Calendar

	Fall 1992	Winter 1993	Spring 1993
First day to file undergraduate application with admissions officer, 1147 Murphy Hall (last day will depend on number of applications received)	November 1, 1991	July 1, 1992	October 1, 1992
Last day to file application for graduate admission or readmission with complete credentials and application fee, with UCLA Graduate Application Processing, P.O. Box 23895, Oakland, CA 94623-0895	January 15, 1992	October 1	December 31
Last day to file graduate petitions for change of major with Graduate Division, 1225 Murphy Hall	January 15	October 1	December 31
Last day for new undergraduates to file On-Campus Housing Lottery Application with On-Campus Housing Assignment Office, 270 De Neve Drive, by 5 p.m.	March 31	October 27	January 26
Last day for current students to file On-Campus Housing Lottery Application with On-Campus Housing Assignment Office by 5 p.m.	April 16	October 27	January 26
Distribution of registration materials by letter groups for continuing students	June 1	October 26	February 8
First day to obtain Student Parking Request forms at Parking Services	June 1	October 5	January 4
Last day for new graduate students to file On-Campus Housing Lottery Application with On-Campus Housing Assignment Office by 5 p.m.	June 1	October 27	January 26
<i>Schedule of Classes</i> goes on sale at Students' Store, Ackerman Union	June 5	October 28	February 10
New and reentrant students eligible to register by mail should receive Registration Form at mailing address (weekly mailings begin)	June 12	October 29	February 12
Academic counseling for new students is available by appointment in college and school offices	July 1	Consult college or school	Consult college or school
*First mailing date for registration fee payment	July 1	October 26	February 8
Last day to submit Student Parking Request for campus parking permit	August 3	November 2	February 1
Eligibility date for new and reentrant registration by mail (Statement of Legal Residence must be processed by the residence deputy by this date in order to receive Registration Form by mail)	August 14	November 13	February 16
Last day to file Undergraduate Application for Readmission form at 1113 Murphy Hall (late applicants will pay a \$50 late payment fee)	August 14	November 27	February 19
REGISTRATION FEE PAYMENT DEADLINE	August 28	December 4	March 5
Registrar mails valid Reg Card to mailing address of students who paid by fee payment deadline; call URSA at (310) 208-0425	Call URSA for date issued	Call URSA for date issued	Call URSA for date issued
LATE registration in person with \$50 late fee	August 31- October 9	December 7-23, 28-30, January 4-22	March 8- April 16
*Financial Aid loan/grant distribution begins	September 15	January 6	March 31
\$50 late fee waived for students using loan/grant checks to pay registration fees	September 15-25	January 6-12	March 31- April 6
English as a Second Language Placement Examination (ESLPE)	September 17, 22	January 7	April 1
QUARTER BEGINS	September 21	January 6	March 31
Chemistry Diagnostic Test	September 21	November 19	March 4
Issuing of UCLA Student I.D. Cards to new and reentering students begins	September 21	January 6	March 31
Mathematics Diagnostic Test	September 21	November 18	March 3
French Placement Examination	September 22	November 10	February 25
German Placement Examination	September 22	December 3	February 25
Music Placement Examination	September 23	—	—
Chinese and Korean Placement Examinations	September 24	—	—
INSTRUCTION BEGINS	September 24	January 11	April 5
Classes will be dropped if fee payment is not completed by 5 p.m.	September 25	January 12	April 6

*Tentative date; refer to *Schedule of Classes* for specific term.

	Fall 1992	Winter 1993	Spring 1993
Spanish and Portuguese Placement Examination	September 29	October 27	February 2
Last day to register for Graduate School Foreign Language Tests (GSFLT) in French, German, Russian, and Spanish	October 2	January 8	April 9
Japanese Placement Examination	October 3	—	—
Subject A Examination and Proficiency Examinations for English 3	October 5	January 18	April 12
Last day:	October 9	January 22	April 16
(1) To change Study List (add, drop courses) without fee by telephone at (310) UC-4-BEAR			
(2) To check waiting lists for courses by telephone (wait lists are dropped at 5 p.m.)			
(3) To enroll in courses for credit without \$50 late Study List fee by telephone			
(4) To file advancement to candidacy petition for master's degree with major department			
(5) To file graduate leaves of absence with Graduate Division, 1225 Murphy Hall			
(6) To file undergraduate request for fee reduction with college or school			
Graduate School Foreign Language Tests (GSFLT) in French, German, Russian, and Spanish	October 10	January 16	April 17
Registrar mails Official Study List datamailer to all registered students; call URSA at (310) 208-0425 to confirm enrollment	October 12	January 25	April 19
Orientation meetings on format for master's theses and doctoral dissertations (see theses and dissertations adviser, 141 Powell Library)	October 15-17	January 21-23	April 15-17
Undergraduates approved for reduced fees are audited (must be enrolled in 10 units or less to be eligible for reduction) as of this date	October 16	January 29	April 23
WITH APPROVAL OF ACADEMIC DEAN:	October 16	January 29	April 23
*(1) Last day for graduate students to ADD courses with \$3 petition fee			
(2) Last day for graduate students to file Late Study List with \$50 fee			
WITH APPROVAL OF ACADEMIC DEAN:	October 23	February 5	April 30
*(1) Last day for undergraduates to ADD OR DROP courses with \$3 petition fee			
(2) Last day for undergraduates to file Late Study List with \$50 fee			
Last day to submit final drafts of dissertations to doctoral committees for degrees to be conferred in current term	November 2	February 15	May 10
*Last day for undergraduates to change grading basis (optional P/NP) with \$3 petition fee and APPROVAL OF ACADEMIC DEAN	November 6	February 19	May 14
Last day to declare bachelor's degree candidacy for current term (with fee if 160 or more units completed) with degree auditor, 1113 Murphy Hall (Arts/Theater, Film, and Television students file with Student Services Office, 125 East Melnitz Building)	November 13	February 26	May 21
Last day to submit final drafts of theses to master's committees for degrees to be conferred in current term	November 16	March 1	May 24
Last day for continuing students to file applications for undergraduate scholarships for 1993-94		March 2	
Last day to file completed copies of theses for master's degrees and dissertations for doctoral degrees to be conferred in current term with theses and dissertations adviser, 141 Powell Library	November 30	March 15	June 7
INSTRUCTION ENDS	December 3	March 19	June 11
Reading Day	December 4	—	—
Last day to withdraw	December 4	March 19	June 11
WITH APPROVAL OF ACADEMIC DEAN:	December 4	March 19	June 11
(1) Last day for graduate students to change grading basis (optional S/U) with \$3 petition fee			
(2) Last day for graduate students to DROP courses with \$3 petition fee			
Final Examinations	December 7-11	March 22-26	June 14-18
QUARTER ENDS	December 11	March 26	June 18
First day to obtain GPA for previous term grades on URSA at (310) 208-0425 from 6 a.m. to 8 p.m. Monday through Saturday (including holidays)	January 13	April 14	July 14
Last day to file applications for graduate merit-based financial support for 1993-94	January 8	Consult department	Consult department
Commencement Weekend (by college/school)			June 19-20
Academic and administrative holidays	July 3 September 7 November 26-27 December 24-25, 31 January 1	January 18 February 15 March 29	May 31

*Changes to Official Study List after this date will be considered only under extraordinary circumstances and with approval of the academic dean.

About UCLA

1

Introducing UCLA

"... in 10 years . . . we shall look with amazement upon the development of this University, for it is certain to be greater, far greater, than the imagination of any of us can foresee."

— Ernest Carroll Moore
UCLA Director, 1919

From Little Acorns . . .

The year was 1880. With a population of 11,000, Los Angeles was a gaslit pueblo trying to convince the state to establish in Southern California a second State Normal School like the one already existing in San Jose, some 300 miles to the north.

In March of the following year, the State Assembly approved the establishment of such a school. A group of enthusiastic citizens, over 200 of whom contributed between \$2 and \$500, purchased a site less than a mile from the business section. Soon the towering Victorian form of the school rose from an orange grove which, today, is the site of the Central Los Angeles Public Library. On August 29, 1882, the Los Angeles Branch of the State Normal School welcomed its first students.

By 1914, the little pueblo of Los Angeles had grown to a city of 350,000 and the school, whose enrollment far exceeded its capacity, moved to new quarters — a Hollywood ranch off a dirt road which would later become Vermont Avenue.

With a view toward expansion, Director Ernest Carroll Moore proposed in 1917 that the school become the first branch of the Berkeley-based University of California. Two years later, the Los Angeles State Normal School was replaced by the Southern Branch of the University of California, no longer merely a teacher's college but an institution that offered two years of instruction in Letters and Science. Third- and fourth-year courses were soon added, the first class of 300 students was graduated in 1925, and by 1927 the Southern Branch had earned its new name: University of California at Los Angeles (the "at" became a comma in 1958).

Groundbreaking, September 21, 1927. Provost Ernest Carroll Moore wields the shovel as Regent Edward A. Dickson (to Dr. Moore's right) and others cheer.

The Move Westward

As the student population of the University continued to increase, the need for a new site became obvious and the search was soon under way for a permanent home for UCLA. On September 21, 1927, Director Moore turned the first shovelful of soil that broke ground for the creation of the campus of his dreams.

The choice of Westwood, set squarely in the path of westward-moving Los Angeles, no doubt was an important factor in determining UCLA's future growth. But in 1929, on the barren chaparral-covered hills of Westwood, the four original buildings — Royce Hall, Powell Library, Haines and Kinsey Halls — formed a lonesome little cluster in the middle of four hundred empty acres. The campus hosted some 5,500 students that fall.

The first priority after the move to Westwood was to establish a graduate curriculum, essential for any major university. The Regents established the master's degree at UCLA in 1933 and, three years later, the doctorate. UCLA was fast becoming a full-fledged university offering advanced study in almost every field.

Los Angeles and the University nurtured each other through the years, and both experienced phenomenal growth and development during the next half century. UCLA's most spectacular period of growth occurred in the 25 years following World War II, when it tripled its prewar enrollment of 9,000 students and undertook what would become a \$260 million building program that included residence halls, parking structures, laboratories, more classrooms, service buildings, athletic and recreational facilities, and a 715-bed teaching hospital which is now one of the largest and most highly respected in the world.

UCLA Today

Today, UCLA is a large and complex institution devoted to undergraduate and graduate scholarship, research, and public service. Known for academic excellence, many of its programs are rated among the best in the nation, some among the best in the world.

Not the sound of symphony, but of chisel and saw: Royce Hall under construction, 1928.

Some 220 buildings on 419 acres house the College of Letters and Science plus 13 professional schools and serve over 35,230 students. Another major period of campus development is currently under way which is providing needed additional space for chemistry, management, microbiology, and medical center programs, as well as increased student housing and parking space on the northwest campus. In addition, several of UCLA's older buildings are now being made earthquake-safe through a broad seismic correction program.

UCLA's top administrative officer is Chancellor Charles E. Young. Marking the twenty-fourth anniversary this fall of his appointment to that position, Chancellor Young is one of America's most senior and most respected leaders in higher education today.

The Setting

UCLA is cradled in rolling green hills just five miles inland from the ocean, in one of the most attractive areas of Southern California. It is bordered on the north by the protected wilderness of the Santa Monica Mountains and at its southern gate by Westwood Village. Originally envisioned as a business district to serve UCLA, this picturesque little college town has mushroomed into an entertainment magnet for the entire Los Angeles area.

The cultural treasures of the Los Angeles County Museum of Art are a few miles to the east as are other museums, the community of Beverly Hills, the Music Center, and the downtown business area. Beyond that the deserts, snowcapped mountains, and ski resorts are little more than an hour's drive.

The Ambience

The stately Tudor Gothic and Italian Romanesque architecture of UCLA's early buildings blends with the contemporary and modern design of the newer structures. Royce Hall, one of the original four buildings, remains the campus symbol. Contrasting campus moods range from the activity of Bruin Walk to the serenity of the Japanese Garden. Attend a rock concert on the lawn, or a classical recital in Schoenberg Hall. Contemplate a Rodin or a Lachaise in the Sculpture Garden, or participate in a political rally in Meyerhoff Park.

UCLA is a place of surprises. A unique inverted fountain, where water flows over river rocks, recalls the Yellowstone creeks that inspired it. Enter the Bunche Hall Annex and discover a glorious atrium where palms and ferns glisten in filtered sunlight. Step inside the courtyard of Macgowan Hall and come face to face with the impressive stone Tower of Masks, created by the noted sculptress Anna Mahler.

UCLA is a place for serious study in a vibrant, dynamic atmosphere. You must visit the campus to appreciate it. **The Visitors Center**, located in 1417 Ueberroth Building (206-8147), has a reception area where visitors are met, welcomed, and assisted. The center arranges group or personal tours of the campus all year round and provides information on campus exhibits and recreation areas. The **Office of Undergraduate Admissions and Relations with Schools** (825-8764) conducts tours for prospective undergraduates.

The Commitment to Research

UCLA is one of the outstanding "research universities" in the country. What does this mean to you as a student?

It means that the same faculty members teach both undergraduate and graduate courses and that these instructors create knowledge as well as transmit it. They spend a major portion of their time engaged in research in libraries and laboratories and out in the field.

At UCLA you are taught by the people making the discoveries, so you learn the latest findings on every front. You may exchange ideas with faculty members who are authorities in their fields, and even as undergraduates you are encouraged to participate in research to experience firsthand the discovery of new knowledge. This inseparable commitment to teaching and research is the hallmark of a research university.

The Question of Size

Although UCLA has a larger enrollment than other University of California campuses, it is small in comparison to some of the Midwestern universities. Its general campus population of some 31,340 students is equal to that at UC Berkeley, but the UCLA campus is enriched by an additional 3,885 men and women studying in its health sciences schools of Dentistry, Medicine, Nursing, and Public Health. UCLA makes the most of its size by offering an extraordinary breadth of high quality academic programs and a range of student opportunities available at few other universities in the country.

A major concern of the faculty and staff is to allow you, the student, to feel that you belong. UCLA provides orientation sessions and special academic assistance programs for new students, a staff of helpful advisers and counselors in every college/school and academic department, a myriad of student services, and unlimited opportunities for involvement and participation.

All UCLA students share the pride of attending one of the most prestigious educational institutions in the country. Beyond that, no one individual deals with the totality of UCLA. Campus life is made comfortable by interacting and identifying with only certain parts of the whole, whether they be your academic department, residence hall, fraternity or sorority, club or organization, or the spirit of Bruin victories on the athletic fields.

Many prospective students ask about the size of classes at UCLA. Standard instructional formats include lectures, discussion sections, seminars, and laboratory sessions. Although large lecture groups in some introductory courses are not unheard of, 96 percent of all lower division lecture classes in 1991-92 had fewer than 200 students, and the University is making every effort to further reduce class size. Students in most lecture classes also enroll in discussion sections of about 25 students, and seminars and laboratory classes usually have fewer than 20 students. There is an overall ratio of one faculty member for approximately 16 students.

Most UCLA faculty members take a genuine interest in their students. They set aside office hours for receiving students, and most appreciate the opportunity for informal conversation. Even professors who seem remote in the classroom may be just the opposite on a one-to-one basis. A brief discussion can benefit both student and instructor.

Professors are often aided, especially in the small discussion sections, by teaching assistants (TAs). These are graduate students who teach on a part-time basis while pursuing their degree. Many students find it helpful to talk to the TAs about academic problems.

Hallmarks of Excellence

Recent surveys indicate that in overall excellence, UCLA is one of America's most prestigious and influential public universities. It is consistently rated among the best universities in the nation and is by far the youngest institution in this select group.

UCLA is accredited by the Western Association of Schools and Colleges and by numerous special agencies. Information regarding the University's accreditation may be obtained in the Planning Office Library, Office of Academic Planning and Budget, 2107 Murphy Hall.

ACADEMICS — UCLA has one college and 13 professional schools. The College of Letters and Science offers programs leading to both undergraduate and graduate degrees, as do the School of the Arts, School of Engineering and Applied Science, School of Nursing, and School of Theater, Film, and Television. The other professional schools offer graduate programs exclusively: the Graduate School of Architecture and Urban Planning, Graduate School of Education, School of Law, Graduate School of Library and Information Science, John E. Anderson Graduate School of Management, School of Social Welfare and, in the health sciences, the Schools of Dentistry, Medicine, and Public Health.

Few universities in the world offer the extraordinary range and diversity of academic programs that students enjoy at UCLA. Undergraduates may earn a Bachelor of Arts or Bachelor of Science degree in one of 109 different disciplines; graduate students may earn one of 85 master's and 104 doctoral and professional degrees.

Academic programs undergo a continuing process of review and evaluation to maintain their excellence, and new programs are added as they are approved by The Regents. In response to the heightened importance of worldwide environmental issues, for example, the revised major in geography/environmental studies includes courses in human, cultural, social, political, and economic systems in relation to the environment. In addition, the School of the Arts is offering a bachelor's degree program in ethnomusicology which combines hands-on musical experience and academic study in exploring the variety of musical expressions throughout the world. Another new degree program this year is the Ph.D. in Oral Biology.

THE FACULTY — Of the many factors that go into the making of a great university, no single factor is as important as its faculty. UCLA's distinguished faculty includes 1987 Nobel prizewinner Donald Cram, several John Simon Guggenheim fellows and Fulbright scholars, and many members of both the National Academy of Sciences and the American Academy of Arts and Sciences. In 1991-92 nine faculty members received Fulbright scholarships to conduct research, lecture, and consult abroad, and six UCLA scientists and scholars were awarded Guggenheim fellowships. Another was elected as a fellow of the prestigious American Association for the Advancement of Science (AAAS). With an additional American Academy of Arts and Sciences award winner and two Sloan Foundation fellows, UCLA placed among the leading universities nationwide in the number of these prestigious awards.

In a recent survey the Conference Board of Associated Research Councils evaluated the quality of the faculty in more than 150 American research universities. UCLA was judged second in the nation among public universities, and among the most highly rated overall. Of the 32 disciplines studied, 17 of UCLA's academic departments were ranked among the top 10 in the country.

RESEARCH — UCLA is among the six leading research universities in the country, receiving a record \$283.1 million in 1990-91 in extramural grants and contracts to support its research activities. The University hosts several hundred postdoctoral scholars each year who share its excellent research facilities. Its laboratories have seen major break-

throughs in scientific and medical research; its study centers have helped foster understanding among the various cultures of the world; ongoing pursuits of new knowledge in a myriad of vital areas continue to improve the quality of life for people around the world.

TEACHING — Although all UCLA faculty members engage in research and the discovery of new knowledge, they are equally dedicated to disseminating their findings in the classroom. Indeed, excellence in teaching is one of the most important criteria for faculty promotion, and distinguished teaching awards are among those most highly prized by UCLA professors.

STUDENT BODY — UCLA's students pride themselves on academic excellence. The Fall Quarter 1991 entering freshman class had an average high school GPA of 3.92, with an average combined score on the Scholastic Aptitude Test (SAT) of 1,149 out of a possible 1,600.

The university has no higher priority than to advance the ethnic diversity of its students, faculty, staff, and administrators. The diversity of UCLA's student population — nearly equally divided between men and women — yields the wide range of opinion and perspective essential to a great university. Although most students are from California, they come from all 50 states and more than 100 foreign countries to study at UCLA. The University now enrolls the most ethnically mixed and culturally diverse undergraduate student population — both in total students and as a percentage of enrollment — of any major university in the U.S. Ethnic minorities comprise 56 percent of the undergraduates and 33 percent of the graduate student population. And international students and scholars presently number over 6,500, making this one of the most popular American universities for students from abroad.

NUMEROUS OTHER FACTORS — With more than six million volumes, UCLA's library is rated among the finest in the country. Its athletic teams have made the University an acknowledged leader in intercollegiate sports. Its Center for the Performing Arts ranks as the largest, most diversified and comprehensive program of its kind in the country.

The University played a significant role in the 1984 Summer Olympics in Los Angeles, and the campus reprised that role in July 1991 for the U.S. Olympic Festival '91. On both occasions, UCLA housed a large Olympic

Village and served as the venue for several events. In fall 1991 a full academic convocation marked the visit to campus of Czechoslovakian President Vaclav Havel.

All these factors plus its research facilities, its community service, and its international links with all parts of the world make UCLA today a very special kind of institution.

The University of California

The University of California traces its origins to 1868, when Governor Henry H. Haight signed the Organic Act providing that California's first "complete University" be created.

Classes began the following year at the College of California in Oakland. The first buildings on the Berkeley campus were completed in 1873, and the University moved into its new home. The following June, the University of California conferred bachelor's degrees on 12 graduates.

Today the University is one of the largest and most renowned centers of higher education in the world. Its nine campuses span the state, from Davis in the north to San Diego in the south. In between are Berkeley, San Francisco, Santa Cruz, Santa Barbara, Riverside, Irvine and, of course, Los Angeles.

All the campuses adhere to the same admission guidelines and high academic standards, yet each has its own distinct character, atmosphere, and — to some degree — academic individuality. Riverside, for example, excels in the plant sciences and entomology; Davis has a large agricultural school and offers the University's only veterinary medicine program; San Diego has excellent oceanography and marine biology programs; San Francisco is devoted exclusively to the health sciences. Among the campuses there are five medical schools and three law

schools, as well as schools of architecture, business administration, education, engineering, and many others.

The UC campuses have a combined enrollment exceeding 166,000 students, over 92 percent of them California residents. About one fourth study at the graduate level. Some 150 laboratories, extension centers, and research and field stations strengthen teaching and research while providing public service to California and the nation. The collections of over 100 UC libraries on the nine campuses are surpassed in size on the American continent only by the Library of Congress collection.

The faculty of the University of California is internationally known for its distinguished academic achievements. On its nine campuses the University has 18 Nobel laureates, and membership in the National Academy of Sciences is the largest of any university in the country.

University Administration

The University of California system is governed by a **Board of Regents** whose regular members are appointed by the Governor of California. In addition to setting broad general policy and making budgetary decisions for the UC system, The Regents appoint the President of the University, the nine chancellors, and the directors, provosts, and deans who administer the affairs of the individual campuses and divisions of the University.

The Regents delegate authority in academic matters to the **Academic Senate**, which determines academic policy for the University as a whole. The Senate, composed of faculty members and certain administrative officers, determines the conditions for admission and granting of degrees, authorizes and supervises courses and curricula, and advises University administrators on budgets and faculty appointments and promotions. Individual divisions of the Universitywide Academic Senate determine academic policy for each campus. Students participate in policy-making at both campuswide and systemwide levels.

Academic Resources and Programs

Research: The Discovery of Knowledge

As one of the largest research universities in the world, UCLA is renowned for its programs of faculty and student research; more than 5,000 funded programs are in progress at a given time. One focus of these efforts is a group of "organized research units" (ORUs) which provide an interdisciplinary approach to the search for knowledge.

ORUs are study centers and research institutes consisting of faculty and students from various departments engaged in continuing research of particular subjects. They do not offer courses of instruction or degrees, although several work in conjunction with interdepartmental instruction programs which lead to bachelor's and/or advanced degrees. ORUs provide invaluable experience for students and faculty in basic and applied research and greatly enhance UCLA's educational program and the overall academic quality of the University.

In the overview which follows, UCLA's 24 organized research units are listed within five major divisions — health sciences, life sciences, physical sciences and engineering, social sciences, and arts and humanities. Within each division, representative groups and programs are included which, although not formally established as ORUs, are nevertheless doing important research in their respective areas.

Health Sciences

The **LABORATORY OF BIOMEDICAL AND ENVIRONMENTAL SCIENCES**, located in Warren Hall (900 Veteran Avenue, 825-9431) and the Center for the Health Sciences, is funded through a contract with the Department of Energy. Research is conducted in biomolecular and cellular science, environmental biology, and nuclear medicine. Laboratory faculty members have joint appointments in academic departments and teach at both undergraduate and graduate levels. Major facilities include a biomedical cyclotron, advanced scanning equipment, a cobalt radiation facility, environmentally controlled growth chambers, a vivarium, and a spectrographic analytical laboratory.

The **BRAIN RESEARCH INSTITUTE**, center for neuroscience research at UCLA, has the largest investigative program of its kind in the country, with more than 170 scientists involved in every aspect of research in the nervous system from molecular organization of the nerve cell to human behavior. The institute provides an environment for specific multidisciplinary research and training in the structure and function of the central nervous system. The Office of the Director is located in 73-369 BRI (825-5061).

The **CRUMP INSTITUTE FOR BIOLOGICAL IMAGING** brings together physical, biomathematical, chemical, biological, and clinical scientists and students in the merging of the principles of imaging with those of the basic biological sciences. The imaging domain ranges from structure/function studies of molecules and regulation of cellular processes to the biological functions of organ systems in the living human. A major focus is the development and use of imaging technologies to collect, analyze, and communicate biological data. Imaging approaches are used to build a picture (image) of biological mechanisms of distributed functions of biological processes, organ systems, or a whole organism. Imaging technologies encompass such areas as X-ray crystallography and multidimensional NMR spectroscopy of molecules; immunocytochemistry, electron, and fluorescent microscopy; biological assays with in vitro and in

vivo autoradiography; and positron emission tomography (PET), X-ray computed tomography (CT), and magnetic resonance imaging (MRI) studies of the structure and biological function of organ systems of the living human. The institute has research and educational programs for visiting scientists and postdoctoral scholars, as well as a Ph.D. graduate program. There are also faculty and student exchange programs with a number of domestic and foreign universities. Dr. Michael E. Phelps is the director (825-6539).

The **DENTAL RESEARCH INSTITUTE**, with principal laboratories on the seventh floor of the School of Dentistry, fosters research related to oral health. Areas of investigation include biomaterials, clinical studies, craniofacial biology, immunology/immunogenetics, oral neurology/pain, periodontology, and ultrastructure/cell biology. The Office of the Director is located in 73-029 Center for the Health Sciences (206-8045).

The **MENTAL RETARDATION RESEARCH CENTER**, located on the C level and the fourth through eighth floors of the Neuropsychiatric Institute and Hospital, provides laboratories and clinical facilities for research and training in mental retardation and related aspects of human development. Its interdisciplinary activities range from anthropological studies to molecular aspects of inherited metabolic diseases. Administrative offices are located in 58-258 NPI&H (825-0313).

The **JULES STEIN EYE INSTITUTE** is one of the best equipped centers for research and treatment of eye diseases in the world. This comprehensive facility, located in the Center for the Health Sciences (825-5053), is devoted to the study of vision, the care of patients with eye disease, and education in the broad field of ophthalmology. Outpatient, inpatient, and surgical facilities are provided. The **Doris Stein Eye Research Center** houses new research and training programs concentrating on major eye diseases worldwide.

In the health sciences, research carried out in ORUs is complemented by research on neurological and neuromuscular diseases in the **Lewis Neuromuscular Research Center**, the **Reed Neurological Research Center**, and the **Neuropsychiatric Institute and Hospital**. The **Jonsson Comprehensive Cancer Center**, one of 20 comprehensive centers in the nation, is renowned for the breadth and excellence of its cancer research. The **UCLA AIDS Institute** is deeply involved in all aspects of the fight against AIDS, with basic research in epidemiology, immunology, and the clinical management of AIDS patients being done in the **Center for Clinical AIDS Research and Education**. And the School of Public Health recently established the **Southern California Injury Prevention Research Center** as the first such center in the U.S. with emphasis on high-risk minority and immigrant populations.

Life Sciences

The **MOLECULAR BIOLOGY INSTITUTE** provides research and training resources in molecular biology for faculty from the College of Letters and Science and the School of Medicine, and includes the Parvin Cancer Research Laboratories. Administrative offices are located in 168 MBI (825-1018).

The **CENTER FOR THE STUDY OF WOMEN**, located in 236A Kinsey Hall (825-0590), coordinates and disseminates interdisciplinary research on women and gender by sponsoring conferences, publications, programs for affiliated and visiting scholars and graduate students, directories of scholars doing research on women and gender at UCLA and throughout the UC system, an ongoing feminist research seminar, and a public lecture series on Women, Culture, and Society. In collaboration

with other UC campuses, women's studies programs, and community groups, the center seeks to address public policies affecting women's lives.

The **Fernald Child Study Center** is a life sciences interdisciplinary research unit created to study and treat a variety of childhood behavioral problems and learning disorders. And the **Center for the Study of Evolution and the Origin of Life** melds the diverse research of more than 100 UCLA faculty members in the study of the emergence and evolution of life on Earth.

Physical Sciences and Engineering

The **INSTITUTE OF GEOPHYSICS AND PLANETARY PHYSICS (IGPP)** is a multicampus research unit (MRU) of the University of California; the branch at UCLA is engaged in research in geophysics, geochemistry, space physics, biochemistry, and biology. Research topics include the nature of the Earth, moon, and other planetary bodies, the origin of terrestrial life, the dynamical properties of the sun and solar wind, and the evolution of stellar interiors. Facilities include analytical laboratories in meteoritics, glaciology, petrology, geochronology, archaeology, and the origins of life, laboratories for experiments in fluid dynamics and high-pressure physics, developmental laboratories for instrumentation in space physics and seismology, and computational laboratories for large-scale numerical modeling relevant to the above topics. The UCLA branch office is located in 3839 Slichter Hall (825-1664).

The **INSTITUTE OF PLASMA AND FUSION RESEARCH**, located in 44-139 Engineering IV (825-5090), is dedicated to research into plasma physics, fusion energy, and the application of plasmas in other disciplines. Students, professional research staff, and faculty study basic laboratory plasmas, plasma-fusion confinement experiments, fusion engineering and nuclear technology, computer simulations and the theory of plasmas, space plasma physics and experimental simulation of space plasma phenomena, advanced plasma diagnostic development, laser-plasma interactions, and the use of plasma in applications ranging from particle accelerators to the processing of materials and surfaces used in microelectronics or coatings.

The **WHITE MOUNTAIN RESEARCH STATION** is a multicampus research unit (MRU) dedicated to high-altitude research. Four separate laboratory sites near Bishop, California, ranging up to 14,250 feet above sea level, include the highest permanent teaching and research facilities in North America. Research includes studies in archaeology and the biological, medical, and physical sciences. The administrative office is located in 6713 Geology (825-2093).

Among other interdisciplinary activities in the physical sciences and engineering at UCLA, three separate research programs in the School of Engineering and Applied Science have formed a new consortium, the **Center for Clean Technology**, which fosters research on the interaction between technology and the environment, focusing on pollution prevention and control. On other frontiers, an **Artificial Intelligence Laboratory** designed exclusively for research in this burgeoning field has opened under the wing of the Computer Science Department, and a **Manufacturing and Automation Research Center**, funded by the National Science Foundation, is operated jointly by UCLA's engineering school and the University of Southern California (USC).

Social Sciences

The **OFFICE OF INTERNATIONAL STUDIES AND OVERSEAS PROGRAMS (ISOP)** supports and coordinates international and foreign area studies at UCLA. Among the area studies centers and programs that operate under its aegis are four major interdisciplinary research centers that rank among the best in the nation. Some of the world's leading specialists on area studies have joined these centers.

The **Coleman African Studies Center** (10244 Bunche Hall, 825-3779) is one of the major interdisciplinary centers for African studies in the U.S. It encourages and coordinates research and teaching on Africa in the humanities, social sciences, and natural sciences, as well as in the professional schools of Architecture and Urban Planning, Arts, Education, Law, Library and Information Sciences, Medicine, Public Health, and Theater, Film, and Television. The center also sponsors an active program of public lectures, seminars, publications, and academic exchanges with African institutions and an outreach service to the Southern California community.

The **Latin American Center** (10343 Bunche Hall, 825-4571) encourages and coordinates interdisciplinary research, academic programs, and publications. By linking campus activities with developments in the field and in other institutional settings, the center benefits UCLA, the broader community of Latin Americanists, and the general public.

The **von Grunebaum Center for Near Eastern Studies** (10286 Bunche Hall, 825-1181) coordinates research projects and academic programs related to the Near East and administers the interdisciplinary programs leading to the M.A. and Ph.D. degrees in Islamic Studies. The combined resources of the center include the largest faculty, one of the most comprehensive library holdings, and the richest variety of Near and Middle Eastern studies courses of any institution in the Western Hemisphere. The center also conducts significant publication and outreach programs.

The **Center for Russian and East European Studies** (11369 Bunche Hall, 825-4060) develops and coordinates teaching and research on Russia and the countries of Eastern Europe through conferences, lectures, seminars, and academic exchange programs with Russian and Eastern European universities.

ISOP also supports other interdisciplinary activities such as the study of arms control, nuclear proliferation, and international security in the **Center for International Relations**. The **Center for Pacific Rim Studies** promotes research, course offerings, seminars, and faculty and student exchange programs on the people and nations bordering the Pacific Ocean; the **Center for Chinese Studies** has developed a major graduate program in Chinese studies, as well as significant research on historical and social science topics; an **NDEA Joint Center in East Asian Studies** with the University of Southern California sponsors joint seminars and conferences focused on the East Asian region; and the **Center for Japanese Studies** fosters research on Japan and scholarly exchange with Japanese institutions. Other ISOP programs focus on development studies, political economy, and South and Southeast Asia. In addition, ISOP houses offices of the UC Education Abroad Program, the Southern California Fulbright Visiting Scholars Program, and the Southern California Consortium on International Studies (SOCCIS).

The **INSTITUTE OF AMERICAN CULTURES** promotes the activities of four major ethnic centers whose goals are to study and illuminate the histories of our country's minorities, and to apply the University's capabilities to the analysis and solution of specific minority problems. These centers promote faculty research, encourage the development of new courses and degree programs, assist departments in recruiting scholars, build library and other resources, and publish literature to disseminate the results of their work.

The **Center for Afro-American Studies** (160 Haines Hall, 825-7403) conducts and sponsors research on the African American experience, coordinates the Afro-American studies curriculum, publishes research results, and sponsors community service programming.

The **American Indian Studies Center** (3220 Campbell Hall, 825-7315) serves as an educational and research catalyst and includes a library, master's and postdoctoral fellowship programs, and a publishing unit that produces a number of books and a quarterly journal.

The **Asian American Studies Center** (3230 Campbell Hall, 825-2974) seeks to increase the knowledge and understanding of the experiences of Asian Pacific peoples in America and promotes the development of material resources related to Asian American studies.

The **Chicano Studies Research Center** (180 Haines Hall, 825-2363) is engaged in the development and articulation of a Chicano/Latino intellectual perspective that recognizes and fosters the creative, professional, and social potential of the Chicano/Latino population. In order to interpret and articulate the presence of this Latino intellectual tradition in the U.S., the center supports interdisciplinary research efforts by Chicano/Latino scholars which provide direction and data for the formulation of public policy. The center also maintains a publications unit and research library that are considered leading contributors to Chicano studies nationally.

The **INSTITUTE OF ARCHAEOLOGY**, located in A210 Fowler Building (206-8934), develops and coordinates the archaeological research and activities of more than 10 academic departments with field interests in the Americas, Asia, Africa, and Europe. Its major goal is to contribute to a reconstruction of the human past based on archaeological evidence. Activities include management of the Rock Art Archive, public lecture and publications programs, and field investigations. The institute's Archaeological Survey coordinates research on Southern California archaeology, oversees several archaeological laboratories, and manages the information center which houses the archaeological site files for Los Angeles, Orange, and Ventura Counties.

The **INSTITUTE OF INDUSTRIAL RELATIONS**, located in 83 Haines Hall (825-1964), has an interdisciplinary research and publishing program directed toward the study of all aspects of the employment relationship, including labor markets, labor law, labor/management relations, equal employment opportunity, occupational safety and health, and related issues. It also offers social policy and employment relations programs to the general public, unions, and management.

The **INSTITUTE FOR SOCIAL SCIENCE RESEARCH** promotes interdisciplinary research on a broad spectrum of contemporary sociological, psychological, political, and economic problems and community issues. Research components include the Center for American Politics and Public Policy, Center for the Study of Urban Poverty, Interdisciplinary Program in Social Statistics, Survey Research Center, Social Science Data Archive, Organizational Research Program, and Center for Social Theory and Comparative History. Training in survey research methodology is available to students through participation in the annual Southern California Social Survey. The institute publishes the *ISSR Quarterly*, a newsletter for the UCLA social sciences community, and *ISSR Working Papers in the Social Sciences*; it is located in 303 Graduate School of Library and Information Science Building (825-0711).

Other interdisciplinary activities in the social sciences include the nationally respected **Business Forecasting Project** in UCLA's John E. Anderson Graduate School of Management and the **Center for the Study of**

Evaluation in the Graduate School of Education which is at the forefront of efforts to improve the quality of schooling in America. In addition, the **Center on the Teaching and Learning of History in Elementary and Secondary Schools**, established by the National Endowment for the Humanities and based at the UCLA education school, is bringing K-12 teachers and social studies professors from throughout the country together in an effort to improve history teaching. The **Center for the Study of Urban Poverty** is initiating new research on issues related to urban poverty and is sponsoring seminars in the field. And the **Center for the Study of the Environment and Society** researches and addresses such issues as air pollution, water quality, and the public response to environmental concerns.

Arts and Humanities

The **CENTER FOR THE STUDY OF COMPARATIVE FOLKLORE AND MYTHOLOGY**, located in 1037 AGSM (825-4242), supports and coordinates the study of comparative folklore and mythology. Resources include the Wayland D. Hand Library, the Visual Media and Folk Medicine Archives, the Archive of California and Western Folklore, the American Popular Beliefs and Superstitions Archive and Encyclopedia Project, the Archive of Folk Song and Music, and other collections of field recordings, records, and films.

The **CENTER FOR MEDIEVAL AND RENAISSANCE STUDIES** supports the research activities of some 20 academic departments dealing with the development of civilization between A.D. 300 and 1650. Major programs include funding research assistants, appointing postdoctoral associates and visiting professors, organizing conferences and colloquia, and supporting departments in inviting lecturers. The center sponsors the publication of research both in book-length studies and in two journals, *Viator*, with emphasis on intercultural and interdisciplinary studies, and *Comitatus*, with articles by graduate students and recent Ph.D. graduates. In addition, the center is responsible for the UCLA 1992 Columbus Quincentenary Programs which coordinate activities of diverse campus departments and organizations in order to promote study of Christopher Columbus's life and the repercussions of his voyages of exploration. The center is located in 212 Royce Hall (825-1880, 825-1970).

The **CENTER FOR SEVENTEENTH- AND EIGHTEENTH-CENTURY STUDIES**, located in 1548 Westwood Center (1100 Glendon Avenue, 206-8552), supports and coordinates research activities and academic programs in the early modern period. The center also functions as the administrative manager of the Clark Memorial Library. Its research activities draw extensively on the Clark's collection of seventeenth- and eighteenth-century materials, as well as those in other collections at UCLA in order to develop programs, conferences, graduate student master classes, and workshops which bring together students and faculty from a wide range of departments within the University. An extensive fellowship program (long-term resident, short-term library, predoctoral, and dissertation fellowships) is offered annually to students and scholars both internationally and from within UCLA. The long-term goals of the two institutions are to offer scholars a unique combination of academic programs, a high-quality publications program, and a first-rate specialist research library, and to serve as a cultural resource for the UCLA community.

In other research activities, the **Center for Bilingual Research and Second Language Education** is working to produce a society that is proficient in at least two languages. In the **Linguistics Phonetics Lab**, one of the best-known laboratories of its kind in the nation, researchers are finding new ways to analyze speech functions and make voiceprints for use in law enforcement. And the University has established the **Hammer Center for Leonardo Studies and Research** where scholars have access to major resources for the study of the works of Leonardo da Vinci.

Resources for Research and Study

University Library System

Library facilities are crucial to both study and research. The University Library on the UCLA campus is one of the country's largest and most renowned academic libraries and consists of the University Research Library, the College Library, and 13 specialized subject libraries. Collectively they contain more than six million volumes and extensive holdings of government publications, pamphlets, manuscripts, maps, microforms, music scores, recordings, photographs, and slides. They regularly receive over 96,000 serial publications.

ORION, the library's on-line information system, provides location and holdings information for most library materials and current information for materials on order or in processing. On-line circulation status information for most libraries is also available. ORION public access terminals are located in many campus libraries, and demonstrations and workshops in using the system are available at the beginning of each term.

Students have access to the stacks in most libraries. A handbook describing the organization, services, and hours of the University libraries is available in all of the campus libraries.

The **Reprographic Service**, housed in 2081 Engineering I, can duplicate books, periodicals, manuscripts, and maps.

University Research Library

The University Research Library on north campus is a modern six-story building designed primarily as a graduate research library serving the social sciences, humanities, and several professional schools. The building houses over three million volumes arranged in open stacks, as well as the Reference Room, Circulation Department, Graduate Reserve Service, Periodicals Room, and Audiovisual Service. The Microform Reading Service, with some 1,110,000 microcopies of newspapers, books, and periodicals, has a variety of reading and copying equipment. During academic sessions library hours are weekdays 8 a.m. to 11 p.m. (6 p.m. Friday), Saturday 9 a.m. to 5 p.m., Sunday 1 to 10 p.m.

The **Department of Special Collections** in the Research Library contains rare books and pamphlets, the University Archives, early maps, and files of early California newspapers. *Manuscript collections include the literary papers of Henry Miller and Anais Nin, as well as the private papers of Jack Benny, Charles Laughton, Carey McWilliams, King Vidor, and Nobel Peace Prize winner Dr. Ralph J. Bunche, a UCLA alumnus. Other significant holdings include the Sadleir Collection of nineteenth-century fiction, generally regarded as the finest of its kind, and the Ahmanson-Murphy Collection of Early Italian Printing (1471-1550), with a concentration on Aldine imprints. The department also houses UCLA's Oral History Program, a national leader in the field with over 400 interviews with prominent individuals since the program was founded in 1959.*

The **Public Affairs Service**, also housed in the Research Library, collects official publications of the U.S. government, the State of California, California counties and cities, selected U.S. state and local governments, foreign nations and selected foreign states and provinces, plus those of the United Nations and some of its specialized agencies and a number of other international organizations. Also housed are current English-language, nongovernmental pamphlets on public affairs representing a wide spectrum of political and social opinion, with strong emphasis on social welfare, economic, social, and political conditions, and industrial relations.

College Library

The College Library is designed to meet the instructional and informational needs of most undergraduates. It is permanently located in the Powell Library Building but will be moving into a temporary structure — Powell Library Tent (commonly known as "Towell") — for a two-year

period beginning in summer 1992 while Powell undergoes seismic renovation. Towell is located at the foot of Janss Steps between the Dance Building and the Men's Gym and will house 200,000 books and periodicals; course reserve materials, including audiocassettes, lecture notes, past examinations, and APS (Academic Publishing Service) readings available for loan; and the Humanities Computing Laboratory with 36 IBM PS/2s, Macintoshes, and printers. During academic sessions library hours are weekdays 8 a.m. to 10 p.m. (5 p.m. Friday), Saturday 10 a.m. to 6 p.m., Sunday noon to 9 p.m.

Specialized Subject Libraries

The resources of the specialized campus libraries are devoted mainly to subjects of concern to the departments or professional schools which they serve, but their materials are available to all UCLA students and faculty. A recorded message (825-8301) provides current hours of service for each library.

The **Archive of Popular American Music** contains sheet music, anthologies, arrangements for band and orchestra, sound recordings, and manuscripts. The new **Arts, Architecture, and Urban Planning Library (AAUPL)** is a consolidation of the former Art, Theater Arts, and Architecture and Urban Planning Libraries. By summer 1992, the core book and serial collections serving art, art history, design, film, television, theater, architecture, city and regional planning, and transportation will be located in Dickson Art Center, along with the **Belt Library of Vinciana**. AAUPL Special Collections, located in the University Research Library, house noncirculating materials, including the Princeton Index of Christian Art, the Artists' File, and other special collections such as unpublished radio, film, and television scripts and archival records of major Southern California motion picture studios.

The **Louise Darling Biomedical Library**, in the Center for the Health Sciences, is one of the finest libraries of its kind in the country. Its 500,000 volumes and nearly 6,000 serial subscriptions serve all the UCLA health and life sciences departments/schools and the UCLA Medical Center.

The **Chemistry Library** includes material on chemistry, biochemistry, and molecular biology, while materials in Chinese, Japanese, and Korean are available in the **Rudolph East Asian Library**. Materials for engineering, astronomy, computer science, meteorology, and mathematics are kept in the **Engineering and Mathematical Sciences Library**, and major subjects covered by the **Geology-Geophysics Library** include geoscience, invertebrate paleontology, planetary and space science, and hydrology.

The **Hugh and Hazel Darling Law Library** has a substantial collection of over 400,000 volumes selected to further the course of instruction in the School of Law and the legal research needs of the UCLA community, and the **Management Library** serves the John E. Anderson Graduate School of Management and the various subjects related to business and management.

The **Bruman Map Library** in Bunche Hall houses maps, city plans, nautical charts, and technical books and serials on all aspects of cartography and is one of the largest of its kind in the U.S. The **Rubsamen Music Library** houses historical musicology and ethnomusicology materials, musical scores, recordings, and the personal collections of such composers as Henry Mancini, Alex North, and Ernst Toch, while the **Physics Library** covers all aspects of that science, including acoustics and spectroscopy.

Supplementing the University Library is the **Clark Memorial Library**, with its collection of some 90,000 volumes and 18,800 manuscripts related to English culture of the seventeenth and eighteenth centuries. Its John Dryden collection is among the most complete in the world. The library, located approximately 10 miles from the UCLA campus at 2520 Cimarron Street, contains noncirculating materials. Leaflets describing the Clark Library and information about University transportation to it are available at the Reference Desk in the Research Library.

Special Archive Collections

The **UCLA FILM AND TELEVISION ARCHIVE** is a living resource equally respected by industry and scholars. Students and faculty from a wide range of disciplines — from the arts to the social sciences to the humanities — use the archive's extensive collections to expand their knowledge and understanding of moving image media, cultural history, and the social and political life of the twentieth century.

The Motion Picture Collection, with more than 37,000 films, is the country's largest collection west of the Library of Congress. Among its outstanding collections are 27 million feet of Hearst Metrotone News film dating back to 1919. Other noteworthy holdings include studio print libraries from Twentieth Century-Fox, Paramount Pictures, Warner Brothers, Columbia Studios, New World Pictures, Universal Studios, and Orion. Special collections document the careers of William Wyler, Hal Ashby, Tony Curtis, Rosalind Russell, Stanley Kramer, Cecil B. DeMille, Harold Lloyd, and other persons of prominence in the American film industry.

The Television Collection, operated jointly by the Academy of Television Arts and Sciences and UCLA, is the nation's largest university-based collection of television broadcast materials. Its 25,000 titles include kinescopes, telefilms, and videotapes spanning television history from 1947 to the present, with emphasis on drama, comedy, and variety programming. A special collection of nearly 100,000 news and public affairs programs is also maintained.

The archive's exhibition program presents evening screenings and discussions in Melnitz Theater which focus on archival materials, new work by independent filmmakers, and a wide array of international films. For program information, call 206-FILM.

The Archive Research and Study Center (ARSC), located in 180 Powell Library Building (206-5388), provides educational access to the Film and Television Archive's collection. Services include individual and group viewing, consultation services for faculty, and the development and support of advanced research projects and specialized use of archival collections. ARSC hours are weekdays 8:30 a.m. to 5 p.m.

Art Galleries and Museums

A tour of all the UCLA museums and art galleries will take you from one corner of campus to the other. In the course of three decades UCLA's **WIGHT ART GALLERY COMPLEX** has evolved into a multifaceted museum, responsive to the needs of the University and the general public. The complex includes the Wight exhibition galleries, with 14,000 square feet of exhibition space in which to mount approximately eight exhibitions per year, the Grunwald Center for the Graphic Arts, and the Murphy Sculpture Garden.

Located in the Dickson Art Center on north campus, the **Wight Art Gallery** is open Tuesday 11 a.m. to 7 p.m., Wednesday through Friday 11 a.m. to 5 p.m., Saturday and Sunday 1 to 5 p.m. (closed Monday, major holidays, and July and August). Admission is free. Tours are offered Saturday and Sunday by the UCLA Art Council docents; special group tours may be arranged by calling 825-3264. The administrative office is located in 1100 Dickson Art Center. For a schedule of exhibitions, call 825-9345.

On the second floor of the Wight Art Gallery is the **Grunwald Center for the Graphic Arts**, which houses a distinguished collection of over 35,000 prints, drawings, and photographs. Maintained as a study and research facility for the benefit of students and the community, the center's permanent holdings include significant European and American examples from the thirteenth century to the present. It is particularly noted for its collection of German expressionist prints formed by Fred Grunwald and the comprehensive holdings of Matisse and Picasso, as well as the Richard Vogler Cruikshank collec-

tion and the Frank Lloyd Wright collection of Japanese prints. The center, located in 2122 Dickson Art Center (825-3783), is open by appointment Monday through Friday from 9 a.m. to 5 p.m.

The **Murphy Sculpture Garden**, located between Bunche Hall and the Wight Art Gallery, contains a collection of over 70 major works by Rodin, Matisse, Calder, Lachaise, Lipchitz, Moore, Miro, Hepworth, and many other late nineteenth- and early twentieth-century masters. All works in the growing collection, situated on a picturesque five-acre expanse, are private gifts to the University.

The **FOWLER MUSEUM OF CULTURAL HISTORY** is internationally known for the quality of its collections and exhibits. Its collections encompass the arts and material culture of much of the world, with particular emphasis on West and Central Africa, Oceania, and Latin America. The museum offers assistance with instruction and research and sponsors major exhibitions, lecture programs, and symposia. Administrative offices are located in 1586 Fowler Building (825-4361).

Other Resources

The **OFFICE OF ACADEMIC COMPUTING (OAC)**, with administrative offices in 4302 Math Sciences, provides centralized computing facilities as well as network and microcomputing support services for the UCLA academic community. OAC offers a broad range of services, including an IBM ES/9000 Model 900 supercomputer with six vector facilities; public computing facilities; instruction in the use of computer hardware and software through free noncredit classes; professional consulting services; user documentation and *Perspective*, a quarterly publication; and assistance to individuals and departments in the selection of microcomputer and workstation hardware and software and computing assistance to faculty, staff, and students with disabilities through the Microcomputer Support Office (MSO).

OAC's IBM ES/9000 runs the MVS/ESA and PAIX operating systems and is available to all colleges, schools, and departments within UCLA, as well as to all registered students. OAC maintains a large library of applications software, including statistical, text processing, language, and graphics packages. The ES/9000, together with its vector facilities, is particularly appropriate for numerically intensive computing and data management tasks. In the numerically intensive computing area, OAC provides a code clinic with professional consultants to analyze and improve the efficiency of

specialized code in numerically intensive computing applications. In the visualization area, OAC consultants work with users in producing the high-quality graphic output necessary for research in many scientific disciplines. OAC is connected to the campus backbone network, thus enabling access to its services wherever there is a connection to the network. These services include access to ORION, the UCLA on-line library information system; use of BEN, an electronic communication system; and access to the Internet and BITNET. Information on how to apply for an account to use the IBM ES/9000 is available in the OAC User Relations Office (4302 Math Sciences, 825-7548) weekdays from 8 a.m. to 5 p.m.

The **Microcomputer Support Office**, located in 2035 AGSM (825-7408), provides services enabling departmental computer support coordinators to provide assistance to faculty and students on the use of microcomputers and advanced workstations, as well as special services in computing for faculty, students, and staff with disabilities. MSO services are intended to support the integration of microcomputers and advanced workstations into administrative, instructional, and research programs as well as individual microcomputer acquisition and use. MSO supports local area networks and their connection to the campus backbone network and coordinates site licenses, user groups, and an electronic newsletter. Most services are available through the Microcomputer Information Center where the UCLA community can try out hardware and software in a nonbiased environment.

The **DIVISION OF LABORATORY ANIMAL MEDICINE**, located in 1V-211 CHS (825-7281), is responsible for the procurement, husbandry, and general welfare of animals required for teaching and investigative services. It also administers the veterinary medical and husbandry programs throughout the campus.

The University of California **NATURAL RESERVE SYSTEM** offers 26 reserves statewide to be used for field studies in unspoiled natural sites and for protected scientific experiments. Several reserves are close enough to campus for daily access. For more information, contact Arthur C. Gibson, 320 Botany (825-8062).

The **BIOLOGICAL COLLECTIONS** of the Biology Department include marine fishes from the Eastern Pacific and Gulf of California, and birds and mammals primarily from the Western U.S., Mexico, and Central America. The department also maintains a more limited collection of amphibians, reptiles, and fossil vertebrates, as well as collections of algae, fungi, and bacteria. For more information, contact James Northern, A339 Life Sciences (825-1282).

Although the UCLA campus as a whole has an attractive, park-like atmosphere, there are two distinctive garden areas worthy of special note. The eight-acre **MATHIAS BOTANICAL GARDEN**, located in the southeast corner of campus, contains some 4,000 species of native and exotic plants. It is used for botanical and ornithological teaching and research. This peaceful wooded area, a center for testing the usefulness of woody subtropical plants, is a favorite spot for quiet strolls. The botanical garden also has a research Herbarium containing 170,000 dried plant specimens. The administrative office is located in 124 Botany (825-3620).

The **CARTER JAPANESE GARDEN** in nearby Bel Air, designed and constructed by Japanese artisans and architects using native plants and artifacts, is an authentic Kyoto-style garden. The terraced two-acre garden contains such traditional and symbolic features as a teahouse, shrine, antique stone water basins, lanterns, waterfalls, and a pond with Japanese carp (koi) swimming among water lilies. The garden, a private gift to UCLA, is used by faculty and students for study and research, by departments for professional events, and by others seeking a serene setting for meditation and solitude. It is open to individual visitors and groups by reservation only. Hours are Tuesday 10 a.m. to 1 p.m. and Wednesday noon to 3 p.m. Friday is reserved for group visits. Call the Visitors Center at 206-8147.

Supplementary Educational Programs

In addition to the regular academic programs which are described in Chapters 5 through 18 of this catalog, the following optional programs are available to UCLA's undergraduate and graduate students.

Summer Sessions

UCLA offers more than 500 courses from approximately 60 UCLA departments in six-, eight-, and 10-week sessions. Many students take advantage of Summer Sessions to enroll in courses they were unable to take during the year, repeat courses in which they may have done poorly, lighten their academic load for the following term, or complete graduation requirements more quickly.

Admission to Summer Sessions does not constitute admission to the University in either undergraduate or graduate standing. Students who wish to attend UCLA in regular session must follow admission procedures described in Chapter 2 (undergraduate) or Chapter 3 (graduate).

If you are a regularly enrolled undergraduate student, you may attend UCLA Summer Sessions for full unit and grade credit. Summer Sessions work is recorded on your UCLA transcript, and grades earned are computed in your grade-point average. Check with your college or school counselor about applying these courses toward your minimum unit requirements and for any limitations your college or school may impose on Summer Sessions study.

If you are a regularly enrolled graduate student, you may, with departmental approval, take regular session courses offered in Summer Sessions for credit toward a master's or doctoral degree; consult your graduate adviser in advance concerning this possibility. Summer Sessions courses may also satisfy the academic residence requirement for master's or doctoral degrees (see Chapter 3 for details).

Unlike enrollment in regular terms, you may attend another college institution for credit while you are enrolled in Summer Sessions. Applications and more information are available in 1147 Murphy Hall (825-8355).

UCLA Extension

Serving approximately 100,000 adult students each year, UCLA Extension is one of the largest university continuing education programs in the world. It is designed to bring the benefits of the University — its scholars, research, and resources — to the community and the state as a whole.

Many of UCLA Extension's 4,400 classes are innovative and experimental in content, format, and teaching methods. Credit and noncredit courses are offered in nearly every academic discipline, in many interdisciplinary areas, and in emerging fields. In addition, Extension offers special programs each term on topical issues as well as those of ongoing public concern. Many noncredit Extension courses offer the opportunity to earn Continuing Education Units, widely used for relicensure and other professional/career-related purposes.

Although registering for Extension courses does not constitute admission to regular session, degree credit earned through Extension may apply toward the UCLA bachelor's or master's degree; consult your college or school counselor or graduate adviser before enrolling. For more information, see the sections on "Concurrent Enrollment and Transfer of Credit" and "Courses of Instruction" in Chapter 4. Graduate students should also see "Transfer of Credit" in Chapter 3.

The Extension Advisory Service offers assistance in planning long- or short-term study through Extension. The office is located in 114 UCLA Extension (UNEX), 10995 Le Conte Avenue (206-6201). To obtain the current *UCLA Extension Catalog*, call 825-8895. The Registration Office is open weekdays from 8 a.m. to 6 p.m. and until 5 p.m. on Friday (825-9971).

EAP students in Japan.

Education Abroad Program (EAP)

Each year more than 1,400 undergraduate and graduate students from UC campuses study at distinguished universities throughout the world. UCLA students remain registered here while overseas and receive UC units and grade points for work completed abroad. Currently, EAP offers study opportunities at nearly 100 different universities in 32 countries: Australia, Austria, Brazil, Canada, China, Costa Rica, Denmark, Ecuador, Egypt, England, France, Germany, Ghana, Hong Kong, Hungary, India, Indonesia, Ireland, Israel, Italy, Japan, Kenya, Korea, Mexico, New Zealand, Norway, Portugal, Russia, Scotland, Spain, Sweden, Thailand, and Wales. Participants generally spend a full academic year abroad, enjoying a unique opportunity to enhance language skills and become involved in the culture of the host country. One-term programs are available in China, Hungary, Korea, Mexico, and Russia. Summer programs are offered in Denmark, Indonesia, Mexico, and Thailand. In Costa Rica there is a year program, a one-term tropical biology field study, and programs for medical students. For all programs a special orientation program and, when necessary, intensive language training are included. During the year UC faculty members at the host university assist with scholastic or personal problems.

EAP is open to all undergraduate students who have (1) completed a minimum of 84 quarter units (junior standing) prior to departure, (2) at least a B average (3.0 GPA) overall at the time of application, and (3) the support of the UCLA EAP Selection Committee. Some programs have a language requirement as well.

Graduate students who have completed at least one year of graduate work and have the approval of their graduate adviser and the dean of the Graduate Division may participate at most study centers.

Costs for participation in EAP vary from \$2,601 to \$16,514, but University financial aid is available to those who qualify. Applications must be filed several months in advance. For more information, contact the EAP Office in 28 Haines Hall (825-4889, 825-4995).

Education at Home Program

Students interested in early American history and culture have the opportunity to spend Winter Quarter 1993 "on location" in three Eastern cities. The Education at Home Program, conducted through the UC Riverside campus, is open to graduate students (with prior approval of their adviser) and undergraduates from any campus in the UC system.

Those selected for participation spend nine weeks in Williamsburg, one in Philadelphia, and a concluding week in Washington, DC. Formal instruction consists of three American history courses (four units each) comprising classroom work and field trips to places of historical interest. An additional four units of independent study may be arranged. For further information, brochures, or applications, write to the Education at Home Program, Department of History, University of California, Riverside, CA 92521, or call Susan Braddock at (714) 787-3820.

Interdisciplinary Colloquia

Organized colloquia involving several disciplines are offered from time to time in conformity with faculty and student interests. They are open to all faculty members, interested undergraduates, and graduate students assigned to the colloquia by their advisers. Credit is not awarded directly but may be given through appropriate departmental courses. For information about the committees in charge of the colloquia, call the assistant to the provost of the College of Letters and Science at 825-4621.

The **Marschak Interdisciplinary Colloquium on Mathematics in the Behavioral Sciences** provides a forum for interaction among faculty and students interested in the applications of mathematics and statistics to the behavioral sciences. Disciplines include anthropology, architecture, artificial intelligence, biology, business, computer science, economics, education, engineering, geography, linguistics, management, operations research, philosophy, political science, psychology, public health, public planning and policy, sociology, and systems analysis.

The colloquium sponsors presentations by leading experts in these fields, including faculty members from UCLA, other UC campuses, and other universities, and meets on alternate Fridays from 1 to 3 p.m. in 2270 AGSM during the academic year. Announcements of presentations, including abstracts of the papers to be presented, are circulated and posted on campus; announcements also appear in *UCLA Today*. The colloquium is directed by Michael D. Intriligator, professor of economics and political science. For further information, contact the Western Management Science Institute at 825-1581 or 825-0604.

The **Rothman Colloquium in Cognitive Science**, organized by the interdisciplinary Cognitive Science Research Program, sponsors presentations by leading experts in the broad field of cognitive science, which explores the nature of human and artificial intelligence. Participating disciplines include artificial intelligence, biology, linguistics, neuroscience, philosophy, and psychology. The list of speakers is circulated to the participating departments on campus; announcements also appear in *UCLA Today*. For further information, contact the Cognitive Science Research Program at 825-0951.

Student Life

Living Accommodations

Where you live while attending UCLA can play an important role in your total college experience. Many students, especially those in their first year, choose to live on campus; others opt for a University-owned apartment or a private apartment in one of the many surrounding communities. About 20 percent of the total student population lives at home.

There are many different housing options available. Decide early which ones you plan to pursue and apply for or follow up on them as soon as possible. If you plan to live off campus, arrive early to make your housing arrangements for the coming academic year. Some students even pay rent year-round to insure accommodations, and try to sublet during the summer months.

The **UCLA Community Housing Office**, 350 De Neve Drive, Los Angeles, CA 90024-1495, (310) 825-4491, provides information and current listings on University-owned apartments, cooperatives, private apartments, roommates, rooms in private homes, room and board in exchange for work, and short-term housing. Because rental listings change daily, they cannot be mailed or given over the telephone. The housing office also has bus schedules, area maps, and neighborhood profiles. A current Registration Card or letter of acceptance and a valid photo identification card are *required* for service.

The International Student Center on Hilgard Avenue helps international students find housing and may also provide temporary facilities until suitable permanent housing arrangements are made.

UCLA Housing Options and Opportunities: Information and Application, a booklet which covers housing options in much greater detail, is mailed to all students when they are accepted for admission.

On-Campus Housing

Living on campus can add an extra dimension of enjoyment and convenience to your UCLA experience. Four residence halls (Dykstra, Hedrick, Rieber, and Sproul Halls), two residential suite complexes (Hitch and Saxon Residential Suites), and the new Sunset Village accommodate nearly 5,700 undergraduates. There is one residence hall, Hershey Hall, which houses some 335 graduate students. All on-campus housing is coed and within walking distance to classrooms.

Residence hall rooms are shared by two or three students (a limited number of single rooms are also available). Residential suites — shared by four or six students — consist of two bedrooms, a full bathroom, and a common living room. Sunset Village has one- and two-bedroom units, each with a full bath, shared by two or three students per bedroom. The four residence hall cafeterias and the dining commons in Sunset Village accommodate all on-campus residents and serve 19 meals per week. Residents may also select a 14- or 11-meal plan.

Applications for on-campus housing are contained in the *UCLA Housing Options and Opportunities: Information and Application* booklet, available at the **UCLA On-Campus Housing Assignment Office**, 270 De Neve Drive, Los Angeles, CA 90024-1381, (310) 825-4271. Assignments to on-campus housing are made annually through a housing lottery. In order to be eligible for the lottery, your completed application must be postmarked by the following deadlines:

- March 31 (June 1 for graduate students) for Fall Quarter 1992
- October 27 for Winter Quarter 1993
- January 26 for Spring Quarter 1993
- March 31, 1993 (June 1 for graduate students) for Fall Quarter 1993

Following each of these dates, the lottery will be held to determine the order in which students will be offered housing. **All new freshman and transfer students who are admitted for Fall Quarter and apply for the housing lottery by the stated deadline are guaranteed on-campus housing.**

The full cost per student for the 1992-93 academic year (Fall, Winter, and Spring Quarters, excluding vacation periods) is \$4,690 (triples) or \$5,410 (doubles) for residence halls, \$5,800 (six persons) or \$6,425 (four persons) for suites, \$5,875 (three persons/one bedroom or six persons/two bedrooms) or \$6,500 (two persons/one bedroom or four persons/two bedrooms) for Sunset Village, plus a \$21.45 membership fee in the On-Campus Housing Student Association.

The **Office of Residential Life**, in the Residential Life Building next to Sproul Hall (825-3401), is responsible for the conduct of students in residence halls and suites and provides professional and student staff members to counsel residents on programming and other problems. The office is also a designated Sexual Harassment Information Center, as well as a campus Harassment Information Center, available to all UCLA students (see "Harassment" in the Appendix for more information).

University Apartments for Family Students

UCLA maintains nearly 1,200 off-campus apartments about five miles from campus for married and single-parent students. Unfurnished one-, two-, and three-bedroom units are available. One-bedroom rentals for 1992-93, excluding utilities, are expected to range from \$478 to \$724 per month. Since waiting lists for family student housing are long, *do not wait until you have been accepted to UCLA to apply*. Verification of marriage and/or copies of children's birth certificates (English translation) must accompany your application. Call University Apartments/South at (310) 398-4692 for up-to-date information.

University Apartments for Single Students

Over 600 shared apartments for single students in four off-campus facilities are maintained by the University; all are located within walking distance of campus. Rental rates vary depending on the location and size of the apartment. All occupants must be full-time UCLA students; rental agreements are month-to-month including summers. An application is included in the *UCLA Housing Options and Opportunities: Information and Application* booklet, available at the UCLA On-Campus Housing Assignment Office. Apartments are available throughout the year, especially at the end of each term, on a first come, first served basis. Call University Apartments/North at (310) 825-2293 for current availability information (best selection is in June and July). Roommate vacancies in University apartments are routinely posted in the UCLA Community Housing Office.

Cooperatives

Cooperatives provide an atmosphere similar to residence halls except that you must work three to four hours per week as partial payment for room and board. There are five cooperatives within walking distance of campus. Room and board rates for 1991-92 varied between \$575 and \$1,200 per term. Cooperatives normally have long waiting lists, so apply early. For applications and specific information, write directly to each cooperative. Addresses are available from the UCLA Community Housing Office.

Fraternities and Sororities

Many of the 51 fraternities and sororities at UCLA own chapter houses on the west and east sides of campus respectively. For sororities, you must be a member to live in the house and generally will be able to move in after your first year of active membership. For fraternities, living in the house depends on the number of housing spaces available. Room, board, and dues are about the same as the monthly residence hall fee. During the summer break, most fraternities with chapter houses lease rooms to students, Greek or not (check listings at the UCLA Community Housing Office). For more information, contact the Office of Fraternity and Sorority Relations, 118 Men's Gym (825-6322).

Apartments

If you would like to rent an apartment off campus, you must carefully consider the kind of living arrangements you can afford. Your financial situation may dictate how close you live to UCLA and whether you can live alone or must share an apartment. Apartments within three miles of UCLA (Westwood, West Los Angeles, parts of Brentwood and Santa Monica) average \$600 per month for single units and \$850 for one-bedroom units. Apartments more than four miles away (Palms, Mar Vista, Culver City) usually cost \$100 to \$150 less. Because they change daily, listings cannot be mailed or given over the phone; they are posted in the UCLA Community Housing Office. A roommate share board is also available.

Short-Term Housing

If you need temporary quarters until you find something permanent, there are several hotels and motels within five miles of campus with varying rates and accommodations. Most short-term housing is available for no more than one to three months, though some may be for longer periods. Sublets are most readily available from May to August. Hotel and motel listings, which may be requested by mail or phone, are available in the UCLA Community Housing Office.

Transportation

There are several alternative means of transportation to and from campus other than driving alone in your car, and UCLA's Commuter Assistance-Ridesharing (CAR) Department can help you find them.

Many students form or join existing UCLA carpools and vanpools to save time and money and make the daily commute more pleasant. A carpool matching service is **free** to all students and can be requested by contacting CAR at 794-RIDE. Students who form a three-person carpool may apply for a student carpool permit through Parking Services (825-9871). There are over 100 vanpools serving over 65 communities throughout Southern California. Students can sign up for vanpools on a full-time (month-to-month) or part-time (occasional) basis. To find out

whether a vanpool currently operates from your area, call the vanpool coordinator at 794-RIDE.

The UCLA/Westwood Commuter Lines buspool program has been operating since January 1989. The 40-passenger luxury vehicles (equipped with disabled access) currently serve Sherman Oaks, Westchester, Woodland Hills, Tarzana, and South Bay. To accommodate diverse student and staff weekday schedules, buses currently arrive on campus three to four times between 7 and 9 a.m. and leave campus three to four times between 3:30 and 6 p.m. For further information, call the buspool coordinator at 794-RIDE.

A Guaranteed Ride Home (GRH) program has been developed to aid full-time UCLA buspoolers/vanpoolers and qualified part-time buspoolers/vanpoolers in the event of an emergency or other unscheduled need to get home quickly. The service consists of three options — night rider vans which are vanpools that arrive on campus at 9 and 9:30 a.m. and leave at 6 or 7 p.m., overnight rental car service, and emergency carpool matchlist service. For detailed information on routes, schedules, fares, or general information, contact the GRH coordinator at 794-RIDE.

Public bus lines connect UCLA to Santa Monica, Culver City, Beverly Hills, and most of the greater Los Angeles area. Bicycles, mopeds, and motorcycles are other popular ways to get to campus; several bike paths in the local area make your ride easier and safer, and there are special parking areas on campus specifically marked and equipped for these vehicles. Scooter and motorcycle parking permits are required and may be obtained through Parking Services.

All of these transportation alternatives are described in the *UCLA Commuter Guide*, a booklet which also contains a carpool matchlist form, information on public bus routes, and helpful hints on getting to UCLA without using your car. It is available at the Commuter Assistance-Ridesharing Department (555 Westwood Plaza, Structure 8, Level 2). CAR is open weekdays from 7 a.m. to 6 p.m. (794-RIDE).

Parking Space and Permits

A limited number of parking permits for main campus structures and lots and off-campus peripheral areas (serviced by regular free shuttle buses) are available to students on both a quarterly and annual basis. Unfortunately, not all students who request a permit can be offered space in their area of preference. You may obtain an application and instructions at Parking Services (555 Westwood Plaza, Structure 8, Level 2, 825-9871). To be considered, apply by the deadline dates listed on the Calendar at the beginning of this catalog or in the quarterly *Schedule of Classes*.

Students with permanent or temporary disabilities who have DMV-issued disabled persons' license plates or placards may apply to the Office for Students with Disabilities for parking assignments and on-campus transportation assistance. Students with short-term disabilities (usually less than three months) who do not have DMV-issued disabled persons' license plates or placards may obtain authorization for disabled parking through Student Health Service.

The application process for parking includes Parking Services' evaluation of your personal transportation needs. Parking assignments are based on a number of factors, including distance you live from campus, employment obligations, and other transportation and educational-related factors. Once evaluated, you are notified of your assignment or denial. You must accept and submit the parking offer by the published deadline. If you are not offered a permit for a particular term, you must reapply each term to be reconsidered. For more information, call Parking Services at 825-9871.

ASUCLA

Every registered UCLA student is a member of the Associated Students of UCLA (ASUCLA), one of the nation's largest such enterprises in terms of size, scope, and range of programs. The undergraduate and graduate student governments are integral parts of ASUCLA, which supports the following activities and services.

Food Service

ASUCLA operates the food service on the general campus and provides a number of innovative menu options at a variety of locations. Catering for special events is also available. Hours listed are for regular school sessions and vary during the summer and holiday periods.

COOPERAGE — On the A Level of Ackerman Union, the Cooperage offers Mexican food, pizza, grill items, gourmet salad bar, and soft ice cream. A stage and sound system for live entertainment and a large-screen TV for major events are available. Hours are weekdays 8:30 a.m. to 10:30 p.m., Saturday 11 a.m. to 10:30 p.m., Sunday 11 a.m. to 10 p.m.

NORTH CAMPUS STUDENT CENTER — This facility, just southwest of the Research Library, offers a variety of Mexican and Latin entrees, frozen yogurt, fresh-baked cookies, deli and garden sandwiches, a wide selection of international-style entrees, hamburgers, and a salad bar. North Campus is open for breakfast, lunch, and dinner. Hours are weekdays 7 a.m. to 10 p.m. (8 p.m. Friday), Saturday 9:30 a.m. to 6 p.m., Sunday 11 a.m. to 8 p.m.

BOMBSHELTER DELI AND BURGER BAR — This unique food service in the center of the Court of Sciences offers an assortment of traditional deli sandwiches, snacks, frozen yogurt, broiled hamburgers and chicken, and salads at reasonable prices. A full breakfast menu is served in the morning. Hours are weekdays 7:30 a.m. to 5 p.m. (4 p.m. Friday), Saturday 10:30 a.m. to 2:30 p.m.

TREEHOUSE — Located on the first floor of Ackerman Union, the Treehouse is open for breakfast, lunch, and dinner and features ranch-fried chicken, chili and salad bars, Italian-style dishes, deli salads, and a variety of traditional American favorites. French dip sandwiches and a top-your-own burger bar are offered at the **Hole-in-the-Wall**, while low-cost made-to-order salads and sandwiches are available at the **Sandwich Room**. Hours are weekdays 7 a.m. to 7:30 p.m. (3 p.m. Friday).

Adjacent to the Treehouse is the **Quick Service Chinese Food Room**, where you can find Chinese food items such as orange-flavored chicken, chow mein, vegetarian fried rice, and beef broccoli.

In the Treehouse lobby is **Tout de Suite**, a baked goods, candy, and frozen yogurt counter with topping bar. Hours are weekdays 9 a.m. to 8 p.m. (6 p.m. Friday), Saturday 11 a.m. to 3 p.m., Sunday noon to 5 p.m.

CAMPUS CORNER — The oldest of the ASUCLA food facilities, the Campus Corner is located just across Bruin Walk from Kerckhoff Hall. Pita bread pocket sandwiches, soft frozen yogurt, burgers, and French fries are available. Hours are weekdays 7:30 a.m. to 5 p.m. (4 p.m. Friday).

KERCKHOFF COFFEE HOUSE, on the second floor of Kerckhoff Hall, offers Baskin-Robbins ice cream specialties and a variety of teas, coffees, fresh pastries, and potages (hearty soups). Live entertainment is featured Tuesday, Thursday, and Friday nights. Hours are weekdays 7 a.m. to 11 p.m., weekends 10 a.m. to 11 p.m.

POTLATCH, a lounge on the first floor of the Anderson Graduate School of Management, offers a variety of sandwiches, snacks, and beverages. Hours are Monday through Thursday 7:45 a.m. to 9 p.m., Friday 8:45 a.m. to 2 p.m.

LU VALLE COMMONS, located between the Anderson Graduate School of Management and the School of Law, features deli food, hamburgers, and other grilled specialties. Hours are weekdays 7:30 a.m. to 8 p.m., Saturday 10 a.m. to 5 p.m., Sunday 11 a.m. to 8 p.m.

Within Lu Valle Commons is **Jimmy's Coffee House**, featuring specialty beverages, cheesecakes, and desserts. Hours are weekdays 7 a.m. to midnight (9 p.m. Friday), Saturday 9 a.m. to 9 p.m., Sunday 10 a.m. to 10 p.m.

Students' Store

The ASUCLA Students' Store, the largest on-campus retail store in the nation, is actually a mini department store with four campus locations. The **Main Store** (B Level of Ackerman Union, 825-7711) offers textbooks, an extensive selection of over 65,000 general book titles, school and art supplies, calculators and other electronic items, UCLA insignia merchandise (Bearwear), men's and women's sportswear, groceries, health/beauty aids, and greeting cards. The University's computer purchase program is administered through the Main Store — Macintosh and IBM computers are available to students, faculty, and staff at discounts up to 40 percent. Selected software is discounted as much as 75 percent. Hours during regular school sessions are weekdays 7:45 a.m. to 7:30 p.m. (6 p.m. Friday), Saturday 10 a.m. to 5 p.m., Sunday noon to 5 p.m.

The **Health Sciences Store** on the first floor of the hospital (13-126 CHS, 825-7721) specializes in books and supplies for students in dentistry, medicine, public health, and related areas. The **Lu Valle Commons Students' Store** (just south of AGSM, 825-7238) carries convenience items, magazines, and general books for the north campus area, as well as textbooks for selected graduate programs (law, management, architecture, urban planning, social welfare). A dry cleaning service and copy center are also available. The **North Campus Shop** (in the North Campus Student Center, 206-0751) is a small convenience store offering school supplies, snacks, and other convenience items. The **Sunset Village Dorm Store** (in Griffin Commons) carries items specifically for dorm residents, such as room space savers, laundry detergent, and groceries. An automatic teller machine and copy center are also available.

Lecture Notes/Academic Publishing Service

The **Lecture Notes Office** (A206 Ackerman Union, 206-0882) publishes concise weekly summaries of about 130 of UCLA's large lecture classes. Hours during regular school sessions are weekdays 7:45 a.m. to 6:30 p.m. (6 p.m. Friday), Saturday 10 a.m. to 5 p.m., Sunday noon to 5 p.m. **Academic Publishing Service** (179 Kerckhoff Hall, 825-2831) reproduces course materials for professors, obtaining 5,000 copyright authorizations each year.

Job Opportunities on Campus

ASUCLA reserves over 2,500 part-time jobs for UCLA students in food service, the students' stores, Graphic Services, Travel Service, the student union, and other departments. Listings are posted outside the Personnel Office, 205 Kerckhoff Hall (825-7055).

The residence halls offer a number of positions, as do the University libraries; check at the residences and the Personnel Office in the University Research Library (825-7947). Other on-campus jobs may be available through the Placement and Career Planning Center (see "Student Services" later in this chapter).

Campus Photo Studio

Yearbook portraits, portrait photography, and passport photographs are available from the Campus Photo Studio (150 Kerckhoff Hall, 206-0889), as are film, darkroom supplies, and discount photofinishing. Hours are weekdays 8:30 a.m. to 5:30 p.m.

Check Cashing

Cash is available via on-campus automatic tellers. Home Federal has three locations: outside the North Campus Student Center, outside the Health Sciences Store, and on the A Level of Ackerman Union. Great Western Bank and Security Pacific Bank have automatic tellers on the patio between Campbell Hall and the North Campus Student Center. An additional Security Pacific automatic teller is located on the A Level of Ackerman Union, as are those for Bank of America, First Interstate Bank, and Wells Fargo Bank. All the automatic tellers give access to the Star, Plus, or Cirrus network; network information is posted on each machine.

Students, faculty, and staff with current UCLA identification may also write checks for \$20 over the amount of purchase at all Students' Store locations; a \$2 minimum purchase is required.

Graduation Et Cetera

Caps and gowns may be rented/purchased at Graduation Et Cetera (across from Tout de Suite on the first floor of Ackerman Union, 825-2587). Graduation announcements, diploma mounting, and other services are also offered. Hours are weekdays 8:30 a.m. to 5 p.m.

Graphic Services

ASUCLA Graphic Services (150 Kerckhoff Hall, 206-0894) is the campus center for printing, copying, typesetting, and other graphic services. Hours are weekdays 8:30 a.m. to 5:30 p.m. A satellite Graphic Services Center is located in Lu Valle Commons (825-7568).

The Graphic Services Ackerman Union office also features a public fax machine and the Computer and Laser Rental Service (206-8454). Macintosh and IBM-compatible computers are available for hourly rental; term papers, newsletters, and flyers may be output on a Laserwriter printer. A Linotronic 500 is available for high-resolution typesetting of newsletters and brochures.

Meeting Rooms

A variety of meeting rooms is available for use by the entire campus community. To reserve space in Ackerman Union, Kerckhoff Hall, Lu Valle Commons, or North Campus Student Center, contact the Student Union Operations Office on the A Level of Ackerman Union (206-0836).

Shipping

The ASUCLA Service Center (140 Kerckhoff Hall, 825-2423) offers shipping via UPS and Federal Express. Hours are weekdays 9 a.m. to 4:30 p.m.

Travel Service

The ASUCLA Travel Service, located on the A Level of Ackerman Union (825-9131), offers a wide range of domestic and international airline flights and rail tickets, land arrangements and charter packages, student tours, and other travel-related services. Students may call UCLA-FLY (825-2359) for reservations. Hours are weekdays 8:30 a.m. to 6 p.m., Saturday noon to 4 p.m.

Student Activities

The opportunities to participate in extracurricular activities at UCLA are virtually unlimited. Though it is impossible to list all the activities here, the following are just a few of the many ways you can get involved in campus life and expand your horizons beyond classroom learning.

Student Government

In addition to its **Services and Enterprises** division, which is responsible for the services described above, ASUCLA includes the **Undergraduate Students Association**, the **Graduate Students Association**, and the **Communications Board**, which publishes the *Daily Bruin* and other campus student publications. Governed by a 10-member Board of Directors, ASUCLA operates and manages Ackerman Union, Kerckhoff Hall, North Campus Student Center, and Lu Valle Commons.

Many facets of student life at UCLA are sponsored or organized in some way by student government. Getting involved in the decision-making process can be extremely rewarding and can offer avenues of expression you may not find in other aspects of your university experience.

Undergraduate Student Government — The Undergraduate Students Association (USA), with offices on the third floor of Kerckhoff Hall (825-7068), is governed by the Undergraduate Students Association Council. USAC administers the association's operating budget through a network of seven student commissions (Academic Affairs, Campus Events, Community Service, Cultural Affairs, Facilities, Financial Supports, and Student Welfare).

Many **student government programs** benefit both campus and community. The Community Service Commission (825-2333) serves Los Angeles through 22 programs such as Amigos del Barrio, offering academic and emotional support for Latino students; the UCLA Prison Coalition, providing tutoring for inmates of juvenile correctional institutions; and the UCLA Special Olympics, to name just a few. Dedicated students offer their services on a volunteer basis.

Student government also supports the various student advocacy groups on campus, such as the African Student Union, American Indian Students Association, Asian Pacific Coalition, Gay and Lesbian Association, International Students Association, MEChA, UCLA Jewish Student Union, and the Union for Students with Disabilities.

The Campus Events Commission (825-1958) provides the campus with free and low-cost entertainment programming, as well as opportunities for student involvement. The commission is responsible for the Speakers and Concert Programs (see next page), the Ackerman Film Program, and Mardi Gras.

Graduate Student Government — The Graduate Students Association is the official organization representing the interests of UCLA graduate students in academic, administrative, campus, and statewide areas. GSA appoints or elects graduate student members to important campus organizations and committees, including the ASUCLA Board of Directors and the Student Fee Advisory Committee, as well as to departmental student organizations and committees of the Academic Senate. In addition, GSA sponsors various graduate student journals, programs, and social events, including Melnitz Movies (UCLA student film program) and publication of the GSA newsletter, *The Grad*. The GSA Office is located in 301 Kerckhoff Hall (206-8512).

Clubs and Organizations

Joining a club or organization is an excellent way to make new friends and find your niche on campus. UCLA has about 700 different clubs and registered organizations — more than you will find on almost any other university campus in the country. Political, athletic, recreational, cultural, academic, and religious clubs of almost every description are represented — and if you can't find one to suit your particular interest, you can start your own.

Clubs focusing on sports and recreation are listed in the Department of Cultural and Recreational Affairs, located in the Wooden Center (825-3701). For a full listing of registered student organizations, contact the **Center for Student Programming**, 161 Kerckhoff Hall (825-7041). This office can help you start a club or join an existing one, and serves as the official registry for all campus organizations. The center assists students with program development and fund-raising, monitors financial activities

of student organizations, interprets and enforces University rules and regulations, and administers official and general purpose bulletin boards on campus.

Groups registered through the Center for Student Programming are eligible to use the services of the **Campus Activities Service Office (CASO)**, 12 Royce Hall (825-8981). CASO offers technical advice and estimates for services in the public events area and reserves most campus public assembly facilities, classrooms, and auditoriums. The Conference Planning and Special Event unit of CASO (825-2024) specializes in large and complex meeting/conference activities using a variety of campus spaces and needing support from multiple campus service agencies. General assignment lockers and the sale of UCLA padlocks are also administered by CASO.

Complaints Against Student Organizations

Complaints of misconduct against officially recognized campus organizations should be made at the **Center for Student Programming**, 161 Kerckhoff Hall, except complaints against Greek letter social organizations (i.e., fraternities and sororities) which should be made at the Office of Fraternity and Sorority Relations, 118 Men's Gym.

Fraternities and Sororities

The **Office of Fraternity and Sorority Relations (FSR)**, 118 Men's Gym (825-6322), serves as the adviser to and sponsor of the 51 Greek letter social organizations and their four governing councils — Asian Greek Council, Interfraternity Council, National Pan-Hellenic Council, and Panhellenic Council.

Greek letter social organizations registered and officially recognized by FSR are eligible to participate in programs such as the Greek Leadership Conference, Rush, Greek Week, New Member Alcohol and Substance Education, Dating Expectations Programs, intramural tournaments, and all University-sponsored programs. Individual student members are eligible for scholarships offered by the Intersorority Mothers' Club, Los Angeles Alumnae Panhellenic, Panhellenic Council, and Interfraternity Council. The FSR staff assists organizations in campus and community programming, fund raising, membership development, training, and philanthropic activity.

FSR is also a designated campus Harassment Information Center available to all UCLA students (see "Harassment" in the Appendix for more information).

Fraternities and sororities provide the security of friendship and academic support while encouraging personal development and expansion. Members have group and individual responsibilities related to their particular interests and talents, and all take part in the group's programs and support networks. "Greeks" follow their founding principles of service, scholarship, and friendship. There is a place for anyone who will contrib-

ute to a group experience, and the cost to live in a chapter house is no more than living in a campus residence hall, although many members "live out" (not all chapters have houses). More than 5,000 UCLA students participate in "Greek life."

Mardi Gras

UCLA's annual Mardi Gras is the world's largest student-operated collegiate activity. Each Spring Quarter over 5,000 Bruins from all types of campus organizations help to prepare and present this carnival. Students design and operate more than 70 booths featuring games, food, and live entertainment. There are celebrity judges, carnival rides, clowns, balloons, fireworks, and much more. Mardi Gras opens on Friday evening and runs through Sunday afternoon.

The event generates well over \$200,000 annually for UCLA's official charity, UniCamp, a summer camp for underprivileged Los Angeles children. For more information, contact the Mardi Gras Committee in 129 Kerckhoff Hall (825-8001) or the Campus Events Commission in 300A Kerckhoff Hall (825-1958).

UCLA Campus Events Speakers and Concert Programs

The Speakers Program, now over 25 years old, brings the world's foremost entertainers, politicians, and literary figures to campus. It also presents two annual awards programs — the Jack Benny Award for comedic excellence and the Spencer Tracy Award for outstanding screen performance. Past speakers have included Johnny Carson, David Letterman, Whoopie Goldberg, John Cleese, Robin Williams, Jessica Lange, James Stewart, Spike Lee, William Hurt, Patricia Schroeder, Jesse Jackson, Matt Groening, Studs Turkel, Shimon Peres, Walter Cronkite, and Jane Fonda.

The Concert Program brings new and name performing artists like the Talking Heads, Guns N' Roses, 10,000 Maniacs, Public Enemy, and Hammer to UCLA for free and affordably priced concerts at noon in Westwood Plaza and at night in the Cooperage and Ackerman Grand Ballroom.

Publications and Broadcast Media

UCLA's publications and broadcast media, operated by the ASUCLA Communications Board, provide excellent training ground for aspiring writers, journalists, photographers, and radio announcers while serving the communication needs of the campus community. The following are the major student-operated sources of information on campus:

The **Daily Bruin**, with a circulation of 22,000, is one of the largest daily newspapers in Los Angeles. As the principal outlet for campus news, the *Bruin* is published each weekday of the regular academic year (twice weekly during the summer) and is distributed free from kiosks around campus and in Westwood and Brentwood. Students work as reporters, editors, proofreaders, photographers, and advertising sales representatives; new staff members are always welcome. *Bruin* offices are located in the Alumni Lounge (227 Kerckhoff Hall, 825-9898).

Seven newsmagazines reflecting the diversity of the campus community are published twice each term. **Al-Talib** is a publication devoted to Muslim issues; **Ha'Am** deals with Jewish issues; **La Gente** treats Chicano, Latino, and Native American issues; **Nommo** explores African American issues; **Pacific Ties** is devoted to Asian issues; **TenPercent** covers gay, lesbian, and bisexual issues; and **Together** reports on women's issues. Each includes news and features on political and cultural affairs both on and off campus. Prospective staffers are welcome. The offices of these newsmagazines are located in 212 Kerckhoff Hall.

The UCLA yearbook, **Bruin Life**, is one of the largest student publication efforts on campus. Available each spring, it contains photographs and information on undergraduate students, graduating seniors, athletic teams, fraternities and sororities, and campus activities. A separate publication, the **Freshman Record**, is produced for new UCLA students. If you would like to participate, contact the yearbook staff in 212 Kerckhoff Hall (825-2640).

Like many other large universities, UCLA has its own radio station. **KLA Radio** provides music, news, public service programming, and sports coverage during the academic year. The carrier current signal is sent to the residence halls and parts of Ackerman Union and Kerckhoff Hall on 530 AM and to many parts of the Los Angeles area on 99.9 Century Cable FM. The studios are located at the rear of the Grand Ballroom in 2400A Ackerman Union (825-9107; request line: 825-9999). All positions, including on-air, news staff, and advertising representatives, are open to students.

The Performing Arts

UCLA offers a rich variety of concerts, art exhibits, dance recitals, and theater productions as an integral part of University life. A full calendar of exceptional programs by the Music, Ethnomusicology and Systematic Musicology, and Dance Departments of the School of the Arts and the Theater and Film and Television Departments of the School of Theater, Film, and Television provides opportunities for student involvement and personal growth.

The **Music Department** offers more than 15 performance organizations. Instrumentalists are invited to play with one of seven different bands and orchestras. Campus choral organizations include a Concert Choir, Chamber Singers, Women's Chorus, Men's Glee Club, and the Collegiate Chorus which, with 120 members, is the largest of the groups.

The **Ethnomusicology and Systematic Musicology Department** provides students with the opportunity to perform in various non-Western and ethnic groups.

The **Dance Department** presents afternoon and evening modern dance concerts and demonstrations both on and off campus, and folk and ethnic performing groups meet regularly. Dance students have the opportunity to design and choreograph as well as perform.

Each year the **Theater Department** presents a series of major productions to the general public, and the **Film and Television Department** produces about 300 student-directed films each year in addition to hundreds of television programs. Professionals appearing on campus frequently visit classes to share their skills, and many have established awards and scholarships in the performing arts at UCLA.

Be a Spectator

Since its founding in 1936, the **UCLA Center for the Performing Arts** has served as the premier West Coast showcase for world-class performers and innovative new work in dance, music, theater, and performance art. The center stages more than 250 public concerts and events each year, often sponsoring debut performances of new work by major artists. Through the center, UCLA's Royce Hall hosts a varied and active performance program, ranging from regular concerts by the Los Angeles Chamber Orchestra to special appearances by Luciano Pavarotti, Marcel Marceau, Isaac Stern, performance artist Karen Finley, Kathleen Battle, Bella Lewitzky Dance, and Branford Marsalis. Discount tickets for students, faculty, and staff are available to all events.

Sports and Athletics

Athletics play a major role in the University's mission to provide a well-rounded education both in and out of the classroom. UCLA continues to live up to its reputation as a national leader in intercollegiate sports. In 1991-92 the UCLA men's athletic program placed first in the *USA Today* national all-around excellence competition and has won the award 11 times, including five of the last seven years. The women's program placed second in the 1991-92 poll conducted by *USA Today* and has won that award four of the last five years. UCLA is the only university in the country to win five National Collegiate Athletic Association (NCAA) men's and women's championships in a single year (1981-82).

MEN'S INTERCOLLEGIATE SPORTS — UCLA is a member of the Pacific-10 Conference, which includes Arizona State University; University of Arizona; University of California, Berkeley; Stanford University; University of Southern California; University of Oregon; Oregon State University; Washington State University; and the University of Washington. UCLA teams have won an overall total of 55 NCAA men's championships — second highest in the nation — including 15 in tennis, 13 in volleyball, 10 in basketball under the legendary John Wooden, and eight in track and field. In addition, the soccer team won the 1990 NCAA title. You can participate on the varsity level in football, basketball, track, baseball, tennis, volleyball, gymnastics, swimming, water polo, golf, soccer, and cross-country. For more information, contact the Men's Athletic Office at 825-8699.

WOMEN'S INTERCOLLEGIATE SPORTS — With nine different varsity sports, the *UCLA women's program is one of the most extensive in the country*, and UCLA has played an important role in establishing women's sports as part of the NCAA. Women's teams have won an overall total of 13 NCAA titles — second highest in the nation — including the 1981-82, 1983-84, 1984-85, 1987-88, 1988-89, 1989-90, and 1991-92 NCAA championships in softball, the 1981-82 and 1982-83 track and field

crowns, the 1984, 1990, and 1991 volleyball titles, and the 1991 golf title. Other nationally ranked teams are those in basketball, swimming, tennis, cross-country, and gymnastics. Athletic grants-in-aid are available on a selective basis in most sports. For more information, contact the Women's Athletic Office at 825-8699.

INTERCOLLEGIATE ATHLETIC FACILITIES — UCLA's major indoor arena is the famed **Pauley Pavilion**, which seats 12,543 for UCLA basketball, volleyball, and gymnastics events. It was the site of the 1984 Summer Olympics gymnastics competition. Immediately adjacent, **Drake Stadium** is the home of UCLA track and field competitions and site of many outdoor events, including the U.S. Olympic Festival '91. The **Los Angeles Tennis Center**, a 5,800-seat outdoor tennis stadium and clubhouse, was the site of the 1984 Olympic tennis competition. The **Morgan Intercollegiate Athletics Center** houses the UCLA Athletic Hall of Fame. Off-campus facilities include **Robinson Stadium** for varsity baseball and the renowned **Rose Bowl** in Pasadena, home of the UCLA football team.

Campus Recreation

UCLA offers a wide variety of recreational opportunities to meet the needs of the campus community. The **Department of Cultural and Recreational Affairs (CRA)**, 2131 Wooden Center (825-3701), serves as the administrative center for the coordination of programming, facilities, and equipment and supervision of campus recreational activities and services.

INTRAMURAL/CLUB SPORTS — The **Intramural Sports Program** offers over 40 activities, ranging from basketball and badminton to volleyball and water polo, in men's, women's, and coed competition with team and individual play; many are divided by skill levels so participants of any ability level can get involved. The **Club Sports Program** offers you the chance to organize, coach, or participate in sports that fall beyond the scope of intramurals but are not offered at the varsity level.

Annually over 15 club teams participate in a competitive schedule of league and tournament play with other college, university, and local area teams. Recognized teams exist in ice hockey, rugby, lacrosse, cycling, rowing, women's soccer, snow skiing, and surfing.

RECREATION CLUBS — Students with special interests in activities that are primarily instructional or social in nature have the opportunity to pursue their interests through clubs such as amateur radio, dance, fishing, snow skiing, and a variety of martial arts.

RECREATION INSTRUCTIONAL PROGRAM — A broad range of non-credit recreation classes is available in aquatics, dance, fine arts, outdoor studies, physical fitness, boating and sailing, tennis, and sports skills. Most classes are designed for beginning and intermediate skill levels. You can also participate in cultural events through art exhibitions, the poetry reading program, museum tours, and theater in Los Angeles outings.

BRUIN KIDS — Summer day camps, recreation classes, enrichment programs, and year-round weekend activities are offered for children of the UCLA community aged four to 16. Summer employment opportunities for UCLA students and a chance to work with children in a learning environment are provided through the Bruin Kids Program.

RECREATION FACILITIES/INFORMAL RECREATION — A popular attraction of CRA is the opportunity for independent recreation and exercise. UCLA students with appropriate identification have several major facilities in which to practice and play. The **Wooden Recreation and Sports Center** is a comprehensive student activities building with multiple gymnasia, 10 racquetball/handball courts, two squash courts, a weight training facility, exercise/dance and martial arts rooms, and a games lounge. The **Sunset Canyon Recreation Center** offers year-round activities in an outdoor park setting and features a 50-meter swimming pool, 25-yard family pool, picnic/barbecue areas, multipurpose play fields, an outdoor amphitheater, 10 lighted tennis courts, and various meeting rooms and lounges. The **UCLA Aquatic Center** in Marina del Rey offers sailing, windsurfing, and rowing classes and activities. Students also have the use of Pauley Pavilion, Drake Stadium, Sycamore Tennis Courts, Los Angeles Tennis Center, Intramural Fields, Men's Gym, and Dance Building for recreational sports and activities.

Student Services

UCLA students enjoy an extremely broad range of benefits and support services which enrich their college careers and help them attain their academic and career goals.

Academic Counseling

Many sources of academic counseling are available. Faculty advisers and counselors in each college and school help students with major selection, program planning, academic difficulties, degree requirements, and petitions for exceptions to these requirements.

Advisers in each major department counsel undergraduates concerning majors offered and their requirements, and possible career and graduate school options (see "Academic Resources and Assistance" in Chapter 2 of this catalog). In addition, special graduate advisers are available in each department to assist prospective and currently enrolled graduate students.

Placement and Career Planning Center

The Placement and Career Planning Center (PCPC) offers career planning and employment assistance free to all UC students. Services are located in the PCPC Building (825-2981) and in two satellite locations: 1349 AGSM (services for M.B.A. students, 825-3325) and 5289 Boelter Hall (specializing in engineering and the physical sciences, 825-4606).

Career Planning and Exploration — Career advisers and counselors provide individualized assistance and offer you guidance in selecting a major, making realistic career goals, investigating career options, evaluating graduate and professional school programs, and developing skills to conduct a successful job search. Information on local, national, and international internship opportunities and cooperative education programs can assist you in exploring different career possibilities, making important professional contacts, and obtaining valuable on-the-job experience. The Career Resources Library offers a collection of over 1,000 career-related books and directories, videos, periodicals, and other materials. In addition, PCPC offers workshops, seminars, and group meetings on a variety of career-related topics; many are repeated several times each term.

Employment Assistance — If you need extra money to finance your college degree, you will find a large volume of part-time, temporary, and seasonal employment leads at PCPC. Information on room and board opportunities in exchange for work also is available. Students and recent graduates looking for full-time, entry-level career positions may refer to job boards which list hundreds of current professional, managerial, and technical openings in numerous career fields. Seniors and graduate students may participate in on-campus interviews for positions in corporations, government, not-for-profit organizations, elementary and secondary schools, community colleges, and four-year academic institutions.

Student Health Service

The Student Health Service (SHS) is designed to offer the health care and information you may need as a UCLA student. Services are provided on an appointment or walk-in basis to all registered students on presentation of current Registration and UCLA Student I.D. Cards. If you withdraw during a school term, all SHS services will continue to be available on a fee basis for the remainder of that term, effective from your date of withdrawal. SHS is supported by a portion of your registration fees and by fees charged for noncore services (e.g., pharmaceuticals). Most services are considered core and are therefore prepaid (call 825-4073 for

the most up-to-date fee information). The cost of services received outside of SHS (e.g., the Emergency Room) is *your* financial responsibility. You are strongly encouraged to purchase supplemental medical insurance either through the UCLA-sponsored Medical Insurance Plan (see below) or other plans that provide adequate coverage. For more information on SHS, call 825-4073.

Location and Hours — General and emergency SHS care is available in A2-130 Center for the Health Sciences. Office hours weekdays are 8 a.m. to 5 p.m. except Tuesday, when service begins at 9 a.m. For emergency care when SHS is closed, you may obtain treatment at the UCLA Medical Center Emergency Room or UCLA Family Practice on a fee-for-service basis.

Primary Care Clinic provides outpatient diagnoses and treatment for most health care needs of both men and women. Care is provided by board certified physicians and nurse practitioners. The clinic also provides counseling for general health concerns. You are encouraged to select a clinician who will provide ongoing health care. Call 825-2463 to schedule an appointment.

Specialty Clinics provide specialized care when you are referred by the Primary Care Clinic. Services include dermatology, orthopedics, surgery, gynecology, internal medicine, allergy, ENT (ear, nose, and throat), ophthalmology, urology, and neurology. Routine physicals, health clearances, immunizations, and travel shots are available for a moderate fee. Call 825-0861.

Women's Health Service provides care for routine women's health needs and treatment of gynecological problems. Family planning (birth control) services are available, as are testing, counseling, and referral for pregnancy. Counseling for sexual problems and relationship concerns is also provided. Call 825-0854 for appointments and 825-7000 for clinicians.

Men's Health Clinic treats male genital and urinary problems, both sexual and nonsexual in nature. The clinic also provides sexual counseling for UCLA's male students. Call 825-0861.

Dental Clinic service arrangements are available. Call 825-5858 or 825-4073 for further information.

Health Education offers many types of services and programs that will interest, inform, and help you to lead a healthier life-style. Outreach programs, such as the Peer Health Counselor and Student Health Advocate Programs, provide peer care and educational counseling for health concerns. The programs allow students to be involved in the planning and delivery of many aspects of health care. Call 825-4730.

Supplemental Medical Insurance — UCLA offers a student Medical Insurance Plan (MIP) which is available as a supplement to the services offered in SHS. MIP provides benefits for certain major medical expenses not covered by SHS, such as hospitalization, surgery, and emergency room costs.

All graduate students and all international students (graduate and undergraduate) on nonimmigrant visas *must maintain adequate medical insurance coverage during all periods of enrollment at UCLA*. MIP fulfills the medical insurance requirement. For graduate students the MIP fee is included each term in the fee assessment total on the UCLA Fee Statement portion of the Registration Form. For undergraduates the MIP fee appears as a voluntary option to be added to the fee assessment total on the Registration Form each term. This is the only method by which MIP can be purchased.

Graduate and international students who are insured under *adequate* private medical insurance may waive out of MIP. See “Mandatory Medical Insurance Requirement” in the “Registration and Enrollment” sections of Chapters 2 and 3 for a description of what constitutes adequate private medical insurance and instructions for waiving out of MIP. For further information on medical insurance, call the SHS Insurance Office at 825-1856.

Student Psychological Services

Student Psychological Services (SPS) offers short-term personal counsel and psychotherapy at two locations. The Mid-Campus Office is located in 4223 Math Sciences (825-0768, 825-4207); the South Campus Office is in A3-062 CHS (825-7985).

Psychologists, clinical social workers, and psychiatrists are available at both locations, offering assistance with situational stresses and emotional problems from the most mild to the most severe. These may include problems with interpersonal relationships, academic stress, loneliness, difficult decisions, sexual issues, anxiety, depression, or other concerns affecting the personal growth of students.

The service is confidential and free to regularly enrolled students. Students are seen individually or may choose from a number of groups offered each term. Appointments are made on weekdays between 8 a.m. and 5 p.m. Emergency counseling is also available.

SPS is also a designated Sexual Harassment Information Center, as well as a campus Harassment Information Center, available to all UCLA students (see “Harassment” in the Appendix for more information).

Helpline

UCLA Peer Helpline (825-HELP) is a crisis intervention and referral hot line staffed by UCLA students and staff members. You can call and talk to a trained peer counselor about school stress, relationship problems, loneliness, depression, drug problems, suicide, or anything else that is on your mind. Hours are weekdays 5 p.m. to midnight, Saturday and Sunday 8 p.m. to midnight. For more information, contact Clive D. Kennedy, Student Psychological Services, 4223 Math Sciences (825-4207).

Office of the Dean of Students

The Office of the Dean of Students, located in 1206 Murphy Hall (825-3871), exists to help you, either directly or by referral, with whatever needs you might have. Direct services include general counseling; sending emergency messages to students; and assisting in understanding University policies and procedures, including grievance procedures regarding student records, discrimination, and student debts.

In addition, the office publishes “Official Notices” in the *Daily Bruin* at various times during the year. Such notices are important, and *all students are held responsible* for the information in them.

The Office of the Dean of Students also plays a role in administering campus discipline and applying the standards of citizenship which you are expected to follow at UCLA. Those standards involve complying with the policies and regulations governing this campus and being aware that infractions of those policies or regulations can result in disciplinary action. See “Student Conduct: Violation of University Policies” in the Appendix for more information.

Ombudsperson

The Ombudsperson is responsible for listening and responding to grievances from any member of the campus community (i.e., students, faculty, administrators, staff), for investigating those grievances where resolution has not been to the satisfaction of the concerned individual or where there are no established guidelines for resolution, and for resolving where possible, through mediation, those grievances (including sexual harassment). All matters are handled confidentially. The office is located in 1172 PCPC Building (825-7627) and is independent in operation; hours are weekdays 8 a.m. to 5 p.m.

The office is also a designated Sexual Harassment Information Center for students, faculty, and staff, as well as a campus Harassment Information Center available to all UCLA students (see “Harassment” in the Appendix for more information).

The **Campus Mediation Service (CMS)**, located in 1172 PCPC Building (825-3454), provides an impartial forum for UCLA students, staff, and faculty to voluntarily express, clarify, and resolve their disputes. The service — free, fast, and confidential — is an alternate resource for helping to resolve a wide variety of disputes and conflicts, such as roommate conflicts, landlord/tenant disputes, group conflicts, and individual conflicts between faculty, staff, and students. CMS, a group of campus volunteers extensively trained in mediation, negotiation, and conflict resolution, assists the parties of the dispute in developing their own solution to their problem.

Student Legal Services

If you are a currently registered and enrolled student with a legal problem, you can get assistance free of charge from attorneys or law students under direct supervision of attorneys. They will help you solve legal problems, including those related to landlord/tenant relations, domestic relations, accident and injury problems, criminal matters, and contract and debt problems. Assistance is available by appointment only from 9 a.m. to 5 p.m. weekdays in 70 Dodd Hall (825-9894).

Central Ticket Office

Tickets for all UCLA events are available at the Central Ticket Office (CTO) in the West Alumni Center.

CTO also offers student *discount* tickets to campus athletic and cultural events and local motion picture theaters (current Registration and UCLA Student I.D. Cards must be presented at the time of purchase). You may also purchase tickets to off-campus events through Ticketmaster, as well as student discount tickets for RTD buses and tokens for the Santa Monica and Culver City bus systems.

For information on athletic and special events, call 825-2101; for cultural events, call 825-2953.

UCLA Community Resource Center

Community and public service is an integral part of UCLA’s educational mission and greatly enhances students’ learning experiences. In an effort to facilitate greater student involvement, the UCLA Community Resource Center actively promotes and publicizes volunteer opportunities to meet the growing needs of our community. The center’s clearinghouse data base provides complete information on either short- or long-term volunteer opportunities both on campus and in the community. Program coordinators, located in 203 Men’s Gym (206-5523), are available to help you explore the field of volunteerism, develop a community service opportunity, and provide resource information on current issues.

Services for International Students

The **Office of International Students and Scholars (OISS)** and the **International Student Center** provide services and programs specifically for UCLA’s 6,500 international students. A comprehensive orientation program for these students assists them in achieving their academic objectives. Programs throughout the year allow them to share their viewpoints with American students and the community.

The OISS staff, located in 105 Men’s Gym (825-1681), includes professional and peer counselors specially prepared to assist you with questions about immigration, employment, government regulations, financial aid, cultural adjustment, and personal matters. OISS is also a designated Sexual Harassment Information Center for international students, as well as a campus Harassment Information Center available to all UCLA students (see “Harassment” in the Appendix for more information).

OISS also provides visa assistance for faculty, researchers, and post-doctoral scholars.

The International Student Center, 1023 Hilgard Avenue (825-3384), focuses on student/community relations and assists with language, housing, and other concerns in addition to sponsoring cultural, educational, and social programs for U.S. and international students and members of the local community.

Services for Students with Disabilities

The **Office for Students with Disabilities**, A255 Murphy Hall (825-1501 or TDD 206-6083), provides academic support services to students with permanent and temporary disabilities, including registration/priority enrollment assistance, special parking, fee deferments authorized by the California Department of Rehabilitation, readers, note takers, interpreters for deaf students, housing assistance, on-campus transportation, campus orientation, proctor and test-taking assistance, support group, and adaptive equipment. The office can also assist with arrangements for training and access to the Disabilities and Computing Program.

The **Disabilities and Computing Program (DCP)** offers consulting and training on adapted computer equipment to assist students with disabilities in their academic work. Special equipment includes reading machines, voice-controlled computers, outlining software, large print monitors, and more. For further information, call 206-7133 or TDD 206-5155.

Veterans' and Social Security Services

Academic Record Services, 1134 Murphy Hall, provides information for veterans and eligible dependents about V.A. educational benefits, tutorial assistance, the work-study program, and emergency loans; issues fee waivers to dependents of California veterans who are deceased or disabled because of service-connected injuries and who meet the income restrictions in Education Code Section 10652; and certifies student status for recipients of Social Security benefits.

Women's Resource Center

The Women's Resource Center (WRC), located in 2 Dodd Hall (825-3945), offers services to all UCLA students, with special focus on women's needs.

The center presents workshops and support groups on many topics, including child care, self-defense, assertiveness training, rape prevention and education, career development, single parenting, health, returning to school, and personal relationships. It also offers referrals for medical, legal, career planning, personal counseling, and other services both on and off campus. In addition, rape services consultants (RSCs) — individuals who provide information, support, and resources for UCLA students who have been raped or sexually assaulted — can discuss options and alternatives, help identify and assist in contacting the most appropriate support services, and answer any questions that may arise. The WRC is also a designated Sexual Harassment Information Center, as well as a campus Harassment Information Center available to all UCLA students (see "Harassment" in the Appendix for more information).

A library includes specialized publications on women's issues. Internships are offered in areas such as creative writing, legislative research, graphic arts, and publicity. The WRC, committed to improving the status of women on campus, works with other campus agencies to help women reach their full potential.

Child Care Services

The **Child Care Center** provides full- and part-time care for children aged two months to five years. Fees range from \$250 to \$630 per month depending on the age of the child and the schedule selected. The center is located in the northwest corner of campus on Sunset Boulevard between Veteran Avenue and Bellagio Drive, with the entrance on Bellagio Drive. A satellite day-care center for children aged two to five years is located in the Colina Glen faculty housing area. Fees range from \$240 to \$525 depending on the schedule; priority is given to Colina Glen residents. Call 825-5086 for more information.

The **Outreach Program** helps parents make off-campus child care arrangements. The outreach coordinator meets parents each Monday from noon to 1 p.m. in 2 Dodd Hall. For more information, call 825-8474.

The **University Parents Nursery School** is a multicultural cooperative school for two- to five-year-old children of UCLA students, faculty, and staff; priority is given to students living in Family Student Housing. Experienced teachers, assisted by co-oping parents, provide a gradual transition from the home to the school environment. Hours are weekdays 8:30 a.m. to 12:30 p.m. and/or 12:30 to 4:30 p.m., with some extended care available from 7:30 to 8:30 a.m. and 4:30 to 5:30 p.m. The nursery school is located in the UCLA Family Student Housing Community Center, 3327 South Sepulveda Boulevard (397-2735).

Safety and Security

Emergency (Police, Fire, or Medical) — Dial **911** from any campus phone (do not dial an additional 9 to establish an outside line). For nonemergency information, contact the UCLA Police Department at 601 Westwood Plaza (825-1491).

Campus Escort Service — The Department of Community Safety provides a free escort service every day of the year from dusk to 1 a.m. Uniformed community service officers (CSOs) — specially trained UCLA students — are available to walk students, staff, faculty, and visitors between campus buildings and local living areas or Westwood Village. To obtain an escort, call 825-1493 about 20 minutes before you need one.

Evening Van Service — The free service provides a safe and convenient mode of transportation around campus at night. Seven vans driven by CSOs operate Monday through Thursday from 6 p.m. to midnight and

provide transportation between Ackerman Union, apartments on the west side of campus, Lot 32, the campus libraries, and the residence halls. For further information or a free brochure, call 825-9800.

UCLA Rape Prevention and Education Services are cosponsored by the Women's Resource Center and the Department of Community Safety. Services include workshops, self-defense classes, intake counseling, and referrals to offer practical safety suggestions, increase physical and psychological preparedness, and heighten awareness of the complex issues of rape and sexual assault. For more information, call 206-8240 or the UCLA Police Department's Crime Prevention Unit at 825-7661.

CPR and Basic Emergency Care Courses — The Center for Prehospital Care offers medical education programs in basic emergency care and American Heart Association cardiopulmonary resuscitation (CPR) which can be organized most days and times. For more information or to schedule a course, call 206-0176.

Important Phone Numbers

UCLA Police Department (24 hours)	825-1491
Police, Fire, or Medical Emergency	911
UCLA Emergency Medical Center (24 hours)	825-2111
Campus Escort Service (dusk to 1 a.m.)	825-1493
Helpline (weekdays 5 p.m. to midnight, weekends 8 p.m. to midnight)	825-HELP

UCLA Alumni Association

For nearly 60 years, the UCLA Alumni Association has offered graduates the opportunity to stay involved with their university. Nearly 55,000 graduates are members, making the association one of the largest alumni groups in the nation. Membership is open to Bruin parents and friends as well as graduates.

The Alumni Association offers a number of services and sponsors various programs for members and for current and future UCLA students. From world travel to UCLA Extension classes, members are entitled to a number of special privileges. Thousands of graduates take advantage of the association's various career services each year. Programs such as ProNet, a confidential resumé data base, and AlumNet, an annual spring job fair, give members the perfect alternative to scanning classified ads. AlumNet also includes career development workshops for members content with their current jobs, but still interested in expanding their careers. Through the Alumni Travel Program, members can explore the world or rediscover America with fellow Bruin alumni and friends. Member benefits also include discounts on UCLA Extension classes, group insurance opportunities, and discounts on athletic and cultural events on campus.

In addition to member services, the association sponsors many student service programs. It encourages student achievement and involvement, and each year awards \$400,000 in student scholarships. Student Alumni Association (SAA) members plan and produce UCLA's fall Homecoming festivities and Spring Sing, as well as the annual Dinners for Twelve Strangers, which bring together students, faculty, staff, and alumni. Through the SAA Career Network, students have the opportunity to meet alumni working in their specific fields of interest. SAA membership is free and open to all students.

The association also sponsors the Governmental Relations Program, Advisory and Scholarship Program, and nearly 130 regional, professional, and support organizations. It is located in the West Alumni Center, 325 Westwood Plaza (825-ALUM; 800-825-ALUM outside the 213, 310, and 818 area codes).

Undergraduate Study

2

Undergraduate Admission

Information:

Undergraduate Admissions and Relations with Schools (UARS)
1147 Murphy Hall
(310) 825-3101

The Office of Undergraduate Admissions and Relations with Schools (UARS) invites you to visit UCLA to discuss your prospects as a student and to experience the campus firsthand. The UARS Office offers frequent student-guided individual and group tours of the campus which are both enjoyable and informative; reservations are required. Call (310) 825-8764 for tour reservations; (310) 825-3101 for general UCLA admissions information.

Preparing for University Work

A carefully planned program of high school courses best prepares you for University work. It can give you a definite edge in your undergraduate studies and a head start in your selected field. Most important, if you master certain basic skills in high school, you increase the probability of your success at the University.

As a prospective UCLA freshman, you should give priority to completing the high school courses required for admission — the academic pattern of courses outlined later in this chapter. In addition, you should give careful thought to the general field of study, if not the specific major, you want to pursue. If you can make this decision early, you can take additional high school courses related to your field.

You should understand that the academic requirements for admission are **minimum** entrance standards. Students are selected from a large number of highly competitive applicants. Most of these applicants will have exceeded the minimum requirements; thus selection is based on your demonstrated overall preparation. Those applicants with the strongest preparation are offered admission.

You must begin preparation for college at least by the ninth grade in order to allow you to progress through more than just the minimum required courses. If possible, you should begin academic coursework in mathematics and foreign language in the seventh and/or eighth grades, as this allows you to complete five or six years of college preparatory work. With the strength of solid preparation, students applying to UCLA will be in a competitive position for admission.

Applying for Admission

The first step in applying for admission is to obtain the *UC Application for Undergraduate Admission and Scholarships* containing all necessary forms and instructions from your California high school or community college counselor or from any University of California Undergraduate Admissions Office. One application is used to apply to all UC campuses. You may apply to one UC campus for the basic \$40 application fee; for each additional campus you select, you must pay an additional \$40 fee per campus. Checks or money orders should be made payable to The Regents of the University of California. These fees are not refundable.

Complete the application, taking care to list your desired major and the correct major code for the campus(es) to which you are applying. Mail the completed application and the nonrefundable application fee in the self-addressed envelope included in the application packet.

If you are in high school when you apply (freshman applicant), your application information is used by UARS to make preliminary admission decisions. **Do not** send your sixth and/or seventh semester high school transcripts. A complete and final transcript, including a statement of graduation or proficiency, will be required at a later date. You must submit official results of the Scholastic Aptitude Test (SAT) or American College Test (ACT) and three achievement tests; request that test results be sent directly to UCLA when you take each test. You should take these tests by the December test date, as they are part of the review process for admission.

If you have attended or are attending another college when you apply (transfer applicant), your application information is used by UARS to make preliminary admission decisions. Transcripts of all your high school and college work will be required at a later date. It is your responsibility to arrange for transcripts to be sent and to assure that they arrive promptly. Official transcripts must be sent directly from the institutions you have attended. Transcripts and other documents cannot be returned or forwarded to other institutions.

When to Apply

The filing periods for applications are as follows:

Winter Quarter 1993:

Closed to new applicants

Spring Quarter 1993:

File October 1-31, 1992 (If open to new applicants, junior-level applicants only)

Fall Quarter 1993:

File November 1-30, 1992 (Freshmen and transfers)

(Applications for admission to Fall Quarter 1992 were accepted only during November 1991.)

Some departments, majors, or schools at UCLA are open for Fall Quarter admission only. Contact UARS before applying.

Notification of Admission

You will be mailed a notice from the UC Undergraduate Application Processing Service, which you should keep, acknowledging receipt of your application. Later, you will receive a letter explaining your admission status. The length of time before admission notification varies depending on how complete your application is and how quickly your records are received. In general, Fall Quarter applicants are notified beginning March 1.

If you are accepted for admission, you will be asked to sign and return a Statement of Intent to Register and a Statement of Legal Residence. A nonrefundable \$100 deposit, also required at this time, will be applied to your University registration fee if you register in the term to which you are admitted.

Entrance Requirements

All campuses of the University of California have the same minimum freshman admission requirements. The requirements are based on two principles: (1) the best indicator of success at the University is a record of high grades in previous schoolwork and (2) the completion of certain academic courses in high school prepares you to begin University work and choose a general field of study.

Fulfilling the minimum admission requirements, however, does not necessarily assure admission to UCLA. The selection of applicants is based on demonstrated high scholarship in preparatory work, which often goes well beyond the minimum eligibility requirements. UCLA offers admission to those students with the best overall academic preparation.

In addition to the primary criteria for admission selection, other elements are considered to ensure a diverse student body which serves the interests of California. If you present evidence of educational and economic disadvantage or a disability, that will be taken into account. If you belong to an ethnic group which has low UC eligibility rates and historically low participation in higher education, that will also be taken into account. California residency is another factor. While these elements are given consideration, academic performance remains the key factor for admission to UCLA.

Admission as a Freshman

You are considered a freshman applicant if you have not enrolled in a regular session of any college-level institution since graduation from high school (except for summer session immediately following high school graduation). To qualify for admission as a freshman, you must meet three major requirements: the **Subject Requirement**, the **Scholastic Requirement**, and the **Examination Requirement**. These are the **minimum** requirements for admission to the University; meeting them does not automatically assure admission to UCLA.

Subject Requirement

Outlined below are the high school academic courses required for admission to the University of California. Each course must be completed with at least a grade of C. The requirement consists of 15 year-long courses, seven of which must be taken during your last two years in high school. These are the **minimum** courses required for admission; you are encouraged to exceed these requirements whenever possible.

- (1) **History** — One year of U.S. history, or one-half year of U.S. history and one-half year of civics or American government.
- (2) **English** — Four years of university preparatory courses in English composition and/or literature, with no more than one year accepted from the ninth grade.

(3) **Mathematics** — Three years of university preparatory courses in elementary algebra, geometry, and advanced algebra (four years are recommended, including trigonometry and calculus).

(4) **Laboratory Science** — A one-year course in one laboratory science, taken in the tenth, eleventh, or twelfth grade (three years are recommended, including biology, chemistry, physics, and/or physiology).

(5) **Foreign Language** — Two years of the same language, other than English (three to four years are recommended). Courses should emphasize speaking and understanding and should include grammar, vocabulary, reading, and composition.

(6) **College Preparatory Electives** — Four units, in addition to those required above, to be selected from at least two of the following subject areas: history, English, advanced mathematics, laboratory science, foreign language, social sciences, and visual and performing arts. In general, elective courses should involve considerable reading and should develop your analytical and reasoning ability and skill with written and oral exposition.

Note: The subject requirements will change effective for Fall Quarter 1994 applicants. Consult the UC publication *Introducing the University* for details.

Scholastic Requirement

Eligibility for admission to the University of California is based on a combination of your grade-point average (GPA) in the academic subject requirements and your American College Test (ACT) or Scholastic Aptitude Test (SAT) scores. For detailed scholarship information, see the UC publication *Introducing the University* or contact Undergraduate Admissions and Relations with Schools (UARS).

Examination Requirement

All freshman applicants must submit scores from the following tests:

- (1) One Aptitude Test:
 - (a) The American College Test (ACT), composite score OR
 - (b) The Scholastic Aptitude Test (SAT), total score.
- (2) Three College Board Achievement Tests (ACH) which must include:
 - (a) English composition AND
 - (b) Mathematics, level 1 or 2, AND
 - (c) Either English literature, foreign language, science, or social science.

Admission Selection

Many elements are considered in the selection process, but the primary ones are (1) high school grade-point average, (2) academic preparation — quality, level, and content of coursework, (3) number of and performance in honors and advanced placement (AP) courses, (4) scores received on the standardized college tests (Scholastic Aptitude Test or American College Test and achievement tests), and (5) depth and quality of senior-year coursework.

You should take as many honors and advanced placement courses as possible and should try to exceed the minimum academic subject requirements in all subjects, particularly mathematics, laboratory sciences, and foreign languages. High test scores are necessary in conjunction with strong performance in classes and a consistent pattern of academic courses. Overall performance must be well above average.

For detailed information on admission requirements for freshman students, see the UC publication *Introducing the University* or contact UARS.

Admission as a Transfer Student

You are considered a transfer applicant if you have been a registered student (1) at another college or university or (2) in college-level extension courses. (This does not include attending a summer session immediately following high school graduation.) You **may not disregard** your college record and apply for admission as a freshman. Priority is given to

junior-level applicants. If you wish to transfer to UCLA, you should follow these general guidelines:

(1) See your college counselor, who can help you identify the courses you should take to prepare for your intended major, and make certain the courses you are currently taking are transferable.

(2) Take as many English and mathematics courses as possible. UCLA's academic program is rigorous and requires a strong background in both critical and quantitative skills. English and mathematics are the most important subjects you can take.

(3) Begin to satisfy the Transfer Core Curriculum, Intersegmental General Education Transfer Curriculum, or general education requirements and fulfill prerequisites for your intended major. Because a sound liberal arts education encompasses more than knowledge of one field, the College of Letters and Science and most schools at UCLA require that students take coursework in areas outside their major. Before transferring to UCLA, you should take courses to satisfy these general education requirements as well as fulfill some of the required "prerequisite" courses for your major.

For more detailed information on admission requirements for transfer students, see the *UC Application for Undergraduate Admission and Scholarships* and the *UC Answers for Transfers* booklet or contact UARS.

Intercampus Transfers

Undergraduate students registered in a regular session at any campus of the University (or those previously registered who have not since registered at any other school) may apply for transfer to another campus of the University. Obtain the *UC Application for Undergraduate Admission and Scholarships* and submit the required application fees with the application form. The filing periods are the same as those for new applicants (see "When to Apply" at the beginning of this chapter). If you have attended another UC campus and wish to be considered for admission to UCLA, you must have been in good standing when you left that campus. Intercampus transfers are not automatic; you must compete with all other applicants.

Senior-Level Applicants

Students attaining senior standing are not generally admitted by the University.

Second Bachelor's Degree Applicants

By policy, second bachelor's degrees are not generally granted by the University, except in the School of Nursing.

Transfer Credit and Credit by Examination

The University gives unit credit to transfer students for certain courses completed at other accredited colleges and universities. To be accepted for credit, the courses must be comparable to those offered at the University, as determined by the Office of Undergraduate Admissions and Relations with Schools (UARS). All courses which meet the criteria are used in determining your eligibility for admission. (To convert semester units into quarter units, multiply the semester units by 1.5 — e.g., 12 semester units \times 1.5 = 18 quarter units.)

College credit for examinations given by national testing services is generally not allowed, except for the Advanced Placement examinations given by the College Board. Contact UARS for more information.

Applicants from Other Countries

To be considered for admission to the University of California, international students must have completed secondary school with a superior average in academic subjects and have earned a certificate of completion which would enable them to be admitted to a university in the home country.

Your application for admission, copies of official certificates, and detailed records of all secondary schools attended should be submitted **as early**

as possible after the filing period opens (see "When to Apply" at the beginning of this chapter). This will allow time for the necessary correspondence and, if you are admitted, to obtain your passport visa.

Students whose native language is not English must have sufficient command of English to benefit from instruction at UCLA. To demonstrate that command, you are required to take the UCLA English as a Second Language Placement Examination (ESLPE). Depending on your ESLPE results, you may have to complete one or more English as a second language courses. In addition, you are advised to take the Test of English as a Foreign Language (TOEFL) as a preliminary means of testing your ability. Make arrangements for this test by writing to the Educational Testing Service, 1947 Center Street, Berkeley, CA 94704. Have your test results sent directly to the UCLA Office of Undergraduate Admissions and Relations with Schools.

Mandatory Medical Insurance Requirement

UCLA requires, as a condition of registration, that all international students on nonimmigrant visas have adequate medical insurance coverage during all periods of enrollment. See "Mandatory Medical Insurance Requirement for International Students" in the "Undergraduate Registration and Enrollment" section later in this chapter for a description of what constitutes adequate medical insurance. Most travel insurance plans are NOT acceptable; medical insurance plans from foreign countries (including Canada) also are NOT acceptable.

UCLA offers a student Medical Insurance Plan (MIP) which fulfills the requirement. For undergraduates the MIP fee appears as a voluntary option to be added to the fee assessment total on the UCLA Fee Statement portion of the Registration Form each term. This is the only method by which MIP can be purchased.

You are required to provide written proof of adequate medical insurance coverage in response to an annual written notice from the Student Health Service (SHS) Insurance Office. For further information on MIP or adequate medical insurance requirements, call the SHS Insurance Office at 825-1856.

Readmission

Undergraduate students are required to apply for readmission only if they are absent from the University for more than one term. Thus, if you complete a term and then withdraw, cancel, or fail to register for the next term, registration materials will be available for you for the term immediately following.

If you are absent for two or more consecutive terms, you must complete an Undergraduate Application for Readmission form and file it with the Registrar. During the 1992-93 academic year, all such students returning in the same standing (undergraduate) must file readmission applications as follows:

Filing Deadlines

August 14 for Fall Quarter 1992
November 25 for Winter Quarter 1993
February 19 for Spring Quarter 1993

Application forms are available at 1113 Murphy Hall. Your completed application must be accompanied by a \$40 application fee (nonrefundable) and transcripts of records from any other institutions (including UCLA Extension) you attended during your absence. Readmission is generally approved if you were in good academic standing (2.0 grade-point average) when you left the University, if coursework completed elsewhere in the interim is satisfactory, and if readmission applications are filed on time. Your college or school may have other academic regulations governing readmission (consult the appropriate counseling office). Contact the readmission clerk at (310) 825-1091 for further information.

Undergraduate Registration and Enrollment

Information:
Registration/Enrollment Office
1113 Murphy Hall
(310) 825-1091

Detailed information on registration (fee payment) and enrollment procedures is contained in the quarterly *Schedule of Classes*, available for purchase at the Students' Store several weeks before the beginning of each term. To obtain a copy by mail, write to ASUCLA Students' Store, 308 Westwood Plaza, Los Angeles, CA 90024-1645, Attn: Mail Out. Include a check or money order for \$4.25 payable to ASUCLA.

Registration consists of paying fees and enrolling in classes. The Registration Form, issued by the Registrar, is used for paying fees and provides information on enrollment in classes by telephone. You must complete both processes by the established deadlines to be officially registered and enrolled for the term.

Advance payment is required of all eligible students. Payments may be mailed or deposited in the Main Cashier's Drop Slot (1125 Murphy Hall) during the published payment period. Payments submitted after the published fee deadline must be made in person at 1125 Murphy Hall and will be assessed an additional \$50 late payment fee. Students on financial aid may be eligible for a waiver of the \$50 fee if funds are delayed by the University.

Deadline Dates

(Tentative only; consult *Schedule of Classes* for firm dates.)

Fee Payment Deadlines:

August 28 for Fall Quarter 1992
December 4 for Winter Quarter 1993
March 5 for Spring Quarter 1993

Classes Dropped for Failure to Pay Registration Fees:

September 25 for Fall Quarter 1992
January 12 for Winter Quarter 1993
April 6 for Spring Quarter 1993

Mandatory Medical Insurance Requirement for International Students

UCLA requires, as a condition of registration, that all international students on nonimmigrant visas have *adequate* medical insurance coverage during all periods of enrollment.

UCLA offers a student Medical Insurance Plan (MIP) which fulfills the requirement. For undergraduates the MIP fee appears as a voluntary option to be added to the fee assessment total on the UCLA Fee Statement portion of the Registration Form each term. This is the only method by which MIP can be purchased.

You are required to provide written proof of adequate medical insurance coverage in response to an annual written notice from the Student Health Service (SHS) Insurance Office.

If you do not purchase the UCLA Medical Insurance Plan, **you must have an *adequate private medical insurance plan that provides all of the following *minimum* benefits:***

- (1) A *minimum* of \$50,000 in "Lifetime Maximum" benefits.
- (2) At least 75 percent of the cost for eligible medical expenses, with no more than a 25 percent out-of-pocket cost to you (patient copayment).
- (3) A claims representative located in the U.S. In addition, you must be provided with an identification card (or reasonable alternative) written in English, which includes payment provisions listed in U.S. dollars and the U.S. telephone number of the U.S. claims representative.

If your private medical insurance plan does not meet all of the above requirements, you must purchase MIP. For further information on MIP or adequate medical insurance requirements, call the SHS Insurance Office at 825-1856.

Enrollment in Classes

The quarterly *Schedule of Classes* contains up-to-date listings of class times, meeting rooms, instructors, and all information necessary for enrolling in classes. Using the *Schedule* and with the aid of academic counseling from your school or college advisers, you can assemble a program of courses (see "Choosing Your Major" and "Planning a Program" later in this chapter).

You should plan two or three alternate programs in case your first choice of courses is not available. You may not choose two courses in the same final examination group and should not select classes that conflict in meeting times. If conflicts are unavoidable, consult with the instructor of each course at the first class meeting.

Telephone Enrollment

The UCLA Telephone Enrollment System is a specialized computer interface which allows you, the student, to directly access UCLA's enrollment data base by using a touch-tone telephone. A digitally recorded human voice instructs you through each transaction. By using this telephone access, you can enroll in classes, add, drop, or exchange classes/sections, put yourself on the wait list for a class, change the grading basis for a class (i.e., Passed/Not Passed), obtain a reading of your Study List, check your wait list position, and obtain instructor names for all courses. You enroll during the appointment periods printed on your Registration Form. Consult the *Schedule of Classes* for full enrollment details.

In-Person Enrollment

For classes that require written approval or specialized processing, you may enroll at computer terminals at 1113 Murphy Hall. Consult the *Schedule of Classes* for specific processing times.

Study Lists

On Friday of the second week of instruction the Study List of enrolled courses becomes "official," all wait lists are eliminated, and a computerized Official Study List is mailed to each registered student. (If you do not

receive yours within 10 days, confirm your course enrollment by calling URSA at 208-0425.) **You are responsible for all courses and the grading basis as listed on the Official Study List, and you cannot receive credit for courses not listed.** Unapproved withdrawal from or neglect of a course entered on the Study List will result in a failing grade.

Beginning with the third week of instruction, changes to your Official Study List require an Enrollment Petition which is available for purchase in the school supplies section at any ASUCLA Students' Store. Approval signatures are required before processing. If you add a special studies (199) course, you must also bring an approved copy of the Petition for Enrollment in Special Studies 199 Course. Consult the *Schedule of*

Classes for deadlines and complete instructions. Note: When retroactive approval is given, in exceptional cases, to drop a course or to change the grading basis, the course and action will appear on the official transcript.

Change of College/School or Major

Changing your college/school or major requires the approval of the college/school or department you want to attend. Applications for change of college/school are made by petition, which is available without charge from your college or school office. Change of major petitions are available from the department you want to attend. You may not change majors after the opening of the last term of your senior year.

Undergraduate Fees and Financial Support

Fees

Although the exact cost of attending UCLA will vary according to personal habits, tastes, and financial resources, there are some fees that all UCLA students must pay. Each entering and readmitted student is required to submit a Statement of Legal Residence to the Registrar's Office. Legal residents of California are not required to pay tuition at the University. Students classified as nonresidents must pay tuition of \$2,566 per term (for a full definition of residence and nonresidence, see the Appendix of this catalog).

At the time of registration each term, all undergraduates must pay the following fixed fees. **Fees for Fall Quarter 1992 are current as of publication date but are subject to change without notice by The Regents.**

Term Expenses, Fall 1992

University registration fee	\$ 231.00
Educational fee	710.00
Ackerman Student Union fee	2.50
Undergraduate Students Association fee	13.00
Wooden Recreation Center fee	11.00
Total for California residents	\$ 967.50
Nonresident tuition fee	\$2,566.00
Total for nonresidents	\$3,533.50

The registration fee covers certain student expenses for counseling service, all laboratory and course fees, athletic and gymnasium facilities and equipment, lockers, registration, graduation, and care and treatment on campus by the Student Health Service. This fee is charged whether or not you make use of these services.

Other Fees

Miscellaneous fees charged to UCLA undergraduates include a \$50 charge for late payment of registration fees (after the fee deadline) or late filing of the Study List (after Friday of the second week of classes). A \$60 fine will be assessed if any check for registration fee payment is returned by a bank (i.e., stopped payment, insufficient funds, etc.). Minimal charges of \$5 or less are assessed for most petitions and other special requests. A complete list of fees may be found in the *Schedule of Classes*.

Fee Refunds

Students who formally withdraw from the University during the first five weeks of instruction may receive partial refunds of fees. For the refund schedule and more information, see "Withdrawal" in Chapter 4 of this catalog or consult the *Schedule of Classes* for specific refund dates for each term.

Reduced Fee Programs

UCLA recognizes the need for undergraduate part-time study in special circumstances. If you have ongoing family or employment responsibilities or health problems which preclude full-time study, you may qualify for part-time enrollment.

If you have approval from your college or school to enroll in 10 units or less, you may qualify for a fee reduction. Nonresident students pay only half the nonresident tuition fee; residents pay half the educational fee. You must file the Request for Fee Reduction form with your college or school by Friday of the second week of instruction. Fee assessment is based on total units enrolled as of Friday of the third week of instruction. If you receive the part-time fee reduction from your academic dean, you may not also use the UC employee reduction; you must use one or the other.

Living Expenses

Printed below are the estimated yearly budgets for undergraduate California residents. Nonresidents must add the \$7,699 annual tuition fee to their total expenses for an accurate estimate. Expenses cover the three regular session terms of the 1992-93 academic year and do not include Summer Sessions. The budgets are designed to serve as a guide and are subject to change.

Estimated Annual Budgets for Undergraduate California Residents

	Commuter, Living in Parents' Home	Living in UCLA Residence Hall, Co-Op, Sorority, or Fraternity	Living in Off-Campus Apartment or House
University fees	\$2,903.50	\$ 2,903.50	\$ 2,903.50
Books and educational supplies	775.00	775.00	775.00
Food and rent	2,600.00	5,650.00	6,000.00
Transportation	2,580.00	165.00	1,780.00
Personal	—	1,490.00	1,000.00
Total budget	\$8,858.50	\$10,983.50	\$12,458.50

For more information on housing, see Chapter 1 or contact the UCLA Community Housing Office, 350 De Neve Drive (825-4491).

Financial Support

Information:
Financial Aid Office
A129J Murphy Hall
(310) 206-0400

It is not required that you come from a low-income family in order to qualify for financial aid. You must, however, demonstrate "financial need," which is defined as the difference between the cost of attending UCLA and the amount that you and your family should be able to contribute. The University expects that students and their families will bear as much of the necessary cost of a student's education as their circumstances will permit.

The Financial Aid Office publishes a *Financial Aid Handbook* which provides more complete information than this catalog can give. You can get a copy free of charge from the Financial Aid Office, A129J Murphy Hall, UCLA, Los Angeles, CA 90024-1435.

Applying for Financial Aid

The deadline for filing all undergraduate financial aid applications for academic year 1993-94 is **March 2, 1993** (applications for 1992-93 would have had to be filed by March 1992). Because of the limits being placed on financial aid funding, meeting deadlines is more crucial than ever. Applications received after the deadline will be considered only if funds are still available. The *Daily Bruin* and other campus media publish information on deadline dates.

Prospective students must first apply for admission to UCLA by filing the *UC Application for Undergraduate Admission and Scholarships* during the filing period (see "Undergraduate Admission" at the beginning of this chapter). You can also use the admissions application to apply for undergraduate scholarships.

Student Aid Application for California (SAAC)

One of the key assumptions of financial aid is that parents, to the extent that they can contribute, have primary responsibility for financing the cost of a student's education. To permit an evaluation of need, all students who apply for need-based aid must provide financial information on the Student Aid Application for California (SAAC). If you are financially independent according to financial aid guidelines, your own financial circumstances are analyzed rather than those of your parents.

The SAAC is used to apply for Pell Grants, funds administered by UCLA, and Cal Grants administered by the California Student Aid Commission. It is available from California high schools and colleges and from the UCLA Financial Aid Office, and should be filed by March 2 with the appropriate processing service. Be sure to indicate that a report is to be sent to UCLA.

Continuing students may obtain UCLA Scholarship and Financial Aid Application Packets beginning in January of each year at the Financial Aid Office. Continuing undergraduate students from foreign countries may pick up a Financial Aid Application for International Students at the same office. No financial aid can be awarded to international students in their first year of attendance at UCLA.

Kinds of Financial Aid

There are four basic kinds of aid: scholarships, grants, loans, and work-study employment. Since most students are eligible for several of these, the Financial Aid Office usually offers a combination "package" consisting of some money that is a gift (scholarship or grant) and some that will have to be paid back or worked for. If you indicate a preference for work or loan, the Financial Aid Office will attempt to honor it.

Unless otherwise stated, you must demonstrate financial need to qualify for aid, and you must be making normal academic progress as defined by your college or school, your department, and the Financial Aid Office (for a full definition of financial aid minimum progress standards, see the *Appendix of this catalog*).

Scholarships

Scholarships are gifts that do not have to be repaid. The Undergraduate Scholarship Program at UCLA rewards academic excellence and promise and provides assistance in meeting the expenses of an undergraduate education. Scholarships are expected to create opportunities for further academic growth and development.

Financial need is a prerequisite only for University and name (endowed) scholarships other than those listed below. Each year approximately \$300,000 is awarded from the many different scholarship funds. Awards range from \$100 to \$2,000 and are not renewable. You must reapply each year for continued consideration.

Regents Scholarships

One of the highest honors that may be conferred on an undergraduate student is the awarding of a Regents Scholarship. Unlike other University scholarships, these are awarded for four years to students entering from high school, and for two years to juniors. A UCLA faculty committee selects Regents Scholars on the basis of their exceptional academic achievement and promise. Financial need is not a criterion for this award; scholars receive a yearly honorarium of \$500 if they have no financial need. Scholars who establish financial need by filing the SAAC receive a yearly stipend to cover the amount of their need. In addition to the monetary awards, Regents Scholars receive special privileges.

National Merit Scholarships

UCLA sponsors a number of four-year scholarships for entering freshmen who are finalists in the National Merit Scholarship competition. Finalists who are admitted to UCLA must select UCLA as their institution of choice and must meet UCLA's scholarship criteria in order to receive a UCLA Merit Scholarship. Awards range from \$500 to \$2,000.

UCLA Alumni Association Scholarships

Alumni Scholarships are available to California high school graduates who will be UCLA freshmen in the Fall Quarter and to community college transfer students. No financial need is involved, but eligibility requirements exist, and you should have demonstrated leadership ability, be involved in extracurricular activities, and show academic excellence and promise. Alumni Scholarships are merit-based and competitively awarded; amounts range from \$500 to \$10,000. The Dr. Ralph Bunche Scholarship and Leadership Awards, also presented by the UCLA Alumni Association and named in honor of the Nobel Peace Prize laureate and UCLA alumnus, are given to students from historically underrepresented backgrounds. In addition to the monetary awards, Alumni Scholars receive special privileges. Recipients who receive work-study and/or loans as part of a financial aid package will receive additional alumni grant monies.

ROTC Scholarships

ROTC Scholarships are awarded on a competitive basis to U.S. citizens regardless of parents' income. Scholarships provide tuition, a book allowance, fees, and a tax-free monetary allowance of \$100 per month during the academic year. Applications for four-year scholarships may be obtained by calling the appropriate department at UCLA — Army, 825-7381; Air Force, 825-1742; Navy, 825-9075 — or by writing to *Armed Forces Opportunities, P.O. Box 2865, Huntington Station, NY 11746-2102*. When writing, specify which service (Army, Air Force, Navy/Marine) scholarship is desired. Completed applications should be received prior to July 15 (Army) or August 15 (Air Force and Navy) for early

consideration, but no later than December 1 (all services) of the year preceding college matriculation. Three- and two-year scholarship applications may be obtained from the appropriate UCLA department and must be submitted prior to February 1.

Prizes

The generosity of alumni and friends of the University provides for competitive prizes and awards in several fields. Selections are made by committees in appropriate academic departments. See your departmental adviser for details.

Grants

Grants are gifts that do not have to be repaid and are based solely on need. Whenever guidelines and funds permit, your financial aid package will include a grant.

Pell Grants

Pell Grants are federal aid awards intended to be the "floor" of financial aid packages. As such, they may be combined with other forms of aid in order to meet the full costs of education. Amounts for 1992-93 range from \$250 to \$2,400, depending on federal funding, and are determined by your own and your family's financial resources. U.S. citizens and eligible noncitizens may apply by filing the SAAC. The University requires all eligible undergraduates to apply for a Pell Grant.

Cal Grants A and B

California residents who have not completed more than nine quarters or six semesters of college work prior to September 1992 are eligible to apply for a California Student Aid Commission Cal Grant award. The SAAC is the official application for these programs. "Cal Grant A" awards are applied toward educational and registration fees. They are based on need and academic achievement and are renewable each year. "Cal Grant B" awards are intended to assist low-income families and are renewable annually. First-year freshmen receive a quarterly stipend. In subsequent years recipients receive a stipend plus funds toward educational and registration fees.

State University Grants

These grants provide eligible students with financial assistance from state funds. Awards range from \$300 to \$2,400. All undergraduate students are considered.

Supplemental Educational Opportunity Grants

These awards are federally funded and are granted only to undergraduates with financial need. Awards range from \$600 to \$2,400. Recipients must be U.S. citizens or eligible noncitizens.

Loans

Loans allow you to postpone paying some of the costs of your education until you have completed school. A financial aid offer almost always includes a long-term, low-interest loan. The loans come from revolving funds; most repayments are immediately reloaned to current students.

It is essential that borrowers realize their commitment and responsibility to repay according to repayment schedules. Before accepting a loan, you should assess your total educational debt and your ability to repay following graduation. The University will make every effort to assist you during the repayment of your obligation, but University services, including registration and the release of official transcripts, will be withheld if your loan becomes delinquent. Seriously delinquent accounts are referred to a professional collection agency for action.

All loan recipients must come to the Student Loan Services Office (A227 Murphy Hall) for a loan exit interview before leaving UCLA for any reason. This interview will help you understand your loan agreement and your rights and responsibilities. If you fail to participate in an exit interview, the University will place a hold on your academic records and registration materials. Call 825-9864 for an interview appointment before graduating, transferring, or withdrawing from UCLA.

Perkins Loans

These low-interest loans are available to all students who are U.S. citizens or eligible noncitizens and who are carrying at least half the full-time academic workload. Repayment begins six or nine months after you terminate at least half-time study. Minimum repayment is \$90 per quarter, including interest, up to a maximum of 10 years.

Nursing Loans

To be eligible for a nursing loan, you must be a U.S. citizen or eligible noncitizen and a student in the School of Nursing. Up to \$1,500 is available per academic year. For more information, contact the financial aid counselor either in the Financial Aid Office or in the School of Nursing.

Emergency Educational Loans

You need not be receiving financial aid to apply for emergency loans. You may borrow up to \$100 for immediate emergency needs; this amount is repayable within five weeks. To qualify, you must be a registered UCLA student with a satisfactory loan repayment record. Applications are available from the Student Loan Services Office, A227 Murphy Hall.

Stafford Student Loans (SSL)

Federal and California Stafford Student Loans (formerly known as Guaranteed Student Loans) are long-term need-based loans made by banks and credit unions. They are available to U.S. citizens and eligible noncitizens who are enrolled in at least a half-time program at UCLA. You should check with various lending institutions to determine their particular loan policies, but the Financial Aid Office must process applications before you submit them to a lending institution. Applications are available from the Financial Aid Office, A129J Murphy Hall.

Repayment of the SSL begins six to nine months after graduation or withdrawal and continues up to a maximum of 10 years. Undergraduates may borrow from \$2,625 to \$4,000 per academic year up to a total of \$17,250. SSL processing takes approximately one to three weeks.

Work-Study Programs

Work-study is a need-based program designed to expand part-time job opportunities for students. The program allows you to work a maximum of 20 hours per week while attending school and 40 hours per week during breaks. An academic year's work-study award may range from \$1,000 to \$2,400, but your gross earnings may not exceed the amount awarded to you. There are two basic work-study programs available.

Under **College Work-Study**, the federal government pays a portion of your hourly wage; your employer contributes the balance. Whenever possible, work is related to your educational objectives. Employment may be on or off campus. Hourly pay rates comply with minimum wage laws and vary with the nature of your work, experience, and capabilities. To be eligible you must be a U.S. citizen or eligible noncitizen.

The **President's Work-Study** program is administered in the same manner as College Work-Study except that The Regents of the University and your employer provide funding, and you are limited to on-campus jobs.

Undergraduate Majors and Degrees

DEPARTMENTS/MAJORS	DEGREES	OTHER
College of Letters and Science		
African Studies	—	Special Program (taken jointly with an organized major)

Getting Your Bachelor's Degree

The College and Schools

The UCLA campus consists of one college and 13 schools, most of which are subdivided into departments. The courses of instruction are administered within the departments.

The **College of Letters and Science** provides a broad, nonprofessionally oriented curriculum leading to both undergraduate and graduate degrees.

The **schools** provide training for specific professions and are authorized to grant professional degrees (e.g., Master of Business Administration, Doctor of Education, Master of Public Health). UCLA has 13 professional schools, four of which offer undergraduate degree programs: School of the Arts, School of Engineering and Applied Science, School of Nursing, and School of Theater, Film, and Television.

Each college and school has its own degree requirements and is headed by a dean or provost who has final academic authority. Thus, when you attend UCLA, you are enrolled not only at the University of California, Los Angeles campus, but in a specific college or school within the University. Your academic life is governed by the college or school which houses your major.

As the chart on the previous pages shows, UCLA offers Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) degrees in a broad range of disciplines. There are no undergraduate minors at UCLA, but there are a number of special programs which you may complete as an adjunct to your major. The bachelor's degree (you may earn only one) is the culmination of your undergraduate work; master's and doctoral degrees are earned in graduate study.

Knowing Your Responsibilities

UCLA provides its students with a wide variety of academic assistance and personal support resources, but it is up to you to realize when you need help and to seek it out. It is also your responsibility to keep informed and to comply with the rules, regulations, and policies affecting your academic standing and your life as a UCLA student. Consult this catalog, the college and school announcements, and the *Schedule of Classes* for the information you need; watch for official announcements in the *Daily Bruin* and on campus bulletin boards. Meeting academic deadlines, monitoring your Study List for accuracy, completing prerequisites, and fulfilling degree requirements are all part of your academic duties as a student. Living up to your responsibilities will add immeasurably to the value and enjoyment of your education (also see "Student Conduct" in the Appendix of this catalog).

Choosing Your Major

One of the most important decisions you will have to make in college is your choice of major — the field of study which represents your principal academic interest and which possibly will contribute toward your career goals. Some students select their major at the time they fill out the University's application for admission. A far greater number, however, are undecided about their major.

If you are in the College of Letters and Science, you do not need to declare your major in your freshman year. The college allows you to attend with an undeclared major until the end of your sophomore year. In fact, if you are not certain of your specific academic goals, it is often wise to wait and explore the diversity of subject areas offered at UCLA. Enroll in introductory courses (usually numbered below 100) in a variety of

disciplines to learn the scope and vocabulary of the major. It is not unusual for students to become enthusiastic about disciplines previously unfamiliar to them. With careful planning, such courses may also apply toward fulfilling college requirements for whatever major you choose. To narrow your choices further, carefully consider general college requirements, the description of courses offered in the major, and the departmental requirements for completing the program of study. Look at the books required for each course. Sit in on a few classes and talk with professors during their office hours. Discuss your interests and plans with a departmental counselor or faculty adviser, a college counselor, or advisers in the Placement and Career Planning Center.

A few words of caution: certain majors, especially in the arts, engineering, and the sciences, require early declaration. Some have enrollment quotas and will allow application by new majors only during a specified term. Check with the departmental adviser for the majors that interest you.

In addition, each UCLA undergraduate is limited to between 208 and 216 quarter units, depending on the college or school, to complete the academic program and fulfill all degree requirements. So, if you wait to declare a major, don't wait too long. In any case, you must declare a major by the beginning of your junior year (90 quarter units).

When you are ready to declare your major, or if you wish to change from one major to another, pick up a Petition for Change of Major at the college or school office. There is no fee for this petition.

Planning a Program

Every new student should obtain academic counseling before enrolling in classes at UCLA (counseling is required in the School of Engineering and Applied Science). Working with a tentative major in mind, you need to plan courses to satisfy all of the degree requirements while staying within the maximum number of units required for graduation. The Orientation program for new students will take you through a step-by-step process designed to insure you enroll in an effective program (see "Orientation" later in this chapter). If you cannot attend Orientation, see your college or school adviser or, if you have selected a major, make an appointment with your major department adviser before enrolling in classes.

Undergraduate Degree Requirements

In all campus units except the School of Engineering and Applied Science, you are required to earn a minimum of 180 units from all college-level coursework for the bachelor's degree at UCLA. A maximum of 208 units is allowed in the School of the Arts, School of Nursing, and School of Theater, Film, and Television; in the College of Letters and Science a maximum of 216 units (228 for double majors and special programs) is allowed. In the School of Engineering and Applied Science, the minimum units allowed are between 180 and 201 (depending on the program); 213 maximum units are allowed.

As you work toward a bachelor's degree, be aware that in addition to unit requirements there are three types of requirements which you must satisfy. The first type consists of Universitywide requirements which all undergraduates must satisfy; the rest vary depending on your major and the college or school which offers it.

- (1) University requirements — Subject A or English as a Second Language (ESL), and American History and Institutions;
- (2) College or school requirements (e.g., credit and scholarship, English composition, general education requirements);
- (3) Department requirements (courses in preparation for the major and in satisfaction of the major).

University requirements are described below. Turn to "Requirements for the Bachelor's Degree" in the appropriate school or college chapter for a description of the college or school requirements, and then to the individual departments within each college and school for the department requirements.

University Requirements

The University of California has established two requirements which all undergraduates must satisfy in order to graduate: Subject A or English as a Second Language (ESL), and American History and Institutions. It is your responsibility to see that these requirements are fulfilled.

Subject A

Because proficiency in English composition is so important to successful performance in many courses, Subject A is the only requirement for graduation that you must satisfy before entering UCLA or during your first year in residence. You may meet this requirement by:

- (1) Scoring 3, 4, or 5 on one of the College Entrance Examination Board (CEEB) Advanced Placement Tests in English OR
- (2) Scoring 600 or better on the CEEB Achievement Test in English Composition OR
- (3) Presenting transfer credit for an acceptable college-level course in English composition (passed with a grade of C or better) at another institution OR
- (4) Passing the Subject A Examination. All freshmen from California high schools should have taken the Universitywide Subject A Examination in May 1992; others will take an examination at UCLA early in their first term.

If you do not meet the requirement in one of the ways described above, Academic Senate regulations require you to enroll in either English A or 2 (determined by performance on the Subject A Examination) as early as possible during your first year in residence. Each course must be taken for a letter grade and passed with a grade of C or better. If you receive a final grade of C – or less, you must repeat the course during your next term in residence. Satisfaction of the Subject A requirement is a prerequisite to English 3 and all subsequent English courses.

English as a Second Language (ESL) Students: If your native language is not English, you are required to take the UCLA English as a Second Language Placement Examination (ESLPE) in addition to the Subject A Examination. Results of both examinations will be reviewed to determine which track (Subject A or ESL) better meets your needs. If you are placed in the Subject A track, you may satisfy the Subject A requirement by following the guidelines listed above. If you are placed in the ESL track, you may satisfy the requirement by completing the required courses in the English as a Second Language 33 series — one or more of courses 33A, 33B, 33C — and 35, depending on your ESLPE results. Each course must be passed with a grade of C or better (C – or a Passed grade is not acceptable). You must begin taking the required courses during your first term in residence at UCLA and then proceed in the English as a Second Language 33 series followed by course 35. All units apply toward graduation but cannot be applied toward general education requirements.

Transfer students whose native language is not English may be required by the Office of Undergraduate Admissions and Relations with Schools to take the ESLPE even if they have received transfer credit for an acceptable college-level course in English composition at another insti-

tion. Those without transfer credit must take both the ESLPE and the Subject A Examination.

American History and Institutions

This requirement is based on the principle that a U.S. citizen attending an American university should understand the history and public institutions of the U.S. under the federal and state constitutions. Candidates for a bachelor's degree must satisfy the requirement in American History and Institutions by one of the following methods:

- (1) Completing a year's course in American history or American government, or a one-year combination of both, in high school with an average grade of B or better OR
- (2) Completing any one of the following UCLA courses with a grade of C or better, or a grade of Passed:
 - Afro-American Studies M104A, M104B, M158A, M158B, M158C
 - Asian American Studies M196A
 - Chicana and Chicano Studies M159A, M159B
 - Economics 183
 - English 80, 85, M104A, M104B, 115A, 170, 171, 172, 173, 174, 176, 177
 - Geography 136
 - History 6A, 6B, 6C, 7A, 7B, 145A, 145B, 146A, 146B, 147A, 147B, 147C, 148A, 148B, 148C, 149A, 149B, 150A, 150B, 150C, 151A, 151B, 152A, 152B, M153, 154A, 154B, 154C, 154D, 155A, 155B, 156A through 156H, 157A, 157B, M158A through 158E, M159A, M159B, 160, 161, 162, 163, 164
 - Political Science 1, 40, 70, 80, 114A, 114B, 143, 144, 145, 172A, 172B, 183A

Equivalent courses completed in UCLA Extension or at another college institution, and accepted by the Board of Admissions, may be used to fulfill the requirement OR

- (3) Presenting a satisfactory result of the requirement, by examination, as administered at another college or university within the state OR
- (4) Scoring 500 or better on the College Entrance Examination Board (CEEB) Achievement Test in American History OR
- (5) Scoring 3, 4, or 5 on the CEEB Advanced Placement Test in American History.

Candidates for an instructional credential, but not for a degree, must take one of the following courses: History 7A, 7B, 151A, 151B, Political Science 172A, or 172B.

Students attending the University on an F-1 or J-1 visa may petition for exemption from this requirement by showing proof of temporary residence in the U.S.

For more information on this requirement, contact the undergraduate History Department counselor in 6248 Bunche Hall (825-3720).

Course Credit and Minimum Scholarship

The grades A through C and Passed denote satisfactory progress toward the bachelor's degree. The grades C – through D – yield unit credit but may not satisfy certain scholarship requirements. Even when they do, they must be offset by grades of C or better in other courses.

In order to qualify for a bachelor's degree in any college or school at UCLA, you must earn at least a C (2.0) average in all courses taken at any University of California campus. If you fail to maintain this level, you may be placed on academic probation or may become subject to dismissal.

Academic Probation

You will be placed on probation if your overall grade-point average falls between 1.5 and 1.99 or if you do not earn at least a 2.0 GPA in any one term. While you are on probation, you may not take any course on a Passed/Not Passed basis, and you may have to limit your Study List to 12 units.

Your probation will end at the close of a regular term if you have attained a C (2.0) average for the term and a cumulative C average in all University work. If you do not end probation within two terms, you will become subject to dismissal.

Academic Dismissal

You will be subject to dismissal from the University under any of the following conditions:

- (1) If your grade-point average in any one term is less than 1.5 OR
- (2) If you do not earn at least a C (2.0) average in any term when you are on probation OR
- (3) If you do not end probation within two terms.

If you are subject to dismissal, your transcript will carry that notation. You should make an appointment with your college or school counselor. Depending on your situation, you will be given conditions for continuation, or you will be dismissed from the University.

Your college or school counselor can explain the conditions for readmission if you wish to return to the University after dismissal (see "Readmission" earlier in this chapter).

Progress Toward the Bachelor's Degree

The undergraduate curriculum at UCLA is designed as a four-year curriculum. In order to graduate in four years, you need to complete at least 45 units during each academic year, not just the 36 required for "minimum progress." In the absence of special circumstances justifying slower progress, you should plan to complete 45 units per year, in an arrangement of courses appropriate to your needs. Consult your college or school counselor if you have questions or seek advice.

Each college and school enforces minimum enrollment or minimum progress regulations. You may be subject to disqualification for failing to meet minimum progress requirements. Check with your college or school counselor. Please read the degree requirements section under each college and school for specific Study List limits. See Chapter 4 for information on concurrent enrollment, credit by examination and credit from other institutions, and special studies (199) course limitations.

UCLA in 1947.

Academic Resources and Assistance

Alternative Academics

UCLA has a broad range of options that can lend an added dimension to your undergraduate academic program. You will find other services and programs available to both graduate students and undergraduates in Chapter 1 of this catalog.

Center for American Politics and Public Policy (CAPPP)

The Center for American Politics and Public Policy selects 20 to 30 undergraduates each fall and spring to participate in its Quarter in Washington, DC Program, which offers an exciting opportunity to combine UCLA courses with research and field experience in areas directly related to the policy-making process of the federal government. Students live in the Washington area for 12 weeks, dividing their time between courses taught by UC faculty and a part-time field placement position. They are registered as UCLA students and earn academic credit for the courses taken. Most of the courses emphasize politics and public policy and carry political science credit. Efforts are also made to provide a course in a subject other than political science, such as art or history. All courses take advantage of Washington's unique resources for study and research.

CAPPP administrators help students find a field placement, which is central to a research seminar each student takes, in a Washington organization. Washington field placement locations have included the American Enterprise Institute, CNN, Carnegie Endowment for International Peace, Congressman Mel Levine's Office, General Accounting Office, Heritage Foundation, Japan Economic Institute, Justice Department, Office of National Drug Control Policy, Senator Edward Kennedy's Office, Treasury Department, and others. For further information and applications, contact the CAPPP Office in 310 Graduate School of Library and Information Science Building (206-3109).

Council on Educational Development

The Council on Educational Development (CED) offers special courses and programs that encourage educational diversity and enrichment for undergraduates. CED works closely with the college, schools, and research centers on campus to support new academic programs and courses. Many of these courses cover socially important issues which, because they are new, are not addressed in existing academic departments. Many involve nontraditional educational concepts, interdisciplinary topics, and subjects on the leading edge of faculty interest.

Each year several courses focus on medicine, law, and human values. Students analyze ethical, legal, and scientific values in medical and mental health care issues, such as genetic screening, human experimentation, patients' rights, and medical technology.

For information about CED courses, consult the *Schedule of Classes*. Your college, school, or department can advise you about degree credit for CED courses. The office is located in 80 Powell Library Building (825-5467).

EXPO Center

The Extramural Programs and Opportunities (EXPO) Center offers access to a wide variety of off-campus learning experiences. For more information on any of the programs or services listed below, contact the EXPO Center, A213 Ackerman Union (825-0831).

UCLA National Internship Program — More than 4,000 UCLA students have learned about the inner workings of government and business while serving in the internship program, the largest of its kind at any university in the nation. Bruins serve full-time internships for one or more terms on the staffs of elected officials, public interest groups, government agencies, and corporate offices in Sacramento and Washington, DC. Others are participating in business, banking, and the arts in New York and San Francisco. Stipends for students in the program can be arranged.

International Opportunities — The EXPO Center counsels students on study, travel, volunteer, international internship, and work opportunities outside the U.S., offering information on some 2,400 overseas study programs open to UCLA students. EXPO also maintains a library of current materials related to study, travel, and other opportunities abroad. International Student and Teacher Identity Cards and Youth Hostel memberships are issued at the center.

EXPO students in Washington, DC.

Field Studies Development

Field Studies Development, a division of the Office of Instructional Development, helps students, faculty, and academic departments to develop meaningful learning experiences outside the classroom. These may be in the form of internships, field studies or research, or community service. The office is located in 70 Powell Library Building (825-7867).

Departmental Field Studies — Academic field study programs have been developed in anthropology, Asian American studies, business and administration, communication studies, education, English, film and television, folklore, geography, history, physiological science, psychology, sociology, urban planning, and women's studies. Departmental coordinators work with you to develop field projects and find placements and academic sponsors.

Independent Field Studies — You may design internships and field study opportunities to meet your specific academic, personal, and career goals. A field study coordinator assists you with your plans and helps identify faculty sponsors for your field study. Most departments offer independent field study opportunities.

Community Service — Learning Programs — These programs enable students to do community service while studying topics related to economics, history, sociology, education, or urban planning.

Sequential or Immersion Options — Field Studies Development sponsors multiple course sequences (taken during one term or over a period of two or three terms) where students study a single issue from different perspectives. For example, the Sociology Department sponsors a three-course "term" which focuses on the control of crime issue, and the Geography and Sociology Departments sponsor a three-term program for first- and second-year students on the study of the urban underclass.

Developmental Disabilities Immersion Program (DDIP) — Cosponsored by Field Studies Development, the Department of Psychology, and the Department of Psychiatry and Biobehavioral Sciences, DDIP offers an intensive studying and working experience in developmental disabilities. The program is a full two-term sequence offered in Winter and Spring Quarters. For more information, call 825-1627.

Freshman and Sophomore Programs

Honors Collegium

The Honors Collegium is an innovative educational alternative designed primarily for UCLA's promising freshmen and sophomores. For a complete description of this program, see Chapter 5 on the College of Letters and Science.

Professional Schools Seminar Program (PSSP)

This program offers seminars that explore topics bridging various academic disciplines and professional practice. Students seeking to define their own academic and career goals gain valuable exposure to (1) research frontiers in the professions, (2) policy and ethical issues, and (3) historical and sociological perspectives on professional practice.

Seminars are offered in Fall, Winter, and Spring Quarters (consult the *Schedule of Classes*). Enrollment is limited to allow students close contact with professional school faculty members; lower division students are preferred. You must satisfy the Subject A requirement before enrolling in these seminars. General education credit is granted for most seminars. For further information, contact the PSSP in 80 Powell Library Building (825-5467).

Individual Classes

Most departments offer the individual study (199) course for seniors — or juniors with at least a B average — who want to pursue a particular research interest. Consult your department or the departmental listings in this catalog for further information.

Individual Majors

Highly motivated students who find that no single major accommodates their specific interest in a given subject may propose designing their own major. Proposals are prepared with faculty guidance and sponsorship and are thoroughly examined for cogency, completeness, and academic merit.

The requirements for an individual major vary with each college and school at UCLA, although maintaining a high scholastic average is usually mandatory. Please refer to the appropriate college or school chapter.

Reserve Officer Training Corps (ROTC)

The University of California, in accordance with the National Defense Act of 1920 and with the concurrence of The Regents, offers courses and programs in military training. This voluntary training allows you to qualify for an officer's commission in the Army, Navy, Air Force, or Marine Corps while completing your college education. ROTC courses are offered by three departments within the College of Letters and Science: Aerospace Studies (Air Force), Military Science (Army), and Naval Science (Navy and Marine Corps). Equipment, uniforms, and textbooks are provided. The programs carry a monthly stipend in the junior and senior years, and additional financial aid is available to qualified students. Individual programs are described in detail in Chapter 5 on the College of Letters and Science.

Student Research Program (SRP)

The Student Research Program invites undergraduates to become more directly and fully involved in the University research community through opportunities to participate in faculty research projects. You gain valuable research experience, acquire in-depth knowledge of a specific field or discipline, and establish a "partnership" with a senior faculty member. Participation is voluntary, and after completing 80 hours of research (approximately 10 hours per week), you receive a notation on your transcript. *There is no required minimum grade-point average.* Many professors require only that you be enthusiastic and responsible.

To join, you must attend **one** of the 30-minute SRP Information Workshops held during the first two weeks of each term (locations are listed in the *Daily Bruin* and in A316 Murphy Hall). At the workshops you learn the process of identifying a sponsor, completing the learning contract, and actually getting started on a research project. Research opportunities are available in **all** departments and professional schools. For further information, brochures, and Faculty Research Directories, contact the SRP Office in A316 Murphy Hall (825-6443).

Teaching Careers

Although UCLA has no undergraduate major in education, you may prepare for a career in teaching and/or education on campus. Information is available from the following offices:

- (1) Specialization in Education Program Office, 1605 Maxxam Building, for information regarding this specialization. The program is described in detail in Chapter 5 on the College of Letters and Science.
- (2) College of Letters and Science Preprofessional/Pregraduate Advising Office, A316 Murphy Hall, for information regarding the Diversified Liberal Arts Program for instructional credential candidates. The program is described in detail in Chapter 5 on the College of Letters and Science.
- (3) Placement and Career Planning Center, for information on employment opportunities in teaching and education.
- (4) UCLA Graduate School of Education Office of Student Services, 1605 Maxxam Building, for information on master's and doctoral degree programs in education and current information on requirements for various instructional credentials.

Advising and Academic Assistance

UCLA's academic standards are high, and many students find they need some form of academic assistance. Help is available in several forms: staff and student counselors, faculty advisers, services, and special programs. You need only to seek it out. This section introduces you to the many kinds of assistance available to undergraduates. Refer to the section on "Student Services" in Chapter 1 for other helpful programs.

College and School Advisers

Each college/school and academic department at UCLA has a staff of academic counselors and advisers who are knowledgeable and experienced. They are eager to help you plan your academic program, monitor your progress toward the bachelor's degree, provide information about college and major requirements and prerequisites, and assist you with academic problems, improving study habits, and program planning. Counseling offices for each undergraduate college and school are listed below.

College of Letters and Science — A316 Murphy Hall, 825-1965 or 825-3382 (**Honors Programs** — A311 Murphy Hall, 825-1553 or 825-3786)

School of the Arts — 125 East Melnitz Building, 825-9705

School of Engineering and Applied Science — 6426 Boelter Hall, 825-2826

School of Nursing — 2-200 Factor Building, 825-7181

School of Theater, Film, and Television — 125 East Melnitz Building, 825-9705

Counseling Assistants

Counseling assistants (CAs) are UCLA graduate students who have been specially trained to help new students with the transition into University life. Employed by the Division of Honors and Undergraduate Programs in the College of Letters and Science, they represent a number of academic disciplines in the college. CAs help new students with program planning and course selection and provide assistance in skill building and personal support. You may make an appointment with a CA in A316 Murphy Hall (206-6681).

ASK Peer Counselors

The ASK program provides an extension to the counseling services available to College of Letters and Science undergraduates. ASK counselors are students trained to provide you with academic information, advisement, and referral in a convenient walk-up setting.

You can find ASK counselors at these campus locations: Campbell Hall (southwest corner), Placement and Career Planning Center, Powell Library (southeast corner), and Royce/Powell Quad, weekdays 10 a.m. to 2 p.m.; in front of 1105 Murphy Hall, weekdays 9 a.m. to 4 p.m.

Orientation

Orientation at UCLA provides a comprehensive introduction to campus life. During the summer and before the beginning of Winter and Spring Quarters, special programs offer new undergraduates extensive academic counseling and educational planning. During Orientation you work in small groups with peer counselors and professional academic advisers. You gain insight into necessary academic skills, learn how to plan and construct your academic program, and become familiar with the educational opportunities, student services, and facilities available at UCLA. Individual counseling sessions help you adjust to University life and fulfill the advising requirements of the college and some schools. Sessions for parents are also offered.

During the summer, Orientation offers three-day, two-night dormitory live-in programs for freshmen and both two- and one-day programs for transfer students. Prior to Winter and Spring Quarters, a one-day on-campus program is offered. There is a fee for participation. For more information, contact the Orientation Office in 3063 Griffin Commons (206-6685).

College Tutorial Services

College Composition and ESL Tutorials

The College Composition Tutoring Lab, in cooperation with the UCLA Writing Programs, offers individual assistance to students enrolled in English A, 2, and 3 and to students writing papers for other UCLA courses. The lab is staffed by trained undergraduate peer tutors who have shown outstanding ability in advanced composition courses and who can help students at any stage of the writing process — from generating and organizing ideas to polishing final drafts.

The College ESL Tutoring Lab assists nonnative-speaking students with English grammar, idioms, pronunciation, listening comprehension, and composition. Priority is given to students enrolled in English as a Second Language 33A, 33B, and 33C, and other ESL courses. Most of the ESL tutors are graduate students pursuing degrees in teaching English as a second language.

Both the Composition and ESL Labs are located in 3012 Griffin Commons and offer free individual tutoring by appointment. For tutoring appointments or further information, call 206-1491.

College Math/Sciences Tutorials

The College Math/Sciences Tutorials, located in 3013 Griffin Commons, provide an organized by-appointment tutorial program for most introductory courses in biology, chemistry, mathematics, and physics. Trained tutors meet in small group sessions on a weekly basis, teaching methods to improve problem-solving skills and test-taking strategies. Requests for tutors must be made during the first three weeks of the term; early registration is strongly advised. Drop-in tutoring is also offered. Schedules vary each term. For more information, call 206-6965 or 825-7305.

College Tutorials for Student Athletes

The College Tutorials for Student Athletes provide tutoring in the evening and on weekends for intercollegiate athletes whose practice and competition schedules prevent them from participating in other tutorial services. Eligible student athletes can receive regular individual or small group assistance in a wide range of courses, provided they request tutoring within the first four weeks of the term. Trained tutors clarify course content, teach study strategies and, in consultation with course instructors, develop problem-solving exercises and practice examinations to build learning and performance skills.

The coordinator is located in 3030 Griffin Commons. For tutoring appointments and further information, call 825-8699.

Academic Advancement Program (AAP)

Located in Campbell Hall, the Academic Advancement Program is dedicated to expanding educational opportunities for over 5,500 underrepresented minority and low-income students. AAP's mission is to promote, encourage, and increase the academic achievement, retention, and graduation of AAP students so that they may assume positions of academic, professional, political, and community leadership. Recognizing the many obstacles students may encounter as they pursue their academic careers, AAP draws on the full range of University resources, programs, and services to enhance students' scholastic achievement and promote their successful pursuit of the bachelor's degree.

AAP provides services to students from historically underrepresented populations (African American, Chicano/Latino, American Indian, Pacific Islander, and Pilipino), as well as to low-income students of all ethnicities. All students, except American Indians, must be California residents. For more information regarding eligibility, application, and/or specific questions on services, contact the AAP Office in 1209 Campbell Hall (825-1481).

Freshman and Transfer Summer Program

The Freshman and Transfer Summer Program is a six-week academic program designed to introduce students to the rigorous demands of UCLA coursework, as well as prepare them for the competitive pressures of Fall Quarter and the academic year. Through classroom lectures and discussion sections, course assignments, examinations, tutorial and counseling sessions, academic advising, and learning skills workshops, entering students are introduced to the academic demands of UCLA. The program assists in enhancing academic strengths, as well as the self-management skills necessary to meet the challenges of University life.

Counseling Services

AAP counselors provide sensitive and caring counseling designed to facilitate and support the self esteem and educational achievement of AAP students. The unit has full-time professional counselors officially responsible for University academic advising, a housing counselor who provides counseling regarding housing concerns and acts as the liaison between the UCLA Community Housing Office and AAP students, and part-time undergraduate peer counselors who provide a student's perspective on courses, study materials, and educational goals.

AAP counseling services also include a special component called the Program Leading to Undergraduate Success (PLUS), which provides retention services specifically for AAP students whose parents have never earned a bachelor's degree and/or whose combined family income meets program guidelines. Professional and peer counselors work together to design a counseling program that focuses on the special needs of PLUS students and their families.

Tutorial Services Unit

The Tutorial Services Unit builds on the premise that critical thinking and intellectual independence are best developed through active dialogue. Tutorial services are provided for all AAP students who wish to improve their academic, analytical reading and composition, quantitative, critical thinking, and study skills while mastering course materials. The unit provides academic support services through its English/humanities, social sciences, and math/sciences tutorial centers. Tutoring, either individual or small group, is a free service to all AAP students.

Graduate Mentor Program (GMP)

The primary goal of the Graduate Mentor Program is to increase the number of AAP students who enroll in graduate school through the encouragement, support, guidance, and advocacy of graduate student mentors. Services offered include individual counseling regarding graduate school; workshops and seminars on such topics as the graduate application process, financing graduate studies, and GRE preparation; and faculty round tables designed to expose prospective graduate students to the many possibilities of graduate study through informal interactions with faculty.

Learning Resource Centers (LRC)

The **Instructional Media Laboratory** provides individual student access to course-related interactive and videotape programs. Students, assigned by faculty to study specific supplementary materials, may learn at their own pace and at times that suit their individual schedules. The laboratory is located in 270 Powell Library (206-1211).

The **Instructional Media Library** is UCLA's central resource for the collection and maintenance of educational and instructional media. Materials from the collection are loaned to regularly scheduled UCLA classes and may be rented by organizations and individuals from the campus community. The library is authorized to monitor compliance with University guidelines and federal copyright law governing the use of video recordings. Reference books from educational and feature film distributors are available. The staff assists in researching media on any subject and obtaining materials from outside sources. Two screening rooms, located in 180 Powell Library, are available by appointment (825-0755).

The **Language Laboratory** is a full-service audio facility for teaching and learning languages. Students enrolled in foreign language classes are assigned by faculty to practice pronunciation, comprehension, and listening skills in the laboratory, 190 Powell Library (206-8855). Audio-tape programs which accompany specific texts used in classes and listening, recording, and monitoring equipment are available.

Petitions

A petition is a piece of paper representing your need or desire to be excepted from any standard rule or regulation in the University. It is the only way to obtain formal approval from the department, the college or school, the Registrar, or whoever has authority over your particular request. Some petitions carry a small fee; others are free.

An approved petition for a waiver or substitution in degree requirements represents an agreement between you, your college or school and, in some cases, the department chair, granting you an exception from the existing regulations.

Petitions are also used at UCLA to change your college/school or major, take more or fewer units than regulations permit, make late changes to your Study List, remove an Incomplete grade, or obtain credit by examination. In addition, you may petition for concurrent enrollment, double major, or waiver of scholarship requirements. Petitions for most of these exceptions are available from your college/school or department.

Academic Excellence

Eligible students receive the following honors and awards in recognition of academic achievement.

Dean's Honors List

The College of Letters and Science, School of the Arts, School of Engineering and Applied Science, and School of Theater, Film, and Television award Dean's Honors to deserving students each term. The School of Nursing awards Dean's Honors on an annual basis. These honors are based on the grade-point average attained within a specified number of units. Consult your college or school for further information.

Honors at Graduation

Your college or school awards honors according to your overall GPA at graduation. **To be eligible you must have completed at least 90 (98 for the School of Nursing) University of California units for a letter grade.**

The levels of honors are *summa cum laude*, *magna cum laude*, and *cum laude*. Specific requirements vary for each level and are included in the appropriate college and school chapters.

Departmental Honors

In the College of Letters and Science, departmental honors and highest honors are awarded at graduation on your major department's recommendation, based on successful completion of a departmental honors program. Consult your department for its requirements.

Departmental Scholar Program

Departments in all campus units except the School of Nursing may nominate exceptionally promising juniors and seniors as UCLA Departmental Scholars to pursue bachelor's and master's degree programs simultaneously. Nominations are submitted to the college or school dean or provost for recommendation to the dean of the Graduate Division. If you are interested in becoming a Departmental Scholar, consult your department well in advance of application dates for graduate admission (see the Calendar at the beginning of this catalog).

Honor Societies

Alpha Lambda Delta and Phi Eta Sigma

Membership in these national freshman honor societies is based solely on academic achievement during your freshman year. To be eligible you must have a 3.5 GPA with 12 graded University of California units in the first term of your freshman year, or a cumulative 3.5 GPA at the end of the second and/or third terms. Invitations are issued in Winter Quarter, and initiation is held during Spring Quarter. For more information, contact the Office of the Dean of Students, 1206 Murphy Hall (825-3871).

Golden Key

Golden Key is a national interdisciplinary academic honors organization dedicated to excellence. Students qualify on the basis of objective academic criteria; no more than the top 15 percent of enrolled juniors and seniors may be eligible. The society recognizes and encourages scholastic achievement and excellence in all undergraduate fields of study, unites with collegiate faculties and administrators in developing and maintaining high standards of education, provides economic assistance to outstanding members by means of an annual scholarship for initiates, and promotes scholastic achievement and altruistic conduct through voluntary service. Invitations are issued in Winter Quarter, and a reception is held in Spring Quarter. For more information, contact the Office of the Dean of Students, 1206 Murphy Hall (825-3871).

Mortar Board

Mortar Board is a national honor society for college seniors which recognizes outstanding and continual scholarship, leadership, and service to the campus community. To be considered for membership, candidates must have completed 90 units and must have attained at least a B average or be in the highest 35 percent scholastically of the junior class, whichever is higher. Applications are available from the Office of the Dean of Students, 1206 Murphy Hall (825-3871), early in Winter Quarter and are due by mid-February. Approximately 40 members are selected each spring by the outgoing chapter.

Phi Beta Kappa

Phi Beta Kappa is a national honorary society in the humanities, founded at the College of William and Mary in 1776. Membership is conferred for high scholastic standing and is determined by vote of the chapter council according to scholarship records. (Students do **not** apply for Phi Beta Kappa membership.)

At UCLA only graduating seniors and selected juniors are elected to membership. The annual election is held in May, with the initiation in June. At present, the minimum GPA considered is 3.65 (for 140 or more UC units); the minimum number of UC units considered is 75 (students at the 75-unit level must have at least a 3.85 GPA). A reasonable distribution of courses in the humanities and sciences is also required. A Passed grade is computed approximately as a B, depending on number of courses taken and graded units. If you are elected, you will be notified by mail. For more information, contact Phi Beta Kappa in the Honors Programs Office, A311 Murphy Hall (825-0192).

Outstanding Senior Award

The Outstanding Senior Award offers recognition to graduating seniors who have demonstrated scholastic excellence, creativity in the department, and outstanding service to the University and community. Nominations are accepted from November through the end of January, and awards are presented at the annual Alumni Awards Ceremony in June. For more information, contact the UCLA Alumni Association in the West Alumni Center, 325 Westwood Plaza (206-0684).

Graduate Study

3

Nature of Graduate Education

The principal characteristic of graduate study is the pursuit of new knowledge through research. At UCLA graduate students benefit from — and contribute to — the resources of one of the outstanding research universities in the country. A distinguished faculty committed to research and teaching, an extensive library system ranked among the best in the nation, and excellent research centers, institutes, and laboratories in virtually every major discipline (see details in Chapter 1) all provide an extraordinary scope of opportunities for graduate endeavor.

Graduate training at UCLA takes place in the classrooms, the laboratories, the libraries, in specialized seminars, through independent research, and in teaching experiences. As a graduate student, your education is enriched by the several hundred postdoctoral fellows and visiting scholars from other universities who engage in research and teaching at UCLA every year. This unique research environment promotes the quality of original work and study which is the hallmark of graduate education.

The degree of Master of Arts or Master of Science, or one of several professional degrees such as Master of Business Administration or Juris Doctor, is intended to develop your mastery of a field and prepare you for the practice of a profession. The doctoral degree (Ph.D., Ed.D., etc.) is designed to prepare you for creative activity and original research, often in association with college or university teaching.

Administration

The Graduate Division

The UCLA Graduate Division is responsible for administering policy established by the Academic Senate's Graduate Council for master's, doctoral, and professional degree programs other than those in law, medi-

cine, and dentistry. It oversees graduate recruitment and admissions, fellowships, teaching assistantships, graduate student researcher appointments, and other graduate student support, affirmative action, and the maintenance of high quality standards in all UCLA graduate programs. The dean of the Graduate Division also serves as vice chancellor — graduate programs.

The Graduate Council

The Graduate Council is a standing committee of the UCLA Academic Senate. In keeping with the University's philosophy of shared governance, the council is responsible for the establishment of policy and standards for graduate education at UCLA; the approval, review, and monitoring of graduate degree programs; and recommendations regarding fellowships and assistantships.

The Graduate Adviser

After admission to a department, program, or school, each graduate student is assigned a graduate adviser who approves Official Study Lists and assists the student in program planning and completing degree requirements. The graduate adviser is available for counseling whenever needed; departments usually require at least one student consultation each term. When the master's or doctoral committee is established, the faculty chair of that committee often assumes the adviser's role.

Graduate Students Association (GSA)

UCLA's Graduate Students Association (GSA) shares an equal voice with the Undergraduate Students Association in the governance of the Associated Students. For more details on the GSA, see "Student Activities" in Chapter 1.

Graduate Admission

Information:
 Graduate Admissions Office
 1247 Murphy Hall
 (310) 825-1711

Admission Requirements

U.S. applicants to graduate standing must hold a bachelor's degree from a regionally accredited institution comparable in standard and content to that awarded at the University of California. Degrees granted on the basis, for example, of nonacademic prior learning, test scores, and other than organized supervised coursework in academic subjects are not considered comparable. A scholastic average of B or better (or its equivalent if the letter grade system is not used) is required in the last two years of undergraduate coursework and in any postbaccalaureate study.

International applicants who have completed their postsecondary education outside the U.S. are expected to hold a degree, with above average scholarship, from a non-U.S. university or university-level institution. If your examinations have been graded Excellent, Very Good, Good, and Pass, you must have at least a Very Good general rating to qualify for admission. Students who hold a three-year ordinary or pass degree, or who hold a professional diploma in accounting, business, librarianship, social work, physical education, health education, etc., or a four-year degree, diploma, or higher certificate from a technical, vocational, or postsecondary specialized school, *should not apply for graduate admission*. Persons with memberships in professional associations such as Institutes of Chartered Accountants, the Institute of Chartered Secretaries and Administrators, etc., also do not qualify for graduate admission.

Meeting the minimum requirements does not ensure graduate admission, which is limited by the number of places available in UCLA's schools, college, and departments. Applications are evaluated in terms of scholastic qualifications and formal preparation for the graduate field of study. Departments may have special requirements for admission, which are included under individual departmental listings in this catalog.

Applying for Admission

Graduate students at UCLA must submit the 1992-93 *Application for Graduate Admission* to UCLA Graduate Application Processing, P.O. Box 23895, Oakland, CA 94623-0895. You may obtain this form, in person or by mail, from your prospective school or department.

Applications are generally accepted for Fall, Winter, and Spring Quarters, although some departments limit admission to Fall Quarter due to course sequencing. Such restrictions are stated in this catalog's departmental listings and in the application packet. Enrollment in Summer Sessions courses does not constitute admission to graduate standing.

Applications and supporting papers should be on file by the following dates (if the dates below fall on a weekend or holiday, the next working day applies):

October 1, 1992, for Winter Quarter 1993
 December 31, 1992, for Spring Quarter 1993
 December 15, 1992, for Fall Quarter 1993

Applications postmarked after these dates will be considered only when enrollment and funding limitations permit.

Supporting papers and materials to be submitted, including official transcripts of record and a \$40 nonrefundable application fee, are specified in the application packet. Submitted materials are not returnable.

Graduate Record Examination — If you are applying for admission to a department or school which requires Graduate Record Examination (GRE) scores, you should arrange to take the examination no later than February so your scores arrive on time. **GRE scores should be sent directly to your prospective department and not to the Graduate Division.**

1992-93 GRE Test Dates

October 10, 1992	February 6, 1993
December 12, 1992	April 17, 1993
June 5, 1993 (general only)	

GRE applications and information are available from offices of the Educational Testing Service, either at CN 6000, Princeton, NJ 08541-6000, or at 1947 Center Street, Berkeley, CA 94704. For information on GRE Fee Waivers, write to the associate program director at the New Jersey address.

Letters of Recommendation — Most graduate professional schools, departments, and interdepartmental programs at UCLA require applicants to submit three letters of recommendation. Letters typically augment, validate, or explain information provided in the application and should be written by people qualified to analyze your abilities and academic promise. In some cases, these letters may mean the difference between acceptance and rejection. Letters should be sent directly to the prospective department. Forms to be used are included in the application packet.

Mandatory Medical Insurance Requirement

UCLA requires, as a condition of registration, that all graduate students and all international students on nonimmigrant visas have *adequate* medical insurance coverage during all periods of enrollment. See "Mandatory Medical Insurance Requirement" in the "Graduate Registration and Enrollment" section later in this chapter for a description of what constitutes adequate medical insurance. Most travel insurance plans are NOT acceptable; medical insurance plans from foreign countries (including Canada) also are NOT acceptable.

UCLA offers a student Medical Insurance Plan (MIP) which fulfills the requirement. For graduate students the MIP fee is included each term in the fee assessment total on the UCLA Fee Statement portion of the Registration Form. This is the only method by which MIP can be purchased.

If you decide to waive out of MIP because you have adequate private medical insurance, you must complete the Medical Insurance Waiver Request included with your registration materials each term and submit the form when you pay your registration fees. For further information on MIP or adequate medical insurance requirements, call the Student Health Service Insurance Office at 825-1856.

**The department only admits applicants whose objective is the Ph.D.

International Applicants

Applicants who have credentials from universities and colleges in foreign countries should submit applications at least two months before the dates listed above. International applicants should have an academic degree or professional title earned at a university and will be evaluated on the basis of grades (marks) and class or rank achieved. You should submit official transcripts of record, in duplicate, for all college and university work. Specific instructions are given in the application packet.

Proficiency in English

Test of English as a Foreign Language (TOEFL) — International students who hold a bachelor's or higher degree from a university in a country where the official language is English and in which English is the spoken tongue and the medium of instruction, or who have completed at least two years of full-time study at such an institution, are exempt from both the TOEFL and the UCLA English as a Second Language Placement Examination (ESLPE). *All other applicants* must take the TOEFL, administered by the Educational Testing Service in some 95 foreign centers. Applications are available from the Educational Testing Service, CN 6000, Princeton, NJ 08541-6000.

UCLA English as a Second Language Placement Examination (ESLPE) — If your native language is not English, you are required to take the UCLA ESLPE (in addition to the TOEFL) before the term in which you are to register. Depending on your ESLPE results, you may have to complete one or more courses in the English as a Second Language 33 series, beginning in your first term in residence at UCLA. These courses must be passed with a grade of C or better if taken for a letter grade, or B or better if taken on an S/U basis. You should expect to spend a longer period of time at the University than would normally be necessary to complete a degree program if you are required to take any English as a second language courses. If you do not achieve a minimum score on the ESLPE, your admission is deferred until you have acquired the necessary proficiency in English. Neither the Test of English as a Foreign Language (TOEFL) nor any other English proficiency test can be submitted or accepted in lieu of the ESLPE.

Test of Spoken English (TSE) — If you are an international student and wish an appointment as a teaching assistant, you should take the Test of Spoken English offered at the TOEFL Center in your home country.

No Degree Objective

UCLA has no special graduate, limited, or unclassified categories of admission. Under some circumstances, however, applicants may be admitted for coursework without a degree objective. For example, teachers with a master's degree who wish some refresher study, or international students on a year's stay in the U.S., may wish to apply in this manner. Requirements for admission are the same as those for degree programs. All admission to no degree objective (NDO) programs, except for students in official Education Abroad Programs, must be preapproved by the dean of the Graduate Division, as must any University financial assistance for students on NDO status.

Duplication of Degrees

The University of California, in general, discourages the duplication of advanced degrees. At the same time, it recognizes that a professional degree does not duplicate an academic one, and that pressing needs may exist for degrees in different areas (see "Concurrent and Articulated Degree Programs" later in this chapter). If you are applying for a second academic degree at the same level or lower than the one you already hold, you are required to show compelling cause to the department. All degree requirements and University regulations apply just as they do for a first degree. Courses already applied to the earlier degree may not be applied to the second.

Summer Sessions Courses

Enrollment in Summer Sessions courses does not constitute admission to graduate standing, nor does it substitute for the required continuous registration in Fall, Winter, and Spring Quarters. If you wish to apply Summer Sessions courses to your subsequent graduate program, you should consult in advance with your departmental adviser. This is also true if you have been readmitted to graduate standing and you wish to resume graduate study in Summer Sessions. Information and applications are available from the Office of Summer Sessions, 1147 Murphy Hall. Also refer to the sections on "Academic Residence" and "Transfer of Credit" later in this chapter.

Readmission

Students who are granted a formal leave of absence (see "Leaving UCLA" in Chapter 4) do not have to apply for readmission if they resume their graduate work in accordance with the terms of their leaves. All other continuing graduate students who fail to register for any regular session, or who fail to complete a term through cancellation or withdrawal, must compete for readmission with new applicants.

