UCLA Academic Calendars

1995 – 96

Fall Quarter 1995

Quarter begins	September 25
Instruction begins	September 28
Thanksgiving holiday	November 23-24
Instruction ends	December 7
Final examinations	December 9-15
Quarter ends	December 15
Christmas holiday	December 25-26
New Year's holiday	December 29- January 1

Winter Quarter 1996

Quarter begins	January 3
Instruction begins	January 8
Martin Luther King, Jr. holiday	January 15
Presidents' Day holiday	February 19
Instruction ends	March 15
Final examinations	March 16-22
Quarter ends	March 22
Administrative holiday (closed)	March 25

Spring Quarter 1996

Quarter begins	March 27
Instruction begins	April 1
Memorial Day holiday	May 27
Instruction ends	June 7
Final examinations	June 8-14
Quarter ends	June 14
Commencement weekend	June 15-16

1996 – 97

Fall Quarter 1995

Quarter begins	September 23
Instruction begins	September 26
Thanksgiving holiday	November 28-29
Instruction ends	December 5
Final examinations	December 7-13
Quarter ends	December 13
Christmas holiday	December 24-25
New Year's holiday	December 31- January 1

Winter Quarter 1996

Quarter begins	January 2
Instruction begins	January 6
Martin Luther King, Jr. holiday	January 20
Presidents' Day holiday	February 17
Instruction ends	March 14
Final examinations	March 15-21
Quarter ends	March 21
Administrative holiday (closed)	March 24

Spring Quarter 1996

Quarter begins	March 26
Instruction begins	March 31
Memorial Day holiday	May 26
Instruction ends	June 6
Final examinations	June 7-13
Quarter ends	June 13
Commencement weekend	June 14-15

On Line: Consult the quarterly *Schedule of Classes* for detailed information on registration, enrollment, and administrative deadlines. Updates to the academic calendar are available on the internet at <http://www.ucla.edu>.

Academic and administrative information and campus publications are available on the internet at <http://www.ucla.edu>. For additional departmental information see UCLA Academic Department Servers at website <http://www.ucla.edu:80/people/servers/academic.html>.

This catalog is also available at website <http://www.ucla.edu/student/catalog/>

On the Cover: The front cover depicts the facade of Royce Hall and the back cover, Powell Library. The insets are details from Powell.

UCLA® General Catalog

Publications Manager: Anita Cotter
 Senior Publications Coordinator: Kathleen Copenhaver
 Technical Support: Sue Kientz
 Graduate Requirements Editors: Daniel Bennett, Susan Smith
 Cover Design: Robin Weisz
 Photography: Robin Weisz

Special thanks to Johnny Godinho, Solomon Matsas, Anthony Salinas, and Doug Thomson for assistance with typesetting and proofreading and to Stephen Schwartz and Michael Van Norman for bringing the catalog on line.

Designed and produced by Academic Publications, UCLA Registrar's Office, using FrameMaker 4.0.4.

Copies of the 1995-96 *UCLA General Catalog* are available for purchase at the Students' Store for \$6. To obtain a copy by mail, send a check or money order for \$9.50 within California or \$10.50 within the continental U.S. (includes UPS or first-class postage) to ASUCLA Students' Store, 308 Westwood Plaza, Los Angeles, CA 90024-1645, ATTN: Mail Out. Make checks payable to ASUCLA. You may also charge the cost to your VISA or MasterCard by calling the Mail Out Department at (310) 825-6064 or 206-4198.

Please Note

Every effort has been made to ensure the accuracy of the information presented in the *UCLA General Catalog*. However, all courses, course descriptions, instructor designations, curricular degree requirements, and fees described herein are subject to change or deletion without notice.

The departmental websites referenced in department addresses in this catalog are maintained by independent operators and do not necessarily reflect approved curricula and courses information.

Other information about UCLA may be found in the announcements of the Schools of Dentistry, Education and Information Studies, Engineering and Applied Science, Law, Management, Medicine, Nursing, Public Health, and Public Policy and Social Research, and in literature produced by the School of the Arts and Architecture and School of Theater, Film, and Television. Further details on graduate programs are available in various Graduate Division publications, including *Program Requirements for UCLA Graduate Degrees* and *Standards and Procedures for Graduate Study at UCLA*.

UCLA (USPS 646-680)

Volume 35, Number 11, October 1995

A series of administrative publications of the University of California, Los Angeles, published 11 times a year (one issue in January, March, April, May, and October; two issues in July, August, and September) by UCLA Academic Publications, 405 Hilgard Avenue, Los Angeles, CA 90095-1429. Second-class postage paid at Los Angeles, CA. © 1995 by The Regents of the University of California. POSTMASTER: Send address changes to UCLA, Mail Services, Box 951361, Los Angeles, CA 90095-1361.

Introducing UCLA

"... in 10 years . . . we shall look with amazement upon the development of this University, for it is certain to be greater, far greater, than the imagination of any of us can foresee."

Ernest Carroll Moore
UCLA Director, 1919

From Little Acorns . . .

The year was 1880. With a population of 11,000, Los Angeles was a gaslit pueblo trying to convince the state to establish in Southern California a second State Normal School like the one already existing in San Jose, some 300 miles to the north.

In March of the following year, the State Assembly approved the establishment of such a school. A group of enthusiastic citizens, over 200 of whom contributed between \$2 and \$500, purchased a site less than a mile from the business section. Soon the towering Victorian form of the school rose from an orange grove which, today, is the site of the Central Los Angeles Public Library. On August 29, 1882, the Los Angeles Branch of the State Normal School welcomed its first students.

By 1914 the little pueblo of Los Angeles had grown to a city of 350,000 and the school, whose enrollment far exceeded its capacity, moved to new quarters — a Hollywood ranch off a dirt road which would later become Vermont Avenue.

With a view toward expansion, Director Ernest Carroll Moore proposed in 1917 that the school become the first branch of the Berkeley-based University of California. Two years later on May 23, 1919, California Governor William D. Stephens signed the legislation that created the "Southern Branch" of the University of California — no longer merely a teacher's college but an institution that offered two years of instruction in Letters and Science.

Third- and fourth-year courses were soon added, the first class of 300 students was graduated in 1925, and by 1927 the Southern Branch had earned its new name: University of California at Los Angeles (the "at" became a comma in 1958).

Move Westward

As the student population of the University continued to increase, the need for a new site became obvious and the search was soon under way for a permanent home for UCLA. On September 21, 1927, Director Moore turned the first shovelful of soil that broke ground for the creation of the campus of his dreams.

The choice of Westwood, set squarely in the path of westward-moving Los Angeles, no doubt was an important factor in determining UCLA's future growth. But in 1929, on the barren chaparral-covered hills of Westwood, the four original buildings — Royce Hall, Powell Library, Haines and Kinsey Halls — formed a lonesome little cluster in the middle of 400 empty acres. The campus hosted some 5,500 students that fall.

The first priority after the move to Westwood was to establish a graduate curriculum, essential for any major university. The Regents established the master's degree at UCLA in 1933 and, three years later, the doctorate. UCLA was fast becoming a full-fledged university offering advanced study in almost every field.

Los Angeles and the University nurtured each other through the years, and both experienced phenomenal growth and development during the next half century. UCLA's most spectacular period of growth occurred in the 25 years following World War II, when it tripled its prewar enrollment of 9,000 students and undertook what would become a \$260 million building program that included residence halls, parking structures, laboratories, more classrooms, service buildings, athletic and recreational facilities, and a 715-bed teaching hospital which is now one of the largest and most highly respected in the world.

UCLA Today

UCLA celebrated its seventy-fifth anniversary during the 1994-95 academic year. In just three-quarters of a century — a remarkably brief span — UCLA has joined the elite ranks of the nation's most prestigious universities. This 75-year journey is one of the great success stories in American higher education. Today, UCLA is distinguished as the only campus among the nation's top 10 research universities that was established in the twentieth century.

UCLA is a large and complex institution devoted to undergraduate and graduate scholarship, research, and public service. Known for academic excellence, many of its programs are rated among the best in the nation, some among the best in the world.

Some 236 buildings on 419 acres house the College of Letters and Science plus 11 professional schools and serve more than 33,550 students. Another major period of campus development is currently nearing completion, providing needed additional space for chemistry, management, and microbiology programs, while several of UCLA's older buildings are now being made earthquake-safe through a broad seismic correction program.

UCLA's top administrative officer is Chancellor Charles E. Young. Now beginning his twenty-eighth year of leadership in that position — more than one third of UCLA's existence — Chancellor Young is one of America's most senior and most respected leaders in higher education today.

Setting

UCLA is cradled in rolling green hills just five miles inland from the ocean, in one of the most attractive areas of Southern California. It is bordered on the north by the protected wilderness of the Santa Monica Mountains and at its southern gate by Westwood Village. Originally envisioned as a business district to serve UCLA, this picturesque little college town has mushroomed into an entertainment magnet for the entire Los Angeles area.

The cultural treasures of the Los Angeles County Museum of Art are a few miles to the east as are other museums, the community of Beverly Hills, the Music Center, and the downtown business area. Beyond that the deserts, snowcapped mountains, and ski resorts are little more than an hour's drive.

Ambience

The stately Tudor Gothic and Italian Romanesque architecture of UCLA's early buildings blends with the contemporary and modern design of the newer structures. Royce Hall, one of the original four buildings, remains the campus symbol. Contrasting campus moods range from the activity of Bruin Walk to the serenity of the Japanese Garden. Attend a rock concert on the lawn, or a classical recital in Schoenberg Hall. Contemplate a Rodin or a Lachaise in the Sculpture Garden, or participate in a political rally in Meyerhoff Park.

UCLA is a place of surprises. A unique inverted fountain, where water flows over river rocks, recalls the Yellowstone creeks that inspired it. Enter the Bunche Hall Annex and discover a glorious atrium where palms and ferns glisten in filtered sunlight. Step inside the courtyard of Macgowan Hall and come face to face with the impressive stone Tower of Masks, created by the noted sculptress Anna Mahler.

UCLA is a place for serious study in a vibrant, dynamic atmosphere. You must visit the campus to appreciate it. If you are thinking of applying to the University as an undergraduate, contact Undergraduate Admissions and Relations with Schools (310-825-8764) to take a tour of the campus specifically tailored to the prospective student. If you are not a student, the Campus Visits Program (310-206-0616), sponsored by the Alumni Association, arranges both individual and group tours of the campus throughout the year. The tours are offered by current students and reservations are required.

Commitment to Research

UCLA is one of the outstanding "research universities" in the country. What does this mean to you as a student?

It means that the same faculty members teach both undergraduate and graduate courses and that these instructors create knowledge as well as transmit it. They spend a major portion of their time engaged in research in libraries and laboratories and out in the field.

At UCLA you are taught by the people making the discoveries, so you learn the latest findings on every front. You may exchange ideas with faculty members who are authorities in their fields, and even as undergraduates you are encouraged to participate in research to experience firsthand the discovery of new knowledge. This inseparable commitment to teaching and research is the hallmark of a research university.

Question of Size

Although UCLA has a larger enrollment than other University of California campuses, it is small in comparison to some of the Midwestern universities. Its general campus population of some 29,742 students is about equal to that at UC Berkeley, but the UCLA campus is enriched by an additional 3,839 men and women studying in its health sciences schools of Dentistry, Medicine, Nursing, and Public Health. UCLA makes the most of its size by offering an extraordinary breadth of high quality academic programs and a range of student opportunities available at few other universities in the country.

A major concern of the faculty and staff is to allow you, the student, to feel that you belong. UCLA provides orientation sessions and several innovative academic assistance programs for new students, a staff of helpful advisers and counselors in every college/school and academic department, a myriad of student services, and unlimited opportunities for involvement and participation.

All UCLA students share the pride of attending one of the most prestigious educational institutions in the country. Beyond that, no one individual deals with the totality of UCLA. Campus life is made comfortable by interacting and identifying with only certain parts of the whole, whether they be your academic department, residence hall, fraternity or sorority, club or organization, or the spirit of Bruin victories on the athletic fields.

Many prospective students ask about the size of classes at UCLA. Standard instructional formats include lectures, discussion sections, seminars, and laboratory sessions. Although large lecture groups in some introductory courses are not unheard of, 96 percent of all lower division lecture classes in 1993-94 had fewer than 200 students, and the University is making every effort to further reduce class size. Students in most lecture classes also enroll in discussion sections of about 25 students, and seminars and laboratory classes usually have fewer than 20 students. There is an overall ratio of one faculty member for approximately 18 students.

Most UCLA faculty members take a genuine interest in their students. They set aside office hours for receiving students, and most appreciate the opportunity for informal conversation. Even professors who seem remote in the classroom may be just the opposite on a one-to-one basis. A brief discussion can benefit both student and instructor.

Professors are often aided, especially in the small discussion sections, by teaching assistants (TAs). These are graduate students who teach on a part-time basis while pursuing their degree. Many students find it helpful to talk to the TAs about academic problems.

Hallmarks of Excellence

Recent surveys indicate that in overall excellence, UCLA is one of America's most prestigious and influential public universities. It is consistently rated among the best universities in the nation and is by far the youngest institution in this select group.

UCLA is accredited by the Western Association of Schools and Colleges and by numerous special agencies. Information regarding the University's accreditation may be obtained in the Planning Office Library, Office of Academic Planning and Budget, 2107 Murphy Hall.

Academics

UCLA has one college and 11 professional schools. The College of Letters and Science offers programs leading to both undergraduate and graduate degrees, as do the School of the Arts and Architecture, School of Engineering and Applied Science, School of Nursing, and School of Theater, Film, and Television. The other professional schools offer graduate programs exclusively: the Graduate School of Education and Information Studies, School of Law, John E. Anderson Graduate School of Management, School of Public Policy and Social Research and, in the health sciences, the Schools of Dentistry, Medicine, and Public Health.

Few universities in the world offer the extraordinary range and diversity of academic programs that students enjoy at UCLA. Undergraduates may earn a Bachelor of Arts or Bachelor of Science degree in one of 112 different disciplines; graduate students may earn one of 84 master's and 103 doctoral and professional degrees.

Academic programs undergo a continuing process of review and evaluation to maintain their excellence, and new programs are added as they are approved by The Regents. For example, a new School of Public Policy and Social Research has been established, incorporating the existing Departments of Social Welfare and Urban Planning with the new Department of Policy Studies, while the existing Department of Architecture and Urban Design has been moved into the newly renamed School of the Arts and Architecture. In the School of Medicine, the Department of Anatomy and Cell Biology recently was renamed the Department of Neurobiology. Two additional mergers occurred when (1) the Department of Astronomy joined the Department of Physics to become the new Department of Physics and Astronomy and (2) the Department of Dance and the interdepartmental World Arts and Cultures Program combined to form the new Department of World Arts and Cultures. New degree programs last year included the interdepartmental B.A. in Asian American Studies, the B.A. in American Literature and Culture, and the interdepartmental B.A. in European Studies.

Faculty

Of the many factors that go into the making of a great university, no single factor is as important as its faculty. UCLA's distinguished faculty includes 1987 Nobel prizewinner Donald Cram, several John Simon Guggenheim fellows and Fulbright scholars, and many members of both the National Academy of Sciences and the American Academy of Arts and Sciences. In 1994-95 nine faculty members received Fulbright scholarships to conduct research, lecture, and consult abroad, and four UCLA scientists and scholars were awarded Guggenheim fellowships. Two were elected as fellows of the prestigious American Association for the Advancement of Science (AAAS). With two additional American Academy of Arts and Sciences award winners, one Sloan Foundation fellow, one National Academy of Sciences awardee, and five National Science Foundation Young Investigators, UCLA placed among the leading universities nationwide in the number of these prestigious awards.

In a recent survey the Conference Board of Associated Research Councils evaluated the quality of the faculty in more than 150 American research universities. UCLA was judged second in the nation among public universities, and among the most highly rated overall. Of the 32 disciplines studied, 17 of UCLA's academic departments were ranked among the top 10 in the country.

Research

UCLA is among the six leading research universities in the country, receiving a record \$342 million in 1993-94 in extramural grants and contracts to support its research activities. The University hosts several hundred postdoctoral scholars each year who share its excellent re-

search facilities. Its laboratories have seen major breakthroughs in scientific and medical research; its study centers have helped foster understanding among the various cultures of the world; ongoing pursuits of new knowledge in a myriad of vital areas continue to improve the quality of life for people around the world.

Teaching

Although all UCLA faculty members engage in research and the discovery of new knowledge, they are equally dedicated to disseminating their findings in the classroom. Indeed, excellence in teaching is one of the most important criteria for faculty promotion, and distinguished teaching awards are among those most highly prized by UCLA professors.

Student Body

UCLA's students pride themselves on academic excellence. The Fall Quarter 1994 entering freshman class had an average high school GPA of 3.90, with an average composite score on the Scholastic Assessment Test (SAT) of 1,128 out of a possible 1,600.

One of the University's highest priorities is to advance the ethnic diversity of its students, faculty, staff, and administrators. The diversity of UCLA's student population — nearly equally divided between men and women — yields the wide range of opinion and perspective essential to a great university. Although most students are from California, they come from all 50 states and more than 115 foreign countries to study at UCLA. The University now enrolls the most ethnically mixed and culturally diverse undergraduate student population — both in total students and as a percentage of enrollment — of any major university in the U.S. Ethnic minorities comprise 64 percent of the undergraduates and 36.2 percent of the graduate student population. And international students and scholars presently number over 6,700, making this one of the most popular American universities for students from abroad.

Numerous Other Factors

With more than six million volumes, UCLA's library is rated among the finest in the country. Its athletic teams have made the University an acknowledged leader in intercollegiate sports. Its Center for the Performing Arts ranks as the largest, most diversified and comprehensive program of its kind in the country. And management of the UCLA at the Armand Hammer Museum of Art and Cultural Center and acquisition of the Westwood Playhouse in Westwood Village enhance the entire arts program.

The University played a significant role in the 1984 Summer Olympics in Los Angeles, and the campus reprised that role in July 1991 for the U.S. Olympic Festival '91. On both occasions, UCLA housed a large Olympic Village and served as the venue for several events.

All these factors plus its research facilities, its community service, and its international links with all parts of the world make UCLA today a very special kind of institution.

University of California

The University of California traces its origins to 1868, when Governor Henry H. Haight signed the Organic Act providing that California's first "complete University" be created.

Classes began the following year at the College of California in Oakland. The first buildings on the Berkeley campus were completed in 1873, and the University moved into its new home. The following June, the University of California conferred bachelor's degrees on 12 graduates.

Today the University is one of the largest and most renowned centers of higher education in the world. Its nine campuses span the state, from Davis in the north to San Diego in the south. In between are Berkeley, San Francisco, Santa Cruz, Santa Barbara, Riverside, Irvine and, of course, Los Angeles.

All the campuses adhere to the same admission guidelines and high academic standards, yet each has its own distinct character, atmosphere, and — to some degree — academic individuality. Riverside, for example, excels in the plant sciences and entomology; Davis has a large agricultural school and offers the University's only veterinary medicine program; San Diego has excellent oceanography and marine biology programs; San Francisco is devoted exclusively to the health sciences. Among the campuses there are five medical schools and three law schools, as well as schools of architecture, business administration, education, engineering, and many others.

The UC campuses have a combined enrollment exceeding 162,300 students, over 90 percent of them California residents. About one fourth study at the graduate level. Some 150 laboratories, extension centers, and research and field stations strengthen teaching and research while providing public service to California and the nation. The collections of over 100 UC libraries on the nine campuses are surpassed in size on the American continent only by the Library of Congress collection.

The faculty of the University of California is internationally known for its distinguished academic achievements. On its nine campuses the University has 18 Nobel laureates, and membership in the National Academy of Sciences is the largest of any university in the country.

University Administration

The University of California system is governed by a **Board of Regents** whose regular members are appointed by the Governor of California. In addition to setting broad general policy and making budgetary decisions for the UC system, The Regents appoint the President of the University, the nine chancellors, and the directors, provosts, and deans who administer the affairs of the individual campuses and divisions of the University.

The Regents delegate authority in academic matters to the **Academic Senate**, which determines academic policy for the University as a whole. The Senate, composed of faculty members and certain administrative officers, determines the conditions for admission and granting of degrees, authorizes and supervises courses and curricula, and advises University administrators on budgets and faculty appointments and promotions. Individual divisions of the Universitywide Academic Senate determine academic policy for each campus. Students participate in policy-making at both campuswide and systemwide levels.

Academic Resources and Programs

As one of the largest research universities in the world, UCLA is renowned for its programs of faculty and student research; more than 5,000 funded programs are in progress at a given time. One focus of these efforts is a group of "organized research units" (ORUs) which provide an interdisciplinary approach to the search for knowledge.

ORUs are study centers and research institutes consisting of faculty and students from various departments engaged in continuing research of particular subjects. They do not offer courses of instruction or degrees, although several work in conjunction with interdepartmental instruction programs which lead to bachelor's and/or advanced degrees. ORUs provide invaluable experience for students and faculty in basic and applied research and greatly enhance UCLA's educational program and the overall academic quality of the University.

In the overview which follows, UCLA's 23 organized research units are listed within five major divisions — health sciences, life sciences, physical sciences and engineering, social sciences, and arts and humanities. Within each division, representative groups and programs are included which, although not formally established as ORUs, are nevertheless doing important research in their respective areas.

Health Sciences

Brain Research Institute

The Brain Research Institute (BRI), center for neuroscience research and education at UCLA, has one of the largest investigative programs of its kind in the country, with more than 200 scientists involved in every aspect of research in the nervous system from molecular organization to human behavior. The institute provides an environment for multidisciplinary research and training in the structure and function of the central nervous system. The BRI sponsors affinity groups, conferences, symposia, and a variety of other activities designed to strengthen ties among neuroscientists campuswide. The interdisciplinary Ph.D. and B.S. programs in Neuroscience, jointly sponsored by the School of Medicine and the College of Letters and Science, are housed within the institute. Public service activities include an elementary school outreach program directed by graduate students and a joint educational program with UCLA Extension. The Office of the Director is located in 73-369 BRI (310-825-5061).

Crump Institute for Biological Imaging

The Crump Institute for Biological Imaging is a science and technology center that brings together physical, biomathematical, chemical, biological, and clinical scientists and students to merge the principles of imaging with those of molecular and cellular biology and biochemistry. The imaging domains range from the molecular organization of viruses and cellular subunits to the biological responses of organ systems in the living human. A major focus is the development and use of imaging technologies to collect, analyze, and communicate biological data. Imaging technologies are used to build a picture (image) of the spatial and temporal variations in biological processes. Imaging technologies encompass such areas as cryoelectron microscopy and protein structure studies to assemble and study simple organisms and subcellular domains; confocal fluorescent microscopy for study of cellular and subcellular processes; in vitro and in vivo autoradiography studies of integrated organ function; and positron emission tomography (PET), X-ray computed tomography (CT), and magnetic resonance imaging (MRI) studies of the structure and biological functions of organ systems in animal and human subjects. The institute has research and educational programs for visiting scientists, postdoctoral scholars, and Ph.D. graduate students which include the development of novel multimedia computer-based learning technologies. There are also faculty and student exchange programs with a number of domestic and foreign universities. Dr. Michael E. Phelps is the director (310-825-6539).

Dental Research Institute

The Dental Research Institute, with principal laboratories on the seventh floor of the School of Dentistry, fosters research related to oral health. Areas of investigation include biomaterials, cancer research, clinical studies, craniofacial biology, immunology/immunogenetics, molecular biology, oral neurology/pain, periodontology, and ultrastructure/cell biology. The Office of the Director is located in 73-017 Center for the Health Sciences (310-206-8045).

Mental Retardation Research Center

The Mental Retardation Research Center, located on the C level and the fourth through eighth floors of the Neuropsychiatric Institute and Hospital, provides laboratories and clinical facilities for research and training in mental retardation and related aspects of human development. Its interdisciplinary activities range from anthropological studies to molecular aspects of inherited metabolic diseases. Administrative offices are located in 58-258 NPI&H (310-825-0313).

Jules Stein Eye Institute

The Jules Stein Eye Institute is one of the best equipped centers for research and treatment of eye diseases in the world. This comprehensive facility, located in the Center for the Health Sciences (310-825-5000), is devoted to the study of vision, the care of patients with eye disease,

and education in the broad field of ophthalmology. Outpatient, inpatient, and surgical facilities are provided. The **Doris Stein Eye Research Center** houses new research and training programs concentrating on major eye diseases worldwide.

UCLA-DOE Laboratory of Structural Biology and Molecular Medicine

The UCLA-DOE Laboratory of Structural Biology and Molecular Medicine, located in the Molecular Biology Institute (310-825-3754) and the Center for the Health Sciences, is funded through a contract with the Department of Energy. Research is conducted in biomolecular and cellular science, environmental biology, nuclear medicine, and structural biology and genetics. Laboratory faculty members have joint appointments in academic departments and teach at both undergraduate and graduate levels. Major facilities include a biomedical cyclotron, advanced scanning equipment, a cobalt radiation facility, a vivarium, and an advanced structural biology laboratory.

In the health sciences, research carried out in ORUs is complemented by research on neurological and neuromuscular diseases in the **Lewis Neuromuscular Research Center**, the **Reed Neurological Research Center**, and the **Neuropsychiatric Institute and Hospital**. The **Joneson Comprehensive Cancer Center**, one of only 27 comprehensive centers in the nation, is renowned for the breadth and excellence of its cancer research. The **UCLA AIDS Institute** is deeply involved in all aspects of the fight against AIDS, with basic research in epidemiology, immunology, and the clinical management of AIDS patients being done in the **Center for Clinical AIDS Research and Education**. And the School of Public Health, which recently established the **Southern California Injury Prevention Research Center**, has joined forces with the School of Medicine to form the **Center for Health Promotion and Disease Prevention**, another clinical research program to enhance the health of the community.

Life Sciences

Molecular Biology Institute

The Molecular Biology Institute provides research and training resources in molecular biology for faculty from the College of Letters and Science and the School of Medicine, and includes the Parvin Cancer Research Laboratories and the UCLA-DOE Laboratory of Structural Biology and Molecular Medicine. Administrative offices are located in 168 MBI (310-825-1018).

Center for the Study of Women

The Center for the Study of Women, located in 276 Kinsey Hall (310-825-0590), is the only unit of its kind in the UC system which focuses on women and gender and draws on the energies of more than 200 faculty from 11 professional schools and 28 departments. The center's major purpose is to encourage and facilitate faculty research on women and gender. To this end, the center develops and monitors grant proposals, provides UCLA faculty with seed-money through the minigrant competition, offers an affiliation for research and visiting scholars, and organizes public conferences and various lecture series, including the Feminist Research Seminar, Feminist Theory Series, Gender Studies of Science, Technology and Medicine Series, Lunch Series, and Gender and Politics Program. In addition, the center sponsors various working groups, produces an annual calendar of events and a quarterly newsletter, and hosts various programs for graduate students interested in women and gender, as well as an annual graduate student research conference.

The **Fernald Child Study Center** is a life sciences interdisciplinary research unit created to study and treat a variety of childhood behavioral problems and learning disorders. And the **Center for the Study of Evolution and the Origin of Life** melds the diverse research of more than 100 UCLA faculty members in the study of the emergence and evolution of life on Earth.

Physical Sciences and Engineering

Institute of Geophysics and Planetary Physics

The Institute of Geophysics and Planetary Physics (IGPP) is a multicampus research unit (MRU) of the University of California; the branch at UCLA is engaged in research in climate dynamics, geophysics, geochemistry, space physics, biochemistry, and biology. Research topics include the nature of the Earth, moon, and other planetary bodies, global environmental change, the origin of terrestrial life, the dynamical properties of the sun and solar wind, and the evolution of stellar interiors. Facilities include analytical laboratories in geochemistry, meteoritics, glaciology, petrology, geochronology, archaeology, and the origins of life, laboratories for experiments in fluid dynamics and high-pressure physics, developmental laboratories for instrumentation in space physics and seismology, and computational laboratories for large-scale numerical modeling relevant to the above topics. The UCLA branch office is located in 3839 Slichter Hall (310-825-1664).

Institute of Plasma and Fusion Research

The Institute of Plasma and Fusion Research, located in 44-139 Engineering IV (310-825-5090), is dedicated to research into plasma physics, fusion energy, and the application of plasmas in other disciplines. Students, professional research staff, and faculty study basic laboratory plasmas, plasma-fusion confinement experiments, fusion engineering and nuclear technology, computer simulations and the theory of plasmas, space plasma physics and experimental simulation of space plasma phenomena, advanced plasma diagnostic development, laser-plasma interactions, and the use of plasma in applications ranging from particle accelerators to the processing of materials and surfaces used in microelectronics or coatings.

White Mountain Research Station

The White Mountain Research Station is a multicampus research unit (MRU) dedicated to high-altitude research. Four separate laboratory sites near Bishop, California, ranging up to 14,250 feet above sea level, include the highest permanent teaching and research facilities in North America. Research includes studies in archaeology and the biological, medical, and physical sciences. The administrative office is located in 6713 Geology (310-825-2093, fax 310-825-1861).

Among other interdisciplinary activities in the physical sciences and engineering at UCLA, the **Center for Clean Technology** in the School of Engineering and Applied Science fosters research on the interaction between technology and the environment, focusing on pollution prevention and control. On other frontiers, an **Artificial Intelligence Laboratory** designed exclusively for research in this burgeoning field operates under the wing of the Computer Science Department, and a **Manufacturing and Automation Research Center**, funded by the National Science Foundation, is operated jointly by UCLA's engineering school and the University of Southern California (USC).

Social Sciences

Office of International Studies and Overseas Programs

The Office of International Studies and Overseas Programs (ISOP) supports and coordinates international and foreign area studies at UCLA. ISOP and its centers also support several interdepartmental degree programs (IDPs) focusing on particular regions of the world. Among the area studies centers and programs that operate under its aegis are four major interdisciplinary research centers that rank among the best in the nation. Some of the world's leading specialists on area studies are affiliated with these centers.

The **Coleman African Studies Center** (10244 Bunche Hall, 310-825-3779) is one of the major interdisciplinary centers for African studies in the U.S. It encourages and coordinates research and teaching on Africa in the humanities, social sciences, and natural sciences, as well as in the professional schools of Arts and Architecture, Education and Informa-

tion Studies, Law, Medicine, Public Health, Public Policy and Social Research, and Theater, Film, and Television. The center also sponsors an active program of public lectures, seminars, publications, and academic exchanges with African institutions and an outreach service to the Southern California community.

The **Center for European and Russian Studies** (11367 Bunche Hall, 310-825-4060) develops and coordinates teaching and research on Russia and its successor states, as well as the countries of Europe through conferences, lectures, seminars, and academic exchange programs with European and Russian institutions.

The **Latin American Center** (10343 Bunche Hall, 310-825-4571) is a major regional, national, and international resource on Latin America and hemispheric issues. The center sponsors and coordinates research, academic and public programs, and publications on Latin America in the humanities, social sciences, and professional schools and links its programs and activities with developments in the field and in other institutional settings. By combining instruction, research, and service and by encouraging multidisciplinary and interdisciplinary approaches, the center promotes the effective use of UCLA's Latin American resources for the benefit of the campus, the broader community, and the public at large.

The **von Grunebaum Center for Near Eastern Studies** (10286 Bunche Hall, 310-825-1181) coordinates research projects and academic programs related to the Near East and administers the interdisciplinary programs leading to the B.A. degree in Near Eastern Studies and the M.A. and Ph.D. degrees in Islamic Studies. The combined resources of the center include the largest faculty, one of the most comprehensive library holdings, and the richest variety of Near and Middle Eastern studies courses of any institution in the Western Hemisphere. Professors affiliated with the center come from UCLA departments as diverse as History, Public Health, Near Eastern Languages and Cultures, Art History, Anthropology, Sociology, and others. The center also conducts significant publication, community outreach, and scholarly exchange programs.

ISOP also supports other interdisciplinary activities within its other research centers:

The **Center for International Relations** (11381 Bunche Hall, 310-825-0604) focuses on international governments, migration, the environment, the spread of nuclear weapons, international political economy, and conflict resolution mechanisms. The center sponsors conferences, seminars, and lectures that deal with modern international problems; the **Center for Pacific Rim Studies** (11286 Bunche Hall, 310-825-0045) promotes and disseminates research, teaching, and public education programs on issues emerging from increasing interactions among the peoples and nations bordering the Pacific Ocean; the **Center for Chinese Studies** (11353 Bunche Hall, 310-825-8683) develops, coordinates, and supports graduate training in Chinese studies, major research projects, and a regional seminar; an **NDEA Joint Center in East Asian Studies** (11266 Bunche Hall, 310-825-0007) with the University of Southern California sponsors joint seminars and conferences focused on the East Asian region; the **Center for Japanese Studies** (11270 Bunche Hall, 310-825-7671) fosters research on Japan and scholarly exchange with Japanese institutions, and sponsors a colloquium series and conferences on Japan, as well as faculty research grants and graduate student fellowships; and the **Center for Korean Studies** (11282 Bunche Hall, 310-825-3284) presides over the biggest Korean studies program on the U.S. mainland, with the greatest number of specialists on its faculty dedicated to Korea and the largest number of students studying Korean subjects at both the undergraduate and graduate levels. The center also sponsors seminars, conferences, and symposia on Korea and Korean civilization.

ISOP's dean's office also supports an interdepartmental degree program in development studies. This undergraduate degree program focuses on the critical issues and problems common to Third World countries. Other ISOP programs focus on language teaching and academic exchange. In addition, ISOP houses offices of the UC Education Abroad

Program, the Southern California Fulbright Visiting Scholars Program, and the Southern California Consortium on International Studies (SOC-CIS).

Institute of American Cultures

The Institute of American Cultures is responsible for strengthening and coordinating interdisciplinary research and instruction in ethnic studies with special attention to UCLA's four ethnic studies research centers. The institute conducts no research itself but makes funds available for research and fellowships and promotes the activities of the four centers whose goals are to study and illuminate the histories of African Americans, American Indians, Asian Americans, Chicanas/Chicanos, and others, and to apply the University's capabilities to the analysis and solution of specific social issues. These centers promote faculty research, encourage the development of new courses and degree programs, assist departments in recruiting scholars, build library and other resources, and publish literature to disseminate the results of their work.

The **Center for African American Studies** (160 Haines Hall, 310-825-7403) conducts and sponsors research on the African American experience, coordinates the Afro-American studies curriculum, publishes research results, and sponsors community service programming.

The **American Indian Studies Center** (3220 Campbell Hall, 310-825-7315) serves as an educational and research catalyst and includes a library, master's and postdoctoral fellowship programs, and a publishing unit that produces a number of books and a quarterly journal.

The **Asian American Studies Center** (3230 Campbell Hall, 310-825-2974) seeks to increase the knowledge and understanding of the experiences of Asian Pacific peoples in America and promotes the development of material resources related to Asian American studies. The center includes a library, publications unit, student/community projects unit, postdoctoral fellowships, and a master's program.

The **Chicano Studies Research Center** (180 Haines Hall, 310-825-2363) promotes the study and dissemination of knowledge on the experience of the people of Mexican descent and other Latinos in the U.S. The center primarily supports UCLA faculty and the training of the next generation of scholars engaged in this area of inquiry, with emphasis given to (1) interdisciplinary and collaborative research of theoretical, interpretative, and applied nature, (2) the analysis, understanding, and articulation of issues critical to the development of Chicano and Latino communities in the U.S., and (3) establishment and maintenance of relationships with communities with similar academic and research interests at the state, national, and international levels.

Institute of Archaeology

The Institute of Archaeology, located in A210 Fowler Building (310-206-8934), is dedicated to studying and understanding the past through laboratory studies of artifacts, analysis of field data, creation of archives to store this information, and the education of students and interested community members via publications and lectures. The institute, the only one of its kind in the U.S., coordinates various academic and practical facilities for more than 40 researchers and many graduate students and volunteers in 10 associated academic departments. It regularly sponsors workshops and special courses. Research facilities include the Information Center (regional office of the California Archaeological Inventory), Ceramics Laboratory, Computer Imaging of Archaeological Data, Obsidian Hydration and Lithics Analysis Laboratory, Paleoethnobotany Laboratory, Rock Art Archive, and Zooarchaeology Laboratory. The Publications Unit publishes the findings of scholars from UCLA and other archaeology centers, while the Public Lecture Program provides a forum for the public presentation of recent archaeological discoveries and advances.

Institute of Industrial Relations

The Institute of Industrial Relations (1001 Gayley Avenue, Second Floor, 310-825-1964) has an interdisciplinary research program directed toward the study of all aspects of the employment relationship, in-

cluding labor markets, labor law, labor/management relations, equal employment opportunity, occupational safety and health, and related issues. Through the Center for Labor Research and Education, the institute also offers social policy and employment relations programs to the general public, unions, and management.

Institute for Social Science Research

The Institute for Social Science Research promotes interdisciplinary research on a broad spectrum of contemporary sociological, psychological, political, and economic problems and community issues. Research components include the Center for American Politics and Public Policy, Center for the Study of Urban Poverty, Interdisciplinary Program in Social Statistics, Survey Research Center, Social Science Data Archive, Organizational Research Program, and Center for Social Theory and Comparative History. Training in survey research methodology is available to students through participation in the annual Southern California Social Survey. The institute publishes the *ISSR Working Papers in the Social Sciences*; it is located in 303 GSEIS Building (310-825-0711).

Other interdisciplinary activities in the social sciences include the nationally respected **Business Forecasting Project** in UCLA's John E. Anderson Graduate School of Management and the **Center for the Study of Evaluation** in the Graduate School of Education and Information Studies which is at the forefront of efforts to improve the quality of schooling in America. In addition, the **Center on the Teaching and Learning of History in Elementary and Secondary Schools** brings K-12 teachers and social studies professors from throughout the country together in an effort to improve history teaching. The **Center for the Study of Urban Poverty** initiates new research on issues related to urban poverty and sponsors seminars in the field. The **Center for the Study of the Environment and Society** researches and addresses such issues as air pollution, water quality, and the public response to environmental concerns. And the **Center for Communication Policy** is a national leader in communications public policy issues such as technological innovations in telecommunications and the social and political impact of these changes.

Arts and Humanities

Center for Medieval and Renaissance Studies

The Center for Medieval and Renaissance Studies supports the research activities of some 20 academic departments dealing with the development of civilization between A.D. 300 and 1650. Major programs include funding research assistants, appointing visiting professors, organizing conferences and colloquia, and supporting departments in inviting lecturers. The center sponsors the publication of two journals, *Viator*, with emphasis on intercultural and interdisciplinary studies, and *Comitatus*, with articles by graduate students and recent Ph.D. graduates. For more information, send inquiries to the center at UCLA, Box 951485, Los Angeles, CA 90095-1485, or call (310)825-1880, fax (310) 825-0655, or e-mail cmrs@humnet.ucla.edu.

Center for Seventeenth- and Eighteenth-Century Studies

The Center for Seventeenth- and Eighteenth-Century Studies and the Clark Memorial Library are united under the administrative direction of the center and the College of Letters and Science. The center, located in 395 Dodd Hall (310-206-8552), organizes scholarly programs and workshops, seeks to enlarge the Clark Library holdings in the early modern period to enhance local research opportunities, has a publications program that makes the results of its conferences and workshops known to the community, provides long- and short-term fellowships to students and scholars doing research in early modern studies, offers graduate research assistantships and master classes, and organizes public programs and classical music concerts. The Clark Library, located approximately 10 miles from UCLA at 2520 Cimarron Street (213-731-8529), is a rare book library specializing in seventeenth- and eighteenth-century British works. It has a renowned collection centering on Oscar Wilde and his era and significant holdings of modern fine printing and

Western Americana. Bequeathed to UCLA in 1934 by William Andrews Clark, Jr., a prominent Los Angeles book collector and philanthropist, the extensive collection is housed in an elegant building in the West Adams district.

In other research activities, the **Center for Bilingual Research and Second Language Education** is working to produce a society that is proficient in at least two languages. In the **Linguistics Phonetics Laboratory**, one of the best-known laboratories of its kind in the nation, researchers are finding new ways to analyze speech functions and make voiceprints for use in law enforcement. In the **Hammer Center for Leonardo Studies and Research** scholars have access to major resources for the study of the works of Leonardo da Vinci. The **Center for the Study of Regional Dress** has opened within UCLA's Fowler Museum of Cultural History to advance the study of past and present cloth and clothing traditions through research, exhibitions, and teaching. And the **Center for Jewish Studies** sponsors lectures, conferences, and visiting scholars and coordinates Jewish studies activities on campus.

Resources for Research and Study

University Library System

Libraries are crucial to both study and research. The University Library on the UCLA campus is one of the country's largest and most renowned academic libraries and consists of the University Research Library, the College Library, and 11 specialized subject libraries. Collectively they contain more than six million volumes and extensive holdings of government publications, pamphlets, manuscripts, maps, microforms, music scores, recordings, photographs, and slides. They regularly receive over 94,000 serial publications.

ORION, the library's on-line information system, provides location and holdings information for most library materials and current information for materials on order or in processing. On-line circulation status information for materials in most libraries is also available. ORION public access terminals are located in many campus libraries, and demonstrations and workshops in using the system are available at the beginning of each term.

Students have access to the stacks in most libraries. A handbook describing the organization, services, and hours of the University libraries is available at all campus libraries.

The **Reprographic Service**, housed in 2081 Engineering I, can duplicate books, periodicals, manuscripts, and maps.

University Research Library

The University Research Library on north campus is a modern six-story building designed primarily as a graduate research library serving the social sciences, humanities, and several professional schools. The building houses over three million volumes arranged in open stacks, as well as the Reference Room, Circulation Department, Graduate Reserve Service, and Periodicals Room. The Microform and Media Service, with some 1,110,000 microcopies of newspapers, books, and periodicals, has a variety of reading and copying equipment. During academic sessions library hours are weekdays 8 a.m. to 11 p.m. (6 p.m. Friday), Saturday 9 a.m. to 5 p.m., Sunday 1 to 10 p.m.

The **Department of Special Collections** in the University Research Library contains rare books and pamphlets, the University Archives, early maps, and files of early California newspapers. Manuscript collections include the literary papers of Henry Miller and Anaïs Nin, as well as the private papers of Jack Benny, Charles Laughton, Carey McWilliams, King Vidor, and Nobel Peace Prize winner Dr. Ralph J. Bunche, a UCLA alumnus. Other significant holdings include the Sadleir Collection of nineteenth-century fiction, generally regarded as the finest of its kind, and the Ahmanson-Murphy Collection of Early Italian Printing (1471-

1550), with a concentration on Aldine imprints. The department also includes UCLA's Oral History Program, a national leader in the field with over 400 interviews with prominent individuals since the program was founded in 1959.

The **Bruman Maps and Government Information Library (MGI)**, also housed in the University Research Library, collects official publications of the U.S. government, the State of California, California counties and cities, selected U.S. state and local governments, foreign nations and selected foreign states and provinces, the United Nations and some of its specialized agencies, and a number of other international organizations. MGI has current English-language, nongovernmental pamphlets on public affairs representing a wide spectrum of political and social opinion, with strong emphasis on social welfare, economic, social, and political conditions, and industrial relations. It also has maps, city plans, nautical charts, and technical books and serials on all aspects of cartography.

College Library

The College Library is designed to meet the instructional and informational needs of most undergraduate students. It is permanently located in the Powell Library Building but is housed in a temporary structure — commonly known as "Towell" — while Powell undergoes seismic renovation. Towell is located at the foot of Janss Steps between the Dance Building and the Men's Gym and houses 200,000 books and periodicals; course reserve materials, including audiocassettes, lecture notes, past examinations, and APS (Academic Publishing Service) readings available for loan; and the Humanities Computing Laboratory with 36 IBM PS/2s, Macintoshes, and printers. During academic sessions library hours are weekdays 8 a.m. to 11 p.m. (6 p.m. Friday), Saturday 9 a.m. to 5 p.m., Sunday 1 to 10 p.m.

Specialized Subject Libraries

The resources of the specialized campus libraries are devoted mainly to subjects of concern to the departments or professional schools which they serve, but their materials are available to all UCLA students and faculty. A recorded message (310-825-8301) provides current hours of service for each library.

The **Arts Library** in Dickson Art Center houses material on art, art history, design, film, television, theater, and architecture. The Belt Library of Vinciana is also located in Dickson Art Center. Arts Special Collections, located in the University Research Library, contain noncirculating materials, including the Princeton Index of Christian Art, the Artists' File, and other special collections such as unpublished radio, film, and television scripts and archival records of major Southern California motion picture studios.

The **Louise Darling Biomedical Library**, in the Center for the Health Sciences, is one of the finest libraries of its kind in the country. Its 500,000 volumes and nearly 6,000 serial subscriptions serve all the UCLA health and life sciences departments/schools and the UCLA Medical Center.

Materials in Chinese, Japanese, and Korean are available in the **Rudolph East Asian Library**, and the **Hugh and Hazel Darling Law Library** has a substantial collection of over 400,000 volumes selected to further the course of instruction in the School of Law and the legal research needs of the UCLA community. The **Rosenfeld Management Library** serves the John E. Anderson Graduate School of Management and the various subjects related to business and management.

The **Rubsamen Music Library** houses historical musicology and ethnomusicology materials, musical scores, recordings, and the personal collections of such composers as Henry Mancini, Alex North, and Ernst Toch. Music Special Collections contain sheet music, anthologies, arrangements for band and orchestra, sound recordings, and manuscripts.

The **Science and Engineering Library (SEL)** covers the fields of engineering, mathematics, and the physical sciences. The SEL collections

are housed in four separate locations. **SEL/Chemistry** includes material on chemistry, biochemistry, and molecular biology; materials for engineering, astronomy, computer science, meteorology, and mathematics are kept in **SEL/Engineering and Mathematical Science**; major subjects covered by **SEL/Geology-Geophysics** include geoscience, invertebrate paleontology, planetary and space science, and hydrology; and **SEL/Physics** covers all aspects of that science, including acoustics and spectroscopy.

Special Archives and Collections

In addition to the extensive collections of the University Library, a rich array of other information resources is available to the UCLA community. The archives and collections listed below are independently managed by individual UCLA departments and centers.

The **American Indian Studies Center Library** houses a collection on American Indian life, culture, and state of affairs in historical and contemporary perspectives, while the **Asian American Studies Center Reading Room** features Asian Pacific American resources. The **Center for African American Studies Library** contains materials reflecting the African American experience in the social sciences, arts, and humanities.

Materials related to Chicano and Latino cultures are housed in the **Chicano Studies Research Center Library**, and the **Clark Memorial Library** contains rare books, manuscripts, and other noncirculating materials on English culture (1640-1750). The **English Reading Room** features a noncirculating collection of English and American literature.

The **Ethnomusicology Archive** houses sound recordings of folk, ethnic, and non-Western classical music, while the **Institute for Social Science Research Data Archive Library** contains a collection of statistical databases for the social sciences. The **Seeds University Elementary School Library** features contemporary materials for children from kindergarten through junior high school and adult works on children's literature.

UCLA FILM AND TELEVISION ARCHIVE

The UCLA Film and Television Archive is the world's largest university-based collection of motion pictures and broadcast programming. The archive's holdings of original film and television materials serve both the UCLA community and national and international constituencies.

The Motion Picture Collection, with more than 37,000 films, is the country's largest collection after the Library of Congress. Among its outstanding collections are 27 million feet of Hearst Metrotone News film dating back to 1919. Other noteworthy holdings include studio print libraries from Twentieth Century-Fox, Paramount Pictures, Warner Brothers, Columbia Studios, New World Pictures, Universal Studios, and Orion. Special collections document the careers of William Wyler, Hal Ashby, Tony Curtis, Rosalind Russell, Stanley Kramer, Cecil B. DeMille, Harold Lloyd, and other persons of prominence in the American film industry.

The Television Collection is the nation's largest university-based collection of television broadcast materials. Its 35,000 titles include kinescopes, telefilms, and videotapes spanning television history from 1946 to the present, with emphasis on drama, comedy, and variety programming. A special collection of over 100,000 news and public affairs programs is also maintained.

The archive's exhibition program presents evening screenings and discussions in Melnitz Theater which focus on archival materials, new work by independent filmmakers, and a wide array of international films. For program information, call (310) 206-FILM.

The Archive Research and Study Center (ARSC), located in 46 Powell Library (310-206-5388), provides on-site viewing of the Film and Television Archive's collections and research consultation to students, faculty, and researchers. ARSC hours are weekdays 8:30 a.m. to 5 p.m. Extended viewing hours are available at the Instructional Media Laboratory.

Art Galleries and Museums

A tour of all the UCLA museums and art galleries will take you from the corner of Wilshire and Westwood Boulevards to the northeast corner of the campus. **UCLA at the Armand Hammer Museum of Art and Cultural Center** regularly presents selections from the **Armand Hammer Collection**, which features Impressionist and Post-Impressionist paintings by such artists as Monet, Pissarro, Sargent, Cassatt, and Van Gogh. Related paintings by Constable, Picasso, and others from UCLA's collection are also on view. The museum also organizes and presents major changing exhibitions devoted to examinations of historical and contemporary art in all periods. Extensive cultural programming, including children's performance and storytelling series, music, poetry readings, and "Dialogues on Art," are presented on Saturdays and Sundays, and Thursday evenings. The museum is open Tuesday through Saturday 11 a.m. to 7 p.m. (Thursday to 9 p.m.), Sunday 11 a.m. to 6 p.m., closed Mondays, July 4, Thanksgiving, and Christmas. Admission is \$4.50 for adults; \$3 for seniors 65 and over, non-UCLA students, and UCLA faculty and staff; \$1 for UCLA students; children 17 and under are admitted free. Admission is free on Thursday from 6 to 9 p.m. For information on programming and docent tours, call (310) 443-7000.

On the gallery level of the Armand Hammer Museum is the **Grunwald Center for the Graphic Arts**, which houses a distinguished collection of over 45,000 prints, drawings, and photographs, including over 10,000 works from the prestigious **Armand Hammer Daumier and Contemporaries Collection**. Maintained as a study and research facility for the benefit of students and the community, the center's permanent holdings include significant European and American examples from the fifteenth century to the present. It is particularly noted for its collection of German expressionist prints and works on paper by Matisse and Picasso, as well as the Richard Vogler Cruikshank collection and the Frank Lloyd Wright collection of Japanese prints. The center is open by appointment Monday through Friday from 9 a.m. to 5 p.m. (310-443-7076).

The **Wight Art Building**, located in the Dickson Art Center on north campus, includes exhibition space of 6,000 square feet in which to mount campus exhibitions and student-organized programs and exhibits. For a schedule of exhibitions, call (310) 206-6467.

The **Murphy Sculpture Garden**, located between Bunche Hall and the Wight Art Building, contains a collection of over 70 major works by Rodin, Matisse, Calder, Lachaise, Lipchitz, Moore, Miro, Hepworth, and many other late nineteenth- and early twentieth-century masters. All works in this distinguished collection, situated on a picturesque five-acre expanse, are private gifts to the University. For information on docent tours, call UCLA at the Hammer Museum of Art and Cultural Center at (310) 443-7000.

The **Fowler Museum of Cultural History** is internationally known for the quality of its collections and exhibits. Its collections encompass the arts and material culture of much of the world, with particular emphasis on West and Central Africa, Oceania, and Latin America. The museum offers assistance with instruction and research and sponsors major exhibitions, lecture programs, and symposia. Administrative offices are located in 1586 Fowler Building (310-825-4361).

Other Campus Resources

The **Office of Academic Computing (OAC)** provides microcomputer and workstation support services through its Microcomputer Support Office (MSO), campus backbone network services through its Campus Network Services (CNS) group, and supercomputer services through its Computing Services group. OAC offers a broad range of services, including an IBM ES/9000 Model 900 supercomputer with vector facilities; IBM SP/2 high-performance parallel processing complex, including a cluster of RS/6000 workstations; public computing facilities; instruction in the use of computer hardware and software through free non-credit classes; professional consulting services; user documentation and *Perspective*, a quarterly journal; assistance to departments in the

selection of microcomputer and workstation hardware and software; and computing assistance to faculty, staff, and students with disabilities.