If you have registered at any time as a graduate student at UCLA and are returning after an absence (except a formal leave of absence), you must file an *Application for Graduate Admission*. Forms are available from the departments and should be submitted to UCLA Graduate Application Processing, P.O. Box 23895, Oakland, CA 94623-0895. The following materials must accompany the application:

- (1) A check or money order for \$40 (nonrefundable) made payable to The Regents of the University of California.
- (2) The Graduate Petition for Change of Major, if appropriate. (If you are reapplying in a new major, request this form along with the *Application for Graduate Admission*.) Your UCLA graduate transcript must also be submitted.
- (3) Transcripts of all academic work completed since your registration at UCLA as a graduate student.

Admission to the Schools of Dentistry, Law, and Medicine

Applicants for M.S. and Ph.D. programs in departments of the School of Medicine or Dentistry should apply for admission to the Graduate Division as described above. For admission to D.D.S., J.D., and M.D. degree programs in the Schools of Dentistry, Law, and Medicine, write to the respective schools for their announcement booklets and for information and application procedures.

Requirements for Graduate Degrees

UCLA offers instruction leading to a broad range of master's and doctoral degrees, both academic and professional. Graduate students earn master's or doctoral degrees through distinguished achievement in study and research. Achievement in study is evaluated by means of the qualifying and comprehensive examinations. Achievement in research is judged by the merits of the thesis or dissertation.

The doctorate, and specifically the Doctor of Philosophy degree, is awarded in recognition of a candidate's in-depth knowledge of a broad field of learning, and for demonstrated ability to make original and distinguished contributions to the field. More generally, the degree is an affidavit of critical aptitude in scholarship, imaginative enterprise in research, and proficiency and style in communication.

University Minimum Standards

The requirements described here for master's and doctoral degrees are minimum standards set by the University. Individual schools or departments may set higher standards and may require additional courses

and/or examinations for their master's degree. Each department also sets additional requirements for doctoral degrees according to the demands of the field of study. You are advised to consult the appropriate school announcement or your departmental graduate adviser for details.

Transfer of Credit

There are two general regulations governing transfer of credit. No courses completed before the award of the bachelor's degree may be applied toward a graduate degree unless you are a UCLA Departmental Scholar. Also, courses taken for any other degree may not be applied toward a master's degree at UCLA unless you are enrolled in a Graduate Council-approved concurrent degree program (see "Concurrent and Articulated Degree Programs" later in this chapter).

From Within the University — You may petition to have units and grade points for graduate work completed at other campuses of the University applied toward satisfaction of master's degree requirements at UCLA. Such courses may fulfill up to one half of both the total course and

University Minimum Standards For Advanced Degrees*

REQUIREMENT	MASTER'S DEGREE	DOCTORAL DEGREE
ACADEMIC RESIDENCE	One year (three terms) in graduate standing at University of California, two terms at UCLA.	Two years (six terms) in graduate standing at University of California, including three consecutive terms at UCLA.** In most cases a longer period of residence is necessary.
PROGRAM OF STUDY	Nine graduate and upper division courses (36 units) in graduate standing, including at least five graduate courses.	No specific course requirements. Program is planned with adviser and guidance committee.
SCHOLARSHIP	B average required in all courses taken in graduate standing at UC and in all courses applied toward the master's degree.	B average required in all courses taken in graduate standing at UC.
FOREIGN LANGUAGE	Requirements are determined by individual departments and programs.	Requirements are determined by individual departments and programs.
ADVANCEMENT TO CANDIDACY	All requirements for advancement, including foreign language examinations, must be satisfied. Forms must be filed by second week of the term in which degree is to be awarded.	The departmental written and University Oral Qualifying Examinations must be passed; departmental, course, and language requirements must be completed. Advancement is officially granted when you obtain your committee chair's signature, pay the \$25 fee, and return the application to the Graduate Division.
FINAL REQUIREMENT FOR THE DEGREE	Master's thesis or comprehensive examination (written, oral, or both).	Doctoral dissertation. A final oral examination in defense of the dissertation may also be required.

*Individual departments and programs may set higher standards. Refer to departmental listings under the appropriate college or school chapter or consult your departmental graduate adviser for details.

**If the master's degree was earned at UCLA, one year of residence will have been satisfied.

graduate course requirements, and one third of the academic residence requirement, but may not have been used to fulfill the requirements for another degree.

From Outside the University — With approval of the dean of the Graduate Division and your major department, courses completed with a grade of B or better in graduate standing at institutions outside the University of California may apply toward UCLA master's programs. However, courses taken for any degree awarded at another institution may not be applied toward a graduate degree at UCLA. A maximum of two courses (eight quarter units or five semester units) may be applied, but they cannot be used to reduce either the minimum graduate course requirement or the academic residence requirement. (To convert semester units into quarter units, multiply the semester units by 1.5 — e.g., 12 semester units \times 1.5 = 18 quarter units. To convert quarter units into semester units, multiply the quarter units by .666 — e.g., 12 quarter units \times .666 = 7.99 or 8 semester units.)

From Summer Sessions — Regular session courses offered in UCLA Summer Sessions by regular faculty qualify for credit toward a higher degree with departmental approval. Courses offered by visiting faculty may apply, with a recommendation from the department chair. It is best to consult your departmental graduate adviser about applying Summer Sessions courses to your graduate program.

From UCLA Extension — Extension courses taken after July 1, 1969, can be applied only if they are **concurrent** courses prefixed by XLC (offered for students in degree programs and open to Extension students by petition) in the 100, 200, or 400 series, completed with a grade of B or better. By petition to the dean of the Graduate Division and with departmental approval, a maximum of two such courses may be applied toward the nine-course minimum and the five-graduate-course requirements for the master's degree. The master's program, then, would include at least three courses in the 200 or 500 series for academic degrees, or three courses in the 200, 400, or 500 series for professional degrees.

If your master's program requires more than nine courses, concurrent Extension courses may be applied toward one half of the course requirements over the minimum of nine.

Grades earned in Extension courses or in courses taken outside the University of California are not included in computing your grade-point average nor may they be used to remove scholarship deficiencies. Correspondence courses are not applicable to graduate degrees.

Academic Residence

Master's Degree — The minimum residence requirement consists of three academic terms in graduate standing at the University of California, including at least two terms at UCLA.

Doctoral Degree — The minimum residence requirement is two years (six terms) in graduate standing at the University of California, including one year (usually the second) in continuous residence at UCLA. If you earned a master's degree at UCLA, one year of this requirement will have been met. In most cases a longer period of residence is necessary, and from three to five years is generally considered optimal.

Academic residency for both degrees is established by successfully completing a minimum of one graduate or upper division course (four units) during a term.

You may earn one term of residence for summer study in either of these ways: (1) enroll in two six-week Summer Sessions taking at least two units of upper division and/or graduate work in each session OR (2) enroll in one eight-week session for at least four units of credit. Residence earned through Summer Sessions enrollment is limited to one third of the degree requirements.

To maintain satisfactory progress toward the degree, UCLA requires at least a B average in all courses taken in graduate standing at the University and in all courses applied toward a graduate degree, including those taken at another UC campus.

Foreign Language Requirements

Foreign language requirements are determined by individual departments and programs. If your program has a language requirement, you should fulfill it either before you begin graduate study or as soon as possible thereafter. All foreign language requirements must be satisfied before advancement to candidacy.

Many departments require graduate degree candidates to demonstrate proficiency in one or more foreign languages, so that you can acquire broad knowledge in your field of study and keep abreast of foreign developments in the field. You are urged to complete language requirements as early as possible in your graduate career. If your department requires two or more foreign languages, you must complete at least one before the University Oral Qualifying Examination (unless your department requires that both be completed before the examination).

Depending on your department's regulations, you may fulfill foreign language requirements either by passing the Graduate School Foreign Language Tests (GSFLT) in French, German, Russian, or Spanish or (in languages not offered by GSFLT) by passing examinations given by UCLA language departments. You may register for the examination at the UCLA Extension Cashier's Office, 10995 Le Conte Avenue. UCLA enrollment is not required. Consult UCLA Extension for registration procedures.

Some departments allow students to fulfill language requirements either by passing departmental examinations or by completing coursework in a foreign language. Certain departments may require additional languages, special competence, or other special procedures. In some departments, English satisfies the foreign language requirement if it is not your native language.

For further details on foreign language requirements, consult your departmental graduate adviser.

Program of Study and Scholarship

Master's Degree

At least nine graduate and upper division courses (or any number of fractional courses totaling 36 units) must be completed in graduate standing; at least five (20 units) of the nine must be graduate-level courses.

UCLA offers master's degrees under two plans: Plan I, the Master's Thesis, and Plan II, the Master's Comprehensive Examination. Some departments offer both plans, and you must consult with your department to determine the plan for meeting your degree requirements. University minimum requirements are the same under either plan.

Master's Thesis (Plan I)

After advancement to candidacy (described below), students under Plan I must submit a thesis reporting on results of their original investigation of a problem. While the problem may be one of only limited scope, the thesis must show a significant style, organization, and depth of understanding of the subject.

A thesis committee, consisting of at least three faculty members who hold regular professorial appointments at the University, is nominated by the department and appointed by the dean of the Graduate Division for each student (consult the Graduate Division for more details on committee members' eligibility requirements). The thesis committee, which

must be appointed before you may be advanced to candidacy, approves the subject and plan of the thesis, provides the guidance necessary to complete it, then reads and approves the completed manuscript. Approval must be unanimous among committee members.

Once the thesis committee and other concerned faculty have approved the subject for the thesis, work may begin. You are responsible for preparing the thesis in the proper form and for observing filing deadlines.

Master's Comprehensive Examination (Plan II)

Following advancement to candidacy (described below), students under Plan II must pass a comprehensive examination administered by a committee consisting of at least three faculty members appointed by the department. In some departments the comprehensive examination may serve as a screening examination for admission to doctoral programs. Information concerning this examination and its format is available in your department.

Doctoral Degree

Doctoral programs are individualized and permit a high degree of specialization. The University does not specify course requirements for doctoral programs. Individual programs set their own requirements, which may include specific courses, and these must be completed before you take the University Oral Qualifying Examination. You will determine your course of study in consultation with a graduate adviser until the doctoral committee is appointed.

Doctoral Examinations before Advancement to Candidacy

Prior to advancement to candidacy, doctoral candidates fulfill the coursework, teaching, and/or examinations required by the major department or group. You are supervised during this period by a departmental adviser and/or departmental guidance committee. This committee administers a departmental written and, in some cases, oral examination (not to be confused with the University Oral Qualifying Examination) after you complete the recommended or required work. Once all departmental and foreign language requirements are met, the department chair consults with you and then nominates a doctoral committee.

University Oral Qualifying Examination

The doctoral committee, consisting of at least five faculty members nominated by your department, is appointed by the dean of the Graduate Division (consult the Graduate Division for details on committee membership). To determine your qualifications for advancement to candidacy, the committee administers the University Oral Qualifying Examination and, at its option, a written examination.

Advancement to Candidacy

Master's Degree

When you have completed approximately half the program for the master's degree (usually at least two terms), you should formally apply for advancement to candidacy. Application forms are available from your

department and must be filed there no later than the second week of the term in which you expect to receive your degree (by the end of the second week of the first Summer Session for a September degree).

You may not be advanced to candidacy until all departmental requirements for advancement, including foreign language examinations, have been satisfied. You then have one year from the date of advancement to complete all requirements for the degree, including your thesis or comprehensive examination. Candidacy expires at the end of one year and reinstatement during the term in which you plan to receive the degree is by petition only.

Doctoral Degree

You are eligible for advancement to doctoral candidacy after passing the University Oral Qualifying Examination with no more than one negative vote, completing four terms of academic residence and any additional departmental requirements, and maintaining a 3.0 grade-point average in graduate standing. You must complete the application for candidacy form sent to you by the Registrar's Office, have it signed by your doctoral committee chair, pay a \$25 advancement to candidacy fee, and submit the form to the Graduate Division, Student and Academic Affairs Section. You are officially advanced to candidacy on the date the completed form is submitted.

Candidate in Philosophy Degree

In several departments, as approved by the Graduate Council, the intermediate degree of Candidate in Philosophy (C.Phil.) is awarded to qualified students on advancement to candidacy for the Ph.D. degree.

The C.Phil. is not a terminal degree but gives formal recognition to a definite state of progress toward the doctorate. Academic requirements are the same as for advancement to candidacy for the Ph.D. (see above). Four terms in academic residence at UCLA are required. (Also refer to "Academic Residence" earlier in this chapter.)

The C.Phil. may not be conferred after or simultaneously with the Ph.D. For departments offering the C.Phil., see the degree chart at the beginning of this chapter. For further details, consult the Graduate Division.

Doctoral Dissertation

Once the doctoral committee approves the subject for your dissertation, the in-candidacy stage of the doctoral program begins and is devoted primarily to independent study and research and to the preparation of the dissertation, which demonstrates your ability for independent investigation. The doctoral committee guides your progress toward its completion. You are responsible for following instructions on the preparation of the dissertation and for observing filing deadlines.

Final Preparation and Filing of Thesis or Dissertation

For guidance in the final preparation of the thesis or in the preparation and submission of the dissertation and accompanying abstract, you may:

- (1) Consult the theses and dissertations adviser, Office of the University Archivist, 141 Powell Library.
- (2) Read *Regulations for Thesis and Dissertation Preparation*, available in the Graduate Division, Student and Academic Affairs Section, or in the Archivist's Office.
- (3) Attend an orientation meeting on manuscript preparation and filing procedures conducted soon after the start of each term (see the Calendar at the beginning of this catalog).

Master's Thesis — When all members of the committee have approved the thesis and you are ready to file it, you must initiate the final steps in the process by submitting the original signature (approval) page, title page, and any other required forms to the Graduate Division, Student and Academic Affairs Section, where completion of degree requirements

will be verified. After final approval by the dean of the Graduate Division, you must file the thesis with the theses and dissertations adviser by the published deadline (approximately two weeks before the degree is to be awarded).

Doctoral Dissertation — When all members of the committee have approved the dissertation and you are ready to file it, you must submit the original signature (approval) page and title page to the Graduate Division, Student and Academic Affairs Section, where completion of degree requirements will be verified. After final approval by the dean of the Graduate Division, you must file two paper copies of the dissertation with the theses and dissertations adviser by the published deadline (approximately two weeks before the degree is to be awarded).

Deadlines for this academic year are:

November 30 for Fall Quarter 1992

March 15 for Winter Quarter 1993

June 7 for Spring Quarter 1993

Doctoral Final Oral Examination

A final oral examination may be required at the option of any member of the doctoral committee, and in some departments is required of all doctoral candidates. The examination, for which all committee members must be present, may be held before you have prepared the final copy of your dissertation, but passing the examination (with no more than one negative vote of the committee members) does not imply approval of the final manuscript. Consult your doctoral committee chair or graduate adviser for further information.

Interdepartmental Degree Programs

In addition to graduate degree programs offered within schools and departments, UCLA offers interdisciplinary programs involving two or more participating departments. A total of 27 interdepartmental programs offer bachelor's, master's, and doctoral degrees in some combination; several units offer all three degrees. These programs are administered by interdepartmental committees made up of faculty whose membership is determined by research interest, not by departmental affiliation. By cutting across the usual lines of faculty division, a subject area is studied from the perspectives of different disciplines and a greater degree of program flexibility is achieved.

Interdepartmental degree programs which currently lead to advanced degrees are listed below. All are described more fully in Chapter 5 on the College of Letters and Science, with the exceptions of *Environmental Science and Engineering* which is in the School of Public Health (Chapter 18) and *Neuroscience* which is in the School of Medicine (Chapter 16). For further information, contact the chair or graduate adviser of the specific program that interests you.

- African Area Studies (M.A.)
- Afro-American Studies (M.A.)
- American Indian Studies (M.A.)
- Applied Linguistics (Ph.D.)
- Archaeology (M.A., Ph.D.)
- Asian American Studies (M.A.)
- Comparative Literature (M.A., Ph.D.)
- Environmental Science and Engineering (D.Env.)
- Folklore and Mythology (M.A., Ph.D.)
- Indo-European Studies (Ph.D.)
- Islamic Studies (M.A., Ph.D.)
- Latin American Studies (M.A.)
- Molecular Biology (Ph.D.)
- Neuroscience (Ph.D.)
- Romance Linguistics and Literature (M.A., Ph.D.)

Concurrent and Articulated Degree Programs

Each of the programs described thus far leads to a single degree — either master's or doctoral. UCLA also offers concurrent and articulated degree programs, which allow you to earn two degrees simultaneously by combining two free-standing degree programs into a coordinated course of study. You may petition to design your own articulated program (with departmental and Graduate Division approval), but you may not apply credits for one degree to the other. Concurrent degree programs, which may not be individually designed, allow some credit overlap.

These programs accomplish several important objectives: they enable the University to respond to societal changes by creating new fields of study; they prepare students more fully for the world's complexities by combining the cultural (political/social/economic) aspects of their field with the tools of a professional degree; and they allow faculty members to cross departmental lines and interact on a broader scale.

Concurrent Degree Program
(Certain courses may apply to both degrees)

Articulated Degree Program
(No credit overlap)

Concurrent degree programs, by allowing a specified amount of credit to apply to both degrees, permit students to reduce the total number of courses required for the two degrees and thereby reduce the time normally required if courses were taken in sequence. Programs leading to concurrent degrees are offered in the following disciplines:

Education, M.A., Ph.D., M.Ed., or Ed.D. — Law, J.D.
History, M.A. — Library and Information Science, M.L.S.

Latin American Studies, Interdepartmental M.A. — Urban Planning, M.A.
Management, M.B.A. — Computer Science, M.S. (School of Engineering and Applied Science)
Management, M.B.A. — Latin American Studies, Interdepartmental M.A.
Management, M.B.A. — Law, J.D.
Management, M.B.A. — Library and Information Science, M.L.S.
Management, M.B.A. — Public Health, M.P.H.
Management, M.B.A. — Nursing, M.N.
Management, M.B.A. — Urban Planning, M.A.
Urban Planning, M.A. — Law, J.D.

Articulated degree programs permit no credit overlap, and students must complete degree requirements separately for each degree. Programs leading to articulated degrees are offered in the following disciplines:

African Area Studies, Interdepartmental M.A. — Public Health, M.P.H.
African Area Studies, Interdepartmental M.A. — Film and Television, M.F.A.
Latin American Studies, Interdepartmental M.A. — Education, M.Ed. in Curriculum
Latin American Studies, Interdepartmental M.A. — Engineering, M.S.
Latin American Studies, Interdepartmental M.A. — Library and Information Science, M.L.S.
Latin American Studies, Interdepartmental M.A. — Public Health, M.P.H.
Medicine, M.D. — Graduate Division health science major, Ph.D.
Oral Biology, M.S. — Dentistry, D.D.S. or Certificate

Inquiries about concurrent and articulated degree programs should be directed to graduate advisers in the departments and schools involved. Contact the Graduate Division, Student and Academic Affairs Section, for information on designing your own articulated program.

Graduate Registration and Enrollment

Information:
Registration/Enrollment Office
1113 Murphy Hall
(310) 825-1091

Detailed information on registration (fee payment) and enrollment procedures is contained in the quarterly *Schedule of Classes*, available for purchase at the Students' Store several weeks before the beginning of each term. To obtain a copy by mail, write to ASUCLA Students' Store, 308 Westwood Plaza, Los Angeles, CA 90024-1645, Attn: Mail Out. Include a check or money order for \$4.25 payable to ASUCLA.

Registration consists of paying fees and enrolling in classes. The Registration Form, issued by the Registrar, is used for paying fees and provides information on enrollment in classes by telephone. You must complete both processes by the established deadlines to be officially registered and enrolled for the term.

Advance payment is required of all eligible students. Payments may be mailed or deposited in the Main Cashier's Drop Slot (1125 Murphy Hall) during the published payment period. Payments submitted after the published fee deadline must be made in person at 1125 Murphy Hall and will be assessed an additional \$50 late payment fee. Students on financial aid may be eligible for a waiver of the \$50 fee if funds are delayed by the University.

Deadline Dates

(Tentative only; consult *Schedule of Classes* for firm dates.)

Fee Payment Deadlines:

August 28 for Fall Quarter 1992
December 4 for Winter Quarter 1993
March 5 for Spring Quarter 1993

Classes Dropped for Failure to Pay Registration Fees:

September 25 for Fall Quarter 1992
January 12 for Winter Quarter 1993
April 6 for Spring Quarter 1993

Mandatory Medical Insurance Requirement

UCLA requires, as a condition of registration, that all graduate students and all international students on nonimmigrant visas have adequate medical insurance coverage during all periods of enrollment.

UCLA offers a student Medical Insurance Plan (MIP) which fulfills the requirement. For graduate students the MIP fee is included each term in the fee assessment total on the UCLA Fee Statement portion of the Registration Form. This is the only method by which MIP can be purchased.

If you decide to waive out of MIP because you have adequate private medical insurance, you must complete the Medical Insurance Waiver Request included with your registration materials each term and submit the form when you pay your registration fees.

An adequate private medical insurance plan must provide all of the following minimum benefits:

(1) A minimum of \$50,000 in "Lifetime Maximum" benefits.

(2) At least 75 percent of the cost for eligible medical expenses, with no more than a 25 percent out-of-pocket cost to you (patient copayment).

(3) A claims representative located in the U.S. In addition, you must be provided with an identification card (or reasonable alternative) written in English, which includes payment provisions listed in U.S. dollars and the U.S. telephone number of the U.S. claims representative.

If your private medical insurance plan does not meet all of the above requirements, you must purchase MIP. For further information on MIP or adequate medical insurance requirements, call the Student Health Service Insurance Office at 825-1856.

Enrollment in Classes

The quarterly *Schedule of Classes* contains up-to-date listings of class times, meeting rooms, instructors, and all information necessary for enrolling in classes. Using the *Schedule* and with the aid of academic counseling from your school or college advisers, you can assemble a program of courses.

Telephone Enrollment

The UCLA Telephone Enrollment System is a specialized computer interface which allows you, the student, to directly access UCLA's enrollment data base by using a touch-tone telephone. A digitally recorded human voice instructs you through each transaction. By using this telephone access, you can enroll in classes, add, drop, or exchange classes/sections, put yourself on the wait list for a class, change the grading basis for a class (i.e., Satisfactory/Unsatisfactory), obtain a reading of your Study List, check your wait list position, and obtain instructor names for all courses. You enroll during the appointment periods printed on your Registration Form. Consult the *Schedule of Classes* for full enrollment details.

Change of Major

Continuing graduate students may petition for a change of major after discussing plans with the new department. Forms for this purpose are available from the departments and should be filed with the Graduate Division, Student and Academic Affairs Section, 1225 Murphy Hall. Deadlines are generally the same as those for the graduate admissions procedure, but you should consult with the adviser in the new program before filing an application.

Full-Time Graduate Program

Three courses (or 12 units) per term are considered the normal enrollment for graduate students and are required for students not in doctoral candidacy to be counted for full-time standing in the University's official enrollment records. Therefore, you will be directed by your department to enroll full time whenever possible.

Throughout their appointments, teaching assistants are required to be registered and enrolled in at least eight quarter units and graduate student researchers in at least 12 quarter units. Those assistants/researchers who take a leave of absence, or withdraw, terminate their appointments. Course 375 for teaching assistants and independent studies at the 500 level for graduate student researchers may be included in reaching the eight- or 12-unit load.

Graduate students holding fellowships must be enrolled in at least eight units, both before and after advancement to candidacy. The eight-unit minimum required per term may include, among others, the 500 series (individual study or research).

Veterans are required to make normal progress toward the degree as stated by the major department. Information on Veterans Administration regulations is available from Academic Record Services, 1134 Murphy Hall.

Continuous Registration

Graduate students are normally required to register in all three terms of each academic year, including the term in which their degrees or certificates are to be awarded. If you are granted a formal leave of absence or are eligible to pay the filing fee for a degree (see next column), you are exempt from this requirement. You must be registered in order to receive financial aid, use University facilities, or take any University examination except the master's comprehensive or doctoral final oral examination.

If you fail to register or to file for an official leave of absence by the end of the second week of instruction, you are assumed to have withdrawn from UCLA. You will then have to reapply and compete for readmission with all other graduate applicants if you wish to return to graduate study at UCLA.

Continuing graduate students studying or doing research outside California throughout a term may pay half the registration fee, plus all other fees in full. Petitions for the reduced fee are available from your department and from Graduate Student Support, 1228 Murphy Hall.

Employment and Degree Progress

Policy governing the employment of graduate students considers you primarily as a student rather than an employee and emphasizes your need to make timely progress toward your degree. You are limited to a maximum of 12 quarters of appointment in academic apprentice teaching titles and a maximum of 18 quarters in a combination of academic apprentice teaching and research titles. Appointment to any title limits your employment maximum to 50 percent time during the academic year.

University policy prohibits the employment of graduate students in academic titles. This policy was established to ensure that you (1) make timely progress toward your degree, (2) not be subject to the conflicting roles of student and faculty member, and (3) not be involved in the instruction of your peers.

Registration in the Final Term for Award of the Degree

(1) You must register in the final term in which the degree is to be conferred if you are (a) completing coursework, (b) using library or other University facilities, (c) taking up faculty time other than for a final reading of the thesis or dissertation or to administer the comprehensive or final examination, (d) a doctoral student and were not registered the term immediately preceding the term in which your dissertation is filed, or (e) receiving University funds in the form of a fellowship or appointment as a teaching assistant, reader, or graduate student researcher. If you were not continuously registered or on leave of absence and you are required to register to receive your degree, you must apply for readmission.

(2) If only the thesis or dissertation and/or comprehensive or final examination remain to be completed in your final term, you may be eligible to pay the filing fee instead of registering (see below).

(3) If you were registered in the preceding term and have completed all degree requirements, including final examinations and filing your thesis/dissertation, during the interval between terms and before the first day of instruction, you are not required to register (or pay the filing fee) to receive your degree at the end of the following term.

The Filing Fee

If you have completed all requirements for a degree except filing the thesis or dissertation and/or taking the master's comprehensive or doctoral final oral examination, you may be eligible to pay a filing fee of half the registration fee instead of registering and paying all required fees. Applications are available from the Graduate Division, Student and Academic Affairs Section, 1225 Murphy Hall. For eligibility conditions and further information on the filing fee and registration in the final term, please consult *Standards and Procedures for Graduate Study at UCLA*, available in 1225 Murphy Hall or in individual departments.

Health Evaluation

New students enrolling in the School of Dentistry, Education, Medicine, Nursing, or Social Welfare must complete and return to the Student Health Service the Health Evaluation forms provided by their departments. For clearance information, call 825-0861.

Graduate Fees and Financial Support

Fees

Although the exact cost of attending UCLA will vary according to your academic program, personal habits, tastes, and financial resources, there are some fees that all UCLA students must pay. Each entering and readmitted student is required to submit a Statement of Legal Residence to the Registrar's Office. Legal residents of California are not required to pay tuition at the University. Students classified as nonresidents must pay tuition of \$2,566 per term (for a full definition of residence and nonresidence, see the Appendix of this catalog).

At the time of registration each term, all graduate students (except Law and Medicine School students) must pay the following fixed fees. Students in the Schools of Law and Medicine should refer to their individual school announcements for explanation of fees per semester. **Fees for Fall Quarter 1992 are current as of publication date but are subject to change without notice by The Regents.**

Term Expenses, Fall 1992	
University registration fee	\$ 231.00
Educational fee	710.00
Ackerman Student Union fee	2.50
Graduate Students Association fee	5.50
Wooden Recreation Center fee	11.00
Mandatory medical insurance	192.00
Total for California residents	\$1,152.00
Nonresident tuition fee	<u>\$2,566.00</u>
Total for nonresidents	\$3,718.00

Other Fees

Miscellaneous fees charged to UCLA graduate students include a \$50 charge for late payment of registration fees (after the fee deadline) or late filing of the Study List (after Friday of the second week of classes); \$25 for advancement to doctoral candidacy; and \$5 or less for most petitions and other special requests. A \$60 fine will be assessed if any check for registration fee payment is returned by a bank (i.e., stopped payment, insufficient funds, etc.). A complete list of fees may be found in the *Schedule of Classes*.

Fee Refunds

Students who formally withdraw from the University during the first five weeks of instruction or take an approved leave of absence by the end of the second week of classes may receive partial refunds of fees. For the refund schedule and more information, see "Withdrawal" in Chapter 4 of this catalog or consult the *Schedule of Classes* for specific refund dates for each term.

Nonresident Tuition Fellowships

A limited number of nonresident tuition fellowships are awarded each year to graduate students with distinguished academic records. Details of eligibility are available from your department or from Graduate Student Support, 1228 Murphy Hall.

Living Expenses

Printed below are the estimated yearly budgets for graduate California residents. Nonresidents must add the \$7,699 annual tuition fee to their total expenses for an accurate estimate. Expenses cover the three regular session terms of the 1992-93 academic year and do not include Summer Sessions. (Budgets for the Schools of Medicine, Dentistry, and Nursing are higher, reflecting the expense of specialized books and supplies; figures are available from your health professions counselor.) The budgets are designed to serve as a guide and are subject to change.

Estimated Annual Budgets for Graduate California Residents

	Commuter, Living in Parents' Home	Living at UCLA Residence Hall, Co-Op, Sorority, or Fraternity	Living in Off-Campus Apartment or House
University fees	\$3,457	\$ 3,457	\$ 3,457
Books and educational supplies	1,020	1,020	1,020
Food and rent	2,600	5,650	7,435
Transportation	2,580	1,705	2,540
Personal	—	<u>2,435</u>	<u>1,000</u>
Total budget	\$9,657	\$14,267	\$15,452

For more information on housing, see Chapter 1 or contact the UCLA Community Housing Office, 350 De Neve Drive (825-4491).

Financial Support

Information:

Graduate Student Support
1228 Murphy Hall
(310) 825-3521

As a major center for graduate study, UCLA offers its qualified graduate students substantial support through several types of financial assistance.

After submitting the *Application for Graduate Admission*, entering graduate students are sent a letter of acknowledgment and a brochure detailing available funding sources. Readmitted students should also request the *Application for Graduate Admission*, and continuing graduate students should complete the Fellowship and Assistantship Application for Continuing Students. Completed applications must be returned by **January 8**. (Some departments have earlier deadlines; consult the application packet for details.)

UCLA Graduate Student Support, a booklet describing the full range of financial assistance available, is published annually and mailed to continuing students by the Graduate Division. Contact your department for more detailed information.

Fellowships

The University administers several awards on the basis of scholarly achievement. Most awards are available in open competition, though some are restricted to new students or to specific departments. Some fellowship and scholarship awards are made from University funds; others are made from endowment funds held in trust by the University and given by interested friends and alumni. Still others come from annual donations by educational foundations, industry, government, and individual benefactors.

Most fellowship, traineeship, and grant awards are for one academic year (three terms). Fellowships and grants provide stipends in varying amounts for qualified students. Nonresident tuition fellowships cover the tuition, for periods of one to three terms, of selected graduate students who are not California residents.

Assistantships

Academic apprenticeships train qualified students for careers in teaching and research, and compensate them for their services. **Teaching assistantships** provide experience in teaching undergraduates, with faculty supervision. (Teaching assistants, associates, and fellows are eligible to

receive partial payment at the beginning of the term in the form of an interest-free advance loan check. Interested students should apply to their departments.) **Graduate student researcher appointments** give students experience working on faculty-supervised research projects.

In-Candidacy Fee Offset Grant Program

The In-Candidacy Fee Offset Grant Program pays the educational fee for eligible doctoral students who have been advanced to candidacy. This program is described in detail in *Standards and Procedures for Graduate Study at UCLA*, available in 1228 Murphy Hall or in individual departments.

Graduate Affirmative Action Awards

Information:
Graduate Affirmative Affairs Office
1248 Murphy Hall
(310) 825-3829

These programs were established to increase the graduate enrollment and retention of students from groups which have traditionally been underrepresented in graduate education. These groups include American Indians, blacks/African Americans, Chicanos/Mexican Americans, Latinos/Hispanics, Pilipino Americans, and Puerto Ricans. In addition, women in the sciences and engineering, Asian American men in the arts, humanities, and social sciences, and Asian American women in all areas are eligible for many of these awards.

As indicated below, the Graduate Division offers one need-based financial aid program (GAP) and several fellowships to underrepresented students. Students may apply for both financial aid and fellowships simultaneously. All applicants for fellowships must be U.S. residents. For more information on these programs, contact the Graduate Affirmative Affairs Office, 1248 Murphy Hall (825-3829).

(1) **Dorothy Danforth Compton Fellowship Program** — UCLA is one of 10 universities selected by the Danforth Foundation for this program, which is jointly sponsored by the UCLA Office of the Chancellor. Initiated in 1981-82, it remains the most prestigious four-year fellowship available to underrepresented students. Fellowships are awarded to black/African American, Chicano/Mexican American, American Indian/Alaskan native, and Puerto Rican students committed to careers in college and university teaching. Students pursuing Ph.D. degrees in the humanities, social sciences, physical sciences, life sciences, and fine arts are eligible.

(2) **Project 88** — Funded jointly by the UCLA Chancellor's Office, the Graduate Division, and participating departments and schools, this program awards four-year fellowships on a competitive basis to historically underrepresented students (American Indian/Alaskan native, black/African American, Chicano/Mexican American, Pilipino, and Puerto Rican) pursuing doctoral degrees. Asian American students pursuing doctoral degrees in the arts, humanities, and social sciences are also eligible.

(3) **Office of the President Affirmative Action Fellowship** — This program is funded by the University of California Office of the President for entering Ph.D. students pursuing careers in research and teaching. All applicants must be U.S. citizens or permanent residents who are American Indian/Alaskan native, black/African American, Chicano/Mexican American, Latino/Hispanic, Pilipino, Asian American women (in all disciplines), and Asian American men in the social sciences and humanities. In addition, women in the physical and life sciences and engineering may apply regardless of ethnicity.

(4) **Graduate Opportunity Fellowship Program (GOFP)** — Funded by the University of California, this program provides fellowships to students from groups traditionally underrepresented in graduate programs and to women in fields such as engineering and the physical and life sciences.

(5) **Dorothy Danforth Compton Dissertation-Year Fellowship Program** — Funded by the Danforth Foundation, this program provides a one-year fellowship to support and encourage underrepresented students to complete the dissertation requirements for the Ph.D. degree. Students must be advanced to candidacy and within 12 months of completing all requirements for the Ph.D. The award provides a stipend, registration fees, and a research allowance.

(6) **Research Assistantship/Mentorship Program** — Funded by the University of California Office of the President, this program provides research assistantships for underrepresented students and is designed to encourage a close mentoring relationship between students and faculty members and to enhance research skills.

(7) **Dissertation-Year Fellowship Program** — Funded by the UC Office of the President, this program supports and encourages University of California minority graduate students to complete the dissertation requirements for the Ph.D. degree and to enhance their qualifications as candidates for faculty teaching and research. The award provides a stipend, registration fees (including mandatory health insurance), and a research allowance.

(8) **Graduate Advancement Program (GAP)** — Awards are made on the basis of need as demonstrated by standard University financial aid criteria. These awards differ from conventional financial aid allocations in that GAP students receive a registration fee grant (nonresident tuition is not paid under this program) and a combination of loans and/or work-study.

Awards Based on Financial Need

Because the cost of a graduate education may present a financial hardship, students who require assistance in meeting educational costs are encouraged to apply for aid based on their financial need. Need is defined as the difference between allowable school-related expenses and your financial resources. Financial aid applicants must file either the Student Aid Application for California (SAAC) or the Graduate and Professional School Financial Aid Service (GAPSFAS) application. The SAAC is preferred.

Financial aid awards include work-study and low-interest loans. Students are usually awarded a financial aid "package" which is a combination of these forms of assistance. Further information is available from the Financial Aid Office, A129J Murphy Hall.

Special Programs and Training

Graduate Cross-Enrollment Program with USC

As an integral part of an Academic Resource Sharing program linking UCLA with the University of Southern California, the Graduate Cross-Enrollment Program makes possible graduate student exchanges in many departments. The program is limited to specialized courses which would not otherwise be available to UCLA students and is in effect only during the regular academic year (not in summer).

If you have completed at least one term of graduate study at UCLA, are in good academic standing, and have obtained the necessary approvals, you may enroll in a 501 course through your department. When you have completed the course at USC, **your grade will be forwarded to UCLA** to be recorded on your transcript (S/U grading only). Only eight units of cross-enrollment courses may be applied toward requirements for the master's degree, and these courses may not be used to satisfy the five-graduate-course requirement. Applications, available from the Graduate Division, Student and Academic Affairs Section, 1225 Murphy Hall, should be completed before the start of the term in which the course is offered.

Intercampus Exchange Program

If you have completed one term of graduate study at any campus of the University and are in good academic standing, you may attend another campus as an Intercampus Exchange Graduate Student with the approval of your department chair, the chair of the department or group in which you wish to study at the host campus, and the dean of the Graduate Division at both the home and host campuses. The privilege should be used only by students whose graduate study may be enhanced by work with certain faculty or use of facilities and resources accessible only at another campus.

Although you are considered to be in residence at your home campus, as an Intercampus Exchange Student you have library, health service, and recreation center privileges at the host campus. Grades are transferred to your home campus and entered on your official record.

Applications are available from the Graduate Division, Student and Academic Affairs Section, and should be filed at least four weeks before the beginning of the term in which you expect to enter the program. The program is available only during the regular academic year (not in summer).

Graduate students may also take advantage of the **Education Abroad** and **Education at Home Programs**, described in Chapter 1 of this catalog.

Postdoctoral Fellows and Visiting Scholars

The University makes opportunities and facilities available to qualified scholars — those holding doctoral degrees or foreign equivalents — to continue advanced study and research under faculty guidance.

A postdoctoral fellow is one who (1) has been awarded a doctoral degree or the foreign equivalent where at least three years of undergraduate study are prerequisite to admission to the graduate program, (2) has been awarded a fellowship, traineeship, or equivalent support (including academic appointments such as postgraduate researcher) for studies at the postdoctoral level, and (3) is pursuing a program of research and training under the direction of a faculty member with the approval of the department or research unit, and by the dean of the Graduate Division. Enrollment as a postdoctoral fellow is normally for a period of one to three years and is limited to a period not to exceed five years. Interested candidates should make advance arrangements with the relevant department or research unit.

The same opportunities are made available to visiting scholars — senior scholars and distinguished visitors holding doctoral degrees or foreign equivalents — who wish to pursue independent research or advanced study at UCLA, working with a colleague for a limited time, normally no more than one year. Visiting scholars are distinguished from postdoctoral fellows in that they are not in training under faculty supervision but rather are themselves peers of our faculty, visiting from other universities and institutions. Visiting scholars ordinarily have adequate support funds from sources outside the University.

Further information on both postdoctoral fellows and visiting scholars is available from the Student and Academic Affairs Section, 1225 Murphy Hall.

General Policies and Regulations

Standards of Scholarship

To maintain satisfactory progress toward a graduate degree, UCLA requires at least a B (3.0) average in all courses taken in graduate standing at any campus of the University and in all courses applied toward advanced degrees. This standard applies to all graduate students, including candidates in certificate programs. In courses graded on an S/U basis, the grade of S (Satisfactory) is awarded for work which would otherwise receive a B or better. Grades S and U are not included in calculating grade-point averages.

Scholarship Probation

You are on probation and are subject to dismissal if your cumulative average in all work attempted in graduate standing falls below a B (3.0) or if work in any two consecutive terms falls below a B average. The dean of the Graduate Division, in consultation with your department, determines your eligibility to continue graduate study in probationary status. If you are allowed to continue, you must make timely progress toward improving your grade-point average.

Disqualification and Appeal

If you are subject to disqualification for reasons other than failure to maintain the minimum grade-point average, you will have your records reviewed by the Graduate Division, in consultation with the graduate adviser. If disqualification results, you may submit a written appeal to the dean of the Graduate Division for reconsideration.

Appeals will be considered only if based on appropriate cause such as (1) procedural error, (2) judgments based on nonacademic criteria, (3) personal bias, or (4) specific mitigating circumstances contributing to performance. Alleged errors in academic judgment or evaluation are not considered appropriate causes for appeal.

In cases of appropriate cause, the dean of the Graduate Division refers the appeal to the Graduate Council's Committee on Degree Programs. You are required to submit a written statement on the basis for your appeal and are entitled to a personal appearance before the committee. After obtaining information on the matter from any appropriate person or

office, the committee makes a recommendation to the dean of the Graduate Division, who makes the final decision. In reporting the decision, the committee includes the basis for the decision, its effective date, and any specific recommendations.

Graduate Student Complaints

Because of the separation of functions within the University, students are sometimes uncertain where they should direct their complaints. The following information may be helpful.

If you have complaints of a scholastic or professional nature involving faculty, you should take them up with the faculty member concerned or, if that is not feasible, with the chair of the department. If the department as a whole is involved, you should take the matter to the appropriate divisional or school dean. Should the issue not be resolved at that level, you may appeal to the dean of the Graduate Division, 1237 Murphy Hall.

Complaints of misconduct against individual students should be made at the Office of the Dean of Students, 1206 Murphy Hall. Complaints of misconduct against officially recognized campus organizations should be made at the Center for Student Programming, 161 Kerckhoff Hall, except complaints against Greek letter social organizations (i.e., fraternities and sororities) which should be made at the Office of Fraternity and Sorority Relations, 118 Men's Gym.

Complaints concerning alleged violation of the policies and regulations governing graduate study should be made to the dean or associate dean of the Graduate Division, 1237 Murphy Hall.

Complaints from teaching assistants about workloads and evaluations are governed by the provisions of the Teaching Assistant Grievance Procedures, which are spelled out in detail in the *Manual on Policies and Procedures Governing the Appointment and Utilization of Academic Apprentice Personnel at UCLA*. Copies are available from departments and from Graduate Student Support, 1228 Murphy Hall.

Complaints about a violation of University policy regarding the conduct of one or more faculty members should be handled as described in "Non-discrimination," "Harassment," and "Faculty Code of Conduct" in the Appendix.

Academics

4

Units and Grading Policy

UCLA students are responsible for understanding the grading policies and regulations established by the Academic Senate. Should any semantic variations exist between explanations in this catalog and regulations in the *Manual of the Academic Senate*, the manual will prevail in all cases. Copies of the Senate manual are available for your review in the Academic Senate Office, 3125 Murphy Hall.

Grades

Instructors are required to assign a final grade for each student registered in a course. The following grades are used to report the quality of a student's work at UCLA:

Undergraduate Students

A+ = Extraordinary
 A = Superior
 B = Good
 C = Fair
 D = Poor
 F = Failure
 P = Passed (achievement at grade C level or better)
 NP = Not Passed
 I = Incomplete
 IP = In Progress
 DR = Deferred Report

Graduate Students

A = Superior Achievement
 B = Satisfactorily demonstrates potential for professional achievement
 C = Passed but work does not indicate potential for professional achievement
 F = Failure
 S = Satisfactory (achievement at grade B level or better)
 U = Unsatisfactory
 I = Incomplete
 IP = In Progress
 DR = Deferred Report

For Undergraduate Students — The grades A, B, C, and D may be modified by a plus (+) or minus (–) suffix, to either raise or lower your grade-point average. The A+ grade will **not** raise your grade-point average because it carries the same number of grade points as the A grade. The grades A, B, C, and P denote satisfactory progress toward the bachelor's degree, but a D grade must be offset by higher grades in the same term for you to remain in good academic standing. An F grade yields no unit or course credit.

For Graduate Students — The grades A, B, and C may be modified by a plus or minus suffix. The grades A, B, and S denote satisfactory progress toward the degree, but a C grade must be offset by higher grades in the same term for you to remain in good academic standing. Courses in which a C grade is received, however, may be applied toward graduate degrees.

The Schools of Dentistry, Medicine, and Law maintain their own grading codes. If you are interested in programs in any of these schools, consult the appropriate school announcement.

Grade Points

In computing scholarship standing, a course counts as four quarter units. Partial or multiple courses are counted proportionally (e.g., one-half course is equal to two units).

Grade points per unit are assigned by the Registrar as follows:

A+ = 4.0	C+ = 2.3
A = 4.0	C = 2.0
A– = 3.7	C– = 1.7
B+ = 3.3	D+ = 1.3
B = 3.0	D = 1.0
B– = 2.7	D– = 0.7

F, NP, U = 0

Courses in which you receive a P or S grade may count toward satisfaction of degree requirements, but these grades, as well as DR, I, and IP, are disregarded in determining your grade-point average. (If an I grade is later removed and a letter grade assigned, units and grade points are included in subsequent grade-point averages.)

Computing Your Grade-Point Average

Your grade-point average, or GPA, is determined by dividing the number of grade points earned by the number of units attempted. The number of grade points earned for a course equals the number of grade points assigned times the number of course units. For example, suppose you take three four-unit courses and receive grades of A–, B–, and C+.

Grade Points	× Course Units	= Total Grade Points
A– = 3.7	4	14.8
B– = 2.7	4	10.8
C+ = 2.3	4	9.2
	12	34.8

To determine your GPA for the term, divide the total grade points earned (34.8) by the total course units attempted (12). Your GPA is 2.9.

For satisfactory standing, undergraduate students must maintain a C average (2.0 GPA) and graduate students a B average (3.0 GPA) in all courses taken at any campus of the University (except UCLA Extension).

Only grades earned in regular session or Summer Sessions at any UC campus are computed in your UCLA grade-point average. Grades earned at another institution or in UCLA Extension do not affect your GPA.

Other schools and agencies may calculate grade-point averages differently from the University when evaluating your records for admission to graduate and professional school programs. You should contact them about their policies in this regard.

Class Standing

Undergraduate classification is determined by the number of units completed:

Classification	Completed Units
Freshman	0 - 44.9
Sophomore	45 - 89.9
Junior	90 - 134.9
Senior	135 or more

In all campus units except the School of Engineering and Applied Science, you are required to earn a minimum of 180 units from all college-level coursework for the bachelor's degree at UCLA. A maximum of 208 units is allowed in the School of the Arts, School of Nursing, and School of Theater, Film, and Television; in the College of Letters and Science a maximum of 216 units (228 for double majors and special programs) is allowed. In the School of Engineering and Applied Science, the minimum units allowed are between 180 and 201 (depending on the program); 213 maximum units are allowed. If you exceed the maximum, you may not be allowed to continue, except in rare cases approved by your college or school. See the degree requirements under each college and school for further details.

Graduate classification is based on your degree objective and whether or not you are advanced to candidacy for a doctorate.

Passed/Not Passed (P/NP) Grades

Undergraduate students in good standing who are enrolled in at least 12 units (14 in the School of Engineering and Applied Science) may take certain courses on a Passed/Not Passed basis.

By alleviating grading pressures, this option allows you to explore areas in which you have little or no previous experience. The grade P is assigned for a letter grade of C or better. Units earned this way count toward satisfaction of degree requirements but do not affect your GPA. You will receive neither units nor course credit for an NP grade.

You may enroll in one course each term on a P/NP basis (two courses if you have not elected the P/NP option in the preceding term). You may not elect this option for Summer Sessions courses without an approved petition. Your department or school may require that you take some or all courses in your major for a letter grade. Certain other courses or programs may also be exempt from the P/NP option; consult your college or school for details.

You may make program changes to or from P/NP grading through the sixth week of instruction (see the Calendar at the beginning of this catalog for exact dates); changes after the first two weeks of class require a petition (available for purchase in the school supplies section at any ASUCLA Students' Store).

Certain undergraduate courses are offered only on a Passed/Not Passed basis and are designated PN in the *Schedule of Classes*.

Satisfactory/Unsatisfactory (S/U) Grades

Graduate students in good standing (minimum 3.0 GPA) may enroll for S/U grading in one graduate or upper division course outside the major field each term, in addition to any courses offered only on an S/U grading basis within the major. The grade S is assigned for a letter grade of B or better, but units earned in this manner will not be counted in computing the GPA. You will receive neither units nor degree credit for a U grade. You may not elect the S/U option for Summer Sessions courses without an approved petition.

Courses taken on an S/U basis outside the major, and 500-series courses within the major, are applicable toward degree and/or academic residency requirements if so approved. Interdepartmental majors may not apply S/U courses to degree requirements, except for 500-series courses. Program changes to or from S/U grading may be made through the tenth week of instruction (see the Calendar at the beginning of this catalog); changes after the first two weeks of class require a petition (available for purchase in the school supplies section at any ASUCLA Students' Store).

Certain graduate courses are offered only on a Satisfactory/Unsatisfactory basis and are designated SU in the *Schedule of Classes*.

Incomplete (I) Grades

Once an I grade is assigned, it remains on your transcript along with the passing grade you may later receive for the course. Your instructor may assign the I grade when your work is of passing quality but is incomplete for a good cause (i.e., illness or other serious problems). It is your responsibility to discuss with the instructor the possibility of receiving an I grade as opposed to a nonpassing grade.

If an I grade is assigned, you may receive unit credit and grade points by satisfactorily completing the coursework as specified by the instructor. Do not reenroll in the course; if you do, it will be recorded twice on your transcript. If the work is not completed by the end of the next full term in residence, the I grade will lapse to an F, NP, or U as appropriate. Your college or school may extend this deadline in unusual cases.

Petitions for Removal of Incomplete Grade are available for purchase in the school supplies section at any ASUCLA Students' Store.

In Progress (IP) Grades

For certain courses extending over more than one term (identified by T1, T2, T3, or T4 in the *Schedule of Classes*), evaluation of student performance is deferred until the end of the final term of the course. Provisional grades of IP are assigned in the intervening term(s) and are replaced with the final grade when you complete the full sequence. The school or college faculty or the Graduate Council will determine credit if you do not complete the full sequence and petition for partial credit.

Deferred Report (DR) Grades

You may receive a DR grade when the instructor believes your work to be complete but cannot assign a grade because of disciplinary proceedings or other problems. If you are given a disciplinary DR grade, the Office of the Dean of Students will assist you in resolving the problem. For graduate students, the dean of the Graduate Division will set a deadline by which the DR will lapse to an F if the problem is not resolved and a grade assigned. The DR will be changed to a grade, or perhaps to an Incomplete, when the instructor provides written confirmation that you have resolved the situation. The DR grade is not included in determining your grade-point average.

Repetition of Courses

Certain courses, as noted in their course descriptions, may be repeated for credit. Other courses taken at the University (except UCLA Extension) may be repeated only according to the following guidelines:

- (1) To improve your grade-point average, you may repeat only those courses in which you receive a grade of C – or lower; NP or U grades may be repeated to gain unit credit. Courses in which you received a letter grade may not be repeated on a P/NP or S/U basis. Courses originally taken on a P/NP or S/U basis may be repeated either on the same basis or for a letter grade.
- (2) Repetition of a course more than once requires the approval of your college or school or the dean of the Graduate Division, and is granted only under extraordinary circumstances.
- (3) Degree credit for a course will be given only once, but the grade assigned each time you take the course will be permanently recorded on your transcript.
- (4) For undergraduates who repeat a total of 16 units or less, only the most recently earned letter grades and grade points will be computed in the grade-point average. After repeating 16 units, however, your GPA will be based on all letter grades assigned and total units attempted.
- (5) For graduate students, all courses in which a letter grade is given, including repeated courses, will be used in computing the grade-point average.

Correction of Grades

All grades except DR, I, and IP are final when filed by the instructor in the end-of-term course report. Thereafter, a grade change may be made only in case of a clerical or procedural error or other unusual circumstances. No grade may be revised by reexamination or, with the exception of the I and IP grades, by completing additional work. If you are dissatisfied with a grade, you should review your work with the instructor and receive an explanation of the grade assigned. All grade changes are recorded on your transcript. See the Appendix for further details and procedures for appealing grades.

Credit by Examination

Students with high scholastic standing may earn credit for regular University courses by taking examinations rather than enrolling in the courses. This is accomplished by establishing, with a UCLA faculty member, an individual plan of study which may include oral and written work in addition to other requirements. To be eligible for this privilege, undergraduate students must have completed a minimum of 12 units at UCLA. Graduate students must be registered at the time of the examination and are limited to a maximum of three courses taken in this manner.

The results of these courses are entered on your record in the same way as regular courses, and corresponding grade points are assigned. Graduate credit earned by examination may be applied toward minimum course requirements for master's degrees but cannot apply to academic residence requirements for master's or doctoral degrees.

You will need approval from the appropriate instructors, the department, and your college or school or the dean of the Graduate Division, from whom petitions for credit by examination (with fee) are available.

Other Academic Policies

Concurrent Enrollment and Transfer of Credit

Concurrent enrollment means taking courses for credit in UCLA regular session (Fall, Winter, or Spring Quarter) and at another college institution (including UCLA Extension) at the same time. **Concurrent enrollment is not permitted except in extraordinary circumstances, and no**

credit will be given for courses taken concurrently elsewhere without the approval of your college or school. This does not apply to UCLA Summer Sessions (see "Summer Sessions" in Chapter 1).

Undergraduate Students

During the summer or during a term when you are not registered at UCLA, you may elect to take courses for credit at UCLA Extension, a community college, or another four-year institution (see limitations below). The Office of Undergraduate Admissions and Relations with Schools makes the final decision on credit transferability, but it is your responsibility to select courses with catalog descriptions similar to courses offered in regular session at UCLA. You should avoid courses that are closely related to those you have already taken, as you cannot receive credit twice for the same or similar courses. If you wish to apply a specific course from another college toward satisfaction of degree requirements at UCLA, consult your college, school, or department counselor before taking the course.

Only grades earned in regular session or Summer Sessions at any UC campus will be computed in your UCLA grade-point average. You may, however, receive unit credit and satisfy course requirements with transferable work taken elsewhere. When you have completed the work, you must have the other college send a copy of your transcript to the UCLA Office of Undergraduate Admissions and Relations with Schools (UARS); you must also fill out a Transfer Credit Evaluation Request form at UARS, 1147 Murphy Hall.

UCLA Extension — If you wish to receive degree credit for work taken through UCLA Extension, you should take courses that correspond in number to the undergraduate courses offered in regular session. The designation XL or XLC before the number of the Extension course signifies that the course is equivalent to the regular session course bearing the same number. No degree credit is given for courses numbered X300 through X499. Remember that concurrent enrollment in Extension and regular session is not permitted.

Community Colleges — The maximum number of community college units allowed toward the bachelor's degree is 105 quarter units (70 semester units). The UCLA Office of Undergraduate Admissions and Relations with Schools will not grant transfer credit for community college courses beyond 105 quarter units, but you may still receive subject credit for this coursework to satisfy lower division requirements. Consult your college or school counselors for possible further limitations. (To convert semester units into quarter units, multiply the semester units by 1.5 — e.g., 12 semester units \times 1.5 = 18 quarter units. To convert quarter units into semester units, multiply the quarter units by .666 — e.g., 12 quarter units \times .666 = 7.99 or 8 semester units.)

Graduate Students

With approval of the dean of the Graduate Division, certain courses completed outside of UCLA regular session may be applied toward the master's degree. For more details, see "Transfer of Credit" under "Requirements for Graduate Degrees" in Chapter 3.

Transcript of Record

The Registrar prepares and permanently retains a record of each student's academic work. Your transcript reflects all undergraduate and graduate work completed in UCLA regular session and Summer Sessions. It lists chronologically your courses, units, grades, cumulative grade-point average, transfer credits, and total units.

The University Records System Access (URSA) allows all UCLA students to obtain course confirmation, past and current term UCLA grades, GPA, completed units, current UCLA holds (i.e., restrictions from receiving services), and confirmation of registration fee payment via a touch-tone telephone. Presently you can call URSA at (310) 208-0425 Monday through Saturday from 6 a.m. to 8 p.m., including holidays (hours are subject to change). You can call as often as you wish. Access is given based on your nine-digit UCLA student I.D. number, your four-digit security code, and some portion of your Social Security number. The system is

easy to use, explaining what to do at each step. A time limit is announced at the beginning of each call. If you exceed the limit, you will be disconnected. You may access the system for up to 10 years after your graduation or your last term of attendance. For additional information, consult the *Schedule of Classes*.

As needed, you may obtain a free printout of your grades for the most recent graded term at Academic Record Services, 1134 Murphy Hall, by presenting your current term Registration Card and UCLA Student I.D. Card.

To have official transcripts sent to other schools or institutions, fill out a Transcript Request form (available in the Murphy Hall North Lobby). Each transcript costs \$4; make your check or money order payable to Regents-UC. Transcript fees are subject to change at any time. Requests will not be processed if you have outstanding financial obligations to the University. Transcripts of work completed elsewhere must be requested directly from the campus or institution concerned.

Transcripts for UCLA Extension courses must be ordered from UCLA Extension, P.O. Box 24901, Los Angeles, CA 90024.

Verification of Student Status

The Registrar verifies registration (fee payment) and enrollment status for loan forms and other noncampus certifications at 1134 Murphy Hall as a student is eligible. Verifications cannot be issued if registration fees for the term have not been paid.

Certificate of Resident Study for International Students

In addition to a formal transcript, each college or school or the Graduate Division may issue a Certificate of Resident Study to a registered international student. To obtain this certificate, you must have completed a program of at least nine courses with a minimum 2.0 grade-point average (2.5 for Graduate Division students), or have satisfactorily completed a research project over a period of nine months or more. The chair of your major department recommends the award of this certificate.

Registration Card

Your valid Registration Card (Reg Card) is your official student identification and is required, along with your UCLA Student I.D. Card, for all University services. Carry it with you as you will be asked to show it for student health services, library privileges, athletic and cultural student ticket rates, recreation center, check cashing, and many other campus services.

If you lose or do not receive your Reg Card, a temporary verification card (good for seven days) will be issued without fee at 1113 Murphy Hall. After the term begins, you may replace lost, destroyed, or mutilated cards at 1113 Murphy Hall for a \$3 fee. You must show proof of identity for verification or replacement cards.

UCLA Student (Photo) I.D. Card

This card with photo is issued without charge to new or reentrant students from the beginning to the end of the first academic term and is valid with the current Reg Card. It is required for all University services and student activities.

You will need a current Reg Card and other valid identification (driver's license, passport, or California DMV I.D. card) to obtain your Student I.D. Card. There is a \$20 fee for issuing the card after your first academic term in attendance, for replacing lost or destroyed cards, and for issuing cards because of a name change affecting your University records.

Change of Name or Address

If you wish to change your name on your official University record, fill out a UCLA Correction or Change of Name form at Academic Record Services, 1134 Murphy Hall. All name changes are recorded on your transcript. If you change your address after filing the UCLA Data Change Request portion of your Registration Form, notify the Registration/Enrollment Office in 1113 Murphy Hall as soon as possible.

Leaving UCLA

Intercampus Transfer

Undergraduate students registered in a regular session at any campus of the University (or those previously registered who have not since registered at any other school) may apply for transfer to another campus of the University. Obtain the *UC Application for Undergraduate Admission and Scholarships* and submit the required application fees with the application form. The filing periods are the same as those for new applicants (see "Undergraduate Admission" in Chapter 2). Applications are available from the UCLA Office of Undergraduate Admissions and Relations with Schools, 1147 Murphy Hall, Los Angeles, CA 90024-1436, other University of California Undergraduate Admissions Offices, or your local community college.

Graduate students who wish to enroll as degree candidates at other UC campuses must apply for admission to those Graduate Divisions.

Absence during a Term

If you have to be absent from classes temporarily for reasons beyond your control, you should notify your instructors. Regardless of the reasons for absence, you are required to complete all coursework. If you cannot complete the work on time because your absence is late in the term or prolonged, you may request that the instructors assign an incomplete grade (see "Incomplete Grades" earlier in this chapter).

One-Term Absence for Undergraduates

Undergraduate students who have completed at least one term at UCLA and fail to register for the following term may return to the University the next subsequent term as continuing students. If you plan to attend another institution (including UCLA Extension) during your absence, you should consult your college or school counselor before enrolling elsewhere (see "Concurrent Enrollment and Transfer of Credit" earlier in this chapter). If you are absent for two or more consecutive terms, you are no longer considered a continuing student and must apply for readmission (see "Readmission" in Chapter 2 for procedures and deadlines).

Leave of Absence for Graduate Students

Graduate students in good standing may be granted leaves of absence, normally for periods of one to three terms, on approval from the appropriate department and the Graduate Division. Leaves, which may be extended for a total of two years at the discretion of your department and with approval of the Graduate Division, must be requested before the end of the second week of classes (see "Withdrawal" in the next column for fee refund procedures and more information). Request forms are available from the Graduate Division, Student and Academic Affairs Section, 1225 Murphy Hall. For details on leaves of absence, see *Standards and Procedures for Graduate Study at UCLA*, available in the Graduate Division offices or in individual departments. Students on leaves of absence are not eligible to use University facilities (except libraries) or faculty time and cannot receive University financial support. Leaves of absence as described here do not apply to undergraduates.

Graduate students who fail to register for a term and do not take an official leave of absence are considered to have withdrawn from the University and must compete for readmission with all other applicants.

Cancellation

Before the first day of classes, you may cancel registration by mailing a written notice and your current Registration Card to the Registration/

Enrollment Office, Attn: Cancellation Clerk, 1113 Murphy Hall, Los Angeles, CA 90024-1429. A \$10 service charge will be deducted from your fee refund; additional fees will be deducted for failure to return your Registration Card.

Undergraduates who return to the University for the following term are considered continuing students. If you are absent longer than one term, you must apply for readmission (see "Readmission" in Chapter 2 for procedures and deadlines). If you cancel in your first term at UCLA, you must reapply for admission.

Graduate students who cancel their registration and do not apply for a formal leave of absence must compete for readmission to return to the University.

Withdrawal

Withdrawing from the University means discontinuing attendance in all courses in which you are enrolled. If you withdraw during a term, you need to file a Notice of Withdrawal, available from your academic dean's office (undergraduates) or departmental office (graduate students). Submit your Registration Card along with the form or a fee will be deducted from any refund.

When you withdraw officially during the first five weeks of instruction (calendar days 1 to 35, beginning with the first day of instruction), a percentage of your registration fee will be refunded as follows:

- First and second weeks of instruction: 80% refund
- Third week of instruction: 60% refund
- Fourth week of instruction: 40% refund
- Fifth week of instruction: 20% refund
- After fifth week of instruction: no refund

If instruction begins in midweek, refund percentages may also change in midweek. Claims for refund must be presented within the academic (fiscal) year to which the claim is applicable. Consult the current *Schedule of Classes* for further details and specific refund dates.

You may withdraw only if you have not taken any final examinations or otherwise completed the work in any of your classes. For undergraduates, one withdrawal places no restriction on readmission or continuation if you started the term in good academic standing. If you withdraw after one or more previous withdrawals or while in academic difficulty, a restriction may be placed on your continuance in undergraduate standing. Before withdrawing, you are urged to consult faculty, departmental, or college advisers to consider the full implications of this action.

Undergraduates may also withdraw from a term retroactively, provided no final examinations have been taken and no coursework has been completed. No withdrawals are accepted once you have officially graduated from the University.

If you register and subsequently discontinue coursework or stop payment on registration checks without an approved petition for withdrawal, leave of absence, or cancellation, you will receive F, NP, or U grades, as appropriate, for all courses in which you are enrolled for that term. A \$60 fine will be assessed if any check for registration fee payment is returned by a bank (i.e., stopped payment, insufficient funds, etc.). No fees will be refunded, and future registration privileges may be curtailed or revoked. Transcripts will not be issued if you have outstanding financial obligations to the University.

Undergraduate Students — If you return to the University for the term following withdrawal, you are considered a continuing student. If you return later than the following term, you must apply for readmission.

Graduate Students — If you do not register for a term, you are considered to have withdrawn from the University and must apply for readmission when you return.

Graduation from UCLA

Approximately eight out of every 10 UCLA freshmen eventually receive a baccalaureate degree, either from UCLA or from another campus or institution. According to a recent survey of UCLA alumni, one third of all UCLA baccalaureate recipients go on to graduate school. For information on academic requirements for graduation, see “Undergraduate Degree Requirements” in Chapter 2.

Undergraduate Students

The awarding of the bachelor’s degree does not happen automatically but is the culmination of several steps which begin when you identify the term you expect to complete degree requirements on part 3 of the quarterly Registration Form (“degree expected term” section). **This must be done by the time you complete 160 units or a late fee will be assessed.** The identified term must fall within the academic year (four quarters) subsequent to the term in which you reach or expect to reach the 160-unit mark. Exceptions can be made by your degree auditor depending on your program of study (e.g., double majors).

You may request a review of your degree progress by a counselor in your college or school office at any time. Advisers in your major department are also available for counseling on departmental requirements.

The “degree expected term” you specify on your Registration Form is used by the degree auditors to review your coursework and begin the audit of your completion of degree requirements. You cannot graduate without such an audit. If your expected graduation date changes, mark the new term on the Registration Form and file it within the published dates (consult the *Schedule of Classes* Calendar) at 1113 Murphy Hall. Once you have completed 160 or more units, a fee will be assessed each time you petition to change your “degree expected term” on the UCLA Declaration of Candidacy form.

The last day to declare candidacy for the current term (with fee if 160 or more units completed) is Friday of the seventh week. Declaration of candidacy after the seventh week may result in a degree award date for the following term.

During the fourth week of each term, a list of all current term degree candidates is posted in the glass case next to 1104 Murphy Hall. If you have requested that no public information (including your name) be released, you will not be included on the posted list. Inquire at 1113 Murphy Hall for information on your “degree expected term” (a photo I.D. is required).

If you intend to complete degree requirements as a nonregistered student (take a course through UCLA Extension or at another institution, remove an Incomplete grade, etc.), you must file a request to graduate “in absentia” with your degree auditor by the seventh-week candidacy deadline. Students graduating “in absentia” will be assessed the special order diploma fee in addition to the declaration of candidacy fee.

Students in the School of the Arts, School of Nursing, School of Engineering and Applied Science, and School of Theater, Film, and Television are audited for degree requirements by staff members in their respective counseling/student affairs offices and should consult them regarding questions on degree requirements and school degree audit procedures.

Students in the College of Letters and Science who entered UCLA in Fall Quarter 1988 and thereafter are mailed a computer-generated **Degree Progress Report** once a year (copies can also be ordered at A316 Murphy Hall). This report includes a detailed evaluation of transfer credit, courses and grades for each completed term, degree requirements completed, and requirements still outstanding.

Students who entered prior to Fall Quarter 1988 are audited for degree requirements by the Registrar’s degree auditors after completing 160 units, with a “degree expected term” within the subsequent two terms.

You should receive information regarding your completion of requirements or any remaining degree requirements and/or deficiencies no later than your final term.

A “Summary of Shortages for the Bachelor’s Degree” statement is mailed to each current term candidate who does not satisfy degree requirements that term. If you receive such a notice, contact a degree auditor immediately to discuss your expected completion of the requirements.

Once you complete 180 units and reach the term you have declared as your “degree expected term,” you are reviewed by your degree auditor for award of the degree each subsequent term while in continuous registration, including UCLA Summer Sessions. Keep your degree auditor informed of your plans for completing your degree.

Graduate Students

Candidates for both master’s and doctoral degrees must file an advancement to candidacy petition, be advanced to candidacy, and complete all degree requirements, including the master’s thesis or comprehensive examination, or doctoral dissertation, before the degree is conferred (consult the *Schedule of Classes* for filing deadlines). For full details on degree requirements and procedures for graduate students, see Chapter 3 on Graduate Study.

Final Transcript

Official transcripts with your graduation date included are available approximately seven weeks after the end of the term. If you require earlier proof of graduation, contact your degree auditor.

Degree Date

Degrees are awarded at the end of Fall, Winter, and Spring Quarters and at the end of the second Summer Session. For the School of Law and School of Medicine degrees are awarded at the end of Fall and Spring Semesters. Consult the respective University calendars (quarter, summer sessions, semester) for the actual degree award date, which is the final day of the term.

Diplomas

Diplomas for both undergraduate and graduate students are available approximately three to four months after the degree award date. Information about obtaining your diploma in person (no fee) or by mail (with fee) is sent to you approximately seven weeks after the end of your final term. To expedite receipt of your diploma, you are encouraged to return the diploma mailer form and remit the mailing fee. Recorded information regarding diploma availability may be obtained by calling the Diploma Hotline at 825-8883. The Registrar’s Office retains diplomas for five years from graduation date.

If your original diploma is destroyed, a duplicate may be ordered by contacting the Registrar’s Office, Diploma Reorder, 1113 Murphy Hall. There is a fee for the replacement diploma, and it will bear a reissue date and the signatures of the current officials of the state and University.

Commencement

Each school and college conducts an academic ceremony for its graduates. Some of the ceremonies feature an address by the Chancellor, student speakers, and recognition of candidates who have achieved high academic distinction and honors, as well as prizes. Check with your school or college for eligibility requirements and program and time schedules.

Academic regalia (caps, gowns, and hoods) are available for rent/purchase at ASUCLA’s Graduation Et Cetera (across from Tout de Suite on the first floor of Ackerman Union, 825-2587). In addition, graduation announcements with printed enclosure cards, diploma covers, and diploma mounting are available. You may also purchase graduation announcements at the ASUCLA Campus Photo Studio (150 Kerckhoff Hall) through mid-May. Discount packages are available for purchase through a joint effort by the UCLA Alumni Association and ASUCLA.

Colleges and Schools

Organization

This catalog is organized into the one college and 13 schools which are the University's component parts. Each of the following chapters is devoted to a single college or school. Each is introduced by general information on scope and emphasis, the academic departments it encompasses, admission standards, and requirements for undergraduate and graduate degrees.

The overall college or school description is followed, in alphabetical sequence, by its departmental listings. Here you will find faculty rosters, departmental degree requirements, requirements for the major, and descriptions of all courses (lower division, upper division, and graduate) offered by that department or interdepartmental degree program. (If you are not certain which college or school offers a particular program, see the organization chart on the inside front cover.)

Since the great majority of UCLA's students and degree programs are housed within the College of Letters and Science, that unit is presented first. It is followed by the other general campus units offering undergraduate programs: School of the Arts, School of Theater, Film, and Television, and School of Engineering and Applied Science. The graduate professional schools of Architecture and Urban Planning, Education, Law, Library and Information Science, Management, and Social Welfare follow in alphabetical sequence. The health sciences disciplines, which include the Schools of Dentistry, Medicine, Nursing, and Public Health, are the final chapters before the Appendix.

Courses of Instruction

Because the catalog must be prepared well in advance of the academic year it covers, it may not reflect recent changes in courses, curricula, and faculty listings. For more current information, consult the quarterly *Schedule of Classes* available in the Students' Store shortly before the beginning of each new term.

Courses listed in this catalog represent the total nonclinical offerings of each college, school, and department at UCLA. Certain courses listed may not be offered every term or every year. Where possible, the terms in which a course is offered have been indicated in parentheses after the instructor's name (F = Fall, W = Winter, Sp = Spring, Sum = Summer).

Academic Credit

A course has a credit value of four quarter units unless otherwise specified in parentheses after the course title.

A listing such as **History 1A-1B-1C, Introduction to Western Civilization**, indicates three full four-unit courses, 1A, 1B, and 1C. The listing **Music 4A-4B-4C, Basic Musicianship (2 units each)**, indicates three half-courses at two units each. A course may not be prerequisite to the next in the series unless so designated, but since policies vary among departments, you should check with the departmental counselor or adviser. Credit for a specific course may be dependent on completion of a subsequent course, as noted in the description.

Prerequisites

Education is a building process. It is difficult or impossible to learn advanced principles without first understanding elementary ones. Therefore, one or more lower division courses may be prerequisite to taking another lower division or an upper division course. Prerequisites should be noted carefully — it is your responsibility to meet these requirements in preparation for more advanced work. A course has no prerequisites if none is designated in departmental requirements or course descriptions.

Undergraduate Courses

Undergraduate courses are classified as lower division and upper division. **Lower division courses (numbered 1-99)** are often surveys offering preliminary introductions to the subject field. They are designed primarily for freshmen and sophomores, though upper division students may enroll for unit and grade credit. Lower division courses may not be applied toward graduate degrees.

Upper division courses (numbered 100-199) are open to all students who have met the prerequisites indicated in departmental requirements or the course description. Preparation generally includes at least one lower division course in the subject or two years of college work. With approval of the major department, graduate students may take 100-series courses toward satisfaction of master's degree requirements.

Courses numbered 98 and 198 are group study courses set up on a one-time basis in subjects for which no regular courses have been established. Because they vary in content and are offered irregularly, they are not listed in the catalog.

Individual special studies courses (numbered 199, 199F, 199H, and 199I) involve supervised independent study and research requiring adequate background in the subject proposed for study. These courses are open to juniors (with a minimum 3.0 GPA in the major field), seniors, and graduate students. To enroll, you must complete the appropriate petition (available from the department) and have it approved by both the instructor in charge and department chair.

Undergraduates may enroll in a maximum of eight units of 199, 199F, 199H, and/or 199I courses per term. After completing 16 units of 199 and/or 199H credit on a letter grade basis, you must take any additional 199 and/or 199H courses on a Passed/Not Passed basis. Independent field study courses (199F and 199I) must be taken on a Passed/Not Passed basis; a total of eight units is allowed. If you have an outstanding Incomplete grade in a 199, 199F, 199H, or 199I course, you may not register for another until the I grade is removed. See departmental listings and individual course descriptions for specific prerequisites and credit limitations.

Graduate Courses*

Graduate courses numbered 200-299 are generally open only to graduate students who have completed basic undergraduate courses in the subject. Courses and seminars in the 200 series can fulfill the minimum graduate course requirement for any advanced degree.

*These definitions do not apply to the School of Law, which maintains its own course numbering system.

With departmental and instructor consent, and subject to requirements in the appropriate college or school, undergraduate students may enroll in 200-series courses for unit credit toward the bachelor's degree. If you take a graduate course as an undergraduate, you may not apply that same course later toward a higher degree.

Graduate courses numbered 300-399 are highly specialized teacher-training courses which are not applicable toward University minimum requirements for graduate degrees. They are acceptable toward the bachelor's degree only at the discretion of the individual college or school.

Graduate courses numbered 400-499 are designed for professional programs leading to graduate degrees other than the M.A., M.S., and Ph.D. These courses may not be used to satisfy minimum graduate course requirements for the M.A. or M.S. degree but may apply as electives.

Individual study and research courses (numbered 500-599) are reserved for advanced study and are not open to undergraduates. Courses are numbered as follows: 595/596 = directed individual study or research; 597 = preparation for master's comprehensive or doctoral qualifying examination; 598 = master's thesis research and preparation; and 599 = doctoral dissertation research and preparation. (Courses numbered 501 are not individual study and research but are cooperative programs held in conjunction with other institutions.) See individual departmental listings for specific limitations on 500-series courses.

UCLA Extension Courses

In general, you may not attend UCLA Extension for degree credit if you are enrolled in UCLA regular session at the same time. However, certain Extension courses (numbered 1-199), prefixed by XL or XLC in the course listings, yield credit toward the bachelor's degree. Graduate students may petition to apply up to two XLC courses toward the master's degree. For more details, see "Concurrent Enrollment" earlier in this chapter.

Concurrent and Multiple Listings

Concurrently scheduled courses (identified by a capital C before the course number) are pairs of courses, usually within a single department or program, for which credit is given at two levels — undergraduate and graduate. Concurrently scheduled courses are offered at the same time and place with the same instructor, but work levels and performance standards are evaluated differently for students at each level. (Concurrently scheduled courses as described here should not be confused with concurrent courses offered through UCLA Extension.)

Multiple-listed courses (identified by a capital M before the course number) are courses of the same format and level offered jointly by more than one department. For example, Political Psychology is offered by the Department of Political Science (Political Science M140) and the Department of Psychology (Psychology M138). You will find that particular course listed under both departments in Chapter 5 on the College of Letters and Science.

Faculty Rosters

Faculty rosters in each academic department are listed in the following order:

- Professors
- Associate Professors
- Assistant Professors
- Lecturers
- Adjunct and Visiting faculty in each of the first three Academic Senate classifications

In the case of interdepartmental degree programs, all participating faculty members have appointments in regular academic departments. Participating faculty are listed in the above order, with the home department or specialty of each member indicated in parentheses.

College of Letters and Science

Herbert Morris, Interim Provost

5

“The Idea of a Multiversity’ is a city of infinite variety. Some get lost in the city; some rise to the top within it; most fashion their lives within one of its subcultures. . . . It offers . . . a vast range of choices, enough literally to stagger the mind. In this range of choices . . . (one) encounters the opportunities and the dilemma of freedom.”

Clark Kerr, *The Uses of the University*

With over 23,000 students and 1,000 faculty, UCLA’s College of Letters and Science is the largest academic unit in the UC system. Underscoring the “multiversity” concept, its four academic divisions of humanities, physical sciences, social sciences, and life sciences provide the framework for more than 100 majors leading to the Bachelor of Arts or Bachelor of Science as well as to master’s and doctoral degrees.

The undergraduate programs in the college stress a “liberal arts education” which brings together perspectives from many fields in a unified approach to learning. Students learn some of the ways issues are analyzed, questions posed, and knowledge organized. After sampling many general subjects, they concentrate on one field or subject and are required to pursue it rigorously and in depth, according to the standards of scholars in the field. When they reach the graduate level, they will pose their own questions, analyze academic issues of their own making and, through their research, participate in the creation of knowledge.

College of Letters and Science

A316 Murphy Hall, (310) 825-1965

The primary units of the College of Letters and Science are the academic departments which are grouped in four divisions: humanities, physical sciences, social sciences, and life sciences. Each division is headed by a dean who reports directly to the provost.

In addition to departmental advising, the Division of Honors and Undergraduate Programs includes a network of student assistance within its components: College Counseling Service, Honors Programs (see "Honors" later in this section), and Academic Advancement Program (see Chapter 2).

Humanities

The division's mission is to promote, through scholarly inquiry and transmission of ideas, sensitive, imaginative, and rigorous reflection on the human condition and to engage in thoughtful reflection on those deep and abiding questions that relate to what it is to be human. Faculty and students reflect on art, literature, philosophy, and other expressions of the human spirit, each of which deepens their understanding. The instructional goal is to engage students in this inquiry — to further their knowledge and competence to express themselves clearly, rigorously, with style and originality.

Programs in the humanities range from teaching the craft of composition in writing programs, to developing an appreciation of profound philosophical thinkers and writers from Asia, the Near East, Europe, England, and America. Daniel G. Calder is the acting divisional dean.

Physical Sciences

The division's departments present the results of mankind's efforts to understand the physical aspects of the natural sciences, which include the study and understanding of the properties and characteristics of matter and energy; the science of numbers and order; studies of the origin and structure of the universe, solar system, and Earth; and climatic change. The bases for the physical sciences are the fundamental laws and proof of mathematics, chemistry, and physics. Studies in the physical sciences are experimental, theoretical, and observational.

Faculty and students are interested in such topics as the nature and evolution of the galaxies; ozone depletion; nuclear winter; greenhouse effect; molecular recognition, interac-

tions, design, synthesis, and structure; evolution of life and the continents; computational mathematics and symbolic logic; superconducting materials; plasma fusion, space plasmas; and high-energy accelerator physics. Clarence A. Hall, Jr., is the divisional dean.

Social Sciences

The division's departments are guided by the ideal of creating a deeper understanding of cultures and heritages and helping young people make sense of the rapidly changing world. By studying and comparing diverse cultures with their own, students gain self-knowledge and global awareness.

Anthropology students study human communities and social systems, archaeological records, and artifacts. Communication studies students learn about the mass media of today and their technological advances, social uses, and abuses. Leading economists investigate the applications of economic principles to business decisions. The geographic purview extends from studying the effects of location on human behavior to the Earth's ecosystem. Courses in history bring about understanding of the forces that have shaped the many societies and cultures of this country and the world. Political scientists study the motivations of political behavior and the relations between today's superpowers. UCLA sociologists examine subjects ranging from the everyday interaction of people to the complexities of social organizations. Scott L. Waugh is the divisional dean.

Life Sciences

Faculty and students in the division play an essential role in unlocking the secrets and mechanisms of life at the most fundamental level. The geography of Southern California is very conducive to life sciences research. An area as ecologically rich and diverse as Southern California is a natural laboratory for environmental physiologists and plant and animal ecologists.

Scientists in biology, microbiology and molecular genetics, and molecular biology conduct research in cell and developmental biology. Neurochemists, neurophysiologists, psychobiologists, and behavior biologists research the underlying mechanism of the neural basis of behavior. Physiological scientists examine the regulation of human movement, neural control of breathing, and environmental conditions such as weightlessness, which affect bone and muscle structure and function. Cognitive sci-

entists are concerned with the nature of knowledge — how people learn, remember, associate, and think, and how computers relate to thought processes. Frederick A. Eiserling is the divisional dean.

Undergraduate Study

The degree programs in the College of Letters and Science are designed to expose students to a variety of intellectual challenges by combining a wide distribution of courses and the opportunity to specialize in one particular field. To this end, you are required to select lower division courses that deal with the general foundations of human knowledge. In upper division courses you are relatively free to concentrate attention on one field of interest: your major.

You are expected to select a major by the beginning of your junior year. This may be a program of related upper division courses within a single department (departmental major) or a group of related courses involving a number of departments (interdepartmental major) or, under certain circumstances, a group of courses selected to meet your special need (individual major). Preparation for a major often requires prior completion of courses known as *prerequisites*.

Counseling Services

The College Counseling Service is located in A316 Murphy Hall. Staff members are specially trained to assist you with questions pertaining to academic regulations and procedures, selection of courses, and the many options and alternatives available to enhance your university education.

Some questions can be answered at the college information window or by calling 825-1965. If you would like to confer with a counselor regarding overall degree requirements, academic difficulty, program planning, or assistance in selecting a major, you can arrange an appointment at the information window. Appointments with counseling assistants can be scheduled by calling 206-6681. Group counseling sessions on a variety of academic issues are offered throughout the year.

For information on the ASK peer counselors, Orientation, and College Tutorial Services, see Chapter 2.

(continued on page 82)

Majors and Degrees Offered

African Area Studies (M.A.)	Greek and Latin (B.A.)
African Languages (B.A.)	Hebrew (B.A.)
Afro-American Studies (B.A., M.A.)	Hispanic Languages and Literatures (C.Phil., Ph.D.)
American Indian Studies (M.A.)	History (B.A., M.A., C.Phil., Ph.D.)
Ancient Near Eastern Civilizations (B.A.)	History/Art History (B.A.)
Anthropology (B.A., B.S., M.A., Ph.D.)	Indo-European Studies (C.Phil., Ph.D.)
Applied Linguistics (C.Phil., Ph.D.)	Iranian Studies (B.A.)
Applied Mathematics (B.S.)	Islamic Studies (M.A., C.Phil., Ph.D.)
Arabic (B.A.)	Italian (B.A., M.A., C.Phil., Ph.D.)
Archaeology (M.A., C.Phil., Ph.D.)	Italian and Special Fields (B.A.)
Art History (B.A., M.A., Ph.D.)	Japanese (B.A.)
Asian American Studies (M.A.)	Jewish Studies (B.A.)
Astronomy (M.S., M.A.T.*, Ph.D.)	Latin (B.A., M.A.)
Astrophysics (B.S.)	Latin American Studies (B.A., M.A.)
Atmospheric Sciences (B.S., M.S., C.Phil., Ph.D.)	Linguistics (B.A., M.A., C.Phil., Ph.D.)
Biochemistry (B.S., M.S., C.Phil., Ph.D.)	Linguistics and Anthropology (B.A.)
Biology (B.S., M.A., C.Phil., Ph.D.)	Linguistics and Computer Science (B.A.)
Business Economics (B.A.)	Linguistics and East Asian Languages and Cultures (B.A.)
Chemistry (B.S., M.S., C.Phil., Ph.D.)	Linguistics and English (B.A.)
Chemistry/Materials Science (B.S.)	Linguistics and French (B.A.)
Chicana and Chicano Studies (B.A.)	Linguistics and Italian (B.A.)
Chinese (B.A.)	Linguistics and Philosophy (B.A.)
Classical Civilization (B.A.)	Linguistics and Psychology (B.A.)
Classics (M.A., C.Phil., Ph.D.)	Linguistics and Scandinavian Languages (B.A.)
Cognitive Science (B.S.)	Linguistics and Spanish (B.A.)
Communication Studies (B.A.)	Mathematics (B.S., M.A., M.A.T., C.Phil., Ph.D.)
Comparative Literature (M.A., C.Phil., Ph.D.)	Mathematics/Applied Science (B.S.)
Cybernetics (B.S.)	Mathematics of Computation (B.S.)
Development Studies (B.A.)	Microbiology and Molecular Genetics (B.S., M.A., Ph.D.)
Earth Sciences (B.A.)	Molecular Biology (Ph.D.)
East Asian Languages and Cultures (M.A., C.Phil., Ph.D.)	Musicology (B.A., M.A., C.Phil., Ph.D.)
East Asian Studies (B.A.)	Near Eastern Languages and Cultures (M.A., C.Phil., Ph.D.)
Economics (B.A., M.A., C.Phil., Ph.D.)	Near Eastern Studies (B.A.)
Economics/International Area Studies (B.A.)	Philosophy (B.A., M.A.** , C.Phil., Ph.D.)
Economics/System Science (B.S.)	Physics (B.S., M.S.** , M.A.T., Ph.D.)
English (B.A., M.A., C.Phil., Ph.D.)	Physiological Science (B.S., M.S., Ph.D.)
English/Greek (B.A.)	Political Science (B.A., M.A., C.Phil., Ph.D.)
English/Latin (B.A.)	Portuguese (B.A., M.A.)
Folklore and Mythology (M.A., Ph.D.)	Psychobiology (B.S.)
French (B.A., M.A., C.Phil., Ph.D.)	Psychology (B.A., M.A.** , C.Phil., Ph.D.)
French and Linguistics (B.A.)	Public Administration (M.P.A.*)
General Chemistry (B.S.)	Religion, Study of (B.A.)
General Mathematics (B.S.)	Romance Linguistics and Literature (M.A., C.Phil., Ph.D.)
General Physics (B.A.)	Russian Language and Literature (B.A.)
Geochemistry (M.S., C.Phil., Ph.D.)	Russian Studies (B.A.)
Geography (B.A., M.A., C.Phil., Ph.D.)	Scandinavian (M.A.)
Geography/Environmental Studies (B.A.)	Scandinavian Languages (B.A.)
Geology (B.S., M.S., C.Phil., Ph.D.)	Slavic Languages and Literatures (B.A., M.A., C.Phil., Ph.D.)
Geology — Engineering Geology (B.S.)	Sociology (B.A., M.A., C.Phil., Ph.D.)
Geology — Paleobiology (B.S.)	Spanish (B.A., M.A.)
Geophysics — Applied Geophysics (B.S.)	Spanish and Linguistics (B.A.)
Geophysics and Space Physics (B.S., M.S., Ph.D.)	Spanish and Portuguese (B.A.)
German (B.A., M.A.)	Teaching English as a Second Language (M.A.)
Germanic Languages (C.Phil., Ph.D.)	Women's Studies (B.A.)
Greek (B.A., M.A.)	World Arts and Cultures (B.A.)

*Not admitting new students at this time.

**The department only admits applicants whose objective is the Ph.D.

Your Major

Most entering freshmen are unsure about specific academic goals and request to be admitted to the college as "undeclared." These students then explore fields of study by taking introductory courses in the physical and life sciences, social sciences, and humanities in search of an area that most excites their interest (see "Choosing Your Major" in Chapter 2 of this catalog).

All students with 90 or more units toward a degree are expected to declare a premajor or a major. When you are ready to do so, obtain approval on a Petition for Declaration of Major from the department or interdepartmental degree committee which governs your intended major and file the form at the College Counseling Service.

You can obtain help with your academic planning from a variety of resources, including the College Counseling Service in A316 Murphy Hall (825-1687 or 825-1965) and the Placement and Career Planning Center (825-2981). In addition, faculty members and counselors in each college department are available to discuss in detail the courses and programs in their respective fields. For further suggestions, see "Advising and Academic Assistance" in Chapter 2.

Assessing Progress Toward Your Degree

One of your responsibilities as a UCLA student includes a regular monitoring of all requirements necessary for the degree. It is imperative that you read this catalog carefully and consult regularly with the Letters and Science counseling staff for confirmation of the requirements you need. Departmental counselors can advise you regarding progress and completion of your major requirements. It is important that you maintain an accurate assessment of progress toward your degree by utilizing departmental and College Counseling Service resources.

Minimum Progress

UCLA is a full-time institution, and it is expected that students will complete their undergraduate degree requirements promptly. The recommended study load for an undergraduate in the College of Letters and Science is 12 to 16 units per term.

According to Academic Senate regulations, Letters and Science undergraduates who do not pass at least 36 units during any three consecutive terms will be placed on probation, and students who do not pass at least 32 units during three consecutive terms will be subject to disqualification from registration at the University. Exceptions may be granted by the college due to poor health, family responsibilities, or regular employment of 20 hours per week or more.

Letters and Science Majors

A major in the College of Letters and Science consists of at least nine and no more than 15 upper division courses (between 36 and 60 units). All courses applied toward the major and preparation for the major must be taken for a letter grade unless otherwise stipulated by the department. If you have been away from the University for several terms, you should consult with your major department or curriculum adviser concerning the requirements under which you will graduate.

There are three categories of majors in the College of Letters and Science:

Departmental Majors

A departmental major consists of a group of related upper division courses, of which at least six courses are in one department. These majors are supervised by established campus departments. There are 84 departmental majors currently offered by the college.

Interdepartmental Majors

An interdepartmental major consists of at least 13 related upper division courses, of which no more than eight are in one department. These programs are administered by interdepartmental committees made up of faculty whose membership is determined by research interest, not by departmental affiliation. By cutting across the usual lines of departmental division, a subject area is studied from the perspectives of different disciplines and a greater degree of program flexibility is achieved.

The College of Letters and Science currently offers 25 interdepartmental majors. Although most lead to bachelor's degrees, there are some which lead to graduate degrees only. Check the chart of majors and degrees for the programs which interest you.

African Area Studies
 Afro-American Studies
 American Indian Studies
 Applied Linguistics
 Archaeology
 Asian American Studies
 Chemistry/Materials Science
 Chicana and Chicano Studies
 Communication Studies
 Comparative Literature
 Cybernetics
 Development Studies
 East Asian Studies
 Economics/System Science
 Folklore and Mythology
 History/Art History
 Indo-European Studies
 Islamic Studies
 Latin American Studies
 Molecular Biology
 Near Eastern Studies

Religion, Study of
 Romance Linguistics and Literature
 Women's Studies
 World Arts and Cultures

You can find a detailed description of each of these majors under their respective headings later in this chapter.

Individual Majors

If you have some unusual but definite academic interest for which no suitable major is offered at the University and you have completed at least three terms of work (nine courses) at the University with a grade-point average of 3.4 or better, you may plan an individual major. The consent of the Division of Honors and Undergraduate Programs and the assistance of a faculty adviser are required.

The major should consist of at least 12 and no more than 15 upper division courses, a majority of which are in departments offering a major in the college. A senior thesis is required. The title of the major will be entered in the memorandum column of your official transcript and, at your request, printed on your diploma (up to a maximum of 70 characters). If you do not elect to have the title printed or if it is longer than 70 characters, your diploma will read "Individual Field of Concentration." For further details about individual majors, contact the Honors Programs Office in A311 Murphy Hall (825-1553).

Returning Students and Their Majors

If you return to the University to resume your studies after an absence of several years, you may find your previous major area of study no longer available. You then must select a current major in which to complete your studies. Consult the College Counseling Service for assistance.

Supplemental Programs

The college offers no "minors"; instead, you may choose from 13 different programs which are not degree-granting majors, but are sequences of supplemental courses designed to enhance your work in certain areas. Each of these specializations must be taken jointly with an organized departmental or interdepartmental major:

African Studies
 Asian American Studies
 Business and Administration
 Chicana and Chicano Studies
 Computing, Specialization in (anthropology, cybernetics, economics, geography, linguistics, mathematics, psychology, sociology)
 Diversified Liberal Arts
 Education
 International Relations
 Labor and Workplace Studies

Law and Society
Organizational Studies
Urban Studies
Women's Studies

Detailed descriptions of the programs (except specialization in computing) are given under their respective headings later in this chapter. For descriptions of the specialization in computing, refer to the majors listed in parentheses above.

Student Research Program (SRP)

For information on this program, see "Alternative Academics" in Chapter 2.

Double Majors

If you are in good academic standing, you may be permitted to have a double major consisting of departmental majors from two departments within this college. They must both be completed within the maximum limit of 228 units, and you must obtain the approval of both departments.

With few exceptions, double majors in the same department are unacceptable. You must designate one of the two majors as the principal one for the purpose of satisfying general education requirements. No more than five upper division courses may be common to both majors.

Courses outside the division of the principal major which are required in preparation for that major may be used to satisfy general education requirements. Courses required for the secondary major (including preparation for the major) also may satisfy general education requirements.

Changing Your Major

If you are in good academic standing and wish to change your major, you may petition to do so provided you can complete the new major within the 216-unit limit (228 for double majors and special programs). Petitions must be submitted to and approved by the department or committee in charge of the new major. Admission to certain majors may be closed or restricted; changes are normally not permitted if you are on probation or have begun your last term.

If you fail to attain a grade-point average of 2.0 (C) in preparation for the major or major courses, you may be denied the privilege of entering or continuing in that major. Some departments may have higher grade-point requirements for their preparation and major courses; consult the appropriate department regarding minimum standards.

The Study List

The required study load for undergraduate students in the College of Letters and Science is 12 to 16 units (three to four courses) per term.

For exceptions, see "Minimum Progress" earlier in this section. Three courses are often recommended for students in the first term of the freshman year. All other students may carry four and one-half courses (18 units) without petition. After the first term, you may petition to enroll in as many as five courses if you attained at least a B average the preceding term in a program of at least three graded courses. First-term transfer students from any other campus of the University may carry excess Study Lists on the same basis as students who have completed one or more terms at UCLA; however, they are not encouraged to do so.

Requirements for Bachelor's Degrees

Each student must meet three types of requirements for the Bachelor of Arts or Bachelor of Science degree: University requirements, college requirements, and department requirements (including preparation for the major and major requirements). For details on department requirements, see the department and major of your choice.

University Requirements

For information on the Subject A or English as a Second Language (ESL) and American History and Institutions requirements, see "Undergraduate Degree Requirements" in Chapter 2.

College Requirements

The College of Letters and Science has eight requirements which must be satisfied for the award of the degree: unit, major, scholarship, academic residence, English composition, quantitative reasoning, foreign language, and general education course requirements.

Unit Requirements

You must satisfactorily complete for credit a minimum of 180 units (45 courses) for the bachelor's degree. At least 72 units (18 courses) of the 180 units must be upper division (numbered 100-199). A maximum of 216 (228 for double majors and special programs) units is allowed. If you have advanced placement (transfer) credit, you may exceed the unit maximum by the amount of that credit.

Scholarship and Major Requirements

You must attain at least a 2.0 (C) grade-point average in all courses undertaken at this University for receipt of the bachelor's degree. You must also attain a 2.0 GPA in a major and satisfy both the course and scholarship requirements of that major (including preparation for the major) in the College of Letters and Science.

Academic Residence Requirements

Sixty-eight of the last 80 units completed for the degree must be earned in residence in the college. **No more than 16 of the 68 units may be completed in UCLA Summer Sessions.** While enrolled in the college you must complete at least 10 upper division courses (40 units), including six courses in the major. These academic residence requirements apply to all students, both continuing and transfer.

Structure of a Degree

Three types of degree requirements are included within the 180-unit minimum/216- or 228-unit maximum limits for the bachelor's degree:

University Requirements

- (1) Subject A or English as a Second Language (ESL)
- (2) American History and Institutions

College Requirements

- (1) English Composition or ESL Composition
- (2) Quantitative Reasoning
- (3) Foreign Language
- (4) General Education Course Requirements

Department Requirements

- (1) Preparation for the Major
- (2) Major Requirements

Electives

The remaining units, defined as electives, are courses which vary according to your interests and goals. When selecting your courses, keep the following degree criteria in mind:

Scholarship

You must attain an overall 2.0 minimum grade-point average in the 180/216 or 228 units required and must satisfy the scholarship requirements of your major department (usually a 2.0 average in the preparation and major courses, but it may be higher in the former, according to departmental requirements).

Academic Residence Requirement

See "Academic Residence Requirements" above.

Upper Division Unit Requirement

At least 72 units (18 courses) must be upper division (numbered 100-199).

English Composition Requirement

Note: You must complete the University's Subject A or English as a Second Language (ESL) requirement prior to completing the college's English Composition requirement.

You may satisfy the English Composition requirement by taking one course from English 3, 4, Humanities 2A, 2B, 2C. The course must be taken for a letter grade, and you must receive at least a C; a grade of C- is not acceptable. Humanities 2A, 2B, or 2C may be applied toward the humanities general education requirements; English 3 or 4 may not be applied.

The composition requirement may also be satisfied by scoring 4 or 5 on one of the College Entrance Examination Board (CEEB) Advanced Placement Tests in English or by passing the English 3 Proficiency Examination. Students scoring 660 or better on the CEEB English Composition Achievement Test are eligible for this proficiency examination.

You must satisfy the composition requirement within your first three terms in residence.

Transfer Students — You may take the English 3 Proficiency Examination (1) if you have completed a transferable English composition course with a Passed grade rather than a letter grade or (2) if you have completed, with a grade of C or better, a college-level English composition course that the Office of Undergraduate Admissions and Relations with Schools does not accept as equivalent to English 3. Like eligible freshmen, you must register for the examination in the Writing Programs Office, 271 Kinsey Hall, before the first day of enrollment for the term.

If you have credit for 90 or more units and have not satisfied the requirement, you are expected to include an acceptable composition course on your Study List during your first term in residence in the college. If you are required to take English 2 to satisfy the Subject A requirement, you should, on completion of that requirement, take an acceptable composition course in your second term in residence.

English as a Second Language (ESL) Students — If your native language is not English, you may satisfy the English Composition requirement by completing English as a Second Language 36 with a grade of C or better (C- or a Passed grade is not acceptable). Admission into course 36 is determined by a Composition Placement Test administered the first day of class each term.

Quantitative Reasoning and Foreign Language Requirements

In the College of Letters and Science you must demonstrate basic skills in quantitative reasoning and satisfy the foreign language requirement.

Note: All courses taken to satisfy these requirements must be completed with a grade of Passed or C or better.

Quantitative Reasoning — May be satisfied by achieving an SAT mathematics score of 600 or better, a mathematics achievement score of 550 or better, or by completing one of the following courses: Anthropology 80; Biostatistics 100A, 100B, 100C, 100D; Computer Science 10C or 10F; Economics 40; Geography 40; Mathematics 1 or any higher numbered course except 38A, 38B, and 104; Philosophy 31; Political Science 6; Program in Computing 10A, 10B, 10C; Sociology 18; Statistics 50.

Foreign Language — May be satisfied by one of the following methods: (1) completing a college-level foreign language course equivalent to UCLA's level three or above **OR** (2) scoring 3, 4, or 5 on the CEEB Advanced Placement (AP) foreign language examination in French, German, or Spanish, thereby earning college credit **OR** (3) presenting a UCLA foreign language departmental examination score indicating competency through level three (consult the *Schedule of Classes* for times and places of these regularly scheduled examinations).

If you wish to demonstrate proficiency in a language which is taught in a UCLA department but for which there is no scheduled examination, contact the appropriate department to arrange for one. If you wish to take an examination in a language not taught at UCLA, contact the College Counseling Service.

The following language courses may be used to fulfill the foreign language requirement:

African Languages (Linguistics) 1A-1B-1C (Swahili); 7A-7B-7C (Zulu); 11A-11B-11C (Yoruba); 31A-31B-31C (Bambara); 41A-41B-41C (Hausa); 51A-51B-51C (Amharic)
Afrikaans (Germanic Languages) 105A, 105B
Ancient Near East (Near Eastern Languages) 120A-120B-120C (Ancient Egyptian); 140A-140B (Sumerian)
Arabic (Near Eastern Languages) 1A-1B-1C
Armenian (Near Eastern Languages) 101A-101B-101C, or 130A-130B and 131A
Berber (Near Eastern Languages) 101A-101B-101C
Bulgarian (Slavic Languages) 103A-103B-103C
Chinese (East Asian Languages) 1, 2, 3
Czech (Slavic Languages) 102A-102B-102C
Dutch (Germanic Languages) 103A-103B, 103C
French 1, 2, 3
German (Germanic Languages) 1, 2, 3
Greek (Classics) 1, 2, 3
Hebrew (Near Eastern Languages) 1A-1B-1C or 10A-10B-10C
Hungarian (Germanic Languages) 101A, 101B, 101C
Indigenous Languages of the Americas (Linguistics) 18A-18B-18C (Quechua)
Iranian (Near Eastern Languages) 1A-1B-1C (Persian)
Italian 1, 2, 3
Japanese (East Asian Languages) 1, 2, 3
Korean (East Asian Languages) 1, 2, 3

Latin (Classics) 1, 2, and 3, or 16 (Summer Sessions course)
Lithuanian (Slavic Languages) 101A-101B-101C
Polish (Slavic Languages) 102A-102B-102C
Portuguese (Spanish and Portuguese) 1, 2, 3
Romanian (Slavic Languages) 101A-101B-101C
Russian (Slavic Languages) 1, 2, and 3, or 11A-13B (two units each)
Scandinavian 1, 2, 3 (Swedish); 11, 12, 13 (Norwegian); 21, 22, 23 (Danish)
Semitics (Near Eastern Languages) 140A-140B, 141 (Akkadian)
Serbo-Croatian (Slavic Languages) 103A-103B-103C
Spanish (Spanish and Portuguese) 1, 2, 3
Turkic Languages (Near Eastern Languages) 101A-101B-101C (Turkish); 111A-111B-111C (Uzbek)
Ukrainian (Slavic Languages) 101A-101B-101C
Yiddish (Germanic Languages) 101A, 101B, 101C

General Education (GE) Course Requirements

The general education requirements of the college are intended to introduce undergraduates to the richness and diversity of the various academic disciplines. Within the four major divisions of the college — humanities, physical sciences, social sciences, and life sciences — you are encouraged to explore the different possibilities for further university study. Whether or not you have a specific educational goal, general education requirements are designed to broaden your intellectual perspective and to set you on the path to becoming an educated member of society.

The set of GE course requirements you will follow are specified on the chart labeled "Courses to Fulfill GE Requirements" on the next pages. You must earn units in four courses in the humanities (literature, philosophy, language and linguistics, culture and civilization, the arts), three courses in the physical sciences, four in the social sciences (two from historical analysis and two from social analysis), and three courses in the life sciences. In the humanities, at least one course must be from literature and no more than two may be from any single subgroup. In the physical sciences, two courses must be complementary and one must include a laboratory and/or demonstration component. In the life sciences, one course must include a laboratory and/or demonstration component.

All students entering UCLA in Fall Quarter 1992 with 45 or more quarter units are not required to complete the complementary course requirement in physical sciences.

Courses required to satisfy the major or other courses taken in the major department may not be used to satisfy the general education

(continued on page 87)

Courses to Fulfill GE Requirements

See "Quantitative Reasoning and Foreign Language Requirements" on page 84 for courses to fulfill those requirements.

(A) Humanities

Four courses, with at least one from Group A1 and no more than two courses from any single subgroup:

(1) Literature

- Classics** 40. Survey of Greek Literature in Translation
41. Survey of Latin Literature in Translation
- English** 10A. English Literature to 1660
10B. English Literature, 1660-1832
70. Major British Authors before 1800
75. Major British Authors, 1800 to the Present
80. Major American Authors
85. The American Novel
90. Shakespeare
95A. Introduction to Poetry
95B. Introduction to Drama
95C. Introduction to Fiction
96. The Short Story in England and America
- French** 12. Introduction to Study of French Literature (in French)
114A, 114B, 114C. Survey of French Literature (in French)
- German (Germanic Languages)** 50A. Masterworks of German Literature in Translation: Medieval Period through Classicism
50B. Masterworks of German Literature in Translation: Romanticism to the Present
101A. Introduction to German Poetry (in German)
101B. Introduction to German Drama (in German)
101C. Introduction to German Narrative Prose (in German)
- Humanities** 1A. World Literature: Antiquity to Early Middle Ages
1B. World Literature: Late Middle Ages to the 17th Century
1C. World Literature: Age of Enlightenment to the 20th Century
1D. Great Books from the World at Large
2A. Survey of Literature: Antiquity to Early Middle Ages
2B. Survey of Literature: Late Middle Ages to the 17th Century
2C. Survey of Literature: Age of Enlightenment to the 20th Century
- Portuguese (Spanish and Portuguese)** 40A, 40B. Portuguese, Brazilian, and African Literature in Translation
120A, 120B. Survey of Portuguese Literature (in Portuguese)
130A, 130B. Survey of Brazilian Literature (in Portuguese)
- Russian (Slavic Languages)** 25. The Russian Novel in Translation
- Scandinavian** 50. Introduction to Scandinavian Literature
- Spanish (Spanish and Portuguese)** 60A, 60B, 60C. Hispanic Literatures in Translation
120A, 120B. Survey of Spanish Literature (in Spanish)
136A, 136B. Survey of Spanish-American Literature (in Spanish)

(2) Philosophy

- Philosophy** 1. Beginnings of Western Philosophy
2. Introduction to Philosophy of Religion
4. Philosophical Analysis of Contemporary Moral Issues
6. Introduction to Moral and Political Philosophy
7. Introduction to Philosophy of Mind
8. Introduction to Philosophy of Science
21. Skepticism and Rationality
22. Introduction to Ethical Theory

(3) Language and Linguistics

- Linguistics** 1. Introduction to Study of Language
10. Structure of English Words
- Language:** Formal University foreign language instruction at level four or higher; no more than one course at level four or higher may be used
- Spanish and Portuguese** M35. Spanish, Portuguese, and Nature of Language

(4) Culture and Civilization

- Chicana and Chicano Studies** 10A. Introduction to Chicano Life and Culture
- Chinese (East Asian Languages)** 50. Chinese Civilization
- East Asian Languages and Cultures** 60. Introduction to Buddhism

- Folklore and Mythology** 15. Introduction to American Folklore Studies
- German (Germanic Languages)** 100A. German Civilization and Culture before 1700
100B. Modern German Civilization and Culture from 1700 to 1919
100C. German Civilization and Culture in the 20th Century
- History** *9A. Introduction to Asian Civilizations: History of India
*9C. Introduction to Asian Civilizations: History of Japan
*9D. Introduction to Asian Civilizations: History of the Near and Middle East
*10A, *10B. Introduction to Civilizations of Africa
*11A, *11B. History of China
- Italian** 46. Italian Cinema and Culture
- Japanese (East Asian Languages)** 50. Japanese Civilization
- Jewish Studies (Near Eastern Languages)** 10. Social, Cultural, and Religious Institutions of Judaism
- Korean (East Asian Languages)** 50. Korean Civilization
- Russian (Slavic Languages)** 99A. Introduction to Russian Civilization
99B. Soviet Civilization
- Spanish and Portuguese** M42. Civilization of Spain and Portugal
M44. Civilization of Spanish America and Brazil

(5) The Arts

- Art History** 50. Ancient Art
51. Medieval Art
54. Modern Art
55A. Africa, Oceania, and Native America
55B. Arts of Pre-Columbian America
56A. Art of India and Southeast Asia
56B. Introduction to Chinese Art
57. Renaissance and Baroque Art
- Dance** 134A. History of Dance in Western Culture, Origins to 1600
134B. History of Dance in Western Culture, 1600 to the Present
181A. Dance Cultures of Asia
182A. Dance Cultures of Africa
C187A. Dance Cultures of Native American Indians
- Design** 30A. Nature of Design
- Ethnomusicology and Systematic Musicology** 20A, 20B, 20C. Musical Cultures of the World
108A, 108B. Music of Latin America
M110A, M110B. The Afro-American Musical Heritage
113. Music of Brazil
136A, 136B. Music of Africa
147. Survey of Classical Music in India
174. Aesthetics of Music
- Film and Television** 106A. History of the American Motion Picture
106B. History of the European Motion Picture
106C. History of African, Asian, and Latin American Film
106D. Development of Film in Europe and the U.S. from WWI through the Depression
106E. Development of Film in Europe and the U.S. from WWII to the Present
108. History of Documentary Film
112. Film and Social Change
- Music** 15. Art of Listening
- Musicology** 2A, 2B. Introduction to the Literature of Music
13. 20th-Century Music of the Western World
133. Bach
134. Beethoven
135A, 135B, 135C. History of Opera
- Theater** 5A. History and Drama of Theater: Primitive Times to 1640
5B. History and Drama of Theater: 1640 to 1900
5C. History and Drama of Theater: 1900 to the Present
102E. Theater of Non-European World
104F. History of American Theater: WWI to the Present

(continued on page 86)

Courses to Fulfill GE Requirements (continued)

(B) Physical Sciences

Three courses from the following, two of which must be complementary and one of which must have a laboratory and/or demonstration component:

- Astronomy** 2A, 2B. Introduction to the Physical Universe
- 3. Astronomy: Nature of the Universe
- 4. Universe of Stars and Stellar Systems
- 5. Life in the Universe
- 6. Cosmology: Our Changing Concepts of the Universe
- 81. Astrophysics I: Stars and Nebulae
- 82. Astrophysics II: Stellar Evolution, Galaxies, and Cosmology
- Atmospheric Sciences** 2. Air Pollution
- 3. Introduction to the Atmospheric Environment
- 4. California Weather and Climate
- 5. Climates of Other Worlds
- 6. Climate and Climatic Change
- Chemistry and Biochemistry** 2. Introductory Chemistry
- 11A, 11B. General Chemistry
- 11BL. General Chemistry Laboratory
- 15. Survey of Organic Chemistry and Biochemistry
- 15L. Laboratory in Elementary Organic Chemistry and Biochemistry
- Earth and Space Sciences** 1. Introduction to Earth Science
- 2. Earth History
- 5. Earth Science and Society: Geological Ecological Interactions
- 8. Earthquakes
- 9. Origin and Evolution of Solar System
- *15. Introduction to Oceanography
- Geography** 1. Physical Environment
- Mathematics** 2. Finite Mathematics
- 3A, 3B. Calculus for Life Sciences Students
- 3E. Calculus for Economics Students
- 5. Calculus for Liberal Arts Students
- 31A, 31B. Calculus and Analytic Geometry
- 31AQ, 31BQ. Calculus and Analytic Geometry with Computer Laboratory
- Mechanical, Aerospace, and Nuclear Engineering** 2. Toxic Waste Control
- Physics** 3A. General Physics: Mechanics of Solids and Fluids
- 3B. General Physics: Heat, Sound, Electricity and Magnetism
- 3C. General Physics: Light, Relativity, and Modern Physics
- 6A. Physics for Life Sciences Majors: Mechanics
- 6B. Physics for Life Sciences Majors: Electricity and Magnetism
- 6C. Physics for Life Sciences Majors: Light and Modern Physics
- 8A. Physics for Scientists and Engineers: Mechanics
- 8B. Physics for Scientists and Engineers: Waves, Sound, Heat
- 8C. Physics for Scientists and Engineers: Electricity and Magnetism
- 10. Physics

Complementary courses include Astronomy 2A/2B, 3/4, 3/5, 3/6, 81/82; Atmospheric Sciences 2/3, 3/4, 3/5, 3/6, 5/6; Chemistry and Biochemistry 11A/11B, 11A/15; Earth and Space Sciences 1/2, 1/9, 1/15; Mathematics 3A/3B, 3A/3E, 3A/31B, 31A/3B, 31A/3E, 31A/31B; Physics 3A/3B, 6A/6B, 6A/8B, 6A/8C, 6B/8A, 8A/8B, 8A/8C.

Courses with a laboratory and/or demonstration component include Astronomy 2A, 2B, 3, 81, 82, Atmospheric Sciences 2, 3, Chemistry and Biochemistry 11BL, 15L, Earth and Space Sciences 1, 2, 15, Geography 1, Mathematics 31AQ, 31BQ, Physics 3A, 3B, 3C, 6A, 6B, 6C, 8A, 8B, 8C, 10.

(C) Social Sciences

Four courses (two each from Groups 1 and 2 or all of Group 3):

(1) Historical Analysis

Two courses from a single sequence are recommended:

- Classics** 10. Survey of Classical Greek Culture
- 20. Survey of Roman Civilization
- History** 1A, 1B, 1C. Introduction to Western Civilization
- 3A, 3B, 3C. Introduction to History of Science
- 3D. Themes in History of Medicine
- 4. Introduction to History of Religions
- 5A, 5B. Survey of British History
- 6A, 6B, 6C. History of the American Peoples
- 7A, 7B. Survey of Political History of the U.S.
- 8B. Latin America: Reform and Revolution
- 8C. Latin American Social History
- 8D. Central America: Struggle for Change
- *9A. Introduction to Asian Civilizations: History of India

- *9C. Introduction to Asian Civilizations: History of Japan
- *9D. Introduction to Asian Civilizations: History of the Near and Middle East
- *10A, *10B. Introduction to Civilizations of Africa
- *11A, *11B. History of China
- Political Science** 10. Introduction to Political Theory

(2) Social Analysis

- Anthropology** 8. Archaeology: An Introduction
- 9. Sociocultural Anthropology
- 33. Culture and Communication
- Chicana and Chicano Studies** 10B. Chicanos in American Society
- Communication Studies** 10. Introduction to Communication Studies
- Economics** 1, 2. Principles of Economics
- 5. Introductory Economics
- Geography** 3. Cultural Geography
- 4. Introduction to Economic Geography
- Political Science** 20. World Politics
- 30. Introduction to Political Economy
- 40. Introduction to Politics
- 50. Introduction to Comparative Politics
- Psychology** 10 (Introductory Psychology) or 11 (Principles of Psychology)
- Social Sciences** 20. Racial Minorities in the U.S.
- Sociology** 1. Introductory Sociology
- 2. Changing Society and Making History
- 3. Sociology of Everyday Life
- 4. Jobs and Careers: Sociological Approach
- 31. Dilemmas of Third World Development
- Women's Studies** 10. Introduction to Women's Studies: Feminist Perspectives on Women and Society

(3) Social Science Cluster Program

The program offers another way to complete all of the social sciences general education requirement. For further information, see page 320.

(D) Life Sciences

Three courses from the following, one of which must have a laboratory and/or demonstration component:

- Anthropology** 7 (*Human Evolution*) or 12 (*Principles of Human Evolution: Comparative Analysis*)
- 10. Principles of Human Evolution: Genetic Basis
- 15. Human Biology and Behavior
- Biology** 2. Principles of Modern Biology
- 3. Introduction to Human Physiology and Disease
- 5. Biology of Organisms
- 5L. Organismic and Environmental Biology Laboratory
- 6. Ecology, Evolution, and Behavior
- 9. Introduction to Cell, Molecular, and Developmental Biology
- 10. Plants and Civilization
- 13. Evolution of Life
- 20. Introduction to Human Heredity
- 21. Field Biology
- 25. Oceans
- 30. Biology of Cancer
- 40. AIDS and Other Sexually Transmitted Diseases: The Modern Plague
- 70. Genetic Engineering and Society
- Earth and Space Sciences** *15. Introduction to Oceanography
- 16. Principles of Paleontology
- 17. Dinosaurs and Their Relatives: Introduction to Paleobiology
- Geography** 2. Biogeography
- 5. People and the Earth's Ecosystems
- Microbiology and Molecular Genetics** 6. Introduction to Microbiology
- 7. Developments in Biotechnology
- Physiological Science** 5. Issues in Human Physiology: Diet and Exercise
- 13. Introduction to Human Anatomy
- Psychology** 15. Introductory Psychobiology

Courses with a laboratory and/or demonstration component include Biology 2, 3, 5, 5L, 6, 10, 20, 21, Earth and Space Sciences 15, 16, 17, Geography 2, 5, Physiological Science 5, 13.

All honors sections of the above courses also fulfill GE requirements.

Honors Collegium: Inquire at the Honors Programs Office (A311 Murphy Hall) for information on courses which satisfy any of the areas of the general education requirements.

requirements. However, courses outside the major which are required as preparation for a major may be used to satisfy these requirements.

Course Exemptions — Students majoring in the humanities are exempt from two courses, one in their major subgroup and one other humanities course. Students majoring in the physical sciences are exempt from two courses in the physical sciences group. Students in the social sciences are exempt from two courses in the subgroup of their major, and students in life sciences are exempt from two courses in the life sciences grouping. At least 14 courses (12, with exemptions) must be completed.

Course Substitutions — Two lower division seminars which have been approved for GE credit may be substituted for courses on the "Courses to Fulfill GE Requirements" list. You may make no more than one such substitution per group (humanities, physical sciences, social sciences, life sciences). An annual list of GE seminars is published in the *General Education Handbook*, and descriptions are listed in the quarterly *Schedule of Classes* under "Seminars and Special Programs for Undergraduates."

Advanced Placement Credit — For application of advanced placement (AP) credit on the general education requirements, see the AP chart later in this section or consult the College Counseling Service.

Reciprocity with Other UC Campuses — Students who transfer to UCLA from other UC campuses and have met all general education requirements prior to enrolling at UCLA are not required to complete the college's GE requirements at UCLA. Written verification from the college dean at the other UC campus is required. Consult a Letters and Science counselor regarding your eligibility for this option.

Transfer Core Curriculum/Intersegmental General Education Transfer Curriculum — Transfer students from non-UC schools have the option to fulfill UCLA's lower division general education requirements by completing a transfer core curriculum or the Intersegmental General Education Transfer Curriculum (IGETC) prior to transfer. Each curriculum consists of a series of subject areas and types of courses which have been agreed on by the University of California and the California community colleges. Although general education or transfer core courses are graduation requirements rather than admission requirements, you are advised to fulfill them prior to transfer. The transfer core curriculum or IGETC significantly eases the transfer process, as all of UCLA's general education requirements are fulfilled when you complete it. If you select one of these options, you must complete it entirely before enrolling at UCLA. Otherwise, you must fulfill the College of Letters and Science general education requirements. The Office of Undergraduate Admissions and

Relations with Schools determines, at the point of admission, your completion of the transfer core or IGETC.

General Education Groupings by Major

For the purpose of these requirements, departmental and interdepartmental majors are classified in the divisions listed below. Not all courses within a department apply on GE requirements in the division of the major (e.g., psychology is listed as a life science; however, Psychology 10 appears as a social science under social analysis).

(A) Humanities

A1: Literature

- African Languages
- Arabic
- Chinese
- English
- English/Greek
- English/Latin
- French
- German
- Greek
- Greek and Latin
- Hebrew
- Italian (including Italian and Special Fields)
- Japanese
- Latin
- Portuguese
- Russian Language and Literature

Credit Limitations

Note: Transfer students with credit from other institutions (advanced standing credit) receive a Degree Progress Report (DPR) from the Office of Undergraduate Admissions and Relations with Schools indicating the transferable units from their former institution(s); however, the following credit limitations may reduce the total number of transferred units which will apply toward the degree in the College of Letters and Science. Consult with a counselor in the College Counseling Service regarding these limitations.

The following credit limitations apply for all students enrolled in the college. In most cases units are not deducted until the final term before graduation. Consult a counselor in the College Counseling Service if you have questions.

Subject A

If you do not satisfy the Subject A requirement prior to enrolling at UC, you must pass an approved course or other program prescribed by your UC campus of residence. Only after satisfying the Subject A requirement can you take for transfer credit an English composition course *after* enrolling at UCLA. Consult a college counselor regarding Subject A equivalent courses from other UC campuses.

Community College

After completing 105 quarter units (26 ¼ courses) toward the degree in all institutions attended, you are allowed no further unit credit for courses completed at a community college.

Physical Education

No more than four units in physical education activities courses may be applied toward the bachelor's degree.

300- and 400-Level Courses

No more than two courses (eight units) in the 300 and 400 series of courses may be applied toward the bachelor's degree. Credit is not granted for X300 and X400 courses taken in UCLA Extension.

Performance Courses

No more than 12 units of music and/or dance performance courses (Dance 71B through 79Z, C171B through C179Z, Ethnomusicology

and Systematic Musicology 91A-91Z, and Music 90A through 90N) may be applied toward the bachelor's degree whether taken at UCLA or another institution.

Foreign Language

Credit will not be allowed for completing a less advanced course in grammar and/or composition after you have completed a more advanced course. College credit for an international student's native language and literature is allowed for (1) courses taken in native colleges and universities or (2) upper division (advanced language courses only) and graduate courses taken at the University of California or another English-speaking institution of approved standing (no credit is allowed for lower division courses).

College Level Examination Programs

Credit earned through the College Level Examination Program (CLEP) and through the California State University English Equivalency Examination may not be applied toward the bachelor's degree.

Advanced Placement (AP) Tests

Advanced Placement (AP) Test credit may not be applied toward a degree unless you had less than 36 units of credit at the time of the examination(s).

ROTC Courses

For students contracted in the Aerospace Studies Department, 36 units of aerospace studies credit may be applied toward the 180-unit minimum required for the degree; for students contracted in the Military Science Department, 24 units of military science credit may be applied; for students contracted in the Naval Science Department, 26 units of naval science credit may be applied.

Independent Study Courses

No more than two courses (eight units) of credit may be taken per term in special independent study courses. The total number of units allowed in such courses for a letter grade is 16; see specific restrictions under each departmental listing.

Physics 3A, 6A, 8A, 10

Any two or more courses from Physics 3A, 6A, 8A, and 10 are limited to a total of six units of credit.

Statistics

No credit is allowed for more than one lower division course in statistics (Anthropology 80, Economics 40, Geography 40, Political Science 6, Psychology 41, Sociology 18, Statistics 50) or for more than one sequence of such courses whether taken at UCLA or another institution.

Education Abroad Program

Students participating in the Education Abroad Program may receive a maximum of 48 units of credit toward the degree in addition to the eight units maximum allowable for the Intensive Language Program.

Credit by Examination

Within the College of Letters and Science, eligibility for credit by examination is usually limited to students who have been approved as Departmental Scholars or who are admitted to a departmental honors program or the UCLA Honors Programs.

You may petition for credit by examination for one course at a time. The examination for that course must be taken successfully before you may petition for credit by examination in another course. Petitions for credit by examination (with fee) are available only through an appointment with a counselor in the Honors Programs Office. Approval is given or withheld by the dean of the Division of Honors and Undergraduate Programs who may limit the number of such petitions you present.

Honors

College Honors

College Honors is the highest academic recognition the College of Letters and Science confers on its undergraduates. The College Honors program provides the exceptional Letters and Science undergraduate an opportunity to pursue individual excellence.

College Honors is awarded to graduating seniors with an overall University of California grade-point average of 3.5 or better who have completed either 44 units of honors coursework or 36 units of honors coursework that include a senior research project/thesis based on original research. With the assistance of Honors Programs counselors, you integrate this coursework throughout your undergraduate education with other University, college, and major requirements for the bachelor's degree. In this way, these units need not be above and beyond your other academic commitments.

Students in the College Honors program are entitled to specialized counseling within the division, some preferential preenrollment in classes each term, access to specially designed honors classes, eligibility for unique scholarships and research stipends, attendance at special forums, speeches, and events, counseling on graduate and preprofessional programs, graduate library privileges, and a filing and mailing service for letters of recommendation. Incoming freshmen who are eligible for College Honors based on SAT scores and GPA are also offered preferred on-campus student housing for the first year.

To qualify for College Honors, entering freshmen must (1) have an overall GPA of 3.85 or better and an SAT score of 1,300 or better (on one test date) or an ACT score of 31 or better or (2) graduate in the top three percent of their high school class or (3) qualify through the Honors Programs Educational Enhancement Program (see below). Certain entering transfer students may be admitted with a transfer GPA of 3.85. Continuing UCLA and transfer students with at least 12 or more graded units at UCLA and a cumulative UC GPA of 3.5 or better who can complete the honors course requirements prior to graduation are encouraged to participate, as are both regularly qualified and potentially successful underrepresented minority students.

The Educational Enhancement Program offers low-income, minority, disabled, and other nontraditional students who might not otherwise be able to participate an opportunity to qualify for UCLA's College Honors program. Contact the Honors Programs Office for more information.

You may apply for admission to College Honors at A311 Murphy Hall. For further information, attend one of the group meetings offered regularly by the Honors Programs Office.

Honors at Graduation

Honors are awarded according to your overall grade-point average at graduation. **To be eligible, you must have completed at least 90 University of California units for a letter grade.** Coursework taken on the Education Abroad Program also is applied toward honors at graduation. The levels of honors and the requirements for each level are: *cum laude*, an overall average of 3.5; *magna cum laude*, 3.65; *summa cum laude*, 3.85.

Dean's Honors List

The Dean's Honors List recognizes high scholastic achievement in any one term. The following criteria are used to note Dean's Honors List on the student records: (1) a 3.75 GPA in any one term with at least 12 graded units and no grade of NP or I or (2) a 3.66 GPA and at least 56 grade points during the term, with no grade of NP or I. Dean's Honors List is automatically recorded on your transcript.

Departmental Scholar Program

Departments may nominate exceptionally promising undergraduate students (juniors and seniors) as UCLA Departmental Scholars to pursue bachelor's and master's degrees simultaneously.

Qualifications include completion of 24 courses (96 quarter units) at UCLA or the equivalent at a similar institution, the requirements in preparation for the major, and a UC cumulative GPA of 3.5 or better. You must also have at least one term's coursework remaining at UCLA. To obtain both the bachelor's and mas-

ter's degrees you must be provisionally admitted to the Graduate Division, fulfill requirements for each program, and maintain a minimum B average. No course may be used to fulfill requirements for both degrees. If you are interested in becoming a Departmental Scholar, consult your department well in advance of application dates for graduate admission (see the Calendar at the beginning of this catalog). For further information, consult the Honors Programs Office.

Honors Collegium

The Honors Collegium is a unique and innovative educational alternative designed primarily for students in their freshman and sophomore years. Refer to Honors Collegium later in this chapter for a complete description of the program.

Honors Programs Office

The Honors Programs Office, located in A311 Murphy Hall (825-1553, 825-3786), provides academic counseling and services for College Honors students, Departmental Scholars, Education Abroad Program students, students pursuing individual majors, and students participating in the High School Scholars program. The division also provides counseling for Regents Scholars, National Merit Scholars, and Alumni Scholars during their first year of attendance. Services offered include academic counseling, degree checks, assistance with petitions and, for College Honors students only, letters describing the program to graduate and professional schools.

A variety of scholarships and awards for qualified continuing students and graduating seniors is also available.

In addition, the Honors Programs Office administers Phi Beta Kappa (national honor society).

Preparing for a Professional School

The programs that follow are not degree programs in the College of Letters and Science. The purpose of each grouping of courses is to assist you if you plan to apply to a professional school at the end of your sophomore (90 units) or junior (135 units) year.

If you are not accepted by a professional school, you must declare a major in the College of Letters and Science and complete the requirements for a degree without exceeding 216 units.

New students entering these curricula are listed as "undeclared" majors and are advised in the college unless an adviser is named below in the presentation of the curriculum.

Preprofessional/Pregraduate Advising Office

Information and counseling on preparing for professional schools and assistance in filing applications and preparing for interviews are available through the Preprofessional/Pregraduate Advising Office, A316 Murphy Hall. Workshops, reference letter services, and MCAT, DAT, AMCAS, LSAT, GRE, GMAT, and other applications are available. For more information, call 825-1817.

Predental Curriculum: Three Years

The College of Letters and Science offers a predental curriculum designed to fulfill the basic educational requirements for admission to several dental schools and the general educational requirements of the College of Letters and Science. You should determine and satisfy the specific requirements of the dental schools to which you expect to apply.

To be adequately prepared for the predental curriculum, you should take the following subjects in high school: English, history, mathematics (algebra, geometry, and trigonometry), chemistry, physics, and foreign language.

The 135 quarter units of work required for admission to the UCLA School of Dentistry in this curriculum include the following:

General University Requirements: (1) Subject A; (2) American History and Institutions.

Specific UCLA School of Dentistry Requirements: (1) Biology 5, 5L, 9, 10B; (2) Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL, 132A and 132B/132BL and 153A/153L (or the former 21 and 23 and 25); (3) English 3, 4; (4) Physics 3A, 3B, and 3C, or 6A, 6B, and 6C, or 8A, 8B, and 8C; (5) Psychology 10.

Social sciences and humanities courses such as anthropology, history, economics, psychology, political science, appreciation of art and/or music, and philosophy should also be included.

For further information, consult *Admissions Requirements of U.S. and Canadian Dental Schools*, AADS, 1625 Massachusetts Avenue NW, Suite 101, Washington, DC 20036. Sample copies of the Dental Admission Test (DAT) are available in the Preprofessional/Pregraduate Advising Office (825-1817).

Predental Hygiene Curriculum: Two Years*

The University offers a four-year program in dental hygiene leading to the degree of Bachelor of Science. The first two years may be taken at Los Angeles; the last two years must be taken at the School of Dentistry at the University of California, San Francisco. Admission to UCSF is by competitive application.

The 90 quarter units of work required for admission to the School of Dentistry at UCSF include specific requirements as follows (the courses referred to are UCLA courses which fulfill the requirements):

Curriculum Requirements: (1) Subject A; (2) American History and Institutions (the examination in American History and Institutions may be taken at the UCSF School of Dentistry, but it is preferable to satisfy the requirements in the predental program); (3) Biology 5, 5L, 9, 10B; (4) Chemistry and Biochemistry 11A, 11B/11BL, 132A and 132B/132BL and 153A/153L (or former 21 and 23 and 25); (5) one year of English which includes English 3; (6) Psychology 10 and one additional psychology course; (7) 16 units in social sciences and humanities, including foreign language (one course in speech and one in sociology are required). Courses in anatomy and physiology are strongly recommended. For more information, call the Preprofessional/Pregraduate Advising Office at 825-1817.

Premedical Studies: Four Years

If you intend to apply for admission to a medical school and wish to complete the requirements for a bachelor's degree before such admission, you should select a major within the College of Letters and Science. *Medical schools have no preference as to major. You should choose the major in which you are most interested and can do best.* In addition to fulfilling the requirements of the selected major, you should satisfy the specific requirements for medical schools to which you expect to apply.

High school preparation for premedical studies at the University should include English, three units; U.S. history, one unit; mathematics, three and one-half units; chemistry, one unit; physics, one unit; biology, one unit; foreign language (preferably French or German), two units. It is desirable that a course in freehand drawing be taken in high school.

The following courses are usually required for admission to the UCLA Medical School: (1) two years of college biology to include the study of organismic, cellular, molecular, developmental, and genetic biology, including at least one year of laboratory courses and one year of upper division courses (Biology 5 and 9, plus additional lower and upper division life sciences courses equivalent to the general requirements, are required; note that Biology 5L is a prerequisite to upper division biology laboratory courses); (2) Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL, 132A and 132B/132BL and 153A/153L (or former 21 and 23 and 25); (3) 12 quarter units of English, including at least one course in English composition; (4) Physics 3A, 3B, and 3C, or 6A, 6B, and 6C, or 8A, 8B, and 8C. Courses in physical chemistry and calculus are strongly recommended.

Course requirements for admission to other University of California medical schools vary slightly.

Because requirements for admission to medical schools outside the University of California also vary somewhat, you should consult the following publications: *Medical School Admission Requirements, U.S. and Canada*, Association of American Medical Colleges, 2450 N Street NW, Washington, DC 20037-1126; *The Education of Osteopathic Physicians*, AACOM, 6110 Executive Boulevard, Suite 405, Rockville, MD 20852; and *The New MCAT Student Manual* (also an AAMC publication available at the above AAMC address). For more information, call the Preprofessional/Pregraduate Advising Office at 825-1817.

Prenursing Curriculum: Two Years

The University offers a four-year course of study leading to the Bachelor of Science degree in Nursing. The prenursing curriculum in the College of Letters and Science is designed to prepare you for the program in the UCLA School of Nursing. You should apply to the School of Nursing when you have completed or have in progress 84 quarter credits, including the prenursing courses listed below with grades of C or better, and a cumulative grade-point average of at least 2.8. Since you must apply during the Fall Quarter of the year prior to the year in which you wish to be enrolled, you must present your proposed curriculum for the remaining terms.

Because enrollment in the UCLA School of Nursing is limited, you should become familiar with the admission requirements as early as possible. Attend **open counseling sessions** in the UCLA School of Nursing (times are posted in the Office of Student Affairs, 2-200 Factor Building, 825-7181) and those given by the Preprofessional/Pregraduate Advising Office (posted outside A316 Murphy Hall, 825-1817).

New students admitted to the college in this curriculum should declare prenursing as their major. Weekly open counseling sessions are available. Students in the college who do not transfer to the UCLA School of Nursing must declare a major and be able to complete all degree requirements within 216 units.

Prenursing Requirements for the UCLA School of Nursing: (1) Anthropology 9; (2) Biology 5, 9; (3) Chemistry and Biochemistry 11A, 15, 15L; (4) Community Health Sciences 130; (5) English 3; (6) Microbiology and Molecular Genetics 6/6L or 101; (7) Physics 10 or one year of high school physics; (8) Physiological Science 13; (9) Psychology 10, 15; (10) Sociology 1; (11) one four-unit humanities course from literature, philosophy, language and linguistics, culture and civilization, or the arts; (12) recommended electives in the social and life sciences. All required prenursing courses must be completed for a letter grade.

*The UCSF School of Dentistry reserves the right to limit enrollment if applications exceed available facilities and to require interviews and aptitude tests if they are necessary in the selection of the class. For further information, see the *Announcement of the School of Dentistry, UC San Francisco*.

Preoptometry Curriculum: Three Years

A three-year program designed to prepare you for admission to optometric schools may be completed in the College of Letters and Science. If you are planning to transfer to the School of Optometry at Berkeley, you should contact Assistant Dean Carter of the School of Optometry, University of California, Berkeley, CA 94720, (510) 642-9537, as early in your preprofessional studies as possible.

You will be adequately prepared for preoptometric studies if you have taken the following subjects in high school: English, history, mathematics (algebra, geometry, and trigonometry), chemistry, physics, and two years of one foreign language.

The 135 quarter units of work required for admission to the School of Optometry, UC Berkeley, include the following: (1) Subject A; (2) American History and Institutions.

Specific UC Berkeley School of Optometry Requirements: (1) Biology 5, 5L, 9, 108; (2) Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL, 132A and 132B (or former 21 and 23); (3) English 3, and 4 or 129; (4) Mathematics 3A, 3B, and 3C, or 31A, 31B, and Statistics 50 or Psychology 41; (5) Microbiology and Molecular Genetics 6 or 101; (6) Physics 6A, 6B, and 6C, or 8A, 8B, and 8C; (7) introductory anatomy (Physiological Science 13) and physiology (Biology 166); (8) Psychology 10. Recommended: two upper division biological sciences courses, preferably in neuroanatomy and neurophysiology.

The balance of the 135 quarter units required for admission may be selected from social sciences, foreign languages, and humanities.

For further information, obtain the booklet *Information for Applicants to Schools and Colleges of Optometry* from the American Optometric Association, 243 Lindbergh Boulevard, St. Louis, MO 63141, or call the Preprofessional/Pregraduate Advising Office at 825-1817.

Prepharmacy Curriculum: Two Years

The School of Pharmacy on the San Francisco campus of the University offers a four-year curriculum leading to the degree of Doctor of Pharmacy. To be admitted to this curriculum you must have met all requirements for admission to the University and have completed, with an average grade of C (2.0) or better, at least 90 quarter units of the program below. Students taking prepharmacy work at the University of California are normally enrolled in the College of Letters and Science. If taken elsewhere, the courses elected must be equivalent to those offered at the University. To complete prepharmacy studies in the minimum time, you

should take elementary chemistry, trigonometry, and a full year of intermediate algebra in high school.*

Curriculum Requirements (First Year): (1) Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; (2) English 3, 4; (3) Subject A; (4) trigonometry and intermediate algebra (if not completed in high school); (5) 28 quarter units of electives selected from courses in foreign language, social sciences, and humanities (within the two-year preparation).

Curriculum Requirements (Second Year): (1) American History and Institutions; (2) Biology 5, 9, 108; (3) Chemistry and Biochemistry 132A and 132B/132BL (or former 21 and 23); (4) Mathematics 3A and 3B, or 31A and 31B; (5) Physics 3A and 3B, or 6A and 6B, or 8A and 8B.

For further information, call the Preprofessional/Pregraduate Advising Office at 825-1817.

Prephysical Therapy Curriculum: Three or Four Years

Students who intend to apply for admission to a physical therapy school should select a major (physiological science and psychology are commonly selected) and complete the following prerequisite courses: (1) Biology 5, 9; (2) Chemistry and Biochemistry 11A, 11B/11BL, 15, 15L; (3) Physics 3A, 3B, 3C; (4) introductory anatomy (Physiological Science 13) and physiology (Biology 166); (5) Psychology 10, 115, 127, 130. Recommended: one course in statistics and one in computing. The prerequisite courses should be taken for a letter grade; GPAs for these courses should not be lower than 3.0, with no grade lower than a C.

You should write to schools with physical therapy programs early in your sophomore year for specific admission requirements and application deadlines. Information concerning in-state and out-of-state programs may be obtained from the American Physical Therapy Association, 1156 15th Street NW, Washington, DC 20005, and at the Preprofessional/Pregraduate Advising Office (825-1817).

Prepublic Health Studies

The professional and academic fields of public health need individuals from many disciplines. Candidates for graduate study may come from a wide variety of academic backgrounds and training, including mathematics and the physical, biological, and social sciences. Preparation typically includes a minimum of two courses

each in mathematics, biological sciences, and social sciences, and one course in physical sciences.

Interested students and those who wish to apply to the UCLA School of Public Health should review the school's announcement booklet for additional requirements or recommendations for entry into the various programs of study. Information is available at the Preprofessional/Pregraduate Advising Office (825-1817).

Prerespiratory Therapy Curriculum: One Year

Santa Monica College (SMC) and the UCLA Medical Center offer a two-year program in respiratory therapy accredited by the American Medical Association (AMA) through which you may obtain a Certificate of Completion.

The first year of the curriculum may be taken at UCLA or any other two- or four-year college/university. Many UCLA students opt to incorporate the first-year respiratory therapy curriculum into their UCLA science or premedical B.S./B.A. degree prerequisites and, after completing their UCLA degree, enter the second year at the SMC/UCLA Medical Center School of Respiratory Therapy. The only first-year course that must be taken at Santa Monica College is an introductory course on respiratory therapy as a profession (Respiratory Therapy 1).

The second year of the program (the formal respiratory therapy curriculum) is taken through Santa Monica College. It is a lecture, laboratory, and clinical program conducted at the UCLA Medical Center, beginning with summer school each year. Admission to the second year is by competitive application. Because enrollment in the second year is limited, you should become familiar with the admission requirements as early as possible.

Curriculum Requirements (First Year): (1) Respiratory Therapy 1 (taken at SMC in Fall/Spring Quarter); (2) general human anatomy with laboratory; (3) general chemistry with laboratory; (4) basic lower division English; (5) U.S. history or general political science; (6) any general humanities course (art, music, foreign languages, etc.); (7) microbiology with laboratory; (8) human physiology with laboratory; (9) general psychology; (10) speech or advanced English composition.

For further information and/or a counseling appointment, contact the SMC/UCLA Medical Center School of Respiratory Therapy at 825-7222.

Prelaw Studies

Law schools have no preference with regard to specific majors or particular courses. Admission to law school is based on the quality of your academic work, LSAT scores, and other qualities as reflected in letters of recommen-

*Students who have completed the two-year prepharmacy curriculum at Los Angeles cannot be assured of admission to the School of Pharmacy on the San Francisco campus. A personal interview may be required. Applicants should contact the school in early fall of the year preceding the September of proposed admission. Contact the Office of Student Affairs, School of Pharmacy. Applications may be obtained from the office of the Director of Admissions, University of California Medical Center, San Francisco, CA 94143-0446, (510) 476-2732. For further information, see the *Announcement of the School of Pharmacy, UC San Francisco*, which may be obtained from the Dean, School of Pharmacy, University of California Medical Center, San Francisco, CA 94143-0446.

dition, in the written application, and in interviews. The College of Letters and Science offers advising on preparing for and applying to law schools through **daily drop-in counseling sessions** (for information, call the Preprofessional/Prerequisite Advising Office at 825-1817).

For additional information, see the *Law School Admission Bulletin* within the "Law School Admission Service Packet" (available at the Admissions Office, UCLA School of Law, 71 Dodd Hall).

Graduate Study

The College of Letters and Science provides graduate students virtually unlimited opportunities for academic pursuit, faculty-sponsored research, and fieldwork relative to specific programs and career goals.

With Graduate Division approval and subject to University minimum requirements, each department sets its own standards for admission and other requirements for the award of the master's and doctoral degrees. See the departmental listings which follow for specific requirements and procedures.

For information on the proficiency in English requirements for international graduate students, refer to "Graduate Admission" in Chapter 3.

African Area Studies (Interdepartmental)

10244 Bunche Hall, (310) 825-3686

Professors

Beverly J. Robinson, Ph.D. (*Theater*)
Hans Schöllhammer, D.B.A. (*Management*)
Nathan Shapira, Dottore in Architettura (*Design*)

Assistant Professors

Judith A. Carney, Ph.D. (*Geography*)
Johannes J. Feddema, Ph.D. (*Geography*)
John A. Nkinyangi, Ph.D. (*Education*)
Nadine R. Peacock, Ph.D. (*Anthropology*)

Lecturers

Patrice E.F. Jelliffe, R.N., M.P.H. (*Community Health Sciences*)
Kobla Ladzekpo, M.A. (*Ethnomusicology and Systematic Musicology*)

Scope and Objectives

The basic objective of the African Area Studies Program is an intellectual one — to provide interested students with the opportunity to engage in intensive study and research on Africa on an interdisciplinary basis. The program offers high quality African area courses in a wide range of fields, including the social sciences, humanities, and professional fields. The Master of Arts is not a professional degree, but students are encouraged to enroll in courses in several professional schools on campus. Articulated degree programs are also offered.

Academic flexibility draws many students to the program. Because there are more than 30 active faculty members on campus with African interest and experience in many disciplines, students have multiple options to design individualized programs.

According to a recent survey, 37 percent of the program's graduates are continuing study at the postgraduate level, 25 percent are employed in higher education, and 24 percent work with international or foreign organizations in 20 countries.

Master of Arts Degree

Admission

In addition to the University minimum requirements, applicants are required to (1) submit three letters of recommendation from academic referees, one of which may be from an employer if the applicant has been away from school for some time and (2) present a resumé describing both academic and professional experience.

In addition to meeting the requirements of the Graduate Division, you must have adequate preparation in undergraduate fields related to the program. Normally, the required preparation for the M.A. degree in African Area Studies is a Bachelor of Arts in the social sciences or arts and humanities.

Major Fields or Subdisciplines

You must select a major field concentration in one discipline, professional school, or approved interdisciplinary grouping. For more information and a brochure describing the program, contact the Assistant Graduate Adviser, African Studies Center, 10244 Bunche Hall, UCLA, Los Angeles, CA 90024-1310.

Foreign Language Requirement

You are required to satisfy the language requirement by one of the following methods: (1) taking three courses (12 units) in an African language with an average grade of B or better (these courses may not be applied toward the

nine courses required for the degree), (2) passing a Linguistics Department examination in an African language not regularly offered, (3) proving that you are a native speaker of an African language, (4) proving that you have a Foreign Service Institute rating of three or above in an African language, or (5) petitioning for the substitution of an appropriate non-African language.

Course Requirements

A minimum of nine courses is required for the M.A., at least five of which must be at the graduate level. The courses must be distributed between disciplines as follows: (1) major discipline — a minimum of five courses, of which three must be at the graduate level. Sociology and anthropology may be taken as a combined major. Other combined majors must be approved by the graduate adviser; (2) minor discipline — a minimum of three courses, of which two must be at the graduate level; (3) third discipline — a course on Africa, preferably of the survey or methodology type. In addition, African Area Studies M229B and/or History 275 are strongly recommended for all students in the program.

No more than one course graded on an S/U basis may be applied toward the minimum of nine courses required for the degree, except with consent of the graduate adviser. One course in the 500 series may be applied toward the total course requirement and toward the minimum graduate course requirement. With consent of the graduate adviser, another 500-level course may be allowed but may not be applied toward the minimum graduate course requirement.

Thesis Plan

The program normally requires a written comprehensive examination for the M.A. degree; however, a thesis option is available. If you wish to follow the thesis plan, you should select, in consultation with the graduate adviser, a faculty committee to supervise your thesis. The thesis must reflect the major area of emphasis. Normally the thesis should be submitted to the committee at the beginning of your fourth term in residence and should be approved before the end of that term. If the committee does not approve the thesis, you will have failed the requirement and are not allowed to resubmit the thesis.

Comprehensive Examination Plan

If you select the comprehensive examination plan, you are required to take a written examination administered by a three-person committee. It is your responsibility to make arrangements for this examination with faculty members in appropriate departments. Exceptions are granted only with consent of the graduate adviser. The examination normally is three to six hours in length.

An oral examination may be held at the discretion of the examining committee after it has

read the written examination. If you fail the comprehensive examination, you may retake it only once with consent of the graduate adviser.

African Development Studies within the M.A. in African Area Studies

Students interested in an interdisciplinary program in African development studies within the existing master's program should consult the graduate adviser. Coursework focuses on planning and development.

Cooperative Degree Programs

In the articulated degree programs described below, no course may be used for credit toward more than one degree. Thus, courses that have been applied toward the completion of the M.A. degree in African Area Studies may not also be applied toward any other degree.

For more information on either of the cooperative degree programs, contact the Graduate Adviser or Assistant Graduate Adviser, M.A. Program in African Area Studies.

M.F.A.-Film and Television/M.A.-African Area Studies

The African Area Studies Program and the Department of Film and Television have an articulated degree program which allows students to combine study for the M.A. in African Area Studies and the M.F.A. in Film and Television. Additional information is available from the Graduate Adviser, Student Affairs Office, UCLA Film and Television Department.

M.P.H./M.A.-African Area Studies

The African Area Studies Program and the School of Public Health have an articulated degree program whereby you can work sequentially for the master's degree in African area studies and the Master of Public Health. By planning the major field emphasis in public health while working toward the M.A. in African Area Studies, it may be possible to shorten the amount of time it would normally take to complete both degrees. Potential applicants may also contact the Office of Student Affairs, UCLA School of Public Health.

Graduate Courses

M229B. Africana Bibliography and Research Methods. (Same as Library and Information Science M229B.) Problems and techniques of research methodologies related to Africana studies. Emphasis on relevant basic and specialized reference materials, using full range of available information resources, including library collections of books, serials, and computerized data bases.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

African Area Studies Course List

All courses are not offered every academic year. You should verify courses with the respective departments.

African Languages (Linguistics) 1A-1B-1C. Elementary Swahili

2A-2B-2C. Intermediate Swahili

7A-7B-7C. Elementary Zulu

8A-8B-8C. Intermediate Zulu

African Studies (Interdepartmental)

10244 Bunche Hall, (310) 825-2944

Professors

Christopher Ehret, Ph.D. (*History*), *Chair*
Thomas J. Hinnebusch, Ph.D. (*Linguistics, African Languages*)
Richard L. Sklar, Ph.D. (*Political Science; Distinguished Teaching Award*)

Scope and Objectives

This special undergraduate program is designed primarily for (1) students who plan to live and work in Africa or who are interested in government and public service careers involving African affairs and (2) students who plan to pursue graduate work in one of the social sciences or Near Eastern and African languages, with primary concentration on the African field.

The philosophy of the specialization is that people with a solid background in one of the established disciplines can make the best contribution to an understanding of Africa and its problems. Thus, the specialization can be taken only jointly with work toward a bachelor's degree, normally in one of the following fields: anthropology, economics, geography, history, linguistics, political science, or sociology. Students completing this special program receive a degree with a major in a selected discipline and specialization in African studies. The chair of the committee in charge certifies completion of the program.

Special Undergraduate Program

Preparation for the Specialization

Required: History 10A-10B and either African Languages 190 or a three-term sequence in any African language.

Upper Division

Students are required to take a departmental major in the social sciences or, by special arrangement with the committee chair, in the humanities or arts. In addition, you are required to take an upper division course related to Africa in each of four departments.

For more information, contact the Assistant Graduate Adviser, African Studies Center, 10244 Bunche Hall (825-2944) or Professor Christopher Ehret, History, 6265 Bunche Hall (825-4093, 825-4601).

Afro-American Studies (Interdepartmental)

160 Haines Hall, (310) 825-7403

Professors

Walter Allen, Ph.D. (*Sociology*)
Gordon L. Berry, Ed.D. (*Education*)
Kimberle W. Crenshaw, J.D., LL.M. (*Law*)
James H. Johnson, Ph.D. (*Geography*)
Claudia Mitchell-Kernan, Ph.D. (*Anthropology*)
E. Victor Wolfenstein, Ph.D. (*Political Science*)
Gail E. Wyatt, Ph.D., *in Residence* (*Psychiatry and Biobehavioral Sciences*)

Associate Professors

Lawrence Bobo, Ph.D. (*Sociology*)
Jacqueline C. DjeDje, Ph.D. (*Ethnomusicology and Systematic Musicology*)
Franklin Gilliam, Jr., Ph.D. (*Political Science*), *Chair*
Sandra Graham, Ph.D. (*Education*)
Robert A. Hill, M.Sc. (*History*)
Vickie M. Mays, Ph.D. (*Psychology*)

Valerie A. Smith, Ph.D. (*English*)
Belinda Tucker, Ph.D., *in Residence* (*Psychiatry and Biobehavioral Sciences*)
Richard A. Yarborough, Ph.D. (*English; Distinguished Teaching Award*)

Assistant Professors

Marcyliena H. Morgan, Ph.D. (*Anthropology*)
Brenda Stevenson, Ph.D. (*History*)

Lecturers

Kenny Burrell, B.A.
Ruth Gilmore, M.F.A.
W. Paul Von Blum, J.D.

Scope and Objectives

Originally born during the late 1960s and early 1970s, the Afro-American studies major was designed to fill a void that existed at UCLA in terms of scholarly and curricular material relevant to the African American experience. Students and faculty currently associated with the program see the major as meeting a number of academic, personal, and social needs.

The program offers both a Bachelor of Arts and a Master of Arts degree. While it is important that students become expert within a traditional discipline, it is even more important that students examine both the truth and the fiction regarding the African American experience in the U.S. For African American students, this leads to a heightening of self-awareness and self-pride. For non-African American students, such a major provides a broadening of perspectives to take into account more than a singular cultural view.

The fundamental goal of the curriculum is to provide students with a comprehensive and multidisciplinary introduction to the crucial life experiences of African Americans. This goal is achieved in two primary ways. First, it provides

an interdisciplinary exposure to particular features of the African American experience. Majors gain an in-depth understanding of the historical, anthropological, sociological, psychological, economic, and political aspects of African America. The curriculum also provides opportunities to study the literary, musical, and artistic heritage of peoples of African descent. Second, students gain expertise in the concepts, theories, and methods of a traditional academic discipline. Majors are required to select an area of concentration in one of the following fields: anthropology, economics, English, history, philosophy, political science, psychology, or sociology (concentrations in departments not listed must be approved by the program adviser).

Bachelor of Arts Degree

The B.A. program in Afro-American Studies is periodically revised; check with the program office for changes and/or updates. Majors should also closely consult the 1992-93 *Afro-American Studies Catalog and Directory*, available from the program office.

Preparation for the Major

Required: History 10A and the lower division courses listed in one of the following concentrations, plus three courses from at least two additional concentrations (prerequisites for the courses listed must be completed before enrolling in a given course; this is especially important for the quantitative courses in economics and psychology): *anthropology* — Anthropology 8, 9, 10 (or 7), 12; *economics* — Economics 1, 2, 40, Mathematics 3A, 3E (or 3A and 3B, or 31A and 31B); *English* — English 3, 4, 10A, 10B, 10C (all must be taken in sequence); *history* — History 1A-1B-1C, 6A-6B-6C, 10B, and 100A or 101; *philosophy* — Philosophy 4, 21, 22, 31; *political science* — Political Science 1, 6, 20, Sociology 1, Economics 1; *psychology* — Mathematics 2, Psychology 10, 41, 42, Biology 2, Anthropology 7, Physics 10 (or 3A or 6A or 8A), one year of high school chemistry (or Chemistry and Biochemistry 2 or 11A); *sociology* — Mathematics 2, Sociology 1, 18, Linguistics 1, Anthropology 9. You are strongly urged to complete the required lower division courses within the first two years of the major.

The Major

Required: (1) Anthropology M164, English M104A or M104B or M104C, History M158B or M158C; (2) four upper division and/or graduate courses in Afro-American studies (or four departmental courses that are multiple-listed with Afro-American Studies); (3) six upper division electives within the department of concentration selected from the approved course list below; (4) two upper division electives outside the department of concentration selected from the approved courses list. Note: You may petition the committee which administers the degree program to have a course not

on the approved list accepted for the major. In arranging a course of study, you should select a combination of courses that best meets your current and future educational and career goals.

Approved courses (recommended courses are in bold):

Afro-American Studies **100B, C101A through C101Z, M104A, M104B, M104C, M145, M147, M158A, M158B, M158C, M164, M172, M197, 197B, 199**

Anthropology 110, **111, 115P, 120, 122, 123, 124, 125, 130, 135A, 135B, M136Q, 137, 138, M140, 142A, 142B, 145, 150, 151, 152, 153, M154, 158, 161, M164, 167, M168, 171, 182, 186A, 186B, 199**

Economics **101A, 101B, 102, 103A through 103Z, 107, 110, 111, 112, 120, 121, 130, 133, M135, M136, 141, 144, 147A, 147B, 150, 151, 160, 161, 180, 183, 190, 191, 192, 199**

English 80, 85, 95A, 95B, 95C, 100, **M104A, M104B, M104C, M105, 106, M107A, M107B, M107C, 108A, 108B, 109, M111A, 114, 115A, 118, 131A through 131J, 136A, 136B, 136C, 140A, 140B, 141A, 141B, 142A, 142B, 143, 171, 172, 173, 174, 178, 188, 189, 190, M197, 199**

History 100A, 101, M104A, M104B, 107A, 107B, 109A, 109B, 135A, 135B, **145A, 145B, 146A, 146B, 147A, 147B, 148A, 148B, 148C, 149A, 149B, 154A, 154B, 156A, 156B, 156C, 156D, 156E, M158A through 158E, M159A, M159B, 160, 161, 166, 175A, 175B, 175C, 176A, 176B, 177, 178A, 178B, 179A, 179B, 193A, 199**

Philosophy 100A, 100B, 101A, 101B, 102, **104, 126A, 126B, 126C, 129, 150, 151A, 151B, 153A, 156, 166, 172, 178, 182, M192, 199**

Political Science **102, 104A, 104B, M105, M106, 111A, 111B, 111C, 113, 114A, 114B, 115, 116, 119A through 119Z, 120, 124, 125, 126, 131, 137A, 137B, M139A, M140, 141, 142, 145, 146, M147B, 165, 166A, 166B, 166C, 167, 168L, 170, 172A, 172B, 173, 174, 175A, 175B, 181, 182A through 182D, 183A, 183B, 183C, 185, 199**

Psychology **42, 110, 111, 112B, 115, 116, 119D, M119K, 120, 121, 123, 125, 127, 129A, 129B, 130, 132, 135, 136A, 136B, 137C, 137D, M138, M142, 150, 151, M163, M165, 170A, 170B, M172, 175, 177, 179A, 192, 193, 194, 197, 199** (note: courses 110, 115, 120, 125, 127, 135, M142, and 151 should be taken by students planning to pursue graduate study in psychology)

Sociology **101, 102, 103, 104, 105, 113, 116, 118, 132, 133, 134, 135, 136, M138, M144, 145, 147A, 147B, 148, 149, 156, 157, 158, 160, 169, 170, 171, 174, M175, M176, 182, 183, 184, 185, 186, 195A through 195Z, 197, 199**

Honors Option

Students participating in the honors option are required to complete an independent research paper or project undertaken with the guidance of a faculty member. If you are an Afro-American studies major with a grade-point average of 3.5 or better, you complete the honors option by writing an undergraduate thesis. For more information, contact the curriculum coordinator of the Afro-American Studies Program.

Double Major Option

Some students elect to complete the requirements of two majors (Afro-American studies and another). If you are interested in this option, you must maintain good academic standing and complete both majors within the 228-unit maximum imposed by the college. Courses used to satisfy the requirements for the principal major may also be used to satisfy the requirements for the secondary one, but no more than five courses may be common to both majors. Because of the complexity of the double major, you are encouraged to plan your curriculum early and to do so in consultation with the college counselors and/or the Afro-American Studies Program adviser or curriculum coordinator.

Master of Arts Degree

The Master of Arts program in Afro-American Studies is international in scope, focusing on African American cultures in the U.S., the Caribbean, and South America. The program prepares students for positions in the job market, as well as further graduate study (i.e., Ph.D. level) in their traditional disciplines.

Admission

Applicants for admission must possess a bachelor's degree in the social sciences or humanities and demonstrate an interest in Afro-American studies either through their previous course of study or in their future plans. Students are selected on the basis of the following criteria: (1) an official transcript; (2) three academic letters of recommendation; (3) a minimum 3.0 (B) average in the junior/senior years of college; (4) a statement of purpose describing the applicant's background in Afro-American studies, proposed program of study, and future career goals; (5) scores on the verbal and quantitative sections of the Graduate Record Examination (GRE); (6) an original term paper or research paper which best expresses the applicant's interests and abilities; (7) other evidence of promise deemed relevant such as work experience, accomplishments, or community and public service.

Admission to the program is limited to Fall Quarter. The application deadline for the 1993-94 academic year is December 15, 1992 (earlier for international students). Prospective students may request applications from the M.A. Degree Program in Afro-American Stud-

ies, Center for Afro-American Studies, 160 Haines Hall, UCLA, Los Angeles, CA 90024-1545.

Major Fields

The M.A. in Afro-American Studies is interdisciplinary, with formal support linkages to nine disciplinary departments: Anthropology, English, History, Linguistics, Music, Philosophy, Political Science, Psychology, and Sociology. Related courses are also offered in the following schools and departments: African Studies, Art, Dance, Economics, Education, Film and Television, Folklore and Mythology, Geography, Latin American Studies, Library and Information Science, Management, Psychiatry and Biobehavioral Sciences, Public Health, Social Welfare, and Theater.

Foreign Language Requirement

You are required to satisfy the language requirement by one of the following methods: (1) successfully completing two years of coursework in a foreign language at the college level, (2) passing a foreign language proficiency examination approved by your guidance committee and deemed appropriate by the program committee, or (3) demonstrating competence in the use of the computer as an aid in social research.

Course Requirements

A total of 14 upper division and graduate courses are required for the degree. Of that number, only four may be selected from upper division listings. The program has a structured core of seven required courses. You are required to take Afro-American Studies M200A and three courses from 200B through 200F. These courses should normally be taken in your first year of study. The second year is devoted to acquiring disciplinary competence in your cognate field, and six courses must be selected from that discipline. Finally, course 270A is required, and courses 270B-270C are to be taken in conjunction with work in the discipline of your choice. These seminars are expected to facilitate completion of your thesis. One course (four units) in the 500 series may be applied toward either the total course requirement or the minimum graduate course requirement.

Thesis Plan

The thesis is the final report on the results of your original investigation. Before beginning work on the thesis, you should consult closely with your academic adviser and the thesis committee. See the 1992-93 *Afro-American Studies Catalog* for details concerning thesis requirements.

Comprehensive Examination Option

You may elect to complete the M.A. degree through the comprehensive examination option. The written examination is administered

by a committee consisting of at least three faculty members appointed by the program and is offered on a regular basis.

Lower Division Course

M5. Social Organization of Black Communities. (Same as Sociology M5.) Lecture, three hours; discussion, one hour. Analysis and interpretation of social organization of black communities, with focus on origins and development of black communities, competing theories and research findings, defining characteristics and contemporary issues.

Mr. Allen, Mr. Oliver (Sp)

Upper Division Courses

100B. Psychology from an Afro-American Perspective. Survey of psychological literature relevant to Afro-Americans, with emphasis on contributions of Afro-American psychologists. Topics include history of psychology, testing and intelligence, the family, personality and motivation, racism and race relations, education, community psychology, and future of Afro-American psychology.

C101A-C101Z. Special Topics in Afro-American Studies. Prerequisite: consent of instructor. Variable topics. May be repeated for credit. Concurrently scheduled with courses C201A-C201Z.

M103A. African American Theater History: Slavery to Mid-1800s. (Same as Theater M103A.) Lecture, three hours. Prerequisite: upper division standing. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from slavery to the mid-1800s.

Ms. Robinson (F)

M103B. African American Theater History: Minstrel Stage to Rise of the American Musical. (Same as Theater M103B.) Lecture, three hours. Prerequisite: upper division standing. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from the minstrel stage to the rise of the American musical.

Ms. Robinson (W)

M103E. African American Theater History: The Depression to the Present. (Same as Theater M103E.) Lecture, three hours. Prerequisite: upper division standing. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from the Depression to the present.

Ms. Robinson (Sp)

M104A. Early Afro-American Literature. (Same as English M104A.) Prerequisite: satisfaction of Subject A requirement. Introductory survey of black American literature from the 18th century through World War I, including oral and written forms (folktales, spirituals, sermons; fiction, poetry, essays), by authors such as Phillis Wheatley, David Walker, Frances Harper, Frederick Douglass, Harriet Jacobs, Paul Laurence Dunbar, Charles W. Chesnut, Booker T. Washington, and Pauline Hopkins.

Ms. Smith, Mr. Yarborough

M104B. Afro-American Literature from the Harlem Renaissance to the 1960s. (Same as English M104B.) Prerequisite: satisfaction of Subject A requirement. Introductory survey of 20th-century black American literature from New Negro Movement of post-World War I period to the 1960s, including oral materials (ballads, blues, speeches) and fiction, poetry, and essays by authors such as Jean Toomer, Claude McKay, Langston Hughes, Sterling Brown, Nella Larsen, Zora Neale Hurston, Richard Wright, Ann Petry, James Baldwin, and Ralph Ellison.

Ms. Smith, Mr. Yarborough

M104C. Afro-American Literature since the 1960s. (Same as English M104C.) Prerequisite: satisfaction of Subject A requirement. Introductory survey of diverse forms of Afro-American literary expression produced from rise of Black Arts Movement of the 1960s to the present by writers such as Amiri Baraka, Nikki Giovanni, Alice Walker, Etheridge Knight, Toni Morrison, Martin Luther King, Jr., Paule Marshall, Ernest Gaines, Ishmael Reed, and Audre Lorde. P/NP or letter grading.

Ms. Smith, Mr. Yarborough

M145. Ellingtonia. (Formerly numbered 145.) (Same as Ethnomusicology M111.) Music of Duke Ellington, his life, and far-reaching influence of his efforts. Ellington's music, known as "Ellingtonia," is one of the largest and perhaps most important bodies of music ever produced in the U.S. Covers the many contributions of other artists who worked with Ellington, such as composer Billy Strayhorn and musicians Johnny Hodges, Cootie Williams, and Mercer Ellington.

Mr. Burrell (W)

M147. Minority Group Politics. (Same as Political Science M147B.) Lecture, three hours; discussion, one hour. Prerequisite: one 140-level political science course or one upper division course on race or ethnicity from history, psychology, or sociology, or consent of instructor. Emphasis on dynamics of minority group politics in the U.S., touching on conditions facing racial and ethnic groups, with black Americans being the primary case for analysis. Three primary objectives: (1) to provide descriptive information about social, political, and economic conditions of the black community, (2) to analyze important political issues facing black Americans, (3) to sharpen students' analytical skills.

Mr. Gilliam

M158A. Comparative Slavery Systems. (Same as History M158A.) Lecture, three hours. Examination of the slavery experience in various New World slave societies, with emphasis on outlining similarities and differences among the legal status, treatment, and slave cultures of North American, Caribbean, and Latin American slave societies.

M158B-M158C. Introduction to Afro-American History. (Same as History M158B-M158C.) Lecture, three hours. Survey of the Afro-American experience, with emphasis on the three great transitions of Afro-American life: transition from Africa to New World slavery, transition from slavery to freedom, and transition from rural to urban milieu.

Mr. Hill, Ms. Stevenson

M164. The Afro-American Experience in the U.S. (Same as Anthropology M164.) Promotes understanding of contemporary sociocultural forms among Afro-Americans in the U.S. by presenting a comparative and diachronic perspective on the Afro-American experience in the New World. Emphasis on utilization of anthropological concepts and methods in understanding the origins and maintenance of particular patterns of adaptation among black Americans.

Ms. Morgan

M172. The Afro-American Woman in the U.S. (Same as Psychology M172 and Women's Studies M172.) Prerequisite: upper division standing. Impact of social, psychological, political, and economic forces which impact on interpersonal relationships of Afro-American women as members of a large society and as members of their biological and ethnic group.

Ms. Mays

M197. Topics in Afro-American Literature. (Same as English M197.) Variable specialized studies course in Afro-American literature. Topics include the Harlem Renaissance; Afro-American Literature in the Nadir, 1890-1914; Contemporary Afro-American Fiction. May be repeated for credit.

Ms. Smith, Mr. Yarborough

197B. Special Studies in Comparative Literature: Caribbean Literature. General introduction to literature of the English-speaking Caribbean by reviewing its historical and geographical background. To analyze the historical process toward self-determination in the literature, the following topics are included: (1) alienation and the search for community, (2) "external" relationships (the ancestor, the kinsman, the other), and (3) form and language.

199. Special Studies in Afro-American Studies (2 to 4 units). To be arranged with faculty member who will direct the study. Prerequisites: 3.0 GPA in the major, junior or senior standing, consent of instructor. Intensive directed research project. Eight units may be applied toward major requirements.

Graduate Courses

M200A. Advanced Historiography: Afro-American. (Same as History M200V.) Seminar, three hours. May be repeated for credit.

Ms. Stevenson

200B. Seminar: Political Economy of Race. Prerequisite: consent of instructor. Seminar on political economy, with special reference to black political economy and with focus on dynamics of allocation of wealth and power resources among social classes and racial and ethnic groups in the U.S. Presented in a context that is at once comparative and international. Seminar emphasizes internationalism and transnationalism as well as the uniqueness of the Afro-American condition. Attempts to relate the black condition in the U.S. to the socioeconomic system of this country and to compare it to political, social, and economic conditions of African peoples elsewhere.

M200C. Selected Problems in Urban Sociology. (Same as Sociology M262.) Seminar. Prerequisite: consent of instructor.

Mr. Allen, Mr. Oliver

M200D. Afro-American Sociolinguistics: Black English. (Same as Anthropology M243Q.) Lecture, three hours. Prerequisite: consent of instructor. Basic information on Black American English, an important minority dialect in the U.S. Social implications of minority dialects examined from perspectives of their genesis, maintenance, and social functions. General problems and issues in fields of sociolinguistics examined through a case study approach. Students required to conduct research in consultation with instructor and participate in group discussion.

Ms. Morgan

M200E. Studies in Afro-American Literature. (Same as English M262.) Prerequisite: consent of instructor. Intensive research and study of major themes, issues, and writers in Afro-American literature. Discussions and research on aesthetic, cultural, and social backgrounds of Afro-American writing. May be repeated for credit.

Ms. Smith, Mr. Yarborough

200F. African American Psychology. Seminar. Prerequisite: consent of instructor. Survey of psychological literature as it pertains to persons of African American descent. Critical review of implications of "mainstream" research on African Americans, including discussion of research on the family, academic achievement, and psychological assessment (testing). Emphasis also on theoretical approaches advanced by African American scholars: African philosophy, perspectives on racism in psychology, and research in the black community.

C201A-C201Z. Special Topics in Afro-American Studies. Prerequisite: consent of instructor. Variable topics. May be repeated for credit. Concurrently scheduled with courses C101A-C101Z.

241. Special Topics in Afro-American Studies. Lecture, four hours; discussion, one hour. Intensive research and study of major themes and issues in various areas of Afro-American studies.

270A. Research Methods. Seminar. Prerequisite: consent of instructor. Introduction to a variety of research methods, including experimental, quasi-experimental, observational, and survey research methodologies. Functions of research, research proposal writing, theory development and hypothesis testing, sampling theory, data collection, data processing and analysis, and interpretation. Ethics of research and preparing the research report.

270B-270C. Research Seminars. Prerequisite: consent of instructor. Designed to provide students with opportunity to put their research skills into practical application. During first term, all students meet under direction of a faculty member and engage in colloquium in which they share conceptual schemata and research design. Students spend second term completing their projects.

596. Directed Readings and Tutorials. Provides students with umbrella under which they can pursue specialized interests from which there is insufficient demand to warrant offering a formal course.

Assistant Professors

Melissa Meyer, Ph.D. (*History*)
 Greg M. Sarris, Ph.D. (*English*)

Scope and Objectives

Because UCLA possesses a substantial number of faculty in the humanities and social sciences engaged in teaching and conducting research on American Indians, the nation's first interdisciplinary M.A. program in American Indian Studies was established here.

The program draws primarily on existing courses in the participating departments, where research and research methodologies are of primary concern. Students are exposed to Indian-related research in a number of different disciplines; demonstration of research skills is required. You will graduate with the training you need to teach Native American studies or to serve in an administrative capacity in Indian programs. The M.A. program is coordinated by the American Indian Studies Center and ranks among the top Indian studies programs in the country.

Master of Arts Degree

Admission

A bachelor's degree from an accredited undergraduate institution is required for admission to the M.A. program in American Indian Studies. You must demonstrate interest in American Indian studies either by formal coursework, independent study, or practical experience. As part of the application, you must submit a detailed account of your background, potential career plan, and interest in American Indian studies. Preference is given to individuals with undergraduate majors relevant to the proposed areas of concentration within the M.A. degree: American Indian studies, anthropology, English, fine arts, history, linguistics, literature, or sociology.

Entering students must meet the University's minimum admission requirement of a 3.0 grade-point average in all work completed during the last two undergraduate years and in all prior graduate work. The Graduate Record Examination (GRE) is not required, but you are encouraged to take the examination and submit test results as part of the documents supporting your enrollment application. At least three faculty letters of recommendation must be submitted. You may obtain application forms and further information from the Committee to Administer the M.A. Degree in American Indian Studies, American Indian Studies Center, 3220 Campbell Hall, UCLA, Los Angeles, CA 90024-1548.

Major Fields or Subdisciplines

The American Indian Studies M.A. is an interdepartmental program with 10 participating academic schools and departments: Anthropology, Art History, Dance, English, History, Law, Library and Information Science, Linguistics, Music, and Sociology. The 10 disciplines are grouped into four areas of concentration: history and law; expressive arts; social relations; and language, literature, and folklore. Courses related to the American Indian Studies M.A. are also offered in the following schools and departments: Architecture and Urban Planning, Education, Political Science, Psychology, and Social Welfare.

Linguistics Requirement

Students in the M.A. program must successfully complete one of the following: (1) Linguistics 114, (2) Anthropology 243P, or (3) for native speakers of an American Indian language, an independent study course (approved by the instructor) in either linguistics or anthropology in which a structural knowledge of the student's language is learned. These courses are designed to show how American Indian languages and communicative norms are primary vehicles for understanding American Indian cultures.

Course Requirements

(1) A minimum of 10 courses is required, at least seven of which must be graduate courses. Four courses are required: American Indian Studies M200A, M200B, M200C (which ordinarily must be taken in the first year), and one of the linguistics requirement options described above, which must be taken by the end of the second year. In addition, one of the remaining six courses must be a graduate course concerned with research methodology.

(2) All M.A. candidates select one of the following areas of concentration: (a) history and law, (b) expressive arts, (c) social relations, (d) language, literature, and folklore. You can petition for optional combinations of interdisciplinary work through the program committee. In addition to the four required courses, you must complete a minimum of four courses in your area of concentration. Three of these must be graduate-level courses. Two additional courses are to be chosen from other areas of concentration. Courses must be selected from an approved list maintained by the program.

(3) Two courses in the 500 series may be applied toward the total course requirement; however, only one 596 course may be applied toward the minimum graduate course requirement.

Thesis or Comprehensive Examination Plan

You may select either (1) a thesis plan or (2) a comprehensive examination plan to complete the degree program. The committee members supervising the thesis or administering the comprehensive examination are selected by you with the consent of the program committee. Copies of the thesis must be submitted to each member of the committee by the fifth week of the term in which you expect to graduate. If you choose the comprehensive examination plan, you must demonstrate in a written and/or oral examination your competency in the major and minor areas of study.

Upper Division Course

197. Special Topics in American Indian Studies. Variable topics selected from the following: Myth and Folklore of Indian Societies; Contemporary American Indian Literature; Social Science Perspectives of American Indian Life; Law and the American Indian; History of American Indians (cultural area); Dance and Music of American Indians (cultural area); American Indian Policy. Consult *Schedule of Classes* for topics and instructors. May be repeated twice for credit. (F,W,Sp)

Graduate Courses

M200A. Advanced Historiography: American Indian Peoples. (Same as History M200W.) Seminar, three hours. Designed to familiarize students with major genres of literature relating to American Indian history. Subjects include theories of Indian origins, historical demography, Euro-American attitudes toward Indian peoples, studies of U.S. Indian policy, and tribal histories. Standard theoretical approaches, including cultural ecology and dependency theory.

Ms. Meyer

M200B. Cultural World Views of Native America. (Same as English M266.) Seminar, three hours. Exploration of written literary texts from oral cultures and other expressive cultural forms — dance, art, song, religious and medicinal ritual — in selected Native American societies, as these traditional and tribal contexts have been translated into contemporary literary texts (fiction, poetry, essay, and drama). Survey, from secondary sources, of interdisciplinary methodological approaches taken from literary analysis, structural anthropology, folklore, linguistics, and ethnomusicology.

Ms. Allen, Mr. Lincoln, Mr. Sarris

M200C. Contemporary Issues of the American Indian. (Same as Anthropology M269 and Sociology M275.) Introduction to most important issues facing American Indians as individuals, communities, tribes, and organizations in the contemporary world, building on historical background presented in course M200A and cultural and expressive experience of American Indians presented in course M200B.

Mr. Champagne

201. Topics in American Indian Studies. Discussion, three hours. Prerequisite: consent of instructor.

Anthropology

Gerardo Reichel-Dolmatoff, Ph.D.

Adjunct Associate Professor

Donald Lindburg, Ph.D.

Research Anthropologist

Kyeyoung Park, Ph.D.

Scope and Objectives

Anthropology, the broadest of the social sciences, is the study of humankind. One of the strengths of anthropology as a discipline is its "holistic" or integrative approach; it links the life sciences and the humanities and has strong ties with disciplines ranging from biology and psychology to linguistics, political science, and the fine arts. Anthropological study is appropriate for people with a wide variety of interests: human cultures and civilizations both present and past, human and animal behavior, particular regions of the world such as Africa, Asia, Latin America, Oceania, etc.

The department recognizes the following four fields in anthropology:

Archaeology is diverse in both methodology and geographic coverage. The greatest strengths within the department lie in the study of cultural evolution, complex societies, hunters/gatherers, iconography, craft specialization, quantitative analysis, and political economy and include major programs focused on Western North America, the high cultures of Mesoamerica and South America, Europe, Africa, and the Caribbean.

Biological anthropology is a comprehensive program on evolutionary anthropology, with emphasis on the behavioral and reproductive ecology of humans and other primates. It includes training in evolutionary theory, behavioral ecology, human ethology, reproductive physiology and ecology, paleoanthropology, primate behavior and evolution, and mathematical modeling. Faculty members have engaged in fieldwork on several continents, particularly Africa, where ongoing projects include work on human reproductive ecology, dietary and subsistence ecology, and human ethology.

Linguistic anthropology is an interdisciplinary field which addresses the manifold ways in which communication and culture mutually define one another in different communities worldwide. Linguistic anthropologists at UCLA have a variety of backgrounds and research interests which include the ethnography of face-to-face communication, language contact and change, verbal art and performance, and language and education. Courses are offered in urban sociolinguistics, ethnographic approaches to discourse analysis, field methods, and conversational analysis, as well as in

cross-cultural pragmatics (including visual aspects of communication).

Sociocultural anthropology concerns the examination and understanding of social systems and cultural perceptions, and the human capacities which have enabled them. Its goal is to understand their operation in specific settings and to understand the experience of individuals who live in these diverse systems. Faculty members have engaged in fieldwork in almost every area of the world, but most notably in Africa, South America, East and Southeast Asia, and Oceania. They have also engaged in ethnographic research among Americans with diverse ethnic identities and in various institutional settings.

Cutting across the four fields are three other categories of course offerings: **applied anthropology, regional cultures, and history, theory, and method.**

The department offers Bachelor of Arts and Bachelor of Science degrees in Anthropology for undergraduates; the graduate program leads to the Master of Arts and Ph.D. degrees. Studies in anthropology are particularly valuable for students planning careers in which an understanding of human behavior and cultural diversity is desirable, such as business, education, law, medicine, nursing, public health, social welfare, and urban planning. Because of its breadth of outlook, anthropology also offers an ideal basis for those seeking a general education in our increasingly interdependent world.

Bachelor of Arts Degree

Preparation for the Major

Required: Anthropology 7, 8, 9, and one elective from 10, 15, 33, 60, 60P, 80. *All courses must be taken for a letter grade, and you must maintain an overall 2.0 GPA.*

The Major

The major is designed for students interested in an anthropological understanding of human behavior. One of the strengths of anthropology is its cross-cultural "holistic" and integrative approach with many fields, such as biology, history, linguistics, the social sciences, and many of the humanities.

To provide a comprehensive understanding of the discipline as a whole, you must take two courses in the sociocultural anthropology field and one course in each of the other three fields (see "Scope and Objectives" above). One upper division survey core course is offered in each field (two in sociocultural anthropology), but you may take any course in the given area to fulfill this requirement. *All courses must be taken for a letter grade, and you must maintain an overall 2.0 GPA.*

You must complete 14 four-unit courses as follows:

(1) Two upper division courses in the sociocultural anthropology field and one in each of

the other three fields (archaeology, biological anthropology, and linguistic anthropology).

(2) One upper division course in regional cultures.

(3) Four additional upper division anthropology courses.

(4) Four courses in related fields selected from a list maintained in the department.

Students considering graduate work in anthropology are strongly encouraged to take at least one course in the history and theory of anthropology and one course in methodology in addition to the upper division core courses in the four fields.

Honors Program

The honors program provides research-oriented students with opportunity to engage in original research and analysis under the close supervision of faculty members and culminates in an honors thesis. To be admitted you must have junior standing and have completed at least two upper division anthropology courses and Anthropology 197H (taken in Winter Quarter of your junior year). You should have a cumulative GPA of 3.0 overall and a 3.5 cumulative GPA in your upper division anthropology courses. The application for admission must be submitted to the honors committee at the end of course 197H. The proposal, research, analysis, and writing of your paper take place over three terms through courses 199HA, 199HB, and 199HC. Course 199HA should be taken in Spring Quarter of your junior year; 199HB and 199HC are taken in Fall and Winter Quarters of your senior year. Exceptions to the above schedule are by petition only. Contact the undergraduate adviser early in your studies for more information.

Bachelor of Science Degree

Preparation for the Major

Required: Anthropology 7 or 12, 8, 9, 10 or 15; Biology 5, 9, 100A, 108; Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Mathematics 3A, 3B, and 3C, or 31A and 31B; Physics 3A, 3B, and 3C, or 6A, 6B, and 6C. *All courses must be taken for a letter grade, and you must maintain an overall 2.0 GPA.*

The Major

The major provides an overview of human evolution and is designed to prepare students for careers in anthropology and the health sciences, including medicine, dentistry, public health, and nursing. *All courses must be taken for a letter grade, and you must maintain an overall 2.0 GPA.*

You must complete 16 four-unit courses as follows:

(1) Two upper division courses in the socio-cultural anthropology field and one in each of the other three fields (archaeology, biological anthropology, and linguistic anthropology).

(2) One upper division course in regional cultures.

(3) Two statistics courses (sequential recommended).

(4) Four additional upper division anthropology courses.

(5) Four four-unit courses in related fields selected from a list maintained in the department.

Specialization in Computing

Majors in either anthropology bachelor's degree program may select a specialization in computing by (1) completing Program in Computing 10A, 10B, and 10C or 15, (2) completing one course from Anthropology 186A or 186B, (3) completing either a 199 course that focuses on the integration of computer methods with anthropological studies or one course from Program in Computing 60, Computer Science 172, or Mathematics 61, or an equivalent course (subject to approval of the departmental computer committee), and (4) satisfying all the other requirements for a bachelor's degree in the specified major. You graduate with a bachelor's degree in your major and a specialization in computing. Interested students should contact the undergraduate adviser.

Graduate Study

Admission

Admission to the graduate program in anthropology is limited to Fall Quarter. The department does not require an undergraduate major in anthropology, though this is desirable. Promising students with a B.A. or M.A. in another field may be admitted, in which case a program of background studies based on previous training and current objectives is formulated. Knowledge of a foreign language is not required for admission, but completion of the language requirement before beginning work is highly recommended, and such students are at an advantage in the selection process.

Applications and all supporting material must be submitted by December 15, 1992, to be considered for admission for Fall Quarter 1993.

UCLA Graduate Application Processing (P.O. Box 23895, Oakland, CA 94623-0895) requires submission of an official application (with fees) and official transcripts of record, in duplicate, from each college or university at which work has been completed.

In addition, you must submit the following directly to the Graduate Counselor, Department of Anthropology, 341 Haines Hall, UCLA, Los Angeles, CA 90024-1553:

(1) Three letters of recommendation (preferably from anthropologists).

(2) Graduate Record Examination (GRE) scores.

(3) A research or term paper.

(4) Statement of purpose.

The department requires two faculty members to sponsor an applicant before admission is recommended.

For further information on the departmental program, a graduate syllabus may be obtained without charge by writing to the above departmental address.

Master of Arts Degree

Foreign Language Requirement

M.A. language requirements may be met by:

(1) Passing the Graduate School Foreign Language Test (GSFLT) with a score of 500 or better or

(2) Passing a departmental examination or other demonstrations of proficiency in a foreign language by petition to the department chair and the dean of the Graduate Division.

Students whose native language is not English may petition to waive the requirement. Formal written petition for such waiver must be submitted to the guidance committee, department chair, and the Graduate Division.

Core Course Requirements

You must demonstrate basic knowledge in the four fields by one or a combination of the following: (1) passing the core course with a grade of B or better, (2) petitioning that work taken elsewhere constitutes the equivalent of such courses, or (3) passing a special examination in each, in Spring Quarter of your first year in residence. Courses taken while in graduate standing to meet these field requirements may also serve to meet course unit demands for the M.A. degree.

Course Requirements

The minimum course load is three courses (12 units) per term, but this requirement may be waived by petition to the department chair. An M.A. degree requires 10 courses (40 units) taken for a letter grade with a minimum 3.0 grade-point average.

(1) Four courses may be upper division (100 series).

(2) One course must be a graduate core seminar in your chosen subfield of specialization (e.g., Anthropology M201A for archaeology, course 202 for biological anthropology, course 203 for sociocultural anthropology, course 204 for linguistic anthropology).

(3) In addition to the appropriate graduate core seminar, you must take five other graduate seminars (200 series).

(4) Three courses may be outside the major with consent of the guidance committee.

(5) Two courses may be anthropology independent studies (see department for course numbers) with consent of the guidance committee.

Eight units of course 596 taken for a letter grade may be applied toward the total M.A. course requirement, with four of these units applicable toward the minimum graduate course requirement.

Thesis

By your fourth term of study, you select a thesis committee of departmental faculty to supervise your research and writing. The committee, as well as your thesis topic, must be approved by the department and the dean of the Graduate Division. Prior to completing the M.A. degree requirements, you file a Petition for Advancement to Candidacy form with the Graduate Division. The approved thesis must be typed and filed according to University regulations; information on regulations and procedures is available from the Graduate Division. Evaluation of the thesis provides the basis for the thesis committee's recommendation and departmental faculty vote regarding both the acceptability of the thesis for the M.A. degree and admission into the doctoral program.

Ph.D. Degree

Admission

If you are entering the department with an M.A. in Anthropology from another university or in a field other than anthropology, you must satisfy all master's degree requirements with the exception of the thesis. To fulfill this requirement, you may submit your prior master's thesis or a research paper written as a graduate student (whether or not in anthropology). Only after satisfying these requirements are you admitted into the Ph.D. program.

Foreign Language Requirement

You must satisfy the Ph.D. language requirement before formally nominating the five-member doctoral committee and before taking the qualifying examinations. Any language useful for field study and/or library research is acceptable. You must submit to your departmental committee a comprehensive annotated bibliography and demonstrate familiarity with its contents by taking a written or oral examination. The format of the examination is determined by your doctoral committee. Students who speak English as a second language may waive the language requirement by petition to their committee, the department chair, and the Graduate Division. Under unusual circumstances, the department will consider alternate means of fulfilling the requirement.

Course Requirements

You must be in residence for one year between receipt of the M.A. degree and advancement to doctoral candidacy. During this time, coursework must be done with at least three different members of the faculty. You must be enrolled in a minimum of 12 units (this requirement may be waived by petition to the department chair) or be on an official leave of absence.

Qualifying Examinations

Qualifying examinations are conducted in two parts: (1) a written examination and (2) the University Oral Qualifying Examination. The timing of the examinations is arranged with members of the doctoral committee, but they may not take place earlier than the third term after receiving the M.A. degree. The written examination must be completed within the first eight weeks of the given term; the University Oral Qualifying Examination is expected to be completed in the same term, but no later than the following term.

The format for the written examination is determined by the doctoral committee which examines you in three subfields of your choice. Two of these three subfields are selected from a list available in the department; the third is specific to your needs, interests, and dissertation plans. After you successfully complete the written examination, the doctoral committee administers the University Oral Qualifying Examination, in which you are required to present a defense of your dissertation proposal. The committee determines the conditions for reexamination should you fail either examination.

Final Oral Review

The department requires a review of the completed dissertation by the doctoral committee as a whole and a public presentation of the results of the dissertation.

Lower Division Courses

7. Human Evolution. (Formerly numbered 11.) Lecture, three hours; discussion, one hour. Required as preparation for B.A. degree. Not open for credit to students with credit for course 12. Evolutionary processes and evolutionary past of the human species.

8. Archaeology: An Introduction. (Formerly numbered 6.) Lecture, three hours; discussion, one hour. Required as preparation for both bachelor's degrees. General survey of field and laboratory methods, theory, and major findings of anthropological archaeology, including case-study guest lectures presented by several departmental archaeologists.

9. Sociocultural Anthropology. (Formerly numbered 5, 22.) Lecture, three hours; discussion, one hour. Required as preparation for both bachelor's degrees. Introduction to study of culture and society in comparative perspective. Examples from societies around the world to illustrate basic principles of formation, structure, and distribution of human institutions. Of special concern is the contribution and knowledge that cultural diversity makes toward understanding the problems of the modern world. P/NP or letter grading.

10. Principles of Human Evolution: Genetic Basis. (Formerly numbered 1.) Lecture, three hours; discussion, one hour. Required as preparation for B.S. degree. Human population biology in the conceptual framework of evolutionary processes. Emphasis on genetic basis of evolution, population biology, and diversity among living populations.

12. Principles of Human Evolution: Comparative Analysis. (Formerly numbered 2.) Lecture, three hours; discussion, one hour. Required as preparation for B.S. degree. Not open for credit to students with credit for course 7. Human population biology in the conceptual framework of evolutionary processes. Emphasis on comparative primate behavior, structural anatomy, and the fossil record.

15. Human Biology and Behavior. Lecture, three hours; discussion, one hour. Human biology and behavior through the life cycle from conception to senescence. Discussion of natural selection, sexual selection, and life history theory. Factors influencing variation in fertility and mortality: reproductive ecology, growth, development, and aging.

Mr. Bailey, Ms. Peacock

33. Culture and Communication. Lecture, three hours; discussion, one hour. Introduction to ways in which culture and communication shape each other, with emphasis on importance of language as a symbolic and practical guide to people's behavior and understanding of each other's actions. Topics include language socialization, cross talk, and verbal and nonverbal communication.

Mr. Duranti (F)

34. Introduction to Urban Speech Communities. Lecture, three hours; discussion, one hour. Introduction to study of speech communities in metropolitan areas, with special focus on communities in Los Angeles. Emphasis on ways in which communities share and incorporate speech norms of urban society while maintaining rules for conduct and interpretation of speech within specific speech communities. Topics include language and identity, socialization, social dialects, and communication.

Ms. Morgan

60. Anthropology for Today. (Formerly numbered 160.) Lecture, three hours. Lectures, films, readings, and discussions, with focus on critical evaluation of anthropological method and theory to understand cultural aspects of a selection of pressing problems in the modern world. Examination of such domestic issues as poverty and social inequality, educational reform, public health and mental health, conflict and criminality, as well as such Third World issues as economic development, environmental protection, population control, political modernization, diplomacy, warfare, revolution, refugee and disaster relief, minority rights, and protection of indigenous peoples. Survey of ethical issues and career opportunities in applied anthropology.

Mr. Hammond

60P. Internships in Applied Anthropology. (Formerly numbered 160P.) Seminar, three hours. Prerequisite: course 60. Designed to give students firsthand experience working in agencies in public and private sectors (e.g., refugee relief centers, drug rehabilitation programs, community development agencies, mental health clinics, etc.) selected for their relevance to individual students' prospective professional interests. Eight to 12 hours per week, complemented by weekly seminars, field evaluations, and preparation of a field journal.

Mr. Hammond

80. Introduction to Quantitative Methods. (Formerly numbered 186A.) Lecture, three hours; discussion, one hour. Data analysis as a way to reason with quantitative information. Topics include description (frequency distribution tables, histograms), population specification (mean and standard deviation, normal distribution), samples and estimation procedures (central limit theorem), and hypothesis testing (t-test, chi-square test).

Mr. Read

88. Lower Division Seminar. Seminar, three hours. Variable topics; consult *Schedule of Classes* or department for topics to be offered in a specific term. P/NP or letter grading.