The **Microcomputer Support Office**, located in 5308A Math Sciences (310-825-7408), provides services enabling departmental computer support coordinators to provide assistance to faculty and students on the use of microcomputers and advanced workstations, as well as special services in computing for faculty, students, and staff with disabilities. MSO services are intended to support the integration of microcomputers and advanced workstations into administrative, instructional, and research programs as well as individual microcomputer acquisition and use. MSO supports local area networks and their connection to the campus backbone network and coordinates campuswide software licenses, user groups, and an electronic newsletter. Most services are available through the Microcomputer Information Center (MIC).

OAC's IBM ES/9000 runs the MVS/ESA operating system and is available to all colleges, schools, and departments within UCLA, as well as to all registered students. OAC maintains a large library of applications software, including statistical, language, and graphics packages. The ES/9000 with its vector facilities and the SP/2 complex are particularly appropriate for numerically intensive computing and data management tasks. In the numerically intensive computing area, OAC provides a code clinic with professional consultants to analyze and improve the efficiency of specialized code in numerically intensive computing applications. In the visualization area, OAC consultants work with users in producing high-quality graphic output necessary for research in many scientific disciplines. OAC is connected to the campus backbone network, enabling access to its services wherever there is a connection to the network. These services include access to ORION, the UCLA on-line library information system; use of BEN, an electronic communication system; and access to the Internet. Information on how to apply for an account to use any of OAC's services is available in the OAC User Relations Office (4302 Math Sciences, 310-825-7548) weekdays from 8 a.m. to 5 p.m.

The **Division of Laboratory Animal Medicine**, located in 1V-211 CHS (310-825-7281), is responsible for the procurement, husbandry, and general welfare of animals required for teaching and investigative services. It also administers the veterinary medical and husbandry programs throughout the campus.

The University of California **Natural Reserve System** offers 26 reserves statewide to be used for field studies in unspoiled natural sites and for protected scientific experiments. For more information, contact Robert M. Gibson, 2203 Life Sciences (310-825-6459).

The **Biological Collections** of the Biology Department include marine fishes from the Eastern Pacific and Gulf of California, and birds and mammals primarily from the Western U.S., Mexico, and Central America. The department also maintains a more limited collection of amphibians, reptiles, and fossil vertebrates. For more information, contact Jaap Hillenius, A339 Life Sciences (310-825-1282), or Donald Buth, 1335 Life Sciences (310-206-6084).

Although the UCLA campus as a whole has an attractive, park-like atmosphere, there are two distinctive garden areas worthy of special note. The eight-acre **Mathias Botanical Garden**, located in the southeast corner of campus, contains some 4,000 species of native and exotic plants. It is used for botanical teaching and research. This peaceful wooded area, a center for testing the usefulness of woody subtropical plants, is a favorite spot for quiet strolls. The botanical garden also has a research Herbarium containing 180,000 dried plant specimens. The administrative office is located in 124 Botany (310-825-3620).

The **Hannah Carter Japanese Garden** in nearby Bel Air, designed and constructed by Japanese artisans and architects using native plants and artifacts, is an authentic Kyoto-style garden. The terraced two-acre garden contains such traditional and symbolic features as a teahouse, shrine, antique stone water basins, lanterns, waterfalls, and a pond with Japanese carp (koi) swimming among water lilies. The garden, a private gift to UCLA, is used by faculty and students for study and research, by

departments for professional events, and by others seeking a serene setting for meditation and solitude. It is open to groups and individuals by reservation only. Call the Visitors Center at (310) 206-8147.

Supplementary Educational Programs

In addition to the regular academic programs which are described in the Curricula and Courses section of this catalog, the following optional programs are available to UCLA's undergraduate and graduate students.

Summer Sessions

UCLA offers more than 500 courses from approximately 60 UCLA departments in six-, eight-, and 10-week sessions. Many students take advantage of Summer Sessions to enroll in courses they were unable to take during the year, repeat courses in which they may have done poorly, lighten their academic load for the following term, or complete graduation requirements more quickly.

Admission to Summer Sessions does not constitute admission to the University in either undergraduate or graduate standing. Students who wish to attend UCLA in regular session must follow admission procedures described in the Undergraduate Study and Graduate Study sections of this catalog.

If you are a regularly enrolled undergraduate student, you may attend UCLA Summer Sessions for full unit and grade credit. Summer Sessions work is recorded on your UCLA transcript, and grades earned are computed in your grade-point average. Check with your college or school counselor about applying these courses toward your minimum unit requirements and for any limitations your college or school may impose on Summer Sessions study.

If you are a regularly enrolled graduate student, you may, with departmental approval, take regular session courses offered in Summer Sessions for credit toward a master's or doctoral degree; consult your graduate adviser in advance concerning this possibility. Summer Sessions courses may also satisfy the academic residence requirement for master's or doctoral degrees.

Unlike enrollment in regular terms, you may attend another college institution for credit while you are enrolled in Summer Sessions. Applications and more information are available in 1147 Murphy Hall (310-794-8333).

UCLA Extension

With over 100,000 adult student enrollments each year, UCLA Extension is one of the largest university continuing education programs in the world. It is designed to bring the benefits of the University — its scholars, research, and resources — to the community and the state as a whole.

Many of UCLA Extension's 4,500 classes are innovative and experimental in content, format, and teaching methods. Credit and noncredit courses are offered in nearly every academic discipline, in many interdisciplinary areas, and in emerging fields. In addition, Extension offers special programs each term on topical issues as well as those of ongoing public concern. Many noncredit Extension courses offer the opportunity to earn Continuing Education Units, widely used for relicensure and other professional/career-related purposes.

Although registering for Extension courses does not constitute admission to regular session, degree credit earned through Extension may apply toward the UCLA bachelor's or master's degree; consult your college or school counselor or graduate adviser before enrolling. For more information, see Concurrent Enrollment and Transfer of Credit and Courses of Instruction in the Academics section of this catalog. Graduate students should also see Transfer of Credit in the Graduate Study section.

The Extension Advisory Service offers assistance in planning long- or short-term study through Extension. The office is located in 114 UCLA Extension Building, 10995 Le Conte Avenue (310-206-6201). To obtain the current *UCLA Extension Catalog*, contact the Registration Office at (310) 825-9971. Hours are weekdays from 8 a.m. to 6 p.m. (5 p.m. Friday).

Education Abroad Program

Each year more than 1,400 undergraduate and graduate students from UC campuses study at distinguished universities throughout the world. UCLA students remain registered here while overseas and receive UC units and grade points for work completed abroad. Currently, the Education Abroad Program (EAP) offers study opportunities at more than 100 different universities in 32 countries: Australia, Austria, Brazil, Canada, Chile, China, Costa Rica, Denmark, Egypt, England, France, Germany, Ghana, Hong Kong, Hungary, India, Indonesia, Ireland, Israel, Italy, Japan, Korea, Mexico, Netherlands, New Zealand, Russia, Scotland, Singapore, Spain, Sweden, Taiwan, and Thailand. Participants can spend up to a full academic year abroad, enjoying a unique opportunity to enhance language skills, take courses in their major, and become involved in the culture of the host country. One-term programs are available in Austria, Brazil, Canada, Chile, China, Costa Rica, Denmark, France, Germany, Hungary, India, Indonesia, Israel, Italy, Japan, Korea, Mexico, Netherlands, Russia, Singapore, Sweden, Taiwan, and Thailand. Summer programs are offered in Denmark and Mexico. In Costa Rica there is a one-term tropical biology field study program. For all programs a special orientation program and, when necessary, intensive language training are included. During the year UC faculty members at the host university assist with scholastic or personal problems.

EAP is open to all undergraduate students who have (1) completed a minimum of 90 quarter units (junior standing) prior to departure, (2) at least a B average (3.0 GPA) overall at the time of application, and (3) the support of the UCLA EAP Selection Committee. Some programs have a language requirement as well.

Graduate students who have completed at least one year of graduate work and have the approval of their graduate adviser and the dean of the Graduate Division may participate at most study centers.

Costs for participation in EAP vary from \$1,740 to \$19,000, but University financial aid is available to those who qualify. Applications must be filed several months in advance. For more information, contact the EAP Office in 28 Haines Hall (310-825-4889, 825-4995).

Interdisciplinary Colloquia

Organized colloquia involving several disciplines are offered from time to time in conformity with faculty and student interests. They are open to all faculty members, interested undergraduates, and graduate students assigned to the colloquia by their advisers. Credit is not awarded directly but may be given through appropriate departmental courses. For information about the committees in charge of the colloquia, call the assistant to the provost of the College of Letters and Science at (310) 825-4621.

The **Marschak Interdisciplinary Colloquium on Mathematics in the Behavioral Sciences** provides a forum for interaction among faculty and students interested in the applications of mathematics and statistics to the behavioral sciences. Disciplines include anthropology, architecture, artificial intelligence, biology, business, computer science, economics, education, engineering, geography, linguistics, management, operations research, philosophy, political science, psychology, public health, public planning and policy, sociology, and systems analysis.

The colloquium sponsors presentations by leading experts in these fields, including faculty members from UCLA, other UC campuses, and other universities, and meets on alternate Fridays from 1 to 3 p.m. in 2270 Public Policy Building during the academic year. Announcements of presentations, including abstracts of the papers to be presented, are circulated and posted on campus; announcements also appear in *UCLA Today*. The colloquium is directed by Michael D. Intriligator, profes-

sor of economics, political science, and policy studies. For further information, contact the Western Management Science Institute at (310) 825-1581 or 825-4144.

The **Rothman Colloquium in Cognitive Science**, organized by the interdisciplinary Cognitive Science Research Program, sponsors presentations by leading experts in the broad field of cognitive science, which explores the nature of human and artificial intelligence. Participating disciplines include artificial intelligence, biology, computer science, linguistics, neuroscience, philosophy, and psychology. The list of speakers is circulated to the participating departments on campus. For further information, contact the Cognitive Science Research Program at (310) 825-0951.

Student Life

Living Accommodations

Where you live while attending UCLA can play an important role in your total college experience. Many students, especially those in their first year, choose to live on campus; others opt for a University-owned apartment or a private apartment in one of the many surrounding communities.

There are many different housing options available. Decide early which ones you plan to pursue and apply for or follow up on them as soon as possible. If you plan to live off campus, arrive early to make your housing arrangements for the coming academic year.

The **UCLA Community Housing Office**, 350 De Neve Drive (Sproul Hall Annex), Los Angeles, CA 90095-1495, (310) 825-4491, provides information and current listings for University-owned apartments, cooperatives, private apartments, roommates, rooms in private homes, room and board in exchange for work, and short-term housing. Rental listings are updated daily. The housing office also has bus schedules, area maps, and neighborhood profiles. A current Registration Card or letter of acceptance and a valid photo identification card are *required* for service.

The International Student Center on Gayley Avenue helps international students find housing and may also provide temporary facilities until suitable permanent housing arrangements are made.

UCLA Housing Options and Opportunities: Information and Application, a booklet which covers housing options in much greater detail, is mailed to all students when they are accepted for admission.

On-Campus Housing

Living on campus can add an extra dimension of academic support, enjoyment, and convenience to your UCLA experience. Four residence halls (Dykstra, Hedrick, Rieber, and Sproul Halls), two residential suite complexes (Hitch and Saxon Residential Suites), and Sunset Village accommodate nearly 6,000 undergraduates, while the Hilgard Houses accommodate 165 transfer and upper division students. Hershey Hall houses 334 graduate students. All on-campus housing is coed and within walking distance to classrooms.

Residence hall rooms are shared by two or three students. Residential suites — shared by four or six students — consist of two bedrooms, a full bathroom, and a common living room. Sunset Village has one- and two-bedroom units, each with a full bath, shared by two or three students per bedroom. Hilgard Houses are four large residential homes on the east side of campus. Each accommodates about 40 students and has a large living room, study hall, small computer room, TV lounge, and patio. Students live in furnished doubles, triples, and quads. Each house has single-sex communal bathrooms and a small laundry room. The four residence hall cafeterias and the dining commons in Sunset Village accommodate all on-campus residents and serve 19 meals per week. Residents may also select a 14- or 11-meal plan.

Applications for on-campus housing are contained in the *UCLA Housing Options and Opportunities: Information and Application* booklet, available at the **UCLA Housing Assignment Office**, 270 De Neve Drive, Los Angeles, CA 90095-1381, (310) 825-4271. To apply for on-campus housing, your completed application must be postmarked by the following deadlines:

- March 31 for freshmen (April 10 for current students, May 1 for transfer students, June 1 for graduate students) for Fall Quarter 1995
- October 27 for Winter Quarter 1996
- January 26 for Spring Quarter 1996

Following each of these dates, the Housing Assignment Office randomly designates a number to each application received; the number determines the order in which you are offered assignment to on-campus housing. **All new freshman and transfer students who are admitted for Fall Quarter and apply for on-campus housing by the stated deadline are guaranteed on-campus housing.**

The full cost per student for the 1995-96 academic year (Fall, Winter, and Spring Quarters, excluding vacation periods) is \$4,955 (triples) or \$5,755 (doubles) for residence halls, \$6,170 (six persons) or \$6,835 (four persons) for suites and Sunset Village, and \$6,280 (triples) or \$6,950 (doubles) for Sunset Village, plus a \$22.44 membership fee in the On-Campus Housing Student Association. These rates include 19 meals per week.

The **Office of Residential Life**, in the Residential Life Building near Sproul Hall (310-825-3401), is responsible for the conduct of students in residence halls and suites and provides professional and student staff members to counsel residents on programming and other problems. The office is also a designated Sexual Harassment Information Center, as well as a campus Harassment Information Center, available to all UCLA students (see Harassment in the Appendix for more information).

University Apartments for Single Graduate and Family Students

UCLA maintains nearly 1,200 off-campus apartments about five miles from campus for married, single-parent, and single graduate students. Unfurnished one-, two-, and three-bedroom units are available. One-bedroom rentals for 1995-96, excluding utilities, are expected to range from \$531 to \$730 per month. Since waiting lists for family student housing are long, *do not wait until you have been accepted to UCLA to apply*. Verification of marriage and/or copies of children's birth certificates (English translation) must accompany your application. Call University Apartments South at (310) 398-4692 for up-to-date information.

University Apartments for Single Students

More than 230 apartments for single students in four off-campus facilities are maintained by the University; all are located within walking distance of campus. Apartments vary from singles to three-bedroom units, with bedrooms usually shared by two or three students. Provisional space rates for the 1995-96 academic year, including utilities, range from \$2,210 to \$4,640. All occupants must be full-time UCLA students; rental agreements are for the entire academic year. An application is included in the *UCLA Housing Options and Opportunities: Information and Application* booklet, available at the UCLA Housing Assignment Office. Assignments are made on a space-available basis. Current UCLA students are assigned to the apartments during Spring Quarter; not all types of apartment spaces are available to entering students. Call the Housing Assignment Office at (310) 825-4271 for current availability information. Roommate vacancies in University apartments are also routinely posted in the UCLA Community Housing Office.

Cooperatives/Boarding Houses

There is one student cooperative within walking distance of campus which provides an atmosphere similar to residence halls except that you must work three to four hours per week as partial payment for room

and board. There are also several boarding houses and private residence halls convenient to UCLA. Phone numbers are available from the UCLA Community Housing Office.

Fraternities and Sororities

Many of the 45 fraternities and sororities at UCLA own chapter houses on the west and east sides of campus respectively. For sororities, you must be a member to live in the house and generally will be able to move in after your first year of active membership. For fraternities, living in the house depends on the number of housing spaces available. Room, board, and dues are about the same as the monthly residence hall fee. During the summer break, most fraternities with chapter houses lease rooms to students, Greek or not (check listings at the UCLA Community Housing Office). For more information, contact Fraternity and Sorority Relations, 118 Men's Gym (310-825-6322).

Apartments

If you would like to rent an apartment off campus, you must carefully consider the kind of living arrangements you can afford. Your financial situation may dictate how close you live to UCLA and whether you can live alone or must share an apartment. Apartments within three miles of UCLA (Westwood, West Los Angeles, parts of Brentwood and Santa Monica) average \$600 per month for single units and \$800 for one-bedroom units. Apartments more than four miles away (Palms, Mar Vista, Culver City) usually cost \$100 to \$150 less. Listings change daily and are posted in the UCLA Community Housing Office. A roommate share board is also available.

Short-Term Housing

If you need temporary quarters until you find something permanent, there are several hotels and motels within five miles of campus with varying rates and accommodations. Most short-term housing is available for no more than one to three months, though some may be for longer periods. Sublets are most readily available from May to August. Hotel and motel listings, which may be requested by mail or phone, are available in the UCLA Community Housing Office.

Transportation

Parking Services

A limited number of parking permits are available for the campus. Unfortunately, not all students who request a permit can be offered parking. To maximize your chances of obtaining a permit, you are encouraged to apply for a two-person or three-person carpool. Valid carpool applications received by the deadline are guaranteed a parking permit. You may obtain a parking application and instructions at Parking Services (555 Westwood Plaza, Structure 8, Suite 100, 310-825-9871). To be considered, apply by the deadline dates listed on the Calendar at the beginning of this catalog or in the quarterly *Schedule of Classes*.

The application process for parking includes Parking Services' evaluation of your personal transportation needs. Parking assignments are based on a number of factors, including distance you live from campus, total terms in attendance, employment obligations, and other related factors. Once evaluated, you are notified of your assignment or denial. You must accept and submit the parking offer by the published deadline. If you are not offered a permit for a particular term, you must reapply each term to be reconsidered. For more information, call Parking Services at (310) 825-9871.

Students with permanent or temporary disabilities who have DMV-issued disabled persons' license plates or placards may apply to the Office for Students with Disabilities (310-825-1501) for parking assignments and on-campus transportation assistance. Students with temporary disabilities (usually less than three months) who do not have DMV-issued disabled persons' license plates or placards may obtain authorization for disabled parking through Student Health Service (310-206-8109).

Commuter Assistance-Ridesharing

The Commuter Assistance-Ridesharing (CAR) Office can help you find alternative means of transportation to and from campus other than driving alone in your car.

Many students form or join existing **UCLA carpools and vanpools** to save time and money and make the daily commute more pleasant. A carpool matchlisting service is **free** to all students and can be requested by contacting CAR at (310) 794-RIDE. There are over 125 vanpools serving over 65 communities throughout Southern California. Students can sign up for vanpools on a full-time (month-to-month) or part-time (occasional) basis. To find out whether a vanpool currently operates from your area, call a vanpool coordinator at (310) 794-RIDE.

An Emergency Ride Home (ERH) program has been developed to aid full-time UCLA vanpoolers and qualified part-time vanpoolers in the event of an emergency or other unscheduled need to get home quickly. The service consists of three options — night rider vans which are vanpools that arrive on campus at 9 and 9:30 a.m. and leave at 6 or 7 p.m., overnight rental car service, and emergency carpool matchlist service. For detailed information, contact CAR at (310) 794-RIDE.

Public bus lines connect UCLA to Santa Monica, Culver City, Beverly Hills, and most of the greater Los Angeles area. Bicycles, mopeds, and motorcycles are other popular ways to get to campus; there are special parking areas on campus specifically marked and equipped for these vehicles.

All of these transportation alternatives are described in the *UCLA Commuter Guide*, a brochure which also contains a carpool matchlist form, information on public bus routes, and helpful hints on getting to UCLA without using your car. It is available at the Commuter Assistance-Ridesharing Office (555 Westwood Plaza, Structure 8, Suite 200). CAR is open weekdays from 7:30 a.m. to 6 p.m. (310-794-RIDE).

ASUCLA

Every registered UCLA student is a member of the Associated Students of UCLA (ASUCLA), one of the nation's largest such enterprises in terms of size, scope, and range of programs. The undergraduate and graduate student governments are integral parts of ASUCLA, which supports the following activities and services.

Food Service

ASUCLA operates the food service on the general campus and provides a number of innovative menu options at a variety of locations. Catering for special events is also available. Hours listed are for regular school sessions and vary during the summer and holiday periods.

Bombshelter Deli And Burger Bar. This unique food service in the center of the Court of Sciences offers an assortment of traditional deli sandwiches, snacks, rice bowls, sushi, broiled hamburgers and chicken, and salads at reasonable prices. Hours are weekdays 7:30 a.m. to 5 p.m. (4 p.m. Friday).

Campus Corner is located just across Bruin Walk from Kerckhoff Hall. **Taco Bell Express** is on the north side, while the south side features **Burger Works**. Hours are weekdays 7:30 a.m. to 5 p.m.

Cooperage — On the A Level of Ackerman Union, the Cooperage offers Mexican food, pizza, grill items, gourmet salad bar, pastries, gourmet coffees, soft ice cream, and pocket sandwiches. A stage and sound system for live entertainment and a large-screen TV for major events are available. Hours are weekdays 9:30 a.m. to 10:30 p.m., Saturday 11 a.m. to 10:30 p.m., Sunday 11 a.m. to 10 p.m.

Kerckhoff Coffee House, on the second floor of Kerckhoff Hall, offers Baskin-Robbins ice cream specialties and a variety of teas, coffees, fresh pastries, and potages (hearty soups). Live entertainment is featured Tuesday, Thursday, and Friday nights. Hours are weekdays 7 a.m. to midnight, weekends 10 a.m. to 11 p.m.

Lu Valle Commons, located just north of the School of Law, features deli food, international entrees, hamburgers, and other grilled specialties. Hours are weekdays 7:30 a.m. to 9 p.m. (8 p.m. Friday), Saturday 10 a.m. to 5 p.m., Sunday 11 a.m. to 8 p.m.

Within Lu Valle Commons is **Jimmy's Coffee House**, featuring specialty beverages, cheesecakes, and desserts. Hours are weekdays 7 a.m. to midnight (9 p.m. Friday), Saturday 9 a.m. to 9 p.m., Sunday 10 a.m. to 10 p.m.

North Campus Student Center — This facility, just southwest of the Research Library, offers a variety of Mexican entrees, frozen yogurt, fresh-baked cookies, pizza, deli and garden sandwiches, a wide selection of international-style entrees, hamburgers, and a salad bar. North Campus is open for breakfast, lunch, and dinner. Hours are weekdays 7 a.m. to 10 p.m. (8 p.m. Friday).

Treehouse — Located on the first floor of Ackerman Union, the Treehouse offers a wide variety of choices. **Etc. Etc. Etc.** has frozen yogurt and fresh-baked cookies. **Panda Express** features quick-serve Asian specialties. Hansen's fresh fruit juices and smoothies are served at the **Tropix** beverage bar. On the east side of the dining room, the servery offers entrees and sandwiches, including ranch-fried chicken, chili, Italian-style dishes, deli salads, and traditional American favorites. The Treehouse servery is open weekdays 7 a.m. to 3 p.m. Hours vary for Etc. Etc. Etc., Tropix, and Panda Express; they generally are open later than the servery and on weekends.

Students' Store

The ASUCLA Students' Store, the largest on-campus retail store in the nation, operates five campus locations. The oldest location, the **Ackerman Union Students' Store** (B Level of Ackerman Union, 310-825-7711), is undergoing seismic renovation, so some store departments are operating out of temporary quarters this year. Textbooks for most undergraduate and graduate programs are located in the Plaza Building, diagonally across from Ackerman Union. Other books, including reference, fiction, technical, and study aids, are stocked in the **Bookzone** on the A Level of Ackerman Union. Still on B Level are school and art supplies, calculators and other electronic items, UCLA insignia merchandise (Bearwear), men's and women's sportswear, and convenience store items. The Computer Store (on B Level) administers the University's computer purchase program; Macintosh and IBM computers are available to students, faculty, and staff at discounts up to 40 percent. Educational editions of software are discounted as much as 75 percent off retail prices. Some departments may be relocated during the 1995-96 academic year, depending on construction schedules. Hours during regular school sessions are weekdays 7:45 a.m. to 7:30 p.m. (6 p.m. Friday), Saturday 10 a.m. to 5 p.m., Sunday noon to 5 p.m.

The **Health Sciences Store** on the first floor of the hospital (13-126 CHS, 310-825-7721) specializes in books and supplies for students in dentistry, medicine, public health, and related areas. The **Lu Valle Commons Students' Store** (just north of the School of Law, 310-825-7238) carries convenience items, magazines, and books, as well as textbooks for selected graduate programs (law, management, architecture, urban planning, social welfare). A dry cleaning service and copy center are also available. The **North Campus Shop** (in the North Campus Student Center, 310-206-0751) is a small convenience store offering snacks and stationery items. The **Hill Top Shop** (in Delta Terrace, Sunset Village, 310-206-4306) carries items specifically for dorm residents, including laundry detergent, closet organizers, and groceries. A Wells Fargo Bank automatic teller machine and photocopier are also available.

Lecture Notes/Academic Publishing Service

Lecture Notes is a subscription service that publishes concise weekly summaries of about 130 of UCLA's large lecture classes. Notes can be picked up in the Ackerman Union Students' Store (B Level of Ackerman Union, 310-206-0882). **Academic Publishing Service** (second floor of Ackerman Union with Graphic Services, 310-825-2831) reproduces

course materials for professors, obtaining 5,000 copyright authorizations each year.

Job Opportunities on Campus

ASUCLA reserves more than 2,500 part-time jobs for UCLA students in food service, the students' stores, Graphic Services, Travel Service, the student union, and other departments. Listings are posted outside the Personnel Office, 205 Kerckhoff Hall (310-825-7055).

The residence halls offer a number of positions, as do the University libraries; check at the residences and the Personnel Office in the University Research Library (310-825-7947). Other on-campus jobs may be available through the Placement and Career Planning Center (see Student Services later in this section).

Campus Photo Studio

Yearbook portraits, portrait photography, and passport photographs are available from the Campus Photo Studio (second floor of Ackerman Union, 310-206-0889), as are film, darkroom supplies, and discount photofinishing. Hours are weekdays 8:30 a.m. to 5:30 p.m. The studio is scheduled to move to the A Level of Ackerman Union during Spring Quarter 1996.