Upper Division Courses

All upper division courses with letter designations (A, B, P, Q, etc.) may be taken independently unless otherwise stated.

Archaeology

110. World Archaeology. Prerequisites: course 8 and upper division standing, or consent of instructor. Broad survey of human culture history from its Stone Age beginnings to establishment of the primary civilizations of the Old and New Worlds. Intended for students with general interest in archaeology and in an anthropological approach to study of the past.

Mr. Sackett

111. Study of Archaeology. Survey of contemporary prehistoric archaeology. Emphasis on what archaeologists do, and how and why they do it. Contributions of archaeology to the modern world. Intended for students with a desire to explore the nature of anthropological archaeology. (Core course for archaeology field.)
Mr. Hill

112. Old Stone Age Archaeology. Lecture, three hours. Prerequisite: course 8 or consent of instructor. Development of Paleolithic cultural traditions in Europe, Africa, Asia, and the New World. Emphasis on the ordering and interpretation of archaeological data. Pleistocene geology and chronology, and relationship between human cultural and biological evolution.
Mr. Sackett

113P. Archaeology of North America. Lecture, three hours. Prehistory of North American Indians; evolution of Indian societies from earliest times to (and including) contemporary Indians; approaches and methods of American archaeology.

113Q. Prehistory of California Indian Cultures. Examination of the California archaeological record from earliest human evidence to historic times, with emphasis on development of cultural diversity.

113R. Southwestern Archaeology. Examination of prehistory of the American Southwest from Early Man to historic times. Emphasis on describing and explaining cultural variation and change, employing an ecological and evolutionary perspective. Special attention to "Great Events" (agriculture, town living, and the Great Abandonment). Evolutionary processes generalized and related to contemporary world problems.
Mr. Hill

114P. Ancient Civilizations of Western Middle America (Nahuatl Sphere). Pre-Hispanic and Conquest period native cultures of Western Middle America, as revealed by archaeology and early colonial writings in Spanish and Indian languages. Toltec/Aztec and Mixteca civilizations and their predecessors, with emphasis on sociopolitical systems, economic patterns, religion, and aesthetic and intellectual achievements.

114Q. Ancient Civilizations of Eastern Middle America (Maya Sphere). Pre-Hispanic and Conquest period native cultures of Eastern Middle America, as revealed by archaeology and early colonial writings in Spanish and Indian languages. Lowland and Highland Maya civilizations and their predecessors, with emphasis on sociopolitical systems, economic patterns, religion, and aesthetic and intellectual achievements.
Mr. Leventhal

114R. Ancient Civilizations of Andean South America. Lecture, three hours. Prerequisite: course 8 or 9. Pre-Hispanic and Conquest period native cultures of Andean South America, as revealed by archaeology and early Spanish writing. The Inca and their predecessors in Peru, with emphasis on sociopolitical systems, economic patterns, religion, and aesthetic and intellectual achievements.
Mr. Donnan

115P. Archaeological Field Training (4 to 8 units). Lecture, two to six hours; discussion, eight or more hours. Prerequisite: consent of instructor. Procedures of archaeological excavation, mapping, stratigraphy, collecting, and recording of archaeological data (field class conducted off campus). Summer field session in various locations set by individual instructor.
Ms. Arnold (Sp.Sum)

115R. Strategy of Archaeology. Lecture, three hours. Prerequisite: course 8 or consent of instructor. Introduction to problem formulation, theory, and method in archaeology, with emphasis on development of research designs. Focus on how archaeological research is conceived and planned, with consideration of differing viewpoints and their usefulness.
Mr. Hill

M115S. Historical Archaeology. (Same as History M103.) Survey of aims and methods of historical archaeology as practiced on both sides of the Atlantic, with case studies from North America, the Caribbean, Africa, and Europe.
Mr. Posnansky

116P. Laboratory Analysis in Archaeology. Lecture, three hours. Prerequisite: consent of instructor. Preparation of archaeological reports for publication. Laboratory description of archaeological collections: typology, documentation, preparation of illustrations, and presentation of archaeological data for scholarly publications. Students work with museum collections of archaeological finds: ceramics, basketry, implements of bone, stone, and shell.

M116Q. Dating Techniques in Environmental Sciences and Archaeology. (Same as Geography M178.) Lecture, three hours; reading period, one hour. Prerequisite: consent of instructor. Introduction to scientific dating methods such as radiocarbon dating, radiation damage methods, biological dating techniques, and magnetic dating, and applications in environmental sciences, archaeology, and physical anthropology.
Mr. Berger

117. Archaeological Materials Analysis: Laboratory Methods. Lecture, three hours; laboratory, three hours. Prerequisite: course 8. Training in archaeological analysis of prehistoric cultural materials, including chipped and ground stone artifacts, vertebrate fauna, shellfish, ceramics, ornaments and beads, and craft production materials from sites worldwide. Introduction to electronic measurement instrumentation and computerization of archaeological data. P/NP or letter grading.
Ms. Arnold (W)

117P. Intensive Laboratory Training in Archaeology. Lecture, three hours; laboratory, four hours. Prerequisites: courses 116P, 117, or equivalent. Archaeologists with special expertise in specific analytical techniques and topics oversee intensive laboratory training on a tutorial or small-class basis on one of the following topics: zooarchaeology, ethnobotany, lithic analysis, ceramic analysis, etc. May be repeated for credit with topic change. P/NP or letter grading.
Ms. Arnold

118A. Museum Studies. Prerequisite: consent of instructor. Method and theory of museum operation. Discussion and demonstration of acquisition accession, storage, photography, conservation, and exhibition. Analysis of museum research, publication, and teaching, as well as museum administration and funding. Lectures and demonstrations structured to illustrate how various aspects of museum operation are interrelated.
Mr. Donnan and the Museum Staff

118B. Museum Studies. Prerequisites: course 118A, consent of instructor. Two areas of museum operation are selected by students from those discussed and demonstrated in course 118A. Students are then required to develop expertise in these areas through a combination of library research and a series of assignments carried out in the museum.
Mr. Donnan and the Museum Staff

Biological Anthropology

120. Survey of Biological Anthropology. Lecture, three hours. Prerequisites: courses 10, 12, or equivalent. Limited to majors and graduate students in anthropology. Survey of biological anthropology including all major subareas. Lecture/seminar format requires attendance at a recitation section in addition to lectures. (Core course for biological field.)

120G. Biological Anthropology in Review. Lecture, three hours; seminar, three hours. Corequisite: lecture portion of course 7. Limited to graduate students in anthropology. Designed for anthropology students who have a deficiency in biological anthropology. Seminar discussion based on basic evolutionary principles, behavior of nonhuman primates, hominid evolutionary history, and contemporary human variation.
Mr. Boyd

121A. Primate Fossil Record. Lecture, three hours. Recommended prerequisites: courses 10, 12. Course 121A should be taken before 121B and 121C. Introduction to method and theory in paleoanthropology. Primate evolution, Cretaceous through the Miocene.

121B. The Australopithecines. Lecture, three hours. Prerequisite: consent of instructor. Recommended: courses 10, 12, 121A. Morphology, ecology, and behavior of the genus *Australopithecus*. History of their discoveries and their place in human evolution.
Ms. Kennedy

121C. Evolution of the Genus *Homo*. Lecture, three hours. Prerequisite: consent of instructor. Recommended: courses 10, 12, 121A, 121B. Origin and evolution of the genus *Homo*, including archaic sapiens and Neanderthals. Morphology, ecology, and behavior of these groups. Course ends with appearance of modern man.
Ms. Kennedy

122. Biology, Society, and Culture. Lecture, three hours. Prerequisite: course 12. Investigation of interaction between human biology and human behavior. Particular emphasis on influences of human biological evolution on human cultural evolution and human cultural evolution on human biological evolution.

123. Human Genetics. Lecture, three hours. Recommended prerequisite: course 10. Discussion of nature and causes of human biological variation. Development and comparison of evolutionary models of genetic and phenotypic changes. Emphasis on geographical and cultural contributions to development of observed patterns of human biological variation.

124. Evolution and Biology of Human Behavior. Comparative survey of behavior patterns of preliterary and Paleolithic peoples and those of nonhuman primates. Assessment of biological variables fundamental to human and prehuman behavior with regard to theories on evolution of human culture.
Mr. Blurton Jones

124P. Evolution of Human Sexual Behavior. Lecture, three hours. Prerequisite: consent of instructor. Recommended: course 7 or 10 or 12 or equivalent. Examination of human sexual relations and social behavior from an evolutionary perspective. Emphasis on theories and evidence for differences between men and women in their patterns of growth, maturation, fertility, mortality, parenting, and relations with members of the opposite sex.
Mr. Bailey

124Q. Physiology of Human Behavior. Lecture, three hours. Prerequisites: upper division standing and/or consent of instructor. Overview of neural, physiological, and endocrine substrates of a variety of human behaviors, including sexual behavior, aggression, language, and affiliative behavior. Emphasis on evolutionary origins, developmental pathways, and cross-cultural expressions of behaviors examined. Focus on human behavior, with evidence from animal literature as well.
Ms. Peacock

124R. Laboratory Methods in Human Behavioral Endocrinology (6 units). Lecture, three hours; laboratory, three hours (plus time to complete project). Prerequisite: course 124Q or consent of instructor. Introduction to laboratory methods in neuroendocrinology for students in social and behavioral sciences. Emphasis on field-compatible methods. Design and execution of a small research project.
Ms. Peacock

125. Genetics of Human Diversity. (Formerly numbered 125A-125B.) Lecture, three hours. Survey of human biological diversity. Emphasis on genetics at the population level for both discrete and quantitative variation. Analytic methods and evolutionary hypotheses.

C126P. Introduction to Field Methods in Human Ecology. (Formerly numbered 126P.) Lecture, three hours. Prerequisite: upper division or graduate standing. Survey of methods used in anthropological investigations emphasizing human biology and human ecology. Study design, physical assessment of nutritional status, growth and maturation, demographic surveys, systematic observation of behavior, energy expenditure, subsistence ecology, data analysis. Demonstrations and labs. Course fee required. Concurrently scheduled with course C226P. P/NP or letter grading.
Mr. Bailey, Ms. Peacock

127P. Primate Evolution. Prerequisite: upper division standing. Survey of primate paleontological and evolutionary record, encompassing prosimians, New and Old World monkeys, and hominoids. Attendant aspects of paleoecology and behavior.

128A. Primate Behavior Nonhuman to Human. Lecture, three hours. Prerequisite: upper division standing. Review of primate behavior as known from laboratory and field studies. Theoretical issues of animal behavior, with special reference to nonhuman primates. Discussion of human behavior as the product of such evolutionary processes. P/NP or letter grading. Ms. Silk

128B. Behavioral Ecology of Primates. Lecture, three hours. Prerequisite: course 128A. Analysis of evolution of sociality, sexual strategies, parenting behavior, fighting and contests, and altruism and cooperation in primate species. Ms. Silk (W)

129P. Laboratory Methods in Biological Anthropology: Skeletal. Lecture, three hours. Prerequisites: courses 10, 12, consent of instructor. Limited to majors and graduate students. Laboratory methodology and analysis of human variation on skeletal material. Ms. Kennedy

129Q. Paleopathology. Lecture, one hour; laboratory, three hours. Prerequisites: course 129P, upper division standing, consent of instructor. Investigation into diseases, trauma, health status, subsistence activities, and ethnic mutilation (i.e., cranial deformation, trepanation) through analysis of human skeletal materials. Course has worldwide scope, with some emphasis on the New World. Ms. Kennedy

Cultural Anthropology

130. Study of Culture. Lecture, three hours. Prerequisite: one lower division sociocultural anthropology course or equivalent, upper division standing. The 20th-century elaboration and development of the concept of culture. Examination of five major paradigms: culture as a human capacity, as patterns and products of behavior, as systems of meaning and cognition, as generative structure and semiotic system, as a component in social action and reality construction. (Core course for cultural field.)

Mr. Newman

130P. Study of the Individual in Society and Culture. Lecture, three hours. Prerequisite: course 9 or consent of instructor. Examination of relationships between the individual and society and culture. Topics include extent to which individuals shape and are shaped by social and cultural systems, role of the individual in social and cultural change, assumptions about human nature and individual needs and goals in social theory, relationship between personality and role and between "private" and "public" symbols, individual variation within and between cultures, and deviance and abnormality. Mr. Edgerton

132. Technology and Environment. Significance of material culture in archaeology and ethnology; problems of invention and the acceptance of innovations; ecological and sociological concomitants of technological systems; selected problems in material culture. Ms. Bray, Mr. Earle

133Q. Symbolic Systems. Prerequisite: upper division standing or consent of instructor. Analysis of anthropological research and theory on cultural systems of thought, behavior, and communication expressed in a symbolic mode (as distinguished from discursive, instrumental, and causal modes). Methods for study of symbolic meaning, including the experiential approach.

133R. Aesthetic Systems. Lecture, three hours. Prerequisite: upper division standing. Provides framework for a cross-cultural understanding of aesthetic phenomena that meets the requirements of anthropological research. Human capacities for aesthetic experience; sociocultural formation of aesthetic production; ethno-aesthetics; experiential dimension of aesthetic production. Mr. Newman

135A-135B. Introduction to Psychological Anthropology. Lecture, three hours. P/NP or letter grading:

135A. Historical Development. Prerequisite: course 9 or consent of instructor. Survey of the field of psychological anthropology, with emphasis on early foundations and historical development of the field. Topics include study of personality, pathology and deviance, altered states of consciousness, cognition, motivation, and emotion in different cultural settings. Mr. Hollan

135B. Current Topics and Research. Prerequisite: upper division standing or consent of instructor. Survey of the field of psychological anthropology, with emphasis on current topics and research. Topics include study of personality, pathology and deviance, altered states of consciousness, cognition, motivation, and emotion in different cultural settings. Mr. Hollan

135C. Seminar: Psychocultural Studies. Seminar, three hours. Prerequisites: course 9 or equivalent, consent of instructor. Firsthand exposure to current research in psychocultural studies. Various university scholars are brought in to discuss their on-going research. Using these presentations as models, students develop proposals for future research. P/NP or letter grading.

135S. Anthropology of Deviance and Abnormality. Lecture, three hours. Prerequisites: course 9 or equivalent, consent of instructor. Relationship between culture and recognition of, responses toward, and forms of deviant and abnormal behavior. Mr. Edgerton

135T. Psychoanalysis and Anthropology. (Formerly numbered 167P.) Lecture, three hours. Exploration of mutual relations between anthropology and psychoanalysis, considering both theory and method. History of and current developments in psychoanalysis; anthropological critiques of psychoanalytic theory and method, toward a cross-cultural psychoanalytic approach. Mr. Johnson

M136Q. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (Same as Psychiatry M112.) Prerequisite: consent of instructor. Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Group and individual projects. Discussion of some of the uses of observations and their implications for research in social sciences. Mr. Weisner (W)

137. Ethnography on Film. Intensive examination of filmed and written ethnographies of a wide range of the world's peoples, with purposes of (1) comparing visual with written data and evidences and (2) developing criteria for adequate written and film ethnography. Mr. Moerman

138. Methods and Techniques of Ethnohistory. Introduction to problems and procedures of extracting cultural data from documentary sources and their interpretation and analysis. Relevant documentary sources of various New World regions are selected as case histories to illustrate more concretely problems and challenges in this major area of anthropological concern.

139. Field Methods in Cultural Anthropology. Lecture, three hours. Prerequisite: upper division standing. Corequisite: course 139L. Introduction to skills and tools of data ascertainment through fieldwork in cultural anthropology. Emphasis on techniques, methods, and concepts of ethnographical research and how basic observational information is systematized for presentation, analysis, and cross-cultural comparison.

139L. Field Methods in Cultural Anthropology. Laboratory, three hours. Prerequisite: upper division standing. Corequisite: course 139. Supervised practicum of field methods in cultural anthropology. Field methods and techniques presented in course 139 practiced and applied in simulated field situations. Discussion of styles of presenting ethnographical information.

Linguistic Anthropology

M140. Language in Culture. (Same as Linguistics M146.) Prerequisite: upper division standing or consent of instructor. Study of language as an aspect of culture; relation of habitual thought and behavior to language; and language and the classification of experience. Holistic approach to study of language, with emphasis on relationship of linguistic anthropology to fields of biological, cultural, and social anthropology, as well as archaeology. (Core course for linguistics field.) Mr. Kroskrity

141. Ethnography of Everyday Speech. Lecture, three hours. Prerequisites: course 33, upper division standing or consent of instructor. Course has two interrelated objectives: (1) to introduce students to ethnography of communication — description and analysis of situated communicative behavior — and the sociocultural knowledge which it reflects and (2) to train students to recognize, describe, and analyze relevant linguistic, proxemic, and kinesic aspects of face-to-face interaction. (Alternates yearly with courses 142A-142B and 143.) Mr. Duranti, Mr. Kroskrity (Sp)

142A-142B. Microethnography of Communication. Lecture, three hours. Course 142A or Sociology C124A or consent of instructor is prerequisite to 142B. Students make primary records (sound tape, videotape, or film) of naturally occurring social interactions which are analyzed in class for interactive tasks, resources, and accomplishments displayed. Laboratory and fieldwork outside of class and minimal fees to offset costs of equipment maintenance and insurance required. (Alternates yearly with courses 141 and 143.) Mr. Moerman (W,Sp)

143. Field Methods in Linguistic Anthropology. (Formerly numbered 143A.) Lecture, three hours. Prerequisite: Linguistics 20 or prior experience in linguistics. Practice in eliciting linguistic data from informants. Initial focus on phonetic transcription and phonological structures; introduction to skills and strategies pertinent to morphological, syntactic, and textual analysis. Practice with native speakers of non-Indo-European languages is normally an important aspect of student participation. P/NP or letter grading. (Alternates yearly with courses 141 and 142A-142B.) Mr. Duranti, Mr. Kroskrity

144. American Indian Ethnolinguistics and Sociolinguistics. Prerequisite: prior coursework in either anthropology, linguistics, or American Indian studies. Introduction and comparative analysis of sociocultural aspects of language use in Native North American Indian speech communities. Specific foci include both micro- and macro-sociolinguistic topics. Micro-sociolinguistic topics are comprised of such issues as multilingualism, cultural differences regarding appropriate communicative behavior and variation within speech communities (e.g., male and female speech, baby talk, ceremonial speech, etc.). Macro-sociolinguistic considerations include language contact and its relationship to language change and language in American Indian education. Mr. Kroskrity

145. Afro-American Sociolinguistics: Black English. (Formerly numbered C145.) Lecture, three hours. Prerequisite: consent of instructor. Basic information on Black American English, an important minority dialect in the U.S. Social implications of minority dialects examined from perspectives of their genesis, maintenance, and social functions. General problems and issues in the fields of sociolinguistics examined through a case study approach. Ms. Morgan

146. Language and Culture of Polynesia: Past, Present, and Future. Lecture, three hours. Introduction to Polynesian cultures and languages, with particular emphasis on past and present sociocultural systems, patterns of language structure and language use, verbal art, language socialization strategies, and forms of cultural assimilation and resistance to European contact. Fieldwork on contemporary Polynesian cultures in U.S. urban areas. Mr. Duranti

Social Anthropology

150. Study of Social Systems. Lecture, three hours. Prerequisite: course 8 or 9 or Sociology 1 or consent of instructor. General principles of the organization of society; relation of these to technological complexity and ecological conditions of the culture; principles of evolutionary development of social systems. (Core course for social field.) Ms. Levine

151. Marriage, Family, and Kinship. Lecture, three hours. Prerequisite: course 9. Survey of marital patterns, descent, and family structure in a range of societies. Emphasis on relationship between kinship and other aspects of the sociocultural system and on importance of kinship for general anthropological research. Ms. Levine

152. Traditional Political Systems. Prerequisite: course 150 or consent of instructor. Political organization in preindustrial societies of varying degrees of complexity. Law and the maintenance of order; corporate groups; ideology. Relations of political institutions to other institutions of society.

153. Evolution of Human Societies. Lecture, three hours. Review of economic and ecological approaches to studying organization of production and exchange. Economic life viewed from three perspectives: adaptation, decision making, and social structure. Comparative theories discussed in context of ethnographic evidence from a wide variety of cultural systems. Mr. Earle, Mr. Johnson

M154. Women in Culture and Society. (Formerly numbered M163.) (Same as Women's Studies M154.) Lecture, three hours. Prerequisite: course 9. Systematic approach to study of sex roles from an anthropological perspective. Critical review of relevant theoretical issues supported by ethnographic material from traditional cultures and contemporary American culture. Ms. Sacks

156. Comparative Religion. Survey of various methodologies in comparative study of religious ideologies and action systems, including understanding particular religions through descriptive and structural approaches, and identification of social and psychological factors which may account for variation in religious systems cross-culturally. Mr. Newman

158. Hunting and Gathering Societies. Lecture, three hours. Prerequisite: course 9. Survey of hunting and gathering societies. Examination of their distinctive features from both an ecological and cultural viewpoint. Discussion of the possibility of developing a general framework for synthesizing these two viewpoints. Use of this synthesis as a basis for illustrating the relevance of hunting and gathering societies as an understanding of complex societies. Mr. Read

159. Social Dynamics. Lecture, three hours. Prerequisite: introductory anthropology or sociology course or consent of instructor. Examination of recurrent forms of institutional behavior, including child-rearing practices, initiation rites, kin-group organization, totemism, potlatch, witchcraft, curing rites, warfare, and structuring of status and authority. Demonstration of interrelatedness of diverse theoretical orientations in anthropology in formulation of a holistic theory. P/NP or letter grading. Mr. Goldschmidt

Applied Anthropology

161. Development Anthropology. Lecture, three hours. Prerequisites: course 9 and upper division standing, or consent of instructor. Comparative study of planned and unplanned development, in particular as it affects rural societies. Emphasis on impact of capital, technological change and gender differences, economic differentiation and class, urban/rural relations, and migration. Discussion of theoretical issues in light of case studies. Ms. Bray

162. Contemporary American Indian Problems. Contemporary problems of the American Indian both on and off the reservation. Topics include self-determination, land claims, activism, urban Indians, and role of the Bureau of Indian Affairs.

M162P. Destruction and Survival of Indigenous Societies. (Formerly numbered 162P.) (Same as World Arts and Cultures M162P.) Lecture, three hours. Prerequisite: course 9 or upper division standing or consent of instructor. Clarification of concepts and forms of destruction and survival; analysis directed to different processes threatening the institutions of a group and its survival. Exploration of current theories of ethnocide and genocide for their relevance and validity. P/NP or letter grading.

Ms. Bray

M164. The Afro-American Experience in the U.S. (Same as Afro-American Studies M164.) Promotes understanding of contemporary sociocultural forms among Afro-Americans in the U.S. by presenting a comparative and diachronic perspective on the Afro-American experience in the New World. Emphasis on utilization of anthropological concepts and methods in understanding the origins and maintenance of particular patterns of adaptation among black Americans. Ms. Morgan

165. Demographic Problems in Nonindustrial Societies. Lecture, three hours. Prerequisite: course 9. Dynamic interaction between environment, cultural belief, social structure, and population in hunting and gathering, pastoral, horticultural, and agricultural societies. Principal theories of population change and current issues in population policy considered in light of the anthropological evidence. Ms. Levine

M166. Economic Development and Culture Change. (Formerly numbered M197A.) (Same as Development Studies M100A.) Seminar, three hours. Prerequisites: course 9 or consent of instructor, some beginning experience in social sciences at college level. Seminar for undergraduates designed to examine concepts and issues arising from economic, social, and political change in the Third World. Mr. Hammond

167. Urban Anthropology. Open to upper division majors in social sciences, and others with consent of instructor. Survey of urbanization throughout the world, with emphasis on urban adaptation of rural migrants. Special focus on problems of rural/urban migration of ethnic minority groups and subsequent adaptation of them within the U.S. explored in terms of methods and perspectives of anthropology.

M168. Health in Culture and Society. (Same as Nursing M158.) Prerequisite: upper division standing. Examination of theories and methods of medical anthropology in relation to cross-cultural health systems, role networks, attitude and belief systems of the participants. Emphasis on interaction networks in health care systems.

Regional Cultures

Africa

171. Civilization of Sub-Saharan Africa. Lecture, three hours. Prerequisite: upper division standing or consent of instructor. Comprehensive overview of the sociocultural world of sub-Saharan Africa, interpreted as a broad cultural unit with its specific African configurations and as a plurality of civilizations, each based on a particular association of an environment (dry savanna, grassland, equatorial forest, highlands) with a dominant technique of acquisition/production (hunting/gathering, cereals growing, cattle herding, commercial crops, industry). Mr. Hammond

North America

172R. Cultures of the Pueblo Southwest. Lecture, three hours. Prerequisite: course 8 or 9 or upper division standing or consent of instructor. Survey of ethnographic and ethnohistorical research of Pueblo Indians (Hopi, Zuni, Tanoan, and Keresan) and their immediate neighbors. Basic information on history, languages, social organization, and traditional cultural systems of these groups. Mr. Kroskrity

M172T. Ethnohistory of Hispanic Cultures in the U.S. Southwest. (Same as Chicana and Chicano Studies M172T.) Lecture, three hours. Prerequisite: course 9 or consent of instructor. Ethnography of social and cultural adaptations of Hispanic peoples in the U.S. Southwest: their respective social organization, economic and political institutions, sacred and secular belief systems, and expressive cultures. P/NP (undergraduates), S/U (graduates), or letter grading.

Middle America

173Q. Latin American Communities. Overview of social and cultural anthropology of small communities in Latin America. Similarities and contrasts in social organization and interpersonal relations described in context of economic, political, and cultural environments. Mr. Johnson

South America

174P. Ethnography of South American Indians. Introduction to ethnography of South American Indians, with special emphasis on Lowland South America. Survey of history and development of man and society in this world area and examination of exemplary cultures symptomatic of various levels of cultural achievement.

174Q. Ethnology of South American Indians. Prerequisite: course 174P or consent of instructor. Introduction to ethnology of South American Indians, with special emphasis on Lowland South America. Methods and theories applied to study of man and culture on the subcontinent, including biological anthropology, linguistics, and sociocultural anthropology.

Asia

175P. Civilizations and Cultures of Southeast Asia. Introduction to understanding and appreciation of the peoples, cultures, and societies of the Philippines, Indonesia, Malaysia, Thailand, Burma, Laos, Cambodia, and Vietnam seen against their historical and ecological backgrounds. Use of slides and other media along with texts, lectures, and discussion. Mr. Moerman

175Q. Civilizations of South Asia. Examination of civilizations of Sri Lanka, India, Pakistan, Bangladesh, and the Himalayan states. Ideational systems, social institutions, and techniques of production discussed in the framework of a few contemporary civilizations, each focused on a major religious tradition (Hinduism, Buddhism, and Islam). Ms. Levine

175R. Civilizations of Inner Asia. Overview of culture and society among the diverse peoples of Inner Asia, including Mongolia, Tibet, and Soviet Central Asia. Topics include environment and economic adaptation, politics in traditional isolation and within the framework of recent national integration, kinship, forms of marriage and status of women, religion and the social order in Hindu/Buddhist culture contact zone, and current problems of modernization. Ms. Levine

175T. Civilizations of East Asia. Lecture, three hours. General anthropological introduction to the closely linked civilizations of China, Korea, and Japan, providing a comparative analysis of fundamental institutions such as family, state, and religion and assessing effects of urbanization and industrialization. Ms. Bray

175U. Cultures of the Indonesian Archipelago. Lecture, three hours. Prerequisite: course 9 or consent of instructor. Introduction to past and contemporary civilizations and cultures of Indonesia, including Javanese, Balinese, Toraja, Dayak, and Minangkabau. Geographical, ecological, and historical overview with examination of such topics as religious and political ideas and institutions, art, symbolism and ritual, illness and healing, and psychological issues and themes.

Pacific

177. Cultures of the Pacific. Four major culture areas of Australia, Melanesia, Polynesia, and Micronesia. General geographical features, prehistory, and language distribution of the whole region. Distinctive sociocultural features of each culture area presented in context of their adaptive significance.

Mr. Newman

History, Theory, and Method

182. History of Anthropology. Brief survey of development of Western social science, particularly anthropology, from Greek and Roman thought to emergence of evolutionary theory and concept of culture in the late 19th century. "Root paradigm" of Western social science and its influence on such notables as Durkheim, Freud, Hall, Lombroso, Marx, Piaget, Terman, and others. Consideration of how this influences ethnocentrism and Eurocentrism, sexism, racism, perception of deviance, and our view of culture in general.

183. History of Archaeology. Prerequisite: at least one upper division archaeology course or consent of instructor. Development of world archaeology from the Renaissance to the present, stressing how each of the major branches of archaeology has evolved a special character determined by peculiarities of its own data, methods, and intellectual affiliation.

Mr. Sackett

184. History of Human Evolutionary Theory. The men, events, and spirit of the time which mark man's attempts to understand his origins and diversity.

186A. Quantitative Methods in Anthropology. (Not the same as course 186A prior to Fall Quarter 1989.) Lecture, three hours; discussion, one hour. Prerequisite: course 80 or equivalent. Methods of quantitative data analysis. Topics to be selected from linear regression analysis (univariate and multivariate), principal component analysis, discriminant analysis, cluster analysis, nonparametric tests, and log-linear models. Emphasis on computer-based applications of data analysis techniques.

Mr. Read

186B. Models and Modeling in Anthropology. Prerequisite: upper division standing. Recommended: course 186A or consent of instructor. Modeling from both individual and social structure viewpoints. Introduction to four groups of models, along with ethnographic examples — decision tree models, indifference curve and marginal cost models, adaptation and learning models, and information diffusion models.

Mr. Read

186P. Models of Cultural Evolution. Lecture, two hours; discussion, one hour. Prerequisite: course 9 or 10 or equivalent. Introduction to Darwinian models of cultural evolution. How organic evolution has shaped the capacity for culture. How processes of cultural transmission and modification explain cultural variation in space and time. P/NP or letter grading.

Mr. Boyd

M189A-M189B. Theoretical Behavioral Ecology. (Same as Biology M189A-M189B.) Lecture, three hours. Prerequisites: one upper division introduction to behavioral ecology course, one university-level mathematics course (preferably calculus or probability and statistics). Course M189A or consent of instructor is prerequisite to M189B. Students expected to do simple algebra, elementary calculus, and probability. A rich body of mathematical theory describing the evolution of animal behavior exists. Introduction to this body of theory at a pace and mathematical level that allows students to grasp this information. Within each area of theory (e.g., kin selection, optimal foraging theory, etc.), presentation of basic corpus of models so that students understand assumptions that underlie the models, and how main results are derived. Presentations supplemented by a survey of results printed in the literature, especially those derived using more advanced methods.

Mr. Boyd

Special Studies

C191. Writing for Anthropology. (Formerly numbered 191.) Lecture, three hours. Prerequisite: course 9. Teaching of writing skills in various academic forms, including term papers, essay examinations, journal articles, and reports. Class projects require student writing and evaluation of professional writing. Emphasis on organization and presentation of a scholarly argument. Concurrently scheduled with course C291.

Mr. Earle, Ms. Levine

197H. Departmental Honors Seminar. Seminar, three hours. Prerequisites: junior standing, consent of instructor. Five discussion segments dealing with major debates, questions, and issues in each departmental field (archaeological, biological, linguistic, and sociocultural). Discussion each week in seminar format of readings on a major topic.

197K-197Z. Selected Topics in Anthropology (2 to 4 units each). Lecture or seminar, three hours. Study of selected topics of anthropological interest taught by resident and visiting faculty members. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit with consent of instructor. P/NP or letter grading.

199. Special Studies in Anthropology (2 to 8 units). Prerequisite: consent of instructor. Eight units may be applied toward upper division anthropology courses required for the major.

199HA. Directed Studies for Honors. Discussion, three hours. Prerequisite: anthropology honors program standing. Discussion meetings with adviser to help define research and preparation for the project. Extensive reading and research in the field of proposed honors thesis. Project often involves summer fieldwork. In Progress grading (credit to be given only on completion of course 199HC).

(Sp)

199HB. Directed Studies for Honors. Prerequisites: course 199HA, anthropology honors program standing. Must be taken in Fall Quarter of senior year. Continued reading and research directed toward analysis and presentation of data in a draft of honors thesis (no more than 30 pages). In Progress grading (credit to be given only on completion of course 199HC).

(F)

199HC. Directed Studies for Honors. Prerequisites: courses 199HA, 199HB, anthropology honors program standing. Preparation of final version of honors thesis (no more than 30 pages) that argues a central thesis of anthropological relevance. Must be submitted by last day of class in Winter Quarter of senior year.

(W)

Graduate Courses

Admission to all graduate courses is subject to consent of instructor and completion of appropriate course requirements (when so indicated). Graduate courses are normally non-repetitive in content but may be repeated for credit with consent of instructor and graduate counselor.

M201A-M201B. Graduate Core Seminars: Archaeology (6 units each). (Formerly numbered M219A-M219B.) (Same as Archaeology M201A-M201B.) Seminar, three hours. Required of anthropology students in archaeology field. Seminar discussions based on carefully selected list of 30 to 40 major archaeology works. These core seminars provide students with foundation in breadth of knowledge required of a professional archaeologist. Archaeological historiography, survey of world archaeology, and archaeological techniques. Emphasis on appreciation of the multidisciplinary background of modern archaeology and relevant interpretative strategies. May be repeated for credit with consent of adviser.

202. Biological Anthropology Colloquium. (Formerly numbered 226.) Seminar, three hours. Selected topics on status of current research in biological anthropology. May be repeated for credit. S/U or letter grading.

203. Core Seminar: Sociocultural Anthropology. Seminar, three hours. Prerequisites: two courses from 130, 135A, 150, or equivalent, or consent of instructor. Essential concepts, theories, and methodologies of sociocultural anthropology. Reading of and critical discussion on a body of significant literature.

204. Core Seminar: Linguistic Anthropology. (Formerly numbered 240.) Seminar, three hours. Prerequisite: consent of instructor. Theoretical and methodological foundations of study of language structure and language use from a sociocultural perspective. Discussion of linguistic, philosophical, psychological, and anthropological contributions to understanding of verbal communication as a social activity embedded in culture.

Mr. Duranti, Mr. Kroskrity

Archaeology

210. Analytical Methods in Archaeological Studies. Prerequisites: one term of statistics, consent of instructor. Data analysis procedures in archaeology. Emphasis on conceptual framework for analysis of archaeological data, beginning at level of the attribute and ending at level of the region.

Mr. Read

211. Regional Analysis in Archaeology. Prerequisite: consent of instructor. Course 210 is not prerequisite to 211. Survey of analytical methods used in archaeology to study prehistoric settlement systems. Specific issues include settlement distribution with respect to natural resources, settlement hierarchy, and patterns of exchange.

Mr. Earle

212P. Selected Topics in Hunter/Gatherer Archaeology. Prerequisite: consent of instructor. Regional studies in development of early human culture. May be repeated for credit.

Ms. Arnold

212Q. Problems in Southwestern Archaeology. Prerequisite: consent of instructor. Consideration of prehistoric cultural systems in the American Southwest, with emphasis on description and explanation of organizational variability and change. Specific research questions vary with each course offering. May be repeated for credit.

Mr. Hill

212R. Problems in Oceanic Archaeology. Lecture, three hours. Prerequisite: consent of instructor. Prehistory of Oceania. Content may vary, but problems considered include history and process of island occupation, island adaptation, and evolution of social stratification. May be repeated for credit.

Mr. Earle

M212S. Special Topics in Archaeology (6 units). (Same as Archaeology M205.) Lecture, three hours. Prerequisite: graduate standing in archaeology or in other departments. Open to undergraduates with consent of instructor. Special advanced topics in archaeology such as new strategies, methodologies, excavation projects, regional synthesis, or comparisons on a worldwide basis, including current work by core faculty of the program and special visitors.

213. Selected Topics in Old World Archaeology. Seminar, three hours. Prerequisite: consent of instructor. May be repeated for credit.

Mr. Sackett

214. Selected Topics in Prehistoric Civilizations of the New World. Prerequisite: consent of instructor. Mesoamerican and Andean civilizations normally constitute major focus of seminar. May be repeated for credit.

Mr. Donnan

215. Field Training in Archaeology (4 to 8 units). Prerequisite: prior experience in archaeology. Advanced training in archaeological excavation techniques, including organization of projects, supervision of field crews, methodology of field recording, and preliminary analysis of field data. May be repeated for credit.

M216. Dating Techniques in Environmental Sciences and Archaeology. (Same as Geography M278.) Lecture, three hours. Prerequisite: consent of instructor. Colloquium devoted to topics in dating techniques in environmental sciences, archaeology, and biological anthropology, as well as laboratory instruction and experimental work. May be repeated for credit. Mr. Berger

217. Explanation of Societal Change. Prerequisite: consent of instructor. Examination of processes of societal evolution, emphasizing usefulness of a variety of explanatory models from general systems theory, ecology, anthropology, and other sources. Specific research questions vary with each course offering. May be repeated for credit. Mr. Hill

218. Style and Ethnicity. Seminar, three hours. Prerequisite: consent of instructor. How stylistic variation in material culture informs on and mediates the shape, boundaries, and interrelations of ethnic groups. Aimed primarily toward archaeologists and ethnographers, seminar also welcomes students specifically interested in either material culture or style as such. Mr. Sackett

219. Complex Hunters/Gatherers in Theoretical Perspective. Seminar, three hours. Prerequisite: consent of instructor. Examination of economic, political, and social foundations of complex hunter/gatherer societies, with focus on theory of emergence of complex cultural organization and recognition of complex middle-range societies in the archaeological record. Role of craft specialization in cultural evolution. S/U or letter grading. Ms. Arnold

Biological Anthropology

220. Current Problems in Biological Anthropology. Seminar, three hours. Prerequisite: consent of instructor. Detailed examination of current research in biological anthropology (specific topics to be announced). Emphasis on nature of hypotheses and their testing in ongoing student and faculty research. May be repeated for credit.

221A-221B. Fossil Evidence for Human Evolution. Prerequisite: consent of instructor. Examination and analysis of fossil evidence for man's evolution. Ms. Kennedy

222P. Population Genetics of Man. Lecture, three hours. Prerequisite: consent of instructor. Introductory course in statistics. Study of population concepts, probability, conditions of gene frequency equilibria, and factors causing gene frequency change.

222Q. Probability Models and Statistical Methods in Genetics. Lecture, three hours. Prerequisites: course 222P, Mathematics 3A, two terms of statistics, graduate standing. Introduction to probability models and statistical methods in genetics. Maximum likelihood methods for estimated genetic parameters introduced and discussed in detail. Mr. Read (W)

223P. Biology and Ecology of Foraging Peoples. Prerequisite: consent of instructor. Detailed discussions of topical issues in study of foraging societies, including perspectives of cultural ecology and ethnoarchaeology. Primary emphasis on theoretical and practical topics in human ecology and biology, including health and nutrition, growth and development, life history variables, foraging, and sex differences. Mr. Bailey

C226P. Introduction to Field Methods in Human Ecology. Lecture, three hours. Prerequisite: upper division or graduate standing. Survey of methods used in anthropological investigations emphasizing human biology and human ecology. Study design, physical assessment of nutritional status, growth and maturation, demographic surveys, systematic observation of behavior, energy expenditure, subsistence ecology, data analysis. Demonstrations and labs. Course fee required. Concurrently scheduled with course C126P. Mr. Bailey, Ms. Peacock

228. Primate Paleobiology. Lecture, 90 minutes; laboratory, 90 minutes. Prerequisite: course 121A or 127P or consent of instructor. Examination of how the biology of fossil primates can be reconstructed by comparative methods in primate anatomy. Emphasis on structure and function of modern primates and on quantitative methods for inferring diet, locomotion, body size, demography, and habitat of extinct primates. S/U or letter grading.

228P. Ecology of Human Reproduction. Seminar, three hours. Prerequisite: consent of instructor. Critical examination of current research concerning responsiveness of the human reproductive system to a variety of biobehavioral and ecological influences, including stress, exercise, nutrition, and disease. Influence of reproductive hormones on human behavior. Evolutionary and cross-cultural perspectives. S/U or letter grading. Ms. Peacock

M229A. Seminar: Human Behavioral Ecology. (Same as Education M281A and Psychiatry M279A.) Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Examination of predictive models from animal behavioral ecology used to study human diet and subsistence; settlement patterns and territoriality; sharing and helping; reproduction and mortality. Comparison with other economic and ecological approaches in anthropology. Mr. Blurton Jones

M229B. Seminar: Reproduction, Families, and Parenting. (Same as Education M281B and Psychiatry M279B.) Prerequisite: consent of instructor. Guided forum for graduate students to discuss and broaden their studies of human reproduction and child rearing from varied viewpoints. Representation and debate of theories, questions, and methods from social and biological sciences. Mr. Blurton Jones

M229C. Seminar: Selected Topics in Human Ethnology. (Same as Education M281C and Psychiatry M279C.) Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Consideration of appropriateness and contributions of using animal behavior methodology in study of human behavior. Analysis: describing and recording behavior; causation; development, especially longitudinal studies; adaptation; evolutionary origins. Mr. Blurton Jones

Cultural Anthropology

230P. Ethnology. Prerequisite: consent of instructor. Seminar on ethnological method and theory concentrating on ideational systems. May be repeated for credit.

230Q. Cultural Anthropology. Prerequisite: consent of instructor. Special problems in cultural anthropology. May be repeated for credit. Mr. Goldschmidt

231. Asian Americans: Personality and Identity. Prerequisite: graduate standing. Effect of class, caste, and race on the Asian American personality within the framework of anthropological theories.

232Q. Myth and Ritual. Prerequisite: consent of instructor. Nature and function of myth and ritual in nonindustrialized societies. Associated value systems and philosophies examined as infrastructure of culture rather than as phenomena proposed by structuralist rationalism and cultural material empiricism. May be repeated for credit. Mr. Newman

M232R. South American Folklore and Mythology Studies. (Same as Folklore M257.) Prerequisite: course 174P or consent of instructor. Examination of oral traditions and related ethnological data from various South American Indian societies against the background of the religious systems of these people.

M232S. Ethnography of Humor. (Same as Folklore M214.) Lecture, three hours. Prerequisite: graduate standing in folklore and mythology or anthropology. Examination and analysis of selected humorous expressions and events in cross-cultural perspective, with emphasis on major psychological and sociocultural approaches to their study and interpretation.

232T. Person, Self, and Identity in Contemporary Anthropology. Seminar, three hours. Prerequisite: graduate standing or consent of instructor. Survey of anthropological literature on person, self, and identity. Conceptual and theoretical relationships among these terms and their use in contemporary ethnography. S/U or letter grading. Mr. Hollan

232V. Current Issues in Ethnography. Seminar, three hours. Prerequisite: graduate standing or consent of instructor. S/U or letter grading. Mr. Newman

233P. Symbolic Anthropology. Prerequisite: course 133R or consent of instructor. Nature of symbolic relations (as distinguished from other referential ones), significance of symbolic systems (in terms of action, cognition, affectivity, contemplation), symbolic and isomorphic logic (as opposed to the causal one) are among questions to be selected for analysis and discussion. May be repeated for credit. S/U or letter grading.

233Q. Aesthetic Anthropology. Prerequisite: course 133R or consent of instructor. Selected questions concerning visual aesthetic phenomena in their relationships with the sociocultural context examined in depth. May be repeated for credit.

M234. Seminar: Psychocultural Studies. (Formerly numbered M234A-M234B.) (Same as Psychiatry M210.) Seminar, three hours. Devoted to present state of research in psychocultural studies. Survey of work in child development and socialization, personality, psychobiology, transcultural psychiatry, deviance, learning, perception, cognition, and psychocultural perspectives on change. Mr. Edgerton

M234P. Transcultural Psychiatry. (Same as Psychiatry M222.) Lecture, three hours. Prerequisite: consent of instructor. Consideration of psychiatric topics in cross-cultural perspective, such as studies of drug use, deviance, suicide, homicide, behavioral disorders, "culture specific" syndromes, non-Western psychiatries, and questions of "sick" societies. May be repeated for credit. Mr. Kennedy

M234Q. Psychological Anthropology. (Same as Psychiatry M272.) Lecture, three hours. Prerequisite: consent of instructor. Various psychological issues in anthropology, both theoretical and methodological. Areas of interest include such things as culture and theory, culture and personality, and culture psychiatry. Discussion of questions relating to symbolic and unconsciousness process as they relate to culture. Topics vary from term to term. May be repeated for credit. Mr. Edgerton

M234R. Sociocultural Perspectives on Mental Retardation. (Same as Psychiatry M211.) Lecture, three hours. Prerequisite: consent of instructor. Exploration of concepts such as "intelligence," "competence," and "adaptive behavior" in varying non-Western societies as background to study of the phenomenon of mental retardation in the West, particularly the U.S. Topics include cross-cultural perspectives, history of institutional confinement, policies of deinstitutionalization and normalization, and current issues involving adaptation and "quality of life." Discussion of topics such as communicative competence, work, crime, deviance, sexuality, and marriage. May be repeated for credit. Mr. Edgerton

M235A-M235B. The Individual in Culture. (Same as Psychiatry M213A-M213B.) Lecture, three hours. Course M235A is prerequisite to M235B. In Progress grading.

M236P. Cross-Cultural Studies of Socialization and Children. (Same as Psychiatry M214.) Seminar, three hours. Selected topics in cross-cultural study of socialization and child training. Methods, ethnographic data, and theoretical orientations. Emphasis on current research. Mr. Weisner

M236Q. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (Same as Education M222A, Psychiatry M235, and Psychology M295.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some uses of observations and their implications for research in social sciences. Students expected to integrate observational work into their current research interests. Mr. Levine, Mr. Weisner (W)

M237A-M237B. Basic Core Courses: Mental Retardation Research (2 units each). (Same as Psychiatry M219A-M219B.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Required of all MRRC trainees. Systematic overview of mental retardation and sciences basic to this field of study. Language, methods, aims, and contributions of various disciplines that contribute to the field. Last two weeks of second term are spent discussing and preparing multidisciplinary research designs with potential for prevention or amelioration of mental retardation. S/U grading. Mr. Buchwald, Mr. Edgerton

239P. Selected Topics in Field Ethnography (4 to 8 units). Seminar, three hours. Prerequisite: consent of instructor. Discussion and practicum in various techniques for collecting and analyzing ethnographic field data. S/U or letter grading.

Linguistic Anthropology

M241. Topics in Linguistic Anthropology. (Same as Linguistics M246C.) Prerequisite: consent of instructor. Problems in relations of language, culture, and society. May be repeated for credit.

242. Ethnography of Communication. Prerequisite: graduate standing or consent of instructor. Seminar devoted to examining representative scholarship from fields of sociolinguistics and ethnography of communication. Particular attention to theoretical developments including relationship of ethnography of communication to such disciplines as anthropology, linguistics, and sociology. Topical foci include style and strategy, speech variation, varieties of noncasual speech genres, languages and ethnicity, and non-verbal communication behavior. Mr. Duranti, Mr. Kroskirty

243P. American Indian Ethnolinguistics and Sociolinguistics. Prerequisites: prior coursework in either anthropology, linguistics, or American Indian studies, consent of instructor. Social and cultural aspects of language use in Native North American speech communities. Specific foci include both micro-sociolinguistic topics (such as multilingualism, cultural differences regarding appropriate communicative behavior, and variation within speech communities) and macro-sociolinguistic topics (such as language contact, language change, and language in American Indian education). Graduate students conduct library and/or other research and participate in group discussion. Mr. Kroskirty

M243Q. Afro-American Sociolinguistics: Black English. (Formerly numbered CM243Q.) (Same as Afro-American Studies M200D.) Lecture, three hours. Prerequisite: consent of instructor. Basic information on Black American English, an important minority dialect in the U.S. Social implications of minority dialects examined from perspectives of their genesis, maintenance, and social functions. General problems and issues in fields of sociolinguistics examined through a case study approach. Students required to conduct research in consultation with instructor and participate in group discussion. Ms. Morgan

245. Linguistic and Intracultural Variation. Prerequisite: consent of instructor. Problem of variation as it impinges on disciplines of anthropology and linguistics. Among objectives of course are the following: to acknowledge importance of speech variation in anthropological linguistics research, to critically assess a broad and representative sample of modern scholarship devoted to study of intra-individual and inter-individual variation, and to evaluate utility and potential applicability of recent linguistic models to anthropological linguistics and anthropological theory. Mr. Kroskirty

246. Research Design and Field Training in Linguistic Anthropology. Prerequisite: consent of instructor. Supervised collection of linguistic information in the field. Students spend full time in the field for most of term. May be repeated for credit. S/U or letter grading. Mr. Duranti, Mr. Kroskirty

247. Analysis of Linguistic Field Data. Seminar, three hours. Prerequisite: course 202 or 242 or 246 or consent of instructor. Supervised analysis of linguistic field data by students who have participated in a related field training course. Students work with their own as well as general project data in preparation of articles for professional journals. May be repeated for credit. S/U or letter grading. Mr. Duranti, Mr. Kroskirty

248. Practicum in a Field Language (4 to 8 units). Prerequisite: consent of instructor. Intensive training in an indigenous language as preparation for work in the field. Mr. Duranti, Mr. Kroskirty

249. Social Interaction. (Formerly numbered 257.) Prerequisite: consent of instructor. Emphasis on issues for ethnographic theory and practice raised by developments in anthropological, sociological, psychological, linguistic, and ethnological contributions to our understanding of organization of face-to-face behavior. May be repeated for credit. Mr. Moerman

Social Anthropology

250. Selected Topics in Social Anthropology. Seminar, three hours. Prerequisite: consent of instructor. Intensive examination of current theoretical views and literature. S/U or letter grading. Ms. Levine

251P. Cultural Ecology. Prerequisite: consent of instructor. May be repeated for credit. Mr. Earle

252P. Comparative Systems of Social Inequality. Seminar, three hours. Examination in historical and contemporary perspective of particular systems of structured social inequality based on rank, class, caste, ethnicity, gender, age, sexual preference, handicap, etc., to develop a unified theory of social inequality. Examples from Asian, Pacific, European, African, and American cultures. S/U or letter grading. Mr. Hammond

253. Economic Anthropology. Prerequisite: consent of instructor. May be repeated for credit.

253P. Technology and Economy. Seminar, three hours. Prerequisite: consent of instructor. Analysis of technological systems and patterns of technical evolution in context of corresponding social and economic change (e.g., in labor organization, kinship, property rights), using examples mainly from Asian peasant societies, past and present. S/U or letter grading. Ms. Bray

254. Kinship. Prerequisite: consent of instructor. May be repeated for credit. Ms. Levine

255. Comparative Political Institutions. Prerequisite: consent of instructor. May be repeated for credit.

Applied Anthropology

260. Urban Anthropology. Prerequisite: course 167 or consent of instructor. Intensive anthropological examination of the urban setting as a human environment. S/U or letter grading.

261Q. Issues in Applied Anthropology. Seminar, three hours. Use of seminar format to explore selected domestic and international problems from applied anthropological perspective. Consideration of history of applied anthropology, ethics, and careers strategies. Mr. Hammond

M262P. Culture and Human Reproduction. (Same as Community Health Sciences M240.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Exploration of human behavior related to reproduction. Cross-cultural exploration of biological and behavioral factors, with particular reference to human adaptation. Ms. Scrimshaw

263P. Gender Systems. Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Current theoretical developments in understanding gender systems cross-culturally, with emphasis on relationship between systems of gender, economy, ideational systems, and social inequality. Selection of ethnographic cases from recent literature. S/U or letter grading. Ms. Levine, Ms. Sacks

M263Q. Advanced Seminar: Medical Anthropology. (Same as Community Health Sciences M244, Nursing M273, and Psychiatry M273.) Seminar, three hours. Prerequisite: consent of instructor. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works. Ms. Browner, Ms. Scrimshaw (Sp)

263R. Medicine in Chinese Culture. Seminar, three hours. Prerequisite: consent of instructor. Use of the rich historical material and anthropological studies of Chinese medicine to analyze social and symbolic complementarity of different therapeutic systems and current attempts at syncretization with Western biomedicine. S/U or letter grading. Ms. Bray

265. Public Archaeology. Prerequisite: consent of instructor. Archaeology as part of the national heritage, both in the U.S. and other countries. Legal, ethical, cultural, and scholarly aspects of salvage and contact archaeology. Designed for researchers and managers of cultural resources.

M266. Medical Anthropology in Public Health. (Same as Community Health Sciences M232, Nursing M250, and Psychiatry M250.) Seminar, three hours. Cross-cultural aspects of human behavior as they relate to perception, treatment, incidence, and prevalence of disease and illness. Ms. Browner, Ms. Scrimshaw

M267B-M267C. Ethnographic Film Direction (4 or 8 units each). (Same as Film and Television M265A-M265B.) Lecture, four hours; laboratory, to be arranged. Prerequisites: course M288, graduate standing, consent of instructor. Further consideration of methods and criteria for use of film as a medium for preservation and communication of human cultures. Production of films and videotapes on topics selected by students. Mr. Boehm, Mr. Hawkins, Mr. Moerman (W, M267B; Sp, M267C)

M269. Contemporary Issues of the American Indian. (Same as American Indian Studies M200C and Sociology M275.) Introduction to most important issues facing American Indians as individuals, communities, tribes, and organizations in the contemporary world, building on historical background presented in American Indian Studies M200A and cultural and expressive experience of American Indians presented in American Indian Studies M200B. Mr. Champagne

M269P. Seminar: Reproduction and Women's Health. (Same as Community Health Sciences M241, Nursing M280, and Psychiatry M280.) Seminar, three hours. Analysis, using a cross-cultural approach, of sociocultural and political economic factors that affect reproduction and women's health. Topics include relationships between women's domestic and extra-domestic roles and their health, and impact of new reproductive technologies. May be repeated for credit. Ms. Browner

Regional Cultures

M272. Indians of South America. (Same as Latin American Studies M250A.) Lecture, three hours. Prerequisite: consent of instructor. Survey of literature and research topics related to Indian cultures of South America. May be repeated for credit.

273. Cultures of the Middle East. Seminar, three hours. Prerequisite: consent of instructor. Survey of literature and problems of various cultures of the Middle East.

274. Cultures of the Pacific Islands. Prerequisite: consent of instructor. Topics in contemporary sociocultural anthropology and classic ethnography of Melanesia, Polynesia, and Micronesia. May be repeated for credit. Mr. Newman

276. Cultures of Southeast Asia. Prerequisite: consent of instructor. Discussion of recent and current anthropological research in Southeast Asia. Depending on their level of preparation, students produce a topical annotated bibliography, critique, or proposal for research. S/U or letter grading. Mr. Moerman

277. Aspects of Chinese Society. Seminar, three hours. Prerequisite: consent of instructor. Anthropological perspective on historical evolution of and contemporary changes in such key institutions of Chinese society as family, lineage, and associations, setting individuals and groups in the larger political, economic, and class framework of society and state. S/U or letter grading. Ms. Bray

History, Theory, and Method

281. Selected Topics in History of Anthropology. Prerequisite: consent of instructor. Particular problems in history of anthropology as dictated by interests of students and faculty. May be repeated for credit.

282. Research Design in Cultural Anthropology. Prerequisite: consent of instructor. Primarily intended for graduate students preparing for fieldwork. Unique position of anthropology among the sciences and resulting problems for scientific research design. Review of typical research problems and appropriate methods. Students prepare their own research designs and present them for class discussion. Mr. Johnson

283. Formal Methods of Data Analysis in Anthropology. Seminar, three hours. Prerequisite: consent of instructor. Current topics and issues related to formal analysis of data and representation of cultural constructs: formal models of kinship terminologies, structural models of cognitive systems, graph theoretic models of networks, models of decision making, hierarchical information systems, stability in complex adaptive systems. S/U or letter grading. Mr. Read

M284. Qualitative Research Methodology. (Same as Community Health Sciences M216.) Discussion, three hours; laboratory, one hour. Prerequisite: consent of instructor. Intensive seminar/field course in qualitative research methodology. Emphasis on using qualitative methods and techniques in research and evaluation related to health care. Ms. Scrimshaw

285. Schools, Domains, and Strategies in World Archaeology. Seminar, three hours. Prerequisite: consent of instructor. Comparative examination of schools of world archaeology, contrasting their respective data bases, research strategies, and relations to allied intellectual disciplines. Archaeologists from all departments are welcome, as are students interested in history or philosophy of science. Mr. Sackett

285P. Selected Topics in Anthropological/Archaeological Theory. Seminar, three hours. Prerequisites: graduate standing and/or consent of instructor. Variable topics course on important theoretical subjects in anthropology and archaeology. May be repeated for credit. S/U or letter grading. Mr. Leventhal

286P. Selected Topics in Computer Simulation and Modeling. Seminar, three hours. Prerequisite: course 186A or consent of instructor. Applications of computer simulations and/or models to specific problem areas of interest to anthropologists. Problem areas rotate with each offering and include cognitive ecological, demographic evolutionary, and other theoretical foci. S/U or letter grading. Mr. Read

287. Poststructural Theories. Seminar, three hours. Prerequisites: graduate standing, consent of instructor. Examination of development and application of poststructural theories in anthropology by exploring interdisciplinary connections, especially as they concern the concept of culture, narrative, ethnographic writing, reflexivity, politics of representation, historicity, and study of the self, identity, and the body. S/U or letter grading.

M288. Ethnographic Film. (Formerly numbered M247A.) (Same as Film and Television M209C.) Prerequisites: graduate standing, consent of instructor. Seminar on uses of film in ethnography and production course in which anthropologists, other social scientists, and humanists learn how to make films that are useful for their disciplines. Cameras and editing facilities provided. Mr. Boehm, Mr. Hawkins, Mr. Moerman (F)

M289. Computer Methodologies in Latin American Studies and Anthropology. (Same as Latin American Studies M225.) Lecture, three hours. Prerequisite: consent of instructor. Basic principles of computing and information processing, along with their potential application in Latin American research. Examination of impact that computers are having in Latin American society. Mr. Behrens

C291. Writing for Anthropology. Lecture, three hours. Prerequisite: consent of instructor. Teaching of writing skills in various academic forms, including term papers, essay examinations, journal articles, and reports. Class projects require student writing and evaluation of professional writing. Emphasis on organization and presentation of a scholarly argument. Concurrently scheduled with course C191. Graduate students expected to prepare a higher level of the scholarly research paper. S/U or letter grading. Mr. Earle, Ms. Levine

292. Making Oral Presentations. Lecture/student presentations, two hours; discussion, one hour. Prerequisite: graduate standing or consent of instructor. How to organize and present seminar reports, papers at scholarly conferences, and lectures to professional audiences. Opportunity for students to develop their speaking skills through actual practice in workshop atmosphere of mutual support and constructive criticism. S/U grading. Mr. Sackett

Special Studies

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching Anthropology (2 to 4 units). Seminar/workshop, three hours. Prerequisite: graduate standing. Required of all new teaching assistants. Workshop and seminar in teaching techniques, including evaluation of each student's own performance as a teaching assistant. Four-day workshop precedes beginning of term, followed by 10-week seminar during term designed to deal with problems and techniques of teaching anthropology. Unit credit may be applied toward full-time equivalence but not toward nine-course requirement for M.A. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Individual Studies for Graduate Students (2 to 8 units). Prerequisite: consent of instructor. Directed individual studies. S/U or letter grading.

597. Preparation for Ph.D. Qualifying Examinations (2 to 12 units).

598. Research for and Preparation of M.A. Thesis (2 to 8 units). Prerequisite: consent of instructor (faculty adviser). Preparation of research data and writing of M.A. thesis. S/U grading.

599. Research for Ph.D. Dissertation (2 to 12 units). Prerequisite: consent of instructor. Ph.D. dissertation research or writing. Students must have completed qualifying examinations and ordinarily take no other coursework.

Applied Linguistics (Interdepartmental)

Hilda J. Koopman, Ph.D. (*Linguistics*)
Dominique L. Sportiche, Ph.D. (*Linguistics*)
Edward P. Stabler, Ph.D. (*Linguistics*)
Donca Steriade, Ph.D. (*Linguistics*)
Timothy A. Stowell, Ph.D. (*Linguistics*)

Assistant Professor

Asif Agha, Ph.D. (*Teaching English as a Second Language and Applied Linguistics*)

Lecturers

Donna Brinton, M.A. (*Teaching English as a Second Language and Applied Linguistics*)
Janet Goodwin, M.A. (*Teaching English as a Second Language and Applied Linguistics; Luckman Distinguished Teaching Award*)
Christine Holten, M.A. (*Teaching English as a Second Language and Applied Linguistics*)
Linda Jensen, M.A. (*Teaching English as a Second Language and Applied Linguistics*)

Adjunct Professor

Ian Maddieson, Ph.D. (*Linguistics*)

Adjunct Assistant Professor

Brian K. Lynch, Ph.D. (*Teaching English as a Second Language and Applied Linguistics*)

Scope and Objectives

Since language permeates every aspect of our social, economic, political, and academic pursuits, it is small wonder that we have deep abiding curiosity about its origin, its use, and its acquisition. The UCLA doctoral program in applied linguistics provides a rich and supportive environment for graduate students and faculty to define and resolve questions that satisfy that curiosity.

The combined faculties of the Department of Teaching English as a Second Language and Applied Linguistics and the Department of Linguistics, as well as professors in Psychology, Sociology, and Education, represent a wide range of expertise and experience in language-related research. Their guidance and collaboration with students as they apply relevant elements of linguistics, psycholinguistics, and sociolinguistics result in substantial research findings in the areas of discourse/grammar analysis, language acquisition, and language assessment. Graduates of the program are well prepared to pursue academic and professional careers at the highest level of service and inquiry.

Ph.D. Degree

Admission

The basic requirement for admission is completion of the UCLA Master of Arts degree in Teaching English as a Second Language (TESL) or in Linguistics or the equivalent of one of these. Applicants with a graduate degree in TESL, linguistics, applied linguistics, psycholinguistics, or sociolinguistics from another recognized institution may be admitted provided they then make up the courses in one or the other of the two UCLA M.A. programs whose equivalents they have not yet taken. Students with graduate degrees in other related disciplines (such as a foreign language, English, education, psychology, sociology, or anthropology) are advised to complete the UCLA M.A. in Linguistics or TESL before seeking admission to the Ph.D. program.

Prospective candidates are required to submit (1) a statement of purpose describing their research background and the type of dissertation they hope to prepare, (2) three letters of recommendation from professors who are well acquainted with their academic background, (3) their M.A. thesis or related research papers, and (4) Graduate Record Examination (GRE) scores; international applicants should also submit their Test of English as a Foreign Language (TOEFL) scores. The admissions committee considers all of the above criteria, as well as undergraduate and graduate grade-point averages, in decisions on program applicants.

Applications for admission to Fall Quarter should reach UCLA Graduate Application Processing by the preceding December 15; the supporting materials should reach the Applied

Linguistics Program (3300A Rolfe Hall, UCLA, Los Angeles, CA 90024-1531) no later than January 15.

Major Fields and Specializations

Three areas of specialization are available: discourse/grammar analysis, language acquisition, and language assessment. For details on each specialization, contact the program office.

Foreign Language Requirement

Before advancement to candidacy, you must demonstrate proficiency in one foreign language. If your native language is English, you may fulfill the requirement by one of the following methods: (1) a reading examination, (2) a research paper based on extensive sources in the language, (3) a conversation examination showing knowledge in depth, or (4) a score of 550 or better on the Graduate School Foreign Language Test (GSFLT). If your native language is not English, you may use English to fulfill the requirement. In consultation with the interdepartmental committee, you must select the most appropriate means of fulfilling the requirement.

Course Requirements

In addition to fulfilling the general University requirements, candidates for the Ph.D. in Applied Linguistics must meet the program requirements listed below. All courses taken to fulfill breadth and specialization requirements must be approved each term by your faculty adviser.

Basic Preparation — Any of the following courses not already taken must be completed as early as possible and before advancement to candidacy for the degree. For basic preparation in linguistics, you can select a phonetics and phonology track, a syntax and semantics track, or a discourse analysis track. For all tracks, you must take Linguistics 120A and 120B. Students selecting the phonetics and phonology track would then take Linguistics 165A or 200A, followed by Linguistics 201 or 203 or 204. Students selecting the syntax and semantics track would take Linguistics 165B, and 200B or 215. Students selecting the discourse analysis track would take Teaching English as a Second Language and Applied Linguistics 283, followed by one course from Teaching English as a Second Language and Applied Linguistics 250, 252, Sociology C244A, C244B, Anthropology 204, or 242. For basic preparation in applied linguistics, you must take Teaching English as a Second Language and Applied Linguistics 241.

Units and Courses — As a breadth requirement, all candidates must take at least 32 units of graduate-level coursework (in the 200 or 500 series). These 32 units may not include courses taken while completing basic preparation courses, Linguistics 275, Teaching English as a Second Language and Applied Linguistics 400, or Applied Linguistics 597 or 599. No

more than eight of the 32 units may be in 596 courses. The 32 units must include eight units in one area outside your area of specialization.

Appropriate graduate courses taken at UCLA after completion of the M.A. but before admission to the doctoral program may be applied toward the 32-unit requirement for the Ph.D. Credit may be transferred for up to two courses taken at another institution, but only for graduate-level courses taken after completion of the M.A. and preferably taken within the framework of UCLA's Applied Linguistics 501.

Within Graduate Division limits, courses that may be taken on an S/U basis include undergraduate courses taken as prerequisites to needed graduate courses, undergraduate courses not required, reading courses in a foreign language, graduate courses taken in addition to the required 32 units, Applied Linguistics 501, 597, 599, Teaching English as a Second Language and Applied Linguistics 400, and Linguistics 275. All other courses must be taken for letter grades.

Research Papers

In lieu of a written qualifying examination, two original research papers of publishable quality in different areas of specialization are required. These may be revised or extended seminar papers but must be prepared after admission to the Ph.D. program. The topics of these papers are to be selected by the student, in consultation with appropriate faculty members and with consent of the Ph.D. program adviser. Each of the finished papers is evaluated by two faculty members.

The doctoral committee administers the University Oral Qualifying Examination before advancement to Ph.D. candidacy.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Dissertation/Final Oral Examination

All candidates are required to prepare a dissertation as a demonstration of their ability to carry out original research under the guidance of their doctoral committee. As the dissertation nears completion, you must make a public report on the results of your research. This may be done, at your choice, at a meeting of the colloquium of either the Department of Teaching English as a Second Language and Applied Linguistics or the Department of Linguistics. You must, therefore, enroll in either Teaching English as a Second Language and Applied Linguistics 400 or Linguistics 275 during the appropriate term. The public report determines whether a final oral examination is required.

Graduate Courses

- 501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA program adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading. (F,W,Sp)
- 596. Directed Individual Study (4 to 8 units).** Prerequisite: doctoral standing. Independent study in an area of applied linguistics. Up to eight units may be applied toward Ph.D. course requirements. May be repeated for credit. (F,W,Sp)
- 597. Preparation for Ph.D. Candidacy Examination (4 to 8 units).** Prerequisite: completion of at least six courses of the 32-unit requirement for Ph.D. May not be applied toward the 32-unit requirement. May be repeated for credit. S/U grading. (F,W,Sp)

- 599. Research for and Preparation of Ph.D. Dissertation (4 to 16 units).** Prerequisite: advancement to Ph.D. candidacy. Required of all Ph.D. candidates each term they are registered and engaged in dissertation preparation. May be repeated for credit but may not be applied toward Ph.D. course requirements. S/U grading. (F,W,Sp)

Applied Linguistics Course List

Discourse/Grammar Analysis

- English** 241. Studies in Structure of the English Language
- Linguistics** 201. Current Issues in Phonological Theory II
202. Survey of Current Issues in Language Change
203. Survey of Phonetic Theory
204. Survey of Experimental Phonetics
205. Survey of Current Issues in Morphological Theory
206. Linguistic Theory: Syntax II
207. Survey of Formal Semantics
- C209A, C209B. Natural Language Processing I, II
- 210A, 210B. Field Methods I, II
214. Survey of Current Syntactic Theories
215. Survey of Syntactic Typology
220. Linguistic Areas
225. Linguistic Structures
251. Topics in Phonetics and Phonology I: Proseminar
252. Topics in Syntax and Semantics I: Proseminar
253. Topics in Language Variation I: Proseminar
254. Topics in Linguistics I: Proseminar
- 256A, 256B. Topics in Phonetics and Phonology II: Proseminar
- 257A, 257B. Topics in Syntax and Semantics II: Proseminar
- 258A, 258B. Topics in Language Variation II: Proseminar
- 259A, 259B. Topics in Linguistics II: Proseminar
- 263A-263B-263C. Seminars: Language Variation (only one of these may be applied toward the 32-unit requirement)
- Teaching English as a Second Language and Applied Linguistics** 249. Current Issues in Language Analysis
250. Advanced Seminar: Cohesion Analysis of English Structure
252. Advanced Seminar: Contextual Analysis of English Structure
283. Discourse Analysis
289. Current Issues in Language Use

Additional Courses in Other Departments

- Anthropology** 204. Core Seminar: Linguistic Anthropology

- M234Q. Psychological Anthropology
242. Ethnography of Communication
245. Linguistic and Intracultural Variation
249. Social Interaction
- Dutch (Germanic Languages)** 234. Structure of Modern Standard Dutch
- Education** 204D. Minority Education in Cross-Cultural Perspective
- Sociology** C244A-C244B. Conversational Structures I, II
266. Selected Problems in Analysis of Conversation
267. Selected Problems in Communication
- Spanish (Spanish and Portuguese)** 209. Dialectology
- 256A-256B. Studies in Spanish Linguistics
257. Studies in Dialectology

Language Acquisition

- Linguistics** 213. Survey of Psycholinguistics
- C235. Theoretical Issues in Disorders of Language Development
254. Topics in Linguistics I: Proseminar
- 259A, 259B. Topics in Linguistics II: Proseminar
- 264A-264B-264C. Seminars: Special Topics in Linguistic Theory
- Teaching English as a Second Language and Applied Linguistics** 227. Experiential Seminar: Second Language Learning
251. Advanced Seminar: Interlanguage Analysis
260. Psycholinguistics and Language Teaching
261. Second Language Acquisition
269. Current Issues in Language Acquisition
271. Cross-Linguistic Topics in Second Language Acquisition

Additional Courses in Other Departments

- Education** 217D. Language Development and Education
- 227B. Research on Cognitive and Language Characteristics of Exceptional Individuals
- Psychiatry** 257A-257B-257C. Communication Disorders Associated with Developmental Disabilities and Psychiatric Disorders
- Psychology** 240A-240B. Developmental Psychology
- 242F. Seminar: Developmental Psychology — Development of Language and Communication
- 260A-260B-260C. Proseminars: Cognitive Psychology
262. Human Learning and Memory
263. Psycholinguistics
- 268D. Seminar: Human Information Processing — Language and Thought

Language Assessment

- Teaching English as a Second Language and Applied Linguistics** 209. Current Issues in Experimental Design and Statistics for Applied Linguistics
222. Language Testing for Teachers of English as a Second Language
225. Program Evaluation in Applied Linguistics
232. Advanced Seminar: Construction and Administration of Language Tests

Additional Courses in Other Departments

- Education** 200B. Survey Research Methods in Education
- 200C. Analysis of Survey Data in Education
202. Evaluation Theory
- 210A. Introduction to Research Design and Statistics
- 210B. Statistical Inference
- 210C. Analysis of Variance
- 210D. Multivariate Analysis
- 210E. Factor Analysis
- 211A. Measurement of Educational Achievement and Aptitude

- 211B. Measurement in Education: Underlying Theory
- 211C. Item Response Theory
- 218A. Multiple Regression Analysis
- 218B. Advanced Quantitative Models in Nonexperimental Research: Multilevel Analysis
- 218C. Structural Equation Modeling
- 218D. Analysis of Categorical and Other Nonnormal Data
219. Laboratory: Advanced Topics in Research Methodology
221. Computer Analyses of Empirical Data in Education
- 222C. Qualitative Data Reduction and Analysis
- 412A. Criterion-Referenced and Norm-Referenced Test Construction
- Psychology** 250A, 250B. Advanced Psychological Statistics
- 252A. Multivariate Analysis
253. Factor Analysis
- 254A. Psychological Scaling
- 254B. Cluster Analysis
255. Quantitative Aspects of Assessment
- M257. Multivariate Analysis with Latent Variables
259. Quantitative Methods in Cognitive Psychology

Archaeology (Interdepartmental)

A148 Fowler Building, (310) 825-4169

Professors

- C. Rainer Berger, Ph.D. (*Anthropology, Geography, Geophysics*)
- Francesca Bray, Ph.D. (*Anthropology*)
- Giorgio Buccellati, Ph.D. (*Ancient Near East, History*)
- Jesse L. Byock, Ph.D. (*Germanic Languages*)
- Elizabeth Carter, Ph.D. (*Near Eastern Languages and Cultures*)

 Richard Leventhal, Ph.D. (*Anthropology*)
 Sarah P. Morris, Ph.D. (*Classics*)
 Joseph F. Nagy, Ph.D. (*English, Folklore and Mythology*)

Assistant Professor

Jeanne Arnold, Ph.D., in Residence (*Anthropology*)

Scope and Objectives

The interdisciplinary program offers M.A. and Ph.D. degrees in Archaeology. It brings together interests and specialties represented by those departments offering courses in archaeology, as well as others offering courses relevant to archaeology. Qualified undergraduates may enroll in courses offered by the program provided they receive consent of the instructor.

The primary purpose of the program is to train scholars in archaeology for university-level teaching and research and other professional aims. Its resources are intended for those archaeology students whose academic goals cannot be met within any single department and who, consequently, require an individually designed plan of study combining academic preparation in two or more departments. Applications are especially encouraged from students whose interests may form bridges with disciplines and departments not offering archaeology (e.g., botany, geology, mathematics, statistics, zoology, etc.). There are opportunities for participation in a variety of field, laboratory, and computer studies on a worldwide scale.

Requirements for Graduate Degrees

Admission

Any undergraduate major may be considered for admission to the program although those applicants who have had little previous archaeological education may be admitted under probationary status and may be required to take a series of courses to make up deficiencies. A Graduate Record Examination (GRE) General Test report is required. The following application materials should be submitted directly to the chair of the program: an acceptable plan of study (including a statement of objectives, an outline of projected coursework, and a general indication of an M.A. paper or dissertation topic); three letters of recommendation; a research paper preferably relevant to archaeology or comparable evidence of scholarly work. Applicants are accepted for admission to Fall Quarter only. The program's "Study Guidelines" brochure will be sent to applicants on request to the Chair, Archaeology Program,

A148 Fowler Building, UCLA, Los Angeles, CA 90024-1526.

Major Fields or Subdisciplines

Africa; analysis of archaeological materials; ancient Near East; Andean South America; Caribbean; China and the Far East; classical Greece and Rome; dating techniques in archaeological sciences; Europe; India and Central Asia; Mesoamerica; Pacific; paleoenvironmental studies; Western North America.

Other areas of specialization are also available.

Fieldwork

No graduate degree is awarded until you have worked in the field and have demonstrated your competency to direct field research in archaeology. Both theoretical and practical knowledge of methods and techniques used in the field are necessary.

This requirement may be met in several ways. Ordinarily you take a regular UCLA field course such as Anthropology 115P, Archaeology 259, Ancient Near East 261, or History 276, or similar courses offered by other departments. Comparable courses offered by other institutions may also be accepted. An informal report, submitted by the director of an excavation, describing work performed by the students under supervision, may be sufficient. Excepting the four courses listed above, any given formula to fulfill the requirement must be cleared in advance with the chair of the program.

Master of Arts Degree

The structure of the M.A. program includes the successful completion, within seven academic terms, of fieldwork (described above) plus the following requirements.

Foreign Language Requirement

The ability to read at least one modern foreign language, relevant to your field of interest and approved by your adviser, is required for the M.A. You may meet this requirement by (1) passing the Graduate School Foreign Language Test (GSFLT) with a score of 550 or better, (2) completing the third course in an introductory, regular sequence of the selected language at UCLA with a minimum grade of A, or (3) taking a reading examination (in Spanish, French, or German) administered by the program.

The foreign language requirement must be completed by the end of your sixth term in residence, unless an earlier deadline is imposed by your adviser.

Course Requirements

A minimum of 42 units (at least nine courses, of which five must be graduate) taken for a letter grade are required, to be distributed as follows: a minimum of five courses (26 units) in the 200 and 500 series, including Archaeology 200 (six

units), M201A-M201B (six units each), and two elective graduate courses*, one of which may be course 596. Course 596 (letter-graded) may be taken twice for a maximum of 12 units, but only six units may be applied toward the minimum graduate course requirement. Four upper division elective courses* (a minimum of 16 units, excluding 199s) are also required.

Comprehensive Examination Plan

You are required to take a comprehensive core examination during your third term in residence. This written examination is based largely on a reading list which has been the focus of the seminar discussions in Archaeology M201A-M201B. The examination is graded high pass, pass, or no pass and may be repeated once.

M.A. Paper

A master's-level research paper, normally no longer than 35 pages and graded by the three members of the M.A. committee, is to be submitted to the chair of the program by the end of the third week of the seventh term.

Ph.D. Degree

Admission

Completion of a master's program is required. Applicants who do not have a UCLA M.A. in Archaeology should refer to the admission section under "Requirements for Graduate Degrees" above. Admission to the doctoral program for students completing a UCLA M.A. in Archaeology is based on written recommendation by all three members of the M.A. committee and at least a high pass on either the M.A. core examination or the M.A. paper.

Doctoral students entering the program with an M.A. from another university are required to pass the comprehensive core examination (see "Master of Arts Degree") unless they can demonstrate to the chair and the members of the admissions committee that the examination should be waived.

Foreign Language Requirement

Reading competence in two modern foreign languages relevant to your interests is normally required and may be demonstrated as outlined for the master's degree.

Course Requirements

You must be enrolled in a minimum of 12 units per term. Archaeology 200 is required. There are no other restrictions or requirements concerning courses.

Qualifying Examinations

By the end of your fourth term in the doctoral program, after the foreign language requirement has been fulfilled, you must take a written

*Of the six combined elective courses, no more than four may be offered by the same department. At least one must be outside your sphere of regional interest to be selected from a pool of eligible courses by your adviser.

qualifying examination in the following three areas: (1) topical specialization, (2) analytical theory, method, and technique, and (3) regional culture history. If you pass this examination, you may then make arrangements to take the oral examination. If the written examination or any portion thereof is failed, you may make one further attempt if your committee deems it appropriate.

The University Oral Qualifying Examination must be taken by the end of your sixth term in the doctoral program. You are required to submit to the doctoral committee a formal dissertation proposal (of about 10 pages), including the particular research problem on which you will be examined during the oral qualifying examination.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

The final oral examination may be waived by your doctoral committee.

Upper Division Course

C110. Archaeological Materials Identification and Characterization (6 units). Lecture, three hours; laboratory, four hours. Laboratory-oriented introduction for archaeologists to identification and quantitative description of solid materials, especially metals, ceramics, and other inorganic and some organic substances. Concurrently scheduled with course C210.

Graduate Courses

200. Archaeology Colloquium (1 or 6 units). Discussion, two hours. Prerequisite: archaeology major or consent of instructor. Required of all students. Development of archaeology as a discipline. Major intellectual trends and current issues in archaeology. Scientific and humanistic viewpoints presented by archaeologists from different academic departments. May be repeated for credit but may be applied only twice toward departmental M.A. requirements. S/U grading only for students enrolled for one unit.

(Sp)

M201A-M201B. Graduate Core Seminars: Archaeology (6 units each). (Same as Anthropology M201A-M201B.) Seminar, three hours. Required of all M.A. students. Seminar discussions based on carefully selected list of 30 to 40 major archaeology works. These compulsory core seminars provide students with foundation in breadth of knowledge required of a professional archaeologist. Archaeological historiography, survey of world archaeology, and archaeological techniques. Emphasis on appreciation of the multidisciplinary background of modern archaeology and relevant interpretative strategies. May be repeated for credit with consent of adviser.

(F, M201A; W, M201B)

M205. Special Topics in Archaeology (6 units). (Formerly numbered 205.) (Same as Anthropology M212S.) Lecture, three hours. Prerequisite: graduate standing in archaeology or in other departments. Open to undergraduates with consent of instructor. Special advanced topics in archaeology such as new strategies, methodologies, excavation projects, regional synthesis, or comparisons on a worldwide basis, including current work by core faculty of the program and special visitors.

C210. Archaeological Materials Identification and Characterization (6 units). Lecture, three hours; laboratory, four hours. Laboratory-oriented introduction for archaeologists to identification and quantitative description of solid materials, especially metals, ceramics, and other inorganic and some organic substances. Concurrently scheduled with course C110.

259. Fieldwork in Archaeology (2 to 12 units). Prerequisite: consent of instructor. Participation in archaeological field excavations or museum research under supervision of staff archaeologists at UCLA. Minimum of one month of field time away from campus required. May be repeated for credit with consent of adviser.

596. Individual Studies for Graduate Students (2 to 12 units). Hours to be arranged. Prerequisite: consent of instructor. May be repeated for credit with consent of adviser.

597. Preparation for Ph.D. Qualifying Examinations (2 to 12 units). Prerequisites: completion of formal coursework, passing of language examinations before enrollment, consent of instructor. May be repeated for credit with consent of adviser. S/U grading.

598. M.A. Paper Preparation (2 to 12 units). Prerequisite: consent of instructor. May be repeated for credit with consent of adviser. S/U grading.

599. Ph.D. Dissertation Research and Preparation (2 to 12 units). Prerequisite: consent of instructor. May be repeated for credit with consent of adviser. S/U grading.

Related Courses in Other Departments

Related courses, not listed individually, include regional geography, ancient and regional history, ethnography, folklore, history of technology, and the Earth sciences. Also recommended are the appropriate modern and ancient languages for your area of study.

Most archaeology courses are taught in the various departments. The following is a list of such courses, by topic and department. You are encouraged to examine the course listings of all departments for a truly interdisciplinary course of study.

Methodology and History

Ancient Near East (Near Eastern Languages) 261. Practical Field Archaeology

Anthropology 115P. Archaeological Field Training 115R. Strategy of Archaeology

M115S. Historical Archaeology

M116Q. Dating Techniques in Environmental Sciences and Archaeology

Jan S. Weisz, Ph.D., *Senior Emerita*

Scope and Objectives

The department offers programs leading to the Bachelor of Arts, Master of Arts, and Ph.D. degrees. Art history courses survey Western and non-Western art from earliest human history to the present. Students learn to treat artistic monuments and trends from a historical point of view, analytically rather than subjectively. This curriculum prepares students for careers in which broad knowledge of art is important and provides students preparing for graduate study with a foundation for research requiring independent critical judgment.

The rich and varied art resources available at UCLA and throughout Southern California offer students extraordinary opportunities to supplement the formal curriculum.

Bachelor of Arts Degree

Preparation for the Major

Required: Art History 50, 51, 54, 55A or 55B, 56A or 56B, 57.

The Major

Required: Eleven upper division art history courses as follows:

(1) A total of eight courses (32 units) from the following 12 areas, distributed as follows: one course from three different areas in Group A (three courses total), one course from three different areas in Group B (three courses total), and two courses from any of the 12 areas:

Group A — (1) 101A, 101B, M102A, M102B, M102C, M102D, M102E, (2) M102F, M102G, M102H, (3) 105A, 105B, 105C, 105D, 105E, (4) 106A, 106B, 106C, 106D, 108A, 108B, (5)

109A, 109B, 109C, 109D, (6) 110A, 110B, 110C, 110D, 110E, 110F, 110G, (7) C112A, C112B, C112C.

Group B — (8) 104A, 104B, C104C, (9) 114A, 114D, 114F, C115A, (10) 114C, 114E, C115B, C115C, C115D, C115E, C115F, (11) C117A, C117B, C117C, 118D, 118E, (12) 118A, 118C, C119A, C119B.

(2) Three art history electives, which may include courses 127, 197, 199, and courses from the above 12 areas. Design or art studio courses may not be applied as electives.

(3) Two terms of one foreign language or equivalent. The language is in addition to the college foreign language requirements.

Art history majors should be aware that the upper division course requirements in the major (44 units) do not meet the upper division requirement of 72 units for graduation. Additional upper division units must be taken to reach the 72-unit total.

It is recommended that you have each term's program approved by the departmental adviser.

Master of Arts Degree

Admission

A minimum grade-point average of 3.25 overall and 3.5 in upper division art history courses is required. The Graduate Record Examination (GRE) is required, although no minimum score has been established. Three letters of recommendation (preferably from art historians) are required, as are two writing samples (two 10-page research papers). The statement of purpose submitted with the application is given weight in the evaluation and should be as specific as possible about your interests in art history. In addition, you must have completed six full courses in the history of art (grades of B or better and not including studio courses), with at least two courses from Fields A and B (see below). Specific areas may not be offered in satisfaction of more than one requirement.

Field A — (1) Aegean, (2) American, (3) Greek and Roman, (4) medieval and Byzantine, (5) modern and contemporary, (6) Renaissance and baroque.

Field B — (7) African, (8) Chinese, (9) Indian/Southeast Asian, (10) Islamic, (11) Japanese, (12) Native North American, (13) oceanic, (14) pre-Columbian.

Field C — (15) Critical theory.

Applicants demonstrating exceptional promise but lacking some or all of the six required courses may, at the discretion of the graduate review committee, be admitted on condition that they make up those courses. Deficiencies must be made up during your first two terms in residence and may not be applied toward degree requirements. Instead of taking a course, you may substitute a competency examination in the deficient area.

Prospective students may contact the Counselor, Department of Art History, 3209 Dickson, UCLA, Los Angeles, CA 90024-1417, for brochures and information. The department has no special departmental application; admission is limited to Fall Quarter.

Major Areas or Subdisciplines

Fifteen major areas in three fields, as noted under "Admission" above.

Foreign Language Requirement

Reading knowledge of French and German is required of all students except those intending to major in Asian (i.e., Chinese, Japanese, South Asian), pre-Columbian, Islamic or, with consent of the adviser, Italian art history. Students majoring in Chinese or Japanese art history must substitute either Chinese or Japanese respectively for either French or German. Those majoring in South Asian or Islamic art history must substitute, for either French or German, an appropriate classical research language of South Asian or Islamic culture respectively. Those majoring in Italian art history may, with consent of their major adviser, substitute Italian for French. In all cases, the final decisions regarding choice must be made in consultation with, and with the consent of, the major adviser. Students majoring in pre-Columbian art history must substitute Spanish for French.

With the exception of Asian and Islamic art history majors, all students must demonstrate reading fluency in both foreign languages by any of the following methods: (1) passing the department language examination, (2) passing the Graduate School Foreign Language Test (GSFLT) with a minimum score of 600, (3) enrolling in and completing with a minimum grade of B, UCLA's French 5, German 6, Italian 5, and/or Spanish 25. One of these language requirements must be satisfied by the end of the second term in residence and the other by the end of the sixth.

Students majoring in Asian or Islamic art history must satisfy their European language requirement by the end of the sixth term in residence and may do so by any of the three methods listed above. The Asian or Islamic language requirement, however, is normally satisfied by enrolling in an appropriate course sequence for six consecutive terms (normally beginning with the first term of graduate study) and by maintaining a grade of B or better in those courses. Details and/or exceptions must be worked out with the major adviser.

Course Requirements

The M.A. degree requires the completion of a major and two minors in art history; there are three major/minor course options available (see the department counselor for option details). For options 1 and 2, you are required to take a minimum of 10 graduate and upper division courses, of which at least eight must be in art history and of which at least six must be

graduate courses (200 series and 596). For option 3, you are required to take a minimum of 13 graduate and upper division courses (but may be required to take up to 14), of which at least eight must be in art history and of which at least six must be graduate courses (200 series and 596). At least four of these courses (in all options) must be in the 200 series, and no more than two may be 596 courses (Art History 597 and 598 may not be applied toward the degree).

All students must take course 200 and either 201 or 202. Courses should be selected in consultation with your major and minor advisers.

Thesis Plan

The thesis committee is established after completion of all course requirements. At the same time, you select a thesis topic in your major field. The thesis should deal succinctly with the topic in an independent, critical, and original fashion while taking fully into account the present state of research on the problem.

Ph.D. Degree

Admission

The M.A. in Art History is usually required for admission to the Ph.D. degree program. However, students with an M.A. degree in other disciplines may apply for admission. The graduate review committee determines the equivalency of the M.A. on an individual basis. An M.A. in Art History from another institution may be accepted as equivalent to that from UCLA or the holder may be accepted into the program at a stage determined by the graduate review committee. All incoming Ph.D. students must have taken and passed with a grade of B or better at least two courses (upper division and/or graduate) in areas not related to the proposed major (as outlined in the M.A. course requirements). Deficiencies must be made up during your first two terms in residence and may not be applied toward degree requirements.

The application must include, in addition to official transcripts and Graduate Record Examination (GRE) scores, all of the following:

- (1) A standard statement of purpose (approximately 400 words) which should be as specific as possible about your interests in art history.
- (2) A copy of the M.A. thesis or, if no thesis was written, one major research paper written at the M.A. level in the major (or intended major) field.
- (3) Three or more letters of recommendation from individuals familiar with your scholarly work, one of which must be a detailed letter of assessment and endorsement from your major adviser for the M.A.
- (4) A written statement from the intended Ph.D. major adviser of willingness to supervise your Ph.D. work.

(5) Evidence, *prior* to admission, of reading fluency in two appropriate foreign languages.

Students applying directly to the Ph.D. program from the M.A. in Art History program at UCLA follow a slightly modified procedure. For details, see the department counselor.

Reading knowledge of French and German is *requisite for admission* at the Ph.D. level for those majoring in all areas except Asian, Islamic, pre-Columbian, or Italian art history. You may demonstrate this knowledge by submitting a Graduate School Foreign Language Test (GSFLT) score of 600 or better, taking and passing the relevant department language examination(s) after officially being admitted, or completing UCLA's German 6, French 5, and/or Italian 5 with a grade of B or better.

Students intending to major in Asian or Islamic art history must demonstrate, by the methods outlined above, reading fluency in either French or German. In addition, they must complete with a grade of B or better six consecutive quarter courses (or equivalent) in an appropriate Asian or Islamic language. Determination of the appropriate language and acceptable equivalencies should be worked out in advance with the intended major adviser.

Students intending to major in pre-Columbian art history must demonstrate, by the means outlined above, reading fluency in German and Spanish. In the latter case, UCLA's Spanish 25, passed with a grade of B or better, fulfills the requirement.

Students who have passed a required foreign language at another institution must either take and pass the relevant UCLA departmental foreign language examination or submit an official recent (within two years) GSFLT score of 600 or better in that language.

Prospective students may contact the Counselor, Department of Art History, 3209 Dickson, UCLA, Los Angeles, CA 90024-1417, for brochures and information. The department has no special departmental application; admission is limited to Fall Quarter.

Major Areas or Subdisciplines

Field A — (1) Aegean, (2) American, (3) baroque, (4) Byzantine, (5) contemporary (post-1945), (6) 18th-century, (7) Greek, (8) medieval, (9) 19th-century, (10) Renaissance, (11) Roman, (12) 20th-century.

Field B — (13) African, (14) Chinese, (15) Indian, (16) Islamic, (17) Japanese, (18) Native North American, (19) oceanic, (20) pre-Columbian, (21) Southeast Asian.

Field C — (22) Critical theory.

Foreign Language Requirement

You are normally required to demonstrate, no later than the time of your University Oral Qualifying Examination, reading fluency in one or more foreign languages in addition to those required for admission. Among those areas re-

quiring such reading fluency are Aegean, Greek, Roman, medieval, Byzantine, Renaissance, Islamic, pre-Columbian, and all Asian areas. The applicability of this requirement, the language(s) required, and the exact methods of satisfying the requirement are determined in consultation with the major adviser.

Course Requirements

There are three major/minor course options available (see the department counselor for option details). For options 1 and 2, a minimum of eight graduate and upper division courses is required, of which at least four must be art history graduate courses (200 series and 596). For option 3, a minimum of 11 graduate and upper division courses is required, of which at least four must be art history graduate courses (200 series and 596). Of these totals (eight or 11), you must take at least two, and may take up to five, extra-departmental upper division and/or graduate courses, which must be approved by your major or minor adviser (where applicable).

If you enter the Ph.D. program deficient in Art History 200 or its equivalent, you must add it to your total requirements. In some cases, course 201 may also be required (if recommended by your faculty adviser).

Qualifying Examinations

After completion of coursework and language requirements, you must take the Ph.D. written comprehensive examination to test your breadth and depth of knowledge in the major and minor fields of study. If you fail the examination, or any part thereof, that portion may be repeated during the subsequent term in residence. No further repetition is allowed.

A dissertation topic is selected after you pass the written comprehensive examination; the members of your doctoral committee are then nominated, and the committee is appointed by the dean of the Graduate Division.

After having submitted a dissertation proposal, you then take the University Oral Qualifying Examination, given by your doctoral committee. Assuming there is no more than one no pass vote, you may initiate the procedure to advance to candidacy.

Final Oral Examination

The doctoral committee may decide, by unanimous agreement, to waive the final oral examination (not normally required). If a final oral examination is required, it is held after the final draft of the dissertation has been circulated among the committee members. In case of failure, the doctoral committee decides, by unanimous agreement, whether or not you may be reexamined.

Lower Division Courses

50. Ancient Art. Lecture, three hours; quiz, one hour. Prehistoric, Egyptian, Mesopotamian, Aegean, Greek, Hellenistic, and Roman art and architecture.

Ms. Downey, Mr. Preziosi

51. Medieval Art. Lecture, three hours; quiz, one hour. Early Christian, Byzantine, Islamic, Carolingian, Ottoman, Romanesque, and Gothic art and architecture.

Mr. Klein

54. Modern Art. Lecture, three hours; quiz, one hour. Art and architecture from 1800 to the present in Europe and the U.S.

Mr. Boime, Mr. Kunzle

55A. Africa, Oceania, and Native America. Lecture, three hours; discussion, one hour. Comparative approach, emphasizing economic, cultural, and historical aspects of selected artistic traditions which developed outside the spheres of influence of major European and Asiatic civilizations.

55B. Arts of Pre-Columbian America. Lecture, three hours; discussion, one hour. Survey of sequence of cultures which developed in the area between (and including) Mexico and Peru from ca. 1000 B.C. to the Conquest.

Ms. Klein

56A. Art of India and Southeast Asia. Lecture, three hours; discussion, one hour. Survey of major artistic monuments of Indo-Iranian and Southeast Asian cultures, concentrating on formal and iconographical problems, as well as social and political conditions under which artworks were patronized and produced.

Mr. Brown

56B. Introduction to Chinese Art. Lecture, three hours; discussion, one hour. Introduction to discipline of Chinese art history. Fundamentals of formats, methods, and materials of Chinese art, visual and textual sources, peculiarities of patronage, traditional art history and criticism, and approaches to representation in premodern China.

57. Renaissance and Baroque Art. Lecture, three hours; discussion, one hour. History of art and architecture in Western Europe from 1400 to 1750.

Ms. Woods-Marsden

Upper Division Courses

101A. Egyptian Art and Archaeology. Lecture, three hours. Study of architecture, sculpture, painting, and minor arts during the Predynastic period and Old Kingdom.

Mr. Preziosi

101B. Egyptian Art and Archaeology of the Middle and New Kingdoms. Lecture, three hours. Prerequisite: course 50. Study of architecture, sculpture, painting, and minor arts during the Middle and New Kingdoms.

Mr. Preziosi

M102A. Minoan Art and Archaeology. (Formerly numbered 102A.) (Same as Classics M153A.) Lecture, three hours. Prerequisite: course 50. Study of development of art and architecture in Minoan Crete from ca. 3000 to 1000 B.C. P/NP or letter grading.

Mr. Preziosi

M102B. Mycenaean Art and Architecture. (Formerly numbered 102B.) (Same as Classics M153B.) Lecture, three hours. Prerequisite: course 50. Study of development of art and architecture in Mycenaean Greece from ca. 2000 to 1000 B.C. P/NP or letter grading.

Mr. Preziosi

M102C. Archaic Greek Art and Archaeology. (Same as Classics M153C.) Lecture, three hours. Prerequisites: course 50, Classics 10 or equivalent. Study of development of art and architecture of Greek world from approximately 800 through 490 B.C. P/NP or letter grading.

Ms. Downey, Mr. Preziosi

M102D. Classical Greek Art and Archaeology. (Same as Classics M153D.) Lecture, three hours. Prerequisites: course 50, Classics 10 or equivalent. Recommended: upper division classics or Greek courses. Study of development of art and architecture of Greek world from approximately 490 through 350 B.C. P/NP or letter grading.

Ms. Downey, Mr. Preziosi

M102E. Hellenistic Greek Art and Archaeology. (Formerly numbered 103B.) (Same as Classics M153E.) Lecture, three hours. Prerequisites: course 50, Classics 10 or equivalent. Study of development of art and architecture of Greek world from middle of the 4th century B.C., including transmittal of Greek art forms to the Romans. P/NP or letter grading.

Ms. Downey

M102F. Etruscan Art. (Formerly numbered 103D.) (Same as Classics M153F.) Lecture, three hours. Prerequisite: course 50. Arts of Italic peninsula from ca. 1000 B.C. to end of the Roman Republic. P/NP or letter grading.

Ms. Downey

M102G. Roman Art. (Formerly numbered 103C.) (Same as Classics M153G.) Lecture, three hours. Prerequisite: course 50. Art and architecture of Rome and its Empire from ca. 300 B.C. to A.D. 300. P/NP or letter grading.

Ms. Downey

M102H. Late Roman Art. (Formerly numbered 103E.) (Same as Classics M153H.) Lecture, three hours. Prerequisites: courses 50, M102G. Art of Roman Empire from the 2nd through 4th century (A.D.). P/NP or letter grading.

Ms. Downey

104A. Western Islamic Art. Lecture, three hours. From the Tigris and Euphrates Rivers to Spain, 7th to 16th century.

Ms. Bierman

104B. Eastern Islamic Art. Lecture, three hours. From the Tigris and Euphrates Rivers through Afghanistan and parts of central Asia; Ottoman Empire.

Ms. Bierman

C104C. Problems in Islamic Art. Lecture, three hours. Monuments or theoretical problems related to Islamic culture and artistic production. Concurrently scheduled with course C214.

Ms. Bierman

105A. Early Christian Art. Lecture, three hours. Prerequisite: course 51 or consent of instructor. Origins and development of architecture, sculpture, and painting of early Christianity to the iconoclastic controversy.

105B. Early Medieval Art. Lecture, three hours. Prerequisite: course 51 or consent of instructor. Art and architecture of Western Europe from the Migration period until A.D. 1000.

Mr. Klein

105C. Romanesque Art. Prerequisite: course 51. Art and architecture of Western Europe in the 11th and 12th centuries.

Mr. Klein

105D. Gothic Art. Lecture, three hours. Prerequisite: course 51. Art and architecture of Europe in the 13th century.

Mr. Klein

105E. Byzantine Art. Lecture, three hours. Prerequisite: course 51 or consent of instructor. Theory and development of Byzantine art from the iconoclastic controversy to 1453 and diffusion of Byzantine art in Armenia, Georgia, the Caucasus, and Russia.

105F. Late Gothic Art and Architecture. Lecture, three hours. Strongly recommended prerequisite: course 51. Art and architecture of Europe in the 14th and early 15th centuries. P/NP or letter grading.

106A. Italian Art of the Trecento. Lecture, three hours. Prerequisite: course 57 or consent of instructor. Art and architecture of the 14th century.

Ms. Woods-Marsden

106B. Italian Art of the Quattrocento. Lecture, three hours. Prerequisite: course 57. Art and architecture of the 15th century.

Ms. Woods-Marsden

106C. Italian Art of the Cinquecento. Lecture, three hours. Prerequisite: course 57. Art and architecture of the 16th century.

Ms. Woods-Marsden

106D. Late Renaissance Art: Counter-Reformation. Lecture, three hours. Prerequisite: course 57 or consent of instructor. Painting, sculpture, and architecture of the late 16th and early 17th centuries considered in context of the Counter-Reformation.

108A-108B. Northern Renaissance Art. Lecture, three hours. Prerequisite: course 57. Course 108A is prerequisite to 108B. Painting and sculpture in the Northern Renaissance.

Ms. Woods-Marsden

109A. Baroque Art. Lecture, three hours. Prerequisite: course 57. Art and architecture of Italy and Spain, 16th to late 17th century.

109B. Baroque Art. Lecture, three hours. Prerequisite: course 109A. Art and architecture of Northern Europe, 16th to late 17th century.

Mr. Kunzle

109C. European Art of the 18th Century. Lecture, three hours. Prerequisite: course 57. Painting, architecture, and sculpture of the 18th century examined in light of political and intellectual developments. Special emphasis on effect of the rise of democratic institutions, especially the French Revolution.

Mr. Kunzle

109D. Art and Architecture of Georgian England. Lecture, three hours.

Ms. Bennett

110A. European Art of the 19th Century. Lecture, three hours. Prerequisite: course 54. Neoclassicism and Romanticism, with emphasis on France—development and influence of David, Ingres, and Delacroix.

Mr. Boime

110B. European Art of the 19th Century: Realism and Impressionism. Lecture, three hours. Prerequisite: course 54. Inquiry into problem of realism, with emphasis on French art, but including developments in England and Germany.

Mr. Boime

110C. European Art of the 19th and 20th Centuries: Postimpressionism to Surrealism. Lecture, three hours. Prerequisite: course 54. Study of major developments in modern art, 1880s to 1930, including Seurat, Cezanne, Gauguin, Van Gogh, Art Nouveau, Fauvism, German expressionism.

110D. Contemporary Art. Lecture, three hours. Prerequisite: course 54. European and American art since World War II.

Mr. Boime, Mr. Kunzle

110E. Art and Politics in the Contemporary Americas: Post-World War II U.S. Art and Politics. Prerequisite: course 54. Selective survey of media and art supporting, condoning, and resisting U.S. capitalism and imperialism, with special emphasis on Vietnam era and arts of protest.

Mr. Kunzle

110F. Selected Topics in Modern Art. Lecture, three hours. Prerequisite: course 54. Changing topics in modern art (post-1780) which reflect interests of individual regular and visiting faculty members.

110G. Art and Politics in the Contemporary Americas: Latin America. Prerequisite: course 54. Nationalist and revolutionary responses of Latin America to U.S. imperialism. Discussion of the cases of Mexico, Cuba, Chile, and Nicaragua.

Mr. Kunzle

112A. American Art before the Civil War. (Formerly numbered 112A.) Lecture, three hours. Painting, sculpture, and architecture in the U.S. from Colonial period through the Civil War. Concurrently scheduled with course C212A.

Ms. Whiting

112B. American Art in the Gilded Age, 1860-1900. (Formerly numbered 112B.) Lecture, three hours. Painting, sculpture, and architecture in the U.S. from the Civil War to turn of the century. Concurrently scheduled with course C212B.

Ms. Whiting

112C. 20th-Century American Art. (Formerly numbered 112C.) Lecture, three hours. Painting and sculpture in the U.S. from 1900 to the present. Concurrently scheduled with course C212C.

Ms. Whiting

114A. Early Art of India. Lecture, three hours. Not open to freshmen. Survey of Indian art from Indus Valley cultures to the 10th century. Emphasis on Buddhist and Hindu backgrounds of the arts.

Mr. Brown

114C. Japanese Art. Lecture, three hours. Not open to freshmen. Japanese art from its beginning in prehistory through the 19th century. Emphasis on development of Buddhist art and its relationship with the culture.

Mr. McCallum

114D. Later Art of India. Lecture, three hours. Not open to freshmen. Survey of Indian art from the 10th to 19th century. Decline of Buddhist art, last efflorescence of Hindu architecture, Muslim painting and architecture, and Rajput painting. P/NP or letter grading.

Mr. Brown

114E. Arts of Korea. Lecture, three hours. Art and archaeology of Korea from the Neolithic Period through the Yi dynasty. Particular emphasis on early archaeology and state formation, Buddhist art, Koryo ceramics, and Yi literati painting.

Mr. McCallum

114F. Arts of Southeast Asia. Lecture, three hours. Not open to freshmen. Southeast Asian art from its beginning in prehistory through the 19th century. Study of art of selected cultures from Burma, Malaysia, Thailand, Cambodia, Vietnam, and Indonesia.

Mr. Brown

C115A. Advanced Indian Art. Lecture, three hours. Prerequisite: course 114A. Study in Indian sculpture and architecture. Concurrently scheduled with course C257.

Mr. Brown

C115B. Advanced Chinese Art. Lecture, three hours. Study in Chinese painting and sculpture. Concurrently scheduled with course C258.

C115C. Advanced Japanese Art. Lecture, three hours. Prerequisite: course 114C. Study in Japanese painting and sculpture. Concurrently scheduled with course C259.

Mr. McCallum

C115D. Art of Early China, Neolithic to A.D. 906. Lecture, three hours. Prerequisite: consent of instructor. Period generally known as "early China," ranging from earliest Neolithic artifacts to end of T'ang dynasty (618-906). Concurrently scheduled with course C261A.

C115E. Chinese Art of Sung and Yuan Dynasties, 906-1368. Lecture, three hours. Prerequisite: consent of instructor. Evolution of Chinese painting and some sculpture from Sung through Yuan dynasties (906-1368). Concurrently scheduled with course C261B.

C115F. Chinese Art from Ming Dynasty to the People's Republic, 1368 to the Present. Lecture, three hours. Prerequisite: consent of instructor. Evolution of Chinese painting and graphic art from Ming dynasty through the late 1970s. Concurrently scheduled with course C261C.

C117A. Pre-Columbian Art of Mexico. Lecture, three hours. Prerequisite: course 55B or consent of instructor. Study of art of selected cultures of northern Mesoamerica from ca. 1200 B.C. to the Conquest, with emphasis on historical and iconographic problems. Concurrently scheduled with course C218A.

Ms. Klein

C117B. Pre-Columbian Art of the Maya. Lecture, three hours. Prerequisite: course 55B or consent of instructor. Study of art of selected Maya-speaking cultures of southern Mesoamerica from ca. 2000 B.C. to the Conquest, with particular emphasis on history and iconography. Concurrently scheduled with course C218B.

Ms. Klein

C117C. Pre-Columbian Art of the Andes. Lecture, three hours. Prerequisite: course 55B or consent of instructor. Study of art of selected cultures of Colombia, Ecuador, Peru, and Bolivia from ca. 4000 B.C. to the Conquest, with particular emphasis on history and iconography of art of Peru. Concurrently scheduled with course C218C.

Ms. Klein

118A. Arts of Oceania. Lecture, three hours. Prerequisite: course 55A or consent of instructor. Survey of arts of the major island groupings of the Pacific, emphasizing style-regions and broad historical relationships.

Ms. Klein

118C. Arts of Sub-Saharan Africa. Lecture, three hours. Survey, with emphasis on sculpture, of selected traditions within a style-region framework.

118D. Arts of Native North America. Lecture, three hours. Prerequisite: course 55A or consent of instructor. Survey of painting, sculpture, and other arts from the Eskimo to peoples of the Caribbean and Southwestern U.S.

Ms. Klein

118E. Advanced Studies in Non-Western Art. Lecture, three hours. Prerequisite: course 118A or 118C or 118D or consent of instructor. Selected topics in arts of non-Western peoples which reflect interests of individual regular and visiting faculty members. P/NP or letter grading.

C119A. Advanced Studies in African Art: Western Africa. Lecture, three hours. Selected topics in arts of peoples living west and north of Cameroun, with emphasis on special problems of theory and method. Concurrently scheduled with course C216A.

C119B. Advanced Studies in African Art: Central Africa. Lecture, three hours. Selected topics in arts of peoples of equatorial, southern, and eastern Africa, with emphasis on special problems of theory and method. Concurrently scheduled with course C216B.

127. Undergraduate Seminar. Lecture, three hours. Prerequisite: junior standing or consent of instructor. Selected aspects of art history explored through readings, discussion, research papers, and oral presentations. May be repeated twice.

197. Honors Course. Hours to be arranged. Prerequisites: 3.0 GPA overall, 3.5 in major, junior or senior standing, consent of instructor. Individual studies for majors. May be repeated once for credit.

199. Special Studies in Art (2 to 8 units). Hours to be arranged. Prerequisites: 3.0 GPA in major, senior standing, consent of instructor. Individual studies for majors. May be taken for a maximum of eight units.

Graduate Courses

All courses may be repeated for credit (unless otherwise noted) on recommendation of the adviser; they are not open to undergraduate students.

200. Art Historical Theories and Methodologies. Discussion, three hours. Critical examination of history of the discipline of art history, with studies of various theoretical, critical, and methodological approaches to visual arts from antiquity to the present.

201. Topics in Historiography of Art History. Discussion, three hours. Critical examination of historiographic traditions of specific areas and fields within the discipline of art history, concentrating on particular time periods, geographical areas, artistic traditions, or the work of one or more authors.

202. Topics in Theory and Criticism in Art History. Discussion, three hours. Focused studies of various theoretical and critical traditions within art history, concentrating on particular issues, authors, or methodologies either within or across historical and cultural areas.

Mr. Preziosi, Ms. Whiting

203. Museum Studies. Seminar, two hours. Various aspects of museum activities: concepts and historical evolution of art museums and collecting; methodology of exhibitions; problems involved in acquisition and evaluation of works of art.

204. Restoration, Preservation, and Conservation. Seminar, two hours. May not be repeated.

205. Studies in Prints. Seminar, two hours. Critical studies in history and connoisseurship of graphic arts in the Western world. Group or individual studies often culminate in professionally directed exhibitions produced by Grunwald Center for the Graphic Arts.

206. Studies in Drawings. Seminar, two hours. Critical studies in history and connoisseurship of draughtsmanship in the Western world. Individual studies emphasizing professional presentation. Group studies may culminate in exhibitions sponsored by Grunwald Center for the Graphic Arts.

210. Egyptian Art. Seminar, two hours. Prerequisites: courses 101A, 101B, M102A. Art in Egypt during the Late period and Greco-Roman period. Students should be ready to prepare for every meeting a briefing of a topic from archaeological memoirs, not to exceed 10 minutes. Some lectures.

211. Topics in Aegean Art. Seminar, two hours. Prerequisites: courses M102A and M102B, or consent of instructor. Art and architecture of Aegean Bronze Age (3000-1000 B.C.). Monuments or theoretical problems related to art and culture of Crete, Greece, the Cyclades, or Western Anatolia.

Mr. Preziosi

C212A. American Art before the Civil War. Lecture, three hours. Painting, sculpture, and architecture in the U.S. from Colonial period through the Civil War. Concurrently scheduled with course C112A.

Ms. Whiting

C212B. American Art in the Gilded Age, 1860-1900. Lecture, three hours. Painting, sculpture, and architecture in the U.S. from the Civil War to turn of the century. Concurrently scheduled with course C112B.

Ms. Whiting

C212C. 20th-Century American Art. Lecture, three hours. Painting and sculpture in the U.S. from 1900 to the present. Concurrently scheduled with course C112C.

Ms. Whiting

213. Advanced Studies in Islamic Art. Seminar, two hours. Art and architecture of Islamic world (Spain to Iran) from the 7th to 17th century. Monuments or theoretical problems related to Islamic culture and artistic production.

Ms. Bierman

C214. Problems in Islamic Art. Lecture, three hours. Prerequisite: consent of instructor. Monuments or theoretical problems related to Islamic culture and artistic production. Concurrently scheduled with course C104C.

Ms. Bierman

C216A. Advanced Studies in African Art: Western Africa. Lecture, three hours. Selected topics in arts of peoples living west and north of Cameroun, with emphasis on special problems of theory and method. Concurrently scheduled with course C119A.

C216B. Advanced Studies in African Art: Central Africa. Lecture, three hours. Selected topics in arts of peoples of equatorial, southern, and eastern Africa, with emphasis on special problems of theory and method. Concurrently scheduled with course C119B.

C218A. Pre-Columbian Art of Mexico. Lecture, three hours. Prerequisite: course 55B or consent of instructor. Study of art of selected cultures of northern Mesoamerica from ca. 1200 B.C. to the Conquest, with emphasis on historical and iconographic problems. Concurrently scheduled with course C117A.

Ms. Klein

C218B. Pre-Columbian Art of the Maya. Lecture, three hours. Prerequisite: course 55B or consent of instructor. Study of art of selected Maya-speaking cultures of southern Mesoamerica from ca. 2000 B.C. to the Conquest, with particular emphasis on history and iconography. Concurrently scheduled with course C117B.

Ms. Klein

C218C. Pre-Columbian Art of the Andes. Lecture, three hours. Prerequisite: course 55B or consent of instructor. Study of art of selected cultures of Colombia, Ecuador, Peru, and Bolivia from ca. 4000 B.C. to the Conquest, with particular emphasis on history and iconography of art of Peru. Concurrently scheduled with course C117C.

Ms. Klein

219A. Oceanic Art. Discussion, two hours. Prerequisite: consent of instructor. Studies in selected topics in the art of Pacific islands.

Ms. Klein

219B. Pre-Columbian Art. Discussion, two hours. Prerequisite: consent of instructor. Studies in selected topics in art of pre-Hispanic Latin America.

Ms. Klein

219C. African Art. Discussion, two hours. Prerequisite: consent of instructor. Studies in selected topics in art of sub-Saharan Africa.

219D. Native North American Art. Discussion, two hours. Prerequisite: consent of instructor. Studies in selected topics in art of the American Indian.

Ms. Klein

220. Oceanic, Pre-Columbian, African, and Native North American Art. Discussion, two hours. Prerequisite: consent of instructor. Studies in selected topics comparing arts of Oceania, Africa, and pre-Columbian and Native North America.

Ms. Klein

221. Topics in Classical Art. Lecture, two to three hours. Studies in Parthian art. Site-by-site survey of the Near East (Afghanistan, Iran, Iraq, Syria) during period of Greek and Parthian control.

Ms. Downey

223. Classical Art. Seminar, two hours. Studies in Greco-Roman art and archaeology. Studies of specific periods, sites, or artistic media.

Ms. Downey

225. Medieval Art. Seminar, two hours. Studies in selected topics in Byzantine and European medieval art.

Mr. Klein

226A-226B. Medieval Art and Architecture. Studies in selected topics in Byzantine and European medieval art. Seminar extends over two consecutive terms. In Progress grading.

Mr. Klein

229. Renaissance and Baroque Paleography. Seminar. Prerequisites: knowledge of Italian, working knowledge of Latin. Workshop approach to documents pertaining to artistic commissions from the 15th to 17th century in Italy to study various aspects of handwriting in official and private deeds, correspondence, treatises, and inscriptions.

Mr. Pedretti

230. Italian Renaissance Art. Seminar, two hours. Prerequisite: knowledge of Italian. Study of various aspects of Leonardo's theoretical approach to art in terms of sources and impact on followers.

Mr. Pedretti, Ms. Woods-Marsden

231. Leonardo and Renaissance Theory of Art. Seminar, two hours. Prerequisite: knowledge of Italian. Study of various aspects of Leonardo's theoretical approach to art in terms of sources and impact on followers.

Mr. Pedretti

235. Northern Renaissance Art. Seminar, two hours. Prerequisite: knowledge of German. Emphasis on selected topic (e.g., particular artist, trend, or problem). Research papers and oral reports required.

240. Baroque Art. Seminar, two hours. Emphasis on selected topic (e.g., particular artist, trend, or problem). Research papers and oral reports required. Language requirements depend on area of focus.

Mr. Kunzle

244. Topics in European Art from 1700 to 1900. Lecture, two to three hours.

245. European Art from 1700 to 1900. Seminar, two hours.

246. Art and Architecture of Georgian England. Seminar, two hours.

Ms. Bennett

253. Modern Art. Seminar, two hours. Changing topics in modern art (including illustration and other popular forms) which reflect interests of particular faculty members. Political and economic factors affecting arts of France and Germany at various times.

Mr. Boime, Mr. Kunzle

255. American Art. Seminar, two hours. Prerequisite: course C112A or C112B or C112C or consent of instructor, depending on topic. Topics in American art from Colonial period to the present. Discussion of weekly readings, student oral presentations, and papers.

Ms. Whiting

C257. Advanced Indian Art. Lecture, three hours. Prerequisite: course 114A. Study in Indian sculpture and architecture. Concurrently scheduled with course C115A.

Mr. Brown

C258. Advanced Chinese Art. Lecture, three hours. Study in Chinese painting and sculpture. Concurrently scheduled with course C115B.

C259. Advanced Japanese Art. Lecture, three hours. Prerequisite: course 114C. Study in Japanese painting and sculpture. Concurrently scheduled with course C115C.

Mr. McCallum

260A. Indian Art. (Formerly numbered 260.) Lecture, two hours. Advanced studies in secular and religious artistic traditions of India. S/U or letter grading.

Mr. Brown

260B. Chinese Art. (Formerly numbered 260.) Lecture, two hours. Advanced studies in secular and religious artistic traditions of China. S/U or letter grading.

260C. Japanese Art. (Formerly numbered 260.) Lecture, two hours. Advanced studies in secular and religious artistic traditions of Japan. S/U or letter grading.

Mr. McCallum

C261A. Art of Early China, Neolithic to A.D. 906. Lecture, three hours. Prerequisite: consent of instructor. Period generally known as "early China," ranging from earliest Neolithic artifacts to end of Tang dynasty (618-906). Concurrently scheduled with course C115D.

C261B. Chinese Art of Sung and Yuan Dynasties, 906-1368. Lecture, three hours. Prerequisite: consent of instructor. Evolution of Chinese painting and some sculpture from Sung through Yuan dynasties (906-1368). Concurrently scheduled with course C115E.

C261C. Chinese Art from Ming Dynasty to the People's Republic, 1368 to the Present. Lecture, three hours. Prerequisite: consent of instructor. Evolution of Chinese painting and graphic art from Ming dynasty through the late 1970s. Concurrently scheduled with course C115F.

265. Fieldwork in Archaeology (2 to 8 units). Participation in archaeological excavations or other archaeological research under supervision of the staff.

M270. Art Law. (Same as Law M301.) Prerequisite: consent of instructor. Knowledge of fine arts, arts management, or international law desirable. Limited enrollment; management and art history students may cross-register with consent of instructors. Legal issues related to the fine arts. Consideration of U.S. domestic law as well as international treaties and foreign law in addressing such controversial issues as the international trade in art, art in public places, and moral rights. Distinguished guest speakers and one field trip.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study or Research (2 to 8 units). Prerequisite: consent of instructor.

597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 12 units). Prerequisite: consent of instructor. S/U grading.

598. Research for and Preparation of Master's Thesis (2 to 12 units). Prerequisite: consent of instructor. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (2 to 12 units). Prerequisite: consent of instructor. S/U grading.

Scope and Objectives

The Asian American Studies Program, an interdepartmental program supported by the Asian American Studies Center, promotes the study of Asian and Pacific peoples in the U.S. from several disciplines. The undergraduate program provides a general introduction to Asian American studies for those who anticipate advanced work at the graduate level or careers in research and community work related to the Asian American. Although no undergraduate major is offered in Asian American studies, students may participate in the program through a departmental major or an interdepartmental major such as East Asian studies. The graduate program leads to the M.A. degree.

A major goal of the program is to communicate the experiences of Asians as an American ethnic group. Courses examine the important issues and concerns of Asian Americans, including their history, mental health, social organization, and culture.

Special Undergraduate Program

Preparation for the Specialization

Required: Asian American Studies 100A-100B.

Upper Division

Since this is not a degree-granting program, students participating in it must complete an organized major.

For further information on the undergraduate specialization, contact the Curriculum Coordinator, Asian American Studies Center, at the above address.

Master of Arts Degree

Admission

In addition to the University's minimum requirements, applicants are expected to present evidence of their previous interest in Asian American studies through courses taken at the undergraduate level, by research papers written independently or for related classes, or by work experience in an Asian American community. In any case, applicants are required to submit a paper or article, preferably on Asian Americans, directly to the Asian American Studies Program (3230 Campbell Hall, UCLA, Los Angeles, CA 90024-1546) as part of their application. Three letters of recommendation are also required.

Major Fields

Since the program is interdepartmental, its major fields are determined by the participating faculty members from various departments.

Research Tool or Language Requirement

Prior to advancement to candidacy, you must fulfill one of the following requirements:

- (1) Foreign Language — Two years of university coursework or equivalent in an Asian language. This requirement may be fulfilled before entering the program, but you must pass a proficiency examination administered by the interdepartmental committee.
- (2) Research Methods — Three upper division or graduate courses in research methods with grades of B or better (e.g., statistics, computer science, field and observational techniques, or archival methods). Courses should be selected from the interdepartmental committee's approved list.

You must justify your requirement choice in a written statement. The rationale must specify the courses selected and how they directly relate to research and career goals.

Course Requirements

A total of 11 upper division and graduate courses is required for the degree. Of that number, seven must be graduate courses, including the required Asian American Studies 200A, 200B, 200C. Three of the graduate courses must be selected from Anthropology 231, Education 204D, 253G, History 201H, 245, Sociology 261, 263. The remaining four courses of the 11-course total, three of which may be upper division, must be approved by your faculty adviser and should be selected to

give you additional training in a discipline or greater understanding of a particular topic.

Two courses in the 500 series may be applied toward the required 11 courses; however, only one of the two may be applied toward the required seven graduate courses.

Thesis Plan

In partial fulfillment of the requirements for the M.A. degree, you are required to complete either one of two thesis plans or a comprehensive examination.

Plan A (Thesis) — The thesis is intended to provide the opportunity for independent scholarly research on the historical and contemporary experiences of the Asian American population. It should be an original contribution to the field and the length and quality of a publishable journal article. You are expected to submit a research plan to your thesis committee for approval at the beginning of Fall Quarter of your second year in residence. After your thesis is approved and completed, the committee conducts an oral examination on its subject, usually in Spring Quarter of your second year. Academic credit for thesis research and preparation is given through Asian American Studies 598.

Plan B (Field Research Thesis) — A field research thesis is recommended for students who are interested in the practical application of what they have learned in their graduate coursework or who are intending to pursue careers with Asian American community organizations and agencies. Your field research thesis committee meets with you to approve your project plan at the beginning of Fall Quarter of your second year in residence. After your thesis is completed, the committee conducts an oral examination on the written report of the project, usually in Spring Quarter of your second year. Academic credit for field research is given through course 596 or 598.

Comprehensive Examination Plan

You may elect to complete the M.A. degree by taking a written comprehensive examination based on an annually updated "Approved List of Core Works in Asian American Studies," a collection of approximately 200 of the most significant scholarly and creative books, novels, articles, and reports in the field of Asian American studies. The examination is normally offered during the break between Winter and Spring Quarters. You must notify the program chair of your intent to take the examination at least one academic term before it is administered. If you fail the examination, you may repeat it once. Academic credit for examination preparation is given through Asian American Studies 596.

Upper Division Courses

100A-100B. Introduction to Asian American Studies. Introductory course on Asian American studies.
100A. History of Asians in America; **100B.** Contemporary Asian American Communities.

101A. Field Studies Methods in Asian Pacific Communities. Lecture, three hours. Prerequisite: one course from Asian American Studies 100A through 197Z. Development of community profiles on Asian Pacific American communities of students' choice, using various field studies techniques of data collection. P/NP or letter grading.

101B. Internships in Asian Pacific Communities. Discussion, 90 minutes; fieldwork, eight hours minimum. Prerequisite: course 101A or another Asian American studies course (except 199) or consent of instructor. Integrates academic and empirical work by providing students the challenge of performing public service and community work in Asian Pacific or other multicultural communities, and of bringing their ongoing internship experiences back to classroom. P/NP grading.

M102. Asian American Literature. (Same as English M102.) Prerequisite: satisfaction of Subject A requirement. Prose and poetry by Americans of Chinese, Japanese, Filipino, and Korean origins. Study of interaction of autobiography and fiction, nourishing and limiting influences of mainstream American and Asian literary traditions, and conflict between ideological and literary criteria. Ms. Cheung (F)

103. Asian Americans and the Law. Survey of major federal and California case and legislative law directed specifically toward Asian Americans from 1850 to World War II and relocation. Major subject areas include Japanese relocation orders, anti-Asiatic labor legislation, legal prohibitions against Asians' right to testify, case law on Asian women, and equal educational opportunity for Asians.

105. Asian American Women. Lecture, three hours. Condition of Asian women in America. Topics include racial and cultural stereotypes, women in Asian American history, and contemporary issues and concerns of Asian American women. Current approaches to Asian American women presented and evaluated.

M107. Asian American Personality and Mental Health. (Same as Psychology M107.) Lecture, three hours. Prerequisite: Psychology 10. Foundations of personality development and mental health among Asian Americans. Topics include culture, family patterns, achievements, stressors/resources, and immigrant and minority group status. Mr. Sue

195A-195E. Asian American History and Experience. Prerequisite: sophomore standing. Survey of immigration history, settlement patterns, and experiences of specific Asian American populations. Examination of historical and contemporary sociocultural, economic, and political issues as they affect formation and character of various Asian American communities. Consult Asian American Studies Center for topics to be offered in a specific term. P/NP or letter grading. **195A.** Filipino American Experience; **195B.** Korean American Experience; **195C.** Vietnamese American Experience; **195D.** Japanese American History; **195E.** Chinese American History. (F,W,Sp)

M196A-196E. Critical Issues in U.S.-Asian Relations. (Formerly numbered 196A-196E.) Prerequisite: sophomore standing. Critical examination of U.S. involvement in specific Asian countries, including study of historical, political, and socioeconomic factors that shape relations between Asia and the U.S. Exploration of impact of relationships in the Pacific Rim, as well as on Asian Americans and the Asian American experience. Consult Asian American Studies Center for topics to be offered in a specific term. P/NP or letter grading. **M196A.** The U.S. and the Philippines. (Same as History M153.) Lecture, three hours. Recommended prerequisite: knowledge of Southeast Asian or U.S. history, or both. Examination of interrelationships of immigration and of colonialism and independence between the U.S. and the Philippines, focused mainly within the time period from 1898 to the present; **196B.** U.S.-Korea Relations; **196C.** U.S.-Vietnam Relations; **196D.** U.S.-Japan Relations; **196E.** U.S.-China Relations. (F,W,Sp)

197A-197Z. Topics in Asian American Studies. (Formerly numbered 197.) Lecture, three to four hours. Prerequisite: junior/senior standing. Variable topics in Asian American studies on selected issues in education, literature, social process, public policy, and economic development. P/NP or letter grading:

M197A. Introduction to Indo-American Studies. (Same as Community Health Sciences M197A.) Lecture, three hours. Prerequisite: junior/senior standing in Asian American studies or at least one course in Southeast Asian or Indian history or consent of instructor. Introductory study of Indian American immigration experiences in the U.S., including historical background, demographics, immigration policies and effects, and adaptation experiences. Class projects include sample survey of quality of life, annotated bibliography, and review of creative works. Mr. Kar (Sp)

199. Special Topics in Asian American Studies (2 to 4 units). Prerequisites: course 100A or 100B or comparable knowledge in Asian American studies, junior or senior standing, consent of instructor. Special individual study on topics such as ethnic literature, public policies, economic development, immigrant education, and/or social policies related to Asian American studies. May be repeated for a maximum of eight units.

Graduate Courses

200A. Critical Issues in Asian American Studies. Prerequisites: graduate standing, consent of instructor. Examines and seeks to develop a critical appreciation of research literature on Asians in America and to develop alternative interpretations of the Asian American experience. Topics include Asian American history and economic/political and social/psychological issues. Ms. Matsumoto

200B. Critical Issues in Asian American Communities. Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Evaluation of traditional and contemporary theories and models of community for their appropriateness to understanding Asian Pacific American communities. Consideration of specific topics which explicate development, structure, and dynamics of Asian Pacific American communities in studying community issues and concerns. Mr. Ong

200C. Critical Issues in Asian American Studies. Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Critical review of research methods, strategies, and philosophies in Asian American studies. Mr. Nakanishi

M297A-297Z. Topics in Asian American Studies. (Formerly numbered 297.) Prerequisite: graduate standing or consent of instructor. Selected topics in Asian American studies:

M297A. Topics in Asian American Literature. (Same as English M260A.) Lecture, three hours. Graduate seminar that examines and critically evaluates writings of Asian Americans. Ms. Cheung

M297B. Asian Migration to the U.S. (Same as Architecture and Urban Planning M242A.) Prerequisite: graduate standing or consent of instructor. Emphasis on Asia as main regional source for international migrants. Topics include patterns and theories of international migration and their relevance to the Asian experience, sending and receiving country perspectives, research and policy issues. S/U or letter grading.

M297C. Urbanization in Asia — Policy Issues and Problems. (Same as Architecture and Urban Planning M242B.) Prerequisite: graduate standing or consent of instructor. Urbanization in less-developed countries in Asia with specific reference to its peculiar features and characteristics, and relationship of urbanization to the development process. Topics include urbanization development, structural and policy determinants of urbanization, urban policy and strategies, and country case studies. S/U or letter grading.

490. Writing Workshop for Graduate Students (2 units). Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Practice in writing reports, grant proposals, abstracts, theses, and article-length research papers. Analyzing rhetorical and stylistic features of essays in various Asian American journals helps students improve both their prose style and editorial abilities. Four units may be applied toward M.A. degree requirements. May be repeated once for credit. S/U grading. Ms. Cheung

596. Directed Individual Study or Research (2 to 8 units). Hours to be arranged. Prerequisite: consent of instructor.

598. Research and Preparation of M.A. Thesis (2 to 8 units). Prerequisite: consent of instructor. Preparation of research data and writing of M.A. thesis. S/U grading.

8979 Math Sciences, (310) 825-4434

Professors

Eric E. Becklin, Ph.D.
 David B. Cline, Ph.D.
 Ferdinand Coroniti, Ph.D.
 Michael A. Jura, Ph.D., *Chair*
 Ian McLean, Ph.D.
 Mark Morris, Ph.D.
 Mirek Plavec, Ph.D.
 Roger K. Ulrich, Ph.D.
 Edward L. Wright, Ph.D.
 Benjamin Zuckerman, Ph.D.
 Lawrence H. Aller, Ph.D., *Emeritus*
 Daniel M. Popper, Ph.D., *Emeritus*

Associate Professors

Matthew Malkan, Ph.D.
 William I. Newman, Ph.D.

Assistant Professor

Jean L. Turner, Ph.D.

Scope and Objectives

Astronomy, the oldest science, has now become a meeting place of nearly all physical sciences. It is difficult for any educated person to escape the awe and wonder of such things as the nature of the other planets, the likelihood of black holes in space, the origin and future of the universe, and the possibility of life elsewhere.

The Astronomy Department, therefore, has several educational missions: to develop skills in graduate students which will enable them to

make contributions at the frontier of astronomical research, to prepare undergraduate majors for entry into a graduate program, and to provide insight and understanding for nonmajors and nonscience students.

Graduate training of future astronomers, up to the Ph.D. level, is the department's first responsibility. Applicants must have solid backgrounds in physics and mathematics. The program provides training in both theoretical and observational astronomy; its strengths, at present, are in solar physics, stellar structure and evolution, magnetohydrodynamics, gaseous nebulae and interstellar medium, infrared instrumentation, galaxies, quasars, and observational and theoretical cosmology.

The department's second responsibility is to the undergraduate astrophysics major who hopes for a career in astrophysics. Some Bachelor of Science degree recipients go on to graduate work; some opt for teaching careers, for which their training in physics, astrophysics, and mathematics is most useful; still others find excellent jobs in industry, where their broad background in physical science with a specialty in astrophysics makes them particularly valuable (especially in computer science, space, and aeronautical fields).

Classes for Nonmajors

The department offers general courses to all University students, including those who are not science oriented.

The Astronomy 2A-2B two-term sequence covers the material in courses 3, 4, and 6. You may take one sequence or the other, but not both.

Astronomy 3 is the fundamental one-term course for students who do not major in physical sciences and should be taken in the first or second year. If you had an astronomical introductory course in high school, you should take either courses 2A-2B, or 3H.

Astronomy 4, 5, and 6 develop the topics covered in course 3 to somewhat greater depths. They use more mathematics but are still aimed at nonscience majors. Course 4 details the stars and stellar systems; course 5 concentrates on the problem of life in the universe; course 6 discusses endpoints of stellar evolution and the structure and evolution of the universe. These three courses may be taken in any order by students with a grade of C or better in course 3, or whose astronomical knowledge is on a similar level.

Students who have had at least two courses in high school algebra and one course in trigonometry are advised to take, instead of Astronomy 3, the parallel honors course, Astronomy 3H. Declared or potential majors in astrophysics or in physical sciences should take course 3H if they need an elementary introductory course in astronomy.

Astronomy 81 and 82 are general survey courses recommended for science majors in

their second year. They systematically introduce astrophysics and require a good background in physics and mathematics (at least two terms of the Physics 8 series and two terms of the Mathematics 31/32 series).

Students of junior and senior standing in physics or related sciences are invited to select any of these courses: 115, 117, 127, 140, 180.

Bachelor of Science in Astrophysics

Preparation for the Major

Required: Astronomy 81, 82, Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL, 8E, Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 3 or 10A. *Recommended:* Astronomy 3H, Chemistry and Biochemistry 11A. Systematic study of astrophysics should begin with Astronomy 81 and 82, taken in the second year.

The Major

Required: Astronomy 115, 117, 127, 140, 180; Physics 105A, 105B, 110A, 110B, 115A, 115B, 131. *Recommended:* Earth and Space Sciences 101, Physics 108, 112, 123, 124, 132.

Honors Program

Senior majors in astrophysics with a 3.4 grade-point average in all astronomy, mathematics, and physics courses are eligible for the honors program in astrophysics. In addition to completing all courses required for the major, you must complete two terms of Astronomy 199. To receive honors and highest honors at graduation, your grade-point average must remain at 3.4 or better, and your work in course 199 must reflect original research and be accepted by the departmental honors committee.

Graduate Study

Admission

The basic requirement for admission is a bachelor's degree in physics or astronomy. Students in closely related fields (e.g., mathematics or chemistry) may be admitted at the discretion of the department. All students who apply should submit at least three letters of recommendation and take the Graduate Record Examination (GRE) General Test and Subject Test in Physics. For further information, contact the Graduate Adviser, Department of Astronomy, 8979 Math Sciences, UCLA, Los Angeles, CA 90024-1562.

New students and those who have not been admitted to candidacy for the Ph.D. should consult with the graduate adviser at the beginning of Fall Quarter to determine a program for the year.

Master of Science in Astronomy

Course Requirements

Nine courses are required for the master's degree, of which at least five must be at the graduate level in astronomy (excluding Astronomy 200). The B segments of the graduate multiple-term courses (Astronomy 204B, 208B, 217B, 219B, 227B, 230B) count as 1.5 courses each for the purpose of receiving degree credit. Courses taken in the 300 or 500 series may not be applied toward the total course requirement or the graduate course requirement.

Comprehensive Examination Plan

To receive the master's degree, you must obtain at least a B average in all the departmental written comprehensive examinations taken. The examinations are divided into sections, with one section for each course in the A or B series that you may apply toward the M.S., M.A.T., or Ph.D. requirements. The examination is scheduled at the time the final examination for the course would normally be scheduled and is letter graded. You may repeat failed courses for credit but may not repeat the departmental examinations for departmental credit.

Master of Arts in Teaching

The department is not admitting students to the program at this time.

Course Requirements

Nine courses are required for the academic portion of the M.A.T. program. They must include at least five graduate courses in astronomy (excluding Astronomy 200), mathematics, or physics, or 100- or 200-series courses in education required for the instructional credential. The B segments of the graduate multiple-term courses (Astronomy 204B, 208B, 217B, 219B, 227B, 230B) count as 1.5 courses each for the purpose of receiving degree credit. Although it does not count for degree credit, Physics 370 is also required. Courses taken in the 300 or 500 series may not be applied toward the total course requirement or the graduate course requirement.

In order to obtain a secondary credential with the M.A.T. in Astronomy, additional courses in education, including supervised teaching, should be taken.

Comprehensive Examination Plan

This plan is the same as for the M.S. degree.

Ph.D. in Astronomy

Course Requirements

Required for the degree are Astronomy 200, 204A, 208A, 217A, 219A, 227A, 230A; at least four courses from 204B, 208B, 217B, 219B, 227B, 230B; and at least two courses (projects) from 204C, 208C, 217C, 219C, 227C,

230C. You are required to take course 250 each term in residence.

Teaching Experience

Before receiving a Ph.D., you are required to spend at least three terms as a teaching assistant at UCLA or have equivalent experience elsewhere.

Comprehensive Examinations

The departmental written comprehensive examinations are the same as described under the M.S. degree. To be qualified to go on to the Ph.D., you must receive a minimum score on these examinations.

After the written comprehensive examinations are completed, you must then fulfill the normal University requirements for a dissertation and pass the University Oral Qualifying Examination.

Projects

During the Fall Quarters of your second and third years, you are expected to complete a research project. You should work closely with one of the staff both when the project subject is selected and throughout the course of the work. The project may be a continuation of work begun during the preceding Spring Quarter; the goals of the project should be selected to reflect the amount of work completed in the Spring Quarter.

Evaluation of the project is based as much on the quality of the written report as on the quality of the research itself. The project report should include statements of the project goals, the relationship of the project to broader issues in astronomy, the techniques selected to attack the project problem, and the reasons for this choice. If the project is original and interesting, but incomplete, you are encouraged to complete it later, but the grade assigned is based on the portion completed by the end of the Fall Quarter.

Final Oral Examination

You must pass a final examination after completing your dissertation.

Lower Division Courses

2A-2B. Introduction to the Physical Universe. Lecture, three hours; discussion, one hour. Thorough introductory survey of astronomy for students not planning to major in physical sciences. Same topics as course 3 but in greater depth, with emphasis on physical reasoning. **2A.** Planets and Stars; **2B.** Galaxies and Cosmology. Prerequisite: course 2A with a grade of C or better. Mr. Malkan

3. Astronomy: Nature of the Universe. Lecture, three hours; discussion, one hour. Not open to students with credit for or currently enrolled in course 3H or 81 or 82. No special mathematical preparation required beyond that necessary for admission to the University in freshman standing. Course for general University students, normally not intending to major in physical sciences, or development of ideas in astronomy and what has been learned of the nature of the universe, including recent discoveries and developments. (F,W,Sp)

3H. Introductory Astronomy and Astrophysics. Lecture, three hours; discussion, one hour. Not open to students with credit for or currently enrolled in course 3. Introduction to astronomy and astrophysics for freshmen who are seriously interested in science. Requires ability to understand mathematical and physical concepts, but high school algebra and trigonometry classes provide sufficient qualification. Particularly recommended for declared or potential majors in astrophysics or in physical and mathematical sciences. Mr. Morris (F)

4. Universe of Stars and Stellar Systems. Lecture, three hours; discussion, one hour. Prerequisite: course 3 or 3H or equivalent. Essentially nonmathematical course for general University students with previous introduction to astronomy; sequel to course 3, dealing in greater detail with stars and stellar systems. Various observed types of stars in relation to their internal structure and evolutionary state. Interacting binary stars, pulsating stars, explosive stars (novae and supernovae). Mass loss from stars, stellar wind. Galactic and planetary nebulae and their relation to stars. Interstellar medium. Initial stages of stellar evolution (protostars, T Tauri stars) and final stages (degenerate and collapsed stars). Stellar systems from clusters to galaxies. Mr. Plavec (F)

5. Life in the Universe. Prerequisite: prior introduction to astronomy or consent of instructor. Life on Earth and prospects for life elsewhere in the context of the evolution of the universe from the simple to complex. Course material primarily from astronomy and biology but includes some chemistry, geology, and physics. Selected topics treated in some depth, but with little or no formal mathematics. Mr. Zuckerman (W)

6. Cosmology: Our Changing Concepts of the Universe. Lecture, three hours; discussion, one hour. Prerequisite: course 3 or 3H or equivalent. Essentially nonmathematical exposition of our ideas about the structure and evolution of the universe. Historical development of ideas up to the present time. Problem of cosmic center and cosmic edge. Space and time. Curvature of space. General relativity. Black holes. Expanding universe and cosmological redshift. Early stages of the universe. Big Bang, current ideas of the inflationary universe. Mr. Malkan, Mr. Wright (Sp)

81. Astrophysics I: Stars and Nebulae. Lecture, three hours; laboratory, one hour. Prerequisites: Mathematics 31A, 31B, and Physics 8A, or equivalent, or consent of instructor. Open to qualified sophomore and upper division students. Survey of our knowledge about stars: their distances, masses, luminosities, temperatures, and interrelations between these parameters. Methods and importance for astrophysics. Variable stars. Planetary and gaseous nebulae. Mr. Morris, Mr. Plavec (W)

82. Astrophysics II: Stellar Evolution, Galaxies, and Cosmology. Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 31A, 31B, Physics 8A, or equivalent. Recommended: course 81, Physics 8B, 8C. Open to qualified sophomore and upper division students. Basic principles of stellar structure and evolution. Red giants, white dwarfs, novae, supernovae, neutron stars, and black holes. Pulsars and galactic X-ray sources. Milky Way galaxy and the interstellar medium. Extragalactic astronomy, galaxy clustering, active galactic nuclei, and quasars. Introduction to cosmology: Hubble law, thermal history of the Big Bang, and earliest moments of the universe. Mr. Coroniti, Mr. Malkan (Sp)

Upper Division Courses

115. Statistical Mechanics and Its Application to Astrophysics. Lecture, three hours. Prerequisites: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Physics 8A, 8B, 8C, 8D. Particle distributions, partition functions, black body radiation, Saha equation, degeneracy. Applications to stellar atmospheres, stellar interiors, and the interstellar medium. Mr. Jura (W)

Atmospheric Sciences

7127 Math Sciences, (310) 825-1217

Professors

Akio Arakawa, D.Sc. (*Atmospheric Dynamics*)
 Michael Ghil, Ph.D. (*Climate Dynamics*)
 Carlos R. Mechoso, Ph.D. (*Atmospheric Dynamics*)
 George L. Siscoe, Ph.D. (*Atmospheric Physics*),
Chair
 Richard M. Thorne, Ph.D. (*Atmospheric Physics*)
 Richard Turco, Ph.D. (*Atmospheric Chemistry*)
 Sekharipuram V. Venkateswaran, Ph.D.
 (*Atmospheric Physics*)
 Michio Yanai, D.Sc. (*Atmospheric Dynamics*)
 James G. Edinger, Ph.D., *Emeritus*
 Morton G. Wurtele, Ph.D., *Emeritus*

Associate Professor

Roger M. Wakimoto, Ph.D. (*Atmospheric Dynamics*)

Assistant Professors

Warren Blier, Ph.D. (*Atmospheric Dynamics*)
 Robert Fovell, Ph.D. (*Atmospheric Dynamics*)
 J. David Neelin, Ph.D. (*Atmospheric Dynamics*)

Adjunct Professors

Nancy Crooker, Ph.D. (*Atmospheric Physics*)
 David Halpern, Ph.D. (*Physical Oceanography*)

Adjunct Assistant Professor

Jeffrey Lew, Ph.D. (*Cloud Physics*)

Scope and Objectives

The atmospheric sciences present a wide variety of problems of compelling scientific interest and increasing social concern. This is exemplified by efforts to improve air quality, depredations caused by severe storms and floods, attempts to control or modify weather phenomena, problems of long-range weather forecasts and climate change, and expanding scientific frontiers into our outer atmosphere and atmospheres of other planets.

The department offers a broad curriculum in dynamic and synoptic meteorology, atmospheric physics and chemistry, and upper atmosphere and space physics.

The Bachelor of Science degree qualifies students for entry-level technical positions or represents valuable background for training in other professions. Master of Science and Ph.D. degree holders work in universities, research centers, laboratories, and government services and, increasingly, in the rapidly burgeoning private sector.

Bachelor of Science Degree

Preparation for the Major

Required: Atmospheric Sciences 2A or 6A, 3A, Chemistry and Biochemistry 11A, Mathematics 31A or 31AQ, 31B, 32A, 32B, 33A, 33B, Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL, 8E, Program in Computing 3.

117. Radiation and Fluids in Astrophysics. Lecture, three hours. Prerequisites: course 115 or equivalent and junior standing in astrophysics or physics, or consent of instructor. Emission and absorption of radiation by matter, spectroscopy, spectral lines, and radiative transfer. Hydrodynamics and shock waves. Applications to stars, to interstellar and intergalactic media, and to the early universe.

Mr. Jura, Mr. Morris (Sp)

127. Stellar Atmospheres, Interiors, and Evolution. Lecture, three hours. Prerequisite: senior standing in astrophysics or physics or consent of instructor. Recommended: courses 115, 117. Physical conditions in stellar interiors. Energy production in stars. Stellar evolution from star formation through normally observed stages to white dwarfs, neutron stars, and black holes. Novae, supernovae, other variable stars, chromospheres and coronae of sun and stars. Evolution of binary stars. Analysis of stellar atmospheres.

Mr. Plavec, Mr. Ulrich (Sp)

140. Stellar Systems and Cosmology. Lecture, three hours. Prerequisite: senior standing in astrophysics or physics or consent of instructor. Properties of star clusters and galaxies, with particular emphasis on Milky Way galaxy. Clusters and superclusters of galaxies. Extragalactic distance scale. Quasars and active galaxies. Topics in cosmology, including expansion of the universe, microwave background, galaxy formation from primordial fluctuations, and observational constraints on the Big Bang.

Mr. Morris, Mr. Wright (W)

180. Astrophysics Laboratory. Lecture, two hours; laboratory, four hours. Prerequisites: junior or senior standing in astrophysics, physics, or a related field, consent of instructor. Lectures cover statistical methods in astrophysics, one- and two-dimensional random processes, and numerical methods. Laboratory experiments involve radio astronomy, interferometry, narrowband solar imaging, and visual photometry. Emphasis on use of computers for automatic collection of data and for processing two-dimensional astronomical images.

Mr. McLean, Mr. Wright (F)

199. Special Studies (2 or 4 units). Prerequisites: senior standing in astrophysics or physics (with an outstanding record), consent of instructor. Special studies with an individual faculty member.

Graduate Courses

Prerequisite to all graduate courses is consent of instructor. Courses 204A through 230C are offered in alternate years and consist of three terms according to the following scheme: level A (Winter Quarter, four units) — a basic survey course presenting the minimum knowledge in the field expected of all students who wish to obtain the Ph.D., but who do not necessarily plan to specialize in the field covered by the course; level B (Spring Quarter, six units) — advanced level for those considering the possibility of taking up a research project in the field; level C (Fall Quarter, following academic year, 10 units) — individual research projects supervised by the instructor in the form of a laboratory. Course 240 is equivalent to the B courses.

200. Introduction to Graduate Study of Astronomy. Required of all new graduate students. Survey of various fields of astronomy and astrophysics; first acquaintance with working methods and with department. Survey of basic astronomical nomenclature; background in physics and mathematics outlined as required in graduate courses.

Mr. Plavec

204A-204B-204C. Observational Astronomy (4 units, 6 units, 10 units). Star catalogs and charts. Radiation measurements, photoelectric photometry, and solid-state detectors. Radio and infrared techniques. Spectroscopic observations. Includes laboratory work.

Mr. McLean, Mr. Ulrich, Mr. Wright

208A-208B-208C. Interstellar Medium (4 units, 6 units, 10 units). Dynamics and physics of interstellar gas and dust. Radio observations of interstellar medium. Diffuse and planetary nebulae. Magnetic fields in space. Star formation. Topics in high-energy astrophysics.

Mr. Jura, Ms. Turner, Mr. Zuckerman

217A-217B-217C. Stellar Photospheres (4 units, 6 units, 10 units). Physics of stellar photospheres and radiative transfer. Continuous and line spectra of stars. Chemical abundances in stars. Stars with extended and unstable atmospheres.

Mr. Plavec, Mr. Ulrich

219A-219B-219C. Stellar Systems (4 units, 6 units, 10 units). Statistical astronomy. Distance determination. Stellar motions and populations. Stellar dynamics. Structure of the galaxy. Galaxies and clusters of galaxies. Distribution of matter in space. Cosmology.

Mr. Malkan, Mr. Wright

227A-227B-227C. Stellar Structure and Evolution (4 units, 6 units, 10 units). Structure and evolution of stars. Stellar energy sources and problems of nucleosynthesis. Theory of variable stars. Evolution of and mass exchange in binary stars. Final state of stellar evolution and degenerate stars. Supernova processes. Practical computation of stellar structure and evolution.

Mr. Plavec, Mr. Ulrich, Mr. Zuckerman

230A-230B-230C. High-Energy Astrophysics (4 units, 6 units, 10 units). High-energy radiation processes. Observational techniques of X-ray and gamma ray astronomy. Theory and observational results of X-ray and gamma ray sources, pulsars, radio galaxies, and quasars.

Mr. Coroniti, Mr. Wright

240. Modern Problems in Astronomy and Astrophysics. Open to qualified graduate students in astronomy and in related fields (physics, atmospheric sciences, Earth and space sciences). Special topics offered by distinguished visiting professors. May be repeated for credit.

250. Seminar: Current Astronomical Research (2 units). Required of all graduate students. Current astronomical problems. S/U grading. (F,W,Sp)

M285. Origin and Evolution of Solar System. (Same as Earth and Space Sciences M285.) Dynamical problems of solar system; chemical evidences from geochemistry, meteorites, and solar atmosphere; nucleosynthesis; solar origin, evolution, and termination; solar nebula, hydromagnetic processes, formation of planets and satellite systems. Content varies from year to year. May be repeated for credit. S/U grading.

Mr. Newman (Sp)

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

The following courses may be repeated at the discretion of the department:

596A. Directed Individual Studies (4 to 10 units).

596L. Advanced Study and Research at Lick Observatory (4 to 12 units). Intended for graduate students who require observational experience, as well as those working on observational problems for their thesis.

Mr. Kraft

599. Ph.D. Research and Writing (10 to 12 units).

The Major

Required: Atmospheric Sciences 104A, 104B, 104C, C105, 161; one course from Atmospheric Sciences CM140, C141, C142, 143, 144, 145, C154; three courses from Physics 110A, 110B, 112, M122, 131, 132, Chemistry and Biochemistry 103, 110A, 110B, C110C, 113A, C113B, 114, Mathematics 115A, 115B, 132, 135A, 135B, 136, 140A, 140B, 145, 146, M150A, 150B, Statistics 154A, 154B. Students preparing for graduate studies in atmospheric chemistry should take Chemistry and Biochemistry 11B, 11C, 103, 110A, 110B, C110C, 113A, C113B, 114; students preparing for graduate studies in upper atmosphere and space physics should take Physics 110A, 110B, M122; students preparing for graduate studies in atmospheric dynamics and physics should take Atmospheric Sciences CM140, C141, C142, Mathematics 136, 145, Physics 131, and either Physics 132 or Mathematics 132.

Graduate Study

The Department of Atmospheric Sciences offers the M.S., C.Phil., and Ph.D. degrees.

Admission

There are no admission requirements in addition to University minimum requirements and no application form in addition to the one used by UCLA Graduate Application Processing. Three letters of recommendation are required. For departmental brochures and information, write to Department of Atmospheric Sciences, 7127 Math Sciences, UCLA, Los Angeles, CA 90024-1565. In addition to students holding bachelor's degrees in meteorology or atmospheric sciences, graduates with degrees in related disciplines — astronomy, chemistry, engineering, geophysics, mathematics, oceanography, and physics — are encouraged to apply for graduate standing in the department. Programs are arranged by consultation between the student and the department's graduate advisers, and considerable flexibility is maintained so that maximum advantage may be taken of the candidate's previous education.

Major Fields or Subdisciplines

Dynamic and synoptic meteorology; atmospheric physics and chemistry; upper atmosphere and space physics.

Master of Science Degree

Course Requirements

A total of nine courses must be completed, five of which must be in the 200 or 500 series. You must also attain a grade of B (3.0) or better in one course in each of two fields other than your field of specialization. Atmospheric Sciences C200A is required of all students without formal background in fluid dynamics, while course C200B is required of all students without formal background in atmospheric sciences. Major field

requirements are as follows: *atmospheric physics and chemistry* — courses M203A, C203B, 203C; *dynamic and synoptic meteorology* — courses C201A, 201B, 201C; *upper atmosphere and space physics* — courses C205A, 205B, 205C.

Only one 500-series course (four units) may be applied toward the minimum graduate course requirement for the M.S. degree.

Comprehensive Examination Plan

The comprehensive examination is based on selected coursework and is conducted at the end of Fall and Spring Quarters. It is composed of two parts — one written, one oral. Grading of the examination is based on a 4.0 scale, with a 3.0 required for a pass at the M.S. level, and a 3.5 or better to continue toward the Ph.D. You are permitted two attempts to obtain the requisite grade either for termination at the M.S. level or for continuation toward a Ph.D. You are encouraged to take the examination as soon as possible. You must, however, attempt the examination by the end of your first two years of study and, if necessary, retake the examination at the earliest available time.

Contact the department for the specific examination requirements of the three major fields.

The special oral examination, conducted by a three-member departmental guidance committee, is based on an individual list of topics which you select in consultation with the guidance committee members. The list should represent the equivalent of three advanced courses (one of which may be 596) in your area of research specialization.

Thesis Plan

If you have a grade-point average of 3.5 or better, you may petition the department to obtain the M.S. by writing an original thesis. The petition must be received by the graduate advisers at least one year before you complete the degree (at the end of your first year of study). Provided you maintain a high academic standard in coursework, the accepted thesis may be used instead of the comprehensive examination for continuation toward the Ph.D. program.

Ph.D. Degree

Course Requirements

Students entering the department with an M.S. degree have no specific course requirements other than Atmospheric Sciences 270 in which you must present a formal seminar attended and graded by all faculty members. The graduate advisers may, at their discretion, prescribe courses in areas in which they deem students to have insufficient background to help them in preparing to pass the comprehensive examination.

Teaching Experience

There is no formal requirement for teaching experience, but it is strongly encouraged, and

approximately 65 percent of our graduate students serve as teaching assistants for one or more terms.

Qualifying Examinations

If you selected the M.S. comprehensive examination plan, you must also take an in-depth oral examination in your area of research specialization. A doctoral committee is appointed to conduct the University Oral Qualifying Examination on your selected dissertation topic and related areas, and the final oral examination which is required of all students. Each of these examinations must be passed in no more than two attempts.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

This examination is required of all students.

Lower Division Courses

1. Introduction to Weather Maps and Weather Forecasting. Lecture, three hours. Introduction to weather maps and satellite imagery and their use in making a weather forecast. Discussions also include structure of the National Weather Service and services it provides to the general public. Course allows students to make weather forecasts for Los Angeles and one city east of the Rocky Mountains.

2. Air Pollution. Lecture, three hours; discussion, one hour. Letters and Science general education requirement course for all students interested in causes and effects of high concentrations of pollution in the atmosphere. Topics include nature and sources of gaseous and particulate pollutants, their transport, dispersion, modification, and removal, with emphasis on atmospheric processes on scales ranging from individual sources to global effects; interaction with biosphere and oceans; stratospheric pollution.

Mr. Cassmassi (Sp), Mr. Lew (F), Mr. Turco (W)

2A. Air Pollution (5 units). Lecture, three hours; discussion, three hours. Prerequisite: major in physical sciences, life sciences, or engineering, or other majors who have completed Physics 6B and Mathematics 3A, or consent of instructor. Course for majors parallel to course 2; discussion section includes use of calculus. Discussion topics include composition of the atmosphere, air pollution, depletion of stratospheric ozone layer, global geochemical cycles, global greenhouse warming, polar ozone hole, nuclear winter.

Mr. Lew (F)

3. Introduction to the Atmospheric Environment. Lecture, three hours; discussion, one hour. Specifically designed to satisfy in part the Letters and Science general education requirement of students majoring outside the physical sciences. Nature and causes of weather phenomena, including winds, clouds, rain, lightning, tornadoes and hurricanes, solar and terrestrial radiation; phenomena of the higher atmosphere; ionosphere and auroras; causes of air pollution; proposed methods and status of weather modification.

Mr. Lew (Sp), Mr. Siscoe (F), Mr. Wakimoto (W)

3A. Introduction to the Atmospheric Environment (5 units). Lecture, three hours; discussion, three hours. Prerequisite: atmospheric sciences major, Physics 8D. Course for majors parallel to course 3; discussion section includes use of calculus. Discussion topics include atmospheric thermodynamics, extratropical synoptic-scale disturbances, atmospheric aerosol and microphysical processes, clouds and storms, radiative processes, atmospheric dynamics.

Mr. Wakimoto (W)

4. California Weather and Climate. Lecture, three hours; discussion, one hour. Prerequisite: course 3 or 3A or equivalent or consent of instructor. Specifically designed to satisfy in part the Letters and Science general education requirement of students majoring outside the physical sciences. Sequel to course 3 dealing in greater detail with atmospheric phenomena relevant to the weather of California, and nature of weather and climate of various regions of the state. Topics include extratropical cyclones and fronts, thunderstorms, severe weather, sea and land breezes, Santa Ana winds, low-level temperature inversions, air pollution, climate change, and discussion of present weather. Mr. Blier (F)

5. Climates of Other Worlds. Lecture, three hours; discussion, one hour. Introduction to atmospheres of planets and their satellites in the solar system using information obtained during the recent planetary exploration program. Elementary description of origin and evolution of atmospheres on the planets. Climates on the planets, conditions necessary for evolution of life, and its resulting effect on planetary environment. Mr. Thorne (W)

6. Climate and Climatic Change. Lecture, three hours; discussion, one hour. Course specifically designed to satisfy in part the Letters and Science general education requirement of students majoring outside the physical sciences. Introduction to physical causes of climate, classification of climate, and global distribution of climate types. Description of climate changes over time scales ranging from lifetime of Earth to el niño events. Discussion of causes of climatic change (e.g., long-term steady increase in solar luminosity, short-term fluctuations in solar luminosity, changes in Earth's orbit, changes in atmospheric composition, volcanoes, anthropogenic changes such as increased CO₂ and nuclear war). State of the art in modeling and predicting climate. Mr. Mechoso (Sp)

6A. Climate and Climatic Change (5 units). Lecture, three hours; discussion, three hours. Prerequisites: atmospheric sciences major, Physics 8D. Course for majors parallel to course 6; discussion section includes use of calculus. Discussion topics include atmospheric circulation, oceanic circulation, greenhouse effect, ice ages, ocean/atmosphere interactions, ozone hole, past climates, climate prediction. Mr. Mechoso (Sp)

8. Clouds, Rain, and Storms. Lecture, three hours; discussion, one hour. The raindrop and the ice crystal. Relation of meteorological conditions to cloud types. Precipitation mechanisms from clouds. Different scales of atmospheric cloud organization. Description and dynamics of spectacular weather systems, ranging from tornadoes to hurricanes. Severe weather forecasting.

88. Lower Division Seminar. Seminar, three hours. Variable topics; consult *Schedule of Classes* or department for topics to be offered in a specific term. P/NP or letter grading.

Upper Division Courses

104A. Atmospheric Thermodynamics. Lecture, three hours; discussion, two hours. Prerequisites: Chemistry 11A, Mathematics 33B, Physics 8D. Basic thermodynamics, including first, second, and third laws. Atmospheric statics. Dry adiabatic processes. Phase changes of water and moist adiabatic processes. Introduction to cloud microphysics. Gravitational stability. Mr. Fovell (F)

104B. Introduction to Dynamic and Synoptic Meteorology I. Lecture, two hours; laboratory, three hours. Prerequisite: course 3A. Atmospheric continuum. Properties of velocity field: vorticity, divergence, streamlines and trajectories, stream function and velocity potential. Equation of motion for fluids. Special atmospheric cases such as geostrophic wind, gradient wind, ageostrophic wind, and thermal wind. Mr. Neelin (W)

104C. Introduction to Dynamic and Synoptic Meteorology II. Lecture, two hours; laboratory, four hours. Prerequisite: course 104B. Conservation of mass and equation of continuity. Transformation of the vertical coordinate. Thermodynamic energy equation. Baroclinic instability. Mr. Wakimoto (Sp)

C105. Advanced Synoptic Meteorology. Lecture, three hours. Prerequisite: course 104C or consent of instructor. Structure and analysis of the wave cyclone. Characteristics of frontal zones. Frontogenesis. Diagnosis of vertical velocity; quasi-geostrophic omega equation: derivation, applications, and alternative formulations. Sawyer/Eliassen equation. Diabatic effects on cyclogenesis. Modeling studies. Discussion of current research topics. Concurrently scheduled with course C227. Mr. Blier (Sp)

CM140. Introduction to Fluid Dynamics. (Formerly numbered M140.) (Same as Earth and Space Sciences M140.) Lecture, three hours; discussion, one hour. Corequisite: Physics 131. Equations of fluid motion. Circulation theorems. Irrotational flow. Vortex motion. Rotating frame. Hydrostatic and geostrophic balance. Sound and shock waves. Viscous flow. Concurrently scheduled with course C200A. Mr. Schubert (F)

C141. Introduction to Geophysical Fluid Dynamics. (Formerly numbered 141.) Lecture, three hours. Prerequisite: course CM140. Equations of motion in a rotating frame, with special emphasis on shallow-water model. Potential vorticity. Geostrophic motion. Gravity and Rossby waves. Geostrophic adjustment. Quasi-geostrophic motion. Laplace's tidal equation. Kelvin and mixed Rossby gravity waves. Baroclinic instability. Concurrently scheduled with course C201A. Mr. Neelin (F)

C142. Introduction to Atmospheric Dynamics and Physics. (Formerly numbered 142.) Lecture, three hours; discussion, one hour. Prerequisites: Chemistry 11A, Mathematics 32A, Physics 8B. Composition, mean structure, and circulations of the atmosphere. Introduction to atmospheric thermodynamics and cloud physics. Radiative transfer and global energy balance. Structure, evolution, and basic dynamics of extratropical cyclones. Concurrently scheduled with course C200B. Mr. Blier (W)

143. Physical Oceanography. Lecture, three hours; discussion, one hour. Prerequisite: course C141. Physical structure of oceans. Observations of ocean currents. Boundary layers. Wind-driven oceanic circulations. Barotropic and thermohaline oceanic circulations. Models of the Gulf Stream. Coastal upwelling. Wind-mixed layers and thermoclines. Surface waves. Tides.

144. Micrometeorology and Air Pollution Meteorology. Lecture, three hours; discussion, one hour. Prerequisite: course C142. Wind and temperature structure in the surface layer; mesoscale weather and wind systems; turbulence and diffusion; evaporation; transport, diffusion, and transformation of atmospheric contaminants.

145. Atmospheric Physics. Lecture, three hours; discussion, one hour. Prerequisites: Physics 8E, 131. Physics of gases; properties and behavior of cloud particles; atmospheric electricity; solar and terrestrial radiation; atmospheric waves, scattering, visibility, and optics; remote sensing. Mr. Thorne

C152. Physics of Clouds and Precipitation. Lecture, three hours. Prerequisite: Physics 131. Recommended: Physics 110A. Thermodynamics of moist air, phase changes of water substance, latent heats, moist adiabatic processes; elementary cloud dynamics; cloud microstructure; microphysics of cloud droplets, nucleation phenomena, droplet hydrodynamics, coalescence and precipitation; ice physics; charge separation mechanisms; macrostructure of clouds and storms. Concurrently scheduled with course C203B. Mr. Lew (W)

C154. Introduction to Solar System Plasmas. (Formerly numbered CM154.) Lecture, three hours; discussion, one hour. Introduction to basic plasma physical processes occurring in the sun, solar wind, magnetospheres, and ionospheres of planets, using simple fluid (magneto-hydrodynamic) models as well as individual particle (radiation belt dynamics) approach. Solar-planetary coupling processes, geomagnetic phenomena, aurora. Concurrently scheduled with course C205A. Mr. Thorne (F)

161. Numerical Methods in Atmospheric Sciences. Lecture, two hours; laboratory, three hours. Prerequisites: course C141 and Program in Computing 3, or consent of instructor. Numerical solutions of problems selected from atmospheric sciences. Matrix inversion. Solution of oscillation, decay, advection, and vorticity equations. Mr. Fovell (Sp)

C162. Statistics in Atmospheric Sciences. Lecture, three hours; discussion, one hour. Prerequisite: Mathematics M150A or Statistics M152A or equivalent. Survey of methods used for data analysis in atmospheric sciences, with emphasis on practical applications. Methods include linear regression, factor analysis, and cluster analysis. Concurrently scheduled with course C213. Mr. Fovell (W)

195. Senior Paper. Prerequisite: senior standing in atmospheric sciences. Supervised through individual consultation with an appropriate faculty member, students write a research paper on a topic of their own choosing within their area of concentration in the major. May be used for writing honors thesis. (F,W,Sp)

198. Operational Meteorology (2 units). Laboratory, six hours. Prerequisite: junior or senior standing in atmospheric sciences. Daily contact with weather data and forecasting, satellite and radar data. Introduction to weather forecasting for aviation, air pollution, marine weather, fire weather, and public use. Includes daily weather map discussions and visits to observing, radiosonde, and radar installations. Mr. Blier (W,Sp), Mr. Wakimoto (F)

199. Special Studies in Meteorology (2 or 4 units). Prerequisite: consent of instructor. Special individual study.

Graduate Courses

C200A. Introduction to Fluid Dynamics. (Formerly numbered C200.) Lecture, three hours; discussion, one hour. Corequisite: Physics 131. Equations of fluid motion. Circulation theorems. Irrotational flow. Vortex motion. Rotating frame. Hydrostatic and geostrophic balance. Sound and shock waves. Viscous flow. Concurrently scheduled with course CM140. Mr. Schubert (F)

C200B. Introduction to Atmospheric Dynamics and Physics. (Formerly numbered C201.) Lecture, three hours; discussion, one hour. Intended for first-year graduate students with little or no prior background in atmospheric sciences. Composition, mean structure, and circulations of the atmosphere. Introduction to atmospheric thermodynamics and cloud physics. Radiative transfer and global energy balance. Structure, evolution, and basic dynamics of extratropical cyclones. Concurrently scheduled with course C142. Mr. Blier (W)

C201A. Introduction to Geophysical Fluid Dynamics. (Formerly numbered C202.) Lecture, three hours. Equations of motion in a rotating frame, with special emphasis on shallow-water model. Potential vorticity. Geostrophic motion. Gravity and Rossby waves. Geostrophic adjustment. Quasi-geostrophic motion. Laplace's tidal equation. Kelvin and mixed Rossby gravity waves. Baroclinic instability. Concurrently scheduled with course C141. Mr. Neelin (F)

201B. Atmospheric Wave Motions. (Formerly numbered 210A.) Lecture, three hours. Prerequisite: course C141/C201A. Wave motions in a compressible, stratified, and rotating atmosphere. Acoustic and gravity waves, anelastic and quasi-static approximations. Kelvin-Helmholtz instability. Quasi-static oscillations of a planetary atmosphere. Quasi-geostrophic motions. Baroclinic and barotropic instabilities. Propagation of planetary waves. Mr. Arakawa (W)

201C. Introduction to Atmospheric Turbulence and Convection. (Formerly numbered 226.) Lecture, three hours. Prerequisite: course C200A or consent of instructor. Small-scale nonhydrostatic motions in the atmosphere. Introduction to turbulence and thermal convection. Planetary boundary layer, effects of moisture on atmospheric motions, theory of moist convection, cumulus convection. Mr. Yanai (Sp)

M203A. Introduction to Atmospheric Chemistry. (Formerly numbered M200C.) (Same as Civil Engineering M262A.) Lecture, three hours. Principles of chemical kinetics, thermochemistry, spectroscopy, and photochemistry; chemical composition and history of Earth's atmosphere; biogeochemical cycles of key atmospheric constituents; basic photochemistry of troposphere and stratosphere, upper atmosphere chemical processes; air pollution; chemistry and climate. Mr. Turco (F)

C203B. Physics of Clouds and Precipitation. (Formerly numbered 203B.) Lecture, three hours. Thermodynamics of moist air, phase changes of water substance, latent heats, moist adiabatic processes; elementary cloud dynamics; cloud microstructure: microphysics of cloud droplets, nucleation phenomena, droplet hydrodynamics, coalescence and precipitation; ice physics; charge separation mechanisms; macrostructure of clouds and storms. Concurrently scheduled with course C152. Mr. Lew (W)

203C. Atmospheric Radiation. (Formerly numbered 200B.) Lecture, three hours. Survey of atmospheric radiation and radiative processes; thermal radiation, infrared radiative transfer in atmospheres, energy balance relationships; solar radiation, Rayleigh and Mie scattering, atmospheric optics; radiation climatology, energy balance and climate; remote sensing of atmospheres. Mr. Venkateswaran (Sp)

C205A. Introduction to Solar System Plasmas. Lecture, three hours; discussion, one hour. Introduction to basic plasma physical processes occurring in the sun, solar wind, magnetospheres, and ionospheres of planets, using simple fluid (magnetohydrodynamic) models as well as individual particle (radiation belt dynamics) approach. Solar-planetary coupling processes, geomagnetic phenomena, aurora. Concurrently scheduled with course C154. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department. Mr. Thorne (F)

205B. Descriptive Solar-Terrestrial Physics. (Formerly numbered 205C.) Lecture, three hours; discussion, one hour. Solar, interplanetary, magnetospheric, ionospheric, auroral, geomagnetic phenomenological background for studies in space physics. Complements theoretical space physics courses. Contextual understanding and literacy in space physics terminology provided. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department. Mr. Crooker (W)

205C. Planetary Upper Atmospheres. (Formerly numbered 205B.) Lecture, three hours; discussion, one hour. Aeronomy of upper atmospheres of Earth and other planets and some of their satellites — thermospheric structure and morphology, circulations, and disturbances; ionospheres as collisional and magnetized (unmagnetized) plasmas: currents, drifts, and instabilities. Examples of upper atmospheric interaction with lower atmosphere and magnetosphere. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department. Mr. Thorne, Mr. Turco, Mr. Venkateswaran (Sp)

Dynamic and Synoptic Meteorology

210B. Dynamics of Planetary Circulations. Lecture, three hours. Prerequisite: course 201B. Interaction between waves and mean zonal and meridional circulations. Vacillation. Regimes of thermally forced planetary circulations and their stability. Frontogenesis. Geostrophic turbulence. Forced planetary waves. Persistent anomalies of atmospheric circulation. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department. Mr. Neelin

212A. Numerical Methods in Geophysical Fluid Dynamics. Lecture, three hours. Prerequisite or corequisite: course C201A. Basic numerical methods for initial-boundary value problems in fluid dynamics, with emphasis on applications to atmospheric and oceanographic problems. Finite-difference methods and truncation error. Linear and nonlinear computational instability. Computational modes and computational boundary conditions. Nonlinear shallow-water equation model. Spectral methods. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department. Mr. Mechoso (W)

212B. Numerical Modeling of the Atmosphere I. Lecture, three hours. Prerequisites: courses 201B and 212A, or consent of instructor. Dynamics of numerical weather prediction and climate models and their computational design. Basic governing equations. Vertical and horizontal coordinates. Quasi-geostrophic and balanced models. Shallow-water equation model. Three-dimensional primitive equation models. Limited-area modeling. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department. Mr. Arakawa (Sp)

212C. Numerical Modeling of the Atmosphere II. Lecture, three hours. Prerequisite: course 201C or consent of instructor. Formulation of physical processes in numerical weather prediction and climate models. Planetary boundary layer processes. Turbulence closure models. Condensation processes. Parameterization of moist-convective processes. Cloudiness parameterization. Parameterization of gravity wave drag. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department. Mr. Arakawa

C213. Statistics in Atmospheric Sciences. Lecture, three hours; discussion, one hour. Prerequisite: Mathematics M150A or Statistics M152A or equivalent. Survey of methods used for data analysis in atmospheric sciences, with emphasis on practical applications. Methods include linear regression, factor analysis, and cluster analysis. Concurrently scheduled with course C162. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department. Mr. Fovell (W)

214. Theoretical Climatic Dynamics. (Formerly numbered 214A, 214B.) Lecture, three hours. Radiative transfer and energy-balance models (EBMs). Multiple equilibrium climates and their stability. Coupled EBMs of the atmosphere and oceans. Climatic history of our planet. Continuum mechanics of ice sheets and mantle. Oscillatory models of Quaternary glaciation cycles. Transitions from equilibrium to periodic and aperiodic climate behavior. Climatic predictability. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department. Mr. Ghil (Sp)

216A. Tropical Motions with Moist Processes. Lecture, three hours. Prerequisite: course 201C. Cumulus convection and the boundary layer in the tropics. Cloud clusters and mesoscale convection systems. Interaction of cumulus convection with large-scale environment. Tropical cyclones. Monsoon meteorology. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department. Mr. Yanai (F)

216B. Wave Motions in the Tropical Atmosphere. Lecture, three hours. Prerequisite: course 201B. Basic theory of equatorially trapped waves. Observations of tropical wave disturbances. Generation mechanisms of tropical waves. Tropical 30-50 day oscillation. Quasi-biennial and semiannual oscillations. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department. Mr. Yanai

218. Dynamics of the Atmosphere-Ocean System. Lecture, three hours. Transfer of properties between atmosphere and ocean; wind-driven ocean currents; coastal upwelling. Air-sea interactions. Effects of oceans on climate. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department. Mr. Neelin

220. Dynamics of the Middle Atmosphere. (Formerly numbered 255.) Lecture, three hours. Prerequisites: courses C200B, C201A. Structure and composition of the middle atmosphere. Waves in the middle atmosphere, including tides, planetary waves, and gravity waves. Quasi-biennial oscillations. Stratospheric sudden warmings. Semiannual oscillations. Wave-mean flow interactions. Interactions between middle and lower atmosphere. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department. Mr. Mechoso (F)

224A. Atmospheric Turbulence. (Formerly numbered 208A.) Lecture, three hours. Kinematics of homogeneous and shear flow turbulence. Surface and planetary boundary layers, including heat transfer and turbulent convection. Survey of field and laboratory observations and their interpretation by theory. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

M224B. Atmospheric Diffusion and Air Pollution. (Formerly numbered M208B.) (Same as Civil Engineering M262B.) Lecture, three hours. Nature and sources of atmospheric pollution; diffusion from point, line, and area sources; pollution dispersion in urban complexes; meteorological factors and air pollution potential; meteorological aspects of air pollution. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

C227. Advanced Synoptic Meteorology. Lecture, three hours. Prerequisite: course 104C or consent of instructor. Structure and analysis of the wave cyclone. Characteristics of frontal zones. Frontogenesis. Diagnosis of vertical velocity; quasi-geostrophic omega equation: derivation, applications, and alternative formulations. Sawyer/Eliassen equation. Diabatic effects on cyclogenesis. Modeling studies. Discussion of current research topics. Concurrently scheduled with course C105. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

Mr. Blier (Sp)

228. Mesometeorology. (Formerly numbered 201.) Lecture, three hours. Prerequisite: consent of instructor. Observations of phenomena with length scales ranging from 20 km to 2,000 km. Topics include polar lows, airmass thunderstorms, multicell storms, supercell tornadoes, gust fronts, downbursts, microbursts, and the dry line. Discussions on design of field project. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

Mr. Wakimoto

229. Mesoscale Modeling. Lecture, three hours. Prerequisites: courses 201C and 228, or consent of instructor. Numerical and analytical modeling of convective and mesoscale motions, from shallow heat sources to large complex systems. Model frameworks, assumptions, parameterizations, and solution techniques. Role of modeling efforts in understanding dynamic structure and behavior of systems. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

Mr. Fovell

Atmospheric Physics and Chemistry

230A-230B. Atmospheric Chemistry I, II. (Formerly numbered 221A, 221B.) Lecture, three hours. Prerequisite: course M203A or consent of instructor. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

230A. Photochemistry of remote troposphere; physical chemistry of surfaces and solutions; precipitation chemistry and acid rain; atmospheric organic chemistry; regional and global biogeochemical cycles; current issues in global change.

Mr. Turco

230B. Photochemistry of stratosphere and mesosphere; basic ionospheric processes; stratospheric pollution and the ozone layer; physical chemistry of upper atmosphere clouds and aerosols; comparative photochemistry of planetary atmospheres; observational techniques and results.

Mr. Turco

232. Chemical Transport Modeling. Lecture, three hours. Prerequisites: courses M203A and 230A-230B, or consent of instructor. Equations of tracer transport and chemical kinetics modeling in three dimensions; numerical techniques; coupled simulations of gas-phase and aerosol microphysics and chemistry; computational versus observational results; current problems in tracer modeling. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

Mr. Turco (W)

234A-234B. Cloud and Precipitation Physics I, II. (Formerly numbered 223A, 223B.) Lecture, three hours. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department:

234A. Prerequisite: course C203B or consent of instructor. Microstructure of atmospheric clouds; structure of the three phases of water substance, including surface effects; thermodynamic theory for equilibrium between the three phases of water substance, including surface effects; theory of homogeneous and heterogeneous nucleation of water drops and ice crystals.

Mr. Turco

234B. Prerequisite: course 234A. Theory of growth and evaporation of water drops and ice crystals by diffusion of water vapor; hydrodynamics of rigid bodies in a viscous medium; hydrodynamics of cloud drops, rain drops, and atmospheric ice particles; growth of cloud drops and atmospheric ice particles by collision.

Mr. Lew

240A. Radar Meteorology. (Formerly numbered 228B.) Lecture, three hours. Radar detection of spherical and nonspherical particles; use of radar in studying size distributions of cloud and precipitation particles, precipitation intensity and amount, updraft velocities, horizontal wind speed, and turbulence; radar observations of convective clouds, thunderstorms, tornadoes, hurricanes, squall lines, and fronts; clear air echoes. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

Mr. Wakimoto (F)

240B. Remote Sensing. (Formerly numbered 256.) Lecture, three hours. Prerequisites: courses 203C and 240A, or consent of instructor. Theory and techniques of remote sensing; atmospheric spectroscopy; methods based on scattering, absorption, and extinction; passive and active techniques; inversion methods; remote sensing of terrestrial meteorological parameters and trace constituents; remote sensing of surfaces and biosphere; remote sensing of planetary atmospheres. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

Mr. Venkateswaran

244. Methods of Radiative Transfer. (Formerly numbered 238.) Lecture, three hours; laboratory, one hour. Prerequisites: courses 203C and 240B, or consent of instructor. Analytical and numerical methods of radiative transfer, pure scattering atmospheres, and Chandrasekhar's solution; discrete ordinates; n-stream representations; exponential sums; Monte Carlo techniques and three-dimensional problems; computational laboratory. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

Mr. Venkateswaran

Upper Atmosphere and Space Physics

250A. Solar System Magnetohydrodynamics. (Formerly numbered 240A.) Lecture, three hours. Prerequisite: course C205A or consent of instructor. Derivation of MHD equations with two fluid aspects, generalized Ohm's law, small amplitude waves, discontinuities, shock waves, and instabilities. Applications to statics and dynamics of solar wind and planetary magnetospheres and to solar wind/magnetosphere/ionosphere coupling. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

Mr. Siscoe

250B. Solar System Microscopic Plasma Processes. (Formerly numbered 240B.) Lecture, three hours. Prerequisite: course C205A or consent of instructor. Adiabatic charged particle dynamics; incoherent radiation processes; collective effects in a plasma; propagation characteristics of electrostatic and electromagnetic waves; introduction to resonant interaction between charged particles and plasma waves. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

Mr. Thorne (Sp)

256. Ionospheric Electrodynamics. (Formerly numbered 240C.) Lecture, three hours. Ionospheric structure, currents, and electric fields; equatorial and high-latitude ionospheres; ionospheric control of magnetospheric phenomena. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

Mr. Venkateswaran

257. Radiation Belt Plasma Physics. (Formerly numbered 247.) Lecture, three hours. Prerequisite: course 250B or consent of instructor. Turbulent plasma instabilities and their relation to satellite observations and magnetospheric structure. Processes responsible for source, loss, and transport of energetic radiation belt particles. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

Mr. Thorne

Special Studies

270. Seminar: Atmospheric Sciences (2 units). (Formerly numbered 260.) Lecture, one hour. May be repeated for credit. S/U or letter grading.

271. Seminar: Atmospheric Dynamics (2 units). (Formerly numbered 261.) Lecture, one hour. May be repeated for credit. S/U or letter grading.

M272A-M272B-M272C. Seminars: Climate Dynamics (2 to 4 units each). (Formerly numbered M270A-M270B-M270C.) (Same as Earth and Space Sciences M270A-M270B-M270C and Geography M270A-M270B-M270C.) Lecture, two hours. Prerequisite: consent of instructor. Archaeological, geochemical, micro-paleontological, and stratigraphic evidence for climate change throughout the geological past. Rheology and dynamics of climatic subsystems: atmosphere and oceans, ice sheets and marine ice, lithosphere and mantle. Climate of other planets. Modeling, simulation, and prediction of modern climate on monthly, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading.

Mr. Ghil

273. Seminar: Atmospheric Physics (2 units). Lecture, one hour. May be repeated for credit. S/U or letter grading.

274. Seminar: Atmospheric Chemistry (2 units). Lecture, one hour. May be repeated for credit. S/U or letter grading.

Mr. Turco

M275A-M275B-M275C. Seminars: Space Physics (2 units each). (Formerly numbered 264.) (Same as Earth and Space Sciences M288A-M288B-M288C.) Lecture, one hour. Problems of current interest concerning particles and fields in space. May be repeated for credit. S/U grading.

276. Seminar: Mesoscale Processes (2 units). Seminar, one hour. Selected topics of current research interest in convection, extratropical cyclones, and fronts. May be repeated for credit. S/U or letter grading.

Mr. Wakimoto

281. Special Topics in Dynamic Meteorology (2 to 4 units). (Formerly numbered 219.) Individual meetings with instructor to be arranged. Content varies from year to year. S/U grading.

283. Special Topics in Atmospheric Physics (2 units). Individual meetings with instructor to be arranged. May be repeated for credit. S/U or letter grading.

284. Special Topics in Atmospheric Chemistry (2 units). Individual meetings with instructor to be arranged. May be repeated for credit. S/U or letter grading.

285. Special Topics in Solar Planetary Relations (2 to 4 units). (Formerly numbered 249.) Individual meetings with instructor to be arranged. Selected topics of current research interest in solar wind, magnetospheric, or ionospheric physics.

Mr. Siscoe, Mr. Thorne, Mr. Venkateswaran

375. Teaching Apprentice Practicum (1 to 4 units).
Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading. Mr. Siscoe

596. Directed Studies for Graduate Students (2 to 8 units).

597. Preparation for Comprehensive Examinations (2 to 8 units).

598. Research and Preparation of M.S. Thesis (2 to 8 units).

599. Research for Ph.D. Dissertation (2 to 8 units).

Carolee Caffrey, Ph.D.

W. Jaap Hillenius, Ph.D.

Eric Mundall, Ph.D.

Steve Strand, Ph.D., *Senior*

Scope and Objectives

Studies in biology touch every aspect of life, and seeking answers to the problems of living organisms is a major challenge to modern biology. To meet this challenge, the Biology Department offers a wide spectrum of undergraduate and graduate instruction in population, organismic, developmental, cell, and molecular biology. All of these subject areas relate in some way to practical problems facing contemporary society, and all influence individual and collective decisions on matters ranging

from environmental degradation to viruses and cancer.

The Bachelor of Science degree combines essential background studies in mathematics, chemistry, and physics with a general introduction to all of the biological subjects, as well as advanced in-depth exposure to some of them. The Master of Arts and Ph.D. degrees provide opportunities for advanced, concentrated study. The Master of Arts degree requires, in addition to specified coursework, completion of either a comprehensive examination or the performance of original research culminating in a thesis. The Ph.D. degree requires independent and innovative research that ultimately results in a dissertation.

Bachelor of Science Degree

The Bachelor of Science degree is divided into five areas of concentration which build on similar lower division introductory courses and differ primarily in the upper division requirements. The first area of concentration — general biology — is designed for students who desire exposure to a wide range of biological subjects and for most students who will later seek admission to health sciences-related professional schools. The remaining four areas of concentration — ecology, behavior, and evolution (EBE), marine biology (MB), molecular, cellular, and developmental biology (MCD), and plant biology (PB) — provide more specialized instruction and strong preparation for employment or subsequent graduate study in the respective disciplines.

Pre-Biology Major

Students who have not completed all the courses required as preparation for the major are considered pre-biology majors. After completing those courses with a grade of C- or better in each, students must petition to enter the biology major in the Undergraduate Advising Office, 2312 Life Sciences.

In order to be admitted as pre-biology majors, transfer students who have 80 or more units must have completed one year of general chemistry with laboratory, Biology 5, 5L, and 9, or equivalent, and at least one of the following: (1) one year of calculus, (2) one year of calculus-based physics, or (3) two organic chemistry courses with laboratory.

General Biology Concentration

This concentration is designed for students with a broad interest in biology who desire to pursue careers in a wide range of biological and related fields. It provides excellent background preparation for postgraduate training in medicine and other health sciences, in tracks leading to academic and public service careers in biology, in biological industries, and even in nonbiological careers such as business, agriculture, and law. The concentration emphasis is breadth of training to expose students to all levels of modern biology.

Preparation for the Major: Biology 5, 5L, 6, 9 or equivalent; Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

The Major: Biology 108 or equivalent; one morphology and systematics course (Biology 101A, 101B, 103, 105, 110, 153/153L, or Microbiology and Molecular Genetics 101); one developmental and molecular biology course (Biology 121, 138, 141, 146, or C149); one physiology course (Biology 158, 162, 166, 167, or 170); two additional upper division biology courses; Chemistry and Biochemistry 132A, 132B/132BL, 153A, 153L; four additional upper division courses in biology, chemistry, mathematics (except Mathematics 104, 106), microbiology, physics, or from Biomathematics 110, Biostatistics 100B, 100C, Earth and Space Sciences 116, Geography 112.

Ecology, Behavior, and Evolution (EBE) Concentration

This concentration is appropriate for students preparing for graduate study in ecology, behavior, and evolution. A strong field component involving study in terrestrial and marine locales such as coastal, desert, and mountain environments in California and the Southwest and in the Neotropics is required. This provides suitable background for such fields as environmental biology, animal behavior, conservation, forestry, teaching, museum work, and governmental positions dealing with environmental issues of wide importance and impact.

Preparation for the Major: Biology 5, 5L, 6, 9 or equivalent; Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL, 15; Mathematics 31A, 31B, 32A, 32B, 33A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

The Major: Biology 108 or equivalent; one morphology and systematics course (Biology 101A, 101B, 103, 105, 110, or 152); one physiology course (Biology 162, 166, 167, or 170); three ecology, behavior, and evolution courses (Biology 111, 120, 122, 129, 135); one field quarter consisting of two to four courses from the Field Biology Quarter (FBQ), Marine Biology Quarter (MBQ), or equivalent; additional upper division courses in biology, chemistry, mathematics (except Mathematics 104, 106), microbiology, or physics (recommended: Biology C119, M127, 146, 168 in ecological and behavioral processes and Biology 103, 107, 112, 113A, 114, 115 in taxon-oriented biology; Chemistry and Biochemistry 132A, 132B/132BL, 153A, 153L may be substituted for Chemistry and Biochemistry 15, Mathematics 32B, 33A).

Marine Biology (MB) Concentration

This concentration is designed for students who wish to specialize in the area of marine sciences. Completion of this concentration provides students with both an excellent back-

ground in biology and specialization in various disciplines such as oceanography, subtidal and intertidal ecology, and physiology of marine organisms. Graduates are well prepared for postgraduate opportunities in the marine sciences, many other areas of biology, and medicine. The concentration provides valuable field experience with concomitant individual research opportunities in marine biology.

Preparation for the Major: Biology 5, 5L, 6, 9 or equivalent; Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL, 132A, 132B/132BL, 153A; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL; Statistics 50; Earth and Space Sciences 15 or Atmospheric Sciences 6.

The Major: Biology 108 or equivalent, C109; one marine organismic biology course (Biology 101A, 105, or 112); one physiology course (Biology 128, 162, 166, 167, or 170); one ecology, behavior, or evolution course (Biology 120, 122, 129, or 135); one field quarter consisting of four courses from the Marine Biology Quarter (MBQ); two physical, chemical, or geological oceanography courses from Atmospheric Sciences CM140, 143, Chemistry and Biochemistry 103, 154, Earth and Space Sciences 130, 131, or 144, Geography 100 or 101, Mechanical, Aerospace, and Nuclear Engineering 103 (strongly recommended) or 150A.

Molecular, Cellular, and Developmental Biology (MCD) Concentration

This concentration is designed for students who intend to go on to postgraduate work in biology or medicine and for students aiming for entry-level positions in biotechnology-related fields. Areas of emphasis include cell biology, immunology, animal and plant molecular biology, developmental biology, and neurobiology, among others. The concentration provides excellent preparation for the study of medicine at all levels, including molecular medicine.

Preparation for the Major: Biology 5, 5L, 9 or equivalent; Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

The Major: Biology 100A, 100B, 108 or equivalent; Chemistry and Biochemistry 110A, 132A, 132B/132BL, 153A, 153B, 153L, 156; a minimum of one course from each of the following three groups of core courses: cell biology (Biology C149, 171, M175A, M185A), molecular biology (Biology CM156, 157, 174), developmental biology (Biology 138, 141); three additional courses selected from the following: any of the courses from the above three groups not used to satisfy the core requirement, Biology 110, 158, 162, 166, 167, M175B, M175C, 181, Chemistry and Biochemistry 153C, Microbiology and Molecular Genetics 101, 102,

C104A, C104B, C104C, C119, 154; eight units of upper division laboratory experience selected from Biology 145A, 145B, 145C, 158, 162, 166, 172A, 172B, 182, 190A through 190D, 199, Chemistry and Biochemistry 154.