Check Cashing/Banking

Cash is available via on-campus automatic tellers. On the A Level of Ackerman Union are automatic tellers for Bank of America, Westwood Student Federal Credit Union, First Interstate Bank, and Wells Fargo Bank. Great Western Bank and Bank of America have automatic tellers on the patio between Campbell Hall and the North Campus Student Center. The Hill Top Shop in Delta Terrace has a Wells Fargo Bank automatic teller, and there is a First Interstate Bank automatic teller at the Health Sciences Store. Automatic tellers give access to the Star, Plus, or Cirrus network, but most banks charge fees for network access.

Students, faculty, and staff with current UCLA identification may also write checks for \$20 over the amount of purchase at all Students' Store locations; a \$2 minimum purchase is required.

Bruin Gold

Bruin Gold is a program that lets UCLA students use their official photo Student I.D. Cards as debit cards. You make a deposit (\$20 minimum) into a Bruin Gold account linked to your photo I.D. Then your photo I.D. can be used for payment at virtually all ASUCLA locations — Students' Stores, Food Service, Travel Service, and Graphic Services. Thousands of students use Bruin Gold instead of credit cards or checks. Unlike credit cards, Bruin Gold helps you keep track of expenses — the current balance shows on the card reader after each transaction. Unlike checks, Bruin Gold can be used for small purchases, even those under \$1. For complete information, contact the Bruin Gold Office on the first floor of Ackerman Union, (310) 825-2336.

Graduation Et Cetera

Caps and gowns may be purchased (bachelor's degree) or rented (advanced degrees) at Graduation Et Cetera in the Ackerman Union Students' Store (B Level of Ackerman Union, 310-825-2587). Graduation announcements, diploma mounting, and other services are also offered. Hours during regular school sessions are weekdays 7:45 a.m. to 7:30 p.m. (6 p.m. Friday), Saturday 10 a.m. to 5 p.m., Sunday noon to 5 p.m.

Graphic Services

ASUCLA Graphic Services (second floor of Ackerman Union, 310-206-0894) is the campus center for printing, copying, typesetting, and other graphic services. Hours are weekdays 8:30 a.m. to 5:30 p.m. A smaller Graphic Services Center is located downstairs in Lu Valle Commons (310-825-7568).

The Graphic Services Ackerman Union office features a public fax machine and the Computer and Laser Rental Service (310-206-8454). Macintoshes and an IBM-compatible computer are available for hourly rental; term papers, newsletters, and flyers may be output on Postscript laser printers. A Linotronic 500 imagesetter for high-resolution work and a color thermal printer are also available.

Meeting Rooms

A variety of meeting rooms is available for use by the entire campus community. To reserve space in Ackerman Union, Kerckhoff Hall, or Lu Valle Commons, contact the Student Union Operations Office on the A Level of Ackerman Union (310-206-0836).

Shipping

The ASUCLA Service Center (211 Plaza Building, 310-825-2423) offers shipping via UPS and Federal Express. Hours are weekdays 9 a.m. to 4:30 p.m.

Travel Service

The ASUCLA Travel Service, located on the A Level of Ackerman Union (310-825-9131), offers a wide range of domestic and international airline flights and rail tickets, land arrangements and charter packages, student tours, and other travel-related services. Students may call UCLA-FLY (310-825-2359) for reservations. Hours are weekdays 8:30 a.m. to 6 p.m., Saturday noon to 4 p.m.

Student Activities

The opportunities to participate in extracurricular activities at UCLA are virtually unlimited. Though it is impossible to list all the activities here, the following are just a few of the many ways you can get involved in campus life and expand your horizons beyond classroom learning.

Student Government

In addition to its **Services and Enterprises** division, which is responsible for the services described above, ASUCLA includes the **Undergraduate Students Association**, the **Graduate Students Association**, and the **Communications Board**, which publishes the *Daily Bruin* and other campus student publications. Governed by a student-majority Board of Directors, ASUCLA operates and manages Ackerman Union, Kerckhoff Hall, North Campus Student Center, and Lu Valle Commons.

Many facets of student life at UCLA are sponsored or organized in some way by student government. Getting involved in the decision-making process can be extremely rewarding and can offer avenues of expression you may not find in other aspects of your university experience.

Undergraduate Student Government — The Undergraduate Students Association (USA), with offices in Kerckhoff Hall (310-825-7068), is governed by the Undergraduate Students Association Council. USAC administers the association's operating budget through a network of six officers (president, internal vice president, external vice president, three general representatives) and seven student commissions (Academic Affairs, Campus Events, Community Service, Cultural Affairs, Facilities, Financial Supports, and Student Welfare).

Many student government programs benefit both campus and community. The Community Service Commission (310-825-2333) serves Los Angeles through more than 20 programs such as Amigos del Barrio, offering academic and emotional support for Latina/Latino students; the UCLA Prison Coalition, providing tutoring for inmates of juvenile correctional institutions; and the UCLA Special Olympics, to name just a few. More than 2,500 students offer their services on a volunteer basis.

Student government also supports approximately 20 student advocacy groups on campus, such as the African Student Union, American Indian

Students Association, Asian Pacific Coalition, Gay and Lesbian Association, International Students Association, MEChA, UCLA Jewish Student Union, Samahang Pilipino, and the Union of Students with Disabilities.

The Campus Events Commission (CEC, 310-825-1958) and the Cultural Affairs Commission (CAC, 310-825-6564) provide the campus with free and low-cost cultural and entertainment programming, as well as opportunities for student involvement. CEC is responsible for the Speakers and Concert Programs, the Ackerman Film Program, and Mardi Gras. CAC sponsors WorldFest, a celebration of campus diversity, and the Jazz/Reggae Festival.

The ASUCLA Library (304D Kerckhoff Hall, 310-206-7997; e-mail: library@asucla.ucla.edu) houses materials related to students and campus governance and aims to enhance understanding among students about University issues and to increase student involvement within the UCLA community.

Graduate Student Government — The Graduate Students Association is the official organization representing the interests of UCLA graduate students in academic, administrative, campus, and statewide areas. GSA appoints or elects graduate student members to important campus organizations and committees, including the ASUCLA Board of Directors and the Student Fee Advisory Committee, as well as to departmental student organizations and committees of the Academic Senate. In addition, GSA sponsors various graduate student journals, programs, and social events, including Melnitz Movies (UCLA student film program). GSA also maintains an electronic mail listserver for graduate student government bulletins, agendas, and general graduate student information. The GSA Office is located in 301 Kerckhoff Hall (310-206-8512; e-mail: gsa@asucla.ucla.edu).

Clubs and Organizations

Joining a club or organization is a wonderful way to become involved on campus. UCLA currently has about 600 different registered organizations — more than you will find on almost any other university campus in the country. Political, recreational, community service, cultural, academic, religious, and residential clubs can be found at UCLA. And it only takes three people to start your own if you can't find one that suits your interests.

Clubs focusing on sports and recreation are listed in the Department of Cultural and Recreational Affairs, located in the Wooden Center (310-825-3701). For a full listing of registered organizations, contact the **Center for Student Programming (CSP)**, 337 Plaza Building (310-825-7041). This office can help you start a club or join an existing one, and serves as the official registry for all campus organizations. CSP assists students with program and leadership development and fund-raising, interprets and enforces University rules and regulations, and administers official and general purpose bulletin boards on campus.

All student organizations are eligible to use the services of **Student Event Management (SEM)**, located in 337 Plaza Building (310-825-6690). SEM offers technical and logistical consulting for student events, including cost estimates and event management.

Complaints Against Student Organizations

Complaints of misconduct against officially recognized student organizations may be made at the Center for Student Programming (337 Plaza Building), Student and Campus Life (1104 Murphy Hall), or the Office of the Dean Students (1206 Murphy Hall).

Fraternities and Sororities

The 45 Greek letter social organizations and their four governing councils — Asian Greek Council (AGC, 310-206-1285), Interfraternity Council (IFC, 310-825-7878), National Pan-Hellenic Council (NPHC, 310-206-1868), and Panhellenic Council (PHC, 310-206-5499) — are sponsored by a component of the Center for Student Programming —

Fraternity and Sorority Relations (FSR), 118 Men's Gym (310-825-6322).

Greek letter social organizations registered and officially recognized by FSR are eligible to participate in programs such as the Greek Leadership Conference, Membership Recruitment, Greek Week, New Member Forums, Dating Expectations Programs, intramural tournaments, and all University-sponsored programs. Individual student members of IFC and Panhellenic Council are eligible for scholarships offered by the Intersorority Mothers' Club, Los Angeles Alumnae Panhellenic, and their own governing councils. The FSR staff assists organizations in campus and community programming, fund raising, membership recruitment and development, training, and philanthropic activity.

FSR is also a designated campus Harassment Information Center available to all UCLA students (see Harassment in the Appendix for more information).

Fraternities and sororities provide the security of friendship and academic support while encouraging personal development and expansion. Members have group and individual responsibilities related to their particular interests and talents, and all take part in the group's programs and support networks. "Greeks" follow their founding principles of service, scholarship, and friendship. There is a place for anyone who will contribute to a group experience, and the cost to live in a chapter house is no more than living in a campus residence hall, although many members "live out" (not all chapters have houses). More than 3,000 UCLA students participate in "Greek life."

Mardi Gras

UCLA's annual Mardi Gras is the world's largest student-operated collegiate activity. Each Spring Quarter more than 5,000 Bruins from all types of campus organizations help to prepare and present this carnival. Students design and operate more than 70 booths featuring games, food, and live entertainment. There are celebrity judges, carnival rides, clowns, balloons, fireworks, and much more. Mardi Gras is open to the campus community on Friday evening; the public is invited on Saturday and Sunday.

The event generates about \$50,000 annually for UCLA's official charity, UniCamp, a summer camp for underprivileged Los Angeles children. For more information, contact the Mardi Gras Committee in 346 Plaza

Building (310-825-8001) or the Campus Events Commission in 300A Kerckhoff Hall (310-825-1958).

UCLA Campus Events Speakers and Concert Programs

The Speakers Program, now over 25 years old, brings the world's foremost entertainers, politicians, and literary figures to campus. It also presents two annual awards programs — the Jack Benny Award for comedic excellence and the Spencer Tracy Award for outstanding screen performance. Speakers and awardees have included Johnny Carson, David Letterman, Whoopie Goldberg, John Cleese, Robin Williams, Jessica Lange, James Stewart, Spike Lee, William Hurt, Patricia Schroeder, Jesse Jackson, Matt Groening, Studs Terkel, Shimon Peres, Walter Cronkite, Dustin Hoffman, Candice Bergen, Tom Hanks, and Denzel Washington.

The Concert Program brings new and name performing artists like the Talking Heads, Guns N' Roses, 10,000 Maniacs, Public Enemy, and Hammer to UCLA for free and affordably priced concerts at noon in Westwood Plaza and at night in the Cooperage and Ackerman Grand Ballroom.

Publications and Broadcast Media

UCLA's publications and broadcast media, operated by the ASUCLA Communications Board, provide excellent training ground for aspiring writers, journalists, photographers, and radio announcers while serving the communication needs of the campus community. The following are the major student-operated sources of information on campus:

The *Daily Bruin*, with a circulation of 20,000, is one of the largest daily newspapers in Los Angeles. As the principal outlet for campus news, the *Bruin* is published each weekday of the regular academic year (once a week during the summer) and is distributed free from kiosks around campus and in Westwood and Brentwood. Students work as reporters, editors, designers, photographers, and advertising sales representatives; new staff members are always welcome. *Bruin* offices are located in the Alumni Lounge (225 Kerckhoff Hall, 310-825-9898).

Seven newsmagazines reflecting the diversity of the campus community are published twice each term. *Al-Talib* is a publication devoted to Muslim issues; *Ha'Am* deals with Jewish issues; *La Gente* treats Chicano, Latino, and Native American issues; *Nommo* explores African issues; *Pacific Ties* is devoted to Asian issues; *TenPercent* covers gay, lesbian, and bisexual issues; and *Together* reports on women's issues. Each includes news and features on political and cultural affairs both on and off campus. Prospective staffers are welcome. The offices of these newsmagazines are located in 210 Kerckhoff Hall.

The UCLA yearbook, *BruinLife*, is one of the largest student publication efforts on campus. Available each spring, it contains photographs and information on undergraduate students, graduating seniors, athletic teams, fraternities and sororities, and campus activities. A separate publication, the *Freshman Record*, is produced for new UCLA students. If you would like to participate, contact the yearbook staff in 212K Kerckhoff Hall (310-825-2640).

Like many other large universities, UCLA has its own radio station. **KLA Radio** provides music, news, public service programming, and sports coverage during the academic year. The carrier current signal is sent to the residence halls and parts of Ackerman Union and Kerckhoff Hall on 530 AM and to many parts of the Los Angeles area on 99.9 Century Cable FM. The studios are located at the rear of the Grand Ballroom in 2400A Ackerman Union (310-825-9107; request line: 310-825-9999). All positions, including on-air, news staff, and advertising representatives, are open to students.

Performing Arts

UCLA offers a rich variety of concerts, dance recitals, and theater productions as an integral part of University life. A full calendar of excep-

tional programs by the Music, Ethnomusicology and Systematic Musicology, and World Arts and Cultures Departments of the School of the Arts and Architecture and the Theater and Film and Television Departments of the School of Theater, Film, and Television provides opportunities for student involvement and personal growth.

The **Music Department** offers more than 15 performance organizations. Instrumentalists are invited to play with one of seven different bands and orchestras. Campus choral organizations include the UCLA Chorale, Chamber Singers, Women's Chorus, Men's Glee Club, and the Collegiate Chorus which, with 120 members, is the largest of the groups.

The **Ethnomusicology and Systematic Musicology Department** provides students with the opportunity to perform in various non-Western and ethnic groups.

The **World Arts and Cultures Department** presents afternoon and evening modern dance concerts and demonstrations both on and off campus, and folk and ethnic performing groups meet regularly. Students concentrating in dance have the opportunity to design and choreograph as well as perform.

Each year the **Theater Department** presents a series of major productions to the general public, and the **Film and Television Department** produces approximately 100 student-directed films and 50 television programs. Professionals appearing on campus frequently visit classes to share their skills, and many have established awards and scholarships in the performing arts at UCLA.

Since its founding in 1936, the **UCLA Center for the Performing Arts** has served as the premier West Coast showcase for world-class performers and innovative new work in dance, music, theater, and performance art. The center stages more than 250 public concerts and events each year, often sponsoring debut performances of new works by major artists. Through the center, UCLA hosts a varied and active performance program, ranging from regular concerts by the Los Angeles Chamber Orchestra to special appearances by Luciano Pavarotti, Marcel Marceau, Isaac Stern, performance artist Karen Finley, Kathleen Battle, Bella Lewitzky Dance, and Branford Marsalis. Discount tickets for students, faculty, and staff are available to all events.

Sports and Athletics

Athletics play a major role in the University's mission to provide a well-rounded education both in and out of the classroom. UCLA continues to live up to its reputation as a national leader in intercollegiate sports. In 1994-95 the UCLA athletic programs (men and women) placed third in the Sears Directors Cup national all-around excellence survey. In the 23-year history of the former *USA Today* survey, the men's program placed first 11 times, while the women's program placed first five times in the past nine years. UCLA is the only university in the country to win five National Collegiate Athletic Association (NCAA) men's and women's championships in a single year (1981-82).

Men's Intercollegiate Sports

UCLA is a member of the Pacific-10 Conference, which includes Arizona State University; University of Arizona; University of California, Berkeley; Stanford University; University of Southern California; University of Oregon; Oregon State University; Washington State University; and the University of Washington. UCLA teams have won an overall total of 58 NCAA men's championships — second highest in the nation — including 15 in tennis, 15 in volleyball, 11 in basketball, eight in track and field, and one in soccer. You can participate on the varsity level in football, basketball, track, baseball, tennis, volleyball, water polo, golf, soccer, and cross-country. For more information, contact the Athletic Office at (310) 825-8699.

Women's Intercollegiate Sports

With 11 different varsity sports, the UCLA women's program is one of the most extensive in the country, and UCLA has played an important role in establishing women's sports as part of the NCAA. Women's

teams have won an overall total of 14 NCAA titles — third highest in the nation — including eight in softball, two in track and field, three in volleyball, and one in golf. Other nationally ranked teams are those in basketball, swimming, tennis, cross-country, soccer, gymnastics, and water polo. For more information, contact the Athletic Office at (310) 825-8699.

Intercollegiate Athletic Facilities

UCLA's major indoor arena is the famed **Pauley Pavilion**, which seats 12,800 for UCLA basketball, volleyball, and gymnastics events. It was the site of the 1984 Summer Olympics gymnastics competition. Immediately adjacent, **Drake Stadium** is the home of UCLA track and field competitions and site of many outdoor events, including the U.S. Olympic Festival '91. The **Los Angeles Tennis Center**, a 5,800-seat outdoor tennis stadium and clubhouse, was the site of the 1984 Olympic tennis competition. **Easton Softball Stadium**, which seats 1,050, is the home of the championship women's softball team. The **Morgan Intercollegiate Athletics Center** houses the UCLA Athletic Hall of Fame. Off-campus facilities include **Robinson Stadium** for varsity baseball and the renowned **Rose Bowl** in Pasadena, home of the UCLA football team.

Campus Recreation

UCLA offers a wide variety of recreational opportunities to meet the needs of the campus community. The **Department of Cultural and Recreational Affairs (CRA)**, 2131 Wooden Center (310-825-3701), serves as the administrative center for the coordination of programming, facilities, and equipment and supervision of campus recreational activities and services.

Intramural/Club Sports

The **Intramural Sports Program** consists of team, dual, and individual sports competition in tournament or league play. More than 40 activities, ranging from basketball and badminton to volleyball and water polo, are offered in men's, women's, and coed divisions. Varying skill levels are available in almost all activities, and the emphasis is on friendly competition. In order to maintain the quality of service to Intramural Sports participants, nominal individual and team entry fees have been established. The **Club Sports Program** offers you the chance to organize, coach, or participate in sports that fall beyond the scope of intramurals but are not offered at the varsity level. Annually over 18 club teams participate in a competitive schedule of league and tournament play with other college, university, and local area teams. Recognized teams exist in ice hockey, men's and women's rugby and lacrosse, cycling, martial arts, rowing, waterskiing, sailing, snow skiing, and surfing.

Recreation Clubs

Students with special interests in activities that are primarily instructional or social in nature have the opportunity to pursue their interests through clubs such as amateur radio, chess, snow skiing, and martial arts.

Recreation Class Program

A broad range of noncredit recreation classes is available in aquatics, dance, fine arts, martial arts, outdoor studies, tennis, and sports skills. Most classes are designed for beginning and intermediate skill levels. Private lessons in tennis, fitness activities, swimming, racquetball, and golf are also available. You can also participate in cultural events through art exhibitions, the poetry reading program, museum tours, and theater in Los Angeles outings.

Fitness is offered either as a recreation class or on a drop-in basis. A Fitness Pass must be purchased (\$25 for a four-quarter pass; \$10 for a one-quarter pass) to participate in drop-in fitness classes.

Youth and Family Programs

Youth and Family Programs (formerly Bruin Kids) is an exciting schedule of year-round activities for children 18 months to 17 years is offered. Summer programs include Bruin Kids Day Camp (ages 5 to 12), Camp Explore (ages 12 to 14), UCLA Summer Programs for High School Students, group and private lessons, and special events. Year-round classes are also offered on Saturday mornings. Activities combine play with skill development and deepen the fun in learning.

Recreation Facilities/Informal Recreation

A popular attraction of CRA is the opportunity for independent recreation and exercise. UCLA students with appropriate identification have several major facilities in which to practice and play. The **Wooden Recreation and Sports Center** is a comprehensive student activities building with multiple gymnasiums, 10 racquetball/handball courts, two squash courts, a weight training facility, exercise/dance and martial arts rooms, and a games lounge. The **Sunset Canyon Recreation Center** offers year-round activities in an outdoor park setting and features a 50-meter swimming pool, 25-yard family pool, picnic/barbecue areas, multipurpose play fields, an outdoor amphitheater, 10 lighted tennis courts, and various meeting rooms and lounges. The **UCLA Marina Aquatic Center** in Marina del Rey offers sailing, windsurfing, kayaking, canoeing, and rowing classes and activities, as well as the opportunity to sail, kayak, canoe, or row on your own. The competitive sailing and rowing club teams are administered through the center. Students also have the use of Pauley Pavilion, Drake Stadium, Sycamore Tennis Courts, Los Angeles Tennis Center, Intramural Fields, Men's Gym, and Dance Building for recreational sports and activities.

Student Services

UCLA students enjoy an extremely broad range of benefits and support services which enrich their college careers and help them attain their academic and career goals.

Academic Counseling

Many sources of academic counseling are available. Faculty advisers and counselors in each college and school help students with major selection, program planning, academic difficulties, degree requirements, and petitions for exceptions to these requirements.

Advisers in each major department counsel undergraduates concerning majors offered and their requirements, and possible career and graduate school options (see Academic Resources and Assistance in the Undergraduate Study section of this catalog). In addition, special graduate advisers are available in each department to assist prospective and currently enrolled graduate students.

Placement and Career Planning Center

The Placement and Career Planning Center (PCPC) offers career planning and employment assistance free to UCLA students. Services are located in the PCPC Building (310-825-2981) and in two satellite locations: EXPO Center in 311 Plaza Building (specializing in local, national, and international internships, 310-825-0831) and Engineering and Science Career Planning Office in 5289 Boelter Hall (specializing in engineering and the physical sciences, 310-825-4606).

Career Planning and Exploration

Career advisers and counselors provide assistance in selecting your major, setting realistic career goals, investigating career options, evaluating graduate and professional school programs, and developing skills to conduct a successful job search. Information on local, national, and international internship opportunities and cooperative education programs can assist you in exploring different career possibilities, making important professional contacts, and obtaining valuable on-the-job experience. The Career Resources Library offers a collection of over

3,000 career-related books and directories, videos, periodicals, and other materials. In addition, PCPC offers workshops, seminars, and group meetings on a variety of career-related topics; many are repeated several times each term.

Employment Assistance

If you need extra money to finance your college degree, you will find a large volume of part-time, temporary, and seasonal employment leads at PCPC. Students and recent graduates looking for full-time, entry-level career positions may access hundreds of current professional, managerial, and technical openings in numerous career fields. Seniors and graduate students may participate in on-campus interviews for positions in corporations, government, not-for-profit organizations, elementary and secondary schools, community colleges, and four-year academic institutions.

Student Health Service

The Student Health Service (SHS) is an outpatient clinic designed especially for UCLA students. Because it is supported by your registration fees, your current Registration Card and a photo I.D. are required for service. Most services are prepaid by your registration fees, and you may be seen by appointment or on a walk-in basis. Call (310) 825-4073 for the most up-to-date fee information. Core (prepaid) services include visits, most procedures, X rays, and some laboratory procedures. Non-core (fee) services, such as pharmaceuticals, injections, orthopedic devices, and some laboratory procedures, are less costly than elsewhere. If you withdraw during a school term, all SHS services will continue to be available on a fee basis for the remainder of that term, effective from your date of withdrawal.

The cost of services received outside of SHS (e.g., the Emergency Room) is *your* financial responsibility. You are strongly encouraged to purchase supplemental medical insurance either through the UCLA-sponsored Medical Insurance Plan (see below) or other plans that provide adequate coverage. For more information on SHS, call (310) 825-4073.

Location and Hours. General and emergency SHS care is available in A2-130 Center for the Health Sciences. Office hours weekdays are 8 a.m. to 5 p.m. except Tuesday, when service begins at 9 a.m. A satellite clinic is located along Bruin Walk between Gates 10 and 11 in Pauley Pavilion (310-825-5704). For emergency care when SHS is closed, you may obtain treatment at the UCLA Medical Center Emergency Room or UCLA Family Practice on a fee-for-service basis.

Primary Care Clinic provides outpatient diagnoses and treatment for most health care needs of both men and women. Care is provided by board certified physicians and nurse practitioners. Though complete physicals are available for a fee, a prepaid "Well Exam" is available if you have general health questions or concerns. You are encouraged to select a clinician who will provide ongoing health care. Call (310) 825-4073 to schedule an appointment.

Specialty Clinics provide specialized care when you are referred by the Primary Care Clinic. Services include dermatology, orthopedics, surgery, gynecology, internal medicine, allergy, ENT (ear, nose, and throat), ophthalmology, urology, and neurology. Health clearances, immunizations, and travel shots are available for a moderate fee. Call (310) 825-4073.

Women's Health Service offers comprehensive health care and counseling. Services include routine gynecological examinations, evaluation of gynecologic problems, abnormal pap smear evaluation and treatment, contraception, and pregnancy testing. Counseling for relationships and sexual concerns is also available. Call (310) 825-4073 for appointments or to speak to clinicians.

Men's Health Clinic treats male genital and urinary problems, both sexual and nonsexual in nature. The clinic also provides sexual counseling for UCLA's male students. Call (310) 825-4073.

Dental Care arrangements are available. Call (310) 825-4073 for further information.

Health Education offers many types of services and programs that will interest, inform, and help you to lead a healthier lifestyle. Outreach programs, such as the Peer Health Counselor and Student Health Advocate Programs, provide peer care and educational counseling for health concerns. The programs allow students to be involved in the planning and delivery of many aspects of health care. Call (310) 825-4730.

Supplemental Medical Insurance. UCLA offers a student Medical Insurance Plan (MIP) which is available as a supplement to the services offered in SHS. MIP provides benefits for certain major medical expenses not covered by SHS, such as hospitalization, surgery, and emergency room costs.

All international students (graduate and undergraduate) on nonimmigrant visas and all graduate students *must maintain adequate medical insurance coverage* during all periods of enrollment at UCLA. MIP fulfills the medical insurance requirement. For graduate students the MIP fee is included each term in the amount due on the UCLA Billing Statement. For undergraduates the MIP fee appears as a voluntary option to be added each term to the amount due on the UCLA Billing Statement. This is the only method by which MIP can be purchased.

Graduate and international students who are insured under *adequate* private medical insurance may waive out of MIP. See Mandatory Medical Insurance Requirement under Registration and Enrollment in the Undergraduate Study and Graduate Study sections of this catalog for a description of what constitutes adequate private medical insurance and instructions for waiving out of MIP. For further information on medical insurance, call the SHS Insurance Office at (310) 825-1856.