Plant Biology (PB) Concentration

This concentration prepares students for postgraduate programs in plant biology, including environmental biology, ecology, agricultural sciences, and plant molecular, developmental, and cellular biology. Students select key courses to obtain a sound, broad foundation in plant biology, learning state-of-the-art research techniques. They are also given opportunity to participate in individual supervised research projects using plants as experimental organisms.

Preparation for the Major: Biology 5, 5L, 6, 9 or equivalent; Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL, 132A, 132B/132BL, 153A; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

The Major: Biology 108 or equivalent, 146 or 162; one plant morphology or anatomy course (Biology 101A, 101B, or 152); two molecular or cellular plant biology courses (Biology 121, 141, C149); one ecology or evolution course (Biology 103, 120, or 122); one field quarter course involving research in plant biology (Biology 118, 124, or 148) or a laboratory internship (Biology 190 series or 199) which requires a written paper on some aspect of plant research; additional upper division courses in biology, chemistry, computer science, geography, or microbiology.

Additional Requirements

- (1) A six-unit course counts as only one course toward requirements for the major.
- (2) A maximum of eight units of Biology 190 or four units of Biology 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied.
- (3) Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Biology majors must earn a C- or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major.

Honors Program

An overall grade-point average of 3.4 and a 3.4 in the major are required for graduation with honors. Highest honors are awarded to majors who have a GPA of 3.6 overall and a 3.6 in the major at graduation and who have successfully completed Biology 190A-190B.

Field Biology

The department offers two quarter-long programs of advanced courses in field biology: the Field Biology Quarter (FBQ) and the Marine Biology Quarter (MBQ). These programs focus

on the biology of organisms living in their natural environments, emphasize independent student research projects, and take place at field sites away from the UCLA campus. The course composition varies somewhat from year to year, but each program always carries 16 units of course credit. The *Field Biology Quarter* occurs during Spring Quarter and involves some combination of Biology 103, 107, 113B, 114, 115, 124, C126, 131, and 132. The *Marine Biology Quarter* occurs during Fall Quarter and includes some combination of Biology 102, C104, 123, 147, 148, 164, and 165. To participate, you must enroll in all courses in the respective program. It is strongly recommended that you complete Biology C109 or C215 prior to applying for MBQ. Participants in both programs are selected by personal interview during Winter Quarter. Although most participants are upper division biology majors, both programs are available to any upper division student with adequate biological background. Information and applications are available in the Undergraduate Advising Office.

Graduate Study

The department offers M.A. and Ph.D. degrees in Biology, with specialization in a wide spectrum of fields. Students who plan to enter graduate school are urged to seek the advice of staff members in their field of interest.

Admission

The department encourages applications from students in all areas of science, but expects successful applicants to have or to acquire a background comparable to the requirements for the bachelor's degree in biology at UCLA. A background in chemistry, physics, and mathematics is desirable. Deficiencies in these or other subjects must be made up at the earliest opportunity. Undergraduates who are prospective applicants should remedy their deficiencies by preparatory study at an appropriate institution. The Graduate Division or the department may initially restrict applicants with less distinguished accomplishments.

The department is organized for administrative purposes into two divisions based on mutual interest. Applications should be directed to either Division I (molecular, cell, and developmental biology) or Division II (integrative biology: cells, organisms, and populations). The major fields and subdisciplines are listed under faculty interests in the departmental brochure.

All applicants must take the General Test (verbal, quantitative, and analytical) of the Graduate Record Examination (GRE). The Subject Test in Biology is also required.

Three letters of recommendation are required. These should be from professors, supervisors, or others who may provide an evaluation of motivation, accomplishments or potential in research, scholarly activities, teaching, and related academic functions.

Applications, departmental brochures, and additional information may be obtained from the Graduate Affairs Office, Department of Biology, 2316 Life Sciences, UCLA, Los Angeles, CA 90024-1606.

Program of Study

Study consists of coursework and research within the department and within related programs in biochemistry, geology, microbiology, and molecular biology on campus. Opportunities are also available off campus for intensive study of marine biology at a marine science center in Fall Quarter (MBQ), field biology in Spring Quarter (FBQ), and tropical biology within the FBQ program and through courses offered by the Organization for Tropical Studies.

You also are required to complete the departmental written qualifying examination, given twice a year, at an early point in your graduate career.

Foreign Language Requirement

No foreign language is prerequisite to admission to the M.A. or Ph.D. program, and there is no uniform language requirement for obtaining the Ph.D. However, in the pursuit of certain subspecialties of biology, you may be required to gain proficiency in one or more foreign languages.

Master of Arts Degree

Admission

Applications are evaluated by the appropriate divisional admissions committee and are accepted for admission to Fall Quarter only.

Course Requirements

The program consists of at least nine courses completed in graduate standing, of which at least five must be graduate (200 series) courses. The remainder may be courses in the 100, 200, or 500 series as noted below. No more than two 596 courses (eight units) may be applied toward the nine courses required for the degree; only one 596 course (four units) may be applied toward the minimum graduate course requirement. Courses graded S/U may not be applied toward the minimum requirement, except that an S/U-graded course outside the major and applicable to the degree may be applied, provided that no more than one such course is taken per term.

Specific course requirements are established for you by your guidance committee.

Thesis Plan

A thesis reporting the results of an original investigation, written to conform to the requirements of the Graduate Division, is presented to and approved by the master's thesis committee of three faculty members. Before beginning work on the thesis, you must obtain approval of the subject and general plan from the faculty members concerned and from the thesis committee.

Comprehensive Examination Plan

If you select this plan, you must take a three-hour examination prepared and graded by your committee or committee chair and approved by the graduate adviser. The examination is graded pass or fail. If you fail, recommendation for or against a second examination must be made by the graduate adviser.

Ph.D. Degree

Admission

Each division determines admission of students to the Ph.D. program separately. Ph.D. students in Division I (molecular, cell, and developmental biology) are admitted in Fall Quarter. Applications to Division II (integrative biology: cells, organisms, and populations) are reviewed by the division's admissions committee which advises prospective sponsors about the desirability of admission.

Course Requirements

There are no formal course requirements for the Ph.D. in Division II, although specific requirements may be established individually by your guidance committee. Division I students are required to take a minimum of four graduate-level courses, preferably in the first year (contact the Graduate Affairs Office for a course list). You must enroll for full-time study, as defined by the Graduate Division.

You are strongly encouraged to rotate laboratory and/or course experience with several faculty members during your first year of study as an aid to selecting a permanent adviser.

Teaching Experience

Each student is required to complete one academic year as a teaching assistant.

Oral Qualifying Examination

The University Oral Qualifying Examination is conducted by the doctoral committee as prescribed by the Graduate Division. It includes your preparation, presentation, and defense of an original written research proposal. The examination is graded pass, fail, or repeat. A failure requires dismissal. The second attempt at the examination is graded pass/fail. The examination must be completed by the end of the third year following first registration. You are advanced to candidacy following successful completion of this examination.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

The final oral examination is administered by your doctoral committee after you complete your dissertation. This examination is highly recommended but may be waived by your doctoral committee.

Lower Division Courses

If you do not complete course prerequisites as listed below, you may be dropped from those courses.

2. Principles of Modern Biology. Lecture, three hours; laboratory, two hours. Designed for nonmajors. Courses 2 and 3 may be taken independently, concurrently, or in either sequence. Not open to students with credit for course 5 or 9 or equivalent. Major themes in biology, including evolution, behavior, ecology, cell biology, photosynthesis, genetics, organismal diversity, and energetics as they relate to events occurring on our Earth today.

3. Introduction to Human Physiology and Disease. Lecture, three hours; laboratory, two hours. Designed for nonmajors. Courses 2 and 3 may be taken independently, concurrently, or in either sequence. Not open to students with credit for course 9 or equivalent. Presentation of an integrative approach to basic anatomy and physiology of major organs and organ systems, including correlative aspects of health, development, and disease.

5. Biology of Organisms. Lecture, three hours; discussion/demonstration, two hours. Comparative morphology and embryology of major plant and animal phyla; function of organ systems, including gas exchange, transport, regulation of internal environment, hormones, coordination, and nervous system.

5L. Organismic and Environmental Biology Laboratory. Discussion, two hours; laboratory, four hours. Prerequisite: course 5. Introductory biology laboratory, including selected topics on anatomy, physiology, behavior, and ecology of plants and animals.

6. Ecology, Evolution, and Behavior. Lecture, three hours; discussion, two hours. Prerequisites: course 5 and Mathematics 3A or 31A. Survey of principles of population and community ecology, behavioral ecology, population genetics, and evolution.

9. Introduction to Cell, Molecular, and Developmental Biology. (Formerly numbered 7A.) Lecture, three hours; discussion, one hour. Prerequisite: Chemistry 11A. Not open for credit to students with credit for former course 7. Biological macromolecules, energy production, principles of cellular organization and function, principles of molecular biology, basic principles of developmental biology.

10. Plants and Civilization. Lecture, three hours; demonstration, one hour. Designed for nonmajors. Origin of crop plants; man's role in development, distribution, and modification of food, fiber, medicinal, and other plants in relation to their natural history.

11. Biomedical Research Issues in Minority Communities. Prerequisite: consent of instructor. Limited to 30 students. Discussions and student presentations on biomedical research as it affects minority communities, with emphasis on methodology, design, consequences, and ethics of current research. Discussion leaders provide information on preparation and training for research careers. P/NP grading.

Mr. González (F)

13. Evolution of Life. Lecture, three hours; discussion, one hour. Not open to life sciences majors. Limited to 100 students. Introduction to biology within the framework of evolutionary theory. Relationships of evolutionary thought to other areas of knowledge and society. Natural selection and origin of variation examined in context of genetics, molecular biology, physiology, phylogeny, population dynamics, behavior, and ecology. Emphasis on critical role of historical processes.

20. Introduction to Human Heredity. Lecture, two hours; discussion, one hour; laboratory, two hours. Not open to students with a prior college course in genetics; not intended to satisfy requirements of medical or dental schools. Man's inheritance and its biological basis introduced through lectures, readings, and laboratory exercises with *Drosophila*. Topics include prenatal development, Mendelizing factors, role of chromosomes in heredity, and role of genes in disease and population structure.

21. Field Biology. Lecture, three hours; discussion, two hours, or field trips, three to four hours. Recommended (but not prerequisite): course 2. Not open for credit to students with credit for course 6 or 122. Introduction to natural history of Western North America, especially Southern California. Classification, distribution, and ecology of common plants and animals.

25. Oceans. Lecture, three hours; discussion, one hour. Not open for credit to students with credit for Earth and Space Sciences 15. Physical and chemical processes that take place in oceans, with emphasis on their effects on organisms.

30. Biology of Cancer. Introduction to molecular, cellular, and clinical aspects of cancer and consideration of sociological and psychological impacts of cancer on the individual and society. P/NP or letter grading.

Mr. Bohman

40. AIDS and Other Sexually Transmitted Diseases: The Modern Plague. Introduction to interdisciplinary debate surrounding the personal and societal response to AIDS and other sexually transmitted diseases. P/NP or letter grading.

Mr. Bohman

70. Genetic Engineering and Society. Lecture, three hours; discussion, two hours. Designed for nonmajors. Not open to students with credit for course 9 or equivalent or 108 or equivalent or any other upper division biology or chemistry course. Basic principles of genetic engineering. Overview of genetic engineering techniques and relationship of genetic engineering to medicine, agriculture, and society. Emphasis on specific genetic engineering applications to generate discussion on its use in society.

Mr. Goldberg

88A. Lower Division Seminar: Conservation of Biodiversity. Discussion, three hours; one weekend field trip. Introduction to patterns of biological diversity; selection, management, and use of natural reserves; human aspects on diversity; and effects of governmental and nongovernmental actions on biological conservation. P/NP or letter grading.

Ms. Mathias

88B. Lower Division Seminar: Origin of Life. Seminar, three hours. Training in science not required. Biological evolution as a central element in Earth history; theories of the origin of life based on observations, experimental simulations, and speculations. Students are guided in making class presentations and in writing papers. P/NP or letter grading.

Upper Division Courses

Course 5L is prerequisite to all upper division laboratory courses. Course 108 is prerequisite to all upper division courses in cell, molecular, and developmental biology. If you do not complete the prerequisites, you may be dropped from those courses.

100A. Principles of Molecular Biology. (Formerly numbered 7B.) Lecture, three hours; discussion, one hour. Prerequisites: course 9 or equivalent, Chemistry 11B (may be taken concurrently). Introduction to principles of molecular biology and their application to information storage and retrieval. Chromosome structure and function, transcription and translation, RNA processing, DNA synthesis and repair, gene regulation.

100B. Principles of Cell Biology. (Formerly numbered 7C.) Lecture, three hours; discussion, one hour. Prerequisites: courses 100A, 108 or equivalent, Chemistry 11C (may be taken concurrently). Satisfies premedical requirements. Analysis of cell organization, structure, and function at molecular level. Cell membranes, membrane transport, cellular signaling, cytoskeleton and cell movement, intracellular trafficking, cell energetics, developmental biology.

101A. Biology of Lower Plants (6 units). (Formerly numbered 100.) Lecture, four hours; laboratory, six hours. Prerequisite: course 5 or equivalent or consent of instructor. Not open for credit to students with credit for former course 100. Introduction to biology of algae, fungi, and bryophytes, with emphasis on form, function, and development, and role of lower plants in the environment. Students are strongly encouraged to take both courses 101A and 101B since these represent a course sequence surveying the entire plant world as appropriate background for upper division courses in plant biology.

101B. Biology of Vascular Plants (6 units). (Formerly numbered 101.) Lecture, three hours; laboratory, six hours. Prerequisite: course 5 or equivalent or consent of instructor. Not open to students with credit for former course 101. Introduction to the diversity in form and reproduction of vascular plants, with emphasis on development, evolution, and function. Students are strongly encouraged to take both courses 101A and 101B since these represent a course sequence surveying the entire plant world as appropriate background for upper division courses in plant biology.

102. Biology of Marine Invertebrates. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisites: courses 5, 5L, and 6, or consent of instructor. Morphology, systematics, life histories and natural history, ecology, behavior, and physiology of marine invertebrates; emphasis on local invertebrates of Southern California and their habitats. Given off campus at a marine science center.

Mr. Morin

103. Plant Evolution and Systematics. Lecture, three hours; laboratory, three hours. Prerequisite: course 2 or 5 or consent of instructor. Evolution, systematics, morphology, principles of taxonomy, phyto-geography, phylogenetic analysis, speciation, and natural history of plants. P/NP or letter grading.

Mr. A. Gibson

C104. Experimental Invertebrate Zoology (6 units). Lecture, two hours; laboratory, 12 hours. Prerequisites: courses 5, 5L, 6, consent of instructor. Advanced treatment of physiology, behavior, and ecology of invertebrates, with emphasis on independent laboratory and field investigations. Concurrently scheduled with course C212.

Mr. Hamner, Mr. Morin

105. Biology of Invertebrates (6 units). Lecture, three hours; laboratory/field trips, six hours. Prerequisites: courses 5, 5L, and 6, or consent of instructor. Introduction to systematics, evolution, natural history, morphology, and physiology of invertebrates.

Mr. Hamner, Mr. Morin

106. Experimental Marine Invertebrate Biology (4 or 6 units). Lecture, two hours; laboratory, 12 hours. Prerequisites: courses 105, and 166 or 167 (either may be taken concurrently), or equivalent, or consent of instructor. Offered either as a six-unit quarter-long course or as a four-unit Marine Biology Quarter course. Advanced course of natural history, physiology, biochemistry of invertebrates, with emphasis on independent laboratory and field investigations.

Mr. Hamner

107. Entomology (6 or 8 units). Prerequisites: courses 5, 5L, and 6, or consent of instructor. Offered either as a six-unit quarter-long course or as an eight-unit Field Biology Quarter course. Six-unit course has lecture, three hours; laboratory, six hours; additional field trips. Morphology, physiology, development, systematics, behavior, and ecology of insects. Eight-unit course covers same basic lecture and laboratory material in two and one-half intensive weeks, followed by extended field trip where students do individual field projects in insect biology.

Mr. Greenfield

108. Introductory Genetics. (Formerly numbered 8.) Lecture, three hours; discussion/demonstration, 90 minutes. Prerequisites: course 9 or equivalent, Chemistry 11B (may be taken concurrently). Not open for credit to students with credit for former course 8. Principles of Mendelian inheritance and chromosomal basis of heredity in prokaryotes and eukaryotes, recombination, biochemical genetics, mutation, DNA, genetic code, gene regulation, genes in populations.

C109. Introduction to Marine Science. Lecture, three hours; laboratory, three hours; weekend field trips. Prerequisites: courses 5, 5L, and 6, or consent of instructor. Strongly recommended for prospective MBQ students. Introduction to physical, chemical, and biological aspects of marine science. Emphasis on biological systems and natural communities. Concurrently scheduled with course C215.

110. Vertebrate Morphology (6 units). Lecture, three hours; laboratory, five hours. Prerequisites: courses 5, 5L, 6. Study of vertebrate morphology, function, and evolution from viewpoint of comparative anatomy of adult forms, biomechanics, development, and paleontology. Laboratory study of selected vertebrates.

Ms. Van Valkenburgh

111. Biology of Vertebrates. Lecture, three hours; demonstration/field trips/discussion, three hours. Prerequisites: courses 5, 5L, 6. Adaptations, behavior, and ecology of vertebrates.

Mr. Vitt

112. Ichthyology. Lecture, two hours; laboratory, six hours; field trips. Prerequisites: courses 5 and 6, or consent of instructor. Highly recommended: courses 110, 111. Biology of freshwater and marine fishes, with emphasis on their evolution, systematics, morphology, zoogeography, and ecology. Field trips examine fishes of the Southern California shoreline, tidepools, and coastal streams.

Mr. Buth

113A. Herpetology. Lecture, three hours; laboratory, four hours; two field trips. Prerequisites: courses 5, 6. Vertebrate zoology course restricted to biology of reptiles and amphibians of the world, covering current systematics, history, ecology, behavior, morphology, and physiology of these animals.

Mr. Vitt

113B. Field Herpetology. Prerequisites: courses 5, 6. Recommended: courses 111, 113A. Three weeks of off-campus research projects followed by two-week lecture course (three hours per day) and offered only as part of *Field Biology Quarter*. Biology, particularly ecology and behavior, of reptiles and amphibians in their natural habitat. Students carry out supervised research projects, then write up and orally present their results in seminar fashion.

Mr. Vitt

114. Ornithology. Lecture, two hours; laboratory/discussion/field trips, six hours. Prerequisites: course 111, consent of instructor. Limited enrollment. Systematics, distribution, physiology, behavior, and ecology of birds.

115. Mammalogy. Lecture, three hours; laboratory, four hours. Prerequisite: course 110 or 111 or equivalent or consent of instructor. Evolution, ecology, behavior, and physiology of mammals.

Ms. Van Valkenburgh

117. Vertebrate Paleontology. Lecture, three hours; laboratory, three hours. Prerequisite: course 110. Recommended: one general geology course. Fossil record of the evolution of vertebrates, with emphasis on paleobiology and morphology of tetrapods.

Ms. Van Valkenburgh

118. Plant Adaptations (8 units). Lecture, one hour; field trip, 10 hours. Prerequisites: completion of preparation for the major courses, consent of instructor. *Five-week course offered only as part of Field Biology Quarter.* Field-oriented introduction to mechanisms by which vascular plants adapt themselves to their abiotic and biotic environments using community, population, and ecophysiological levels of integration.

Mr. Rundel (Sp)

C119. Mathematical Ecology. (Formerly numbered 119.) Lecture, three hours. Prerequisites: Mathematics 31A, 31B, 32A. Differential equation models of population growth explore theory of evolutionary ecology to determine why natural environments of the world support the kinds of living organisms they do and why organisms of the world possess the adaptations they do. Concurrently scheduled with course C219.

Mr. Vance

120. Evolution. Lecture, three hours; discussion, two hours. Prerequisites: courses 5, 5L, 6, Mathematics 3A and 3B, or 31A. Recommended: course 108 or equivalent. Designed for biology majors specializing in environmental and population biology. Introduction to mechanics and processes of evolution, with emphasis on natural selection, population genetics, speciation, evolutionary rates, and patterns of adaptation. P/NP or letter grading.

Mr. Buth, Mr. Cody, Mr. Hesperheide

121. Molecular Biology and Evolution. Lecture, three hours; discussion, one hour. Prerequisites: courses 9 and 108 or equivalent. Not open for credit to students with credit for former course 144. Molecular biology, with emphasis on evolutionary aspects. DNA replication, RNA transcription, protein synthesis, gene expression, and molecular evolution.

Mr. Brunk (W)

122. Ecology. Lecture, three hours; laboratory, three hours. Prerequisites: courses 5, 5L, 6, and Mathematics 3A and 3B, or 31A, or consent of instructor. Highly recommended: Mathematics 31B, 32A. Recommended for biology majors specializing in environmental and population biology. Introduction to population and community ecology, with emphasis on growth and distributions of populations, interactions between species, and structure, dynamics, and functions of communities and ecosystems.

Mr. Cody, Mr. Greenfield

123. Ecology of Marine Communities. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisites: courses 5, 5L, and 6, or consent of instructor. Field study of natural history and ecology of marine organisms and communities, involving independent research project. Given off campus at a marine science center.

Mr. Vance

124. Field Ecology (4 or 8 units). Lecture, two hours; laboratory or field trip, 10 hours. Prerequisites: courses 5, 6. Recommended: courses 111, 120, 122. *Offered either as a four-unit quarter-long course with weekend field trips or as a single field trip conducted between quarters, followed by lectures and tutorials for three weeks. When course is given as part of Field Biology Quarter, it is eight units and lasts for five weeks.* Field and laboratory research in ecology; collection, analysis, and write-up of numerical data, with emphasis on design and execution of field studies.

Mr. Cody

125. Tropical Animal Communication (4 or 8 units). Prerequisites: courses 5, 6. *Offered either as a four-unit quarter-long course or as an eight-unit Field Biology Quarter course.* Four-unit course has lecture, three hours; discussion, two hours. Animal communication behavior, tropical vertebrate biology, and evolution of information processing systems. Eight-unit course covers same basic lecture material in five or six intensive weeks, followed by extended field trips where students do individual projects in animal communication.

Mr. Narins

C126. Behavioral Ecology (4 or 8 units). (Formerly numbered 126.) Prerequisites: course 6, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A, or consent of instructor. Not open for credit to students with credit for course 129. *Offered either as a four-unit quarter-long course or as an eight-unit Field Biology Quarter course.* Four-unit course has lecture, three hours; discussion, three hours. Animal communication behavior, island biogeography, and evolution of social behavior. Eight-unit course covers same basic lecture material in five intensive weeks, followed by extended field trip where students do individual projects in behavioral ecology. Concurrently scheduled with course C227.

Mr. Greenfield, Mr. Narins

M127. Soils, Plants, and Society. (Same as Geography M127.) Lecture, three hours; field trip. Prerequisites: Chemistry 11A, 11B, and 11C, or equivalent, or consent of instructor. General treatment of soil development and morphology and physical and chemical properties of soils as they relate to plant growth and distribution; soil resources, management, conservation, and cultural aspects. Use of soil profiles examined on field trip to explain developmental phenomena.

128. Plant Physiological Ecology. Lecture, three hours; laboratory/field, three hours. Study of plant/environment interactions under natural conditions. Emphasis on transpiration and photosynthesis, leaf temperatures, and water movement in soil/plant/atmosphere continuum. Individual student projects.

Mr. Nobel (W)

129. Animal Behavior. Lecture, three hours; discussion, two hours. Prerequisites: courses 5, 6, 108 or equivalent. Introduction to behavioral ecology. Methods and results of evolutionary approaches to study of animal behavior, including foraging strategies, social competition, sexual selection, mating systems, cooperation, and social organization.

Mr. R. Gibson

131. Insect Ecology (4 or 8 units). Lecture, two hours; laboratory or field trip, eight hours. Prerequisite: course 6. Recommended: courses 120, 122. *Offered either as a four-unit quarter-long course with weekend field trips or as an eight-unit Field Biology Quarter course with amount of fieldwork increased accordingly.* Analysis of ecological roles of insects in terrestrial communities, with emphasis on interactions with both plants and vertebrates. Group and individual field projects.

Mr. Greenfield, Mr. Hesperheide

132. Field Behavioral Ecology (8 units). Lecture, two hours; laboratory/field trip, 10 hours. Prerequisites: courses 5, 6. Recommended: course 129. *Five-week course offered only as part of Field Biology Quarter.* Field research in behavioral ecology, emphasizing animal communication. Design and execution of individual and small group field projects during extended field trip.

Mr. Greenfield, Mr. Narins

C134. Physiological Ecology of Desert Animals (4 or 8 units). Lecture, three hours; laboratory, one hour; field trips, four hours. Prerequisites: courses 111, and 166 or 167 or 170. *Offered either as a four-unit quarter-long course with weekend field trips or as an eight-unit Field Biology Quarter course with amount of fieldwork increased accordingly.* Consideration of physiological, behavioral, morphological, and ecological mechanisms desert animals use to enhance their survival in an arid habitat. Concurrently scheduled with course C214.

Mr. Nagy

135. Population Genetics. Lecture, three hours; discussion, one hour. Prerequisite: course 108 or equivalent. Highly recommended: Mathematics 31A, 31B. Basic principles of genetics of population, dealing with genetic structure of natural populations and mechanisms of evolution. Equilibrium conditions and forces altering gene frequencies, polygenic inheritance, molecular evolution, and methods of quantitative genetics.

Mr. Taylor

138. Developmental Biology. Lecture, three hours; discussion, one hour. Prerequisites: courses 9 and 108 or equivalent, 100A. Highly recommended: course 100B. Synopsis of fundamental concepts in embryology and survey of current topics in developmental biology.

Mr. Crews, Mr. Hartenstein, Ms. Lengyel

141. Molecular Basis of Plant Differentiation and Development. Lecture, three hours; discussion, one hour. Prerequisites: courses 5, 9 and 108 or equivalent, 100A. Highly recommended: course 100B. In-depth study of basic processes of development and molecular aspects of the developmental process as it relates to the plant kingdom. Discussion of a variety of developing systems (protists, fungi, lower and higher plants), with goal of developing a unified concept of differentiation.

Ms. Erickson, Ms. Tobin

142. Seminar: Topics in Developmental Biology (2 units). (Formerly numbered 142A-142B-142C.) Prerequisites: course 138, consent of instructor. Undergraduate seminar on topics in developmental biology. Reading and group discussions on current research. P/NP or letter grading.

145A-145B-145C. Molecular Biology Laboratory. Laboratory, 12 hours. Prerequisite: consent of instructor. Highly recommended: course 100A. Course in experimental molecular biology in which students carry out original research under supervision. Space is limited, and arrangements must be made in advance with instructor.
Mr. Salser (F,W,Sp)

146. Physicochemical Biology. Lecture, three hours; discussion, one hour. Prerequisites: courses 5, 9 or equivalent, or consent of instructor, Physics 6C or equivalent. Physicochemical analysis of physiology of cells and organelles, with emphasis on membranes, thermodynamics of solute and water movement, light absorption, and subcellular energy transduction.
Mr. Nobel (F)

147. Biological Oceanography. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisites: courses 5, 5L, 6, 9 or equivalent, Chemistry 11A, 11B/11BL, and 11C/11CL, or consent of instructor. Recommended: Chemistry 132A. Lectures include physical, chemical, and biological factors affecting composition and distribution of plankton. Natural history of major phytoplankton and zooplankton taxa; production in marine food chains; adaptation to pelagic habitats. Laboratory includes systematics, morphology of major plankton taxa; experimental studies of local marine plankton, with emphasis on measurement of feeding, primary and secondary productivity, and nutrient flux. Given off campus at a marine science center.
Mr. Muscatine

148. Biology of Marine Plants. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisites: courses 5, 5L, 9 or equivalent, Chemistry 11A, 11B/11BL, and 11C/11CL, or consent of instructor. Introduction to general biology of marine algae, including basics of structure reproduction, life histories, systematics, and introduction to physiology and ecology of marine algae. Techniques in culture and laboratory investigation and utilization of algae. Given off campus at a marine science center.
Mr. Chapman

C149. Cell and Molecular Biology of Plants. Lecture, three hours; discussion, one hour. Prerequisites: courses 9 and 108 or equivalent, 100A. Highly recommended: course 100B. Structure, function, and biogenesis of cells, with emphasis on organelles and metabolic processes specific to plants. Comparison with equivalent processes in algae and bacteria. Concurrently scheduled with course C220.
Mr. Thornber

150. Plant Chemical and Molecular Communication. Lecture, three hours; discussion, two hours. Prerequisites: courses 5, 5L, 9 or equivalent, Chemistry 11A, 11B/11BL, 11C/11CL. Introductory course in chemical ecology and how natural compounds affect gene expression. Emphasis on role of natural compounds in plant/microbe, plant/plant, and plant/herbivore interactions; synopsis of principles of plant defense mechanisms and responses to microbial infections.
Mr. Chapman, Ms. Hirsch

152. Functional Plant Anatomy. Lecture, three hours; laboratory, six hours. Prerequisite: course 5 or equivalent or consent of instructor. Structure and functional significance of various cell and tissue types in higher plants, plus patterns of growth and differentiation in roots, stems, leaves, flowers, and fruits.
Mr. A. Gibson, Ms. Hirsch

153. Cellular Physiology: Functional Histology. Prerequisites: courses 5, 5L, 9 or equivalent, Chemistry 11A, 11B/11BL, 11C/11CL, Mathematics 3A, 3B, 3C, Physics 6A, 6B, 6C. Emphasis on how cellular organelles (nucleus, mitochondria, smooth and rough endoplasmic reticulum, golgi apparatus, lysosomes, cytoskeleton, plasma membrane, extracellular matrix) contribute to function of tissues and organs in vertebrates.
Mr. Cascarano

153L. Laboratory for Cellular Physiology: Functional Histology (2 units). (Formerly numbered 153.) Laboratory, four hours. Corequisite: course 153. Exploration of microanatomy of vertebrate tissues and organs.
Mr. Cascarano

155. Genetics Methods. Discussion, two hours; laboratory, eight hours. Prerequisites: courses 100A and 108, or consent of instructor. Laboratory course in gene mapping and detection and analysis of gene variant by means of inheritance patterns.
Mr. Merriam (F)

CM156. Human Genetics. (Same as Biomathematics CM156.) Lecture, three hours; discussion, one hour. Prerequisites: courses 100A, 108 or equivalent, Chemistry 153A, 153L. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM256.
Mr. Merriam

157. Gene Manipulation: Genetic Engineering. Lecture, three hours; discussion, two hours. Prerequisite: course 100A or 138 or consent of instructor. Survey of methods and applications of recombinant DNA research as applied to both basic scientific research and the biotechnology industry.
Mr. Salser

158. Cell Biology (6 units). Lecture, three hours; laboratory, six hours. Prerequisites: courses 5, 5L, 9 and 108 or equivalent, Chemistry 11A, 11B/11BL, 11C/11CL. Cell biology of eukaryotic cells, with emphasis on correlation of structure and function at molecular, organelar, and cellular levels.
Mr. Cascarano

162. Plant Physiology (6 units). Lecture, four hours; laboratory, four hours. Prerequisites: courses 5, 9 or equivalent, Chemistry 153A, 153L. Basic aspects of plant function, including photochemical, biochemical, and physiological aspects of photosynthesis. Carbon and nitrogen metabolism and its regulation; organelar interactions and compartmentation. Water relations, ion transport, flowering, hormone action, and plant responses to stress.
Ms. Gonzalez, Mr. Zeiger

163. Biology of Marine Tetrapods. Five-week intensive course. Lecture, five hours; laboratory and fieldwork, 15 hours. Prerequisites: courses 5, 5L, 6, 9 or equivalent, Chemistry 11A, 11B/11BL, 11C/11CL. Highly recommended: course 111. Survey of "higher" vertebrates living in marine habitats, including estuarine amphibians, marine reptiles, seabirds, and marine mammals. Laboratory emphasizes observational and experimental approaches to study of morphology, systematics, ecology, and behavior of local marine birds and mammals. Given off campus at a marine science center.

164. Field Biology of Marine Fishes. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisites: courses 5, 5L, 6, or consent of instructor. Recommended: Mathematics 3A, 3B, 3C. Selected aspects of natural history, ecology, and behavior of the diverse assemblage of local marine fishes. Fieldwork strongly emphasized. Given off campus at a marine science center.
Mr. Buth

165. Ecological Physiology of Marine Vertebrates. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisites: courses 5, 5L, 6, 9 or equivalent, Chemistry 11A, 11B/11BL, and 11C/11CL, or consent of instructor. Recommended: Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A, Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL. Introduction to physiological adaptations of marine vertebrates to major physicochemical variables in the oceans of the world and to major marine habitats. Laboratory work emphasizes marine vertebrates of Southern California waters. Given off campus at a marine science center.
Mr. Gordon

166. Animal Physiology (6 units). Lecture, three hours; laboratory, five hours. Prerequisites: courses 5, 5L, 9 or equivalent, Chemistry 11A, 11B/11BL, 11C/11CL. Not open for credit to students with credit for course 167 or 170. Introduction to physiological principles, with emphasis on organ systems and intact organisms.

167. Regulatory Physiology (6 units). Lecture, three hours; laboratory, five hours. Prerequisites: courses 5, 5L, 9 or equivalent, Chemistry 11A, 11B/11BL, 11C/11CL. Not open for credit to students with credit for course 166 or 170. Introduction to whole animal and organ physiology. Primary considerations to neuronal and endocrine regulations of body functions and integration of organ systems.
Mr. Engelmann

168. Insect Physiology. Lecture, two hours; laboratory, six hours. Prerequisite: course 158 or 166 or 167 or equivalent. Survey of physiology of insects, with emphasis on functional adaptations.
Mr. Engelmann

170. Animal Environmental Physiology (6 units). Lecture, three hours; laboratory, eight hours. Prerequisites: courses 5, 5L, 9 or equivalent, Chemistry 11A, 11B/11BL, 11C/11CL. Not open for credit to students with credit for course 166 or 167. Recommended for students with interests in zoology or concentration in ecology, behavior, and evolution (EBE). Introduction to animal function, especially concerning exchanges of energy and materials between organism and environment.
Mr. Nagy

171. Principles of Neurobiology. Lecture, three hours; discussion, one hour. Prerequisite: course 166 or consent of instructor. Introduction to basic principles of neurobiology, including description of the structure of neurons and nervous systems; ionic mechanisms responsible for generating membrane potentials, action potentials, and synaptic potentials; properties of synaptic transmission, information transduction and coding in sensory pathways, and neural control of movement; development of and trophic interactions between cells of the nervous system.
Mr. O'Lague

172A-172B. Introductory Laboratory in Neurophysiology. Laboratory, eight hours. Prerequisite: course 171 or consent of instructor. Limited enrollment. Courses must be taken concurrently. Laboratory investigation of function of central and peripheral nervous systems in invertebrates and vertebrates. Emphasis on electrophysiological approaches to basic neurophysiological problems.
Mr. O'Lague

M173. Anatomy and Physiology of Sense Organs. (Formerly numbered 173.) (Same as Physiological Science M173.) Lecture, three hours; discussion, one hour. Prerequisites: courses 171 (or Physiological Science 111A) or M175A-M175B (or Physiological Science M180A-M180B) or equivalent. Structure and function of sense organs. Adoption of quantitative and comparative approach to provide insight into evolution of sense organs in both invertebrates and vertebrates.
Mr. Fain, Mr. Narins, Mr. Simmons

174A-174F. Advanced Topics in Cell and Molecular Biology (2 units each). (Formerly numbered 174.) Lecture, three hours; discussion, one hour. Series of five-week two-unit courses on recent developments in fields of cell and molecular biology. Two courses to be presented in succession in same term whenever offered; students may take either or both:

174A. Molecular Evolution. Prerequisites: courses 100B, 108, Chemistry 153B. Current developments in the field of molecular evolution. Constructing evolutionary trees at molecular level; formal testing of evolutionary hypotheses using sequencing data.
Mr. Lake

174B. Molecular Biology and Cell Nucleus. Prerequisites: courses 100B, 108, Chemistry 153B. Animal cell nucleus regulation of cell metabolism. Structure/function relationships, nuclear-cytoplasmic exchange, DNA replication and gene expression.
Ms. Kasamatsu

174C. Eukaryotic DNA Replication and Cell Cycle Control. Prerequisites: courses 100B, 108, Chemistry 153B. Enzymatic mechanisms of DNA replication, protein kinases and cell cycle control, regulation of genes encoding DNA replication proteins.

Mr. Ray

174D. Molecular Biology of Extracellular Matrix. Prerequisites: courses 100B, 108, Chemistry 153B. Recommended: course 138. Synthesis of key extracellular matrix proteins and their assembly into supramolecular structures. Interactions of matrix proteins with cells and their influence on tissue formation.

Mr. Fessler

174E. Chromosome Structure and Gene Expression. Prerequisites: courses 100B, 108, Chemistry 153B. Genetic and biochemical approaches to analysis of relation between chromosome structure, genetic regulatory factors, and gene expression.

Mr. Grunstein

174F. Molecular Parasitology. Examination of recent advances in molecular biology of parasites and host/parasite relationship. Specific topics include parasite development, antigenic variation in trypanosomes, RNA editing, prospects for parasitic vaccines.

Mr. Simpson

M175A-M175B-M175C. Neuroscience: From Molecules to Mind (5 units each). (Same as Physiological Science M180A-M180B-M180C and Psychology M117A-M117B-M117C.) Lecture, four hours; discussion, one hour. P/NP or letter grading:

M175A. Cellular Mechanisms. Prerequisites: course 9 or equivalent, Physics 3B or 6B or 8C. Cellular physiology, pharmacology, molecular biology, and development of the nervous system. (F)

M175B. Integrative Mechanisms. Prerequisite: course 171 (or Physiological Science 111A or Psychology 115) or M175A (or Physiological Science M180A or Psychology M117A). Central and reflex mechanisms of homeostasis, sensory information processing, and motor control. (W)

M175C. Neural Bases of Behavior. Prerequisite: course M175B (or Physiological Science M180B or Psychology M117B) or former Kinesiology 126 or Psychology 115. Neural mechanisms underlying motivation, learning, and cognition. (Sp)

179. Invertebrate Endocrinology. Lecture, three hours. Prerequisite: course 158 or 166 or 167 or consent of instructor. Comprehensive treatment of invertebrate endocrinology. Mr. Engelmann

181. Parasitology and Symbiosis (6 units). Lecture, three hours; laboratory, six hours. Prerequisites: courses 5, 9 or equivalent. Introduction to principles, biology, and evolution of infectiousness, symbiosis, and parasitism, emphasizing protozoan and helminth parasites, including those of man.

182. Experimental Parasitology. Laboratory, eight hours. Prerequisite: consent of instructor. Introduction to use of parasites in experiments concerning basic biological problems and to problems concerning parasitism.

M185A. Fundamentals of Immunology. (Formerly numbered CM185.) (Same as Microbiology M185A and Microbiology and Immunology M185A.) Lecture, three hours; discussion, one hour. Prerequisite: course 108 or equivalent. Recommended prerequisites or corequisites: courses 100A, 100B, Chemistry 153A, 153L. Introduction to experimental immunology and immunochemistry; cellular and molecular aspects of humoral and cell immune reactions.

Mr. Clark, Ms. Morrison

CM185B. Immunology. (Same as Microbiology CM185B.) Lecture, three hours; discussion, two hours. Prerequisite: course M185A or equivalent. Suitable for undergraduate students with a grade of C or better in course M185A or equivalent, or for graduate students. Advanced treatment of major issues in contemporary immunology, using analysis of experiments as basis for discussion. Concurrently scheduled with course CM285B.

Mr. Aguilera, Mr. Kronenberg, Mr. Sercarz

188. Seminar: Biology and Society (2 units). Prerequisite: consent of instructor. Investigations and discussions of current socially important issues involving substantial biological considerations, either or both as background for policy and as consequences of policy. May be repeated once for credit.

M189A-M189B. Theoretical Behavioral Ecology. (Same as Anthropology M189A-M189B.) Lecture, three hours. Prerequisites: one upper division introduction to behavioral ecology course, one university-level mathematics course (preferably calculus or probability and statistics). Course M189A or consent of instructor is prerequisite to M189B. Students expected to do simple algebra, elementary calculus, and probability. A rich body of mathematical theory describing the evolution of animal behavior exists. Introduction to this body of theory at a pace and mathematical level that allows students to grasp this information. Within each area of theory (e.g., kin selection, optimal foraging theory, etc.), presentation of basic corpus of models so that students understand assumptions that underlie the models, and how main results are derived. Presentations supplemented by a survey of results printed in the literature, especially those derived using more advanced methods.

Mr. Boyd

190A-190D. Honors Research in Biology (2 to 4 units each). Prerequisites: course 5L, senior standing, consent of undergraduate adviser. Individual research designed to broaden and deepen students' knowledge of some phase of biology. Must be taken with Biology Department faculty for at least two terms and for a total of at least eight units. In Progress grading (credit to be given only on completion of course 190B). Students may elect to enroll in additional research through courses 190C-190D (letter grading). A report on progress must be presented to undergraduate adviser each term a 190 course is taken. A maximum of eight units may be applied toward biology major. (F,W,Sp)

199. Special Studies (2 to 16 units). Prerequisites: course 5L, consent of instructor and undergraduate adviser based on written proposal outlining the study or research to be undertaken. Proposal should be worked out in consultation with instructor and submitted for approval to undergraduate adviser before the day instruction begins in that term. At end of term a report describing progress of the study or research and signed by the student and instructor must be presented to undergraduate adviser. Students who wish to take more than eight units of course 199 in any one term must obtain authorization from department chair and appropriate dean. Only one 199 course may be applied toward biology major. (F,W,Sp)

Graduate Courses

Consent of instructor is required for admission to all graduate courses. Additional prerequisites are stated in the course descriptions.

200. Research Trends in Integrative Biology (1 to 2 units). Lecture, one hour; discussion, two hours (Winter Quarter only). Limited to and required of all first-year integrative biology graduate students in Fall, Winter, and Spring Quarters. Orientation to integrative biological research, achieved through integrative biology division's weekly seminar series together with weekly discussions of recently published articles on related topics. Final examination uses departmental written qualifying examination format. S/U or letter grading. (F,W,Sp)

201. Use of the Computer in Biology (2 units). (Not the same as course 201 prior to Spring Quarter 1989.) Lecture, two hours; laboratory, one hour. Introduction to use of IBM PC microcomputer and VAX minicomputer in biological research. S/U grading.

Mr. Simpson

202. Principles of Systematics and Taxonomy. Lecture, three hours; discussion, two hours. Prerequisite: course 120. Concepts, principles, and methods involved in the inference of evolutionary relationships and application of biological nomenclature.

Mr. Buth

203. Marine Botany and Physiology. Lecture, two hours; discussion, one hour; laboratory, six hours; experimental project. Prerequisites: graduate standing, consent of instructor. Structure, reproduction, life histories, and biology of marine algae, with emphasis on physiological ecology and biochemistry. Techniques in culture and physiological, ecological, and biochemical investigation of algae. Given off campus at a marine science center.

204. Advanced Biology of Algae. (Formerly numbered 204A.) Lecture, four hours; discussion, one hour. Prerequisite: consent of instructor. Consideration of current research in experimental phyecology. Topics include discussion of appropriate aspects of chemical and physical oceanography and limnology; algal physiology; biochemistry, physiological ecology, and algal processes in ocean and freshwater habitats.

Mr. Chapman

205. Marine Invertebrate Biology. Lecture, four hours; laboratory, eight hours. Prerequisite: consent of instructor. Functional morphology, life histories, and systematics of marine invertebrates of all major and most minor taxa; emphasis on the living animal and its habitat. Given off campus at a marine science center.

206. Advanced Ichthyology. Lecture, three hours; laboratory, three hours. Prerequisite: course 111 or 112. Advanced study of various aspects of fish biology. Theme varies from year to year. May be repeated for credit.

Mr. Buth

208. Advanced Vertebrate Morphology. Lecture, two hours; laboratory, eight hours. Prerequisites: course 110 or equivalent, consent of instructor. Emphasis on a functional approach to evolution of vertebrate locomotor, feeding, and circulatory systems. Laboratory includes comparative and experimental analyses of morphological adaptation. Independent project required. May be repeated once for credit.

Ms. Van Valkenburgh

209. Behavior of Arthropods. Lecture, three hours; discussion, one hour. Prerequisites: course 105 or 107 or equivalent, consent of instructor. Advanced study of topics in behavior of terrestrial arthropods, including communication, feeding, reproductive, and social behavior. Emphasis on both mechanistic and adaptive approaches toward understanding behavior. Independent project required. Mr. Greenfield

210. Advanced Ornithology. Lecture, two hours; laboratory, two hours; fieldwork, two hours. Prerequisites: course 114 or equivalent, consent of instructor. Advanced study of topics in modern avian biology. Emphasis on experimental approaches to investigations of physiology (energetics, nutrition, osmoregulation), ecology (population and community organization), and behavior (foraging, breeding, sociality).

211. Physiology and Ecology of Digestion. (Not the same as course 211 prior to Spring Quarter 1989.) Lecture, two hours; discussion, two hours; laboratory, two hours. Prerequisite: course 166 or 167 or 170 or equivalent. Introduction to function of digestive systems and intestinal adaptations to diet, stage of development, and nutritional state. Principles of digestion and membrane transport emphasized in lecture and discussion sections; modern techniques taught in laboratory. Students conduct individual projects in lab and field.

C212. Experimental Invertebrate Zoology (6 units). Lecture, two hours; laboratory, 12 hours. Prerequisites: courses 5, 5L, 6, consent of instructor. Advanced treatment of physiology, behavior, and ecology of invertebrates, with emphasis on independent laboratory and field investigations. Concurrently scheduled with course C104.

Mr. Hamner, Mr. Morin

C214. Physiological Ecology of Desert Animals (4 or 8 units). Lecture, three hours; laboratory, one hour; field trips, four hours. Prerequisites: courses 111, and 166 or 167 or 170. Offered either as a four-unit quarter-long course with weekend field trips or as an eight-unit Field Biology Quarter course with amount of fieldwork increased accordingly. Consideration of physiological, behavioral, morphological, and ecological mechanisms desert animals use to enhance their survival in an arid habitat. Concurrently scheduled with course C134. Mr. Nagy

C215. Introduction to Marine Science. (Formerly numbered C219.) Lecture, three hours; laboratory, three hours; weekend field trips. Prerequisites: courses 5, 5L, and 6, or consent of instructor. Strongly recommended for prospective MBQ students. Introduction to physical, chemical, and biological aspects of marine science. Emphasis on biological systems and natural communities. Concurrently scheduled with course C109.

216. Quantitative Methods in Behavior and Ecology. Lecture, two hours; laboratory, six hours. Prerequisites: course 122 or 129 or equivalent, consent of instructor. Quantitative methods of data collection and analysis in behavioral and ecological research. Lectures review general nature of quantitative problems that arise in behavior and ecology and statistical methods used to solve them. Laboratory exercises emphasize analysis, using comprehensive statistical software routines on personal microcomputers, of the kinds of data that frequently arise in field biological research. Mr. R. Gibson

217. Marine Ecology. Lecture, four hours; discussion, one hour. Prerequisites: graduate standing, consent of instructor. Structure, diversity, and energetics of marine communities; behavior, population dynamics, and biogeography of component species; associated oceanography and geology. Given off campus at a marine science center. Mr. Vance

218. Oceanology. Lecture, four hours; discussion, one hour. Prerequisites: graduate standing, consent of instructor. Ecology and dynamics of pelagic and benthic associations; physicochemical properties of seawater and marine substrates and their biological significance; qualitative and quantitative methods of oceanology. Given off campus at a marine science center.

C219. Mathematical Ecology. (Formerly numbered 215.) Lecture, three hours. Prerequisites: Mathematics 31A, 31B, 32A. Differential equation models of population growth explore theory of evolutionary ecology to determine why natural environments of the world support the kinds of living organisms they do and why organisms of the world possess the adaptations they do. Concurrently scheduled with course C119. Mr. Vance

C220. Cell and Molecular Biology of Plants. Lecture, three hours; discussion, one hour. Prerequisites: courses 9 and 108 or equivalent, 100A. Highly recommended: course 100B. Structure, function, and biogenesis of cells, with emphasis on organelles and metabolic processes specific to plants. Comparison with equivalent processes in algae and bacteria. Concurrently scheduled with course C149.

Mr. Thornber

224. Marine Molecular Biology (8 units). (Formerly numbered 224T.) Lecture, three hours; laboratory, eight hours. Prerequisites: background in marine sciences, basic cell biology and biochemistry, consent of instructor. Ten-week intensive course designed to train marine biologists in advanced techniques of cell and molecular biology. Independent project required. Given off campus at a marine science center.

M226A-M226B. Principles of Microbial Pathogenesis. (Same as Microbiology M226A-M226B and Microbiology and Immunology M226A-M226B.) Lecture, one hour; discussion, three hours. Prerequisites: Microbiology and Immunology 202A, 202B, 202C, and 202D, or equivalent, or consent of instructor. Lecture/discussion format designed to analyze basic pathogenesis of infections. Emphasis on molecular and cellular approaches to understand host-microbial interaction. **M226A.** Bacterial and Mycotic Infections; **M226B.** Parasitic and Viral Infections.

Mr. Ahmed

C227. Behavioral Ecology (4 or 8 units). Prerequisites: course 6 and Mathematics 3 or 31 series, or consent of instructor. Offered either as a four-unit quarter-long course or as an eight-unit Field Biology Quarter course. Four-unit course has lecture, three hours; discussion, three hours. Animal communication behavior, island biogeography, and evolution of social behavior. Eight-unit course covers same basic lecture material in five intensive weeks, followed by extended field trip where students do individual projects in behavioral ecology. Concurrently scheduled with course C126. S/U or letter grading.

Mr. Greenfield, Mr. Narins

228. Prokaryotic and Eukaryotic Gene Systems (2 units). Presentations concerning current experimental approaches in study of DNA replication, organization, transcription, and translation.

Mr. Grunstein, Mr. Ray

229. Structural Macromolecules. Lecture, three hours; discussion, one hour. Comprehensive molecular biology of selected structural proteins and polysaccharides, including cellular synthesis, structure and physical properties, and integrated biological functions.

Mr. Fessler

M230B. Structural Molecular Biology. (Same as Chemistry M230B.) Lecture, three hours; discussion, one hour. Prerequisites: Physics 6C, Mathematics 3C, consent of instructor. Selected topics from principles of biological structure: structures of globular proteins and RNAs; structures of fibrous proteins, nucleic acids, and polysaccharides; harmonic analysis and Fourier transforms; principles of electron, neutron, and X-ray diffraction; optical and computer filtering; three-dimensional reconstruction. S/U or letter grading.

Mr. Eisenberg

M230D. Structural Molecular Biology Laboratory (2 units). (Same as Chemistry M230D.) Laboratory, 10 hours. Corequisite: course M230B. Methods in structural molecular biology, including experiments utilizing single crystal X-ray diffraction, low angle X-ray diffraction, electron diffraction, optical diffraction, optical filtering, three-dimensional reconstruction from electron micrographs, and model building.

Mr. Eiserling, Mr. Lake

231A-231B-231C. Advanced Evolutionary Biology. (Formerly numbered M231A, 231B.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Series of advanced studies of concepts and methods in evolutionary biology. Topics may include speciation, extinction, coevolution, fossil record, rates of evolution, contributions of molecular biology in evolutionary studies, and development of evolutionary thought. Students encouraged to take each course in sequence. Themes vary from year to year. May be repeated for credit. S/U or letter grading.

231A. Mechanisms of Evolution. Prerequisites: courses 120 and/or 135 or equivalent; **231B.** Patterns of Evolution; **231C.** Molecular Evolution.

M233. Principles, Practices, and Policies in Biotechnology (2 units). (Same as Biological Chemistry M233, Chemical Engineering M233, Chemistry M233, Microbiology M233, Microbiology and Immunology M233, and Radiological Sciences M233.) Prerequisite: graduate standing or consent of instructor. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. S/U or letter grading.

Mr. Fox, Ms. Morrison

234A. Genetic Control of Development. Especially intended for first- and second-year graduate students as overview of research questions on developmental biology available within Biology Department and of significant new advances in the discipline. Fundamental questions in developmental biology, with examples from current literature. Topics include differential gene activity, gene localization, maternal effect and homeotic mutations, determined cell state, cell identification, hormone receptors and hormone-mediated responses, and developmental neurobiology and emphasize analysis of genes implicated in development. Students strongly encouraged to take both courses 234A and 234B, since these represent a survey of modern biology as appropriate preparation for graduate study. S/U or letter grading.

234B. Advanced Topics in Cell Biology. Lecture, two hours; discussion, two hours. Especially intended for first- and second-year graduate students as overview of research questions on cell biology available within Biology Department and of significant new advances within the discipline. Fundamental questions in cell biology, with examples from current literature.

235. Current Topics in Escherichia coli Genetics (2 units). Prerequisite: course 596. Seminar on topics from current literature in *Escherichia coli* molecular genetics, with emphasis on using nonsense suppression to effect protein engineering and to study mechanisms of mutagenesis.

236. Seminar: Marine Molecular Biology. (Not the same as course 236 prior to Spring Quarter 1989.) Discussion, 10 hours. Prerequisites: course 224, consent of instructor. Seminar on current issues and work in marine molecular biology. Given off campus at a marine science center.

M237. Introduction to Cellular Physiology and Biophysics (6 units). (Same as Physiology Science M212 and Physiology M212.) Lecture, five hours. Prerequisites: graduate standing, consent of department and instructor; for upper division undergraduates: consent of instructor. Development of fundamental physiological and biophysical concepts associated with all membranes, membrane channels and transporters, membrane potential, membrane excitability, electrical signal transmission and transduction, and muscle contraction and their application to study of basic cellular processes. Emphasis in laboratory on development of skills using computer programming languages, spreadsheets, and graphics for modeling and analysis of cellular processes.

238. Structure, Function, and Biogenesis of the Mitochondrion. Lecture, three hours. Prerequisites: course 158, consent of instructor. Origin, maintenance, and function of the mitochondrion as example of a highly organized subcellular organelle in the eukaryotic cell.

Mr. Simpson

240. Physiology of Marine Animals. Lecture, four hours; discussion, one hour. Prerequisite: graduate standing or consent of instructor. Lecture and laboratory studies on cellular, tissue, organ, and animal physiology; regulatory biology; metabolic characteristics of cells, energy transformations. Given off campus at a marine science center.

241. Laboratory in Advanced Electrophysiology (8 units). Laboratory, 12 hours. Prerequisites: courses 172A-172B or equivalent, consent of instructor. In-depth involvement in individual research projects under staff guidance. Approximately two projects each term. May be repeated twice for credit.

Mr. O'Lague

242. Topics in Neurobiology. Lecture, three hours. Prerequisites: course 171 or equivalent, consent of instructor. Selected current problems in neurobiology discussed in depth, with emphasis on analysis of original papers. May be repeated for credit.

Mr. O'Lague

243. Animal Communication. Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 3C, Physics 6C, consent of instructor. Open to qualified undergraduates with consent of instructor. Physical properties of animal signals and physiological mechanisms underlying their generation and reception. Lectures treat signal analysis, signal transmission, and receptor design in light of constraints placed on each of the sensory modalities. Examples of communication systems using visual, auditory, chemical, electrical, and magnetic cues, with emphasis on biological adaptations for efficiently signaling species-specific information.

Mr. Narins

244. Advanced Insect Physiology. Lecture, two hours; laboratory, five hours. Prerequisite: course 168 or consent of instructor. Detailed discussion of current problems in insect physiology, with advanced laboratory.

Mr. Engelmann

245. Advanced Topics in Cell Biology (2 units). Seminar, one hour; discussion, one hour. Prerequisite: course 138 or 158 or equivalent. Includes seminar section on a current topic in cell biology and discussion section on seminar topic. Students prepare one such seminar each term, using reading list provided as background, and select a topic with aid of current literature and consent of instructor. May be repeated for credit. S/U grading.

M246. Computer Analysis of Genetic Organization. (Same as Microbiology M246.) Lecture, two hours; laboratory, six hours. Prerequisites: courses 100A and 108 or equivalent, or Microbiology C119 or equivalent. Lectures and laboratory instruction in contemporary procedures for analysis of nucleic acid and protein sequence data with the computer. No prior computer experience necessary; students gain both general and specialized facility with IBM PC and Digital VAX computers.

Mr. Nierlich, Mr. Simpson (F, alternate years)

247. Advanced Plant Biology. Lecture, three hours; discussion, two hours. Prerequisite: course 141 or 162 or equivalent. Open to undergraduates with consent of instructor. Designed to expose first-year graduate students to topics of current interest in plant biology. Subjects include plant genetics, growth and development, organelle structure, development and function, and plant-specific metabolic processes (photosynthesis, nitrogen fixation, metabolism of small molecules). S/U or letter grading.

M248. Molecular Genetics. (Same as Biological Chemistry M248 and Microbiology M248.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in biochemistry and molecular biology. Topics include mutagenesis, mutant selection, recombination, genetic mapping, complementation, transposable elements, gene organization, genetic regulation, and molecular evolution.

249. Biochemistry of Parasitism. Lecture, three hours. Biochemical and physiological aspects of parasite/host relationships.

251. Seminar: Systematics (2 units). Discussion, two to four hours. Prerequisite: consent of instructor. Current topics in systematic biology, including methods development and specific applications in study of phylogeny. Theme varies from year to year. May be repeated for credit.

Mr. Buth

253. Seminar: Plant Structure (2 units).

Mr. A. Gibson

254. Seminar: Plant Morphogenesis (2 units).

Ms. Hirsch

255. Seminar: Invertebrate Zoology (2 units).

Mr. Morin, Mr. Muscatine

CM256. Human Genetics. (Same as Biomathematics CM256.) Lecture, three hours; discussion, one hour. Prerequisites: courses 100A, 108 or equivalent, Chemistry 153A, 153L. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM156. Independent research project required of graduate students.

Mr. Merriam

257. Gene Manipulation: Genetic Engineering. Lecture, three hours; discussion, two hours. Prerequisite: course 100A or 138 or consent of instructor. Survey of methods and applications of recombinant DNA research as applied to both basic scientific research and the biotechnology industry.

Mr. Salsler

257B. Gene Manipulation: Advanced Course (2 units). Lecture, 90 minutes; discussion, one hour. Prerequisite: course 157 or 257. Additional topics in methods and applications of recombinant DNA research as applied to both basic scientific research and the biotechnology industry. S/U or letter grading.

Mr. Salsler

M258A. Molecular Genetic Mechanisms of Immune Response (2 units). (Same as Microbiology M258A and Microbiology and Immunology M258A.) Lecture, two hours; discussion, two hours. Prerequisite: course CM185B or CM285B or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on immunoglobulin I and II, oncogenes of immune system, T cell antigen receptor, and loci affecting differentiation. S/U or letter grading.

Mr. Kronenberg, Mr. Wall (W, five weeks)

M258B. Biology of B Cells: Development, Repertoire, and Activation (2 units). (Same as Microbiology M258B and Microbiology and Immunology M258B.) Lecture, two hours; discussion, two hours. Prerequisite: course CM185B or CM285B or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on B cell development, repertoire, and growth and differentiative regulation. S/U or letter grading.

Mr. Braun, Mr. Stevens (W, five weeks)

M258C. T Cells and the MHC (2 units). (Same as Microbiology M258C and Microbiology and Immunology M258C.) Lecture, two hours; discussion, two hours. Prerequisite: course CM185B or CM285B or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on structure of human and murine MHC chromosomal regions and genes, T cell recognition of mite products and foreign antigens, MHC polymorphism, MHC-like systems, MHC-linked genes, MHC and disease, and nonimmune function of MHC. S/U or letter grading.

Mr. Bonavida, Mr. Clark (Sp, five weeks)

M258D. Molecular Interactions in Immune Responses (2 units). (Formerly numbered M258F.) (Same as Microbiology M258D and Microbiology and Immunology M258D.) Lecture, two hours; discussion, two hours. Prerequisite: course CM185B or CM285B or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on immunochemistry of antibodies, antigens, and complement, antigenic recognition, antibody restriction. S/U or letter grading.

Ms. Morrison (F, five weeks)

M258E. Immunopathology: Immunology of Disease (2 units). (Formerly numbered M258D.) (Same as Microbiology M258E and Microbiology and Immunology M258E.) Lecture, two hours; discussion, two hours. Prerequisite: course CM185B or CM285B or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on tolerance and autoimmunity, autoimmune disease models, immune complex disease, immediate hypersensitivity and its cellular basis, and natural and acquired immune deficiency disease. S/U or letter grading.

Mr. Porter (Sp, five weeks, alternate years)

M258F. Immune Regulation (2 units). (Formerly numbered M258E.) (Same as Microbiology M258F and Microbiology and Immunology M258F.) Lecture, two hours; discussion, two hours. Prerequisite: course CM185B or CM285B or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on idiotype networks, suppressor T cells, tolerance at T and B cell levels, and Ir gene control. S/U or letter grading.

Mr. Sercarz (F, five weeks)

259. Seminar: Herpetology (2 units). Discussion, three hours. Prerequisite: consent of instructor. Seminar on current approaches to herpetology. Main theme varies from year to year in areas such as biogeography, ecology, behavior, environmental physiology.

Mr. Vitt

260. Seminar: Biology of Terrestrial Vertebrates (2 units).

Mr. R. Gibson

261. Molecular Neurobiology. Lecture, two and one-half hours; discussion, one hour. Prerequisites: courses 100A and 171, or consent of instructor. Examination of impact of molecular biology on study of neuroscience. Topics include molecular biological approaches to structure and function of proteins important in nervous system, gene expression and regulation in nervous system, neural development, learning behavior, and neurological disease. S/U or letter grading.

Mr. Tobin

262. Seminar: Vertebrate Paleontology (2 units).

Ms. Van Valkenburg

263. Seminar: Population Genetics (2 or 4 units). Discussion, three to six hours. Prerequisite: consent of instructor. Seminar on topics of current interest in population genetics, such as kin selection, sociobiology, cultural evolution, conservation genetics, etc.

Mr. Taylor

264. Seminar: Stomatal Function. Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Open to undergraduates with consent of instructor. Structure and function of guard cells; gas exchange; environmental and hormonal regulation of stomatal responses; sensory transduction; stomatal adaptations.

Mr. Zeiger

265. Seminar: Biophysical Plant Ecology (2 units).

Mr. Nobel

M266A-M266B-M266C. Seminars: Molecular Embryology (2 units each). (Same as Biological Chemistry M266A-M266B-M266C.) Prerequisite: consent of instructor. Advanced course in developmental genetics and biochemistry, with emphasis on early development. Intended mostly for students actively working or highly interested in embryology. S/U grading.

Ms. Lengyel, Mr. Merriam

267. Seminar: Current Topics in Evolutionary Ecology (2 units).

Mr. Cody

268. Seminar: Population Biology (2 units).

Mr. Cody, Mr. Hespenheide, Mr. Vance

269. Seminar: Animal Ecology (2 units). Discussion, three hours. Advanced study of specific topics in animal ecology and related fields.

Mr. Cody, Mr. Hespenheide

270. Seminar: Environmental Physiology (2 units). S/U grading.

Mr. Nagy

271. Seminar: Phycology and Mycology (2 units). Prerequisite: course 101A or equivalent or consent of instructor. Advanced study in biology of algae and fungi. Topics in physiological ecology, physiology, and biochemistry of algae and fungi, and their industrial uses. Algae and fungi as experimental organisms. Phylogeny and origin of eukaryote organisms. Evolutionary origin of chloroplasts. Mr. Chapman

272. Seminar: Marine Biology (2 units). Mr. Gordon, Mr. Morin, Mr. Muscatine

273. Seminar: Entomology (2 units). Discussion of specific topics in entomology and related fields. Main theme varies from year to year, but usually emphasizes areas such as behavior, ecology, and evolution. S/U grading. Mr. Greenfield

274. Seminar: Behavioral Ecology (2 units). Discussion of theoretical and empirical aspects of topics in behavioral ecology. S/U or letter grading.

Mr. R. Gibson (W)

276. Seminar: Molecular Genetics (2 units). Topics vary each term. Mr. Salser

277. Seminar: Genetics (2 units). Mr. Hartenstein, Mr. Laski

278. Seminar: Molecular Genetics of Development (2 units). Prerequisites: graduate standing, consent of instructor. Topics vary from year to year, with focus on establishment of position and pattern during embryogenesis by interaction of signal transduction systems and transcription factors. S/U or letter grading. Ms. Lengyel

279. Seminar: Molecular Neurobiology (2 units). Seminar, three hours; laboratory, three hours. Prerequisites: graduate standing, consent of instructor. Current topics in molecular and developmental neurobiology. S/U or letter grading.

Mr. Crews, Mr. Tobin

M280. Cellular and Molecular Developmental Neurobiology. (Same as Anatomy M204, Neuroscience M204, Physiology M204, and Psychiatry M204.) Lecture, three hours; discussion, one hour. Prerequisites: Neuroscience M201, M202, and M203, or Biological Chemistry 201A-201B, or consent of instructor. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging. (W)

281. Seminar: Molecular Biology (2 units). Mr. Brunk, Mr. Fessler, Ms. Kasamatsu, Mr. Ray

282. Seminar: Ichthyology (2 units). Prerequisite: course 111 or 112. Student presentations and discussion of specific topics in ichthyology. Theme varies from year to year. May be repeated for credit.

Mr. Both

283. Seminar: Topics in Cell Biology (2 units). Discussion of various topics on biology of eukaryotic cells. Topics vary from year to year and include bioenergetics, motility, organelle DNA, membrane structure and function, oncogenic transformation, nuclear organization and function. Mr. Simpson

284. Seminar: Structural Macromolecules (2 units). Lecture, one hour; discussion, three hours. Prerequisites: courses 100A, 138, and/or consent of instructor. In-depth analysis of current problems in biology, biochemistry, and molecular biology of structural macromolecules, involving critical evaluation of recent findings and publications on biosynthesis, structure, and biodegradation of these molecules.

Mr. Fessler

CM285B. Immunology. (Same as Microbiology CM285B and Microbiology and Immunology M285B.) Lecture, three hours; discussion, two hours. Prerequisite: course M185A or equivalent. Suitable for undergraduate students with a grade of C or better in course M185A or equivalent, or for graduate students. Advanced treatment of major issues in contemporary immunology, using analysis of experiments as basis for discussion. Concurrently scheduled with course CM185B.

Mr. Aguilera, Mr. Kronenberg, Mr. Sercarz (W)

286. Seminar: Plant Development (2 units). Lecture, one hour; discussion, two hours. Prerequisites: one plant physiology course and at least one advanced undergraduate or graduate plant development or biochemistry course, or consent of instructor. Seminar on specific topics in plant development. Content varies each term. S/U grading.

Mr. Phinney, Ms. Tobin

287. Seminar: Comparative Cell Physiology (2 units). Mr. Cascarano

288. Seminar: Plant Cell Biology (2 units). Recommended prerequisite: course 162. Ms. Gonzalez

289. Seminar: Plant Physiology (2 units). Mr. Laties

290. Seminar: Comparative Physiology (2 units). Mr. Gordon, Mr. Narins

291. Seminar: Physiology and Biochemistry of Arthropods (2 units). Mr. Engelmann

292. Seminar: Molecular Evolution (2 units). (Formerly numbered 285.) Discussion, three hours. Prerequisites: course 100A and/or consent of instructor. Detailed analysis of current understanding of evolution of molecular sequences and structures.

Mr. Lake

M293A. Seminar: Current Topics in Immunobiology of Cancer (2 units). (Same as Microbiology M262A and Microbiology and Immunology M262A.) Prerequisite: consent of instructor. Review of recent literature in immunology, biology, and biochemistry of cancer, with emphasis on fundamental studies involving cell-mediated immunity, humoral response, tumor specific antigens, and new techniques. Discussion of reports on scientific meetings. May be repeated for credit. S/U grading.

Mr. Bonavida (F,W,Sp)

M293B. Immunology of AIDS (2 units). (Same as Epidemiology M214, Microbiology M262B, and Microbiology and Immunology M262B.) Lecture, one hour; discussion, one hour. Prerequisites: courses M258B, M258C, Microbiology and Immunology 202A, 202B, 202C, 202D, or equivalent, consent of instructor. Lecture and student discussion of assigned publications. Topics include specific anti-HIV immune responses, activation of immune system by HIV, and basic mechanisms that underlie HIV-induced immunodeficiency. S/U or letter grading.

Ms. Giorgi (W)

M293C. Biological Individuality and Immunity (2 units). (Same as Microbiology M262C and Microbiology and Immunology M262C.) Prerequisite: course M258C. Review of current literature in the field of immunogenetics, with emphasis on fundamental studies involving genetic and immunologic principles and techniques. Selected topics discussed and results interpreted; conclusions and experimental methods evaluated.

(Sp, alternate years)

M293D. Selected Topics in Immunology (2 units). (Same as Microbiology M262D and Microbiology and Immunology M262D.) Prerequisite: consent of instructor. Student participation in discussions related to various topics in immunology. May be repeated for credit. S/U or letter grading.

(F,W,Sp)

294. Seminar: Current Aspects of Photosynthesis (2 units). Mr. Thornber

295. Seminar: Neurophysiology (2 units). Mr. O'Laugh

296. Current Topics in Plant Molecular Biology (2 units). Discussion, one hour. Recent research developments in the field of plant molecular biology. Opportunities for graduate students to discuss individual research work. S/U grading.

Ms. Hirsch

M298. Seminar: Current Topics in Molecular Biology (2 units). (Same as Biological Chemistry M298, Chemistry M298, Microbiology M298, Microbiology and Immunology M298, and Molecular Biology M298.) Prerequisite: consent of instructor and graduate adviser of interdepartmental Molecular Biology Ph.D. Program. Each student conducts or participates in discussions on assigned topics. May be repeated for credit. (F,W,Sp)

299. Seminar: Parasitology (2 units).

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Preparation for Teaching Biology in Higher Education (2 units). Prerequisites: graduate standing, consent of instructor. Study of problems and methodologies in teaching biology, which includes workshops, seminars, apprentice teaching, and peer observation. S/U grading.

496. Preparation for Teaching Biology in Higher Education (2 units). Prerequisites: graduate standing, consent of instructor. Strongly recommended as sequel to course 495 discussions on teaching, theory, and development of advanced skills. Study of methods and approaches to teaching of specific areas in biology, with emphasis on laboratory teaching, instructor/student interaction, and undergraduate motivation. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual (or Tutorial) Studies (2 to 12 units).

596F. Directed Individual (or Tutorial) Studies (2 to 8 units). Given off campus at a marine science center.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examination (2 to 12 units). May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

598. M.A. Thesis Research and Writing (2 to 12 units).

599. Ph.D. Dissertation Research and Writing (2 to 12 units).

Business and Administration (Interdepartmental)

A316 Murphy Hall, (310) 825-1965

Additional Coursework for Students Interested in Business and Administration

The specialization in business and administration is not a major, but a sequence of supplemental courses designed to prepare students for the complexities of a career in business and administration. Students complete one of the many majors in the College of Letters and Science, as well as a sequence of courses.

For example, if you are interested in international business, you might major in a foreign language to become familiar with the literature and culture of other countries, and then add this program to gain basic understanding of economics, accounting, and statistics. Other students interested in working for a governmental agency or nonprofit corporation might add this program to a social science major. Students with an interest in a liberal arts area, who are not planning to go to graduate school, may want to complete this program to prepare for a job in business while pursuing a major of their choice. (Note: This program may **not** be taken with any economics major. Students with a particular interest in accounting, banking, and finance are directed to the business economics major.)

Completion of this program in addition to a Letters and Science major will give you the basic skills and knowledge most employers seek. Courses used to satisfy either the major or general education requirements may also be applied toward the requirements of this program.

A minimum grade of C – is necessary to apply courses to this program, with an overall C average in the specialization. All courses must be taken for a letter grade; the P/NP option is not acceptable. You may satisfy one of the field studies course requirements by completing an independent study course (199), taken in an appropriate department with prior consent of the program faculty adviser. You also are required to seek guidance from a field studies coordinator in choosing and researching your topic.

To enter the specialization, you must file a petition with the College Counseling Service in the College of Letters and Science. If you do not complete the program prior to graduation, you must petition out of the program to be eligible to graduate. (Such petitions are automatically granted; there is no penalty for not completing the program.) *All degree requirements, including the specific requirements for this specialization, must be fulfilled within 228 units.* A statement of completion is noted on your transcript and diploma when you have successfully completed the requirements for this specialization and for graduation.

For further information and help in assessing the appropriateness of this program and how it relates to your career/education goals, contact the College Counseling Service in the College of Letters and Science.

Core Courses

Required: Economics 1 and 2, or 5 or 100; Management 1A-1B; one statistics course; one mathematics course (except Mathematics A, 1, 38A, 38B, 104, Statistics 50); two courses from English 4, 100W, 129, 131A through 131J, 136A, 136B, Speech 1 (English 136A and 136B are in Progress courses; credit is given only on completion of both courses).

Analytical Skills

Required: Three courses from one of the following areas: (1) *quantitative methods:* Program in Computing 10A, 10B, 10C, Computer Science 141, Anthropology 186A, 186B, Economics 141, 147A, 147B, Geography 171, Political Science 102, Psychology M142, 144, 150, 151, Sociology 104, 112, 113; (2) *critical reasoning:* Civil Engineering 11, 12, Philosophy 9, 31, 32.

Field Studies

Required: Any three courses from the following list:

Business and Administration Communications and Interactions — Communication Studies 100, 101, Psychology 136A, 174, 178, Sociology 135

Business Logistics — Geography 148, 149

Cognitive Science — Linguistics 1 or 20, 10, Materials Science and Engineering M107A or Psychology M153, Psychology 110, 111, 120, 121, 187

Contemporary Administration — Anthropology 150, Geography 148, Political Science 173, 180, Sociology 173

Government and Business — Political Science 142, 173

History of American Business — History 148A, 148B, 149A, 149B, Political Science 173

Labor Studies — History 155A, 155B, Political Science 174, Psychology M137E, Sociology 171

National and International Business and Administration — History 125E, 148C, 149B, Political Science 124, 129, 130

Chemistry and Biochemistry

3010 Young Hall, (310) 825-4219

Professors

Mario E. Baur, Ph.D. (*Physical Chemistry*)
 Kyle D. Bayes, Ph.D. (*Physical Chemistry*)
 Orville L. Chapman, Ph.D. (*Organic Chemistry*)
 Steven G. Clarke, Ph.D. (*Biochemistry*)
 Donald J. Cram, Ph.D. (*Saul Winstein Professor of Organic Chemistry, University Professor*)
 Richard E. Dickerson, Ph.D. (*Biochemistry, Molecular Biology*)

David D. Eisenberg, D.Phil. (*Physical Chemistry, Molecular Biology; Distinguished Teaching Award*)
 Mostafa A. El-Sayed, Ph.D. (*Physical Chemistry; Distinguished Teaching Award*)
 Christopher S. Foote, Ph.D. (*Organic Chemistry and Biochemistry*)
 William M. Gelbart, Ph.D. (*Physical Chemistry*)
 Jay D. Gralla, Ph.D. (*Biochemistry*)
 M. Frederick Hawthorne, Ph.D. (*Inorganic and Organometallic Chemistry*)
 Kendall N. Houk, Ph.D. (*Organic and Theoretical Chemistry*)
 Wayne L. Hubbell, Ph.D. (*Biochemistry; Jules Stein Professor of Ophthalmology*)
 Michael E. Jung, Ph.D. (*Organic Chemistry and Biochemistry; Distinguished Teaching Award*)
 Herbert D. Kaesz, Ph.D. (*Inorganic and Organometallic Chemistry*)
 Daniel Kivelson, Ph.D. (*Physical Chemistry; Distinguished Teaching Award*)
 Charles M. Knobler, Ph.D. (*Physical Chemistry; Distinguished Teaching Award*)
 Raphael D. Levine, Ph.D. (*Physical Chemistry*)
 Harold G. Martinson, Ph.D. (*Biochemistry, Molecular Biology*)
 Malcolm F. Nicol, Ph.D. (*Physical Chemistry*)
 Emil Reisler, Ph.D. (*Biochemistry, Molecular Biology*)
 Verne N. Schumaker, Ph.D. (*Biochemistry, Molecular Biology; Distinguished Teaching Award*)
 Robert L. Scott, Ph.D. (*Physical Chemistry*)
 David S. Sigman, Ph.D. (*Organic and Biological Chemistry*)
 Charles E. Strouse, Ph.D. (*Inorganic Chemistry*)
 Joan S. Valentine, Ph.D. (*Inorganic Chemistry and Biochemistry*)
 John T. Wasson, Ph.D. (*Geochemistry, Chemistry*)
 Richard L. Weiss, Ph.D. (*Biochemistry*)
 Charles A. West, Ph.D. (*Biochemistry; Distinguished Teaching Award*)
 R. Stanley Williams, Ph.D. (*Physical Chemistry*)
 Jeffrey I. Zink, Ph.D. (*Inorganic and Physical Chemistry*)

Professors Emeriti

Frank A.L. Anet, Ph.D.
 Daniel E. Atkinson, Ph.D.
 Paul D. Boyer, Ph.D.
 Paul S. Farrington, Ph.D.
 Clifford S. Garner, Ph.D., D.Sc.
 E. Russell Hardwick, Ph.D.
 Thomas L. Jacobs, Ph.D.
 John M. Jordan, Ph.D.
 William G. McMillan, Jr., Ph.D.
 Howard Reiss, Ph.D.
 Roberts A. Smith, Ph.D.
 Kenneth N. Trueblood, Ph.D. (*Distinguished Teaching Award*)

Associate Professors

Juli F. Feigon, Ph.D. (*Biochemistry*)
 Peter M. Felker, Ph.D. (*Chemical Physics*)
 Richard B. Kaner, Ph.D. (*Inorganic and Solid-State Chemistry*)
 Robert L. Whetten, Ph.D. (*Physical Chemistry*)

Assistant Professors

Robert W. Armstrong, Ph.D. (*Organic and Bioorganic Chemistry*)
 Delroy A. Baugh, Ph.D. (*Physical Chemistry*)
 Emily A. Carter, Ph.D. (*Theoretical Chemistry*)
 Robert E. Cohen, Ph.D. (*Biochemistry*)
 Albert J. Courey, Ph.D. (*Biochemistry*)
 Miguel Garcia-Garibay, Ph.D. (*Organic Chemistry*)
 Robin L. Garrell, Ph.D. (*Physical and Analytical Chemistry*)
 James W. Gober, Ph.D. (*Biochemistry*)
 Sabeeha Merchant, Ph.D. (*Biochemistry, Molecular Biology*)
 Craig A. Merlic, Ph.D. (*Organic Chemistry*)

David C. Myles, Ph.D. (*Organic and Bioorganic Chemistry*)
 Daniel Neuhauser, Ph.D. (*Physical Chemistry*)
 Yves Rubin, Ph.D. (*Organic and Bioorganic Chemistry*)
 Todd O. Yeates, Ph.D. (*Biochemistry*)

Lecturers

Sandra I. Lamb, Ph.D. (*Chemistry*)
 Lawrence H. Levine, Ph.D. (*Chemistry*)
 Betty A. Luceigh, Ph.D. (*Chemistry; Distinguished Teaching Award*)
 Arlene A. Russell, Ph.D. (*Chemistry*)

Adjunct Professor

Seymour Siegel, Ph.D. (*Physical Chemistry*)

Scope and Objectives

Chemistry is concerned with the composition, structure, and properties of substances, the transformations of these substances into others by reactions, and the kinds of energy changes that accompany these reactions. The department is organized in four interrelated and overlapping subdisciplines that deal primarily with the chemistry of inorganic substances (inorganic chemistry), the chemistry of carbon compounds (organic chemistry), the chemistry of living systems (biochemistry), and the physical behavior of substances in relation to their structures and chemical properties (physical chemistry).

The department offers three undergraduate majors: one in chemistry with emphasis on inorganic, organic, or physical chemistry, a second major in biochemistry, and a third in general chemistry. The chemistry and biochemistry majors are designed to prepare students for graduate studies in each field, for entry into professional schools in the health sciences, and for careers in industries and businesses that depend on chemically and biochemically based technology. The general chemistry major is intended for students who wish to acquire considerable chemical background in preparation for careers outside chemistry.

Graduate research and training programs leading to the M.S. and Ph.D. degrees in Chemistry and in Biochemistry are also offered.

Undergraduate Study

Admission

Regular and transfer students who have the prerequisites for the various courses are not thereby assured of admission to those courses. The department may deny admission to any course if a grade of D or below was received in a prerequisite, or if in the opinion of the department the student shows other evidence of inadequate preparation.

Transfer students with more than 84 quarter units are accepted into the departmental majors only if they have completed the following courses or their equivalents: the entire Chemistry and Biochemistry 11 series, Mathematics 31A, 31B, 32A, Physics 8A, 8C/8CL, and 8D/

8DL, or 6A, 6B, and 6C (or a year of calculus-based physics). For *biochemistry* majors, a year of biology may replace the physics. For *chemistry* majors, Mathematics 32B is recommended.

Transfer students with more than 105 quarter units are accepted into the departmental majors only if they have completed the following courses or their equivalents: the entire Chemistry and Biochemistry 11 series and one term of organic chemistry, Mathematics 31A, 31B, 32A, Physics 8A, 8C/8CL, and 8D/8DL, or 6A, 6B, and 6C (or a year of calculus-based physics). *Biochemistry* majors also should have completed a course in the biology of organisms; *chemistry* majors should have completed Mathematics 32B.

Entering transfer students who have successfully completed a year course (including laboratory) in general college chemistry intended for science and engineering students should enter course 132A. Transfer students should consult the department's Undergraduate Office for assistance in planning their programs.

You may not take or repeat a chemistry or biochemistry course for credit if it is a prerequisite for a more advanced course for which you already have credit.

Courses used to fulfill any of the requirements for any of the departmental majors must be taken for a letter grade. Seminar courses, individual study courses, and research courses (e.g., 190, 199) may not be applied toward the requirements for the majors.

Each of the major programs is outlined below. Students may contact Dorothy Seymour, Undergraduate Counselor, for help and advice (4016 Young Hall).

Preliminary Examination for Chemistry and Biochemistry 11A

If you wish to enroll in Chemistry and Biochemistry 11A or 11AH, you must take the Chemistry Diagnostic Test during the enrollment period for the term in which you intend to take these courses. Enrollment usually is limited to students who have passed the examination. It will be given in 50 Young Hall on Monday, September 21, 1992; Thursday, November 19, 1992; and Thursday, March 4, 1993.

If your performance on the examination does not qualify you for immediate admission to Chemistry and Biochemistry 11A, but you wish to enroll in a subsequent term, you may be eligible for enrollment in Los Angeles Valley College (LAVC) Chemistry 17. This course is given at UCLA during Fall Quarter expressly for UCLA students preparing for Chemistry and Biochemistry 11A. If you successfully complete LAVC course 17, you are entitled to admission to course 11A for the next three terms. Offered on a Passed/Not Passed basis, LAVC course 17 carries no UCLA graduation credit but does displace four units on your Study List. It is *not* an acceptable substitute for course 11A.

Bachelor of Science in Chemistry

This program is for students who intend to pursue a career in chemistry.

Preparation for the Major

Required: Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Mathematics 31A, 31B, 32A, 32B, 33A; Physics 8A, 8C/8CL, and 8D/8DL (8B/8BL strongly recommended), or 6A, 6B, and 6C*. Physics 8 series is strongly recommended for students with interest in physical chemistry, biophysical chemistry, or physical organic chemistry. No specific foreign language is required; however, reading knowledge of German (at least at the level of German 3) is strongly recommended if you are planning to pursue graduate work in chemistry.

The Major

Required: Chemistry and Biochemistry 110A, 110B, 113A, 114 (or 114H), 132A, 132B/132BL, 132C/132CL, 136 or 144, 153A, 153L, 173, and two other upper division or graduate courses in the department, including at least one laboratory course from 154, 174, 184.

Bachelor of Science in Biochemistry

This program is for students preparing for careers in biochemistry or other fields requiring extensive preparation in both chemistry and biology.

Preparation for the Major

Required: Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Mathematics 31A, 31B, 32A (33A strongly recommended); Physics 6A, 6B, and 6C, or 8A, 8C/8CL, and 8D/8DL (8B/8BL strongly recommended*); Biology 5, 5L, 9. Physics 8 series is recommended for students with interest in biophysical chemistry.

The Major

Required: Chemistry and Biochemistry 110A, 132A, 132B/132BL, 132C/132CL, 153A, 153B, 153C, 153L, 154, 156, Biology 108, Microbiology and Molecular Genetics 101; one additional upper division or graduate course in chemistry and biochemistry; two elective upper division or graduate courses in biology, chemistry and biochemistry, mathematics, microbiology, or physics, which must be approved by the undergraduate adviser.

Bachelor of Science in General Chemistry

This program is for students who wish to acquire considerable chemical background in preparation for careers outside chemistry. The requirements are accordingly quite flexible. The major

*If physics courses from both the 6 and 8 series are taken, undue duplication must be avoided.

may be appropriate for some students who plan to enter professional schools, such as those of medicine, dentistry, or public health.

Preparation for the Major

Required: Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Mathematics 31A, 31B, 32A, 33A; Physics 6A, 6B, and 6C, or 8A, 8C/8CL, and 8D/8DL*.

To enter the major, you must complete the preparation courses with at least a 2.0 average.

The Major

Required: Chemistry and Biochemistry 110A, 132A, 132B/132BL, 132C/132CL, 153A, 153L; three additional upper division courses in the department (at least one must be a laboratory course); six additional upper division courses. A 2.0 average is required in all upper division courses in the department. The program should be coherent in terms of your interests and objectives and must be based on a written proposal and approved by the undergraduate adviser.

Graduate Study

The department offers programs of study and research leading to the M.S. and Ph.D. degrees in both Chemistry and Biochemistry. Candidates for advanced degrees may specialize in the following fields: biochemistry, inorganic, organic, or physical chemistry.

If you are planning to work toward the Ph.D., you should not seek an M.S. degree first but should apply directly to the Ph.D. program. Application materials may be obtained by writing to Phyllis Jergenson, Graduate Office, Department of Chemistry and Biochemistry, 4006 Young Hall, UCLA, Los Angeles, CA 90024-1569.

Admission

An excellent undergraduate record is required in addition to the University minimum requirements. Graduate Record Examination (GRE) General and Subject Tests are recommended.

Each student admitted to graduate standing in **chemistry** is given orientation examinations at the beginning of the first term in the division of study and a second area selected from physical, organic, and inorganic chemistry. The main purpose of the orientation requirement is to help you and your adviser plan a suitable course program. The examinations include material covered in upper division courses in biochemistry, physical, organic, and inorganic chemistry. All courses suggested because of deficiencies in undergraduate preparation are normally to be completed by the end of the first year.

No orientation examinations are given to **biochemistry** students.

You are encouraged to become familiar with research activities of all faculty members in your area of interest and to join a research group as soon as possible. Biochemistry students rotate through at least two research groups during Fall and Winter Quarters, with a final selection made during Spring Quarter.

Foreign Language Requirement

Language requirements for the different areas of specialization are as follows: *biochemistry, inorganic, physical* — none; *organic* — German (translation of a portion of a scientific article with the aid of a dictionary). There is no language requirement for the M.S. degrees.

Master of Science Degrees

Course Requirements

Chemistry M.S. — At least nine courses (36 units) are required, of which at least five (20 units) must be graduate courses and the remainder upper division courses. You must take a minimum of two courses in your major area and one course in an outside area. Choices may be made from the following:

Inorganic — Chemistry and Biochemistry 174, 207, C275, C276A, 276B, 277, 279, 280

Organic — Chemistry and Biochemistry 207, 232, 236, 241A through 241Z, 242, C243A, C243B, 244A, 244B, 245, 246

Physical — Chemistry and Biochemistry C215A, C215B, 215C, 215D, C223A, C223B, 223C, 225

Substitutions may be made with consent of the area adviser. With consent of the graduate adviser, courses of directed individual study, but not research courses, may replace any of the courses listed above.

Up to 24 units of course 596 or 598 may be applied toward the total course requirement; up to 20 units may be applied toward the minimum graduate course requirement.

Plan I (thesis plan) is the preferred method of attaining the M.S. in Chemistry. However, in exceptional cases where Plan II (comprehensive examination plan) is used, an additional six units of course 597 and six units from course 228, 248, or 278 may be applied toward the graduate course requirement and the total course requirement.

Biochemistry M.S. — The M.S. in Biochemistry may be obtained by the thesis plan or the comprehensive examination plan. Course requirements vary for each plan, as follows.

Plan I (Thesis Plan) — A total of 36 units is required. Of these, 20 must be at the graduate level and include a minimum of 12 units from Chemistry and Biochemistry M253, M255, M263, M267. Registration in course 268 is required for three terms but is not applicable to the 36-unit requirement.

Up to 24 units of course 596 or 598 may be applied toward the total course requirement;

up to eight units may be applied toward the graduate course requirement.

After completion of course requirements, you should consult your research adviser to form a thesis committee.

Plan II (Comprehensive Examination Plan) — A total of 36 units is required. Of these, 20 must be at the graduate level and include a minimum of 12 units from Chemistry and Biochemistry M253, M255, M263, M267. You may apply six units of course 258 and six units of course 268 to the graduate course requirement and the total course requirement. With the exception of Chemistry and Biochemistry 258 and 268, all courses must be taken for a letter grade.

Ph.D. Degrees

Course Requirements

Chemistry Ph.D. — Candidates in each area of specialization should normally complete as a minimum the coursework indicated below. Some of these requirements can be met on the basis of orientation examinations and courses taken prior to entry into the graduate program. If your projected research falls in an area which differs appreciably from that anticipated by the field requirements listed below, you may be permitted appropriate modifications. Required coursework must be completed prior to advancement to candidacy.

Inorganic Chemistry — (1) Required background material: Chemistry and Biochemistry 173; (2) courses 174, C275, C276A, 276B; (3) two courses from 153C, 207, C213B, C215A, C215B, 215D, C223A, 232, 236, 241A through 241Z, 242, C243A, C243B, 244A, 244B, 245, 246, 271A through 271Z, 279, 280, C281, or other graduate courses with the approval of the graduate adviser; (4) Chemistry and Biochemistry 278.

Organic Chemistry — (1) Required background material: Chemistry and Biochemistry 132A, 132B, 132C, 136; (2) courses C243A, 244A; (3) course C243B or 244B; (4) one additional course from physical chemistry (C213B, 245) or inorganic chemistry (173, 174, C275, C276A) or biochemistry (153C); (5) two courses from 207, 232, 236, 241A through 241Z, 242, 245, 246; (6) Chemistry and Biochemistry 248.

Physical Chemistry — (1) Required background material: Chemistry and Biochemistry 110A, 110B, 113A; (2) courses C215A, C215B, C223A, or equivalent; (3) course 228 each term; (4) one term of course 218 (for presentation of research); (5) two courses (for letter grade credit) from 215C, 215D, 223C, 225; (6) two courses (with S/U grading option) from 215C, 215D, 221A through 221F, 223C, 225, C243A, C276A, 277, Physics 105A, 110A, 110B, 131, 132, 140, or upper division mathematics courses (subject to approval). Substitutions may be made with consent of the graduate adviser (physical chemistry).

*If physics courses from both the 6 and 8 series are taken, undue duplication must be avoided.

Biochemistry Ph.D. — Candidates should normally complete as a minimum the coursework indicated below. Some of these requirements can be met on the basis of orientation examinations and courses taken prior to entry into the graduate program. Required coursework must be completed before advancement to candidacy.

(1) Required background material: Chemistry and Biochemistry 110A, 132A, 132B/132BL, 132C/132CL, 153A, 153B, 153C, 156, some coursework in the life sciences, and some biochemistry laboratory experience. Deficiencies in background may be made up after admission.

(2) Core courses M253, M255, M263, M267 — 18 units total. Students concentrating in biophysical chemistry or other specialized areas may want to modify the core. In these cases, six units of the core courses may be replaced subject to consultation with and consent of the graduate adviser.

(3) An additional 12 units of upper division or graduate courses subject to the consent of the graduate adviser. It is recommended that eight of these units be from other than biochemistry offerings. Advanced courses taken elsewhere or as an undergraduate may be substituted for some of these units in appropriate cases. Seminar courses are normally not applicable.

(4) Chemistry and Biochemistry 258 in the first four terms.

Teaching Experience

One year of teaching experience is required.

Qualifying Examinations

Rather than a single comprehensive examination, the department gives all **chemistry** Ph.D. candidates a series of written tests called cumulative examinations. These are designed to encourage and test the continued growth of professional competency through coursework, study of the literature, departmental seminars, and informal discussions with colleagues.

Three examinations are given per term at approximately monthly intervals. If you enter directly into the chemistry Ph.D. program and perform satisfactorily on the orientation examination in your special area, you may begin writing the examinations immediately. You must begin by the start of your second term in residence and must continue until you have passed five. To remain in good standing, you should pass at least one of the first six examinations attempted and three out of nine. Fifteen attempts are normally the maximum.

The written examination requirement for all **biochemistry** Ph.D. candidates is coupled to the graduate student seminar, Chemistry and Biochemistry 258. Beginning with Winter Quarter of your first year, you are required to submit the following written reports for grading to the instructor and other designated faculty members:

(1) Winter Quarter — A presentation and written report based on the Fall Quarter rotation research experience, to be submitted to the instructor and rotation supervisor for grading.

(2) Spring Quarter — A written report which summarizes the current state of knowledge in a small, well-defined area and which identifies the general types of experiments needed for progress in that field, to be prepared for grading by the course instructors.

(3) Fall Quarter, Second Year — At the end of the preceding Spring Quarter, you select a research topic from a list prepared by the division. An in-depth seminar on this topic which summarizes the current state of knowledge in a field and which indicates likely future directions must be presented. The written report should go beyond the information presented in the seminar and should propose specific experiments. This examination is graded by two faculty members other than the research supervisor.

A failed report may be revised once. The written examination requirement for the biochemistry Ph.D. program is fulfilled after you satisfactorily complete all three different types of reports.

At the end of the first and second years in either Ph.D. program, your overall progress is evaluated by the graduate study committee, taking into account performance in courses, written examinations, and research. The committee may recommend that you (1) proceed to the oral examination, (2) be redirected to the M.S. program, or (3) be terminated.

The University Oral Qualifying Examination is based on your research proposal which should represent independent work and should offer the doctoral committee an opportunity to judge your ability to think creatively and to formulate significant ideas for research. The examination is to be attempted by the end of the seventh term (sixth term for biochemistry). Failure to comply with this time schedule may result in disqualification from the Ph.D. program unless permission has been given by the area adviser. The committee's decision to advance you to candidacy, to allow you to repeat the oral, or to disqualify you is based on the quality of the written proposal, the adequacy of the oral presentation, your overall record at UCLA as reflected in coursework and examinations, and your research ability.

When a satisfactory report on the completion of the written and oral qualifying examinations, course requirements, and the departmental language requirement has been submitted, you are eligible for formal advancement to candidacy for the Ph.D.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Dissertation/Final Oral Examination

You are required to prepare a dissertation thesis based on independent, original research conducted under the supervision of your research adviser and doctoral committee.

The final oral examination is optional with the doctoral committee.

Lower Division Courses

2. Introductory Chemistry. Lecture, two hours; discussion, two hours. Not open to students with credit for course 11A. Designed to meet part of Letters and Science requirements for nonscience majors and similar requirements in other schools. Concept of submicroscopic world of chemistry, ranging from protons to proteins in subject matter. (F,Sp)

9. Beginning a Career in Molecular Sciences (1 unit). Prerequisite: freshman or sophomore standing. Limited to 50 students. Recommended for students considering a career in chemical sciences. Introduction to and discussion of research and career opportunities in molecular sciences; establishment of a faculty/student mentorship for each student to help in preparing a paper on a student-selected research topic. May be repeated twice.

Mr. Jung, Mr. Williams

11A. General Chemistry. Lecture, four hours; discussion, one hour. Prerequisites: high school chemistry or equivalent background and three and one-half years of high school mathematics, successful completion of Chemistry Diagnostic Test. Recommended: high school physics. Required of all majors in chemistry and biochemistry. (Students lacking prerequisites may qualify for admission by exceptional performance on Chemistry Diagnostic Test.) Atomic picture of matter; periodicity of chemical properties; types of chemical reactions; reaction stoichiometry; chemical reaction calculations; quantum theory; atomic and molecular structure and bonding.

Mr. Baur, Ms. Garrell (F,W,Sp)

11AH. General Chemistry (Honors). Lecture, four hours; discussion, one hour. Prerequisites: high school chemistry or equivalent background and three and one-half years of high school mathematics. Recommended: high school physics. (Students lacking prerequisites may qualify for admission by exceptional performance on Chemistry Diagnostic Test.) All students who intend to take this course must take the Chemistry Diagnostic Test (enrollment is usually limited to students who have passed the examination). Honors course parallel to course 11A.

Mr. Gelbart, Mr. Kivelson (F)

11B. General Chemistry. Lecture, three hours; discussion, one hour. Prerequisite: course 11A or 11AH with a grade of C- or better or consent of instructor. Kinetic theory and thermodynamics of gas phase; thermochemistry; molecular interactions in liquids and solids; acid-base and solubility equilibria; free energy and reactivity.

Mr. Felker, Mr. Nicol (F,W,Sp)

11BH. General Chemistry (Honors). Lecture, three hours; discussion, one hour. Prerequisites: course 11AH with a grade of B- or better or course 11A, and consent of instructor. Honors course parallel to course 11B.

Mr. Kivelson, Mr. Knobler (W)

11BL. General Chemistry Laboratory (2 units). Laboratory, four hours; video laboratory, one hour. Prerequisite: course 11A with a grade of C- or better or consent of instructor. Corequisite: course 11B (or must already have been passed with a grade of C- or better). Use of the balance; volumetric techniques; equilibria; thermochemistry; quantitative analysis using volumetric and potentiometric procedures; Beer's law.

Ms. Russell (F,W,Sp)

11C. General Chemistry (3 units). Lecture, two hours. Prerequisite: course 11B or 11BH with a grade of C- or better or consent of instructor. Chemical kinetics; electrochemistry; main group and transition metal reactivity; coordination chemistry; special topics such as carbon chemistry, polymers, ceramics, biological molecules.

Mr. Strouse, Ms. Valentine (F,W,Sp)

11CH. General Chemistry (Honors). Lecture, three hours; discussion, one hour. Prerequisites: course 11BH with a grade of B- or better or course 11B, and consent of instructor. Honors course parallel to course 11C, but at a more advanced level.

Ms. Valentine (Sp)

11CL. General Chemistry Laboratory (3 units). Laboratory, eight hours; video laboratory, one hour. Prerequisite: course 11BL with a grade of C- or better. Corequisite: course 11C (or must already have been passed with a grade of C- or better). Rates of reactions; quantitative volumetric analysis; qualitative inorganic analysis; inorganic synthesis; column chromatography; colorimetric analysis.

Ms. Russell (F,W,Sp)

15. Survey of Organic Chemistry and Biochemistry. Prerequisite: course 11A with a grade of C- or better. Not open to students with credit for course 132A or former course 21. Recommended for students in prenursing, prephysical therapy, and pre-dental hygiene. Does not meet requirements for admission to medical and dental schools. Fulfills one of physical sciences general education requirements in College of Letters and Science. Introduction to structures and reactions of organic compounds, particularly with respect to their roles and transformations in living systems.

Ms. Lamb (F)

15L. Laboratory in Elementary Organic Chemistry and Biochemistry (1 unit). Laboratory, four hours. Corequisite: course 15 (or must already have been passed with a grade of C- or better). Does not meet requirements for admission to medical and dental schools. Introduction to quantitative work with aqueous solutions and to preparation, isolation, and characterization of organic compounds, particularly some of those important in living systems.

Ms. Lamb (F)

88. Lower Division Seminar (2 units). Prerequisite: freshman or sophomore standing. General introduction to frontiers of molecular sciences or intensive exploration of a particular theme or topic. Variable topics; consult *Schedule of Classes* for topics to be offered in a specific term. May not be repeated for credit except by students who receive a grade of C-, D, or F. P/NP or letter grading.

Mr. Jung, Mr. Kaesz

96. Special Courses in Chemistry (1 to 4 units). To be arranged. Prerequisite: consent of undergraduate adviser (chemistry). May be repeated for a maximum of eight units.

(F,W,Sp)

Upper Division Courses

103. Environmental Chemistry. Prerequisites: courses 132A, 132B/132BL, 153A, and 153L, or consent of instructor. Chemical aspects of air and water pollution, solid waste disposal, energy resources, and pesticide effects. Chemical reactions in the environment and effect of chemical processes on the environment.

Mr. Baur, Mr. Bayes (Sp)

110A. Physical Chemistry: Chemical Thermodynamics. Lecture, four hours; discussion, one hour. Prerequisites: course 11C, Physics 8A, 8C, and 8D, or 6A, 6B, and 6C, Mathematics 31A, 31B, 32A or 3C (for life sciences majors). Fundamentals of thermodynamics, chemical and phase equilibria, thermodynamics of solutions, electrochemistry.

Mr. Baur, Mr. Knobler, Mr. Scott (F,W,Sp)

110B. Physical Chemistry: Introduction to Statistical Mechanics and Kinetics. Lecture, four hours; discussion, one hour. Prerequisites: course 110A and Mathematics 32B, or consent of instructor. Strongly recommended: course 113A (for biochemistry majors course 156 may be substituted). Kinetic theory of gases, principles of statistical mechanics, statistical thermodynamics, equilibrium structure and free energy, relaxation and transport phenomena, macroscopic chemical kinetics, molecular-level reaction dynamics.

Mr. Bayes, Mr. Nicol, Mr. Trueblood (W,Sp)

C110C. Physical Chemistry: Charges, Fields, and Matter. Lecture, three hours; discussion, one hour. Prerequisite: course 110A. Topics include electromagnetic fields in matter — susceptibilities, molar polarization and refraction, multipoles, van der Waals forces; classical EM waves — propagation, refraction, scattering, absorption, optical rotation and rotatory dispersion, magnetic effects; radiation — multipoles, black-body, Einstein coefficients, lasers; scattering and diffraction — Rayleigh, Mie, Raman, X-ray, electron, neutron, nuclear — by particles, molecules, lattices; resonance phenomena — light, EPR, NMR, NQR, Mössbauer; electrolytes — ion activity, conductivity, rate effects. May be concurrently scheduled with course C210C.

(Sp)

113A. Physical Chemistry: Introduction to Quantum Mechanics. Lecture, four hours; discussion, one hour. Prerequisites: course 11C, Physics 8A, 8C, and 8D, or 6A, 6B, and 6C, Mathematics 31A, 31B, 32A, 33A (may be taken concurrently). Departure from classical mechanics: Schrödinger's vs. Newton's equations; model systems: particle-in-a-box, harmonic oscillator, rigid rotor, and hydrogen atom; approximation methods: perturbation and variational methods; many-electron atoms, spin, and Pauli principle, chemical bonding.

Mr. Baugh, Mr. Gelbert, Mr. Williams (F,Sp)

C113B. Physical Chemistry: Introduction to Molecular Spectroscopy. Lecture, four hours; discussion, one hour. Prerequisite: course 113A. Interaction of radiation with matter, microwave spectroscopy, infrared and Raman spectroscopy, vibrations in polyatomic molecules, electronic spectroscopy, magnetic resonance spectroscopy. Concurrently scheduled with course C213B.

Mr. Felker, Ms. Garrell (W)

114. Physical Chemistry Laboratory. Lecture, two hours; laboratory, eight hours. Prerequisites: courses 11CL, 110A, 110B, and 113A, or consent of instructor. Lectures include techniques of physical measurement, error analysis and statistics, special topics. Laboratory includes spectroscopy, thermodynamic measurements, and chemical dynamics.

Mr. Bayes, Mr. Felker (W,Sp)

114H. Physical Chemistry Laboratory (Honors). Lecture, two hours; laboratory, eight hours. Prerequisites: courses 11CL, 110A, 110B, and 113A, with grades of B or better, or consent of instructor. Lectures include techniques of physical measurement, error analysis and statistics, special topics. Laboratory includes topics in physical chemistry to be selected in consultation with instructor.

Mr. Bayes, Mr. Felker (F,W,Sp)

C115A-C115B. Quantum Chemistry. Lecture, four hours; discussion, one hour. Prerequisites: course 113A, Mathematics 31A, 31B, 32A, 32B, 33A. Recommended: knowledge of differential equations equivalent to Mathematics 135A or Physics 131 and of analytic mechanics equivalent to Physics 105A. Course C115A or Physics 115B is prerequisite to C115B. Students entering course C115A are normally expected to take course C115B the following term. Designed for chemistry students with serious interest in quantum chemistry. Postulates and systematic development of nonrelativistic quantum mechanics; expansion theorems; wells; oscillators; angular momentum; hydrogen atom; matrix techniques; approximation methods; time dependent problems; atoms; spectroscopy; magnetic resonance; chemical bonding. May be concurrently scheduled with courses C215A-C215B.

Mr. Gelbart, Mr. Reiss (F, C115A; W, C115B)

121. Special Topics in Physical Chemistry. Prerequisite: course 110B. Recommended: course 113A, Physics 8D. Topics of considerable research interest presented at level suitable for students who have completed junior-year courses in physical chemistry.

C123A-C123B. Classical and Statistical Thermodynamics. Lecture, four hours; discussion, one hour. Prerequisite: course 110B or 156. Recommended: course 113A. Rigorous presentation of fundamentals of classical thermodynamics. Principles of statistical thermodynamics: probability, ensembles, partition functions, independent molecules, and the perfect gas. Applications of classical and statistical thermodynamics selected from diatomic and polyatomic gases, solid and fluid states, phase equilibria, electric and magnetic effects, ortho-para hydrogen, chemical equilibria, reaction rates, the imperfect gas, nonelectrolyte and electrolyte solutions, surface phenomena, high polymers, gravitation. May be concurrently scheduled with courses C223A-C223B.

Mr. Kivelson, Mr. Knobler (F, C123A; W, C123B)

125. Computers in Chemistry. Lecture, three hours. Prerequisites: courses 110A, 110B, 113A, working knowledge of FORTRAN IV or PL/1. Discussion of computer techniques, including matrix manipulation, solution of differential equations, data acquisition, and instrumental control, and their applications to chemical problems in quantum mechanics, thermodynamics, and kinetics.

Mr. L. Levine (F)

132A. Organic Chemistry. Lecture, three hours; discussion, one hour. Prerequisites: courses 11C or 11CH, 11CL (may be taken concurrently), with grades of C- or better, or consent of instructor. Structures and properties of organic molecules; chemical bond and its relation to organic molecular structure, stereochemistry, and reactivity; mechanisms and stereochemistry of organic reactions; physical/organic study of a chemical reaction; synthesis, properties and reactions of alkanes, alkenes, alkynes, alkyl halides, ethers, and alcohols.

Mr. Chapman, Mr. Jung, Ms. Luceigh (F,W,Sp)

132AH. Organic Chemistry (Honors). Lecture, three hours; discussion, one hour. Prerequisites: courses 11C or 11CH, and 11CL, with grades of B- or better, or consent of instructor. Honors course parallel to course 132A.

Mr. Merlic (F)

132B. Organic Chemistry. Lecture, three hours; discussion, one hour. Prerequisite: course 132A or 132AH with a grade of C- or better or consent of instructor. Corequisite: course 132BL. Introduction to infrared, ¹H, and ¹³C NMR spectroscopy; structure, reactivity, and spectroscopic properties of carbonyl and carboxyl derivatives, aromatic compounds, and amines; concepts of aromaticity; amino acids and the peptide bond.

Mr. Foote, Ms. Luceigh (F,W,Sp)

132BH. Organic Chemistry (Honors). Lecture, three hours; discussion, one hour. Prerequisite: course 132A or 132AH with a grade of B- or better or consent of instructor. Honors course parallel to course 132B.

Mr. Foote, Mr. Jung (W)

132BL. Organic Chemistry Laboratory (2 units). Lecture, one hour; laboratory, three hours. Prerequisites: courses 11CL, and 132A or 132AH, with grades of C- or better or consent of instructor. Corequisite: course 132B. Basic experimental techniques in organic synthesis (distillation, extraction, crystallization reaction setup and workup) and organic analytical chemistry (melting and boiling point, refractive index, chromatography, IR, NMR, GC). One-step synthesis of known organic compounds on microscale level.

Ms. Lamb, Ms. Russell (F,W,Sp)

132C. Organic Chemistry. Lecture, three hours; discussion, one hour. Prerequisites: courses 132B or 132BH, and 132BL, with grades of C- or better, or consent of instructor. Introduction to electron absorption and mass spectroscopy; modern NMR spectroscopy; pericyclic reactions; molecular orbital theory; polymers and organic materials; organic chemistry of silicon, phosphorus, and sulfur; organic synthesis; concepts and design; building blocks of biological systems: amino acids and the peptide bond, lipids, carbohydrates, and heterocycles; bioorganic chemistry; molecular modeling.

Ms. Luceigh, Mr. Merlic (F,Sp)

132CH. Organic Chemistry (Honors). Lecture, three hours; discussion, one hour. Prerequisite: course 132B or 132BH with a grade of B- or better or consent of instructor. Honors course parallel to course 132C. Mr. Armstrong (Sp)

132CL. Organic Chemistry Laboratory (2 units). Lecture, one hour; laboratory, four hours. Prerequisites: courses 132B or 132BH, and 132BL, with grades of C- or better, or consent of instructor. Corequisite: course 132C. Modern techniques in organic synthetic and analytical chemistry. Micro-preparative and semi-preparative scale single and multistep synthesis of known organic molecules. One- and two-dimensional multinuclear NMR techniques. CAS on-line literature search and written synthesis proposal.

Ms. Lamb (F,Sp)

136. Organic Structural Methods. Lecture, two hours; laboratory, eight hours. Prerequisites: courses 132A, 132B/132BL, and 132C/132CL, or equivalent, with grades of C- or better, or consent of instructor. Laboratory course in organic structure determination by chemical and spectroscopic methods; microtechniques. Mr. Armstrong, Mr. Myles (Sp)

C143A. Structure and Mechanism in Organic Chemistry. Lecture, three hours; discussion, one hour. Prerequisites: courses 110B, 113A, and 132C/132CL (may be taken concurrently), or equivalent, with grades of C- or better, or consent of instructor. Mechanisms of organic reactions. Acidity and acid catalysis; linear free energy relationships; isotope effects. Molecular orbital theory; photochemistry; pericyclic reactions. May be concurrently scheduled with course C243A. Mr. Houk (F)

C143B. Mechanism and Structure in Organic Chemistry. Lecture, three hours; discussion, one hour. Prerequisite: course C143A with a grade of C- or better or consent of instructor. Mechanisms of organic reactions; structure and detection of reactive intermediates. May be concurrently scheduled with course C243B. (W)

144. Practical and Theoretical Introductory Organic Synthesis. Lecture, two hours; laboratory, eight hours. Prerequisites: courses 132C/132CL or equivalent. Lectures on modern synthetic reactions and processes, with emphasis on stereospecific methods for carbon-carbon bond formation. Laboratory methods of synthetic organic chemistry, including reaction techniques, synthesis of natural products, and molecules of theoretical interest. Mr. Jung, Mr. Merlic (F)

153A. Biochemistry: Introduction to Structure, Enzymes, and Metabolism. Lecture, three hours; discussion, one hour; tutorial, one hour. Prerequisite: course 132B or 132BH with a grade of C- or better. Structure of proteins, carbohydrates, and lipids; enzyme catalysis and principles of metabolism, including glycolysis, citric acid cycle, and oxidative phosphorylation. Mr. Martinson, Ms. Merchant, Mr. Weiss (F,W,Sp)

153B. Biochemistry: DNA, RNA, and Protein Synthesis. Lecture, three hours; discussion, one hour; tutorial, one hour. Prerequisite: course 153A. Nucleotide metabolism; DNA replication; DNA repair; transcription machinery; regulation of transcription; RNA structure and processing; protein synthesis and processing. Ms. Feigon, Mr. Gralla (F,W)

153C. Biochemistry: Biosynthetic and Energy Metabolism and Its Regulation. Lecture, three hours; discussion, one hour; tutorial, one hour. Prerequisites: courses 153A and 153L, or consent of instructor. Metabolism of carbohydrates, fatty acids, amino acids, and lipids; photosynthetic metabolism and assimilation of inorganic nutrients; regulation of these processes.

Mr. Clarke, Mr. Gober, Mr. Weiss, Mr. West (F,W,Sp)

153L. Elementary Biochemistry Laboratory (2 units). (Formerly numbered 153AL.) Lecture, one hour; laboratory, four hours. Prerequisites: courses 132B or 132BH, 132BL, 153A (may be taken concurrently). Protein assay and purification, enzyme kinetics. Mr. Gober, Mr. Weiss (F,W,Sp)

154. Biochemical Methods. Lecture/quiz, two hours; laboratory, eight hours. Prerequisites: courses 153A, 153B, and 153L, or consent of instructor. Recommended: course 156. Applications of biochemical procedures to metabolic reactions; properties of living systems; enzymes; proteins; nucleic acids and other tissue constituents.

Mr. Cohen, Mr. Courey, Mr. Reisler (F,W,Sp)

156. Physical Biochemistry. Lecture, four hours; discussion, one hour. Prerequisites: courses 110A, 153A. Biochemical kinetics; solution thermodynamics of biochemical systems; multiple equilibria; hydrodynamics; energy levels, spectroscopy, and bonding; topics from structural, statistical, and electrochemical methods of biochemistry.

Mr. Courey, Mr. Gober, Mr. Reisler (F,Sp)

C161A. Plant Biochemistry. Lecture, three hours; discussion, one hour. Prerequisite: course 153C or equivalent or consent of instructor. Introduction to distinctive features of plant biochemistry. Topics include photosynthesis, nitrogen metabolism, plant cell wall metabolism, and secondary metabolism in relation to stress. Concurrently scheduled with course C261A.

Ms. Merchant, Mr. West (F, alternate years)

173. Structural Inorganic Chemistry. Lecture, three hours; discussion, one hour. Prerequisite: course 110A. Recommended: courses 113A or 156, and 132B/132BL. Introductory survey of structure and bonding in inorganic compounds; molecular stereochemistry; donor/acceptor interactions; coordination compounds of transition metals; elements of crystal-field and ligand-field theory.

Mr. Kaesz, Mr. Kaner, Mr. Zink (F,Sp)

174. Inorganic and Metalorganic Laboratory Methods. Lecture, two hours; laboratory, eight hours. Prerequisites: courses 132A, 132B/132BL, and 173, or consent of instructor. Synthesis of inorganic compounds, including air-sensitive materials; dry-box, vacuum line, and high-pressure techniques; Schlenk methods; chromatographic and ion exchange separations. Mr. Hawthorne (W)

C175. Inorganic Reaction Mechanisms. Lecture, three hours. Prerequisites: courses 110A, 110B, 113A, 173, or equivalent. Survey of inorganic reactions; mechanistic principles; electronic structure of metal ions; transition-metal coordination chemistry; inner- and outer-sphere and chelate complexes; substitution, isomerization, and racemization reactions; stereochemistry; oxidation/reduction, free radical, polymerization, and photochemical reactions of inorganic species. May be concurrently scheduled with course C275. Mr. Hawthorne, Ms. Valentine (F)

C176. Group Theory and Applications to Inorganic Chemistry. Lecture, three hours; discussion, one hour. Prerequisites: courses 113A, 173, or equivalent. Group theoretical methods; molecular orbital theory; ligand-field theory; electronic spectroscopy; vibrational spectroscopy. May be concurrently scheduled with course C276A. Mr. Zink (F)

C181. Polymer Chemistry. Lecture, three hours; discussion, one hour. Prerequisites: courses 110A, 132A, 132B. Synthesis of organic and inorganic macromolecules, thermodynamic and statistical mechanical descriptions of unique properties of polymers, polymer characterization methods, and special topics such as conductive and biomedical polymers and polymeric reagents in synthesis. Concurrently scheduled with course C281.

Ms. Garrett (Sp, alternate years)

184. Chemical Instrumentation. Lecture/quiz, two hours; laboratory, eight hours. Prerequisite: course 110A. Theory and practice of instrumental techniques of chemical and structural analysis, including atomic absorption spectroscopy, gas chromatography, mass spectrometry, nuclear magnetic resonance, polarography, X-ray fluorescence, and other modern methods.

Mr. Strouse, Mr. Wasson (F)

190. Undergraduate Thesis Research. Prerequisites: two terms of course 199 on related material, consent of undergraduate adviser and research director. Final term of integrated one-year research project. May consist of experimental and/or theoretical research or, in some cases, comprehensive review of a given area. Thesis embodying totality of year's work is to be submitted and oral presentation made. Course suggested, but not required, for those seeking departmental honors at graduation. (F,W,Sp)

196A-196F. Special Courses in Chemistry (1 to 4 units each). Hours to be arranged. Prerequisite: consent of undergraduate adviser (chemistry). (F,W,Sp)

199A-199Z. Directed Individual Study or Research for Undergraduate Students (2 to 8 units each). To be arranged with faculty member who will direct the research. Prerequisites: advanced junior standing in the major with 3.0 GPA or senior standing in the major, consent of department chair. Proposal must be received one week prior to first day of term. Additional details on requirements and application may be obtained from undergraduate counselor. A maximum of three 199 courses (no more than 12 units) may be taken. P/NP grading (first eight units); P/NP or letter grading (final four units). (F,W,Sp)

Graduate Courses

207. Organometallic Chemistry. Lecture/discussion, three hours. Prerequisite or corequisite: course C243A or consent of instructor. Survey of synthesis, structure, and reactivity (emphasizing a mechanistic approach) of compounds containing carbon bonded to elements selected from main group metals, metalloids, and transition metals, including olefin complexes and metal carbonyls; applications in catalysis and organic synthesis. Mr. Merlic (Sp)

C210C. Physical Chemistry: Charges, Fields, and Matter. Lecture, three hours; discussion, one hour. Prerequisite: course 110A. Topics include electromagnetic fields in matter — susceptibilities, molar polarization and refraction, multipoles, van der Waals forces; classical EM waves — propagation, refraction, scattering, absorption, optical rotation and rotatory dispersion, magnetic effects; radiation — multipoles, black-body, Einstein coefficients, lasers; scattering and diffraction — Rayleigh, Mie, Raman, X-ray, electron, neutron, nuclear — by particles, molecules, lattices; resonance phenomena — light, EPR, NMR, NQR, Mössbauer; electrolytes — ion activity, conductivity, rate effects. May be concurrently scheduled with course C110C. S/U or letter grading. (Sp)

C213B. Physical Chemistry: Molecular Spectroscopy. Lecture, four hours; discussion, one hour. Prerequisite: course 113A. Interaction of radiation with matter, microwave spectroscopy, infrared and Raman spectroscopy, vibrations in polyatomic molecules, electronic spectroscopy, magnetic resonance spectroscopy. Concurrently scheduled with course C113B. Independent study project required of graduate students.

Mr. Felker, Mr. Whetten, Mr. Williams (W)

C215A-C215B. Quantum Chemistry: Methods. Lecture, four hours; discussion, one hour. Prerequisites: course 113A, Mathematics 31A, 31B, 32A, 32B, 33A. Recommended: knowledge of differential equations equivalent to Mathematics 135A or Physics 131 and of analytic mechanics equivalent to Physics 105A. Course C215A or Physics 115B is prerequisite to C215B. Students entering course C215A are normally expected to take course C215B the following term. Designed for chemistry students with serious interest in quantum chemistry. Postulates and systematic development of nonrelativistic quantum mechanics; expansion theorems; wells; oscillators; angular momentum; hydrogen atom; matrix techniques; approximation methods; time dependent problems; atoms; spectroscopy; magnetic resonance; chemical bonding. May be concurrently scheduled with courses C115A-C115B.

Mr. Gelbart (F, C215A; W, C215B)

215C. Advanced Quantum Chemistry: Applications. Lecture, three hours; discussion, one hour. Prerequisites: course C215B, Physics 131, or equivalent. Topics in quantum chemistry selected from molecular structure, collision processes, theory of solids, symmetry and its applications, and theory of electromagnetic radiation. S/U or letter grading.

Ms. Carter, Mr. R. Levine (F)

215D. Molecular Spectra, Diffraction, and Structure. Lecture, three hours; discussion, one hour. Prerequisites: course C215B, Physics 131, or equivalent. Selected topics from electronic spectra of atoms and molecules; vibrational, rotational, and Raman spectra; magnetic resonance spectra; X-ray, neutron, and electron diffraction; coherence effects. S/U or letter grading.

Mr. El-Sayed, Mr. Nicol, Mr. Whetten (W)

218. Physical Chemistry Student Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

219A. Seminar: Atomic and Molecular Clusters (2 units). Discussion, three hours. Prerequisite: consent of instructor. Analysis of advanced current topics in principles, methods, and applications of atomic and molecular clusters and related finite condensed matter systems. S/U grading.

Mr. Whetten

219B. Seminar: Chemistry and Physics of Surfaces (2 units). Discussion, three hours. Prerequisite: consent of instructor. Advanced study and analysis of current topics in preparation and analysis of surfaces and thin film structures on crystalline substrates. S/U grading.

Mr. Williams

220A. Seminar: Computer Simulation in Chemistry (2 units). Prerequisite: consent of instructor. Analysis of advanced current topics in electronic structure theory, statistical mechanics computer simulations, and their applications to problems in gas phase and solid-state chemistry. S/U grading.

Ms. Carter

221A-221Z. Advanced Topics in Physical Chemistry (2 to 4 units each). Prerequisite: consent of instructor. Each course encompasses a recognized specialty in physical chemistry, generally taught by a staff member whose research interests embrace that specialty. S/U or letter grading.

Ms. Carter, Mr. Reiss, Mr. Williams

C223A-C223B. Classical and Statistical Thermodynamics. Lecture, four hours; discussion, one hour. Prerequisite: course 110B or 156. Recommended: course 113A. Presentation of fundamentals of classical thermodynamics. Principles of statistical thermodynamics; probability, ensembles, partition functions, independent molecules, and the perfect gas. Applications of classical and statistical thermodynamics selected from diatomic and polyatomic gases, solid and fluid states, phase equilibria, electric and magnetic effects, ortho-para hydrogen, chemical equilibria, reaction rates, the imperfect gas, nonelectrolyte and electrolyte solutions, surface phenomena, high polymers, gravitation. May be concurrently scheduled with courses C123A-C123B.

Mr. Kivelson, Mr. Reiss (F, C223A; W, C223B)

223C. Statistical Mechanics. Lecture, three hours; discussion, one hour. Prerequisites: courses C215B, C223B, Physics 131, or equivalent. Fundamentals of statistical mechanics; classical equations of state; Coulomb systems; phase transitions; quantum statistical mechanics; quantum corrections to the equation of state; density matrix; second quantization. S/U or letter grading.

Mr. Gelbart

225. Chemical Kinetics. Lecture, three hours; discussion, one hour. Prerequisites: courses C215B, C223B. Classical experimental and theoretical approaches to study of rates and mechanisms of chemical reactions. Modern experimental techniques and molecular-level theory of reaction dynamics. Examples of well-studied elementary reactions. S/U or letter grading.

Mr. Bayes (Sp)

228. Chemical Physics Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

229. Introduction to Physical Chemistry Research (2 units). Lecture, 90 minutes. Intended primarily for entering physical chemistry graduate students. S/U grading.

M230B. Structural Molecular Biology. (Same as Biology M230B.) Lecture, three hours; discussion, one hour. Prerequisites: Physics 6C, Mathematics 3C, consent of instructor. Selected topics from principles of biological structure; structures of globular proteins and RNAs; structures of fibrous proteins, nucleic acids, and polysaccharides; harmonic analysis and Fourier transforms; principles of electron, neutron, and X-ray diffraction; optical and computer filtering; three-dimensional reconstruction. S/U or letter grading.

Mr. Eisenberg, Ms. Feigon (W)

M230D. Structural Molecular Biology Laboratory (2 units). (Same as Biology M230D.) Laboratory, 10 hours. Corequisite: course M230B. Methods in structural molecular biology, including experiments utilizing single crystal X-ray diffraction, low angle X-ray diffraction, electron diffraction, optical diffraction, optical filtering, three-dimensional reconstruction from electron micrographs, and model building.

Mr. Eiserling, Mr. Lake (W)

232. Stereochemistry and Conformational Analysis. Lecture/discussion, three hours. Prerequisite or corequisite: course C143A or consent of instructor. Molecular symmetry, chirality, prochirality, stereochemistry in vinyl polymers, atropisomerism, diastereomeric interactions in solution, conformations of acyclic and cyclic molecules.

Mr. Jung

M233. Principles, Practices, and Policies in Biotechnology (2 units). (Same as Biological Chemistry M233, Biology M233, Chemical Engineering M233, Microbiology M233, Microbiology and Immunology M233, and Radiological Sciences M233.) Prerequisite: graduate standing or consent of instructor. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. S/U or letter grading.

Mr. Fox, Ms. Morrison

235A. Seminar: Synthesis of Natural Products and Biopolymers (2 units). Discussion, three hours. Prerequisite: consent of instructor. Study of specific topics in synthesis of natural products and biopolymers, as well as binding and DNA chemistry. S/U grading.

Mr. Armstrong

235B. Seminar: Design, Preparation, and Characterization of New Organic Materials (2 units). Discussion, three hours. Prerequisite: consent of instructor. Topics include (1) computer-aided design of organic materials, (2) strategy for preparing these materials, (3) characterization of materials, and (4) application of materials to societal needs. New materials cover perfect crystal networks, polymers, catalytic systems, and organic ceramics. S/U grading.

Mr. Chapman

235C. Seminar: Supramolecular Chemistry (2 units). Discussion, three hours. Prerequisite: consent of instructor. Advanced study of current knowledge regarding molecular recognition and catalysis, bioorganic chemistry, material science, and chemistry of carbon molecules and polymeric networks. S/U grading.

Mr. Diederich

235D. Seminar: Modern Photochemistry and Biooxidants (2 units). Discussion, three hours. Prerequisite: consent of instructor. Discussion of topics in areas of photochemistry, singlet oxygen chemistry, and biological oxidants, as well as other related fields. S/U grading.

Mr. Foote

235E. Seminar: Theoretical and Physical Organic Chemistry (2 units). Discussion, three hours. Prerequisite: consent of instructor. Detailed discussion of modern developments in theoretical organic chemistry, computational methods, and related experimental organic chemistry. S/U grading.

Mr. Houk

235F. Seminar: Synthetic Methods and Synthesis of Natural Products (2 units). Discussion, three hours. Prerequisite: consent of instructor. Advanced study of specific topics in development of new synthetic methods and total synthesis of natural products, as well as other related fields. S/U grading.

Mr. Jung

235G. Seminar: Organometallic Chemistry and Organic Synthesis (2 units). Discussion, three hours. Prerequisite: consent of instructor. Discussion of various topics in study of organometallic chemistry and its application to organic synthesis. S/U grading.

Mr. Merlic

235H. Seminar: Reaction Mechanisms in Molecular Biology (2 units). Discussion, three hours. Prerequisite: consent of instructor. Detailed analysis of current topics in nucleic acid chemistry and enzymology. S/U grading.

Mr. Sigman

236. Spectroscopic Methods of Organic Chemistry. Lecture, three hours. Prerequisite or corequisite: course C243A or consent of instructor. Problem solving using proton and carbon 13 nuclear magnetic resonance, infrared spectroscopy, and mass spectrometry; new techniques in NMR, IR, and MS, with emphasis on Fourier transform NMR.

241A-241Z. Special Topics in Organic Chemistry (2 to 4 units each). Prerequisite or corequisite: course C243A or equivalent or consent of instructor. Each course encompasses a recognized specialty in organic chemistry, generally taught by a staff member whose research interests embrace that specialty.

Mr. Armstrong, Mr. Houk, Mr. Jung

242. Organic Photochemistry. Lecture/discussion, three hours. Prerequisite or corequisite: course C243A or consent of instructor. Interactions of light with organic molecules; mechanistic and preparative photochemistry.

C243A. Organic Chemistry: Structure and Mechanisms. Lecture, three hours; discussion, one hour. Prerequisites: courses 110B, 113A, and 132C/132CL (may be taken concurrently), or equivalent, with grades of C- or better, or consent of instructor. Mechanisms of organic reactions. Acidity and acid catalysis; linear free energy relationships; isotope effects. Molecular orbital theory; photochemistry; pericyclic reactions. May be concurrently scheduled with course C143A. S/U or letter grading.

Mr. Houk (F)

C243B. Organic Chemistry: Mechanism and Structure. Lecture, three hours; discussion, one hour. Prerequisite: course C243A or consent of instructor. Mechanisms of organic reactions; structure and detection of reactive intermediates. May be concurrently scheduled with course C143B.

Mr. Diederich (W)

244A. Organic Synthesis: Methodology and Stereochemistry. Modern synthetic reactions and transformations involving organic substrates. Special emphasis on reagents useful in asymmetric induction and stereoselective synthesis of structurally complex target molecules.

Mr. Armstrong

244B. Strategy and Design in Organic Synthesis. Lecture, three hours. Prerequisite or corequisite: course C243A or consent of instructor. Theory behind the planning of syntheses of complex molecules from simpler ones. Organic reactions and their use in the synthetic process. Reasoning and art involved in organic synthesis.

Mr. Jung

245. Applications of Electronic Theory in Organic Chemistry. Lecture, three hours; discussion, one hour. Prerequisite or corequisite: course C243A or consent of instructor. Review of molecular orbital theory; introduction to alternative theoretical methods; aromaticity and homoaromaticity; Hückel and Möbius conjugation; Woodward/Hoffmann theory of concerted pericyclic reactions; through-bond and through-space interactions; introduction to photoelectron spectroscopy; frontier molecular orbital theory; related special topics.

Mr. Houk

246. Bioorganic Chemistry. Lecture/discussion, three hours. Prerequisites: courses 110A and 132A, or equivalent, or consent of instructor. Reaction mechanisms relevant to biochemistry and molecular biology; experimental approaches for study of enzymes, including organic chemical models for catalysis and complexation, kinetics, stereochemistry, isotope labeling, and chemical modification; molecular design of pharmacologically active agents and artificial enzymes. Mr. Sigman

247. Organic Colloquium (2 units). Seminars in organic chemistry and related areas presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

248. Organic Chemistry Student Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

249. Problems in Advanced Organic Chemistry (2 units). Problems in organic reaction mechanisms, synthesis, structure determination, stereochemistry, spectroscopy, electronic theory, photochemistry, and organometallic chemistry, with emphasis on current literature. Intended primarily for first- and second-year graduate students as preparation for cumulative examinations. May be repeated for credit. S/U grading.

250. Topics in Biochemistry and Molecular Biology of Animal Cells. Lecture, three hours. Prerequisites: courses 132A, 132B/132BL, 132C/132CL, or equivalent, 153A, 153B, 153C, courses in genetics and molecular biology, consent of instructor. Structure and organization of animal cells, cell-cell contact, motility of cell and mobility of cellular components, chromosome structure, interactions between cytoplasm and nucleus, genetic analysis in higher eukaryotic cells, biochemistry of tissue development and organization.

251A-251Z. Advanced Topics in Biochemistry (2 units each). Prerequisite: consent of instructor. Each course encompasses a recognized specialty in biochemistry, generally taught by a staff member whose research interests embrace that specialty.

M253. Macromolecular Structure (6 units). (Same as Biological Chemistry M253.) Lecture/discussion, five hours. Prerequisites: courses 110A, 153A, 153B, 153C, and 156, or Biological Chemistry 201A-201B, or equivalent. Chemical and physical properties of proteins and nucleic acids. Structure cloning and analysis of DNA; biosynthesis and processing of RNA; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. (F)

254. Advanced Biochemical Methods. Lecture, two hours; laboratory, eight hours. Prerequisite: course 156 or consent of instructor. Recommended: courses 153B, 153C. Theoretical and practical basis of metabolic, chromatographic, kinetic, electrophoretic, ultracentrifugal, isotopic, and other techniques as applied to biochemical systems.

Mr. Eisenberg, Mr. Shumaker (W)

M255. Biological Catalysis (2 units). (Same as Biological Chemistry M255.) Prerequisites: courses 110A and 153A, or equivalent, or consent of instructor. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes.

Mr. Sigman (Sp)

M257. Physical Chemistry of Biological Macromolecules (2 units). (Same as Biological Chemistry M257.) Prerequisites: courses 110A and 153A, or consent of instructor. Theory of hydrodynamic, thermodynamic, and optical techniques used to study structure and function of biological macromolecules.

Mr. Schumaker (W)

258. Biochemistry Student Seminar (2 units). Seminars presented by graduate students on topics of current biochemical interest. May be repeated for credit. S/U grading.

259. Mechanisms in Regulation of Transcription. Lecture, three hours. Prerequisite: course M253 or M267 or consent of instructor. Prokaryotic operons; initiation and termination; DNA regulatory sequences and regulator protein-DNA interactions; RNA polymerases; regulation of eukaryotic transcription; hormones, differentiation, cell cycle; role of chromatin structure in mediating regulation.

Mr. Gralla, Mr. Martinson (Sp)

C261A. Plant Biochemistry. Lecture, three hours; discussion, one hour. Prerequisite: course 153C or equivalent or consent of instructor. Introduction to distinctive features of plant biochemistry. Topics include photosynthesis, nitrogen metabolism, plant cell wall metabolism, and secondary metabolism in relation to stress. Concurrently scheduled with course C161A.

Ms. Merchant, Mr. West (F, alternate years)

262. Biological Energy Transductions. Lecture, three hours. Prerequisites: courses 153B and 153C, or equivalent, or consent of instructor. Molecular basis of energy-transducing processes, including oxidative and photosynthetic phosphorylation, other energy-linked oxidative functions, membrane active transport, muscle contraction, and special sensory functions. (W)

M263. Metabolism and Its Regulation. (Same as Biological Chemistry M263.) Lecture, three hours. Prerequisites: course 110A, one course from 153B, 153C, 156, or Biological Chemistry 201A-201B, or equivalent, or consent of instructor. Thermodynamic and kinetic aspects of metabolism; regulatory properties of enzymes; metabolic regulation; consideration of comparative aspects of metabolism in relation to physiological function.

Mr. Atkinson, Mr. Weiss (Sp)

M264A-M264B-M264C. Molecular Basis of Atherosclerosis: Selected Topics (2 units each). (Same as Biological Chemistry M264A-M264B-M264C.) Prerequisite: consent of instructor. Biochemistry, morphology, and physiology of atherosclerosis. Emphasis on chemistry of lipoproteins and role of plasma lipoproteins in regulation of tissue lipid metabolism and development of atherosclerosis. Each course may be taken independently for credit.

(F, M264A; W, M264B; Sp, M264C)

266. Seminar: Techniques for Study of Gene Regulation (2 units). Prerequisite: course 259 or consent of instructor. Seminar to discuss specific experimental approaches being taken in study of gene regulation. Emphasis on specific biochemical techniques being used to study regulatory protein-DNA interactions in diverse biological model systems.

M267. Macromolecular Metabolism and Subcellular Organization (6 units). (Same as Biological Chemistry M267.) Lecture/discussion, five hours. Prerequisites: courses 153B and 153C or Biological Chemistry 201A-201B, or equivalent, or consent of instructor. Recommended: course M253. Cell cycle DNA replication and repair; structure and properties of cellular organelles; regulation of cell division; cell transformation; normal and aberrant expression of oncogenes; molecular aspects of development.

Mr. Martinson, Mr. McEntee (W)

268. Biochemistry Research Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students on topics of current biochemical research interest. May be repeated for credit. S/U grading.

271A-271Z. Advanced Topics in Inorganic Chemistry (2 to 4 units each). Prerequisite: consent of instructor. Each course encompasses a recognized specialty in inorganic chemistry, generally taught by a staff member whose research interests embrace that specialty.

Ms. Valentine

272A. Seminar: Chemistry of Materials (2 units). Discussion, three hours. Prerequisite: consent of instructor. Advanced study and analysis of current topics in synthesis, properties, and characterization of materials. S/U grading.

Mr. Kaner

C275. Inorganic Chemistry: Reaction Mechanisms. Lecture, three hours. Prerequisites: courses 110A, 110B, 113A, 173, or equivalent. Survey of inorganic reactions; mechanistic principles; electronic structure of metal ions; transition-metal coordination chemistry; inner- and outer-sphere and chelate complexes; substitution, isomerization, and racemization reactions; stereochemistry; oxidation/reduction, free radical, polymerization, and photochemical reactions of inorganic species. May be concurrently scheduled with course C175.

Mr. Hawthorne, Ms. Valentine (F)

C276A. Inorganic Chemistry: Group Theory and Spectroscopy. Lecture, three hours; discussion, one hour. Prerequisites: courses 113A, 173, or equivalent. Group theoretical methods; molecular orbital theory; ligand-field theory; electronic spectroscopy; vibrational spectroscopy. May be concurrently scheduled with course C176. S/U or letter grading.

Mr. Zink (F)

276B. Physical Methods for the Characterization of Inorganic Compounds. Lecture, three hours. Prerequisite: course C276A or consent of instructor. Applications of spectroscopic techniques, including IR, Raman, visible, UV, NMR, ESR, and NQR, to elucidation of structure and bonding in inorganic and organometallic compounds.

Mr. Strouse (W)

277. Crystal Structure Analysis. Lecture, three hours. Theory and practice of modern crystallography, with emphasis on practical experience in structure determination. Topics include crystallographic symmetry, scattering theory, data collection, Fourier analysis, heavy atom techniques, direct methods, isomorphous replacement, crystallographic refinement, error analysis, and common pitfalls. S/U or letter grading.

Mr. Dickerson, Mr. Eisenberg, Mr. Strouse

278. Inorganic Chemistry Student Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

279. Bioinorganic Chemistry. Lecture, three hours. Prerequisites: courses 110A and either 156 or 173. Role of metal ions in biology; introduction to metalloenzymes and metalloproteins; metal ion interactions with nucleic acids; metal ion metabolism.

Ms. Valentine (W)

280. Solid-State Chemistry. Lecture, three hours. Prerequisite: course 173 or equivalent. Survey of important materials, their synthesis, and characterization as single crystals, powders, or polymers. Chemical, optical, and magnetic properties and their relationship to band theory.

Mr. Kaner

C281. Polymer Chemistry. Lecture, three hours; discussion, one hour. Prerequisites: courses 110A, 132A, 132B. Synthesis of organic and inorganic macromolecules, thermodynamic and statistical mechanical descriptions of unique properties of polymers, polymer characterization methods, and special topics such as conductive and biomedical polymers and polymeric reagents in synthesis. Concurrently scheduled with course C181.

Ms. Garrell

M298. Seminar: Current Topics in Molecular Biology (2 units). (Same as Biological Chemistry M298, Biology M298, Microbiology M298, Microbiology and Immunology M298, and Molecular Biology M298.) Prerequisite: consent of instructor and graduate adviser of interdepartmental Molecular Biology Ph.D. Program. Each student conducts or participates in discussions on assigned topics. May be repeated for credit.

(F,W,Sp)

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

400. Safety in Chemical and Biochemical Research (2 units). Survey of safe laboratory practices for experimental research in organic, inorganic, and physical chemistry and biochemistry. Topics include laser safety, cryogenic hazards, high- and low-pressure experimentation, gas and carcinogen handling, chemical spills, fire extinguishing, and chemical disposal. S/U grading. Mr. Merlic (W)

495. Teaching College Chemistry (2 units). Lecture, two hours; discussion, two hours; 20 hours training during week prior to Fall Quarter. Course for teaching assistants designed to deal with problems and techniques of teaching college chemistry. S/U grading. (F)

596. Directed Individual Study or Research (2 to 16 units). To be arranged with faculty member who will direct the study or research. May be repeated for credit. S/U grading.

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 4 units). Prerequisite: consent of graduate adviser (chemistry). S/U grading.

598. Research for and Preparation of M.S. Thesis (2 to 16 units). Each faculty member supervises research of M.S. students and holds research group meetings, seminars, and discussions with the students.

599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units). Each faculty member supervises research of Ph.D. students and holds research group meetings, seminars, and discussions with the students.

Assistant Professor

Mark S. Goorsky, Ph.D. (*Materials Science and Engineering*)

Scope and Objectives

The undergraduate major is designed for students who are interested in solid-state chemistry, the preparation of engineering materials such as semiconductors, glasses, ceramics, metals, and polymers, the reactivity of such materials in different environments, and how chemical compositions affect properties. It

provides appropriate preparation for graduate studies in many fields emphasizing interdisciplinary research involving chemistry, engineering, and applied science.

Bachelor of Science Degree

Preparation for the Major

Required: Chemistry and Biochemistry 11A or 11AH, 11B or 11BH, 11BL, 11C or 11CH, 11CL, English 3, Materials Science and Engineering 14, Mathematics 31A, 31B, 32A, 32B, 33A, Physics 8A, 8B or 8BH, 8C or 8CH, 8CL, 8D or 8DH, 8DL, Program in Computing 10A.

The Major

Required: Chemistry and Biochemistry 110A, 110B, 113A, C113B or C115A-C115B, 114, 132A, 173, eight units from C123A, C123B, 132B or 132BH, 132BL, 132C or 132CH, 132CL, 174, C175, C176; Materials Science and Engineering 120, 131L or 161L, 132, 150, 160, eight units from 110, 111, 121, 122, 130, 131, 143A, 147B, 147E, 162.

For further information, contact Barbara Brooks, Materials Science and Engineering, 5732 Boelter Hall, 825-8918.

Scope and Objectives

Today there is a demand for individuals with extensive knowledge of the Chicano community. Opportunities exist in both the public and private sector that call for men and women academically prepared and aware of the history, culture, and current problems facing Chicano/Latino communities. The Chicana and Chicano studies major provides students with the language and cross-cultural studies background that will enhance their qualifications for positions in schools, governmental organizations, and private enterprise.

The program, coordinated by an interdepartmental committee, is interdisciplinary and leads to the Bachelor of Arts degree.

Bachelor of Arts Degree

The B.A. program in Chicana and Chicano Studies is designed to provide systematic instruction for students who wish concentrated study of the Chicana/Chicano experience. Viewed as developmental, the program subjects the Chicana/Chicano reality to critical investigation, including social, economic, educational, historical, and political analysis. The major is recommended for students preparing for graduate study as well as for public service careers.

Preparation for the Major

Required: Chicana and Chicano Studies 10A, 10B, Spanish 5 or equivalent.

The Major

Required: A total of 15 upper division courses, including Chicana and Chicano Studies 101, nine courses from the approved list of Chicana and Chicano studies courses (available in the program office each term), one term of field studies, and three related study courses and one advanced seminar from the approved list of courses or by petition to the program director or undergraduate counselor. Related study includes courses with some Chicana/Chicano content, such as those on Mexico, Latin America, and the experiences of people of color in the U.S.

Recommended: English 100W; Library and Information Science 111C; the introductory course in two of the following: anthropology, economics, history, political science, sociology; one or more courses in Chicana/Chicano history, literature, feminism, social science.

Optional Multidisciplinary Senior Thesis — Prerequisite: senior standing. Chicana and Chicano studies majors have the option during

their senior year to enroll in two 199 courses in their major concentration area, with the intention of producing a Chicana and Chicano studies undergraduate thesis related to the major concentration. Enrollment in the two 199 courses is with the advice and consent of a faculty member. The first term includes thesis conceptualization and formulation, along with preliminary data collection for the thesis. The second term entails completion of the data collection, analysis of the data, and termination of the thesis.

Course Limitations — No more than two 199 courses may be applied toward the major concentration; 199 courses applied toward the multidisciplinary senior thesis option may not also be applied toward the major concentration area. Registration in 199 courses must be approved in writing by the program director. No more than two CED courses may be applied toward the major concentration.

Chicana and Chicano Studies Specialization

The specialization complements study in a traditional field. Students participating in this program are required to complete both a departmental major and the Chicana and Chicano studies specialization. You must take Chicana and Chicano Studies 10A, 10B, 101, and four courses from the approved list of Chicana and Chicano studies courses (available in the program office each term).

Lower Division Courses

10A. Introduction to Chicano Life and Culture. Lecture, three hours; discussion, one hour. Enrollment priority to Chicana and Chicano studies majors. Introduction to central concepts and historical experiences which define Chicano culture, from exploring indigenous roots to examining current trends. Emphasis on diversity of the Chicano experience, gender as a central cultural variable, and particular socioeconomic conditions which have shaped cultural response. Mr. Sanchez (F)

10B. Chicanos in American Society. Lecture, three hours; discussion, one hour. Enrollment priority to Chicana and Chicano studies majors. Examination of conditions of Chicanos in the U.S., with particular attention to socioeconomic aspects of their experience. Additional emphasis on examination of role of women in both a family context and the workplace. Ms. Ortiz (W)

Upper Division Courses

101. Theoretical Concepts in Chicana and Chicano Studies. Lecture, three hours. Enrollment priority to Chicana and Chicano studies majors and students in the specialization. Examination of following theoretical concepts and practical concerns: self-definition, relationship between educational institutions and the Chicana/Chicano community, nature of critical Chicana/Chicano specific research, basic issues in Chicana/Chicano culture, and current problems facing the Chicano/Latino community. Mr. Sanchez (W)

M102. The Mexican American and the Schools. (Same as Education M102.) Prerequisite: consent of instructor. Review of research and teaching strategies. Analysis of school policies and practices and their effect on development of Mexican American and Chicano youth and communities. Ms. Gutierrez, Mr. Solorzano, Ms. Valadez

M103C. Origins and Evolution of Chicano Theater. (Same as Theater M103C.) Lecture, three hours. Prerequisite: upper division standing. Exploration of development of Chicano theater from its beginning in legends and rituals of ancient Mexico to work of Luis Valdez (late 1960s). Ms. Villarreal

M103D. Contemporary Chicano Theater. (Same as Theater M103D.) Lecture, three hours. Prerequisite: upper division standing. Study of recent trends in Chicano theater as reflected in works of contemporary Chicano dramatists and theater artists. Ms. Villarreal

M105. The Chicano Experience in Literature. (Same as English M105.) Prerequisite: satisfaction of Subject A requirement. Study of literature in English by and about Chicanos. Survey of depiction of the Chicano experience in American literature generally, with emphasis on development of Chicano literature itself, its cultural backgrounds, and distinctive uses of language. Mr. Paredes, Ms. Saldivar-Hull

M110. Chicana Feminism. (Same as Women's Studies M132A.) Lecture, three hours. Prerequisite: Women's Studies 10 or consent of instructor. Examination of theories and practices of women who identify as "Chicana feminist." Analysis of writings of Chicanas who do not identify as feminist but whose practices attend to gender inequities faced by Chicanas both within the Chicana/Chicano community and the dominant society. Attention to Anglo-European and Third World women. Ms. Saldivar-Hull

120. Immigration and the Chicano Community. Lecture, three hours. Discussion on relationship between international immigration and development of the Chicana/Chicano community. Examination of U.S. immigration policy and relationship between Mexican-origin population and other Latin American immigrants. Mr. Hinojosa-Ojeda, Mr. Telles (W)

125. U.S./Mexico Relations. Lecture, three hours. Examination of complex dynamics in relationship between Mexico and the U.S., using a political economy approach to study of asymmetrical integration between advanced industrial economies and developing countries. Mr. Hinojosa-Ojeda (Sp)

M145. Introduction to Chicano Literature. (Same as Spanish M145.) Lecture, three hours. Prerequisite: Spanish 25 or 26. Recommended: Spanish 136B. Introduction to texts representative of the Chicano literary heritage. Sampling of genres, as well as historical and geographical settings and points of view characteristic of work written by Chicanos during the 20th century. Most required reading is in Spanish. Bilingual and English works are included and discussed. Reading and analysis of a number of important scholarly and critical statements pertaining to characteristics and development of the Chicano literary corpus. Mr. Calderón, Mr. Hernández

M147A. Chicano/Latino Politics. (Formerly numbered M147.) (Same as Political Science M147A.) Lecture, three hours; discussion, one hour. Prerequisite: one 140-level political science course or one upper division course on race or ethnicity from history, psychology, or sociology, or consent of instructor. Introduction to political economy of racial domination in the U.S., concentrating on study of Mexican origin communities. Emphasis on identifying and explaining the historically changing relationship between class, race, and power by studying the interaction between state policies and practices, class and racial stratification systems, and cultural codes and modes of ideological discourse in each historical period. Mr. Rocco

M154. Contemporary Issues among Chicanas. (Same as Women's Studies M132B.) Prerequisite: Women's Studies 10 or consent of instructor. Overview of conditions facing Chicanas in the U.S., including issues on family, immigration, reproduction, employment conditions. Comparative analysis with other Latinas. Ms. Ortiz

M159A. History of the Chicano Peoples. (Same as History M159A.) Lecture, three hours. Survey lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent (Indio-Mestizo-Mulato) north of the Rio through the 17th, 18th, and 19th centuries, with special focus on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical forces affecting the community. Social structure, economy, labor, culture, political organization, conflict, and international relations. Emphasis on social forces, class analysis, social, economic, and labor conflict, ideas, domination, and resistance. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and field research, and submission of a paper. Mr. Gómez-Quiñones

M159B. History of the Chicano Peoples. (Same as History M159B.) Lecture, three hours. Survey lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent in the U.S. through the 20th century, with special focus on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical and policy issues affecting the community. Within a framework of domination and resistance, discussion deals with social structure, economy, labor, culture, political organization, conflict, and ideology. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and/or field research, and submission of a paper. Mr. Gómez-Quiñones

M172T. Ethnohistory of Hispanic Cultures in the U.S. Southwest. (Same as Anthropology M172T.) Lecture, three hours. Prerequisite: Anthropology 9 or consent of instructor. Ethnography of social and cultural adaptations of Hispanic peoples in the U.S. Southwest: their respective social organization, economic and political institutions, sacred and secular belief systems, and expressive cultures. P/NP (undergraduates), S/U (graduates), or letter grading.

197A-197Z. Undergraduate Seminars. Lecture, three hours. Prerequisites: courses 10A, 10B, upper division standing. Selected topics of interest in Chicana and Chicano studies.

199. Independent Study (2 to 4 units). Prerequisites: courses 10A, 10B, upper division standing, consent of interdepartmental Chicana and Chicano Studies Program faculty. Intensive directed research program. May be repeated for a maximum of eight units.

Scope and Objectives

The general objective of the Classics Department is to provide a thorough knowledge of the Greek and Roman languages and culture. To this end, it offers elementary and advanced courses in the languages, the reading and analysis of Greek and Roman authors, the history of Greek and Roman literature, classical art, archaeology, mythology, philosophy, and religion. The department is also strong in three fields which are not commonly taught in classics departments, namely classical linguistics, medieval Latin, and Byzantine studies.

Bachelor of Arts degrees are offered in Classical Civilization, in Greek, in Latin, and in Greek and Latin. Other undergraduate degrees include the B.A. in English/Greek and in English/Latin, offered jointly with the English Department. Students considering a major in the department should consult the adviser as soon as possible in their University career, but in no case later than the point at which they are about to take upper division courses. Graduate degrees include the Master of Arts in Classics (Greek and Latin), Greek, and Latin, and the Ph.D. in Classics.

Bachelor of Arts in Classical Civilization

The purpose of the classical civilization major is to provide a balanced, yet focused, view of the ancient civilizations of Greece and Rome, both historically unique and universally typical human creations. The approach to the subject is accordingly both causal and comparative. The areas of study include the elements of

culture — religion, mythology, philosophy, art, literature, language, the socioeconomic system, and politics. The requirements of the major encourage both breadth and depth: eight of the 12 required upper division courses (four from this department and four from other departments) must be taken in one of the four areas of concentration listed below; the remaining four upper division courses taken in this department may be selected to reflect your varied interests in the areas outside your concentration. If you qualify for the departmental honors program, you may substitute Classics 195A-195B-195C for one of the four upper division electives. While this major is not designed to qualify you for graduate study in classics, it does not preclude a transition to advanced study in classics or related fields.

Preparation for the Major

Required: Classics 10 and 20 and either 40 or 41.

The Major

Required: (1) Greek 3 or Latin 3 with a passing grade; (2) eight upper division courses in the department — no more than three may be selected from either Greek 101A through 130 or Latin 101 through 133, four must be selected from the courses listed below under any one of the four areas of concentration, and four electives (one may be Classics 195A-195B-195C if you qualify for the departmental honors program); (3) any four related courses in other departments listed below in your chosen area of concentration. Total courses required: 12, plus the language requirement.

Areas of Concentration

(1) **Language and Society** — Classics 180, three courses from either Latin 101 through 133 or Greek 101A through 130. *Related courses:* Anthropology 130P, M140, Folklore and Mythology 163, History 115A-115B-115C, 116A-116B, 117A-117B, 118, Humanities C139, Linguistics M150, 170, Philosophy 127A, 127B, 172.

(2) **Religion and Mythology** — Classics 145A, 150A, 150B, 152, 161, 162, 165, 166A, 166B, 167, 168. *Related courses:* Ancient Near East (Near Eastern Languages) 170, Anthropology 130P, 156, English M111A, Folklore and Mythology 101, M111, History 115A-115B-115C, 116A-116B, 117A-117B, 118, 119, 120, 193A, 194B.

(3) **Literature and Society** — Classics 140, 141, 142, 143, 144, 145A, 150A, 150B, 152, 162, 165. *Related courses:* Anthropology 130P, 133R, 150, 152, M154, Communication Studies 142, English 109, 140A, 152A, 190, Folklore and Mythology M111, 163, History 115A-115B-115C, 116A-116B, 117A-117B, 118, 121A-121B, Humanities C105, C107, C111, C112, C129, C139, Philosophy 101A, 101B, 102, Political Science 111A, Sociology 127, 158, Theater 102D, 111A.

(4) **Ancient Art, Architecture, and Urbanistics** — Classics 150A, 150B, 152, M153A through M153H. *Related courses:* Ancient Near East (Near Eastern Languages) M104A-M104B, Anthropology 110, 183, Art History M102A through M102H, 105A, Folklore and Mythology 172, Geography 151, History 121A-121B, 123A-123B, 195A, Sociology 158, same history and anthropology courses as above under item 3.

Bachelor of Arts in Greek

Preparation for the Major

Required: Greek 1, 2, 3 and Latin 1, 2, 3, or equivalent.

The Major

Required: (1) Nine upper division courses in Greek, including course 110; (2) one upper division course in Latin; (3) Classics 143 and either 140 or 141; (4) two courses in Greek or Roman history (History 115B-115C, 116A-116B, 117A-117B); (5) two additional courses in one or two of the related areas: classical archaeology (Classics M153A through M153H), classical linguistics (Classics 180), classical mythology (Classics 161, 162, 168), Greek and Roman religion (Classics 166A, 166B), ancient philosophy (Classics 145A, Philosophy 101A, 101B, 102, Greek 121, 122, 123, 124), Byzantine civilization (Classics M170), medieval Latin literature (Latin 131, 133). Total courses required: 16.

Bachelor of Arts in Greek and Latin

Preparation for the Major

Required: Greek 1, 2, 3 and Latin 1, 2, 3, or equivalent.

The Major

Required: (1) Twelve upper division courses, six in Greek and six in Latin, including Greek 110 and Latin 110A; (2) one course from Classics 140, 141, 142, 143; (3) one course in Greek or Roman history (History 115B, 115C, 116A, 116B, 117A, 117B); (4) one additional course in two of the related areas: classical archaeology (Classics M153A through M153H), classical linguistics (Classics 180), classical mythology (Classics 161, 162, 168), Greek and Roman religion (Classics 166A, 166B), ancient philosophy (Classics 145A, Philosophy 101A, 101B, 102, Greek 121, 122, 123, 124), Byzantine civilization (Classics M170), medieval Latin literature (Latin 131, 133). Total courses required: 16.

Note: Students in the Greek, Latin, and Greek and Latin majors are permitted to take Greek 200A-200B-200C and Latin 200A-200B-200C. Two of these courses may replace one course in requirement 3 of the Greek major and Latin major and requirement 2 of the Greek and Latin major, as well as two courses in requirement 1 of all three majors, thereby reducing the total number of required courses by one.

Bachelor of Arts in Latin

Preparation for the Major

Required: Greek 1, 2, 3 and Latin 1, 2, 3, or equivalent.

The Major

Required: (1) Nine upper division courses in Latin, including course 110A; (2) one upper division course in Greek; (3) Classics 141 and either 142 or 143; (4) two courses in Greek or Roman history (History 115B-115C, 116A-116B, 117A-117B); (5) two additional courses in one or two of the related areas: classical archaeology (Classics M153A through M153H), classical linguistics (Classics 180), classical mythology (Classics 161, 162, 168), Greek and Roman religion (Classics 166A, 166B), ancient philosophy (Classics 145A, Philosophy 101A, 101B, 102, Greek 121, 122, 123, 124), Byzantine civilization (Classics M170), medieval Latin literature (Latin 131, 133). Total courses required: 16.

Bachelor of Arts in English/Greek

Preparation for the Major

Required: English 4, 10A, 10B, 10C, Greek 1, 2, 3.

The Major

Required: (1) Seven courses from English 140A through 190 selected in consultation with an adviser in the Department of English; (2) seven upper division or graduate courses in Greek, including courses 100 and either 101A or 101B, selected in consultation with an adviser in the Department of Classics (of these seven courses, at least two must be in poetry and two in prose). Total courses required: 14.

Bachelor of Arts in English/Latin

Preparation for the Major

Required: English 4, 10A, 10B, 10C, Latin 1, 2, 3.

The Major

Required: (1) Seven courses from English 140A through 190 selected in consultation with an adviser in the Department of English; (2) seven upper division or graduate courses in Latin, including courses 105A and 113, selected in consultation with an adviser in the Department of Classics (of these seven courses, at least two must be in poetry and two in prose). Total courses required: 14.

Honors Program

The honors program is open to students in each of the departmental majors. To qualify for graduation with departmental honors or highest honors, you must (1) complete all require-

ments for your major, (2) have a cumulative grade-point average of 3.5 or better in upper division courses in the department and at least a 3.0 overall GPA, and (3) complete Classics 195A-195B-195C with a grade of A – or better.

Master of Arts Degrees

Admission

Requirements for admission to the M.A. programs are a UCLA B.A. degree, or the equivalent, with a major in Greek and Latin (for the Classics M.A.), Greek (for the Greek M.A.), or Latin (for the Latin M.A.) and a grade-point average of at least 3.0 in the major; a statement of purpose; three letters of recommendation, normally from previous instructors in the classics; and the Graduate Record Examination (while there is no minimum required score, the GRE is used as a criterion in uncertain cases, as well as to assess applications for teaching assistantships and other financial assistance from the department). In cases of deficient preparation or doubtful equivalency to a UCLA B.A., the department may grant provisional admission, requiring additional coursework or a written examination. Applicants for the Classics M.A. program who are deficient in Greek (or Latin) may be admitted to the Latin (or Greek) program, then permitted to transfer into the classics program when the deficiencies have been removed. The department uses the same application form as UCLA Graduate Application Processing, which may be obtained from the Department of Classics (7349 Bunche Hall, UCLA, Los Angeles, CA 90024-1475) or the Graduate Admissions Office.

Major Fields or Subdisciplines

The department offers M.A. degrees in Classics (Greek and Latin), Greek, and Latin.

Foreign Language Requirement

In addition to taking courses in Greek and/or Latin, you must demonstrate proficiency in German, French, or Italian during your first year of study, either by passing German 5, French 5, or Italian 5 at UCLA (or an equivalent course) with a minimum grade of C, or by examination. For German and French, the examination is the standard Graduate School Foreign Language Test (GSFLT) reading examination with a score of 500 or better; for Italian, a written translation examination is administered by the department.

Course Requirements

For the Classics M.A., Classics 287, Greek or Latin 210, and five courses from Greek 200A-200B-200C/Latin 200A-200B-200C are required. For the Greek M.A., Classics 287, Greek 200A-200B-200C, and 210 are required. For the Latin M.A., Classics 287, Latin 200A-200B-200C, and 210 are required. (The Greek and Latin 200A-200B-200C courses test the appropriate sections of the departmental reading lists in a one-hour translation

examination.) The remaining courses are to be selected in consultation with the graduate adviser.

No more than two half seminars, each counting as two units, and no more than one 500-series course may be applied toward the M.A. course requirements.

Comprehensive Examination Plan

The department follows the comprehensive examination plan for the M.A. degrees. Before the examination, you are expected to complete the departmental reading lists in Greek authors (for the Greek M.A.) or Latin authors (for the Latin M.A.) or in Greek and Latin authors (for the Classics M.A.). The examination consists of a three-hour written test in Greek and Latin literature (Greek for Greek M.A., Latin for Latin M.A., Greek and Latin for Classics M.A.) in two parts: (1) passages for translation at sight and for generic identification and comparison and (2) an essay question combining periods kept separate in the Greek and Latin 200A-200B-200C courses (for Classics M.A., combining Greek and Latin). It must be taken no later than one term after you fulfill the M.A. course requirements. The examination may be repeated once, in the term following your first attempt; in exceptional cases and with consent of the departmental faculty, more than once. A grade of B+ or better is required for admission into the Ph.D. program.

Ph.D. Degree

Admission

A UCLA M.A. degree in Classics, Greek, or Latin, with a comprehensive examination grade of B+ or better, or an equivalent degree from another university is required.

In addition to an M.A. degree the department requires a statement of purpose. Students without a UCLA M.A. must also submit three letters of recommendation, normally from previous instructors in the classics, and the Graduate Record Examination (while there is no minimum required score, the GRE is used as a criterion in uncertain cases, as well as to assess applications for teaching assistantships and other financial assistance from the department). The department uses the same application form as UCLA Graduate Application Processing, which may be obtained from the department or the Graduate Admissions Office.

Major Fields or Subdisciplines

The department offers the Ph.D. degree in Classics with major fields in (1) classical literature and philology, (2) classical linguistics, (3) Byzantine Greek, and (4) medieval Latin.

Foreign Language Requirement

New students in the doctoral program will normally have demonstrated proficiency in French, German, or Italian as described in the requirements for the M.A. degree. During the first year of study in the Ph.D. program, you must demon-

strate proficiency in either French (Italian may be substituted with consent of the regular departmental faculty) or German, whichever was not used to satisfy the M.A. requirement. If Italian or French was used to satisfy the M.A. requirement, German must be taken.

Greek and Latin Graduate Courses

Most Greek and Latin seminars may be taken as follows: (1) full seminars (four units, letter grading), with a required final paper (or an equivalent workload, such as a final examination, as designated by the instructor) to be presented to the instructor and assessed as part of the final grade or (2) half seminars, with full participation in the course but no required paper (or equivalent as described above). Half seminars carry two units and are normally taken on an S/U grading basis only. Arrangements must be made with the instructor beforehand for S/U or letter grading.

Course Requirements

Classical Literature and Philology — M.A. degree holders in Greek only or Latin only must take two 200A-200B-200C courses in the other language. In addition, five (or more) 200-series courses are required of all Ph.D. students, including Greek 210 and Latin 210 unless taken previously. Required courses (except for Greek 210 and Latin 210) are in addition to those taken for the M.A.

Classical Linguistics — M.A. degree holders in Greek only or Latin only must complete the Classics M.A. course requirements by taking two 200A-200B-200C courses in the other language. A minimum of five full seminars is required: Classics 180 (or an equivalent undergraduate or graduate course taken at UCLA or elsewhere), 240, Greek 242, 243, Latin 242, and either Classics 230A-230B or one term of Vedic (Indic M222A, presupposing three terms of upper division classical Sanskrit).

Byzantine Greek — M.A. degree holders in Greek only or Latin only must complete the Classics M.A. course requirements by taking courses 200A-200B-200C in the other language. A minimum of five full seminars is required: Greek 210, at least two courses from 231A-231B-231C, 240A-240B, 245, History 216A-216B.

Medieval Latin — M.A. degree holders in Greek only or Latin only must complete the Classics M.A. course requirements by taking courses 200A-200B-200C in the other language. A minimum of five full seminars is required: Latin 130 or 120, 131, 133 (or equivalent undergraduate or graduate courses taken at UCLA or elsewhere), 210, at least two courses from 231A-231B, 243 (or History 219A or 219B), Greek 231A or 231B or 231C (or an upper division medieval language course such as French 115A, 115B, 115C, German 122, Italian 113A, 113B, 114A, 114B, 190, Spanish M118A, M118B, 122, 123, or an equivalent un-

dergraduate or graduate course taken at UCLA or elsewhere), History 217.

Qualifying Examinations

Each major field has a separate reading list. All lists include the reading list in Greek and Latin authors required for the M.A. in Classics.

Classical Literature and Philology — (1) A written three-hour comprehensive examination consisting of passages from the Ph.D. reading list and other literature (M.A. degree holders in Greek only or Latin only take an additional two-hour examination in sight translation from the other language), (2) a 15- to 25-page research paper on a field or author of your choice outside your area of specialization (submitted either before or after the comprehensive examination), (3) a written three-hour examination in your area of specialization and prospective dissertation topic.

Classical Linguistics — (1) A written three-hour translation examination in classical Greek or Latin, (2) a written three-hour examination consisting of passages of ancient texts covered in the required course, (3) a two-hour written examination in comparative grammar.

Byzantine Greek — (1) A written three-hour translation examination in classical Greek and (2) a written three-hour examination on Byzantine Greek.

Medieval Latin — (1) A written three-hour translation examination in classical Latin and (2) a written three-hour examination on medieval Latin.

Complete examination details are available in the department. Each qualifying examination may normally be retaken once. The University Oral Qualifying Examination, administered by the doctoral committee after you complete your last qualifying examination, tests your knowledge of your major field (and possible stipulated areas outside your specialization) and includes discussion of your formal dissertation proposal.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Dissertation/Final Oral Examination

An oral defense of the dissertation, which is written under the supervision of the individual adviser and must contribute significantly to research on the subject, may be required or waived at the discretion of the doctoral committee.

Classics

Lower Division Courses

10. Survey of Classical Greek Culture. Knowledge of Greek not required. Lectures, many illustrated, on Greek life and culture from age of Homer to Roman Conquest. Discussion of art, literature, philosophy, and mythology. Mr. Blank, Mr. Lattimore (F,W)

20. Survey of Roman Civilization. Knowledge of Latin not required. Study of life and culture of Rome from time of its foundation to end of antiquity. Survey of art, literature, and political thought of the Romans. Selections from Latin authors read in translation.

Mr. Frischer, Mr. Gurval, Ms. Newlands (W,Sp)

40. Survey of Greek Literature in Translation. Lecture, three hours; discussion, one hour. Readings in English of Greek literature from the beginning to Roman times to demonstrate the sweep of Greek literary achievement and the foundations it laid for subsequent literary developments. P/NP or letter grading.

Mr. Goldberg, Mr. Haslam

41. Survey of Latin Literature in Translation. Lecture, three hours; discussion, one hour. Readings in English to emphasize unique achievements of Latin literature, particularly in such areas as drama, epic, satire, oratory, and history. P/NP or letter grading.

Mr. Dyck, Mr. Gurval, Ms. Newlands

50F. Power and Imagination in Ancient Rome. Lecture, 90 minutes; discussion, 90 minutes. Prerequisite: consent of instructor. Freshman seminar designed to survey major aspects of Roman civilization, including art, religion, literature, and politics. P/NP or letter grading.

Mr. Frischer (F,W,Sp)

51. Art and Archaeology of the Classical World. Lecture, three hours; discussion, one hour. Survey of a major period, theme, or medium of Greek and Roman art and archaeology at discretion of instructor. P/NP or letter grading.

Mr. Frischer, Mr. Lattimore

M70. Survey of Medieval Greek Culture. (Same as History M70.) Lecture, three to four hours. Classical roots and medieval manifestation of Byzantine civilization: political theory, Roman law, pagan critique of Christianity, literature, theology, and contribution to the Renaissance (including discovery of America).

Mr. Dyck

88A-88Z. Lower Division Seminars. Seminar, three hours. Variable topics; consult *Schedule of Classes* or department for topics to be offered in a specific term. P/NP or letter grading.

88A. Socrates. Examination of evidence for Socrates' life and thought, through texts from Plato, Xenophon, and Aristophanes, in an attempt to see how Socrates worked and affected those around him.

Mr. Blank (Sp)

88C. Comparative Mythology. Ways of studying myth through history, especially in ancient Near Eastern and Indo-European cultures. Comparison of myths on both diffusionary and genetic models. Reconstruction of protomyths common to prehistoric Western Asia and Europe.

Mr. Puhvel (F,W,Sp)

88D. The Greek Symposium. Freshman seminar on the topic of the Greek symposium, an institution that permits students to understand many major features of Greek culture and society.

Ms. Bergren

Upper Division Courses

140. Topics in History of Greek Literature. Lecture, three hours. Prerequisites: courses 10, 40. Investigation of a specific issue in the understanding of Greek literature, such as definition of a genre or evaluation of a particular author. May be repeated for credit with topic change. P/NP or letter grading.

Mr. Haslam, Mr. Janko

141. Topics in History of Latin Literature. Lecture, three hours. Prerequisites: courses 20, 41. Investigation of a specific issue in the interpretation of Latin literature, such as definition of a genre or evaluation of a particular author. May be repeated for credit with topic change. P/NP or letter grading.

Mr. Goldberg, Mr. Gurval, Ms. Newlands

142. Ancient Epic. Lecture, three hours. Prerequisites: courses 10 or 20, and 40 or 41. Homer's *Iliad* and *Odyssey*, Vergil's *Aeneid*, and Ovid's *Metamorphoses*, studied in translation.

Ms. Bergren, Mr. Gurval, Ms. King

143. Ancient Drama. Lecture, three hours. Prerequisites: courses 10 or 20, and 40 or 41. Study of Greek and/or Latin drama in translation. P/NP or letter grading.

Mr. Goldberg, Mr. Haslam

144. Generic and Topical Studies in Ancient Literature. Lecture, three hours. Prerequisites: courses 10 or 20, and 40 or 41. Investigation of a problem in ancient literature that involves discussion of both Greek and Roman material. May be repeated for credit with topic change. P/NP or letter grading.

Mr. Frischer, Mr. Goldberg, Ms. Newlands

145A. Ancient Greek and Roman Philosophy. Lecture, two hours; discussion, one hour. Study of some major Greek and Roman philosophical texts, including those of Pre-Socratics, Plato, Aristotle, and Hellenistic philosophers, with emphasis on historical and cultural setting of the texts, their literary form, interrelations, and contribution to discussion of basic philosophical issues. Mr. Blank

145B. Later Ancient Greek Philosophy. Lecture, two hours; discussion, one hour. Prerequisite: one course from 145A, Philosophy 1, 100A, 101B, or 102, or consent of instructor. Study of some major texts in Greek philosophy of the Hellenistic and Roman periods. Readings vary and include works by Stoics, skeptics, philosophers of science, Neoplatonists, etc. P/NP or letter grading. Mr. Blank

150A. Origins of the Western View of Women: The Female in Greek Thought. Lecture, three hours. Prerequisites: course 10 or equivalent, consent of instructor. Interdisciplinary study of concept of the female in various forms of thought developed by the Greeks (e.g., epic, tragedy, comedy, history, political philosophy, gynecology). Special emphasis on how these texts lay the foundation for the Western view of women. Ms. Bergren

150B. Origins of the Western View of Women: The Female in Roman and Early Christian Thought. Lecture, three hours. Prerequisites: course 20 or equivalent, consent of instructor. Interdisciplinary study of concept of the female in Roman and early Christian thought. Special emphasis on status of the female with regard to sexuality, procreation, and the sacred. Ms. Bergren, Ms. Newlands

C151E. Archaeological Field Techniques (12 units). Off-campus field archaeology, 36 hours. Prerequisites: at least one classical archaeology course, consent of instructor. Training in techniques of archaeological research in the field, including topographic and area survey, mapping and recording artifacts, excavation and data analysis. Conducted in Mediterranean area. Concurrently scheduled with course C251E. P/NP or letter grading. Ms. Morris

152. The Ancient City. Lecture, three to four hours. Prerequisites: courses 10 and 20, or History 1A, or equivalent. Study of urban planning in the ancient world, with particular attention to cities of classical Greece and Rome, but with consideration also to comparable developments in the ancient Near and Far East. Examination of questions of architectural space and organization, of form, design, and function of major municipal areas and buildings, and of provision of public amenities by detailed reference to significant archaeological sites and contemporary sources.

Mr. Frischer, Mr. Lattimore

M153A. Minoan Art and Archaeology. (Same as Art History M102A.) Lecture, three hours. Prerequisite: Art History 50. Study of development of art and architecture in Minoan Crete from ca. 3000 to 1000 B.C. P/NP or letter grading. Ms. Morris

M153B. Mycenaean Art and Architecture. (Same as Art History M102B.) Lecture, three hours. Prerequisite: Art History 50. Study of development of art and architecture in Mycenaean Greece from ca. 2000 to 1000 B.C. P/NP or letter grading.

Mr. Janko, Ms. Morris

M153C. Archaic Greek Art and Archaeology. (Same as Art History M102C.) Lecture, three hours. Prerequisites: course 10 or equivalent, Art History 50. Study of development of art and architecture of Greek world from approximately 800 through 490 B.C. P/NP or letter grading. Mr. Lattimore, Ms. Morris

M153D. Classical Greek Art and Archaeology. (Same as Art History M102D.) Lecture, three hours. Prerequisites: course 10 or equivalent, Art History 50. Recommended: upper division classics or Greek courses. Study of development of art and architecture of Greek world from approximately 490 through 350 B.C. P/NP or letter grading. Mr. Lattimore

M153E. Hellenistic Greek Art and Archaeology. (Same as Art History M102E.) Lecture, three hours. Prerequisites: course 10 or equivalent, Art History 50. Study of development of art and architecture of Greek world from middle of the 4th century B.C., including transmittal of Greek art forms to the Romans. P/NP or letter grading. Mr. Lattimore

M153F. Etruscan Art. (Same as Art History M102F.) Lecture, three hours. Prerequisite: Art History 50. Arts of Italic peninsula from ca. 1000 B.C. to end of the Roman Republic. P/NP or letter grading. Ms. Downey

M153G. Roman Art. (Same as Art History M102G.) Lecture, three hours. Prerequisite: Art History 50. Art and architecture of Rome and its Empire from ca. 300 B.C. to A.D. 300. P/NP or letter grading. Ms. Downey

M153H. Late Roman Art. (Same as Art History M102H.) Lecture, three hours. Prerequisites: course M153G, Art History 50. Art of Roman Empire from the 2nd through 4th century (A.D.). P/NP or letter grading. Ms. Downey

161. Introduction to Classical Mythology. Lecture, three to four hours. Prerequisite: course 10 or History 1A or equivalent. Origins of classical myth; substance of divine myth and heroic saga; place of myth in religion; survey of study of classical mythology. Mr. Lattimore, Mr. Puhvel

162. Classical Myth in Literature. Use of myth in principal authors and genres of Greek and Roman literature, with examples of its influence in later literatures. Mr. Lattimore, Mr. Puhvel

165. Ancient Athletics. Prerequisite: course 10 or History 1A or equivalent. Study of ancient Greek and Roman athletics and their connections with religion, politics, literature, and art. Mr. Lattimore

166A. Greek Religion. Prerequisite: course 10 or equivalent. Study of the religion of the ancient Greeks. Mr. Blank, Mr. Dyck, Mr. Janko

166B. Roman Religion. Prerequisite: course 20 or equivalent. Study of the religion of the ancient Romans. Mr. Frischer, Ms. Newlands

167. Greek and Roman Magic. Lecture, three hours. Prerequisite: course 10 or 20. Study of beliefs about supernatural phenomena in the ancient world, including witches, ghosts, vampires, and magic spells, attested in both literary and archaeological sources. P/NP or letter grading. Mr. Dyck

168. Introduction to Comparative Mythology. Prerequisite: course 161 or consent of instructor. Religious, mythical, and historical traditions of Greece and Rome compared with each other and with those of other ancient Near Eastern and European societies. Mr. Puhvel

M170. Power and Imagination in Byzantium. (Formerly numbered 88B.) (Same as History M122.) Lecture, three hours. Prerequisites: course M70 or History 123A-123B. Study of relations of authority and the intelligentsia in the highly centralized Byzantine Empire. Topics include criticism of the emperor, iconoclasm, intellectual freedom, attempts at reform. Mr. Dyck (F,W,Sp)

180. Introduction to Classical Linguistics. Prerequisites: Greek 3, Latin 3. Basics of comparative grammar of Greek and Latin in relation to one another and in the frame of Indo-European linguistics. Mr. Janko, Mr. Puhvel

190. The Medieval Book. Seminar, three hours. Prerequisites: courses 10, 20, and 40 or 41, senior standing in Greek and Latin, Greek, Latin, or classical civilization. History of the book from manuscript to printing, with attention to construction, layout, decoration, and script, as well as changing cultural and historical contexts, medieval methods of information retrieval, and transition from script to print culture. Mr. Blank

195A-195B-195C. Senior Honors Paper (2 units, 2 units, 8 units). Supervised through individual consultation with an appropriate faculty member, students write a research paper on a topic of their own choosing within their area of concentration in the major. **195A.** P/NP grading. **195B.** Prerequisite: course 195A with a grade of P. P/NP grading. **195C.** Prerequisite: course 195B with a grade of P. Letter grading.

197. The Female in Platonic and Aristotelian Thought. Prerequisite: Greek and Latin major or consent of instructor. Study of function of the female at levels of the body, household, city, and cosmos in Platonic and Aristotelian thought. Special attention to how these levels function as analogies and supplements of one another in a comprehensive construction of gender. Ms. Bergren

199. Special Studies in Classics (2 to 8 units). Prerequisites: senior standing, consent of instructor.

Graduate Courses

200. History of Classical Scholarship. Mr. Dyck

230A-230B. Language in Ancient Asia Minor. Prerequisite: consent of instructor. Survey of the language situation in Anatolia in 2nd and 1st Millennium B.C. Readings in Hittite, Palaic, Luwian, Hieroglyphic, Lycian, and Lydian texts. Anatolian-Greek relationships and survivals in classical and Hellenistic times. Mr. Puhvel

240. Etruscology. Prerequisite: consent of instructor. Survey of scholarly research on Etruscan language and culture, with analysis of epigraphic material. Mr. Puhvel

244. Textual Criticism: Studies in Preparation of a Critical Edition of Greek and/or Latin Texts. Seminar, three hours. Different steps required in preparation of a critical edition of an ancient text: localizing manuscripts; collation; establishing the stemma; selecting the right reading on basis of knowledge of the context, of the language of the author, and of the sources; emendations; formulation of *apparatus criticus* and *apparatus fontium*. Mr. Dyck, Mr. Haslam, Mr. Löfstedt

245. Computing and Classics. Introduction to processing and analysis of digitized texts of classical authors for purposes of literary history and criticism. Mr. Frischer

246. Greek and Latin Meter. Prerequisite: consent of instructor. Comprehensive study of meter as it functions in classical poetry. Mr. Haslam, Mr. Janko

251A. Seminar: Classical Archaeology — Aegean Bronze Age. Mr. Janko

251B. Seminar: Classical Archaeology — Greco-Roman Architecture. Mr. Frischer, Mr. Lattimore

251C. Seminar: Classical Archaeology — Greco-Roman Sculpture. Mr. Lattimore

251D. Seminar: Classical Archaeology — Greco-Roman Painting. Discussion, three hours. Prerequisite: consent of instructor. Studies in style and iconography of various periods of ancient Greek and Roman painting. May be repeated for credit with consent of instructor. Mr. Lattimore

C251E. Archaeological Field Techniques (12 units). (Formerly numbered 251E.) Off-campus field archaeology, 36 hours. Prerequisites: at least one classical archaeology course, consent of instructor. Training in techniques of archaeological research in the field, including topographic and area survey, mapping and recording artifacts, excavation and data analysis. Conducted in Mediterranean area. Concurrently scheduled with course C151E. S/U or letter grading. Ms. Morris

252. Topography and Monuments of Athens. Detailed studies in topography and monuments of Athens, combining evidence of literature, inscriptions, and actual remains. Mr. Lattimore

253. Topography and Monuments of Rome. Detailed studies in topography and monuments of ancient Rome, combining evidence of literature, inscriptions, and actual remains. Mr. Frischer, Mr. Lattimore

260. Topics in Ancient Religion. Seminar, three hours. Prerequisite: consent of instructor. Ms. Bergren, Mr. Frischer, Mr. Lattimore

268. Seminar: Comparative Mythology. Prerequisites: course 168, consent of instructor. Advanced study of selected topics in comparing Greek and Roman traditions with other ancient Near Eastern and European societies. Mr. Puhvel

287. Graduate Colloquium in Classical Literature. Survey of basic methods of and approaches to classical scholarship, including textual criticism, literary interpretation and theory, hermeneutics, interdisciplinary studies, and computer applications to classics. Emphasis varies from year to year, depending on instructor(s). May be repeated for credit with topic change. S/U grading. (F,W,Sp)

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

380. Research Apprentice Practicum. Discussion, three hours. Prerequisite: apprentice personnel employment as a graduate student researcher in the department on Philodemus Translation Project. Training in textual reconstruction, translation, and annotation for those working as graduate student researchers on Philodemus Translation Project (text and facing translation of fragmentary aesthetic treatises of Philodemus, teacher of Vergil). Mr. Blank, Mr. Janko

596. Directed Individual Study or Research (2 to 8 units).

597. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units).

599. Research for Ph.D. Dissertation (2 to 8 units).

Greek

Lower Division Courses

1. Elementary Greek. Lecture, five hours. (F)

2. Elementary Greek. Lecture, five hours. Prerequisite: course 1. (W)

3. Elementary Greek. Lecture, five hours. Prerequisite: course 2. (Sp)

Upper Division Courses

Note: Greek 3 is prerequisite to 100, which is prerequisite to 101A through 106 and 110 through 124.

100. Readings in Greek Prose. Prerequisite: course 3. Reading of Plato's *Apology* or a text of comparable difficulty. Ms. Bergren, Mr. Haslam, Mr. Janko

101A. Homer: *Odyssey*. Mr. Haslam, Mr. Janko, Mr. Puhvel

101B. Homer: *Iliad*. Mr. Haslam, Ms. King, Mr. Puhvel

102. Lyric Poets. Selections from Archilochus to Bacchylides. Ms. Bergren, Mr. Haslam, Mr. Janko

103. Aeschylus. Mr. Blank, Mr. Haslam, Mr. Janko

104. Sophocles. Ms. Bergren, Mr. Haslam, Mr. Janko, Ms. King

105. Euripides. Mr. Haslam, Mr. Janko, Ms. King

106. Aristophanes. Ms. Bergren, Mr. Haslam, Mr. Janko

107. Hesiod. Lecture, three hours. Prerequisite: course 100. Reading of *Theogony* and excerpts from *Works and Days*, with emphasis on Hesiod's place in Greek literature and his role in transmission of Greek mythology. Mr. Goldberg, Mr. Janko

110. Study of Greek Prose. Work in sight reading and grammatical analysis of Attic prose texts; writing Attic prose. Mr. Blank, Mr. Haslam, Mr. Janko

111. Herodotus. Mr. Blank, Mr. Janko, Mr. Lattimore

112. Thucydides. Mr. Haslam, Mr. Janko, Mr. Lattimore

113. Attic Orators. Mr. Dyck, Mr. Haslam, Mr. Lattimore

121. Plato. Mr. Blank, Mr. Frischer, Ms. King

122. Plato: *Republic*. Ms. Bergren, Mr. Blank, Mr. Haslam

123. Aristotle: *Poetics and Rhetoric*. Mr. Blank, Mr. Haslam, Mr. Janko

124. Aristotle: *Ethics*. Mr. Blank, Mr. Dyck, Mr. Frischer

130. Readings in the New Testament. Prerequisite: course 3. Mr. Dyck, Mr. Haslam

131. Readings in Later Greek. Prerequisite: course 100. Topics vary from year to year and include "Longinus," "On the Sublime; Marcus Aurelius; Arrian; the Second Sophistic; Plutarch; later epic; epigram; epistolographi Graeci. Mr. Blank, Mr. Dyck, Mr. Gural

132. Survey of Byzantine Literature. Prerequisite: course 100. Readings based on (1) *Anthology of Byzantine Prose*, ed. Nigel Wilson and (2) *Oxford Book of Medieval and Modern Greek Verse*, ed. C.A. Trypanis, or if unavailable, *Poeti bizantini*, ed. R. Cantarella. In addition, necessary historical and cultural background provided by readings and lectures. Mr. Dyck

133. Readings in Byzantine Literature. Prerequisite: course 132. Topics vary from year to year and include Procopius, Agathias, Michael Psellus, the *Alexiad* of Anna Comnena, and *Digenis Akritas*. Mr. Dyck

199. Special Studies in Greek (2 to 8 units). Prerequisites: senior standing, consent of instructor.

Graduate Courses

The 200-series courses which are designated A and B (e.g., 201A-201B) are double courses. Course A is a preseminar and is normally prerequisite to course B, a seminar. Seminars numbered 201A through 233 (except 210) may be taken for either two or four units. If a seminar is taken for four units, a paper is required.

200A-200B-200C. History of Greek Literature (6 units each). Prerequisite: consent of instructor. Lectures on history of Greek literature, supplemented on the part of the student by independent reading of Greek texts in original language. Ms. Bergren, Mr. Haslam, Mr. Janko

201A-201B. Homer: *Iliad* (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading. Ms. Bergren, Mr. Haslam, Mr. Janko

202A-202B. Homer: *Odyssey and the Epic Cycle* (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading. Ms. Bergren, Mr. Haslam, Mr. Janko

203. Hesiod (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading. Ms. Bergren, Mr. Frischer, Mr. Janko

204. Homeric Hymns (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading. Ms. Bergren, Mr. Janko

205. Seminar: Aeschylus (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading. Ms. Bergren, Mr. Blank, Mr. Haslam

206A-206B. Sophocles (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading. Mr. Haslam, Mr. Lattimore

207A-207B. Euripides (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading. Mr. Haslam, Ms. King

208A-208B. Aristophanes (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading. Ms. Bergren

209A-209B. Seminars: Hellenistic Poetry (2 or 4 units each). (Formerly numbered 209.) S/U (two-unit course) or letter (four-unit course) grading. Mr. Frischer, Mr. Haslam

210. Advanced Greek Prose Composition. Prerequisite: course 110 or equivalent. Mr. Haslam, Mr. Janko

211A-211B. Herodotus (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading. Mr. Blank

212A-212B. Thucydides (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading. Mr. Haslam, Mr. Lattimore

213. Seminar: Greek Historiography (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading. Mr. Haslam

214. Demosthenes (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading. Mr. Dyck

215. Early Greek Orators (2 or 4 units). Studies in works of Antiphon, Andocides, and Lysias. S/U (two-unit course) or letter (four-unit course) grading. Mr. Dyck

216. Menander (2 or 4 units). Prerequisite: reading knowledge of classical Greek. S/U (two-unit course) or letter (four-unit course) grading. Mr. Frischer, Mr. Goldberg

217A-217B. Greek Lyric Poetry (2 or 4 units each). Prerequisite: consent of instructor. S/U (two-unit course) or letter (four-unit course) grading. **217A.** Archaic Lyric. Study of lyric poetry of Archaic period, both choral and monodic, with elegiac and iambic included. **217B.** Pindar and Bacchylides. Study of choral odes of Pindar and Bacchylides, with special attention to conventions of the epinician. Ms. Bergren, Mr. Haslam, Mr. Janko

220. Seminar: Greek Novel (2 or 4 units). Lecture, three hours. Study of the Greek romance and its place in Greek literature. Two texts (Chariton: *Chaereas and Callirhoe* and Longus: *Daphnis and Chloe*) studied in some detail. S/U (two-unit course) or letter (four-unit course) grading.

221. Seminar: Pre-Socratic Philosophers (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading. Mr. Blank, Mr. Frischer

222A-222B. Plato (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading. Ms. Bergren, Mr. Blank

223A-223B. Aristotle (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading. Mr. Blank, Mr. Dyck, Mr. Frischer

224. Seminar: Post-Aristotelian Philosophy (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading. Mr. Blank, Mr. Frischer

231A-231B-231C. Seminars: Later Greek and Byzantine Literature (2 or 4 units each). Prerequisite: consent of instructor. Studies in various aspects of Byzantine Greek language and literature. Topics vary from year to year. Each course may be taken independently and may be repeated for credit with topic change. S/U (two-unit course) or letter (four-unit course) grading. Mr. Blank, Mr. Dyck

233. Byzantine Poetry (2 or 4 units). Study of main representatives of both religious and secular poetry. S/U (two-unit course) or letter (four-unit course) grading. Mr. Dyck

240A-240B. History of the Greek Language. Prerequisite: consent of instructor. **240A.** Linguistic history of classical Greek. **240B.** Postclassical, medieval, and modern Greek. Mr. Dyck, Mr. Janko

241. Greek Epigraphy. Survey of Greek historical inscriptions, chiefly Attic. Mr. Dyck

242. Greek Dialects and Historical Grammar. Prerequisite: consent of instructor. Linguistic situation in early Greece. Readings in classical Greek dialectal texts. Greek grammar in context of common Greek and Indo-European linguistics. Mr. Janko, Mr. Puhvel

243. Mycenaean Greek. Prerequisite: consent of instructor. Script, language, and grammar of the Linear B inscriptions; their relevance to ancient Greek linguistic and cultural history. Mr. Janko, Mr. Puhvel

244. Greek Papyrology. Prerequisites: reading knowledge of Greek, consent of instructor. Introduction to Greek papyri, considered both as historical documents and as carriers of literature. Mr. Haslam

245. Greek Paleography. Studies in development of book hand in Greek manuscripts earlier than the invention of printing. Mr. Blank

596. Directed Individual Study or Research (2 to 8 units).

597. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units).