Student Psychological Services

Student Psychological Services (SPS) offers short-term personal counsel and psychotherapy at two locations. The Mid-Campus Office is located in 4223 Math Sciences (310-825-0768); the South Campus Office is in A3-062 CHS (310-825-7985).

Psychologists, clinical social workers, and psychiatrists are available at both locations, offering assistance with situational stresses and emotional problems from the most mild to the most severe. These may include problems with interpersonal relationships, academic stress, loneliness, difficult decisions, sexual issues, anxiety, depression, or other concerns affecting the personal growth of students.

The service is confidential and free to regularly enrolled students. Students are seen individually or may choose from a number of groups offered each term. Appointments are made on weekdays between 8 a.m. and 5 p.m. Emergency counseling is also available.

SPS is also a designated Sexual Harassment Information Center, as well as a campus Harassment Information Center, available to all UCLA students (see Harassment in the Appendix for more information).

Helpline

UCLA Peer Helpline (310-825-HELP) is a crisis intervention and referral hot line staffed by UCLA students and staff members. You can call and talk to a trained peer counselor about school stress, relationship problems, loneliness, depression, drug problems, suicide, or anything else that is on your mind. Hours are weekdays 5 p.m. to midnight, Saturday and Sunday 8 p.m. to midnight. For more information, contact Clive D. Kennedy, Student Psychological Services, 4223 Math Sciences (310-825-0768).

Office of the Dean of Students

The Office of the Dean of Students, located in 1206 Murphy Hall (310-825-3871), exists to help you, either directly or by referral, with whatever needs you might have. Direct services include general counseling; sending emergency messages to students; and assisting in under-

standing University policies and procedures, including grievance procedures regarding student records, discrimination, and student debts.

In addition, the office publishes "Official Notices" in the *Daily Bruin* at various times during the year. Such notices are important, and *all students are held responsible* for the information in them.

The Office of the Dean of Students also plays a role in administering campus discipline and applying the standards of citizenship which you are expected to follow at UCLA. Those standards involve complying with the policies and regulations governing this campus and being aware that violation of those policies or regulations can result in disciplinary action. See Student Conduct: Violation of University Policies in the Appendix for more information.

Campus Ombuds Office

The ombudsperson is a confidential and neutral party responsible for listening and responding to grievances or concerns from any member of the campus community (i.e., students, staff, faculty, administrators). Acting impartially, the ombudsperson may investigate unresolved grievances or facilitate the resolution of problems for which there are no established guidelines and may also, where possible and when requested by the grievant, assist in resolving an issue through mediation (including sexual harassment cases). The ombudsperson is empowered to recommend changes to the University Policies Commission and/or to the chancellor regarding University policies and procedures. The office is located in 1172 PCPC Building (310-825-7627); hours are weekdays 8 a.m. to 5 p.m.

The office is also a designated Sexual Harassment Information Center for students, faculty, and staff, as well as a campus Harassment Information Center available to all UCLA students (see Harassment in the Appendix for more information).

Established through the Campus Ombuds Office, the **Conflict Mediation Program (CMP), etc.** is composed of a select group of student, faculty, and staff volunteers trained specifically to address diversity-related disputes. CMP, etc. mediators specialize in conflicts dealing with issues of race, ethnicity, culture, sexual orientation, disability, and gender. The variety of conflict management services offered seeks to promote constructive interaction and dialogue through a culturally relevant, need-based, and community-centered approach. Services include designing and/or facilitating forums on topics of concern, serving as discussion facilitators, intervening as mediators in designated disputes, offering educational and skills-oriented workshops, providing conflict management assessment, and offering informational presentations on CMP, etc. Services are neutral, independent of the administration, confidential, and free. For more information, call (310) 825-9840.

Student Legal Services

If you are a currently registered and enrolled student with a legal problem, you can get assistance from attorneys or law students under direct supervision of attorneys. They will help you solve legal problems, including those related to landlord/tenant relations, domestic relations, accident and injury problems, criminal matters, and contract and debt problems. Assistance is available by appointment only from 9 a.m. to 5 p.m. weekdays in 70 Dodd Hall (310-825-9894).

Central Ticket Office

Tickets for all UCLA events are available at the Central Ticket Office (CTO) in the West Alumni Center (310-825-2101).

CTO also offers student *discount* tickets to campus athletic and cultural events and local motion picture theaters (current Registration and UCLA Student I.D. Cards must be presented at the time of purchase). You may also purchase tickets to off-campus events through Ticketmaster, as well as student discount tickets for RTD buses and tokens for the Santa Monica and Culver City bus systems.

Services for International Students

The **Office of International Students and Scholars (OISS)** and the **International Student Center (ISC)** provide services and programs for UCLA's international community, particularly for 2,000 nonimmigrant students. A comprehensive orientation program for these students assists them in achieving their academic objectives. Programs throughout the year allow them to share their viewpoints with American students and the community.

The OISS staff, located in #05 Men's Gym (310-825-1681), includes professional and peer counselors specially prepared to assist you with questions about immigration, employment, government regulations, financial aid, academic and administrative procedures, cultural adjustment, and personal matters. OISS is also a designated Sexual Harassment Information Center for international students, as well as a campus Harassment Information Center available to all UCLA students (see Harassment in the Appendix for more information).

OISS also provides visa assistance for faculty, researchers, and post-doctoral scholars.

The International Student Center, 1045 Gayley Avenue, Suite 200 (310-794-8138), seeks to improve student and community relationships and assists international students with language, housing, and personal concerns in addition to sponsoring cultural, educational, and social programs for UCLA students and community members. OISS and ISC frequently offer programs with interethnic and international themes.

Services for Students with Disabilities

The **Office for Students with Disabilities (OSD)**, A255 Murphy Hall (Voice 310-825-1501 or TDD 310-206-6083), provides a wide range of academic support services to students with permanent or temporary disabilities in compliance with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990. Free support services include readers, note takers, sign language interpreters, Learning Disabilities Program, special parking, registration assistance, fee deferments authorized by the California Department of Rehabilitation, on-campus transportation, campus orientation and accessibility, proctor and test-taking arrangements, tutorial referral, housing assistance, support groups, workshops, special materials, adaptive equipment, and referral to the Disabilities and Computing Program. Accommodations are varied and specifically designed to meet the disability-related needs of each student. All contact and assistance are handled confidentially.

The **Disabilities and Computing Program (DCP)** offers consulting and training on adapted computer equipment to assist students with disabilities in their academic work. Special equipment includes reading machines, voice recognition, large print software, and more. For further information, call Voice (310) 206-7133 or TDD (310) 206-5155.

Veterans' and Social Security Services

Academic Record Services, 1134 Murphy Hall, provides information for veterans and eligible dependents about veterans' educational benefits, tutorial assistance, the work-study program, and emergency loans; issues fee waivers to dependents of California veterans who are deceased or disabled because of service-connected injuries and who meet the income restrictions in Education Code Section 10652; and certifies student status for recipients of Social Security benefits.

Women's Resource Center

The Women's Resource Center (WRC), located in 2 Dodd Hall (310-825-3945), offers services to all UCLA students, with special focus on women's needs.

The center presents workshops and support groups on many topics, including child care, self-defense, assertiveness training, rape prevention and education, career development, single parenting, health, returning to school, and personal relationships. It also offers referrals for medical,

legal, career planning, personal counseling, and other services both on and off campus. A library includes specialized publications on women's issues. In addition, rape services consultants (RSCs) — individuals who provide information, support, and resources for UCLA students who have been raped or sexually assaulted — can discuss options and alternatives, help identify and assist in contacting the most appropriate support services, and answer any questions that may arise. The WRC is also a designated Sexual Harassment Information Center, as well as a campus Harassment Information Center available to all UCLA students (see Harassment in the Appendix for more information).

The WRC, committed to improving the status of women on campus, works with other campus agencies to help women reach their full potential.

Child Care Services

Two **Child Care Centers** provide full- and part-time care for children two months to five years old. Fees range from \$240 to \$775 per month depending on the age of the child and the site chosen. A limited number of grants are available at the Bellagio center for eligible student families. The Bellagio center is located in the northwest corner of campus at Sunset Boulevard and Bellagio Drive; the Fernald center is located at the corner of Stone Canyon Drive and Circle Drive North. A satellite day-care center for children two to five years old is located in the Colina Glen faculty housing area; priority is given to Colina Glen residents. Call (310) 825-5086 for more information.

The **Outreach Program** helps parents make off-campus child care arrangements. The program coordinator meets parents each Monday from noon to 1 p.m. in 2 Dodd Hall. For more information, call (310) 825-8474.

The **University Parents Nursery School** is a multicultural cooperative school for two- to five-year-old children of UCLA students, faculty, and staff; priority is given to students living in Family Student Housing. Experienced teachers, assisted by co-oping parents, provide a gradual transition from the home to the school environment. Hours are weekdays 7:30 a.m. to 5:30 p.m. Part-time morning spaces are available (the morning program ends at 12:30 p.m.). The nursery school is located in the UCLA Family Student Housing Community Center, 3327 South Sepulveda Boulevard (310-397-2735).

Safety and Security

Emergency (Police, Fire, or Medical). Dial 911 from any campus phone (do not dial an additional 9 to establish an outside line). For non-emergency information, contact the UCLA Police Department at 601 Westwood Plaza (310-825-1491).

Campus Escort Service. The UCLA Police Department provides a free escort service every day of the year from dusk to 1 a.m. Uniformed community service officers (CSOs) — specially trained UCLA students — are available to walk students, staff, faculty, and visitors between campus buildings and local living areas or Westwood Village. To obtain an escort, call (310) 794-WALK about 20 minutes before you need one.

Evening Van Service. The free service provides a safe and convenient mode of transportation around campus at night. Seven vans driven by CSOs operate Monday through Thursday from 6 p.m. to midnight and provide transportation between Ackerman Union, apartments on the west side of campus, Lot 32, the campus libraries, and the residence halls. For further information or a free brochure, call (310) 825-9800.

UCLA Rape Prevention and Education Services are cosponsored by the Women's Resource Center and the UCLA Police Department. Services include workshops, self-defense classes, intake counseling, and referrals to offer practical safety suggestions, increase physical and psychological preparedness, and heighten awareness of the complex issues of rape and sexual assault. For more information, call (310) 206-8240 or the Crime Prevention Unit at (310) 825-7661.

CPR and Basic Emergency Care Courses. The Center for Prehospital Care offers medical education programs in basic emergency care and American Heart Association cardiopulmonary resuscitation (CPR) which can be organized most days and times. For more information or to schedule a course, call (310) 206-0176.

The **Office of Environment, Health, and Safety (EH&S)** provides for the health and safety of all UCLA faculty, staff, students, and visitors and ensures that UCLA operations do not have an adverse impact on the environment. In addition, EH&S promotes the University's compliance with applicable health, safety, and environmental regulations. For further information, call (310) 825-5689.

Important Telephone Numbers

UCLA Police Department (24 hours)	(310) 825-1491
Police, Fire, or Medical Emergency	911
UCLA Emergency Medical Center (24 hours)	(310) 825-2111
Campus Escort Service (dusk to 1 a.m.)	(310) 794-WALK
Helpline (weekdays 5 p.m. to midnight, weekends 8 p.m. to midnight)	(310) 825-HELP

UCLA Alumni Association

Celebrating more than 60 years of serving the UCLA community, the UCLA Alumni Association has nearly 64,000 members, making it one of the largest alumni groups in the nation. Whether you are a recent graduate, a pioneer Bruin, or somewhere in between, membership in the Alumni Association is the best way to stay connected to UCLA and its growing excellence.

Membership dues enable the Alumni Association to serve as an advocate on campus and to play the vital role of guardian of the value of every UCLA degree. Dues also support programs such as Homecoming Week, Spring Sing, class reunions, and the scholarship program.

The association also offers a plethora of benefits and services. Members can make new friends, pursue lifelong learning, save money, and make a difference. Recently the association greatly expanded its career services program to meet the needs of members. UCLA graduates, Bruin parents, and friends of the University are invited to take advantage of all the association has to offer. It is located in the West Alumni Center, 325 Westwood Plaza (310-825-ALUM; 800-825-ALUM outside Los Angeles County).

Undergraduate Admission

Undergraduate Admissions and Relations with Schools (UARS)
1147 Murphy Hall
(310) 825-3101

The Office of Undergraduate Admissions and Relations with Schools (UARS) invites you to visit UCLA to discuss your prospects as a student and to experience the campus firsthand. The UARS Office offers student-guided individual and group tours of the campus Monday through Friday at 10:15 a.m. and 2:15 p.m. and Saturday at 10:15 a.m. during the academic year; reservations are required. Call (310) 825-8764 for tour reservations; (310) 825-3101 for general UCLA admission information.

Applying for Admission

The first step in applying for admission is to obtain the *UC Application for Undergraduate Admission and Scholarships* containing all necessary forms and instructions from your California high school or community college counselor or from any University of California Undergraduate Admissions Office. One application is used to apply to all UC campuses. You apply to one UC campus for the basic \$40 application fee; for each additional campus you select, you must pay an additional \$40 fee.

Complete the application, taking care to list your desired major and the correct major code for the campus(es) to which you are applying. Mail the completed application and the nonrefundable application fee in the self-addressed envelope included in the application packet.

If you are in high school when you apply (freshman applicant), your self-reported application information is used to make preliminary admission decisions. Do not send your sixth and/or seventh semester high school transcripts. Once admitted, you must submit a final transcript, including a statement of graduation or proficiency, which will be used to verify your application information. You must submit official results of the Scholastic Assessment Test I (SAT I) or American College Test (ACT) and three subject tests from the SAT II; request that test results be sent directly to UCLA when you take each test. You should take these tests by the December test date, as they are part of the review process for admission.

If you have attended or are attending another college when you apply (transfer applicant), your self-reported application information is used to make preliminary admission decisions. Once admitted, you must submit official transcripts from all colleges and universities attended (high school transcripts may also be required), which will be used to verify your application information. Transcripts and other documents cannot be returned or forwarded to other institutions.

When to Apply

The filing periods for applications are as follows:

- Winter Quarter 1996 — Closed to new applicants
- Spring Quarter 1996 — File October 1-31, 1995
(If open to new applicants, junior-level applicants only.)
- Fall Quarter 1996 — File November 1-30, 1995
(Freshmen and transfers)

Note: Applications for admission to Fall Quarter 1995 were accepted only during November 1994.

All majors are open for Fall Quarter. For Spring Quarter all majors in the College of Letters and Science, except communication studies, are open. Majors in the Schools of Engineering and Applied Science, Nursing, Arts and Architecture, and Theater, Film, and Television are closed.

Notification of Admission

You will be mailed a notice from the UC Undergraduate Application Processing Service acknowledging receipt of your application. Later, you will receive a letter from the UCLA Office of Undergraduate Admissions and Relations with Schools regarding the admission decision. The length of time before admission notification varies. In general, Fall Quarter applicants are notified beginning March 1; Spring Quarter applicants are notified in mid-December.

If you are accepted for admission, you will be asked to sign and return a Statement of Intent to Register and a Statement of Legal Residence. A nonrefundable \$100 deposit, also required at this time, will be applied to your University registration fee as long as you register in the term to which you are admitted.

Entrance Requirements

The entrance requirements established by the University of California follow the guidelines set forth in the California Master Plan for Higher Education, which requires that the top one eighth of the state's high school graduates be eligible for admission to the University of California. These requirements are designed to ensure that all eligible students are adequately prepared for University-level work and are based on the principles that the completion of certain academic courses in high school prepares you to begin University work and choose a general field of study. Further, the grades you earn in these courses indicate whether you will be successful in college-level courses.

Fulfilling the minimum admission requirements, however, does not necessarily assure admission to UCLA. The selection of applicants is based on demonstrated high scholarship in preparatory work, which often goes well beyond the minimum eligibility requirements. UCLA offers admission to those students with the best overall academic preparation.

In addition to the primary criteria for admission selection, other elements are considered to ensure a diverse student body which serves the interests of California. If you present evidence of educational and economic disadvantage or a disability, that will be taken into account. If you belong to an ethnic group which has low UC eligibility rates and historically low participation in higher education, that will also be taken into account. California residency is another factor. While these elements are given consideration, academic performance remains the key factor for admission to UCLA.

Admission as a Freshman

You are considered a freshman applicant if you have not enrolled in a regular session of any college-level institution since graduation from high school (except for summer session immediately following high school graduation). To qualify for admission as a freshman, you must meet three major requirements: the **Subject Requirement**, the **Scholastic Requirement**, and the **Examination Requirement**. These are the **minimum** requirements for admission to the University; meeting them does not automatically assure admission to UCLA.

Subject Requirement

Outlined below are the high school academic courses required for admission to the University of California. Each course must be completed with at least a grade of C. The requirement consists of 15 year-long courses, seven of which must be taken during your last two years in high school. These are the **minimum** courses required for admission; you are encouraged to exceed these requirements whenever possible.

- (1) **History/Social Science** — Two years of history/social science, including one year of U.S. history or one-half year of U.S. history and one-half year of civics or American government; and one year of world history, cultures, and geography.
- (2) **English** — Four years of college preparatory English that include frequent and regular writing, and reading of classic and modern litera-

ture. No more than two semesters of ninth-grade English can be used to meet this requirement.

(3) **Mathematics** — Three years of college preparatory mathematics that include the topics covered in elementary algebra, geometry, and advanced algebra (four years are recommended, including trigonometry and calculus). Mathematics courses taken in the seventh and eighth grades may be used to fulfill this requirement if your high school accepts them as equivalent to its own courses.

(4) **Laboratory Science** — Two years of laboratory science (three years are recommended) which provide fundamental knowledge in at least two of these areas — biology, chemistry, and physics. Laboratory courses in Earth/space sciences are acceptable if they have prerequisites or provide basic knowledge in biology, chemistry, or physics. No more than one year of ninth-grade laboratory science can be used to meet this requirement.

(5) **Language other than English** — Two years of the same language, other than English (three to four years are recommended). Courses should emphasize speaking and understanding and include instruction in grammar, vocabulary, reading, and composition.

(6) **College Preparatory Electives** — Two units, in addition to those required above, to be selected from the following subject areas: history, English, advanced mathematics, laboratory science, language other than English, social science, and visual and performing arts.

Scholastic Requirement

Eligibility for admission to the University of California is based on a combination of your grade-point average (GPA) in the academic subject requirements and your American College Test (ACT) or Scholastic Assessment Test (SAT) scores. For detailed scholarship information, see the UC publication *Introducing the University* or contact Undergraduate Admissions and Relations with Schools (UARS).

Examination Requirement

All freshman applicants must submit scores from the following tests:

- (1) Either the American College Test (ACT) composite score OR the Scholastic Assessment Test I: Reasoning Tests (SAT I) total score:
- (2) Three Scholastic Assessment Test II: Subject Tests (SAT II) which must include
 - (a) Writing AND
 - (b) Mathematics, level 1, 1C, or 2C, AND
 - (c) One additional test (either English literature, foreign language, science, or social studies).

You should take these tests by the December test date, as they are part of the review process. Request that test results be sent directly to UCLA when you take each test.

Admission Selection

Many elements are considered in the selection process, but the primary ones are (1) academic grade-point average, (2) scores on the SAT I or ACT and the three SAT II tests, (3) quality, content, and level of coursework throughout your entire high school program, including your senior year, and (4) number of and performance in honors and advanced placement (AP) courses.

You should take as many honors and advanced placement courses as possible and should try to exceed the minimum academic subject requirements in all subjects, particularly mathematics, laboratory sciences, and foreign languages. High test scores are necessary in conjunction with strong performance in classes and a consistent pattern of academic courses. Overall performance must be well above average.

For detailed information on admission requirements for freshman students, see the UC publication *Introducing the University* or contact UARS.

Admission as a Transfer Student

You are considered a transfer applicant if you have been a registered student (1) at another college or university or (2) in college-level extension courses. (This does not include attending a summer session immediately following high school graduation.) You **may not disregard** your college record and apply for admission as a freshman. Priority is given to junior-level applicants. If you wish to transfer to UCLA, you should follow these general guidelines:

The number of advanced standing students applying to UCLA has increased significantly during the last several years. Students admitted to the University exceed the minimum University of California transfer eligibility requirements, and those with the strongest preparation and performance are offered admission.

In accordance with the California Master Plan for Higher Education, UCLA gives first preference to California community college applicants. Applicants transferring from other UC campuses are next in priority, followed by applicants transferring from other colleges and universities. Each application receives a comprehensive review, integrating all available information.

The academic criteria are as follows: grade-point average (GPA) in transferable courses, significant preparation for the major, completion of the English composition and mathematics requirements, and progress toward completion of the Intersegmental General Education Transfer Curriculum (IGETC) or UCLA general education requirements. Applicants who have completed the English composition and mathematics requirements as early as possible in their academic program and who will have 90 transferable quarter units by the time they enroll in the University receive priority admission consideration.

For more detailed information on admission requirements for transfer students, see the *UC Application for Undergraduate Admission and Scholarships* and the *UC Answers for Transfers* booklet or contact UARS.

Intercampus Transfers

Undergraduate students registered in a regular session at any campus of the University (or those previously registered who have not since registered at any other school) may apply for transfer to another campus of the University. Obtain the *UC Application for Undergraduate Admission and Scholarships* and submit the required application fees with the application form. The filing periods are the same as those for new applicants (see When to Apply at the beginning of this section). If you have attended another UC campus and wish to be considered for admission to UCLA, you must have been in good standing when you left that campus. Intercampus transfers are not automatic; you must compete with all other applicants.

Senior-Level Applicants

Students attaining senior standing are not generally admitted by the University.

Transfer Credit and Credit by Examination

The University awards unit credit to transfer students for certain courses completed at other accredited colleges and universities. To be accepted for credit, the courses must be comparable to those offered at the University, as determined by the Office of Undergraduate Admissions and Relations with Schools (UARS). All courses which meet the criteria are used in determining your eligibility for admission. (To convert semester units into quarter units, multiply the semester units by 1.5 — e.g., 12 semester units \times 1.5 = 18 quarter units.)

College credit for examinations given by national testing services is generally not allowed, except for the Advanced Placement (AP) Tests given by the College Board and the International Baccalaureate. Contact UARS for more information.

Applicants from Other Countries

To be considered for admission to the University of California, international students must have completed secondary school with a superior average in academic subjects and have earned a certificate of completion which would enable them to be admitted to a university in the home country.

Your application for admission, copies of official certificates, and detailed records of all secondary schools attended should be submitted **as early as possible after the filing period opens** (see When to Apply at the beginning of this section). This will allow time for the necessary correspondence and, if you are admitted, to obtain your passport visa.

Students whose native language is not English must have sufficient command of English to benefit from instruction at UCLA. To demonstrate that command, you are required to take the UCLA English as a Second Language Placement Examination (ESLPE) before the term in which you are to register. Depending on your ESLPE results, you may be required to complete one or more English as a second language courses with a grade of C or better. In addition, you are advised to take the Test of English as a Foreign Language (TOEFL) as a preliminary means of testing your ability. Make arrangements for this test by contacting TOEFL/TSE Publications, P.O. Box 6154, Princeton, NJ 08541-6154 (609-771-7760). Have your test results sent directly to the UCLA Office of Undergraduate Admissions and Relations with Schools.

Mandatory Medical Insurance Requirement

UCLA requires, as a condition of registration, that all international students on nonimmigrant visas have *adequate* medical insurance coverage during all periods of enrollment. See Mandatory Medical Insurance Requirement for International Students under Undergraduate Registration and Enrollment later in this section for a description of what constitutes adequate medical insurance. Most travel insurance plans are NOT acceptable; medical insurance plans from foreign countries (including Canada) also are NOT acceptable.

UCLA offers a student Medical Insurance Plan (MIP) which fulfills the requirement. For undergraduates the MIP fee appears as a voluntary option to be added each term to the amount due on the UCLA Billing Statement. This is the only method by which MIP can be purchased.

You are required to provide written proof of adequate medical insurance coverage in response to an annual written notice from the Student Health Service (SHS) Insurance Office. For further information on MIP or adequate medical insurance requirements, call the SHS Insurance Office at (310) 825-1856.

Readmission

Undergraduate students are required to apply for readmission only if they are absent from the University for more than one term. Thus, if you complete a term and then withdraw, cancel, or fail to register for the next term, registration information will be available for you for the term immediately following.

If you are absent for two or more consecutive terms, you must complete an Undergraduate Application for Readmission form and file it with the Registrar. During the 1995-96 academic year, all such students returning in the same standing (undergraduate) must file readmission applications as follows:

- August 15 for Fall Quarter 1995
- November 27 for Winter Quarter 1996
- February 26 for Spring Quarter 1996

Application forms are available at 1113 Murphy Hall. Your completed application must be accompanied by a \$40 application fee (nonrefund-

able) and transcripts of records from any other institutions (including UCLA Extension) you attended during your absence. The paper records of nonregistered students, including transcripts submitted for transfer credit, are retained for five academic years by the Registrar's Office. If you were admitted prior to Fall Quarter 1988 and have not been registered for the last five years, you must resubmit official transcripts of all work completed outside UCLA. Readmission is generally approved if you were in good academic standing (2.0 grade-point average) when you left the University, if coursework completed elsewhere in the interim is satisfactory, and if readmission applications are filed on time. Your college or school may have other academic regulations governing readmission (consult the appropriate counseling office). Contact the readmission clerk at (310) 825-1091 for further information.

Second Bachelor's Degree Applicants

By policy, second bachelor's degrees are not generally granted by the University, except in the School of Nursing.

Undergraduate Registration and Enrollment

Registration/Enrollment Office
1113 Murphy Hall
(310) 825-1091

Detailed information on registration (fee payment) and enrollment procedures is contained in the quarterly *Schedule of Classes*, available for purchase at the Students' Store several weeks before the beginning of each term. To obtain a copy by mail, write to ASUCLA Students' Store, 308 Westwood Plaza, Los Angeles, CA 90024-1645, Attn: Mail Out. Include a check or money order payable to ASUCLA for \$5 (Fall Quarter) or \$4.50 each (Winter and Spring Quarters).

Registration consists of paying fees and enrolling in classes. The UCLA Billing Statement, mailed monthly to your UCLA mailing address by the Student Accounting Office, is used to pay registration fees and other University charges. Enrollment in classes is completed through URSA (University Records System Access). You must complete both processes by the established deadlines to be officially registered and enrolled for the term.

Payment is required of all eligible students by the applicable deadlines. Payments may be mailed or deposited in the Main Cashier's Drop Slot (1125 Murphy Hall). Payments submitted after the published deadline must be made in person at 1125 Murphy Hall and will be assessed an additional \$50 late payment fee. Students on financial aid may be eligible for a waiver of the \$50 fee if funds are delayed by the University.

Registration Fee Payment Deadlines

- September 20 for Fall Quarter 1995
- December 20 for Winter Quarter 1996
- March 20 for Spring Quarter 1996

Classes Dropped for Failure to Pay Registration Fees

- October 6 for Fall Quarter 1995
- January 12 for Winter Quarter 1996
- April 5 for Spring Quarter 1996

Mandatory Medical Insurance Requirement for International Students

UCLA requires, as a condition of registration, that all international students on nonimmigrant visas have *adequate* medical insurance coverage during all periods of enrollment.

UCLA offers a student Medical Insurance Plan (MIP) which fulfills the requirement. For undergraduates the MIP fee appears as a voluntary

option to be added each term to the amount due on the UCLA Billing Statement. This is the only method by which MIP can be purchased.

You are required to provide written proof of adequate medical insurance coverage in response to an annual written notice from the Student Health Service (SHS) Insurance Office.

If you do not purchase the UCLA Medical Insurance Plan, **you must have an adequate private medical insurance plan that provides all of the following minimum benefits:**

- (1) A minimum of \$50,000 in "Lifetime Maximum" benefits.
- (2) At least 75 percent of the cost for eligible medical expenses, with no more than a 25 percent out-of-pocket cost to you (patient copayment).
- (3) A claims representative located in the U.S. In addition, you must be provided with an identification card (or reasonable alternative) written in English, which includes payment provisions listed in U.S. dollars and the U.S. telephone number of the U.S. claims representative.

If your private medical insurance plan does not meet all of the above requirements, you must purchase MIP. For further information on MIP or adequate medical insurance requirements, call the SHS Insurance Office at (310) 825-1856.

Enrollment in Classes

The quarterly *Schedule of Classes* contains up-to-date listings of class times, meeting rooms, instructors, and all information necessary for enrolling in classes. Using the *Schedule* and with the aid of academic counseling from your school or college advisers, you can assemble a program of courses (see Choosing Your Major and Planning a Program later in this section).

You should plan two or three alternate programs in case your first choice of courses is not available. You may not choose two courses in the same final examination group and should not select classes that conflict in meeting times. If conflicts are unavoidable, consult with the instructor of each course at the first class meeting.

University Records System Access (URSA)

URSA (310-208-0425) enables all UCLA students to acquire information via a touch-tone telephone from their University academic records stored on the Registrar's Student Records System computer database.

URSA allows you to process your class enrollment, to obtain course confirmation (i.e., a reading of your Study List, including day/time, location, examination code, instructor name), UCLA grades for any completed term, GPA, completed units, and outstanding holds (i.e., restrictions from receiving services), to confirm registration fee payment and Registration Card mailing, to update or review selected student information ("degree expected term," telephone number, residence hall address, privacy release, ethnic-based mailing option, and ethnic background), and to change the security code used to access URSA.

URSA is operational Monday through Saturday from 5 a.m. to midnight, including holidays. You may access the system for grades, GPA, units, and holds information for up to 10 years after your graduation or your last term of attendance. If you have outstanding holds, you will be informed at the beginning of your call.

Telephone Enrollment

By using URSA, you can enroll in classes, add, drop, or exchange classes/sections, put yourself on the wait list for a class, add a class using a PTE Authorization Number, change the grading basis for a class (i.e., Passed/Not Passed), obtain a reading of your Study List, check your wait-list position, and obtain instructor names for all courses. You enroll during your assigned appointment periods, which you also obtain by calling URSA. Consult the *Schedule of Classes* for full enrollment details.

In-Person Enrollment

For classes that require written approval or specialized processing, you may enroll at computer terminals at 1113 Murphy Hall Monday through Friday from 9 a.m. to 5 p.m.

Study Lists

At 7 p.m. on Friday of the second week of instruction the Study List of enrolled courses becomes "official," and all wait lists are eliminated. You should obtain a reading of your Study List through URSA after all enrollment transactions. **You are responsible for all courses and the grading basis as listed on URSA, and you cannot receive credit for courses not listed.** Errors or omissions should be corrected before your academic dean's deadline for changes by petition. Unapproved withdrawal from or neglect of a course entered on the Study List will result in a failing grade.

Beginning with the third week of instruction, changes to your Official Study List require an Enrollment Petition which is available for purchase in the school supplies section at any ASUCLA Students' Store. Approval signatures are required before processing. If you add a special studies (199) course, you must also bring an approved copy of the Petition for Enrollment in Special Studies 199 Course. Consult the *Schedule of Classes* for deadlines and complete instructions. Note: When retroactive approval is given, in exceptional cases, to drop a course or to change the grading basis, the course and action will appear on the official transcript.

Change of College/School or Major

Changing your college/school or major requires the approval of the college/school or department you want to attend. Applications for change of college/school are made by petition, which is available without charge from your college or school office. Change of major petitions are available from the department you want to attend. You may not change majors after the opening of the last term of your senior year.

Undergraduate Fees and Financial Support

Fees

Although the exact cost of attending UCLA will vary according to personal habits, tastes, and financial resources, there are some fees that all UCLA students must pay. Each entering and readmitted student is required to submit a Statement of Legal Residence to the Registrar's Office. Legal residents of California are not required to pay tuition at the University. Students classified as nonresidents must pay tuition of \$2,566 per term (for a full definition of residence and nonresidence, see the Appendix of this catalog).

At the time of registration each term, all undergraduates must pay the following fixed fees. **Fees for Fall Quarter 1995 are current as of publication date but are subject to change without notice by The Regents.**

Term Expenses for Fall 1995

University registration fee	\$ 237.00
Educational fee	1,028.00
Ackerman Student Union fee	2.50
Undergraduate Students Association fee	18.00
Wooden Recreation Center fee	11.00
Total for California residents	\$1,296.50
Nonresident tuition fee	\$2,566.00
Total for nonresidents	\$3,862.50

The registration fee covers certain student expenses for counseling service, all laboratory and course fees, athletic and gymnasium facilities

and equipment, lockers, registration, graduation, and care and treatment on campus by the Student Health Service. This fee is charged whether or not you make use of these services. A duplicate degree fee of \$2,000 per term is assessed to students admitted for a second baccalaureate degree program.

Other Fees

Miscellaneous fees charged to UCLA undergraduates include a \$50 charge for late payment of registration fees (after the fee deadline) or late filing of the Study List (after Friday of the second week of classes) and a \$20 late fee if the UCLA Billing Statement has an unpaid balance in excess of \$25. A \$60 fine will be assessed if any check for registration fee payment is returned by a bank (i.e., stopped payment, insufficient funds, etc.). Minimal charges of \$5 or less are assessed for most petitions and other special requests. A complete list of fees may be found in the *Schedule of Classes*.

Fee Refunds

Students who formally withdraw from the University during the first five weeks of instruction may receive partial refunds of fees. For the refund schedule and more information, see Withdrawal in Academics section of this catalog or consult the *Schedule of Classes* for policy details and specific refund dates for each term.

Reduced Fee Programs

UCLA recognizes the need for undergraduate part-time study in special circumstances. If you have ongoing family or employment responsibilities or health problems which preclude full-time study, you may qualify for part-time enrollment.

If you have approval from your college or school to enroll in 10 units or less, you may qualify for a fee reduction. Nonresident students pay only half the nonresident tuition fee; residents pay half the educational fee. You must file the Request for Fee Reduction form with your college or school by Friday of the second week of instruction. Fee assessment is based on total units enrolled as of Friday of the third week of instruction. If you receive the part-time fee reduction from your academic dean, you may not also use the UC employee reduction; you must use one or the other.

Nonresidents must add the \$7,699 annual tuition fee to their total expenses for an accurate estimate. Expenses cover the three regular session terms of the 1995-96 academic year and do not include Summer Sessions. The budgets are designed to serve as a guide and are subject to change.

Estimated Annual Budgets for Undergraduate California Residents

The budgets are designed to serve as a guide and are subject to change. Expenses cover the three regular session terms of the 1995-96 academic year and do not include Summer Sessions. Nonresidents must add the \$7,699 annual tuition fee to their total expenses for an accurate estimate.

	Commuter Living at Home	On-Campus Housing	Off-Campus Housing
University fees	\$3,893.50	\$3,893.50	\$3,893.50
Books and supplies	874.00	874.00	874.00
Food and rent	1,324.00	5,859.00	6,560.00
Transportation	2,660.00	165.00	1,922.00
Personal	<u>1,739.00</u>	<u>1,131.00</u>	<u>906.00</u>
Total Budget	\$10,490.50	\$11,922.50	\$14,155.50

For more information on housing, contact the UCLA Community Housing Office, 350 De Neve Drive (310-825-4491).

Financial Support

Financial Aid Office
A129J Murphy Hall
(310) 206-0400

It is not required that you come from a low-income family in order to qualify for financial aid. You must, however, demonstrate "financial need," which is defined as the difference between the cost of attending UCLA and the amount that you and your family should be able to contribute. The University expects that students and their families will bear as much of the necessary cost of a student's education as their circumstances will permit.

The Financial Aid Office publishes a *Financial Aid Handbook* which provides more complete information than this catalog can give. You can get a copy free of charge from the Financial Aid Office, A129J Murphy Hall, UCLA, Los Angeles, CA 90095-1435.

Applying for Financial Aid

The deadline for filing all undergraduate financial aid applications for academic year 1996-97 is **March 2, 1996** (applications for 1995-96 would have had to be filed by March 1995). Because of the limits being placed on financial aid funding, meeting deadlines is more crucial than ever. Applications received after the deadline will be considered only if funds are still available. The *Daily Bruin* and other campus media publish information on deadline dates.

Prospective students must first apply for admission to UCLA by filing the *UC Application for Undergraduate Admission and Scholarships* during the filing period (see Undergraduate Admission at the beginning of this section). You can also use the admissions application to apply for undergraduate scholarships.

Free Application for Federal Student Aid

One of the key assumptions of financial aid is that parents, to the extent that they can contribute, have primary responsibility for financing the cost of a student's education. To permit an evaluation of need, all students who apply for need-based aid must provide financial information on the Free Application for Federal Student Aid (FAFSA). If you are financially independent according to financial aid guidelines, your own financial circumstances are analyzed rather than those of your parents.

The FAFSA is used to apply for all federally funded programs, funds administered by UCLA, and Cal Grants administered by the California Student Aid Commission. The FAFSA is available from California high schools and colleges and from the UCLA Financial Aid Office, and should be filed by March 2. Be sure to indicate that a report is to be sent to UCLA.

Continuing students may obtain UCLA Scholarship and Financial Aid Application Packets beginning in January of each year at the Financial Aid Office. Continuing undergraduate students from foreign countries may pick up a Financial Aid Application for International Students at the same office. No financial aid can be awarded to international students in their first year of attendance at UCLA.

Types of Financial Aid

There are four basic types of aid: scholarships, grants, loans, and work-study employment. Since most students are eligible for several of these, the Financial Aid Office usually offers a combination "package" consisting of some funds that are a gift (scholarship or grant) and some that will have to be paid back or earned through employment.

Unless otherwise stated, you must demonstrate financial need to qualify for aid, and you must be making normal academic progress as defined by your college or school, your department, and the Financial Aid Office (for a full definition of financial aid minimum progress standards, see the Appendix of this catalog).

Scholarships

Scholarships are gifts that do not have to be repaid. The Undergraduate Scholarship Program at UCLA rewards academic excellence and promise and provides assistance in meeting the expenses of an undergraduate education. Scholarships are expected to create opportunities for further academic growth and development.

Financial need is a prerequisite only for University and name (endowed) scholarships other than those listed below. Each year approximately \$300,000 is awarded from the many different scholarship funds. Awards range from \$100 to \$2,000 and are not renewable. You must re-apply each year for continued consideration.

Regents Scholarships

One of the highest honors that may be conferred on an undergraduate student is the awarding of a Regents Scholarship. Unlike other University scholarships, these are awarded for four years to students entering from high school, and for two years to juniors. A UCLA faculty committee selects Regents Scholars on the basis of their exceptional academic achievement and promise. Financial need is not a criterion for this award; scholars receive a yearly honorarium of \$500 if they have no financial need. Scholars who establish financial need by filing the FAFSA receive a yearly stipend to cover the amount of their need. In addition to the monetary awards, Regents Scholars receive special privileges.

National Merit Scholarships

UCLA sponsors a number of four-year scholarships for entering freshmen who are finalists in the National Merit Scholarship competition. Finalists who are admitted to UCLA must select UCLA as their institution of choice and must meet UCLA's scholarship criteria in order to receive a UCLA Merit Scholarship. Awards range from \$500 to \$2,000.

UCLA Alumni Association Scholarships

Alumni Scholarships are available to California high school graduates who will be UCLA freshmen in the Fall Quarter and to community college transfer students. No financial need is involved, but eligibility requirements exist, and you should have demonstrated leadership ability, be involved in extracurricular activities, and show academic excellence and promise. Alumni Scholarships are merit-based and competitively awarded. Freshman award amounts range from \$500 to \$10,000; transfer awards are \$500 each. The Dr. Ralph Bunche Scholarship Awards, also presented by the UCLA Alumni Association and named in honor of the Nobel Peace Prize laureate and UCLA alumnus, are given to students from historically underrepresented backgrounds. In addition to the monetary awards, Alumni Scholars receive special privileges. Recipients who receive work-study and/or loans as part of a financial aid package will receive additional alumni grant monies.

ROTC Scholarships

ROTC Scholarships are awarded on a competitive basis to U.S. citizens regardless of parents' income. Scholarships provide tuition, a book allowance, fees, and a tax-free monetary allowance of \$150 per month during the academic year. Applications for four-year scholarships may be obtained by calling the appropriate department at UCLA — Army, (310) 825-7381; Air Force, (310) 825-1742; Navy, (310) 825-9075 — or by writing to Armed Forces Opportunities, P.O. Box 2865, Huntington Station, NY 11746-2102. When writing, specify which service (Army, Air Force, Navy/Marine) scholarship is desired. Completed applications should be submitted prior to July 15 (Army) or August 15 (Air Force and Navy) for early consideration, but no later than December 1 (all services) of the year preceding college matriculation. Three- and two-year scholarship applications may be obtained from the appropriate UCLA department and must be submitted prior to February 1.

Grants

Grants are funds that do not have to be repaid and are based solely on need. Whenever awarding policies and funds permit, your financial aid package will include a grant.

Federal Pell Grants

Federal Pell Grants are federal aid awards intended to be the "floor" of financial aid packages. As such, they may be combined with other forms of aid in order to meet the full costs of education. Amounts for 1995-96 range from \$400 to \$2,340, depending on federal funding, and are determined by your financial resources and your family's financial resources. U.S. citizens and eligible noncitizens may apply by filing the FAFSA. The University requires all eligible undergraduates to apply for a Federal Pell Grant.

Cal Grants A and B

California residents who have not completed more than nine quarters or six semesters of college work prior to September 1995 are eligible to apply for a California Student Aid Commission Cal Grant award. The FAFSA and GPA Verification Form are the official applications for these programs. "Cal Grant A" awards are applied toward registration fees. They are based on need and academic achievement and are renewable each year. "Cal Grant B" awards are intended to assist low-income families and are renewable annually. First-year freshmen receive a quarterly stipend. In subsequent years recipients receive a stipend plus funds toward educational and registration fees.

State University Grants

These grants provide eligible students with financial assistance from state funds. Awards range from \$100 to \$3,900. All undergraduate students are considered.

Federal Supplemental Educational Opportunity Grants

These awards are federally funded and are granted only to undergraduates with financial need. Awards range from \$100 to \$3,900. Recipients must be U.S. citizens or eligible noncitizens.

Loans

Loans allow you to postpone paying some of the costs of your education until you have completed school. A financial aid offer includes a long-term, low-interest loan.

It is essential that borrowers realize their commitment and responsibility to repay according to repayment schedules. Before accepting a loan, you should assess your total educational debt and your ability to repay following graduation. The University will make every effort to assist you during the repayment of your obligation, but University services, including registration and the release of official transcripts, will be withheld if your loan becomes delinquent. Seriously delinquent accounts are referred to a professional collection agency for action.

All loan recipients must come to the Student Loan Services Office (A227 Murphy Hall) for a loan exit interview before leaving UCLA for any reason. This interview will help you understand your loan agreement and your rights and responsibilities. If you fail to participate in an exit interview, the University will place a hold on your academic records and registration materials. Call (310) 825-9864 for an interview appointment before graduating, transferring, or withdrawing from UCLA.

Federal Perkins Loans

These low-interest loans are available to all students who are U.S. citizens or eligible noncitizens. Repayment begins six or nine months after you terminate at least half-time study. Minimum repayment is \$90 per quarter, including interest, up to a maximum of 10 years.

Federal Nursing Loans

To be eligible for a nursing loan, you must be a U.S. citizen or eligible noncitizen and a student in the School of Nursing. Up to \$2,000 is available per academic year. For more information, contact the financial aid counselor either in the Financial Aid Office or in the School of Nursing.

Emergency Educational Loans

You need not be receiving financial aid to apply for emergency loans. You may borrow up to \$100 for immediate emergency needs; this amount is repayable within five weeks. To qualify, you must be a registered UCLA student with a satisfactory loan repayment record. Applications are available from the Student Loan Services Office, A227 Murphy Hall.

Federal Family Education Loan Program

Federal Stafford Loans are long-term need-based loans made by banks and credit unions. They are available to U.S. citizens and eligible noncitizens who are enrolled in at least a half-time program at UCLA. Freshmen may borrow up to \$2,625, sophomores up to \$3,500, and juniors and seniors up to \$5,500 per academic year, to a maximum of \$23,000.

Unsubsidized Federal Stafford Loans for Middle-income Borrowers are not based on need. You must first apply for a Federal Stafford Loan to be considered for this program.

Federal Parent Loans for Undergraduate Students (PLUS) — Through this program your parents may be eligible to borrow up to the cost of your education for the academic year minus any estimated financial aid.

Work-Study Programs

Work-study is a need-based program designed to expand part-time job opportunities for students. The program allows you to work a maximum of 20 hours per week while attending school. An academic year's work-study award may range from \$1,000 to \$1,800, but your gross earnings may not exceed the amount awarded to you.

Under **Federal Work-Study**, the federal government pays a portion of your hourly wage; your employer contributes the balance. Whenever possible, work is related to your educational objectives. Employment may be on or off campus. Hourly pay rates comply with minimum wage laws and vary with the nature of your work, experience, and capabilities. To be eligible you must be a U.S. citizen or eligible noncitizen.

Off-campus community service positions are also available in nonprofit organizations and governmental agencies. If you are placed in these positions, you may petition the Financial Aid Office for an increase in work-study funding up to a maximum of \$5,000.

Whether employed on or off campus, you must maintain full-time enrollment (12 units for undergraduates, eight units for graduate students) to be exempt from Social Security and Medicare taxation.

Getting Your Bachelor's Degree

College and Schools

The UCLA campus consists of one college and 11 schools, most of which are subdivided into departments. The courses of instruction are administered within the departments.

The **College of Letters and Science** provides a broad, nonprofessionally oriented curriculum leading to both undergraduate and graduate degrees.

The **schools** provide training for specific professions and are authorized to grant professional degrees (e.g., Master of Business Administration, Doctor of Education, Master of Public Health). UCLA has 11 professional schools, four of which offer undergraduate degree pro-

grams: School of the Arts and Architecture, School of Engineering and Applied Science, School of Nursing, and School of Theater, Film, and Television.

Each college and school has its own degree requirements and is headed by a dean or provost who has final academic authority. Thus, when you attend UCLA, you are enrolled not only at the University of California, Los Angeles campus, but in a specific college or school within the University. Your academic life is governed by the college or school which houses your major.

UCLA offers Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) degrees in a broad range of disciplines. In addition there are a number of special programs and minors which you may complete as an adjunct to your major. The bachelor's degree (you may earn only one) is the culmination of your undergraduate work; master's and doctoral degrees are earned in graduate study.

Knowing Your Responsibilities

UCLA provides its students with a wide variety of academic assistance and personal support resources, but it is up to you to realize when you need help and to seek it out. It is also your responsibility to keep informed and to comply with the rules, regulations, and policies affecting your academic standing and your life as a UCLA student. Consult this catalog, the college and school announcements, and the *Schedule of Classes* for the information you need; watch for official announcements in the *Daily Bruin* and on campus bulletin boards. Meeting academic deadlines, monitoring your Study List for accuracy, completing prerequisites, and fulfilling degree requirements are all part of your academic duties as a student. Living up to your responsibilities will add immeasurably to the value and enjoyment of your education (also see Student Conduct in the Appendix of this catalog).

Choosing Your Major

One of the most important decisions you will have to make in college is your choice of major — the field of study which represents your principal academic interest and which possibly will contribute toward your career goals. Some students select their major at the time they fill out the University's application for admission. A far greater number, however, are undecided about their major.

If you are in the College of Letters and Science, you do not need to declare your major in your freshman year. The college allows you to attend with an undeclared major until the end of your sophomore year. In fact, if you are not certain of your specific academic goals, it is often wise to wait and explore the diversity of subject areas offered at UCLA. Enroll in introductory courses (usually numbered below 100) in a variety of disciplines to learn the scope and vocabulary of the major. It is not unusual for students to become enthusiastic about disciplines previously unfamiliar to them. With careful planning, such courses may also apply toward fulfilling college requirements for whatever major you choose. To narrow your choices further, carefully consider general college requirements, the description of courses offered in the major, and the departmental requirements for completing the program of study. Look at the books required for each course. Sit in on a few classes and talk with professors during their office hours. Discuss your interests and plans with a departmental counselor or faculty adviser, a college counselor, or advisers in the Placement and Career Planning Center.

A few words of caution: certain majors, especially in the arts, theater, film, television, engineering, and the sciences, require early declaration. Some have enrollment quotas and will allow application by new majors only during a specified term. Check with the departmental adviser for the majors that interest you.

In addition, each UCLA undergraduate is limited to between 208 and 216 quarter units, depending on the college or school, to complete the academic program and fulfill all degree requirements. So, if you wait to declare a major, don't wait too long. In any case, you must declare a major by the beginning of your junior year (90 quarter units).

When you are ready to declare your major, or if you wish to change from one major to another, pick up a Petition for Change of Major at the college or school office. There is no fee for this petition.

Planning a Program

Every new student should obtain academic counseling before enrolling in classes at UCLA (counseling is required in the School of Engineering and Applied Science). Working with a tentative major in mind, you need to plan courses to satisfy all of the degree requirements while staying within the maximum number of units required for graduation. The Orientation program for new students will take you through a step-by-step process designed to insure you enroll in an effective program (see Orientation later in this section). If you cannot attend Orientation, see your college or school adviser or, if you have selected a major, make an appointment with your major department adviser before enrolling in classes.

Undergraduate Degree Requirements

In all campus units except the School of Engineering and Applied Science, you are required to earn a minimum of 180 units from all college-level coursework for the bachelor's degree at UCLA. A maximum of 208 units is allowed in the School of the Arts and Architecture, School of Nursing, and School of Theater, Film, and Television; in the College of Letters and Science a maximum of 216 units (228 for double majors and special programs) is allowed. In the School of Engineering and Applied Science, the minimum units allowed are between 180 and 200 (depending on the program); 213 maximum units are allowed.

As you work toward a bachelor's degree, be aware that in addition to unit requirements there are three types of requirements which you must satisfy. The first type consists of Universitywide requirements which all undergraduates must satisfy; the rest vary depending on your major and the college or school which offers it.

- (1) University requirements — Subject A or English as a Second Language (ESL), and American History and Institutions;
- (2) College or school requirements (e.g., credit and scholarship, English composition, general education requirements);
- (3) Department requirements (courses in preparation for the major and in satisfaction of the major).

University requirements are described below. See the College and Schools section of the catalog for a description of the college or school requirements and the Curricula and Courses section for departmental requirements.

University Requirements

The University of California has established two requirements which all undergraduates must satisfy in order to graduate: Subject A or English as a Second Language (ESL), and American History and Institutions. It is your responsibility to see that these requirements are fulfilled.

Subject A

Because proficiency in English composition is so important to successful performance in many courses, Subject A is the only requirement for graduation that you must satisfy before entering UCLA or during your first year in residence. You may meet this requirement by

- (1) Scoring 3, 4, or 5 on one of the College Board Advanced Placement Tests in English OR
- (2) Scoring 600 or better on the SAT II Subject Test in Writing OR
- (3) Presenting transfer credit for an acceptable college-level course in English composition (passed with a grade of C or better) at another institution OR

(4) Passing the Subject A Examination. All freshmen from California high schools should have taken the Universitywide Subject A Examination in May 1995; others will take an examination at UCLA early in their first term.

If you do not meet the requirement in one of the ways described above, Academic Senate regulations require you to enroll in either English A or 2 (determined by performance on the Subject A Examination) as early as possible during your first year in residence. Each course must be taken for a letter grade and passed with a grade of C or better. If you receive a final grade of C- or less, you must repeat the course during your next term in residence. Satisfaction of the Subject A requirement is a prerequisite to English 3 and all subsequent English courses.

English as a Second Language (ESL)

The English as a Second Language Placement Examination (ESLPE) is required of all entering UCLA students whose native language is not English and who have not otherwise satisfied the English as a Second Language (ESL) requirement. Neither the Test of English as a Foreign Language (TOEFL) nor any other English proficiency test can be submitted or accepted in lieu of the ESLPE. Undergraduate students may take the ESLPE once only. Unauthorized retakes of the examination result in an invalid examination score.