599. Research for Ph.D. Dissertation (2 to 8 units).

Latin

Lower Division Courses

1. Elementary Latin. Lecture, five hours. (F)

16. Elementary Latin for Graduate Students (No credit). Concurrently scheduled with course 14.

2. Elementary Latin. Lecture, five hours. Prerequisite: course 1. (W)

3. Elementary Latin. Lecture, five hours. Prerequisite: course 2. (Sp)

14. Elementary Latin: Intensive (8 units). All declensions of nouns and adjectives, all conjugations in indicative mood, and primary uses of subjunctive mood. Emphasis on development of ability to read easy selections of classical prose.

Upper Division Courses

Note: Latin 3 is prerequisite to 100, which is normally prerequisite to all other 100-series courses in classical Latin authors.

100. Readings in Latin Prose and Poetry. Lecture, three hours. Prerequisite: course 3 or equivalent. Close study of a prose text supplemented with related readings in poetry. Attention to historical and cultural context. Course is normally prerequisite to other courses in the Latin 100 series.

Mr. Frischer, Mr. Gurval, Ms. Newlands

101. Plautus. Mr. Goldberg, Mr. Löfstedt

102. Terence. Mr. Goldberg, Mr. Löfstedt

103. Lucretius. Mr. Blank, Mr. Frischer, Ms. Newlands

104. Ovid.

Ms. Bergren, Mr. Gurval, Ms. Newlands

105A. Beginning Vergil: Selections from Aeneid I-VI. (Formerly numbered 105.) Lecture, three hours. Prerequisite: course 100 or consent of instructor. Reading of one or more books from first half of the *Aeneid*, designed especially for students with only limited experience in reading Latin poetry.

Mr. Frischer, Mr. Gurval, Ms. Newlands

105B. Advanced Vergil. Lecture, three hours. Prerequisite: course 105A or equivalent or consent of instructor. Reading and discussion of Vergil's *Eclogues*, *Georgics*, and/or second half of the *Aeneid*. May be repeated for credit with change in readings. P/NP or letter grading. Ms. Newlands (Sp)

106. Catullus. Mr. Haslam, Ms. Newlands

107. Horace.

Mr. Frischer, Mr. Gurval, Ms. Newlands

108. Roman Elegy. Selections from Catullus, Tibullus, and Propertius.

Mr. Frischer, Mr. Gurval, Ms. Newlands

109. Roman Satire. Selections from *Epistles* of Horace, *Satires* of Juvenal, and *Epigrams* of Martial.

Mr. Frischer, Ms. Newlands

110A-110B. Study of Latin Prose. Discussion, three hours. Course 110A is prerequisite to 110B. Work in sight reading and grammatical analysis of classical prose texts; writing of classical prose.

Mr. Gurval, Mr. Löfstedt, Ms. Newlands

111. Livy. Mr. Frischer, Mr. Gurval, Mr. Löfstedt

112. Tacitus.

Mr. Frischer, Mr. Gurval, Ms. Newlands

113. Cicero: The Orations.

Mr. Dyck, Mr. Frischer, Mr. Gurval

114. Roman Epistolography: Cicero and Pliny.

Mr. Dyck, Mr. Frischer, Mr. Gurval

115. Caesar.

Mr. Dyck, Mr. Gurval

116. Roman Novel. Lecture, three hours. Prerequisite: course 100 or equivalent. Reading and discussion of either Petronius' *Satyricon* or Apuleius' *Metamorphoses* and development of the genre of prose novel in antiquity. May be repeated for credit with change in author and text.

Mr. Frischer, Mr. Gurval, Ms. Newlands

117. Sallust. Mr. Gurval, Ms. Newlands

118. Seneca. Selection of Seneca's works read in Latin. Mr. Gurval, Mr. Löfstedt, Ms. Newlands

120. The Vulgate. Lecture, three hours. Prerequisite: course 3 or consent of instructor. Reading of selected chapters of St. Jerome's translation of the Bible, with emphasis on unclassical features of the Latin.

Mr. Löfstedt

121. Patristic Texts. Lecture, three hours. Prerequisite: course 100. Reading and discussion of one or more Latin patristic texts (especially works of Ambrose, Augustine, and/or Jerome), with emphasis on specific features of patristic, as opposed to classical, Latin.

Mr. Löfstedt

130. Introduction to Medieval Latin. Prerequisite: course 3 or consent of instructor. Reading of easy prose texts, with emphasis on basic language training.

Mr. Löfstedt

131. Medieval Latin Prose. Prerequisite: course 130 or consent of instructor. Extensive reading of selected texts in prose, with emphasis on idiosyncrasies of medieval Latin.

Mr. Löfstedt

133. Medieval Latin Poetry. Prerequisite: one upper division Latin language course or consent of instructor.

Mr. Löfstedt

199. Special Studies in Latin (2 to 8 units). Prerequisites: senior standing, consent of instructor.

Graduate Courses

The 200-series courses which are designated A and B (e.g., 203A and 203B) are double courses. Course A is a pre-seminar and is normally prerequisite to course B, a seminar.

Seminars numbered 201 through 231B (except 210) may be taken for either two or four units. If a seminar is taken for four units, a paper is required.

200A-200B-200C. History of Latin Literature (6 units each). Prerequisite: consent of instructor. Lectures on history of Latin literature, supplemented on the part of the student by independent reading of Latin texts in the original.

Mr. Frischer, Mr. Goldberg, Ms. Newlands

201. Roman Epic Tradition (2 or 4 units). Seminar, three hours. Close study of one epic poet other than Vergil (e.g., Ennius, Lucan, Valerius Flaccus, Statius, Silius Italicus), with attention to the literary tradition of epic. May be repeated for credit with topic change. S/U (two-unit course) or letter (four-unit course) grading.

Mr. Gurval, Ms. Newlands

202. Seminar: Catullus (2 or 4 units). Detailed consideration of entire Catullan corpus. S/U (two-unit course) or letter (four-unit course) grading.

Ms. Newlands

203A. Elegiac Poetry (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading.

Mr. Frischer, Ms. Newlands

203B. Propertius (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading.

Mr. Frischer, Mr. Gurval, Ms. Newlands

204A-204B. Vergil's Aeneid (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading.

Mr. Frischer, Mr. Gurval, Ms. Newlands

205A. Seminar: Vergil's Bucolics (2 or 4 units). (Formerly numbered 205.) S/U (two-unit course) or letter (four-unit course) grading.

Mr. Frischer, Mr. Gurval, Ms. Newlands

205B. Seminar: Vergil's Georgics (2 or 4 units). Close reading of Vergil's text; careful evaluation of influential criticism on the poem, much of it recent; examination of the work's place within the tradition of rural poetry. S/U (two-unit course) or letter (four-unit course) grading.

Ms. Newlands

206. Horace (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading.

Mr. Frischer, Mr. Gurval, Ms. Newlands

207. Roman Comedy (2 or 4 units). Prerequisite: consent of instructor. Survey of history of Roman comedy. Reading of one comedy by Plautus or Terence, with emphasis on language and meter. S/U (two-unit course) or letter (four-unit course) grading.

Mr. Goldberg, Mr. Löfstedt

208. Ovid (2 or 4 units). Prerequisite: reading knowledge of classical Latin. Detailed study of poetic works of Ovid. Readings in the original with discussion of secondary literature and scholarship. May be repeated for credit with topic change. S/U (two-unit course) or letter (four-unit course) grading.

Ms. Bergren, Ms. Newlands

209. Seminar: Roman Satire (2 or 4 units). Detailed study of an individual satirist, with attention to his position in development of the satirical genre in Roman literature. Choice of author varies from year to year. Close study of the text, of characteristics of the writer as a social critic and artist, and of contemporary literary and social environment. S/U (two-unit course) or letter (four-unit course) grading.

Mr. Frischer, Ms. Newlands

210. Advanced Latin Prose Composition. Prerequisite: course 110B.

211A-211B-211C. Seminars: Roman Historians (2 or 4 units each). Study of considerable portions of writings of the following. S/U (two-unit course) or letter (four-unit course) grading:

211A. Sallust. Mr. Gurval, Ms. Newlands

211B. Livy. Mr. Frischer, Mr. Gurval

211C. Tacitus. Mr. Frischer, Mr. Gurval, Ms. Newlands

215. Seminar: Roman Novel (2 or 4 units). Works such as Petronius' *Satyricon* and Apuleius' *Metamorphoses*: study of literary problems. May be repeated for credit with topic change. S/U (two-unit course) or letter (four-unit course) grading.

Mr. Blank, Mr. Frischer, Ms. Newlands

216. Roman Rhetoric (2 or 4 units). Seminar, three hours. Close study of one rhetorical text (e.g., *Rhetorica ad Herennium*, Cicero's *de Oratore*, Seneca's *Controversiae* or *Suasoriae*, Quintilian's *Institutio*), with attention to its place in rhetorical tradition. May be repeated with topic change. S/U (two-unit course) or letter (four-unit course) grading.

Mr. Dyck, Mr. Frischer, Ms. Newlands

220. Cicero's Orations (2 or 4 units). Seminar, three hours. S/U (two-unit course) or letter (four-unit course) grading.

Mr. Dyck, Mr. Frischer, Ms. Newlands

221A. Cicero's Philosophical Works (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading.

Mr. Dyck, Mr. Frischer

221B. Cicero: De Natura Deorum (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading.

Mr. Dyck, Mr. Frischer

222. Seminar: Roman Stoicism (2 or 4 units). Prerequisite: reading knowledge of Greek and Latin. S/U (two-unit course) or letter (four-unit course) grading.

Mr. Blank, Mr. Dyck, Mr. Frischer

223. Lucretius (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading.

Mr. Blank, Mr. Frischer

224. Seneca (2 or 4 units). Seminar, three hours. Detailed study of one work of prose or poetry by the younger Seneca. Emphasis on literary and philological problems, with some attention to philosophical and historical matters as well. May be repeated with topic change. S/U (two-unit course) or letter (four-unit course) grading.

Mr. Goldberg, Mr. Gurval, Ms. Newlands

231A-231B. Seminars: Medieval Latin (2 or 4 units each). Prerequisite: at least one upper division Latin course or consent of instructor. Studies in various areas of the language and literature of medieval Latin. May be repeated for credit with consent of instructor. S/U (two-unit course) or letter (four-unit course) grading.

Mr. Löfstedt

232. Vulgar Latin. Prerequisite: consent of instructor. History and characteristics of popular Latin; its development into early forms of the Romance languages.

Mr. Löfstedt

235. Late Latin Poetry. Seminar, three hours. Close study, with attention to literary and historical background, of work of one or several poets who flourished between the death of Ovid and fall of the Roman Empire.

Ms. Newlands

236. Late Latin Prose. Seminar, three hours. Close study, with attention to literary and historical background, of work of one or several prose authors who flourished between the death of Tacitus and fall of the Roman Empire.

Ms. Newlands

240. History of the Latin Language. Prerequisite: consent of instructor. Development of Latin from the earliest monuments until its emergence in the Romance languages.

Mr. Löfstedt

242. Italic Dialects and Latin Historical Grammar. Prerequisite: consent of instructor. Linguistic situation in early Italy. Readings in Oscan, Umbrian, and early Latin texts. Latin grammar in context of Italic and Indo-European linguistics.

Mr. Puhvel

243. Seminar: Latin Paleography. Studies in development of book hand in Latin manuscripts earlier than the invention of printing.

370. Teaching Latin. Prerequisite: graduate standing or consent of instructor. Techniques for teaching; organization of courses; review of content of curriculum offered in junior and senior high schools.

495. College Teaching of Latin (2 units). Prerequisites: appointment as a teaching assistant, consent of instructor. Methodology of instruction in conjunction with classroom practice. May be repeated for credit. S/U grading.

Mr. Goldberg

596. Directed Individual Study or Research (2 to 8 units).

597. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units).

599. Research for Ph.D. Dissertation (2 to 8 units).

Scope and Objectives

The major in communication studies is an interdisciplinary program leading to a Bachelor of Arts degree. It seeks to provide students with a comprehensive knowledge of the nature of human communication, the symbol systems by which it functions, the environments in which it occurs, its media, and its effects. Employing critical and empirical approaches, the major draws its resources from the social sciences, humanities, and fine arts. Two areas of specialty are offered: the specialization in mass communication centers on formal and institutional communication systems and the macrocosmic social contexts in which they function; the specialization in interpersonal communication centers on face-to-face communicative interaction in the small group environment.

Bachelor of Arts Degree

Students selecting the major in communication studies must complete the required lower division prerequisites and a minimum of 15 upper division courses as set forth below. Enrollment in the major is limited. Admission to the major is by application to the committee in charge. Applications are available in the program office.

Students officially admitted to the communication studies major for Fall Quarter 1988 and thereafter must fulfill the following requirements. Those admitted prior to Fall Quarter 1988 have the option of fulfilling either the following requirements or those listed in the 1986-87 *UCLA General Catalog*.

Preparation for the Major

Required lower division courses: Communication Studies 10, Psychology 10, Sociology 1, Speech 1, Anthropology 33 or Linguistics 1, Program in Computing 1, one course from Economics 40, Sociology 18, or Statistics 50.

You are encouraged but not required to complete as many lower division preparation for the major courses as possible before admission to the program.

Writing Requirement

Required: English 131D.

The Major

Required Core Courses: Communication Studies 100 and 101 and one course from Anthropology M140 or Communication Studies 102.

Specializations

Mass Communication — (1) *Required*: Communication Studies 140, 152, and one course from Political Science 141, Psychology 137B, or Sociology 133; (2) *systems, institutions, and policies* — two courses from Communication Studies 153, 155, 156, 165, 170, 177, 180, 187, either Communication Studies M147 or Sociology M176; (3) *media content/criticism/history* — two courses from Communication Studies 160, M161, 171, Film and Television 106A, 108, 110A, either Communication Studies 175 or Film and Television 116; (4) *electives in interpersonal communication* — two courses from Communication Studies 115, 120, 130, Psychology 135 or Sociology 132, Sociology C124A, C124B, 135, 160; (5) *general electives* — two courses from one of the following groups: (a) *American studies* — English 115A, History 148A, 148B, 148C, 150A, 150B, 156A, 156B, Political Science 114A, 114B; (b) *language theory* — Communication Studies M124, 150, Linguistics 170, Philosophy 172, Psychology 122 or 123; (c) *social systematics* — Anthropology 133R, 135A, 135B, 142A, 142B, Sociology C124A, C124B, 134.

Interpersonal Communication — (1) *Required*: four courses (at least one of which must be Communication Studies 115 or 120) from Communication Studies 115, 120, Sociology C124A, C124B, 135, either Psychology 135 or Sociology 132; (2) *heterogeneous groups communication* — three courses from Anthropology 141, Communication Studies 130, Psychology 125, 137C, M165, 174, 177, 178, either Sociology 156 or 160; (3) *electives in mass communication* — two courses from Communication Studies 140, 152, 153, 155, 165, 170, 180, 187, either Communication Studies M147 or Sociology M176; (4) *general electives* — two courses from one of the following groups: (a) *media content/criticism/history* — Communication Studies 160, 171, Film and Television 106A, 108, 110A, either Communication Studies 175 or Film and Television 116; (b) *language theory* — Communication Studies M124, 150, Linguistics 170, Philosophy 172, Psychology 122 or 123; (c) *social systematics* — Anthropology 133R, 135A, 135B, 142A, 142B, Sociology C124A, C124B, 134.

Lower Division Courses

10. Introduction to Communication Studies. Introduction to fields of mass communication and interpersonal communication. Study of modes, media, and effects of mass communication, interpersonal processes, and communication theory.

Mr. Cole (F,W,Sp)

97A-97Z. Special Topics in Communication Studies. Lecture, three hours. Variable topics courses; consult *Schedule of Classes* for topics to be offered in a specific term. **97A.** Mass Communication Theory; **97B.** Systems, Institutions, and Policies; **97C.** Media Content/Criticism and History; **97D.** American Studies; **97E.** Language/Interaction Structures; **97F.** Social Systematics; **97G.** Interpersonal Communication Theory; **97J.** Heterogeneous Groups Communication.

Upper Division Courses

100. Communication Theory. Prerequisite: course 10 or Linguistics 1 or Sociology 1 or Psychology 10 or consent of instructor. Analysis of fundamental nature of human communication; its physical, linguistic, psychological, and sociological bases. Study of theoretical models explicating the process and constituents of the communicative act.

Mr. Clayman, Ms. French

101. Freedom of Communication. Analysis of legal, political, and philosophical issues entailed in rights of free expression, access to an audience, and access to information. Study of court decisions governing freedom of communication in the U.S.

Mr. Cowan, Mr. Rosenthal (F,Sp)

102. Code of Human Communication. Prerequisite: course 10 or Sociology 1 or Psychology 10 or Linguistics 1 or consent of instructor. Structural analysis and description of human communication codes; development of language; characteristics of the source, channels, and destination in human communication.

Ms. French

115. Dyadic Communication and Interpersonal Relationships. Prerequisite: course 100. Developmental approach to study of communication in dyadic relationships. Analysis of differences in the stages of relationships in terms of communication rules and verbal and nonverbal messages.

Ms. French, Ms. Henley

M116. Communication and Conflict in Couples and Families. (Same as Psychology M176.) Lecture, 90 minutes; discussion, 90 minutes. Prerequisites: Psychology 10 or 11, 41, and 127, or consent of instructor. Examination of (1) dysfunctional communication and conflict in couples and families and (2) relationship of these processes to individual psychopathology, marital discord, and family disruption (e.g., separation and divorce).

Mr. Christensen

120. Principles and Types of Group Communication. Prerequisite: course 100 or consent of instructor. Analysis of purposes, principles, and types of small group communication. Particular emphasis on organization of and participation in problem-solving discussion.

M124. Psychology of Language and Gender. (Same as Psychology M137J and Women's Studies M137J.) Lecture, three hours. Prerequisites: Psychology 10 or equivalent, junior standing. Examination of current topics at intersection of gender and language. Topics include sex differentiation in language cross-culturally; sex bias in lexicon and usage; sex differences in lexicon, syntax, phonology, and nonverbal behavior; development of sex-differentiated language in children; "women's" and "men's" language in various racial/ethnic/class/sexual preference groups; and conversational interaction.

130. Cultural Factors in Interpersonal Communication. Prerequisite: course 100 or consent of instructor. Study of cultural factors as they affect the quality and processes of interpersonal communication; exercises in participation, analysis, and criticism of interethnic and interracial communications in the small group configuration.

Ms. French

140. Theory of Persuasive Communication. Prerequisite: course 100 or consent of instructor. Dynamics of communication designed to influence human conduct; analysis of structure of persuasive discourse; integration of theoretical materials from relevant disciplines of humanities and social sciences.

Mr. Rosenthal

142. Rhetorical Theory. Prerequisite: course 100 or consent of instructor. Survey of major classical and neoclassical treatises on rhetoric. Analysis of theories of Plato, Aristotle, Cicero, Quintilian, St. Augustine, Blair, Whately, Campbell, and other leading works in theory of rhetoric.

M147. Sociology of Mass Communication. (Formerly numbered 147.) (Same as Sociology M176.) Prerequisite: course 100 or consent of instructor. Studies in relationship between mass communication and social organization. Topics include history and organization of major media institutions, social forces that shape production of mass media news and entertainment, selected studies in media content, and effects of media on society.

Mr. Clayman

150. Analysis of Communication Content. Prerequisite: course 100 or consent of instructor. Study of methodologies for qualitative and quantitative analysis of the content of communications.

Ms. French

152. Analysis of Communication Effects. Prerequisite: course 100 or consent of instructor. Survey of experimental and field research on effects of communications. Study of source, message, and environmental factors affecting audience response.

Ms. Greenfield, Mr. Malamuth

153. The Media and Aggression Against Women. Lecture, two hours; discussion, two hours. Prerequisite: course 152 or consent of instructor. Study of the growing body of literature on relationship between mass media and aggression against women. Consideration of both role of the media as reflecting cultural values and scripts and its potentially powerful role as a socializing agent of the culture. Analysis of research on role of individual differences among members of a culture as mediators of the impact of the media.

Mr. Malamuth

155. Communication Technology and Public Policy. Prerequisite: course 10. Introduction to modern communication technology and policy, with special attention to current policy issues, institutions which make policy decisions, and social, economic, and technological trends which create policy problems. Modern communication technologies surveyed include cable television, teletext, viewdata, and satellite, microwave cellular, and subcarrier communication.

Mr. Case, Mr. Cole

156. Human/Computer Communication. (Formerly numbered 198C.) Prerequisite: completion of the seven preparation for the major courses. Limited to communication studies majors. Survey of behavioral, design, and evaluation issues in human/computer communication. Readings from disciplines of psychology, sociology, computer science, communication, and library and information science. Students perform several on-line assignments in learning to use different technologies. Term paper required.

Ms. Borgman

160. Political Communication. Prerequisites: courses 100 and 101, or consent of instructor. Study of nature and function of communication in the political sphere; analysis of contemporary and historical communications within established political institutions; state papers; deliberative discourses; electoral campaigns.

Mr. Iyengar

M161. Mass Media and Elections. (Formerly numbered M198B.) (Same as Political Science M148.) Prerequisite: communication studies major or consent of instructor. Assessment of manner in which Americans' political beliefs, choices, and actions are influenced by mass media presentations, particularly during election campaigns. Topics include processes of political attitude formation and change, different types of media "effects," and role of the media in the American political process.

Mr. Iyengar

165. Agitational Communication. Prerequisites: courses 100 and 101, or consent of instructor. Theory of agitation; agitation as a force for change in existing institutions and policies in a democratic society. Intensive study of selected agitational movements and the technique and content of their communications.

170. Legal Communication. Prerequisites: courses 100 and 101, or consent of instructor. Study of trial and appellate processes as systems of communication. Analysis of elements of the juridical process as they affect the quality of communication content. Study of rules of evidence, jury behavior, and structure of legal discourse.

Mr. Rosenthal

171. Seminar: Theories of Freedom of Speech and Press. Prerequisites: course 101, consent of instructor. Exploration of relationship between freedoms of speech and press and values of liberty, self-realization, self-government, truth, dignity, respect, justice, equality, association, and community. Study of the significance of these values examined in connection with issues such as obscenity, defamation, access to media, and control of commercial, corporate, and government speech.

175. Criticism and the Public Arts. Prerequisite: course 10 or consent of instructor. Introduction to methods and problems of criticism in the public arts. Study of several types of critical methods: formalistic, analogue, pragmatic, and aesthetic criticism. Topics include definition of art and criticism, aesthetic media, genre and resources of film, television, theater, and public discourse, varieties of critical method, problems of critical judgment.

177. Libel and Freedom of Expression. Lecture, two hours; discussion, two hours. Prerequisite: course 101 or consent of instructor. Intensive study of law of defamation and its relationship to the free flow of information in a democracy. Examination of rationale, scope, and effects of libel laws. Topics include application of libel laws to public official, public figure, and private plaintiffs and media and nonmedia defendants; group libel, privileged libel, and libelous fiction.

Mr. Rosenthal

180. Politics of Censorship. Discussion, two hours; simulation teaching, three hours. Prerequisites: course 101, consent of instructor. Examination of the process and substance of debates over government and private censorship by having students become active participants in a term-long simulated battle over a current issue such as book censorship, pornography, or UNESCO's proposed "New World Information Order."

Mr. Cowan (W)

185. Field Studies in Communication (2 to 4 units). Discussion, two hours; fieldwork, seven to 14 hours (depending on unit value). Prerequisites: senior standing in communication studies, consent of instructor. Fieldwork in communication. Students participate in two-hour seminar sessions and spend seven hours in approved community settings each week for each two units of credit. May be repeated for a maximum of six units. P/NP grading.

Ms. Gregory

187. Ethical and Policy Issues in Institutions of Mass Communication. Prerequisites: courses 10, 101. Intensive examination of ethical and policy issues arising from interaction of media institutions (print, film, broadcasting, and new technologies) and societal institutions (Congress, federal agencies, courts, the Presidency, schools, churches, political action groups, advertisers, and audiences).

Mr. Cole

189. Multicultural Television and Society. (Formerly numbered 197C.) Study and evaluation of cross-cultural, social, and psychological characteristics of selected national and international television programs and their implications for social learning in children. Designed to systematically study multicultural attributes related to sociocultural images and portrayals of television programs using various evaluation models and techniques.

Mr. Berry

191H. Research Methods in Communication (Honors). Lecture, three hours. Prerequisites: course 10, junior standing. Provides a working understanding of research methods in communication studies, particularly related to study of mass media effects, to give students the background necessary to design, implement, and report their own research project.

Mr. Iyengar, Mr. Malamuth (F)

196H. Undergraduate Honors Proseminar. (Formerly numbered 197H.) Prerequisites: senior standing, 3.5 GPA in communication studies major, 3.3 GPA overall. Limited enrollment. Variable topics course involving specialized study of selected aspects of the field of human communication.

Mr. Iyengar, Mr. Malamuth

197A-197Z. Special Topics in Communication Studies. Lecture, three hours. Prerequisite: completion of preparation for the major courses or consent of instructor. Variable topics courses; consult *Schedule of Classes* for topics to be offered in a specific term. **197A.** Mass Communication Theory; **197B.** Systems, Institutions, and Policies; **197C.** Media Content/Criticism and History; **197D.** American Studies; **197E.** Language/Interaction Structures; **197F.** Social Systematics; **197G.** Interpersonal Communication Theory; **197J.** Heterogeneous Groups Communication.

(F,W,Sp)

199. Special Studies (2 to 8 units). To be arranged with faculty member who will direct the study. Prerequisites: senior standing, consent of instructor. Independent study for seniors who desire intensive or specialized investigation of selected research topics.

199H. Special Studies for Honors Candidates (2 to 8 units). To be arranged with faculty member who will direct the study. Prerequisites: senior and honors program standing. Independent study for honors undergraduates who desire intensive or specialized investigation of selected research topics.

Comparative Literature (Interdepartmental)

334D Royce Hall, (310) 825-7650

Professors

Michael J.B. Allen, Ph.D., D.Litt. (*English; Distinguished Teaching Award*)
 Arnold J. Band, Ph.D. (*Hebrew; Distinguished Teaching Award*)
 Calvin B. Bedient, Ph.D. (*English*)
 A.R. Braunmuller, Ph.D. (*English; Distinguished Teaching Award*)
 Frederick L. Burwick, Ph.D. (*English*)
 Daniel G. Calder, Ph.D. (*English*)
 Marga Cottino-Jones, Ph.D. (*Italian*)
 Peter Haidu, Ph.D. (*French*)
 Michael Heim, Ph.D. (*Czech and Russian Literature*)
 Carroll B. Johnson, Ph.D. (*Spanish*)
 Henry A. Kelly, Ph.D. (*English*)
 Kathleen L. Komar, Ph.D. (*German; Distinguished Teaching Award*)
 Leo Ou-fan Lee, Ph.D. (*Chinese*)
 Peter H. Lee, Ph.D. (*Korean*)
 Richard D. Lehan, Ph.D. (*English; Distinguished Teaching Award*)
 C. Brian Morris, Litt.D. (*Spanish*)
 Maximilian E. Novak, D.Phil., Ph.D. (*English*)
 Ross P. Shideler, Ph.D. (*Scandinavian; Distinguished Teaching Award*), Chair
 Samuel Weber, Ph.D. (*English*)
 Stephen I. Yenser, Ph.D. (*English; Distinguished Teaching Award*)
 Pier-Maria Pasinetti, Ph.D., Emeritus (*Italian*)

Associate Professors

Jean-Claude Carron, Docteur ès Lettres (*French*)
 Donald J. Cosentino, Ph.D. (*English*)

 Shushi Kao, Ph.D. (*French*)
 Katherine C. King, Ph.D. (*Classics*)
 Robert M. Maniquis, Ph.D. (*English*)
 José Monleón, Ph.D. (*Spanish*)
 Vincent P. Pecora, Ph.D. (*English*)
 Lucia Re, Ph.D. (*Italian*)

Assistant Professors

Kenneth Reinhard, Ph.D. (*English*)
 C.P. Haun Saussy, Ph.D. (*Chinese*)

Scope and Objectives

Standing at the forefront of innovative literary analysis and criticism, comparative literature is one of the most exciting fields in the humanities. As a discipline it requires exceptional linguistic ability and high intellectual caliber. UCLA's graduate interdepartmental program offers students the opportunity to work with faculty in any of the University's language and literature departments as well as with the Comparative Literature Program faculty.

Comparative literature at UCLA focuses on those elements which define literature in general, such as genre, period, theme, language, and theory. Courses are designed to provide students with a historical understanding of the concepts of genre and period by studying specific genres and periods or literary movements. Paradigmatic or thematic courses offer another way of examining literature synchronically or diachronically regardless of language boundaries.

Courses in literary criticism and theory inquire into the premises of specific critical approaches, and of criticism itself, in order to provide further insight into the intellectual and moral concerns of literature and the world it reflects. Thus, through the study of these various assumptions and aspects of literature and criticism, students learn not only to cross linguistic boundaries, but to join them — to compare and to contrast, to analyze and, finally, to synthesize the text and the subtext, the structure and the history which define, undermine, and transcend the text and its reader.

Master of Arts Degree

Admission

A bachelor's degree in literature, ancient or modern, is a prerequisite for admission to the program. Students not having a literature major in their B.A. program are required to demonstrate the equivalent knowledge and comprehension of one literature before being considered a graduate student in good standing. Applicants are expected to have at least a 3.4 grade-point average in upper division literature courses, take the Graduate Record Examination (GRE), and submit three letters of recommendation to the Comparative Literature Program (334D Royce Hall, UCLA, Los Angeles, CA 90024-1536). Applicants should have literary proficiency in one foreign language and at least elementary knowledge of a second.

Areas of Study

Your study plan should combine work in the major and minor literatures by focusing on a limited area in which these literatures may be explored. The area may be a literary period (e.g., Romanticism), a genre (e.g., the novel), or a theoretical problem.

The major literature is the area of your primary concentration. You specialize in one historically defined period (e.g., medieval, Renais-

sance, and baroque, neoclassicism and 18th century, Romanticism to modern), but general knowledge of the major literature is a prerequisite for the specialization.

In the minor literature, you focus on a period comparable to the area of specialization in the major literature, although you may not have as much historical depth and breadth as in the major literature.

Foreign Language Requirement

Literary proficiency in the major and minor literatures is an essential prerequisite for courses and degrees in comparative literature. You should be able to take graduate classes conducted in the languages of your specialization, speak the major foreign language adequately, and read literary texts in that language with "literary proficiency" (i.e., with sensitivity to stylistic nuances).

Before completing the M.A., you must demonstrate knowledge of two foreign languages. Proficiency in one must be certified by completing two or more upper division and/or graduate literature courses in the appropriate language department. (You must prove more than elementary language competency in order to take these courses.) The second language requirement may be satisfied either by completing two years of language classes, by taking one upper division literature class, or by passing the Graduate School Foreign Language Test (GSFLT) with a score of 600 or better. Translation examinations may be administered by departmental members in languages for which no GSFLT is available.

Course Requirements

The following 12 courses are the minimum course requirements. Some students will take extra courses to make up deficiencies.

- (1) Four comparative literature courses, including Comparative Literature 200 and one course in literary theory such as 201, 202, 203, or 204; the comparative study of one genre (e.g., novel, epic, lyric, drama); the comparative study of one period or movement (e.g., baroque, Romanticism).
- (2) Five courses (three must be graduate, two may be upper division) in your major literature.
- (3) Three courses, either graduate or upper division, in your minor literature. You should study periods, genres, or problems in the minor literature which lend themselves to comparison with similar elements in your major literature.

Of the above required courses, eight units at most may be in the 500 series. Course 596 or 597 may be applied toward the minimum course requirement and the graduate course requirement.

Comprehensive Examination Plan

The examination for the M.A. is both written and oral, testing both historical knowledge and comprehension of methodology. There are three possible results of the examination: you

may receive an M.A. degree and be allowed to progress toward the Ph.D., be granted a terminal M.A., or fail the examination altogether. The program allows a maximum of two attempts to pass the M.A. examinations.

The written examinations test your skill in literary analysis and detailed knowledge of specified works in the major and minor literatures. The examinations are based on reading lists from the works of at least 15 authors in the major literature (two three-hour examinations) and the works of at least 10 authors in the minor literature (one three-hour examination). Normally, the reading list consists of approximately 24 to 30 works in the major literature and 12 to 15 works in the minor literature. For more details on the reading list, contact the program office.

Ph.D. Degree

Admission

For entrance into the Ph.D. program, an M.A. degree in Comparative Literature is normally required. Students with an M.A. degree in one national literature, extensive knowledge of a second, and the ability to read literary texts in a third language may be considered for admission. Applicants should submit three letters of recommendation. Students entering with any degree other than an M.A. in Comparative Literature from UCLA are required to pass a "permission to proceed" examination before being allowed to continue toward the Ph.D. It should be taken within your first year in residence.

Major Fields or Subdisciplines

The study plan for the Ph.D. should combine work in one major and two minor literatures by focusing on a limited area in which these literatures may be explored. This area may be a literary period or a particular aspect common to several literatures (e.g., a genre like tragedy or the novel, or a phenomenon like neoclassicism or the baroque). It may also be a critical or theoretical problem, involving analyses of styles or modes of interpretation; comparisons of classical and modern genres and themes; questions about the artistic process in different art forms; or problems in literary aesthetics or epistemology. You may substitute, by petition for program approval, a related field such as art history or film for one minor literature.

Foreign Language Requirement

You must have literary proficiency in at least two foreign languages before taking the qualifying examination. Reading knowledge of a third foreign language is strongly recommended. Two of the three languages offered for the Ph.D. must be from different language groups (e.g., Romance and Germanic, English and Slavic). If you intend to offer three literatures written in foreign languages for your Ph.D. degree, you are expected to have literary proficiency in the three pertinent foreign languages. A classical language is usually neces-

sary for anyone majoring in a period prior to the 19th century. If you present three literature areas for the Ph.D., you must fulfill the language requirements through coursework.

If you select a nonliterary minor, you must still demonstrate the ability to read literature in two foreign languages. You are examined in at least one foreign language as part of your course and examination requirements for the Ph.D. You must also demonstrate literature reading proficiency in a second foreign language by taking an upper division course in that language. For example, if you select English (major), French (minor), and film (minor) as your three areas of specialization, you are expected to demonstrate literature reading proficiency in another foreign language such as Italian or German. If you have taken a course to fulfill your M.A. language requirements, you may not use the same course to fulfill the second foreign language requirement for the option described above.

Course Requirements

All students entering with an M.A. must take a minimum of six graduate courses, and often up to 12 courses. Those whose M.A. is not in Comparative Literature at UCLA must take three of the required six courses in comparative literature and one from each of the major and minor literatures/fields. Other relevant or necessary courses are determined in consultation with a graduate adviser. None of the minimum required courses may be in the 500 series. Although only six courses are required, you are strongly advised to take at least two and usually three courses in each of your literatures.

If you have taken your M.A. in Comparative Literature at UCLA, the following courses are required: two comparative literature courses, one with a theoretical orientation; two to three courses in your second minor; two courses in your major literature, preferably in your period of emphasis, plus any additional courses required by the program committee and/or graduate advisers. None of the minimum required courses may be in the 500 series.

Teaching Experience

Teaching experience is not required but is highly recommended.

Qualifying Examinations

The examinations are both written and oral and may be taken over a period of two to three terms at the end of the second year after receiving your M.A. degree. The written examinations are based on reading lists for the major and two minor literatures/fields.

For the major literature, you take one three-hour historical examination based on a reading list of 40 items. No more than 20 of the items may be in the approximately 100-year period of emphasis.

For the minor fields, you must take (1) one three-hour written examination in each minor field, based on approved reading lists of 25 to 30 items or (2) one three-hour written examination in the minor field not included in your M.A. examinations and write a paper of 20 to 30 pages on a topic in the minor field originally presented for the M.A., based on approved reading lists of 25 to 30 items. The latter choice must have approval of the program chair and agreement of the examining professor.

For the University Oral Qualifying Examination, you must submit a detailed dissertation prospectus of approximately 20 pages. The two- to three-hour examination covers all written examinations, as well as your dissertation prospectus.

The program allows a maximum of two attempts to pass the Ph.D. examinations.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Dissertation

The doctoral dissertation must demonstrate original critical work in the field. Although a topic comparing literatures is commonly undertaken, comparative literature students may write a dissertation on a single subject in a single field provided that their wide range of knowledge is demonstrated by the quality of the work.

Graduate Courses

200. Methodology of Comparative Literature (6 units). Seminar, four hours. Prerequisite: consent of instructor. Study of methodology of comparative literature and theory of literature.

201. Contemporary Theories of Criticism. Prerequisite: course 200 or equivalent. Advanced course in theory of literature focusing on structuralist, psychoanalytic, and Marxist approaches.

202. Problems in Theory of Literature. Prerequisites: course 201 or equivalent, reading knowledge of French or German. Study of specific topics in theory of literature for advanced students in criticism and literary theory. May be repeated for credit.

203. Problems of the Sign in Literature. Inquiry into theoretical bases and implications of the sign as metaphysical, logical, and grammatical categories. Many texts central to Western thinking dwell on the sign as a concept-tool in order to focus on the relationship between words and things, language and reality, the linguistic medium in its meaning-producing functions. Excerpts from Plato, Aristotle, Augustine, Locke, Vico, and Hegel lead to a discussion of "sciences" envisioned by Saussure (semiology) and Peirce (semiotics) and propounded by contemporary theorists such as Barthes, Hjelmslev, and Greimas.

Ms. Kao

204. Psychoanalytic Approaches to Literature. Prerequisite: course 200 or equivalent criticism course in English. Study of development of modern psychoanalytic approaches to literature, with particular stress on affective theories of criticism. Readings include Freud and early psychoanalytic critics, contemporary psychoanalytic critics of literature, and modern British and American psychoanalytic theorists (Winnicott, Schafer) whose work is applicable to literary theory.

Mr. Hutter, Mr. Reinhard

C205. Comic Spirit. Prerequisite: reading knowledge of one appropriate foreign language. Literary masterpieces, both dramatic and nondramatic, selected to demonstrate varieties of comic expression. May be concurrently scheduled with Humanities C105. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week.

Mr. Band

206. Reception Theory and Literary Hermeneutics. Seminar, three hours. Major premises of reception theory and literary hermeneutics presented and analyzed.

C207. Classical Tradition: Epic. Seminar, three hours. Prerequisite: reading knowledge of Greek, Latin, or Italian. Analysis of *Iliad*, *Odyssey*, *Aeneid*, *Gerusalemme Liberata*, and *Paradise Lost* both in relation to their contemporary societies and to literary traditions. Emphasis on how poets build on work of their predecessors. May be concurrently scheduled with Humanities C107. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week.

Ms. King

C209. Crisis of Consciousness in Modern Literature. Prerequisite: reading knowledge of one appropriate foreign language. Study of modern European and American works which are concerned both in subject matter and artistic methods with the growing self-consciousness of human beings and their society, focusing on works of Kafka, Rilke, Woolf, Sartre, and Stevens. May be concurrently scheduled with Humanities C109. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week.

Ms. Komar

210. Allegory and Some Allegories. Seminar, three hours. Prerequisites: graduate standing, reading knowledge of French, German, Italian, Latin, Greek, or Chinese. Historical perspective on topic of allegory, with readings from texts traditionally held to be examples of the genre. Defining allegory is simple; saying which works count as examples of allegory, and why, is much harder. Authors include Prudentius, Augustine, Dante, Spenser, Donne, Tung Yueh, Hegel, Baudelaire, and Mallarmé.

Mr. Saussy

C211. Classical Tradition: Tragedy. Seminar, three hours. Prerequisite: knowledge of one appropriate foreign language, usually Greek or French. Analysis of selected Greek dramas and their re-creations in Rome, in the Renaissance, and in the modern period. May be concurrently scheduled with Humanities C111. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week.

Ms. King

C212. Satire. Lecture, three hours. Examination of satire both in texts generally recognized as models of the genre as well as in others, including examples of satirical discourse. Special attention to two important literary problems: role played by authors and narrators in relation to treatment of characters before possible audiences and importance of contextual values in interpretation of satire. Concurrently scheduled with Humanities C112. Graduate students required to prepare papers based on texts read in original languages whenever possible and may meet as a group one additional hour each week. S/U or letter grading.

227. Imaginary Women. Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Examination of archetypal female figures in classical/traditional literatures and their incarnations in modern African American, Anglo-American, Asian American, European, Native American, and Spanish-American literatures. Particular emphasis on position of women in the cultures and ideology of the authors. S/U or letter grading.

Ms. King

C229. Archetypal Heroes in Literature. Lecture, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Survey and analysis of function and appearance of such archetypal heroes as Achilles, Ulysses, Prometheus, Oedipus, and Orpheus in literature from antiquity to the modern period. Concurrently scheduled with Humanities C129. Graduate students required to prepare papers based on texts read in original language and to meet as a group one additional hour each week.

Ms. King

230. Translation Workshop. Prerequisites: solid reading knowledge of at least one foreign language, consent of instructor. Open to qualified undergraduates with proper language preparation. Theory and practice of literary translation. Analyses of significant theoretical contributions to the field. Weekly exercises in translation technique with genres, periods, and authors at discretion of participants.

Mr. Heim

C239. Early Medieval Literature. Prerequisite: reading knowledge of one appropriate foreign language. Survey of Latin and Germanic literatures from fall of Rome to beginning of the 12th century. May be concurrently scheduled with Humanities C139. Graduate students required to write papers based on texts read in original languages and may meet as a group one additional hour each week.

Mr. Calder

C240. Medieval Epics. Prerequisite: reading knowledge of one appropriate foreign language. Consideration of five medieval epics (*Beowulf*, *El Cid*, *La Chanson de Roland*, *Nibelungenlied*, and *Njalsaga*), with two objectives: first, critical understanding of each work, and second, understanding of the nature of epic literature. Assignments consist of extended seminar paper and short oral reports. May be concurrently scheduled with Humanities C140. Graduate students required to prepare papers based on texts read in original languages.

C241. Literary Mediation of History in the Renaissance. Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Analysis of the presence and treatment of history in rhetoric of Renaissance authors ranging from Italian humanists to Machiavelli and Shakespeare. Other authors include Poliziano and Lorenzo de' Medici. May be concurrently scheduled with Humanities C141. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week.

Ms. Re

C245. Renaissance Drama. Prerequisite: reading knowledge of one appropriate foreign language. Broad introduction to subject matter and types of plays in the Renaissance, with consideration of historical and literary influences on the plays. Readings include works of such dramatists as Tasso, Machiavelli, Lope de Vega, Racine, Jonson, Shakespeare. May be concurrently scheduled with Humanities C145. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week.

Mr. Braunmuller

C260. Literature and the Visual Arts, 1700 to the Present. Lecture, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Knowledge of art history valuable but not required. Assuming that literature and the visual arts are in some degree expressions of cultural and philosophical patterns of eras, course studies relationships between primarily English writers from 1700 to the present and movements in painting, architecture, and sculpture. Interdisciplinary investigation of similarities and differences between the plastic and verbal arts in comparative study. May be concurrently scheduled with Humanities C160. Graduate students required to read works in original languages.

Mr. Roston

C268. Romantic Autobiography. Discussion, three hours. Evolution of the autobiography from spiritual (Augustine) and secular (Cellini) sources to transition in the 18th century which blended features of the epic poem and quest-romance. Wordsworth's *Prelude* came to represent the best example of this mixture. Major examples of Romantic autobiography to be studied include Rousseau's *Confessions*, Wordsworth's *Prelude*, and Goethe's *Wilhelm Meister's Apprenticeship*. Later novels that develop and extend the genre include Joyce's *Portrait of the Artist as a Young Man* and Proust's *Swann's Way*. May be concurrently scheduled with Humanities C168.

Ms. Packer

C270. The Dream in English and German Romantic Literature. Lecture, three hours; discussion, one hour. Prerequisite: reading knowledge of one appropriate foreign language. Study of use of the dream as a standard narrative technique in English and German Romantic literature. May be concurrently scheduled with Humanities C170. Graduate students may be required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week.

Mr. Burwick

C271. Dramatic Theory and Criticism in German and English Romanticism. Seminar, three hours. Prerequisite: reading knowledge of German. Generic conception of drama in critical essays of the Schlegels, Tieck, Jean Paul, Coleridge, De Quincey, and Hazlitt, with emphasis on role of the actor and the idea of dramatic action as discussed by the critics. May be concurrently scheduled with Humanities C171.

Mr. Burwick

C272. The Grotesque in Romantic Literature and Art. Prerequisite: reading knowledge of one appropriate foreign language. Study of the grotesque in visual and verbal arts of the Romantic period; aesthetics of tragic/comic interaction, demonic vision, and satirical sketches of man's abnormality and perversity. May be concurrently scheduled with Humanities C172. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week.

Mr. Burwick

C273. Theory and Texts of the Fantastic. Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Attempt to define the fantastic as a theoretical genre separate from the wider genre of fantasy. Critical texts by Todorov and Brooke-Rose. Primary texts by Hoffmann, Nerval, James, Poe, Borges, Casares, Cortazar, Landolfi, and Calvino. May be concurrently scheduled with Humanities C173. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week.

Ms. Re

274. Search for Organic Forms. Prerequisite: reading knowledge of French or German. Seminar devoted to theories of the "organic" in the 18th and 19th centuries, with special emphasis on Rousseau and Goethe. Studies of the transition made between theories of nature and theories of state.

Mr. Maniquis

C275. The 19th-Century Novel. Seminar, three hours. Prerequisite: reading knowledge of French or German. Comparative study of the 19th-century novel in England and on the continent. Novels selected so as to allow seminar to concentrate on a particular tradition or critical problem. May be concurrently scheduled with Humanities C175.

Mr. Lehan, Ms. Re

C276. Fiction and History. Seminar, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Analysis of use of historical events, situations, and characters in literary works of the Renaissance and/or modern period. Texts and individual assignments range from Renaissance historical narratives (Italian humanists, Machiavelli) to 19th- and 20th-century novels by authors such as Stendhal, Verga, Tomasi di Lampedusa, Carpentier, and Kundera. Use of fictional methods by historians. Emphasis on how aesthetic, ideological, and political factors influence authors' choice and use of historical material. May be concurrently scheduled with Humanities C176. Graduate students required to prepare papers based on texts read in original languages.

Ms. Re, Mr. Saussy

C278. Crisis of Authority. Seminar, three hours. Prerequisites: graduate standing or consent of instructor, reading knowledge of one appropriate foreign language. Darwin's *Origin of Species* undermines the notion of a traditional fatherly God and reflects a major transition between the 19th and 20th centuries. Threat to, or collapse of, a divinely author(ized) and male-dominated society appears in writers such as G. Eliot, Zola, Ibsen, Strindberg, Conrad, Hardy, Woolf, and Camus. May be concurrently scheduled with Humanities C178. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week.

Mr. Shideler

C280. Symbolist Tradition in Poetry. Prerequisite: reading knowledge of either French or German. Study of symbolist tradition in 19th- and 20th-century English, French, and German poetry. May be concurrently scheduled with Humanities C180. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week.

Mr. Shideler

C281. Poetry and Poetics of the Post-Symbolist Period. Prerequisite: reading knowledge of French or German. Study of some dominant poetic trends and figures in American and European poetry in first half of the 20th century, including surrealists such as Apollinaire and Breton, imagists, and major individual poets such as Pound, Eliot, Valery, Rilke, George, and Stevens. May be concurrently scheduled with Humanities C181. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week.

Ms. Komar, Mr. Shideler

C284. Alternate Tradition: In Search of a Female Voice in Contemporary Literature. Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Investigation of narrative texts by contemporary French, German, English, American, Spanish-American, African, and Asian women writers from a cross-cultural perspective. Common themes, problems, and techniques. May be concurrently scheduled with Humanities C184. Graduate students required to prepare papers based on texts read in original languages whenever possible.

Ms. King, Ms. Komar

C285. The Modern Continental Novel. Lecture, three hours. Prerequisite: reading knowledge of at least one appropriate foreign language. Study of the modern novel's development from naturalism toward a mythic or symbolic level. Use of authors such as Gide, Proust, Mann, Joyce, Nabokov, and Grass to focus on development of themes such as primitivism vs. authority, change vs. stability, and the self-conscious narrative. Concurrently scheduled with Humanities C185. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week.

Mr. Lehan

C286. The Postmodern Novel. Lecture, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Study of the postmodern novel as it developed out of modernism. Postmodernism defined in three different ways — philosophically, scientifically, and economically. Emphasis on relationship of recent novels to theories of structuralism and post-structuralism. Readings include authors such as Borges, Beckett, Nabokov, Pynchon, Fuentes, Grass, Böll, and Calvino. Concurrently scheduled with Humanities C186. Graduate students required to meet as a group one additional hour each week. S/U or letter grading.

Mr. Lehan

287. Death and the Limits of Representation. Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Examination of fundamental shifts in the relationship that obtains between thinking and death which are closely tied to rethinking of the status and structure of representation.

Mr. Weber

C288. Heidegger, Language, and Literature. Seminar, three hours. Knowledge of German not required. Close reading of essays contained in the collection *Poetry, Language, and Thought*, including "The Origin of the Work of Art," "The Thing," and "Language." Concurrently scheduled with Humanities C188.

Mr. Weber

C289. Derrida as a Reader of Heidegger. Seminar, three hours. Retracing of certain of Derrida's attempts to read Heidegger, beginning with the essay, "Restitutions," in *Truth and Painting*. Other writings include *Of Spirit: Heidegger and the Question and Geschlecht*. Concurrently scheduled with Humanities C189. S/U or letter grading.

Mr. Weber

C290. Postmodernism and the Third World. Prerequisite: reading knowledge of one appropriate foreign language. Exploration of intersection between concepts of postmodernism and Third World culture and politics, including topics such as post-Marxism and revolution; historical thought; gender, ethnicity, imperialism, and their relationship to cultural politics; and recent Latin American literary production. Concurrently scheduled with Humanities C190.

292. The Psychological Novel. Prerequisites: major in literature, reading knowledge of French. Comparative study of French and English novels which both precede and follow development of psychoanalysis. Selected readings of Freud, in addition to the required fiction.

Mr. Hutter

C297. The Mystery Novel. Prerequisite: reading knowledge of French. Study of mystery and detective fiction in England, France, and the U.S. Development of origin, form, and historical significance of mystery fiction through close readings of selected works. May be concurrently scheduled with Humanities C117. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week.

Mr. Hutter

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Preparation for Teaching Literature and Composition. Lecture, three hours. Seminar on problems and methods of presenting literary texts as exemplary materials in the teaching of composition. Deals with theory and classroom practice and involves individual counseling and faculty evaluation of TAs' performance. May not be applied toward M.A. course requirements. S/U grading.

596. Directed Individual Study or Research (2 to 12 units). Prerequisite: graduate standing in comparative literature. Necessary for students in comparative literature who need additional individual study and research. May be repeated for credit. S/U grading.

596X. Directed Individual Study (2 to 4 units). Preparation for foreign language examination. S/U grading.

597. Preparation for M.A. and Ph.D. Examinations (2 to 12 units). Prerequisite: graduate standing. Preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be repeated for credit. S/U grading.

599. Research for Ph.D. Dissertation (2 to 12 units). Prerequisite: doctoral standing. Research for and preparation of Ph.D. dissertation. May be repeated for credit. S/U grading.

Elliot M. Landaw, M.D., Ph.D. (*Biomathematics*)

Assistant Professor

Josef Skrzypek, Ph.D. (*Computer Science*)

Scope and Objectives

The major in cybernetics is designed primarily for highly motivated undergraduates interested in interdisciplinary activities in life sciences, behavioral sciences, and engineering and computer sciences. Preparation for the major consists of a broad foundation in basic sciences — chemistry, biology, physics, and mathematics, plus introduction to psychology and computing. The major itself provides an introduction to modeling, information processing, control and system analysis, with emphasis on quantitative ideas and methodologies. Mathematical and other analytical skills are essential in the major.

Cybernetics majors have four options for in-depth studies: life sciences, behavioral sciences, engineering and applied mathematical sciences, or an integration of courses from these areas that form a coherent cybernetics curriculum. The major is appropriate preparation for employment or for graduate studies in any of these areas, with emphasis on interdisciplinary activities. It is also appropriate preparation for professional school studies in medicine, public health, management, dentistry, and engineering.

Bachelor of Science Degree

Pre-Cybernetics Major

You may apply for the pre-cybernetics major via petition if you are a sophomore and have taken at least three of the premajor mathematics courses with a 2.7 GPA or better and three other premajor courses. Together, all preparation for the major courses, including mathematics, must be completed with at least a 3.0 GPA and a minimum grade of C in all courses. Transfer students must meet the same academic requirements, based on all courses transferred from another institution which satisfy premajor requirements, and must have completed one 12-unit term of residence in regular session at UCLA.

Preparation for the Major

Required: A minimum of 73 units, including Biology 5, 9; Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL, 132A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A, 8B, 8C; Program in Computing 10A; Psychology 10 or 11.

The Major

Admission to the major is by petition only and is based on successful completion of all preparation for the major courses and requirements (2.7 GPA in mathematics, 3.0 GPA overall, and a minimum grade of C in all courses).

The major consists of a methodology core (five and one-half courses), a specialization area (seven courses), and a cybernetics breadth requirement (three courses). Each course in the major must be passed with a grade of C or better.

Methodology Core — Four subject areas as follows:

- (1) One overview course: Computer Science 196A.
- (2) Two courses in probability and statistics from one of the following groups: (a) Statistics M152A and 152B, or (b) Mathematics M150A and Statistics 152B, or (c) Electrical Engineering 131A and Statistics 152B.
- (3) Two courses in signals and control systems (one from each group): (a) Computer Science 170 or Electrical Engineering 102 and (b) Electrical Engineering 141 or Mechanical, Aerospace, and Nuclear Engineering 171A.

(4) One course in modeling and computer simulation: Computer Science M196B.

Applications/Specialization Areas — A minimum of seven courses in either life sciences, behavioral sciences, engineering and applied mathematics, or an integration of courses from these areas. A continually updated and approved list of courses in each specialization area is available in the program office and the College Counseling Service.

With few exceptions, courses in the life sciences area are in biology, microbiology, chemistry, and biochemistry, as well as in departments of the School of Medicine. Courses in the behavioral sciences area are in psychology and linguistics. And courses in the engineering and applied mathematics area are in engineering, computer science, and mathematics.

Cybernetics Breadth Requirement — One course from each of the applications/specialization areas selected from the current approved list.

Specialization in Computing

You may select this area as an option in the existing applications/specialization areas. Program in Computing 10B, 10C, 30, and Computer Science 141 are required, in addition to six courses selected from an approved list. You graduate with a bachelor's degree in cybernetics and a specialization in computing.

Honors Program

Junior and senior majors who have completed all preparation for the major courses and have an overall grade-point average of 3.0 or better and a 3.5 or better in required major courses may apply for admission to the honors program, in which honors-designated sections of selected courses are required. Students pursuing highest honors must, in addition, complete a senior thesis based on an approved research topic. Those who successfully complete the program (3.0 GPA or better overall, 3.5 or better in major coursework, and a grade of B or better in required honors courses) are awarded a degree with honors. At the discretion of the faculty sponsor and the interdepartmental committee, students demonstrating exceptional ability on the senior research thesis are awarded highest honors.

Upper Division Course

195H. Honors Thesis. Limited to cybernetics honors majors. Honors thesis preparation and submission, under direction of a faculty sponsor on Cybernetics Interdepartmental Committee. P/NP grading.

Scope and Objectives

This undergraduate major aims to provide a liberal education in relation to the critical issues and problems common to developing countries from a global or theme-oriented perspective. It is designed for students who are interested in careers related to international development in academia or in public or private agencies.

Bachelor of Arts Degree

Preparation for the Major

You must be a sophomore in good standing to enter the major. No specific courses are re-

quired as preparation for the major, but you should have some beginning experience in the social sciences at the college level.

The Major

Required: Fifty-six units of upper division courses (including the four core courses, Development Studies M100A-M100B, and Economics 110 or 111), taken for a letter grade, and the foreign language requirement. (For the quantitative methods requirement, some lower division courses are accepted in place of upper division courses.) Courses applied toward the major may be selected from the list in item 5 below. Substitutions may be made only with consent of the faculty adviser.

The major consists of six parts:

- (1) Development Studies M100A-M100B.
- (2) Economics 110* or 111*.
- (3) Four core courses (two should be from the same discipline) from Anthropology 130, 150, Economics 112*, 191*, Geography 121, 133, Political Science 115, 167, 168L or 168S, Sociology 101, 184.
- (4) One course in quantitative methods from Anthropology 186A, 186B, Biostatistics 100A, Economics 40, Geography 171, Political Science 6, Sociology 18, 104, 112, 113, Statistics 50.
- (5) Twenty-four units of elective courses, including at least 16 units to be divided equally between two of the world's developing areas (e.g., Africa, Latin America, the Near East, South and Southeast Asia, East Asia), selected from Anthropology 151*, 152*, 153, M154*, 161*, 165*, 167, 171, 173Q, 174P, 175P, 175R, 175T, 177, 186A, 186B, Architecture and Urban Planning 232A, 232B, 235A*, 235B*, 236A, 246, 266, 267A*, 267B*, 269, Community Health Sciences 131*, 132*, 133*, Economics 103A through 103Z*, 120*, 130*, 150*, 151*, 171*, 180*, 192*, Education M108*, C203*, 204B through 204D, 204F, 228*, 234, 238, 252B*, 253B, 253C, Geography 117*, 119*, 122*, 124*, 128*, 142, 148*, 151*, 181*, 182A*, 182B*, 186*, 187*, 188*, 189*, History 106A, 106B, 106C, 107A, 107B, 109A, 109B, 110A, 110B, 111A, 111B, 112A, 112B, 112C, 165A, 165C, 166, 167A through 167D, 168, 169*, 170A, 171, 173, 174, 175A through 175Z*, 176A, 176B, 176C, 177, 178A, 178B, 182A*, 182B*, 183A*, 183B*, 184*, 188A, 188B, 190A, 190B, 197, Latin American Studies 197, 199*, Political Science 124*, 130, 159, 162, 163A, 163B, 164, 165, 166A, 166B, 166C, 167, 168L*, C197A through C197F*, Sociology 105*, 116, 118*, 156, 157, 160, 186, 187*, 188. Consult the program counselor regarding other possible electives that may be applied toward the major.
- (6) Twenty-four quarter units in one modern foreign language or the equivalent in transfer units.

*Courses so marked have prerequisites.

You may also take a proficiency examination administered and evaluated by members of the program faculty (or by outside faculty for languages not familiar to program faculty).

Honors Program

Development studies majors who have completed Development Studies M100A-M100B and who have a 3.5 grade-point average in all courses offered for the major are eligible to formally apply for the honors program. In addition to completing all courses required for the major, you must take courses 195A-195B-195C, in which you research, write, and present an honors thesis. To receive honors at graduation, you must have at least a 3.5 GPA in courses applied toward the major (including 195A-195B-195C) and an overall GPA of 3.0. Highest honors are awarded to students who complete the major (including courses 195A-195B-195C) with a 3.75 GPA and who produce an exceptional thesis.

Upper Division Courses

M100A-M100B. Introduction to Development Studies. Seminar, three hours. Two-term seminar for undergraduates designed to examine concepts and issues arising from economic, social, and political change in the Third World. **M100A.** Economic Development and Culture Change. (Same as Anthropology M166.) Prerequisites: Anthropology 9 or consent of instructor, some beginning experience in social sciences at college level. **M100B.** Political Economy of Development. (Same as Political Science M197G.) Prerequisite: some beginning experience in social sciences at college level.

Mr. Burr, Mr. Zeitlin (WSp)

195A-195B-195C. Directed Studies for Honors. Prerequisites: courses M100A-M100B, 3.5 GPA in courses offered for the major, formal application to honors program, consent of instructor. **195A.** Research, discussion, and planning of honors thesis. **195B-195C.** Research, preliminary drafting, and final writing of honors thesis. In Progress grading for course 195B (credit to be given only on completion of course 195C).

Diversified Liberal Arts (Interdepartmental)

A316 Murphy Hall, (310) 825-1965

Undergraduate Certificate Program

The Diversified Liberal Arts Program (DLAP) is not a major, but a special certificate program through which you may fulfill a requirement to earn a "clear" credential to teach in California elementary schools. To earn the credential, you must complete the Instructional Credential Program in the Graduate School of Education. In addition, you must either earn a satisfactory score on the Commons Section of the National

Teachers Examination or complete the DLAP in the College of Letters and Science.

To earn the certificate in diversified liberal arts, you must complete a major in the College of Letters and Science. You must also complete DLAP requirements in four areas: (1) language and literature, (2) mathematics and science, (3) history and social science, (4) arts and culture.

Requirements for one of these areas are normally satisfied by courses taken for your major; in addition, you must complete a pattern of courses in specified areas.

If you plan to pursue the program, you should begin to take courses in your freshman year to fulfill these requirements. You must petition for admission to the program and are advised to do so as soon as possible. Transfer students may petition to have suitable courses completed at other institutions applied toward the course requirements of this program. The college certifies completion of the program.

If you do not complete the program prior to graduation, you must petition out of the program to be eligible to graduate.

For further information about the program and a complete list of courses that apply, contact a counselor in the College of Letters and Science Preprofessional/Pregraduate Advising Office, A316 Murphy Hall (825-1817). For information regarding the Teacher Credential Program in the Graduate School of Education, see a counselor in 1605 Maxxam Building (825-8328).

Scope and Objectives

The disciplines of geology, geochemistry, geophysics, paleobiology, and space physics are concerned with the structure and evolution of the solar system, Earth, and life: essentially, the physical environment and its interaction with biota. These studies entail the application of fundamental physics and chemistry to a broad subject area stretching from astronomy at one extreme to biology at the other. Areas which are emphasized at UCLA include isotope and trace element analyses, petrology and mineralogy, sedimentology, paleobiology and organic geochemistry, structural geology and tectonophysics, the Earth's interior, planetary physics, and space plasmas.

The variety of techniques applied lead to several specializations within the five main disciplines. Students completing their studies with a B.S. or M.S. degree usually are employed by industry. Many are employed in environment-related activities; others are involved in mineral or oil exploration or in construction. Students attaining the Ph.D. degree are usually employed by universities or governmental and industrial research groups.

The Bachelor of Arts program in Earth Sciences is intended to provide a broad background in Earth sciences that is especially appropriate for students intending to become K through 12 teachers in Earth, physical, or life sciences. It may also be of interest to students who plan careers in environmental sciences, law, government, business, journalism, public

health, medicine, or dentistry. Those who intend to become professional geologists, geochemists, or geophysicists and/or to continue into graduate studies in Earth or space sciences are urged to pursue one of the B.S. degrees.

Bachelor of Science in Geology

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 2, 51A, 51B, 61; Biology 2; Chemistry and Biochemistry 11A, 11B/11BL; Mathematics 31A, 31B, 32A; Physics 8A/8AL, 8B/8BL, and 8C/8CL or 6B; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C-.

The Major

Required: Earth and Space Sciences 103A, 103B, 103C, 111, 112, 116, 121A-121B, 135, and three additional courses from 114, 119, 128, 130, 131, 133, 134, 136C, 137, 139, 141, 144, 150, 152.

Students with an interest in nonrenewable natural resources are advised to take courses 128, 136C, 137, 138, 139, 141, and/or 150. Those interested in geochemistry are advised to take Earth and Space Sciences 103C, 119, 121A-121B, 128, 130, 131, and/or Chemistry and Biochemistry 110A, 110B, 114, 132A, 132B, 153A, 184.

Bachelor of Science in Geology — Engineering Geology

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 51A, 51B, 61; Chemistry and Biochemistry 11A, 11B/11BL; Mathematics 31A, 31B, 32A, 33A; Physics 8A/8AL, 8B/8BL, 8C/8CL; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C-.

The Major

Required: Earth and Space Sciences 103A, 103B, 111, 112, 121A-121B, 135, 139; Civil Engineering 108, 120, 121, 128L, 150; one course from Earth and Space Sciences 134, 136C, 137, 141, 150, Geography 100, Civil Engineering 151, 155.

Bachelor of Science in Geology — Paleobiology

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 2, 51A, 51B, 61; Biology 5, 5L, and 6 or 9 or 108; Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL. All courses must be passed with a minimum grade of C-.

The Major

Required: Earth and Space Sciences 103B, 111, 112, 116; Chemistry and Biochemistry 132A, 132B/132BL, 153A, 153L; six courses from Chemistry and Biochemistry 153B, 154, Biostatistics 110A, 110B, Biology 101A, 101B, 102, 105, 110, 111, 117, 120, 122, 123, 147, 148, Earth and Space Sciences 115, 119, 121A-121B, 133, 141, 144.

Bachelor of Science in Geophysics — Applied Geophysics**Preparation for the Major**

Required: Earth and Space Sciences 1 or 1H, 51A, 51B, 61; Chemistry and Biochemistry 11A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C-.

The Major

Required: Earth and Space Sciences 111, 112, 136A, 136B, 136C, 152; Physics 105A, 105B, 110A, 110B, 114; two courses from Earth and Space Sciences 101, 103A, 103B, 131, 134, 137, 139, 154, 205, 265, Mathematics 140A, 140B, 140C, Physics 112, 115A, 116, 131, 132, Statistics M152A, 152B, or other courses with consent of adviser.

Bachelor of Science in Geophysics — Geophysics and Space Physics**Preparation for the Major**

Required: Earth and Space Sciences 1 or 1H, 9; Chemistry and Biochemistry 11A, 11B/11BL, 11C; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C-.

The Major

Required: Earth and Space Sciences M140, 152, 154; Physics 105A, 105B, 110A, 110B, 112; Physics 131 or Mathematics 145; three courses from Earth and Space Sciences 101, 119, 131, 134, 136A, 136B, 150, 205, 233, Atmospheric Sciences 203C, one of Mathematics 140A, 140B, or 140C.

Students planning to do graduate work in specialized careers in Earth sciences should, when possible, take appropriate courses in departments outside the major in addition to those already specified. Suggested graduate programs for various fields of emphasis are available in the Student Affairs Office, 3683 Geology, and provide guidelines in selecting upper division courses.

Qualified undergraduate students may, with consent of their advisers and the instructor, take Earth and Space Sciences graduate courses numbered from 200A through 249.

Bachelor of Arts in Earth Sciences**Preparation for the Major**

Required: Earth and Space Sciences 1 or 1H, 2, 9, 15, 51A, 51B, 61; Biology 2 or 5; Chemistry and Biochemistry 11A, 11B/11BL; Mathematics 3A, 3B, and 3C, or 31A and 31B; Physics 6A, 6B, and 6C, or 8A/8AL and 8B/8BL. All courses must be passed with a minimum grade of C-.

The Major

Required: Earth and Space Sciences 103A, 103B, 111, 112, 116; five additional upper division courses from Earth and Space Sciences other than 100 or 120, English 131G, Geography 100/100A, 101/101A, 104, 105/105A, 106/106A, 107, 113, or other upper division physical sciences, life sciences, or engineering courses by petition.

Honors in Geology or Geophysics

The honors program in geology or geophysics is intended to provide exceptional students an opportunity for advanced research and study under the tutorial guidance of a member of the faculty. Requirements for admission to candidacy are the same as those required for admission to the Honors Programs of the College of Letters and Science. Qualified students wishing to enter the program must submit a completed application form to the departmental honors committee near the end of their junior year. Honors in geology or geophysics are awarded at graduation to those students who have a cumulative GPA of 3.5, who have completed at least 90 graded units at the University of California, and who have completed a minimum of two terms (eight units) of Earth and Space Sciences 199H leading to the preparation of a satisfactory honors thesis. Students demonstrating exceptional ability are awarded highest honors.

Graduate Study**Admission**

Application may be made for admission to any term. Graduate Record Examination (GRE) scores are required; the examination should be taken at least six weeks before the deadline. Also required are three letters of recommendation which should be sent to the Graduate Adviser, Department of Earth and Space Sciences, 3683 Geology, UCLA, Los Angeles, CA 90024-1567. Application forms and a brochure giving information about the department may be obtained from the graduate adviser. Students who wish to apply for fellowships or

teaching assistantships should be aware that these are allocated in February for the following academic year; completed applications should be received by January.

Major Fields and Subdisciplines

The Department of Earth and Space Sciences offers programs leading to the M.S. and Ph.D. degrees in Geochemistry, in Geology, and in Geophysics and Space Physics. The program in geochemistry offers study in crystal chemistry, experimental petrology, isotopic studies of stable and radioactive elements, meteorite research, planetology, and lunar geochemistry. The program in geology offers study in geomorphology, glaciology, micropaleontology, mineralogy, paleobiology, paleontology, petrology, sedimentology, stratigraphy, structural geology, tectonophysics, and other fields. The program in geophysics and space physics offers study in applied geophysics, the Earth's interior (seismology, gravity, thermal regime, geomagnetism, tectonics), geophysical fluid dynamics (turbulence, rotating systems, stability, hydromagnetism), planetology (orbital dynamics, planetary interiors, surfaces and atmospheres, solar-system origin), and space physics (magnetosphere, radiation belts, solar wind, magnetic fields, cosmic rays). Other comparable areas of study are also possible.

Foreign Language Requirement

Advising committees may require one or more foreign language in special individual cases. The committees determine how the requirement is to be fulfilled.

Master of Science in Geochemistry**Admission**

A bachelor's degree in chemistry, geology, physics, or a related field is required. Applicants must have outstanding records in the basic sciences, physics, chemistry, and mathematics. The Graduate Record Examination (GRE) Subject Test may be in any appropriate field of science.

Course Requirements

A minimum of nine courses is required for the degree, at least six of which must be graduate-level courses. Each course of study is worked out individually between you and the advising committee. You are expected to attain, either through prior training or through prescribed coursework, a common mastery of the subject matter of Earth and Space Sciences 51A, 51B, 130, 131, 234A or 234B, and Chemistry and Biochemistry 110A, as well as more advanced courses in particular fields, and some familiarity with the methods of field geology. You must take course 235A, 235B, or 235C each term.

Sixteen units of 500-series courses (596, 597, 598) may be applied toward the total course requirement; 12 units may be applied toward the minimum graduate course requirement.

Thesis Plan

The thesis must be approved by the research director (usually the chair of your advising committee), as well as by the other members of the advising committee. No examination is required of students who write a thesis.

Comprehensive Examination Plan

If you elect this plan, the advising committee prepares and administers the final examination (normally oral). In most cases, a failed final examination can be repeated once.

Master of Science in Geology

Admission

A bachelor's degree in geology, biology, chemistry, physics, or other science is required. Applicants must have outstanding records in the relevant basic sciences and mathematics.

Course Requirements

Each course of study is worked out individually between you and the advising committee. It may include appropriate courses offered by other departments. Unless you have already passed Earth and Space Sciences 61 and 111, you are required to take either 195G or 61 and 111 during your first year in residence. Depending on your performance in course 195G, you may subsequently be required to take either 111 or 61 and 111.

Courses applied toward the 36-unit minimum requirement must be from the 100, 200, or 500 series in the physical or life sciences. At least 24 units must be graduate-level courses, of which at least four units must be a geology seminar (courses 251 through 260). Except for courses 597 and 598, those graded on an S/U basis may not be applied toward the requirements. The advising committees may require additional courses in light of individual educational objectives and backgrounds.

Eight units of 500-series courses (596, 597, 598) may be applied toward the total course requirement; four units may be applied toward the minimum graduate course requirement.

Thesis Plan

This plan is normally required for students not continuing to the doctorate. The thesis subject may be selected at once and the research undertaken concurrently with coursework; in any event, it should normally be selected within your first year in residence. The completed thesis must be approved by the thesis committee. If it is not, the committee may recommend either termination of graduate study or further coursework or research, leading to a revised thesis. Revision and resubmission is not normally permitted more than once.

Comprehensive Examination Plan

This plan is recommended for those continuing to the Ph.D. The examination consists of a six-hour written part covering your major field of study and a subsequent oral part which may be more general in scope. If the examination is failed, the advising committee may recommend either termination of graduate study or further coursework followed by another examination. Reexamination is not normally permitted more than once.

Master of Science in Geophysics and Space Physics

Admission

A bachelor's degree in a physical science, engineering, mathematics, or other field is required. Undergraduate work must include junior- or senior-level courses in mathematical methods, dynamics, electromagnetism, and thermodynamics. Recent Graduate Record Examination (GRE) Aptitude Test scores are required; Subject Test scores are desirable, preferably in physics, although mathematics or geology scores are also acceptable.

Qualified students may proceed directly toward the Ph.D. degree, although most obtain the M.S. degree in the process.

Course Requirements

Courses applied toward the 36-unit minimum requirement must include Earth and Space Sciences 200A, 200B, and 200C and at least 12 additional units of 200-series (graduate) courses. At least half of these must fall within a single field of concentration (applied geophysics, Earth's interior, geophysical fluid dynamics, planetology, or space physics) selected in consultation with your faculty adviser, and the remainder must contribute to your general competence in geophysics and space physics. Courses 200A, 200B, and 200C must be passed with a grade-point average of 3.2 or better unless you are following the thesis plan. Courses graded on an S/U basis may not be applied toward the minimum requirement.

Thesis Plan

The completed thesis must be approved by your faculty adviser (usually the chair of your advising committee), as well as by the other members of that committee. Eight units of 500-series courses (596, 598) may be applied toward the total course requirement.

Comprehensive Examination Plan

You may select either (1) a written six-hour examination in question/answer format or (2) an examination in written proposal/oral format. Contact the department for details of each format. Courses in the 500 series may not be applied toward the 36-unit minimum requirement.

Specialization in Applied Geophysics

The objective of this program is to provide advanced technical training to students who plan to do detailed analysis of geophysical data in industry, mainly petroleum exploration. Emphasis is on theory, computation, data analysis, and inversion. Fieldwork and original measurements are strongly supported, but UCLA has no facilities for gathering or routine processing of reflection seismic data. Undergraduate preparation for admission is equivalent to a B.S. in Geophysics (applied geophysics specialty), including a common mastery of the subject matter of Earth and Space Sciences 61, 111, 112, 136A, 136B, 136C, 152, Physics 105A, 105B, 110A, 110B, and 114. Exceptions may be allowed, but in particular, deficiency in geophysical fieldwork must be made up.

Course Requirements — Courses applied toward the 36-unit minimum requirement must include Earth and Space Sciences 200A and 202, plus at least two courses from 203, 204, 205, 222. Eight additional units of graduate-level courses are required; courses 200B, 208, M224A, M224B are recommended. Eight units of 500-series courses (596, 598) may be applied toward the graduate course requirement. Except for courses 596 and 598, those graded on an S/U basis may not be applied toward the minimum requirement.

Thesis Plan — A thesis is required for this specialization. A qualifying examination on the suitability of the proposed thesis should be taken by your fourth term in residence. You are also required to take a final examination on the adequacy of your completed thesis.

Ph.D. in Geochemistry

Admission

Admission requirements are the same as those for the M.S. in Geochemistry.

Course Requirements

Each course of study is worked out individually in consultation with your advising committee. You are expected to complete at least the minimum number of courses which are required for the M.S. in Geochemistry and to attain, either through prior training or through prescribed coursework, a common mastery of the subject matter of Earth and Space Sciences 51A, 51B, 130, 131, 234A or 234B, and Chemistry and Biochemistry 110A, as well as more advanced courses in particular fields, and some familiarity with the methods of field geology. You must take course 235A, 235B, or 235C each term.

Qualifying Examinations

The departmental written qualifying examination must be taken before the end of your first year of the doctoral program if you have a master's degree; otherwise, it must be taken before the end of your second year of enrollment. It may be given in either a question/answer for-

mat or in a proposal format, at your discretion. Contact the department for details of each format. In case of failure, an examination of either format may be repeated at the discretion of the examining committee.

After passing the written qualifying examination, you must nominate your doctoral committee and arrange a time for the University Oral Qualifying Examination. This examination determines the suitability of the selected problem for the dissertation and your ability to research the problem but is not limited to these topics. Repetition of a failed examination is at the option of the doctoral committee.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

The final oral examination is normally required.

Ph.D. in Geology

Admission

Admission requirements are the same as those for the M.S. in Geology.

Course Requirements

Each course of study is worked out individually in consultation with your advising committee. It may include appropriate courses offered by other departments. Unless you have already passed Earth and Space Sciences 61 and 111, you are required to take either 195G or 61 and 111 during your first year in residence. Depending on your performance in course 195G, you may subsequently be required to take either 111 or 61 and 111. You also are expected to complete at least the minimum number of courses which are required for the M.S. in Geology and must take a geology seminar each year.

Qualifying Examinations

The departmental written qualifying examination must be taken before the end of your first year of the doctoral program if you have a master's degree; otherwise, it must be taken before the end of your second year of enrollment. It is given in either a question/answer format or in a proposal/proposition format, at your discretion. Contact the department for details of each format.

After passing the written qualifying examination, you must nominate your doctoral committee and arrange a time for the University Oral Qualifying Examination. This examination determines the suitability of the selected problem for the dissertation and your ability to research the problem but is not limited to these topics. Repetition of a failed examination is at the option of the doctoral committee.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

The final oral examination is normally required.

Ph.D. in Geophysics and Space Physics

Admission

Admission requirements are the same as those for the M.S. in Geophysics and Space Physics.

Course Requirements

Six courses are required, three in fundamental physics and three in the major geophysics disciplines. You must attain a grade-point average of 3.3 or better (on a 4.0 scale) in the six courses. Contact the department for details.

Qualifying Examinations

The departmental written qualifying examination is given in either a question/answer format or in a written research proposal/oral format, at your discretion. Contact the department for details of each format.

After passing the written qualifying examination, you must nominate your doctoral committee and arrange a time for the University Oral Qualifying Examination. This examination determines the suitability of the selected problem for the dissertation and your ability to research the problem but is not limited to these topics. Repetition of a failed examination is at the option of the doctoral committee. If you do not pass this examination within four years after entering the program, you are subject to dismissal.

Final Oral Examination

The examination is required.

Lower Division Courses

1. Introduction to Earth Science. Lecture, three hours; laboratory, two hours. Not open to students with credit for or currently enrolled in course 1H or 100. Elements of Earth science; study of Earth materials; nature and interpretation of geologic evidence; study of geologic processes; historical aspects of geology. (F,W,Sp)

1H. Fundamentals of Earth Science. Lecture, three hours; laboratory, two hours; two field days. Not open to students with credit for or currently enrolled in course 1 or 100. Particularly recommended for future physical science majors with strong high school or some lower division preparation. Introduction to Earth materials, physical geology, and tectonics, with examples of geophysical and geochemical methods. (Sp)

2. Earth History. Lecture, three hours; laboratory, three hours; fieldwork. Prerequisite: course 1 or 1H. Methods of historical science; consideration of special problems relating to physical and biological evolution of Earth from earliest time to the present.

Mr. Davidson (W)

5. Earth Science and Society: Geological Ecological Interactions. Lecture, three hours; discussion, two hours; field trips. Geologic aspects of major environmental problems, with emphasis on lithosphere/biosphere interactions. Problems of exploration and exploitation of fossil fuel resources. Comparison of society-produced materials and natural cycles.

Mr. Reed

8. Earthquakes. Lecture, three hours. Causes and effects of earthquakes, with special emphasis on problems of living with earthquakes in Southern California. Topics include relationship between earthquakes and local and regional geology, types of earthquakes, past and future earthquakes in California, earthquake engineering, disaster preparedness, and prospects for predicting or controlling earthquakes. (F,W,Sp)

9. Origin and Evolution of Solar System. Lecture, three hours. Properties of sun, planets, asteroids, and comets. Astronomical observations relevant to understanding the solar system and its origin. Dynamical problems, including examination of fallacious hypotheses. Meteoritic evidence regarding earliest history of the solar system. Chemical models of solar nebula. Space exploration and its planning. (F,W,Sp)

10. Geology of California. Lecture, two hours; laboratory, two hours (alternate weeks); 10 field days. Prerequisite: course 1 or 1H. General survey of major geologic features and geologic history of California; its relationship to large-scale crustal motions of Western North America and the Eastern Pacific. Environmental geology; study of geologic hazards such as earthquakes, landslides; aspects of urban geology.

15. Introduction to Oceanography. Lecture, three hours; discussion, one hour. Not open for credit to students with credit for Biology 25. Processes responsible for chemical composition of ocean and current circulation patterns. Seafloor spreading and morphology of ocean floor. Biological productivity, marine ecology, and minerals forming in the ocean. (Sp)

16. Principles of Paleontology. Lecture, three hours; laboratory, two hours; one optional field trip. Designed for nonmajors. Introduction to nature, occurrence, and use of fossils; history of biosphere as revealed through the fossil record.

Mr. Runnegar, Mr. Schopf (F,W)

17. Dinosaurs and Their Relatives: Introduction to Paleobiology. Lecture, three hours; laboratory, two hours; one optional field trip. Designed for nonmajors. Exploration of biology, evolution, and extinction of dinosaurs and close relatives, in context of history of biosphere. Information from paleontology, biology, and geology. Mr. Marshall (Sp)

20. Natural History of Southern California. Lecture, one hour; laboratory, three hours; seven field weekends. Identification, distribution, diversity of plants, animals, and communities; environmental factors influencing distribution in alpine to lower desert life zones. Identification, interpretation, and physical history of rocks, landforms, and structural geologic features within the physiographic regions of Southern California. Emphasis on field-based learning related to integrated aspects of natural history. Mr. Hall

51A. Mineralogy-Lithology. Lecture, three hours; laboratory, six hours. Prerequisite: course 1 or 1H or consent of instructor. Recommended: completion of chemistry requirement. Mineralogic crystal chemistry; relation of physical properties to structure. Structural classification and petrogenesis of major minerals and rocks. Laboratory study of crystallography and identification of minerals and igneous, sedimentary, and metamorphic rocks in hand sample.

Mr. Dollase (F)

51B. Optical Mineralogy-Petrography. Lecture, three hours; laboratory, six hours. Prerequisites: course 51A and one introductory high school or college physics course, or consent of instructor. Principles of optical crystallography. Utilization of optical properties to identify nonopaque minerals in immersion media and in thin section. Study of common igneous, sedimentary, and metamorphic rocks in thin section. Mr. Dollase (W)

61. Elements of Field Geology. Lecture, two hours; laboratory, three hours; fieldwork, one day per week. Prerequisites: courses 1 or 1H, and 2, or consent of instructor. Majors must have completed or be concurrently enrolled in course 51B. Techniques of geologic mapping; preparation of geologic reports; methods of mapping faults and folds, sedimentary, igneous, and metamorphic terrains, and Quaternary deposits; introduction to field methods in engineering and environmental geology, petroleum geology, and mining geology and mineral exploration; interpretation of geologic maps; field exercises in pace-and-compass topographic and geologic mapping. Mr. Yin (Sp)

Upper Division Courses

100. Principles of Earth Science. Lecture, three hours. Designed for nonmajors. Not open to students with credit for course 1 or 1H. Fundamentals of physical geology and Earth history; major problems of geology, such as continental drift and development of large-scale features of Earth; physical and biological evolution.

101. Introduction to Geophysics and Space Physics. Lecture, three hours. Prerequisites: Physics 8A, 8B, 8C, Mathematics 31A, 31B, 32A. Designed primarily for students majoring in a physical science or mathematics. Survey of geophysics, physics of planets, their atmospheres, and the interplanetary medium, with emphasis on topics of current research interest.

103A. Igneous Petrology. Lecture, two to three hours; laboratory, six hours; field trips. Prerequisites: courses 51A, 51B, Chemistry 11B, Mathematics 31B, Physics 8B. Recommended: Mathematics 32A. Mineralogy, chemical composition, and field occurrence of igneous rocks with reference to their origin by melting in Earth. Introduction to thermodynamics as applied to petrology. Formation of magma, its movement, eruption, crystallization, and chemical evolution. Petrologic structure of the crust and mantle and its relation to seismology. Overview of petrological and chemical evolution of Earth, moon, and other planets from their origin to the present. Mr. Davidson (Sp)

103B. Sedimentary Petrology. Lecture, two to three hours; laboratory, six hours; field trips. Prerequisite: course 103A. Recommended: course 61. Study of sedimentary rocks based on characteristics of sedimentary particles and dynamics of depositional processes. Lectures focus on development of depositional facies models, and laboratories emphasize recognition of sedimentary deposits from each major depositional facies. Mr. Reed (F)

103C. Metamorphic Petrology. Lecture, two to three hours; laboratory, six hours; field trips. Prerequisite: course 103B. Interpretation of metamorphic rocks based on field occurrence, mineralogical composition, texture, and application of physical and chemical principles. Mr. Manning (Sp)

111. Stratigraphic and Field Geology (6 units). Lecture, two hours; laboratory, three hours; fieldwork, one day per week. Prerequisite: course 61 or consent of instructor. Principles of stratigraphy; geologic mapping of a selected area; preparation of a geologic report. Mr. Hall (W)

111G. Field Geology (2 to 4 units). Prerequisite: graduate standing or consent of instructor. Geologic mapping, principles of stratigraphy, structural geology, and map interpretation. Mr. Hall (W)

112. Structural Geology. Lecture, three hours; laboratory, six hours. Prerequisite: course 1 or consent of instructor. Recommended: course 51B. Planar and linear structures at different scales in sedimentary, metamorphic, and igneous rocks. Faults and folds, their description, classification, and kinematic and dynamic analysis. Deformation, strength, fracture, and rheological properties of rocks. Mr. Yin (F)

114. Introduction to Stress and Deformation. Lecture, three hours; discussion, three hours. Prerequisite: course 112 or consent of instructor. Introduction to quantitative treatment of strain in geological bodies, stresses that cause them, and their rheological behavior. Stress and strain fields in folds, near faults, and in and near intruding magma bodies.

115. Micropaleontology. Lecture, three hours; laboratory, three hours; field trips. Prerequisite: Biology 5. Survey of morphology, evolution, and geologic importance of the major groups of microfossils.

116. Paleontology. Lecture, three hours; laboratory, three hours; field trips. Prerequisite: Biology 5 or consent of instructor. Review of major groups of fossil organisms and their significance in geology and biology. Mr. Runnegar (W)

119. Continental Drift and Plate Tectonics. Lecture, three hours. Prerequisites: upper division standing and one introductory geology course (course 1, 1H, 100, or equivalent), or consent of instructor. Classical concepts of sedimentation and tectonics. Alfred Wegener's theory of continental drift and ensuing controversy. Physiography of continents and oceans. Geophysical evidence regarding nature of ocean floor. Magnetic stratigraphy. Seafloor spreading. Plate tectonic model and its driving mechanisms. Tectonic, igneous, and metamorphic processes at plate boundaries. Mr. Christie (Sp)

120. Rubey Colloquium: Major Advances in Earth Science. Lecture, three hours. Prerequisite: upper division standing. Lectures on major advances in Earth science offered by distinguished authorities (including regular faculty). Supervision of continuity and assessment of student performance by a faculty member. Content varies from year to year. If laboratory work is required, course 199 must be taken concurrently.

121A-121B. Advanced Field Geology (6 units each). Fieldwork, four weeks each. Prerequisites: courses 61, 103B, 111. Problems in field geology; preparation of geologic maps and cross-sections; preparation of written geologic reports in the field and a final written summary geologic report of selected areas. Mr. Reed (Sum)

128. Mineral Deposits. (Formerly numbered 128A, 128B.) Lecture, three hours; laboratory, three hours. Prerequisites: course 51B, Chemistry 11B. Survey of mineral deposits from magmatic to sedimentary, covering their geological and geochemical characteristics, tectonic settings, and genesis. Laboratory includes examination of ore suites in hand specimen and with reflected and transmitted light petrography.

129A-129B. Hydrogeology (2 units each). Prerequisites: course 1 or 1H or 100 or equivalent, upper division standing. Hydrogeologic controls of groundwater occurrence, movement, quality, and management. Hydrologic equation, groundwater/surface water relationships, water wells, pumping tests, pollution, artificial recharge, seawater intrusion, safe yield of groundwater basins, groundwater models.

130. Isotope Geochemistry. Lecture, three hours; discussion, one hour. Prerequisites: junior or senior standing in physical or biological sciences, consent of instructor. Theoretical aspects of geochronology, particularly carbon 14 dating. Application of radioisotopes to hydrologic cycle and to atmospheric circulation. Stable isotope distribution in nature. Exchange mechanisms and their applications to paleotemperatures, hydrology, mineral formation, and origin of biological deposits. (Alternates yearly with course 131.)

131. Geochemistry. Lecture, three hours; discussion, one hour. Prerequisite: junior or senior standing in chemistry, physics, or Earth and space sciences. Origin and abundance of the elements and their isotopes; distribution and chemistry of the elements in Earth, oceans, and atmosphere; chemistry of Earth's interior, phase transformations at high pressure and temperature. (Alternates yearly with course 130.)

133. Regional Geology. Lecture, three hours; discussion, two hours. Prerequisites: courses 61 and 111, or consent of instructor. Application of geologic, stratigraphic, paleontologic, biologic, and climatic principles to a specific province or provinces. Emphasis on tectonic evolution of selected regions.

134. Computing in Earth and Space Sciences. Lecture, three hours; laboratory, three hours. Prerequisite: Program in Computing 3 or 10A or consent of instructor. Original programming and application of software to generate and test hypotheses with non-ideal or incomplete data sets. Interpolation/extrapolation with graphics to generate hypotheses; forward modeling from fundamental equations to explore implications; probabilistic testing of models against data. Examples and exercises from the Earth and space sciences. Introduction to software used in research and industry. Mr. Bird (F)

135. Introduction to Applied Geophysics. Lecture, three hours; laboratory, one hour. Prerequisites: Physics 8A, 8B, 8C or 6B, Mathematics 31A, 31B, 32A, and Program in Computing 3 or 10A, or consent of instructor. Not open for credit to students with credit for course 136A. Principles and techniques of gravimetric, seismic, magnetic, and other geophysical methods of exploration for ores, petroleum, and other economic minerals. Mr. Jackson (Sp)

136A. Applied Geophysics. Lecture, three hours; laboratory/field trips, three hours. Prerequisites: Physics 8A, 8B, 8C, 8D, Mathematics 33A, Program in Computing 3 or 10A. Not open for credit to students with credit for course 135. Seismic reflection and refraction, Fourier analysis and deconvolution, vibroseis, synthetic seismograms, marine seismics, seismic interpretation, gravity and magnetic fields, inversion uniqueness and depth rules.

136B. Applied Geophysics. Lecture, three hours; laboratory/field trips, six hours. Prerequisites: course 136A and Program in Computing 3 or 10A, or consent of instructor. Principles and techniques of exploration for mineral deposits using natural and artificial electric and magnetic fields. Methods include self potential, resistivity, induced polarization, electromagnetics, magnetotellurics, magnetics. Mr. McPherron (F)

136C. Field Geophysics (6 units). Lecture, three hours; discussion, one hour; laboratory, two hours; fieldwork, 10 hours. Prerequisites: course 135 or 136A, consent of instructor. Application of seismic, gravimetric, magnetic, electrical, and other geophysical methods to geologic and engineering problems. Practical aspects of geophysical exploration, including planning, data collection, data reduction, and interpretation. Fieldwork on unsolved problems (week-long field trip). Mr. Davis (Sp)

136D. Advanced Field Geophysics (6 units). Lecture, six hours; laboratory, six hours; fieldwork, 12 hours. Prerequisites: course 135 or 136A, consent of instructor. Application of seismic reflection, seismic refraction, gravity, magnetic, electrical, and electromagnetic methods to geologic problems. Planning, data collection, data reduction, and interpretation. Use of computer in applied geophysics. Mr. Davis, Mr. Jackson (Sum, six weeks)

137. Petroleum Geology. Lecture, three hours. Prerequisites: courses 61 and 111, or consent of instructor. Geology applied to exploration for and production of natural gas and petroleum; techniques of surface and subsurface geology; problems of petroleum geology. Mr. Hallinger (Sp)

138. Exploration and Mining Geology. Lecture, three hours; discussion, two hours; laboratory, four hours; field trip. Prerequisite: course 51B. Geological principles applied to exploration for and evaluation of mineral deposits; geological techniques at operating mines; mine economics; exploration geology and mineral resource economics.

Graduate Courses

139. Engineering and Environmental Geology. (Formerly numbered M139.) Lecture, two and one-half hours. Prerequisite: course 1 or 100. Recommended: course 111. Principles and practice of soil mechanics and foundation engineering in light of geologic conditions, recognition, prediction, and control or abatement of subsidence, landslides, earthquakes, and other geologic aspects of urban planning and subsurface disposal of liquids and solid wastes. Mr. Merfield (W)

M140. Introduction to Fluid Dynamics. (Same as Atmospheric Sciences CM140.) Lecture, three hours; discussion, one hour. Corequisite: Physics 131. Equations of fluid motion. Circulation theorems. Irrotational flow. Vortex motion. Rotating frame. Hydrostatic and geostrophic balance. Sound and shock waves. Viscous flow. Mr. Schubert (F)

141. Basin Analysis. Lecture, three hours; laboratory, six hours. Prerequisites: courses 103B, 111. Interpretation of sedimentary rock records in terms of tectonics and basin evolution. Sedimentary patterns in modern plate settings serve to focus interpretations of deformed rocks in complex structural regions.

144. Marine Geology. Lecture, three hours; field trips. Prerequisite: senior standing. Recent marine sedimentology and geochemistry; oceanography morphology, structure and geologic history of ocean basins.

150. Remote Sensing for Earth Sciences. Lecture, three hours. Open to upper division and graduate students. Remote sensing related to development of natural resources. Characteristics of electromagnetic spectrum and review of remote sensing devices. Applicability to land-use classification, soil survey, urban studies, vegetation classification; emphasis on geologic interpretation of imagery. Mr. Sabins (W)

152. Physics of the Earth. (Formerly numbered 122.) Lecture, three hours; discussion, one hour. Prerequisites: Physics 8A, 8B, 8C, Mathematics 31A, 31B, and 32A, or consent of instructor. Application of physics to structure and evolution of the solid Earth. Seismology, convection and heat flow, gravity, geomagnetism, rock magnetism, and relation of these topics to plate tectonics and other problems of current geophysical interest. Mr. Anderson (W)

153. Oceans and Atmospheres. Lecture, three hours; discussion, one hour. Prerequisites: Physics 8A, 8B, 8C, Mathematics 31A, 31B, and 32A, or consent of instructor. Physics and chemistry of Earth's oceans and atmosphere; origin and evolution of planetary atmospheres; biogeochemical cycles, atmospheric radiation and climate, energetics and dynamics of oceanic and atmospheric circulation systems. P/NP or letter grading.

154. Solar Terrestrial Physics. (Formerly numbered M154.) Lecture, three hours; discussion, one hour. Prerequisite or corequisite: Physics 110B. Particle and electromagnetic emissions from the sun under quiet and under disturbed conditions. Solar wind. Magnetospheres and ionospheres of Earth and other planets. Geomagnetic phenomena and the aurora. Ms. Kivelson, Mr. Coleman (F)

155. Planetary Physics. Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 31A, 31B, 32A, Physics 8A, 8B, and 8C, or consent of instructor. Formation of solar nebula; origin of planets and their satellites; comets, asteroids, and meteorites; celestial mechanics and dynamics; physics of planetary interiors, surfaces, and atmospheres. Mr. Paige (Sp)

195G. Field Geology for Graduate Students (2 units). Field mapping; preparation of a geologic report. P/NP grading. Mr. Reed (F)

199. Special Studies in Earth and Space Sciences (2 to 8 units). May be repeated for credit.

199H. Honors Research in Earth and Space Sciences. Prerequisites: senior standing, consent of departmental honors committee. Individual research designed to broaden and deepen students' knowledge of some phase of Earth and space sciences.

200A. Introduction to Geophysics and Space Physics I: The Solid Earth and Planets. Lecture, three hours. Prerequisites: Physics 105A, 110A, 112, and 131, or consent of instructor. Geochemistry, cosmochemistry, and petrology; geotectonics; gravity field; seismology; heat transfer, thermal and mechanical evolution of the mantle; core and geomagnetism; lunar and planetary interiors. Mr. Newman (F)

200B. Introduction to Geophysics and Space Physics II: Oceans and Atmospheres. Lecture, three hours. Prerequisites: Physics 105A, 110A, 112, and 131, or consent of instructor. Evolution, chemistry, and heat balance of oceans and atmospheres; molecular spectra, radiative transfer, and planetary observations; dynamics of oceans and atmospheres. Mr. Paige (Sp)

200C. Introduction to Geophysics and Space Physics III: Plasmas — Aeronomy and the Interplanetary Medium. Lecture, three hours. Prerequisites: Physics 105A, 110B, 112, and 131, or consent of instructor. Solar surface features, heating and expansion of corona, solar wind, plasma and magnetic fields, interaction of the solar wind with Earth, magnetospheric phenomena. Mr. Russell (W)

201. Classical Mechanics. Lecture, three hours. Kinematics, variational principles and Lagrange's equations, rotational dynamics. Hamilton equations of motion, linear and nonlinear perturbation theory, applications to solar system.

202. Continuum Mechanics. Lecture, three hours. Kinematics and dynamics of continuous media. Properties of stress, strain, and rate-of-strain tensors. Conservation laws. Elasticity and viscosity. Heat transfer, boundary layers, and dynamical similarity. S/U or letter grading. Mr. Newman (W)

203. Electrodynamics. Prerequisite: upper division electromagnetic theory course or consent of instructor. Maxwell's equations and boundary conditions; momentum, angular momentum, and energy of electromagnetic fields; plane electromagnetic and magnetohydrodynamic waves; wave guides, simple radiating systems, and diffraction.

204. Time-Series Analysis and Spectral Estimation. Lecture, three hours. Prerequisites: intermediate courses in calculus (including linear algebra and complex variables) and computer programming (including FORTRAN). Basic methods in time-series analysis, including spectral estimation, prediction, and signal detection, in application to problems in geophysics, atmospheric physics, and space physics. Topics include Fourier transforms (continuous, discrete, FFT), time series (Z-transforms, deconvolution), maximum entropy spectral analysis, autoregressive and moving average methods (AR, MA, ARMA), and multichannel prediction and spectral analysis.

205. Inverse Theory and Data Interpretation. Lecture, three hours. Prerequisites: Mathematics 115A, M150A-150B, and 151, or consent of instructor. Inverse modeling problem — determination of model parameters consistent with experimental data, considering effects of random errors and nonuniqueness. Emphasis on linear and quasi-linear problems; nonlinear problems also discussed. Tools used include matrix theory, quadratic forms, orthogonal rotations, statistics, principal axis transformation for rectangular matrices, Bachus/Gilbert resolving kernels, and Lagrange multipliers. Examples from a broad range of physical sciences. Mr. Jackson (W)

208. Geothermics. Lecture, two and one-half hours; discussion, 30 minutes. Prerequisite: Mathematics 33A or consent of instructor. Basic concepts of heat transfer applied to solutions of geological and geophysical problems, including continental heat flow, cooling of oceanic lithosphere, solidification of magmas, thermal and subsidence history of sedimentary basins, frictional heating on fault zones, mantle geotherms, temperature in descending slabs, thermal convection in geothermal regions. Mr. Schubert (Sp)

219. Planetary and Orbital Dynamics. Planetary rotations, satellite orbits, and tidal dissipation; planetary orbital system; resonance effects and chaos; spin-orbit and orbit-orbit coupling; planetary rings.

220. Principles of Paleobiology. Lecture/discussion, three hours. Prerequisite: graduate standing in science. Open to qualified undergraduates in biological and physical sciences with consent of instructor. Current and classic problems in paleobiology, with emphasis on interdisciplinary problems involving aspects of biology, geology, organic geochemistry, and cosmology. Content varies from year to year. May be repeated for credit. Mr. Marshall (W)

221. Field Geology. Lecture, one hour; discussion, one hour; fieldwork, 10 days. Prerequisites: course 121B, or 195G and consent of instructor. Planning, execution, and presentation of geologic mapping projects at professional level. Resolution of problems in Southern California geology from synthesis of new and published research. Field area varies from year to year. May be repeated for credit. Mr. Yin (W)

222. Introduction to Seismology. Lecture, three hours. Types of seismic waves; travel-time seismology; epicenter location; amplitude variations; seismograph theory; explosion seismology; seismicity; focal conditions; surface wave analysis; microseisms and tsunamis.

M224A. Elastic Wave Propagation I. (Same as Mechanical, Aerospace, and Nuclear Engineering M257A.) Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 158A or 166A or consent of instructor. Review of elasticity theory; elastic waves in unbounded media; reflection and refraction of plane elastic waves; surface waves and guided waves in multilayered media; waves generated by concentrated loads; radiation from dislocations; attenuation; representative applications in engineering and seismology. Mr. Mai (W)

M224B. Elastic Wave Propagation II. (Same as Mechanical, Aerospace, and Nuclear Engineering M257B.) Prerequisite: course M224A. Diffraction and scattering of elastic waves by isolated cracks and inclusions; normal mode theories for vibration of finite elastic bodies; dynamic theories of fracture; representative applications in engineering and seismology.

225A. Physics and Chemistry of Planetary Interiors I. Chemical compositions of Earth and planets; high-pressure and temperature effects, phase transitions, and equations of state; variations of density and temperature with depth; thermal and compositional evolution. Mr. Anderson (W)

225B. Physics and Chemistry of Planetary Interiors II. Lateral inhomogeneities in Earth: seismic velocities, petrology, geothermal and gravitational variations; evidences of motion; remanent magnetism, seismic motions; postglacial rebound; plate tectonics; rheology of mantle; thermal convection. Mr. Schubert (Sp)

229. Planetary Atmospheres. Lecture, three hours. Prerequisite: course 200B or consent of instructor. Planetary atmospheric structure, dynamics, and composition. Topics include spacecraft observations; origin and evolution of atmospheres; photochemistry, radiation mechanisms, and transport; atmospheric waves and general circulation; wave-mean flow and turbulence; remote sensing and inversion techniques.

230. X-Ray Crystallography. Lecture, three hours; laboratory, three hours. Prerequisite: course 51B. Point, translation, and space group symmetry, diffraction of X ray, reciprocal lattice theory, single crystal X-ray methods, diffraction symmetry and elementary crystal structure analysis. (Alternates yearly with course 231.)

231. Crystal Chemistry and Structure of Minerals. Lecture, three hours; laboratory, three hours. Prerequisite: course 51B. Bonding, interatomic configurations, polymorphic transformations, isotypism, thermal and positional disorder; survey of structures of common minerals, and relation of physical and chemical properties to crystal structure. (Alternates yearly with course 230.) Mr. Dollase (W)

233. Mineral Physics and Equations of State. Lecture, three hours. Prerequisite: consent of instructor. Interrelationship of physical properties of rock-forming minerals: optical reflectivity, refraction index, sound velocity, elastic constants, specific heat, and thermal expansivity. Determination of pressure, volume, and temperature relationships and planet-forming compounds. Variation of elastic constants with temperature and pressure. Application of shock-wave experiments to equations of state.

234A. Thermodynamic and Geometric Principles of Phase Equilibria. Prerequisites: course 51B and Chemistry 110B, or consent of instructor. Thermodynamic bases of phase transformations and of phase rules. Geometric representation of multicomponent systems using pressure, temperature, chemical potential, molal volume, and fugacity of oxygen, water, and other volatile components as variable parameters.

234B. Petrologic Phase Equilibria. Lecture, three hours; discussion, three hours. Prerequisites: course 51B and Chemistry 110B, or consent of instructor. Principles governing homogeneous and heterogeneous equilibria, with selected applications to mineral stability relations in igneous and metamorphic rocks (fractional crystallization, partial melting, hydrothermal solutions, element partitioning in coexisting phases).

235A-235B-235C. Current Research in Geochemistry (1 unit each). Prerequisite: graduate standing in Earth and space sciences. Seminars presented by staff, outside speakers, and graduate students stressing current research in Earth and planetary chemistry. May be repeated for credit. S/U grading.

236. Igneous Petrology. Lecture, two hours; laboratory, six hours. Prerequisites: one introductory course in petrology and petrography, knowledge of differential equations. Understanding the genesis of igneous rocks based on geochemical, tectonophysical, and other geological evidence and principles.

Mr. Davidson (F)

237. Geochemistry of Solutions. Lecture, three hours. Prerequisites: courses 103A, 103C, Chemistry 110A, and 110B, or consent of instructor. Classical thermodynamics applied to mineral solutions, silicate melts, and low- and high-temperature aqueous solutions and gases. Chemical kinetics and its application to geologic problems.

238. Metamorphic Petrology. Lecture, three hours; laboratory, six hours. Prerequisite: one introductory petrology and petrography course or consent of instructor. Interpretation of metamorphic rocks in light of observation, theory, and experiment. Geological relations, petrographic evidence, metamorphic zoning, thermodynamics of phase equilibria, projections, chemographic relationships, use of piezobirefringent haloes, Rayleigh depletion model, isotopic fractionation, environmental factors of metamorphism. Laboratory study of representative metamorphic rocks and suites of rocks selected to illustrate topics discussed in lectures.

239. Structural Petrology of Deformed Rocks. Discussion, three hours; laboratory, three hours. Prerequisites: courses 51B, 112. Recommended: courses 245A-245B, 249. Use of universal stage. Microscopic study of textures, structures, and preferred orientations of minerals in tectonites. Deformation mechanisms in crystals and aggregates. Theories of development of preferred orientation. Application of experimental data to interpretation of microfabrics. (Alternates yearly with course 249.) Mr. Christie (F)

240. Space Plasma Physics. Lecture, three hours. Prerequisite: course 203 or Physics 210A. Physics of plasmas in space, including treatments based on magnetohydrodynamics and kinetic theory. Applications to solar or planetary winds; steady-state magnetospheres; magnetospheric convection; substorm processes; magnetic merging; field-aligned currents and magnetosphere/ionosphere coupling; ring current dynamics; and wave particle instabilities.

Mr. Coleman (Sp)

241. Sedimentary Petrology. Lecture, two hours; laboratory, six hours. Prerequisites: courses 51B, 103B. Texture, composition, structure, and modes of origin of sedimentary rocks. Content varies from year to year.

242. Sandstone Petrology. Lecture, two hours; laboratory, four hours. Prerequisite or corequisite: course 141. Petrographic study of sandstones, with emphasis on provenance, petrofacies, and paleotectonic reconstructions.

244. Tectonics of Sedimentary Basins. Lecture, two hours; discussion, two hours; field trips. Prerequisites: courses 103B, 119. Recommended: course 141. Plate-tectonic settings of sedimentary basins. Basin analysis, stratigraphy, paleoenvironments, sedimentology, and related subjects in context of plate-tectonic controls on basin evolution.

245A-245B. Stress and Deformation. Lecture, three hours. Prerequisites: Physics 8A, 8B, Mathematics 32A, and 32B, or consent of instructor. Recommended: Mathematics 33A. Scalars, vectors, tensors; subscript notation; rotation and inversion of axes, transformation matrix; stress; finite homogeneous strain, rotation; infinitesimal strain, strain rate; Mohr's circle construction and other graphical methods; flow laws.

246. Stress in the Lithosphere. Lecture, three hours. Prerequisite: course 202 or 245A or Civil Engineering 108 or consent of instructor. Overcoring, hydrofracture, fault plane solutions, seismic stress drops; effects of erosion, cooling, Earth ellipticity, topography, and density anomalies. State of stress in plate boundaries and interiors. Application of finite element and analytic methods to stress determination. Mr. Bird (Sp)

247. Glaciology. Lecture, three hours. Prerequisite: course 245A or equivalent or consent of instructor. Occurrence and classification of glaciers; accumulation and ablation; glacier budget; mechanical properties of ice; glacier flow; crevasses; textural and structural features; thermal relationships; bed slip; climatic response; catastrophic advances.

248. Advanced Structural Geology. Lecture, three hours; discussion, two hours. Prerequisite: course 111. Principles governing fracture, folding, and flow of rocks; solutions of structural problems at various scales; regional tectonic problems.

249. Structural Analysis of Deformed Rocks. Discussion, three hours; laboratory, three hours. Prerequisites: courses 111 and 112, or consent of instructor. Recommended: course 248. Geometrical analysis of megascopic structures in terranes with complex or multiple deformations. Analysis of strain from deformed primary features. Interpretation of structural history in metamorphic terranes. (Alternates yearly with course 239.)

250. Advanced Engineering and Environmental Geology. Lecture, three hours; required field trips. Prerequisite: course 139 or consent of instructor. Current topics in engineering and environmental geology, including slope stability, hazardous waste disposal, grading codes, slip rates and recurrence intervals of active faults, computer and remote sensing applications, and case histories. Offered irregularly according to demand.

251. Seminar: Mineralogy. Lecture, three hours. Examination of groups of rock-forming minerals (e.g., feldspars), integrating such aspects as crystal structure, crystal chemistry, phase equilibria, and petrogenesis.

252. Seminar: Geochemistry. Lecture, two hours; discussion, two hours. Phase equilibria under crustal conditions, chemistry of ocean waters, recent and ancient sediments, structure and chemistry of upper mantle, geochronology, cosmochronology, and cosmochemistry. Mr. Kaplan (W)

253. Seminar: Petrology. Lecture, three hours. Problems of igneous or metamorphic petrology: methods of evaluating physical conditions of metamorphism; diffusion in mineralogical systems; origin of ultramafic rocks and problems of the mantle; element fractionation among coexisting phases; other current subjects in the field. S/U or letter grading.

Mr. Harrison, Mr. Manning (W,Sp)

254. Seminar: Sedimentology. Lecture, three hours. Processes of sediment transport and deposition; deep sea sediments; deltas and estuaries; petrology of carbonates, sandstones, and lutites; stratigraphy; paleoenvironmental studies.

255. Seminar: Structural Geology and Tectonics. Lecture, three hours. Flow and fracture in Earth's crust from microscopic to continental scale and in experiments. Examples may include metamorphic terranes, glaciers, plutons, volcanoes, and consolidated or unconsolidated sediments. Modern concepts of oceanic basins; processes leading to segregation of continental-type rocks. Mr. Christie (F)

256. Seminar: Glaciology and Geomorphology. Lecture, three hours. Glacier physics, theoretical geomorphology, river mechanics, statistical models.

257. Seminar: Paleontology. Lecture/discussion, three hours. Prerequisite: consent of instructor. Advanced topics in paleobiology, biostratigraphy, paleoecology, and paleobiogeography, with emphasis on relations to other disciplines.

Mr. Marshall, Mr. Schopf (F,W)

258. Seminar: Mineral Deposits. Lecture, three hours. Problems of distribution, composition, and formation of mineral deposits; mineral economics; investigations of opaque minerals by microscopic or other techniques.

259. Seminar: Paleotectonics. Lecture, two hours; discussion, two hours. Prerequisite: course 244 or consent of instructor. Basin evolution and paleogeography, with emphasis on the Phanerozoic of the Western U.S. Mr. Ingersoll (Sp)

260. Seminar: Advanced Topics in Geology (2 to 4 units). Topics vary. May be repeated for credit.

261. Topics in Magnetospheric Plasma Physics. Lectures, discussions, and exercises on specific advanced topics in magnetospheric plasma physics. Previous courses examined magnetic storms, magnetospheric substorms, ultralow frequency waves, and adiabatic particle motion in Earth's radiation belts.

Mr. McPherron (W)

265. Instrumentation, Data Processing, and Data Analysis in Space Physics. Lecture, three hours. Principles, testing, and operations of magnetometers and other instruments. Data processing, display, and archiving. Time-series analysis techniques, including filtering. Fourier series, eigenanalysis, and power spectra.

268. Seminar: Resource Analysis. Lecture, three hours. Prerequisite: consent of instructor. Geological, geophysical, economic, and technological factors in studies of optimum use of mineral and energy resources. Emphasis on different mineral or energy sources from time to time.

M270A-M270B-M270C. Seminars: Climate Dynamics (2 to 4 units each). (Same as Atmospheric Sciences M272A-M272B-M272C and Geography M270A-M270B-M270C.) Lecture, two hours. Prerequisite: consent of instructor. Archaeological, geochemical, micropaleontological, and stratigraphic evidence for climate change throughout the geological past. Rheology and dynamics of climatic subsystems: atmosphere and oceans, ice sheets and marine ice, lithosphere and mantle. Climate of other planets. Modeling, simulation, and prediction of modern climate on monthly, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading.

282. Seminar: Geophysics. Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Seismology, geophysical prospecting, electromagnetic prospecting. Selected topics in Earth physics. Content varies from year to year. May be repeated for credit.

M285. Origin and Evolution of Solar System. (Same as Astronomy M285.) Dynamical problems of solar system; chemical evidences from geochemistry, meteorites, and solar atmosphere; nucleosynthesis; solar origin, evolution, and termination; solar nebula, hydromagnetic processes, formation of planets and satellite systems. Content varies from year to year. May be repeated for credit. S/U grading.

286A-286B-286C. Seminars: Planetology (2 units each). Problems of current interest concerning moon, planets, and meteorites. May be repeated for credit. S/U grading.

287A-287B-287C. Seminars: Seismology and Earth's interior (2 units each). Problems of current interest in seismology and Earth's interior. May be repeated for credit. S/U grading.

M288A-M288B-M288C. Seminars: Space Physics (2 units each). (Formerly numbered 288A-288B-288C.) (Same as Atmospheric Sciences M275A-M275B-M275C.) Lecture, one hour. Problems of current interest concerning particles and fields in space. May be repeated for credit. S/U grading.

289A-289B-289C. Seminars: Fluid Dynamics (2 units each). Problems of current interest in fluid dynamics, with emphasis on geophysical applications. May be repeated for credit. S/U grading.

290. Seminar: Time-Series Analysis (2 units). Discussion, three hours. Discussion of recent research in spectral estimation, filtering, and signal detection applied to geophysical problems. S/U grading.

Mr. Jackson (Sp)

297. Advanced Techniques in Geological Research (2 to 4 units). S/U grading.

Mr. Jones, Mr. Runnegar (W)

298. Advanced Topics in Earth and Space Sciences (2 to 4 units). (W,Sp)

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study and/or Research (2 to 12 units). May be repeated. S/U or letter grading.

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units). S/U grading.

598. M.S. Research and Thesis Preparation (2 to 12 units). May be repeated. S/U grading.

599. Ph.D. Research and Dissertation Preparation (2 to 12 units). S/U grading.

East Asian Languages and Cultures

290 Royce Hall, (310) 206-8235

Professors

Robert E. Buswell, Ph.D. (Chinese)

Leo Ou-fan Lee, Ph.D. (Chinese)

Peter H. Lee, Ph.D. (Korean), Chair

Herbert E. Plutschow, Ph.D. (Japanese)

Hartmut E. F. Scharfe, Ph.D. (Sanskrit)

Richard E. Strassberg, Ph.D. (Chinese)

Kenneth K. S. Chen, Ph.D., Emeritus

Robert C. Epp, Ph.D., Emeritus

Kan Lao, B.A., Emeritus

Richard C. Rudolph, Ph.D., Emeritus

Associate Professors

Noriko Akatsuka, Ph.D. (Japanese)

Hung-hsiang Chou, Ph.D. (Chinese)

Shirleen S. Wong, Ph.D. (Chinese)

Ben Befu, Ph.D., Emeritus

Assistant Professors

William M. Bodiford, Ph.D. (Japanese)

John B. Duncan, Ph.D. (Korean)

Shoichi Iwasaki, Ph.D. (Japanese)

Kyu-hyun Kim, Ph.D. (Korean)

Leslie Pincus, Ph.D. (Japanese)

C. P. Haun Saussy, Ph.D. (Chinese)

Lecturers

Sung-Ock Sohn, Ph.D. (Korean)

Kuo-ming Sung, M.Phil. (Chinese)

Yihua Wang, M.A. (Chinese; Luckman

Distinguished Teaching Award)

Y.C. Chu, M.A., Emeritus

Kuo-yi Pao (Unensečen), M.A., M.S., Emeritus

Scope and Objectives

The Department of East Asian Languages and Cultures aims to provide students with an exposure to the rich cultural heritage of China, Japan, Korea, and India. This is accomplished through courses in language, literature, religion, thought, archaeology, and other aspects of culture. For undergraduates the department offers a program leading to the B.A. degree in Chinese or Japanese, in which the emphasis is on the language and culture of China or Japan. The language program aims to develop the four skills of speaking, aural comprehension, reading, and writing in a balanced and mutually supportive manner.

At the graduate level, the department offers a program leading to an M.A. degree in several fields of East Asian culture. The program aims to give students a solid mastery of these fields preparatory to careers in teaching or in areas such as journalism, business, banking, or government service. The Ph.D. program, which is very selective, trains research scholars for academic careers in specialized fields.

Classes for Nonmajors

The department offers the following courses in which knowledge of Asian languages is not required: Chinese 50, 150, 151, 160, 175, 180, 190A-190B, East Asian Languages and Cultures 60, 162, Indic 175, Japanese 90, 150, 151, 160, 175, Korean 150, 151, 160, 175.

Buddhist Courses

The department also offers the following courses in Buddhism: Chinese 160, 165, 265A-265B, East Asian Languages and Cultures 60, 162, 265A-265B, 270A-270B, Japanese 160, 265A-265B, Korean 160, 165, 265A-265B.

Bachelor of Arts in Chinese

Preparation for the Major

Required: Chinese 1, 2, 3, 4, 5, 6, 50, History 9C, and 11A or 11B. *Recommended:* Anthropology 9, Chinese 110A, and English 4.

The Major

Required: A total of 11½ courses, of which seven must be upper division language courses, including at least two vernacular language courses from Chinese 100A, 100B, 100C, 101A, 101B, 101C, 145A, 145B, and at least four classical language courses from 110A, 110B, 110C, 140A, 140B, 140C, 143A, 143B, 165.

The remaining four and one-half required courses must include Chinese 150 or 151; one course from 160, 175, 190A, 190B; East Asian Languages and Cultures 199 (at least two units in the senior year); Art History C115D, C115E, or C115F; and either History 182A, 182B, 183A, 183B, or 184.

English 95A, 95B, 95C, and additional courses in Chinese history are recommended. Students planning to undertake graduate study are urged to include in their undergraduate program additional courses in classical Chinese and beginning courses in Japanese or Korean. Those planning to undertake advanced graduate study are urged to gain a reading knowledge of French or German.

Bachelor of Arts in Japanese

Preparation for the Major

Required: Japanese 1, 2, 3, 4, 5, 6, 50, History 9C, and 11A or 11B. *Recommended:* Anthropology 9 and English 4.

The Major

Required: A total of 12½ courses, of which seven must be upper division language courses selected from Japanese 100A, 100B, 100C, 130, 131, 140, 141, 142, 149. The seven courses must include 100B and 130 or 131.

The remaining five and one-half required courses must include Japanese 120 or CM122 or CM123; 150 or 151; one course from 160 or 175; East Asian Languages and Cultures 199 (at least two units in the senior year); Art History 114C; and either History 187A, 187B, or 187C.

English 95A, 95B, 95C, and additional courses in Japanese history are recommended. Students planning to undertake graduate study are urged to include in their undergraduate program three courses in classical Japanese and beginning courses in Chinese or Korean. Those planning to undertake advanced graduate study are urged to gain a reading knowledge of French or German.

Master of Arts Degree

Admission

To qualify for admission you are expected to (1) meet general University requirements for the undergraduate major, (2) have taken a minimum of three quarter courses or the equivalent in classical Chinese (for Chinese majors), classical Jap-

anese (for Japanese majors), or a minimum of three years of modern Korean (for Korean majors), and (3) present a B.A. degree from a Department of East Asian Languages and Cultures similar to UCLA's. Applicants with a B.A. in another field or from departments whose requirements are less rigorous are admitted to the Department of East Asian Languages and Cultures (290 Royce Hall, UCLA, Los Angeles, CA 90024-1540) only if they can meet the requisite standards within one year. Selection is based on (1) prior scholastic performance, (2) recommendations by professors, (3) score on the Graduate Record Examination (GRE), (4) statement of purpose focusing on research interests, and (5) an undergraduate term paper or comparable writing sample in English.

Major Fields or Subdisciplines

M.A. students may specialize in Chinese language and culture, Japanese language and culture, or Korean language and culture. A comparative or interdisciplinary field may be incorporated into an area of specialization.

Language Requirements

Students majoring in Chinese must have completed one year of Japanese or Korean with a grade of S or better; those majoring in Japanese must have completed one year of classical or modern Chinese or Korean with a grade of S or better; those majoring in Korean must have completed one year of Chinese or Japanese with a grade of S or better. This requirement may be fulfilled before admission to the M.A. program.

Course Requirements

Nine courses (36 units) are required for the degree, of which six (24 units) must be graduate courses. Chinese 200 is required for the Chinese major; Japanese 200 is required for the Japanese major; Korean 200 is required for the Korean major. With departmental consent, up to two courses (eight units) taken outside the department (S/U grading is acceptable) may be applied toward the nine courses. No more than two 500-series courses (four units) may be applied toward the nine courses required for the degree; only one 500-series course may be applied toward the minimum graduate course requirement. Courses taken to meet admission standards and language requirements may not be applied toward the total course requirement. You must take at least one seminar in each of your comprehensive examination fields.

International students may also be required to take English as a Second Language 33A, 33B, 33C, 34, 36, or other ESL courses.

Thesis Plan

This plan is recommended if you intend to proceed to the Ph.D. After completing at least one year of graduate work with excellence, you may petition the department to present a thesis; you also must have a letter of support from

a faculty member agreeing to serve as your thesis director. After your committee accepts your thesis, you must take an oral examination related to it and a translation examination in your area of specialization.

Comprehensive Examination Plan

Comprehensive examinations are offered in the literature and cultural history of China, Japan, or Korea. You are required to take an examination in each of three fields within your area of specialization, including one in a literature field. In consultation with your graduate adviser, you may replace one field with an outside field either within the department or in another department.

For the major in Chinese, you must take comprehensive examinations in three of the following fields: (1) modern Chinese literature, (2) traditional Chinese fiction and drama, (3) traditional Chinese poetry, (4) Chinese civilization or archaeology, (5) Chinese Buddhism.

For the major in Japanese, you must take comprehensive examinations in three of the following fields: (1) classical Japanese literature (poetry and prose), (2) classical Japanese culture and folklore, (3) modern Japanese literature and culture, (4) Japanese Buddhism, (5) Japanese linguistics.

For the major in Korean, you must take comprehensive examinations in three of the following fields: (1) Korean culture, (2) Korean Buddhism, (3) classical Korean poetry, (4) classical Korean fiction, (5) modern Korean literature.

You must also take a translation examination in your area of specialization, and you are required to present two seminar research papers. The results of the examinations and the quality of the papers determine whether you are admitted to the Ph.D. program.

Ph.D. Degree

Admission

An M.A. degree in the field or in a related field is required. Selection among qualified applicants from outside the department is based on (1) prior scholastic performance, (2) three letters of recommendation, (3) score on the Graduate Record Examination (GRE), (4) statement of purpose focusing on research interests, and (5) a recent research paper in English. Students with an M.A. in the department are judged on their M.A. record.

International students are encouraged to complete an M.A. in the department before proceeding to the Ph.D. program.

Major Fields or Subdisciplines

The department emphasizes four major fields at the Ph.D. level: (1) Chinese language and literature with the subdisciplines of poetry, drama, fiction, and modern literature; (2) Japanese language and literature with the subdisciplines of ancient, medieval, early modern, and modern literature; (3) Korean language and literature

with the subdisciplines of culture, Buddhism, classical poetry and fiction, and modern literature; (4) Buddhist studies with the subdisciplines of Chinese Buddhism, Japanese Buddhism, and Korean Buddhism. A comparative or interdisciplinary field may be incorporated into an area of specialization. In addition, a program in ancient Chinese civilization or Japanese linguistics may be arranged by petition.

Foreign Language Requirement

You must demonstrate reading knowledge of French or German by passing (1) a reading examination administered by the department's foreign language examination committee, (2) the Graduate School Foreign Language Test (GSFLT) with a score of 500 or better, or (3) a level five course with a grade of B or better or S. With the consent of the department, Russian may be substituted.

Course Requirements

Students entering the program with an M.A. in a different field, or in the same field but from another institution, must meet the standards of the department's M.A. coursework in addition to fulfilling Ph.D. course requirements. A minimum of five graduate courses (not including courses taken to meet the language requirements listed below) beyond the M.A. degree is required. In addition, students majoring in Chinese must take three years of modern Japanese; those majoring in Japanese must take three years of modern Chinese or modern Korean, or two years of classical Chinese; those majoring in Korean must take three years of modern Japanese or two years of classical Chinese. Those majoring in Buddhist studies are encouraged to take appropriate courses in Sanskrit and/or Pali. A grade of B or better or S is required for all language courses.

Qualifying Examinations

You must take written examinations as follows:

For the major in Chinese literature — (1) a general examination in Chinese literature covering modern Chinese literature, traditional fiction and drama, and traditional Chinese poetry; (2) examinations in three approved fields to be selected from at least two of the following groups: (a) Chinese poetry, Chinese fiction and drama, modern Chinese literature, (b) ancient Chinese civilization, Chinese Buddhism or another field of Chinese thought or religion, (c) an outside field from within the department, (d) a field offered in another department or interdepartmental program.

For the major in Japanese literature — (1) a general examination in Japanese literature; (2) examinations in two of the following approved fields (which cannot be from the same group): (a) ancient, medieval, early modern, or modern Japanese literature, (b) Japanese Buddhism, another field of Japanese thought or religion, or Japanese linguistics, (c) Chinese or Korean literature, (d) a field offered in another department or interdepartmental program.

For the major in Korean literature — (1) a general examination in Korean literature; (2) examinations in three approved fields to be selected from at least two of the following groups: (a) Korean poetry, Korean fiction, modern Korean literature, (b) Korean Buddhism, Korean thought, (c) Chinese or Japanese literature, (d) a field offered in another department or interdepartmental program.

For the major in Buddhist studies — (1) a general examination in your major field; (2) an examination in an approved subfield within your major field; (3) a general examination in another approved field inside or outside the department.

For the major in ancient Chinese civilization or Japanese linguistics — (1) an examination in your major language area; (2) a general examination in your major field; (3) an examination in an approved subfield within your major field; (4) a general examination in another approved field inside or outside the department.

The written qualifying examinations must be taken within a four-week period after satisfying all language and course requirements. With consent of the department, you may repeat the qualifying examinations once only. You must also take a translation examination in your area of specialization.

After successful completion of the written examinations, the department appoints a doctoral committee whose chair serves as your dissertation adviser. Preferably within six months, but no more than a year after your written examinations, you must pass the University Oral Qualifying Examination on the dissertation proposal. With department consent, you may repeat the examination once.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Dissertation/Final Oral Examination

Within three years after you have advanced to candidacy, you must present a dissertation embodying the results of independent investigation. If you fail to meet the five-year time limit for the completion of the dissertation, you are required to take the written qualifying examinations again.

A final oral defense of the dissertation is optional at the discretion of the doctoral committee.

Chinese

Lower Division Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition.

1. Elementary Modern Chinese. (Formerly numbered East Asian Languages 1A.) Lecture, two hours; discussion, three hours. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Introduction to fundamentals of standard Chinese, including pronunciation, grammar, and Chinese characters, with emphasis on all four basic language skills — speaking, listening comprehension, reading, and writing.

Ms. Wang

2. Elementary Modern Chinese. (Formerly numbered East Asian Languages 1B.) Lecture, two hours; discussion, three hours. Continuation of course 1.

Ms. Wang

3. Elementary Modern Chinese. (Formerly numbered East Asian Languages 1C.) Lecture, two hours; discussion, three hours. Continuation of course 2.

Ms. Wang

4. Intermediate Modern Chinese. (Formerly numbered East Asian Languages 11A.) Lecture, two hours; discussion, three hours. Prerequisite: course 3 or consent of instructor. Designed to strengthen communicative skills of listening, speaking, reading, and writing. Grammar reviews, knowledge of idiomatic expressions, and both traditional and simplified characters.

5. Intermediate Modern Chinese. (Formerly numbered East Asian Languages 11B.) Lecture, two hours; discussion, three hours. Prerequisite: course 4 or consent of instructor. Continuation of course 4.

6. Intermediate Modern Chinese. (Formerly numbered East Asian Languages 11C.) Lecture, two hours; discussion, three hours. Prerequisite: course 5 or consent of instructor. Continuation of course 5.

50. Chinese Civilization. (Formerly numbered East Asian Languages 40A.) Lecture, three hours. Knowledge of Chinese not required. Survey of development of outstanding aspects of Chinese culture from prehistoric to modern times.

Mr. Chou

Upper Division Courses

100A-100B-100C. Advanced Modern Chinese. (Formerly numbered East Asian Languages 121A-121B-121C.) Lecture, three hours. Prerequisite: course 6 or consent of instructor. Materials selected from contemporary Chinese publications, with emphasis on social sciences. Texts analyzed for their linguistic features and social and cultural background. Readings, compositions, informal debates on topical issues, and oral presentations.

Ms. Wang

101A-101B-101C. Readings in Modern Expository Chinese. (Formerly numbered East Asian Languages 124A-124B-124C.) Lecture, three hours. Prerequisite: course 100C or consent of instructor. Selected readings in modern essays taken from literary texts. In addition, students work with material in the area of their professional interests.

110A-110B-110C. Introduction to Classical Chinese. (Formerly numbered East Asian Languages 113A-113B-113C.) Lecture, three hours. Prerequisite: course 3 or consent of instructor. Grammar and readings in selected texts.

Ms. Wong

120. Introduction to Chinese Linguistics. Lecture, three hours. Prerequisite: course 6 or consent of instructor. Discussion of issues of Chinese phonology, morphology, and syntax. Case studies of seemingly idiosyncratic properties of Chinese in light of current theory of universal grammar.

Mr. Sung (F,W)

130A-130B. Readings in Modern Chinese Literature. (Formerly numbered East Asian Languages 122A-122B.) Lecture, three hours. Prerequisite: course 100B or consent of instructor. Readings and discussion of works of modern Chinese literature.

Mr. L. Lee

139. Post-1949 Chinese Literature. (Formerly numbered East Asian Languages 126.) Lecture, three hours. Prerequisite: course 100B or consent of instructor. Reading and discussion of selected works in contemporary poetry, drama, and fiction, with emphasis on People's Republic of China.

Mr. L. Lee

140A-140B-140C. Readings in Chinese Literary Texts. (Formerly numbered East Asian Languages 163A-163B-163C.) Lecture, three hours. Prerequisite: course 110C.

143A-143B. Readings in Classical Chinese Poetry. (Formerly numbered East Asian Languages 152A-152B.) Lecture, three hours. Prerequisite: course 110C or consent of instructor. Discussion and collateral reading of representative works selected on basis of such critical concerns as thematic patterns, image clusters, genres, and characteristics of major poets.

Ms. Wong

145A-145B. Readings in Traditional Chinese Fiction. (Formerly numbered East Asian Languages 151A-151B.) Lecture, three hours. Prerequisite: course 110C or equivalent or consent of instructor. Selected readings from classic Chinese novels. Designed primarily as a language course; emphasis on translation and obtaining a command of various literary styles, as well as on critical interpretation of the texts.

Mr. Strassberg

150. Chinese Literature in Translation: Classical Literature. (Formerly numbered 150, 151.) Lecture, three hours. Prerequisite: English 3 or one course from Humanities 1A, 1B, 1C, 1D, 2A, 2B, 2C. Readings from English translations of masterpieces of the Chinese literary tradition, including most major genres (historical narrative, fiction, *shih* and *tz'u* poetry, drama, folk poetry, expository prose).

Mr. Saussy

151. Chinese Literature in Translation: Modern Literature. (Formerly numbered 152.) Lecture, three hours. Prerequisite: English 3 or one course from Humanities 1A, 1B, 1C, 1D, 2A, 2B, 2C. Knowledge of Chinese not required. Lectures and reading of representative works from 1900 to the present in English translation.

Mr. L. Lee

160. Chinese Buddhism. (Formerly numbered East Asian Languages 173.) Lecture, three hours. Knowledge of Asian languages not required. Introduction and development of Buddhism in China, interaction between Buddhism and Chinese culture, rise of Chinese schools of Buddhism such as Pure Land and Zen, contributions to Chinese culture.

Mr. Buswell

165. Introduction to Chinese Buddhist Texts. (Formerly numbered East Asian Languages 139.) Lecture, three hours. Prerequisite: course 100A or 110C or Korean 100A or Japanese 100A. Readings in Buddhist texts written in literary Chinese and taken from translated Indian sutras, indigenous exegetical materials, Chinese apocryphal scriptures, and Ch'an writings. Problems in translation from Indo-European languages into Chinese; evolution of Chinese Buddhist terminology. Coverage varies. May be repeated for credit with consent of instructor.

Mr. Buswell

170. Readings in Chinese Philosophical Texts. (Formerly numbered 275.) Lecture, three hours. Prerequisite: course 110C or consent of instructor. May be repeated for credit with consent of instructor.

Mr. Strassberg

175. Introduction to Chinese Thought. (Formerly numbered East Asian Languages 183.) Lecture, three hours. Knowledge of Asian languages not required. General survey of indigenous Chinese thought from Chou period to circa 1800, covering Confucianism, Taoism, Mo-tzu, legalists, influence of Buddhism, development of neo-Taoism and neo-Confucianism.

190A-190B. Archaeology in Early and Modern China. (Formerly numbered East Asian Languages 170A-170B.) Lecture, three hours:

190A. Introduction to Chinese Archaeology. Early Chinese study of their own past, types of artifacts, antiquarianism, and beginnings of scientific archaeology in China before 1949.

Mr. Chou

190B. Archaeology in People's Republic of China. Survey of major excavations of sites of all periods, carried out under the intensive archaeological program of the PRC, and interpretation of archaeological findings.

Mr. Chou

195. Chinese Etymology and Calligraphy. (Formerly numbered East Asian Languages 188.) Lecture, three hours. Prerequisite: one year of classical Chinese or consent of instructor. Covers (1) development of the Chinese writing system from the "Pottery Inscriptions" 6,000 years ago to modern "Simplified Forms" and the studies of Six Scripts principles which were used to form Chinese characters and (2) aesthetic training of calligraphic art and its appreciation, with focus on ways of recognizing and interpreting the "Cursive Style," a common form of handwriting.

Mr. Chou

Graduate Courses

200. Bibliography and Methods of Research in Chinese. (Formerly numbered East Asian Languages 295.) Required of all graduate students in Chinese. Lectures and discussion on research methodologies for dealing with traditional Chinese materials, with emphasis on bibliography training (including most up-to-date indexes in Chinese studies), punctuation practice, knowledge of textual criticism, and rare book editions.

Mr. Chou

M201. China — Seminar: Classical Historiography and Readings in Classical Studies. (Same as History M201L.) Seminar, three hours. Prerequisite: two years of classical Chinese or working knowledge of classical Chinese. Readings in late Imperial Civil Service Examination essays.

230A-230B. Seminars: Selected Topics in Modern Chinese Literature (2 units each). (Formerly numbered East Asian Languages 251.) Lecture, three hours. Prerequisite: consent of instructor. Selected readings in 20th-century Chinese literature, emphasizing fiction. Discussion of individual research projects. May be repeated for credit. In Progress grading.

Mr. L. Lee

231A-231B. Modern Chinese Literary History (2 units each). Lecture, three hours. Prerequisite: graduate standing. Discussion of history of modern Chinese literature, focusing on sources, controversies, major literary genres, and critical approaches to studying the relationship between literature and history. In Progress grading.

Mr. L. Lee

240A-240B. Advanced Chinese Classics (2 units each). (Formerly numbered East Asian Languages 240.) Lecture, three hours. Reading and discussion of selected works in classical Chinese, including various types of literary prose and historical narratives, with attention to stylistic features and historical development. May be repeated for credit with consent of instructor. In Progress grading.

Ms. Wong

243A-243B. Seminars: Classical Chinese Poetry, ca. 400-600 (2 units each). (Formerly numbered 243A.) Lecture, three hours. Prerequisites: courses 143A and/or 143B, or consent of instructor. Chinese poetry from the *Shih-ching* phase to the 6th century, with emphasis on evolution of the lyric form during the Southern dynasties (ca. 400-600). May be repeated for credit. In Progress grading.

Mr. Saussy, Ms. Wong

244A-244B. Seminars: Classical Chinese Poetry, ca. 600-900 (2 units each). (Formerly numbered 243B.) Lecture, three hours. Prerequisites: courses 143A and/or 143B, or consent of instructor. Development of *shih* and *tz'u* from T'ang period (ca. 600-900) and onward; traditional and modern critical approaches to classical Chinese poetry. In Progress grading.

Ms. Wong

245A-245B. Seminars: Traditional Chinese Narrative and Drama (2 units each). (Formerly numbered East Asian Languages 244.) Lecture, three hours. Prerequisite: reading knowledge of colloquial and literary Chinese. Seminar topics alternate yearly between traditional narrative and drama, with emphasis on generic, hermeneutical, and historical approaches. Topics in narrative selected from genres from Chou through Ch'ing periods. Topics in drama selected from *tsa-chü* and *ch'uan-ch'i*. May be repeated for credit with consent of instructor. In Progress grading.

Mr. Strassberg

265A-265B. Chinese Buddhist Texts (2 units each). (Formerly numbered East Asian Languages 213.) Lecture, three hours. May be repeated for credit with consent of instructor. In Progress grading.

Mr. Buswell

290A-290B. Seminars: Selected Topics in Chinese Archaeology (2 units each). (Formerly numbered East Asian Languages 270.) Lecture, three hours. Prerequisite: course 190A or 190B or consent of instructor. Discussion and research on major problems about Chinese archaeology and different interpretations to the most important archaeological finds, with emphasis on studies of the Xia and Shang cultures and Xia and Shang dynasties. May be repeated for credit. In Progress grading.

Mr. Chou

295A-295B. Seminars: Selected Topics in Chinese Cultural History (2 units each). (Formerly numbered East Asian Languages 275.) Lecture, three hours. Prerequisite: consent of instructor. Discussion and research on major problems related to Chinese culture, such as beginnings of the Chinese civilization and Chinese dynastic history. Other topics include cultural developments of ancient and medieval China. May be repeated for credit. In Progress grading.

Mr. Chou

East Asian Languages and Cultures

Lower Division Course

60. Introduction to Buddhism. (Formerly numbered 41.) Lecture, three hours. Knowledge of Asian languages not required. General survey of development of Buddhism in India, focusing on those religious doctrines and meditative practices most essential to various Asian traditions of the religion.

Mr. Buswell

Upper Division Courses

162. Buddhist Meditation Traditions. (Formerly numbered 171.) Lecture, three hours. Knowledge of Asian languages not required. Survey of theory and practice of meditation in Buddhism, with emphasis on Theravada and Zen schools. Topics include various typologies of meditation, symbiotic relationship between meditation and soteriology, and processes by which doctrinal innovation prompts changes in meditative praxis.

Mr. Buswell

199. Special Studies in East Asian Languages and Cultures (2 to 4 units). Prerequisites: senior standing in department or advanced reading knowledge of Chinese or Japanese, consent of instructor. Required of senior majors. Special individual study. May be repeated once with consent of instructor.

Graduate Courses

230A-230B. Theoretical Topics in East Asian Literature (2 units each). Lecture, three hours. Prerequisite: reading knowledge of at least one East Asian language. Concerns of literary theory which are brought to the fore by the reading of literature from or about East Asia. Readings from both Western and Eastern theorists; issues of translation, comparison, and categorization. In Progress grading.

Mr. Saussy

240A-240B. Seminars: Topics in East Asian Literary History (2 units each). (Formerly numbered 279.) Lecture, three hours. Prerequisite: reading knowledge of at least one East Asian language. Critical issues common to literary historiography in East Asia, including periodization, canon, ideology, interaction between high and low culture, the written and the oral, etc. In Progress grading.

Mr. P. Lee

245A-245B. Position of Modernity in East Asian Literature (2 units each). Lecture, three hours. Prerequisites: graduate standing, at least five years of an East Asian language. Course 245A concerned with conceptual architecture and archaeology of modernity, with readings largely from European sources. In-class debate probes relevance of these readings for work as Asianists. Focus on Asian writings in course 245B. In Progress grading.

Mr. L. Lee, Mr. Saussy

265A-265B. Seminars: Selected Topics in Buddhist Studies (2 units each). (Formerly numbered 255.) Lecture, three hours. Coverage varies. May be repeated for credit. In Progress grading.

Mr. Buswell

270A-270B. Selected Topics in Buddhist Culture (2 units each). (Formerly numbered 285.) Lecture, three hours. May be repeated for credit with consent of instructor. In Progress grading.

299A-299B. Independent Study (2 units each). (Formerly numbered 299.) Lecture, three hours. Prerequisite: graduate standing. Guided research and writing of a research paper. May be repeated, but only four units may be applied toward M.A. degree. May not be applied toward Ph.D. degree. In Progress grading.

(F,W,Sp)

301. Teaching an East Asian Language as a Foreign Language.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Studies (2 to 4 units). S/U grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (4 to 8 units). S/U grading.

598. Research for and Preparation of M.A. Thesis (4 to 8 units). Prerequisite: consent of instructor. Maximum of eight units may be applied toward M.A. degree requirements. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (4 to 8 units). S/U grading.

Indic

Upper Division Courses

110A. Elementary Sanskrit. (Formerly numbered East Asian Languages 160.) Lecture, three hours. Introduction to script and grammar, with reading exercises and attention to significance of Sanskrit for the understanding of other Indo-European languages.

Mr. Scharfe

110B. Intermediate Sanskrit. (Formerly numbered East Asian Languages 161.) Lecture, three hours. Prerequisite: course 110A or equivalent. Advanced aspects of grammar and reading of literary texts.

Mr. Scharfe

110C. Advanced Sanskrit. (Formerly numbered East Asian Languages 162.) Lecture, three hours. Prerequisite: course 110B or equivalent. Reading of entire *Bhagavadgita* or comparable amount of other Sanskrit literature.

Mr. Scharfe

115. Readings in Sanskrit. (Formerly numbered East Asian Languages 165.) Lecture, three hours. Prerequisite: course 110C or equivalent. Extensive reading in such texts as best serve students' needs.

Mr. Scharfe

175. Introduction to Indic Philosophy. (Formerly numbered East Asian Languages 167.) Lecture, three hours. Survey of main trends in Indian philosophy from ancient to modern times. Mr. Scharfe

Graduate Courses

M222A-M222B. Vedic. (Formerly numbered East Asian Languages M222A-M222B.) (Same as Iranian M222A-M222B.) Lecture, three hours. Prerequisite: knowledge of Sanskrit equivalent to course 110C. Characteristics of Vedic dialect and readings in Rig-Vedic hymns. Only course M222B may be repeated for credit. Mr. Schmidt

230. Selected Readings in Sanskrit Texts. (Formerly numbered 230A-230B.) Lecture, three hours. May be repeated for credit with consent of instructor. S/U or letter grading. Mr. Scharfe

234A-234B. Introduction to Panini's Grammar. (Formerly numbered East Asian Languages 221A-221B.) Lecture, three hours. Prerequisite: course 110C or equivalent. Reading of selected passages of the text, with introduction to Panini's technique. S/U or letter grading. Mr. Scharfe

236A-236B. Pali and Prakrits. (Formerly numbered East Asian Languages 214A-214B.) Lecture, three hours. Prerequisites: knowledge of Sanskrit equivalent to course 110B, consent of instructor. Grammatical studies and reading of texts. Comparative considerations. S/U or letter grading. **236A.** Pali; **236B.** Prakrits. Mr. Scharfe

Japanese

Lower Division Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition.

1. Elementary Modern Japanese. (Formerly numbered East Asian Languages 9A.) Lecture, two hours; discussion, three hours. Not open to students who have learned, from whatever source, enough Japanese to qualify for more advanced courses. Introduction to modern Japanese with attention to conversation, grammar, and written forms. Conversation drill based on material covered in class. Ms. Akatsuka, Mr. Iwasaki

2. Elementary Modern Japanese. (Formerly numbered East Asian Languages 9B.) Lecture, two hours; discussion, three hours. Continuation of course 1. Ms. Akatsuka, Mr. Iwasaki

3. Elementary Modern Japanese. (Formerly numbered East Asian Languages 9C.) Lecture, two hours; discussion, three hours. Continuation of course 2. Ms. Akatsuka, Mr. Iwasaki

4. Intermediate Modern Japanese. (Formerly numbered East Asian Languages 19A.) Lecture, three hours; discussion, two hours. Prerequisite: course 3. Continuation of course 3. Readings in modern Japanese, with emphasis on comprehension and structural analysis.

5. Intermediate Modern Japanese. (Formerly numbered East Asian Languages 19B.) Lecture, three hours; discussion, two hours. Prerequisite: course 3. Continuation of course 4.

6. Intermediate Modern Japanese. (Formerly numbered East Asian Languages 19C.) Lecture, three hours; discussion, two hours. Prerequisite: course 3. Continuation of course 5.

50. Japanese Civilization. (Formerly numbered East Asian Languages 40B.) Lecture, three hours. Prerequisite: consent of instructor. Knowledge of Japanese not required. Survey of development of Japanese culture and its relationship to the Asiatic mainland. Mr. Plutschow

90. The Tea Ceremony: Introduction to History of Japanese Culture in Theory and Practice. (Formerly numbered East Asian Languages 42.) Lecture, three hours. Prerequisite: consent of instructor. Limited to 40 students. History and culture of Japan as revealed through study and practice of the Tea Ceremony. Topics include Buddhism, aesthetics, calligraphy, painting, architecture, gardens, ceramics, and politics. Mr. Plutschow

Upper Division Courses

100A-100B-100C. Advanced Modern Japanese. (Formerly numbered East Asian Languages 119A-119B, 145.) Lecture, two hours; discussion, three hours (100A-100B) and one hour (100C). Prerequisite: course 6. Emphasis on comprehension, structure, and proficiency in reading, composition, and conversation in modern Japanese.

101A-101B. Advanced Readings in Modern Japanese. Lecture, two hours; discussion, 90 minutes. Prerequisite: course 100C. Advanced readings and discussion for students planning to do advanced coursework or research on Japan. Topics selected from magazines, journals, and books related to humanities and social sciences. Ms. Pincus

120. Introduction to Japanese Linguistics. (Not the same as course CM120 prior to Fall Quarter 1990.) Lecture, three hours. Prerequisite: course 3 or equivalent. Introduction to Japanese grammar and sociolinguistics through reading, discussion, and problem solving in phonology, syntax, semantics, and discourse pragmatics. Ms. Akatsuka, Mr. Iwasaki

CM122. Structure of Japanese I. (Formerly numbered CM120.) (Same as Linguistics M176A.) Lecture, three hours. Prerequisites: course 120 or equivalent or consent of instructor, two years of Japanese. Discussion of many seemingly idiosyncratic characteristics of Japanese syntax and semantics in light of word-order typology and universal grammar, often in form of a contrastive analysis of Japanese and English. Concurrently scheduled with course C222. Ms. Akatsuka

CM123. Structure of Japanese II. (Same as Linguistics M176B.) Lecture, three hours. Prerequisite: two or more years of Japanese language study or consent of instructor. Survey of Japanese language at three different levels of organization: (1) word level — word class, verbal morphology and semantics; (2) clause/sentence level — tense, aspect, modality; (3) discourse level — point of view, ellipsis, topicalization. Concurrently scheduled with course C223. Mr. Iwasaki

130. Introduction to Kawabata Yasunari. (Formerly numbered East Asian Languages 134A.) Lecture, three hours. Prerequisite: course 6. Reading and analysis of the Nobel laureate's short stories, with particular emphasis on their emotional structure.

131. Introduction to Mushakoji Saneatsu. (Formerly numbered East Asian Languages 134B.) Lecture, three hours. Prerequisite: course 6. Reading and discussion of Mushakoji's prose, fiction, and poetry.

133. Readings in Modern Japanese Texts. Lecture, three hours. Prerequisite: course 6. Designed to familiarize students with literary, journalistic, and critical texts representing late 19th- and 20th-century Japan. Text selection set by individual instructor. Mr. Plutschow and the Staff

140. Introduction to Classical Japanese: Heian Literature. (Formerly numbered East Asian Languages 129.) Lecture, three hours. Prerequisite: course 100C or consent of instructor. Introduction to literary Japanese, with readings and discussions in prose and poetry of the Heian period.

141. Readings in Medieval Japanese Literature. (Formerly numbered East Asian Languages 179A.) Lecture, three hours. Prerequisites: course 140 or consent of instructor, reading knowledge of modern and some classical Japanese. Readings in prose and poetry from the 13th to 15th century, using original texts in classical Japanese. Mr. Plutschow

142. Readings in Edo Literature. (Formerly numbered East Asian Languages 179B.) Lecture, three hours. Prerequisite: course 140. Readings and discussion in prose, poetry, and drama from 1600 to 1868.

149. Introduction to Kambun and Other Literary Styles. (Formerly numbered East Asian Languages 137.) Lecture, three hours. Prerequisite: course 141 or 142 or consent of instructor. Introduction to Kambun, the Japanese literary rendering of classical Chinese, and Sorobun, the epistolary style. Mr. Plutschow

150. Japanese Literature in Translation: Classical. (Formerly numbered East Asian Languages 141A.) Lecture, three hours. Prerequisite: English 3 or one course from Humanities 1A, 1B, 1C, 1D, 2A, 2B, 2C. Knowledge of Japanese not required. Survey of Japanese literature from the beginning to 1600, emphasizing Chinese, Buddhist, and Western influences. Mr. Plutschow

151. Japanese Literature in Translation: Modern. (Formerly numbered East Asian Languages 141B.) Lecture, three hours. Prerequisite: English 3 or one course from Humanities 1A, 1B, 1C, 1D, 2A, 2B, 2C. Knowledge of Japanese not required. Survey of Japanese literature from the 16th century to post-World War II. Ms. Pincus

160. Japanese Buddhism. (Formerly numbered East Asian Languages 174.) Lecture, three hours. Knowledge of Asian languages not required. Development of Buddhism in Japan and its influence on Japanese culture, with emphasis on the arts. Mr. Bodiford

161. Religious Life in Modern Japan. Lecture, three hours. Religious transformations accompanying rapid industrialization, urbanization, militarism, and defeat in the Pacific War, including analyses of Shinto mythology, secular positivism, Buddhist reform movements, new religions, and continuing role of traditional village/family religious rites. Mr. Bodiford (W)

175. Introduction to Japanese Thought. (Formerly numbered East Asian Languages 184.) Lecture, three hours. Knowledge of Asian languages not required. General survey of Japanese thought from early to modern times, including analyses of Shinto mythology, forms of Confucianism, ethic of bushido, National Learning School, and modern Japanese philosophers such as Nishida Kitaro and Watsuji Tetsuro. Attention also to representative types of contemporary thinking about Japanese thought, especially the question of what might qualify as recognizably "Japanese" in aesthetics, ethics, and philosophy.

M182. Japanese Folklore. (Formerly numbered East Asian Languages M136.) (Same as Folklore M182.) Lecture, three hours. Knowledge of Japanese not required. Lectures/discussions on native religious rituals (festivals) and observances of the Japanese, with special emphasis on artistic behavior. Discussion of Shinto, Shinto-Buddhist syncretism, and other non-Buddhist belief systems found in Japan. Mr. Plutschow

M196. Seminar: Comparative Japanese Law — Selected Readings (2 units). (Same as Law M519.) Designed to introduce students to a variety of Japanese-language legal materials. Reading of law review articles and other sources as time permits (e.g., selections from contracts, cases, or treatises); titles vary from term to term. Classroom work may be coordinated with outside research projects with consent of instructor.

Graduate Courses

200. Bibliography and Methods of Research in Japanese. (Formerly numbered East Asian Languages 296.) Lecture, three hours. Required of all graduate students in Japanese.

C222. Structure of Japanese I. (Formerly numbered C220.) Lecture, three hours. Prerequisites: course 120 or equivalent or consent of instructor, two years of Japanese. Discussion of many seemingly idiosyncratic characteristics of Japanese syntax and semantics in light of word-order typology and universal grammar, often in form of a contrastive analysis of Japanese and English. Concurrently scheduled with course CM122. Ms. Akatsuka

C223. Structure of Japanese II. Lecture, three hours. Prerequisite: two or more years of Japanese language study or consent of instructor. Survey of Japanese language at three different levels of organization: (1) word level — word class, verbal morphology and semantics; (2) clause/sentence level — tense, aspect, modality; (3) discourse level — point of view, ellipsis, topicalization. Concurrently scheduled with course CM123. Mr. Iwasaki

224A-224B. Seminars: Selected Topics in Japanese Discourse Linguistics (2 units each). Lecture, three hours. Prerequisite: course CM122 or equivalent. Critical reading and discussion of selected topics in Japanese discourse linguistics. May be repeated for credit with consent of instructor. In Progress grading. Ms. Akatsuka, Mr. Iwasaki

225A-225B. Seminars: Linguistic Analysis of Japanese Narratives (2 units each). (Formerly numbered East Asian Languages 223.) Lecture, three hours. Prerequisite: course CM122 or consent of instructor. Analysis of selected modern and classical Japanese narratives. Emphasis on exploration of how grammatical features such as tense, aspect, voice, and point of view are utilized to achieve desired literary effects. May be repeated for credit with consent of instructor. In Progress grading. Ms. Akatsuka

226A-226B. Survey of Functional Linguistics (2 units each). Lecture, three hours. Survey of recent empirical and theoretical research in several areas of functional linguistics, which has served as backbone for development of Japanese discourse linguistics. May be repeated for credit with consent of instructor. In Progress grading. Ms. Akatsuka

235A-235B. Seminars: Modern Japanese Fiction (2 units each). (Formerly numbered East Asian Languages 245.) Lecture, three hours. May be repeated for credit with consent of instructor. In Progress grading. Ms. Pincus

240A-240B. Seminars: Selected Topics in Japanese Literature (2 units each). (Formerly numbered East Asian Languages 252.) Lecture, three hours. May be repeated for credit. In Progress grading.

241A-241B. Japanese Classics (2 units each). (Formerly numbered East Asian Languages 242A-242B.) Lecture, three hours. Prose and poetry from early times to 1868. May be repeated for credit with consent of instructor. In Progress grading.

243A-243B. Seminars: No and Kyogen (2 units each). (Formerly numbered East Asian Languages 243.) Lecture, three hours. Prerequisite: one year of classical Japanese. Readings of selected No and Kyogen texts from Muromachi and Edo periods, as well as readings of critical writings and discussion of theories. May be repeated for credit with consent of instructor. In Progress grading.

245A-245B. Seminars: Medieval Japanese Literature (2 units each). (Formerly numbered East Asian Languages 250.) Lecture, three hours. Prerequisite: one year of classical Japanese. Selected readings in travel poetry, travel diaries, and other genres of Japanese travel literature of Heian, Kamakura, Nambokucho, and Muromachi periods. May be repeated for credit with consent of instructor. In Progress grading. Mr. Plutschow

265A-265B. Japanese Buddhist Texts (2 units each). (Formerly numbered East Asian Languages 229A-229B.) Lecture, three hours. May be repeated for credit with consent of instructor. In Progress grading. Mr. Bodiford

M270A-M270B. Graduate Seminars: Japanese Ritual Arts (2 units each). (Formerly numbered East Asian Languages M238.) (Same as Folklore M270A-M270B.) Lecture, three hours. Reading knowledge of Japanese not required. Lectures, discussions, and readings on ritual (performing) arts of Japan comprising music, dance, storytelling, viewing, purification, divination, disguise, mimicry, and competitive as well as acrobatic arts, with special emphasis on religious-magical purposes and symbolic structure of these arts. In Progress grading. Mr. Plutschow

290. Seminar: Kyoto through Classical Japanese Literature. Lecture, three hours. Prerequisite: knowledge of Japanese. Investigation of history and life of the city as seen through Japanese literature. Mr. Plutschow

Korean

Lower Division Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition.

1. Elementary Modern Korean. (Formerly numbered East Asian Languages 7A.) Lecture, two hours; discussion, three hours. Not open to students who, from whatever source, already know the language. Introduction to standard spoken Korean and Korean writing, with emphasis on conversation. Ms. Sohn

2. Elementary Modern Korean. (Formerly numbered East Asian Languages 7B.) Lecture, two hours; discussion, three hours. Continuation of course 1. Ms. Sohn

3. Elementary Modern Korean. (Formerly numbered East Asian Languages 7C.) Lecture, two hours; discussion, three hours. Continuation of course 2. Ms. Sohn

4. Intermediate Modern Korean. (Formerly numbered East Asian Languages 17A.) Lecture, two hours; discussion, three hours. Prerequisite: course 3 or equivalent. Continuation of course 3. Conversation, composition, and readings with structural analysis in modern Korean. Ms. Sohn

5. Intermediate Modern Korean. (Formerly numbered East Asian Languages 17B.) Lecture, two hours; discussion, three hours. Prerequisite: course 3 or equivalent. Continuation of course 4. Ms. Sohn

6. Intermediate Modern Korean. (Formerly numbered East Asian Languages 17C.) Lecture, two hours; discussion, three hours. Prerequisite: course 3 or equivalent. Continuation of course 5. Ms. Sohn

50. Korean Civilization. Lecture, three hours. Knowledge of Korean not required. General survey of development of Korean culture within context of political, social, and economic history. Mr. Duncan

Upper Division Courses

100A-100B-100C. Advanced Modern Korean. (Formerly numbered East Asian Languages 117A-117B.) Lecture, three hours. Prerequisite: course 6 or equivalent. Course 100A or consent of instructor is prerequisite to 100B, which is prerequisite to 100C. Continuation of course 6. Readings of modern prose and poetry, with emphasis on grammar and Sino-Korean.

101A-101B-101C. Advanced Readings in Modern Korean. Lecture, three hours. Prerequisite: course 100C or equivalent. Advanced readings and discussion for students planning to do advanced coursework or research on Korea. Topics selected from magazines, journals, and books related to humanities and social sciences.

CM120. Structure of Korean. (Formerly numbered East Asian Languages CM177.) (Same as Linguistics M177.) Lecture, three hours. Prerequisites: two years of Korean, or one year of Korean and some knowledge of linguistics. Discussion of major syntactic, semantic, and pragmatic characteristics of Korean in light of linguistic universals, with brief introduction to formation, typological features, and phonological structure of Korean. Concurrently scheduled with course C220. Ms. Sohn

150. Korean Literature in Translation: Classical. (Formerly numbered East Asian Languages 142A.) Lecture, three hours. Prerequisite: English 3 or one course from Humanities 1A, 1B, 1C, 1D, 2A, 2B, 2C. Knowledge of Korean not required. Survey of Korean literature from the beginning to the present day, with all readings from English translations. Poetry and prose to the end of the 19th century. Mr. P. Lee

151. Korean Literature in Translation: Modern. (Formerly numbered East Asian Languages 142B.) Lecture, three hours. Prerequisite: English 3 or one course from Humanities 1A, 1B, 1C, 1D, 2A, 2B, 2C. Knowledge of Korean not required. Survey of Korean literature from the beginning to the present day, with all readings from English translations. Literature of the 20th century. Mr. P. Lee

160. Korean Buddhism. (Formerly numbered East Asian Languages 175.) Lecture, three hours. Knowledge of Asian languages not required. Introduction and development of Buddhism in Korea, interactions between indigenous Korean culture and Sinitic traditions of Buddhism, Korean syntheses of imported Buddhist theological systems and meditative techniques, and independent Son (Zen) schools of Korea. Mr. Buswell

165. Introduction to Korean Buddhist Texts. (Formerly numbered East Asian Languages 138.) Lecture, three hours. Prerequisites: course 100A and/or Chinese 110C. Introduction to reading Korean Buddhist texts written in Sino-Korean and taken from indigenous doxographic materials and philosophical writings, Korean Buddhist apocryphal scriptures, native exegetical commentaries, and Son (Zen) texts. Coverage varies. Texts may be read in either Sino-Korean or literary Chinese. May be repeated with consent of instructor. Mr. Buswell

175. Introduction to Korean Thought. (Formerly numbered East Asian Languages 185.) Lecture, three hours. General survey of Korean thought from the earliest records to the 20th century, including shamanism, Taoism, Buddhism, Christianity, and neo-Confucianism. Korean traditions and those found in India, China, Japan, and the West. Mr. Duncan

176. Introduction to Korean Confucian Texts. Lecture, three hours. Prerequisite: course 100C or equivalent. Reading in Koryo and Choson texts on politics, society, and culture. Coverage varies. Texts may be read in either Sino-Korean or literary Chinese. May be repeated with consent of instructor. Mr. Duncan

180A-180B-180C. Cultural History of Korea. Lecture, three hours. Prerequisite: course 50. Examination of evolution of Korean culture and society within context of political and institutional industry. Consideration of both higher and popular culture. **180A.** Through 1259; **180B.** 1260 through 1876; **180C.** Since 1876. Mr. Duncan

Graduate Courses

200. Bibliography and Methods of Research in Korean. (Formerly numbered East Asian Languages 297.) Lecture, three hours. Prerequisites: graduate standing, reading knowledge of Korean and Chinese. Review of basic Western and modern Korean reference books, with concentration on Korean literature and language, and survey of basic bibliographical material. In addition, introduction to most important primary sources in student's field of specialization. Mr. P. Lee

C220. Structure of Korean. (Formerly numbered East Asian Languages C277.) Lecture, three hours. Prerequisites: two years of Korean, or one year of Korean and some knowledge of linguistics. Linguistic analysis of Korean for those who concentrate on Korean language. Discussion of major syntactic, semantic, and pragmatic characteristics of Korean in light of linguistic universals. Concurrently scheduled with course CM120. Ms. Sohn

230A-230B. Seminars: Literary Translation from Korean (2 units each). (Formerly numbered East Asian Languages 290.) Lecture, three hours. Prerequisite: reading knowledge of Korean. In consultation with instructor, students select works to be translated. Devoted to skill of producing accurate and readable translations, with emphasis on problems and techniques unique to poetry and prose. At end of term, students expected to produce publishable translations. May be repeated once with consent of instructor. In Progress grading. Mr. P. Lee

235A-235B. Seminars: Topics in Modern Korean Literature (2 units each). Lecture, three hours. Prerequisite: at least five years of Korean or graduate standing. Recommended: reading knowledge of Chinese or Japanese. Study of a selected period, movement, theme, or author of 20th-century Korean literature, with critical review of secondary works in Western and Korean languages. May be repeated for credit with consent of instructor. In Progress grading. Mr. P. Lee

240A-240B. Classical Korean Fiction (2 units each). (Formerly numbered East Asian Languages 248.) Lecture, three hours. Prerequisite: reading knowledge of Korean. Formal and thematic study of tales of the marvelous, romance, satirical stories, diaries, and *p'ansori* fiction. Status of fiction in society and culture, fiction as imaginative representation of the writer's relationship to real conditions of existence. Latest Western theory of narratology applied in analysis. In Progress grading. Mr. P. Lee

245A-245B. Classical Korean Poetry (2 units each). (Formerly numbered East Asian Languages 262.) Lecture, three hours. Prerequisite: reading knowledge of Korean. Critical reading and analysis of classical Korean poetry, including discussion of literary and cultural contexts of poetic genres. Nature of codes, conventions that make meaning possible. Review of latest Korean scholarship. May be repeated once with consent of instructor. In Progress grading. Mr. P. Lee

265A-265B. Korean Buddhist Texts (2 units each). (Formerly numbered East Asian Languages 212.) Lecture, three hours. Prerequisite: consent of instructor. Selected topics in Korean Buddhist texts. Coverage varies. In Progress grading. Mr. Buswell

290A-290B. Thought and Society in Korea (2 units each). Discussion, three hours. Prerequisites: graduate standing, reading knowledge of Korean. Readings in Korean intellectual history and its social, political, and economic background from the rise of Neo-Confucianism in the 14th century to the 20th century. In Progress grading. Mr. Duncan (W.Sp)

295A-295B. Seminars: Topics in Korean Cultural History (2 units each). Lecture, three hours. Prerequisite: reading knowledge of Korean or literary Chinese. Discussion and research on major topics in Korean cultural history, such as Confucianization of Korean society, Practical Learning movement of late Choson dynasty, or Korean reactions to the West in Eastern learning and enlightenment movements of the 19th century. May be repeated for credit. In Progress grading. Mr. Duncan

Scope and Objectives

This undergraduate major is an area studies program of the East Asian region which is divided into three areas of concentration — China, Japan, and Korea. It offers a social science approach, combined with language study and work in the humanities.

Bachelor of Arts Degree

Two years of language and a total of 13 upper division courses, including courses in the social sciences, culture, and language, must be taken for graduation. Students concentrating on China or Japan must take a minimum of nine courses in the area of their choice; those concentrating on Korea must take a minimum of seven courses in that area. The remainder must be taken in another area of concentration within the major. No more than eight courses may be from a single department. You should select the courses from the lists below. Courses on East Asia not listed below, offered only on a temporary basis, may also be applied toward the major. At the discretion of the adviser, you may be advised to take theory classes applicable to the major requirements.

China Concentration

Preparation for the Major: Chinese 1, 2, 3, 4, 5, 6, History 11A-11B, Sociology 1.

The Major: A minimum of nine courses selected from Anthropology 175T*, Art History C115B, C115D, C115E, C115F, Chinese 150, 151, 160, 175, 190A, 190B, and up to three upper division language courses or equivalent, Economics 190*, 191*, 192*, Ethnomusicology and Systematic Musicology 156A, 156B, 157, 158A, 158B, 158C, Geography 186, History 182A, 182B, 183A, 183B, 184, Political Science 135, Sociology 188*, and a 199 special studies course in Chinese or in any social sciences or humanities department.

Japan Concentration

Preparation for the Major: History 9C, Japanese 1, 2, 3, 4, 5, 6, Sociology 1.

The Major: A minimum of nine courses selected from Anthropology 175T*, Art History 114C, C115C, Economics 190*, 191*, 192*, Ethnomusicology and Systematic Musicology 160A, 160B, History 186, 187A, 187B, 187C, Japanese 150, 151, 160, 175, M182, and up to three upper division language courses or equivalent, Political Science 136, 160, Sociology 188*, 189, and a 199 special studies course in Japanese or in any social sciences or humanities department.

Korea Concentration

Preparation for the Major: Korean 1, 2, 3, 4, 5, 6, 50, Sociology 1.

The Major: A minimum of seven courses selected from Anthropology 175T*, Art History 114E, Economics 190*, 191*, 192*, Korean 150, 151, 160, 175, and three upper division language courses or equivalent, Sociology 188*, Theater 102E*, and a maximum of two four-unit 199 special studies courses in Korean or in any social sciences or humanities department.

Economics

Federico Sturzenegger, Ph.D.
Mariano Tommasi, Ph.D.
Darrell Williams, Ph.D.

Scope and Objectives

UCLA's Economics Department is ranked among the 10 best in the nation according to a recent survey conducted by the Conference Board of the Associated Research Councils. Its undergraduate program is designed for students who wish to gain a thorough understanding of economic analysis. Emphasis is on economic principles applied to resolving interpersonal conflicts of interest and coordinating productive activity in a world of scarce resources. Because students must gain a thorough theoretical and technical competence before extensive study of the applied specializations in the discipline, the analytic core of the major in economics is closely structured. Some courses are appropriate for nonmajors, but the curriculum is most suitable for students who wish to make the study of economics the primary focus in their undergraduate education.

The undergraduate major provides analytical training in reference to socioeconomic phe-

nomena and provides an excellent theoretical background for those pursuing graduate education in law, management, public administration, journalism, social welfare, architecture and urban planning, and education, as well as economics.

The graduate program is designed primarily for students pursuing the Ph.D. degree. The doctorate is awarded to those students who have achieved the level of study and training required for a professional economist. The degree recognizes students' ability to make scholarly contributions in their fields of specialization and to undertake advanced research in those areas. A Master of Arts program is also offered, which involves coursework and comprehensive examinations designed for the Ph.D. student.

Bachelor of Arts in Economics

Pre-Economics Major

While you are completing the lower division preparation courses for the major, you may be classified as a pre-economics major. When you have completed the preparation courses for the major and before you reach 100 quarter units (but no later than 135 quarter units), you must petition to enter the major at the undergraduate counselor's office in 2253 Bunche Hall.

Preparation for the Major

Required: English 4 or 100W or 129; Economics 1, 2, 40 (or Statistics 50 as a substitute for course 40); two courses in calculus (i.e., Mathematics 3A or 31A and 3B, 3E, or 31B; the Mathematics 31A, 31B sequence is particularly recommended). All courses must be taken for a letter grade. A 2.0 (C) grade is required in each premajor course, with a combined 2.5 GPA required in the economics and mathematics courses. You must petition for major standing by the time you attain 135 quarter units.

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval; consult the undergraduate counselor before enrolling in any courses for the major.

The Major

Required: Ten upper division courses in economics which must include Economics 101A, 101B, 102, and at least one course in three different fields in economics selected from the list below (all courses must be taken for a letter grade). Economics 100, 110, and 190 may not be included among the 10 upper division courses. One or two of the 10 courses may include Management 120A and/or 120B and/or 130 and/or 133 (Learning Center courses or courses transferred from other institutions may not be applied toward this option).

*Courses on East Asia in general.

A grade of C – or better is required in each of courses 101A, 101B, and 102. In addition, you must have a 2.0 grade-point average in the upper division major courses. Transfer credit for any of the above is subject to department approval; consult the undergraduate counselor before enrolling in any courses for the major.

Major Fields

Economic theory (courses 101A, 101B, 102, 103A-103Z, 104, 105AH, 105BH, 107); economic development (courses 111, 112); regional economics (courses 120, 121); public finance (courses 130, 133, M135, M136); statistics, mathematical economics, and econometrics (courses 141, 142, 143, 144, 145, 146, 147A, 147B); labor economics (courses 150, 151, 152); money and banking (courses 160, 161); government and industry (courses 170, 171, 172, 173, 174, 175, 176); economic institutions (courses 180, 181A, 181B, 182, 183, 184); international economics (courses 191, 192).

Bachelor of Arts in Business Economics

This program offers students a business orientation in their undergraduate studies and is designed to prepare students for careers in business, economics, and law. The program requires students to include specific courses offered by the department and the John E. Anderson Graduate School of Management (see "The Major").

Admission

Students who do not qualify for admission to the major by the last day of Spring Quarter 1992 must follow the premajor and major requirements listed below.

Enrollment in the program is limited. Applications for admission are handled exclusively by the Department of Economics. To apply you must have completed at least 72 quarter units (but no more than 135 quarter units), one 12-unit term of residence in regular session at UCLA, and all courses listed under "Preparation for the Major." In addition, you must (1) be enrolled in UCLA regular session at the time of application, (2) have a 2.0 (C) minimum grade in each preparation course, and (3) have a 3.0 (B) overall average in all preparation courses except English.

Note: The requisite grade-point averages plus completion of the preparation for the major courses do not guarantee admission to the program. Admission is on a competitive basis, using the above qualifications as minimum standards for consideration.

Pre-Business Economics Major

While you are completing the preparation courses for the major, you may be classified as a pre-business economics major. (Transfer students who wish to enter UCLA as pre-business economics majors must meet the admission screen-

ing requirements. For information, contact the Office of Undergraduate Admissions and Relations with Schools.) When you have completed the required economics, mathematics, and management preparation courses and have at least 72 quarter units (but no more than 135 quarter units), you must petition to enter the major at the business economics counselor's office in 2250B Bunche Hall.

Preparation for the Major

Required: Economics 1, 2, 40 (or Statistics 50), 101A, 101B; English 4 or 100W or 129; Management 1A-1B; Mathematics 3A or 31A and 3B, 3E, or 31B (the Mathematics 31A, 31B sequence is particularly recommended). All courses must be taken for a letter grade.

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval; consult the business economics counselor before enrolling in any courses for the major.

The Major

Required: Economics 102 and at least two courses from 104, 173, 174, 184; four other upper division courses in economics in at least two different fields (no more than two may be taken in the government and industry field); four upper division courses from Management 108, 120A, 120B, 122, 123, 124, 127, 130, 133, 140, 175. Transfer credit for any of the major courses is subject to department approval. In addition, some graduate courses from the Anderson Graduate School of Management may be applied toward the major with department consent prior to taking the courses. Consult the business economics counselor before enrolling in any courses for the major.

All upper division major courses must be taken for a letter grade. A grade of C – or better is required in each upper division major course (except for Economics 101A and 101B which are part of the premajor), and you must have a 2.0 GPA in the upper division major courses to graduate in this major.

Bachelor of Arts in Economics/International Area Studies

This program is for students who wish to attain specialized knowledge of a particular geographical area in addition to the economics analysis provided by the major. It should be useful to those who plan careers in international business or government service. The department encourages participation in the University of California Education Abroad Program or other recognized international study programs. Experience in foreign firms or institutions would be an advantage but yields no academic unit credit toward the major.

Admission

Students who do not qualify for admission to the major by the last day of Spring Quarter 1992 must follow the premajor and major requirements listed below.

Qualified students must submit written applications to the undergraduate counselor in 2253 Bunche Hall to be admitted. To apply you must have completed at least 72 quarter units, one 12-unit term of residence in regular session at UCLA, and all courses listed under "Preparation for the Major." In addition, you must be enrolled in UCLA regular session at the time of application. All courses must be completed for a letter grade. A minimum 2.0 (C) grade is required in each premajor course, with a combined 2.5 GPA in the economics and mathematics courses. Language course preparation need not be completed at the time of admission but must be completed before preparing the research paper required in Economics 193. Your program as a whole must be approved by the Economics Department faculty adviser before you are admitted to the major; you must apply before you reach 135 quarter units.

Pre-Economics/International Area Studies Major

While you are completing the preparation courses for the major, you may be classified as a pre-economics/international area studies major. When you have completed the required mathematics and economics preparation courses and at least the first year of foreign language, and have at least 72 quarter units (but no more than 135 quarter units), you must petition to enter the major at the undergraduate counselor's office.

Preparation for the Major

Required: Economics 1, 2, 40 (or Statistics 50 as a substitute for course 40), 101A, 101B, 102; two courses in calculus (i.e., Mathematics 3A or 31A and 3B, 3E, or 31B; the Mathematics 31A, 31B sequence is particularly recommended). You also must complete the sixth quarter course (or equivalent) of any modern language (e.g., French 6, German 6, Russian 6, Spanish 25; these are most frequently offered in fulfillment of this requirement, but also see the offerings under Portuguese, Italian, Germanic Languages, Near Eastern Languages and Cultures, African Languages, and East Asian Languages and Cultures).

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval; consult the undergraduate counselor before enrolling in any courses for the major.

The Major

Required: A total of 12 upper division courses selected from economics and the list of "Approved Noneconomics Courses" below. Eight

must be from economics, including Economics 191, 192, 193, and five courses from at least two different fields in economics (selected from the "Major Fields" listed under the regular economics major). Economics 101A, 101B, and 102 (which are required for the premajor) cannot be used to satisfy this requirement. The four remaining upper division courses must be chosen from the approved list below and must include selections from at least two different departments. Economics 193 must be completed in your last year before graduation and includes the preparation of a research paper on the economy of the country or region of your specialization. Sources in the language of the region or country must be utilized. The non-economics courses, the research paper, and the language learned must show consistency of purpose.

One or two of the five upper division economics electives may include Management 120A and/or 120B and/or 130 and/or 133 (Learning Center courses or courses transferred from other institutions may not be applied toward this option).

To graduate in the major you must achieve a 2.0 GPA for both economics and noneconomics courses, with a grade of C- or better in each course.

Approved Noneconomics Courses

Anthropology 171, 175P, 175Q, 175R, 177; Geography 181, 182A, 182B, 183, 184, 185, 186, 187, 188, 189, 190; History 106C, 107B, 108A, 109B, 110B, 111B, 112C, 113, 125E, 126E, 128C, 129C, 131C, 131D, 132B, 133B, 134B, 141C, 142A, 142B, 143, 144, 167A, 167B, 167C, 171, 173, 176B, 177, 178A, 178B, 179B, 187C, 188B, 190B; Political Science 152 through 165, 166A, 166B, 166C; Sociology 186, 187, 188; others by department approval.

Specialization in Computing

Majors in economics, business economics, and economics/international area studies may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, Mathematics 61, and two courses from Program in Computing 10C, 30, 60, and (3) completing at least two courses from Economics 104, 143, 144, 145, 146, 147A, 147B, 199, with the additional provision that the courses taken must make substantial use of computers. A grade of C- or better is required in each course, with a combined GPA of at least 2.0. You graduate with a bachelor's degree in your major and a specialization in computing.

Bachelor of Science in Economics/System Science

The degree is described following the Economics Department courses.

Honors Program

The departmental honors program is open to majors in economics, business economics, economics/international area studies, and economics/system science who have an overall 3.5 grade-point average.

To qualify for departmental honors at graduation, you must (1) select at least seven of the required upper division economics courses from the approved list designated for departmental honors, (2) complete a senior thesis acceptable to the departmental honors committee, (3) present your thesis in Economics 195H, and (4) complete your major requirements with at least a 3.5 GPA in the economics courses. Highest honors are awarded at the discretion of the departmental honors committee based on grade-point average and quality of the senior thesis.

Economics 195H and 199, the courses used for thesis preparation, may be counted as upper division courses toward the field in which the thesis is written (for purposes of satisfying the requirements for the major). Further information and application forms are available from the undergraduate counselor in 2253 Bunche Hall.

Graduate Study

Admission

Applicants for graduate study who satisfy the University minimum requirements are eligible to apply. It is strongly recommended that you have undergraduate training in economics, mathematics, and statistics. You must also submit a full record of prior university experience, three letters of reference, and your scores in the Graduate Record Examination (GRE) General Test and the Subject Test in Economics.

The Department of Economics (2263 Bunche Hall, UCLA, Los Angeles, CA 90024-1477) admits students only for Fall Quarter of each academic year. The deadline for submitting the admission/fellowship application is December 15.

Major Fields or Subdisciplines

Economic theory; economic development; urban and regional economics; public finance; mathematical economics; statistics and econometrics; labor economics; money and banking; industrial organization; economic institutions; international economics; uncertainty and information.

Master of Arts Degree

Course Requirements

Candidates for the Master of Arts degree in Economics should have completed the equivalent of an undergraduate major in economics. The department requires nine upper division and graduate-level courses in economics completed in graduate standing at UCLA. If not previously taken, these courses must include Economics 101A, 101B, and 102 with grades of B or better and one graduate-level course with a grade of B in history of economic thought or economic history. At least five of the nine courses must be strictly graduate economics courses.

You must also complete, if not previously taken, two courses in calculus and one in statistics. Economics 144 may be used as one of the calculus courses and Economics 40 as the statistics course.

With consent of the graduate chair, you may offer a maximum of two courses in other social sciences such as history, management, mathematics, psychology, education, or philosophy in partial satisfaction of the degree requirements; however, you must still take five graduate economics courses.

Four units of course 596 may be applied toward the total course requirement and the minimum graduate course requirement.

Comprehensive Examination Plan

The comprehensive examination requirement for the master's degree may be met in one of the following three ways:

- (1) A master's pass (M) or better in each of two full doctoral comprehensive examinations.
- (2) A master's pass (M) or better in each of two doctoral examinations, with one of the examinations being either microeconomic theory or macroeconomic theory, and the second examination in a field other than micro or macro theory.
- (3) A master's pass (M) or better in each of microeconomic theory and macroeconomic theory, plus a B+ average in Economics 203A, 203B, and 203C.

Examinations are graded H (Ph.D. honors pass), P (pass at the Ph.D. level), M (pass at the M.A. level), or F (fail).

Ph.D. Degree

Course Requirements

The specific course requirements which must be fulfilled prior to taking the University Oral Qualifying Examination are in quantitative methods.

The requirement may be satisfied by one of the following methods: (a) passing the quantitative methods examination offered at the close of the mathematics review course given to entering students (only) just prior to the start of

their first term; (b) achieving a B+ average in Economics 203A, 203B, and 203C; (c) achieving a B average in at least two terms of the advanced econometrics sequence (courses 231A, 231B) and one of the 232A-232Z special topics courses.

Qualifying Examinations

You are responsible for contacting the graduate adviser for additional regulations covering these examinations.

You are required to pass (with a P) both the microeconomic theory and macroeconomic theory examinations by the beginning of your third year. In addition, you have to pass further written examinations in three elective fields of specialization.

Written examinations are graded H (honors pass), P (pass at the Ph.D. level), M (pass at the M.A. level), or F (fail). They can be repeated, but you may sit for no more than seven in total. If you want to attempt an eighth sitting, you must obtain written approval from the chair of the graduate committee. Such approval is not generally granted.

In order to be advanced to candidacy, you are required to present a paper in a departmental workshop. It is recommended that this be done by the end of your third year.

The University Oral Qualifying Examination, administered by your doctoral committee, is scheduled after successful completion of all the written examinations and other course requirements, and after the submission of a written dissertation proposal. The examination focuses on, but is not limited to, the dissertation proposal.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

A final oral examination on the doctoral dissertation is required unless it is waived by the committee that supervises the dissertation.

Lower Division Courses

1. Principles of Economics. Lecture, three hours; discussion, one hour. Not open to students with credit for course 100. Introduction to principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on allocation of resources and distribution of income through the price system.

2. Principles of Economics. Lecture, three hours; discussion, one hour. Not open to students with credit for course 100. Introduction to principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on aggregative economics, including national income, monetary and fiscal policy, and international trade.

5. Introductory Economics. Lecture, three hours. Not open to students with credit for course 1, 2, or 100. Principles of economics as tools of analysis. Presentation of a set of concepts with which to analyze a wide range of social problems that economic theory illuminates. May not be used to fulfill entrance requirements for any Economics Department major.

Mr. Murphy (F,Sp)

40. Introduction to Statistical Methods. Lecture, three hours; discussion, one hour. Not open to students with credit for Mathematics M150A-150B, 151, Statistics 50, M152A, or 152B. Elements of statistical analysis. Presentation and interpretation of data; descriptive statistics; theory of probability and basic sampling distributions; statistical inference, including principles of estimation and tests of hypotheses; introduction to regression and correlation.

Mr. Potter, Mr. Ryu

88A. Lower Division Research Seminar: Microeconomics. Discussion, three hours. Prerequisite: course 1. Limited to 10 freshmen or sophomores. Seminar in which students do intensive research project under guidance of regular faculty. Students select topics in consultation with instructor (topics limited to material covered in course 1), write papers, and present them at the seminar.

88B. Lower Division Research Seminar: Macroeconomics. Discussion, three hours. Prerequisite: course 2. Limited to 10 freshmen or sophomores. Seminar in which students do intensive research project under guidance of regular faculty. Students select topics in consultation with instructor (topics limited to material covered in course 2), write papers, and present them at the seminar.

99. Lower Division Seminar (2 or 4 units). Prerequisites: courses 1 and 2 with a grade of B or better in each, overall 3.0 grade-point average, consent of instructor. Designed to provide an instructional vehicle for student research projects. May not be used to fulfill entrance requirements for any Economics Department major.

Mr. Murphy

Upper Division Courses

Courses 1 and 2, or 100 are prerequisite to all upper division courses in economics.

100. Economic Principles and Problems. Lecture, three hours. Prerequisite: upper division standing. Not open to students with credit for course 1, 2, or 5. Principles of economics with application to current economic problems. May not be used to fulfill entrance requirements for any Economics Department major.

Mr. Murphy

101A. Microeconomic Theory. Lecture, three hours; discussion, one hour. Prerequisites: two calculus courses or consent of instructor. Laws of demand, supply, returns, and costs; price and output determination in different market situations.

Mr. Ostroy, Mr. Riley

101B. Microeconomic Theory. Lecture, three hours; discussion, one hour. Prerequisite: course 101A. Theory of factor pricing and income distribution; general equilibrium; implications of pricing process for optimum allocation of resources; interest and capital.

Mr. Ostroy

102. Macroeconomic Theory. Lecture, three hours; discussion, one hour. Prerequisites: two calculus courses or consent of instructor. Theory of income, employment, and price level. Analysis of secular growth and business fluctuations; introduction to monetary and fiscal policy.

Mr. Farmer, Mr. Hansen, Mr. Thompson

103A-103Z. Upper Division Research Seminars: Applications of Economic Theory. Prerequisites: course 101A and others as set by instructor. Limited enrollment seminars in which students usually write a research paper on a topic selected in consultation with instructor:

M103A. Political and Economic Issues in the Proliferation of Nuclear Weapons. (Same as Political Science M139A.) Interdisciplinary approach to the problem of nuclear proliferation. Economic aspects of acquisition of nuclear weapons and economic aspects of nuclear energy treating technological, bargaining, and stability issues.

Mr. Intriligator (alternate years)

103B. Economics of Energy. Prerequisites: courses 101A, 101B, 102. Topics include pricing and taxation of exhaustible resources, interactions between energy and the economy, institutions such as OPEC and oil price controls, oil debt and balance of payments, energy conservation, and future technologies.

104. Managerial Economics. Lecture, three hours. Prerequisite: course 101A. Enrollment priority to business economics students. Application of economic principles to business decisions. Allocating joint costs. Implicit costs of capacity constraints. Problems in capital budgeting, financing, and pricing. Role of interest rates in business decisions.

Mr. Riley

105AH. Topics in Microeconomics (Honors). Lecture, three hours. Prerequisites: courses 101A, 101B, 102, 144, departmental honors program standing or consent of instructor. Introduction to Walrasian and Nash equilibrium. Modeling of selected applied topics such as peak load pricing, pricing of externalities, strategic pricing.

Mr. Levine

105BH. Topics in Macroeconomics (Honors). Lecture, three hours. Prerequisites: courses 101A, 101B, 102, 144, departmental honors program standing or consent of instructor. Imperfect information-based models of monetary business cycles: theory and evidence. Real business cycle models: role of shocks and interindustrial technology structure in explaining fluctuations. Policy analysis and policy intervention in a world with rational maximizing agents: recent perspectives.

Mr. Hansen

107. History of Economic Theory. Lecture, three hours. Prerequisite: course 1 or 100. Survey of economic analysis from Grecian antiquity to the early 20th century, concentrating on the 18th and 19th centuries; special attention to selected writers, including Aristotle, mercantilists, Physiocrats, Hume, Smith, Malthus, Ricardo, Marx, marginalists, and Marshall.

Mr. Hilton

110. Economic Problems of Underdeveloped Countries. Lecture, three hours. Prerequisite: course 1 or 100. Limited to non-Economics Department majors. Not open for credit to students with credit for course 111 or 112. Survey of major issues of development economics. Economic structure of low-income countries and primary causes for their limited economic growth. Economic goals and policy alternatives open to their leaders. Possible roles of developed countries. May not be applied toward any Economics Department major.

111. Theories of Economic Growth and Development. Lecture, three hours. Prerequisite: course 101A. Growth models, theory of production under constraints, relative factor prices and their impact on choice of technology, investment criteria, role of the market, economic planning in less developed areas.

Mr. Lal

112. Policies for Economic Development. Lecture, three hours. Prerequisite: course 102 or 111. Suggested strategies for economic development: inflation, balanced growth, industry vs. agriculture, import substitution, export-oriented expansion, foreign aid, and others. Selected case studies.

Mr. Lal

120. Introduction to Urban and Regional Economics. Lecture, three hours. Prerequisite: course 101A or consent of instructor. Survey of broad range of policy and theoretical issues that are raised when economic analysis is applied in an urban setting. Topics include urbanization and urban growth, housing markets, location decisions of households and firms, transportation, urban labor markets, and local public sector.

121. Urban Economic Analysis. Lecture, three hours. Prerequisites: courses 101A, 101B, and 120, or consent of instructor. Urban economic analysis requires development of analytical tools that are different in some respects from standard methodology presented in course 101A or 101B. Construction and implementation of these tools, with applications to urban location decisions, housing, transportation, labor markets, and local public sector.

130. Public Finance. Lecture, three hours. Prerequisites: courses 101A and 101B, or consent of instructor. Role of government in a market economy. Alternative justifications for government intervention. Principles and effects of spending programs (especially social insurance and health), taxation, deficit financing, and federal credit programs. Taxation in an open economy. Properties of public choice mechanisms.

Mr. Engen, Mr. Gale

133. State and Local Finance. Lecture, three hours. Prerequisite: course 130. Division of functions and revenues between state and local governments; revenues, expenditures, and indebtedness of these governments. Analyses of state and local tax systems.

Mr. Engen

M135. Economic Models of Public Choice. (Same as Political Science M105.) Prerequisites: course 101A, any lower division political science course other than Political Science 1, and junior/senior standing, or consent of instructor. Analysis of methods and consequences of arriving at collective decisions through political mechanisms. Topics include free-rider problem, voting and majority choice, demand revelation, and political bargaining.

Mr. Wallerstein

M136. Economic Models of Political Conflict and Conflict Resolution. (Same as Political Science M106.) Prerequisites: course 101A, any lower division political science course other than Political Science 1, and junior/senior standing, or consent of instructor. Biological, cultural, and organizational sources of political conflict. Role of threats, promises, commitments. Models of the onset and termination of conflict. Conduct of war: strategy and tactics.

141. Principles of Statistical Decision. Lecture, three hours. Prerequisite: course 40 or equivalent. Errors of first and second kind; economic loss functions; prior probabilities and Bayes' theorem. Analysis of classical and Bayesian approaches. Application to inventory and production problems. Value of information and implications for sampling design.

Mr. Ellickson, Mr. McCall, Mr. Ostroy

142. Probabilistic Microeconomics. Lecture, three hours. Prerequisites: courses 40, 101A, 101B. Combination of basic probability introduced in course 40 with microeconomic models presented in courses 101A and 101B in order to explain phenomena such as insurance, job search, and stock market behavior. Optimal production and consumption under uncertainty. Review of probability and introduction to alternative measures of risk and risk aversion.