First-Year Students — Nonnative-speaking students who have taken the Subject A Examination are evaluated on the basis of their Subject A composition and informed if they need to sit for the ESLPE before the term in which they are to register. Results of both examinations are reviewed to determine which track (Subject A or ESL) is a more appropriate placement. If you are placed in the Subject A track, you may satisfy the Subject A requirement by following the guidelines listed above. If you are placed in the ESL track, you must complete the requirement by taking the designated courses through the ESL track.

Transfer Students — Nonnative-speaking students with a grade of B or better in the English 3 and 4 equivalent courses at their transfer institution are exempt from the ESL requirement. Other students are notified that they must sit for the ESLPE and may be required to take one or more ESL courses beginning in their first term in residence at UCLA to satisfy the ESL requirement.

Results of the ESLPE are used to determine placement into the required sequence of ESL courses or exemption from the ESL requirement. In the case of a nonpassing score on the examination, you are placed in one or more of the credit-bearing courses — English as a Second Language 33A, 33B, 33C, and 35. You must begin taking courses during your first term in residence at UCLA and must complete the courses in sequence with a grade of C or better (C- or a Passed grade is not acceptable). All units are applied toward graduation but cannot be applied toward general education requirements. Certain ESL courses fulfill major requisite requirements and provide upper division elective units.

American History and Institutions

This requirement is based on the principle that a U.S. citizen attending an American university should understand the history and public institutions of the U.S. under the federal and state constitutions. Candidates for a bachelor's degree must satisfy the requirement in American History and Institutions by one of the following methods:

- (1) Completing a year's course in American history or American government, or a one-year combination of both, in high school with an average grade of B or better OR
- (2) Completing any one of the following UCLA courses with a grade of C or better, or a grade of Passed:

Afro-American Studies M104A, M104B, M158A, M158B, M158C

Asian American Studies M153

Chicana and Chicano Studies M159A, M159B

Economics 183

English 80, 85, M104A, M104B, 115A, 170A, 171A, 171B, 173B, 173C, 174B, 174C

Geography 136

History 6A, 6B, 6C, 7A, 7B, 145A, 145B, 146A, 146B, 147A, 147B, 147C, 148A, 148B, 148C, 149A, 149B, 150A, 150B, 150C, 151A, 151B, 152A, 152B, M153, 154A, 154B, 154C, 154D, 155A, 155B, 156A through 156H, 157A, 157B, M158A through M158E, M159A, M159B, 160A, 160B, 161, 162, 163, 164

Political Science 40, 114A, 114B, 140A, 140B, 140C, 142A, 143A, 145B, 145C, 146A

Equivalent courses completed in UCLA Extension or at another college institution, and accepted by the Board of Admissions, may be used to fulfill the requirement OR

(3) Presenting a satisfactory result of the requirement, by examination, as administered at another college or university within the state OR

(4) Scoring 500 or better on the SAT II Subject Test in American History OR

(5) Scoring 3, 4, or 5 on the College Board Advanced Placement Test in American History.

Candidates for an instructional credential, but not for a degree, must take one of the following courses: History 7A, 7B, 151A, 151B, Political Science 145B, or 145C.

Students attending the University on an F-1 or J-1 visa may petition for exemption from this requirement by showing proof of temporary residence in the U.S.

For more information on this requirement, contact the undergraduate History Department counselor in 6248 Bunche Hall (310-825-3720).

Course Credit and Minimum Scholarship

The grades A through C and Passed denote satisfactory progress toward the bachelor's degree. The grades C – through D – yield unit credit but may not satisfy certain scholarship requirements. Even when they do, they must be offset by grades of C + or better in other courses.

In order to qualify for a bachelor's degree in any college or school at UCLA, you must earn at least a C (2.0) average in all courses taken at any University of California campus. If you fail to maintain this level, you may be placed on academic probation or may become subject to dismissal.

Petitions

A petition is a piece of paper representing your need or desire to be exempted from any standard rule or regulation in the University. It is the only way to obtain formal approval from the department, the college or school, the Registrar, or whoever has authority over your particular request. Some petitions carry a small fee; others are free.

An approved petition for a waiver or substitution in degree requirements represents an agreement between you, your college or school and, in some cases, the department chair, granting you an exception from the existing regulations.

Petitions are also used at UCLA to change your college/school or major, take more or fewer units than regulations permit, make changes to your Study List after URSA processing ends, remove an Incomplete grade, or obtain credit by examination. In addition, you may petition for concurrent enrollment, double major, or waiver of scholarship requirements. Petitions for most of these exceptions are available from your college/school or department; consult the *Schedule of Classes* for details about procedures.

Academic Probation

You will be placed on probation if your overall grade-point average falls between 1.5 and 1.99 or if you do not earn at least a 2.0 GPA in any one term. While you are on probation, you may not take any course on a Passed/Not Passed basis, and you may have to limit your Study List to 12 units.

Your probation will end at the close of a regular term if you have attained a C (2.0) average for the term and a cumulative C average in all University work. If you do not end probation within two terms, you will become subject to dismissal.

Academic Dismissal

You will be subject to dismissal from the University under any of the following conditions:

(1) If your grade-point average in any one term is less than 1.5 OR

(2) If you do not earn at least a C (2.0) average in any term when you are on probation OR

(3) If you do not end probation within two terms.

If you are subject to dismissal, your transcript will carry that notation. You should make an appointment with your college or school counselor. Depending on your situation, you will be given conditions for continuation, or you will be dismissed from the University.

Your college or school counselor can explain the conditions for readmission if you wish to return to the University after dismissal (see Readmission earlier in this section).

Progress Toward the Bachelor's Degree

The undergraduate curriculum at UCLA is designed as a four-year curriculum. In order to graduate in four years, you need to complete at least 45 units during each academic year, not just the 36 required for "minimum progress." In the absence of special circumstances justifying slower progress, you should plan to complete 45 units per year, in an arrangement of courses appropriate to your needs. Consult your college or school counselor if you have questions or need advice.

Each college and school enforces minimum enrollment or minimum progress regulations. You may be subject to disqualification for failing to meet minimum progress requirements. Check with your college or school counselor. Read the degree requirements section under each college and school for specific Study List limits. See the Academics section of this catalog for information on concurrent enrollment, credit by examination and credit from other institutions, and special studies (199) course limitations.

Academic Resources

Alternative Academics

UCLA has a broad range of options that can lend an added dimension to your undergraduate academic program. You will find other services and programs available to both graduate students and undergraduates in the About UCLA section of this catalog.

Center for American Politics and Public Policy

The Center for American Politics and Public Policy (CAPPP) selects 25 to 30 undergraduates each fall and spring to participate in its Quarter in Washington, DC Program, which offers an exciting opportunity to combine UCLA courses with research and field experience in areas directly related to the policy-making process of the federal government. Students live in the Washington area for 12 weeks, dividing their time between courses taught by UC faculty and a part-time field placement position. They are registered as UCLA students and earn academic credit for the courses taken. Most of the courses emphasize politics and pub-

lic policy. The core course carries political science credit. Efforts are also made to provide at least one course in a subject other than political science, such as art or history. All courses take advantage of Washington's unique resources for study and research.

CAPPP administrators help students find a field placement, which is central to a research seminar each student takes, in a Washington organization. Washington field placement locations have included the American Enterprise Institute, CNN, Carnegie Endowment for International Peace, General Accounting Office, Heritage Foundation, Japan Economic Institute, Justice Department, Office of National Drug Control Policy, Senator Edward Kennedy's Office, Treasury Department, and others. For further information and applications, contact the CAPPP Office in 310 GSEIS Building (310-206-3109).

Council on Educational Development

The Council on Educational Development (CED) offers special courses and programs that encourage educational diversity and enrichment for undergraduates. CED works closely with the college, schools, and research centers on campus to support new academic programs and courses. Many of these courses cover socially important issues which, because they are new, are not addressed in existing academic departments. Many involve nontraditional educational concepts, interdisciplinary topics, and subjects on the leading edge of faculty interest.

Each year several courses focus on medicine, law, and human values. Students analyze ethical, legal, and scientific values in medical and mental health care issues, such as genetic screening, human experimentation, patients' rights, and medical technology.

For information about CED courses, consult the *Schedule of Classes*. Your college, school, or department can advise you about degree credit for CED courses. The office is located in 80 Powell Library (310-825-5467).

EXPO Center

The Extramural Programs and Opportunities (EXPO) Center offers access to a wide variety of off-campus learning experiences. For more information on any of the programs or services listed below, contact the EXPO Center, 311 Plaza Building (310-825-0831).

UCLA National Internship Program. More than 4,000 UCLA students have learned about the inner workings of government and business while serving in the internship program, the largest of its kind at any university in the nation. Bruins serve full-time internships for one or more terms on the staffs of elected officials, public interest groups, government agencies, and corporate offices in Sacramento and Washington, DC. Stipends for students in the program can be arranged.

Los Angeles Internship Program. Local internships are available throughout the year in fields such as advertising, business, film, media, politics, and television.

International Opportunities. The EXPO Center counsels students on study, travel, volunteer, international internship, and work opportunities outside the U.S., offering information on some 2,400 overseas study programs open to UCLA students. EXPO also maintains a library of current materials related to study, travel, and other opportunities abroad. International Student Identity Cards and Youth Hostel memberships are issued at the center.

Field Studies Development

Field Studies Development, a division of the Office of Instructional Development, helps students, faculty, and academic departments to develop meaningful learning experiences outside the classroom. These may be in the form of internships, field studies or research, or community service. The office is located in 80 Powell Library (310-825-7867).

Departmental Field Studies. Academic field study programs have been developed in Afro-American studies, anthropology, Asian American studies, business and administration, communication studies, edu-

cation, English, film and television, folklore, geography, history, physiological science, psychology, sociology, urban planning, women's studies, and others. Departmental coordinators work with you to develop field projects and find placements.

Independent Field Studies. You may design internships and field study opportunities to meet your specific academic, personal, and career goals. A field studies coordinator assists you with your plans and helps identify faculty sponsors for your field study. Most departments offer independent field study opportunities.

Community Service — Learning Programs. These programs enable students to perform community service while studying topics related to community health sciences, economics, history, sociology, education, urban planning, women's studies, or other subjects.

Sequential Courses. These classes are taken consecutively for two to three terms and provide in-depth analysis of a specific topic (e.g., Community Health Sciences 196A and 196B). In the first term you are introduced to the techniques of public health education; in the second term, you engage in intensive community outreach. Other sequential courses are also available. Consult a Field Studies Development schedule for more information.

Immersion Programs provide an opportunity for intense involvement in a specific area of study and typically require a full-time commitment for one or two terms. Normally the programs are structured around a block of three courses — a theme course, a methodological course, and a field-work or intensive writing course for which you earn 12 to 14 units per term. The **Developmental Disabilities Immersion Program (DDIP)**, one example, is cosponsored by Field Studies Development, the Department of Psychology, and the Department of Psychiatry and Biobehavioral Sciences. DDIP students learn about a variety of developmental disabilities by working with developmentally disabled children and adults in various research and educational facilities. The program is a full two-term sequence offered in Winter and Spring Quarters. Immersion programs are also available through the Sociology and Anthropology Departments. For more information, call (310) 825-7867.

Freshman and Sophomore Programs

Honors Collegium

The Honors Collegium is an innovative educational alternative designed primarily for UCLA's promising freshmen and sophomores. Some upper division courses are also offered. For a complete description of this program, see College of Letters and Science in the College and Schools section of this catalog.

Lower Division/First-Year Seminars

These departmentally sponsored seminars are designed to provide freshmen and sophomores the opportunity to participate in a small classroom setting to enhance writing, verbal, and analytical skills. Many courses carry general education credit.

Professional Schools Seminar Program (PSSP)

This program offers seminars that explore topics bridging various academic disciplines and professional practice. Students seeking to define their own academic and career goals gain valuable exposure to (1) research frontiers in the professions, (2) policy and ethical issues, and (3) historical and sociological perspectives on professional practice.

Seminars are offered in Fall, Winter, and Spring Quarters (consult the *Schedule of Classes*). Enrollment is limited to allow students close contact with professional school faculty members; lower division students are preferred. You must satisfy the Subject A requirement before enrolling in these seminars. General education credit is granted for most seminars. For further information, contact the PSSP Office in 80 Powell Library (310-825-5467).

Individual Classes

Most departments offer the individual studies (199) course for seniors — or juniors with at least a B average — who want to pursue a particular research interest. Consult your department or the departmental listings in this catalog for further information.

Individual Majors

Highly motivated students who find that no single major accommodates their specific interest in a given subject may propose designing their own major. Proposals are prepared with faculty guidance and sponsorship and are thoroughly examined for cogency, completeness, and academic merit.

The requirements for an individual major vary with each college and school at UCLA, although maintaining a high scholastic average is usually mandatory. Please refer to the Curricula and Courses section of this catalog for major requirements.

Reserve Officers' Training Corps (ROTC)

The University of California, in accordance with the National Defense Act of 1920 and with the concurrence of The Regents, offers courses and programs in military training. This voluntary training allows you to qualify for an officer's commission in the Army, Navy, Air Force, or Marine Corps while completing your college education. ROTC courses are offered by three departments within the College of Letters and Science: Aerospace Studies (Air Force), Military Science (Army), and Naval Science (Navy and Marine Corps). Equipment, uniforms, and textbooks are provided. The programs provide a monthly stipend in the junior and senior years, and additional financial aid is available to qualified students. Individual programs are described in detail in the Curricula and Courses section of this catalog.

Student Research Program

The Student Research Program (SRP), A265 Murphy Hall, (310) 825-6443 invites undergraduates to become directly and fully involved in the University research community through opportunities to participate in faculty research projects. You gain valuable research experience, acquire in-depth knowledge of a specific field or discipline, and establish a "partnership" with a faculty member. The program is available to all undergraduates on a voluntary basis. You receive transcript notation after completing 60 to 80 hours of research (approximately six to eight hours per week). *There is no required minimum grade-point average.* Consult the *SRP Information and Faculty Directory Handbook* for further information on the enrollment process.

Teaching Careers

Although UCLA has no undergraduate major in education, you may prepare for a career in teaching and/or education on campus. Information is available from the following offices:

- (1) **Specialization in Education Program Office**, 1009 Moore Hall, for information regarding this specialization. The program is described in detail in the Curricula and Courses section of this catalog.
- (2) **College of Letters and Science Counseling Service**, A316 Murphy Hall, for information regarding the **Diversified Liberal Arts Program** which is described in detail in the Curricula and Courses section of this catalog.
- (3) **Placement and Career Planning Center**, for information on employment opportunities in teaching and education.
- (4) **UCLA Graduate School of Education and Information Studies**, Office of Student Services, 1009 Moore Hall, for information on master's and doctoral degree programs in education and current information on requirements for various instructional credentials.

Advising and Academic Assistance

UCLA's academic standards are high, and many students find they need some form of academic assistance. Help is available in several forms: staff and student counselors, faculty advisers, services, and special programs. You need only to seek it out. This section introduces you to the many kinds of assistance available to undergraduates. Refer to the section on Student Services in the About UCLA section of this catalog for other helpful programs.

College and School Advisers

Each college/school and academic department at UCLA has a staff of academic counselors and advisers who are knowledgeable and experienced. They are eager to help you plan your academic program, monitor your progress toward the bachelor's degree, provide information about college and major requirements and requisites, and assist you with academic problems, improving study habits, and program planning. Counseling offices for each undergraduate college and school are listed below.

College of Letters and Science — College Counseling Offices

Letters and Science Counseling, A316 Murphy Hall, (310) 825-1965
Academic Advancement Program, 1209 Campbell Hall, (310) 825-1481
Honors Programs, A311 Murphy Hall, (310) 825-1553

School of the Arts and Architecture — 1100 Dickson Art Center, (310) 206-3564

School of Engineering and Applied Science — 6426 Boelter Hall, (310) 825-2826

School of Nursing — 2-200 Factor Building, (310) 825-7181

School of Theater, Film, and Television — 103 East Melnitz Building, (310) 825-5761 or 206-8441

Counseling Assistants

Counseling assistants (CAs) are UCLA graduate students who have been specially trained to help new and lower division students with the transition into University life. Employed by the Division of Honors and Undergraduate Programs in the College of Letters and Science, they represent a number of academic disciplines in the college. CAs help new and lower division students with program planning and course selection and provide assistance in skill building and personal support. You may make an appointment with a CA at the information window at A316 Murphy Hall. CAs are available at the College Counseling Service in Murphy Hall and at Griffin Commons. For additional information, call (310) 206-6681.

ASK Peer Counselors

The ASK Peer Counseling Program is an extension of the College of Letters and Science Counseling Service. ASK peer counselors are undergraduate students in the college trained to provide counseling and respond to your immediate concerns and questions in convenient walk-up settings. No appointments are required. Counselors can provide most petitions, give directions, make referrals, and bridge the gap between campus life and the college office in Murphy Hall.

You can find ASK counselors weekdays when school is in session at these campus locations: Campbell Hall (southwest corner), science quad, and Schoenberg Hall (vending area) from 10 a.m. to 2 p.m.; next to A316 Murphy Hall from 9 a.m. to 1 p.m.; and adjacent to 1105 Murphy Hall from 9 a.m. to 4 p.m.

Orientation

Orientation at UCLA provides a comprehensive introduction to campus life. During the summer and before the beginning of Winter and Spring Quarters, special programs offer new undergraduates extensive aca-

democratic counseling and educational planning. During Orientation you work in small groups with peer counselors and gain insight into necessary academic skills, learn how to plan and construct your academic program, and become familiar with the educational opportunities, student services, and facilities available at UCLA. Individual counseling sessions help you adjust to University life and fulfill the advising requirements of your college or school. Sessions for parents are also offered.

During the summer, Orientation offers three-day, two-night dormitory live-in programs for first-year students and one-day programs for transfer students. Prior to Winter and Spring Quarters, a one-day on-campus program is offered. There is a fee for participation. For more information, contact the Orientation Office in 201 Griffin Commons (310-206-6685).

College Tutorial Services

College Composition and ESL Tutorials

The College Composition Tutoring Lab, in cooperation with the UCLA Writing Programs, offers individual assistance to students enrolled in English A, 2, and 3 and to students writing papers for other UCLA courses. The lab is staffed by trained undergraduate peer tutors who have shown outstanding ability in advanced composition courses and who can help students at any stage of the writing process — from generating and organizing ideas to polishing final drafts.

The College ESL Tutoring Lab assists nonnative-speaking students with English grammar, idioms, pronunciation, listening comprehension, and composition. Priority is given to students enrolled in English as a Second Language 33A, 33B, and 33C, and other ESL courses. Most of the ESL tutors are graduate students pursuing degrees in teaching English as a second language.

Both the Composition and ESL Labs are located in 228 Griffin Commons and offer free individual tutoring by appointment. For tutoring appointments or further information, call (310) 206-1491.

College Math/Sciences Tutorials

The College Math/Sciences Tutorials, located in 230 Griffin Commons, provide an organized by-appointment tutorial program for most introductory courses in biology, chemistry, mathematics, and physics. Trained tutors meet in small group sessions on a weekly basis, teaching methods to improve problem-solving skills and test-taking strategies. Requests for tutors must be made during the first three weeks of the term; early registration is strongly advised. Drop-in tutoring is also offered. Schedules vary each term. For more information, call (310) 206-6965 or 825-7305.

College Tutorials for Student Athletes

The College Tutorials for Student Athletes provide tutoring in the evening and on weekends for intercollegiate athletes whose practice and competition schedules prevent them from participating in other tutorial services. Eligible student athletes can receive regular individual or small group assistance in a wide range of courses, provided they request tutoring within the first four weeks of the term. Trained tutors clarify course content, teach study strategies and, in consultation with course instructors, develop problem-solving exercises and practice examinations to build learning and performance skills.

The coordinator is located in 209 Griffin Commons. For tutoring appointments and further information, call (310) 825-8699.

Academic Advancement Program

The Academic Advancement Program (AAP), with more than 6,000 students, is the nation's largest undergraduate affirmative action program, a multiracial and multicultural program working to retain and graduate historically underrepresented (African American, Chicano/Latino, Native American, Pacific Islander, and Filipino), first-generation college, and low-income students. AAP's goals include increasing the number of

AAP students who enter graduate and professional schools and developing the academic, political, economic, and community leadership necessary to transform our society in the twenty-first century. AAP encourages and promotes academic excellence by providing its students with support services, academic programs, learning resources, scholarships, and research opportunities.

You are eligible to join AAP, participate in its programs, and use its resources if you are a student who comes from a historically underrepresented population, are the first generation to go to college, or are from a low-income family. All students, except Native Americans, must be California residents. For more information, contact the AAP Office in 1209 Campbell Hall (310-825-1481).

Freshman and Transfer Summer Programs

The six-week Freshman and Transfer Summer Programs prepare students to succeed at UCLA by exposing them to the rigor and demands of academic life and the wide range of campus programs, services, and learning resources.

You enroll in two University courses (both meet UCLA's requirements for graduation) and receive close personal attention, in either small groups or individual sessions, from your teaching assistants and tutors. You are encouraged to live on campus so that you can participate in the many cultural and social events, interact with students of diverse backgrounds, build a network of friends, and broaden your life experiences and world outlook.

Counseling Services

AAP counselors work with students to plan their academic programs, monitor progress toward the bachelor's degree, provide information about requirements and prerequisites for different majors, discuss graduate school and career options, and provide support and assistance for students' personal problems. One counselor is responsible for scholarships, housing, and financial aid needs. Upper division AAP peer counselors provide a student perspective on courses, study strategies, educational goals, and stress management to entering students.

Program Leading to Undergraduate Success (PLUS)

PLUS provides retention services such as counseling, tutoring, and a variety of specialized developmental programs for first-generation college students. The PLUS team personalizes the educational process and gives students the opportunity to develop the skills necessary to achieve their academic and career goals.

Tutorial Services

The Tutorial Services unit builds on the premise that critical thinking and intellectual independence are best developed through questioning and active dialogue. Free individual or small group tutoring is offered to all AAP students who wish to improve their critical thinking and analytical reading, composition, quantitative reasoning, and study skills while mastering course materials. AAP provides tutoring for more than 450 courses through its humanities, social sciences, and math/sciences laboratories.

Graduate Mentor Program (GMP)

The primary goal of the Graduate Mentor Program is to increase the number of AAP students who enroll in graduate or professional schools through the encouragement, support, guidance, and advocacy of underrepresented graduate student mentors. Services offered include individual mentoring, meetings with faculty at roundtable discussions, workshops and seminars (on such topics as the graduate application process, financing graduate studies, and GRE preparation), summer undergraduate research stipends, letters of recommendation, and a resource library.

Instructional Media

The **Instructional Media Laboratory** provides individual student access to course-related interactive and videotape programs. Students, assigned by faculty to study specific supplementary materials, may learn at their own pace and at times that suit their individual schedules. The laboratory is located in 270 Powell Library (310-206-1211).

The **Instructional Media Library** is UCLA's central resource for the collection and maintenance of educational and instructional media. Materials from the collection are loaned to regularly scheduled UCLA classes and may be rented by organizations and individuals from the campus community. The library is authorized to monitor compliance with University guidelines and federal copyright law governing the use of video recordings. Reference books from educational and feature film distributors are available. The staff assists in researching media on any subject and obtaining materials from outside sources. The library is located in 46 Powell Library (310-825-0755).

The **Language Laboratory** is a full-service audio facility for teaching and learning languages. Students enrolled in foreign language classes are assigned by faculty to practice pronunciation, comprehension, and listening skills in the laboratory, 190 Powell Library (310-206-8855). Audiotape programs which accompany specific texts used in classes and listening, recording, and monitoring equipment are available.

Academic Excellence

Eligible students receive the following honors and awards in recognition of academic achievement.

Dean's Honors List

The College of Letters and Science, School of the Arts and Architecture, School of Engineering and Applied Science, and School of Theater, Film, and Television award Dean's Honors to deserving students each term. The School of Nursing awards Dean's Honors on an annual basis. These honors are based on the grade-point average attained within a specified number of units. Consult your college or school for further information.

Honors at Graduation

Your college or school awards honors according to your overall GPA at graduation. **To be eligible you must have completed at least 90 (98 for the School of Nursing) University of California units for a letter grade.**

The levels of honors are *summa cum laude*, *magna cum laude*, and *cum laude*. Specific requirements vary for each level and are detailed in the College and Schools section of this catalog.

Departmental Honors

In the College of Letters and Science, departmental honors and highest honors are awarded at graduation on your major department's recommendation, based on successful completion of a departmental honors program. Consult your department for its requirements.

Departmental Scholar Program

Departments in all campus units except the School of Nursing may nominate exceptionally promising juniors and seniors as UCLA Departmental Scholars to pursue bachelor's and master's degree programs simultaneously. Nominations are submitted to the college or school dean or provost for recommendation to the dean of the Graduate Division. If you are interested in becoming a Departmental Scholar, consult your department well in advance of application dates for graduate admission (see the Calendar at the beginning of this catalog).

Honor Societies

Alpha Lambda Delta and Phi Eta Sigma

Membership in these national freshman honor societies is based solely on academic achievement during your **freshman year**. To be eligible you must have a 3.5 GPA with 12 graded **University of California** units in the first term of your freshman year, or a **cumulative 3.5 GPA** at the end of the second and/or third terms. Invitations are issued in Winter Quarter, and initiation is held during Spring Quarter. For more information, contact the Office of the Dean of Students, 1206 Murphy Hall (310-825-3871).

Golden Key

Golden Key is a national interdisciplinary academic honors organization dedicated to excellence. Students qualify on the basis of objective academic criteria; no more than the top 15 percent of enrolled juniors and seniors may be eligible. The society recognizes and encourages scholastic achievement and excellence in all undergraduate fields of study, unites with collegiate faculties and administrators in developing and maintaining high standards of education, provides economic assistance to outstanding members by means of an annual scholarship for initiates and graduating seniors, and promotes scholastic achievement and altruistic conduct through voluntary service. Invitations are issued in Winter Quarter, and a reception is held in Spring Quarter. For more information, contact the Office of the Dean of Students, 1206 Murphy Hall (310-825-3871).