Mr. McCall

143. Applied Regression Analysis. Lecture, three hours; discussion/computer tutorial, one hour. Prerequisite: course 40 or equivalent. Not open to students with credit for course 147A or 147B. Review of simple regression; assumptions of classical linear regression model; multiple regression, estimation, and inference; violations of assumptions of classical model (multicollinearity, heteroskedasticity, autocorrelation); autoregressive models, dummy variables. Emphasis on practical experience with regression analysis and interpretation; matrix algebra not required.

Ms. Cameron

144. Introduction to Mathematical Methods in Economics. Lecture, three hours. Prerequisites: courses 101A, 101B, two calculus courses. Introduction to use of calculus in economic analysis. Topics include partial differentiation, optimization, integration, and differential and difference equations, with applications to the theory of the household and the firm, capital theory, and economic dynamics.

Mr. Ellickson, Mr. Intriligator, Mr. Riley

145. Topics in Mathematical Economics. Lecture, three hours. Prerequisite: course 144. Possible topics include theory of economic growth; competitive equilibrium analysis; examination of market failure and role for market intervention.

Mr. Ellickson, Mr. Ostroy

146. Linear Models in Economics. Lecture, three hours. Prerequisite: one linear or matrix algebra course. Not open for credit to students with credit for Mathematics 144 or Electrical Engineering 136. Possible topics include duality theory of linear programming and simplex algorithm, input-output analysis, and two-person zero-sum games.

Mr. McCall, Mr. Ostroy

147A. Introduction to Econometrics. Lecture, three hours. Prerequisites: two calculus courses and course 143 (or Mathematics M150A-150B or Statistics M152A, 152B), or consent of instructor. Introduction to econometrics, including review of matrix algebra and statistical theory; linear regression model; model specification; data collection; estimation and hypothesis testing; and introduction to simultaneous equations models. Original econometric paper required.

Mr. Ellickson, Mr. Intriligator, Mr. Levine

147B. Applications of Econometrics. Lecture, three hours. Prerequisite: course 147A. Econometric models and data; forecasting, policy analysis, estimation of simultaneous equations models, applications of econometrics. Major original econometric paper required.

Mr. Ellickson, Mr. Intriligator, Mr. Levine

148. Introductory System Theory. Lecture, three hours. Prerequisites: Mathematics 33A, 33B. Introduction to modeling and analysis of dynamic systems, with emphasis on examples from social and life sciences. Linearity, impulse responses, stability, state variables, algorithms for filtering and control.

Mr. Aoki, Mr. Ellickson (W)

150. Wage Theory. Lecture, three hours. Prerequisites: courses 101A and 101B, or consent of instructor. Supply and demand for labor. Analysis of government, union, and other constraints on competitive system of wage determination. Wage level and structure. Wages and human capital theory.

Mr. Fallick

151. Labor, Wages, and Income. Lecture, three hours. Prerequisite: course 150 or consent of instructor. Selected topics in labor theory; income distribution; business cycles and unemployment; investments in human capital and life cycles; migration; human fertility; marriage and divorce, etc.

Mr. Fallick

152. Trade Unions and Professional Associations. Lecture, three hours. Comparative behavior of unions and professional associations; criteria for wage maximization; quantification of gains; analysis of legal framework applying to such organizations.

160. Money and Banking. Lecture, three hours. Recommended prerequisite: course 102. Principles of money and banking in the U.S.; legal and institutional framework; money supply process; instruments, effects, and practice of monetary policy.

161. Monetary Theory. Lecture, three hours. Prerequisite: course 160. Nature of money and monetary exchange; level and term structure of interest rates; level and growth rate of money; transmission of monetary shocks; theory and practice of monetary policy.

170. Monopoly and Competition. Lecture, three hours. Prerequisite: course 101A. Comparison of economic and legal treatments of the competitive process. Monopoly competition, and collusion as economic theory, as antitrust doctrine, and as fact. Source of monopoly. Predatory behavior. Misleading practices in theory and policy. General problem of relationship between private rights of action and competitive entry.

Mr. Demsetz, Mr. Klein

171. Industrial Organization: Theory and Tactics. Lecture, three hours. Prerequisite: course 101A. Study of pricing and output decisions of firms under conditions of less than perfect competition or monopoly; theories of oligopoly and monopolistic competition; information costs and advertising; examination of pricing practices such as price discrimination, tie-in selling, predatory pricing, and resale price maintenance.

Mr. Demsetz, Mr. Klein

172. Economic Analysis of Laws and Legal Institutions. Lecture, three hours. Prerequisite: course 101A. Application of economic theory to legal rule formulation; study of economic nature and consequences of alternative legal arrangements, with special reference to property rights. Application of economic theory to analysis of effects of laws relative to property, contracts, torts, crimes, taxation, and constitutional issues. Analysis of legal process.

Mr. Demsetz

173. Centralized Markets. Lecture, three hours. Prerequisite: course 101A. Enrollment priority to business economics students. Organization and function of stock, bond, commodity, and foreign exchange markets. Theory and evidence relating to efficiency of these markets in evaluating information, to their role in facilitating risk-bearing and capital allocation. Interrelationship between business finance and organized capital markets.

Mr. Butz, Mr. Demsetz, Mr. Williams

174. Organization of the Firm. Lecture, three hours. Prerequisite: course 101A. Enrollment priority to business economics students. Role of the firm in traditional economic theory and modern developments in the theory of the firm. Functions of ownership and management in face of risk and opportunism. Internal organization of the firm. Problem of separation of ownership from control in the modern corporation. Determinates of firm size, vertical integration, and degree of specialization of activities of firms. Decision making within the firm in a democratic setting.

Mr. Butz, Mr. Demsetz, Mr. Dick

175. Economics of Transportation. Lecture, three hours. Recommended prerequisite: course 101A. Economic characteristics of transport; functions of the different agencies; pricing and resource allocation in transport; public regulation of transport; urban transport; modern transport problem.

176. Business and Government. Lecture, three hours. Prerequisites: courses 101A, 101B. Several aspects of interaction between business and government, including regulation of prices, entry, working conditions, natural resource use, policies of taxation, and subsidy of business.

Mr. Demsetz

180. Comparative Economic Systems. Lecture, three hours. Prerequisites: courses 101A, 101B. Comparative analysis of capitalist and socialist economies. Pure models; attention to actual economies selected in light of those models and the march of events.

Mr. Murphy, Mr. Stanczak

181A. Development of Economic Institutions in Western Europe. Lecture, three hours. Prerequisite: upper division standing. European economic history, 900-1700. Custom, command, and market modes of organization. Evolution of property rights, contract forms, and monetary arrangements. Decline of feudal institutions, especially serfdom. Open field village and enclosures. Crafts manufacturing and guild organization. Development of banking. Public finances and role of government.

Mr. Rosenthal

181B. Development of Economic Institutions in Western Europe. Lecture, three hours. Prerequisite: upper division standing. European economic history, 1700-1914. Industrial revolution in Britain and its spread to the continent. Rise of factories, industrial firms, and unions. Changes in standard of living and demographic consequences. Imperial expansion and decline of Britain. Worldwide diffusion of economic growth and the Gerschenkron hypothesis.

Mr. Rosenthal, Mr. Sokoloff

182. Centralized Economics Systems. Lecture, three hours. Prerequisites: courses 101A, 101B. Introduction to theory of centralized systems and examination of some centralized economies. Considerable attention to economy of the U.S.S.R.; some attention to other economies selected in light of the centralized model and with view to the march of current events.

Mr. Murphy

183. Development of Economic Institutions in the U.S. Lecture, three hours. Study of changing economic conditions in the U.S. from Colonial times to the early 20th century and effects of these changes on American society.

Mr. Sokoloff

184. History of Enterprise and Entrepreneurship in the American Economy. Lecture, three hours. Enrollment priority to business economics students. Study of role of innovation in history of American enterprise. Examination of specific episodes of salient entrepreneurial innovation, as well as general theoretical and empirical treatments. Mr. Sokoloff

190. International Economics. Lecture, three hours. Prerequisite: course 1 or 100. Limited to non-Economics Department majors. Not open to students with credit for course 191 or 192. General introduction to international economics, based on examination of theory of trade and the means and significance of balance of payments adjustments, with analysis of major issues of international commercial and monetary policy confronting national and international agencies. May not be applied toward any Economics Department major.

191. International Trade Theory. Lecture, three hours. Prerequisite: course 101B. Not open to students with credit for course 190. Theory of international trade: bases, direction, terms, volume, and gains of trade. Effects of tariffs, quantitative restrictions, and international integration. Effects of free and restricted trade on economic welfare and political stability. Mr. Stanczak

192. International Finance. Lecture, three hours. Prerequisite: course 102. Not open to students with credit for course 190. Emphasis on interpretation of the balance of payments and adjustment to national and international equilibria through changes in price levels, exchange rates, and national income. Other topics include making international payments, determination of exchange rates under various monetary standards, capital movements, exchange controls, and international monetary organization. Ms. Ozler, Mr. Sturzenegger

193. Research in International Area Studies Seminar. Lecture, three hours. Limited to economics/international area studies seniors. Students prepare research paper on economy of the country or region of specialization. Mr. Sturzenegger

195H. Honors Thesis Seminar. Seminar, three hours. Limited to seniors in departmental honors program. Seminar in which students present results of their senior theses.

199. Special Studies in Economics (2 or 4 units). Prerequisites: courses 101A, 101B, junior/senior standing, consent of instructor. May be repeated but may be applied only once toward the major requirements.

Graduate Courses

Foundations of Economics

201A-201B-201C. Microeconomics:

201A. Theory of Consumption and Exchange. Preferences, demand, exchange, pricing, and markets in an exchange economy. Emphasis on derivation and interpretation of theorems, illustrated by applications.

201B. Theory of Production and Distribution. Theory of the firm, with particular attention to demand for factors of production in short and long runs. May cover introduction to general equilibrium theory and welfare economics. Mr. Ostroy, Mr. Waldman

201C. Theory of Interest and Capital. Intertemporal choice and equilibrium, interest, and accumulation of capital, decisions under uncertainty, and allocation of risk.

202A-202B-202C. Macroeconomics:

202A. Macrostatics. Keynesian income-expenditure approach. Expenditures functions. Money demand and supply functions. IS-LM model and its extensions. Large-scale macroeconomic models. Mr. Leijonhufvud

202B. Macrodynamics. Neoclassical growth model. Money and growth. Adjustment dynamics. Rational expectations. Unemployment and inflation. Keynesian-monetarist controversy. International macroeconomics. Stabilization policy. Mr. Leijonhufvud

202C. Disequilibrium Approaches and Critiques. Microfoundations. Wicksellian theme. Keynes and the classics. Theory of effective demand failures. Critiques and critics of mainstream macroeconomics. Mr. Farmer, Mr. Leijonhufvud

203A. Probability and Statistics for Econometrics. Lecture, three hours. Provides statistical tools necessary to understand econometric techniques. Random variables, distribution and density functions, sampling, estimators, estimation techniques, hypothesis testing, and statistical inference. Use of economic problems and examples. S/U or letter grading. Mr. Sharma

203B. Introduction to Econometrics: Single Equation Models. Lecture, three hours. Estimation of basic linear regression model, testing hypotheses, generalized least squares, serial correlation, heteroskedasticity, multicollinearity, error-in-variables, distributed lags, qualitative dependent variables, and forecasting. S/U or letter grading.

203C. Introduction to Econometrics: Systems Models. Lecture, three hours. Multivariate regression, simultaneous equation estimation, identification, and latent variables. S/U or letter grading. Ms. Cameron

204A-204Z. Applications of Economic Theory. Lecture, three hours:

M204L-M204M-M204N. Seminars: Pharmaceutical Economics and Policy. (Formerly numbered M204L.) (Same as Health Services M204A-M204B-M204C.) Seminar, three hours every other week for three terms. Prerequisites: courses 201A-201B-201C or equivalent, graduate standing in public health or economics, consent of instructor. Various topics in economics of pharmaceutical industry, including rates of innovation, drug regulation, and economic impact of pharmaceuticals. In Progress grading. Mr. Intriligator, Mr. Schweitzer

205. Economic Modeling. Lecture, three hours. Development of modeling skills by considering a sequence of economic issues (e.g., peak load pricing, regulation, monopoly, capital asset pricing, Pareto efficiency). Emphasis on multivariate constrained optimization. S/U or letter grading. Mr. Intriligator, Mr. McCall, Mr. Sharma

207. History of Economic Thought. Lecture, three hours. Topics from classical economics, including work of Smith, Ricardo, and Mill, and developments from the 1870s, including contributions of major figures of the marginalist revolution, the socialist controversy, and history of welfare economics. S/U or letter grading. Mr. Ostroy

Economic Theory

211A-211B. Economics of Uncertainty, Information, and Games. Lecture, three hours. Prerequisites: course 201C, introductory probability. Theory of individual decision making under uncertainty, applied to topics such as asset pricing models, adverse selection, moral hazard, bargaining, signaling, auctions, and search. S/U or letter grading. Mr. Levine, Mr. McCall, Mr. Riley

212A-212Z. Topics in Advanced Theory. Lecture, three hours. Current research in microeconomic theory. Content varies. Courses in this sequence not ordinarily given every year. May be repeated for credit. S/U or letter grading.

212A. Search Theory. Prerequisites: calculus, introductory probability. Price searching, queueing, Brownian motion, martingales, and applications to the theory of the firm. Mr. McCall

212B. Applied Game Theory. Prerequisites: calculus, introductory probability. Use of theory of Bayesian games to study bargaining, monetary theory, and oligopoly. Use of theory of mechanisms to study auction design and imperfectly competitive markets. Mr. Levine, Mr. Riley

213A-213B. General Equilibrium and Game Theory. Lecture, three hours. Prerequisite: course 201C or consent of instructor. Selected advanced theoretical topics of current interest and introduction to modern mathematical economics, including general equilibrium theory and game theory. S/U or letter grading. Mr. Ellickson, Mr. Ostroy, Mr. Shapley

214A-214Z. Topics in Mathematical Economics. Lecture, three hours. Prerequisite: course 213B or consent of instructor. Current research in mathematical economics. Content varies. Ordinarily only two courses in this sequence are given every year. May be repeated for credit. S/U or letter grading:

214A. General Equilibrium Theory. Prerequisite: course 201C or equivalent or consent of instructor. Core convergence theorem, cooperative and noncooperative approach to competitive equilibrium theory, perfectly competitive equilibria, the no-surplus condition, and applications to mechanism theory and incomplete market models. Mr. Ostroy

M214B. Game Theory. (Same as Political Science M208A.) Prerequisites: course 213A or suitable mathematics courses. Bargaining theory, the core, the value, other solution concepts. Applications to oligopoly, general exchange and production economies, and allocation of joint costs. Mr. Shapley

M214C. Large Economies. (Same as Political Science M208C.) Prerequisites: course 213A or suitable mathematics courses. Consideration of economics with a continuum of consumers and with a continuum of goods. Basic model applied to perfectly competitive equilibrium, the core, location models, and other models with nonconvex preferences and/or technology. Mr. Ellickson

M215. Topics in Applied Game Theory. (Same as Political Science M208B.) Lecture, three hours. Prerequisites: calculus or introductory probability, and graduate standing in economics or consent of instructor. Survey and applications of major solution concepts to models of bargaining, oligopoly, cost allocation, and voting power. S/U or letter grading. Mr. Shapley

219A-219B-219C. Workshops: Economic Theory and Mathematical Economics. Lecture, three hours. Prerequisite: consent of instructor. Workshops for dissertation and pre-dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.

Also see Management 200 (game theory and information economics), 203A (decision theory), 203B (economics of information)

Monetary Economics

221A-221B. Monetary Economics I, II. Lecture, three hours. S/U or letter grading:

221A. Prerequisite: course 202C. Emphasis on empirical studies in money and banking. Econometric implications of rational expectations, random vs. deterministic trends, unemployment, central bank operating procedures, and evolution of monetary institutions. Mr. Leijonhufvud, Mr. Tabellini

221B. Prerequisite: course 221A. Emphasis on theoretical aspects of monetary economics. Financial intermediation, models of banking panics, asset prices volatility, contract theory, game theoretic models of policy, and Keynesian models with monopolistic competition, search, and coordination failures. Mr. Leijonhufvud, Mr. Oh

222A-222Z. Topics in Monetary Economics. Lecture, three hours. Current research in monetary economics. Content varies. May be repeated for credit. S/U or letter grading:

M222A. Control and Coordination in Economics. (Same as Computer Science M222.) Prerequisite: graduate standing in economics or engineering or consent of instructor. Recommended: appropriate mathematics course. Stabilization policies, short- and long-run dynamics and stability analysis; decentralization, coordination in teams; certainty equivalence and separation theorems; stochastic and learning models. Bayesian approach to price and output rate adjustment. Mr. Aoki

229A-229B-229C. Workshops: Monetary Economics. Lecture, three hours. Prerequisite: consent of instructor. Workshops for dissertation and pre-dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading. Mr. Leijonhufvud, Mr. Tabellini

Also see Management 239A, 239B, 239C (Ph.D. sequence in finance), 239D (advanced topics in finance), 239X-239Y-239Z (finance workshops)

Econometrics

231A. Econometrics: Single Equation Models. Lecture, three hours. Linear regression model, specification error, functional form, autocorrelation, nonlinear estimation, distributed lags, nonnormality, univariate time series, qualitative dependent variables, aggregation, structural change, and errors-in-variables. S/U or letter grading. Mr. Leamer

231B. System Models. Lecture, three hours. Multivariate regression, errors-in-variables, simultaneous equations, identification, proxy variables, latent variables, factor analysis of panel data, asymptotic distribution theory. S/U or letter grading. Mr. Sharma

232A-232Z. Topics in Econometrics. Lecture, three hours. Prerequisites: courses 231A, 231B. Current research in econometrics. Content varies. Courses in this sequence not ordinarily given every year. May be repeated for credit. S/U or letter grading.

M232A. Bayesian Econometrics. (Same as Political Science M208E.) Subjective probability, introduction to decision theory, Bayesian analysis of regression, sensitivity analysis, simplification of models, criticism. Mr. Leamer

232B. Time Series. Stationary stochastic processes, Box/Jenkins methods, spectral analysis, forecasting, rational expectation models, analysis of macroeconomic data. Mr. Sharma

239A-239B-239C. Workshops: Econometrics. (Formerly numbered 239A-239B.) Lecture, three hours. Prerequisite: consent of instructor. Workshops for dissertation and pre-dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.

Economic History

241. Economic History of Western Europe. Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Seminar on European economic history, with emphasis on evolution of institutions and growth. Serfdom, medieval agriculture and the agricultural revolution, demographics, industrial revolution, imperial expansion, and decline of Britain. S/U or letter grading. Mr. Rosenthal, Mr. Sokoloff

242. Economic History of the U.S. Lecture, three hours. Seminar on American economic history. Onset of industrialization, relative economic backwardness of the South, slavery, technological change, rise in industrial concentration, women in the labor force, development of financial markets. S/U or letter grading. Mr. Sokoloff

243A-243Z. Topics in Economic History. Lecture, three hours. Current research in economic history. Content varies. May be repeated for credit. S/U or letter grading.

249A-249B-249C. Von Grep Workshops: History of Entrepreneurship in the U.S. Economy. Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Workshops for advanced graduate students. Research in progress discussed by visiting experts, UCLA faculty members, graduate students. S/U grading. Mr. Sokoloff

Public Finance

251A. Theory and Policy of Taxation. Lecture, three hours. Examination of influence of taxation on economic efficiency and incidence of taxation in first part of course. Topics include tax equivalences, Ramsey rules, and alternative forms of taxation. Special tax provisions, tax incentives, and progressivity in taxation in second part of course. S/U or letter grading. Mr. Harberger

251B. Cost-Benefit Analysis of Public Projects and Programs. Lecture, three hours. Prerequisite: course 251A. Presentation of those aspects of applied capital theory that are relevant in decisions concerning investment projects in first part of course. Differences between social and private benefits and costs (shadow prices) for foreign exchange, capital, and labor, with applications to public investment decisions, in second part of course. S/U or letter grading. Mr. Harberger

252. Economics of Federalism. Lecture, three hours. Theories of perfect games and social organization. Role of government, collective goods, collective defense, local public goods, spillovers, and intergovernmental relations. S/U or letter grading. Mr. Thompson

253A-253Z. Topics in Public Finance. Lecture, three hours. Current research in public finance. Content varies. Topics include Social Security taxes and programs, unemployment insurance, public provision of medical care, theory of public goods, and theory of public choice. May be repeated for credit. S/U or letter grading.

254A-254B-254C. Workshops: Public Economics. Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Workshops for advanced graduate students. Research in progress discussed by graduate students, UCLA faculty members, visiting experts. S/U grading.

Labor Economics

261A-261B. Labor Economics I, II. Lecture, three hours. S/U or letter grading:

261A. Wage determination in competitive labor markets. Extension of wage determination to schooling and occupational choice, life cycle earnings profiles, discrimination, minimum wage legislation, and unionism. Emphasis on empirical literature. Mr. Welch

261B. Prerequisite: course 261A. Models of life cycle learning and work behavior, with particular emphasis on recent literature examining labor force behavior and experience of women. Ms. Currie, Mr. Welch

262A-262Z. Topics in Labor Economics. Lecture, three hours. Current research in labor economics. Content varies. May be repeated for credit. S/U or letter grading.

269A-269B-269C. Workshops: Labor Economics. Lecture, three hours. Prerequisite: consent of instructor. Workshops for dissertation and pre-dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading. Mr. Welch

Industrial Organization

271A-271B. Industrial Organization, Price Policies, and Regulation I, II. Lecture, three hours. S/U or letter grading:

271A. Major economic aspects of property rights system. The firm and the market compared from perspective of alternative arrangements for allocating resources. Traditional problems of competition, monopoly, and industrial concentration. Brief analysis of those portions of antitrust policy bearing on industrial structure. Mr. Demsetz

271B. Prerequisite: course 271A. Study of firm organization and pricing under conditions of less than perfect competition; information costs and advertising; economic and legal analysis of marketing practices such as discrimination, tie-in selling, resale price maintenance, exclusive dealing, and territorial arrangements. Mr. Klein

271C. Mathematical Theory in Industrial Organization. Lecture, three hours. Prerequisites: courses 201A-201B-201C. Formal modeling of theory of industrial organization: principal-agent problem, entry deterrence, endogenous price discrimination, monopolistic competition, new approaches to rationality. S/U or letter grading. Mr. Dick

272A-272Z. Topics in Industrial Organization. Lecture, three hours. Current research in industrial organization. Content varies. May be repeated for credit. S/U or letter grading.

273A. Public Utility Regulation. Lecture, three hours. Theory, practice, and consequences of regulation in electric power, gas, water, telecommunications, broadcasting, and other regulated industries; experiences of unregulated monopoly and public enterprises by way of contrast. S/U or letter grading.

273B. National Transport Policy. Lecture, three hours. Regulation of surface and air carriers, pricing and investment in public transport facilities, policy toward merchant marine. S/U or letter grading.

279A-279B-279C. Workshops: Business Organization. Prerequisite: consent of instructor. Workshops for dissertation and pre-dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading. Mr. Demsetz, Mr. Klein

Also see Management 262 (pricing policy)

International Economics

281A. International Trade Theory. Lecture, three hours. Theoretical and empirical analysis of microeconomic relationships among countries. Determinants of commodity and factor flows, prices, and factor rewards. Effects of trade barriers. S/U or letter grading. Mr. Leamer

281B. International Finance. Lecture, three hours. Theory and evidence on balance of payments, exchange rate determination, international transmission of inflation and business cycles, macroeconomic policy in open economies, alternative monetary systems. S/U or letter grading. Mr. Edwards

281C. International Economics. Lecture, three hours. Theoretical and empirical analysis of interrelation between flows of capital, people, and goods. Applications to current policy. S/U or letter grading. Ms. Ozler

282A-282Z. Topics in International Economics. Lecture, three hours. Current research in international economics. Content varies. May be repeated for credit. S/U or letter grading.

283. Economics of Soviet External Involvement.

Lecture, three hours. Prerequisite: consent of instructor. Interrelations between Soviet economy and the U.S.S.R.'s international behavior. Major topics, considered in various regional contexts of Soviet activity, include (1) extent of the U.S.S.R.'s global involvement, (2) domestic economic constraints on that involvement, and (3) external influences on Soviet domestic economic development. S/U or letter grading.

Mr. Becker

284. Soviet Economic Theory and Organization.

Lecture, three hours. Overall strategy of planning used by U.S.S.R. planners and specific planning methods, interpreted broadly to cover not only instructions and objectives but also institutional arrangements. Intended and unintended outcomes of the methods. S/U or letter grading.

Mr. Murphy

285A-285B-285C. Workshops: International Economics.

Lecture, three hours. Prerequisite: consent of instructor. Workshops for dissertation and predissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.

Mr. Edwards, Mr. Harberger

Development Economics

286A. Economic Development. Lecture, three hours. Prerequisites: courses 201C, 202C. Study of theoretical and empirical problems related to developing countries. Emphasis on relation between international trade and economic development, dynamic aspects of commercial policies, inflation, stabilization, structural adjustment, growth and migration. S/U or letter grading.

Mr. Edwards

286B. Analysis and Appraisal of Development Projects.

Lecture, three hours. Prerequisite: course 286A. Methodology for evaluating investment projects, with special attention to types of issues that arise in developing countries. Discussion of social versus private evaluation criteria; applications to highway, electricity, and irrigation projects. S/U or letter grading.

Mr. Harberger

287A-287Z. Topics in Development Economics.

Lecture, three hours. Current research in development economics. Content varies. Courses in this sequence not ordinarily given every year. May be repeated for credit. S/U or letter grading.

287A. Economic Problems of Latin America. Economic history of Latin America. The great depression, import substitution and industrialization, inflation and growth, free market experiments, and economic integration.

Mr. Edwards

287B. Economic Development in East Asia. Recent economic history of East Asia, focusing on postwar development of Japan, Korea, and China. Emphasis on role of international investment and trade, especially with the U.S., in area's economic development.

Urban Economics

291A-291B. Urban Economics. Lecture, three hours. Course 291A is prerequisite to 291B. Implications of urbanization for economic analysis. Development of theory in course 291A; emphasis on policy in 291B. Use of monocentric model of urban land use to introduce location and transportation costs. Examination of housing, transportation, and local public services.

Ms. Cameron

293A-293Z. Topics in Urban Economics. Lecture, three hours. Current research in urban and regional economics. Content varies. Serves as forum for presentation of papers on urban economics by students, UCLA faculty members, and visitors. May be repeated for credit. S/U or letter grading.

Ms. Cameron

Special Studies

299A-299B-299C. Workshops: Preparing a Dissertation Proposal. Lecture, three hours. Workshops for third-year graduate students who are preparing for oral qualifying examination. Presentation of journal articles for critical analysis to develop students' analytical skills. Presentation of students' own research for critical analysis by fellow students and faculty. Workshops open to research in all fields of economics. S/U grading.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching College Economics (2 units). Discussion, one hour; laboratory, three hours. Prerequisite: graduate standing. Required of all new teaching assistants. Classroom practice in teaching, with individual and group instruction on related educational methods, materials, and evaluation. May be repeated for credit. S/U grading.

596. Individual Study (2 to 8 units). Directed individual study or research. S/U grading.

597. Individual Study: Graduate Examinations (2 to 8 units). Directed individual study in preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. S/U grading.

599. Individual Research: Ph.D. Dissertation (2 to 8 units). Prerequisite: advancement to Ph.D. candidacy. Directed individual research in preparation of Ph.D. dissertation. S/U grading.

Economics/System Science (Interdepartmental)

2263 Bunche Hall, (310) 825-1011

Professors

Masanao Aoki, Ph.D. (*Economics*)

Bryan C. Ellickson, Ph.D. (*Economics*;

Distinguished Teaching Award)

Michael D. Intriligator, Ph.D. (*Economics*)

Stephen E. Jacobsen, Ph.D. (*Electrical Engineering*)

Scope and Objectives

The major is an alternative to the regular departmental major in economics and combines work in the School of Engineering and Applied Science with preparation in economic theory and in those aspects of mathematics and statistics necessary for the study of quantitative aspects of economics and systems theory. The major is appropriate for students with interests in such areas as economic theory, mathematical economics, econometrics, feedback and control systems, optimization, computing techniques, and the modeling and analysis of various socioeconomic systems.

Bachelor of Science Degree**Admission**

Ten to 15 students are admitted each year based on space availability, completion of preparation for the major courses, and the GPA in those courses. Minimum qualifications for admission include the completion of six preparatory courses (four of the mathematics courses with a minimum GPA of 3.0 exclusively must be included) and an overall 2.75 GPA in the preparatory courses. Any transfer credit applied to the major is used in GPA calculations.

Pre-Economics/System Science Major

While you are completing the lower division preparation courses for the major, you may be classified as a pre-economics/system science major. When you have satisfied the minimum admission qualifications (see above), you may apply by written application for admission to the major at the undergraduate counselor's office in 2253 Bunche Hall.

Preparation for the Major

Required: Economics 1 and 2; Computer Science 10C or 10F or Program in Computing 3 or 10A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B. All courses must be completed for a letter grade of C- or better.

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval; consult the undergraduate counselor before enrolling in any courses for the major.

The Major

Required: Fourteen upper division courses as follows: six courses in economics selected from Economics 101A and above, including 101A, 101B, 102, and one course from 141, 142, 144, 145, 146, 147A, 147B; six courses in system science selected from Computer Science 170, Electrical Engineering 102, 103, 131A, 131B, 136, 141, 142, including 131A (or Mathematics M150A or Statistics M152A) and 131B (or Mathematics 151 or Statistics 152B); two courses in mathematics selected from Mathematics 110A and above (such mathematics courses may not also be applied toward the system science requirements).

Recommended courses include Computer Science 170 and Electrical Engineering 141 and 142 in the area of dynamic systems analysis and Electrical Engineering 136 in the area of optimization.

All upper division major courses must be completed for a letter grade of C- or better, with an overall 2.0 GPA.

Education

1605 Maxxam Building, (310) 825-8327

Professors

Helen S. Astin, Ph.D.
 Nicholas Blurton Jones, Ph.D.
 James E. Bruno, Ph.D.
 Sol Cohen, Ph.D.
 John N. Hawkins, Ph.D.
 Carollee Howes, Ph.D.

Associate Professors

James W. Trent, Ph.D.
 Concepción Valadez, Ph.D.
 Wellford Wilms, Ph.D.

Lecturer

Edward (Chip) Anderson, Ph.D.

Scope and Objectives

The undergraduate specialization in education is designed to (1) allow students to learn more about the multitude of professional and research issues in the field of education and to understand the complex interactions between social, political, and economic forces which influence and shape educational policies in America, (2) provide an introductory educational sequence for students who wish to pursue careers in education either as teachers or researchers, and (3) present an information base in the area of education by which UCLA students can become better consumers of educational services as future parents, taxpayers, and citizens.

The teaching philosophy is governed by a need to address these objectives with a logical and time-efficient course structure — lower division courses that provide an introduction to educational policy, upper division social and behavioral sciences courses (sociology, political science, history, philosophy, anthropology, economics, psychology) taught in the Graduate School of Education, upper division elective courses in which students can pursue their own specific interests in the area of education, and a special studies research experience. The specialization must be taken in conjunction with a departmental or interdepartmental major.

Special Undergraduate Program

Enrollment is limited but includes freshman, sophomore, or junior students. To enter the specialization you must submit a formal application to the Office of Student Services in the

Graduate School of Education. All courses applied toward the specialization must be taken for a letter grade.

Preparation for the Specialization

Required: Two courses from Education 91A through 91E.

Upper Division

Required: Two social sciences courses from Education M108, 112, C191A through C191E; two elective courses from Education 100, M102, 125A, M148, 180, 181, 192, 197. Additional courses will be applicable as approved.

After successfully completing the six required courses with at least a 2.5 GPA, you must complete one special studies research experience (Education 199) or practicum course (Education 197) with a professor in the Graduate School of Education. Internship research areas include administration, curriculum, and teaching studies; higher education; psychological foundations and educational research methods; and social sciences (history, economics, anthropology, sociology, philosophy).

For further information and application forms, contact the Graduate School of Education Office of Student Services at the program address.

Scope and Objectives

An interest in English and American literature draws many students to the Department of English, which also offers courses in other fields, including the history and structure of the English language itself. Although committed to no single method or approach, the department

encourages an emphasis on literary history and requires of its undergraduate majors a firsthand acquaintance with such influential writers as Chaucer, Milton, and Shakespeare. Students may range outward from this core to a rich variety of other fields — literary criticism, for example, or the ethnic literatures and popular culture of America, or the relation of literature to such complementary disciplines as history, sociology, psychology, and philosophy. Qualified students may elect a concentration in creative writing or an interdisciplinary program in American studies.

An understanding and appreciation of literature can furnish lifelong rewards. In addition to such personal benefits, the department seeks to impart the capacity to make balanced critical judgments and the ability to write the English language persuasively, with point and effect. Such skills are essential to success in a variety of professions for which the major in English can provide excellent preparation, including law, administration, business, and teaching.

A graduate program leading to the Master of Arts degree is available for students who wish to continue the study of literature at an advanced level. A parallel program continues to the Ph.D. degree. Because the Ph.D. program may require five years or more, it is intended only for qualified students who are seriously committed to advanced literary scholarship and, in some cases, to a career in college or university teaching.

Bachelor of Arts Degree

Admission to Courses in English

You must have completed the Subject A requirement before taking any courses in English (other than English A or 2). For further information regarding Subject A, see "Undergraduate Degree Requirements" in Chapter 2.

Preparation for the Major

Required: English 3, 4, 10A, 10B, 10C taken in the stated sequence (each course is a prerequisite for the next course).

Extra-Departmental Requirement in Foreign Literature or Foreign Language: All English majors must have completed either (1) level five or equivalent in any one foreign language or (2) level three or the equivalent of one foreign language and two additional courses in foreign language or foreign literature, including foreign literature in translation (see course listings later in this section of the catalog). Italian 46 may not be applied. The courses may be taken on a P/NP grading basis.

The Major

Required: English 141A or 141B, 142A, 142B, 143, at least one course from the 180 series, and a minimum of seven additional upper division English courses. At least five of the seven courses must be selected from 140A, 140B, 142C, or 150 through 190. At least one of the

seven courses must be in literature before 1800 (the 150 series).

You are encouraged to choose additional electives from courses 140A through M197. English 140A is especially recommended if you plan graduate work in literature. You may wish to select several courses in the relevant classical and postclassical foreign literatures and thought.

Special Programs

The department offers special programs in American studies, creative writing, and general literature, and one for international students. For all programs, the regular "Preparation for the Major" sequence as well as the departmental foreign language requirement apply. Because of the specialized nature of these programs, students should consult the departmental counselor before selecting and declaring one of them as a concentration.

American Studies — This program consists of nine upper division courses in English and six related upper division courses taken in other departments. The nine English courses must include 178; one course from M102 through M107A or 109; two courses from 142A, 142B, 143; three courses from the 170 series, with at least one course from 170, 171, or 172, and no more than one course from 176 or 177; and one course pertaining to American studies selected from 187, 188, or 189, taken preferably in the senior year. Of the six upper division courses in other departments, four must be in a selected discipline (history, political science, sociology, etc.). One of the four courses must deal with the methodology of the discipline, while the other three must explicitly treat American culture. The courses must be selected in consultation with the English departmental counselor.

General Literature — This program consists of nine upper division courses in English or American literature and six upper division courses in foreign literatures (at least one of which must be taught in the original language). The nine English courses must include 141A, 141B, or 143; 142A and 142B; at least one course from the 150 series; and four electives selected from courses 140A through M197 (students intending graduate work in literature are especially encouraged to take English 140A). A listing of acceptable courses may be obtained from the department.

Creative Writing — This program consists of English 142A and 142B and a minimum of 10 additional upper division English courses: three creative writing courses from the 133A through 135C series, taken in a single genre (poetry, short story, or drama), three literature courses paralleling the creative writing specialization, and four electives selected from courses 140A through M197. You may declare this program as a concentration only after you have completed three creative writing workshops in a single genre. If you are planning to

select this program, you are encouraged to take course 20; for further details, contact the departmental counselor.

International Students Program — The department offers a special program in English to bona fide international students whose native language is other than English. For this program, you must satisfy all requirements listed under "Preparation for the Major"; you may fulfill the departmental foreign language requirement with your own native language. The following 12 courses are required for the program itself: English as a Second Language 103, 106, 109; two courses from English 100 through 199; 122; 142A, 142B; and four additional courses from those numbered 140A through 199. If you complete this program and wish to pursue graduate study, you should consult the departmental counselor about programs of study and requirements for admission.

National Teachers Examination Waiver for Instructional Credential in English

On request the department will provide a letter asking for a waiver of the National Teachers Examination (NTE) to qualified graduating English majors. To qualify, you must complete English 120A or 120B, 130A or 130B, and at least one American literature course selected from 170 through 174, as part of or in addition to the major. You are encouraged to select additional courses in language, children's literature, literature for adolescents, American literature, and literature for minorities as some of your electives. The NTE is only one requirement in obtaining an instructional credential. For additional information on courses leading to the credential, consult the Graduate School of Education at 825-8328.

Honors Program

Admission — The honors program is open to English majors with a 3.5 departmental and a 3.25 overall grade-point average. If you have a lower GPA, you may petition for admission to the program, but these grade-point averages must be achieved before graduation in order to qualify for honors. You should apply by Spring Quarter of your junior year. For application forms and further information, contact the departmental counselor.

Requirements — All honors students are required to take English 140A during the junior year and one seminar from the English 180 through 189 sequence, preferably before the senior year. In Fall Quarter of your senior year, you must take course 199HA. During Winter and Spring Quarters, you take courses 199HB and 199HC, in which you write a thesis under the direction of a faculty member. The thesis determines whether you receive high honors, honors, or no honors.

M.A. and Ph.D. Degrees

All students admitted into the UCLA English graduate program with a B.A. must enter the M.A. course of study, which also serves as the first phase of the doctoral program. The M.A. degree may be obtained either by passing the first qualifying examination (which also grants admission into the second phase of the doctoral program) or by writing a thesis. Students admitted with a master's degree may waive some course requirements but must pass the first qualifying examination.

Admission

Admission to the program is based on a thorough review of the student's academic record. Ordinarily, students holding the B.A. are expected to meet these minimum requirements: an undergraduate major or program that provides preparation for advanced study of literature; a grade-point average in all English courses and in the junior and senior years of at least 3.5; and a recent (within the last five years) score on the Graduate Record Examination (GRE) of 650 on both the verbal section of the General Test and the Literature in English Subject Test or a combined score of 1,300. Applicants holding the M.A. are expected to have a grade-point average of at least 3.7 in all graduate courses and a correspondingly higher score on the Literature in English Subject Test. A minimum of three letters of recommendation attesting to your ability to succeed in graduate study and a writing sample are also required. Care should be taken with the statement of purpose and the writing sample, since the quality of thought and argument they exhibit, as well as their style, weigh significantly in admissions decisions. For a descriptive brochure, write to the Graduate Assistant, Department of English, 2225 Rolfe Hall, UCLA, Los Angeles, CA 90024-1530.

If you elect the M.A. thesis option, you may, on completion of that course of study, petition to enter the doctoral program provided you have maintained a grade-point average of at least 3.7 in your graduate studies and are recommended by your thesis committee. Such petitions are not automatically approved and should be accompanied by appropriate supporting materials.

Foreign Language Requirement

If you are pursuing only the M.A. degree, you may fulfill the language requirement by demonstrating reading knowledge of any foreign

language. This requirement should be satisfied at the beginning of your first term in residence, but in any event no later than the midpoint of the term in which you complete all degree requirements.

If you are pursuing the Ph.D., you are expected to have reading knowledge of two foreign languages or to demonstrate superior proficiency in a single language (which must have prior approval of the vice chair of graduate studies). The departmentally approved languages are French, German, Italian, Spanish, Latin, and Greek, but other languages may be substituted by petition on the basis of a special research interest.

Course Requirements

Nine letter-graded English courses from the 200 series are required for the M.A. If you enter the program with an M.A. in English, some of your prior coursework may be accepted by petition. An additional five letter-graded courses are required for the Ph.D.

Teaching Experience

Although teaching experience is not required, most students in the Ph.D. program have the opportunity to serve as teaching assistants after passing English 495A and being in the program for at least one year. Teaching assistantships are awarded on the basis of merit.

Qualifying Examinations

The doctoral program is divided into three stages, the first two of which culminate in the first and second qualifying examinations.

First Stage

First Qualifying Examination Option — If you are pursuing the Ph.D. degree, you take the first qualifying examination sometime early in your third year in the program. The examination consists of written work from any two seminars (substantial seminar papers) and a two-hour oral test in three historical periods or in two historical periods and one genre. The graduate faculty decides in each case whether to grant an M.A. and whether you will be admitted to the second stage of the Ph.D. program. Further details on breadth and philology requirements are available from the department.

Terminal M.A. Thesis — Students electing to take a terminal M.A. must request a thesis committee (three faculty members) from the graduate counselor at least two terms before completing the program. The committee then meets with you to consider your thesis proposal. Your thesis should not be less than 40 nor more than 60 pages in length.

Second Stage

In this stage of the program, you are encouraged to take as many seminars as possible (any graduate seminar may be repeated for credit), as well as suitable courses in other departments. When sufficiently well prepared and after satisfying the second language re-

quirement, you take the second qualifying examination.

Second Qualifying Examination — The University Oral Qualifying Examination, at least two hours in length, deals with your prospectus, a substantially researched paper which has been approved by the committee chair and distributed to the doctoral committee at least two weeks before the scheduled examination. The committee must certify that the prospectus has been approved. If you fail the examination, you may, at the discretion of the committee, repeat it once only.

Third Stage/Candidate in Philosophy Degree

Once you have passed the second qualifying examination, you may advance to candidacy and, on application, receive the Candidate in Philosophy (C.Phil.) degree. You may then proceed with the writing of the dissertation.

Final Oral Examination

A final oral defense of the dissertation is optional with the doctoral committee but is usually not required.

Lower Division Courses

A. Introduction to University Discourse (No credit). See listing under "English Composition."

2. Approaches to University Writing. (Formerly numbered B.) See listing under "English Composition."

3. English Composition, Rhetoric, and Language. See listing under "English Composition."

3H. English Composition, Rhetoric, and Language (Honors). See listing under "English Composition."

4. Critical Reading and Writing. Prerequisites: satisfaction of Subject A requirement, course 3 or equivalent. Introduction to literary analysis, with close reading and carefully written exposition of selections from one or more of the principal modes of literature: poetry, prose fiction, and drama. Minimum of six papers (three to five pages each).

4H. Critical Reading and Writing (Honors). Discussion, three hours. Prerequisites: satisfaction of Subject A requirement, course 3 or equivalent, consent of department. Introduction to literary analysis, with close reading and carefully written exposition of selections from one or more of the principal modes of literature: poetry, prose fiction, and drama. Minimum of six papers (three to five pages each).

10A. English Literature to 1660. Prerequisites: satisfaction of Subject A requirement, courses 3, 4. Study of selected works of the period, beginning with selections from Old English poetry and including writings by Chaucer, Spenser, Shakespeare, Donne, and Milton. Minimum of three papers (three to five pages each) or equivalent.

Mr. Allen, Mr. Condren, Mr. Rodes

10B. English Literature, 1660-1832. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A. Study of selected works of the period, including writings by Dryden, Pope, Swift, Wordsworth, and Keats. Minimum of three papers (three to five pages each) or equivalent.

Mr. Batten, Mr. Burwick, Mr. Novak

10C. English Literature, 1832 to the Present. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B. Study of selected works of the period, including writings by Tennyson, Arnold, Browning, Yeats, Joyce, and Eliot. Minimum of three papers (three to five pages each) or equivalent.

Mr. Aguirre, Mr. Berst, Mr. Kolb

20. Introduction to Creative Writing. Prerequisites: satisfaction of Subject A requirement, course 3 or equivalent, submission of creative or expository writing samples to a screening committee. Designed to introduce fundamentals of creative writing. Emphasis either on poetry, fiction, or drama, depending on wishes of instructor(s) during any given term. Readings from assigned texts and weekly writing assignments required.

70. Major British Authors before 1800. Prerequisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 10A or 10B. Study of selected masterpieces of English literature before 1800, including works of such writers as Chaucer, Shakespeare, Donne, Milton, Swift, Pope, Johnson, and Fielding.

Mr. Rousseau

75. Major British Authors, 1800 to the Present. Prerequisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 10B or 10C. Study of selected masterpieces of English literature from 1800 to the present, including works of such writers as Wordsworth, Coleridge, Keats, Tennyson, Dickens, Browning, Yeats, Joyce, and Eliot.

Mr. Berst, Mr. Hutter, Mr. Kolb

80. Major American Authors. Prerequisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for any courses in the 170 series. Introduction to the chief American authors, with emphasis on poetry, nonnarrative prose, and short fiction of such writers as Poe, Dickinson, Emerson, Whitman, Twain, Frost, and Hemingway.

Ms. Garfield, Mr. Goodwin, Mr. Wortham

85. The American Novel. Prerequisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 171, 172, or 174. Development, with emphasis on form, of the American novel from its beginning to the present day. Includes works of such novelists as Hawthorne, James, Fitzgerald, and Faulkner.

Mr. Allmendinger, Ms. Saldivar-Hull

90. Shakespeare. Prerequisite: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 142A or 142B. Survey of Shakespeare's plays, including comedies, tragedies, and histories, selected to represent Shakespeare's breadth, artistic progress, and total dramatic achievement.

Mr. Little, Mr. Rodes, Ms. Rowe, Mr. Watson

95A. Introduction to Poetry. Prerequisite: satisfaction of Subject A requirement. Recommended for instructional credential candidates. Study of critical issues (metrics, diction, figurative language, symbolism, irony and ambiguity, form and structure) and aesthetic issues, including evaluative criteria, followed by close critical analysis of a selection of representative poems. P/NP or letter grading.

Mr. Grose, Mr. Sheats, Mr. Thorslev

95B. Introduction to Drama. Prerequisite: satisfaction of Subject A requirement. Examination of representative plays; readings may range from Greek to modern drama. Emphasis on critical approaches to dramatic text; study of issues such as plot construction, characterization, special uses of language in drama, methods of evaluation. P/NP or letter grading.

Mr. Berst, Mr. Rodes

95C. Introduction to Fiction. Prerequisite: satisfaction of Subject A requirement. Introduction to prose narrative, its techniques and forms. Analysis of short and long narratives and of critical issues such as plot, characterization, setting, narrative voice, realistic and nonrealistic forms. P/NP or letter grading.

Mr. Anderson

96. The Short Story in England and America. Prerequisite: satisfaction of Subject A requirement. Historical survey of the short story as a genre, from the 19th century to the present. P/NP or letter grading.

Mr. Anderson

97H. Honors Seminar for Freshmen and Sophomores. (Formerly numbered 197H.) Seminar, three hours. Prerequisites: courses 3, 4. Limited to 15 students. Recommended for lower division students who anticipate entering English honors program during their junior year. Content varies; see departmental counselor for information.

Mr. Batten

Upper Division Courses

100. Introduction to Special Topics and Genres. Prerequisite: satisfaction of Subject A requirement. Study of a particular topic, genre, or subgenre in literature such as satire, biography, parody, or a specialized classification of literature. May be repeated for credit. P/NP or letter grading.

Mr. Anderson, Mr. Tennyson, Mr. Thorslev

100W. Intensive Writing. See listing under "English Composition."

100WH. Intensive Writing (Honors). See listing under "English Composition."

101. Gay and Lesbian Literature. (Formerly numbered 100.) Prerequisite: satisfaction of Subject A requirement. Late-19th- and 20th-century fiction, drama, and poetry written on gay and lesbian themes. Special emphases (on different genres and on gay male or lesbian literature) vary with individual instructors.

Mr. Thorslev

M102. Asian American Literature. (Same as Asian American Studies M102.) Prerequisite: satisfaction of Subject A requirement. Prose and poetry by Americans of Chinese, Japanese, Filipino, and Korean origins. Study of interaction of autobiography and fiction, nourishing and limiting influences of mainstream American and Asian literary traditions, and conflict between ideological and literary criteria.

Ms. Cheung (F)

103. Jewish American Fiction. Prerequisite: satisfaction of Subject A requirement. Study of the fiction of Jewish writers in America, such as Bellow, Malamud, and Roth, focusing on encounter of Jewish ethical ideals and social values with the contemporary environment.

Mr. Novak

M104A. Early Afro-American Literature. (Same as Afro-American Studies M104A.) Prerequisite: satisfaction of Subject A requirement. Introductory survey of black American literature from the 18th century through World War I, including oral and written forms (folktales, spirituals, sermons; fiction, poetry, essays), by authors such as Phillis Wheatley, David Walker, Frances Harper, Frederick Douglass, Harriet Jacobs, Paul Laurence Dunbar, Charles W. Chesnut, Booker T. Washington, and Pauline Hopkins.

Ms. Smith, Mr. Yarborough

M104B. Afro-American Literature from the Harlem Renaissance to the 1960s. (Same as Afro-American Studies M104B.) Prerequisite: satisfaction of Subject A requirement. Introductory survey of 20th-century black American literature from New Negro Movement of post-World War I period to the 1960s, including oral materials (ballads, blues, speeches) and fiction, poetry, and essays by authors such as Jean Toomer, Claude McKay, Langston Hughes, Sterling Brown, Nella Larsen, Zora Neale Hurston, Richard Wright, Ann Petry, James Baldwin, and Ralph Ellison.

Ms. Smith, Mr. Yarborough

M104C. Afro-American Literature since the 1960s. (Same as Afro-American Studies M104C.) Prerequisite: satisfaction of Subject A requirement. Introductory survey of diverse forms of Afro-American literary expression produced from rise of Black Arts Movement of the 1960s to the present by writers such as Amiri Baraka, Nikki Giovanni, Alice Walker, Etheridge Knight, Toni Morrison, Martin Luther King, Jr., Paule Marshall, Ernest Gaines, Ishmael Reed, and Audre Lorde. P/NP or letter grading.

Ms. Smith, Mr. Yarborough

M105. The Chicano Experience in Literature. (Same as Chicana and Chicano Studies M105.) Prerequisite: satisfaction of Subject A requirement. Study of literature in English by and about Chicanos. Survey of depiction of the Chicano experience in American literature generally, with emphasis on development of Chicano literature itself, its cultural backgrounds, and distinctive uses of language.

Mr. Paredes, Ms. Saldivar-Hull

106. Native American Literary Studies. Prerequisite: satisfaction of Subject A requirement. Study of Native American oral cultures through translated documents (song-poems, life-stories, myths, tales, dream visions, speeches) and/or images in writing about Native Americans (poetry, fiction, history, anthropology, sociology).

Mr. Lincoln, Mr. Sarris

M107A. American Women Writers. (Same as Women's Studies M107A.) Prerequisite: satisfaction of Subject A requirement. Survey of literary works by American women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by American women.

Ms. Banta, Ms. Rowe

M107B. British Women Writers. (Same as Women's Studies M107B.) Prerequisite: satisfaction of Subject A requirement. Survey of literary works by British women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by British women.

Ms. Lewis, Ms. Mellor

M107C. Special Topics in Women and Literature. (Same as Women's Studies M107C.) Prerequisite: satisfaction of Subject A requirement. Variable specialized studies course in women and literature, with emphasis on a period, genre, particular theme, or nonnational literary grouping.

Ms. Cheung, Ms. Smith

108A-108B. The English Bible as Literature. Prerequisite: satisfaction of Subject A requirement. Principal literary monuments of the Old and New Testaments in King James Version. **108A.** Old Testament; **108B.** New Testament.

Mr. Aguirre, Mr. Dearing, Mr. Post

108C. The English Bible as Literature: Special Topics. Prerequisite: satisfaction of Subject A requirement. Study of the English Bible, with attention to particular literary themes, motifs, and genres. Possible discussion of influence of the Bible on discrete periods or individual authors in English literature. May be repeated for credit.

Mr. Aguirre, Mr. Dearing

109. Interdisciplinary Approaches to Literature. Prerequisite: satisfaction of Subject A requirement. Study of British or American literature in relation to other disciplines such as history, politics, philosophy, psychology. May be repeated for credit.

Mr. Burwick, Mr. Maniquis

110. Studies in Individual Authors. Prerequisite: satisfaction of Subject A requirement. Specialized study of the work of a single poet, dramatist, prose writer, or novelist. May be repeated for credit.

M111A. Literature of Myth and Oral Tradition. (Same as Folklore M111.) Prerequisite: satisfaction of Subject A requirement. Study of myth, dramatic origins, oral epic, folktale, and ballad, emphasizing Indo-European and Semitic examples.

Mr. Cosentino, Mr. Nagy

M111B. Anglo-American Folk Song. (Same as Ethnomusicology M124 and Folklore CM106.) Survey of Anglo-American balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values.

Mr. Porter

M111C. British Folklore and Mythology. (Same as Folklore M121.) Prerequisites: satisfaction of Subject A requirement, junior standing. Survey of folklore of the peoples of Britain, with attention to their history, function, and regional differences.

Mr. Nagy, Mr. Porter

M111D. Celtic Mythology. (Same as Folklore M122.) Prerequisite: Folklore 101 or consent of instructor. Survey of early materials, chiefly literary, for study of mythic traditions of the Celtic peoples, ranging from ancient Gaul to medieval Ireland and Wales.

Mr. Nagy

M111E. Survey of Medieval Celtic Literature. (Same as Folklore M112.) Prerequisite: satisfaction of Subject A requirement. Knowledge of Irish or Welsh not required. General course dealing with Celtic literature from earliest times to the 14th century.

Mr. Nagy

M111F. Celtic Folklore. (Same as Folklore M127.) Prerequisite: Folklore 101 or consent of instructor. Folkloric traditions of modern Ireland, Scotland, and other Celtic countries, with attention to current techniques of folkloristic research.

Mr. Nagy

M111G. Oral Traditions in Africa. (Same as Folklore M155.) Prerequisite: upper division standing. Survey of African folk traditions: folktales, epic, heroic poetry, and folk song.

Mr. Cosentino

112. Children's Literature. Prerequisite: satisfaction of Subject A requirement. Study of historical backgrounds and development of types of children's literature, folklore and oral tradition, levels of interest, criticism and evaluation, illustration and bibliography.

113. Literature for Adolescents and Young Adults. Prerequisite: satisfaction of Subject A requirement. Analysis and evaluation of literature intended mainly for students in junior and senior high schools. Review of mature books that are popularly suggested for this age group; study of interests and reading habits of young adults.

114. World Literatures in English. Prerequisites: satisfaction of Subject A requirement, consent of instructor. Survey of contemporary literature from English-speaking regions of the world, reviewing major genres from several countries and making cross-comparisons with the literatures. Generalizations concerning the nature of the English used by such writers. May be repeated for credit.

Mr. Cosentino, Ms. See

115A. American Popular Literature. Prerequisite: satisfaction of Subject A requirement. Study of main currents of popular and cultural taste as reflected in such genres as dime novels, detective fiction, and Western stories.

Mr. Nagy, Mr. Paredes

115B. British Popular Literature. Prerequisite: satisfaction of Subject A requirement. Readings in the literature of the British masses, from 16th-century broadsides to contemporary novels. Examination of social functions of literature.

Mr. Nagy

116. Science Fiction. Prerequisite: satisfaction of Subject A requirement. Study of science fiction and speculative literatures.

Mr. Guffey

117. Detective Fiction. Prerequisite: satisfaction of Subject A requirement. Study of British and American detective fiction and the literature of detection.

Mr. Hutter

118. Film and Literature. Prerequisite: satisfaction of Subject A requirement. Study of interdisciplinary relationships between film and literature, including theme and structure, and focusing on cinematic adaptations of literary works.

Mr. Goodwin

119. Literature of California and the American West. Prerequisite: satisfaction of Subject A requirement. Study of literature in English dealing with exploration, settlement, and emergent cultural awareness of the Western U.S. P/NP or letter grading.

Mr. Allmendinger, Mr. Wortham

120A. Language Study for Teachers: Elementary School. See listing under "English Composition."

120B. Language Study for Teachers of English: Secondary School. See listing under "English Composition."

120C. Language Study for Teachers of Subjects Other Than English: Secondary School. See listing under "English Composition."

121. History of the English Language. Prerequisite: satisfaction of Subject A requirement. Study directed toward English majors of main features in grammatical, lexical, and phonetic condition of the English language from Indo-European time to the present.

Mr. Condren, Ms. Minkova

122. Introduction to Structure of Present-Day English. Prerequisite: satisfaction of Subject A requirement. Introduction to techniques of linguistic description as applied to pronunciation, grammar, and vocabulary of modern English.

Ms. Minkova

129. Intermediate Exposition. See listing under "English Composition."

129H. Intermediate Exposition (Honors). See listing under "English Composition."

130A. Composition for Teachers: Elementary School. See listing under "English Composition."

130B. Composition for Teachers: Secondary School. See listing under "English Composition."

131A-131J. Advanced Exposition. See listing under "English Composition."

132. Composition and Society. See listing under "English Composition."

133A-133B-133C. Creative Writing: Poetry. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, consent of instructor (following submission of writing samples). Weekly exercises in writing of poetry, with practice in standard forms and meters and study of techniques. Classroom discussion based on student use. Only one course in sequence may be repeated for credit.

Mr. Gullans, Mr. Kessler, Mr. Yenser

134A-134B-134C. Creative Writing: Short Story. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, consent of instructor (following submission of writing samples). Three stories of average length to be completed during each term. Some of these may, with instructor's consent and student's wish, be substantial revisions of other stories presented. Classroom discussion based on stories presented. Only one course in sequence may be repeated for credit.

Mr. Kessler, Ms. See

135A-135B-135C. Creative Writing: Drama. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, consent of instructor (following submission of writing samples). Exploration of capacity of each student to write for the theater. Class discussion of student writing, individual conferences, rehearsed readings, and laboratory productions. Only one course in sequence may be repeated for credit.

Mr. Kessler, Mr. Rodes

136A-136B-136C. Practical Writing and Editing. See listing under "English Composition."

137. Advanced Computer Techniques for Students of English. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C, and Program in Computing 1 and 10A or consent of instructor. Concurrent instruction in writing computer programs for literary study and in the kinds of literary research that can be aided by computers. BASIC is taught; students must know how to operate a computer. Principles of computer science neither assumed nor taught.

Mr. Dearing

140A. Criticism: History and Theory. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of some major historical documents and theoretical statements in history of literary criticism, including works by such writers as Plato, Aristotle, Horace, Sidney, Dryden, Johnson, Kant, Coleridge, Wordsworth, Shelley, Arnold, James, Croce, and T.S. Eliot, with emphasis on major critical positions posed and developed by these writers, basis of their theoretical positions, and practical consequences of those positions. Possible discussion of recent trends in criticism.

Mr. Kolb, Mr. Pecora

140B. Criticism: Special Topics. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of limited periods and specialized issues and approaches in history of literary criticism, including moral, biographical, sociological, psychological, formal, structural, and deconstructionist. Area of concentration determined by instructor and listed in *Schedule of Classes*. Some study of literary texts, to illuminate the value and practical application of the approach, may be required.

Mr. Pecora, Mr. Reinhard

141A. Chaucer: The Canterbury Tales. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Introductory study of Chaucer's language, versification, and historical and literary background, including analysis and discussion of his long major poem, *The Canterbury Tales*. Satisfies department's Chaucer requirement.

Mr. Condren, Mr. Kolve, Ms. Ridley

141B. Chaucer: *Troilus and Criseyde* and Selected Minor Works. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Intensive study of Chaucer, such as *The Book of the Duchess*, *The House of Fame*, *The Parliament of Fowls*, etc. Satisfies department's Chaucer requirement.

Mr. Condren, Mr. Kelly, Ms. Ridley

142A. Shakespeare: Poems and Early Plays. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Intensive study of selected poems and representative comedies, histories, and tragedies through *Hamlet*.

Mr. Allen, Mr. Post

142B. Shakespeare: Later Plays. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C, 142A. Intensive study of representative problem plays, major tragedies, Roman plays, and romances.

Mr. Braunmuller, Mr. Foakes, Mr. Watson

142C. Shakespeare: Selected Topics. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C, 142A, 142B. Designed for students interested in further study of Shakespeare. Limits of investigation set by individual instructors.

Mr. Allen, Mr. Braunmuller, Mr. Rodes

143. Milton. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of major works of Milton, with emphasis on *Paradise Lost*.

Mr. Grose, Mr. Guffey, Ms. Lewis

150. Later Medieval Literature. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Reading and historical explication of major writers of the 14th and 15th centuries (e.g., the Gawain-poet, Langland, Gower, Malory, miracle and morality plays, prose, and lyrics). The more difficult texts read in modernized form.

Mr. Condren, Mr. Kipling, Mr. Kolve

151. Elizabethan Literature. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of English literature of the 16th century, with special emphasis on development and interrelationships of poetry, prose, fiction, and literary theory and criticism during reign of Elizabeth I.

Mr. Kipling, Ms. McEachern, Mr. Watson

152A. Drama from the Beginning to 1576. Prerequisites: courses 3, 4, 10A, 10B, 10C. English drama from its Latin and Anglo-Norman roots to opening of first public playhouse. P/NP or letter grading.

Mr. Kipling, Mr. Kolve

152B. Drama, 1576-1642. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Non-Shakespearean English drama from opening of first public playhouse to closing of the theaters. P/NP or letter grading.

Mr. Braunmuller, Mr. Foakes, Mr. Little

153. Literature of the Early 17th Century, 1600-1660. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of major works as literary documents and as products of 17th-century thought. Work of Milton excluded.

Mr. Grose, Mr. Gullans, Mr. Post

154. Literature of the Restoration and Earlier 18th Century, 1660-1730. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of major works as literary documents and as products of the Restoration and earlier 18th-century thought. Ms. Lewis, Mr. Roper, Mr. Rousseau

155. Literature of the Later 18th Century, 1730-1798. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of major works as literary documents and as products of later 18th-century thought.

Ms. Lewis, Mr. Novak, Mr. Roper

156. Drama, 1660-1842. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Survey of English drama from the Restoration to the Licensing Act.

Mr. Batten, Mr. Novak, Mr. Rodes

157. The Novel to 1832. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Survey of works of major English novelists from Defoe through Scott.

Mr. Batten, Mr. Lehan, Mr. Rousseau

160. Earlier Romantic Poetry and Prose. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Intensive study of poetry and prose of Blake, Wordsworth, and Coleridge, with collateral readings from such authors as Godwin, Burke, Paine, Burns, Southey, Lamb, DeQuincey, and Scott.

Mr. Maniquis, Ms. Mellor, Mr. Sheats

161. Later Romantic Poetry and Prose. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Intensive study of poetry and prose of Keats, Shelley, and Byron, with collateral readings from such authors as Hazlitt, Hunt, Landor, Clare, Moore, and Peacock.

Mr. Burwick, Mr. Maniquis, Mr. Thorslev

162. Earlier Victorian Poetry and Prose. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of poetry and prose of the Victorian age from passage of the first Reform Bill through the high Victorian period, including such authors as Tennyson, Browning, Arnold, Carlyle, Mill, and Newman.

Mr. Kolb, Mr. Tennyson

163. Later Victorian Poetry and Prose. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of poetry and prose of the later Victorian age from Pre-Raphaelitism through the aesthetic and decadent movements, along with other intellectual trends, including such authors as Ruskin, Swinburne, Pater, Hopkins, Hardy, Wilde, and Yeats.

Mr. Kolb, Mr. Tennyson

164. The Novel, 1832-1900. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Survey of major English novelists from Dickens through Hardy.

Mr. Anderson, Mr. Hutter

165. 20th-Century British Poetry. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Survey of major British poets, including Yeats, Eliot, Auden, and Hughes, from 1900 to the present.

Mr. Bedient, Mr. Kolb, Mr. North

166. 20th-Century British Fiction. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Survey of major British novelists and short story writers, including Conrad, Joyce, Woolf, and Lawrence, from 1900 to the present.

Mr. Kolb, Mr. Lincoln, Mr. Pecora

167. Drama, 1842-1945. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C (for theater and film and television majors the 10A, 10B, 10C prerequisites are waived). Survey of British and American drama, with its principal continental influences, from 1842 through World War II.

Mr. Berst, Mr. Braunmuller, Mr. Goodwin

168. Drama, 1945 to the Present. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of British and American drama, with its principal continental influences, since World War II.

Mr. Berst, Mr. Braunmuller, Mr. Goodwin

170. American Literature to 1800. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Historical survey of American literature through the Colonial and early national periods.

Mr. Colacurcio, Ms. Packer, Ms. Rowe

171. American Literature, 1801-1865. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Historical survey of American literature, including fiction, from beginning of the 19th century to end of the Civil War.

Mr. Colacurcio, Ms. Packer, Mr. Wortham

172. American Literature, 1866-1912. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Historical survey of American literature from end of the Civil War to founding of *Poetry* magazine.

Ms. Banta, Mr. Wortham

173. American Poetry, 1912-1945. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Development of American poetry from 1912 through World War II, including works of Frost, Eliot, Pound, Williams, and Stevens.

Mr. Bedient, Mr. Yenser

174. American Fiction, 1912-1945. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Development of American novel and short story from 1912 through World War II, including works of Hemingway, Fitzgerald, Faulkner, and Stein.

Mr. Goodwin, Mr. Lehan, Mr. Yarborough

176. American Poetry, 1945 to the Present. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of contemporary American poetry.

Mr. Yenser

177. American Fiction, 1945 to the Present. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of contemporary novel and short story.

Mr. Kessler, Ms. Smith

178. Perspectives in Study of American Culture. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Interdisciplinary study of American literature in its relationships to other disciplines, including art, architecture, film, history, music, politics, and various social sciences, with emphasis on application of literary methodology to historical survey of American culture.

Mr. Goodwin, Mr. Paredes

Courses 180 through 189 are designed to permit a small number of students (normally 15) to engage in concentrated study in an area in which they have a particular interest and in which they have taken adequate upper division background courses. **Prerequisites:** satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. For further details, see the departmental counselor. Courses may be repeated for credit.

180. Specialized Studies in Medieval Literature.

180X. Specialized Studies in Literature.

181. Specialized Studies in Renaissance Literature.

182. Specialized Studies in 17th-Century Literature.

183. Specialized Studies in 18th-Century Literature.

184. Specialized Studies in Romantic Literature.

185. Specialized Studies in Victorian Literature.

186. Specialized Studies in 20th-Century British Literature.

187. Specialized Studies in Colonial American Literature.

188. Specialized Studies in 19th-Century American Literature.

189. Specialized Studies in 20th-Century American Literature.

190. Literature and Society. Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Intensive study of some aspect of relationship between literature and social, economic, or political history. May be repeated for credit.

Mr. Goodwin

M197. Topics in Afro-American Literature. (Same as Afro-American Studies M197.) Variable specialized studies course in Afro-American literature. Topics include the Harlem Renaissance; Afro-American Literature in the Nadir, 1890-1914; Contemporary Afro-American Fiction. May be repeated for credit.

Ms. Smith, Mr. Yarborough

197F. Rhetoric in Modern American Culture. See listing under "English Composition."

199. Special Studies in English (2 to 4 units). Prerequisite: consent of instructor. Intensive directed research project. To enroll or obtain information, see departmental counselor.

199HA. Honors Seminar. Prerequisite: course 140A. Introduction to research techniques and study of various approaches and applications of critical methodology as it relates to interpretation and evaluation of texts. (F)

199HB-199HC. Honors Tutorial. Prerequisites: course 199HA, consent of instructor. Tutorial in which students write theses under direction of a faculty member. In Progress grading. (W,Sp)

199I. Independent Study for Internships (2 to 4 units). Prerequisite: consent of instructor. Independent study course to be supervised jointly by Field Studies Office and faculty supervisor. Further supervision to be provided by business for which student is doing internship. P/NP grading.

Graduate Courses

200. Approaches to Literary Research. Bibliographical tools of English and American literary scholarship; introduction to descriptive bibliography and basic methods of research. Periods covered vary.

Mr. Batten, Mr. Kipling

201A. History of Literary Criticism. (Formerly numbered 201.) Study of major documents in Western literary theory from Plato through T.S. Eliot.

Mr. Lehan, Mr. Pecora

201B. Modern Literary Criticism. Study of developments and trends in 20th-century literary criticism.

Mr. Pecora

202. Enumerative and Descriptive Bibliography. Problems in bibliography, texts, and editions, with practical application in compiling bibliographies, editing texts, and approaching literature through textual criticism.

Mr. Dearing

203. Computers and Literary Research. Prior knowledge in this area not required. Practice in writing and using computer programs for analysis of literary style, content, and authorship.

Mr. Dearing

204. History of Rhetoric. Reading of basic texts in history of rhetoric and selections from standard commentaries. Survey of classical period and medieval-to-modern period in alternate years.

Mr. Lanham

M205. Perspectives in American Folklore Research. (Same as Folklore CM205.) Lecture, three hours. Prerequisite: Folklore 101 or consent of instructor. Examination of American folklore studies compared and contrasted with investigations in other countries, with emphasis on principal conceptual schemes and research orientations employed in study of folklore in American society.

Mr. Georges, Mr. Jones

210. History of the English Language. Detailed study of history, characteristics, and changing forms of the language from its origin until about 1900.

Ms. Minkova

211. Old English. Study of Old English grammar, lexicon, phonology, and pronunciation to enable students to read the literature silently and aloud. Reading of as much of the more interesting Old English prose and poetry as can be read in a term.

Mr. Calder, Mr. Conden

212. Middle English. Prerequisite: course 211. Detailed study of linguistic aspects of Middle English and of representative examples of the better prose and poetry. Ms. Minkova, Ms. Ridley

213. Early Modern English. Detailed study of phonology, morphology, syntax, and vocabulary of English between 1450 and 1750. Description and analysis of changes in the language in relation to intellectual, political, and social characteristics of the period. Ms. Minkova

214. Modern English. Description and analysis of modern English phonology, grammar, and vocabulary, using theory and techniques of contemporary linguistics. Survey of the evolution of American English and account of characteristic phonological and grammatical features of major regional varieties of English around the world. Ms. Minkova

216A-216B. Old Irish. Prerequisite: consent of instructor. Studies in grammar. Readings in the glosses and other texts. Comparative considerations. Mr. Nagy

217A-217B. Medieval Welsh. Prerequisite: consent of instructor. Studies in grammar. Readings in the Mabinogi and other texts. Comparative considerations.

218. Celtic Linguistics. Prerequisite: consent of instructor. Survey of salient features of Celtic linguistic stock in its Gaelic and British branches, with reference to position of Celtic within Indo-European languages.

230. Workshop: Creative Writing (2 to 4 units). Prerequisite: consent of instructor, following submission of writing samples in specified genre (poetry, fiction, or drama). May be repeated but may not satisfy more than one of the nine courses required for first qualifying examination nor any of the five courses required for second qualifying examination. Mr. Kessler, Mr. Yenser

M235. African Myth and Ritual. (Same as Folklore M235.) Prerequisite: consent of instructor. Seminar on methods of analyzing African and African Diaspora myth and ritual. Mr. Cosentino

238. Colloquium (2 to 4 units). Special topics from various fields in lecture, proseminar, or seminar format. S/U grading.

Seminar courses (240 to the end of the 200 series) are open to all graduate students with adequate preparation and may be repeated for credit. Students must pre-enroll with the graduate counselor. Continuing students must sign up for seminars before the end of the preceding term. A prospectus announcing topics for all seminars is available in the department office in early summer for the ensuing academic year.

240. Studies in History of the English Language. Individual seminars dealing with any single historical period from Old English period to the present or development of a particular linguistic characteristic (phonology, syntax, semantics, dialectology) through various periods. Ms. Minkova

241. Studies in Structure of the English Language. Prerequisite: consent of instructor. Topics in various aspects of structure of modern English, especially syntax and semantics. Ms. Minkova

242. Language and Literature. Application of linguistics to literary analysis. Individual seminars dealing with a historical period (medieval and Renaissance, neoclassical, or 19th century and modern), specific authors, or contributions of specific groups of linguists to literary analysis. Mr. Grose, Mr. Lanham

M243A. The Ballad. (Same as Folklore M243A.) Prerequisite: consent of instructor. Study of English and Scottish popular ballads and their American derivatives, with some attention to European analogues.

M243B. Problems in Ballad Scholarship. (Same as Folklore M243B.) Prerequisite: course M243A or consent of instructor. Intensive investigation of a problem or problems in study of the popular ballad.

244. Old and Medieval English Literature. Studies in poetry and prose of Old and medieval English literature; limits of investigation set by individual instructor. Mr. Calder, Mr. Kelly, Mr. Kolve

245. Chaucer. Mr. Kelly, Mr. Kolve, Ms. Ridley

246. Renaissance Literature. Studies in poetry and prose of Renaissance English literature, exclusive of Shakespeare; limits of investigation set by individual instructor. Mr. Allen, Mr. Kipling, Ms. Shuger

247. Shakespeare.

Mr. Braummuller, Mr. Foakes, Mr. Watson

248. Earlier 17th-Century Literature. Studies in poetry and prose of 17th-century English literature up to the Restoration; limits of investigation set by individual instructor. Mr. Guffey, Mr. Gullans, Mr. Sellin

249. Milton. Studies in poetry and prose of John Milton; limits of investigation set by individual instructor. Mr. Grose, Mr. Post, Mr. Sellin

250. Restoration and 18th-Century Literature. Studies in English poetry and prose, 1660 to 1800; limits of investigation set by individual instructor. Mr. Novak, Mr. Roper, Mr. Rousseau

251. Romantic Writers.

Mr. Burwick, Mr. Sheats, Mr. Thorslev

252. Victorian Literature. Studies in English poetry and prose of the Victorian period; limits of investigation set by individual instructor. Mr. Kolb, Mr. Tennyson

253. Contemporary British Literature.

Mr. Bedient, Mr. North

254. American Literature to 1900. Studies in Colonial and 19th-century American literature; limits of investigation set by individual instructor. Ms. Banta, Mr. Colacurcio, Ms. Packer

255. Contemporary American Literature. Studies in contemporary American poetry and prose; limits of investigation set by individual instructor. Mr. Lehan, Mr. Yenser

256. Studies in the Drama. Studies in drama as a genre from its beginning to the present; limits of investigation set by individual instructor. Mr. Berst, Mr. Braummuller, Mr. Foakes

257. Studies in Poetry. Studies in various themes and forms of poetry from Old English to the present; limits of investigation set by individual instructor. Mr. Bedient, Mr. Yenser

258. Studies in the Novel. Studies in evolution of the genre from its beginning to the present; limits of investigation set by individual instructor. Mr. Lehan, Mr. Novak

259. Studies in Criticism. Mr. Guffey, Mr. Weber

260. Studies in Literature and Its Relationship to the Arts and Sciences. Studies in interrelationships of literature, arts, and sciences; limits of investigation set by individual instructor. Mr. Guffey, Mr. Lincoln, Mr. Rousseau

M260A. Topics in Asian American Literature. (Same as Asian American Studies M297A.) Lecture, three hours. Graduate seminar that examines and critically evaluates writings of Asian Americans. Ms. Cheung

M262. Studies in Afro-American Literature. (Same as Afro-American Studies M200E.) Prerequisite: consent of instructor. Intensive research and study of major themes, issues, and writers in Afro-American literature. Discussions and research on aesthetic, cultural, and social backgrounds of Afro-American writing. May be repeated for credit. Ms. Smith, Mr. Yarborough

263. Celtic Literature. Lecture, three hours. Prerequisite: knowledge of one of the ancient or modern Celtic languages. Studies in poetry and prose of early and modern Celtic literatures, chiefly Irish and Welsh; limits of investigation set by individual instructor. Mr. Nagy

264. Studies in Rhetoric. Discussion, three hours. Special topics in classical and modern rhetoric, including substantial practice in rhetorical analysis of literary texts. Mr. Lanham

265. Seminar: Literary Data Processing. Prerequisites: courses 200, 203. Subjects alternate between (1) team writing of a large program to solve or help solve a research problem proposed by a faculty member (who usually joins in supervising the seminar) and (2) compilation and interpretation of literary statistics (with cooperation of a member of Statistical/Bio-mathematical Consulting Clinic).

M266. Cultural World Views of Native America. (Same as American Indian Studies M200B.) Seminar, three hours. Exploration of written literary texts from oral cultures and other expressive cultural forms — dance, art, song, religious and medicinal ritual — in selected Native American societies, as these traditional and tribal contexts have been translated into contemporary literary texts (fiction, poetry, essay, and drama). Survey, from secondary sources, of interdisciplinary methodological approaches taken from literary analysis, structural anthropology, folklore, linguistics, and ethnomusicology. Ms. Allen, Mr. Lincoln, Mr. Sarris

270A-270B. English for the Two-Year College. Prerequisite: course 120B or 275. Discussion and practice of two-year college instruction in reading and composition. In Progress grading.

272. Current Issues in Teaching English. Focus on one of a variety of topics of special current interest. Mr. Lanham

275. Stylistics and the Teaching of English. Strongly recommended for teaching assistants. Introduction to study of language and style and its application to teaching English, including rhetoric, linguistics, and grammar. Mr. Lanham

M299. Interdisciplinary American Studies (6 units). (Same as History M299.) Discussion, four hours. Readings, discussion, and papers on a common theme, team-taught by faculty from different departments. Topics vary according to participating faculty. May be repeated for credit with consent of instructors. Ms. Banta

300. Teaching English. See listing under "English Composition."

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May not be substituted for any departmental enrollment requirements. May be repeated for credit. S/U grading.

495A-495B. Supervised Teacher Preparation (2 units each). See listing under "English Composition."

495C. Supervised Teacher Preparation (2 units). See listing under "English Composition."

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study (2 to 4 units). Prerequisite: consent of instructor. For students preparing for first qualifying examination or engaging in intensive directed research project. May not be applied toward any course requirement for degree. Consult graduate counselor to enroll or obtain information. S/U grading.

597. Preparation for Ph.D. Examinations (4 or 8 units). For second-stage Ph.D. students preparing for second qualifying examination. S/U grading.

598. M.A. Research and Thesis Preparation (4 or 8 units). Prerequisite: graduate standing. May not be applied toward any course requirement for degree. S/U grading.

599. Ph.D. Dissertation Research (4 or 8 units). Limited to Ph.D. candidates unable to enroll in seminars in their fields or to candidates concurrently enrolled in such seminars. (Exception to this rule must be requested by petition.) S/U grading.

Scope and Objectives

Students need writing proficiency at every stage of their university careers. Although UCLA does not have a composition major, this program offers a series of courses introducing the varieties of university discourse and providing instruction

in basic to high-level skills. Besides courses which satisfy the University's Subject A and English Composition requirements, the program offers writing courses linked with courses in other departments, intermediate and advanced courses in exposition, language and composition courses for teachers, and a sequence of courses in professional writing and editing.

Subject A

Every student who does not satisfy the Subject A requirement by presenting transfer credit or acceptable test scores is required to take, as early as possible during the first year in residence, either English A or 2. Placement in these courses is determined by performance on the Subject A Examination. For more information regarding Subject A, see "Undergraduate Degree Requirements" in Chapter 2.

Composition Requirement

The College of Letters and Science and each of the University's professional schools set their own composition requirement. Completing English 3 with a grade of C or better meets the requirement in all divisions. For further information about the composition requirement, see the introductory copy for your college or school.

Students who score 660 or better on the CEEB English Composition Achievement Test are eligible to take the English Proficiency Examination. Outstanding performance on this examination fulfills the composition requirement. For further information, contact the Student Services Office.

Lower Division Courses

A. Introduction to University Discourse (No credit). Lecture, five hours. Prerequisite: appropriate score on Subject A Examination. English A displaces four units on student's Study List but yields no credit toward a degree. First course in reading university-level texts and framing written responses that employ a range of rhetorical strategies from paraphrase to analysis. Emphasis on revision, developing syntactic variety and academic vocabulary, and editing for grammar and style. Completion of this course with a grade of C or better or demonstration of minimum competence on Subject A Examination is prerequisite to English 2.

2. Approaches to University Writing. (Formerly numbered B.) Prerequisite: English A with a grade of C or better or appropriate score on Subject A Examination. Second course in university-level discourse, with analysis and critique of university-level texts. Emphasis on revision for argumentative coherence and effective style. Completion of this course with a grade of C or better meets Subject A requirement.

3. English Composition, Rhetoric, and Language. Lecture, three hours. Prerequisite: satisfaction of Subject A requirement by examination or by completion of course 2 with a grade of C or better. Rhetorical techniques and skillful argument. Analysis of varieties of academic prose and writing of a minimum of five formal papers (three to five pages each). Completion of this course with a grade of C or better satisfies English Composition requirement.

3H. English Composition, Rhetoric, and Language (Honors). Lecture, three hours. Prerequisites: satisfaction of Subject A requirement, consent of department. Rhetorical techniques and skillful argument. Analysis of varieties of academic prose and writing of a minimum of five formal papers (three to five pages each).

Upper Division Courses

100W. Intensive Writing. Prerequisite: satisfaction of Subject A and English Composition requirements. Students must be concurrently enrolled in a course offered in conjunction with English 100W (consult *Schedule of Classes* for courses so designated). Writing assignments use materials from adjunct course and develop analytical reading and writing skills needed for work in its discipline.

100WH. Intensive Writing (Honors). Prerequisite: satisfaction of Subject A and English Composition requirements. Students must be concurrently enrolled in an honors course offered in conjunction with English 100WH (consult *Schedule of Classes* for courses so designated). Writing assignments use materials from adjunct course and develop analytical reading and writing skills needed for work in its discipline.

120A. Language Study for Teachers: Elementary School. Prerequisite: satisfaction of Subject A and English Composition requirements. Survey of topics in English linguistics of special interest to elementary school teachers. Subjects include approaches to English grammar; language acquisition and development; language attitudes; regional and social dialects of American English; bilingual schooling; contribution of English language study to teaching of reading, writing, spelling, and literature.

120B. Language Study for Teachers of English: Secondary School. Prerequisite: satisfaction of Subject A and English Composition requirements. Review of terminology of English grammar and survey of development of modern grammars, with special attention to transformational-generative grammar. Introduction to basic concepts in sociolinguistics, dialectology, and stylistics, especially as applied to analysis and evaluation of writing assigned in secondary school.

120C. Language Study for Teachers of Subjects Other Than English: Secondary School. Prerequisite: satisfaction of Subject A and English Composition requirements. Introduction for teachers of subjects other than English to basic concepts in language acquisition, dialectology, sociolinguistics, and composition.

129. Intermediate Exposition. (Formerly numbered 30.) Prerequisites: satisfaction of Subject A and English Composition requirements, sophomore standing. Intermediate course in academic writing suitable for both lower and upper division students. Teaches students how to write longer papers built on more complex, demanding texts. Readings include at least two books dealing with issues central to humanities, social sciences, or life sciences. Writing assignments include a research project appropriate to students' majors.

129H. Intermediate Exposition (Honors). Prerequisites: satisfaction of Subject A and English Composition requirements, sophomore standing. Honors course parallel to course 129.

130A. Composition for Teachers: Elementary School. Prerequisite: satisfaction of Subject A and English Composition requirements. Preparation for future elementary school teachers of English composition in writing and criticism of the kinds of prose discourse usually taught in primary schools. P/NP or letter grading.

130B. Composition for Teachers: Secondary School. Prerequisite: satisfaction of Subject A and English Composition requirements. Preparation for future secondary school teachers of English composition in writing and criticism of the kinds of prose discourse usually taught in secondary schools.

131A-131J. Advanced Exposition. Prerequisites: satisfaction of Subject A and English Composition requirements, upper division standing. Writing course designed to help students develop stylistic and argumentative virtuosity in various rhetorical contexts, including different sections that emphasize principles of effective writing in major professions. May be taken P/NP by English majors, though English majors who wish to use course to satisfy departmental prerequisites must take it for a letter grade. Each course may be taken independently for credit. **131A.** General; **131B.** Business; **131C.** Prehealth Care; **131D.** Journalism/Communication Studies; **131E.** Prelaw; **131F.** Fine Arts; **131G.** Science and Technology; **131H.** Honors; **131J.** Literature.

132. Composition and Society. Prerequisites: satisfaction of Subject A and English Composition requirements, upper division standing. Intensive study of some aspect of relationship between composition and social, economic, or political history. P/NP or letter grading. (W,Sp)

136A-136B-136C. Practical Writing and Editing. Lecture, three hours. Prerequisites: satisfaction of Subject A requirement, course 3, one course from 131 series, consent of instructor. Sequence in practical writing and editing ability specifically designed to prepare students for a career. Analysis of prose and literary styles necessary to the variety of writing in professional, nonacademic fields combined whenever possible with practical experience in a variety of writing internships and training in a wide range of editorial skills. In Progress grading for courses 136A-136B only.

197F. Rhetoric in Modern American Culture. Seminar, three hours. Prerequisites: satisfaction of Subject A and English Composition requirements, course 4 or 129 or one course from 131 series, upper division standing. One-term field studies course designed to provide students with academic background in and firsthand knowledge of media writing. P/NP or letter grading.

Graduate Courses

300. Teaching English. Required of candidates for single subject credential in English. Study of theories of rhetoric, composition, reading, and literature as they apply to secondary school English curriculum.

495A-495B. Supervised Teacher Preparation (2 units each). Discussion, one hour; laboratory, 30 minutes. **495A.** Required of all applicants for a teaching assistantship in English. Practical concerns of designing a course, creating assignments, grading papers, and holding conferences for English 3 classes. **495B.** Must be taken concurrently with first teaching assignment. Examination of specialized problems which occur in teaching English 3 and introduction to techniques for teaching English 2 and ESL. In Progress and S/U grading.

495C. Supervised Teacher Preparation (2 units). Prerequisites: courses 495A-495B. S/U grading.

Environmental Science and Engineering (Interdepartmental)

This interdisciplinary graduate program, which leads to the Doctor of Environmental Science and Engineering (D.Env.) degree, provides scientific training in the enlightened management of the environment through a broad range of environmental disciplines. For details on this program, see Chapter 18 on the School of Public Health.

Folklore and Mythology (Interdepartmental)

1041 Anderson Graduate School of Management, (310) 825-3962

Professors

Shirley L. Arora, Ph.D. (*Spanish and Portuguese*)
 Marianna D. Birnbaum, Ph.D., in Residence (*Germanic Languages*)
 Jesse L. Byock, Ph.D. (*Germanic Languages*)
 Marga Cottino-Jones, Ph.D. (*Italian*)
 Elsie Dunin, M.A. (*Dance*)
 Robert A. Georges, Ph.D. (*English*)
 Nazir A. Jairazbhoy, Ph.D. (*Ethnomusicology and Systematic Musicology*)
 Michael O. Jones, Ph.D. (*History*)
 James R. Massengale, Ph.D. (*Scandinavian Languages*)
 Herbert E. Plutschow, Ph.D. (*East Asian Languages and Cultures*)
 James W. Porter, M.A. (*Ethnomusicology and Systematic Musicology*)
 Jaan Puhvel, Ph.D. (*Classics*)

Professors Emeriti

Kees W. Bolle, Ph.D. (*History*)
 Patrick K. Ford, Ph.D. (*English*)
 Marija Gimbutas, Ph.D. (*Slavic Languages and Literatures*)
 Vladimir Markov, Ph.D. (*Slavic Languages and Literatures*)
 Douglass R. Price-Williams, Ph.D. (*Anthropology*)
 Stanley L. Robe, Ph.D. (*Spanish and Portuguese*)
 Allegra Fuller Snyder, M.A. (*Dance*)
 Donald J. Ward, Ph.D. (*Germanic Languages*)
 Johannes Wilbert, Ph.D. (*Anthropology*;
Distinguished Teaching Award)

Associate Professors

Donald J. Cosentino, Ph.D. (*English*)
 Jacqueline C. DjeDje, Ph.D. (*Ethnomusicology and Systematic Musicology*)
 Steven Lattimore, Ph.D. (*Classics*)
 Joseph F. Nagy, Ph.D. (*English*), Chair
 Philip L. Newman, Ph.D. (*Anthropology*)
 Beverly J. Robinson, Ph.D. (*Theater*)

Assistant Professor

Colin Quigley, Ph.D. (*Dance*)

Scope and Objectives

The interdisciplinary Folklore and Mythology Program, which leads to the Master of Arts and Ph.D. degrees, provides coordinated study of the traditional life-styles of specific societies and culture areas, on the one hand, and systematic training in the research methods and investigative techniques of cross-cultural study, on the other. Courses focus on the nature, history, and functions of such traditional forms as narrative, song, music, art, dance, and speech and consider the part they play in human development and cultural existence. The program examines the ways in which human traditions both reflect and contribute to continuity and consistency in thought and life.

Trained folklorists pursue careers in teaching, research, governmental agencies, museum work and administration, performing groups and arts management, social work, the medical and legal professions, and business. Their responsibilities include documenting cultural and ethnic traditions, introducing traditional artists and their works to interested audiences, describing transformations of traditional processes and forms, and preserving on tape and film the customs and mores of social groups and individuals.

Although no undergraduate degree program is offered in folklore and mythology, students majoring in world arts and cultures may select folklore and mythology as their area of concentration. A variety of undergraduate courses offered by departments or by faculty participating in the interdepartmental program is also available to all University students. Those with undergraduate preparation in folklore and mythology studies may continue their work on the graduate level. For planning coursework, you should consult departmental counselors and the chair of the committee which administers the interdepartmental program.

Master of Arts Degree

Admission

Two letters of recommendation from former instructors or other comparable references are required and should be sent to the Chair, Folklore and Mythology Program, 1041 AGSM, UCLA, Los Angeles, CA 90024-1459.

Foreign Language Requirement

Reading knowledge of French, German, or Spanish is required. You have the option of demonstrating proficiency either by:

- (1) Passing the fifth quarter or fourth semester course in the selected foreign language at a college or university with a grade of B or equivalent no more than five years before graduate enrollment OR
- (2) Successfully completing the Graduate School Foreign Language Test (GSFLT) with a score of 550 or better OR
- (3) Passing a reading examination administered and evaluated by members of the pro-

gram faculty (or by outside faculty for languages not familiar to the program faculty).

Course Requirements

All degree candidates, whether electing the thesis or comprehensive examination plan (see below), must complete the following courses: Folklore and Mythology 200A, 200B, 200C (in sequence), and at least one course from each of the following groups:

Group 1 — One course in folk song, folk music, or folk dance (e.g., C206, M243B, M258, or CM284D).

Group 2 — One course in the folklore and mythology of a specific culture or culture area.

Group 3 — One course in folktale, legend, or myth (e.g., 215 or 216).

Group 4 — One additional form/genre-based graduate course in folklore and mythology studies (e.g., M211, 213, M214, 217, 218, or C275).

Group 5 — One graduate seminar in an area of folklore and mythology (e.g., 228, M235, 259).

Only eight units of course 596 may be applied toward the minimum course requirements.

Thesis Plan

If you select this plan, you must complete a minimum of 10 courses (six in the 200 series; two 596 courses may be included) and submit an acceptable thesis, prepared under the direction of a member of the program faculty. Submission of the thesis is followed by an oral examination covering the fields of folklore and mythology studies. You must complete all degree requirements in a maximum of six regular academic terms.

The thesis committee, composed of three or more faculty members selected with approval of the chair of the interdepartmental committee, is appointed no later than the term before you expect to complete the requirements. No outside members are required.

Comprehensive Examination Plan

If you plan to pursue a Ph.D. degree in Folklore and Mythology, you must elect this plan and must complete a minimum of 10 courses (six in the 200 series; two 596 courses may be included). After completion of the coursework, you are expected to demonstrate competence in written and oral examinations (the latter only if requested by M.A. committee members or by you) requiring a grasp of (1) theoretical bases, major documents, and research methods and techniques of folklore and mythology studies, (2) two forms of folklore and mythology, and (3) the folklore and mythology of a specific country, continent, or geographical area. You must complete all degree requirements in a maximum of six regular academic terms.

Ph.D. Degree

Admission

Requirements for admission to the doctoral program include completing the requirements for the M.A. degree in Folklore and Mythology (or equivalent) and the written comprehensive examination. You are admitted to the doctoral program on the recommendation of the interdepartmental committee (you may secure provisional admission in order to complete the admission requirements).

Major Fields or Subdisciplines

You must develop competency in (1) a major field of folklore and mythology and (2) an area of concentration within a related discipline. These areas are selected with the approval of the guidance committee.

Foreign Language Requirement

Reading knowledge of German and another language approved by the guidance committee is required. You may demonstrate proficiency by any of the three methods described above under "Foreign Language Requirement" for the master's degree.

The foreign language examinations must be completed before you attempt the qualifying examinations.

Course Requirements

Before attempting the qualifying examinations, you must complete a minimum of nine courses or seminars in the 200 series (or substitutes recommended by the guidance committee) in (1) folklore and mythology and (2) an area of concentration within a related discipline. At least five of the nine courses must be selected from Folklore and Mythology 200A through M286B, and at least two of the nine are to be folklore seminars (i.e., course 259). No more than two 596 courses may be applied toward the minimum graduate course requirement.

Qualifying Examinations

After the required preparation, you complete a written examination covering (1) your specialization in folklore and mythology and (2) your related area of concentration. The examination is administered by a committee appointed with approval of the interdepartmental committee and includes one or more members from your related discipline.

The written examination is followed by the University Oral Qualifying Examination covering the same two areas listed above, which you must pass in order to be advanced to candidacy. The oral examination is administered by the doctoral committee, which also considers and approves your dissertation topic.

Final Oral Examination

An oral defense of the dissertation may be required, to be determined by your doctoral

committee after you complete the oral qualifying examination.

Lower Division Course

15. Introduction to American Folklore Studies. Lecture/discussion. Cultural/historical survey of role of folklore in development of American civilization and of influence of the American experience in shaping folklore in American society; attention also to representative areas of inquiry and analytical procedures.

Upper Division Courses

101. Introduction to Folklore. Survey of various forms of folklore and examination of their historical and social significance.

C105. Perspectives in American Folklore Research. Lecture, three hours. Prerequisite: course 101 or consent of instructor. Examination of American folklore studies compared and contrasted with investigations in other countries, with emphasis on principal conceptual schemes and research orientations employed in study of folklore in American society. Concurrently scheduled with course CM205.

Mr. Georges, Mr. Jones

CM106. Anglo-American Folk Song. (Same as English M111B and Ethnomusicology M124.) Survey of Anglo-American balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values. May be concurrently scheduled with course C206.

Mr. Porter

C107. Folklore in Urban Environments. Lecture, three hours. Prerequisites: course 15 or 101 and/or consent of instructor. Exploration of expressive and symbolic dimensions of complex urban life, focusing on how immigrants, migrants, residents, and workers shape their experiences through dynamic interplay of community, ethnicity, culture, and religion. Concurrently scheduled with course C207.

Mr. Jones

108. Afro-American Folklore and Culture. Prerequisite: course 101 or consent of instructor. Study of traditional genres or forms of Afro-American folklore and their cultural functions.

M111. Literature of Myth and Oral Tradition. (Same as English M111A.) Prerequisite: satisfaction of Subject A requirement. Study of myth, dramatic origins, oral epic, folktale, and ballad, emphasizing Indo-European and Semitic examples.

Mr. Cosentino, Mr. Nagy

M112. Survey of Medieval Celtic Literature. (Same as English M111E.) Prerequisite: satisfaction of Subject A requirement. Knowledge of Irish or Welsh not required. General course dealing with Celtic literature from earliest times to the 14th century.

Mr. Nagy

113. The Arthurian Tradition. Prerequisite: consent of instructor. Survey of traditions relating to British King Arthur from medieval times to the present day. Coverage includes both oral traditions and written texts; attention also to modern versions of Arthurian material in other mediums (e.g., opera, film).

Mr. Porter

118. Folk Art, Folklife, and Material Culture. Prerequisite: junior standing. General course concerned with folk art, aesthetics, and material culture and with theoretical concepts and methodologies utilized in their analysis.

Mr. Jones

M121. British Folklore and Mythology. (Same as English M111C.) Prerequisites: satisfaction of Subject A requirement, junior standing. Survey of folklore of the peoples of Britain, with attention to their history, function, and regional differences.

Mr. Nagy, Mr. Porter

M122. Celtic Mythology. (Same as English M111D.) Prerequisite: course 101 or consent of instructor. Survey of early materials, chiefly literary, for study of mythic traditions of the Celtic peoples, ranging from ancient Gaul to medieval Ireland and Wales.

Mr. Nagy

M123A. Finnish Folklore and Mythology. (Same as Scandinavian M123A.) Methods and results of Finnish folklore studies and mythic traditions of the Finns. Special attention to oral epic, beliefs, and legends.

M123B. Finnish Folk Song and Ballad. (Same as Scandinavian M123B.) Course M123A is not prerequisite to M123B. Survey of Finnish balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values.

124. Finnish Folk Art and Technology. Material manifestations of Finnish folk culture: village layout and architecture, folk technology, arts and crafts, textiles, costumes, and design.

M125. Folklore and Mythology of the Lapps. (Same as Scandinavian M125.) Survey of Lappish beliefs, customs, and various genres of oral tradition, including tales, legends, songs, and music. Attention also to material manifestations of Lappish culture: arts and crafts, textiles, costume, folk technology.

M126. Baltic and Slavic Folklore and Mythology. (Same as Slavic M179.) Lecture, three hours. General course for students interested in folklore and mythology and for those interested in Indo-European mythic antiquities.

M127. Celtic Folklore. (Same as English M111F.) Prerequisite: course 101 or consent of instructor. Folkloric traditions of modern Ireland, Scotland, and other Celtic countries, with attention to current techniques of folkloristic research. Mr. Nagy

M128. Hungarian Folklore and Mythology. (Same as Hungarian M135.) General course for students in folklore and mythology, with emphasis on types of folklore and varieties of folklore research. Ms. Birnbaum

M129. Folklore and Mythology of the Ugric Peoples. (Same as Hungarian M136.) Survey of traditions of the smaller Ugric nationalities (Voguls, Ostyaks, etc.). Ms. Birnbaum

130. North American Indian Folklore and Mythology Studies. Prerequisite: course 101 or consent of instructor. Examination of folkloristic and mythological data recorded from various North American Indian peoples within contexts of principal ideological frameworks which have been evolved historically for analysis of such data. Mr. Georges

131. Folklore of India. Prerequisite: course 101 or consent of instructor. Survey of folklore of India, with special reference to content and dissemination of oral epics, ballads, legends, and beliefs. Mr. Jairazbhoy

CM132. Celtic Folk Music. (Same as Ethnomusicology CM132.) Prerequisite: consent of instructor. Survey and analysis of indigenous traditional music in lands where a Celtic language is or was spoken into modern times. Instrumental and vocal genres, context and performance, social value and ideology. Concurrently scheduled with course CM232. P/NP or letter grading. Mr. Porter

M140. From Boccaccio to Basile (in English). (Same as Italian M140.) Lecture, three hours. Study of origins and development of the Italian novella in its themes, structure, historical context, and European ramifications. Designed for students in other departments who wish to become acquainted with either the premises or growth of similar literary genres. Also intended for students majoring in folklore and mythology, who are given insight into Italian popular tales when these (as in the case of Boccaccio) were translated into highly sophisticated literary forms, as well as when (as in the case of Basile) they become embedded into the folk tradition of the Western world. Mrs. Cottino-Jones

M142. Introduction to Jewish Folklore. (Same as Jewish Studies M143.) Nature of Jewish folklore; narrative, folk song, folk art, folk religion, and methods and perspectives used in their analysis.

C145. Applied Folkloristics. Prerequisite: junior standing. Introduction to methods and issues in application of folklore studies to such areas as education, health, museums, organization development, tourism, environmental planning, economic and community development, aging, art therapy, and public sector folklife. Concurrently scheduled with course C245. Mr. Jones

M149. Folk Literature of the Hispanic World. (Same as Spanish M149.) Lecture, three hours. Study of history and present dissemination of principal forms of folk literature throughout the Hispanic countries. Ms. Arora

M150. Russian Folk Literature. (Same as Russian M150.) Lecture, three hours. Lectures and readings in Russian.

M154A-M154B. The Afro-American Musical Heritage. (Same as Ethnomusicology M110A-M110B.) Lecture, three hours. Prerequisite: consent of instructor. Course M154A is not open to students with credit for former Music M154A; M154B is not open to students with credit for former Music M154B. Study of African music and its impact on the Americas; survey of development of various Afro-American musical genres from slave era to the present, including traditions in the West Indies and Central and South America. Ms. Djedje

M155. Oral Traditions in Africa. (Same as English M111G.) Prerequisite: upper division standing. Survey of African folk traditions: folktales, epic, heroic poetry, and folk song. Mr. Cosentino

163. Folklore and Oral History. Prerequisite: junior standing. Examination of relationships between folk tradition and oral history; how history may be derived from tradition; how traditions are embedded in historical sources; how the folk traditionalize history to reflect their point of view.

C165. Film and Folklore. Prerequisite: junior standing. Introduction to film criticism and folklore methodology. Topics include early examples of folklore on film, changing conceptions of folklore and uses of films about folklore, and examples of films by, with, and for folklorists. Concurrently scheduled with course C265. Mr. Jones

M170. Russian Folklore. (Same as Russian M170.) Lecture, three hours. General introduction to Russian folklore, including survey of genres and related folkloric phenomena. Lectures and readings in English.

172. Folklore in Ethnic Context. Prerequisite: course 15 or 101 or consent of instructor. Role of folklore in ethnic relations; processes by which ethnic folklore is generated, transmitted, and maintained by immigrant groups and subsequent generations. Mr. Georges

C175. Food Customs and Symbolism. Prerequisite: junior standing. Introduction to foodways, with particular attention to customs and symbolism in America. Topics include sensory realm, child rearing practices, foodsharing, food and identity, food and its emotional significance, aversions and taboos, advertising, changing food habits, and the American diet. Concurrently scheduled with course C275. Mr. Jones

M180. Analysis of Traditional Music. (Same as Ethnomusicology M180.) Prerequisite: consent of instructor. Not open to students with credit for former Music M180. Intensive study of methods and techniques necessary to understand traditional music. Mr. Porter

M181. Folk Music of Western Europe. (Same as Ethnomusicology M126.) Prerequisite: consent of instructor. Not open to students with credit for former Music M181. Introduction to forms and styles of traditional music in Western Europe. Historical and ethnological perspectives on this music combined with numerous recorded examples from major cultural subdivisions of the region. Mr. Porter

M182. Japanese Folklore. (Formerly numbered M136.) (Same as Japanese M182.) Lecture, three hours. Knowledge of Japanese not required. Lectures/discussions on native religious rituals (festivals) and observances of the Japanese, with special emphasis on artistic behavior. Discussion of Shinto, Shinto-Buddhist syncretism, and other non-Buddhist belief systems found in Japan. Mr. Plutschow

183. Korean Folklore. (Formerly numbered M183.) Lecture, three hours. Survey of Korean folklore and its perspectives and methods — oral literature, performing folk arts, social folk custom, and material culture.

CM184D. Dance in the British Isles and North America: Anglo-American Tradition. (Same as Dance CM184D.) Introduction to folklore research on dance, with examples primarily from the British Isles and related traditions in North America. Topics include search for origins, structural analysis of dance forms, and relation of dance to its contexts. Concurrently scheduled with course CM284D. Mr. Quigley

190. Selected Topics in Folklore and Mythology Studies. Prerequisite: course 15 or 101 or consent of instructor. Proseminar focusing on selected problems, data, or themes in folklore and mythology studies. May be repeated twice for credit.

199. Special Studies in Folklore (2 to 4 units). Prerequisites: senior standing, consent of instructor.

Graduate Courses

200A. Folklore Bibliography, Theory, and Research Methods. (Formerly numbered 200.) Lecture, three hours; discussion, one hour. Basic course in theory and bibliography for folklore students, including techniques of research necessary for serious folklore study.

200B. Current Trends and Issues in Folklore Studies. (Formerly numbered 203.) Lecture, three hours; discussion, one hour. Prerequisite: course 200A or consent of instructor. Survey and analysis of current trends and issues in folklore studies, with emphasis on conceptual models, research techniques, and analytical procedures.

200C. Folklore Collecting and Field Research. (Formerly numbered 201A.) Lecture, three hours; discussion, one hour. Prerequisites: courses 200A and 200B, or consent of instructor. Discussion/demonstration concerning theoretical concepts, methods, and techniques of data gathering and field research in folklore.

M202. Folklore Archiving. (Same as Library and Information Science M202.) Lecture, two hours; laboratory, two hours. Exploration and analysis of alternative data indexing, storage, and retrieval systems and procedures for folklore archival collections, supplemented by firsthand experience in creating and managing data bases, utilizing both manual and computerized techniques. Mr. Georges

CM205. Perspectives in American Folklore Research. (Formerly numbered M205.) (Same as English M205.) Lecture, three hours. Prerequisite: course 101 or consent of instructor. Examination of American folklore studies compared and contrasted with investigations in other countries, with emphasis on principal conceptual schemes and research orientations employed in study of folklore in American society. Concurrently scheduled with course C105. Mr. Georges, Mr. Jones

C206. Anglo-American Folk Song. Survey of Anglo-American balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values. May be concurrently scheduled with course CM106. Mr. Porter

C207. Folklore in Urban Environments. Lecture, three hours. Prerequisites: course 200A and/or consent of instructor. Exploration of expressive and symbolic dimensions of complex urban life, focusing on how immigrants, migrants, residents, and workers shape their experiences through dynamic interplay of community, ethnicity, culture, and religion. Concurrently scheduled with course C107. Mr. Jones

208. Afro-American Folklore and Culture. Prerequisite: graduate standing. Theoretical and methodological constructs which have contributed to the body of black cultural expression in the U.S. Ms. Robinson

M211. Traditional Festivals and Festive Events. (Same as Italian M211.) Lecture, three hours. Prerequisite: consent of instructor. Analysis of traditional expressive forms and behaviors inherent in selected festivals and festive events (e.g., carnival, community folk festivals, small festive gatherings), with emphasis on their structure and human dynamics.

213. Folk Belief and Custom. Prerequisites: course 101 and one course from 118, M121, M122, M123A, M123B, 124, M125, M126, M128, M149, M150, Anthropology 156, German 134, 240A, 240B, 240C. Study of beliefs and customs in the folk community: life cycle, calendrical and agricultural customs, and legal antiquities. Mr. Jones

M214. Ethnography of Humor. (Same as Anthropology M232S.) Lecture, three hours. Prerequisite: graduate standing in folklore and mythology or anthropology. Examination and analysis of selected humorous expressions and events in cross-cultural perspective, with emphasis on major psychological and sociocultural approaches to their study and interpretation.

215. Popular Legend. Prerequisite: course 200A or consent of instructor. Study of categories of legendry and their relation to myth, custom, ritual, popular beliefs, and ballads.

216. Folktales. Prerequisite: course 200A or consent of instructor. Mr. Georges

217. Folk Speech. Lecture, three hours. Study of ethnography of communication and its relevance to study of social and regional dialects, proverbs, riddles, onomastics, folk poetry and verse, and traditional humor. Mr. Georges

218. Folk Art, Craft, and Aesthetics. Lecture, three hours. Prerequisite: course 200A. Examination of research orientations and findings in regard to what has been called folk art, craft, and aesthetics. Major perspectives and areas of inquiry from latter part of the 19th century to the present. Mr. Jones

M219. Seminar: Puppet Theater. (Same as Theater M217B.) Lecture, three hours. Prerequisite: consent of instructor. Studies in puppet theaters of the world: techniques, literature, aesthetics.

228. Seminar: Topics in Celtic Folklore and Mythology. Lecture, three hours. Prerequisites: course 200A, coursework in Celtic studies. Preparation for advanced study of and research in important areas of Irish oral tradition and folklore/mythology scholarship. Possible topics include pagan Celtic Britain/Ireland; comparative Celtic mythology; Celtic origin legends; literary and oral saints' legends; the Irish Fenian (Ossianic) tradition of ballads (*laoidhe/duain*) and prose tales; "fairy" beliefs; collecting and archiving methods of the Irish Folklore Commission; folklore studies and nationalism. Mr. Nagy

M230A-M230B. Folk Tradition in Italian Literature. (Same as Italian M230A-M230B.) Lecture, two hours.

CM232. Celtic Folk Music. (Same as Ethnomusicology CM232.) Prerequisite: consent of instructor. Survey and analysis of indigenous traditional music in lands where a Celtic language is or was spoken into modern times. Instrumental and vocal genres, context and performance, social value and ideology. Concurrently scheduled with course CM132. S/U or letter grading. Mr. Porter

M235. African Myth and Ritual. (Same as English M235.) Prerequisite: consent of instructor. Seminar on methods of analyzing African and African Diaspora myth and ritual. Mr. Cosentino

240. Introduction to Jewish Folk Literature. Prerequisites: upper division standing and consent of instructor, or graduate standing. Examination of both historic and generic methods used in study of Jewish folk literature.

M241. Folklore and Mythology of the Near East. (Same as Near Eastern Languages M241.) Prerequisite: course 101 or equivalent.

M243A. The Ballad. (Same as English M243A.) Prerequisite: consent of instructor. Study of English and Scottish popular ballads and their American derivatives, with some attention to European analogues.

M243B. Problems in Ballad Scholarship. (Same as English M243B.) Prerequisite: course M243A or consent of instructor. Intensive investigation of a problem or problems in study of the popular ballad.

C245. Applied Folkloristics. Prerequisite: graduate standing. Introduction to methods and issues in application of folklore studies to such areas as education, health, museums, organization development, tourism, environmental planning, economic and community development, aging, art therapy, and public sector folklife. Concurrently scheduled with course C145. Mr. Jones

248. Theory and Method in Latin American Folklore Studies. Historical survey of folklore scholarship in Latin America, with emphasis on theoretical bases, methods, and techniques employed in study and analysis of traditional tales, songs, music, linguistic expression.

M249. Folk Literature of the Spanish and Portuguese Worlds. (Same as Portuguese M249 and Spanish M249.) Lecture, three hours. Intensive study of folk literature of the Spanish and Portuguese cultures as represented in (1) ballad and poetry, (2) narrative and drama, (3) speech. Ms. Arora

251. Seminar: Finno-Ugric Folklore and Mythology. Advanced studies in folk traditions and mythologies of the Finno-Ugric speaking nations.

M257. South American Folklore and Mythology Studies. (Same as Anthropology M232R.) Prerequisite: Anthropology 174P or consent of instructor. Examination of oral traditions and related ethnological data from various South American Indian societies against the background of the religious systems of these people.

M258. Seminar: Folk Music. (Same as Ethnomusicology M287.) Seminar, three hours. Prerequisite: consent of instructor. Not open to students with credit for former Music M258. Mr. Porter

259. Seminar: Folklore. Prerequisite: course 200A or consent of instructor. Seminar focusing on selected topics in folklore and mythology. May be repeated for credit.

260. Organizational Folklore, Culture, and Symbolism. Prerequisite: graduate standing. Folklore in organizational settings (stories, rituals, rites, metaphors, etc.) and role of folklore in organization development as information source, diagnostic, and intervention to improve personnel practices, climate, and leadership. Mr. Jones

C265. Film and Folklore. Prerequisite: graduate standing. Introduction to film criticism and folklore methodology. Topics include early examples of folklore on film, changing conceptions of folklore and uses of films about folklore, and examples of films by, with, and for folklorists. Concurrently scheduled with course C165. Mr. Jones

M270A-M270B. Graduate Seminars: Japanese Ritual Arts (2 units each). (Formerly numbered M238.) (Same as Japanese M270A-M270B.) Lecture, three hours. Reading knowledge of Japanese not required. Lectures, discussions, and readings on ritual (performing) arts of Japan comprising music, dance, storytelling, viewing, purification, divination, disguise, mimicry, and competitive as well as acrobatic arts, with special emphasis on religio-magical purposes and symbolic structure of these arts. In Progress grading. Mr. Plutschow

C275. Food Customs and Symbolism. Prerequisite: junior standing. Introduction to foodways, with particular attention to customs and symbolism in America. Topics include sensory realm, child rearing practices, foodsharing, food and identity, food and its emotional significance, aversions and taboos, advertising, changing food habits, and the American diet. Concurrently scheduled with course C175. Mr. Jones

CM284D. Dance in the British Isles and North America: Anglo-American Tradition. (Same as Dance CM284D.) Introduction to folklore research on dance, with examples primarily from the British Isles and related traditions in North America. Topics include search for origins, structural analysis of dance forms, relation of dance to its contexts. Concurrently scheduled with course CM184D. Mr. Quigley

M286A-M286B. Studies in Hispanic Folk Literature. (Same as Spanish M286A-M286B.) Lecture, two hours. Ms. Arora

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading. Mr. Georges, Mr. Jones

400A-400B-400C. Directed Professional Activities. Prerequisite: consent of department chair. Directed individual projects in professional editing, bibliography, discography, filmography, festival direction, and other professional activities. May not be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

495. Teaching Folklore and Mythology. Lecture, three hours. Prerequisite: course 200A. Analysis and design of alternative organizational schemes, teaching aids and techniques, and evaluation methods for folklore and mythology courses at the college level, with opportunities for observation and apprentice teaching. May not be applied toward M.A. or Ph.D. course requirements. S/U grading. Mr. Georges, Mr. Jones

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Studies in Folklore (2 to 6 units).

597A. Preparation for M.A. Comprehensive Examination (2 to 4 units). Prerequisites: graduate standing in folklore and mythology, consent of instructor. S/U grading.

597B. Preparation for Ph.D. Qualifying Examinations (4 to 8 units). Prerequisites: successful completion of M.A. comprehensive examination, consent of instructor. S/U grading.

598. M.A. Thesis Preparation (2 to 4 units).

599. Ph.D. Dissertation Research (4 to 8 units). Prerequisite: advancement to Ph.D. candidacy. S/U grading.

Scope and Objectives

The Department of French is a major West Coast center for the study of French. In recent decades French critical thought has maintained a dominant position in the Western world. The department seeks to give its students not merely a background in the various fields of French studies, but opportunity to synthesize literary, linguistic, and cultural study with examination of the critical intellectual questions of our time.

The lower division program is designed to provide minimal competence in French after one year and thorough basic knowledge of the language after two years. From the first day of French 1 all instruction is conducted in French.

The upper division program is chiefly devoted to perfecting linguistic skills and to the study of French culture and literature. Courses in linguistics and business French are also offered. Students graduating with a Bachelor of Arts in French should be fully fluent in French and possess a thorough background in French literature and culture. All four plans lead to the Bachelor of Arts degree and subsequently to graduate studies in French.

The graduate program comprises training in the various fields of French literature and thought, as well as in literary criticism, analysis, and theory. A number of courses in linguistics and stylistics are also offered. The department offers both the M.A. and Ph.D. degrees.

Bachelor of Arts Degrees

Preparation for the Majors

Required: French 1, 2, 3, 4, 5, 6, 12, and 15, or equivalent. You normally take course 6 before undertaking course 12 or 15. If you received a grade of A in course 5, you may enroll in course 12 concurrently with course 6, with consent of instructor. Students in Plan D must also take Linguistics 20.

The Majors

Four plans are offered by the department:

Plan A (General) leads to the Bachelor of Arts in French and subsequently to the standard elementary or secondary instructional credential. *Required:* Fifteen full courses of upper division work, including French 100, 101, 102, 103, 114A-114B-114C; two terms from courses 130A through 132 (a course in French history may be substituted for one of these with consent of the major adviser); three courses and/or seminars in French literature from 115A through 125 and/or 150 through 157; three elective courses and/or seminars normally selected from upper division offerings in the department in language, civilization, literature, or the arts, including 105 through 109, 130A through 132, 140 through 142, and 158. Two upper division courses outside the department may be substituted in the major program with consent of the undergraduate adviser.

Candidates for an instructional credential within Plan A must take 15 upper division French Department courses, including French 105, in order to qualify for a waiver of the National Teachers Examination for the single subject instructional credential in French.

Plan B (Literature) leads to the Bachelor of Arts in French. *Required:* Fifteen full courses of upper division work, including French 100, 101, 102, 103, 114A-114B-114C; six courses and/or seminars in French literature from 115A through 125 and/or 140 through 157; two elective upper division courses from the department, the humanities or social sciences division of the College of Letters and Science, or the School of the Arts, to be selected in consultation with a major adviser.

Plan C (French Studies), with emphasis on French culture, leads to the Bachelor of Arts in French and is a core program in French allowing for individual selection of relevant courses in related fields such as humanities, social sciences, women's studies, and linguistics. *Required:* Fifteen full courses of upper division work, including French 100, 101, 102, 103, 114A-114B-114C; three courses and/or seminars in French literature from 115A through 125 and/or 140 through 157; five upper division elective courses in the fields relevant to French studies to be selected in or out of the department in consultation with the undergraduate adviser.

Plan D (French and Linguistics) leads to the Bachelor of Arts in French and Linguistics. In addition to the normal preparation for the major, you are required to complete the sixth term of work in one other foreign language or the third term in each of two other foreign languages. Linguistics 20 is required as preparation for the major. *Required:* Fourteen full courses of upper division work, including French 100, 101, 102, 103, 114A-114B-114C; two courses from French 105, 107, 108A, 109; Linguistics 103, 110, 120A, 120B, and 165A or 165B.

It is strongly advised that students who intend to pursue advanced degrees begin preparation for the language requirements at the undergraduate level.

If your knowledge of French exceeds the preparation usually received in courses preparing for the major and if you demonstrate the requisite attainment in French 100, 101, or 102, you may substitute for those courses in grammar and composition an equivalent number of upper division courses in the Department of French in consultation with an adviser. All prospective French majors who are native or quasi-native speakers of French must see the undergraduate adviser before beginning upper division work in the major.

All majors must complete a minimum of nine courses of appropriate upper division work in the UCLA Department of French. A maximum of eight units of course 199 may be applied toward the elective requirements for the major if approved in advance by the undergraduate adviser. You must maintain a C average in upper division major courses in order to remain in any of the French majors.

Coursework taken on a Passed/Not Passed basis is not acceptable in any area of the major program.

It is recommended that students intending to major in French consult a major adviser before enrolling in upper division courses.

Honors Program

The department encourages those students in the French majors with initiative and independence of mind who desire an enriched individualized course of study to apply for the honors program.

The honors program is designed for French majors who have fulfilled their lower division requirements and have a 3.5 departmental grade-point average. Students whose GPA falls between 3.3 and 3.5 should submit a composition from an advanced language or literature course to the honors committee. If the work submitted meets with approval, you are admitted to the program.

To graduate with departmental honors, you must complete a minimum of two honors projects in the context of nonhonors upper division courses (French 115A and above) taken for honors credit. You must do an extra honors project (a research paper of 12 to 15 pages) in addition to the regular course requirements. An honors contract must be signed before the end of the third week of the term. After completing the project, you fill out a completion form.

On the basis of your coursework and field of interest, you are expected to formulate a research topic you wish to pursue in greater depth. You take course 170 where you receive regular personal supervision from a faculty member in the research, methodology, and writing of your approximately 20- to 25-page honors thesis (honors projects and the honors thesis are not to be confused). Course 170 counts toward the requirements for the French majors as outlined above.

You may begin the honors program toward the end of your junior year or during your senior year. The honors projects and course 170 may be taken over two terms minimum. You are allowed to enroll in graduate courses with the consent of the professor but cannot use those courses to replace an honors project. Departmental honors will be recorded on your final transcript if you fulfill all requirements for the program. You may submit your final honors thesis for the departmental prize.

Instructional Credential in French

If you wish a single subject instructional credential in French, you must have the consent of the French Department in order to gain admission to student teaching. For the single subject credential, consent is contingent on a major (or equivalent) in French and the successful completion of French 370. For additional information, consult the Graduate School of Education (1605 Maxxam Building, 825-8328) and/or the Department of French.

Master of Arts Degree

Admission

The Graduate Record Examination (GRE) General Test, a sample of written work in French, and three letters of recommendation are required and should be sent to the Department of French, 222 Royce Hall, UCLA, Los Angeles, CA 90024-1550. You must hold a Bachelor of Arts in French or the equivalent.

Major Fields or Subdisciplines

The corpus of French literature is divided into three chronological periods, each including two "centuries": (1) medieval and Renaissance, (2) classical (17th and 18th centuries), and (3) modern (19th and 20th centuries, with francophone literature as an option).

Foreign Language Requirement

The foreign language requirement may be fulfilled by (1) passing a course of at least level three in either German, Latin, Spanish, or Italian, (2) by passing the University reading examination in one of these languages, or (3) by passing the Graduate School Foreign Language Test (GSFLT) with a score of 500 or better. In special cases, substitution of another foreign language is accepted if approved by the graduate adviser. You must complete the foreign language requirement before you submit your M.A. thesis (Plan I) or take the M.A. examination (Plan II). All candidates for the M.A. must be proficient in spoken French.

Plans of Study

The department offers two master's programs: Plan I (thesis plan) and Plan II (comprehensive examination plan).

Plans I and II Course Requirements — A total of 11 courses in French is required, including French 201, 202, and 203 (should be taken as early as possible), at least one course in each of the six "centuries," and one additional course in the period not covered on the M.A. examination. For Plan I thesis candidates, this is the period of specialization which is not covered on the oral qualifying examination. At least eight of the courses must be at the graduate level. Four units of course 596 (or 598 for students in Plan I) may be substituted for one required "century" course on approval of the graduate adviser or thesis director.

Plan I (Thesis Plan) — You may apply to the chair of the department for admission into Plan I after completing at least six graduate courses (200 series), four of which must be literature courses in the French Department. The minimum admission requirements are a 3.5 graduate GPA in French and letters from two graduate professors in the department specifically recommending admission into this plan. A brief statement of your proposed thesis topic is also required.

Final admission into Plan I (i.e., permission to write the thesis) is contingent on passing a one-hour oral examination, administered by the departmental master's committee, in the two periods other than the proposed period of specialization (in which you will write the thesis). You normally take the examination during the fourth term (but no later than the sixth term) after admission. Your thesis committee is appointed only after you have passed the examination. If you fail this examination, the examining committee determines whether you may be permitted another attempt or be ad-

vised to take the comprehensive examination (Plan II).

For the purpose of course requirements, the period of specialization for the thesis is considered the period not covered on the M.A. examination; course 598 may be applied as one of the three courses required in this period.

The thesis should demonstrate proficiency in the methods and concepts of literary research; a suitable length is normally about 50 pages. A tentative outline of the proposed thesis must be approved in writing by the thesis committee before work on the thesis is begun. Final approval of the thesis by the committee is also required.

Plan II (Comprehensive Examination Plan)

— You must pass written examinations of four hours in length in each of the two periods prepared and a 30-minute oral examination in French covering the two periods of the written examination. The examinations are given in Fall and Spring Quarters and may be retaken once.

Three results are possible in either Plan I or II — fail, pass without admission to the doctoral program (terminal M.A.), or pass with admission to the doctoral program. The decision concerning admission to the doctoral program is made by the department on the basis of your M.A. examination or thesis results and overall appraisal of your record.

Students who either fail or pass without admission to the doctoral program are permitted to retake the examination or resubmit the thesis once, at a date no later than a year after the first attempt.

Ph.D. Degree

Admission

For UCLA applicants, completion of the master's degree in French with recommendation for admission to the doctoral program is required; outside applicants must hold an M.A. degree in French or equivalent and must submit three letters of recommendation, as well as the Graduate Record Examination (GRE) General Test and a sample of written work in French.

Admitted students holding the M.A. or an equivalent degree from another institution must take an oral *examen de passage* in two periods of literary history (to be selected in consultation with the graduate adviser) in order to be formally admitted to the doctoral program. This examination, administered by the M.A. committee, should be taken during your first year in residence. In case of failure it may be repeated once.

Major Fields or Subdisciplines

The corpus of French literature is divided into three chronological periods, each including two "centuries": (1) medieval and Renaissance, (2) classical (17th and 18th centuries), and (3) modern (19th and 20th centuries, with francophone literature as an option).

Foreign Language Requirement

Languages are divided into three groups: Latin; German and Russian; and other Romance languages. You must demonstrate proficiency in two languages at level five, with no more than one from any one group. The languages selected must be approved by your guidance committee. Language requirements may also be satisfied by passing the Graduate School Foreign Language Test (GSFLT) with level five corresponding to a score of 550. Substitution of another language, when warranted by the nature of your specialization, must be recommended by the guidance committee and approved by the graduate adviser. Language requirements are to be completed before taking the doctoral qualifying examinations.

Course Requirements

The following courses are required: (1) French 201, 202, and 203, if not already covered at the M.A. level, (2) a minimum of five seminars, at least two of which must be taken after obtaining the M.A. (balance should be sought between theoretical and literary-historical relevance to your proposed period of specialization), (3) at least two graduate courses in other departments related to the area of specialization. In addition, you are expected to follow the guidance committee's suggestions in taking courses in preparation for the doctoral qualifying examinations.

Qualifying Examinations

Two written examinations of three hours each, based on individual reading lists of approximately 15 works each, are required as follows: (1) focused specifically on the historical area related to the proposed dissertation topic and (2) in areas of critical theory relevant to the proposed dissertation topic. The examinations must be taken within a period of one week; in no case may they be separated by a longer interval. The topics are determined by prior consultation with the doctoral guidance committee. At the discretion of the guidance committee, you may be permitted to retake a failed written examination once.

After passing the written examinations, you are admitted to the University Oral Qualifying Examination which should be taken during the same term as the written qualifying examinations. You must submit a 20- to 30-page prospectus of your proposed dissertation, including an outline and a bibliography. This examination, normally of two hours duration, bears on the written examinations and on the proposed dissertation subject.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

This examination is not required by the department but may be imposed at the discretion of an individual doctoral committee.

Lower Division Courses

Students who have had special advantages in preparation may, through placement examinations or with recommendation of the instructor, be permitted a more advanced program. If you have taken French elsewhere, you must take a placement test administered by the department. No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition.

1. Elementary French. Lecture, five hours.

1G. Elementary French for Graduate Students (3 units). Preparation for GSFLT or other language examinations. A passing grade does not imply satisfaction of language requirements. S/U grading.

2. Elementary French. Lecture, five hours. Prerequisite: course 1 with a grade of C- or better or one year of high school French.

2G. Elementary French for Graduate Students (3 units). Prerequisite: course 1G or equivalent. Preparation for GSFLT or other language examinations. A passing grade does not imply satisfaction of language requirements. May be repeated. S/U grading.

3. Elementary French. Lecture, five hours. Prerequisite: course 2 with a grade of C- or better or two years of high school French or advanced placement standing.

4. Intermediate French. Lecture, five hours. Prerequisite: course 3 with a grade of C- or better or three years of high school French or advanced placement standing.

5. Intermediate French. Lecture, five hours. Prerequisite: course 4 with a grade of C- or better or four years of high school French or advanced placement standing.

6. Intermediate French. Lecture, five hours. Prerequisite: course 5 with a grade of C- or better or advanced placement standing.

10A-10D. French Conversation (2 units each). Discussion, three hours. Prerequisite: course 3 with a grade of A or B or consent of department.

12. Introduction to Study of French Literature. Lecture, two hours; discussion, one hour. Prerequisite: course 6 or equivalent or consent of instructor. Principles of literary analysis as applied to selected texts in poetry, theater, and prose.

Mr. Carron in charge (F,W,Sp)

14. Introduction to French Civilization. Lecture, three hours. Prerequisite: course 6 or consent of instructor. Study of contemporary French institutions and issues in political, cultural, and socioeconomic realms. Structure of and recent developments in French society.

15. Theory and Correction of Diction. Prerequisite: course 6 or consent of instructor. French pronunciation, diction, intonation in theory and practice; phonetic transcription, phonetic evolution of the modern language; remedial exercises; recordings.

Ms. Jansma in charge

Upper Division Courses

Prerequisites to all upper division courses taken in partial fulfillment of the French major are French 6, 12, 15, or equivalent. Credit is ordinarily not allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition. Courses 105 through 109 are not sequential and may be taken in any order, provided the prerequisites for each course are fulfilled.

100. Introduction to Written Expression. Lecture, three hours. Prerequisite: course 6 or equivalent. Development of writing techniques in French, with emphasis on revision of grammatical structures.

Mr. Collaros in charge (F,W,Sp)

101. Intermediate Exposition. Lecture, three hours. Prerequisite: course 100 or equivalent. Development of narrative techniques in writing, with emphasis on editing for grammar and style.

Mr. Collaros in charge (F,W,Sp)

102. Advanced Exposition. Lecture, three hours. Prerequisite: course 101 or equivalent. Development of analytic writing skills in French, with emphasis on rhetorical techniques and skillful argument.

Mr. Collaros in charge (F,W,Sp)

103. Composition and Style. Lecture, three hours. Prerequisite: course 102 or equivalent. Designed to develop proficiency in composition and style, with concentration on three linguistic skills of reading, writing, and translating. Ms. Dufresne (F,W,Sp)

105. Structure of French. Lecture, three hours. Prerequisites: course 15, consent of instructor. Prior background in linguistics not required. Introduction to linguistic analysis of French in areas of phonology, morphology, syntax, and language variation.

Ms. Jansma (W)

107. Advanced Oral Expression. Lecture, three hours. Prerequisites: courses 15 and 100, or consent of instructor. Communicative and rhetorical strategies; techniques of oral exposition, argumentation, and analysis. Ms. Dufresne (F,W,Sp)

108A-108B-108C. Advanced Practical Translation. Lecture, three hours:

108A. Prerequisite: course 103 with a grade of B or consent of instructor. Introduction to translation of advanced texts of general interest, with work in theory of translation. Mr. Collaros in charge

108B. Prerequisite: course 108A or consent of instructor. Practice in translation of technical documents and texts; comparative stylistics of translation. Mr. Collaros in charge

108C. Prerequisite: course 108B or consent of instructor. Advanced work in areas of general and specialized interest. Mr. Collaros in charge

109. French Business: Its Language and Culture. Lecture, three hours. Prerequisite: course 6 or equivalent. Study of language of economics and business in France as well as its specific practices and customs. Mr. Collaros (Sp)

114A-114B-114C. Survey of French Literature. Lecture, three hours. Prerequisite: course 12 or consent of instructor. Survey of French literature from the medieval period through the 20th century:

114A. Medieval and Renaissance Literature. Masterpieces of medieval and Renaissance literature, including examples of epic (*La Chanson de Roland*), romance (Chrétien de Troyes' *Yvain*), and Renaissance prose and poetry (including Marot, Du Bellay, Ronsard, Rabelais, Marguerite de Navarre, and Montaigne). Mr. Coleman in charge

114B. 17th and 18th Centuries. Study of selections from major works of classicism and the Enlightenment, including those by Racine, Pascal, La Fayette, La Fontaine, Laclous, Diderot, Voltaire, and Rousseau. Mr. Coleman in charge

114C. 19th and 20th Centuries. Study of major literary movements and writers of the period, including works by Hugo, Baudelaire, Balzac, Stendhal, Flaubert, Zola, Gide, Proust, Sartre, Robbe-Grillet, and Duras. Mr. Coleman in charge

115A-115B-115C. Medieval French Literature: (Formerly numbered 115A-115D.) Lecture, three hours:

115A. Invention of Love in the 12th Century. Selections from the broad range of lyric poetry and narrative romance in which is first elaborated "romantic" (sometimes called "courtly") love. Readings include works of the troubadours and trouvères, different versions of the Tristan-myth, a romance of Chrétien de Troyes, and first part of *Romance of the Rose*.

Mr. Haidu

115B. Medieval Knight: Heroism and Its Social Problems. Readings in literature and history of medieval warfare and its ideals in relation to social structure of the time. Texts include *La Chanson de Roland*, *Raoul de Cambrai*, *La Mort le roi Artu*, crusade history, and Georges Duby's *Guerriers et paysans*. Mr. Haidu

115C. Comic Structure and Social Class. Medieval comedy, to be studied in relation to class structures and their evolution in the Middle Ages, takes a number of forms. Often obscene in the *fabliaux*, it can turn parodic in the *Roman de Renart*, simultaneously satiric, fantastic, and religious in the bourgeois drama of Arras, and utterly charming in the unclassifiable *Aucassin et Nicolette*. Mr. Haidu

116A-116B-116C. Renaissance. (Formerly numbered 116A-116D.) Lecture, three hours:

116A. La Pléiade and 16th-Century Poetry. Study of linguistic and poetic "revolution" brought about by the *Deffence et illustration* (1549), including texts by Marot, Scève, Labé, Du Bellay, and Ronsard. Mr. Carron

116B. The Novel and Other Early 16th-Century Prose. Emphasis on Rabelais, with other texts by Marguerite de Navarre and Jean Calvin. Mr. Carron

116C. Late French Humanism. Emphasis on Montaigne's *Essais*, with other texts from the Religious Wars period. Mr. Carron

117A-117B-117C. 17th Century. (Formerly numbered 117A-117D.) Lecture, three hours:

117A. Theater. Study of French comedy and/or tragedy through representative works, including those by Corneille, Molière, and Racine. Ms. Melzer, Ms. Stefanovska

117B. Prose. Study of 17th-century philosophers, moralists, and/or novelists such as Pascal, La Rochefoucault, La Bruyère, La Fayette, and La Fontaine. Ms. Melzer, Ms. Stefanovska

117C. Culture and Society. (Formerly numbered 117D.) Study of 17th-century political, social, religious, and courtly aspects, including libertine and *salons milieu*, La Fronde, and Versailles. Ms. Melzer, Ms. Stefanovska

118A-118B-118C. 18th Century. (Formerly numbered 118A-118D.) Lecture, three hours:

118A. Satire. Readings include Montesquieu's *Lettres persannes*, Diderot's *Neveu de Rameau* and *Rêve de d'Alembert*, and Voltaire's *Contes*. Mr. Coleman, Mr. Werner

118B. The Novel. Readings include Prévost's *Manon Lescaut*, Diderot's *La Religieuse* and *Jacques le fataliste*, excerpts from Rousseau's *Julie*, and Laclos' *Les Liaisons dangereuses*. Mr. Coleman, Mr. Werner

118C. Theater. Readings include selected plays of Marivaux and Beaumarchais, as well as selections from theoretical writings of Diderot and Rousseau. Mr. Coleman, Mr. Werner

119A-119D. 19th Century. Lecture, three hours:

119A. Romanticism. Readings of representative poets, novelists, and playwrights of the Romantic era such as Chateaubriand, Lamartine, Hugo, Vigny, Balzac, and Stendhal. Mr. Gans

119B. Generation of 1848. Readings of representative writers of the 1840s and the Second Empire such as Baudelaire, Nerval, Balzac, Flaubert, and Mérimée. May also include the *théâtre à thèse* and Parnassian poetry. Mr. Gans

119C. Naturalism and Symbolism. Study of naturalism in the novel and drama as represented by Zola, Maupassant, and Becque, and of symbolism in the poetry of Baudelaire, Verlaine, Rimbaud, and Mallarmé. Mr. Gans

119D. Turn of the Century. Study of genres and trends from 1885 through World War I, with emphasis on prose writers such as Huysmans, Laforgue, Barrès, Alain-Fournier, Jarry, Roussel, France, and Romain-Roland. Mr. Gans

120A-120D. 20th Century. Lecture, three hours:

120A. Early 20th-Century Writers. Readings of works by Claudel, Apollinaire, Valéry, Gide, and Proust. Ms. Kao, Ms. Loselle

120B. Literature from 1918 to 1945. Study of works by surrealists and other major writers such as Céline, Malraux, Giraudoux, and Anouilh. Ms. Kao, Ms. Loselle

120C. Post-World War II Literature. Study of works by existentialists and other major writers such as Robbe-Grillet, Beckett, Genet, Ponge, and Duras. Ms. Kao, Ms. Loselle

120D. Post-May 1968 Literature. Study of representative works from the "revolution" of 1968 to the present. Ms. Kao, Ms. Loselle

121A-121B. Contemporary Francophone Literature. Lecture, three hours:

121A. French-African Literature. Survey of literary works of French expression north and south of the Sahara from World War II to the present. Mr. Coleman

121B. Quebec Literature. Survey of modern *Québécois* literary works. Mr. Coleman

124. The Short Story. (Not the same as course 124 prior to Fall Quarter 1990.) Lecture, three hours. Survey of short fiction forms in France and the French-speaking world. Mr. Coleman

125. Evolution of French Comedy. Lecture, three hours. Study of history and evolution of comedy from the Middle Ages to the Theater of the Absurd. Ms. Melzer

130A-130B-130C. History of French Civilization and Institutions. Prerequisites: courses 6, 12, 15:

130A. France from Prehistoric Times to the End of the Middle Ages. Lecture, three hours. Fourth hour may be required for viewing films and other laboratory activities. Ms. Stefanovska

130B. From the Renaissance to the End of the "Ancien Régime." Lecture, three hours. Fourth hour may be required for viewing films and other laboratory activities. Ms. Stefanovska

130C. From the End of the "Ancien Régime" to 1918. Lecture, three hours. Fourth hour may be required for viewing films and other laboratory activities. Ms. Stefanovska

132. Contemporary France. Lecture, three hours. Social, cultural, and political institutions and/or movements in 20th-century France. (Sp)

140. Women's Studies in French Literature. (Formerly numbered 158.) Lecture, three hours. Exploration of a selected aspect of the situation of women in French literature as author, character, symbol, etc. Ms. Stefanovska

141. Cinema and Literature in France. (Formerly numbered 138.) Lecture, three hours (additional hours may be required for viewing films and other laboratory activities). Study of interaction between cinema and literature in its generic, thematic, and sociocultural aspects. Mr. Carron

142. Poetry and Music. Lecture, three hours. Interdisciplinary study of relation between music and literature, with emphasis on the setting of poetical texts to music, from the troubadours to modern times. Mr. Carron

Courses 150 through 156 may be repeated once for credit with consent of major adviser.

150. Studies in Medieval Literature.

151. Studies in 16th-Century Literature.

152. Studies in 17th-Century Literature.

153. Studies in 18th-Century Literature.

154. Studies in 19th-Century Literature.

155. Studies in 20th-Century Literature.

156. Studies in Contemporary Literature of French Expression.

157. Studies in French Critical Theory and Philosophy. Lecture, three hours. Prerequisite: consent of instructor. Advanced study of major concepts in contemporary French thought, with attention to its influence on French letters and culture, and its application to literary and nonliterary texts.

158. Studies in History of Ideas. (Formerly numbered 160.) Lecture, three hours. Specific themes which address a particular problem of French literature, civilization, or ideas. May be repeated for credit with consent of major adviser.

The following courses may not be taken for graduate credit but may be taken as the equivalent of out-of-department electives by undergraduate majors.

162. Modern French Thought in Translation. (Formerly numbered 143.) Lecture, three hours. Reading and discussion of contemporary works in translation.

163. Contemporary French Theater in Translation. (Formerly numbered 142.) Lecture, three hours; discussion, one hour.

164A-164B-164C. The French Novel in Translation. (Formerly numbered 144A-144B-144C.) Lecture, three hours; discussion, one hour. Authors to be studied announced each term.

165. Topics in French Literature in Translation. (Formerly numbered 145.) Lecture, three hours. To be announced each term. May not be taken for major or graduate credit but may be considered as an out-of-department elective for purpose of satisfying major requirements.

170. Honors Program in French. (Formerly numbered 140.) Prerequisites: junior or senior standing in French with 3.5 GPA in major, completion of two honors projects, consent of department. Individual study on a topic leading to an honors thesis of approximately 20 to 25 pages to be written under guidance of a faculty member. Ms. Loselle in charge

199. Special Studies in French (2 to 8 units). Prerequisites: junior or senior standing, consent of instructor, consultation with undergraduate adviser. May be repeated once.

Graduate Courses

201. Literary Research and Composition. Lecture, three hours. Introduction to graduate-level literary research, including writing scholarly papers, compilation and presentation of bibliography, and practical work in computer use of data bank.

202. Historical and Philosophical Background to French Literary Criticism. (Formerly numbered 203A.) Lecture, three hours.

203. Contemporary Theories. (Formerly numbered 203B.) Lecture, three hours. Introductory study of representative texts from the works of major modern theoreticians, which may include works by Althusser, Barthes, Derrida, Foucault, Genette, Greimas, Kristeva, and Lacan.

205. Techniques of Literary Analysis. (Formerly numbered 202.) Lecture, three hours. Practice in close analysis of literary texts, including *explication de texte*.

210A. Phonology and Morphology from Vulgar Latin to French Classicism. (Formerly numbered 204A.) Lecture, three hours. Evolution of the French language. Required of candidates for Ph.D. in Romance Linguistics and Literature who specialize in philology.

210B. Syntax and Semantics from Vulgar Latin to French Classicism. (Formerly numbered 204B.) Lecture, three hours. Evolution of the French language. Required of candidates for Ph.D. in Romance Linguistics and Literature who specialize in philology.

214. Problematics of Medieval Language and Literature. (Formerly numbered 215A.) Lecture, three hours. Prerequisite to courses 215A through 215D and 250A through 250C. Introduction to Old French and the problematics of medieval literature.

Mr. Haidu

215A-215D. Medieval Literature. (Formerly numbered 215A-215F.) Lecture, three hours. Prerequisite: course 214.

215A. Lyric Types. (Not the same as course 215A prior to Fall Quarter 1990.) Mr. Haidu

215B. Narrative Types. Mr. Haidu

215C. Theater — Comic and Religious. Mr. Haidu

215D. Discursive Texts. Mr. Haidu

216A-216B-216C. Renaissance. (Formerly numbered 216A-216E.) Lecture, three hours:

216A. Early Renaissance French Literature. Selected readings of works from first half of the 16th century, including those by Marot, Rabelais, Marguerite de Navarre, and Scève. Mr. Carron

216B. Poetic "Revolution" of 1549. Readings of works by Ronsard and Du Bellay, with selections from other writers of the 1550s. Mr. Carron

216C. Late Renaissance Literature. Selected readings of works by major writers of the period from 1560 to 1600, including those by d'Aubigné, Sponde, Chassignet, and Montaigne. Mr. Carron

217A-217D. 17th Century. (Formerly numbered 217A-217L.) Lecture, three hours:

217A. Theater. Analysis of representative comedies and/or tragedies, including those by Corneille, Molière, and Racine. Ms. Melzer, Ms. Stefanovska

217B. Prose. Readings of selected works by philosophers, moralists, and/or novelists, including those by Pascal, La Rochefoucault, La Bruyère, La Fayette, and La Fontaine. Ms. Melzer, Ms. Stefanovska

217C. Poetry. Selected readings of works by major poets, including those by Racan, Voiture, Saint-Amant, Racine, La Fontaine, and Boileau. Ms. Melzer, Ms. Stefanovska

217D. Culture and Society. Study of political, social, religious, and courtly aspects, including *libertine* and *salons milieu*, La Fronde, and Versailles. Ms. Melzer, Ms. Stefanovska

218A-218B-218C. 18th Century. (Formerly numbered 218A-218D.) Lecture, three hours:

218A. Topics in the Early Enlightenment. Selected readings from major works of the period from 1680 to 1747. Mr. Coleman, Mr. Werner

218B. Topics in the Enlightenment. Selected readings from major works of the period from 1748 to 1765. Mr. Coleman, Mr. Werner

218C. Topics in the Late Enlightenment. Selected readings from major works of the period from 1766 to 1791. Mr. Coleman, Mr. Werner

219A-219D. 19th Century. (Formerly numbered 219A-219K.) Lecture, three hours:

219A. Topics in Romanticism. Readings in literature of the Romantic period. Mr. Gans

219B. Topics in Realism and Naturalism. Readings in realist and naturalist novel and theater. Mr. Gans

219C. Topics in Symbolism. Readings in symbolist poetry and prose. Mr. Gans

219D. Poetry. Study of development of French poetry throughout the 19th century. Mr. Gans

220A-220D. 20th Century. (Formerly numbered 220A-220P.) Lecture, three hours:

220A. Turn of the Century. Readings of works by post-symbolist writers, as well as Valéry, Gide, and Proust. Ms. Kao, Ms. Loselle

220B. Literature from 1918 to 1945. Readings of works by surrealist writers, as well as Céline, Malraux, and Anouilh. Ms. Kao, Ms. Loselle

220C. Post-World War II Literature. Readings of works by existentialist writers, as well as Robbe-Grillet, Beckett, and Ponge. Ms. Kao, Ms. Loselle

220D. Cinema and Literature. Comparative study of interrelations between cinematic and literary forms. Ms. Kao, Ms. Loselle

221A-221C. French-African Literature. (Formerly numbered 221A-221D.) Lecture, three hours:

221A. Introduction to Study of French-African Literatures. In-depth survey of French-African literatures prior to independence.

221B. French-African Literature of Madagascar and Bantu Africa. Readings and analysis of major works since independence.

221C. French-African Literature of Berbero-Sudanese and Arabo-Islamic Africa. Readings and analysis of major works since independence.

222. Quebec Literature. Lecture, three hours. Study of selected poems, novels, and plays in their cultural context. Mr. Coleman

241. Introduction to Generative Anthropology. (Formerly numbered 261.) Lecture, three hours. Prerequisite: consent of instructor. Discussion of principles of generative anthropology and their application to study of literary texts and related cultural phenomena. Mr. Gans

242. Introduction to Study of Narrative. Lecture, three hours. First survey of modern French methodology for critical analysis and interpretation of narrative, with examples from all periods of French literature. Mr. Haidu

Seminars 250A through 260B may be repeated for credit.

250A. Major Medieval Texts. Seminar, three hours. Prerequisite: course 214. Intensive study of individual texts from multiple perspectives, such as *La Chanson de Roland*, a romance of Chrétien de Troyes, *Le Roman de la rose*, or François Villon's *Grand Testament*. Mr. Haidu

250B. Structures of Medieval Literature. Seminar, three hours. Prerequisite: course 214. Advanced study of a variety of texts in terms of textual and historical structures. Mr. Haidu

250C. Problems in Medieval Literature. Seminar, three hours. Prerequisite: course 214. Exploratory study of a theoretical problem, such as subjectivity and representation in medieval literature, minor or nonclassified texts, individuality and convention, or opposition of religion and secularism. Mr. Haidu

251A-251B. Studies in the Renaissance. Mr. Carron

252A-252B. Studies in the Baroque. Mr. Carron, Ms. Melzer

253A-253B. Studies in the 17th Century. Ms. Melzer, Ms. Stefanovska

254A-254B. Studies in the 18th Century. Mr. Coleman, Mr. Werner

255A-255B. Studies in the 19th Century. Mr. Gans

256A-256B. Studies in Contemporary Literature. Ms. Kao, Ms. Loselle

257A-257B. Studies in French-African Literature.

258A-258B. Studies in Literary Criticism.

259A-259B. Studies in Philosophy and Literature.

260A-260B. Studies in History of Ideas. Particular problems of French literature and ideas.

370. Teaching French in Secondary School. Lecture, three hours; discussion, one hour. Required of all candidates for general secondary instructional credential in French. Ms. Dufresne, Ms. Jansma

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching French at College Level. Lecture, three hours; discussion, one hour. Prerequisite: graduate standing. Theory and practice of language teaching. S/U grading. Ms. Dufresne, Ms. Jansma

596. Directed Individual Studies or Research (2 to 4 units).

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units). May be repeated for a maximum of 16 units. S/U grading.

598. Research for and Preparation of M.A. Thesis (2 to 4 units). Prerequisite: consent of instructor. A maximum of four units may be applied toward M.A. degree requirements. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (2 to 8 units).

Norman J.W. Thrower, Ph.D.

Associate Professor

Gerry A. Hale, Ph.D.

Assistant Professors

Judith A. Carney, Ph.D.
Michael R. Curry, Ph.D.
Chi-Fun Cindy Fan, Ph.D.
Johannes J. Feddema, Ph.D.
Stephen A. Matthews, Ph.D.
Joshua S.S. Muldavin, Ph.D.
Marilyn N. Raphael, Ph.D.
David L. Rigby, Ph.D.
Melissa Savage, Ph.D.

Scope and Objectives

Geography is concerned primarily with interpreting and explaining the occurrence, distribution, and interrelationships of the physical and social elements which can be seen in the landscape. The geographer concentrates on two essential questions: where are things located? and why are they located where they are? The answer to the former is largely descriptive, but the answer to the latter involves theory and analysis. The geographer's challenge is to provide continuing interpretation of the constantly changing physical and human landscapes on the Earth's surface.

The research and teaching interests of the faculty, ranked sixth nationally by the Conference

Board of the Associated Research Councils, cover major areas of geographical knowledge and underlie both the undergraduate and graduate instructional programs. These areas of interest may be broadly grouped into urban and regional development studies, spatial demography and social processes in the city, culture and environment in the modern world, physical geography, and biogeography.

Geography is an especially attractive major for liberal arts students. Its body of theory and its methodologies provide ideas and techniques applicable to a wide range of questions about our environment; it also provides both the regional and world perspectives required of responsible citizens.

The department offers two undergraduate majors that lead to the Bachelor of Arts degree: (1) the major in geography and (2) the major in geography/environmental studies. The majors prepare students for employment opportunities in both the public and private sectors (in environmental analysis, assessment, and management, map making and remote sensing, regional analysis, economic and urban spatial analysis, and teaching) and for graduate study in law, management, urban and regional planning, education, other biophysical and social sciences, and applied programs, as well as in geography.

Producing geographers of high quality is the principal goal of the graduate program, designed primarily for students pursuing the Ph.D. degree. The Master of Arts degree, which involves coursework and a thesis, serves as an essential building-block of the doctoral program. The doctorate is awarded to those students who have achieved the level of geographical knowledge and training required of a professional geographer. The degree recognizes the ability of students to make scholarly contributions in their fields of specialization and to undertake advanced research in those areas.

Bachelor of Arts in Geography

Geography majors are encouraged to consult with the undergraduate adviser for the planning of a program suitable to their particular and individual objectives.

Preparation for the Major

Required: Geography 1, 2, 3, 4, 40. All courses must be taken for a letter grade.

The Major

Required: Ten upper division geography courses taken for a letter grade, which must include (1) five courses from one of the "Concentrations for the Major" listed below, (2) three additional courses in at least two different concentrations, (3) one regional course, and (4) one procedures course.

Concentrations for the Major

By the end of your junior year and no later than the beginning of your senior year, you are required to declare your specific concentration by filing a statement with the undergraduate adviser. The purpose of the concentration requirement is to expose you to systematic in-depth work within a specific area of geography. Completion of a concentration requires five upper division geography courses. You must take a concentration's required course(s), if any, before declaring that concentration. You must select one of the following concentrations and meet its course requirements:

- (1) *Urban and Regional Development Studies*
Five of the following: 135, 148, 150, 155, 157, 159A
- (2) *Spatial Demography and Social Processes in the City*
Required: 142
Four of the following: 143, 144, M145, M146A, M146B, M147, 150, 156, 159B
- (3) *Culture and Environment in the Modern World*
Five of the following: 130, 133, 134, 135, 136, 140, 151, 159C
- (4) *Physical Geography*
Required: 100, 100A, 104, 105, 105A
Two of the following: 101, 103, 106, 107, 113, 159D
- (5) *Biogeography*
Five of the following: 108, 111, 112, 117, 118, 122, 123, 159E, 163

Foreign Language/Mathematics Requirement

Every geography major is required to pass five quarter courses in foreign language (in no more than two languages) or mathematics, in any combination. In foreign language, the department accepts UCLA foreign language departmental proficiency examination scores as evidence of foreign language competency. All students who entered UCLA as a geography major and/or declared the geography major during Fall Quarter 1988 and thereafter may not apply high school foreign language courses toward this requirement. In mathematics, only Mathematics 2, 3A, 3B, 3C, 5, 31A, 31B, 32A, or equivalent are acceptable. A grade of Passed or C (or better) is required in all courses intended to satisfy this requirement.

Allied Fields

You must develop some competence in an allied field. This requirement consists of at least two upper division courses selected from at least one of the following disciplines: Afro-American studies, anthropology, art history, Asian American studies, atmospheric sciences, biology, chemistry, Chicana and Chicano studies, communication studies, Earth and space sciences,

economics, folklore, history, management, philosophy, physics, political science, psychology, public health, sociology, women's studies. Architecture and Urban Planning 187 and 190 are also acceptable. Other disciplines require departmental consent.

Honors Program

Honors in the geography major may be obtained through procedures described under Geography 199HA-199HB.

Bachelor of Arts in Geography/Environmental Studies

The major in geography/environmental studies develops and deepens students' understanding of environmental issues; it explores problem-solving approaches from an interdisciplinary viewpoint and from the analysis of social, physical, and biotic environmental systems. The major's uniqueness lies in its emphasis on social science perspectives of human impacts on natural systems, as well as of implications of global change on local and regional human systems.

Preparation for the Major

Required: Biology 2 or 5, Geography 5, 40, three courses from 1, 2, 3, 4. All courses must be taken for a letter grade. Biology 6, 21, Chemistry and Biochemistry 2 or 11A, Mathematics 3A, 3B, Philosophy 6, and Political Science 20 are recommended. Students considering graduate work are strongly advised to include Chemistry and Biochemistry 11A, 11B, Mathematics 31A, 31B, and 32A in their program.

The Major

Required: Ten upper division geography courses taken for a letter grade which must include (1) five courses from the environmental studies cluster (Geography 107, 109, 110, 114, 116, 120, 121, 124, 125, 126, 128, 129), (2) three courses in at least two geography concentrations, (3) one regional course, and (4) one procedures course. A minimum of two upper division courses must be taken as electives in other social sciences departments (Anthropology, Economics, History, Political Science, Sociology), the Urban Planning Program (Graduate School of Architecture and Urban Planning), or the School of Public Health.

Foreign Language/Mathematics Requirement

Every geography/environmental studies major is required to pass five quarter courses in foreign language (in no more than two languages) or mathematics, in any combination. In foreign language, the department accepts UCLA foreign language departmental proficiency examination scores as evidence of foreign language competency. All students who entered UCLA as a geography/environmental studies major and/or declared the geography/environmental studies

major during Fall Quarter 1988 and thereafter may not apply high school foreign language courses toward this requirement. In mathematics, only Mathematics 2, 3A, 3B, 3C, 5, 31A, 31B, 32A, or equivalent are acceptable. A grade of Passed or C (or better) is required in all courses intended to satisfy this requirement.

Honors Program

Honors in the geography/environmental studies major may be obtained through procedures described under Geography 199HA-199HB.

Specialization in Computing

Majors in geography and geography/environmental studies may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, 30, 60, and Mathematics 61 with a minimum grade of C in each course (Mathematics 32A and 32B are also highly recommended), and (3) completing at least two courses from Geography 104, 167, 168, 171. You graduate with a bachelor's degree in your major and a specialization in computing.

Graduate Study

Admission

Application may be made for admission to any term. You must submit an official application, a complete set of transcripts of prior university coursework, the results of the Graduate Record Examination (GRE) General Test, and three letters of evaluation. You should normally have (1) completed the undergraduate major in geography or its equivalent, (2) received a B.A. degree, (3) attained at least a 3.3 grade-point average in courses taken in your junior and senior years and in the major for admission to the M.A. program and a 3.5 GPA for the Ph.D. (exceptions may be made if your record indicates unusual promise), (4) attained a high GRE score (normally well above 1,100) in the combined verbal and quantitative sections, and (5) strong letters evaluating past academic, and possible professional, performance and potential for high achievement in the graduate program.

Admission to the Ph.D. program usually requires an M.A. or M.S. degree. You must provide clear evidence of your ability to conduct substantive research and to articulate your ideas clearly in writing. In addition, a faculty member must be willing to serve as your interim adviser, so it is advisable to establish prior contact with potential advisers before the decision to admit is made. Under rare circumstances, you may proceed directly toward the Ph.D. degree without taking a master's degree.

The Test of English as a Foreign Language (TOEFL) is normally required of all international applicants whose native language is not English.

Information and graduate brochures may be obtained by writing to the Graduate Adviser,

Department of Geography, 1255 Bunche Hall, UCLA, Los Angeles, CA 90024-1524.

Major Fields or Subdisciplines

Students commonly specialize in one or more of the following areas of geographical knowledge: environmental studies, geomorphology, climatology, biogeography, cartography, and economic, social, political, cultural, historical, urban, and regional geography. At the M.A. level students emphasize at least one of these specialized areas; the written qualifying examinations for the Ph.D. include three papers in the major fields or subdisciplines. However, because geographical knowledge and its associated research questions frequently transcend disciplinary and subdisciplinary boundaries, you are expected to refine and deepen your research interests further, in consultation with knowledgeable faculty members, within, across, and beyond these organized research and teaching areas.

Master of Arts Degree

Course Requirements

You must complete at least nine courses, seven of which must be at the graduate level, including the required core courses (Geography 298A, 298B, 298C). The core courses must be completed within two years and with a grade of B- or better in each (if you enter with a geography major, you should complete them in your first year). Your program must have the approval of your committee chair and the graduate adviser each term.

Only one 500-series course may be applied toward the minimum course requirement for the master's degree and toward the minimum graduate course requirement.

Research Tool Requirement

At least one research tool (a foreign language, computer programming, or a series of mathematics or statistics courses) is required. The requirement varies according to each subdisciplinary area or region. At least a B average must be attained in any series of courses taken, and the requirement must be met prior to approval of the thesis proposal by your guidance committee. If a foreign language is selected, the requirement may be met by passing the Graduate School Foreign Language Test (GSFLT) with a score of 500 or better and translating a minimum of 500 words from an appropriate geographical text in three hours or less.

Thesis Plan

You must present a thesis, based in whole or in part on original investigation. Selection of a thesis topic, creation of a scientific design, and conduct of the investigation proceed initially under the supervision of the informal guidance committee, and later under the official thesis committee. The thesis proposal should include the exact nature of the problem to be re-

searched, an outline of the subject matter, the proposed methods of research, the degree of originality involved, and the anticipated time of completion of the study.

Ph.D. Degree

Course Requirements

You must successfully complete, within two years and with a grade of B- or better in each, the required core courses (Geography 298A, 298B, 298C) if these have not already been taken at the M.A. level. If you enter with a geography degree, you should complete them in your first year. You are also required to take at least three graduate geography courses in addition to your M.A. coursework (excluding 298A, 298B, 298C, 375, 495, and the 500 series) and three upper division or graduate courses in one or two fields (outside of geography) allied to your major research area or subdisciplinary specialization, subject to approval of your committee. The allied field requirement must be met before you can take the oral qualifying examination. Your total program must be approved by the graduate adviser each term.

Research Tool Requirement

At least one research tool (a foreign language, computer programming, statistics/mathematics) is required. The requirement varies according to each subdisciplinary area or region and is required in addition to the M.A. tool requirement. Students who receive their M.A.s elsewhere need to fulfill the UCLA tool requirement for the M.A. (credit may be given for research tools acquired at other institutions). At least a B average must be attained in any series of courses taken, and the requirement must be met prior to approval of the thesis proposal by your guidance committee. If a foreign language is selected, the requirement may be met by passing the Graduate School Foreign Language Test (GSFLT) with a score of 500 or better and translating a minimum of 500 words from an appropriate geographical text in three hours or less.

Qualifying Examinations

You are expected to take the written qualifying examination, which consists of five written papers and is administered by your guidance committee, no later than your sixth term in the Ph.D. program (exceptions may be made in case you are entering from disciplines outside geography). The examination may be taken over a period of no more than two weeks. In case of failure, you may make one further attempt, but no sooner than three months nor longer than one year after the first examination. Preparation of your dissertation proposal follows successful completion of the written qualifying examination.

The University Oral Qualifying Examination, conducted by your official doctoral committee, focuses on your dissertation proposal. Once you have successfully completed the oral

qualifying examination, you are eligible for advancement to candidacy. In instances of failure, the oral examination may be repeated once.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Dissertation/Final Oral Examination

The dissertation is the ultimate focus of your Ph.D. program and demonstrates an ability for independent investigation in a selected field of study. The dissertation should be designed and executed in such a way as to make a significant original contribution to geographic research, a contribution that is worthy of publication, in part or as a whole, in a reputable scientific medium.

A final oral defense of the dissertation may be required by the dissertation committee.

Lower Division Courses

Contact the department office to learn of additional offerings, seminar topics, and specific instructors for the term you wish to enroll in courses in geography.

1. **Physical Environment.** Lecture, three hours; laboratory, two hours. Study of Earth's physical environment, with particular reference to the nature and distribution of landforms and climate.
2. **Biogeography.** Lecture, three hours; laboratory, two hours. Prerequisite: course 1 or equivalent. Study of Earth's biosphere, with particular reference to evolution and distribution of plants, animals, and soils.
3. **Cultural Geography.** Lecture, three hours; discussion, 90 minutes. Broad examination of basic cultural variables in human occupation of Earth's surface. Ecological, spatial, and historical approaches.
4. **Introduction to Economic Geography.** Lecture, three hours; laboratory, one hour. Introduction to basic concepts used in modern urban and economic geography. Emphasis on giving better understanding of effects of location on human behavior. Discussion and practical exercises on analysis of problems in the Los Angeles urban environment.
5. **People and the Earth's Ecosystems.** Lecture, three hours; laboratory, two hours. Examination of historical and contemporary roles of man as a major agent of biological change in Earth's ecosystems.
40. **Geographical Statistics.** Lecture, three hours; laboratory, 90 minutes. Prerequisites or corequisites: courses 1, 4. Satisfies statistics requirement for geography major. Presentation and interpretation of data, descriptive statistics and measures of spatial patterns, introduction to statistical inference and measures of association. Ms. Fan, Mr. Rigby
88. **Lower Division Seminar: Geography.** Staff/student discussion, three hours; reading period, one hour. Prerequisite: course 1 or 2 or 3 or 4 or 5 as befits the theme. Seminar designed to explore various themes and issues pertinent to environment and people. Seminar topics advertised in department during previous term.

Upper Division Courses

100. **Principles of Geomorphology.** Lecture, three hours; reading period, one hour. Prerequisite: course 1 or consent of instructor. Corequisite: course 100A. Study of processes that shape the world's landforms, with emphasis on weathering, mass movement and fluvial erosion, transport, deposition; energy and material transfers; space and time considerations. P/NP or letter grading. Mr. Orme
- 100A. **Principles of Geomorphology: Field and Laboratory (2 units).** Laboratory/fieldwork, six hours. Corequisite: course 100. Field and laboratory investigations of weathering, mass movement, fluvial erosion, transport, deposition; related geomorphic phenomena. Mr. Orme
101. **Coastal Geomorphology.** Lecture, three hours; reading period, one hour. Prerequisite: course 1. Study of origin and development of coastal landforms, emphasizing past and present changes, hydrodynamic processes, sediment transfers, and such features as beaches, estuaries, lagoons, deltas, wetlands, dunes, seacliffs, and coral reefs, together with coastal zone management. P/NP or letter grading. Mr. Orme
- 101A. **Coastal Geomorphology: Field and Laboratory (2 units).** Laboratory/fieldwork, six hours. Corequisite: course 101. Field and laboratory investigations of coastal landforms, emphasizing past and present changes, hydrodynamic processes, sediment transfers, and such features as beaches, estuaries, lagoons, deltas, wetlands, dunes, and seacliffs, together with coastal zone management. Mr. Orme
103. **Paleoclimatology and Ice-Age Environments.** (Not the same as course 103 prior to Fall Quarter 1991.) Lecture, three hours; discussion, one hour. Prerequisite: course 1 or consent of instructor. Study of past climates and their environmental impact, with emphasis on the last three million years, including evidence for glacial and interglacial oscillations, historic changes, paleogeographic reconstruction, external and internal forcing mechanisms, and human implications. P/NP or letter grading. Mr. Orme
104. **Climatology.** Lecture, three hours; reading period, one hour. Examination of the many relations between climate and the world of man. Application of basic energy budget concepts to the microclimates of relevance to ecosystems of agriculture, animals, man, and urban places. Mr. Feddema, Ms. Raphael
105. **Hydrology.** Lecture, three hours; reading period, one hour. Prerequisite: course 1 or equivalent. Corequisite: course 105A. Role of water in geographic systems: hydrologic phenomena in relation to climate, landforms, soils, vegetation, and cultural processes and impacts on the landscape. Field projects required. Mr. Trimble
- 105A. **Hydrology: Field and Laboratory (2 units).** Laboratory/fieldwork, six hours. Corequisite: course 105. Field and laboratory investigations into role of water in geographic systems: hydrologic phenomena in relation to climate, landforms, soils, vegetation, and cultural processes and impacts on the landscape. Students solve applied hydrology problems in lab and make hydrologic measurements in the field. Mr. Trimble
106. **Soils.** Lecture, three hours; reading period, one hour. Prerequisites: course 1 or equivalent and Chemistry 11A, or consent of instructor. Corequisite: course 106A. Study of origins, evolution, properties, and utilization of soils, with special emphasis on world's major soil groups.
- 106A. **Soils: Laboratory (2 units).** Laboratory/fieldwork, six hours. Corequisite: course 106. Study of natural development of soils, physical and chemical properties of soil, and uses of soil. Analysis of pH, moisture, texture, nutrients, and organics. Includes one-day field trip.

107. **Soil and Water Conservation.** Lecture, three hours; discussion, one hour. Prerequisite: course 105 or Civil Engineering 150 or equivalent. Recommended: courses 100, 106, 160. Systematic study of processes of and hazards posed by erosion, sedimentation, and pollution and techniques needed to conserve soil and maintain environmental quality. Scope includes agriculture, forest engineering, mining, and other rural uses of land. Mr. Trimble

108. **World Vegetation.** Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 2, or equivalent, or consent of instructor. Characteristics, distribution, environmental and cultural relationships of world's principal vegetation patterns.

109. **Environmental Systems.** (Not the same as course 109 prior to Fall Quarter 1991.) Lecture, three hours; reading period, one hour. Prerequisites: course 5, three courses from 1, 2, 3, 4. Introduction to analysis of interactive environmental systems, including examples of physicoecological and socioeconomic systems affected by natural and anthropogenic disturbance. Intended to demonstrate utility of systems approach for environmental problem solving. P/NP or letter grading. Mr. Orme, Mr. Rigby, Mr. Walter (F)

110. **Population and Natural Resources.** (Not the same as course 110 prior to Fall Quarter 1991.) Lecture, three hours; reading period, one hour. Recommended (but not prerequisite): course 142. Examination of debate about environmental change and ability of the planet to maintain a growing population. Introduction and evaluation of basic demographic processes in context of food production, energy use, and environmental degradation. Discussion of major debates about use of resources in context of increasing population in developing countries and decreasing population in Western countries. P/NP or letter grading. Mr. Clark, Ms. Fan (W)

111. **Forest Ecosystems.** Lecture, three hours; reading period, one hour; field trips. Prerequisites: courses 2, 40, Biology 5, 6, or equivalent. Evaluation of ecological principles as they apply to forests. Emphasis on constraints of physical environment, biotic interactions, succession, disturbances, and long-term environmental change. P/NP or letter grading. Ms. Savage

112. **Analytical Animal Geography.** Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 2, 40 (or Statistics 50). Analysis of processes of expanding and contracting distribution areas. Focus on island biogeography and its implications for biodiversity trends in natural and anthropogenic environments. P/NP or letter grading. Mr. Walter

113. **Clastic Sedimentation Processes in Geomorphology.** Lecture, three hours. Prerequisites: courses 1, 100, and 105, or equivalent, or consent of instructor. Recommended: courses 101, 103, 107, or equivalent. Study of clastic sedimentation transport and deposition processes in geomorphology. Topics include basic fluid mechanics and sediment transport; tectonic framework of sedimentation; general overview of depositional environments; and more detailed discussion of selected environments.

114. **Ideas of Nature and Environmental Values.** Lecture, three hours; reading period, one hour. History of ideas of nature and the environment. Relationship of those ideas to contemporary ethical and political concerns about the environment and the place of humans within it. P/NP or letter grading. Mr. Curry

116. **Origins and Histories of Crop Plants.** Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 2, and Biology 2, or equivalent, or consent of instructor. Geographic patterns of domestication and diffusion of useful plants from antiquity to the present, based on detailed case histories of selected species.

117. **Animal Geography: Anthropogenic Factors.** Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 2, 5, and Biology 2 or equivalent. Study of human cultural factors influencing animal distributions; roles of animals in human societies; origins and diffusion of domesticated animals. P/NP or letter grading. Mr. Bennett, Mr. Walter

118. Medical Geography. Lecture, three hours; reading period, one hour. Prerequisite: course 5 or consent of instructor. Examination of patterns of population/place/disease interactions and some effects of change and development on disease etiology and problems of health care. Mr. Matthews

119. Agricultural and Pastoral Ecosystems. Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 2, 5, 116, and 112 or 117, or equivalent. Recommended: courses 120, 121. Students who do not meet prerequisites should not attempt this course. Geographical, ecological, and historical analysis of world's agricultural and pastoral systems. Emphasis on energy flows, nutrient cycles, and ecological and social problems associated with the various systems.

120. Conservation of Resources: North America. Prerequisites: courses 1 and 2, or equivalent, or upper division standing. Analysis of basic principles and problems associated with conservation of natural resources in the U.S. and Canada. Mr. Bennett, Mr. McKnight, Mr. Trimble

121. Conservation of Resources: Underdeveloped World. Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 2, 120, or equivalent, upper division standing. Analysis of principles and problems of conservation of natural resources of the underdeveloped world. Mr. Bennett

122. Wildlife Conservation in Eastern Africa. Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 2, 5. Analysis of tropical ecosystems of eastern Africa, including wildlife communities, vegetation, climate, and human impact. Discussion of national park systems and their natural and anthropogenic ecological dynamics. P/NP or letter grading. Mr. Walter

123. Bioresource Management. Lecture, three hours; discussion, one hour. Prerequisites: courses 2, 5. Recommended: course 40. Theory and practice of management and conservation of bioresources. Introduction to wildlife management, endangered species conservation, and design and maintenance of National Parks and ecological reserves. Mr. Walter

124. Environmental Impact Analysis. Lecture, three hours; discussion, one hour. Prerequisites: courses 40, 123, two environmental studies cluster courses. Introduction to interdisciplinary analysis of local and regional impacts on environmental systems. Evaluation of state and federal concepts for analysis of environmental impact. P/NP or letter grading.

125. Health and the Global Environment. (Not the same as course 125 prior to Fall Quarter 1991.) Lecture, three hours; reading period, one hour. Impact of the environment and life-style on individual health examined from a geographical perspective, with examples from both developed and developing countries. P/NP or letter grading. Mr. Matthews (Sp)

126. Geography of Extinction. Lecture, three hours; reading period, one hour. Prerequisites: course 5, upper division standing. Geographic and taxonomic survey and analysis of biotic extinctions over the past 15,000 years. Identification of extinction factors and pathways through case studies of extinct and endangered species and communities. P/NP or letter grading. Mr. Walter

M127. Soils, Plants, and Society. (Same as Biology M127.) Lecture, three hours; field trip. Prerequisites: Chemistry 11A, 11B, and 11C, or equivalent, or consent of instructor. General treatment of soil development and morphology and physical and chemical properties of soils as they relate to plant growth and distribution; soil resources, management, conservation, and cultural aspects. Use of soil profiles examined on field trip to explain developmental phenomena.

128. Global Environment: Problems and Issues. Lecture, three hours; reading period, one hour. Prerequisite: course 5. Analysis of selected environmental problems and issues associated with human-induced ecological disturbances. In-depth evaluation of key problem factors and processes using a multidisciplinary approach. P/NP or letter grading. Ms. Carney, Ms. Savage

129. Seminar: Environmental Studies. Lecture, three hours; reading period, two hours. Prerequisites: three environmental studies cluster courses, senior standing. Qualitative/quantitative analysis of problems associated with rational protection and use of selected environmental systems (urban, rural, forest, desert, coastal, water, soil, or others).

130. Geographical Discovery and Exploration. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Survey of history of exploration, from earliest times to modern, with emphasis on period from Marco Polo to the present. Mr. Thrower

133. Cultural Geography of the Modern World. Lecture, three hours; reading period, one hour. Prerequisite: course 3 or equivalent. Evolutionary and structural approach to sociocultural geography of the modern world system, with particular emphasis on structure and functioning of its core, semi-periphery, and periphery. Mr. Hale

134. Space, Place, and Nature in Western Thought. Lecture, three hours. History of development of basic ideas of geography — space, place, and nature — in Western thought. Relationship between those ideas and conceptions of science, knowledge, and inquiry. P/NP or letter grading. Mr. Curry, Mr. Entrikin

135. African Ecology and Development. (Not the same as course 135 prior to Fall Quarter 1991.) Lecture, three hours. Prerequisite: upper division standing. Overview of contemporary ecological and development issues in sub-Saharan Africa. P/NP or letter grading. Ms. Carney

136. Technology, Nature, and the American Landscape. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Study of evolution of cultural landscapes of the area that is now the U.S. Examination of past geographies and of geographical change through time. P/NP or letter grading. Mr. Curry

140. Political Geography. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Spatiality of political activity, spatial constitution of political power, control over space as central component to political struggles. Studies at local, national, state, and global scales. P/NP or letter grading. Mr. Hale

142. Population Geography. Lecture, three hours; reading period, one hour. Study of social and behavioral perspectives influencing people in their patterns of demographic change, migration, and mobility, with special emphasis on spatial relationships and selected case studies. Mr. Clark, Ms. Fan

143. Geography of Health Care. Lecture, three hours. Examination of geography of health care delivery and planning, focusing on factors which influence accessibility and utilization of health services by consumers. Spatial aspects of organization of health care influence who gets care where. P/NP or letter grading. Mr. Matthews

144. Ethnicity in the American City. Lecture, three hours; reading period, two hours. Prerequisite: course 4. Designed to encourage and facilitate critical thinking about geographical aspects of ethnicity in contemporary America, with focus specifically on nonwhite ethnic minorities (blacks, Hispanics, Asian Americans, and Native Americans). Use of a comparative perspective to explain changing distribution, social, economic, and political behavior, and adjustment problems these groups face in the contemporary American city. P/NP or letter grading. Ms. Fan, Mr. Johnson

M145. Urban Poverty and Public Policy in the U.S. (Not the same as course 145 prior to Fall Quarter 1991.) (Same as Sociology M144.) Historical overview of urban poverty and social welfare programs; ongoing debates about causes and consequences of poverty. Mr. Johnson, Ms. Ortiz (F)

M146A-M146B. Contemporary Issues in Urban Poverty Research. (Not the same as course 146 prior to Fall Quarter 1991.) (Same as Sociology M196A-M196B.) Prerequisite: course 150. Two-term research seminar designed to engage students in ongoing faculty research projects focusing on models of urban poverty and underclass behaviors. Mr. Johnson, Mr. Oliver, Ms. Ortiz

M147. Urban Poverty and Public Policy in the U.S. (Field Component). (Same as Sociology M107.) Prerequisite: course M145. Corequisite: course 150 or Sociology 159. Supplements and enriches students' academic understanding of urban poverty and the underclass by personal exposure and direct observation in a field setting. Students required to develop a plan of service in a local social service agency and observe policy formulation and implementation. Mr. Johnson, Mr. Oliver, Ms. Ortiz

148. Economic Geography. Lecture, three hours; reading period, one hour. Prerequisite: course 4 or consent of instructor. Geographical aspects of economic production and growth. General theory of the space-economy. Land-use processes. Location of industry. Regional development. Mr. Scott

149. Transportation Geography. Prerequisite: course 3 or 4 or upper division standing. Study of geographical aspects of transportation, focusing on characteristics and functions of the various modes and on complexities of intra-urban transport.

150. Urban Geography. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Analysis of development, functions, spatial patterns, and geographic problems of American cities. Mr. Clark, Mr. Johnson, Mr. Scott

151. Historical Geography of Cities. Prerequisites: courses 3 and 4, or equivalent, or upper division standing. Survey of diffusion and growth of cities in Western civilization. Development of city systems and evolution of urban internal spatial structure.

155. Industrial Location and Regional Development. Lecture, three hours. Prerequisite: course 4. Reexamination of industrial local theory in light of contemporary theories of industrial organization and local labor markets. Consideration of empirical patterns of industrialization and regional growth, with special reference to Frostbelt/Sunbelt shifts and off-shore relocation. P/NP or letter grading. Mr. Scott

156. Metropolitan Los Angeles. Lecture, three hours; reading period, one hour. Prerequisite: upper division standing. Study of origins, growth processes, internal structure and pattern, interactions, environmental and spatial problems of the Los Angeles metropolitan area. Mr. Clark

157. Models of Regional Growth and Change. Lecture, three hours; reading period, one hour. Prerequisite: course 4. Recommended: course 40. Examination of empirical and theoretical issues of regional growth and change. Introduction to supply and demand-based models of regional development. P/NP or letter grading. Mr. Rigby

159A-159E. Problems in Geography. (Formerly numbered 159.) Discussion, three hours; reading period, one hour. Prerequisites: completion of three courses in a concentration, senior standing. Seminar course in which students carry out intensive research projects developed from courses within a concentration. P/NP or letter grading.

Procedures

160. Field and Laboratory Analysis in Geomorphology. Laboratory/fieldwork, eight hours. Prerequisites: course 100 and two courses from 101, 103, 105, 106, 107. Limited to geography and environmental studies majors, with enrollment priority to seniors, then to juniors. Students must pre-enroll in department during prior term. Examination of field and laboratory procedures and intellectual concepts used in observation, measurement, analysis, and interpretation of landforms, constituent materials, and relevant processes. Mr. Orme, Mr. Trimble

163. Field Analysis in Biogeography. Fieldwork, eight hours. Prerequisites: courses 2, 5, 110, 112. Examination of field procedures and intellectual concepts used in observation, measurement, analysis, and interpretation of phenomena pertinent to biogeography and interrelated human influences. P/NP or letter grading. Ms. Savage, Mr. Walter

167. Cartography (6 units). Lecture, two hours; laboratory, six hours; independent study, three hours. Prerequisites: courses 1 and 3, or equivalent, or consent of instructor. Survey of the field of cartography. Theory and construction of map projections, compilation procedures, principles of generalization, symbolization, terrain representation, lettering, drafting and scribing, and map reproduction methods. Mr. Matthews

168. Computer Cartography. Lecture, two hours; laboratory, two hours; independent study, two hours. Prerequisites: Program in Computing 3 or 10A, consent of instructor. Recommended: course 167. Theory and methods of mapping quantitative information with a computer. Problems of acquiring and processing machine-readable map data and representing them as point symbols and surfaces. Mr. Matthews

169. The Earth from Above. Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 3, and 4, or consent of instructor. Interface between cartography and remote sensing. By means of a wide variety of imagery from maps and satellite photos, different landscapes analyzed and explained. Mr. Thrower

171. Quantitative Analysis. Lecture, three hours; laboratory, one hour. Prerequisite: course 40 or consent of instructor. Introduction to methods of measurement and interpretation of geographic distributions and associations. Mr. Matthews, Mr. Rigby

M178. Dating Techniques in Environmental Sciences and Archaeology. (Same as Anthropology M116Q.) Lecture, three hours; reading period, one hour. Prerequisite: consent of instructor. Introduction to scientific dating methods such as radiocarbon dating, radiation damage methods, biological dating techniques, and magnetic dating, and applications in environmental sciences, archaeology, and physical anthropology. Mr. Berger

Regions

180. North America. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Delimitation and analysis of principal geographic regions of the U.S. and Canada. Mr. McKnight

181. Mexico, Central America, Caribbean. Lecture, three hours; reading period, one hour. Prerequisite: upper division standing. Study of geographic factors, physical and cultural, that are basic to understanding the historical development of Middle America and the contemporary economic and cultural geography of Mexico and countries of Central America and the West Indies. P/NP or letter grading. Mr. Bennett

182A. Spanish South America. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Study of geographic factors, physical and cultural, that are basic to understanding the historical development of Spanish South America and the contemporary economic and cultural geography of the individual Spanish-speaking countries. Mr. Bennett

182B. Brazil. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Study of geographic factors, physical and cultural, that are basic to understanding the historical development of Portuguese South America and the contemporary economic and cultural geography of Brazil. Mr. Bennett

183. Europe. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Study of geographic conditions and their relation to economic, social, and political problems in Europe. Mr. Thrower

184. Soviet Union. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Study of geographic conditions and their relation to economic, social, and political problems in the Soviet Union.

185. South and Southeast Asia. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Regional synthesis with varying emphasis on the people of South or Southeast Asia in their physical, biotic, and cultural environment and its dynamic transformation.

186. Contemporary China. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Systematic geographic analysis of elements of landscape, resources, population, and socioeconomic characteristics of the People's Republic of China. Dynamics that have led to China's major role in the East Asian and international scene, with special attention to China-Japan and Sino-American relations and their geographic bases. Ms. Fan

187. Middle East. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Analysis of economic, social, and political geography of the area extending from Iran to Morocco and from Turkey to Sudan. Emphasis on geographical themes and problems during historical and modern times. Mr. Hale

188. Northern Africa. Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Analysis of economic, social, and political geography of the area including Mediterranean Africa, Sahara, Sudanic belt, and eastern Horn. Emphasis on geographical themes and problems during historical and modern times. Mr. Hale

189. Middle and Southern Africa. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Regions of Africa south of the Sahara (middle and southern Africa) in terms of physical features, human settlement, economic production, and political patterns. Mr. Hale

190. Australasia. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Regional synthesis of physical and cultural features which characterize Australia, New Zealand, and the islands of the South Pacific. Mr. McKnight

191. California. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Systematic and regional treatment of geography of California, including physical, cultural, and economic aspects and detailed studies of the various regions. Mr. McKnight

Special Studies

199. Special Study (2 to 8 units). Hours to be arranged. Prerequisites: junior standing with a B average in the major or senior standing, consent of instructor.

199HA-199HB. Honors in Geography I, II. Hours to be arranged. Prerequisites: 3.25 GPA overall, at least five upper division geography courses with a 3.5 GPA. **199HA.** Independent study course taught by team of two faculty members who assist student with bibliographic research and/or field research on a topic of mutual interest to student and the faculty members. Successful completion of course 199HA entails preparation of a detailed bibliography and outline (to be evaluated by the two faculty members) for writing of a substantial paper during course 199HB. If that work is determined to be of A quality, student is allowed to continue in honors program. If that work is graded B or below, credit is awarded, but student is not permitted to continue in honors program. **199HB.** Devoted to writing of substantial paper researched and outlined in course 199HA. It also is evaluated by the two faculty members. If paper is determined to be of A quality, student graduates with honors in geography. If paper is graded B or below, credit is awarded, but student does not receive honors.

199I. Independent Study for Internships (2 to 4 units). Prerequisite: consent of instructor. Independent study course to be supervised jointly by Field Studies Office and faculty adviser. Further supervision to be provided by placement for which student is doing internship. May not be applied toward major requirements. P/NP grading.

Graduate Courses

Environment

200. History and Paradigms of Geomorphology. Lecture, two hours; discussion, one hour; reading period, eight hours. Prerequisites: course 100, two courses from 101, 103, 105, 106, 107. Analysis of geomorphic theories since the scientific revolution, with emphasis on catastrophism, uniformitarianism, glacial theories, isostasy and eustasy, evolution and cyclicity, thermodynamics and mechanics, quantification, and current paradigms. View of each theme in its contemporary milieu. Mr. Orme

201. Coastal Geomorphology Seminar. Discussion, three hours; reading period, five hours; fieldwork. Prerequisites: courses 100, 101. Discussion of selected topics pertaining to geomorphic processes and responses observable in the coastal zone. May be repeated for credit. Mr. Orme

202. Fluvial Geomorphology Seminar. Discussion, three hours; reading period, five hours; fieldwork. Prerequisites: courses 100 and 105, or Civil Engineering 150. Discussion of selected topics pertaining to action of running water in shaping the physical landscape. May be repeated for credit. Mr. Trimble

203. Glacial Geomorphology Seminar. Discussion, three hours; reading period, five hours; fieldwork. Prerequisites: courses 100, 103. Discussion of selected topics pertaining to action of snow and ice in arctic and alpine environments. May be repeated for credit.

204A-204B-204C. Advanced Climatology. Lecture, three hours; laboratory, one hour. Prerequisites: course 104, first year of calculus, and acquaintance with FORTRAN IV, or consent of instructor. Courses must be taken in sequence. Introduction to tools and concepts of environmental physics of relevance to natural and man-made landscapes. Such basic intellectual, mathematical, and computer programming tools are of special concern to physical geographers, ecologists, and architects. Mr. Feddema, Ms. Raphael

205. Seminar: Climatology. Discussion, three hours; reading period, one hour. Prerequisites: courses 204A-204B-204C or equivalent, consent of instructor. Selected topics. May be repeated for credit. Mr. Feddema, Ms. Raphael

208. Advanced Biogeography: Plants. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: courses 108 and 110 or 116, or equivalent, or consent of instructor. Intensive review and analysis of physical and cultural factors influencing plant distributions. Ms. Savage

212. Advanced Biogeography: Animals. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course 112 or 117 or equivalent or consent of instructor. Intensive review and analysis of biophysical and cultural factors influencing animal distributions. Mr. Bennett, Mr. Walter

213. Seminar: Biogeography. Discussion, three hours; reading period, two hours. Prerequisites: course 208 or 212 or equivalent, consent of instructor. Related research projects growing out of course 208 or 212. May be repeated for credit.

215. Quaternary Studies: Physical Aspects. Discussion, three hours; reading period, two hours; fieldwork, three hours. Prerequisite: at least one course from 200 through 205 or an appropriate graduate course in atmospheric sciences or Earth and space sciences. Analysis of the changing physical environment of the Quaternary period. May be repeated for credit. Mr. Orme

217. Quaternary Studies: Ecological Aspects. Discussion, three hours; reading period, two hours. Prerequisites: courses 202 or 204A-204B-204C or 208 or 212 or an appropriate graduate course in anthropology, botany, Earth and space sciences, or zoology, or consent of instructor. Analysis of ecological aspects of environmental change during the Quaternary period. May be repeated for credit. Mr. Orme

218. Advanced Medical Geography. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course 118 or consent of instructor. In-depth study of selected topics in medical geography and intense review of recent research. Mr. Matthews

223. Seminar: Humid Tropics. Lecture, three hours; reading period, two hours. Prerequisite: graduate standing. Selected topics. Biophysical and cultural complexes of the humid tropics, with emphasis on problems related to human settlement and livelihood. May be repeated for credit. S/U or letter grading. Mr. Bennett

227. Water Quality Management. Discussion, three hours; reading period, one hour. Prerequisites: graduate standing, consent of instructor. Discussion of basic technical, regional planning, and public policy issues in water quality management.

229. Seminar: People and Environment. Discussion, three hours; reading period, two hours. Prerequisite: course 128 or equivalent. Analysis of man's perception of the environment throughout history and in different parts of the world and its impact on past, present, and future ecosystems.

Human Geography

232. Advanced Cultural Geography. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course 133 or equivalent or consent of instructor. Lectures and discussions around specific aspects of development of cultural landscape in different geographic environments. Mr. Hale

233. Seminar: Cultural Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 232 or 236 or equivalent, consent of instructor. Discussions on particular topics in cultural geography. Content may vary from year to year. May be repeated for credit. Mr. Entrikin, Mr. Hale

234. Environment and Subsistence in Indigenous Cultures. Seminar, three hours. Discussion on resource management strategies and environmental issues in indigenous cultures. Topics vary from year to year. Ms. Carney, Ms. Savage

236. Advanced Historical Geography of the U.S. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: course 136, consent of instructor. Some major themes in American historical geography.

237. Seminar: Historical Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 236, consent of instructor. Theory and practice of historical geography in North America and Europe. May be repeated for credit.

240. Advanced Political Geography. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course 140 or equivalent or consent of instructor. Intensive study of theories and principles of political geography and German geopolitics. Selected regions used as specific examples of differing techniques of study in geopolitics. Mr. Hale

241. Seminar: Political Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 240 or equivalent, consent of instructor. Related research projects growing out of course 240. May be repeated for credit. Mr. Hale

242. Advanced Population Geography. Lecture, three hours; reading period, one hour. Prerequisite: course 142 or equivalent or consent of instructor. Study of population dynamics and migration, spatial variation in population composition, and population resource problems, diffusion, and epidemiology. Ms. Fan

248. Location and Space Economy. Lecture, two hours; discussion, one hour; reading period, one hour. Methods of locational analysis as applied to problems of regional growth and development. S/U or letter grading. Mr. Scott

249. Seminar: Economic Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 248 or equivalent, consent of instructor. Related research projects growing out of course 248. May be repeated for credit. Mr. Scott

250. Urban Systems. Lecture, two hours; discussion, one hour; reading period, one hour. General study of hierarchy of urban places, including diffusion within urban hierarchy and theories to account for location and size distribution of cities. S/U or letter grading.

251. Seminar: Urban Geography. Discussion, three hours; reading period, two hours. Prerequisites: course 250 or equivalent, consent of instructor. Related research projects growing out of course 250. May be repeated for credit.

252. Location and Social Structure within the City. Lecture, two hours; discussion, one hour; reading period, one hour. Study of links between urban social and urban spatial structure, emphasizing urban residential land use, social areas of the city, and accessibility and urban form. S/U or letter grading. Mr. Scott

254. Migration and Residential Mobility. Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: consent of instructor. Description and modeling of national, regional, and intra-urban migration. Mr. Clark

Procedures

260. Advanced Field and Laboratory Analysis in Geomorphology. Laboratory/fieldwork, 10 hours. Prerequisites: graduate standing, two courses from 200, 201, 202, 203, 215. Examination of advanced field and laboratory procedures used in contemporary geomorphic research, with emphasis on scientific design, instrumentation, and data evaluation. Mr. Orme, Mr. Trimble

261. Advanced Field Analysis: Cultural Geography (8 units). Fieldwork, once a week from 8 to 5. Prerequisites: one or more courses from 232, 233, 250, 251. Field methods and analysis applied to the cultural landscape, especially in Southern California, with particular reference to settlement, agriculture, and environmental modification.

262. Advanced Field Analysis: Biogeography (8 units). Fieldwork, 10 hours. Prerequisite: consent of instructor. Observation, measurement, and analysis of biogeographic phenomena, including identification and evaluation of biotic populations and communities and their modifications resulting from the impact of human activity.

265. Geographical Bibliography. Lecture, one hour; discussion, two hours; reading period, one hour. Prerequisite: consent of instructor. Survey of the literature of geography, with special reference to periodicals. Intended for beginning graduate students.

267. Advanced Cartography. Laboratory, three hours; independent study, two hours. Prerequisite: course 167 or equivalent or consent of instructor. Advanced work in theory and practical application of modern cartographic principles. Special emphasis on terrain representation, quantitative and computer mapping, scribing, color separation, and reproduction of maps.

268. Geographic Information Systems. Lecture, two hours; laboratory, two hours. Prerequisites: courses 167, 168, and 171, or consent of instructor. Recommended: Earth and Space Sciences 150. Encoding, storage, analysis, and display of spatial data in digital format using geographic information systems. Emphasis on geographic data (including remote sensing imagery and digital terrain models), raster and vector data structures, and spatial analysis/spatial modeling using GIS. Mr. Matthews

269. Remote Sensing of Environment. Laboratory, three hours; independent study, two hours. Prerequisite: course 167 or equivalent or consent of instructor. Study of aerial photographs and other remote sensing images as tools for geographical research. Particular attention to analysis of landscapes and interpretation of interrelationships of individual features in their physical and cultural complex.

M270A-M270B-M270C. Seminars: Climate Dynamics (2 to 4 units each). (Same as Atmospheric Sciences M272A-M272B-M272C and Earth and Space Sciences M270A-M270B-M270C.) Lecture, two hours. Prerequisite: consent of instructor. Archaeological, geochemical, micropaleontological, and stratigraphic evidence for climate change throughout the geological past. Rheology and dynamics of climatic subsystems: atmosphere and oceans, ice sheets and marine ice, lithosphere and mantle. Climate of other planets. Modeling, simulation, and prediction of modern climate on monthly, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading. Mr. Berger, Mr. Ghil, Mr. Schubert

M272. Spatial Statistics. (Same as Architecture and Urban Planning M215.) Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisite: consent of instructor. Specific techniques useful in analysis of spatial data and modeling of spatial distributions. Ms. Fan

273. Seminar: Model Building for Spatial Analysis. Discussion, three hours. Prerequisite: consent of instructor. Discussions of philosophy and methodology of model building, with emphasis on problems unique to models of spatial structure. Individual research topics. May be repeated for credit. Mr. Clark

M278. Dating Techniques in Environmental Sciences and Archaeology. (Same as Anthropology M216.) Lecture, three hours. Prerequisite: consent of instructor. Colloquium devoted to topics in dating techniques in environmental sciences, archaeology, and biological anthropology, as well as laboratory instruction and experimental work. May be repeated for credit. Mr. Berger

Regions

Courses 280 through 291 may be repeated for credit (lecture, two hours; discussion, two hours).

280. North America. Prerequisite: course 180 or consent of instructor. Mr. McKnight

281. Middle America. Prerequisites: course 181, consent of instructor. Mr. Bennett

282. South America. Prerequisites: course 182A or 182B, consent of instructor. Mr. Bennett

283. Europe. Prerequisites: course 183, consent of instructor.

284. Soviet Union. Prerequisites: course 184, consent of instructor.

285. South and Southeast Asia. Prerequisites: course 185, consent of instructor.

286. Eastern Asia. Prerequisites: course 186, consent of instructor.

287. Middle East. Prerequisites: course 187, consent of instructor. Mr. Hale

288. Northern Africa. Prerequisites: course 188, consent of instructor. Mr. Hale

289. Middle and Southern Africa. Prerequisites: course 189, consent of instructor.

290. Australasia. Prerequisites: course 190, consent of instructor. Mr. McKnight

291. Arid Lands. Prerequisites: courses 104, 106, 108, 116, 120, 148, or equivalent, consent of instructor. Investigation of physical and cultural complexes of the world's arid regions. Salient factors include climate, landforms, water, soils, natural vegetation, and various aspects of human occupation, including future possibilities for human utilization.

292. Advanced Regional Geography: Selected Regions. Lecture, three hours; discussion, one hour. Prerequisite: appropriate upper division regional course. Lecture series devoted to a specific region at discretion of instructor. May be repeated for credit.

Seminar

295. Seminar: Geographic Thought. Discussion, three hours; reading period, two hours. Prerequisites: graduate standing, consent of instructor. Discussion and study of topics significant to growth of modern philosophy of geography. Mr. Entrikin

Core Courses

298A. Philosophical Issues in Geographical Inquiry. Lecture, three hours. Prerequisite: consent of instructor. Discussion of geographical research within context of philosophical debates concerning the nature of scientific inquiry. Mr. Entrikin

298B. History of Modern Geography. Lecture, three hours; reading period, one hour. Prerequisite: consent of instructor. Evolution of the field of geography in the 19th and 20th centuries, with emphasis on professionalization of geography and its emergence as a modern academic discipline. Mr. Curry

298C. Statistical Methods for Geographic Research. Lecture, three hours; laboratory, two hours. Prerequisite: course 171 or equivalent. Use of linear models, discriminant functions, and factor analysis to analyze problems in geography. Mr. Clark, Mr. Rigby

Special Studies

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching College Geography (2 units). Discussion, one hour; laboratory, three hours. Prerequisite: consent of instructor. Classroom practice in teaching, with individual and group instruction on related educational methods, materials, and evaluation. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research (2 to 8 units). Prerequisite: consent of instructor. May be repeated for credit. S/U grading.

597. Preparation for Ph.D. Qualifying Examinations (2 to 8 units). Prerequisite: consent of instructor. Independent study. May be repeated for credit. S/U grading.

598. Research for and Preparation of M.A. Thesis (2 to 8 units). Prerequisite: consent of instructor. Independent study. May be repeated for credit. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (2 to 8 units). Prerequisite: consent of instructor. Independent study.

Germanic Languages

302 Royce Hall, (310) 825-3955

Professors

Ehrhard Bahr, Ph.D. (*German; Distinguished Teaching Award*)

Marianna D. Birnbaum, Ph.D., *in Residence (Hungarian)*

Jesse L. Byock, Ph.D. (*Old Norse*)

Janet R. Hadda, Ph.D. (*Yiddish*)

Robert S. Kirsner, Ph.D. (*Dutch, Afrikaans*)

Kathleen L. Komar, Ph.D. (*German; Distinguished Teaching Award*)

Wolfgang Nehring, Ph.D. (*German*)

Hans Wagener, Ph.D. (*German*), *Chair*

Franz H. Bäuml, Ph.D., *Emeritus*

Carl W. Hagge, Ph.D., *Emeritus (Distinguished Teaching Award)*

William J. Mulloy, Ph.D., *Emeritus*

Victor A. Oswald, Jr., Ph.D., *Emeritus*

Donald J. Ward, Ph.D., *Emeritus*

Terence H. Wilbur, Ph.D., *Emeritus*

Assistant Professors

Jill Anne Kowalik, Ph.D. (*German*)

Hannelore Mundt, Ph.D. (*German*)

Christopher M. Stevens, Ph.D. (*Germanic Linguistics and Philology*)

Lecturers

Jutta Landa, Ph.D. (*German*)

Wilfried M. Voge, Ph.D. (*German*), *TA Coordinator*

Scope and Objectives

The Department of Germanic Languages offers an extraordinary scope of Germanic languages and literatures, including philology, linguistics, and folklore. This broad range of studies offers training in specialized fields, in addition to providing strong background in the literary and cultural traditions. The courses of instruction are designed to enable students to become effective teachers and productive scholars in either German or Germanic languages and literatures, including Germanic folklore, Hungarian, and Finnish.

Undergraduate majors in both German and Scandinavian languages lead to Bachelor of Arts degrees. The graduate program offers Master of Arts degrees in German and Scandinavian and a Ph.D. in Germanic Languages, with a variety of specialized fields available. The department also offers courses in Afrikaans, Dutch, Hungarian, Old Norse studies, and Yiddish, and a program in Finno-Ugric languages and literatures, which are open to all students.

Bachelor of Arts in German

The undergraduate program in German is comprised of lower division courses in the German

language and upper division courses in German language, linguistics, literature, civilization, and folklore. While the nucleus of the undergraduate program consists of training in language and literature, students majoring in German will be prepared for a wide range of graduate studies and activities in related fields.

Preparation for the Major

Required: German 1, 2, 3, 4, 5, 6, or equivalent. Students who have completed two semesters of college German should enroll in course 4. Placement examinations may be given in instances where the proper level is difficult to determine. Native speakers of German must consult the undergraduate adviser. For additional information, all students are encouraged to contact the undergraduate adviser.

The Major

Required: Fifteen upper division German courses as follows: Group I — German 100A or 100B or 100C, 108A, 108B, 129; Group II — four courses from 100A or 100B or 100C (whichever has not been taken to satisfy the Group I requirement), 101A, 101B, 101C, 121A, 121E, 128, 134; Group III — three courses from 103, 105, 106, 107, 137; Group IV — four courses from 121B or 121C, 122, 123, 124, 126, 127, 130, 132. Native speakers of German should consult the undergraduate adviser before enrolling in course 108A, 108B, or 128. German majors, especially those who wish to pursue graduate studies in German, are encouraged to enroll in courses in German history and philosophy in those respective departments and are strongly urged to acquire reading knowledge of French.

Honors Program

To qualify for graduation with departmental honors, you must earn a cumulative grade-point average of 3.6 or better in upper division German courses and a 3.3 overall GPA, and complete German 195 with a grade of A. Contact the departmental honors adviser for procedures, special arrangements, possible exceptions, and other information.

Instructional Credential in German

Students desiring the general secondary instructional credential in German should consult the Graduate School of Education (1605 Maxxam Building, 825-8328) and the Department of Germanic Languages.

Graduate Study

The Department of Germanic Languages offers the advanced degree candidate a scope and variety of studies unique among departments of German in the U.S. The department provides programs of study leading to the M.A. in German, the M.A. in Scandinavian, and the Ph.D. in Germanic Languages, with specialized fields in all areas of German literature, Germanic philology and linguistics, Germanic folklore, Scandinavian literature and philology,

Netherlandic languages and literatures, Old Norse studies, and Yiddish studies. In addition, the department offers a program in Finno-Ugric languages and literatures. This wide range of studies within the Germanic languages and cultures enables the Ph.D. candidate to acquire competence in several specialized fields.

For brochures and other information, contact the Department of Germanic Languages, 302 Royce Hall, UCLA, Los Angeles, CA 90024-1539.

Master of Arts in German

Admission

A bachelor's degree in German with a minimum grade-point average of 3.0 from an accredited U.S. institution or the equivalent is required. Candidates deficient in their undergraduate preparation may be admitted but are required to take remedial courses, as recommended by the graduate adviser. A placement examination in German language or literature may be required. Three letters of recommendation are also required.

Major Fields or Subdisciplines

There are two M.A. plans that differ with respect to the course requirements and the comprehensive examinations. Plan A is for students who plan to terminate their studies with the M.A. and an instructional credential. Plan B is for students whose main interests are literary and linguistic rather than pedagogical and for students who plan to proceed toward the Ph.D.

Foreign Language Requirement

Before advancement to candidacy for the M.A., you must pass the Graduate School Foreign Language Test (GSFLT) reading examination in French with a score of 500 or better. The test is administered through UCLA Extension at the beginning of each term, including the summer.

Course Requirements

Plan A requires a minimum of nine upper division and graduate courses, of which at least five courses must be graduate level (200 or 500 series). German 128, 129 (or equivalent), and 370 are required. Undergraduate credit for these courses (or equivalent) is applicable in satisfaction of these requirements.

Plan B requires a minimum of nine upper division and graduate courses, of which at least six courses must be graduate level (200 or 500 series). One seminar must be included.

Course 596 may be taken twice; course 597 may be taken once before the M.A. degree; course 598 may be taken three times. However, only one 500-series course may be applied toward the M.A. course requirements.

Graduate students are expected to attend and participate in departmental lectures and colloquia.

Thesis Plan

If you choose this plan, a thesis committee is established no later than the end of your fourth term of graduate study to evaluate the proposal for the thesis. After acceptance of the thesis you must pass a two-hour oral examination in the field of the thesis, as well as in the fields listed below under the comprehensive examination plan.

Comprehensive Examination Plan

Examinations are offered each term, beginning with the written part during the fifth week of each term. Under exceptional circumstances the chair of the department will receive petitions for M.A. examinations during the summer recess.

One examination committee is appointed for each term. The members of the committee administer the written and oral examinations. The M.A. examination consists of two written examinations of three hours each, followed by a one-hour oral examination.

Part 1 of the written examinations covers various fields. In the case of Plan A, the origin and development of the standard German language and contemporary standards of the German language are included. In the case of Plan B, bibliography, Middle High German, the history of the German language, and German literature before 1600 are included. Part 2 of the written examinations covers major works and authors of German literature from 1600 to the present and concepts of literary criticism. After you have taken the written examinations, the M.A. committee decides whether you may proceed to the oral examination. If you fail the oral examination, the M.A. committee decides whether you must repeat the entire examination or only the oral portion.

If you apply for an M.A. under Plan B (to proceed toward the Ph.D.) and are awarded a terminal M.A., you may repeat the examinations if you choose not to have the M.A. degree officially awarded before the reexamination.

Ph.D. in Germanic Languages

Admission

An M.A. degree in German from an accredited U.S. institution or equivalent (e.g., *Staatsexamen* in German) is required. In case of significant deficiencies in prior training, the graduate advisers make appropriate study or course recommendations. All deficiencies must be removed prior to application for admission to candidacy for the qualifying examinations. Applicants without an M.A. in German (e.g., with an M.A. in Comparative Literature or in Linguistics) are required to pass the written part of the M.A. comprehensive examination before beginning doctoral work in the department. Applicants with

an M.A. in Scandinavian who wish to major in Scandinavian literature and philology must take a formal minor in German. Three letters of recommendation are also required.

Major and Minor Fields of Study

The department offers two Ph.D. programs. The first program requires a major and a minor field in order to give students the broadest possible education and preparation for professional flexibility in research and teaching. The second program does not require a minor and is designed to enable students to complete their studies toward the Ph.D. more expeditiously.

If you select the first program, you must, as soon as possible after admission, declare your major and minor fields. The field in which you plan to present a dissertation is your major field and is selected from the four fields in which the degree is offered: (1) German literature, (2) Germanic philology and linguistics, (3) Scandinavian literature and philology, or (4) Germanic folklore.

If you select German literature as your major field, you must choose one of the following: (1) German literature before 1700 or (2) German literature from 1700 to the present.

The minor field may be selected from the following options: (1) German literature before 1600; (2) German literature from 1600 through Romanticism; (3) German literature from Romanticism to the present; (4) German philology and linguistics; (5) modern Scandinavian literature; (6) Germanic folklore; (7) Yiddish; (8) Dutch and Afrikaans; (9) Old Norse studies. If your major field is German literature, you may not choose options 1 through 3. As a special option, you may select an extra-departmental minor which must be individually endorsed by a majority of the departmental faculty members on the basis of your dissertation plans.

The second Ph.D. program allows specialization in either of the following two areas: (1) modern German literature (1600 to the present) or (2) Germanics — older German literature (to 1600), Germanic philology and linguistics (including Old Norse and Dutch linguistics), Germanic folklore. If you select the latter area, you are expected to choose two of these three fields, with special emphasis on one.

Foreign Language Requirement

In addition to French, a second language examination is required either in a modern Scandinavian language or in Dutch and Afrikaans or in Latin or in Yiddish (substitution of another language may be approved by petition).

Course Requirements

There are no course requirements *per se* for the Ph.D. However, the following rules apply: (1) you must successfully complete at least three seminars in residence before taking the qualifying examinations for the Ph.D.; (2) specific course requirements may be assigned to new students by the graduate adviser.

Qualifying Examinations

The written examinations consist of three parts for the first Ph.D. program and two parts for the second program: (1) first half of major field (three hours); (2) second half of major field (three hours); (3) minor field (three hours).

You may take the written examinations in the major or minor field any time after admission to the doctoral program and fulfillment of all prerequisite requirements. The major field examinations are given within a period of seven school days and completed no later than four weeks before instruction ends in a given term.

Written examinations may be repeated in case of failure. Repetition of the major examination includes both parts of the major field. When you have completed the written examinations successfully, the chair of the guidance committee schedules the University Oral Qualifying Examination to be administered by the doctoral committee as soon as possible after completion of the written examinations.

Advancement to candidacy takes place when you have (1) passed the graduate reading examination in French, (2) passed a departmental reading examination either in a modern Scandinavian language or in Dutch and Afrikaans or in Latin or in Yiddish (or an approved substitute language), (3) successfully completed three seminars, and (4) passed the qualifying examinations. When you pass the oral examination, you advance to candidacy and proceed to the writing of the dissertation.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

After your completed dissertation is accepted by the certifying members of the doctoral committee, you may be required to defend the dissertation in a final oral examination.

German

Lower Division Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition. Students with demonstrated preparation may be permitted to transfer to a more advanced course with consent of the instructor.

1. Elementary German. Lecture, five hours; laboratory, one hour. Mr. Voge

1G. Elementary German for Graduate Students. Preparation for Graduate Division foreign language reading requirement. May not be applied toward degree requirements. S/U grading.

2. Elementary German. Lecture, five hours; laboratory, one hour. Prerequisite: course 1. Mr. Voge

2G. Elementary German for Graduate Students. Preparation for Graduate Division foreign language reading requirement. May not be applied toward degree requirements. S/U grading.

3. Elementary German. Lecture, five hours; laboratory, one hour. Prerequisite: course 2 or two years of high school German. Mr. Voge

4. Intermediate German. Lecture, five hours. Prerequisite: course 3 or three years of high school German. Mr. Voge

5. Intermediate German. Prerequisite: course 4 or four years of high school German. Mr. Voge

6. Intermediate German. Prerequisite: course 5 or equivalent. Mr. Voge

12. German Conversation (2 units). Prerequisite: course 1 or one year of high school German. Use of German language teaching films; students have opportunity to practice spoken German in small groups. Mr. Voge

14. Intermediate Conversation (2 units). Prerequisite: course 3 or three years of high school German. Students have opportunity to practice spoken German in small groups. Mr. Voge

50A-50B. Masterworks of German Literature in Translation. Lecture, three hours. Fulfills general education literature requirement. May not be applied toward completion of the major in German:

50A. Medieval Period through Classicism. Study and analysis of selected masterworks in English translation, including works from the earliest period, such as the heroic and courtly epic, to authors such as Grimmelshausen, Lessing, Schiller, and Goethe.

50B. Romanticism to the Present. Study and analysis of selected masterworks in English translation, including authors such as E.T.A. Hoffmann, Heine, Fontane, Rilke, Kafka, Brecht, Thomas Mann, Hesse, Grass, Böll, and Christa Wolf.

51. Masterworks of Germanic or East Central European Literatures in English Translation. Lecture, three hours. Study and analysis of masterworks of Germanic or East Central European literatures (Dutch and Afrikaans, Hungarian, Old Norse, or Yiddish). Examination of one particular literature per term.

88. Lower Division Seminar. Discussion, three hours. Course of variable content limited to topics of current interest and offered whenever a staff member is available.

Upper Division Courses

Prerequisite for all upper division courses (except 100A, 100B, 100C, 119A through M119H, 121A, 121B, 121C) is course 6 or equivalent or consent of instructor.

Courses in the German 119 literature series may not be applied toward completion of the major in German.

Courses Open to Majors and Nonmajors; No Credit to Graduate Students in German

100A. German Civilization and Culture before 1700. Lectures, discussions, and readings in English; knowledge of German not required. Study of development of German civilization and institutions from earliest times to 1700. Study of German culture as represented in its literature, art, music, and architecture.

100B. Modern German Civilization and Culture from 1700 to 1919. Lectures, discussions, and readings in English; knowledge of German not required. Study of development of German civilization and institutions from 1700 to 1919. Study of German culture as represented in its literature, art, music, and architecture.

100C. German Civilization and Culture in the 20th Century. Lectures, discussions, and readings in English; knowledge of German not required. Study of development of German culture and institutions from 1919 to the present, emphasizing developments in literature, arts, and architecture.

Mr. Bahr, Ms. Mundt, Mr. Wagener

101A. Introduction to German Poetry. Close analysis of representative examples of German lyric poetry from early as well as modern literary periods, including systematic consideration of poetic conventions and forms, diction, tone, imagery, symbolism, and metrics. Course should be taken at beginning of literary studies. Mr. Bahr, Ms. Komar, Mr. Wagener

101B. Introduction to German Drama. Analysis of selected examples of drama (e.g., tragedy, comedy, one-act play, lyric drama, lyric theater, etc.), including systematic introduction to dramatic forms, techniques, and theories. Texts selected from modern literature as well as from other periods. Course should be taken at beginning of literary studies.

Mr. Bahr, Ms. Kowalik, Mr. Nehring

101C. Introduction to German Narrative Prose. Analysis of significant examples of narrative prose (e.g., short story, novella, novel, fairy tale, etc.), including systematic introduction to narrative forms, techniques, styles. Texts selected from modern literature as well as from older periods. Course should be taken at beginning of literary studies.

Ms. Komar, Mr. Nehring

102. Business German. Prerequisites: courses 1, 2, 3, 4, 5, 6. German for business studies: exercises in German business correspondence, terminology of export and import, readings and translations in the field of business German. Ms. Landa

103. Introduction to German Enlightenment, Sturm und Drang, and Classicism. Reading and discussion of representative works by Lessing, Goethe, and Schiller; their historical and social background, their relationship to music (Bach, Mozart) and philosophy (Leibniz, Kant), as well as their place in the history of ideas. Mr. Bahr, Ms. Kowalik

105. Introduction to German Literature from Romanticism to Realism. Lecture, three hours. Reading and analysis of selected works from Romanticism to realism. Ms. Komar, Mr. Nehring

106. Introduction to Modern Literature. Analysis of selected works of the period from 1890 to 1945.

Mr. Nehring, Mr. Wagener

107. Introduction to Contemporary Literature. Analysis of selected works of the period from 1945 to the present time. Ms. Mundt

108A-108B. Composition and Conversation. Course 108A or consent of instructor is prerequisite to 108B. Ms. Landa, Mr. Stevens

Courses Not Open for Credit to Majors or Graduate Students in German

119A. German Literature in the Age of Chivalry, in English Translation. Lecture, three hours. Study and analysis of literary monuments in English translation in their social and cultural settings, including courtly love lyrics, Arthurian epics, and heroic epics. May not be applied toward completion of the major in German.

119B. Weimar Classicism and Its Influence, in English Translation. Lecture, three hours. Study and analysis of works in English translation from the classic age of German literature and concentrating on major works of Lessing, Goethe, and Schiller and their reflection in the modern period. May not be applied toward completion of the major in German.

Mr. Bahr, Ms. Kowalik

119C. The Faust Tradition from the Renaissance to the Modern Age, in English Translation. Lecture, three hours. Readings and discussions in English of the Faust theme and tradition in European literature and intellectual history, including chapbook of *Doktor Faustus*, Christopher Marlowe's and Goethe's Faust dramas, and Bulgakow, as well as Thomas Mann's novel, *Doktor Faustus: The Life of the German Composer Adrian Leverkühn*. May not be applied toward completion of the major in German.

Mr. Bahr

119D. Romantic Heritage in German Literature, in English Translation. Lecture, three hours. Study and analysis of literary works in English translation that reflect German Romantic imagination from end of the 18th century into the 20th century. May not be applied toward completion of the major in German.

Ms. Komar, Mr. Nehring

119E. Pattern and Chaos: Modern German Literature and Thought, in English Translation. Lecture, three hours. Selected works in English translation of German authors, poets, and thinkers from the late 19th through the 20th century, such as Nietzsche, Thomas Mann, Kafka, Brecht, Grass, and Christa Wolf. Topics vary from term to term. May not be applied toward completion of the major in German. May be repeated for credit.

119F. From Dream to Nightmare: The German-Jewish Experience, in English Translation. Lecture, three hours. Study and analysis of works in English translation reflecting the process of German-Jewish assimilation and disenfranchisement, including authors such as Mendelssohn, Heine, Schnitzler, Kafka, Feuchtwanger, Anne Frank, Sachs, Celan, and Becker.

Ms. Hadda

M119G. Interwar Central European Prose. (Same as Humanities M125 and Slavic M125.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative authors of the 1920s and 1930s in translation. Special attention to relation between literature and historical and ethnic concerns.

M119H. Postwar Central European Prose. (Same as Humanities M126 and Slavic M126.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative contemporary authors in translation. Special attention to relation between art and ideology.

Courses Open for Credit to Majors, Nonmajors, and Graduate Students in German

121A. Special Problems in Literature. Lecture or seminar, three hours. Prerequisite: upper division standing. Varying topics of current importance and immediate relevance to literary study. Designed to introduce students to contemporary trends in literary study and predominantly concerned with topics related to German literature and criticism.

121B. German Film in Cultural Context: Early German Film. Lecture, one hour; discussion, one hour; screenings, two to two and one-half hours. Survey of German film from the Weimar to Adenauer eras. Viewing and discussion of films by Lang, Murnau, Sternberg, Wiene, Staudte, etc., with respect to their cultural, sociopolitical, and cinematographic codes.

Ms. Landa

121C. German Film in Cultural Context: New German Film. Lecture, one hour; discussion, one hour; screenings, two to two and one-half hours. Survey of new German film as it evolved in the late 1960s. Viewing and discussion of films by Fassbinder, Herzog, Schlöndorff, Sanders-Brahms, Wenders, and other German-speaking filmmakers, with respect to their cultural, sociopolitical, and cinematographic codes.

Ms. Landa

121D. Selected Topics in German Culture and Civilization. Lecture, three hours. Required of all German majors who are candidates for standard instructional credential in secondary teaching.

121E. Women in German Literature. Lecture, three hours. Prerequisite: upper division standing or consent of instructor. Role of women writers and image of women in German literature of various periods (e.g., Romanticism, 19th century, early 20th century, contemporary). Readings to be selected to represent the period of literature being taught in any given term.

122. Studies in German Literature before 1750. Prerequisites: three upper division courses (including course 100A) or consent of instructor. Readings and analysis of major works from the Middle Ages to the baroque.

Mr. Bäuml, Mr. Wagener, Mr. Ward

123. Goethe. Prerequisites: courses 100A or 100B and 103, or consent of instructor. Reading and discussion of representative works (except *Faust*) from Goethe's early period to his maturity and old age.

Mr. Bahr, Ms. Kowalik

124. Romanticism. Prerequisites: courses 100A or 100B and 105, or consent of instructor. Reading and analysis of major works of the Romantic period. Authors include Tieck, Novalis, E.T.A. Hoffman, and Eichendorff.

Ms. Komar, Mr. Nehring

126. Advanced Study in Modern Literature. Prerequisites: courses 100A or 100B or 100C and 106, or consent of instructor. Reading and analysis of a wide range of literature from 1890 to 1945.

Mr. Nehring, Mr. Wagener

127. Advanced Study in Contemporary Literature Prerequisites: courses 100A or 100B or 100C and 107, or consent of instructor. Analysis of a wide range of German literature from 1945 to the present.

Ms. Mundt

128. Advanced Composition, Grammar, and Conversation. Prerequisites: courses 108A-108B or consent of instructor.

Ms. Landa

129. German Phonetics. Study of articulatory basis of the sounds of German and practice in standard pronunciation.

Mr. Stevens

130. Methodology of Literary Criticism. Prerequisite: senior standing or consent of instructor. Introduction to methodology of literary criticism, including systematic study of motif, topos, plot, space and time, semantics, stylistics, rhetoric, metrics, imagery (emblem, metaphor, allegory, symbol), structural elements (act, stanza, book, flashback, anticipation, interior monologue), narrator and reader response, humor and irony, hermeneutics.

Mr. Bahr

132. Goethe's *Faust*. Prerequisites: courses 100A or 100B and 123, or consent of instructor. Detailed interpretation of Goethe's *Faust*, Parts I and II, together with general consideration of other treatments of the *Faust* theme in European literature.

Mr. Bahr

134. German Folklore. Survey of various genres of German folklore.

137. Language and Linguistics. Prerequisites: courses 100A or 100B, 108A. Introduction to historical development of the German language; theories and methods of linguistics.

Mr. Stevens

195. Senior Thesis Course. Extensive reading, research, and writing of senior thesis. May be used for writing honors thesis.

199A-199ZZ. Special Studies (2 to 4 units each). Prerequisite: consent of instructor. To be arranged with faculty member who will direct the study (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). Independent study for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a prerequisite.

Graduate Courses

201A. Bibliography, Research Methods, and Scholarly Writing. Lecture, three hours. Introduction to current state of advanced research and analysis of literary and philological materials, with emphasis on bibliographies and such tools of research as reference works, series publications, journals, archives, literary histories, and computer data banks. Practical exercises in analysis of sources, compilation and presentation of bibliographies, and writing of research papers.

Mr. Bahr

201C. Theories of Literary Criticism. Lecture, three hours. Analysis and discussion of foundations of literary criticism and current theories such as hermeneutics, positivism, psychoanalytical criticism, social historical approaches, intellectual history (Geistesgeschichte), New Criticism, Marxist Criticism, Russian and Czech Formalism, structuralism, and semiotics.

Mr. Bahr, Ms. Kowalik

202A. Middle High German. Introduction to grammar, syntax, and vocabulary of the Middle High German language. Exercises in reading Middle High German literary works, combined with study of socio-cultural contexts in which works of the medieval period were produced and performed.

202B. Readings in Middle High German Literature. Extensive reading of literary monuments of the medieval period in Germany. Introduction to cultural and literary history of the Middle Ages.

203A. The Courtly Epic. Analysis of major epics of the medieval period in Germany, such as Hartmann's *Erec* and *Iwein*, Wolfram's *Parzival*, and Gottfried's *Tristan*. Study of courtly society, as well as introduction to methods of interpretation and analysis.

203B. The Courtly Lyric. Analysis of medieval songs of courtly performers, beginning with Der von Kurenberg and ending with Johannes von Hadlaub. Study of sociocultural context in which the songs were produced and performed, and introduction to methods of interpretation and analysis.

203C. The Heroic Epic. Survey of German heroic literature, beginning with *Hildebrandslied* and including such works as *Nibelungenlied*, *Kudrun*, and the Dietrich epics. Methods of analysis and interpretation, as well as analysis of thematic and formal characteristics of the different epics.

204. Renaissance and Reformation Literature. Literature of the 15th and 16th centuries, including introduction to and study of the early New High German language. Selected readings from works of authors such as Sebastian Brant, Martin Luther, Hans Sachs, and Johann Fischart.

205. Baroque Literature. Definition of the term baroque; development of modern baroque scholarship; influence of foreign models; analysis of sample theoretical writings (prosodies) and of representative poems, dramas, novels, and prose satires of the 17th century.

Mr. Wagener

206A. Enlightenment and Sentimentalism. Study of representative authors of the earlier part of the 18th century from Gottsched through Lessing, including authors such as Leibniz, Thomasius, Wolff, Bodmer and Breitinger, Johann Elias Schlegel, Haller, Brockes, Anacreontic poets, Gessner, Klopstock, Mendelssohn, and Wieland.

Mr. Bahr, Ms. Kowalik

206B. *Sturm und Drang*. Study of representative authors of the *Sturm und Drang* period, such as Herder, Forster, Gerstenberg, Leisewitz, Klingner, Wagner, R.M. Lenz, Moritz, Heine, Schubart, and the young Goethe and Schiller.

Mr. Bahr, Ms. Kowalik

207A. Classicism: Goethe. Selected topics from works of Goethe in the period from 1786 to 1832, such as *Iphigenie auf Tauris*, *Torquato Tasso*, *Wilhelm Meisters Lehrjahre*, *Die natürliche Tochter*, *Pandora*, and poetry selections.

Mr. Bahr, Ms. Kowalik

207B. Classicism: Schiller. Selected topics from critical and dramatic works of Schiller in the period from 1793 to 1805, such as *Über Anmut und Würde*, *Über das Erhabene*, *Wallenstein*, *Maria Stuart*, *Jungfrau von Orleans*, and *Wilhelm Tell*.

Mr. Bahr, Ms. Kowalik

208. Romanticism. Analysis of selected works of the Romantic period by authors such as Wackenroder, Tieck, the brothers Schlegel, Novalis, Hölderlin, Brentano, Arnim, the brothers Grimm, "Bonaventura," E.T.A. Hoffmann, Eichendorff, and others. Course may be genre or topic oriented.

Ms. Komar, Mr. Nehring

209A. 19th-Century Lyrics. Development of German lyric poetry from the classic/Romantic period to symbolism. Discussion of forms, attitudes, tendencies. Analyses may include poetry by Romantic authors, as well as Heine, Platen, the political poets of *Vormärz*, Droste-Hülshoff, Keller, Storm, C.F. Meyer, Nietzsche, George, and others.

Ms. Komar, Mr. Nehring

209B. 19th-Century Drama. Reading and analysis of selected dramas by Kleist, Büchner, Hebbel, Grillparzer, and others. Discussion and analyses may include topics such as *Schicksalstragödie*, bourgeois trivial drama, sociopolitical drama, historical drama, Viennese Volkstheater. Ms. Komar, Mr. Nehring

209C. 19th-Century Narrative Prose. Analysis of German prose works from Romanticism to naturalism. Discussion of the problem of reality and literary realism with respect to narrative techniques. Authors may include Heine, Büchner, Droste-Hülshoff, Stifter, Gotthelf, Keller, C.F. Meyer, Fontane, and the early naturalists. Ms. Komar, Mr. Nehring

210A. Naturalism and Symbolism. Sociological background and theoretical writings concerning naturalism and symbolism. Analysis of representative poems, dramas, and shorter narratives by authors such as Holz, G. Hauptmann, George, Hofmannsthal, and Rilke. Mr. Nehring, Mr. Wagener

210B. Expressionism and Neorealism. Historical and sociological background in the period from 1910 to 1933. Literary magazines, theoretical writings, poetry of expressionism and Dadaism, expressionist dramas, and shorter narratives. Definition and representative works of neorealism. Mr. Wagener

210C. 20th-Century Novel to 1945. Analysis of selected 20th-century novels written prior to 1945. Authors of different literary and historical eras, such as Broch, Döblin, Hesse, Kafka, Heinrich Mann, Thomas Mann, and Rilke. Ms. Komar, Mr. Wagener

211A. Contemporary Novel. Study of selected novels in the period from 1945 to the present. Works by authors from West and East Germany, Austria, and Switzerland, such as Böll, Grass, Handke, Frisch, and Christa Wolf, analyzed and placed in context of literary, cultural, and political trends. Ms. Mundt

211B. Contemporary Lyrics and Drama. Study of selected dramas and poems in the period from 1945 to the present. Works by authors from West and East Germany, Austria, and Switzerland, such as Dürrenmatt, Frisch, Handke, Celan, and Brecht, analyzed and placed in context of literary, cultural, and political trends. Ms. Mundt

217. History of the German Language. Historical survey of development of the standard literary German language from the time of Indo-European unity through proto-Germanic, West Germanic, medieval period, Reformation, baroque period, and Enlightenment until its final codification at the end of the 19th century. Mr. Stevens

230. Survey of Germanic Philology. Systematic survey of major problems in the field of Germanic linguistics: origin and historical diffusion of Germanic dialects and their classification; problems in evolution of nominal and verbal morphology of the various dialects; problems in phonological evolution of the various dialects. Mr. Stevens

231. Gothic. Systematic study of phonology and grammar of the Gothic language, with readings in Wulfila's translation of the Bible and introduction to history of the Goths and their place in the development of modern Europe. Mr. Stevens

232. Old High German. Introduction to earliest phases of German literature, with extensive readings in major documents of that period (750-1050). Emphasis on grammatical interpretation of these documents and identification of dialects used in their composition.

233. Old Saxon. Introduction to study of earliest documents in Old Low German. Readings in the *Heliand* and study of the *Old Saxon Genesis*.

240A. Theories, Methods, and History of Germanic Folklore. History of Germanic folklore studied in context of European cultural history. Evolution of theories and methods of the discipline as developed by Herder, the Grimms, Bolte, Meier, Naumann, Bausinger, and others.

240B. Folk Song and Ballad. Analysis of poetic and musical aspects of German folk songs and ballads. Study of thematic and formalistic evolution of text and music, combined with introduction to theories and methods of analysis of folk music and function of folk song in its social context.

240C. Oral Prose Genres. Study of thematic and formal characteristics of legends, folktales, jests, proverbs, and riddles. Role of popular narrative in its sociocultural context in German history and survey of methods of analysis of narratives, texts, and contexts.

245B. Germanic Antiquities. Survey of prehistory and early history of Germanic civilization from the Bronze Age to the end of the migrations on basis of archaeological, historic, and philological evidence. Uses of methods of comparative ethnography, religion, and myth to interpret evidence.

251. Seminar: Syntax and Phonology of German. Topics selected from the field of contemporary German syntax and phonology according to needs and preparation of students enrolled (e.g., *Dialektgeographie*, generative phonology, generative syntax, *Valenztheorie*, *Texttheorie*). Mr. Stevens

252. Seminar: Historical and Comparative German Linguistics. Topics selected from the field of historical German phonology and syntax according to needs and preparation of students enrolled (e.g., West Germanic problem and classification of the Germanic languages, development of Germanic verbal and nominal morphology, proto-Germanic syntax). Mr. Stevens

253. Seminar: Medieval Literature. Selected topics in medieval literature, with emphasis on problems in literary analysis and applicability of various types of analysis to medieval texts.

254. Seminar: Renaissance and Reformation. Seminar on selected literary or philological problems, such as a particular genre, author, or theme. Studies on textual analysis or pertinent research to apply methods of literary history to literature of the 15th and 16th centuries.

255. Seminar: Baroque Literature. Seminar on selected problems of German baroque literature, such as a particular genre, author, or theme. Textual analysis supplemented by critical review of research and application of methods of literary analysis pertinent to literature of this age. Mr. Wagener

256. Seminar: Enlightenment and Sturm und Drang. Selected topics in 18th-century literature, such as utopian literature, love and money as motifs, family structure and family life, image of women and women's literature, Jacobin literature, seduction and betrayal as motifs, nobility and middle class in 18th-century literature. Textual analysis and review of current research. Mr. Bahr, Ms. Kowalik

257. Seminar: Age of Goethe. Selected topics in German literature between 1775 and 1832, such as Schiller's theoretical writings, Goethe's *Faust II*, Goethe's *Wanderjahre* and *West-östlicher Divan*, Goethe's *Faust II* and Hegel's *Phänomenologie des Geistes*, the French Revolution and German classicism. Textual analysis and review of current research. Mr. Bahr, Ms. Kowalik

258. Seminar: Romanticism. Discussion of a specific author or topic from the Romantic period, possibly in close connection with course 208. Critical review of secondary works. Ms. Komar, Mr. Nehring

259. Seminar: 19th-Century Literature. Discussion of a specific author or topic of 19th-century literature, possibly in close connection with course 209A, 209B, or 209C. Critical review of secondary works. Ms. Komar, Mr. Nehring

260. Seminar: Modern Period. Seminar on a selected genre, author, or theme of 20th-century German literature prior to 1945. Mr. Bahr, Mr. Nehring, Mr. Wagener

261. Seminar: Contemporary Literature. Study of selected works, a specific author, genre, period, or topic from 1945 to the present. Texts analyzed and placed in context of literary, cultural, and political trends. Ms. Mundt

262. Seminar: Germanic Folklore. Detailed research on individual aspects of Germanic folklore. Topic selected generally is from course in the German 240 series that preceded the seminar. Emphasis on problems of theory and method.

263. Seminar: Theories of Literature. Specialization in literary theories, such as *Rezeptionsästhetik*, Neo-Marxist Criticism, New Criticism, psychoanalytic criticism or sociology of literature, structuralism, semiology, and hermeneutics. Mr. Bahr, Ms. Kowalik

370. Teaching German in Secondary Schools. Lecture, three hours; discussion periods. Prerequisite: graduate standing or consent of instructor. Required of all candidates for general secondary instructional credential in German. Mr. Voge

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading. Mr. Voge

495A. Preparation for College Teaching of German (2 units). Study of problems and methods in teaching German on college level, with emphasis on teaching and testing the listening, speaking, reading, and writing skills. May not be applied toward M.A. course requirements. S/U grading. Mr. Voge (F)

495B. College Teaching of German: Special Problems (2 units). Prerequisite: course 495A or consent of instructor. Study of contemporary issues in German language pedagogy, with emphasis on textbook evaluation and proficiency-oriented instruction. May not be applied toward M.A. course requirements. S/U grading. Mr. Voge (W)

596. Directed Individual Study or Research. To be arranged with faculty member who will direct the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once; however, only one course in the 500 series may be applied toward M.A. graduate course requirement. S/U grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. To be arranged with faculty member who will direct the study (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be taken only once before and only once after M.A. degree, except for Ph.D. candidates with a formal minor field of studies who may take course twice after M.A., once in the major and once in the minor. Only one course in the 500 series may be applied toward M.A. graduate course requirement. S/U grading.

598. Research for and Preparation of M.A. Thesis (4 to 12 units). To be arranged with faculty member who will direct the study (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). Only one course in the 500 series may be applied toward M.A. graduate course requirement. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (4 to 12 units). To be arranged with faculty member who will direct the study (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated. S/U grading.

Afrikaans

Upper Division Courses

105A. Elementary Afrikaans. Lecture/language laboratory. Introduction to a sister language of modern Dutch and a national language of South Africa. Grammar, practice in listening, speaking, reading, and writing. Mr. Kirsner

105B. Intermediate Afrikaans. Lecture/language laboratory. Prerequisite: course 105A or equivalent. Grammatical exercises; reading and linguistic analysis of texts from both literary and nonliterary sources. Mr. Kirsner

114. Afrikaans Literature in Translation. Lecture, three hours. Readings and analysis of works by selected authors such as Brink, Joubert, Krige, Leroux, Marais, and Rabie and selected poets such as Breytenbach, Eybers, Lion Cachet, W.E.G. Louw, Van Wyk Louw, and Opperman. Mr. Kirsner

135. Introduction to Afrikaans Literature. Discussion, three hours. Prerequisite: course 105B or equivalent. Analysis of selected works from founding of the Genootskap van Regte Afrikaners in 1875 to the present time, including novels by recent writers such as Leroux and Brink, as well as work of poets such as Eybers, Opperman, W.E.G. Louw, Van Wyk Louw, and Breytenbach. Mr. Kirsner

199. Special Studies in Afrikaans (2 to 4 units). Prerequisite: consent of instructor. Independent study for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a prerequisite. Mr. Kirsner

Graduate Courses

596. Directed Individual Study or Research in Afrikaans. To be arranged with faculty member who will direct the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once. S/U grading. Mr. Kirsner

597. Preparation for Ph.D. Qualifying Examinations. To be arranged with instructor (see department for I.D. number). S/U grading. Mr. Kirsner

Dutch

Upper Division Courses

100. Modern Dutch Culture and Society. Lecture, three hours. Lectures, discussions, and readings in English. Survey of art, architecture, literature, film, Dutch government (including 'Pillarization' — *verzuiling*), the two World Wars, housing policy, mass media, and rise of a multiracial society. Mr. Kirsner

103A-103B. Elementary Dutch. Lecture/language laboratory. Course 103A or equivalent is prerequisite to 103B. Introduction to the standard language of the Netherlands and one of the three standard languages of Belgium. Practice in grammar, listening, speaking, reading, and writing. Mr. Kirsner

103C. Intermediate Dutch. Lecture/language laboratory. Prerequisite: course 103B or equivalent. Grammatical exercises, conversation, reading and analysis of simple texts. Mr. Kirsner

113. Modern Dutch and Flemish Literature in Translation. Lecture, three hours. Readings and analysis of works by selected authors of the Netherlands and northern (Flemish) Belgium such as Boon, Claus, Couperus, Hermans, Mulisch, Multatuli, and Reve and selected poets such as Campert, Gezelle, Gorter, Kloos, Lucebert, Nijhoff, Van Ostaijen, and Vroman. Mr. Kirsner

120. Introduction to Dutch Studies. Prerequisite: consent of instructor. Brief review of Dutch grammar. Reading and discussion of selections from contemporary Dutch literature, contemporary Dutch literary criticism, and modern Dutch linguistics. Emphasis on developing reading skill and on acquiring familiarity with and appreciation of the scope of 20th-century *Neerlandistiek*. Mr. Kirsner

131. Introduction to Modern Dutch Literature. Discussion, three hours. Prerequisite: course 103B or 120 or equivalent. Selected works of literature of the Netherlands and northern (Flemish) Belgium from the mid-1850s to the present, including novels by such writers as Multatuli, Couperus, Hermans, Mulisch, and Reve and poetry by such groups as the symbolist *Beweging van Tachtig* and the post-War *Beweging van Vijftig*. Mr. Kirsner

199. Special Studies in Dutch (2 to 4 units). Prerequisite: consent of instructor. Independent study for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a prerequisite. Mr. Kirsner

Graduate Courses

234. Structure of Modern Standard Dutch. Detailed examination, from contrasting theoretical viewpoints, of central problems in Dutch phonology, grammar, and semantics, with attention to related phenomena in German, English, and Afrikaans. Equivalent to Linguistics 225. Mr. Kirsner

596. Directed Individual Study or Research in Dutch. To be arranged with faculty member who will direct the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once. S/U grading. Mr. Kirsner

597. Preparation for Ph.D. Qualifying Examinations. To be arranged with faculty member who will direct the study (see department for I.D. number). S/U grading. Mr. Kirsner

Hungarian

Upper Division Courses

101A. Elementary Hungarian. Introduction to grammar and reading exercises, with emphasis on the spoken language. Ms. Birnbaum

101B. Elementary Hungarian. Prerequisite: course 101A or equivalent. Grammatical exercises, conversation, and reading of texts. Ms. Birnbaum

101C. Elementary Hungarian. Prerequisite: course 101B or equivalent. Conversation and readings in literary texts. Ms. Birnbaum

101D. Advanced Hungarian. Prerequisites: courses 101A, 101B, 101C, or equivalent. Grammar, conversation, vocabulary building. Ms. Birnbaum

101E. Advanced Hungarian. Prerequisites: courses 101A through 101D or equivalent. Conversation, reading, and discussion of literary texts. Ms. Birnbaum

101F. Advanced Hungarian. Prerequisites: courses 101A through 101E or equivalent. Conversation and review of Hungarian grammar from a typological point of view. Ms. Birnbaum

120A-120B. Readings in Hungarian. Prerequisite: course 101C or equivalent. Selections of Hungarian prose and poetry read in the original. Ms. Birnbaum

120C. Readings in Hungarian Literature. Prerequisites: reading knowledge of Hungarian, course 101C or equivalent. Selections of Hungarian prose and poetry read in the original. Discussion conducted in Hungarian. Ms. Birnbaum

121A-121B. Survey of Hungarian Literature in Translation. Intended for students in general and comparative literature, as well as students interested in Finno-Ugric studies. Survey of main trends and contacts with other literatures. Ms. Birnbaum

130. Hungarian Civilization and Culture. Study of Hungarian civilization and institutions from earliest times to the present. Study of Hungarian culture as represented in its arts (literature, fine arts, music). Ms. Birnbaum

M135. Hungarian Folklore and Mythology. (Same as Folklore M128.) General course for students in folklore and mythology, with emphasis on types of folklore and varieties of folklore research. Ms. Birnbaum

M136. Folklore and Mythology of the Ugric Peoples. (Same as Folklore M129.) Survey of traditions of the smaller Ugric nationalities (Voguis, Ostyaks, etc.). Ms. Birnbaum

199. Special Studies in Hungarian (2 to 4 units). Prerequisite: consent of instructor. Independent study for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a prerequisite. Ms. Birnbaum

Old Norse Studies

Lower Division Course

40. The Heroic Journey in Northern Myth, Legend, and Epic. Comparison of the journeys of heroes. Readings in mythology, legend, folktale, and epic, including *Nibelungenlied*, *Volsunga saga*, *Eddas*, and *Beowulf*. Cultural and historic backgrounds to the texts. All readings in English. Mr. Byock

Upper Division Courses

139. The Saga. Lecture, three hours. The sagas are the largest extant medieval prose literature. Texts in English, with selections from the different types of Icelandic sagas. Consideration of the history and culture that produced this literature. Mr. Byock

140. Viking Civilization and Literature. Readings in history, society, and culture of early Scandinavians. All texts in English: Old Norse sagas, *Eddas*, and early ballad literature. Mr. Byock

C145. Old Norse Literature and Society. Lecture, three hours. Readings in primary texts in conjunction with the critical literature. Specific issues in medieval Scandinavian studies. May be repeated for credit. Concurrently scheduled with course C223. Mr. Byock

151. Elementary Old Norse. Introduction to grammar and pronunciation of Old Norse. Selected readings from the sagas and *Prose Edda*. Mr. Byock

152. Intermediate Old Norse. Prerequisite: course 151 or equivalent. Continued grammar, pronunciation, and readings from the *Eddas* and sagas of Icelanders, Norwegian kings, and legendary heroes. Mr. Byock

153. Modern Icelandic. Prerequisite: course 152 or equivalent. Grammar, readings, and conversation. Mr. Byock

199. Special Studies in Old Norse (2 or 4 units). Prerequisite: consent of instructor. Independent study for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a prerequisite. Mr. Byock

Graduate Courses

221. Advanced Old Norse Prose. Prerequisite: course 152 or equivalent. Readings of major saga texts. Also, secondary sources which bear on specific issues in Old Norse literature and medieval Scandinavian history. Mr. Byock

222. Advanced Old Norse Poetry. Prerequisite: course 152 or equivalent. Readings of mythological and heroic poems from *Poetic Edda*. Secondary sources used where appropriate. Mr. Byock

C223. Old Norse Literature and Society. Lecture, three hours. Critical issues in medieval Scandinavian studies. May be repeated for credit. Concurrently scheduled with course C145. Mr. Byock

245A. Germanic and Scandinavian Mythology. Lecture, three hours. Study of Northern myth and religion through close reading of Eddic texts and secondary sources. Mr. Byock

596. Directed Individual Study or Research. To be arranged with faculty member who will direct the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once; however, only one course in the 500 series may be applied toward M.A. graduate course requirement. S/U grading. Mr. Byock

597. Preparation for Ph.D. Qualifying Examinations. To be arranged with faculty member who will direct the study (see department for I.D. number). S/U grading. Mr. Byock

Yiddish

Upper Division Courses

101A. Elementary Yiddish. (Formerly numbered 1.) Introduction to grammar; instruction in listening, speaking, reading, and writing skills. Ms. Hadda

101B. Elementary Yiddish. (Formerly numbered 2.) Prerequisite: course 101A or equivalent. Ms. Hadda

101C. Elementary Yiddish. (Formerly numbered 3.) Prerequisite: course 101B or equivalent. Ms. Hadda

104. Advanced Yiddish. Lecture, three hours. Prerequisite: course 101C or equivalent. Grammatical exercises, reading and linguistic analysis of texts, conversation. Ms. Hadda

121A. 20th-Century Yiddish Poetry in English Translation. Prerequisite: upper division standing or consent of instructor. Readings in 20th-century Yiddish poetry and drama. Ms. Hadda

121B. 20th-Century Yiddish Prose and Drama in English Translation. Prerequisite: upper division standing or consent of instructor. Readings in 20th-century Yiddish prose. Ms. Hadda

121C. Special Topics in Yiddish Literature in English Translation. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of a wide range of 19th- and 20th-century literature. Ms. Hadda

131A. Modern Yiddish Poetry. Prerequisite: course 104 or consent of instructor. Readings in modern Yiddish poetry. Ms. Hadda

131B. Modern Yiddish Prose and Drama. Prerequisite: course 104 or consent of instructor. Readings in modern Yiddish prose and drama. Ms. Hadda

131C. Special Topics in Yiddish Literature. Prerequisite: course 131A or 131B. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of a wide range of 19th- and 20th-century literature. Ms. Hadda

199. Special Studies in Yiddish (2 to 4 units). Prerequisite: consent of instructor. Independent study for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a prerequisite. Ms. Hadda

Graduate Courses

596. Directed Individual Study or Research in Yiddish. To be arranged with faculty member who will direct the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once. S/U grading. Ms. Hadda

597. Preparation for Ph.D. Qualifying Examinations. To be arranged with faculty member who will direct the study (see department for I.D. number). S/U grading. Ms. Hadda

Jules L. Zentner, Ph.D.

Scope and Objectives

Scandinavia consists of five Northern European countries: Denmark, Finland, Iceland, Norway, and Sweden. These countries form a geographic bridge between the American and European continents and a political bridge between the West and Eastern Europe. For all students of literature, language, the arts, and the social and physical sciences, Scandinavia is of particular interest.

The modern Scandinavian program educates students about Scandinavia through the study of its languages and literatures. The Scandinavian Section offers both undergraduate and graduate degrees in the languages and literatures of Denmark, Norway, and Sweden, as well as a strong set of course offerings in Finnish language, literature, and folklore. Danish, Norwegian, and Swedish are mutually understandable languages, giving the student of one access to the literatures and cultures of the other two. Both undergraduate and graduate majors are expected to concentrate on one Scandinavian language, though they study the literatures of the other language areas.

Bachelor of Arts in Scandinavian Languages

Preparation for the Major

Required: Scandinavian 1, 2, 3, 4, and 5, or 11, 12, 13, 14, and 15, or 21, 22, 23, 24, 25, and 30, or equivalent.

The Major

Required: Twelve upper division courses in Scandinavian, including 105 and 106 or 110 for two terms and 141, 142, 143. As an option, three upper division courses in a related field may be taken. These three courses must be approved in advance by the undergraduate adviser. It is recommended that students who plan to do graduate work in Scandinavian take German 1 through 6.

Master of Arts in Scandinavian

Admission

In addition to the University minimum requirements, prospective students in the M.A. program in Scandinavian must have an under-

graduate major in Scandinavian languages or equivalent. If you are deficient in the undergraduate major, you must complete it by taking the appropriate courses as recommended by the graduate adviser. A placement examination in the Scandinavian languages, as well as in German, may be required.

Three letters of recommendation are required by the Graduate Division.

For a brochure describing the program and requirements, write to the Scandinavian Section, 332 Royce Hall, UCLA, Los Angeles, CA 90024-1537.

Major Fields or Subdisciplines

There are no specifically designated major fields or subdisciplines in the M.A. program, but students emphasize one modern language and literature area in Danish, Norwegian, or Swedish.

Foreign Language Requirement

Reading knowledge of French or German is required (in addition, of course, to knowledge of the Scandinavian languages). You must pass the Graduate School Foreign Language Test (GSFLT) reading examination in French or German with a score of 500 or better or must pass at least one upper division course in French or German.

Course Requirements

A total of 12 courses is required for the M.A. degree. These include a minimum of nine upper division and graduate courses in Scandinavian languages, at least five of which must be graduate courses. Three upper division or graduate-level courses may be taken in a related field of study to be determined in consultation with the graduate adviser; at least one of these must be at the graduate level. Comparative Literature 200 or English 201A or an equivalent course in methodology is required as one of the 12 courses.

Three 596 courses (12 units) may be applied toward the total course requirement, but only one (four units) may be applied toward the minimum graduate course requirement.

Comprehensive Examination Plan

A comprehensive examination, based on the required coursework and a reading list, is required of all candidates for the M.A. degree. The examination is given whenever you have completed the course requirements and, in consultation with the graduate adviser, your general and reading list preparation is deemed adequate.

The comprehensive examination is both written and oral; students who fail may be reexamined once without petitioning.

For the Ph.D. degree in Germanic Languages with Scandinavian literature as a major or minor field, see the "Ph.D. in Germanic Languages."

Lower Division Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition. Students with demonstrated preparation may be permitted a more advanced program by the section or may be transferred to a more advanced course with consent of the instructor.

Native speakers of Norwegian, Swedish, or Danish may not enroll in any language course (including courses 105, 106, 110) in the Scandinavian Section, except by petition in writing to the section. Non-Scandinavian students with knowledge of one of these Scandinavian languages may not take courses in the others except by petition in writing. Petitions must include a description of the student's linguistic background and the reason for wanting to take the language course in question.

1. Elementary Swedish.

Mr. Massengale, Mr. Shideler

2. Elementary Swedish. Prerequisite: course 1 or equivalent.

Mr. Massengale, Mr. Shideler

3. Elementary Swedish. Prerequisite: course 2 or equivalent.

Mr. Massengale, Mr. Shideler

4. Intermediate Swedish. Prerequisite: course 3 or equivalent.

Mr. Massengale, Mr. Shideler

5. Intermediate Swedish. Prerequisite: course 4 or equivalent.

Mr. Massengale, Mr. Shideler

11. Elementary Norwegian.

Ms. Norseng

12. Elementary Norwegian. Prerequisite: course 11 or equivalent.

Ms. Norseng

13. Elementary Norwegian. Prerequisite: course 12 or equivalent.

Ms. Norseng

14. Intermediate Norwegian. Prerequisite: course 13 or equivalent.

Ms. Norseng

15. Intermediate Norwegian. Prerequisite: course 14 or equivalent.

Ms. Norseng

21. Elementary Danish.

Mr. Massengale

22. Elementary Danish. Prerequisite: course 21 or equivalent.

Mr. Massengale

23. Elementary Danish. Prerequisite: course 22 or equivalent.

Mr. Massengale

24. Intermediate Danish. Prerequisite: course 23 or equivalent.

Mr. Massengale

25. Intermediate Danish. Prerequisite: course 24 or equivalent.

Mr. Massengale

30. Intermediate Danish, Norwegian, and Swedish. Prerequisite: course 5 or 15 or 25 or equivalent. Readings in Danish, Norwegian, and Swedish. Written and oral exercises. P/NP (undergraduates), S/U (graduates), or letter grading.

40. Scandinavian Civilization. Discussion, three hours. Survey of Scandinavian civilization, focusing on the contemporary political and social situation in Denmark, Finland, Iceland, Norway, and Sweden by examining the historical development. Readings in both literary and nonfiction texts. P/NP or letter grading.

Mr. Zentner

50. Introduction to Scandinavian Literature. Lecture, three hours. Intended for students in general and for those wishing to prepare for more advanced and specialized studies in Scandinavian literature and culture. Selected works from literature of Sweden, Norway, Denmark, Iceland, and Finland, ranging from myth, national epic, saga, and folktale through modern novel, poem, play, short story, and film script, read in English and critically discussed.

Ms. Norseng, Mr. Zentner

60. Ingmar Bergman and Other Swedish Filmmakers. Discussion, three hours. Knowledge of a Scandinavian language or of film not required. Intended for students in general and for those preparing for more advanced studies in Scandinavian literature or culture. History of Swedish film, emphasizing how it reflects social and cultural aspects of Scandinavian life. Discussion and analysis of representative Bergman and other Swedish films.

Mr. Zentner

Upper Division Courses

105. Advanced Swedish. Discussion, three hours. Prerequisite: course 30 or equivalent. Readings, composition, and conversation in Swedish.

Mr. Massengale, Mr. Shideler

106. Advanced Swedish. Discussion, three hours. Prerequisite: course 105 or equivalent. Readings, composition, and conversation in Swedish.

Mr. Massengale, Mr. Shideler

110. Advanced Danish and/or Norwegian. Discussion, three hours. Prerequisite: course 30 or equivalent. Readings, composition, and conversation in Danish and Norwegian. May be repeated once for credit.

Mr. Massengale, Ms. Norseng

M123A. Finnish Folklore and Mythology. (Same as Folklore M123A.) Methods and results of Finnish folklore studies and mythic traditions of the Finns. Special attention to oral epic, beliefs, and legends.

M123B. Finnish Folk Song and Ballad. (Same as Folklore M123B.) Course M123A is not prerequisite to M123B. Survey of Finnish balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values.

M125. Folklore and Mythology of the Lapps. (Same as Folklore M125.) Survey of Lappish beliefs, customs, and various genres of oral tradition, including tales, legends, songs, and music. Attention also to material manifestations of Lappish culture: arts and crafts, textiles, costume, folk technology.

130. Elementary Finnish. Introduction to pronunciation and grammar.

131. Intermediate Finnish. Prerequisite: course 130 or equivalent. Grammatical exercises and readings.

132. Advanced Finnish. Prerequisite: course 131 or equivalent. Readings, composition, and conversation.

138. Survey of Finnish Literature. Conducted in English; knowledge of Finnish not required. Intended for students in general and comparative literature, as well as students interested in Finnish studies. Readings and discussions of selected works from the literature of Finland in the 19th and 20th centuries.

141. Backgrounds of Scandinavian Literature. Discussion, three hours. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussions of representative texts selected from literature of medieval, Renaissance, baroque, and Enlightenment periods.

Mr. Massengale

142. Scandinavian Literature of the 19th Century. Discussion, three hours. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussions of selected works from Romantic, realistic, and post-Romantic literature of Scandinavia in the 19th century.

Mr. Massengale, Ms. Norseng

143. Scandinavian Literature of the 20th Century. Discussion, three hours. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussions of selected works of modern Scandinavian literature from beginning of the century to the present.

Mr. Massengale, Ms. Norseng, Mr. Shideler

C144. Henrik Ibsen. Discussion, three hours. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussions of selected plays by Henrik Ibsen. May be concurrently scheduled with course C251.

Ms. Norseng

C145. August Strindberg. Discussion, three hours. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussions of selected plays by August Strindberg. May be concurrently scheduled with course C252.

Mr. Massengale, Mr. Shideler

C146. Søren Kierkegaard. Discussion, three hours. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussions of selected works by Søren Kierkegaard. May be concurrently scheduled with course C253.

Mr. Massengale

C147. Knut Hamsun. Discussion, three hours. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussions of selected works by Knut Hamsun. May be concurrently scheduled with course C254.

Ms. Norseng

C180. Literature and Scandinavian Society. Discussion, three hours. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Discussion of selected aspects of Scandinavian society based on readings of contemporary literature as well as historical and/or sociological material. May be repeated for credit (as determined by undergraduate adviser) with topic change. May be concurrently scheduled with course C263.

Mr. Massengale, Ms. Norseng, Mr. Shideler

181. Contemporary Swedish Literature. Discussion, three hours. Prerequisite: reading knowledge of a Scandinavian language. Reading and analysis of selected texts by major 20th-century Swedish authors.

Mr. Shideler

C182. Theory of the Scandinavian Novel. Discussion, three hours. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Analysis of predominant structures of the Scandinavian novel from its 18th-century beginnings through its rise in the 19th century and its 20th-century evolution. Emphasis on works of writers such as Kierkegaard, Andersen, Almquist, Jacobsen, Hamsun, and Hansen. May be concurrently scheduled with course C264.

Mr. Massengale, Ms. Norseng, Mr. Shideler

183. Scandinavian Ballads. Lecture, three hours. Prerequisite: reading knowledge of a Scandinavian language. Survey of Danish, Norwegian, and Swedish ballads, with attention to their historical development, poetic content, and musical/poetic structure.

Mr. Massengale

184. Hans Christian Andersen. Lecture, three hours. Prerequisite for Scandinavian majors: course 30 or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Conducted in English. Study of works of Hans Christian Andersen, Danish novelist, dramatist, and writer of tales, including consideration of his literary background and of his times. Analysis of his works in terms of their structure, style, and meaning. P/NP or letter grading.

Mr. Massengale

C185. Seminar: Scandinavian Literature. Discussion, three hours. Prerequisite: reading knowledge of a Scandinavian language. Selected topics in Scandinavian prose, poetry, and drama. May be repeated for credit with consent of instructor and undergraduate adviser. May be concurrently scheduled with course C265.

Mr. Massengale, Ms. Norseng, Mr. Shideler

190. Honors Course in Scandinavian. Prerequisites: senior standing with a minimum 3.0 GPA in the major, consent of honors committee. Intensive study of a selected special topic in Scandinavian. Discussions, oral and written reports.

199A-199ZZ. Special Studies in Scandinavian (2 or 4 units each). Prerequisites: senior or graduate standing, consent of instructor. To be arranged with faculty member who will direct the study (course section to be identified by two-letter code using initials of sponsoring instructor — see section for I.D. number). Independent study designed for graduates or senior undergraduates who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a prerequisite.

Graduate Courses

C251. Henrik Ibsen. Discussion, three hours. Prerequisites: advanced knowledge of a modern Scandinavian language, consent of instructor. Intensive study of works of Henrik Ibsen. May be concurrently scheduled with course C144. Ms. Norseng

C252. August Strindberg. Discussion, three hours. Prerequisites: advanced knowledge of a modern Scandinavian language, consent of instructor. Intensive study of works of August Strindberg. May be concurrently scheduled with course C145.

Mr. Massengale, Mr. Shideler

C253. Søren Kierkegaard. Discussion, three hours. Prerequisites: advanced knowledge of a modern Scandinavian language, consent of instructor. Intensive study of works of Søren Kierkegaard. May be concurrently scheduled with course C146.

Mr. Massengale

C254. Knut Hamsun. Discussion, three hours. Prerequisites: advanced knowledge of a modern Scandinavian language, consent of instructor. Intensive study of works of Knut Hamsun. May be concurrently scheduled with course C147. Ms. Norseng

C263. Seminar: Scandinavian Studies. Prerequisites: graduate standing or consent of instructor, knowledge of a Scandinavian language. Intensive study of selected aspects of Scandinavian society based on readings in the literature as well as historical and/or sociological material. May be repeated for credit (as determined by graduate adviser) with topic change. May be concurrently scheduled with course C180.

Mr. Massengale, Ms. Norseng, Mr. Shideler

C264. Theory of the Scandinavian Novel. Prerequisites: advanced knowledge of a Scandinavian language, consent of instructor. Analysis of predominant structures of the Scandinavian novel from its 18th-century beginnings through its rise in the 19th century and its 20th-century evolution. Emphasis on works of writers such as Kierkegaard, Andersen, Almqvist, Jacobsen, Hamsun, and Hansen. May be concurrently scheduled with course C182.

Mr. Massengale, Ms. Norseng, Mr. Shideler

C265. Seminar: Scandinavian Literature. Discussion, three hours. Prerequisite: reading knowledge of a Scandinavian language. Selected topics in Scandinavian prose, poetry, and drama. May be repeated for credit with consent of instructor and graduate adviser. May be concurrently scheduled with course C185.

Mr. Massengale, Ms. Norseng, Mr. Shideler

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research (2 to 6 units). Prerequisite: graduate standing in Scandinavian. To be arranged with faculty member who will direct the study or research. Twelve units may be applied toward total course requirement, but only four units may be applied toward minimum graduate course requirement. May be repeated twice. S/U or letter grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (4 to 8 units). To be arranged with faculty member who will direct the study or research. May be repeated once. May not be applied toward M.A. minimum course requirements. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. To be arranged with faculty member who will direct the study or research. May be repeated. S/U grading.

Scope and Objectives

History is the study of the past of our own society and how it emerged out of the traditions that produced it. At the same time, self-knowledge for students of history comes not only from self-discovery, but from a comparison of their own tradition and experience with those of others. It is only by studying the history of other civilizations and cultures that we can hope to gain perspective on our own.

The course offerings in history at UCLA are designed to bring about an understanding of the forces that have shaped the many cultures of this country and the world. UCLA has one of the largest, most distinguished, and most diverse history faculties in the country. Its main emphasis is on the many aspects of social history, but intellectual, cultural, and political history are also strongly represented.

Of all undergraduate majors, history is probably the most flexible and far-reaching. Leading to a Bachelor of Arts degree, it is excellent preparation for a wide variety of careers — law,

teaching, business, the communications media, public services, and medicine.

The department offers graduate programs leading to the M.A. and Ph.D. and accepts qualified applicants for either or both degrees. There is also a joint master's program with the Graduate School of Library and Information Science. Traditionally, the M.A. and Ph.D. in History have led to careers in high school, college, and university teaching. Increasingly, they are also being put to use in government service, international business, museum and archival work, and journalism.

Bachelor of Arts Degree

Preparation for the Major and the Major

The History Department's undergraduate program consists of 16 courses in history (six lower division — the "Preparation for the Major"; 10 upper division — the "Major") and four courses in the social sciences outside the department. The following courses are required in the program:

- (1) History 1A-1B-1C.
- (2) Two courses in U.S. history.
- (3) Two courses in non-Western history from the same area (i.e., Latin America, Asia, Near and Middle East, Africa) or in science and technology. Candidates for the California Standard Instructional Credential may not choose science and technology to fulfill their non-Western requirement.
- (4) History 100A or 101.
- (5) History 197 or 199.
- (6) Four courses in the social sciences outside of history or in other related disciplines as explained below.

The requirements for U.S. and non-Western history may be met with either upper or lower division courses. Normally only six lower division courses in history need to be included in your program, so if you meet the U.S. history requirement at the lower division level, you have to meet the non-Western requirement at the upper division level (or vice versa). If you choose to meet both requirements at the lower division level, you are still required to take 10 upper division courses to fulfill upper division requirements. The department recommends the following lower division courses to meet the U.S. history and non-Western requirements: History 2, 3A, 3B, 3C, 3D, 6A, 6B, 6C, 7A, 7B, 8A, 8B, 8C, 8D, 9A, 9C, 9D, 10A, 10B, 11A, 11B. If only one non-Western course is taken in lower division, an appropriate upper division non-Western course must be included in the major.

All history majors are required to take at least four courses in other departments in the social sciences, whether lower or upper division (anthropology, geography, economics, political science, sociology, psychology). These courses

may not be taken on a Passed/Not Passed basis. A one-term course from the History 6A-6B-6C sequence may be applied toward this requirement, provided the same course is not used to satisfy any other requirement of the major.

By petition, you may replace up to two social sciences courses with courses in humanities, arts, or natural sciences relevant to your program in history. Courses in communication studies do not fulfill this requirement.

Transfer students with deficiencies in lower division courses may by petition substitute appropriate upper division courses in history for the lower division requirements. See the undergraduate counselor.

There is no language requirement for the major; however, students wishing to enter the honors program or planning to do graduate work in history are urged to pursue language study early in their undergraduate careers.

Advanced Placement Credit in History — The College of Letters and Science allows eight quarter units toward the B.A. for each Advanced Placement Test in History. The History Department applies this credit to the "Preparation for the Major" as follows: AP European History fulfills History 1C; AP American History with a score of 4 or 5 allows eight units of History 7A-7B credit on the history preparation. The excess units may be applied only toward the degree.

Honors Program

The honors program is designed for history majors who are interested in carrying out a year-long independent research project that culminates in an honors thesis. Special honors seminars are also offered during the junior year. A 3.5 departmental grade-point average is normally required for admission, but students with a lower GPA may apply to the honors committee for admission. Application should be made at the beginning of the junior year.

History 101H is required, as are History 199HA-199HB-199HC, which count as three of the 10 required upper division courses. Course 199HA is taken in Spring Quarter of the junior year; honors students then take courses 199HB and 199HC in Fall and Winter Quarters of their senior year under the guidance of the sponsoring professor. A prize is awarded for the outstanding honors thesis.

Instructional Credential in History

For information on the single subject instructional credential in history, consult the Graduate School of Education (1605 Maxxam Building, 825-8328).

Master of Arts Degree

Admission

For admission to graduate standing in the Department of History, you should normally have completed the undergraduate major or its equivalent, have received a Bachelor of Arts degree or its equivalent from an accredited college or

university, and have maintained at least a B+ average in upper division work. You also need three letters of recommendation and the score of the General Test of the Graduate Record Examination (GRE) submitted to the department. Students not meeting the grade-point average requirements may be admitted in exceptional cases if their letters of recommendation, GRE score, or other factors indicate unusual promise. Applicants with a year or more of graduate study at other institutions should have attained a GPA of 3.5 or better if they wish to work toward the Ph.D. degree. Admission to the department depends on the number of openings in the field in which you expect to specialize. Applications should be submitted *before* December 15; notification is made on or before May 1. Except for extraordinary cases, students are expected to begin their graduate work in Fall Quarter. The department has no separate application form in addition to the one used by UCLA Graduate Application Processing. Departmental information is available from Ruth Ann Raftery, Graduate Adviser, Department of History, 6273 Bunche Hall, UCLA, Los Angeles, CA 90024-1473.

There is no screening examination. Nonhistory majors may be required to take specified courses, depending on their background and fields of specialization. Because applicants are admitted to pursue graduate work in a specific field, a change of fields after admission requires approval of the relevant field committee.

An annual *Guide to Graduate Study in History* which explains the requirements and procedures of the graduate program in detail is mailed to all new graduate students who have filed a Statement of Intent to Register (prior to registration). The guide lists faculty, their representative publications, and descriptions of courses offered during the year, and is available from the graduate adviser.

Major Fields or Subdisciplines

The comprehensive examination covers one of the following fields: (1) ancient (includes ancient Near East); (2) medieval (includes Byzantine and medieval Jewish history); (3) Europe, 1550 to present (includes British history and the British Empire); (4) Africa; (5) Near East (includes Armenia); (6) India and Southeast Asia; (7) East Asia; (8) Latin America; (9) U.S.; (10) history of science; (11) special fields (students in the history of religions, Russian history, and modern Jewish history are normally examined in one of the above fields, but with consent of the faculty in these fields may petition the graduate guidance and curriculum committee for an M.A. examination in their field of specialization).

Foreign Language Requirement

If you are contemplating graduate work in history, you should begin study of a foreign language as an undergraduate since reading knowledge of one foreign language approved by the department is required. For French, German, Russian, or Spanish, a score of 500 on the Graduate School Foreign Language Test (GSFLT) is re-

quired. Students of U.S., Near East, and African history may use departmentally administered translation examinations in French, Spanish, or German in place of the GSFLT. Students of European history must pass departmentally administered examinations in one of these three languages no later than the beginning of the sixth term of full-time study. For other languages, certification is required by the department teaching the language according to that department's standards.

Course Requirements

The department requires a minimum (and preferably a maximum) of nine upper division and graduate courses in history, at least six of which must be graduate courses. No course in the 300 series may be applied toward this requirement, and only one in the 500 series may be applied. For students in U.S. history and European history, a minimum of seven of the nine courses must be at the 200 level. For U.S. history, these seven courses must include at least two two-term seminars and History 245. For European history, the seven courses must include two two-term seminars and course 225. Africanists must take course 275.

Comprehensive Examination Plan

The department follows the comprehensive examination plan. Individual fields specify fulfillment of the examination requirement by (1) a three-hour written examination designed to assess your ability to synthesize a broad field of knowledge or (2) the submission of three essays written for at least two different professors as part of your program of study. At least two of these papers must have been submitted for graduate courses in the 200 series. The U.S. field requires a comprehensive examination in the form of a research paper of approximately 15,000 words, to be submitted at the end of six terms of full-time study. The European field requires a comprehensive examination in the form of a research paper of approximately 15,000 words, to be submitted at the beginning of the sixth term of full-time study.

The medieval M.A. examination is given in May of each academic year. All other field examiners administer the M.A. comprehensive examinations in November, March, and May each year. The committee recommends the following examination results: pass to continue, pass subject to reevaluation, terminal pass, fail. In cases where the M.A. is awarded pass subject to reevaluation, the field M.A. committee reevaluates your progress after an additional three terms of study. Only in exceptional cases are oral examinations required for the M.A. degree.

M.L.S./M.A.-History

This concurrent degree program of the Department of History and the Graduate School of Library and Information Science allows you to combine historical study with the tools of the information professional and to obtain two de-

grees — the M.L.S. and the M.A. in History. The best sequence of coursework should be discussed with the advisers from this department and the Graduate School of Library and Information Science.

Ph.D. Degree

Admission

Admission requirements for the Ph.D. program are the same as those for the M.A., but applicants for the doctorate are urged to seek an interview or to correspond with a member of the faculty in the field in which they intend to work. Students may be admitted with subject deficiencies, but such deficiencies must be removed by completing courses in addition to the requirements for an advanced degree.

While no examination is required for admission to a Ph.D. program, evaluation examinations are given to determine your continuance to the Ph.D. degree.

An annual *Guide to Graduate Study in History* which explains the requirements and procedures of the graduate program in detail is mailed to all new graduate students who have filed a Statement of Intent to Register (prior to registration). The guide lists faculty, their representative publications, and descriptions of courses offered during the year and is available from the graduate adviser.

Major Fields or Subdisciplines

Ancient Greece; ancient Rome; medieval constitutional and legal; medieval social and economic; medieval ecclesiastical and religious; medieval intellectual and cultural (medieval history specialists may offer no more than two of these fields in medieval history); Byzantine; Russia since 862; Southeast Europe (Balkans); England prior to 1485; England, 1485-1763; England since 1763; the British Empire; ancient Near East; the Near East, 500-1500; the Near East since 1500; Armenian; survey of African history; topics in African history (preferably on a regional basis); history of science to 1600; history of science since 1600; Europe, Renaissance/Reformation; Europe, Renaissance to the French Revolution; Europe since 1740; European socioeconomic history; European intellectual and cultural history; psychohistory; China, 900-1800; China since 1800; modern Japan; South Asia; Southeast Asia; Latin America, 1492-1830; Latin America since 1759; history of religions; Jewish history; history of Christianity; comparative history; U.S.: (1) mastery of the general field of U.S. history sufficient to teach a college-level survey course and (2) a specialized field selected from the following: Afro-American, American diplomatic, American West, American Indian, California, history of the South, Civil War and Reconstruction, Colonial, cultural, economic, immigration, intellectual, Jeffersonian and Jacksonian American (1800-1850), labor, Mexican-American, social, the new nation (1763-1800), 20th century, urban, women's history. Both the general and a specialized

field must be offered by specialists in U.S. history, and only two fields in U.S. history are permitted. Either field 1 or 2 or both may be selected as minor fields for the Ph.D.

Candidates offering a field in comparative history as a fourth field for the Ph.D. degree should select a topic for comparison which would usually coincide with time-area spans of the other three fields defined for the Ph.D. qualifying examinations.

Candidates in the history of science program must select three of the above fields and either the history of medicine or an allied field.

All candidates may offer for examination an approved allied field outside the Department of History.

Foreign Language Requirement

Foreign language requirements vary according to the major field, although reading knowledge of the prescribed language(s) (one for U.S. history students, at least two for all others) is required. For details, consult the *Program Requirements for UCLA Graduate Degrees, 1992-93: Department of History* or your graduate adviser.

Course Requirements

You must meet (1) the special requirements for admission listed above and (2) the general requirements set forth under the Graduate Division. A program, extending over the full time of study, must be approved by the department. You are required to complete at least one continuing two- or three-term seminar or, alternatively, a continuing sequence of at least two graduate courses approved by the graduate guidance and curriculum committee, which results in a substantial research paper based at least in part on primary sources. If this requirement is met entirely or in part by a sequence of directed study courses (History 596), you must take the course(s) for a letter grade. Students in U.S. history should complete course 245. Students in European history must complete course 225, and students in African history must complete course 275 unless exempt by special petition. Courses taken to fulfill M.A. degree requirements may also be used to satisfy Ph.D. requirements.

Teaching Experience

The department cannot provide teaching experience for all Ph.D. candidates and cannot therefore require it for the degree. You should, however, be able to demonstrate ability to give instruction in your field.

Qualifying Examinations

Full-time graduate students must schedule the written qualifying examination by the end of the ninth term of graduate work. The written examination includes the major field only, is normally prepared and administered by the chair of your doctoral committee, and is read by the entire committee before you take the oral qualifying examination. The members of

the doctoral committee determine whether or not an examination may be repeated (normally only once).

The written examination must be passed and a dissertation prospectus (approved by the doctoral committee chair) must be written before taking the University Oral Qualifying Examination. In the oral examination you are examined in four fields, one of which may be an approved allied field. You should select fields in consultation with your faculty sponsor and must receive the department's approval of all four fields. If you fail the oral qualifying examination, you may repeat it once (normally within a period of six months) with the consent of the doctoral committee.

After passing the oral qualifying examination, you are advanced to candidacy and may begin work on the dissertation.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

If required by the qualifying examination committee, a final oral examination is conducted after completion of the dissertation to cover the field within which the dissertation falls. After approving a dissertation, the chair of the doctoral committee may, with the unanimous consent of the entire committee, recommend a waiver of the final oral examination.

Lower Division Courses

1A-1B-1C. Introduction to Western Civilization. Lecture, two hours; discussion, two hours. Broad, historical study of major elements in Western heritage from the world of the Greeks to that of the 20th century, designed to further beginning students' general education, introduce them to ideas, attitudes, and institutions basic to Western civilization, and acquaint them, through reading and critical discussion, with representative contemporary documents and writings of enduring interest. **1A.** Ancient Civilizations from Prehistory to ca. A.D. 843; **1B.** Circa A.D. 843 to ca. 1715; **1C.** Circa 1715 to the Present.

1AH-1BH-1CH. Introduction to Western Civilization (Honors). Lecture, two hours; discussion, two hours. Honors sequence parallel to courses 1A-1B-1C.

2. History of Technology from Antiquity to the 20th Century. Lecture, three hours. Designed for students in natural sciences, social sciences, and the arts. Survey of development of man's ability to understand more fully and to utilize more efficiently the natural environment, stressing technology's changing social, economic, scientific, and cultural relationships.

3A-3B-3C. Introduction to History of Science. Lecture, three hours; discussion, two hours. History majors may not apply these courses on science general education requirements:

3A. Scientific Revolution. Survey of the beginnings of physical sciences involving transformation from Aristotelian to Newtonian cosmology, mechanization of the natural world, rise of experimental science, and origin of scientific societies.

3B. Physical Sciences since the Enlightenment. Broad survey of development of ideas in classical and modern physical science since Newton. Theories of matter, but more specifically chemistry, thermodynamics, electromagnetic theory of light, energy conservation, relativity, and quantum mechanics.

3C. Biological Sciences, 1800-1955. Survey of development of biological sciences from the period of Bichat and Müller to discovery of the double helix.

Mr. Frank

3D. Themes in History of Medicine. Lecture, three hours. Prerequisite: sophomore standing. Limited to 30 students. Examination, through illustrated lectures and focused discussion of primary sources, of five important themes in development of modern medicine: nature of diagnosis, emergence of surgery, epidemics, conception and treatment of insanity, and use of medical technology.

Mr. Frank

4. Introduction to History of Religions. Lecture, three hours; discussion, two hours. Discussion of various systems, ideas, and fashions of thought that have dominated Western approaches to religions of the world since antiquity. Survey of development from classical Greek and early Christian theories to modern history with its discoveries of the religions of India, China, ancient Near East, etc., and the problem of the encounter of various religions in the 19th and 20th centuries.

5A-5B. Survey of British History. Lecture, three hours; discussion, two hours. Designed for students wanting general orientation to British history and those in English literature and prelaw. Survey of history of England and (after the union between England and Scotland) Great Britain. **5A.** Middle Ages to the Glorious Revolution in 1688; **5B.** 1688 to the 20th Century. Ms. McClendon, Mr. Urdank, Mr. Waugh

6A-6B-6C. History of the American Peoples. Lecture, two hours; discussion, two hours. Survey of the American peoples from advent of aboriginal society to the present, emphasizing racial and ethnic interaction, industrialization, urbanization, and cultural change. **6A.** To 1800; **6B.** 1800 to 1900; **6C.** 1900 to the Present. Ms. Appleby, Ms. Meyer, Mr. Nash

6BH. History of the American Peoples (Honors). Lecture, two hours; discussion, two hours. Survey of the American peoples from advent of aboriginal society to the present, emphasizing racial and ethnic interaction, industrialization, urbanization, and cultural change. Mr. Monknonen

7A-7B. Survey of Political History of the U.S. Lecture, two hours; discussion, two hours. This sequence (or two terms of course 6) strongly recommended for history majors planning to take more advanced courses in U.S. history. Designed for students in social sciences and other departments who desire thorough grounding in American political culture. Survey of history of the U.S. from the Revolutionary era to the present. Emphasis on political developments and social, cultural, and economic bases of American politics. **7A.** To 1877; **7B.** 1877 to the Present.

Ms. Appleby, Mr. Gatell, Mr. Howe

8A. Culture, Ethnicity, and Gender in Early Latin America. Lecture, three hours; discussion, two hours. General introduction to Latin American history from conquest to independence, with emphasis on role of ethnicity and gender in the emerging society and culture. Mr. Lockhart

8B. Latin America: Reform and Revolution. (Formerly numbered 8A.) Lecture, three hours; discussion, two hours. General introduction to Latin America, emphasizing those institutions from the past which have shaped the present and the struggle for change in the 20th century.

Mr. E.B. Burns and the Staff

8C. Latin American Social History. (Formerly numbered 8B.) Lecture, three hours; discussion, two hours. Historical and contemporary perspective of role of ordinary people in Latin American society. Each lecture/film session centers on a major Latin American movie illustrative of a theme in social history.

Mr. E.B. Burns and the Staff

8CH. Latin American Social History (Honors). Lecture, three hours; discussion, two hours. Honors course parallel to course 8C.

Mr. E.B. Burns, Mr. Moya

8D. Central America: Struggle for Change. (Formerly numbered 8C.) Lecture, three hours; discussion, two hours. Economic growth and accompanying dependency of Central America from independence until the Great Depression and turbulent consequences of that combination from 1930 to the present. Attention to common characteristics of the five nations, as well as their individuality.

Mr. E.B. Burns

9A-9D. Introduction to Asian Civilizations. Lecture, three hours; discussion, two hours:

9A. History of India. Introductory survey for beginning students of major cultural, social, and political ideas, traditions, and institutions of Indic civilization.

Mr. Wolpert

9C. History of Japan. Survey of Japanese history from earliest recorded time to the present, with emphasis on development of Japan as a cultural daughter of China. Attention to manner in which Chinese culture was Japanese and aspects of Japanese civilization which became unique. Creation of the modern state in the last century and impact of Western civilization on Japanese culture.

Mr. Notehelfer, Ms. Silverberg

9CH. History of Japan (Honors). Honors course parallel to course 9C.

Mr. Notehelfer

9D. History of the Near and Middle East. Introduction to history of the Muslim world from advent of Islam to the present day.

Ms. Marsot

10A-10B. Introduction to Civilizations of Africa. Lecture, three hours; discussion, two hours. Intended for students with general interest in Africa, but also strongly recommended for those intending to take upper division courses in African history. Exploration of African cultures on a thematic basis within a wider framework of political change over time.

10BH. Introduction to Civilizations of Africa (Honors). Lecture, three hours; discussion, two hours. Honors course parallel to course 10B.

Mr. Worger

11A-11B. History of China. Lecture, three hours; discussion, two hours:

11A. To 1000. Survey of early history of China — genesis of characteristic Chinese institutions and modes of thought from antiquity to 1000. Focus on social, political, intellectual, and economic aspects of early and middle empires.

Mr. Elman, Mr. von Glahn

11B. 1000 to 1950. Survey of later history of China — evolution of characteristic Chinese institutions and modes of thought from 1000 to 1950. Focus on social, political, intellectual, and economic aspects of late empires and rise of modern China in the contemporary era.

Ms. Bernhardt, Mr. Elman, Mr. von Glahn

11AH-11BH. History of China (Honors). Lecture, three hours; discussion, two hours. Honors sequence parallel to courses 11A-11B.

Mr. Elman, Mr. von Glahn

M70. Survey of Medieval Greek Culture. (Same as Classics M70.) Lecture, three to four hours. Classical roots and medieval manifestation of Byzantine civilization: political theory, Roman law, pagan critique of Christianity, literature, theology, and contribution to the Renaissance (including discovery of America).

Mr. Dyck

88A-88U. Lower Division Seminars (5 units each). Seminar, three hours. Prerequisite: freshman or sophomore standing. Limited to 15 students. Open to non-history majors. Readings, discussions, papers. Sign-ups and descriptions of offerings each term are available in undergraduate counselor's office (6248 Bunche Hall). Ten units may be taken for credit. **88A.** Ancient Greece; **88B.** Ancient Rome; **88C.** Medieval; **88D.** Early Modern Europe; **88E.** Modern Europe; **88F.** Russia/Eastern Europe; **88G.** Britain; **88H.** U.S.; **88I.** Latin America; **88J.** Near East; **88K.** India; **88L.** China; **88M.** Japan; **88N.** Africa; **88O.** Science/Technology; **88P.** History of Religions; **88Q.** Theory of History; **88R.** Jewish History; **88S.** Armenia and the Caucasus; **88T.** Southeast Asia; **88U.** Psychohistory.

97H. Three Trials. Discussion, three hours. Prerequisite: consent of instructor. Limited to 20 students. Intensive study of three trials, each of which led to the execution of the accused: Socrates, Jesus of Nazareth, and Joan of Arc. View of each trial as a conflict between legitimate but irreconcilable interests and world views. For each, class constitutes itself as a court (prosecution, defense, jury) and reviews the verdict of original trial. Mr. Benson

Upper Division Courses

Prerequisite for all upper division courses is upper division standing or consent of instructor, unless otherwise stated. Certain graduate courses (200 series) are open to students with upper division standing and consent of instructor.

100A. History and Historians. (Formerly numbered 100.) Lecture, three hours. Study of historiography, including intellectual processes by which history is written, results of these processes, and sources and development of history. Attention also to representative historians. Mr. Baldwin, Mr. Ooms, Mr. Reill

100B. History and Contemporary Theory. Lecture, three hours. Survey of main sources and trends of contemporary theory, from Saussure's linguistics to recent feminist theories, in texts that inform much of the most recent historiographical directions and debate. Mr. Biagioli, Mr. Ooms

101. Introduction to Historical Practice. Seminar, three hours. Limited to juniors and seniors. Discussion classes of no more than 15 students meeting with a faculty member. Exploration of how works of history are written, with emphasis on problems of historiography and method.

101H. Introduction to Historical Practice (Honors). Seminar, three hours. Limited to juniors and seniors in history honors program. Discussion classes of no more than 15 students meeting with a faculty member. Emphasis on problems in philosophy of history, historiography, and historical method.

102. Explorations in Psychoanalysis and History. Lecture, three hours. Art of psychological and historical interpretation; assessment of recent writings in the field of psychohistory. Mr. Loewenberg, Mr. Wohl

M103. Historical Archaeology. (Same as Anthropology M115S.) Survey of aims and methods of historical archaeology as practiced on both sides of the Atlantic, with case studies from North America, the Caribbean, Africa, and Europe. Mr. Posnansky

M104A-M104B. Ancient Egyptian Civilization. (Same as Ancient Near East M104A-M104B.) Lecture, three hours. Course M104A is not prerequisite to M104B. Political and cultural institutions of ancient Egypt and ideas on which they were based. **M104A.** Chronological discussion of Prehistory, the Old and Middle Kingdom. **M104B.** The New Kingdom and the Late period until 332 B.C. (Alternate years)

M105. History of Ancient Mesopotamia and Syria. (Formerly numbered 105.) (Same as Ancient Near East M105.) Lecture, three hours. Political and cultural development of the "Fertile Crescent," including Palestine, from the Neolithic to the Achaemenid period. Mr. Buccellati

106A-106B-106C. Survey of the Middle East from 500 to the Present. Lecture, three hours. Background and circumstances of rise of Islam, creation of the Islamic Empire, and its development. Rise of Dynastic Successor States and the Modern Nation States. Social, intellectual, political, and economic development:

106A. 500 to 1300. Mr. Morony

106B. 1300 to 1700. Ms. Marsot

106C. 1700 to the Present. Ms. Keddie

107A-107B. Islamic Civilization. Lecture, three hours:

107A. Premodern Islam. Origins of Islamic civilization, Muhammad and the Qur'an; development of Islamic doctrine, ritual, piety and law, sectarian Islam, and mysticism. Mr. Morony

107B. Islam in the Modern World. Reform movements, legal issues, sociopolitical trends, movements of opposition. Ms. Keddie, Ms. Marsot

108A-108B. History of the Arabs. Lecture, three hours. Course 108A is prerequisite to 108B. Political, social, intellectual, and economic history of the Arabs from the 18th century to the present. Ms. Marsot

109A-109B. History of North Africa from the Moslem Conquest. Lecture, three hours:

109A. To 1578. Mr. Morony

109B. 1578 to the Present. Ms. Marsot

110A-110B. Iranian History. Lecture, three hours. Political, social, and cultural history of Persia:

110A. Islamic Iran to 1800. Mr. Banani

110B. Iran from 1800 to the Present. Ms. Keddie

111A-111B. History of the Turks. Lecture, three hours. Survey of society, government, and political history of the Turks from earliest times to the present:

111A. Origins to 1808. Turkish origins, early Central Asian and Middle Eastern states. Rise and fall of the Ottoman Empire. Mr. Shaw

111B. 1808 to the Present. Modernization of the Ottoman Empire, 1808-1923. The Turkish Republic. The Turks in the world. Mr. Shaw

111C. History of Jews in the Ottoman Empire and the Turkish Republic, 1300-1923. Lecture, three hours. Preliminary introduction to the Jews in Byzantium and the Islamic world before the Ottoman conquest, followed by discussion of Jewish communities and Judaism in Southwestern Europe, Anatolia, and the Middle East while they were under Ottoman rule (1300-1923) and in the Turkish Republic since 1923. P/NP or letter grading. Mr. Shaw

112A-112B-112C. Armenian History. Lecture, three hours:

112A. Armenia in Ancient and Medieval Times, 2nd Millennium B.C. to A.D. 11th Century. Mr. Hovannisian

112B. Armenia from the Cilician Kingdom through the Periods of Foreign Domination and National Stirrings, 11th to 19th Centuries. Mr. Hovannisian

112C. Armenia in Modern and Contemporary Times, 19th and 20th Centuries. The Armenian question and genocide, national republic, Soviet Armenia, and the dispersion. Mr. Hovannisian

C112D. Introduction to Armenian Oral History. Lecture/discussion, three hours. Uses and techniques of Armenian oral history; preinterview, interview, and postinterview procedures; methods of compilation and evaluation. Field assignments and interviews. May be concurrently scheduled with course C212. Mr. Hovannisian

113. The Caucasus under Russian and Soviet Rule. Lecture, three hours. Survey of political, economic, social, and cultural history of the Caucasus region since 1801. Georgian, Armenian, and Azerbaijani response to Russian and Soviet rule; the nationality question and the Soviet national republics. Mr. Hovannisian

115A-115B-115C. History of Ancient Mediterranean World. Lecture, three hours:

115A. Survey of history of the ancient East from earliest times to foundation of the Persian Empire. Mr. Mellor

115B. History and institutions of the Greeks from their arrival to the death of Alexander. Mr. Chambers, Mr. Mellor

115C. History and institutions of Rome from founding of the city to the death of Constantine. Mr. Chambers, Mr. Mellor

116A-116B. History of Ancient Greece. Lecture, three hours. **116A.** Rise of the Greek City-State. Emphasis on archaic period and early classical age through the Persian Wars. **116B.** Classical Period. Clash between Athens and Sparta, consequent rise of Macedonia, and aftermath of Alexander the Great. Mr. Chambers

117A-117B. History of Rome. Lecture, three hours. **117A.** To Death of Caesar. Emphasis on development of imperialism and on constitutional and social struggles of the late republic. **117B.** From Death of Caesar to the Time of Constantine. The early empire treated in more detail, supplemented by survey of social and economic changes in the 3rd century. Mr. Mellor

118. Introduction to Roman Law. Lecture, three hours. Survey of public (constitutional), criminal, and private law of the Romans. Topics include social context of Roman law, historical evolution of Roman law, mechanisms and procedures by which the law was administered, and content of private law. Mr. Mellor

119. The Christian Church, 100-1517. Lecture, three hours. Constitutional, political, and economic history of the Church: Christianization of Roman Empire and Germanic kingdoms; governance and institutions of the Church; relations between Church and monarchy; the high tide of papalism; crises of authority on eve of the Reformation. Mr. Benson

120. The Christian Religion, 100-1350. Lecture, three hours. Religious experience of Christians — conversion, doctrine, belief, heresy, spirituality, worship, liturgy, and art. Religious life of lay Christians, as well as that of the Church's institutional, intellectual, and spiritual leaders. Mr. Benson

121A-121B. Medieval Europe. Lecture, three hours. Recommended prerequisite: Western civilization. Basic introduction to Western Europe from Latin antiquity to the age of discovery, with emphasis on medieval use of Greco-Roman antiquity, history of the manuscript book, and growth of literacy. **121A.** 400 to 1000; **121B.** 1000 to 1500. Mr. Rouse

121C. Medieval Civilization: Mediterranean Heartlands. Lecture, three hours. Survey of Western Mediterranean Europe, social/economic/cultural within a political framework, including its relation with other cultures.

121D. Medieval People: The 13th Century. Lecture, three hours. Movements and creative contributions to Western culture in this central century of the Middle Ages, as seen in its representative men and works.

M122. Power and Imagination in Byzantium. (Same as Classics M170.) Lecture, three hours. Prerequisites: courses M70 or 123A-123B. Study of relations of authority and the intelligentsia in the highly centralized Byzantine Empire. Topics include criticism of the emperor, iconoclasm, intellectual freedom, attempts at reform. Mr. Dyck

123A-123B. Byzantine History. Lecture, three hours. Political, socioeconomic, religious, and cultural continuity in the millennial history of Byzantium. Reforms of Diocletian. Byzantium's relations with Latin Europe, Slavs, Sassanids, Arabs, and Turks.

124A-124B. East-Central Europe. Lecture, three hours. **124A.** The Long 19th Century, 1780-1914. Analysis of characteristics of peripheral 19th-century capitalism, effort to modernize and catch up, and factors and consequences of its partial failure in the economy, politics, and culture. **124B.** The Short 20th Century, 1918-1990. Analysis and interpretation of stormy history of crisis zone of Europe where wars, revolts and revolutions, different types of extremisms led to a historical detour: 70 years of departure from Western values and at last an effort to turn back to them. Mr. Berend

125A-125F. History of Modern Europe. Lecture, three hours:

125A. Renaissance: Power and Culture in the Italian City-States. Mr. Martines

125B. Reformation: Church and Religion in the Early 16th Century. Revolutionary tendencies in German society. The peasant uprising. Theology and political thought of Erasmus, Luther, Zwingli, Calvin, and the Anabaptists. The new churches. Effects of the Reformation on society.

125C. Absolutism and Enlightenment: Europe under the Old Regime. State, society, and culture in Europe from the mid-17th century until eve of the French Revolution. Mr. Anderson

125D. Europe, 1789-1900. The French Revolution and Napoleon. The Industrial Revolution. Uprisings of 1848. Unification of Germany and Italy. Industrialization and imperialism. Rise of socialism. Population growth and changes in social structure.

Mr. Berenson, Mr. Reill, Ms. Silverman

125E. Europe, 1870-1939. Liberalism and its adversaries. Imperialism and the coming of the First World War. The Great War and its impacts. Bolshevik Revolution, Italian Fascism, and the Nazi dictatorship. German drive for hegemony in Europe and response of the democracies.

Mr. Loewenberg, Mr. Wohl

125F. Europe, 1939 to the Present. The Second World War and its legacy. Collaboration and resistance during World War II. Breakup of the Grand Alliance, Eastern European revolution, and restructuring of Western Europe. Trauma of decolonization. De-Stalinization and its limits. European integration, the new society, and political configurations of contemporary Europe.

Mr. Wohl

126A-126E. Cultural and Intellectual History of Modern Europe. Lecture, three hours. Climates of taste and climates of opinion. Educational, moral, and religious attitudes; art, thought, and manners of the time in historical context:

126A. 16th Century.

126B. 17th Century.

Mr. Anderson

126C. 18th Century.

Mr. Reill

126D. 19th Century.

Mr. Loewenberg, Ms. Silverman, Mr. Weber

126E. 20th Century.

Mr. Loewenberg, Mr. Weber, Mr. Wohl

127A-127B. War and Diplomacy in Europe. Lecture, three hours:

127A. 1650 to 1815. Survey of military and diplomatic history, seen in relation to social and economic developments and growth of the state. Mr. Symcox

127B. 1815 to 1945. Balance of power; growth of the nation state; imperial and colonial rivalries; the two World Wars. Mr. Shaw, Mr. Symcox

128A-128C. History of France. Lecture, three hours:

128A. France, 1500-1715. Social history of 16th- and 17th-century France, including growth of monarchy, wars of religion, peasant uprisings, popular culture, Catholic resurgence, Louis XIV and achievements in arts and literature. Ms. Norberg

128B. France, 1715-1871. "Ancien Régime" and the time of revolutions. Critical discourse leading to the French Revolution, collapse of the state, Napoleonic era, reconstruction of society through the monarchies and revolutions of the 19th century.

Mr. Berenson, Ms. Silverman

128C. The Making of Modern France, 1871 to the Present. From oligarchy to democratic bureaucracy in two wars and three republics. Mr. Weber

129A-129D. History of Modern Germany, Austria, and Switzerland. (Formerly numbered 129A-129B-129C.) Lecture, three hours:

129A. 1500 to 1648. Political structure of empire and territories, economy, social classes, daily life, book publishing and universities, Reformation and Counter-Reformation, Thirty Years' War, military entrepreneurship, population losses, the Peace of Westphalia.

129B. 1648 to 1820. Survey of social, economic, cultural, and political history, including rise of absolutist and bureaucratic government, Enlightenment and reform, emergence of Austro-Prussian dualism, transformation of the German economy, impact of the French Revolution and German reform movement, Restoration and Metternichian reaction. Mr. Reill

129C. 19th Century. Wars of Liberation, Congress of Vienna, rise of Romanticism, causes and failure of the Revolutions of 1848. Prussian constitutional struggle, German unification, Bismarckian and Wilhelmine eras in Germany and Ausgleich in Austria, liberalism, industrialism, anti-Semitism, social democracy. Mr. Baldwin

129D. 20th Century. Hohenzollern and Habsburg Empires, nationalities question, electoral reform, World War I, revolutions, republics, inflation, Fascism and Nazism, World War II, occupation, and Austrian and German Federal Republic, German Democratic Republics, and Swiss Confederation.

Mr. Baldwin, Mr. Loewenberg

130A-130B-130C. Europe in the Age of Revolution, 1750-1850. Lecture, three hours:

130A. End of the Old Regime. Economic development from ca. 1750. The agrarian revolution. The Enlightenment: social criticism and political economy. Intellectual origins of the French Revolution. New sensibility: rococo, neoclassicism, proto-Romanticism. First signs of discontent: Geneva, Corsica, Poland. American war of independence and its effect on the European state-system; its intellectual effects. Mr. Symcox

130B. Crisis of the Old Regime and the Revolution. The revolution in France, 1787-1799. Spread of revolution to other parts of Europe and varying responses. Impact of war on revolutionary France after 1792 and spread of the revolution by military force. Jacobinism in France and outside. Parallel movements abroad (e.g., Ireland, Haiti, Poland). Satellite regimes set up in Europe. Mr. Symcox

130C. Napoleonic Europe and the Restoration. Napoleon's ascendancy in France from 1799: internal effects. Restructuring of Europe under Napoleon and nationalist reactions. Industrial and political change in Britain: Anglo-French world rivalry to 1815. The restoration: what could be restored and what could not. Rising national consciousness against Metternich's system. Continuing revolutionary tradition: 1821, 1830, 1848. Romanticism at its apogee. Conclusion: how world of 1850 differed from that of 1750. Mr. Symcox

131A-131D. History of Russia. Lecture, three hours:

131A. From the Origins to the Rise of Muscovy. Kiev-an Russia and its culture. Appanage principalities and towns; the Mongol invasion; unification of the Russian state by Muscovy, Autocracy and its Servitors; serfdom. Mr. Krekic

131B. Imperial Russia from Peter the Great to Nicholas II. Westernization of state and society; centralization at home and expansion abroad; peasant problem; beginnings of industrialization; movements of political and social protest; non-Russian peoples; political reforms and social changes; Revolution of 1905; Russia in World War I; fall of the old regime.

131C. Revolutionary Russia and the Soviet Union. The Revolutions of 1917, Civil War, consolidation of the Bolshevik Regime; succession crisis and ascendancy of Stalin, collectivization and industrialization; foreign policy and World War II; death of Stalin, de-Stalinization, developments since; stagnation or stability? Mr. Hatch

131D. Intellectual History. Prerequisite: course 131B or Russian 99A or 119 or consent of instructor. Social thought and movements in modern Russia, late 18th to early 20th century. Mr. Hatch

132A-132B. History of Italy. Lecture, three hours:

132A. 1559 to 1848. Counter-Reformation and absolutism, Enlightenment reforms, revolutionary era, and first phase of the Risorgimento. Mr. Ginzburg, Mr. Symcox

132B. 1848 to the Present. Political, economic, social, diplomatic, and ideological developments. Mr. Wohl

133A-133B. Social History of Spain and Portugal. Lecture, three hours:

133A. Age of Silver in Spain and Portugal, 1479-1789. Development of popular history in the Iberian Peninsula. Emphasis on peasants and urban history, gold routes, slave trade, history of women, and development of different types of collective violence.

133B. Rebellion and Revolution in Modern Spain and Portugal, 1789 to the Present. Spain's position in Europe and its potentialities for social change discussed through investigations of urban history, agrarian social structure, history of women, problems of slow industrial development, imperialism, anarchism, and labor history.

134A. Southeastern Europe, 500-1500. Lecture, three hours. Political, economic, and cultural survey of the independent Balkan states in the Middle Ages. Mr. Krekic

134B. Southeastern Europe, 1500-1918. Lecture, three hours. The Balkans under Ottoman rule, movements of national liberation, and formation of nation-states. Mr. Krekic

135A-135B. Marxist Theory and History. Lecture, three hours. Course 135A is generally prerequisite to 135B. Introduction to Marxist philosophy and method; conception of historical stages; competing Marxist analyses of transition from feudalism to capitalist economy via reading *Capital*; theory of politics and state in relationship to historical interpretation of 19th-century European revolutions; capitalist crises. Mr. Brenner

136A-136Z. Topics in European History. Lecture, three hours. Integrated introduction to important aspects of European history, with emphasis on a specific topic within a broad framework:

136A. Social Movements.

136B. Peasants and Agrarian Society.

Mr. Brenner

136C. Urban Society.

Mr. Symcox

136F. The Family. Social history of the family in Western Europe since the Middle Ages. Household and family organization of peasants, artisans, and aristocrats; kinship, child-rearing, parental authority, marriage and inheritance systems; attitudes toward love, sex, and children. Mr. Urdank

136G. Psychohistory. Mr. Loewenberg, Mr. Wohl

136I. Special Topics. May be repeated once for credit.

137A-137B-137C. History of Women in Europe. Lecture, three hours:

137A. Prehistory to 1348. History of women in ancient Greece, Rome, and the Middle Ages. Topics include women in Greek mythology and life, Roman Empire, Christianity, convents, courtly love. Ms. Norberg

137B. 1348 to 1814. History of women from the Renaissance to the end of the French Revolution. Topics include women of Renaissance Italy, women in the Protestant and Catholic Reformations, witchcraft, and the Enlightenment and French Revolution. Ms. Norberg

137C. 1814 to the Present. Topics include Victorian women; purity movements; suffrage; role of women in World War I, Russian Revolution, and the Nazi State; "second" feminism. Ms. Norberg

138A-138B. Topics in Medieval English History. Lecture, three hours. Topics include the village community and economy, family and landholding, Church and society, war, politics, and feudal relations. Mr. Rouse, Mr. Waugh

139. Renaissance England. Lecture, three hours. Culture and society. Emphasis on literary culture (Elizabethans, Jacobean, Carolines), with readings and lectures on different aspects of political and economic life as required for serious understanding of the culture. Mr. Martines

141A-141B-141C. History of Britain. Lecture, three hours. Analysis of British economy, society, and polity, focusing on dynamics of both stability and change:

141A. Tudor-Stuart Times, 1485-1660.

Mr. Brenner, Mr. Martines, Ms. McClendon

141B. Early Modern Times, 1660-1832.

Mr. Anderson, Mr. Brenner, Mr. Brewer

141C. Modern Britain since 1832. Mr. Urdank

142A-142B. British Empire since 1783. Lecture, three hours. Political and economic development of the British Empire, including evolution of colonial nationalism, development of the commonwealth idea, and changes in British colonial policy.

Mr. SarDesai

143. History of Canada. Lecture, three hours. Survey of growth of Canada into a modern state from its beginnings under the French and British colonial empires.

144. History of Australasia. Lecture, three hours. History of Australia and New Zealand from the European settlement, with emphasis on interrelationships between settlers and aborigines; comparisons and contrasts between the Australian and New Zealand experience.

145A. Colonial America, 1600-1763. Lecture, three hours. Examination of the molding of an American society in English North America from 1600 to 1763. Emphasis on interaction of three converging cultures: Western European, West African, and American Indian.

Ms. Appleby, Ms. Bloch, Mr. Nash

145B. Revolutionary America, 1760-1800. Lecture, three hours. Inquiry into origins and consequences of the American Revolution, nature of the revolutionary process, creation of a constitutional national government, and development of a capitalist economy.

Ms. Appleby, Ms. Bloch, Mr. Nash

146A-146B. U.S., 1800-1850. Lecture, three hours:

146A. Jeffersonian America. Jeffersonian Republican ascendancy and Era of Good Feelings, 1800-1828; disintegration of Federalist opposition; testing of American nationality in the second war with Britain; beginnings of transportation and industrial revolutions; restructuring of politics in an increasingly egalitarian age.

Mr. Howe

146B. Jacksonian America and Beyond. "Jacksonian Revolution" and its aftermath, 1829-1850; problem of national power versus state sovereignty; problems of rapid social change through industrialization and urbanization; reform impulse; antislavery movements; territorial expansion as focus for sectional rivalry.

Mr. Howe

147A. U.S., Civil War and Reconstruction. Lecture, three hours. Rise of sectionalism, antislavery crusade; formation of the Confederate States; war years; political and social reconstruction.

Mr. Howe

147B. U.S., 1875-1900. Lecture, three hours. American political, social, and institutional history in a period of great change. Emphasis on the altering concepts of role of government and responses to that alteration.

147C. American South, 1877 to the Present. Lecture, three hours. Analysis of political, economic, social, intellectual, and cultural history of the South from cotton belt to Sunbelt. Topics include origins of segregation, sharecropping, Southern politics, Southern culture, and civil rights movement.

Mr. Schulman

148A-148B. U.S., 20th Century. Lecture, three hours. Political, economic, intellectual, and cultural aspects of American democracy. **148A.** 1900 to 1928; **148B.** 1929 to 1945.

Mr. Coben, Mr. Schulman, Mr. Weiss

148C. U.S. since 1945. Lecture, three hours. History of political, social, and diplomatic developments that have shaped the U.S. since 1945.

Mr. Dallek, Ms. Matsumoto, Mr. Schulman, Mr. Weiss

149A-149B. American Economic History. Lecture, three hours:

149A. 1790 to 1910. Roles of economic forces, institutions, individuals, and groups in promoting or impeding effective change in the American economy, 1790-1910. During this period the technical skeleton of the modern industrial structure was formed. Why and how American economy evolved into a dual economy, characterized by a center of firms large in size and influence and a periphery of smaller firms.

Ms. Yeager

149B. 1910 to the Present. Dynamics of change in the dual economy, focusing in greater detail on interrelationships between macro and micro developments in the economy and on the growing interdependency between the U.S. and world economy, 1910 to the present.

Ms. Yeager

150A-150B. Intellectual History of the U.S. Lecture, three hours. Principal ideas about humanity and God, nature and society, which have been at work in American history. Sources of these ideas, their connections with one another, their relationship to American life, and their expression in great documents of American thought.

Mr. Howe

150C. History of Religion in the U.S. Lecture, three hours. Consideration of the religious dimension of people's experience in the U.S. Examination of a number of religious traditions which have been important in this country, with emphasis on relating developments in religion to other aspects of American culture.

Mr. Howe

151A-151B. Constitutional History of the U.S. Lecture, three hours:

151A. Origins and Development of Constitutionalism in the U.S. Particular emphasis on framing of the Federal Constitution in 1787 and its subsequent interpretation. Judicial review, significance of the Marshall Court, and effects of slavery and the Civil War on the Constitution.

151B. Constitutionalism since the Civil War. Particular emphasis on development of the Supreme Court, due process revolution, the Court and political questions, and the fact of judicial supremacy within self-prescribed limits.

152A-152B. American Diplomatic History. Lecture, three hours. **152A.** Establishment of an independent foreign policy, territorial expansion of the U.S., and emergence of a world power. **152B.** Role of the U.S. in the 20th-Century World.

Mr. Dallek

152BH. American Diplomatic History (Honors). Lecture, three hours; discussion, one hour. Role of the U.S. in the 20th-century world.

Mr. Dallek

M153. The U.S. and the Philippines. (Formerly numbered 153.) (Same as Asian American Studies M196A.) Lecture, three hours. Prerequisite: sophomore standing. Recommended: knowledge of Southeast Asian or U.S. history, or both. Examination of interrelationships of immigration and of colonialism and independence between the U.S. and the Philippines, focused mainly within the time period from 1898 to the present.

154A-154B. U.S. Urban History. Lecture, three hours:

154A. U.S. Cities: Overview. Demographic, geographic, political, economic, and social development of U.S. cities in relation to broad trends in U.S. history as well as to their own more special histories. Emphasis on mastery of facts and chronology, and awareness of major theoretical issues and fundamental concepts in urban history.

Mr. Monkkonen

154B. Topics in U.S. Urban History. Prerequisite: course 154A. Exploration of one aspect of U.S. urban history in depth without having to attend to basic chronology or geography. Topics include crime and police, urban economics, and urban government. Students do primary research papers based on local materials in addition to written examinations.

Mr. Monkkonen

154C-154D. History of American Architecture and Urban Planning, 1600 to the Present. Lecture, three hours. Aspects of American cultural history as explored through architecture, urban planning, and allied arts, with emphasis on development of an architectural consciousness in America, ways in which the built environment has affected its users and observers, and extent to which it has reflected their values and ways of living.

154C. 1600 to 1890; **154D.** 1890 to the Present.

Mr. Hines

155A-155B. American Working Class Movements. Lecture, three hours. Major episodes in social, trade union, and cultural history of the American working class from Colonial times to the present, emphasizing both organized and unorganized labor, history of the Knights of Labor, A.F. of L. and C.I.O., and development of labor politics.

Mr. Laslett

156A-156B. American Social History, 1750-1960. Lecture, three hours. Historical analysis of American society and culture, with emphasis on the family, religious values, Afro-American life, women's work, urbanization and industrialization, immigration and nativism, and movements for social reform. **156A.** 1750 to 1860; **156B.** 1860 to 1960.

Mr. Coben

156C-156D-156E. Social History of American Women. Lecture, three hours. Survey of major demographic, economic, social, and intellectual factors shaping the lives of women in families, at work, and in larger social collectivities. Emphasis on class, regional, racial, and ethnic comparisons. **156C.** Colonial and Early National, 1600-1820; **156D.** Victorian and Industrial, 1800-1920; **156E.** 20th Century, 1900-1975.

Ms. DuBois, Ms. Matsumoto

156F-156G. History of the American Family. Lecture, three hours. Perspective on the contemporary American family through study of its development over the course of four centuries. Topics include Western European origins, sex roles, child-rearing, sexuality, work patterns. Emphasis on class, racial, ethnic, and regional variations. **156F.** 1600 to 1870; **156G.** 1870 to 1990.

Ms. Morantz-Sanchez

156H. Medicine and Society in 19th-Century America. Lecture, three hours. Therapeutics, theories of disease, and medical science scrutinized with the understanding that these are never value-neutral, but are shaped by social structures of which they are products. Why have doctors become so powerful and over whom did they wield power in the 19th century?

Ms. Morantz-Sanchez

157A-157B. North American Indian History. Lecture, three hours. History of Native Americans from contact to the present, with emphasis on historical dimensions of culture change, Indian political processes, and continuity of Native American cultures. Focus on selected Indian peoples in each period. **157A.** Precontact to 1830; **157B.** 1830 to the Present.

Ms. Meyer

M158A. Comparative Slavery Systems. (Same as Afro-American Studies M158A.) Lecture, three hours. Examination of the slavery experience in various New World slave societies, with emphasis on outlining similarities and differences among the legal status, treatment, and slave cultures of North American, Caribbean, and Latin American slave societies.

M158B-M158C. Introduction to Afro-American History. (Same as Afro-American Studies M158B-M158C.) Lecture, three hours. Survey of the Afro-American experience, with emphasis on the three great transitions of Afro-American life: transition from Africa to New World slavery, transition from slavery to freedom, and transition from rural to urban milieus.

Mr. Hill, Ms. Stevenson

158D. Afro-American Urban History. Lecture, three hours. Examination of Afro-American urban life prior to 1945, with emphasis on transformation from slavery to freedom and shift from Southern to Northern areas. Forces which both propelled Afro-Americans to the cities and which also inhibited their adjustment to them.

158E. Afro-American Nationalism in First Half of the 20th Century. Lecture, three hours. Critical examination of the Afro-American search in first half of the 20th century for national/group cohesion through collectively built institutions, associations, organized protest movements, and ideological self-definition.

Mr. Hill

M159A. History of the Chicano Peoples. (Same as Chicana and Chicano Studies M159A.) Lecture, three hours. Survey lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent (Indio-Mestizo-Mulato) north of the Rio through the 17th, 18th, and 19th centuries, with special focus on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical forces affecting the community. Social structure, economy, labor, culture, political organization, conflict, and international relations. Emphasis on social forces, class analysis, social, economic, and labor conflict, ideas, domination, and resistance. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and field research, and submission of a paper.

Mr. Gómez-Quiñones

M159B. History of the Chicano Peoples. (Same as Chicana and Chicano Studies M159B.) Lecture, three hours. Survey lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent in the U.S. through the 20th century, with special focus on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical and policy issues affecting the community. Within a framework of domination and resistance, discussion deals with social structure, economy, labor, culture, political organization, conflict, and ideology. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and/or field research, and submission of a paper.

Mr. Gómez-Quiñones

160. The Immigrant in America. Lecture, three hours. Historical analysis of causes and consequences of immigration to the U.S. in the 19th and 20th centuries. Discussion of immigration restriction, acculturation, and implications of the influx of new peoples both for U.S. domestic and foreign policy. Mexican American, Asian American, and European immigration included.

Mr. Laslett

161. Asians in American History. Lecture, three hours. Study of the politically troubling question of entry into the U.S. of immigrants ineligible for citizenship and their citizen children in American history.

162. American West. Lecture, three hours. Study of the West as frontier and as region, in transit from the Atlantic seaboard to the Pacific, from the 17th century to the present.

Mr. Hundley, Mr. Sanchez

163. History of California. Lecture, three hours. Economic, social, intellectual, and political development of California from earliest times to the present.

Mr. Hundley, Mr. Sanchez

164. History of Los Angeles. Lecture, three hours. Social, economic, cultural, and political development of Los Angeles and its environs from time of its founding to the present. Emphasis on the diverse peoples of the area, changing physical environment, various interpretations of the city, and Los Angeles' place among American urban centers.

Mr. Sanchez

165A. Early Latin America. (Formerly numbered 165A-165B.) Lecture, three hours. Advanced survey of Latin American history from conquest to independence, with emphasis on society, culture, and ethnic aspects.

Mr. Lockhart

165C. Indians of Colonial Mexico. Lecture, three hours. Survey of social and cultural history of the Indians of Mexico, especially central Mexico, from time of the European conquest until Mexican independence, emphasizing an internal view of Indian groups and patterns on basis of records produced by the Indians themselves.

Mr. Lockhart

166. Latin America in the 19th Century. Lecture, three hours. Intensive analysis of economic, social, and political problems of Latin American nations from their independence to around 1910.

Mr. E.B. Burns, Mr. Moya

167A-167D. Latin America in the 20th Century. Lecture, three hours. Experiments in national development analyzed to relate the timing of social changes to economic, political, cultural, and geographic context. Successive country case studies each focus on world pressures and interplay of overlapping themes: struggle between centralized and decentralized government agencies (emphasized in course 167A), role of personalist leaders (emphasized in course 167B), definition of the national polity (emphasized in course 167C), and "rightist" and "leftist" models of development (emphasized in course 167D). Mexico is treated in course 171. Within each course, countries are studied according to the chronological contribution to the theme emphasized. **167A.** Haiti, Uruguay, Costa Rica, Cuba, Chile; **167B.** Bolivia, Dominican Republic, Argentina, Paraguay, Venezuela; **167C.** Panama, Colombia, Ecuador, Honduras, El Salvador; **167D.** Brazil, Guatemala, Peru, Nicaragua.

Mr. Wilkie

168. History of Latin American International Relations. Lecture, three hours. Emphasis on developing interests of Latin American nations in their relationship with one another and with other areas of the world, beginning with 19th-century independence.

169. Latin American Elite. Lecture, three hours. Prerequisite: course 167A, 167B, 167C, or 171. Elite (defined as oral or noninstitutionalized knowledge involving leaders' conceptual and perceptual life history views) in contrast to folklore (followers' traditional or popular views). Elite genres include oral history, literature, and cinema.

Mr. Wilkie

170A. Latin American Cultural History. Lecture, three hours. Intellectual, artistic, and folk expressions of the Latin American spirit and character examined in readings and lectures, with emphasis on unique contribution of Latin Americans to develop self-interpretation. Music, films, and slides supplement discussions.

Mr. E.B. Burns, Mr. Wilkie

170B. Classic Travel Accounts of Latin America since 1735. Lecture, three hours. Recommended for prospective researchers before they select their region of study. Introduction to "enlightened traveler" accounts as they reveal cultural change from wide-ranging spatial and temporal vantage points. Comparison of published works to photographic series to analyze the great variety of geographic regions, peoples, customs, occupations, dress, food, architecture, and transportation in the 20 countries of the area.

Mr. Wilkie

171. Mexican Revolution since 1910. Lecture, three hours. Examination of concept of "permanent crisis" to describe and explain the structure of "permanent revolution" under "one-party democracy." Analysis of unresolved colonial and 19th-century problems and crises that have influenced modern-day Mexico, if in modified form.

Mr. Wilkie

172. History of Argentina. (Formerly numbered 198H.) Lecture, three hours. History of economic, political, social, and cultural developments that have shaped Argentina from colonial time to the present. Emphasis on 19th-century development of an agro-export economy and 20th-century formation of a mass society.

Mr. Moya

173. Modern Brazil. Lecture, three hours. Selected topics in political, economic, social, and cultural development of Brazil, with emphasis on modernization and the struggle for change, 1850 to the present. Discussions, films, slides, and guest speakers supplement and complement lectures.

Mr. E.B. Burns

174. Brazilian Intellectual History. Lecture, three hours. General intellectual development of Brazil, with emphasis on those introspective movements in which Brazilians attempted to interpret themselves, their nation, and their civilization.

Mr. E.B. Burns

175A-175Z. Topics in African History. Lecture, three hours. Prerequisite: one prior course in African history at UCLA or consent of instructor. Examination of specific topics which have a continental application rather than proceeding on a strictly chronological or regional basis:

175A. Prehistoric Africa — Technological and Cultural Traditions. Survey of nondocumentary sources of early African history, with particular reference to technological, economic, and cultural developments from origins of Man until the colonial period.

Mr. Posnansky

175B. Africa and the Slave Trade. Social, economic, political, and cultural impact of the slave trade on African society, with emphasis on Atlantic trade without neglecting those of ancient Mediterranean, Islamic, and Indian Ocean worlds. Abolition and the African diaspora.

Mr. Alpers, Mr. Obichere

175C. Africa in the Age of Imperialism. Topics include penetration of precapitalist social formations by capital, emergence of classes, nature of the colonial and postcolonial state, and struggle for national liberation in a global context.

Mr. Alpers, Mr. Obichere

175E. Africa, 1945 to the Present. History of Africa south of the Sahara from end of World War II to the present. Last phases of colonial rule in Africa, African nationalism, Pan-Africanism, liberation movements, and achievement of independence. Political, social, and economic change in the colonies and in the independent states of Africa. Neocolonialism, experiments in national development, apartheid in South Africa, ideological conflict in contemporary Africa, and Africa in world affairs since 1957.

Mr. Obichere

176A-176B. History of West Africa. Lecture, three hours:

176A. West Africa from Earliest Times to 1800.

Mr. Obichere, Mr. Posnansky

176B. West Africa since 1800.

Mr. Obichere

176C. Social and Economic History of West Africa since 1600. Lecture, three hours. Analysis of main currents of West African social, cultural, and economic history since the fall of the Songhai Empire, with emphasis on the family, religious values, education, urbanization, migrations, arts, slavery, and the slave trade. Roles of economic forces and institutions in promoting or inhibiting economic change in West Africa; ethnic diversity and sociopolitical integration; colonial economic systems and efforts at economic planning and development since the 1950s.

Mr. Obichere

177. Ethiopia and the Horn of Africa. Lecture, three hours. Survey of history of Ethiopia, Somalia, and Sudan.

Mr. Alpers, Mr. Ehret

178A-178B. History of Eastern Africa. Lecture, three hours. **178A.** Cultural diversity of Eastern African societies, growth of more complex political systems, and impact of international trade to the later 19th century. **178B.** Economic, social, and political history of Eastern Africa since imposition of colonial rule, with emphasis on underdevelopment and protest.

Mr. Alpers, Mr. Ehret, Mr. Posnansky

179A-179B. History of Southern Africa. Lecture, three hours. Attention to social and economic as well as political aspects. **179A.** From the Origins to 1870. Origins of the South African peoples and their interactions to 1870. **179B.** Since 1870. Interactions between the inhabitants of southern Africa since 1870.

Mr. Worger

182A-182B. Thought and Society in China. Lecture, three hours:

182A. To 1000. Recommended prerequisite: course 11A or equivalent. Elite and popular expressions of Chinese cultural life examined in readings and lectures. Focus on diversities of thought in the classical legacy and their evolution under the impact of Buddhism to 1000. Emphasis on intersections between intellectual life and social, political, and economic conditions.

Mr. Elman, Mr. von Glahn

182B. Since 1000. Recommended prerequisite: course 11B or equivalent. Elite and popular expressions of Chinese cultural life from 1000 to the 20th century. Emphasis on social, political, and economic conditions within which Chinese orthodox and heterodox values evolved and changed. Evaluation of iconoclasm of Chinese intellectual life in the 20th century in light of earlier currents of thought.

Mr. Elman

183A-183B. Society and Economy in China. Lecture, three hours:

183A. To 1500. Recommended prerequisite: course 11A or equivalent. Survey of main features of Chinese society and economy in the premodern era, with emphasis on interplay of economic forces, ideas, and social and political institutions; structure of the imperial state; medieval economic revolution; gentry society. Mr. Huang, Mr. von Glahn

183B. Since 1500. Recommended prerequisite: course 11B or equivalent. Social-economic change and involution of the late imperial period in comparative perspective; Western impact and Chinese development and underdevelopment; change and continuity in revolutionary China.

Ms. Bernhardt, Mr. Huang, Mr. von Glahn

184. 20th-Century China. Lecture, three hours. Recommended prerequisite: course 11B or equivalent. Political events and intellectual developments seen in context of social-economic trends; human agency, structural change, and historical conjunctures in the 20th century. Ms. Bernhardt, Mr. Huang

185. Japanese Popular Culture. Lecture, three hours. Topics in 18th-, 19th-, and 20th-century Japanese history, including legacy of premodern satire in postmodern comic books, American culture in 1930s' Japanese visual culture, gender in photography, and relationship of monster movies to postwar politics.

Ms. Silverberg

186. Shinto, Buddhism, and Japanese Folk Religion. Lecture, three hours. Social dimension of various "Ways," great and little: Shinto's connection with cultural nationalism, Buddhism's medieval "Reformation" and Zen's relation to the warrior culture, folk religious aspects such as shamanism, ancestor worship, and millenarianism. Mr. Ooms

187A-187B-187C. Japanese History. Lecture, three hours. Political, economic, and cultural development of Japan from prehistory to the present. **187A.** Ancient, Prehistory to 1600; **187B.** Early Modern, 1600 to 1868; **187C.** Modern, 1868 to the Present.

Mr. Notehelfer, Mr. Ooms, Ms. Silverberg

188A. Early History of India. Lecture, three hours. Introduction to civilization and institutions of India. Survey of history and culture of the South Asian subcontinent from earliest times to founding of the Mughal Empire. Mr. Wolpert

188B. Recent History of India and Pakistan. Lecture, three hours. History of the South Asian subcontinent from founding of the Mughal Empire through eras of European expansion, British rule, and the nationalist movement to the present. Mr. Wolpert

190A-190B. History of Southeast Asia. Lecture, three hours. **190A.** Early History of Southeast Asia. Political and cultural history of the peoples of Southeast Asia from earliest times to about 1815. **190B.** Southeast Asia since 1815. History of modern Southeast Asia, with emphasis on expansion of European influence in political and economic spheres, growth of nationalism, and process of decolonization.

Mr. SarDesai

M191A-M191B. Survey of Jewish History. (Same as Jewish Studies M191A-M191B.) Lecture, three hours. Survey of social, political, and religious developments. **M191A.** From Biblical Times to End of the Middle Ages; **M191B.** From End of the Middle Ages to the Present.

M191C-M191D. Focal Themes in Jewish History. (Same as Jewish Studies M191C-M191D.) Lecture, three hours. Treatment in depth of one major theme in Jewish history (such as history of Messianic Movements, structure of the Jewish communities) through the ages.

191E-191F. The Third Reich and the Jews. Lecture, three hours:

191E. History of modern anti-Semitic ideologies and movements. Rise of national socialism in Germany. Development and execution of Nazi anti-Jewish policy to outbreak of World War II. Mr. Friedlander

191F. Second World War. Implementation of Nazi plans for extermination of Jews in Nazi-dominated Europe. Life in Nazi-imposed ghettos. Forms of Jewish resistance. Fate of Jewish populations in the occupied territories. Mr. Friedlander

191G. European Jewry from 1914 to the Present: Social and Political History. Lecture, three hours. Survey of major social, economic, and political factors that shaped the lives of Europe's Jews from outbreak of the First World War to the present. Emphasis on the diverse Jewish communities of interwar Europe, fate of Jews under the Nazis, and character of the postwar Jewish community.

M192A-M192B. Jewish Intellectual History. (Same as Jewish Studies M192A-M192B.) Lecture, three hours. Development of Jewish self-understanding in relation to intellectual climate of the environment as expressed in the halacha, in philosophy, and in cabalism. **M192A.** Medieval Period; **M192B.** Modern Period. Mr. Friedlander

193A. History of Religions: Myth. Lecture, three hours. Nature and function of myth in history of religion and culture. Examples selected from nonliterate as well as from other Asian and European traditions.

193B. Religions of South and Southeast Asia. Lecture, three hours. Prerequisite: course 4 or 193A. Topics vary from year to year and include religion of the Veda; Brahmanism; (later) Hinduism. Consult *Schedule of Classes* for specifics. May be taken independently for credit.

193C. Religions of South and Southeast Asia. Lecture, three hours. Prerequisite: course 4 or 193A. Topics vary from year to year and include Buddhism in India; religions of Java and Bali; nonliterate traditions of India and Southeast Asia. Consult *Schedule of Classes* for specifics. May be taken independently for credit.

193D. Religions of the Ancient Near East. Lecture, three hours. Main polytheistic systems of the ancient Near East, with emphasis on Mesopotamia and Syria and with reference to the religion of ancient Israel: varying concepts of divinity, hierarchies of gods, prayer and cult, magics, wisdom, and moral conduct.

Mr. Buccellati

193E. Special Topics in History of Religions. Lecture, three hours. Topics announced in *Schedule of Classes* and include ancient Germanic cults; Renaissance mysticism; mystics of the low countries; goddesses; religion in a secular age.

194A. History of Early Christians. Lecture, three hours. Christian movement from its origins to ca. 160 C.E., stressing its continuity/discontinuity with Judaism, various responses to Jesus of Nazareth, writings produced during this period, movement's encounters with its religious, social, and political world, and methods of research. Mr. Bartchy

194B. Religious Environment of Early Christians. Lecture, three hours. Rich variety in religious practice and thought in the Mediterranean world of the 1st century C.E. as in context of the developing Christian movement. Topics include the Pharisees, Qumran, Philo, Stoics, Epicureans, traditional Greek and Roman religions, "mysteries," astrology, magic, gnosticism, and emperor-worship. Mr. Bartchy

194C. Jesus of Nazareth in Historical Research. Lecture, three hours. Recommended prerequisite: course 194A. Stimulated by significant post-Enlightenment historical evaluations, students are led into firsthand knowledge (in translation) of various multi-layered sources for reconstruction of the life, teaching, and initial impact of Jesus of Nazareth in his social, economic, political, and religious contexts.

Mr. Bartchy

195A-195B-195C. History of Science. Lecture, three hours. Prerequisite: course 3A or consent of instructor:

195A. Medieval and Renaissance Science. Continuity and discontinuity in scientific traditions from the 12th to the 17th century; interrelationships between theology, scientific thought, and social conditions. Theories of force, motion, and space; some attention to occult sciences.

195B. Perspectives on Early Modern Physical Science. Detailed view of selected topics in development of physical sciences from 1650 to 1800. Typical subjects include chemistry, social and political aspects of scientific change, and science in the Enlightenment.

195C. Perspectives on Modern Physical Science. Selected aspects of 19th- and 20th-century physical science, typically including science and industrialization, thermodynamics, electromagnetism, relativity, quantum mechanics, and the atom bomb.

M195F-M195G. History of Biological Sciences. (Same as Anatomy/Medical History M108A-M108B.) Lecture, three hours. **M195F.** Biological Sciences from Ancient Times to the Early 19th Century; **M195G.** Biological Sciences from the Early 19th Century to the Mid 20th Century. Mr. Frank (F,W)

197. Undergraduate Seminars. Seminar, three hours. Limited to 15 students meeting with a faculty member. Organized on a topics basis with readings, discussions, papers. Signups and descriptions of offerings each term are available in undergraduate counselor's office (6248 Bunche Hall). May be repeated once for credit. When concurrently scheduled with courses 201A-201U or M203A-M203B, undergraduates must obtain consent of instructor to enroll.

199. Special Studies in History. Intensive directed research program. Eight units may be applied toward the major requirements.

199HA-199HB-199HC. Directed Studies for Honors. Limited to history honors majors. In Progress grading. **199HA.** Extensive reading and research in the field of proposed honors thesis. Report on work in progress to be made to sponsoring professor at regular intervals. **199HB.** Seminar meetings on research methods with continued reading and research culminating in draft of honors thesis. **199HC.** Revisions of draft and preparation of polished honors thesis; oral examination on thesis.

199I. Independent Study for Internships. Prerequisite: maintenance of 3.0 grade-point average in the major. Independent study course to be supervised jointly by Field Studies Office and faculty adviser. Further supervision to be provided by business for which student is doing internship. May not be used to satisfy requirement for course 197 or 199. Normally, only four units of internship with History Department are allowed. P/NP grading.

Graduate Courses

Admission to all graduate courses is subject to consent of instructor and to appropriate language qualifications. For multiterm courses, credit and grades are given only on completion of the full seminar sequence, with In Progress grading until the last term unless otherwise noted. Topics courses and seminars may be repeated.

200A-200U. Advanced Historiography. Seminar, three hours. May be repeated for credit. **200A.** Ancient Greece; **200B.** Ancient Rome; **200C.** Medieval; **200D.** Early Modern Europe; **200E.** Modern Europe; **200F.** Russia/Eastern Europe; **200G.** Britain; **200H.** U.S.; **200I.** Latin America; **200J.** Near East; **200K.** India; **200L.** China; **200M.** Japan; **200N.** Africa; **200O.** Science/Technology; **200P.** History of Religions; **200Q.** Theory of History; **200R.** Jewish History; **200S.** Armenia and the Caucasus; **200T.** Southeast Asia; **200U.** Psychohistory.

M200V. Advanced Historiography: Afro-American. (Same as Afro-American Studies M200A.) Seminar, three hours. May be repeated for credit.

M200W. Advanced Historiography: American Indian Peoples. (Same as American Indian Studies M200A.) Seminar, three hours. Designed to familiarize students with major genres of literature relating to American Indian history. Subjects include theories of Indian origins, historical demography, Euro-American attitudes toward Indian peoples, studies of U.S. Indian policy, and tribal histories. Standard theoretical approaches, including cultural ecology and dependency theory. Ms. Meyer

200X. Advanced Historiography: Oral History. Seminar, three hours. Introduction to practice, method, and theory of oral history.

200Y. Advanced Historiography: Application of Economics to History. Discussion, three hours.

Mr. Sokoloff, Ms. Yeager

200Z. Advanced Historiography: Chicano. Discussion, three hours. Graduate survey of leading literature in Chicano history, with emphasis on new methodological and theoretical approaches in the field.

Mr. Sanchez

201A-201U. Topics in History. Seminar, three hours. Topic titles are same as for courses 200A-200U. Graduate courses involving reading, lecturing, and discussion of selected topics. Does not fulfill seminar requirements for Ph.D. degree. May be repeated for credit. When concurrently scheduled with course 197, undergraduate must obtain consent of instructor to enroll:

M201L. China — Seminar: Classical Historiography and Readings in Classical Studies. (Same as Chinese M201.) Seminar, three hours. Prerequisite: two years of classical Chinese or working knowledge of classical Chinese. Readings in late Imperial Civil Service Examination essays.

Mr. Elman

202A-202B. Seminars: Comparative Modern Economic History. Discussion, three hours. Prerequisite: graduate standing. Study of problems of modern economics in the 19th and 20th centuries, including such topics as industrialization, growth, demography, development, and economic change. In Progress grading.

Ms. Yeager

M203A-M203B. Social Theory and Comparative History. (Formerly numbered 203.) (Same as Political Science M291A-M291B and Sociology M296A-M296B.) Colloquium, three and one-half hours every other week. Introduction to historically rooted social theory and theoretically sensitive history, following the program of the Center for Social Theory and Comparative History. Each course may be taken independently for credit.

Mr. Ashcraft, Mr. Brenner

204A-204B. Seminars: Near and Middle Eastern History. Seminar, three hours. Methodology, socio-economic and political change in the Arab world.

Ms. Marsot

205A-205B. Seminars: Medieval Middle Eastern History. Seminar, three hours.

Mr. Morony

206A-206B. Seminars: Social History of the Middle East. Seminar, three hours. Interrelationship of city, tribe, and village in the Middle East; role of such definable social groups as women, religious classes, middle classes, landlords, tribesmen, and peasants; social change.

Ms. Keddie

M207. Seminar: Ancient Mesopotamia. (Same as Ancient Near East M250.) Seminar, three hours. Selected topics on political, social, and intellectual history of ancient Mesopotamia. May be repeated for credit.

Mr. Buccellati

209A-209B. Seminars: Ottoman and Modern Turkish History. Seminar, three hours.

Mr. Shaw

211A-211B. Seminars: Armenian History. Seminar, three hours.

Mr. Hovannisian

C212. Methods in Armenian Oral History. Seminar, three hours. Prerequisite: proficiency in Armenian language. Lectures and laboratory in methods of taking, processing, and utilizing depositions and other oral sources for Armenian history, including project assignment in the field. May be concurrently scheduled with course C112D.

Mr. Hovannisian

215A-215B. Seminars: Ancient History. Seminar, three hours.

Mr. Chambers, Mr. Mellor

216A-216B. Seminars: Byzantine History. Seminar, three hours.

217. Sources and Handbooks of Medieval History. Seminar, three hours. Prerequisite: reading knowledge of German or French. Introduction to types of medieval source materials and the handbooks needed to use them.

Mr. Rouse

218. Medieval Latin Literary History. Seminar, three hours. Recommended prerequisite: reading knowledge of Latin and German or French. Examination of aspects of medieval history through study of paleography, medieval libraries, and transmission of ancient medieval authors.

Mr. Rouse

219A-219B. Paleography I, II. Seminar, three hours. Prerequisite: reading knowledge of Latin and German or French:

219A. History of the manuscript book from antiquity through the Carolingian renaissance, with emphasis on dating and localization as well as on proficiency in reading.

Mr. Rouse (alternate years)

219B. History of the manuscript book from the Carolingian renaissance through the invention of printing, with emphasis on dating and localization as well as on proficiency in reading.

Mr. Rouse (alternate years)

220A-220B. Seminars: Church and Monarchy in the Middle Ages. Seminar, three hours. Textual studies and interpretative problems in constitutional, legal, and intellectual history of the Latin church and of Western European monarchies, with special attention to the German monarchy, from the 11th to 14th century.

Mr. Benson

221A-221B. Seminars: Medieval History. Seminar, three hours.

222A-222B. Seminars: Medieval Intellectual History and History of Science. Seminar, three hours. Selected problems from medieval and early modern philosophy, science, political theory, theology.

225. Colloquium for Entering Graduate Students in Modern European History. Seminar, three hours. Normally limited to and required of all modern European history graduate students. Introduction to topics, methods, and historiography of modern European history.

Mr. Reill, Mr. Wohl

226A-226B. Seminars: Italian Renaissance. Seminar, three hours.

Mr. Martines

227A-227B. Seminars: Reformation. Seminar, three hours.

229A-229B. Seminars: Early Modern European History. Seminar, three hours.

Mr. Martines, Mr. Symcox

230A-230B. Seminars: Modern European History. Seminar, three hours.

Mr. Berenson, Mr. Loewenberg, Ms. Silverman, Mr. Weber

231A-231B. Seminars: Modern European Intellectual and Cultural History. Seminar, three hours.

Mr. Loewenberg, Ms. Silverman, Mr. Weber, Mr. Wohl

232A-232B. Seminars: French History of the 19th and 20th Centuries. Seminar, three hours.

Mr. Berenson, Ms. Silverman, Mr. Weber

233A-233B. Seminars: Russian/Soviet History. Seminar, three hours.

Mr. Hatch

234A-234B. Seminars: Modern History of Spain, Portugal, and Italy. Seminar, three hours.

Mr. Wohl

235A-235B. Economic History of Europe, 1780-1939. Lecture, three hours. Analysis of internationalization of European world economy, emergence of Western core and its relation with European peripheries. Comparative analysis on different regions, stressing main characteristics of postwar European economy.

Mr. Berend

M236A. Proseminar: Political Psychology. (Same as Political Science M261A and Psychology M228A.) Discussion, three hours. Introduction to political psychology: psychobiography, personality and politics, mass attitudes, group conflict, political communication, and elite decision making.

Mr. Loewenberg, Mr. Sears

236B-236C. Seminars: Psychohistory. (Formerly numbered 236A-236B.) Seminar, three hours. Exploration of individual and group psychological processes and their uses in historical research.

Mr. Friedlander, Mr. Loewenberg, Mr. Wohl

239A-239B. Seminars: English History — Middle Ages. Seminar, three hours.

Mr. Waugh

240A-240B. Seminars: English History — Modern History. Seminar, three hours.

Mr. Brewer, Mr. Urdank

244A-244B. Seminars: British Empire History. Seminar, three hours.

245. Colloquium: U.S. History. Seminar, three hours. Normally limited to and required of all entering graduate students in U.S. history. Critical introduction to historical method, with emphasis on new methodological and conceptual approaches, use of source materials, and current state of U.S. historiography.

246A-246B-246C. Introduction to U.S. History. Seminar, three hours. Graduate survey of significant literature dealing with U.S. history from the Colonial period to the present. Each course may be taken independently for credit:

246A. Colonial Period. Mr. Appleby, Mr. Nash

246B. 1790 to 1900. Mr. Howe, Ms. Morantz-Sanchez

246C. 20th Century. Mr. Dallek, Mr. Sanchez, Mr. Weiss

247A-247B. Seminars: Early American History. Seminar, three hours.

Ms. Appleby, Mr. Nash

249A-249B. Seminars: Jacksonian America. Seminar, three hours.

250A-250B. Seminars: U.S. History of the Middle 19th Century. Seminar, three hours.

Mr. Howe

252A-252B. Seminars: Recent U.S. History to 1930. Seminar, three hours.

Mr. Coben, Mr. Hines, Mr. Schulman

253A-253B. Seminars: Recent U.S. History since 1930. Seminar, three hours.

Mr. Hines, Mr. Weiss

254A-254B. Seminars: U.S. Social and/or Intellectual History. Seminar, three hours.

Mr. Howe

255A-255B. Seminars: History of Business and Government in the American Economy. Seminar, three hours.

Ms. Yeager

256A-256B. Seminars: American Diplomatic History. Seminar, three hours.

Mr. Dallek

257A-257B. Seminars: U.S. Urban History. Seminar, three hours.

Mr. Hines, Mr. Monkkonen

258A-258B. Seminars: Working Class History. Seminar, three hours.

Mr. Laslett

259A-259B. Seminars: Social History of Women in the U.S. Seminar, three hours.

260A-260B. Seminars: Native American History. Seminar, three hours.

Ms. Meyer

261A-261B. Seminars: Afro-American History. Seminar, three hours. Social and political history of the Afro-American, including emphasis on development and structure of race relations in America; racial concepts and dilemmas, black and white.

Mr. Hill

262A-262B. Seminars: Chicano History. Seminar, three hours.

Mr. Gómez-Quíñones

263A-263B. Seminars: History of the American West. Seminar, three hours.

Mr. Hundley

M264. History of American Education. (Same as Education M201C.) History of educational thought and of social forces impinging on American education from the 1880s to the present. Analysis of relation between these ideas and forces, and aims and practices of American education today.

Mr. S. Cohen

M265. Latin American Research Resources. (Same as Latin American Studies M200 and Library and Information Science M225.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research results.

Mr. Lauerhass

266A-266B. Seminars: Colonial Latin American History. Seminar, three hours.

Mr. Lockhart

267A-267B. Seminars: Latin American History, 19th and 20th Centuries. Seminar, three hours.

M268A-M268B. Seminars: Recent Latin American History. (Same as Latin American Studies M268A-M268B.) Seminar, three hours. Prerequisite: consent of instructor. Reading knowledge of Spanish and Portuguese normally required. Seminar devoted to selected topics of an interdisciplinary nature. In Progress grading. Mr. Wilkie

275. Introduction to Professional Study of African History. Seminar, three hours. Required of all entering graduate students in African history. Strongly recommended for students with a history concentration in African Area Studies M.A. program. Source identification, research methodologies, historiographical traditions, historical interpretation, and approaches to teaching.

276. African Archaeology: Field Techniques (2 to 8 units). Seminar, three hours. Prerequisites: any introductory course in archaeology and preferably an African history course. Field course on an African excavation to provide basic skills-reconnaissance, surveying, excavation techniques, conservation, and scientific sampling required by an archaeologist in Africa, together with introduction to ethnographic survey and oral data collection. Mr. Posnansky

277. African Archaeology: Data Analysis (2 to 8 units). Seminar, three hours. Prerequisite or corequisite: course 276. Field course to equip students to handle finds from excavations. Analysis, description, illustration, and interpretation of actual archaeological and/or ethnographic collection.

Mr. Posnansky

278A-278B. Seminars: African History. Seminar, three hours.

282A-282B. Seminars: Chinese History. Seminar, three hours. Ms. Bernhardt, Mr. Elman, Mr. Huang, Mr. von Glahn

285A-285B. Seminars: Modern Japanese History. Seminar, three hours.

Mr. Notehelfer, Ms. Silverberg

288A-288B. Seminars: South Asia. Seminar, three hours. Mr. Wolpert

289A-289B. Seminars: Southeast Asia. Seminar, three hours. Mr. SarDesai

291A-291B. Seminars: Jewish History. Seminar, three hours. Studies in intellectual and social history of Jewish people from ancient times to the modern period.

293A-293B. Seminars: History of Religions. Seminar, three hours.

295. Theories of Scientific Change. Seminar, three hours. Historical and philosophical perspectives on science, focusing on rationality of scientific change and logic and psychology of scientific discovery. Readings and seminar-style discussions of such authors as Popper, Kuhn, Toulmin, Lakatos, Holton, Buchdahl, Feyera-bend, and others.

297A-297B. Seminars: History of Science. Seminar, three hours.

M299. Interdisciplinary American Studies (6 units). (Same as English M299.) Discussion, four hours. Readings, discussion, and papers on a common theme, team-taught by faculty from different departments. Topics vary according to participating faculty. May be repeated for credit with consent of instructors. Ms. Banta

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

490. Writing Workshop for Graduate Students (2 units). Prerequisite: consent of instructor. Writing workshop on students' papers-in-progress. Analysis and group discussion of rhetorical and stylistic principles, illustrated in students' own and in professional historians' work, help students improve their own writing. May be repeated once. S/U grading. Ms. Strenski

495. Teaching History. Prerequisite: graduate standing. Required of all new teaching assistants. Lectures, readings, discussions, and practice teaching sessions within the structure of a seminar. Students receive unit credit toward full-time equivalence but not toward the nine-course requirement for M.A. degree. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Studies (1 to 8 units). Prerequisites: graduate standing, consent of instructor. Individual directed reading arranged with professor. M.A. candidates may take this course only once. Number of times Ph.D. candidates may take this course is subject to consent of graduate studies committee. S/U or letter grading.

597. Directed Studies for Graduate Examinations (1 to 8 units). Preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. S/U grading.

599. Ph.D. Research and Writing (1 to 8 units). Prerequisite: advancement to Ph.D. candidacy.

History/Art History (Interdepartmental)

6248 Bunche Hall, (310) 825-3720

Scope and Objectives

The interdisciplinary major in history/art history allows students to study the relationship between art history and the history of society, politics, and culture.

Bachelor of Arts Degree

Lower division history and art history courses may be applied toward the general education requirements; a course taken to satisfy the American History and Institutions requirement may be applied toward the history section of the interdepartmental major.

No course for the major may be taken on a P/NP grading basis.

If you wish to confer with a counselor regarding program planning and major requirements, contact the history/art history counselor at 825-3720.

Preparation for the Major

Required: History 1A-1B-1C; two courses from Art History 50, 51, 54, 57; one course from Art History 55A, 55B, 56A, 56B.

The Major

Required: History 100A or 101; 197 or 199; and courses as indicated in the following groups:

Group A — Two non-Western history courses from History M104A, M104B, M105, 106A, 106B, 106C, 107A, 107B, 108A, 108B, 109A,

109B, 110A, 110B, 111A, 111B, 111C, 112A through C112D, 115A, M122, 123A, 123B, 157A, 157B, 165A, 165C, 166, 167A, 167B, 167C, 168, 169, 170A, 170B, 171, 173, 174, 175A, 175B, 175C, 175E, 176A, 176B, 177, 178A, 178B, 179A, 179B, 182A, 182B, 183A, 183B, 184, 187A, 187B, 187C, 188A, 188B, 190A, 190B, 193D.

Group B — Two U.S. history courses from History 145A, 145B, 146A, 146B, 147A, 147B, 148A, 148B, 148C, 149A, 149B, 150A, 150B, 150C, 151A, 151B, 152A, 152B, M153, 154A through 154D, 155A, 155B, 156A through 156H, 157A, 157B, M158A through 158E, M159A, M159B, 160, 161, 162, 163, 164.

Group C — Two European history courses from History 116A, 116B, 117A, 117B, 121A through 121D, 125A through 125F, 126A through 126E, 127A, 127B, 128A, 128B, 128C, 129A through 129D, 130A, 130B, 130C, 131A through 131D, 132A, 132B, 133A, 133B, 134A, 134B, 135A, 135B, 136A through 136Z, 137A, 137B, 137C, 138A, 138B, 139, 141A, 141B, 141C, 142A, 142B, 143, 144.

Group D — Three Western art history courses from Art History 101A, 101B, M102A through M102H, 106A through 106D, 108A, 108B, 109A through 109D, 110A through 110F, C112A, C112B, C112C, 120A, 120B, 120C, 121A, 121B.

Group E — Three non-Western art history courses from Art History 104A, 104B, C104C, 114A, 114C, 114D, C115A through C115F, C117A, C117B, C117C, 118A, 118C, 118D, C119A, C119B.

Group F — Two art history elective courses selected from the above lists. You may also take Art History M113, 127, 197, 199 to meet this requirement.

Honors Collegium

A311 Murphy Hall, (310) 825-1553

The Honors Collegium is an unusual educational alternative designed primarily for students in their freshman and sophomore years. Entering freshmen with at least a 580 SAT verbal score who have satisfied the Subject A requirement and continuing students with a UCLA grade-point average of 3.0 who have satisfied the Subject A requirement may enroll in specially devised Honors Collegium courses with an interdisciplinary emphasis. The Collegium offers small classes and individual attention. It encourages animated discussion among students, as well as between students and professors. And it seeks to promote scholarly exchange across the major disciplines in the University.

Each Collegium course is staffed by a director who is distinguished in teaching and scholarship, by a variable number of guest lecturers, and by additional specialists in their fields. Many Collegium courses satisfy general education requirements and serve as preparation for numerous majors in the College of Letters and Science. Counselors are available in the Honors Programs Office, A311 Murphy Hall, to advise and help you plan an integrated academic program.

In 1992-93 the Honors Collegium will offer the following one-term courses, most of which carry four units of credit each; the six-unit courses are so indicated.

Lower Division Courses

- 4. The Surrealist Challenge.** Examination of revolutionary cultural movement of surrealism in France and Spain in the 1920s and 1930s, including films of Buñuel and Dalí, paintings of Ernst and Magritte, and writings of Breton, Crevel, and Péret. P/NP or letter grading. Mr. Morris (Sp)
- 5. Geometry of Relativity.** Lecture, three hours; discussion, one hour. No special mathematical knowledge required. Systematic examination of relationship between physics and geometry in Einstein's relativity theories. P/NP or letter grading. Mr. Venkateswaran (W)
- 7A. Urban Poverty and Public Policy in the U.S.** Lecture, four hours; discussion, one hour. Focus on social welfare in the U.S., providing historical overview of poverty and the social programs that have attempted to deal with it and addressing current debate on the subject. P/NP or letter grading. Ms. Ortiz (F)
- 7B. Urban Poverty and Public Policy in the U.S.** Optional fieldwork and tutorial. Corequisite: course 7A. Field studies in social policy. P/NP or letter grading. Mr. Johnson, Mr. Oliver (F)
- 10. Chemical Ecology and Plant Life.** Lecture, three hours; discussion, one hour. Consideration of how plants communicate their presence to other plants, animals, and microbes in a process involving chemical substances and known as chemical ecology. P/NP or letter grading. Mr. Chapman (W)
- 17. Archetypal Heroines.** Seminar, three hours. Examination of archetypal women in classical/traditional literature of several cultures and their revised reincarnations in contemporary ones. P/NP or letter grading. Ms. King (F)
- 21. Rise and Fall of Modernism (6 units).** Seminar, three hours; writing seminar, two hours. Study of early and middle 20th-century's attempt to construct significance in a general climate of disillusionment by way of literature, literary criticism, and other intellectual movements. P/NP or letter grading. Mr. Creese (Sp)
- 24. Muslim Women in the Egyptian Novel.** Seminar, three hours. Image of Muslim women as presented in novels of Egypt's foremost authors, including both study of Muslim women as portrayed in the Qur'an and their interpretations over time, as well as historical study of Muslim women through the ages. P/NP or letter grading. Ms. Marsot (W)
- 25. Human Genome: Prospects for a Super Race?** Lecture, four hours; discussion, one hour. Influence of genetics on human biology, addressing the controversial issue of using genetic engineering to alter genes on human chromosomes. P/NP or letter grading. Mr. Goldberg (Sp)
- 26. Varieties of Self-Representation in Western Culture.** Seminar, three hours. Survey and interrogation of discourses of self-representation in Western culture from early Christian era to the present, including literature, religion, philosophy, and art. P/NP or letter grading. Mr. Aguirre (W)

27. Time in Society and History. Seminar, three hours. Examination of concept of time from sociological, historical, philosophical, anthropological, and physical perspectives, looking specifically at how cultures have perceived time, how societies have organized themselves within it, and how various disciplines have theorized it in terms of concepts like causality. P/NP or letter grading. Mr. Roy (Sp)

29. Critical Vision: History of Art as a Social and Political Commentary. Seminar, three and one-half hours. Study of tradition of visual arts (painting, graphic art, photography, sculpture) as vehicles for social and political commentary. P/NP or letter grading. Mr. Von Blum (F)

31. Current Environmental Problems. Lecture, three hours; discussion, one hour. Overview of current pressing environmental issues, including overpopulation, greenhouse effect, loss of biodiversity, and toxic waste production and disposal. P/NP or letter grading. Mr. Strand (Sp)

32. Creativity and Culture: Making Things New in the Arts, Humanities, Social Sciences, and Sciences (6 units). Seminar, three hours; writing laboratory, two hours. Study of creative acts of artists, writers, social scientists, and scientists in relation to their societies, cultures, disciplines, conventions, and art forms. P/NP or letter grading. Mr. Creese (F)

33. Physics from Aristotle to Einstein. Lecture, three hours; discussion, one hour. Concepts of physics in context of their historical development from classical times to the early 20th century. P/NP or letter grading. Mr. Kener (W)

34. Film and Society: The Hollywood Myth of Ancient Rome. Exploration of the popular influence of ancient Rome on filmmakers of the 20th century, with an eye to separating the objective examination of Roman political and social institutions from the myth they have become. P/NP or letter grading. Mr. Gurval (W)

36. Ethnicity and Social Class in America. Introduction to data analysis, quantitative method, and use of statistics in social sciences, using General Social Survey (GSS) and concentrating particularly on ethnicity and social class. Students conduct statistical research of their own. P/NP or letter grading. Mr. Mason (F)

37. Popular Culture: The Japanese Case. Seminar, three hours. Using both primary and secondary course materials, examination of history of icons and institutions constituting modern Japanese popular culture; introduction of issues informing current debates on popular and mass culture. P/NP or letter grading. Ms. Silverberg (W)

38. Sociolinguistic Approaches to the Japanese Language, People, and Society. Knowledge of Japanese not required. Through sociolinguistic analysis, study of Japanese society by examining linguistic behaviors of Japanese people in everyday life and contrasting these with linguistic behaviors of contemporary Americans. P/NP or letter grading. Ms. Akatsuka (Sp)

39. Nucleosynthesis and Its Clues to Cosmogony and Evolution of the Earth: We Are Stardust. Lecture, two and one-half hours; discussion, one hour. Exploration of evolution of universe, solar system, and Earth through unifying theme of synthesis and destruction of nuclides — isotopic variations which are responsible for virtually all cosmological and geological phenomena. P/NP or letter grading. Mr. Harrison, Mr. Morris (F)

40. Origin and Evolution of Solar System and Earth. Lecture/discussion, three hours. Investigation into the nature of space (astronomical) and time (geological) of the solar system, including comparative planetology; study of formation of Earth, its geological time scale, and development of its atmosphere and hydrosphere. P/NP or letter grading. Mr. Newman (F)

42. European Expansion in Age of Columbus. Seminar, three hours. Examination of European (mainly Iberian) exploration and colonization during the period from ca. 1400 to 1650. P/NP or letter grading. Mr. Symcox (W)

45. Nations and Nationalisms. Seminar, three hours. Examination of nations and nationalisms, particularly as these relate to current historical events in consolidation of Europe and fragmentation of the Soviet Union. P/NP or letter grading. Mr. Brubaker (F)

50B. Gender and Race: Constructions of Greek Political Thought. Lecture, three hours; discussion, one hour. Comprehensive introduction to Greek views of humanity with concentration on gender and race, especially as these issues are manifested in Plato and Aristotle. P/NP or letter grading. Ms. Bergren (F)

53. Comparative Heroic Traditions. Seminar, three hours. Comparison of how modes of heroism are manifested in both Greek and Asian classics, with particular emphasis on correlation of manly courage and violence and the English Renaissance and contemporary feminist critiques of this position. P/NP or letter grading. Ms. Cheung (Sp)

55. Imagining Revolution. Seminar, three hours. Examination of how English writers, in ways both political and imaginative, sought to grasp significance of the French Revolution. P/NP or letter grading. Mr. Sheats (Sp)

61. Social Theory in the 20th Century (6 units). Lecture, three hours; discussion, one hour; writing seminar, two hours. Examination of the strikingly subjective thrust of 20th-century social thought which has emphasized cultural and emotional structures rather than the material, objective world. Focus on psychoanalysis, structuralism, functionalism, existentialism, and phenomenology in readings from Durkheim to Jean-Paul Sartre. P/NP or letter grading. Mr. Szelenyi (W)

62. Community and Self-Interest in History of American Culture (6 units). Lecture, four hours; discussion, one hour. Exploration of historical origins of the frequently contradictory values which inform American thought and culture: hierarchy and equality, institutional constraints and voluntarism, collective sense of mission and belief in the autonomous individual. Ms. Appleby (W)

68. History of Social Thought. Lecture, three hours; discussion, one hour. Study of significant forms of social theory and social change from the English Revolution to beginning of the 20th century, including readings from Hobbes, Rousseau, Smith, Tocqueville, Marx, and Freud. P/NP or letter grading. Mr. Prager (W)

69. American Writing, American Photography. Seminar, three hours. Exploration of interrelationship of American writing and American photography, including social documentary, American naturalism, war, and contemporary social conflict and change. P/NP or letter grading. Mr. Goodwin (Sp)

73. Elementary Particles in the Universe. Lecture, two hours; discussion, 90 minutes. No special mathematical knowledge required. Examination of elementary particle physics, including status of its current study in laboratories around the world and its role in assessing the early evolution of the universe. P/NP or letter grading. Mr. Cline (F)

83. Politics and Rhetoric of Literature (6 units). Seminar, four hours; writing laboratory, two hours. Examination of relationship among politics, rhetoric, and literature in study of literature from classical times to the present, broadening into general discussions of development of political discourse in Western thought, particularly conflict between self and state, between ideology and the practical business of living. P/NP or letter grading. Ms. Wilson (W)

89. Freud, Fairy Tales, and Feminism. Lecture/discussion. Demonstration of both the power of Freud's ideas and vision and vitality of criticisms of Freud that emanate from self-psychology and feminist thinking in contemporary social science. P/NP or letter grading. Ms. Myers, Mr. Rabow (W)

94. American Presidency: Psychocultural Perspectives. Seminar, three hours. Focus on six American presidents, all of whom have been influenced by a combination of liberal and conservative ideas. Exploration of their political actions through study of their personalities and the national and political culture in which they functioned. P/NP or letter grading. Mr. Dallek (F)

95. Art, Politics, and Social Change in 19th-Century England and France. Seminar, three hours. Exploration of social factors in cultural expression and way that national traditions and political and social conditions shape each set of literary and artistic innovations through analysis of artists and intellectuals in 19th-century England and France. P/NP or letter grading. Ms. Silverman (Sp)

96. Cultural Dimensions of Apartheid South Africa. Examination of the cultural ferment that is the product of apartheid South Africa, a ferment expressed in the literary output of both black and white South African authors, as well as in popular cultural forms such as people's theater and township jazz. P/NP or letter grading. Mr. Alpers (Sp)

97. Issues in American Foreign Policy: Methodology of Assessment. Lecture/debate, three hours; discussion, one hour. Exploration in debate format of wide range of views on contemporary foreign policy issues to train students how to discern the ideological origins of policy arguments. Examination of material in major foreign policy journals. P/NP or letter grading. Mr. Spiegel (Sp)

Upper Division Courses

102. Culture, Media, and Los Angeles (6 units). Lecture, four hours; screenings, two hours. Prerequisite: upper division standing. Role of media in society and its influence on contemporary cultural environment, specifically in Los Angeles; issues of representation as they pertain to race, ethnicity, gender, and sexuality. P/NP or letter grading. Ms. Gabriel (Sp)

103. Interracial Work, Friendship, and Love Relationships of African American Men and Women. Seminar, three hours. Examination of factors that influence development, maintenance, and dissolution of interracial relationships (specifically African Americans in interracial relationships) in the workplace, friendships, and intimate love relationships. P/NP or letter grading. Ms. Mays (Sp)

199. Directed Honors Studies. Prerequisites: minimum of four units completed in Honors Collegium with a grade of B or better, overall UCLA GPA of 3.0 or better, consent of instructor and dean of Division of Honors and Undergraduate Programs. Special research/writing tutorial with a director of one of the Honors Collegium courses in order to pursue in greater depth a significant topic from one of the Collegium courses. May not be repeated for credit.

Assistant Professor

C.P. Haun Saussy, Ph.D. (*Chinese, Comparative Literature*)

Lower Division Courses

The following courses are made up of selected masterpieces of world literature. Humanities 1A, 1B, 1C, 1D, 2A, 2B, 2C satisfy the humanities general education requirement in the College of Letters and Science.

1A. World Literature: Antiquity to Early Middle Ages. Lecture, three hours; discussion, one hour. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2A. Study of major texts in world literature, with emphasis on Western civilization. Texts include major works and authors such as *Iliad* or *Odyssey*, Greek tragedies, portions of the Bible, Virgil, Petronius, St. Augustine, and others such as *Gilgamesh* or *Tristan and Iseult*.

1B. World Literature: Late Middle Ages to the 17th Century. Lecture, three hours; discussion, one hour. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2B. Study of major texts in world literature, with emphasis on Western civilization. Texts include works and authors such as Chaucer's *Canterbury Tales*, Dante's *Divine Comedy*, Boccaccio's *Decameron*, Cervantes' *Don Quixote*, Shakespeare, Calderón, Molière, and Racine.

1C. World Literature: Age of Enlightenment to the 20th Century. Lecture, three hours; discussion, one hour. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2C. Study of major texts in world literature, with emphasis on Western civilization. Authors include Swift, Voltaire, Diderot, Rousseau, Goethe, Flaubert, Ibsen, Strindberg, Dostoevsky, Kafka, Joyce, Woolf, and Stevens.

1D. Great Books from the World at Large. Lecture, three hours; discussion, one hour. Prerequisite: satisfaction of Subject A requirement. Study of major literary texts usually overlooked in courses that focus only on the canon of Western literature. Texts from at least three of the following areas read in any given term: African, Caribbean, East Asian, Latin American, and Middle Eastern literature. P/NP or letter grading.

2A. Survey of Literature: Antiquity to Early Middle Ages. Lecture, two hours; discussion, two hours. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1A. Fulfills College of Letters and Science English Composition requirement and School of the Arts and School of Theater, Film, and Television Critical Reading and Writing requirement. Study of selected texts from antiquity to the Middle Ages, with emphasis on literary analysis and expository writing. Texts include works and authors such as *Iliad*, *Gilgamesh*, Greek tragedies, *Aeneid*, Petronius, St. Augustine, or *Tristan and Iseult*.

2B. Survey of Literature: Late Middle Ages to the 17th Century. Lecture, two hours; discussion, two hours. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1B. Fulfills College of Letters and Science English Composition requirement and School of the Arts and School of Theater, Film, and Television Critical Reading and Writing requirement. Study of selected texts from the Middle Ages to the 17th century, with emphasis on literary analysis and expository writing. Texts may include works and authors such as Chaucer, Dante's *Divine Comedy*, Cervantes' *Don Quixote*, Shakespeare, Calderón, Molière, and Racine.

2C. Survey of Literature: Age of Enlightenment to the 20th Century. Lecture, two hours; discussion, two hours. Prerequisite: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1C. Fulfills College of Letters and Science English Composition requirement and School of the Arts and School of Theater, Film, and Television Critical Reading and Writing requirement. Study of selected texts from the Age of Enlightenment to the 20th century, with emphasis on literary analysis and expository writing. Texts may include works by authors such as Swift, Voltaire, Diderot, Rousseau, Goethe, Flaubert, Ibsen, Strindberg, Dostoevsky, Kafka, and James Joyce or Wallace Stevens.

Upper Division Courses

104. The 20th-Century Continental Novel: Mann and Proust. Prerequisite: one course from Humanities 1A, 1B, 1C, 2A, 2B, 2C, or English 3, or consent of instructor. Intensive study of *The Magic Mountain* and *The Remembrance of Things Past* as works of art and as expressions of the sense of social and cultural dissolution felt in early 20th-century Europe.

C105. Comic Spirit. Prerequisites: upper division standing, literature major. Literary masterpieces, both dramatic and nondramatic, selected to demonstrate varieties of comic expression. May be concurrently scheduled with Comparative Literature C205. Undergraduates read all works in translation. Mr. Band

M106. Hebrew Literature in English — Literary Traditions of Ancient Israel: Bible and Apocrypha. (Same as Jewish Studies M150A.) Lecture, three hours. Study of literary culture of ancient Israel through examination of principal compositional strategies of the Hebrew Bible and the Apocrypha (read in translation). Mr. Band

C107. Classical Tradition: Epic. Seminar, three hours. Prerequisites: upper division standing, literature major, consent of instructor. Analysis of *Iliad*, *Odyssey*, *Aeneid*, *Gerusalemme Liberata*, and *Paradise Lost* both in relation to their contemporary societies and to literary traditions. Emphasis on how poets build on work of their predecessors. May be concurrently scheduled with Comparative Literature C207. Ms. King

C109. Crisis of Consciousness in Modern Literature. Prerequisites: upper division standing, literature major. Study of modern European and American works which are concerned both in subject matter and artistic methods with the growing self-consciousness of human beings and their society, focusing on works of Kafka, Rilke, Woolf, Sartre, and Stevens. May be concurrently scheduled with Comparative Literature C209. Undergraduates read all works in translation. Ms. Komar

110. Man and His Fictions. Prerequisite: one course from Humanities 1A, 1B, 1C, 2A, 2B, 2C, or English 3, or consent of instructor. Art of tale-telling and the nature of narrative. Examination of the wisdom or knowledge the tales possess, how exchange of tales defines form and meaning for the audience. Ms. Komar

C111. Classical Tradition: Tragedy. Seminar, three hours. Prerequisite: upper division standing or consent of instructor. Analysis of selected Greek dramas and their re-creations in Rome, in the Renaissance, and in the modern period. May be concurrently scheduled with Comparative Literature C211. Ms. King

C112. Satire. (Formerly numbered 102.) Lecture, three hours. Prerequisite: upper division standing or consent of instructor. Examination of satire both in texts generally recognized as models of the genre as well as in others, including examples of satirical discourse. Special attention to two important literary problems: role played by authors and narrators in relation to treatment of characters before possible audiences and importance of contextual values in interpretation of satire. Concurrently scheduled with Comparative Literature C212. Undergraduates read all texts in translation. P/NP or letter grading.

Humanities

334D Royce Hall, (310) 825-7650

Professors

Arnold J. Band, Ph.D. (*Hebrew, Comparative Literature; Distinguished Teaching Award*)

Kathleen L. Komar, Ph.D. (*German, Comparative Literature; Distinguished Teaching Award*)

Ross P. Shideler, Ph.D. (*Scandinavian, Comparative Literature; Distinguished Teaching Award*), Chair

Samuel Weber, Ph.D. (*English, Comparative Literature*)

Pier-Maria Pasinetti, Ph.D., Emeritus (*Italian, Comparative Literature*)

Associate Professors

Katherine C. King, Ph.D. (*Classics, Comparative Literature*)

Lucia Re, Ph.D. (*Italian, Comparative Literature*)

115. Four Modern Dramatists. Study of several works by four major modern dramatists, focusing on understanding specific elements in each work and authors' possible interrelations. Pirandello, Beckett, and Pinter are read; fourth author is selected from Ionesco, Giraudoux, Cocteau. Mr. Braunmuller

116. Man and Society in the Renaissance. Lecture, three hours; discussion, one hour. Prerequisite: one course from Humanities 1A, 1B, 1C, 2A, 2B, 2C, or English 3, or consent of instructor. Explorations of a change in Western man's relationship to his world, himself, and his art; reading of such works as *Don Quixote*, Montaigne's *Essays*, *Gargantua and Pantagruel*, *The Praise of Folly*, *Utopia*. Mr. Allen

C117. The Mystery Novel. Prerequisites: upper division standing and literature major, or consent of instructor. Study of mystery and detective fiction in England, France, and the U.S. Development of origin, form, and historical significance of mystery fiction through close readings of selected works. May be concurrently scheduled with Comparative Literature C297. Undergraduates read all works in translation. Mr. Hutter

118. Continental African Authors. Lecture, three hours. Prerequisite: one course from Humanities 1A, 1B, 1C, 2A, 2B, 2C, or English 3, or consent of instructor. Introduction to new set of African authors and attempt to discern similarities or differences they may have with major authors such as Achebe, Ngugi, Armah, Soyinka, etc. P/NP or letter grading.

M125. Interwar Central European Prose. (Same as German M119G and Slavic M125.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative authors of the 1920s and 1930s in translation. Special attention to relation between literature and historical and ethnic concerns.

M126. Postwar Central European Prose. (Same as German M119H and Slavic M126.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative contemporary authors in translation. Special attention to relation between art and ideology.

C129. Archetypal Heroes in Literature. Lecture, three hours. Prerequisite: upper division standing. Survey and analysis of function and appearance of such archetypal heroes as Achilles, Ulysses, Prometheus, Oedipus, and Orpheus in literature from antiquity to the modern period. Concurrently scheduled with Comparative Literature C229. Undergraduates read all works in translation. Ms. King

C139. Early Medieval Literature. Prerequisites: upper division standing, literature major. Survey of Latin and Germanic literatures from fall of Rome to beginning of the 12th century. May be concurrently scheduled with Comparative Literature C239. Undergraduates read all works in translation. Mr. Calder

C140. Medieval Epics. Prerequisites: upper division standing, literature major. Consideration of five medieval epics (*Beowulf*, *El Cid*, *La Chanson de Roland*, *Nibelungenlied*, and *Njalssaga*), with two objectives: first, critical understanding of each work, and second, understanding of the nature of epic literature. Assignments consist of extended seminar paper and short oral reports. May be concurrently scheduled with Comparative Literature C240. Undergraduates read all works in translation.

C141. Literary Mediation of History in the Renaissance. Seminar, three hours. Prerequisites: upper division standing, literature major. Analysis of the presence and treatment of history in rhetoric of Renaissance authors ranging from Italian humanists to Machiavelli and Shakespeare. Other authors include Poliziano and Lorenzo de' Medici. May be concurrently scheduled with Comparative Literature C241. Undergraduates read all works in translation. Ms. Re

C145. Renaissance Drama. Prerequisites: upper division standing and literature major, or consent of instructor. Broad introduction to subject matter and types of plays in the Renaissance, with consideration of historical and literary influences on the plays. Readings include works of such dramatists as Tasso, Machiavelli, Lope de Vega, Racine, Jonson, Shakespeare. May be concurrently scheduled with Comparative Literature C245. Undergraduates read all works in translation. Mr. Braunmuller

C160. Literature and the Visual Arts, 1700 to the Present. Lecture, three hours. Prerequisite: upper division standing or consent of instructor. Knowledge of art history valuable but not required. Assuming that literature and the visual arts are in some degree expressions of cultural and philosophical patterns of eras, course studies relationships between primarily English writers from 1700 to the present and movements in painting, architecture, and sculpture. Interdisciplinary investigation of similarities and differences between the plastic and verbal arts in comparative study. May be concurrently scheduled with Comparative Literature C260. Undergraduates read all works in translation. Mr. Roston

M161. Film and Literature of the Spanish-Speaking World. (Same as Spanish M161.) Lecture, three hours. Exploration of perceptions of reality offered by different authors from Spain, Latin America, and the Chicano community. Mr. Monleón

C168. Romantic Autobiography. Discussion, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Evolution of the autobiography from spiritual (Augustine) and secular (Cellini) sources to transition in the 18th century which blended features of the epic poem and quest-romance. Wordsworth's *Prelude* came to represent the best example of this mixture. Major examples of Romantic autobiography to be studied include Rousseau's *Confessions*, Wordsworth's *Prelude*, and Goethe's *Wilhelm Meister's Apprenticeship*. Later novels that develop and extend the genre include Joyce's *Portrait of the Artist as a Young Man* and Proust's *Swann's Way*. May be concurrently scheduled with Comparative Literature C268. Undergraduates read all works in translation. Ms. Packer

C170. The Dream in English and German Romantic Literature. Lecture, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Study of use of the dream as a standard narrative technique in English and German Romantic literature. May be concurrently scheduled with Comparative Literature C270. Undergraduates read all works in translation. Mr. Burwick

C171. Dramatic Theory and Criticism in German and English Romanticism. Seminar, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Generic conception of drama in critical essays of the Schlegels, Tieck, Jean Paul, Coleridge, De Quincey, and Hazlitt, with emphasis on role of the actor and the idea of dramatic action as discussed by the critics. May be concurrently scheduled with Comparative Literature C271. Undergraduates read all works in translation. Mr. Burwick

C172. The Grotesque in Romantic Literature and Art. Prerequisites: upper division standing and literature major, or consent of instructor. Study of the grotesque in visual and verbal arts of the Romantic period; aesthetics of tragic/comic interaction, demonic vision, and satirical sketches of man's abnormality and perversity. May be concurrently scheduled with Comparative Literature C272. Undergraduates read all works in translation. Mr. Burwick

C173. Theory and Texts of the Fantastic. Seminar, three hours. Prerequisites: upper division standing, literature major. Attempt to define the fantastic as a theoretical genre separate from the wider genre of fantasy. Critical texts by Todorov and Brooke-Rose. Primary texts by Hoffmann, Nerval, James, Poe, Borges, Casares, Cortazar, Landolfi, and Calvino. May be concurrently scheduled with Comparative Literature C273. Undergraduates read all works in translation. Ms. Re

C175. The 19th-Century Novel. Seminar, three hours. Prerequisites: upper division standing, literature major. Comparative study of the 19th-century novel in England and on the continent. Novels selected so as to allow seminar to concentrate on a particular tradition or critical problem. May be concurrently scheduled with Comparative Literature C275. Undergraduates read all works in translation. Mr. Lehan, Ms. Re

C176. Fiction and History. Seminar, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Analysis of use of historical events, situations, and characters in literary works of the Renaissance and/or modern period. Texts and individual assignments range from Renaissance historical narratives (Italian humanists, Machiavelli) to 19th- and 20th-century novels by authors such as Stendhal, Verga, Tomasi di Lampedusa, Carpentier, and Kundera. Use of fictional methods by historians. Emphasis on how aesthetic, ideological, and political factors influence authors' choice and use of historical material. May be concurrently scheduled with Comparative Literature C276. Ms. Re, Mr. Saussy

C178. Crisis of Authority. Seminar, three hours. Prerequisite: upper division standing or consent of instructor. Darwin's *Origin of Species* undermines the notion of a traditional fatherly God and reflects a major transition between the 19th and 20th centuries. Threat to, or collapse of, a divinely author(ized) and male-dominated society appears in writers such as G. Eliot, Zola, Ibsen, Strindberg, Conrad, Hardy, Woolf, and Camus. May be concurrently scheduled with Comparative Literature C278. Mr. Shideler

C180. Symbolist Tradition in Poetry. Prerequisites: upper division standing and literature major, or consent of instructor. Study of symbolist tradition in 19th- and 20th-century English, French, and German poetry. May be concurrently scheduled with Comparative Literature C280. Undergraduates read all works in translation. Mr. Shideler

C181. Poetry and Poetics of the Post-Symbolist Period. Seminar, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Study of some dominant poetic trends and figures in American and European poetry in first half of the 20th century, including surrealists such as Apollinaire and Breton, imagists, and major individual poets such as Pound, Eliot, Valery, Rilke, George, and Stevens. May be concurrently scheduled with Comparative Literature C281. Undergraduates read all works in translation. Ms. Komar, Mr. Shideler

182. Semiotics of Story and Film: Introduction to Narrative Semiotics. Discussion, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Investigation of theoretical aspects of semiotics and their application to specific narratives in prose and film. Mr. Haidu

183. Walter Benjamin's Literary Criticism. Prerequisite: upper division standing. Some knowledge of German desirable but not required, as all texts are available in English translation. Walter Benjamin has emerged in recent years as one of the most influential critics of the 20th century. Course approaches his work primarily through a reading of his specifically literary criticism which occupies a central place in his work. Mr. Weber

C184. Alternate Tradition: In Search of a Female Voice in Contemporary Literature. Seminar, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Investigation of narrative texts by contemporary French, German, English, American, Spanish-American, African, and Asian women writers from a cross-cultural perspective. Common themes, problems, and techniques. May be concurrently scheduled with Comparative Literature C284. Undergraduates read all works in translation. Ms. King, Ms. Komar

C185. The Modern Continental Novel. Lecture, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Study of the modern novel's development from naturalism toward a mythic or symbolic level. Use of authors such as Gide, Proust, Mann, Joyce, Nabokov, and Grass to focus on development of themes such as primitivism vs. authority, change vs. stability, and the self-conscious narrative. Concurrently scheduled with Comparative Literature C285. Undergraduates read all works in translation. Mr. Lehan

C186. The Postmodern Novel. Lecture, three hours. Prerequisites: upper division standing and literature major, or consent of instructor. Study of the postmodern novel as it developed out of modernism. Postmodernism defined in three different ways — philosophically, scientifically, and economically. Emphasis on relationship of recent novels to theories of structuralism and poststructuralism. Readings include authors such as Borges, Beckett, Nabokov, Pynchon, Fuentes, Grass, Böll, and Calvino. Concurrently scheduled with Comparative Literature C286. Undergraduates read all works in translation. P/NP or letter grading. Mr. Lehan

M187. The Holocaust in Literature. (Same as Jewish Studies M187.) Prerequisite: History 191E, 191F, or 191G or equivalent. Investigation of how the Holocaust informs a variety of literary and cinema works and raises a wide range of aesthetic and moral questions. Mr. Band

C188. Heidegger, Language, and Literature. Seminar, three hours. Knowledge of German not required. Close reading of essays contained in the collection *Poetry, Language, and Thought*, including "The Origin of the Work of Art," "The Thing," and "Language." Concurrently scheduled with Comparative Literature C288. Mr. Weber

C189. Derrida as a Reader of Heidegger. Seminar, three hours. Retracing of certain of Derrida's attempts to read Heidegger, beginning with the essay, "Restitutions," in *Truth and Painting*. Other writings include *Of Spirit: Heidegger and the Question and Geschlecht*. Concurrently scheduled with Comparative Literature C289. P/NP or letter grading. Mr. Weber

C190. Postmodernism and the Third World. Exploration of intersection between concepts of postmodernism and Third World culture and politics, including topics such as post-Marxism and revolution; historical thought; gender, ethnicity, imperialism, and their relationship to cultural politics; and recent Latin American literary production. Concurrently scheduled with Comparative Literature C290.

Marija Gimbutas, Ph.D., *Emerita (Slavic Languages and Literatures, Archaeology)*
Terence H. Wilbur, Ph.D., *Emeritus (Germanic Languages)*

Associate Professor

Joseph F. Nagy, Ph.D. (*Celtic Languages and Literatures*)

Assistant Professor

Christopher M. Stevens, Ph.D. (*Germanic Languages*)

Scope and Objectives

The prime aim of this graduate program is the integral study of Indo-European culture, based on comparative linguistics, archaeology, social structure, and religion. The Ph.D. in Indo-European Studies is offered with three alternative major emphases: Indo-European linguistics, Indo-Iranian or other specialized language area studies, and European and related archaeology.

Ph.D. Degree

Admission

Students admitted to graduate standing must have a B.A. degree with a major in an Indo-European language field (e.g., German, Slavic, Celtic, Romance languages, Latin, Greek), linguistics (with concentration in historical and comparative linguistics), anthropology, or archaeology. Letters of recommendation (at least two, preferably three or four) are required; Graduate Record Examination (GRE) scores are not required. Potential applicants may request a brochure by writing to the Indo-European Studies Program, c/o Germanic Languages, 302 Royce Hall, UCLA, Los Angeles, CA 90024-1539.

Admission to the program itself constitutes admission to the doctoral program; a master's degree is not offered. Should deficiencies exist in prerequisites to specific work at the graduate level, you may be granted provisional admission and directed to remove those deficiencies in the initial period of enrollment.

Major Fields or Subdisciplines

The Ph.D. in Indo-European Studies is offered with three alternative major emphases: (1) Indo-European linguistics; (2) Indo-Iranian or other specialized language area studies; (3) European and related archaeology.

Foreign Language Requirement

French and German are required, one during the first year. A third language is added only when relevant to your field of specialization. Proficiency in a language may be demonstrated by (1) passing the Graduate School Foreign Language Test (GSFLT) with a score of 600 or better, (2) completing a level five course with a grade of B or better, or (3) passing a departmental reading examination.

Course Requirements

The course requirements vary among the three major fields of specialization. General requirements for all students regardless of specialization include knowledge of Vedic Sanskrit and Homeric Greek, basic competence in Indo-European linguistics (including Indo-European Studies M150 and 210), mythology (e.g., Classics 168), and archaeology (including Indo-European Studies 131, 132). Additional requirements by field are as follows:

(1) *Linguistics* — An advanced seminar in comparative grammar, a minimum of four ancient Indo-European languages from different subbranches, and additional units in courses offered by the Linguistics Department (e.g., phonetics, structural linguistics) and related departments. These additional units should be selected in consultation with your adviser.

(2) *Indo-Iranian or Other Specialized Language Area* — An advanced seminar in comparative grammar, a minimum of two ancient Indo-European languages from different subbranches, and additional units in the area of specialization, to be selected in consultation with your adviser.

(3) *European and Related Archaeology* — A minimum of one ancient Indo-European language, an advanced seminar in European archaeology, a course in analytical methods in archaeology, and additional units in archaeology, anthropology, and related fields, to be selected in consultation with your adviser.

Teaching Experience

Teaching experience is highly desired, but not available within the program and therefore is not required. The program works closely with its constituent departments in an attempt to provide some teaching experience.

Qualifying Examinations

When you have completed the required coursework, a series of written examinations covering the major and minor fields are administered. These consist of translation and analysis of set texts from the ancient Indo-European languages and diagnostic examinations in the other fields. Following successful completion of the written examinations, the University Oral Qualifying Examination, based on the written examinations and the dissertation prospectus, is administered by the doctoral committee. It is intended to probe your grasp of the entire field. Should you fail either the written or oral examinations, the interdepartmental degree committee may allow re-examination. After successful completion of the written and oral examinations, you are advanced to doctoral candidacy and begin work on the dissertation.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Indo-European Studies

(Interdepartmental)

302 Royce Hall, (310) 825-2174

Professors

Raimo A. Anttila, Ph.D. (*Linguistics*)

Henrik Birnbaum, Ph.D. (*Slavic Languages and Literatures*)

Vyacheslav Vs. Ivanov, Ph.D. (*Slavic Languages and Literatures*)

Bengt T.M. Löfstedt, Ph.D. (*Classics*)

Jaán Puhvel, Ph.D. (*Classics, Indo-European Studies*)

Hartmut E.F. Scharfe, Ph.D. (*East Asian Languages and Cultures*)

Hanns-Peter Schmidt, Ph.D. (*Near Eastern Languages and Cultures*)

Final Oral Examination

A final oral defense of the dissertation is optional with the doctoral committee.

Upper Division Courses

131. European Archaeology: Proto-Civilizations of Europe. Survey of European cultures from beginning of the food-producing economy in the 7th Millennium B.C. to beginning of the Bronze Age in the 3rd Millennium B.C.

132. European Archaeology: Bronze Age. Prerequisite: course 131 or consent of instructor. Survey of European cultures from around 3000 B.C. to the period of destruction of the Mycenaean culture about 1200 B.C. Aegean area and rest of Europe.

M150. Introduction to Indo-European Linguistics. (Same as Linguistics M150.) Prerequisites: one year of college-level study (course 3 or better, eight units minimum) of either Greek or Latin and either German or Russian. Survey of Indo-European languages from ancient to modern times; their relationships and chief characteristics. Mr. Anttila (Sp)

199. Special Studies (2 to 8 units).

Graduate Courses

210. Indo-European Linguistics: Advanced Course. Prerequisite: course M150 or equivalent. Comparative study of phonology, morphology, syntax, and lexicon. Problems in analysis and reconstruction. Mr. Anttila, Mr. Ivanov (F)

250A-250B. European Archaeology. Prerequisite: consent of instructor. Studies in ancient European archaeological materials and their relationship to the Near East, Western Siberia, and Central Asia. May be repeated for credit. In Progress grading.

280A-280B. Seminars: Indo-European Linguistics. Prerequisite: course 210. Selected topics in Indo-European comparative grammar for advanced graduate students. In Progress grading.

596. Directed Individual Studies (2 to 8 units).

597. Preparation for Ph.D. Qualifying Examinations (2 to 8 units).

599. Research for Ph.D. Dissertation (2 to 8 units).

Related Courses in Other Departments

201. Introduction to Old Church Slavic

202. Introduction to Comparative Slavic Linguistics

241A-241B. Advanced Old Church Slavic

242. Comparative Slavic Linguistics

251. Introduction to Baltic Linguistics

International Relations

4256 Bunche Hall, (310) 825-3862

Scope and Objectives

The undergraduate specialization in international relations can only be taken jointly with a major in political science, and all requirements for the political science major must be met by or in addition to meeting the requirements of this program. Students completing the program receive a degree with a major in political science and specialization in international relations. The program is designed to serve the needs of (1) students desiring a general education focused on international affairs and (2) students preparing for graduate work in international affairs, whether in a social science or area study.

The program is also beneficial for (1) students planning careers (in business, law, journalism, or library service) with an international emphasis and (2) those preparing to teach social sciences in the secondary schools. These students should structure their programs primarily to meet the preparation requirements of the professional school or instructional credential of their choice.

Courses in management and administration, and in oral and written communications, ordinarily increase the career options of students in this program.

Special Undergraduate Program

Preparation for the Specialization

Required: Political Science 20, 50, and two courses from 10, 40, 70, 80; Anthropology 9; Economics 1 and 2, 5, or 100; Geography 3 or 5; History 1A-1B-1C or any three courses from 5A, 5B, 8A, 8B, 8C, 8D, 9A, 9C, 9D, 10A, 10B, 11A, 11B; Sociology 1.

Upper Division

The political science major should be completed as follows: any four upper division political science courses in each of Fields II and IV and two additional courses both in Field I, Field III, Subfield IIIa, or Subfield IIIb.

Other required social sciences courses include one course from Anthropology 161, M162P, 165, 171, 173Q, 174P, 174Q, 175P, 175Q, 175R, 175T, 175U, 177, Sociology 182, 183, 186, 187, 188, 189, 190; two courses from Economics 110, 111, 112, 180, 181A, 181B, 182, 190, 191, 192; one course from Geography 133, 140, 181, 182A, 182B, 183, 184, 185, 186, 187, 188, 189, 190; two courses from History 116A, 116B, 117A, 127A, 127B, 142A, 142B, 148C, 152A, 152B, 168.

Completion of the sixth quarter course (or equivalent as prescribed by the language department), with a grade of C or better, of any modern foreign language is also required. French 6, German 6, Spanish 25, and Russian 6 are most frequently offered in fulfillment of this requirement, but also refer to the offerings listed under Portuguese, Italian, Germanic Languages, Near Eastern Languages and Cultures, African Languages, and East Asian Languages and Cultures. Arabic, Chinese, French, German, Japanese, Russian, and Spanish are the languages of widest career utility in international affairs.

All courses must be taken for a letter grade.

Area Focus

Students are advised but not required to concentrate their political science, geography, history, and language courses so as to achieve broad familiarity with one area, such as Latin America, Africa, Europe, East Asia, Southeast Asia, South Asia, or the Middle East.

For further information, contact the political science undergraduate counselor in the program office.

 Thomas Penchoen, Ph.D. (*Near Eastern Languages and Cultures*)

Scope and Objectives

The undergraduate major in this discipline is called Near Eastern studies. For details, see the program by that name later in this chapter.

The designation of this interdepartmental degree program is meant to convey the broadest cultural concern with peoples and places influenced by Islam, rather than a narrow approach to Islam as religion alone. Islam as a culture-forming force in history may be studied and understood through the literate sources of Islamic civilization and/or through systematic observation and examination of behavioral patterns and social relations of Muslim peoples. The commonality of an "idealized" and a "functional" or "practical" Islam does not preclude a multiple number of valid and varied approaches to Islamic studies. The program, with its core emphasis on the major languages of the Islamic Middle East, is intended to provide an internal view of the dynamics of Islamic culture.

The interdepartmental program for the Master of Arts and Ph.D. degrees in Islamic Studies is designed primarily for students desiring to prepare for an academic career. It may, however, be found useful for students seeking a general education and desiring a special emphasis in this particular area or for those who plan to live and work in this area, whose career will be aided by a knowledge of the people, languages, and institutions. (Such a career might be centered on teaching, research, business, engineering, journalism, librarianship, or government service.) Subject to the limitations of the program, the special course of studies is formulated for candidates according to their experience and requirements.

Master of Arts Degree

Admission

In addition to the general University requirements, a Bachelor of Arts degree in Near Eastern Studies or equivalent is required. The interdepartmental degree committee passes on your application for admission to the program. You are normally expected to have completed the equivalent of Arabic 102A-102B-102C and Iranian 102A-102B-102C or Turkic Languages 102B-102C. In addition, you should have completed the equivalent of two years of Near Eastern history (classical and modern). Some coursework in Islamic culture and institutions may be applied toward the history requirement. Deficiencies in any of these prerequisites have to be removed by taking the appropriate courses without credit toward the advanced degree. No special application form is required.

The Graduate Record Examination (GRE) is required of graduates of American universities and recommended for overseas applicants. No screening examination is required.

A departmental brochure may be obtained by writing to the Von Grunebaum Center for Near

Eastern Studies, 10286 Bunche Hall, UCLA, Los Angeles, CA 90024-1480.

Major Fields or Subdisciplines

Arabic, Persian, Turkish, history of the Near East, political science, anthropology, economics, geography, sociology, Islamic art and architectural history, Near Eastern music.

Foreign Language Requirement

You are required to show proficiency in either French or German. You are expected to (1) pass the Graduate School Foreign Language Test (GSFLT) reading examination with a score of 550 or better, (2) pass a departmentally administered European language examination by the end of your third term in residence, or (3) complete two years of language courses at UCLA with grades of B or better.

Course Requirements

A minimum of nine courses is required, five of which must be at the graduate level. You must take no fewer than four courses on the appropriate level in one Near Eastern language of your choice, and no fewer than five courses selected from the relevant upper division and graduate courses in history, political science, or any of the other fields represented in the program. The selection must be limited to two of these disciplines. The omission of history may be approved only in exceptional cases. Eight units of 500-series courses may be applied toward the total course requirement, as well as toward the minimum graduate course requirement, provided they are not in the same discipline. If you intend to proceed to the Ph.D. in Islamic Studies, you should show proficiency in a second Near Eastern language (Arabic, Persian, Turkish). One of the two languages required for the Ph.D. is Arabic.

Comprehensive Examination Plan

The thesis plan is not available in this program. You must pass written examinations in one Near Eastern language, one in its literature, one in the history of the Near East, and in one of the other non-language major fields or subdisciplines listed above. The examinations are constructed by the instructor responsible for each discipline. Reexamination in exceptional cases is determined by the interdepartmental degree committee. The examiner or examiners are appointed by the chair of the interdepartmental degree committee.

Ph.D. Degree

Admission

Students intending to work for the Ph.D. in Islamic Studies are normally expected first to fulfill all requirements for the M.A. degree. Those who enter the program with an M.A. from another university should have attained a level of preparation in languages, history, and social sciences equivalent to that required for the M.A. at UCLA. In addition, students are

expected to show proficiency in a second Near Eastern language (one of the two required languages is Arabic.) Those who have not done so should make up any deficiencies by taking the appropriate courses without credit toward the degree. No special application form is required, but applications must be accompanied by three letters of recommendation.

The Graduate Record Examination (GRE) is required of graduates of American universities and recommended for overseas applicants.

A departmental brochure may be obtained by writing to the Von Grunbaum Center for Near Eastern Studies, 10286 Bunche Hall, UCLA, Los Angeles, CA 90024-1480.

Major Fields or Subdisciplines

Arabic, Persian, Turkish, history, anthropology, economics, geography, sociology, political science, Islamic art and architectural history, Near Eastern music.

Foreign Language Requirement

At the beginning of your first term in residence, you must present to the chair of the interdepartmental degree committee a written statement explaining your preparation in one of the two modern languages required by the University (generally French and German). You are expected to (1) pass the Graduate School Foreign Language Test (GSFLT) reading examinations with scores of 550 or better, (2) pass departmentally administered European language examinations by the end of your second year in residence, or (3) complete two years of language courses at UCLA with grades of B or better. Any option may be selected for either language. For work in some fields, reading knowledge of Italian, Spanish, or Russian may be substituted for one of the above European languages after satisfactory advisement.

Course Requirements

If you are entering directly into the Ph.D. program, course requirements are the same as in the M.A. program. Beyond this, you continue advanced courses in your two Near Eastern languages, in Near Eastern history, and in one of the social sciences, on specific advisement of the interdepartmental degree committee.

Qualifying Examinations

Written qualifying examinations in four fields are required: two Near Eastern languages and literatures as approved by the advisory committee, the whole range of Near Eastern history, and one of the other non-language major fields or subdisciplines listed above. After successfully completing the written examinations, you must pass the University Oral Qualifying Examination in order to be advanced to doctoral candidacy. Reexamination in any field is at the discretion of the doctoral committee in consultation with the chair of the program.

Research proposals, dossiers, research papers, propositions, etc., are not permitted as alternatives to the written qualifying examinations.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

With the approval of the doctoral committee at the time of the oral qualifying examination, the final oral examination may be waived.

Islamic Studies Course List

Anthropology 130. Study of Culture
150. Study of Social Systems
M154. Women in Culture and Society
156. Comparative Religion
161. Development Anthropology
167. Urban Anthropology
215. Field Training in Archaeology

Professors

Luigi Ballerini, Dottore in Lettere, *Chair*
 Franco Betti, Ph.D.
 Marga Cottino-Jones, Ph.D., Dottore in Lettere
 Edward F. Tuttle, Ph.D.
 Giovanni Cecchetti, Dottore in Lettere, *Emeritus*
 Pier-Maria Pasinetti, Ph.D., Dottore in Lettere, *Emeritus*

Associate Professor

Lucia Re, Ph.D., Dottore in Lettere

Lecturers

Mirella Cheeseman, Dottore in Legge
 Maria Grazia Pellegrini, Dottore in Lettere
 Althea Reynolds, B.A., *Emerita*

Scope and Objectives

Italian art and letters provide an invaluable key to understanding many facets of European civilization. Examined in its own right or studied comparatively, Italian culture offers unmatched rewards. The UCLA faculty views transmitting the Italian language as inseparable from transmis-

sion of the culture, so students consider in depth virtually all aspects of Italian civilization. After their linguistic initiation, ideally including a year abroad, students may pursue advanced studies in the department exclusively and through a wide range of interdisciplinary programs.

Bachelor of Arts degrees are offered in Italian and in Italian and Special Fields. Graduate study leads to the Master of Arts degree in Italian (with specializations in literature and language) and to the Ph.D. (literature specialization). In addition, the department participates extensively in the interdepartmental graduate programs in Romance Linguistics and Literature, Comparative Literature, and Folklore and Mythology.

Bachelor of Arts in Italian

The program of studies leading to the Bachelor of Arts in Italian consists of two distinct phases: preparation in the language and study of the literature. While literature courses constitute the bulk of the program, good knowledge of the language is prerequisite to all upper division literature courses credited toward the major in Italian. The use of Italian is stressed at all levels of study. Detailed information on programs and specific degree requirements is available in the department publication, *Programs in Italian Studies*, and in the department office.

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, 25, or equivalent.

The Major

Required: Fourteen upper division courses out of 16 courses regularly offered every year or every other academic year, including Italian 102A-102B-102C, 113A-113B, 130, 190. An additional seven are to be selected from courses 114A through 122.

Three upper division courses from other departments are strongly recommended, as follows: History 132A or 132B, and English 110. Also recommended: Art History 106A, 106B, or 106C; upper division courses in another literature and philosophy and a second language (Latin, French, Spanish, or German, at least on level three). Programs must be organized in consultation with the departmental undergraduate adviser.

Study in Italy

You are encouraged to spend up to one year in Italy either to (1) study with an education abroad program or (2) study in an Italian university. You are also urged to take advantage of summer language workshops and study programs, either at American campuses or in Italy. The Department of Italian offers an intensive, eight-week summer Italian studies program. For information on *Casa Italiana*, contact the department or the Summer Sessions Office, 1147 Murphy Hall.

Honors Program

Majors with an overall grade-point average of 3.25 and a 3.5 GPA or better in Italian are

eligible to participate in the honors program. Prerequisites: Italian 102A-102B-102C.

Candidates select three upper division literature courses in which additional readings are required. In the last term of your senior year, you are required to write a thesis on a subject related to one of the three above-mentioned courses. The average for the three courses should not fall below A-. Applications should be made during the last term of your junior year.

Bachelor of Arts in Italian and Special Fields

Study programs fulfilling requirements for the major have been developed with the Departments of Anthropology, Art, Art History, Classics (Latin), Design, English, Film and Television, French, History, Linguistics, Music, Philosophy, Political Science, Spanish and Portuguese, and Theater. Consult the Italian undergraduate adviser for requirements in the various fields of specialization.

Preparation for the Major

Required: Italian 1, 2, 3, 4, 5, or equivalent, plus additional required courses associated with the field of specialization selected in consultation with the undergraduate adviser.

The Major

Required: Fourteen upper division courses, seven of which must be in Italian. Italian 102A-102B-102C are required, while the remaining four may be selected from courses 113A through 122 as determined by your area of specialization. The other seven courses are to be selected from offerings in another department, as determined by the field of specialization.

Study Lists each term must be planned in consultation with the undergraduate adviser. Courses are assigned in accordance with your needs as determined by the area of specialization pursued. In certain cases, as many as two courses (eight units) at the graduate level may be applied toward the 14-course minimum requirement.

Master of Arts Degree

Admission

Three letters of recommendation should be sent to the Graduate Adviser, Department of Italian, 340 Royce Hall, UCLA, Los Angeles, CA 90024-1535.

Files of prospective graduate students meeting the University minimum requirements are screened by the departmental committee on admissions. Because the department offers the master's degree as a step toward the Ph.D. degree, all students admitted to the M.A. program are designated as "first-stage doctoral students" in order to distinguish them from students in terminal master's degree programs. This is for administrative purposes only and has no bearing on your acceptance into the

program if you do not indicate on the application that your final degree objective is the Ph.D. Admission on a provisional basis may be recommended in case of deficiencies in preparation.

Major Fields or Subdisciplines

The M.A. degree is available with specializations in Italian literature and language.

Foreign Language Requirement

Reading knowledge of one other foreign language approved by the graduate adviser or successful completion of courses through at least level three is required. This requirement must be met at least one term before the comprehensive examination.

Course Requirements

Italian Literature Specialization —

(1) For the thesis plan, 12 courses are required, including Italian 200A, 200B, 200C, 205B, and 205C. At least nine courses must be in the 200 series.

(2) For the comprehensive examination plan, 12 courses are required, including Italian 200A, 200B, 200C, 205B, and 205C. The other eight courses must be distributed in three main literary periods — Middle Ages, Renaissance, modern (at least two courses in each period). Three of these courses may be upper division if approved by the graduate adviser. Related courses in other departments, such as History 205A-205B and Art History 230, are strongly recommended.

Italian Language Specialization —

(1) For the thesis plan, 12 courses are required, including Italian 200A, 200B, 200C, 259A-259B, Latin 232, and Linguistics 140. At least nine courses must be in the 200 series.

(2) For the comprehensive examination plan, 12 courses are required, including Italian 130, 200A, 200B, 200C, 259A-259B, and Latin 232 or Italian 210A or both. The others should be courses on the Middle Ages (seminar on Dante strongly recommended), Renaissance, and modern times.

No 500-series courses may be applied toward the M.A. course requirements.

Thesis Plan

This plan is recommended for research-oriented students of exceptional merit. If you have completed your first year of graduate work with at least a 3.7 grade-point average, you may be nominated by one of the faculty members of the department for application to the thesis plan.

At this point you must have completed Italian 200A, 200B, 200C, 205B, 205C, and at least two other graduate courses in Italian. On acceptance, the guidance committee helps you select six more graduate courses in preparation for the thesis.

The thesis must be at least 50 pages long and follow the rules and style of the UCLA Ph.D. dissertation regulations. It must be submitted

in Spring Quarter of your second year of graduate work. After completion of the thesis, you must pass an oral examination testing your knowledge in the field of the thesis and your general competence in Italian literature.

Comprehensive Examination Plan

In general, the department favors the comprehensive examination plan, which consists of a minimum four-hour written examination to be given before the final examination period in Fall and Spring Quarters. The examination tests your general competency and does not have major and minor fields of emphasis. After the written examination, you are required to take an oral examination. In case of failure, you may be reexamined once, subject to approval by the examination committee and the chair of the department.

Ph.D. Degree

Admission

Three letters of recommendation from professionals in the field of Italian studies should be sent to the Graduate Adviser, Department of Italian, 340 Royce Hall, UCLA, Los Angeles, CA 90024-1535.

Prerequisite for entering the department's doctoral program is an M.A. in Italian literature from UCLA or another university in the U.S. or the equivalent. Students with a master's degree from another institution, or the equivalent, are required to pass part 1 of the Ph.D. qualifying examinations by the end of their third term in residence. They should expect to take part 2 of the examinations after approximately eight terms.

Students admitted to the Ph.D. program without the M.A. degree must take the qualifying examinations (part 2) at the end of the twelfth term in residence, carrying a normal course load.

Students holding the M.A. from UCLA normally take part 2 of the qualifying examinations at the end of their sixth term in residence.

Major Fields or Subdisciplines

Two centuries of Italian literature in the medieval, Renaissance and baroque, or modern area comprise the major fields, while two centuries of Italian literature from any of these areas make up the minor fields.

You may select a major in a literary genre or a minor outside the department, provided that it relates to your major field of specialization and has the department's approval.

Foreign Language Requirement

This requirement is normally met by passing courses through level three in at least two of the following languages: Latin, French, German, Spanish (subject to departmental approval). A foreign language used to satisfy the requirement for the master's degree in Italian may be applied toward fulfillment of this requirement. The language requirement must be satisfied before tak-

ing part 2 of the qualifying examinations, either by Graduate School Foreign Language Test (GSFLT) or departmental examination or by petition for course credit to the Graduate Division.

Course Requirements

In addition to those required for the master's degree, at least 10 other quarter courses, of which no more than two 596 courses may apply, are required. You also take such courses as your guidance committee may prescribe for the qualifying examinations (such as Italian 596 or 597). All courses from Italian 201 on, except 205B-205C, may be applied toward the Ph.D. degree.

Qualifying Examinations

The comprehensive examination for the M.A. in Italian at UCLA corresponds to part 1 of the Ph.D. qualifying examinations.

The department also requires both written and oral qualifying examinations (part 2), which must be taken during the same academic year, although not necessarily during the same term. Normally taken six terms after the M.A. degree, the written examination consists of two parts: an eight-hour examination in your major field and a six-hour examination in your minor field. Additionally, a two-hour University Oral Qualifying Examination is required for advancement to doctoral candidacy. A summary of requirements entitled "Regulations for the Ph.D. Examination" is available in the department. In case of failure, you may be reexamined on unanimous approval of the guidance committee, after at least one academic term of additional residence.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

After acceptance of the dissertation in its final form, your doctoral committee may require that you take an oral examination which covers principally the field within which the dissertation falls.

Lower Division Courses

Enrollment in the Italian open language laboratory is required of all students in Italian 1, 1A, 2, 2A, and 3.

1. Elementary Italian — Beginning. Lecture, five hours; laboratory, one hour.

Mrs. Cheeseman in charge

1A. Elementary Italian — Accelerated (8 units). Lecture, 10 hours; laboratory, two hours. Designed for those students having capacity and desire to learn the language at a much faster pace than normal. Encompasses material ordinarily intended for courses 1 and 2.

Mrs. Cheeseman in charge

1G. Special Reading Course. Readings, three hours. Open to graduate students in other fields. Preparation for Graduate Division foreign language reading requirement. S/U grading.

2. Elementary Italian — Continued. Lecture, five hours; laboratory, one hour. Prerequisite: course 1 or one year of high school Italian.

Mrs. Cheeseman in charge

2A. Elementary Italian — Accelerated (Continued) (8 units). Lecture, 10 hours; laboratory, two hours. Prerequisite: course 1A or 2 or two years of high school Italian. Designed for those students having capacity and desire to learn the language at a much faster pace than normal. Encompasses material ordinarily intended for courses 3 and 4.

Mrs. Cheeseman in charge

2G. Special Reading Course. Readings, three hours. Open to graduate students in other fields. Preparation for Graduate Division foreign language reading requirement.

3. Elementary Italian — Continued. Lecture, five hours; laboratory, one hour. Prerequisite: course 2 or two years of high school Italian.

Mrs. Cheeseman in charge

3A. Intermediate Italian — Accelerated (8 units). Lecture, six hours; laboratory, two hours. Prerequisite: course 2A or 3 or three years of high school Italian. Designed for those students having capacity and desire to learn the language at a much faster pace than normal. Encompasses material ordinarily intended for courses 4 and 5.

Mrs. Cheeseman in charge

4. Intermediate Italian. Lecture, five hours; laboratory, one hour. Prerequisite: course 3 or three years of high school Italian. Mrs. Cheeseman in charge

5. Intermediate Italian. Lecture, five hours; laboratory, one hour. Prerequisite: course 4 or four years of high school Italian. Mrs. Cheeseman in charge

7. Elementary Italian Conversation. Lecture, five hours (first six-week session). Encompasses conversational material included in course 1, with emphasis on traveler's vocabulary. (Sum)

8A-8B-8C. Italian Conversation (2 units each). Prerequisite: consent of instructor. Intended for students who have taken three to six terms of language instruction and have developed considerable skills in Italian. Designed to further improve students' spoken proficiency through constant exposure and practice of the language. Each course may be repeated once for credit.

Mrs. Cheeseman in charge

25. Advanced Italian. Lecture, five hours. Prerequisite: course 5. Advanced grammar and composition course with readings from select literary works.

Mrs. Cheeseman in charge

42A-42B. Italian Civilization or Italy through the Ages. Lecture, three hours. General survey of history, literature, art, music, and architecture audiovisually illustrated, with emphasis on Italy's cultural contributions to Western civilization. Service course designed to meet general education requirements:

42A. From Origins through the Renaissance.

Mrs. Cottino-Jones, Mr. Tuttle

42B. From the Enlightenment to Modern Italy.

46. Italian Cinema and Culture. Lecture, two hours; discussion, one hour; film screenings, two to three hours. Survey of development of Italian cinema and culture from the 1900s to the present through analysis of principal aesthetic, literary, artistic, and philosophical movements in Italy as reflected in works of the nation's filmmakers and writers.

Mrs. Cottino-Jones, Ms. Re

50A-50B. Main Trends in Italian Literature:

50A. Italian Literature from Its Origins to End of the Renaissance. Study of selected works by major writers of the period, including Dante, Petrarch, Boccaccio, Poliziano, Ariosto, Machiavelli, Castiglione.

50B. Italian Literature from the Baroque Period to the Present. Study of selected works by major writers of the period, including Tasso, Bruno, Vico, Parini, Alfieri, Foscolo, Leopardi, Manzoni, Verga, Pirandello, Svevo, Moravia, Ungaretti, Montale.

Upper Division Courses

Sixteen quarter units in Italian or equivalent are required for admission to any upper division course. Upper division courses for the majors are conducted in Italian.

102A-102B-102C. Italian Cultural Experience. Lecture, three hours. Study of cultural development of Italy conducted especially with a view to contemporary situations. **102A.** From Disruption of Roman Unity to Feudal and Communal Society and Culture; **102B.** From Renaissance Civilization to the Baroque Age; **102C.** Historical and Cultural Issues from the Age of Enlightenment to Our Day.

105. Tradition and Innovation in Italian Culture. Lecture, three hours. Italy's basic social structures and cultural institutions delineated through their historical development and as they are manifest in stresses to which the industrializing state currently is subject.

110A-110B. Divine Comedy in English. Lecture, three hours.

113A-113B. Dante's Divina Commedia. Lecture, three hours. Focus on *Divine Comedy*. Selected readings from the text integrated with relevant information on scholasticism, classical tradition, medieval literature and poetics, and sociopolitical structure of Dante's world. **113A.** General Introduction and Readings from *Inferno*; **113B.** Readings from *Purgatorio* and *Paradiso*.

114A-114B. Italian Literature of the Middle Ages. Lecture, three hours. Emphasis on Stil Novo, Dante's minor works, Petrarch, and Boccaccio.

Mrs. Cottino-Jones, Mr. Tuttle

116A-116B. Italian Literature of the Renaissance. Lecture, three hours. Emphasis on Lorenzo de' Medici, Poliziano, Castiglione, Machiavelli, Ariosto, Tasso.

Mr. Betti

118. Italian Literature of the 18th Century. Lecture, three hours. Emphasis on Goldoni, Parini, Alfieri.

Mr. Betti

119. Italian Literature of the 19th Century. Lecture, three hours. Survey of the Romantic age as it expresses values and national aspirations of 19th-century Italy. Emphasis on the innovative approach to poetry as seen in works of Foscolo and Leopardi and to sociohistorical novels of Foscolo, Manzoni, and Verga.

Mr. Betti, Ms. Re

120. Italian Literature of the 20th Century. Lecture, three hours. Brief introduction to Italian literature after unification of the country, followed by concentration on selected writers seen in their political, social, and artistic contexts.

Mr. Ballerini, Ms. Re

121. Italian Cinema. Lecture, three hours. Comparative study of specific literary works and their translations into films and of different techniques in the two forms of expression. Texts include literary works, screenplays, and works on literary and film theory.

Mrs. Cottino-Jones

122. Italian Theater. Lecture, three hours. Emphasis on what is alive today (read and performed) in Italian theater. Texts range from the Renaissance to the present.

Ms. Re

130. Advanced Grammar and Composition within a Literary Context. Lecture, three hours. Prerequisite: course 25. Study in depth of idiomatic phenomena of the language from both grammatical and syntactical points of view within a literary context.

Mrs. Cheeseman

131. Reading and Reciting. Lecture, three hours. Prerequisite: consent of instructor based on sufficient knowledge of Italian. Emphasis on diction, interpretation, and performance of one-act plays as vehicles for perfection of pronunciation, comprehension, and fluency. May be repeated twice for credit.

M140. From Boccaccio to Basile (in English). (Same as Folklore M140.) Lecture, three hours. Study of origins and development of the Italian novella in its themes, structure, historical context, and European ramifications. Designed for students in other departments who wish to become acquainted with either the premises or growth of similar literary genres. Also intended for students majoring in folklore and mythology, who are given insight into Italian popular tales when these (as in the case of Boccaccio) were translated into highly sophisticated literary forms, as well as when (as in the case of Basile) they become embedded into the folk tradition of the Western world.

Mrs. Cottino-Jones

150. Modern Italian Fiction in Translation. Lecture, three hours.

Mr. Ballerini, Ms. Re

M158. Women in Italian Culture. (Same as Women's Studies M158.) Lecture, three hours. Designed with intent of examining role that women have played in Italian society. Concentration alternatively on the world of medieval and Renaissance "matriarch" and on "liberated" women of our times. Historical and political documents and social and religious taboos presented and discussed, together with other data derived from literature and art. Italian majors required to read texts in Italian and to prepare papers written in Italian.

Mrs. Cottino-Jones, Ms. Re

190. History of the Italian Language. Lecture, three hours. Main forces which have shaped literary or standard Italian and specific ways in which the language has evolved. Tracing of its changing relations with other European languages and survey of effects wrought by historical events, changes in taste, and altered social functions.

Mr. Tuttle

195. Special Fields Research (2 units). Limited to senior Italian and special fields majors. Unscheduled tutorial in which paper (15 to 20 pages) is to be written in either Italian or English which requires students to unify and synthesize their experience of combining two disciplines of study. Paper graded by ad hoc committee of faculty from department, with the chair in charge.

199. Special Studies (2 to 4 units). Prerequisite: consent of instructor. Course of independent study for advanced undergraduates who wish to pursue a special research project under direction and close supervision of a faculty member.

Graduate Courses

200A. Readings in Italian Literature. Lecture, three hours. Prerequisite: graduate standing. Literature of the generation dominated by the Franciscan movement, proceeding through culture of Frederick II's court to the three classics of the 14th century — Dante, Petrarch, and Boccaccio. Early humanists, post-classic generation, and cultural booming under Lorenzo il Magnifico.

200B. Readings in Italian Literature. Lecture, three hours. Prerequisites: course 200A, graduate standing. Literature of the High Renaissance of central Italy in its three most popular genres (lyric poetry, chivalric poem, and theater), proceeding through Counter-Reformist culture, especially of northern and southern Italy. Main Enlightenment figures and cultural evolution stemming from them.

200C. Readings in Italian Literature. Lecture, three hours. Prerequisites: course 200B, graduate standing. Literature of the Romantic era, proceeding through study of literary figures of the Italian "Risorgimento." Various "novcentisti" movements, literature between the two wars, and contemporary generation.

201. Bibliography and Methods of Research. Lecture, three hours.

205A-205B-205C. Methods of Literary Criticism. (Formerly numbered 205A-205B.) Lecture, three hours. **205A.** Brief history of literary criticism. **205B.** Presentation, discussion, and application of basic currents of criticism from stylistics to structuralism. **205C.** Prerequisite: course 205B or consent of instructor. Presentation, discussion, and application of contemporary approaches from structuralism to deconstruction, new historicism, and feminist criticism. Mrs. Cottino-Jones, Ms. Re

210A-210B-210C. Early Italian Literature. Lecture, three hours:

210A. Origins of Italian Language and Early Texts. Mr. Tuttle

210B. *Scuola Siciliana* and Early Poetry in Central and Northern Italy. Mr. Tuttle

210C. *Dolce Stil Novo*.

M211. Traditional Festivals and Festive Events. (Same as Folklore M211.) Lecture, three hours. Prerequisite: consent of instructor. Analysis of traditional expressive forms and behaviors inherent in selected festivals and festive events (e.g., carnival, community folk festivals, small festive gatherings), with emphasis on their structure and human dynamics.

212A. Theory of Textual Criticism. Prerequisite: graduate standing. Presentation and discussion of methods to be employed in preparation of a critical edition of a medieval and/or Renaissance literary text.

214A-214G. Italian Literature of the 14th Century. Lecture, three hours:

214A. Dante's *Vita Nuova* and *Rime*.

214B. *Convivio* and *De Vulgari Eloquentia*.

214C. *Commedia* and *Monarchia*.

214D. Petrarca.

214E. *Decameron*. Mrs. Cottino-Jones

214F. Boccaccio's Other Works. Mrs. Cottino-Jones

214G. Sacchetti and Other Prose Writers. Mrs. Cottino-Jones

215A-215B-215C. Italian Literature of the 15th Century. Lecture, three hours:

215A. Fiction and Other Prose Texts.

215B. Writings of the Humanists.

215C. Age of Lorenzo de' Medici and Poliziano. Mr. Betti

216A-216E. Italian Literature of the 16th Century. Lecture, three hours:

216A. Machiavelli.

216B. Ariosto.

216C. Bembo, Folengo, Aretino, and the Theater. Mrs. Cottino-Jones

216D. Prose (Castiglione, Della Casa, Guicciardini, Cellini).

216E. Tasso.

217A-217B-217C. Italian Literature of the 17th Century. Lecture, three hours:

217A. Bruno, Campanella, Galilei, Magalotti. Mrs. Cottino-Jones

217B. *Commedia dell'Arte* and the Theater. Mrs. Cottino-Jones

217C. Marino and Marinisti. Mrs. Cottino-Jones

218A-218E. Italian Literature of the 18th Century. Lecture, three hours:

218A. Prose from Vico to Cesarotti. Mr. Betti

218B. Essayists and Autobiographical Writers. Mr. Betti

218C. Theater, Especially Metastasio, Goldoni, C. Gozzi.

218D. Parini and Poets of Arcadia.

218E. Alfieri. Mr. Betti

219A-219F. Italian Literature of the 19th Century. Lecture, three hours:

219A. Foscolo.

219B. Leopardi.

219C. Manzoni.

219D. Trends in Fiction before Verga. Mr. Betti

219E. Verga.

219F. Italian Literature at Turn of the Century. Ms. Re

220A-220B-220C. Italian Literature of the 20th Century. Lecture, three hours:

220A. From D'Annunzio to Futurism and the Early Twenties. Mr. Ballerini, Ms. Re

220B. Contemporary Italian Poetry. Mr. Ballerini

220C. Contemporary Italian Fiction. Mr. Ballerini, Ms. Re

M230A-M230B. Folk Tradition in Italian Literature. (Same as Folklore M230A-M230B.) Lecture, two hours.

250A-250D. Seminars: Dante. Seminar, three hours.

251. Seminar: Petrarch. Seminar, three hours.

252. Seminar: Boccaccio. Seminar, three hours. Mrs. Cottino-Jones

253A-253B-253C. Seminars: Chivalric Poetry in Italy. Seminar, three hours. Relationship between the genre and its French medieval sources, with study of its evolution in Italy through Pulci, Boiardo, Ariosto, and Tasso. Mrs. Cottino-Jones

254. Seminar: Machiavelli. Seminar, three hours.

255A-255B. Seminars: Baroque. Seminar, three hours. Mrs. Cottino-Jones

256A-256B. Seminars: 18th Century. Seminar, three hours.

257A-257B. Seminars: Romanticism. Seminar, three hours.

258A-258B. Seminars: Contemporary Italian Literature. Seminar, three hours. Mr. Ballerini, Ms. Re

259A-259B-259C. Studies in History of Italian Language:

259A. History of the Italian Language. Prerequisite: graduate standing. Historical survey of development of the language from medieval times to unification of the country (1861). *Questione della lingua*, general acceptance of Florentine speech, and its evolution into the national language. Mr. Tuttle

259B. Structure of Modern Italian. Prerequisite: graduate standing. Various tendencies in modern and contemporary Italian. Foreign influences in today's Italian language. Relationship between national language and the various dialects. Mr. Tuttle

259C. Italian Dialectology. Historical differentiation of Italian dialects considered in its areal dimension. Specific geolinguistic problems and solutions illustrating growth of the discipline up to its present merging with sociolinguistics as Italian dialects become more vertically defined. Mr. Tuttle

298. Variable Topics in Italian Studies. Lecture, three hours; discussion, one hour. Prerequisite: graduate standing or consent of instructor. Seminar focusing on themes and issues outside the uniquely Italian literature topics covered in regular departmental graduate courses.

370. Problems and Methods in Teaching Italian. Lecture, two hours. Mr. Cheeseman

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495A-495D. Teaching Italian at College Level (2 to 4 units each). Prerequisite: consent of instructor. **495A.** Techniques in Teaching Italian Literature; **495B.** Techniques in Teaching Italian Culture; **495C.** Techniques in Teaching Italian Conversation; **495D.** Techniques in Teaching Italian Film.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Studies (4 to 8 units). May be repeated twice. S/U grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (4 to 8 units). S/U grading.

599. Ph.D. Research and Writing (4 to 8 units). May be repeated. S/U grading.

Labor and Workplace Studies (Interdepartmental)

Associate Professors

Ruth H. Milkman, Ph.D. (*Sociology*)
Michael Wallerstein, Ph.D. (*Political Science*)

Assistant Professors

Christopher Erickson, Ph.D. (*Management*)
Miriam A. Golden, Ph.D. (*Political Science*)

Scope and Objectives

This special undergraduate program is intended to coordinate and enrich offerings on the workplace's connections to the social, political, and economic forces that surround it. Students become acquainted with institutions of the labor market such as public policies, employment practices, and unions. Faculty members from various disciplines are actively engaged in research on some aspect of employee relations, employee organizations, or workplace concerns in the U.S. or other countries. Administration of the program is coordinated through the Institute of Industrial Relations.

Special Undergraduate Program

The specialization must be taken in conjunction with a major in the social sciences or in psychology. Students with other majors may be admitted by petition.

Upper Division

Required: Management 150; Political Science 174 or History 155B; three other courses selected from Economics 151, 152, 181B, 183, Geography 155, History 155A, 155B, Political Science 169A, 174, Psychology M137E, Sociology M163, 171, 173, Women's Studies 170. All students take a one-term specialization seminar designed for the exchange of disciplinary perspectives and directed research toward the end of the program.

Courses in the specialization may also be applied toward the requirements of the major where appropriate.

For further information, contact the Institute of Industrial Relations (825-9603) or Professor Sanford M. Jacoby (825-1658).

Ludwig Lauerhass, Ph.D. (*History*)
Linda Rodriguez, Ph.D. (*History*)

Adjunct Associate Professor

Ichak Adizes, Ph.D. (*Management*)

Scope and Objectives

UCLA has been in the forefront of U.S. universities with significant teaching and research interests in Latin American studies for more than 50 years. More than 100 faculty members from 22 departments and professional schools regularly offer a broad range of courses with an emphasis on Latin America. These course offerings in the humanities, social sciences, fine arts, and professional fields provide students a unique opportunity to focus on Latin America, a region of growing importance.

The Latin American Studies Program, coordinated through UCLA's Latin American Center, offers the Bachelor of Arts and Master of Arts degrees. In the undergraduate major students develop a program combining language and methodological training with interdisciplinary studies in one of three areas: arts and humanities, social sciences, or ecology and environment. At the graduate level, students pursue more specialized coursework and interests, culminating in an interdisciplinary research study. Cooperative degree programs with the UCLA Schools of Architecture and Urban Planning, Education, Engineering and Applied Science, Library and Information Science, Management, and Public Health provide the opportunity to combine the M.A. in Latin American Studies with a master's degree in a professional field.

Bachelor of Arts Degree

Undergraduate studies of the Latin American region are designed to serve the needs of (1) students desiring a general education focused on the Latin American cultural region, (2) students planning to enter business, government, or international agency service, (3) students preparing to teach social sciences or language, and (4) students preparing for advanced academic study of Latin America.

Preparation for the Major

You must complete all preparation courses with a C (2.0) in each course; the courses are applicable toward the Letters and Science lower division general education requirements.

Foreign Language Requirement

Language requirements are uniform for all students in the major regardless of core area. Proficiency in two languages equivalent to (1) Spanish 25 and Portuguese 3 or (2) Portuguese 25 and Spanish 5 is required. In lieu of Portuguese 1, 2, and 3, you may take Portuguese 102A-102B which are designed for students with a background in Spanish. An indigenous language of Latin America (i.e., Quechua) may be substituted for the minor language.

Course Limitations

You may not take more than eight units of Latin American Studies 199 for letter-grade credit nor more than eight units in any single term. No course taken on a Passed/Not Passed basis may be applied toward the B.A. degree requirements. In order to register in a 199 course, you must have advanced junior standing and an overall GPA of 3.0, or senior standing.

Double Majors

Through judicious use of electives, you may find it possible to obtain the B.A. degree with two majors (e.g., Latin American studies and history). Interested students who have achieved junior standing should consult the undergraduate advisers of both departments involved, initiating the appropriate petition with the undergraduate adviser in Latin American Studies.

Study in Latin America

You are encouraged to spend up to one year in Latin America either (1) to study with an education abroad program, (2) to study in Latin American universities, (3) to conduct research, or (4) to complete an internship in an international or development agency. Full credit is granted according to the individual programs arranged in consultation with the undergraduate adviser. Proposals must be presented in writing to the interdepartmental committee.

Core Areas

You select one of three core areas as the focus of your major: arts and humanities, social sciences, or ecology and environment. Requirements for each core area are listed below.

Core I: Arts and Humanities

Preparation — Two courses from History 8A, 8B, 8C, 8D; Latin American Studies 99 (or 197 with department consent); Spanish and Portuguese M44; Art History 55A or 55B or Ethnomusicology and Systematic Musicology 91K and Dance 73B.

Core Area — Ten upper division courses from the approved list of Latin American courses distributed as follows:

(1) *Core Concentration* — Five courses from literature and folklore or the arts (art, music, dance, theater arts) or linguistics. Only one course from the electives list may be applied toward the core concentration.

(2) *Theory and Methods* — One course from theory and methods.

(3) *Internal Breadth* — Four additional courses from the arts and humanities core area but outside the core concentration. No more than two of these may be electives.

External Breadth — From the approved list, six upper division courses outside the arts and humanities core area distributed as follows: two courses in each of two core concentrations such that at least one core concentration is selected from the social sciences core (e.g., history) and at least one is developed within the ecology and environment core (e.g., public health). No more than three external breadth courses may be electives.

Approved Undergraduate Course List

(1) Literature and Folklore

Folklore and Mythology M149. Folk Literature of the Hispanic World

History 169. Latin American Eliteloire

Portuguese (Spanish and Portuguese) 130A-130B. Survey of Brazilian Literature

C131. Colonial Brazilian Literature

C132. Romanticism in Brazilian Literature

C133. Naturalism, Realism, and Symbolism in Brazilian Literature

C134. 20th-Century Brazilian Literature: Poetry and Drama

C135. 20th-Century Brazilian Literature: Novel

Spanish (Spanish and Portuguese) 136A-136B. Survey of Spanish-American Literature

137. Literature of Colonial Spanish America

139. Romanticism and Realism in Spanish-American Literature

142. 20th-Century Spanish-American Literature: Fiction and the Essay

143. 20th-Century Spanish-American Literature: Poetry and Drama

144. Mexican Literature

M149. Folk Literature of the Hispanic World

170B. Senior Honors Seminar: Topics in Spanish-American Literature

Theory and Methods

Folklore and Mythology 101. Introduction to Folklore

190. Selected Topics in Folklore and Mythology Studies

199. Special Studies in Folklore

Portuguese (Spanish and Portuguese) 199. Special Studies

Spanish (Spanish and Portuguese) 119A. Introduction to Study of Literature: Prose

119B. Introduction to Study of Literature: Poetry

119C. Introduction to Study of Literature: Drama

199. Special Studies

(2) Fine Arts

Art History C117A. Pre-Columbian Art of Mexico

C117B. Pre-Columbian Art of the Maya

C117C. Pre-Columbian Art of the Andes

Dance C173B. Dance of Mexico

C180B. Studies in Dance Ethnography

183A. Dance in Latin America

Ethnomusicology and Systematic Musicology 108A-108B. Music of Latin America

M110A-M110B. The Afro-American Musical Heritage 113. Music of Brazil

Film and Television 106C. History of African, Asian, and Latin American Film

Theory and Methods

Anthropology *118A, 118B. Museum Studies

*133R. Aesthetic Systems

*137. Ethnography on Film

Art History *199. Special Studies in Art

Dance *199. Special Studies in Dance

Ethnomusicology and Systematic Musicology *M180. Analysis of Traditional Music

*C190A-C190B. Proseminars: Ethnomusicology

Film and Television 199. Special Studies in Film and Television

Music *199. Special Studies in Music

(3) Linguistics

Portuguese (Spanish and Portuguese) 100A. Phonology and Morphology

*100B. Syntax

*M118A. History of Portuguese and Spanish: Phonology

*M118B. History of Portuguese and Spanish: Morphology and Syntax

Spanish (Spanish and Portuguese) *100A. Introduction to Study of Spanish Grammar: Phonology and Morphology

*100B. Introduction to Study of Spanish Grammar: Syntax

*115. Applied Linguistics

*M118A. History of Portuguese and Spanish: Phonology

*M118B. History of Portuguese and Spanish: Morphology and Syntax

*119A. Introduction to Study of Literature: Prose

*119B. Introduction to Study of Literature: Poetry

*119C. Introduction to Study of Literature: Drama

*170C. Senior Honors Seminar: Topics in Hispanic Linguistics

Theory and Methods

Anthropology *143. Field Methods in Linguistic Anthropology

Linguistics *103. Introduction to General Phonetics

*110. Introduction to Historical Linguistics

*120A. Phonology I

*120B. Linguistic Analysis: Grammar

*165A. Phonology II

*165B. Linguistic Theory: Grammar

*170. Language and Society: Introduction to Sociolinguistics

*199. Special Studies in Linguistics

Portuguese (Spanish and Portuguese) *199. Special Studies

Spanish (Spanish and Portuguese) *199. Special Studies

(4) Electives

Anthropology *M140. Language in Culture

Ethnomusicology and Systematic Musicology 20A. Musical Cultures of the World

*M110A-M110B. The Afro-American Musical Heritage

Film and Television 112. Film and Social Change

Folklore and Mythology *118. Folk Art, Folklife, and Material Culture

*190. Selected Topics in Folklore and Mythology Studies

Latin American Studies 197. Interdisciplinary Topics in Latin American Studies

199. Special Studies in Latin American Studies

*Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

Core II: Social Sciences

Preparation — Two courses from History 8A, 8B, 8C, 8D; Latin American Studies 99 (or 197 with department consent); Economics 1 and 2, or 100; Economics 40 or Sociology 18 or Statistics 50.

Core Area — Ten upper division courses from the approved list of Latin American courses distributed as follows:

(1) *Core Concentration* — Five courses from anthropology and sociology or economics or geography or history or political science. Only one course from the electives list may be applied toward the core concentration.

(2) *Theory and Methods* — One course from theory and methods.

(3) *Internal Breadth* — Four additional courses from the social sciences core area but outside the core concentration. No more than two of these may be electives.

External Breadth — From the approved list, six upper division courses outside the social sciences core area distributed as follows: two courses in each of two core concentrations such that at least one core concentration is selected from the arts and humanities core (e.g., fine arts) and at least one is developed within the ecology and environment core (e.g., public health). No more than three external breadth courses may be electives.

Approved Undergraduate Course List

(1) Anthropology and Sociology

Anthropology 114P. Ancient Civilizations of Western Middle America (Nahuatl Sphere)

114Q. Ancient Civilizations of Eastern Middle America (Maya Sphere)

114R. Ancient Civilizations of Andean South America
M172T. Ethnohistory of Hispanic Cultures in the U.S. Southwest

173Q. Latin American Communities

174P. Ethnography of South American Indians

*174Q. Ethnology of South American Indians

Sociology 186. Latin American Societies

Theory and Methods

Anthropology *115P. Archaeological Field Training

*115R. Strategy of Archaeology

116P. Laboratory Analysis in Archaeology

*M116Q. Dating Techniques in Environmental Sciences and Archaeology

*118A, 118B. Museum Studies

*M136Q. Laboratory for Naturalistic Observations: Developing Skills and Techniques

*137. Ethnography on Film

*138. Methods and Techniques of Ethnohistory

*139. Field Methods in Cultural Anthropology

*186A. Quantitative Methods in Anthropology

*186B. Models and Modeling in Anthropology

*199. Special Studies in Anthropology

Sociology *104. Introduction to Sociological Research Methods

*112. Introduction to Mathematical Sociology

*199. Special Studies

(2) Economics

Economics *110. Economic Problems of Underdeveloped Countries

*111. Theories of Economic Growth and Development

*112. Policies for Economic Development

*190. International Economics

*191. International Trade Theory

*192. International Finance

*148. Economic Geography

*150. Urban Geography

Latin American Studies 197. Interdisciplinary Topics in Latin American Studies

199. Special Studies in Latin American Studies

Sociology *116. Social Demography

*Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

Master of Arts Degree

Admission

In addition to University minimum requirements, the B.A. degree in Latin American Studies constitutes the normal basis for admission. Applicants with a degree in another field can be admitted but must complete certain undergraduate prerequisites subsequent to admission. Applicants with Latin American field experience or special methodological studies are given special consideration. All applicants should meet minimum requirements in at least one language of Latin America. The following items are required:

(1) Three academic letters of recommendation, unless you have been away from school for some time, in which case one of the letters may be from an employer.

(2) A minimum of a 3.0 or B average in the junior/senior years of college.

(3) A statement of purpose discussing your background in Latin American studies, proposed program of study, and future career plans.

(4) A minimum score of 1,000 on the General Test (combined verbal and quantitative sections) of the Graduate Record Examination (GRE).

(5) A resumé or curriculum vitae describing academic and Latin American experience.

Students are admitted each term. Application deadlines are November 1 for Winter Quarter, February 1 for Spring Quarter, and December 15 (to be considered for financial assistance) or May 15 for Fall Quarter.

Fellowship applications for the academic year are due on January 8 prior to the Fall Quarter for which application is made. Prospective students may write for departmental brochures to the Academic Programs Office, Latin American Center, 10347 Bunche Hall, UCLA, Los Angeles, CA 90024-1483.

Major Fields or Subdisciplines

You are expected to develop and integrate three fields in Latin American studies, to be selected from the following: anthropology, art, economics, engineering, education, folklore, geography, history, law, library science, linguistics, management, music, political science, Portuguese, public health, sociology, Spanish, theater arts, and urban planning. At least one of the selected fields must be a social science.

Foreign Language Requirement

Proficiency equivalent to 24 quarter units of university-level Spanish and 12 quarter units of university-level Portuguese or 16 quarter units of university-level Portuguese and 20 units of university-level Spanish is required. Only coursework taken within five years of the award of the M.A. degree may be used to demonstrate current proficiency. Since these courses may not be applied toward the M.A. degree, you are encouraged to pass these proficiency levels by examination. A major Indian language of Latin America (i.e., Quechua) may be substituted for either Spanish or Portuguese. You must fulfill the foreign language requirement by examination or petition for a waiver of the examination if you have gained competency in another manner (i.e., native speaker, upper division coursework, Peace Corps service).

Course Requirements

Two plans are available. For the comprehensive examination plan, a minimum of nine courses is required, including a one-term core course (Latin American Studies 205) and eight additional courses to be distributed among three fields or

disciplines on a 3-3-2 basis. Of the nine courses, five must be at the graduate level, with at least one in each of the three fields.

For the thesis plan (which requires prior approval), a minimum of 10 courses is required, including a one-term core course and nine additional courses to be distributed on a 4-3-2 basis among three fields. Three graduate-level courses are required in the first field, with one each in the two minor fields.

All courses must be selected from the department-approved list of courses. Other courses must be petitioned in advance.

Courses numbered in the 300 and 400 series are not applicable toward the M.A. degree.

No more than eight units of 500-series courses may be applied toward the total course requirement for the M.A. degree; no more than four units may be applied toward the five graduate courses required for the degree.

Graduate courses may be repeated unless they are lecture courses.

Comprehensive Examination Plan

In addition to course requirements, you must submit three research papers written for at least two of your three fields of study. At least two of the papers must have been submitted for graduate courses in the 200 series. A three-member faculty committee representing your three fields evaluates the papers and grades them pass, pass subject to revision of one or more of the research papers, or fail. No reexamination is permitted. The M.A. degree is awarded on recommendation of the faculty committee. Copies of your papers must be filed in the Academic Programs Office of the Latin American Center.

Thesis Plan

Although you are generally expected to follow the M.A. comprehensive examination plan, in special cases you may be allowed to follow the M.A. thesis plan. You must develop a carefully prepared proposal that provides sound justification for the thesis plan, including provisions for funding any planned field research.

Once the thesis plan option has been approved, you select a three-member faculty thesis committee to work with you in the development of the thesis and to read, evaluate, and approve the drafts and final version. Once the final version is approved, the thesis committee recommends the award of the M.A. degree. By the end of the term before graduation, you must file for advancement to candidacy with the Graduate Division.

Cooperative Degree Programs

Several options are available to combine the M.A. in Latin American Studies with a professional degree. After acceptance by both the Latin American Studies Program and the re-

spective professional school, you may pursue both degrees simultaneously. Articulated degree programs are currently available with the Schools of Education (M.Ed. in Curriculum), Engineering and Applied Science (M.S. in Engineering), Library and Information Science (M.L.S.), and Public Health (M.P.H.); articulated programs do not allow course credit to be applied toward more than one degree. Concurrent degree programs are available with the Graduate Schools of Architecture and Urban Planning (M.A. in Urban Planning) and Management (M.B.A.).

Lower Division Course

99. Introduction to Latin American Problems. Limited to 15 students. Interdisciplinary seminar for lower division students. May be repeated for credit with topic change.

Upper Division Courses

197. Interdisciplinary Topics in Latin American Studies. Advanced interdisciplinary course for upper division students. May be repeated for credit with topic change.

199. Special Studies in Latin American Studies (4 or 8 units). Prerequisite: upper division standing. Intensive directed research program in which students conduct interdisciplinary research or complete internship with an international agency or program dealing with Latin America. Faculty sponsorship and written reports required.

Graduate Courses

M200. Latin American Research Resources. (Same as History M265 and Library and Information Science M225.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research results. Mr. Lauerhass

201. Statistical Resources for Latin American Research. Contemporary statistical materials important for research in Latin American studies. Discussion on qualitative and interpretative aspects of the material, especially as it relates to data developed for publication in Latin American Center's *Statistical Abstract of Latin America and its Supplement Series*.

205. Latin Americanist Scholarship. Lecture, three hours. Prerequisite: consent of instructor. Panoramic introduction to methods and issues in various disciplines that study Latin America, with guest lecturers from various fields. (Latin American Studies core course.) Mr. Lockhart

M225. Computer Methodologies in Latin American Studies and Anthropology. (Same as Anthropology M289.) Lecture, three hours. Prerequisite: consent of instructor. Basic principles of computing and information processing, along with their potential application in Latin American research. Examination of impact that computers are having in Latin American society. Mr. Behrens

M250A. Indians of South America. (Same as Anthropology M272.) Lecture, three hours. Prerequisite: consent of instructor. Survey of literature and research topics related to Indian cultures of South America. May be repeated for credit.

250B. Interdisciplinary Seminar: Latin American Studies. Lecture, three hours. Prerequisite: consent of instructor. Problem-oriented seminar on critical areas stressed in University's cooperative programs in Latin America.

250C. Interdisciplinary Topics in Latin American Studies. Prerequisite: consent of instructor. Reading knowledge of Spanish or Portuguese normally required. Seminar devoted to selected topics of an interdisciplinary nature.

M268A-M268B. Seminars: Recent Latin American History. (Same as History M268A-M268B.) Seminar, three hours. Prerequisite: consent of instructor. Reading knowledge of Spanish and Portuguese normally required. Seminar devoted to selected topics of an interdisciplinary nature. In Progress grading. Mr. Wilkie

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study or Research (2 to 8 units). May be repeated, but only four units may be applied toward the minimum graduate course requirement. S/U or letter grading.

597. Preparation for M.A. Comprehensive Examination. Ordinarily taken only during term in which student is being examined. S/U grading.

598. Research for and Preparation of M.A. Thesis. Only four units may be applied toward the minimum graduate course requirement. S/U grading.

Approved Graduate Course List

Refer to the Latin American Studies undergraduate section for the lists of approved undergraduate courses.

Fine Arts

Art History *201. Topics in Historiography of Art History

C218A. Pre-Columbian Art of Mexico

C218B. Pre-Columbian Art of the Maya

C218C. Pre-Columbian Art of the Andes

219B. Pre-Columbian Art

220. Oceanic, Pre-Columbian, African, and Native North American Art

596. Directed Individual Study or Research

Dance *280A-280D. Advanced Studies in Dance Ethnology

Ethnomusicology and Systematic Musicology *290. Seminar: Ethnomusicology

2. Elementary Spanish

2G. Reading Course for Graduate Students

3. Elementary Spanish

4. Intermediate Spanish

5. Intermediate Spanish

25. Advanced Spanish

*105. Spanish Composition

Linguistics

Anthropology 204. Core Seminar: Linguistic Anthropology

Linguistics *210A. Field Methods I

*210B. Field Methods II

*220. Linguistic Areas

*225. Linguistic Structures

M246C. Topics in Linguistic Anthropology

Portuguese (Spanish and Portuguese) *202. Synchronic Morphology and Phonology

*204A-204B. Generative Grammar

*M205A-M205B. Development of Portuguese and Spanish Languages

Spanish (Spanish and Portuguese) *202A. Phonology

*202B. Morphology

*204A-204B. Generative Syntax and Semantics

*M205A-M205B. Development of Portuguese and Spanish Languages

*209. Dialectology

*256A-256B. Studies in Spanish Linguistics

*257. Studies in Dialectology

Literature

Portuguese (Spanish and Portuguese) *M200. Research Resources

C231. Colonial Brazilian Literature

C232. Romanticism in Brazilian Literature

C233. Naturalism, Realism, and Symbolism in Brazilian Literature

C234. 20th-Century Brazilian Literature: Poetry and Drama

C235. 20th-Century Brazilian Literature: Novel

M249. Folk Literature of the Spanish and Portuguese Worlds

254. Studies in Early Brazilian Literature

255. Studies in Modern Brazilian Literature

Spanish (Spanish and Portuguese) *M200. Research Resources

237. Literature of the Spanish Conquest

239. Romanticism and Realism in Spanish-American Literature

240. Major Currents in Modern Spanish-American Literature

243A-243B. Contemporary Spanish-American Poetry

244A-244B. Contemporary Spanish-American Novel

245. Contemporary Spanish-American Essay

246. Contemporary Spanish-American Drama

M249. Folk Literature of the Spanish and Portuguese Worlds

277A-277B. Studies in Colonial Spanish-American Literature

278A-278B. Studies in 19th-Century Spanish-American Literature

280A-280B. Studies in Contemporary Spanish-American Literature

*M286A-M286B. Studies in Hispanic Folk Literature

Professional

Architecture and Urban Planning *232A. Introduction to Regional Planning: Evolution of Regional Planning Doctrines

*232B. Spatial Planning: Regional and International Development

*235A-235B. Urbanization and Rural Development in Third World Countries

*236A. Urban and Regional Economic Development I

*236B. Urban and Regional Economic Development II

*236C. Urban and Regional Economic Development III

239. Special Topics in Urban and Regional Development Policy

246. Housing in Social and Economic Development Policy

266. City and Countryside in the Third World

267A. Resource-Based Development Planning

267B. Rural Development Issues

Community Health Sciences *231. Maternal and Child Nutrition

*M232. Medical Anthropology in Public Health

*233. Seminar: Current Issues in Maternal and Child Health

*M237A-M237B. Population Policy and Fertility

*M237C. Seminar: Population Policy and Fertility

*M240. Culture and Human Reproduction

*260A. Advanced Nutrition: Vitamins

*260B. Advanced Nutrition: Proteins

*260C. Advanced Nutrition: Lipids

260D. Advanced Nutrition: Minerals

*262. Seminar: Nutrition

Education *C203. Educational Anthropology

*204B. Introduction to Comparative Education

*204C. Education and National Development

*204D. Minority Education in Cross-Cultural Perspective

*204E. International Efforts in Education

204F. Nonformal Education in Comparative Perspective

*C207. Politics of Education

*238. Cross-National Analysis of Higher Education

*252B. Seminar: Education and Social Change

*253A. Seminar: Current Problems in Comparative Education

253D. Seminar: Latin American Education

*253F. Seminar: Education in Revolutionary Societies

*253H. Seminar: The Chicano/Hispanic and Education

*596. Directed Independent Study

*597. Preparation for Master's Comprehensive Examinations or Doctoral Qualifying Examinations

*598. Thesis Research

Engineering *596. Directed Individual or Tutorial Studies (selected from any of the engineering departments)

*597A. Preparation for M.S. Comprehensive Examination (selected from any of the engineering departments)

Epidemiology *290. Seminar: Epidemiology — Infectious and Tropical Disease

*291. Seminar: Epidemiology — Methodology

Health Services *240. Health Care Issues in International Perspective

Law *270. International Law

*271. International Business Transactions

Library and Information Science *207. Seminar: International and Comparative Librarianship

*223. Literature of the Social Sciences

*224. Literature of the Humanities and Fine Arts

M225. Latin American Research Resources

*596. Directed Individual Study or Research

Management *205A. International Business Economics

*205B. Comparative Market Structure and Competition

*205C. Business Forecasting for Foreign Economies

*209. Selected Topics in Business Economics

*234A. International Financial Markets

*234B. Financial Management of Multinational Corporations

*261B. International Marketing Management

*296A. International Business Management

*297A. Comparative and International Management

*297B. International Business Policy

*297C. International Business Law

*297D. International Business Negotiations

*298B. Special Topics in International and Comparative Management

Public Health *596. Directed Individual Study or Research (selected from any of the public health departments)

Social Science

Anthropology 204. Core Seminar: Linguistic Anthropology

*212P. Selected Topics in Hunter/Gatherer Archaeology

*214. Selected Topics in Prehistoric Civilizations of the New World

*M216. Dating Techniques in Environmental Sciences and Archaeology

*230P. Ethnology

*232Q. Myth and Ritual

*M232R. South American Folklore and Mythology Studies

*M241. Topics in Linguistic Anthropology

*253. Economic Anthropology

*M267B. Ethnographic Film Direction

M272. Indians of South America

*282. Research Design in Cultural Anthropology

*M288. Ethnographic Film

M289. Computer Methodologies in Latin American Studies and Anthropology

Archaeology *200. Archaeology Colloquium

*259. Fieldwork in Archaeology

Economics *281A. International Trade Theory

*281B. International Finance

*285A-285B-285C. Workshops: International Economics

*286A. Economic Development

*286B. Analysis and Appraisal of Development Projects

287A. Economic Problems of Latin America

*291A-291B. Urban Economics

Folklore and Mythology *200C. Folklore Collecting and Field Research

248. Theory and Method in Latin American Folklore Studies

*M249. Folk Literature of the Spanish and Portuguese Worlds

*M286A-M286B. Studies in Hispanic Folk Literature

Geography *251. Seminar: Urban Geography

*M278. Dating Techniques in Environmental Sciences and Archaeology

281. Middle America

282. South America

*292. Advanced Regional Geography: Selected Regions

History 200I. Advanced Historiography: Latin America

201I. Topics in History: Latin America

M265. Latin American Research Resources

266A-266B. Seminars: Colonial Latin American History

267A-267B. Seminars: Latin American History, 19th and 20th Centuries

M268A-M268B. Seminars: Recent Latin American History

Latin American Studies M200. Latin American Research Resources

M225. Computer Methodologies in Latin American Studies and Anthropology

M250A. Indians of South America

250B. Interdisciplinary Seminar: Latin American Studies

250C. Interdisciplinary Topics in Latin American Studies

Political Science 200A. Statistical Methods I

*C221. Advanced International Relations Theory

*231. Markets, States, and International Political Economy

*C239. Selected Topics in International Relations

C244. Latin American Studies

*259. Selected Topics in Comparative Politics

*265. Politics and Economy

Sociology *235. Comparative Ethnic Stratification

*259. Social Structure and Economic Change: Historical and Comparative Perspectives

*263. Social Stratification

M287A-M287B. Population Policy and Fertility

*Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

Law and Society

4256 Bunche Hall, (310) 825-3862

Scope and Objectives

The undergraduate specialization in law and society can only be taken jointly with a major in political science, and all requirements for the political science major must be met by or in addition to meeting the requirements of this program. Students completing the program receive a degree with a major in political science and specialization in law and society. The program is designed to allow students to explore the relationships of law with ethics, economics, crime, and social and political institutions and theories.

Special Undergraduate Program

Preparation for the Specialization

Required: Political Science 10, 40, 70, and 20 or 50; two courses from History 7A, 7B, Philosophy 4, 6, 22.

Upper Division

The political science major should be completed as follows: Political Science 117; one course in Field I other than course 117; two courses in Field III; four courses in Subfield IIIa; two other political science electives; six courses from Anthropology 152, Economics 172, History 151A, 151B, Philosophy 150, 151A, 151B, 157A, 157B, 166, Sociology 145, 147A, 147B, 169.

For further information, contact the political science undergraduate counselor in the program office.

Adjunct Professor

Ian Maddieson, Ph.D.

Scope and Objectives

The goal of linguistics is the enrichment of knowledge about the nature, grammar, and history of human language. Linguistics is a theoretical discipline, akin to philosophy, anthropology, and cognitive psychology. It is important for prospective students to understand that studying linguistics is not a matter of learning to speak many languages. Linguistics courses draw examples from the grammars of a wide variety of languages, and the more languages linguists know about in depth (as distinct from possessing fluency in the use of them), the more likely they are to discover universal properties. It is also possible to pursue these universal aspects of human language through the intensive in-depth study of a single language. This accounts for the high proportion of examples from English and familiar European languages found in linguistics courses and research publications.

The core areas of linguistic theory are phonology (with its roots in phonetics), morphology, syntax, and semantics. A grammar is a system of rules

which characterize the phonology, morphology, syntax, and semantics of a natural language. The properties of grammars are the central focus of linguistic theory.

Because language is central to all humanistic disciplines, as well as to several social science areas, it is studied from many points of view. Linguistics itself cannot be said to recognize a single optimal approach to the subject. Hence, the courses provide a variety of approaches which reflect the diversity of the field.

In a recent survey conducted by the Conference Board of the Associated Research Councils, UCLA's Linguistics Department was judged second best in the nation in the quality of its faculty. It offers programs leading to the Bachelor of Arts, Master of Arts, and Ph.D. degrees.

Undergraduate Study

The majors described below are of three types: (1) a major which concentrates entirely on general linguistics, (2) several majors which combine the basic courses of the general program with a language concentration or other related fields, and (3) a major which concentrates entirely on an African language area. The combined majors in conjunction with instructional certification programs are especially appropriate for students who have nonuniversity teaching careers as goals, and the African major is for students with specific African interests.

A 2.0 grade-point average in linguistics courses is required for all Linguistics Department majors.

Bachelor of Arts in Linguistics

This major is designed for students with an exceptional interest in and aptitude for the study of languages and linguistics. It enables the undergraduate to gain substantial familiarity with several languages and types of linguistic structure and to become conversant with the historical study of language and formal theories of linguistics.

Preparation for the Major

Required: Linguistics 20; two of the following: Philosophy 31, Psychology 10, one cultural anthropology course; completion of the equivalent of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages.

If you complete an advanced language course, you are considered to have completed the equivalent of whatever courses are prerequisite to that one (e.g., if you complete French 100, you have automatically satisfied the requirement of the sixth term of work in one language). You are required to complete at least the equivalent of the third term in a language other than those in the Romance, Slavic, or

Germanic families. This requirement may be satisfied either as part of or in addition to the language requirement described in the preceding paragraph.

The Major

Required: A minimum of 13 upper division or graduate courses, including Linguistics 103, 110, 120A, 120B, and two courses from 125, 165A, 165B (you may substitute courses 200A and 200B for 165A and 165B respectively if you receive grades of A in 120A and 120B respectively and have consent of instructor). Both courses 165A and 165B, or 200A and 200B, are recommended for students planning linguistics graduate work. The remaining seven courses are electives, three of which must be linguistics courses. The other four may be in linguistics or in certain other fields as listed below. Electives have generally been selected from the following list (courses not on the list may be used as electives only in consultation with an adviser): Linguistics 104, 114, 125, 127, 130, C135, 140, M146, M150, 160, 165A (or 200A for qualified students), 165B (or 200B for qualified students), 170, 175, M176A, C180, C185A, C185B, 195, 196A, 196B, 199 (if four units), African Languages 190, Anthropology 143, English 121, 122, Philosophy 127A, 127B, 172, Psychology 122, 123, or upper division courses in a foreign language beyond the sixth term. Not all of these elective courses are necessarily given every year; consult an adviser regarding electives to be offered in a given year.

Linguistics 195 or 196A/196B are recommended for students planning to pursue graduate work in linguistics, since they provide an opportunity to engage in independent research and to write a paper which can be submitted to graduate admissions committees. To enroll in the courses, you must consult with the department's senior essay and honors counselor.

Specialization in Computing

Students in any of the linguistics majors (except linguistics and computer science) may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major and (2) completing Program in Computing 10A, 10B, 10C, 60, Linguistics C180, C185A. You graduate with a bachelor's degree in your major and a specialization in computing.

Honors Program

Honors in linguistics are awarded at graduation to those students who have a grade-point average of 3.6 or better in their junior and senior years and who have received a grade of A in Linguistics 195 or 196A/196B. Qualified students may be proposed by any member of the faculty to the faculty as a whole for the award of highest honors on the basis of a piece of research in linguistics completed at UCLA.

Bachelor of Arts in Linguistics and Anthropology

Preparation for the Major

Required: Linguistics 20, completion of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages (at least three terms must be in a language other than those in the Romance, Slavic, and Germanic families). Anthropology 33 is strongly recommended, when offered.

The Major

Required: Thirteen upper division courses as follows: Linguistics 103, 110, 120A, 120B or 127, 125, 170, one other upper division linguistics course (recommended: 114), Anthropology M140, 144 or 145, one course from Anthropology 141, 142A, 143, or Sociology C124A, and three upper division electives from Anthropology 141, 142A, 143, 144, 145, the 130 series (one course only), the 170 series (one course only), Sociology C124A, C124B. Linguistics 165A and 165B (or 200A and 200B with grades of A in 120A and 120B respectively and consent of instructor) are recommended for students planning to pursue graduate work in linguistics.

Bachelor of Arts in Linguistics and Computer Science

Premajor in Linguistics and Computer Science

Admission to the major is contingent on passing the following courses, which constitute the linguistics and computer science premajor, with a grade-point average of 3.3 or better and no grade lower than a C: Linguistics 20, Philosophy 31, Program in Computing 10A, 10B, 10C.

Preparation for the Major

Required: Linguistics 20, Mathematics 31A, 31B, Philosophy 31, Program in Computing 10A, 10B, 10C, 30, completion of the sixth term in one foreign language and the third term in a second foreign language. Mathematics 31A and 31B must be passed with grades of C or better. Mathematics 61 is strongly recommended.

The Major

Required: Fourteen upper division courses as follows: Linguistics 103, 104, 120A, 120B, 125, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor; 165B/200B are most strongly recommended for this major), C180, C185A, C185B, Computer Science 131, 132, 141, 161 or 163, 181.

Bachelor of Arts in Linguistics and East Asian Languages and Cultures

Preparation for the Major

Required: Completion of the sixth term in either Chinese or Japanese; Linguistics 20, Philosophy 31; one cultural anthropology course; either Chinese 50 or Japanese 50, as appropriate; completion of the sixth term in one other foreign language or the third term in each of two other foreign languages.

The Major

Required: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), one upper division elective in linguistics; for the classical Japanese track: Japanese 100A-100B, CM122, 140, 141, 142, 149; for the modern Japanese track: Japanese 100A-100B, CM122, three courses from 100C, 130, 131, C132; for the classical Chinese track: Chinese 110A-110B-110C, four courses from 140A, 140B, 140C, 143A, 143B; for the modern Chinese track: Chinese 100A-100B-100C, four courses from 101A, 101B, 101C, 130A, 130B, 139, 145A, 145B.

Bachelor of Arts in Linguistics and English

Preparation for the Major

Required: Linguistics 20, English 3, 10A, 10B, 10C, Philosophy 31, completion of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages.

The Major

Required: Fourteen upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two upper division electives in linguistics, English 121, 122, 140A, and four electives from 141A, 141B, 142A, 142B, 143, the 150 series (one course only), the 160 series (one course only), the 170 series (one course only).

Bachelor of Arts in Linguistics and French

Preparation for the Major

Required: Linguistics 20, French 1, 2, 3, 4, 5, 6, 12, 15, completion of the sixth term in one other foreign language or the third term in each of two other foreign languages.

The Major

Required: Fifteen upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of

instructor), two upper division electives in linguistics, French 100A, 100B, 100C, 103, 105, 106, and two elective upper division French literature courses.

Bachelor of Arts in Linguistics and Italian

Preparation for the Major

Required: Linguistics 20, Italian 1, 2, 3, 4, 5, 25, Latin 1, 2, 3, completion of the third term in one other foreign language or the sixth term in Latin, Philosophy 31, one cultural anthropology course.

The Major

Required: Twelve upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two upper division electives in linguistics, Italian 102A, 190, and three upper division electives in Italian.

Bachelor of Arts in Linguistics and Philosophy

Preparation for the Major

Required: Linguistics 20, Philosophy 31, 32, and two courses from 1, 6, 7, 21; completion of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages.

The Major

Required: Thirteen upper division courses as follows: Linguistics 103, 120A, 120B, 165B (or 200B with a grade of A in 120B and consent of instructor), three upper division electives in linguistics; six upper division courses in philosophy, including at least five from Philosophy 126A through 135B, 170, 172, 184, 186, 187, 188, of which at least two must be from 127A, 127B, 172.

Bachelor of Arts in Linguistics and Psychology

Preparation for the Major

Required: Linguistics 20, Psychology 10, 41, 42, completion of the sixth term in one foreign language and the third term in a second foreign language. Program in Computing 10A is strongly recommended.

The Major

Required: Twelve upper division courses as follows: Linguistics 103, 120A, 120B, 130, two upper division electives in linguistics, Psychology 110, 120, 121, 123, 130, and an elective to be selected from 112A, 112B, 112C, 115, 116, 124B, 135. Linguistics 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor) and Psychology 115 are strongly recommended.

Bachelor of Arts in Linguistics and Scandinavian Languages

Preparation for the Major

Required: Linguistics 20, Scandinavian 1, 2, 3, 4, and 5, or 11, 12, 13, 14, and 15, or 21, 22, 23, 24, and 25, 30, completion of the sixth term in one other foreign language or the third term in each of two other foreign languages.

The Major

Required: Thirteen upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two upper division electives in linguistics, Scandinavian 105 and 106, or 110 twice, 199 (in a topic related to Scandinavian linguistics, under the direction of a Scandinavian or Linguistics faculty member), and three upper division electives in Scandinavian.

Bachelor of Arts in Linguistics and Spanish

Preparation for the Major

Required: Linguistics 20, Spanish 1, 2, 3, 4, 5, 25, M42, M44, completion of the sixth term in one other foreign language or the third term in each of two other foreign languages.

The Major

Required: Fourteen upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two additional upper division courses in linguistics (preferably 130 and 170), Spanish 100A-100B, 115 or M118A, 119A, 119B, and two additional upper division Spanish courses.

Bachelor of Arts in African Languages

Preparation for the Major

Required: Linguistics 20, nine courses from African Languages 1A through 42C and 199 (six in one language and three in another).

The Major

Required: A minimum of 13 upper division courses, including three courses in an African language; African Languages 150A-150B, 190, Linguistics 103; three courses selected from English 114, Ethnomusicology and Systematic Musicology 136A, 136B, Geography 189, History 125A, 125B, 125C, 126A, 126B, 127A, 127B, 128A, 128B, Linguistics 110, 120A, 120B or 127, 140, M146, 170, Political Science 166A, 166B, 166C. Linguistics 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor) and completion of the sixth term in one of the following non-

African languages are strongly recommended: Afrikaans, Arabic, Dutch, French, German, Portuguese.

Graduate Study

The programs leading to the M.A. and Ph.D. degrees in Linguistics are open to qualified graduate students who are interested in descriptive, theoretical, and historical linguistics. Preparation for graduate study in linguistics should be equivalent in as many respects as possible to the undergraduate curriculum in linguistics.

There is also a graduate program leading to a Ph.D. in Applied Linguistics. It is administered by an interdepartmental committee, not by the Department of Linguistics. The requirements of the program are stated earlier in this chapter.

Master of Arts Degree

Admission

Students are normally admitted to begin residence in Fall Quarter only (exceptions may be made by the chair). The deadline for submission of applications for Fall Quarter is December 15 of the previous year. This deadline may occasionally be extended for applicants who do not wish to be considered for fellowship support.

Applicants are asked to submit a statement of purpose, which should include their background for graduate study in linguistics and their immediate and long-range goals in the field. They should also have three scholars under whom they have studied submit letters to the department about their qualifications. Scores on the verbal, quantitative, and analytical sections of the Graduate Record Examination (GRE) must be submitted with the application. There is no minimum score requirement. In addition, applicants must submit a copy of some research paper or other piece of writing in linguistics or a closely related field.

While not required for admission, Linguistics 103, 110, 120A, 120B, 165A, 165B are prerequisites to graduate courses in their respective areas. At the time of admission, students are notified which, if any, of the above courses are required due to deficiencies. However, if there is any question of whether courses taken elsewhere are equivalent to the above courses, students must discuss this with their advisers.

Prospective students may request an information brochure from the Administrative Analyst, Department of Linguistics, 3125 Campbell Hall, UCLA, Los Angeles, CA 90024-1543. This brochure explains, in particular, advising methods and procedures for the formation of M.A. and Ph.D. guidance committees.

Specialization

At the M.A. level, three survey courses in phonology, syntax, and language change are required. You must also select four additional survey courses from a list of 11. These choices

allow for a certain amount of specialization. The remaining two courses (of the nine graduate courses required) may be in any area of linguistics and provide additional opportunities for specialization.

Foreign Language Requirement

You must demonstrate knowledge of one research language before receiving the M.A. and a second research language before advancement to candidacy. Knowledge can be demonstrated by one of four methods: (1) a reading examination administered by the department, (2) a research paper based on extensive sources in the language, (3) a conversation examination showing knowledge in depth, (4) a Graduate School Foreign Language Test (GSFLT) with a score of 650 or better. One of the languages must have substantial literature on linguistics; the other may serve as a contact language for field research. The latter option must be approved by the departmental language committee. Native speakers of languages other than English may use English to meet one of the foreign language requirements. If this is done, the second language must be other than the native language. The departmental brochure provides details about the departmentally administered language examinations.

Course Requirements

The M.A. degree requires the completion, with a B average or better, of nine graduate courses in linguistics. All students, regardless of prior background, are required to take Linguistics 200A, 200B, 201, 202, and 206. The remaining four survey courses must be selected from Linguistics 203 through 218. All first-year graduate students must take courses 411A-411B, and all second-year students who have not yet been admitted to the Ph.D. program must take course 444.

The following undergraduate courses or the equivalent are prerequisite to graduate courses in the corresponding areas: Linguistics 103, 110, 120A, 120B, 165A, 165B. Course 103, or an examination in practical phonetics, must be passed with a grade of B or better as a prerequisite to course 210A, a required course for the Ph.D. that may be taken at the pre-M.A. level. A proficiency examination in elementary logic, which may be waived on the basis of appropriate coursework, is prerequisite to course 206.

No more than two courses (with grades of B or better) from institutions outside the University of California may be applied toward the M.A.

You must complete all degree requirements in a maximum of seven regular academic terms.

Thesis Plan

After completing the required courses and the foreign language examination, students selecting this plan submit a thesis based on original research to a thesis committee for approval. All students intending to proceed to the Ph.D. must adopt this plan.

If you wish to be considered for advancement into the doctoral program, a copy of the thesis, complete and clearly legible, but not necessarily in final typed form, must be in the hands of the committee at least two weeks before the last day of classes in the term. Limits on the length of the thesis are stipulated in the departmental brochure.

Requirements for receiving an M.A. include the filing of a Petition for Advancement to Candidacy form early in the term during which you expect to take the degree. The thesis must be typed according to regulations set by the University. Information on these regulations and procedures is available from the Graduate Division.

Comprehensive Examination Plan

After completing the required courses and the foreign language examination, you must pass a comprehensive examination administered by a four-member committee of the faculty, appointed by the chair. This is normally an oral examination, general in scope, and results in a terminal M.A. degree.

Ph.D. Degree

Admission

General admission requirements are the same as those listed for the M.A. Students who have done their earlier graduate work at UCLA are considered for admission into the Ph.D. program on the basis of the following: (1) completion of all requirements for the M.A. and (2) the faculty's evaluation of the quality of the M.A. thesis and of the student's overall work and promise.

If you have already received an M.A. in Linguistics from another department or institution, you must fulfill all the requirements expected of an M.A. candidate, including the coursework, unless work elsewhere is equivalent and satisfies the course requirements. Then there are two possible procedures: (1) you may submit a master's thesis written at another institution or department or (2) if you have not written a thesis elsewhere, you must submit a paper equal in depth and scope to a thesis. In either case an evaluation committee is appointed and, once the committee has approved the thesis or paper, it is submitted to the entire faculty who evaluates its quality and your accomplishments and promise.

Major Fields or Subdisciplines

You may specialize in syntax, semantics, phonology, phonetics, language change, morphology, typology, sociolinguistics, neurolinguistics, psycholinguistics, computational linguistics, and many language areas, notably African languages and American Indian languages. Other specializations may be possible, depending on the availability of faculty expertise.

Foreign Language Requirement

A doctoral committee cannot be officially appointed until the foreign language requirement has been met. Details are given above under the "Foreign Language Requirement" for the M.A. degree.

Course Requirements

Candidates for the Ph.D. are required to have taken 36 units of graduate coursework beyond the M.A. requirements. These units must include Linguistics 210A, 210B, and eight units in an area distinct from that of your major area of concentration. The 36 units may not include courses 275, 597, or 599. Of the 36 units, no more than 12 units may be in course 596A. A maximum of four two-unit seminars may be included in the 36 units. At some time, you are expected to present some of the results of your research at a meeting of the Linguistics Department Colloquium. This is a requirement for the degree.

Qualifying Examinations

In order to be advanced to candidacy, you are required to prepare two original research papers in different areas or fields of linguistics. These papers are to be submitted to and approved by a doctoral guidance committee. A written prospectus of the dissertation must be submitted to the guidance committee, with a copy for the department file, one month prior to the oral examination. At this time, provided the language requirement has been met, an official doctoral committee must be established.

The University Oral Qualifying Examination is administered by the doctoral committee, based primarily on the topic of the dissertation research. The examination deals with the background necessary for you to pursue research on the specific topic. Reexamination is possible on recommendation of the committee. You are expected to take the examination and be advanced to candidacy no later than six terms after being admitted to the doctoral program.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

A final defense of the dissertation is required. The defense is not restricted to the doctoral committee and is scheduled at a time, and with advance notice, that will enable a substantial number of students and faculty to attend.

General Linguistics

Lower Division Courses

1. Introduction to Study of Language. Summary, for general undergraduates, of what is known about human language; unique nature of human language, its structure, its universality, and its diversity; language in its social and cultural setting; language in relation to other aspects of human inquiry and knowledge.

10. Structure of English Words. Lecture, three to four hours. Introduction to structure of English words of classical origin, including most common base forms and rules by which alternate forms are derived. Students may expect to achieve substantial enrichment of their vocabulary while learning about etymology, semantic change, and abstract rules of English word formation.

Mr. Stockwell

20. Introduction to Linguistics. (Formerly numbered 100.) Lecture, four hours; discussion, one hour. Introduction to theory and methods of linguistics: universal properties of human language; phonetic, phonological, morphological, syntactic, and semantic structures and analysis; nature and form of grammar.

88. Lower Division Seminar. Seminar, three hours. Limited to freshmen. Variable topics; consult *Schedule of Classes*, College of Letters and Science, or department for topics to be offered in a specific term. May be repeated for credit.

99. Special Studies in Linguistics (2 to 4 units). Prerequisite: consent of instructor. Supervised research or training. May be repeated for credit. P/NP or letter grading.

Upper Division Courses

103. Introduction to General Phonetics. Lecture, three hours; laboratory, two hours. Prerequisite or corequisite: course 20 or equivalent. Phonetics of a variety of languages and phonetic phenomena that occur in languages of the world. Extensive practice in perception and production of such phenomena.

Mr. Hayes, Ms. Keating

104. Experimental Phonetics. Prerequisite: course 103 or equivalent. Survey of principal techniques of experimental phonetics. Use of laboratory equipment for recording and measuring phonetic phenomena.

Ms. Keating

110. Introduction to Historical Linguistics. Prerequisites: courses 20, 103, 120A, and 120B or 127. Methods and theories appropriate to historical study of language, such as comparative method and method of internal reconstruction. Sound change, grammatical change, semantic change.

Mr. Anttila, Mr. Bedell, Ms. Munro

114. American Indian Linguistics. Strongly recommended prerequisite: course 20. Survey of genetic, areal, and typological classifications of American Indian languages; writing systems for American Indian languages; American Indian languages in social and historical context. One or more languages may be investigated in detail.

Ms. Munro (W or Sp)

120A. Phonology I. Prerequisites: courses 20, 103. Introduction to phonological theory and analysis. Rules, representations, underlying forms, derivations. Justification of phonological analyses. Emphasis on practical skills with problem sets.

Mr. Hayes, Ms. Steriade

120B. Linguistic Analysis: Grammar. Prerequisite: course 20. Course 120A is not prerequisite to 120B. Descriptive analysis of morphological and syntactic structures in natural languages; emphasis on insight into nature of such structures rather than linguistic formalization.

Mr. Sportiche, Mr. Stowell

125. Semantics. Prerequisite: course 120B. Survey of most important theoretical and descriptive claims about the nature of meaning.

Mr. Keenan

127. Syntactic Typology and Universals. Prerequisite: course 20. Study of essential similarities and differences among languages in grammatical devices they use to signal the following kinds of concepts: relations between nouns and verbs (case and word order), negation, comparison, existence/location/possession, causation, interrogation, reflexivization, relativization, attribution (adjectives), time (tense and aspect), and backgrounding (subordination). Data from a range of languages presented and analyzed.

Mr. Keenan

130. Child Language Acquisition: Introduction. Prerequisites: courses 20, 120A, and 120B, or consent of instructor. Survey of contemporary research and theoretical perspectives in acquisition of language. Emphasis on linguistic interpretation of existing data, with some attention to relationship with second language learning, cognitive development, and other topics. Discussion of acquisition of English and other languages and universals of linguistic development.

Ms. Curtiss, Ms. Hyams

132. Introduction to Psycholinguistics. Prerequisites: courses 20, 120A, 120B. Central issues in language comprehension and production, with emphasis on how theories in linguistics inform processing models. Topics include word understanding (with emphasis on spoken language), parsing, anaphora and inferring, speech error models of sentence production, and computation of syntactic structure during production.

C135. Theoretical Issues in Disorders of Language Development. Prerequisites: courses 1 or 20, and 130, or consent of instructor. Introduction to the field of language disorders of children. Some clinical syndromes which are associated with delayed or deviant language acquisition: aphasia, autism, mental retardation. Theories regarding etiology and relationship of these disorders to each other. Such questions as relationship of cognition to linguistic ability. Concurrently scheduled with course C235.

Ms. Curtiss

140. Linguistics in Relation to Language Teaching. Prerequisites: courses 120A, 120B. Aspects of linguistics in relation to teaching of language, with particular focus on special problems entailed in teaching non-European languages.

Mr. Schuh, Mr. Stockwell

M146. Language in Culture. (Same as Anthropology M140.) Prerequisite: upper division standing or consent of instructor. Study of language as an aspect of culture; relation of habitual thought and behavior to language; and language and the classification of experience. Holistic approach to study of language, with emphasis on relationship of linguistic anthropology to fields of biological, cultural, and social anthropology, as well as archaeology.

Mr. Kroskrity

M150. Introduction to Indo-European Linguistics. (Same as Indo-European Studies M150.) Prerequisites: one year of college-level study (course 3 or better, eight units minimum) of either Greek or Latin and either German or Russian. Survey of Indo-European languages from ancient to modern times; their relationships and chief characteristics.

Mr. Anttila

160. Field Methods (6 units). Discussion, four hours; individual or group sessions, one to two hours. Prerequisites: courses 103, 120A, 120B, 3.5 grade-point average. Analysis of a language unknown to members of class from data elicited from a native speaker of the language.

Ms. Koopman, Ms. Munro

165A. Phonology II. (Formerly numbered C165A.) Prerequisite: course 120A (undergraduates with grade of A in course 120A may replace course 165A with 200A, with consent of instructor). Further study in phonological theory and analysis: autosegmental theory, syllable structure, metrical theory, interface of phonology and grammar.

Mr. Hayes, Ms. Steriade

165B. Linguistic Theory: Grammar. (Formerly numbered C165B.) Prerequisite: course 120B. Recommended for students who plan to do graduate work in linguistics. Form of grammars, word formation, formal and substantive universals in syntax, relation between syntax and semantics.

Ms. Koopman, Mr. Sportiche, Mr. Stowell

170. Language and Society: Introduction to Sociolinguistics. Prerequisite: course 20 or consent of instructor. Study of patterned covariation of language and society; social dialects and social styles in language; problems of multilingual societies.

175. Linguistic Change in English. Prerequisites: courses 110, 120A, 120B. Principles of linguistic change as exemplified through detailed study of history of English pronunciation, lexicon, and syntax.

Mr. Stockwell

M176A. Structure of Japanese I. (Formerly numbered M176.) (Same as Japanese CM122.) Lecture, three hours. Prerequisites: Japanese 120 or equivalent or consent of instructor, two years of Japanese. Discussion of many seemingly idiosyncratic characteristics of Japanese syntax and semantics in light of word-order typology and universal grammar, often in form of a contrastive analysis of Japanese and English.

Ms. Akatsuka

M176B. Structure of Japanese II. (Same as Japanese CM123.) Lecture, three hours. Prerequisite: two or more years of Japanese language study or consent of instructor. Survey of Japanese language at three different levels of organization: (1) word level — word class, verbal morphology and semantics; (2) clause/sentence level — tense, aspect, modality; (3) discourse level — point of view, ellipsis, topicalization.

Mr. Iwasaki

M177. Structure of Korean. (Same as Korean CM120.) Lecture, three hours. Prerequisites: two years of Korean, or one year of Korean and some knowledge of linguistics. Discussion of major syntactic, semantic, and pragmatic characteristics of Korean in light of linguistic universals, with brief introduction to formation, typological features, and phonological structure of Korean.

Ms. Sohn

C180. Survey of Mathematical Backgrounds for Linguistics. Prerequisites: courses 120A, 120B, 165B/200B (may be taken concurrently). Prior mathematics knowledge not assumed. Introduction to selected topics in set theory, logic and formal systems, modern algebra, and automata theory, with elementary applications to linguistics. Topics vary each term. Concurrently scheduled with course C208.

Mr. Keenan

C185A. Natural Language Processing I. (Formerly numbered 185.) Prerequisites: courses 120B, C180, Program in Computing 10B. Recommended: course 165B or 200B, Program in Computing 60. Survey of recent work on natural language processing, including basic syntactic parsing strategies, with brief glimpses of semantic representation, reasoning, and response generation. Concurrently scheduled with course C209A.

Mr. Stabler (W)

C185B. Natural Language Processing II. Prerequisite: course C185A/C209A or consent of instructor. Extensions of basic language processing techniques to natural language processing. Recent models of syntactic, semantic, and discourse analysis, with particular attention to their linguistic sophistication and psychological plausibility. Concurrently scheduled with course C209B.

Mr. Stabler (Sp)

195. Senior Essay. Prerequisite: consent of instructor. Limited to senior linguistics majors. Extended piece of writing is undertaken on a linguistic topic selected by the student to be completed under supervision of a faculty member. Consult professor in charge to enroll.

196A. Honors Essay. Prerequisites: 3.5 GPA, course 165A/200A or 165B/200B (may be taken concurrently). Recommended (but not required): completion of both courses 165A and 165B (or 200A and 200B) before or during term in which course 196A is taken. Draft of extended piece of writing on a linguistic topic selected by the student is prepared under supervision of a faculty member. Consult professor in charge to enroll. In Progress grading (credit to be given only on completion of course 196B).

(Sp)

196B. Honors Essay (2 units). Prerequisite: course 196A. Piece of writing drafted in course 196A is presented in a seminar, revised, and put into final form under supervision of a faculty member. Consult professor in charge to enroll.

(F)

197. Special Topics in Linguistics. Prerequisite: course 1 or 20 or consent of instructor. Variable topics selected from any undergraduate linguistics course area in which students desire greater in-depth knowledge. May be repeated for credit with topic change.

199. Special Studies in Linguistics (2 to 4 units). Prerequisites: courses 120A, 120B, consent of instructor. May be repeated for credit.

Graduate Courses

200A. Current Issues in Phonological Theory I. (Formerly numbered C200A.) Prerequisite: graduate standing in linguistics or grade of A in course 120A or equivalent course in phonology. Interaction of phonology with morphology and syntax, syllable structure, stress. Courses 200A and 201 form two-course survey of current research in phonological theory.

Mr. Hayes, Ms. Steriade

200B. Linguistic Theory: Syntax I. (Formerly numbered C200B.) Prerequisite: graduate standing in linguistics or grade of A in course 120B or equivalent course in syntax. In-depth introduction to selected topics in theory of constituent structure and syntax of predicates, arguments, and grammatical relations. Topics include levels of representation, X-bar theory, case theory, thematic roles, the lexicon, grammatical function-changing rules, head-complement relations.

Ms. Koopman, Mr. Sportiche, Mr. Stowell

201. Current Issues in Phonological Theory II. Prerequisite: course 200A. Continuation of course 200A. Second course in two-course survey of current research in phonological theory. Topics include autosegmentalism (tone, tiers, segment structure), feature theory, underspecification, prosodic morphology.

Mr. Hayes, Ms. Steriade

202. Survey of Current Issues in Language Change. Prerequisite: course 110. Survey of current theories and research problems in language change.

Mr. Anttila, Ms. Munro, Mr. Stockwell

203. Survey of Phonetic Theory. Prerequisite: course 120A. Preliminaries to speech analysis. Functional anatomy of vocal organs; fundamental principles of acoustics and of acoustic theory of speech production; issues in perception of speech; nature and design of feature systems for phonetic and phonological analysis.

Ms. Keating

204. Survey of Experimental Phonetics. Prerequisite: course 103 or equivalent. Use of laboratory equipment to investigate articulatory, acoustic, and perceptual properties of speech. Topics include experimental design and statistics; theoretical basis of acoustic structure of speech sounds; computer-based speech processing, analysis, and modeling; perceptual and acoustic evaluation of synthetic speech.

Ms. Keating

205. Survey of Current Issues in Morphological Theory. Prerequisites: courses 200A, 200B. Survey of current theories and research problems in morphology. Nature of morphological structure; derivational and inflectional morphology; relation of morphology to phonology, syntax, and the lexicon.

Mr. Hayes, Ms. Steriade

206. Linguistic Theory: Syntax II. Prerequisite: course 200B or consent of instructor. In-depth introduction to topics in theory of movement processes and topics selected from following areas: WH-movement and related rules, subjacency and other constraints on movement; ECP and related conditions on distribution of empty categories; resumptive pronoun constructions; parametric variation in movement constructions; LF WH-movement; filters; reconstruction; parasitic gaps; barriers theory; control theory; null subject parameter.

Ms. Koopman, Mr. Sportiche, Mr. Stowell

207. Survey of Formal Semantics. Prerequisite: course C180/C208 or equivalent. Survey of current approaches to model-theoretic semantics and its relation to current linguistic theory. Topics include generalized categorial grammars, Montague grammar, Boolean-based systems, generalized quantifier theory, logical form.

Mr. Keenan

C208. Survey of Mathematical Backgrounds for Linguistics. Prerequisites: courses 120A, 120B, 165B/200B. Prior mathematics knowledge not assumed. Introduction to selected topics in set theory, logic and formal systems, modern algebra, and automata theory, with elementary applications to linguistics. Topics vary each term. Concurrently scheduled with course C180. Graduate students expected to complete additional problem sets.

Mr. Keenan

C209A. Natural Language Processing I. (Formerly numbered 209.) Prerequisites: courses 120B, C180, Program in Computing 10B. Recommended: course 165B or 200B, Program in Computing 60. Survey of recent work on natural language processing, including basic syntactic parsing strategies, with brief glimpses of semantic representation, reasoning, and response generation. Concurrently scheduled with course C185A. Mr. Stabler (W)

C209B. Natural Language Processing II. (Formerly numbered 209.) Prerequisite: course C185A/C209A or consent of instructor. Extensions of basic language processing techniques to natural language processing. Recent models of syntactic, semantic, and discourse analysis, with particular attention to their linguistic sophistication and psychological plausibility. Concurrently scheduled with course C185B. Mr. Stabler (Sp)

210A. Field Methods I (6 units). Prerequisites: courses 200A, 200B, grade of B or better in course 103 or in examination on practical phonetics. Analysis of a language unknown to members of class from data elicited from a native speaker of the language. Term papers to be relatively full descriptive sketches of the language. May be repeated for credit with topic change. Ms. Koopman, Ms. Munro

210B. Field Methods II (6 units). Prerequisite: course 210A in preceding term. Because different languages are investigated in different years, course 210B can only be taken as direct continuation of 210A in same year. When there are multiple sections, continuation must be in same section. May be repeated for credit with topic change. Ms. Munro

212. Learnability Theory. (Not the same as course 212 prior to Fall Quarter 1990.) Prerequisite: course C180/C208 or consent of instructor. Survey of some of most significant results on capabilities of learners, given precise assumptions about their memory, time, and computational power, and precise assumptions about information provided by the environment. Ms. Hyams, Mr. Stabler

213. Survey of Psycholinguistics. Prerequisites: courses 200A, 200B. Survey of recent empirical and theoretical research in several subareas of psycholinguistics, including grammatical and lexical development in first language acquisition; psycholinguistic models of grammatical processing, especially syntactic parsing; brain bases for language acquisition; language breakdown. Ms. Hyams

214. Survey of Current Syntactic Theories. Prerequisite: course 206. Survey of several current syntactic theories, compared with one another and with theory discussed in course 206, from point of view of theories' relative descriptive and explanatory power. Mr. Stowell

215. Survey of Syntactic Typology. Prerequisite: course 200B. Current results in word-order universals; genetic classification of the world's languages; cross-language properties of specific construction types, including relative clauses, passives, positive and negative concord systems, agreement systems, deixis systems, and types of sentence complements. Mr. Keenan

216. Linguistic Theory: Syntax III. Prerequisite: course 206 or consent of instructor. Selected topics on syntactic theories of anaphora and quantification from the following areas: typology of binding categories (pronouns, anaphors, etc.); theory of locality conditions in binding theory; parametric variation in binding; quantifier movement; existential quantification and unselective binding; strong and weak crossover; superiority; scope interactions; complex quantifier structures. Ms. Koopman, Mr. Sportiche, Mr. Stowell

218. Survey of Formal Language Theory. Prerequisite: course C180/C208 or consent of instructor. Applications of automata and formal language theory to natural language: Chomsky hierarchy; whether natural languages are finite state, context free, context sensitive; categorial grammar, indexed grammar, ID/IP grammar, tree adjoining grammar, feature systems, languages as models of first-order theories. Mr. Keenan, Mr. Stabler

220. Linguistic Areas. Prerequisites: courses 120A, and 120B or 127. Recommended: courses 165A/200A, 165B/200B. Analysis and classification of languages spoken in a particular area (e.g., Africa, the Balkans, South Asia, Southeast Asia, Australia, Aboriginal North America, Aboriginal South America, Far East, etc.). May be repeated for credit with topic change.

225. Linguistic Structures. Prerequisites: courses 120A, and 120B or 127. Recommended: courses 165A/200A, 165B/200B. Phonological and grammatical structure of a selected language and its genetic relationships to others of its family. May be repeated for credit with topic change.

230. History of Linguistics. Prerequisites: courses 200A, 200B. Aspects of history of linguistics. Different course offerings may deal with different areas of linguistics (e.g., phonology, syntax) or with different historical periods. May be repeated for credit with topic change.

C235. Theoretical Issues in Disorders of Language Development. Prerequisites: courses 1 or 20, and 130, or consent of instructor. Introduction to the field of language disorders of children. Some clinical syndromes which are associated with delayed or deviant language acquisition: aphasia, autism, mental retardation. Theories regarding etiology and relationship of these disorders to each other. Such questions as relationship of cognition to linguistic ability. Concurrently scheduled with course C135. Graduate students expected to apply more sophisticated knowledge and produce research paper of greater depth. Ms. Curtiss

M246C. Topics in Linguistic Anthropology. (Same as Anthropology M241.) Prerequisite: consent of instructor. Problems in relations of language, culture, and society. May be repeated for credit.

Proseminars numbered 251 through 254 may be taken for either two or four units. If a proseminar is taken for four units, a paper is required. Proseminars and seminars numbered 251 and above may be repeated for credit, having been approved by the Graduate Council as nonrepetitive in content.

251. Topics in Phonetics and Phonology I: Proseminar (2 or 4 units). Lecture, four hours. Prerequisite: course 200A. Course 201, 203, or 204 may be required. Specialized topics in phonetics and phonology. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. Meets with course 256A. May be repeated for credit. S/U (two-unit course) or letter (four-unit course) grading.

252. Topics in Syntax and Semantics I: Proseminar (2 or 4 units). Lecture, four hours. Prerequisite: course 200B. Course 206, 207, 214, 215, or 216 may be required. Specialized topics in syntax and semantics. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. Meets with course 257A. May be repeated for credit. S/U (two-unit course) or letter (four-unit course) grading.

253. Topics in Language Variation I: Proseminar (2 or 4 units). Prerequisite: course 110. Course 202 may be required. Specialized topics in language variation. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. Meets with course 258A. May be repeated for credit. S/U (two-unit course) or letter (four-unit course) grading.

254. Topics in Linguistics I: Proseminar (2 or 4 units). Lecture, four hours. Prerequisites: courses 200A, 200B, consent of instructor. Course 201, 202, 203, 204, 205, 206, 207, C208, C209A, C209B, 212, 213, 214, 215, 216, or 218 may be required. Individual proseminars on topics such as child language, sociolinguistics, neurolinguistics, computational linguistics, psycholinguistics, etc. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. Meets with course 259A. May be repeated for credit. S/U (two-unit course) or letter (four-unit course) grading.

256A. Topics in Phonetics and Phonology II: Proseminar. Prerequisite: course 200A. Course 201, 203, or 204 may be required. Specialized topics in phonetics and phonology. May be repeated for credit. Meets with course 251. In Progress grading (credit to be given only on completion of course 256B).

256B. Topics in Phonetics and Phonology II: Proseminar (2 units). Prerequisite: course 256A. Specialized topics in phonetics and phonology. May be repeated for credit.

257A. Topics in Syntax and Semantics II: Proseminar. Prerequisite: course 200B. Course 206, 207, 214, 215, or 216 may be required. Specialized topics in syntax and semantics. May be repeated for credit. Meets with course 252. In Progress grading (credit to be given only on completion of course 257B).

257B. Topics in Syntax and Semantics II: Proseminar (2 units). Prerequisite: course 257A. Specialized topics in syntax and semantics. May be repeated for credit.

258A. Topics in Language Variation II: Proseminar. Prerequisite: course 110. Course 202 may be required. Specialized topics in language variation. May be repeated for credit. Meets with course 253. In Progress grading (credit to be given only on completion of course 258B).

258B. Topics in Language Variation II: Proseminar (2 units). Prerequisite: course 258A. Specialized topics in language variation. May be repeated for credit.

259A. Topics in Linguistics II: Proseminar. Prerequisites: courses 200A, 200B, consent of instructor. Course 201, 202, 203, 204, 205, 206, 207, C208, C209A, C209B, 212, 213, 214, 215, 216, or 218 may be required. Individual proseminars on topics such as child language, sociolinguistics, neurolinguistics, computational linguistics, psycholinguistics, etc. May be repeated for credit. Meets with course 254. In Progress grading (credit to be given only on completion of course 259B).

259B. Topics in Linguistics II: Proseminar (2 units). Prerequisite: course 259A. Individual proseminars on topics such as child language, sociolinguistics, history of linguistic theory, neurolinguistics, languages of the world, psycholinguistics, etc. May be repeated for credit.

Seminars numbered 260A through 264C may be taken for either two or four units. If a seminar is taken for four units, an oral presentation is required. Seminars may be taken for two units credit only by students who have been formally admitted to the doctoral program. All others must enroll for four units.

260A-260B-260C. Seminars: Phonetics (2 or 4 units each). Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

261A-261B-261C. Seminars: Phonology (2 or 4 units each). Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

262A-262B-262C. Seminars: Syntax and Semantics (2 or 4 units each). Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

263A-263B-263C. Seminars: Language Variation (2 or 4 units each). Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

264A-264B-264C. Seminars: Special Topics in Linguistic Theory (2 or 4 units each). Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. Special topics may include child language, neurolinguistics, psycholinguistics, sociolinguistics, etc. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

275. Linguistics Colloquium. Prerequisite: completion of M.A. requirements. Varied linguistic topics, generally presentations of new research by students, faculty, and visiting scholars. S/U grading.

276. Linguistics Colloquium (No credit). Prerequisite: graduate standing. Same as course 275, but taken without credit by students not presenting a colloquium. S/U grading.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

403. Practical Phonetics Training (1 unit). Extensive practice in production, perception, and transcription of sounds from a wide range of languages. Concurrently scheduled with practical sections of course 103. S/U grading. Ms. Keating

411A-411B. Research Orientation (2 units each). (Formerly numbered 411A-411B-411C, 433.) Prerequisite: graduate standing. Sequence of lectures by department faculty to acquaint new graduate students with research directions and resources of department and elsewhere on campus. May not be applied toward M.A. or Ph.D. degree requirements. S/U grading.

(F,W)

422. Practicum: Phonetic Data Analysis (2 units). Prerequisite: graduate standing. Workshop in examination of phonetic data, such as sound spectrograms, oscillographic records, and computer output. May not be applied toward M.A. or Ph.D. degree requirements. S/U grading. Ms. Keating

444. M.A. Thesis Preparation Seminar. Student presentations, two hours. Student presentations of proposed topics for M.A. theses, with discussion and criticism by other students and faculty. May not be applied toward M.A. or Ph.D. degree requirements. S/U grading.

495. College Teaching of Linguistics (2 units). Prerequisite: graduate standing. Required of all new teaching assistants. Seminars, workshops, and apprentice teaching. Selected topics, including curriculum development, various teaching strategies and their effects, teaching evaluation, and other topics on college teaching. Students receive unit credit toward full-time equivalence but not toward any degree requirements. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596A. Directed Studies (1 to 8 units). Prerequisite: completion of all undergraduate deficiency courses. Directed individual study or research. May be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

596B. Directed Linguistic Analysis (1 to 8 units). Prerequisite: completion of M.A. degree requirements. Intensive work with native speakers by students individually. May be repeated for credit. S/U grading.

597. Preparation for M.A. Comprehensive and Ph.D. Qualifying Examinations (1 to 8 units). Prerequisite: at least six graduate courses in linguistics. May be taken only in terms in which students expect to take comprehensive or qualifying examination. May not be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

598. Research for M.A. Thesis (1 to 8 units). Prerequisite: consent of guidance committee chair. Research and preparation of M.A. thesis. May not be applied toward M.A. course requirements. May be repeated for a maximum of eight units. S/U grading.

599. Research for Ph.D. Dissertation (1 to 16 units). Prerequisite: advancement to Ph.D. candidacy. May not be applied toward Ph.D. course requirements. May be repeated for credit. S/U grading.

African Languages

Lower Division Courses

1A-1B-1C. Elementary Swahili. Lecture, five hours. Major language of East Africa, particularly Tanzania. Mr. Hinnebusch

2A-2B-2C. Intermediate Swahili. Prerequisites: courses 1A-1B-1C or consent of instructor. Mr. Hinnebusch

7A-7B-7C. Elementary Zulu. Lecture, five hours. Most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group. Mr. Kunene

8A-8B-8C. Intermediate Zulu. Prerequisites: courses 7A-7B-7C or consent of instructor. Mr. Kunene

11A-11B-11C. Elementary Yoruba. Lecture, five hours. Prerequisite: consent of instructor. Major language of Western Nigeria.

12A-12B-12C. Intermediate Yoruba. Prerequisites: courses 11A-11B-11C or consent of instructor.

31A-31B-31C. Elementary Bambara. Lecture, five hours. Prerequisite: consent of instructor. Major language of Mali, also widely spoken in adjacent parts of West Africa; includes Maninka (Malinke), Dyula, and other mutually intelligible dialects. Ms. Koopman

32A-32B-32C. Intermediate Bambara. Prerequisites: courses 31A-31B-31C or consent of instructor. Ms. Koopman

41A-41B-41C. Elementary Hausa. Lecture, five hours. Major language of Northern Nigeria and adjacent areas. Mr. Schuh

42A-42B-42C. Intermediate Hausa. Prerequisites: courses 41A-41B-41C or consent of instructor. Mr. Schuh

51A-51B-51C. Elementary Amharic. Lecture, five hours (15 hours for intensive course). Major language of Ethiopia. P/NP (undergraduates), S/U (graduates), or letter grading.

52A-52B-52C. Intermediate Amharic. Lecture, five hours (15 hours for intensive course). Prerequisites: courses 51A-51B-51C or consent of instructor. P/NP (undergraduates), S/U (graduates), or letter grading.

61A-61B-61C. Elementary Wolof. Lecture, five hours. Major language of Senegambia. Mr. Schuh

62A-62B-62C. Intermediate Wolof. Prerequisites: courses 61A-61B-61C or consent of instructor. P/NP or letter grading. Mr. Schuh

97. Elementary and Intermediate Studies in African Languages (1 to 6 units). Prerequisite: consent of instructor. Instruction at elementary or intermediate level, based on needs of students, in any language for which appropriate facilities are available. Those taught in past included Akan, Efik, Ewe, Fula, Igbo, Lingala, Luganda, Wolof, and Xhosa.

Upper Division Courses

103A-103B-103C. Advanced Swahili. Prerequisites: courses 2A-2B-2C or consent of instructor. Readings in Swahili literature and the contemporary press. Discussions mainly in Swahili. Mr. Hinnebusch

123A-123B-123C. Advanced Yoruba. Prerequisites: courses 12A-12B-12C or consent of instructor. Readings in Yoruba literature and the contemporary press. Discussions mainly in Yoruba.

133A-133B-133C. Advanced Bambara. Prerequisites: courses 32A-32B-32C or consent of instructor. Readings in Bambara literature and the contemporary press. Discussions mainly in Bambara. Ms. Koopman

143A-143B-143C. Advanced Hausa. Prerequisites: courses 42A-42B-42C or consent of instructor. Readings in Hausa literature and the contemporary press. Discussions mainly in Hausa. Mr. Schuh

150A-150B. African Literature in English Translation. Prerequisite: History 10A or 10B. Course 150A is prerequisite to 150B. Narrative and didactic oral prose and poetry of sub-Saharan Africa and written prose and poetry of South Africa. Mr. Kunene

153A-153B-153C. Advanced Amharic. Lecture, five hours (15 hours for intensive course). Prerequisites: courses 52A-52B-52C or consent of instructor. Readings in Amharic literature and the contemporary press. Discussions mainly in Amharic. P/NP (undergraduates), S/U (graduates), or letter grading.

190. Survey of African Languages. Introduction to languages of Africa, their distribution and classification, and their phonological and grammatical structures; illustrations from several representative languages, with appropriate language laboratory demonstrations and drills. Ms. Koopman

199. Special Studies in African Languages (1 to 6 units). Prerequisite: consent of instructor. Instruction at advanced level or supervised research, based on needs of individual students, in any language or group of languages for which appropriate facilities are available.

Graduate Courses

202A-202B-202C. Comparative Bantu. Prerequisites: Linguistics 110, 165A, 165B. Recommended: three quarter courses in one Bantu language selected from courses 1A through 8C, 199. Investigation of relationships among the Bantu languages; extent and external relationships of Bantu. Mr. Hinnebusch

270. Seminar: African Literature. Mr. Kunene

596. Directed Studies (1 to 8 units). Directed individual study or research. Four units may be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

Indigenous Languages of the Americas

Lower Division Courses

10A-10B-10C. Elementary Nahuatl. Lecture, five hours. Language of the Aztecs. Mr. Bedell

18A-18B-18C. Elementary Quechua. Lecture, five hours. Language of the Incas and its present-day dialects, as spoken in Andean South America.

Upper Division Courses

119A-119B-119C. Advanced Quechua. Prerequisites: courses 18A-18B-18C or consent of instructor. Readings in Quechua. Dialectal and stylistic variation. Discussions mainly in Quechua. Mr. Bedell

Graduate Course

596. Directed Studies in Quechua (1 to 8 units). Prerequisites: courses 119A-119B-119C or consent of instructor. Directed individual study or research in Quechua. Four units may be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

Related Courses in Other Departments (Other than Language Courses)

- Anthropology** 143. Field Methods in Linguistic Anthropology
- Armenian (Near Eastern Languages)** 210. History of the Armenian Language
- Dutch (Germanic Languages)** 234. Structure of Modern Standard Dutch
- English** 121. History of the English Language
122. Introduction to Structure of Present-Day English
210. History of the English Language
218. Celtic Linguistics

 Shanshuang Yang, Ph.D. (*Hedrick*)
 Shun-Hui Zhu, Ph.D. (*Hedrick*)

Scope and Objectives

Gauss has called mathematics the "Queen of the Sciences." It has provided powerful intellectual tools that have made possible tremendous advances in modern science and technology. The Department of Mathematics aims to provide courses of study that introduce students to the fundamentals of mathematics and allow them to master the most important parts of the subject, both pure and applied. It leads doctoral students to the frontiers of mathematical research, where they can begin to push back those frontiers.

Undergraduate Study**Preliminary Examination in Mathematics**

If you wish to enroll in Mathematics 1, 3A, or 31A, you must pass the Mathematics Diagnostic Test.

This examination may be taken at any one of several times, including all sessions of the summer Orientation Program. It will also be given on Monday, September 24, 1992, for Fall Quarter 1992; Wednesday, November 18, 1992, for Winter Quarter 1993; and Wednesday, March 3, 1993, for Spring Quarter 1993. For information, contact the Mathematics Student Services Office, 6356 Math Sciences.

Advanced Placement in Calculus

Students who have taken the Advanced Placement (AP) Calculus AB Test and obtained a score of 4 or 5 receive four units of credit and Mathematics 31A equivalency; those with a score of 3 receive four units of calculus and analytic geometry credit. You may petition for 31A equivalency, or you may take course 31A at UCLA. Students who take the BC Test and obtain a score of 4 or 5 receive eight units of credit and Mathematics 31A, 31B equivalency; those with a score of 3 receive eight units of calculus and analytic geometry credit. You may petition for 31A, 31B equivalency, or you may take courses 31A, 31B at UCLA.

If you received a score of 3 on the AB or BC examination, you should consult the undergraduate mathematics counselor prior to enrolling in a calculus course at UCLA. If you had calculus in high school but do not have Advanced Placement Test credit, you may take beginning calculus (Mathematics 3A or 31A), or you may seek advanced placement by passing examinations in the subject. Consult the Student Services Office for further details.

Credit Limitations

Credit is given for at most one course in each of the following groups: (1) 3A, 31A, 31AH, 31AQ; (2) 3B, 3E (if completed Fall Quarter 1987 and thereafter), 31B, 31BH, 31BQ; (3) 3C, 3E (if completed prior to Fall Quarter 1987); (4) 3C, 32A, 32AH, 32AQ; (5) 110A, 117; (6) 132, 132H; (7) 140A, 141A; (8) M150A, Statistics M152A, 154A.

Mathematics 2, 38A, 38B, and Statistics 50 are not open for credit to students with credit for any course from Mathematics 110A through 199.

Mathematics 140A-140B-140C and 141A-141B are not open for credit to students with credit for Electrical Engineering 103.

Mathematics M150A and Statistics M152A are not open for credit to students with credit for Electrical Engineering 131A.

You may not take a mathematics course for credit if you have credit for a more advanced course which has the first course as a prerequisite. This applies in particular to the repetition of courses (e.g., if you wish to repeat Mathematics 31B, you must do so before completing course 32A).

Pre-Mathematics Major

All students who wish to enter one of the majors offered by the Mathematics Department must first register as pre-mathematics majors. After completing all required preparation courses for the major of your choice and before accumulating a total of 135 quarter units, you should apply for admission to the major by filing a change of major petition in the Student Services Office, 6356 Math Sciences. Transfer students must have completed a minimum of three preparation for the major and major courses at UCLA before petitioning to enter the major.

Admission Requirements — Students entering UCLA directly from high school who declare themselves as pre-mathematics majors at the time they apply for admission are automatically admitted as such.

UCLA students who wish to enter the pre-mathematics major must have a minimum grade of C- in each preparation for the major course completed and a combined grade-point average of at least 2.0 in those courses. Grades in any completed major courses must also average at least 2.0. Students with 60 or more units of credit must have completed at least 12 units of calculus to enter the pre-mathematics major.

Transfer students must have a minimum grade of C in the equivalent of each preparation for the major course completed. Those transferring with 60 or more quarter units of credit must have completed at least 12 quarter units of calculus to enter the pre-mathematics major.

Undergraduate Majors

The Mathematics Department offers five majors: mathematics, applied mathematics, mathematics of computation, mathematics/applied science, and general mathematics.

The mathematics major is designed for students whose basic interest is mathematics; the applied mathematics major for those interested in the classical relationship between mathematics, the physical sciences, and engineering; the mathematics of computation major for individuals interested in the mathematical theory and the applications of computing; the mathematics/applied science major for those with substantial interest in the applications of mathematics to a particular outside field of interest; and the general mathematics major for students planning to teach mathematics at the high school level. As part of the mathematics/applied science major, the department offers programs for students interested in the fields of actuarial science and operations research.

Courses taken to fulfill any of the requirements for any of the mathematics majors must be taken for a letter grade.

If you plan to pursue graduate study in mathematics, you are strongly encouraged to take a three-term sequence of graduate-level courses during your senior year.

Bachelor of Science in Mathematics**Preparation for the Major**

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Physics 8A, 8C, and one additional course from Physics 8B, 8D, 8E, Chemistry and Biochemistry 11A, 11B. Each course must be passed with a minimum grade of C-, and you must have a minimum overall GPA of 2.0 for the courses.

The Major

Required: Mathematics 110A-110B, 115A, 120A, 131A-131B, 132, and at least five additional courses from 106 through 199 and Statistics M152A through 154B. The 12 courses must be passed with a minimum overall GPA of 2.0.

Bachelor of Science in Applied Mathematics**Preparation for the Major**

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Physics 8A, 8C, and one additional course from Physics 8B, 8D, 8E, Chemistry and Biochemistry 11A, 11B. Each course must be passed with a minimum grade of C-, and you must have a minimum overall GPA of 2.0 for the courses.

The Major

Required: Mathematics 115A, 131A, either 131B or 132, 142; two two-term sequences from two of the following categories: *numerical analysis* — courses 140A-140B or 141A-141B, *probability and statistics* — courses M150A-150B or Statistics M152A and 152B or 154A-154B, *differential equations* — courses 135A-135B; four additional courses from 110A

through 199 and Statistics M152A through 154B (appropriate courses from other departments may be substituted for some of the additional courses provided departmental consent is given before such courses are taken). The 12 courses must be passed with a minimum overall GPA of 2.0.

Bachelor of Science in Mathematics of Computation

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Program in Computing 10A, 10B, 10C or 30, Physics 8A, 8C, and one additional course from Physics 8B, 8D, 8E, Chemistry and Biochemistry 11A, 11B. Each course must be passed with a minimum grade of C-, and you must have a minimum overall GPA of 2.0 for the courses.

The Major

Required: Eleven Mathematics Department courses, including Mathematics 115A, 117, 131A, two additional courses from 110A through 199 and Statistics M152A through 154B, and six courses from *Plan A (scientific computing)* — courses 131B or 132, 140A-140B-140C, and 135A-135B or 145/146, or *Plan B (computation theory)* — courses 114A-114B-114C and 118A-118B-118C, or *Plan C (computational statistics)* — courses 140A or 141A, M150A or Statistics M152A, Statistics 152B-152C, and M153A-M153B; three upper division computer science courses (12 units).

Bachelor of Science in Mathematics/Applied Science

The major is designed for students with a substantial interest in mathematics and its applications to a particular field. It is an individual major in that students, in consultation with a faculty adviser, design their own program. You may also select one of the established programs: the actuarial plan, the mathematics/economics plan, or the operations research plan. In the past, mathematics/applied science majors have combined the study of mathematics with fields such as physics, biology, chemistry, biochemistry, economics, and geography.

If you are interested in designing an individual program, you should meet with the undergraduate adviser, 6356 Math Sciences, during your sophomore year. A proposed program is drawn up, then forwarded to the mathematics/applied science curriculum committee for approval. All programs must include the following preparation for the major and major courses.

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A. Each course must be passed with a minimum grade

of C-, and you must have a minimum overall GPA of 2.0 for the courses. Additional preparation, varying with the individual program, may be required.

The Major

Required: Fourteen courses, seven in the Mathematics Department selected from Mathematics 110A through 199 and Statistics M152A through 154B and seven upper division courses in a related field selected from one or two other departments. The seven Mathematics Department courses must be passed with an overall GPA of 2.0, as must the seven courses outside mathematics.

At least five of the courses from the related discipline must be taken after the program has been approved. If you will have 135 or more units by the end of the term in which you plan to enter the program, you will not be admitted to the major.

Actuarial Plan

Preparation for the Major: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Economics 1 and 2, or 100. Economics 100 may not be applied as one of the upper division courses for the major. You must have a minimum overall 2.5 GPA in the six calculus courses.

The Major: Seven Mathematics Department courses, including Mathematics 115A, 140A or 141A, 144, M150A-150B or Statistics M152A and 152B or 154A-154B, and two courses from 113, 140B or 141B, 151, Statistics 152C, M153A; seven outside courses, including Economics 101A, 101B, 102, 147A, 160, and two additional courses from Management 130, 190, English 131A through 131J, Economics 145 through 199.

Mathematics/Economics Plan

Preparation for the Major: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Economics 1, 2, Program in Computing 10A.

The Major: Seven Mathematics Department courses, including Mathematics 110A or 117, 115A, 131A, 144, M150A or Statistics M152A or 154A, Statistics 152B or 154B, and one additional course from 110A through 199 and Statistics M153A, M153B; seven economics courses, including Economics 101A, 101B, 102, and four additional upper division courses, with at least three from 105AH, 105BH, and 141 through 147B.

Operations Research Plan

Preparation for the Major: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Economics 1 and 2, or 100, Management 1A, Program in Computing 10A, 10B, and two courses from 10C, 15, 30, 60.

The Major: Seven courses in the Mathematics Department and seven in economics and management. Consult the department for recommended courses. Programs are designed so that students in this plan qualify for a specialization in computing.

Bachelor of Science in General Mathematics

The major is designed primarily for students planning to teach mathematics at the high school level. It provides exposure to a broad range of mathematical topics, especially those appropriate for the prospective teacher. Students planning to pursue graduate studies in mathematics or related fields are encouraged to enter the mathematics, applied mathematics, or mathematics of computation major.

Preparation for the Major

Required: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Program in Computing 10A, and three courses from the Physics 6 or 8 sequence, the Chemistry and Biochemistry 11 sequence, or Program in Computing 10B, 10C, 30, 60. Each course must be passed with a minimum grade of C-, and you must have a minimum overall GPA of 2.0 for the courses.

The Major

Required: Mathematics 106, 110A or 117, 115A, 123, M150A or Statistics M152A or 154A, one course from 131A through 136, one course from 140A through 147, and five additional courses from 110A through 199, 370, and Statistics M152A through 154B.

Specialization in Computing

Majors in mathematics, applied mathematics, mathematics/applied science, or general mathematics may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, and two courses from 10C, 15, 30, 60, and Mathematics 61 or 113, with a minimum grade of C- in each course and a combined GPA of at least 2.0, and (3) completing at least two courses from Mathematics 141A, 141B, 149, 149HS. You must petition for admission to this program and are advised to do so after you complete Program in Computing 10B (petitions should be filed in the Student Services Office). You graduate with a bachelor's degree in your major and a specialization in computing.

Honors

Honors Courses

The department offers a lower division honors sequence in calculus and upper division honors sequences in algebra and analysis. The sequences are intended for students (not necessarily mathematics majors) who desire a broad, comprehensive introduction to these topics. Call the department (206-1286) for further details.

Honors Program

Students majoring in mathematics, applied mathematics, and mathematics of computation who wish to graduate with departmental honors should apply for admission to the honors program in the Student Services Office. You may apply any time after completing four courses from the calculus sequence or from upper division mathematics courses with an overall GPA of 3.6 or better. The program entails taking a specified sequence of courses as part of your major requirements, completing an approved seminar offered by the Mathematics Department or submitting an original research project, and earning an overall GPA of at least 3.6 in approved upper division and graduate mathematics courses.

If you complete the program, you are awarded honors at graduation; if you demonstrate exceptional achievement (i.e., at least a 3.8 GPA in upper division mathematics courses taken for the major), you are awarded highest honors. Consult the department for further information.

Graduate Study

Admission

Prospective graduate students in mathematics need not have an undergraduate mathematics major, but they should have completed at least 12 quarter courses (or eight semester courses) in substantial upper division mathematics — particularly algebra, differential equations, analysis, and differential or projective geometry. For admission to a master's degree program, you must have earned in those upper division mathematics courses a cumulative grade-point average of at least 3.2; for direct admission to the doctoral program, at least 3.5.

If you have already obtained a master's degree, you must have maintained an average of better than 3.6 in graduate study.

You must take the Graduate Record Examination (GRE) General Test and Subject Test in Mathematics and must submit three letters of recommendation from mathematicians who know your recent work.

Applications are available from the Graduate Adviser, Department of Mathematics, 6356 Math Sciences, UCLA, Los Angeles, CA 90024-1555.

Master of Arts Degree

You may earn the M.A. degree in Mathematics under the comprehensive examination plan, either in the basic (*pure mathematics*) program, in an interdisciplinary program in *applied mathematics*, or in *statistics*.

Foreign Language Requirement

There is no foreign language requirement for master's students.

Course Requirements

Eleven courses are required for the M.A. degree, of which at least eight must be graduate courses, while the remaining three may be approved upper division courses. Each course must be passed with a grade of B or better. With consent of the graduate vice chair, students in the applied mathematics and statistics programs may take up to five of the required 11 courses in other departments, provided that these courses are in professional or scientific fields closely related to research in applied mathematics or statistics respectively.

You may enroll in Mathematics 596 any number of times and may apply up to two 596 courses toward the 11-course requirement for the M.A., provided you receive a B or better in these courses (not the grade S).

Comprehensive Examination Plan

You must pass two written qualifying examinations at the M.A. level within seven terms of full-time study. By program, the following examinations are required: (1) *pure mathematics* — algebra and either real analysis or complex analysis; (2) *applied mathematics* — one in real analysis or complex analysis and one in numerical analysis or applied differential equations; (3) *statistics* — two from probability, theoretical statistics, or applied statistics.

These examinations are offered early in Fall Quarter and toward the end of Spring Quarter. You may take one or both of the examinations at one sitting and may retake them any number of times until you pass them.

Master of Arts in Teaching

The M.A.T. program serves the needs of present and prospective mathematics teachers in high school and junior college.

Foreign Language Requirement

There is no foreign language requirement for M.A.T. students.

Course Requirements

Eleven courses are required, as follows.

Core Courses — You must take Mathematics 201A-201B-201C and 202A-202B. Normally, you also take one term of course 596 while fulfilling the essay requirement described below.

Credential Requirements — If you plan to teach in secondary schools and do not already have valid credentials for such teaching, you should enroll in the single subject instructional credential program in the Graduate School of Education. Of the courses required by this program, you may receive M.A.T. credit only for the following: Education 100, 112, 312, 330A, 330B. Actual receipt of the credential is not a degree requirement. You should check with the Graduate School of Education for a full and up-to-date description of credential requirements and should submit a Graduate School of Edu-

cation application for admission to the credential program.

Additional Courses — Besides the six core courses described above, you must take a seventh upper division or graduate course in mathematics. Particularly recommended are Mathematics 106, 110B, 110C, 111A, 111B, 131B, 135A, and Statistics 152B. Candidates on the junior college track normally take five 100- or 200-level courses in mathematics in addition to the six core courses. However, with prior approval of the graduate vice chair, such students may present for degree credit one course of a predominantly mathematical nature taken in another department.

You may not receive degree credit for Mathematics 104 or 370. In addition, you may not receive degree credit for more than two terms of course 596 or for more than two terms of any 300-series courses.

Essay Requirement — You must prepare a master's essay on some subject in mathematics related to your prospective teaching. You write this under the direction of a faculty member while enrolled in Mathematics 596.

Teaching Experience

Teaching experience is not a formal requirement for the M.A.T. degree, although students working for a secondary credential must take the supervised teaching course. M.A.T. students are eligible for teaching assistantships.

Comprehensive Examination Plan

In the M.A.T. program, you take one examination in mathematical subject matter and one in content and philosophy of secondary school mathematics. Ordinarily, these are administered in conjunction with Mathematics 201A-201B-201C and 202A-202B. Reexamination after failure is allowed.

Ph.D. Degree

Students may earn the Ph.D. degree in Mathematics at UCLA either in the classical (*pure mathematics*) program, in an interdisciplinary program in *applied mathematics*, or in *statistics*. There are many possible choices of fields within these programs, and you are urged to read the booklet, *Graduate Studies in Mathematics at UCLA*, where the specialties of the faculty and the active research areas in the department are described in some detail.

Language Requirement

Prior to advancement to candidacy, you must fulfill one of the following requirements:

(1) *Foreign Language Requirement* — You must pass two written departmental language examinations, at least one of which must be in French, German, or Russian. In order to take an alternate non-English examination such as Italian, you must petition to the graduate vice chair. International students whose principal language of instruction in elementary and sec-

ondary education was not English may substitute English for one of the foreign languages.

(2) Foreign Language/Computer Project Requirement (for students in the applied program only) — You must pass one written departmental language examination in either French, German, or Russian and complete a computer language project approved by the graduate vice chair.

The foreign language examinations, offered each term, require the translation of material in some basic field of mathematics (a dictionary may be used). They may be retaken any number of times until passed. One of the examinations must be passed within seven terms of registered full-time study, the second within 13 terms. In any event, one language examination must be passed before you take the first oral qualifying examination.

Course Requirements

In the pure mathematics and statistics programs, you must pass (with a grade of A or B) at least 12 courses from Mathematics 205A through 285L, but excluding the basic courses 210A-210B, 245A-245B, and 246A-246B. At most, three of these courses may be in the 285 series. You must also satisfy a *seminar participation requirement* by participating actively in at least two advanced seminars (normally you lecture twice for a total of 90 minutes). Credit for one seminar must be obtained within three registered terms after passing the written qualifying examinations, the other within five terms.

In the applied mathematics program, you must pass (with a grade of A or B) at least 18 approved graduate courses, including at least 12 courses from Mathematics 205A through 285L. At most, three of these may be in the 285 series.

Qualifying Examinations

You must pass four written qualifying examinations, at least two of which must be passed at the Ph.D. level. One examination (any level) must be passed within three terms of full-time study, three examinations must be passed within six terms of full-time study, and all four examinations must be passed within seven terms of full-time study. Students in the applied mathematics program are allowed to substitute an outside examination (at the M.A. level) for one of the regular departmental examinations. By program, the following examinations are required: (1) *pure mathematics* — algebra and real analysis (either one or both may be passed at the M.A. level, subject to the above restriction on the number of M.A. passes); (2) *applied mathematics* — real analysis and either numerical analysis or applied differential equations; (3) *statistics* — real analysis and probability at the M.A. level; theoretical statistics and applied statistics at the Ph.D. level. These examinations are offered early in Fall Quarter and toward the end of Spring Quarter.

After passing the four qualifying examinations, you may set up the doctoral committee which administers the University Oral Qualifying Examination for advancement to candidacy.

Candidate in Philosophy Degree

You are eligible to receive the C.Phil. degree on advancement to candidacy for the Ph.D.

Final Oral Examination

The final oral examination may be waived by the doctoral committee, with the approval of the graduate vice chair.

Program in Computing

Program in Computing 1 is designed for students who wish a broad, general introduction to the topic of computers and computation. It is strongly recommended for those who wish to take course 3 or 10A, but who have no prior experience in computing.

Students who would like one course in programming should take either course 3 (uses FORTRAN) or 10A (uses PASCAL), depending on the advice of their major department.

The sequence (courses 10A, 10B, 10C, 30, 60) provides an extensive education in basic computer science. It is intended for Letters and Science majors who are completing a specialization in computing and for those planning to take upper division coursework in computer science. These students should take all or part of the sequence, depending on the advice of their major department.

Lower Division Courses

1. Introduction to Computers and Computing. Lecture, three hours; laboratory, one hour; computer assignments, five hours. Fundamentals of computers and computing; applications software, editors, spreadsheets, file manager; machine organization and computer hardware. Brief introduction to programming.

3. Introductory FORTRAN Programming (5 units). Lecture, three hours; discussion, two hours; laboratory, eight hours. Students with credit for course 10A will receive only two units of credit for this course. Basic principles of programming, using FORTRAN as example language. Terminal course intended for physical sciences and engineering majors who need to use the extensive library of existing FORTRAN programs. Students who wish to take more advanced program in computing courses should take course 10A rather than this course.

10A. Introduction to Programming (5 units). Lecture, three hours; discussion, two hours; laboratory, eight hours. Recommended prerequisite for students with no prior computing experience: course 1. Students with credit for course 3 will receive only two units of credit for this course. Basic principles of programming, using PASCAL as example language: algorithmic, procedural problem solving; program design and development; control structures and data structures; human factors in programming and program design.

10B. Intermediate Programming (5 units). Lecture, three hours; discussion, two hours; laboratory, eight hours. Prerequisite: course 10A. Arrays, pointers, classes; abstract data types, object-oriented programming; text processing, recursion, linked lists, stacks, queues, trees, and applications. Example language to be C++.

10C. Advanced Programming (5 units). Lecture, three hours; discussion, two hours; laboratory, eight hours. Prerequisite: course 10B. Sorting and searching; lexical analysis and parsing; algorithmic analysis; programming in UNIX environment.

15. Introduction to LISP and Symbolic Computation (5 units). Lecture, three hours; discussion, two hours; laboratory, eight hours. Prerequisite: course 1. Introduction to symbolic computation using LISP programming language. Basics: list structures, recursion, function abstraction. Advanced topics: knowledge representation, higher-order functions, problem-solving algorithms and heuristics. P/NP or letter grading.

30. Machine Organization and Assembly Language Programming (5 units). Lecture, three hours; discussion, two hours; laboratory, eight hours. Prerequisite: course 10B. Not open for credit to students with credit for former Computer Science 30. Description of machine organization and operation. Representation of information, instruction sets and formats, addressing modes, memory organization and management, I/O processing and interrupts.

60. Data Structures and Algorithms. Lecture, three hours; discussion, one hour; computer terminals, 10 hours. Prerequisites: course 10B, Mathematics 31A, 31B, 61. Review of basic data structures: arrays, stacks, queues, lists, trees. Advanced data structures: priority queues, heaps, balanced trees. Sorting, searching techniques. Corresponding algorithms.

97. Special Topics in Programming. Lecture, three hours; discussion, one hour. Prerequisite: course 10A. Variable topics in programming not covered in regular program in computing courses. May be repeated for credit with topic change. P/NP or letter grading.

Upper Division Courses

110. Introduction to Concurrent Computation. Lecture, three hours; discussion, two hours; laboratory, 10 hours. Prerequisite: course 10C or equivalent familiarity with programming in C language. Introduction to programming of concurrent (parallel) computers. Shared and distributed memory parallel architectures; currently available concurrent machines; parallel algorithms and development of concurrent programs; estimation of algorithmic performance; selected advanced topics.

197. Advanced Topics in Programming. Lecture, three hours; discussion, two hours. Prerequisite: consent of instructor. Variable topics in programming and the mathematics of programming not covered in regular program in computing courses. May be repeated for credit with topic change. P/NP or letter grading.

Graduate Courses

285. Seminar: Logic and Theory of Computation. Prerequisite: consent of instructor. Topics in various aspects of logic and theory of computation. Course is considered equivalent to a Mathematics 285 course for purpose of degree requirements.

286. Participating Seminar: Logic and Theory of Computation (No credit). Prerequisite: consent of instructor. Seminar and discussion by staff and students. No course credit is given, but course may be used to satisfy participating seminar requirement for Ph.D. in Mathematics. S/U grading.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

Mathematics

Lower Division Courses

A. Intermediate Algebra (No credit). Lecture, five hours. Mathematics A displaces four units on student's Study List but yields no credit toward degree. May not be applied toward Letters and Science general education requirements. Not open to students with credit for other mathematics courses. Designed for students requiring review of elementary and intermediate algebra. Arithmetical operations on real numbers, algebraic notation, polynomials, rational exponents, linear and quadratic equations and inequalities, coordinate geometry. (F,W,Sp)

1. Precalculus. Lecture, three hours; discussion, two hours. Prerequisites: course A with a grade of C or better, or two and one-half years of high school mathematics. Function concept. Linear and polynomial functions and their graphs, zeros of polynomials. Inverse, exponential, and logarithmic functions. Trigonometric functions.

2. Finite Mathematics. Lecture, three hours; discussion, one hour. Prerequisite: course 1 or three years of high school mathematics or consent of instructor. Finite mathematics consisting of matrices, Gauss/Jordan method, combinatorics, probability, Bayes' theorem, and Markov chains.

3A. Calculus for Life Sciences Students. Lecture, three hours; discussion, one hour. Prerequisites: three and one-half years of high school mathematics (including trigonometry) and successful completion of Mathematics Diagnostic Test, or completion of course 1 with a grade of C- or better. Not open for credit to students with credit in another calculus sequence. Students with credit for course 5 will receive only two units of credit for this course. Techniques and applications of differential calculus.

3B. Calculus for Life Sciences Students. Prerequisite: course 3A with a grade of C- or better. Techniques and applications of integral calculus.

3C. Calculus for Life Sciences Students. Prerequisite: course 3B with a grade of C- or better. Functions of several variables, vectors, partial differentiation, and multiple integration.

3E. Calculus for Economics Students. Lecture, three hours; discussion, one hour. Prerequisite: course 3A, or 31A with a grade of C- or better. Not open for credit to students with credit for course 3B, 31B, or 31BH. Calculus with applications to economics. Differentiation and integration of logarithmic and exponential functions, definite integral, probability, differential equations.

5. Calculus for Liberal Arts Students. Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 3A, 3B, 3C, 31A through 33B, or 110A through 199. Brief look at concepts, techniques, and applications of both differential and integral calculus. Emphasis on intuitive ideas in place of mathematical proofs.

31A. Calculus and Analytic Geometry. Lecture, three hours; discussion, one hour. Prerequisites: at least three and one-half years of high school mathematics (including some coordinate geometry and trigonometry) and successful completion of Mathematics Diagnostic Test, or completion of course 1 with a grade of C- or better. Students with credit for course 5 will receive only two units of credit for this course. Differential calculus and applications; introduction to integration.

31AH-31BH. Calculus and Analytic Geometry (Honors). Lecture, three hours; discussion, one hour. Prerequisites: successful completion of Mathematics Diagnostic Test or additional honors placement examination, consent of instructor. Honors sequence parallel to courses 31A, 31B.

31AQ. Calculus and Analytic Geometry with Computer Laboratory (5 units). (Formerly numbered 31A/PC.) Lecture, three hours; discussion, one hour; laboratory, one hour. Prerequisites: at least three and one-half years of high school mathematics (including some coordinate geometry and trigonometry) and successful completion of Mathematics Diagnostic Test, or completion of course 1 with a grade of C- or better. Same material as course 31A with one additional computer laboratory hour. P/NP or letter grading.

31B. Calculus and Analytic Geometry. Lecture, three hours; discussion, one hour. Prerequisite: course 31A with a grade of C- or better. Transcendental functions; methods and applications of integration.

31BQ. Calculus and Analytic Geometry with Computer Laboratory (5 units). (Formerly numbered 31B/PC.) Lecture, three hours; discussion, one hour; laboratory, one hour. Prerequisite: course 31AQ, or 31A with a grade of C- or better. Same material as course 31B with one additional computer laboratory hour. P/NP or letter grading.

32A. Calculus of Several Variables. Lecture, three hours; discussion, one hour. Prerequisite: course 31B with a grade of C- or better. Introduction to differential calculus of several variables.

32AH-32BH. Calculus of Several Variables (Honors). Prerequisites: course 31BH, or 31B with a grade of A and consent of instructor. Honors sequence parallel to courses 32A, 32B.

32AQ. Calculus of Several Variables with Computer Laboratory (5 units). (Formerly numbered 32A/PC.) Lecture, three hours; discussion, one hour; laboratory, one hour. Prerequisite: course 31BQ, or 31B with a grade of C- or better. Same material as course 32A with one additional computer laboratory hour. P/NP or letter grading.

32B. Calculus of Several Variables. Lecture, three hours; discussion, one hour. Prerequisite: course 32A with a grade of C- or better. Introduction to integral calculus of several variables.

33A. Matrices and Differential Equations. Lecture, three hours; discussion, one hour. Prerequisite: course 32A or 32AH or 32AQ. Introduction to matrix theory, differential equations, and systems of differential equations.

33AH-33BH. Matrices, Differential Equations, and Infinite Series (Honors). Prerequisites: course 32BH, or 32B with a grade of A and consent of instructor. Honors sequence parallel to courses 33A, 33B.

33B. Infinite Series. Lecture, three hours; discussion, one hour. Prerequisite: course 33A or consent of instructor. Infinite sequences and series; applications.

38A. Fundamentals of Arithmetic. Lecture, three hours; discussion, one hour. Prerequisite: sophomore standing. Not open for credit to students with credit for any course from Mathematics 110A through 199. May not be applied toward Letters and Science general education requirements. Courses 38A, 38B, and 104 form one-year sequence for prospective elementary teachers in Diversified Liberal Arts Program. Counting numbers and other subsystems of real numbers; sets; operations, relations, algorithms; applications and problem solving. Emphasis on understanding arithmetic procedures.

38B. Fundamentals of Arithmetic. Lecture, three hours; discussion, one hour; laboratory, one hour to be arranged. Prerequisite: course 38A. Not open for credit to students with credit for any course from Mathematics 110A through 199. May not be applied toward Letters and Science general education requirements. Continuation of course 38A. Elementary number theory; probability and statistics; the microcomputer and simple instructional programs; measurement and approximation; coordinate geometry. Other topics appropriate for elementary classroom.

61. Introduction to Discrete Structures. Lecture, three hours; discussion, one hour. Prerequisites: courses 31A, 31B, and Program in Computing 10A or 3 or equivalent. Not open for credit to students with credit for course 113. Discrete structures commonly used in computer science and mathematics, including sets and relations, permutations and combinations, graphs and trees, induction, Boolean algebras.

70. Theory of Interest. Lecture, three hours; discussion, one hour. Prerequisites: two calculus courses. Measurement of interest, annuities, amortization, sinking funds, bonds, and other securities.

Upper Division Courses

Mathematics 113, 115A, 117, 131A, 132, 141A, 142, 144, 147, and Statistics 154A-154B are offered each term. The remaining upper division courses are usually offered once or twice each year. The tentative class schedule for the forthcoming academic year is posted in the Student Services Office in February.

General and Teacher Training

104. Fundamental Concepts of Geometry. Lecture, three hours; discussion, one hour. Prerequisites: courses 38A and 38B or equivalent, or consent of instructor. Designed for prospective elementary teachers. Informal geometry and topology, motion geometry, measurement of geometric figures, LOGO computer language, models and constructions appropriate for elementary classrooms.

106. History of Mathematics. Prerequisite: course 32A. Topics in history of mathematics, with emphasis on development of modern mathematics.

Algebra, Number Theory, and Logic

109. Transition to Upper Division Mathematics. Lecture, three hours; discussion, one hour. Prerequisite: course 33B or consent of instructor. Introduction to mathematical proof. Principle of mathematical induction. Proof by contradiction. Developing and writing mathematical proofs. Proofs of basic theorems for limits and infinite series. Completeness property of the real number system. P/NP or letter grading.

110A-110B-110C. Algebra. Lecture, three hours; discussion, one hour. Prerequisite: course 115A or consent of instructor. **110A.** Not open for credit to students with credit for course 117. Ring of integers, integral domains, fields, polynomial domains, unique factorization. **110B.** Groups, structure of finite groups. **110C.** Further topics in rings and modules; field extensions, Galois theory, applications to geometric constructions, and solvability by radicals.

110AH-110BH-110CH. Algebra (Honors). Prerequisite: consent of instructor. Honors sequence parallel to courses 110A-110B-110C.

111A-111B-111C. Theory of Numbers. Lecture, three hours; discussion, one hour. Prerequisites: courses 110A or 117, and 115A, or consent of instructor. Divisibility, congruences, Diophantine analysis, selected topics in theory of primes, algebraic number theory, Diophantine equations.

112A-112B-112C. Set Theory and Logic. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B. **112A.** Informal axiomatic set theory presented as foundation for modern mathematics. **112B-112C.** Predicate logic, formalized theories; Gödel's completeness and incompleteness theorems.

113. Combinatorics. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B. Permutations and combinations, counting principles, recurrence relations and generating functions, combinatorial designs, graphs and trees, with applications including games of complete information. Combinatorial existence theorems, Ramsey's theorem.

114A-114B-114C. Computation Theory and Logic. Lecture, three hours; discussion, one hour. Prerequisites: courses 33B, 61, 115A (latter may be taken concurrently with course 114A). Finite automata; Turing machines and other models of computation; recursive functions; Church's thesis; Gödel numbering of computations; universal machines; unsolvability results. Recursive and recursively enumerable sets; reducibilities; relative recursiveness. Propositional and predicate logic; syntax and semantics; formal deductions; completeness and compactness; effective enumerability of valid sentences. Formal number theory; representation of recursive functions; incompleteness and undecidability; theorems of Gödel, Tarski, Church. Complexity of computations; time and space limitations; nondeterministic machines; polynomial classes P and NP; complete problems; measures of complexity; speed-up and gap theorems; lengths of proofs.

115A-115B. Linear Algebra. Lecture, three hours; discussion, one hour. **115A.** Prerequisite: course 33A. Abstract vector spaces; linear transformations and matrices; determinants; inner product spaces; low-dimension eigenvector theory. **115B.** Prerequisite: course 115A. Linear transformations, conjugate spaces, duality; theory of a single linear transformation, Jordan normal form; bilinear forms, quadratic forms; Euclidean and unitary spaces, symmetric skew and orthogonal linear transformations, polar decomposition.

117. Algebra for Applications. Lecture, three hours; discussion, one hour. Prerequisite: course 115A. Not open for credit to students with credit for course 110A. Integers, congruences; fields, applications of finite fields; polynomials; permutations, introduction to groups.

118A-118B-118C. Combinatorial Algorithms. Lecture, three hours; discussion, one hour. Prerequisites: courses 33B, 61, 115A, 117 (latter may be taken concurrently with course 118A). Introduction to discrete mathematics and algorithms as used in computer science and related fields. Topics include asymptotic analysis, arithmetic algorithms, computer-oriented algorithms, graphs and matroids, coding theory and designs.

Geometry and Topology

120A-120B. Differential Geometry. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B, 115A, 131A. Curves in 3-space, Frenet formulas, surfaces in 3-space, normal curvature. Gaussian curvature. Congruence of curves and surfaces. Intrinsic geometry of surfaces, isometrics, geodesics, Gauss/Bonnet theorem.

121. Introduction to Topology. Prerequisite: course 131A. Metric and topological spaces, topological properties, completeness, mappings and homeomorphisms, metrization problem.

122. Projective Geometry. Lecture, three hours; discussion, one hour. Prerequisites: courses 110A-110B, 115A. Projective spaces, especially lines and planes; homogeneous coordinates; principles of duality; projectivities, fundamental theorem, and theorems of Desargues, Pappus, Steiner, and Pascal.

123. Foundations of Geometry. Lecture, three hours; discussion, one hour. Prerequisite: course 115A. Axioms and models, Euclid's geometry, Hilbert's axioms, neutral (absolute) geometry, hyperbolic geometry, Poincaré's model, independence of parallel postulate.

Analysis

131A-131B. Analysis. (Formerly numbered 131A-131B-131C.) Lecture, three hours; discussion, one hour. **131A.** Prerequisite: course 33B. Rigorous introduction to foundations of real analysis; real numbers, point set topology in euclidean space, functions, continuity. **131B.** Prerequisites: courses 33B, 115A, 131A. Derivatives, Riemann integral, sequences and series of functions, power series, Fourier series.

131AH-131BH. Analysis (Honors). Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors sequence parallel to courses 131A-131B. Courses 131AH-131BH and 132H form a full honors sequence in analysis.

132. Complex Analysis for Applications. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B. Introduction to basic formulas and calculation procedures of complex analysis of one variable relevant to applications. Topics include Cauchy/Riemann equations, Cauchy integral formula, power series expansion, contour integrals, residue calculus.

132H. Complex Analysis (Honors). (Formerly numbered 131CH.) Lecture, three hours; discussion, one hour. Prerequisite: course 131A. Honors course parallel to course 132. Courses 131AH-131BH and 132H form a full honors sequence in analysis.

133. Integration on Manifolds. Prerequisite: course 131B. Integration theory for functions of several variables, multilinear algebra, differential forms, Stokes' theorem on manifolds.

134. Measure and Integration. Prerequisite: course 131B or consent of instructor. Introduction to Lebesgue measure and integration.

135A-135B. Ordinary Differential Equations. Lecture, three hours; discussion, one hour. Prerequisites: courses 33A, 33B, 115A. Systems of differential equations; linear systems with constant coefficients, analytic coefficients, periodic coefficients, and linear systems with regular singular points; existence and uniqueness results; linear boundary and eigenvalue problems; two-dimensional autonomous systems, phase/plane analysis; stability and asymptotic behavior of solutions.

136. Partial Differential Equations. Lecture, three hours; discussion, one hour. Prerequisites: courses 33A, 33B. Linear partial differential equations, particularly of the second order: wave equation, heat equation, and Laplace's equation; appropriate boundary, initial value problems, and eigenvalue problems.

Applied Mathematics

140A-140B-140C. Numerical Analysis. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B, 115A, and Program in Computing 3 or 10A or equivalent. Not normally open for credit to students with credit for course 141A, 141B, or Electrical Engineering 103. Emphasis on both theory, with error analysis, and applications. Analysis of numerical methods for following areas: **140A.** Nonlinear equations, systems of linear equations, and eigenvalue problems.

140B. Interpolation, approximation, fast Fourier transforms, differentiation, and integration. **140C.** Differential equations, systems of nonlinear equations, and optimization.

141A-141B. Applied Numerical Methods. Lecture, three hours; discussion, one hour. Prerequisites: courses 32A, 32B, 33A, 33B, 115A, and Program in Computing 3 or 10A or equivalent. Not open for credit to students with credit for course 140A, 140B, or Electrical Engineering 103. Introduction to scientific computing, with emphasis on programming, algorithms, and applications. Case studies. Numerical methods and computer implementation for following areas: **141A.** Nonlinear equations, systems of linear equations, optimization, interpolation, differentiation, and integration. **141B.** Differential equations, least-squares approximation, and Monte Carlo methods.

142. Mathematical Modeling. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B and 33B, or consent of instructor. Introduction to fundamental principles and spirit of applied mathematics. Emphasis on manner in which mathematical models are constructed for physical problems. Illustrations from many fields of endeavor (e.g., physical sciences, biology, economics, traffic dynamics, etc.).

143. Analytic Mechanics. Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B. Foundations of Newtonian mechanics, kinematics and dynamics of a rigid body, variational principles and Lagrange's equations; calculus of variations, variable mass; related topics in applied mathematics.

144. Linear Programming. Lecture, three hours; discussion, one hour. Prerequisite: course 115A or consent of instructor. Not open for credit to students with credit for Electrical Engineering 136. Principles of linear programming, duality theorem, simplex methods; applications to industrial and business problems. Additional topics such as sensitivity analysis, integer programming, distribution and transportation algorithms, and applications to game theory.

145. Fourier Methods for Differential Equations. Lecture, three hours; discussion, one hour. Prerequisite: course 33B. Fourier series and integral transforms, separation of variables, eigenfunction expansions. Applications from such areas as mechanical vibrations, fluid dynamics, heat conduction, and electromagnetics.

146. Methods of Applied Mathematics. Lecture, three hours; discussion, one hour. Prerequisite: course 33B. Integral equations, Green's function, and calculus of variations. Selected applications from control theory, optics, dynamical systems, and other engineering problems.

147. Game Theory. Lecture, three hours; discussion, one hour. Prerequisite: course 115A or 144 or consent of instructor. Principles and techniques of game theory. Games in extensive form. Matrix games. Minimax theorem and calculation of optimal strategies. Stochastic games. Cooperative and noncooperative solutions of bimatrix games. Coalitional games and applications. Additional topics such as combinatorial games, repeated games, Lemke/Howson algorithm, assignment games and marriage problem, economic markets, cost allocation, measurement of voting power.

149. Mathematics of Computer Graphics. Lecture, three hours; discussion, one hour. Prerequisites: course 115A, and Program in Computing 10A or equivalent knowledge of programming in either PASCAL or C language. Study of homogeneous coordinates, projective transformations, interpolating and approximating curves, representation of surfaces, and other mathematical topics useful for computer graphics.

149HS. Honors Seminar: Mathematics of Computer Graphics. Lecture, three hours. Prerequisites: course 149, consent of instructor. Limited enrollment (admission to be based on performance in course 149; participants need not be in an honors program). Participating seminar on topics not covered in course 149. Each student prepares substantial course project and presents it to class.

Probability

M150A-150B. Probability Theory. Lecture, three hours; discussion, one hour. **M150A.** (Formerly numbered 150A.) (Same as Statistics M152A.) Prerequisites: courses 32B, 33B. Not open to students with credit for Statistics M152A, 154A, or Electrical Engineering 131A. Probability distributions, random variables and vectors, expectation, normal approximations. P/NP or letter grading. **150B.** Prerequisite: course M150A or Statistics M152A. Convergence in distribution, laws of large numbers, Poisson processes, random walks.

151. Stochastic Processes. Lecture, three hours; discussion, one hour. Prerequisites: course M150A or Statistics M152A, and consent of instructor. Discrete Markov chains, continuous-time Markov chains and semi-Markov processes, renewal theory, Brownian motion.

172A-172B. Actuarial Mathematics. Lecture, three hours; discussion, one hour. **172A.** Prerequisite: course 70. Survival distributions and life tables, life insurance, life annuities, net premiums, net premium reserves. **172B.** Prerequisites: course 172A, Statistics 154A-154B. Multiple life functions, multiple decrement models, valuation theory for pension plans, insurance models, nonforfeiture benefits and dividends.

Special Studies

190. Honors Mathematics Seminar. Lecture, three hours. Prerequisite: consent of instructor. Participating seminar on advanced topics in mathematics. Content varies from year to year. May be repeated for credit by petition.

191. Upper Division Seminars (2 to 4 units). Prerequisites: courses 32A, 32B, 33A, 33B, consent of instructor. Limited to 15 students. Each term department offers a limited number of seminars in various branches of mathematics. Substantial student participation. May be repeated for credit.

199. Special Studies in Mathematics (1 to 4 units). Prerequisite: consent of department chair and instructor. At discretion of chair and subject to availability of staff, individuals or groups may study topics suitable for undergraduate course credit but not specifically offered as separate courses. May be repeated for credit, but no more than one 199 course may be applied toward upper division courses required for a major offered by Mathematics Department.

Graduate Courses

Teacher Preparation

201A-201B-201C. Topics in Algebra and Analysis. Prerequisite: bachelor's degree in mathematics or equivalent. Designed for students in mathematics/education program. Important ideas of algebra, geometry, and calculus leading effectively from elementary to modern mathematics. Approaches to number system, point sets, geometric interpretations of algebra and analysis, integration, differentiation, series and analytic functions. May not be applied toward M.A. degree requirements.

202A-202B. Mathematical Models and Applications. Prerequisite: bachelor's degree in mathematics or equivalent. Designed for students in mathematics/education program. Development of mathematical theories describing various empirical situations. Basic characterizing postulates; development of a logical structure of theorems. Modern topics such as operations research, linear programming, game theory, learning models, models in social and life sciences. May not be applied toward M.A. degree requirements.

Number Theory

205A-205B-205C. Number Theory. Prerequisites: courses 210A and 246A, or consent of instructor. Topics from analytic algebraic and geometric number theory, including distribution of primes and factorization in algebraic number fields. Selected topics from additive number theory, Diophantine approximation, partitions, class-field theory, lattice point problems, valuation theory, etc.

206A-206B. Combinatorial Theory. Prerequisite: consent of instructor. Generating functions. Probabilistic methods. Polya's theorem. Enumerative graph theory. Partition theory. Number theoretical applications. Structure of graphs, matching theory, duality theorems. Packings, pavings, coverings, statistical designs, difference sets, triple systems, finite planes. Configurations, polyhedra. Ramsey theory, finite and transfinite, and applications.

Algebra

210A-210B-210C. Algebra. Prerequisites: courses 110A-110B-110C or consent of instructor. Students with credit for courses 110B and/or 110C will not receive M.A. degree credit for courses 210B and/or 210C. Group theory, including theorems of Sylow and Jordan/Holder/Schreier; rings and ideals, factorization theory in integral domains, modules over principal ideal rings, Galois theory of fields, multilinear algebra, structure of algebras.

211. Structure of Rings. Prerequisite: course 210A or consent of instructor. Radical, irreducible modules and primitive rings, rings and algebras with minimum condition.

212. Homological Algebra. Prerequisite: course 210A or consent of instructor. Modules over a ring, homomorphisms and tensor products of modules, functors and derived functors, homological dimension of rings and modules.

213A-213B. Theory of Groups. Prerequisite: course 210A or consent of instructor. Topics include representation theory, transfer theory, infinite Abelian groups, free products and presentations of groups, solvable and nilpotent groups, classical groups, algebraic groups.

214A-214B. Introduction to Algebraic Geometry. Prerequisite: course 210A or consent of instructor. Basic definitions and first properties of algebraic varieties in affine and projective space: irreducibility, dimension, singular and smooth points. More advanced topics, such as sheaves and their cohomology, or introduction to theory of Riemann surfaces, as time permits.

215A-215B. Commutative Algebra. Prerequisite: course 210A or consent of instructor. Topics from commutative ring theory, including techniques of localization, prime ideal structure in commutative Noetherian rings, principal ideal theorem, Dedekind rings, modules, projective modules, Serre conjecture, regular local rings.

216. Further Topics in Algebraic Geometry. Prerequisites: courses 214A-214B or consent of instructor. Closer examination of areas of current research in algebraic geometry. Variable content may include algebraic surfaces, Abelian varieties, invariant theory, Hodge theory, or geometry over finite fields. May be repeated for credit by petition.

Logic and Foundations

220A-220B-220C. Mathematical Logic and Set Theory. Prerequisites: courses 112A-112B-112C or equivalent. Model theory: compactness theorem; Lowenheim/Skolem theorems; definability; ultraproducts; preservation theorems; interpolation theorems. Recursion function theory: Church's thesis; recursively enumerable sets; hierarchies; degrees. Formal proofs: completeness and incompleteness theorems; decidable and undecidable theories; quantifier elimination. Set theory: Zermelo/Fraenkel and von Neumann/Gödel axioms; cardinal and ordinal numbers; continuum hypothesis; constructible sets; independence results and forcing.

222A-222B. Lattice Theory and Algebraic Systems. Lecture, three hours. Prerequisite: course 210A or consent of instructor. Partially ordered sets, lattices, distributivity, modularity; completeness, interaction with combinatorics, topology, and logic; algebraic systems, congruence lattices, subdirect decomposition, congruence laws, equational bases, applications to lattices.

223A. Model Theory. Prerequisites: courses 220A-220B-220C. Topics include ultraproducts, preservation theorems, interpolation theorems, saturated models, omitting types, categoricity, two cardinal theorems, enriched languages, soft model theory, and applied model theory.

223B. Set Theory. Prerequisites: courses 220A-220B-220C. Topics include constructibility theory, Cohen extensions, large cardinals, and combinatorial set theory.

223C. Recursion Theory. Prerequisites: courses 220A-220B-220C. Topics include degrees of unsolvability, recursively enumerable sets, undecidable theories, inductive definitions, admissible sets and ordinals, and recursion in higher types.

223D. Descriptive Set Theory. Prerequisites: courses 220A-220B-220C. Classical descriptive set theory: Borel and projective sets. Effective descriptive set theory. Consequences of strong set-theoretic hypotheses.

Geometry and Topology

225A. Differentiable Manifolds. Lecture, three hours. Prerequisites: courses 121 and 131A-131B, or consent of instructor. Smooth manifolds and maps, basic examples and properties, orientability, tangent and cotangent spaces, embeddings and immersions, Sard's theorem and transversality, vector fields and integral curves, Lie brackets and Frobenius' theorem, Lie derivative, tensors, differential forms and exterior derivative, Stokes' theorem on manifolds.

225B. Introduction to Algebraic Topology. Lecture, three hours. Prerequisite: course 225A or consent of instructor. Elementary concepts of homotopy theory; covering spaces and fundamental group. Singular homology theory, axioms of homology, Mayer/Vietoris sequence, calculation of homology of standard spaces, applications, Betti numbers and Euler characteristic, cell complexes and cellular homology.

225C. Further Topics in Geometry and Topology. Lecture, three hours. Prerequisites: courses 225A and 225B, or consent of instructor. Topics may include cohomology (singular, cellular, de Rham), duality theorems, de Rham's theorem, degree theory, cup products, higher homotopy groups, transversality theory, Morse theory, Riemannian metric.

226A-226B-226C. Differential Geometry. Lecture, three hours. Prerequisite: course 225A or consent of instructor. Manifold theory; connections, curvature, torsion, and parallelism. Riemannian manifolds; completeness, submanifolds, constant curvature. Geodesics; conjugate points, variational methods, Myers' theorem, nonpositive curvature. Further topics such as pinched manifolds, integral geometry, Kahler manifolds, symmetric spaces.

227A-227B. Algebraic Topology. Lecture, three hours. Prerequisite: course 225B or consent of instructor. CW complexes, fiber bundles, homotopy theory, cohomology theory, spectral sequences.

229A-229B-229C. Lie Groups and Lie Algebras. Prerequisite: knowledge of basic theory of topological groups and differentiable manifolds. Lie groups, Lie algebras, subgroups, subalgebras. Exponential map. Universal enveloping algebra. Campbell/Hausdorff formula. Nilpotent and solvable Lie algebras. Cohomology of Lie algebras. Theorems of Weyl, Levi-Mal'cev. Semisimple Lie algebras. Classification of simple Lie algebras. Representations. Compact groups. Weyl's character formula.

233. Partial Differential Equations on Manifolds. Lecture, three hours. Prerequisites: courses 226A and 251A, or consent of instructor. Topics may include Laplacian operator on a Riemannian manifold, eigenvalues, Atiyah/Singer index theorem, isoperimetric inequalities, elliptic estimates, harmonic functions, function theory on manifolds, Green's function, heat equation, minimal hypersurfaces, prescribed curvature equations, harmonic maps, Yang/Mills equation, Monge/Ampere equations.

234. Topics in Differential Geometry. Lecture, three hours. Prerequisites: courses 226A-226B or consent of instructor. Complex and Kahler geometry, Hodge theory, homogeneous manifolds and symmetric spaces, finiteness and convergence theorems for Riemannian manifolds, almost flat manifolds, closed geodesics, manifolds of positive scalar curvature, manifolds of constant curvature. Topics vary from year to year. May be repeated for credit by petition.

235. Topics in Manifold Theory. Lecture, three hours. Prerequisites: courses 225A and 225B, or consent of instructor. Emphasis on low-dimensional manifolds. Structure and classification of manifolds, automorphisms of manifolds, submanifolds (e.g., knots and links). Topics vary from year to year. May be repeated for credit by petition.

236. Topics in Geometric Topology. Lecture, three hours. Prerequisites: courses 225A and 225B, or consent of instructor. Decomposition spaces, surgery theory, group actions, dimension theory, infinite dimensional topology. Topics vary from year to year. May be repeated for credit by petition.

237. Topics in Algebraic Topology. Lecture, three hours. Prerequisites: courses 227A-227B or consent of instructor. Fixed-point theory, fiber spaces and classifying spaces, characteristic classes, generalized homology and cohomology theories. Topics vary from year to year. May be repeated for credit by petition.

Analysis and Differential Equations

240. Methods of Set Theory. Lecture, three hours. Prerequisites: courses 110A-110B, 121 or equivalent, 131A-131B. Naive, axiomatic set theory, axiom of choice and its equivalents, well-orderings, transfinite induction, ordinal and cardinal arithmetic. Applications to algebra: Hamel bases, Stone representation theorem. Applications to analysis and topology: Cantor/Bendixson theorem, counterexamples in measure theory, Borel and analytic sets, Choquet's theorem.

245A-245B-245C. Real Analysis. Lecture, three hours. Prerequisites: courses 121, 131A-131B, or equivalent. Students with credit for course 134 will not receive M.A. degree credit for course 245A. Basic measure theory. Measure theory on locally compact spaces. Fubini theorem. Elementary aspects of Banach and Hilbert spaces and linear operators. Function spaces. Radon/Nikodym theorem. Fourier transform and Plancherel on \mathbb{R}^n and \mathbb{T}^n .

246A-246B-246C. Complex Analysis. Prerequisites: courses 131A-131B. Students with credit for course 132 will not receive M.A. degree credit for course 246A. Cauchy/Riemann equations. Cauchy's theorem. Cauchy's integral formula and residue calculus. Power series. Normal families. Harmonic functions. Linear fractional transformations. Conformal mappings. Analytic continuation. Examples of Riemann surfaces. Infinite products. Partial fractions. Classical transcendental functions. Elliptic functions.

247A-247B. Classical Fourier Analysis. Lecture, three hours. Prerequisites: courses 245A-245B, 246A. Distribution on \mathbb{R}^n and \mathbb{T}^n . Principal values; other examples. Distributions with submanifolds as supports. Kernel theorem. Convolution; examples of singular integrals. Tempered distributions and Fourier transform theory on \mathbb{R}^n . Distributions with compact or one-sided supports and their complex Fourier transforms.

250A. Ordinary Differential Equations. Prerequisite: course 246A or consent of instructor. Basic theory of ordinary differential equations. Existence and uniqueness of solutions. Continuity with respect to initial conditions and parameters. Linear systems and n th order equations. Analytic systems with isolated singularities. Self-adjoint boundary value problems on finite intervals.

250B. Nonlinear Ordinary Differential Equations. Prerequisite: course 250A. Asymptotic behavior of nonlinear systems. Stability. Existence of periodic solutions. Perturbation theory of two-dimensional real autonomous systems. Poincaré/Bendixson theory.

250C. Advanced Topics in Ordinary Differential Equations. Prerequisites: courses 250A, 250B. Selected topics, such as spectral theory or ordinary differential operators, nonlinear boundary value problems, celestial mechanics, approximation of solutions, and Volterra equations.

251A. Introductory Partial Differential Equations. Prerequisite: consent of instructor. Classical theory of heat, wave, and potential equations; fundamental solutions, characteristics and Huygens principle, properties of harmonic functions. Classification of second-order differential operators. Maximum principles, energy methods, uniqueness theorems. Additional topics as time permits.

251B-251C. Topics in Partial Differential Equations. Prerequisite: consent of instructor. In-depth introduction to topics of current interest in partial differential equations or their applications.

252A-252B-252C. Topics in Complex Analysis. Lecture, three hours. Prerequisites: courses 245A-245B-245C and 246A-246B-246C, or consent of instructor. Potential theory, subharmonic functions, harmonic measure; Hardy spaces; entire functions; univalent functions; Riemann surfaces; extremal length, variational methods, quasiconformal mappings. Topics vary from year to year.

253A-253B. Several Complex Variables. Prerequisites: courses 245A-245B-245C and 246A-246B-246C, or consent of instructor. Introduction to analytic functions of several complex variables. The $\bar{\partial}$ problem. Cousin problems, domains of holomorphy, complex manifolds.

254A-254B. Topics in Real Analysis. Prerequisites: courses 245A-245B-245C, 246A-246B-246C. Selected topics in analysis and its applications to geometry and differential equations. Topics may vary from year to year. May be repeated for credit by petition.

Functional Analysis

255A. Functional Analysis. Prerequisites: courses 245A-245B or 265A-265B, and 246A, or consent of instructor. Banach spaces, basic principles. Weak topologies. Compact operators. Fredholm operators. Special spaces including Hilbert spaces and $C(X)$.

255B-255C. Topics in Functional Analysis. Prerequisite: course 255A. Topics include Banach algebras, operators on Banach spaces and Hilbert space, semigroups of operators, linear topological vector spaces, and other related areas.

256A-256B-256C. Topological Groups and Their Representations. Lecture, three hours. Prerequisite: course 255A or consent of instructor. Topological groups and their basic properties. Haar measure. Compact groups and their representations. Duality and Fourier analysis on locally compact abelian groups. Induced representations, Frobenius reciprocity. Representations of special groups (Lorentz, Galilean, etc.). Projective representations. Representations of totally disconnected groups.

258A-258B. Commutative Banach Algebras. Lecture, three hours. Prerequisites: courses 246A, 255A, 255B. Gelfand theory of commutative Banach algebras. Applications to harmonic analysis on locally compact abelian groups. Algebras of holomorphic functions. Special topics.

259A-259B. Operator Algebras in Hilbert Space. Prerequisites: courses 255A, 255B-255C. Selected topics from theories of C^* and von Neumann algebras. Applications.

Applied Mathematics

260. Introduction to Applied Mathematics. Prerequisite: course 142 or consent of instructor. Construction, analysis, and interpretation of mathematical models of problems which arise outside of mathematics.

261. Multiperson Game Theory. Lecture, three hours. Prerequisite: graduate standing in mathematics or consent of instructor. Nonadditive set functions; games in characteristic function form; imputations and domination; von Neumann/Morgenstern solutions; the core; totally balanced games; kernel and nucleolus; multi-linear extension and Shapley value; fixed-point theorems; Nash equilibrium; nontransferable utility; lambda-transfer method. Applications to markets, cost allocation, assignment and marriage problems, voting power.

264. Applied Complex Analysis. Prerequisite: course 246A or consent of instructor. Topics include contour integration conformal mapping, differential equations in complex plane, special functions, asymptotic series, Fourier and Laplace transforms, singular integral equations.

265A-265B. Real Analysis for Applications. Prerequisites: courses 131A-131B or consent of instructor. Not open for credit to students with credit for courses 245A-245B-245C. Lebesgue measure and integration on real line, absolutely continuous functions, functions of bounded variation, L^2 and L^p spaces. Fourier series. General measure and integrations, Fubini and Radon/Nikodym theorems, representation of functionals, Fourier integrals.

266A. Applied Ordinary Differential Equations. Prerequisites: courses 131A-131B, 132, and 135A-135B or 145 and 146. Spectral theory of regular boundary value problems and examples of singular Sturm/Liouville problems, related integral equations, phase/plane analysis of nonlinear equations.

266B-266C. Applied Partial Differential Equations. Prerequisite: course 266A or consent of instructor. Classification of equations, classical potential theory, Dirichlet and Neumann problems. Green's functions, spectral theory of Laplace's equation in bounded domains, first-order equations, wave equations, Cauchy problem, energy conservation, heat equation, fundamental solution, equations of fluid mechanics and magnetohydrodynamics.

267A-267B. Applied Algebra. Prerequisite: course 110A or equivalent. Students with credit for course 210A will not receive M.A. degree credit for course 267A. Linear algebra, eigenvalues, and quadratic forms; linear inequalities, finite fields, and combinatorial analysis. Group theory, with emphasis on representations. Application to physical problems.

268A. Applied Functional Analysis. Lecture, three hours. Prerequisites: courses 115A-115B, 131A-131B, and 132, or consent of instructor. Topics may include Hilbert spaces, distributions, Fourier transforms, L^2 space, the Laplacian, linear operators, spectrum and resolvent, self-adjoint and unitary operators, problems of evolution in Banach spaces, well-posed initial value problems, semigroups, applications to applied problems.

268B-268C. Topics in Applied Functional Analysis. Prerequisite: course 255A. Topics include spectral theory with applications to ordinary differential operators, eigenvalue problems for differential equations, generalized functions, and partial differential equations.

269A-269B-269C. Advanced Numerical Analysis. Prerequisites: courses 115A, 135A, and 140A-140B-140C, or consent of instructor. Numerical solution for systems of ordinary differential equations; initial and boundary value problems. Numerical solution for elliptic, parabolic, and hyperbolic partial differential equations. Topics in computational linear algebra.

270A-270F. Mathematical Aspects of Scientific Computing. (Formerly numbered 270A-270E.) Lecture, three hours. Prerequisites: courses 115A, 140A or 141A-141B, and Program in Computing 10A or equivalent, or consent of instructor:

270A. Techniques of Scientific Computing. Mathematical modeling for computer applications, scientific programming languages, software development, graphics, implementation of numerical algorithms on different architectures, case studies.

270B-270C. Computational Linear Algebra. Direct, fast, and iterative algorithms, overdetermined systems; singular value decomposition, regularization, sparse systems, algebraic eigenvalue problem.

270D-270E. Computational Fluid Dynamics. Basic equations, finite difference, finite element, pseudo-spectral, and vortex methods; stability, accuracy, shock capturing, and boundary approximations.

270F. Parallel Numerical Algorithms. Prerequisites: courses 270B-270C. Recommended: courses 270A, 270D-270E. Design, analysis, and implementation of numerical algorithms on modern vector and parallel computers. Discussion of classical numerical algorithms and novel parallel algorithms. Emphasis on applications to PDEs.

271A. Tensor Analysis. Prerequisite: course 131A or consent of instructor. Algebra and calculus of tensors on n -dimensional manifolds. Curvilinear coordinates and coordinate-free methods. Covariant differentiation. Green/Stokes theorem for differential forms. Applications to topics such as continuum and particle mechanics.

271B. Analytical Mechanics. Prerequisites: course 271A, prior knowledge of mechanics. Newtonian and Lagrangian equations. Hamilton's principle. Principle of least action. Holonomic and nonholonomic systems. Hamilton's canonical equations, contact transformations, applications.

271C. Introduction to Relativity. Prerequisites: course 271A, prior knowledge of mechanics. Restricted theory of relativity. Extensions to general theory. Relativistic theory of gravitation.

271D. Wave Mechanics. (Formerly numbered 273.) Prerequisite: consent of instructor. General concepts of mechanical systems (states, space-time, "logics," etc.). Classical and quantum examples. Correspondence principle. Spinors.

272A. Foundations of Continuum Mechanics. Lecture, three hours. Prerequisite: consent of instructor. Kinematic preliminaries, conservation laws for mass, momentum and energy, entropy production, constitutive laws. Linear elasticity, inviscid fluid, viscous fluid. Basic theorems of fluid mechanics. Simple solutions. Low Reynolds number flow, Stokes drag. High Reynolds number flow, boundary layers. Two-dimensional potential flow, simple aerofoil. Compressible flow, shocks.

272B. Mathematical Aspects of Fluid Mechanics. Lecture, three hours. Prerequisite: course 272A or consent of instructor. Review of basic theory of moving continua, fluid equations, integral theorems. Simple solutions, flow created by slowly moving bodies, flows where viscosity is negligible, vortices, boundary layers and their separation, water waves, ship waves, compressional waves, shock waves, turbulence theory (overview).

272C. Magnetohydrodynamics. Lecture, three hours. Prerequisites: course 272A, consent of instructor. Basic electromagnetism. Steady flows, Hartmann layers. Alfvén's theorem and waves. Compressible media. Magnetostatic equilibria and stability.

272D. Rotating Fluids and Geophysical Fluid Dynamics. Lecture, three hours. Prerequisite: consent of instructor. Effects of Coriolis forces on fluid behavior. Inviscid flows, Taylor/Proudman theorem, Taylor columns, motions of bodies, inertial waves in spheres and spherical shells, Rossby waves. Ekman layers, spin-up. Shallow-water theory, wind-driven ocean circulation. Effects of stratification, Bénard convection. Baroclinic instability, Eady model. S/U or letter grading.

273. Optimization, Calculus of Variations, and Control Theory. Prerequisite: consent of instructor. Application of abstract mathematical theory to optimization problems of calculus of variations and control theory. Abstract nonlinear programming and applications to control systems described by ordinary differential equations, partial differential equations, and functional differential equations. Dynamic programming.

M274A. Asymptotic Methods. (Same as Civil Engineering M292.) Lecture, three hours. Prerequisites: course 132, Mechanical, Aerospace, and Nuclear Engineering 192A, or equivalent. Fundamental mathematics of asymptotic analysis, asymptotic expansions of Fourier integrals, method of stationary phase. Watson's lemma, method of steepest descent, uniform asymptotic expansions, elementary perturbation problems.

274B-274C. Perturbation Methods. Lecture, three hours. Prerequisite: course 266A or equivalent. Boundary layer theory, matched asymptotic expansions, WKB theory. Problems with several time scales: Poincaré's method, averaging techniques, multiple-scale analysis. Application to eigenvalue problems, nonlinear oscillations, wave propagation, and bifurcation problems. Examples from various fields of science and engineering.

Probability and Statistics

275A-275B. Probability Theory. Prerequisite: course 245A or 265A. Connection between probability theory and real analysis. Weak and strong laws of large numbers, central limit theorem, conditioning, ergodic theory, martingale theory.

275C. Stochastic Processes. Lecture, three hours. Prerequisite: course 275B or consent of instructor. Brownian motion, continuous-time martingales, Markov processes, potential theory. S/U or letter grading.

275D. Stochastic Calculus. Lecture, three hours. Prerequisite: course 275C or consent of instructor. Stochastic integration, stochastic differential equations, Itô's formula and its applications. S/U or letter grading. (Alternates yearly with course 275E.)

275E. Stochastic Particle Systems. Lecture, three hours. Prerequisite: course 275C or consent of instructor. Interacting particle systems, including contact process, stochastic Ising model, and exclusion processes; percolation theory. S/U or letter grading. (Alternates yearly with course 275D.)

276A-276B. Statistical Theory. Lecture, three hours. Prerequisite: Statistics 152C or consent of instructor.

276A. Sufficiency, exponential families, least squares, maximum likelihood estimation, Fisher information, Cramér/Rao inequality, confidence intervals. **276B.** Asymptotic properties of tests and estimates, consistency and efficiency, likelihood ratio tests, chi-squared tests.

276C. Statistical Decision Theory. Prerequisite: course 276A. Invariant estimates and tests; best unbiased and locally best tests; multiple decision problems; application to general linear model; other topics.

277. Data Analysis. Lecture, three hours. Prerequisites: course 276A and Statistics M153A, or consent of instructor. Outline of principles of applied statistics, followed by survey of specific data analyses from physical, life, and social sciences. Methods include regression, analysis of variance and covariance, survival analysis, categorical data analysis, and simple time-series analysis. Illustration of transformations, plotting, model selection and evaluation, and estimation and decision procedures.

278A. Multivariate Analysis. Lecture, three hours. Prerequisite: course 276B or consent of instructor. Distributions in several dimensions, partial and multiple correlation. Normal distribution theory, Wishart distribution, Hotelling's T^2 . Principal components, canonical correlation, discriminant analysis. Introduction to linear structural relations and factor analysis.

278B. Nonparametric and Robust Statistics. Lecture, three hours. Prerequisite: course 276B or consent of instructor. Development of nonparametric and robust procedures for hypothesis testing, estimation in one- and two-sample problems, linear and nonlinear regression, multiple classification, density estimation.

278C. Decision Theory. Lecture, three hours. Prerequisites: courses 131A and 276B, or consent of instructor. Bayes', admissible, and minimax decision rules. Invariant tests and estimates, best unbiased tests, locally best tests. Application to general linear model.

278D. Sequential Analysis. Lecture, three hours. Prerequisites: courses 131A and 276B, or consent of instructor. Bayes' sequential decision problems, stopping rule problems, optimality of sequential probability ratio test, Wald's identity, asymptotic theory, and other topics.

M279A-M279B. Linear Statistical Models. (Formerly numbered M279A-M279B-M279C.) (Same as Biostatistics M250A-M250B.) Lecture, three hours; discussion, one hour. Prerequisites: Biostatistics 110C, Statistics 152C, or equivalent. Topics include linear algebra applied to linear statistical models, distribution of quadratic forms, Gauss/Markov theorem, fixed and random component models, balanced and unbalanced designs.

M280. Statistical Computing. (Same as Biostatistics M280 and Biostatistics M280.) Lecture, three hours. Prerequisites: course 115A, Statistics 152C, or equivalent. Introduction to theory and design of statistical programs: computing methods for linear and nonlinear regression, dealing with constraints, robust estimation, and general maximum likelihood methods.

Special Studies

285A-285L. Seminars. Prerequisite: consent of instructor. No more than two 285 courses may be applied toward M.A. degree requirements except by prior consent of graduate vice chair. Topics in various branches of mathematics and their applications by means of lectures and informal conferences with staff members:

285A. Seminar: History and Development of Mathematics.

285B. Seminar: Number Theory.

285C. Seminar: Algebra.

285D. Seminar: Logic.

285E. Seminar: Geometry.

285F. Seminar: Topology.

285G. Seminar: Analysis.

285H. Seminar: Differential Equations.

285I. Seminar: Functional Analysis.

285J. Seminar: Applied Mathematics.

285K. Seminar: Probability.

285L. Seminar: Statistics.

286A-286M. Participating Seminars (No credit). Prerequisite: consent of instructor. Seminars and discussion by staff and students. No course credit is given, but courses may be used to satisfy participating seminar requirement for Ph.D. S/U grading:

286A. Participating Seminar: History and Development of Mathematics.

286B. Participating Seminar: Number Theory.

286C. Participating Seminar: Algebra.

286D. Participating Seminar: Logic.

286E. Participating Seminar: Geometry.

286F. Participating Seminar: Topology.

286G. Participating Seminar: Analysis.

286H. Participating Seminar: Differential Equations.

286I. Participating Seminar: Functional Analysis.

286J. Participating Seminar: Applied Mathematics.

286K. Participating Seminar: Probability.

286L. Participating Seminar: Statistics.

286M. Participating Seminar: Mathematics.

290. Seminar: Current Literature. Intended for Ph.D. candidates. Readings and presentations of papers in mathematical literature under supervision of a staff member.

370. Teaching Mathematics. Lecture, three hours. Prerequisites: course 3B or 31B, senior standing. Critical inquiry into present-day tendencies in teaching mathematics.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research (2 to 8 units). Supervised individual reading and study on project approved by a faculty member, which may be preparation for M.A. examination. May be repeated for credit, but only two 596 courses (eight units) may be applied toward M.A. degree unless departmental consent is obtained.

599. Research in Mathematics (2 to 12 units). Prerequisite: advancement to doctoral candidacy. Study and research for Ph.D. dissertation. May be repeated for credit.

Statistics

Lower Division Course

50. Elementary Statistics. Lecture, three hours; discussion, one hour. Prerequisite: three years of high school mathematics or consent of instructor. Descriptive statistics, elementary probability, random variables, binomial and normal distributions. Large and small sample inference concerning means.

Upper Division Courses

Students planning to pursue advanced degrees in statistics should enroll in the M152A, 152B-152C sequence. The 154A-154B sequence is less comprehensive than the 152 series. In particular, probability topics do not receive the same level of coverage. Courses 154A-154B are offered each term. The remaining upper division courses are usually offered once or twice each year. The tentative class schedule for the forthcoming academic year is posted in the Student Services Office in February.

M152A. Probability Theory. (Formerly numbered 152A.) (Same as Mathematics M150A.) Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 32B, 33B. Not open to students with credit for course 154A, Mathematics M150A, or Electrical Engineering 131A. Probability distributions, random variables and vectors, expectation, normal approximations. P/NP or letter grading.

152B-152C. Statistics. Lecture, three hours; discussion, one hour. Not open to students with credit for courses 154A-154B. P/NP or letter grading. **152B.** Prerequisite: course M152A. Survey sampling, estimation, testing, data summary, one- and two-sample problems. **152C.** Prerequisite: course 152B. Analysis of variance, categorical data, linear regression, decision theory and Bayesian inference.

M153A-M153B. Introduction to Computational Statistics. (Same as Biomathematics M153A-M153B and Biostatistics M153A-M153B.) Lecture, three hours; discussion, one hour. Prerequisites: course 152B, Mathematics 115A. Linear and nonlinear regression analysis using package programs. Emphasis on relation between statistical theory, numerical results, and analysis of data. **M153A.** BMDP, SAS, and SPSS regression programs; general linear model theory; linear regression analysis; transforming and weighting; regression diagnostics; model building. **M153B.** Analysis of variance and covariance; nonlinear regression programs, analysis, and applications; maximum likelihood analysis; robust regression.

154A-154B. Statistics. Lecture, three hours; discussion, one hour. Not open to students with credit for courses M152A and 152B. P/NP or letter grading. **154A.** Prerequisites: Mathematics 32B, 33B. Not open to students with credit for Mathematics M150A or Electrical Engineering 131A. Probability, distributions, expectation, estimation, central limit theorem, confidence intervals, testing. **154B.** Prerequisite: course 154A. One- and two-sample problems, goodness of fit and contingency tables, correlation and regression, analysis of variance, nonparametrics.

Microbiology and Molecular Genetics

 Jack Stevens, D.V.M., Ph.D.
 Bernadine J. Wisniewski, Ph.D.
 Owen N. Witte, M.D. (*President's Professor of Developmental Immunology*)
 June Lascelles, Ph.D., *Emerita*
 Rafael J. Martinez, Ph.D., *Emeritus*
 M.J. Pickett, Ph.D., *Emeritus*
 Sydney C. Rittenberg, Ph.D., *Emeritus* (*Distinguished Teaching Award*)
 William R. Romig, Ph.D., *Emeritus* (*Distinguished Teaching Award*)

Associate Professors

Robert P. Gunsalus, Ph.D.
 Aldons J. Lulis, Ph.D.
 Robert W. Simons, Ph.D.

Assistant Professors

Patricia Hartzell, Ph.D.
 Joan E. McEwen, Ph.D.
 Virginia L. Miller, Ph.D.

Lecturer

Ralph Robinson, Ph.D.

Scope and Objectives

Microbiology at UCLA is a diverse science that includes bacteriology, virology, genetics, molecular biology, and the study of single cells. The science has its roots in the fundamental human needs of health, nutrition, and environmental control, and it provides opportunities for study in the basic biological fields of genetics and cellular and molecular biology.

Undergraduate students majoring in microbiology prepare for careers in biomedical research, medicine or dentistry, biotechnology and genetic engineering, industrial microbiology, and agricultural or environmental sciences, among others. The courses presented by the department lead to a Bachelor of Science degree and depend heavily on preparation in chemistry, biology, physics, and mathematics. They provide preparation for careers in microbiology or for further advanced study leading to the doctorate.

The graduate program emphasizes the areas of molecular genetics, cell biology, immunology, cell and virus structure and morphogenesis, animal virology, general bacteriology and physiology, host/parasite relationships, medical microbiology, microbial genetics, and recombinant DNA research. Students are prepared for creative research careers in all of these fields. The objective of the department is

to provide breadth in microbiology at the undergraduate level and depth and training in independent study and research for graduate students.

Note: Several upper division and graduate courses in this department are multiple-listed with those in the Microbiology and Immunology Department in the UCLA School of Medicine. If you are interested in a fundamentally disease-oriented approach to microbiology, see the Microbiology and Immunology Department description in Chapter 16.

Bachelor of Science Degree

Pre-Microbiology and Molecular Genetics Major

While you are completing the preparation courses for the major, you are considered a pre-microbiology and molecular genetics major. After completing the preparation courses with a minimum grade-point average of 2.0, you should petition to enter the major in the Student Affairs Office, 5324 Life Sciences. All preparation courses must be taken for a letter grade. If you enter with 80 or more units of credit, in order to specify pre-microbiology and molecular genetics as your major, you must have completed one year of general chemistry; Biology 5, 9, or equivalent; at least one of the following: organic chemistry with laboratory (two courses), calculus-based physics (one year), calculus (one year).

Preparation for the Major

Required: Biology 5, 9, 100A, 108, or equivalent; Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Mathematics 3A, 3B, 3C (or 31A, 31B, 32A); Physics 6A, 6B, 6C (or 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL).

The Major

Required: Microbiology and Molecular Genetics 101, 102, C106, C119, M185A; Chemistry and Biochemistry 132A, 132B/132BL, 153A, 153C, 153L; four additional upper division courses from the departmental list or from related departments selected with approval of your faculty adviser. All major courses must be taken for a letter grade, with a minimum overall 2.0 GPA in the major. A maximum of four units of Microbiology and Molecular Genetics 199, taken for a letter grade, may be applied toward the major. Credit for 199 courses from other departments may not be applied.

Honors Program

An overall grade-point average of 3.2 and a 3.5 in the premajor and major are required to apply for departmental honors. In addition you must have junior standing and the sponsorship of a faculty adviser. The core of the program consists of three terms (minimum) of Microbiology and Molecular Genetics 199H research, culminating in a thesis. If the thesis is accepted by the honors committee, you are awarded the bachelor's degree with departmental honors. The department

also offers honors-designated courses each term for the elective program. For further information, contact the Student Affairs Office, 5324 Life Sciences.

Master of Arts Degree

Admission

Requirements for admission are the same as for the Ph.D. degree, with the addition of a research proposal. Students who select this program must obtain sponsorship for a laboratory research problem prior to submitting an application.

The department accepts relatively few students whose objective is a master's degree; applicants must contact a potential faculty sponsor at the time of application.

Ph.D. Degree

Admission

For admission, you must have completed an undergraduate major in microbiology or a related field with superior scholastic achievement. You should have preparation in calculus, physics, biology, genetics, organic and biological chemistry, and microbiology. Physical chemistry is strongly recommended. You may be admitted with background deficiencies to be remedied prior to or concurrent with graduate studies. Submit scores of the Graduate Record Examination (GRE) General Test directly to the department. The Subject Test in Biology, Biochemistry, or Chemistry is recommended. Evidence (via letters of recommendation, interviews, or direct knowledge) of superior research potential and motivation is also required. Completion of a master's degree is not normally required.

Applications, brochures, and additional information on the master's and Ph.D. programs are available from the Graduate Adviser, Student Affairs Office, Department of Microbiology and Molecular Genetics, 5324 Life Sciences, UCLA, Los Angeles, CA 90024-1489.

Course Requirements

Formal Lecture/Laboratory Courses

Biochemistry — Chemistry and Biochemistry M253 (six units; offered only in Fall Quarter; to be completed during the first year) is required.

Genetics and Regulation — One 200-level, four-unit course to be selected from the current course listings maintained in the Student Affairs Office is required.

A total of eight additional units of 200-level coursework to be selected from at least two of the following three subject areas is required: (1) general microbiology and cell biology, (2) host/parasite interactions and virology, (3) immunology. Acceptable courses are listed in the Student Affairs Office.

You are expected to complete a course in physical chemistry (Chemistry and Biochemis-

try 156). This requirement can be waived on the basis of work done before entering UCLA.

Student-Participation Seminar Courses

Each term, seminar courses in which students read and report on current scientific research literature are organized. You must enroll in five such courses (10 units) during your first two years in residence.

Laboratories

During your first 15 months in residence, you rotate for one term each through three laboratories within the department (outside laboratories are permissible with consent of the advisory committee). You normally enroll in Microbiology and Molecular Genetics 596 for four units of credit for each laboratory rotation.

First-Year Proposal

By June 30 of your first year of study you must submit an original research proposal of approximately five pages. The topic may be based on a subject presented in a departmental professional seminar or on material from one of the seminar courses. Suggestions and evaluations are returned to you and used by the faculty to evaluate continuation into the second year.

Teaching Experience

The department considers teaching experience to be an integral part of the graduate program. All Ph.D. candidates are required to serve as teaching assistants or in some other formal teaching capacity for three terms. Prior experience at another institution is acceptable when approved by the departmental graduate adviser.

Qualifying Examinations

The oral examination must be taken within 24 months of entry into graduate school and must be passed, if reexamination is required, no later than 27 months from the date of entry. (These periods may be extended with the written consent of the departmental graduate adviser and your mentor.)

The examination is administered by the doctoral committee which normally serves as the thesis committee as well. As a major part of the examination, you prepare and defend a written research proposal. Before presentation to the doctoral committee, you are encouraged to present the proposal before a student seminar group.

The University Oral Qualifying Examination covers both your proposal and general scientific background. It is not restricted to the topics of the proposal. The committee may arrange alternate ways to assess your preparation and qualifications.

Dissertation/Final Oral Examination