Mortar Board

Mortar Board is a national honor society for college seniors which recognizes outstanding and continual scholarship, leadership, and service to the campus community. To be considered for membership, candidates must have completed 90 units and must have attained at least a B average or be in the highest 35 percent scholastically of the junior class, whichever is higher. Applications are available from the Center for Student Programming, 337 Plaza Building (310-206-5523), early in Winter Quarter and are due by mid-February. Approximately 40 members are selected each spring by the outgoing chapter.

Phi Beta Kappa

Phi Beta Kappa is a national honorary society in the humanities, liberal arts, and sciences, founded at the College of William and Mary in 1776. Membership is conferred for high scholastic standing and is determined by vote of the chapter council according to scholarship records. (Students do **not** apply for Phi Beta Kappa membership.)

At UCLA only graduating seniors and selected juniors are elected to membership. The annual election is held in May, with the initiation in June. At present, the minimum GPA considered is 3.65 (for 140 or more UC units); the minimum number of UC units considered is 75 (students at the 75-unit level must have at least a 3.85 GPA). A reasonable distribution of courses in the humanities and sciences is also required. A Passed grade is computed approximately as a B, depending on number of courses taken and graded units. If you are elected, you will be notified by mail. For more information, contact Phi Beta Kappa in the Honors Programs Office, A311 Murphy Hall (310-206-9667).

Outstanding Senior Award

The Outstanding Senior Award offers recognition to graduating seniors who have demonstrated scholastic excellence, creativity in the department, and outstanding service to the University and community. Nominations are accepted in January and early February, and awards are presented at the annual Alumni Awards Ceremony in May. For more information, contact the UCLA Alumni Association in the West Alumni Center, 325 Westwood Plaza (310-206-0523).

Undergraduate Majors and Degrees

College of Letters and Science

Requirements for Graduate Degrees

General Policies and Regulations

**Graduate Majors, Degrees, and Foreign Language
Requirements**

Graduate Study

The principal characteristic of graduate study is the pursuit of new knowledge through research. At UCLA graduate students benefit from — and contribute to — the resources of one of the outstanding research universities in the country. A distinguished faculty committed to research and teaching, an extensive library system ranked among the best in the nation, and excellent research centers, institutes, and laboratories in virtually every major discipline all provide an extraordinary scope of opportunities for graduate endeavor.

Graduate training at UCLA takes place in the classrooms, the laboratories, the libraries, in specialized seminars, through independent research, and in teaching experiences. As a graduate student, your education is enriched by the several hundred postdoctoral fellows and visiting scholars from other universities who engage in research and teaching at UCLA every year. This unique research environment promotes the quality of original work and study which is the hallmark of graduate education.

The degree of Master of Arts or Master of Science, or one of several professional degrees such as Master of Business Administration or Juris Doctor, is intended to develop your mastery of a field and prepare you for the practice of a profession. The doctoral degree (Ph.D., Ed.D., etc.) is designed to prepare you for creative activity and original research, often in association with college or university teaching.

Administration

Graduate Division

The UCLA Graduate Division is responsible for administering policy established by the Academic Senate's Graduate Council for master's, doctoral, and professional degree programs other than those in law, medicine and dentistry. It oversees graduate recruitment and admissions, fellowships, teaching assistantships, graduate student researcher appointments, and other graduate student support, affirmative action, and the maintenance of high quality standards in all UCLA graduate programs. The dean of the Graduate Division also serves as vice chancellor — academic affairs.

Graduate Council

The Graduate Council is a standing committee of the UCLA Academic Senate. In keeping with the University's philosophy of shared governance, the council is responsible for the establishment of policy and standards for graduate education at UCLA; the approval, review, and monitoring of graduate degree programs; and recommendations regarding fellowships and assistantships.

Graduate Adviser

After admission to a department, program, or school, each graduate student is assigned a graduate adviser who assists the student in program planning and completing degree requirements. The graduate adviser is available for counseling whenever needed; departments usually require at least one student consultation each term. When the master's or doctoral committee is established, the faculty chair of that committee often assumes the adviser's role.

Graduate Students Association (GSA)

UCLA's Graduate Students Association (GSA) shares an equal voice with the Undergraduate Students Association in the governance of the Associated Students. For more details on the GSA, see Student Activities in the About UCLA section of this catalog.

Graduate Admission

Graduate Admissions/Student and Academic Affairs
1255 Murphy Hall
(310) 825-1711

Admission Requirements

U.S. applicants to graduate standing must hold a bachelor's degree from a regionally accredited institution comparable in standard and content to that awarded at the University of California. Degrees granted on the basis, for example, of nonacademic prior learning, test scores, and other than organized supervised coursework in academic subjects are not considered comparable. A scholastic average of B or better (or its equivalent if the letter grade system is not used) is required in the last two years of undergraduate coursework and in any postbaccalaureate study.

International applicants who have completed their postsecondary education outside the U.S. are expected to hold a degree, with above average scholarship, from a non-U.S. university or university-level institution. If your examinations have been graded Excellent, Very Good, Good, and Pass, you must have at least a Very Good general rating to qualify for admission. Students who hold a three-year ordinary or pass degree, or who hold a professional diploma in accounting, business, librarianship, social work, physical education, health education, etc., or a four-year degree, diploma, or higher certificate from a technical, vocational, or post-secondary specialized school, *should not apply for graduate admission*. Persons with memberships in professional associations such as Institutes of Chartered Accountants, the Institute of Chartered Secretaries and Administrators, etc., also do not qualify for graduate admission.

Meeting the minimum requirements does not ensure graduate admission, which is limited by the number of places available in UCLA's schools, college, and departments. Applications are evaluated in terms of scholastic qualifications and formal preparation for the graduate field of study. Departments may have special requirements for admission, which are included under individual departmental listings in this catalog.

Applying for Admission

Graduate students at UCLA must submit the 1996-97 *Application for Graduate Admission* to Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall, UCLA, Los Angeles, CA 90095-1428. You may obtain this form, in person or by mail, from your prospective school or department.

Applications are generally accepted for Fall, Winter, and Spring Quarters, although some departments limit admission to Fall Quarter due to course sequencing. Such restrictions are stated in this catalog's departmental listings and in the application packet. Enrollment in Summer Sessions courses does not constitute admission to graduate standing.

Applications and supporting papers should be on file by the following dates (if the dates below fall on a weekend or holiday, the next working day applies):

December 15, 1995, for Fall Quarter 1996
October 1, 1996, for Winter Quarter 1997
December 28, 1996, for Spring Quarter 1997
December 15, 1996, for Fall Quarter 1997

Applications postmarked after these dates will be considered only when enrollment and funding limitations permit.

Supporting papers and materials to be submitted, including official transcripts of record and a \$40 nonrefundable application fee, are specified in the application packet. Submitted materials are not returnable.

Graduate Record Examination. If you are applying for admission to a department or school which requires Graduate Record Examination (GRE) scores, you should arrange to take the examination no later than December so your scores arrive on time. **GRE scores should be sent**

directly to your prospective department and not to the Graduate Division.

GRE applications and information are available from offices of the Educational Testing Service, either at P.O. Box 6151, Princeton, NJ 08540-6151, or at 1947 Center Street, Berkeley, CA 94704. For information on GRE Fee Waivers, write to the associate program director at the New Jersey address.

Graduate Record Examination 1995-96 Test Dates

October 14, 1995
December 9, 1995
April 13, 1996

Letters of Recommendation. Most graduate professional schools, departments, and interdepartmental programs at UCLA require applicants to submit three letters of recommendation. Letters typically augment, validate, or explain information provided in the application and should be written by people qualified to analyze your abilities and academic promise. In some cases, these letters may mean the difference between acceptance and rejection. Letters should be sent directly to the prospective department. Forms to be used are included in the application packet.

Mandatory Medical Insurance Requirement

UCLA requires, as a condition of registration, that all graduate students and all international students on nonimmigrant visas have *adequate* medical insurance coverage during all periods of enrollment. See Mandatory Medical Insurance Requirement under Graduate Registration and Enrollment later in this section for a description of what constitutes adequate medical insurance. Most travel insurance plans are **not** acceptable; medical insurance plans from foreign countries (including Canada) also are **not** acceptable.

UCLA offers a student Medical Insurance Plan (MIP) which fulfills the requirement. For graduate students the MIP fee is included each term in the amount due on the UCLA Billing Statement. This is the only method by which MIP can be purchased.

If you decide to waive out of MIP because you have adequate private medical insurance, you must complete the Medical Insurance Waiver Request included each term with the UCLA Billing Statement and submit the form when you pay your registration fees. For further information on MIP or adequate medical insurance requirements, call the Student Health Service Insurance Office at (310) 825-1856.

International Applicants

Applicants who have credentials from universities and colleges in foreign countries should submit applications at least two months before application deadlines. International applicants should have an academic degree or professional title earned at a university and will be evaluated on the basis of grades (marks) and class or rank achieved. You should submit official transcripts of record, in duplicate, for all college and university work. Specific instructions are given in the application packet.

Proficiency in English

Test of English as a Foreign Language (TOEFL). International students who hold a bachelor's or higher degree from a university in a country where the official language is English and in which English is the spoken tongue and the medium of instruction are exempt from both the TOEFL and the UCLA English as a Second Language Placement Examination (ESLPE). *All other applicants* must take the TOEFL, administered by the Educational Testing Service in some 95 foreign centers. Applications are available from TOEFL/TSE Publications, P.O. Box 6154, Princeton, NJ 08541-6154 (609-771-7760).

UCLA English as a Second Language Placement Examination (ESLPE). If your native language is not English, you are required to take the UCLA ESLPE (in addition to the TOEFL) before the term in which you are to register. Graduate students may take the ESLPE only once in

a given term. They may retest in a subsequent term, and in such cases the most recent examination score is held to be valid. Unauthorized retakes of the examination result in an invalid examination score. Depending on your ESLPE results, you may be required to complete one or more courses in the English as a Second Language 33 series, beginning in your first term in residence at UCLA. These courses must be passed with a grade of C or better if taken for a letter grade, or B or better if taken on an S/U basis. You should expect to spend a longer period of time at the University than would normally be necessary to complete a degree program if you are required to take any English as a second language courses. If you do not achieve a minimum score on the ESLPE, your admission is deferred until you have acquired the necessary proficiency in English. Neither the Test of English as a Foreign Language (TOEFL) nor any other English proficiency test can be submitted or accepted in lieu of the ESLPE.

Test of Spoken English (TSE). If you are an international student and wish an appointment as a teaching assistant, you should take the Test of Spoken English offered at the TOEFL Center in your home country. Individual departments may require international teaching assistant applicants to take the TSE or SPEAK, an institutional version of the TSE offered through UCLA's Office of Instructional Development (OID). Contact the TA Training Program at (310) 825-9269 for more information on SPEAK.

No Degree Objective

UCLA has no special limited or unclassified categories of graduate admission. Under some circumstances, however, applicants may be admitted for coursework without a degree objective. For example, teachers with a master's degree who wish some refresher study, or international students on a year's stay in the U.S., may wish to apply in this manner. Requirements for admission are the same as those for degree programs. All admission to no degree objective (NDO) programs, except for students in official Education Abroad Programs, must be preapproved by the dean of the Graduate Division, as must any University financial assistance for students on NDO status.

Duplication of Degrees

The University of California, in general, discourages the duplication of advanced degrees. At the same time, it recognizes that a professional degree does not duplicate an academic one, and that pressing needs may exist for degrees in different areas (see Concurrent and Articulated Degree Programs later in this section). If you are applying for a second academic degree at the same level or lower than the one you already hold, you are required to show compelling cause to the department. All degree requirements and University regulations apply just as they do for a first degree. Courses already applied to the earlier degree may not be applied to the second.

Summer Sessions Courses

Enrollment in Summer Sessions courses does not constitute admission to graduate standing, nor does it substitute for the required continuous registration in Fall, Winter, and Spring Quarters. If you wish to apply Summer Sessions courses to your subsequent graduate program, you should consult in advance with your departmental adviser. This is also true if you have been readmitted to graduate standing and you wish to resume graduate study in Summer Sessions. Information and applications are available from the Office of Summer Sessions, 1147 Murphy Hall. Also refer to Academic Residence and Transfer of Credit later in this section.

If you take Summer Sessions courses following the award of your bachelor's degree, the grades do not appear on your undergraduate transcript (they are included on a separate transcript). After you are accepted by the Graduate Division, your Summer Sessions grades are included on your graduate transcript and computed in your grade-point average.

Readmission

Students who are granted a formal leave of absence do not have to apply for readmission if they resume their graduate work in accordance with the terms of their leaves. All other continuing graduate students who fail to register for any regular session, or who fail to complete a term through cancellation or withdrawal, must compete for readmission with new applicants.

If you have registered at any time as a graduate student at UCLA and are returning after an absence (except a formal leave of absence), you must file an *Application for Graduate Admission*. Forms are available from the departments and should be submitted to Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall, UCLA, Los Angeles, CA 90095-1428. The following materials must accompany the application:

- (1) A check or money order for \$40 (nonrefundable) made payable to The Regents of the University of California.
- (2) The Graduate Petition for Change of Major, if appropriate. (If you are reapplying in a new major, request this form along with the *Application for Graduate Admission*.) Your UCLA graduate transcript must also be submitted.
- (3) Transcripts of all academic work completed since your registration at UCLA as a graduate student.

Admission to the Schools of Dentistry, Law, and Medicine

Applicants for M.S. and Ph.D. programs in departments of the School of Medicine or Dentistry should apply for admission to the Graduate Division as described above. For admission to D.D.S., J.D., and M.D. degree programs in the Schools of Dentistry, Law, and Medicine, write to the respective schools for their announcement booklets and for information and application procedures.

Special Programs and Training

UCLA ACCESS to Programs in Molecular and Cellular Life Sciences

The life and basic biomedical science departments at UCLA offer a mechanism for a combined recruitment, admission, and first-year program that provides Ph.D. students in the molecular and cellular life sciences with maximal choice and flexibility in selecting a research specialization. Through UCLA ACCESS, you are able to select research projects from 165 faculty mentors according to changing perceptions, interests, and goals without regard to traditional departmental boundaries. The first year of each degree program has a common curriculum and advising structure.

UCLA ACCESS is used to recruit and admit students to the following 11 Ph.D. programs: Biochemistry, Biology, Microbiology and Molecular Genetics, Molecular Biology, and Physiological Science in the College of Letters and Science; Anatomy and Cell Biology, Biological Chemistry, Experimental Pathology, Microbiology and Immunology, Pharmacology, and Physiology in the School of Medicine. For specific information, refer to the individual department listings in the Curricula and Courses section of this catalog.

Admission

Applicants apply to UCLA ACCESS to Programs in Molecular and Cellular Life Sciences rather than to an individual department and must have completed an undergraduate major in a life or physical sciences discipline with superior scholastic achievement. You should have preparation in physics, biology, and chemistry, as well as specialized courses within the major which may include cell biology, neurobiology, immunology, structural or computational biology, microbiology, virology, plant molecular biology, developmental biology, gene expression, biochemistry, molecular biology, or the molecular basis of disease. In certain cases, background deficiencies may be remedied concurrently with graduate studies if rec-

ommended by the ACCESS advising committee. In addition to the UCLA *Application for Graduate Admission*, you should submit your scores on the Graduate Record Examination (GRE) General Test (Subject Test is optional) and three letters of recommendation from individuals who can provide direct knowledge of your academic record and potential for superior achievement in independent research. Admission is limited to Fall Quarter.

Applications and further information are available from the Program Coordinator, UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 172 MBI, UCLA, Los Angeles, CA 90095-1570 (310-206-6051).

First-Year Course Requirements

Individual requirements vary based on your background and scientific interest and are determined by your advising committee. In general a formal course of study consists of three lecture courses, three laboratory rotations, and two seminar courses. In addition, you participate in related activities on an informal basis.

Lecture Courses. Three survey courses to be selected from a list of approved courses maintained in the program office are required (one in molecular biology, one in cellular biology, and an elective in one of several areas).

Seminar Courses. You must enroll in two seminars during your first three terms to read and report on current scientific research literature.

Laboratory Rotations. During your first nine months in residence, you rotate for one term each through three laboratories selected from the UCLA ACCESS faculty list. You normally enroll in a 200- or 500-level course for a minimum of six units of credit for each rotation.

Additional Coursework. A course in computer application in molecular biology is required.

Teaching Experience. All departments participating in UCLA ACCESS consider teaching experience to be an integral part of the graduate program. You are required to complete two terms of teaching beginning in your second year. You are also required to complete a course, administered through the program, on approaches and methods for successful teaching.

Transfer to the Degree-Granting Program

You are admitted to UCLA graduate standing through UCLA ACCESS on a provisional basis for up to four terms. At the end of Spring Quarter, your academic progress is evaluated by your advising committee. If you receive a satisfactory evaluation, you select a faculty mentor as your doctoral committee chair. With concurrence of your mentor and the degree-granting program, you then transfer from UCLA ACCESS to that program for the remainder of your Ph.D. studies.

In the event you are unable to identify a suitable mentor and program by the end of your first year, one additional laboratory rotation approved by your advising committee will be available during the summer quarter. If you are unable to arrange for a laboratory after four rotations, you will be recommended for termination of graduate study or given the opportunity to arrange for a terminal master's degree through one of the participating or affiliated programs.

Graduate Cross-Enrollment Program with USC

As an integral part of an Academic Resource Sharing program linking UCLA with the University of Southern California, the Graduate Cross-Enrollment Program makes possible graduate student exchanges in many departments. The program is limited to specialized courses which would not otherwise be available to UCLA students and is in effect only during the regular academic year (not in summer).

If you have completed at least one term of graduate study at UCLA, are in good academic standing, and have obtained the necessary approvals, you may enroll in a 501 course through your department. When you have completed the course at USC, **your grade will be forwarded to UCLA to**

be recorded on your transcript (S/U grading only). Only eight units of cross-enrollment courses may be applied toward requirements for the master's degree, and these courses may not be used to satisfy the five-graduate-course requirement. Applications, available from Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall, should be completed before the start of the term in which the course is offered.

Intercampus Exchange Program

If you have completed one term of graduate study at any campus of the University and are in good academic standing, you may attend another campus as an Intercampus Exchange Graduate Student with the approval of your department chair, the chair of the department or group in which you wish to study at the host campus, and the dean of the Graduate Division at both the home and host campuses. The privilege should be used only by students whose graduate study may be enhanced by work with certain faculty or use of facilities and resources accessible only at another campus.

Although you are considered to be in residence at your home campus, as an Intercampus Exchange Student you have library, health service, and recreation center privileges at the host campus. Grades are transferred to your home campus and entered on your official record.

Applications are available from Graduate Admissions/Student and Academic Affairs and should be filed at least four weeks before the beginning of the term in which you expect to enter the program. The program is available only during the regular academic year (not in summer).

Graduate students may also take advantage of the **Education Abroad Program** described in the About UCLA section of this catalog.

Postdoctoral Fellows and Visiting Scholars

The University makes opportunities and facilities available to qualified scholars — those holding doctoral degrees or foreign equivalents — to continue advanced study and research under faculty guidance.

A postdoctoral fellow is one who (1) has been awarded a doctoral degree or the foreign equivalent where at least three years of undergraduate study are prerequisite to admission to the graduate program, (2) has been awarded a fellowship, traineeship, or equivalent support (including academic appointments such as postgraduate researcher) for studies at the postdoctoral level, and (3) is pursuing a program of research and training under the direction of a faculty member with the approval of the department or research unit, and by the dean of the Graduate Division. Enrollment as a postdoctoral fellow is normally for a period of one to three years and is limited to a period not to exceed five years. Interested candidates should make advance arrangements with the relevant department or research unit.

The same opportunities are made available to visiting scholars — senior scholars and distinguished visitors holding doctoral degrees or foreign equivalents — who wish to pursue independent research or advanced study at UCLA, working with a colleague for a limited time, normally no more than one year. Visiting scholars are distinguished from postdoctoral fellows in that they are not in training under faculty supervision but rather are themselves peers of our faculty, visiting from other universities and institutions. Visiting scholars ordinarily have adequate support funds from sources outside the University.

Further information on both postdoctoral fellows and visiting scholars is available from Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall.

Graduate Registration and Enrollment

Registration/Enrollment Office
1113 Murphy Hall
(310) 825-1091

Detailed information on registration (fee payment) and enrollment procedures is contained in the quarterly *Schedule of Classes*, available for purchase at the Students' Store several weeks before the beginning of each term. To obtain a copy by mail, write to ASUCLA Students' Store, 308 Westwood Plaza, Los Angeles, CA 90024-1645, Attn: Mail Out. Include a check or money order payable to ASUCLA for \$5 (Fall Quarter) or \$4.50 each (Winter and Spring Quarters).

Registration consists of paying fees and enrolling in classes. The UCLA Billing Statement, mailed monthly to your UCLA mailing address by the Student Accounting Office, is used to pay registration fees and other University charges. Enrollment in classes is completed through URSA (University Records System Access). You must complete both processes by the established deadlines to be officially registered and enrolled for the term.

Payment is required of all eligible students by the applicable deadlines. Payments may be mailed or deposited in the Main Cashier's Drop Slot (1125 Murphy Hall). Payments submitted after the published deadline must be made in person at 1125 Murphy Hall and will be assessed an additional \$50 late payment fee. Students on financial aid may be eligible for a waiver of the \$50 fee if funds are delayed by the University.

Registration Fee Payment Deadlines

September 20 for Fall Quarter 1995
December 20 for Winter Quarter 1996
March 20 for Spring Quarter 1996

Classes Dropped for Failure to Pay Registration Fees

October 6 for Fall Quarter 1995
January 12 for Winter Quarter 1996
April 5 for Spring Quarter 1996

Mandatory Medical Insurance Requirement

UCLA requires, as a condition of registration, that all graduate students and all international students on nonimmigrant visas have *adequate* medical insurance coverage during all periods of enrollment.

UCLA offers a student Medical Insurance Plan (MIP) which fulfills the requirement. For graduate students the MIP fee is included each term in the amount due on the UCLA Billing Statement. This is the only method by which MIP can be purchased.

If you decide to waive out of MIP because you have adequate private medical insurance, you must complete the Medical Insurance Waiver Request included each term with the UCLA Billing Statement and submit the form when you pay your registration fees.

An *adequate* private medical insurance plan must provide all of the following *minimum* benefits:

- (1) A *minimum* of \$50,000 in "Lifetime Maximum" benefits.
- (2) At least 75 percent of the cost for eligible medical expenses, with no more than a 25 percent out-of-pocket cost to you (patient copayment).
- (3) A claims representative located in the U.S. In addition, you must be provided with an identification card (or reasonable alternative) written in English, which includes payment provisions listed in U.S. dollars and the U.S. telephone number of the U.S. claims representative.

If your private medical insurance plan does not meet all of the above requirements, you must purchase MIP. For further information on MIP or

adequate medical insurance requirements, call the Student Health Service Insurance Office at (310) 825-1856.

Enrollment in Classes

The quarterly *Schedule of Classes* contains up-to-date listings of class times, meeting rooms, instructors, and all information necessary for enrolling in classes. Using the *Schedule* and with the aid of academic counseling from your school or college advisers, you can assemble a program of courses.

University Records System Access (URSA)

URSA (310-208-0425) enables all UCLA students to acquire information via a touch-tone telephone from their University academic records stored on the Registrar's Student Records System computer database.

URSA allows you to process your class enrollment, to obtain course confirmation (i.e., a reading of your Study List, including day/time, location, examination code, instructor name), UCLA grades for any completed term, GPA, completed units, and outstanding holds (i.e., restrictions from receiving services), to confirm registration fee payment and Registration Card mailing, to update or review selected student information ("degree expected term," telephone number, residence hall address, privacy release, ethnic-based mailing option, and ethnic background), and to change the security code used to access URSA.

URSA is operational Monday through Saturday from 5 a.m. to midnight, including holidays. You may access the system for grades, GPA, units, and holds information for up to 10 years after your graduation or your last term of attendance. If you have outstanding holds, you will be informed at the beginning of your call.

Telephone Enrollment

By using URSA, you can enroll in classes, add, drop, or exchange classes/sections, put yourself on the wait list for a class, add a class using a PTE Authorization Number, change the grading basis for a class (i.e., Satisfactory/Unsatisfactory), obtain a reading of your Study List, check your wait-list position, and obtain instructor names for all courses. You enroll during your assigned appointment periods, which you also obtain by calling URSA. Consult the *Schedule of Classes* for full enrollment details.

In-Person Enrollment

For classes that require written approval or specialized processing, you may enroll at computer terminals at 1113 Murphy Hall Monday through Friday from 9 a.m. to 5 p.m.

Study Lists

At 7 p.m. on Friday of the second week of instruction the Study List of enrolled courses becomes "official," and all wait lists are eliminated. You should obtain a reading of your Study List through URSA after all enrollment transactions. **You are responsible for all courses and the grading basis as listed on URSA, and you cannot receive credit for courses not listed.** Errors or omissions should be corrected before your academic dean's deadline for changes by petition. Unapproved withdrawal from or neglect of a course entered on the Study List will result in a failing grade.

Beginning with the third week of instruction, changes to your Official Study List can be made with a fee by calling URSA through the end of the last day of instruction. Consult the *Schedule of Classes* for full enrollment details.

Change of Major

Continuing graduate students may petition for a change of major after discussing plans with the new department. Forms for this purpose are available from the departments and should be filed with Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall. Deadlines are generally the same as those for the graduate admissions procedure, but you should consult with the adviser in the new program before filing an application.

Full-Time Graduate Program

Three courses (or 12 units) per term are considered the normal enrollment for graduate students and are required for students not in doctoral candidacy to be counted for full-time standing in the University's official enrollment records. Therefore, you will be directed by your department to enroll full time whenever possible.

Throughout their appointments, **teaching assistants** are required to be registered and enrolled in at least eight quarter units and **graduate student researchers** in at least 12 quarter units. Those assistants/researchers who take a leave of absence, or withdraw, terminate their appointments. Course 375 for teaching assistants and independent studies at the 500 level for graduate student researchers may be included in reaching the eight- or 12-unit load.

Graduate students holding fellowships must be enrolled in at least eight units, both before and after advancement to candidacy. The eight-unit minimum required per term may include, among others, the 500 series (individual study or research).

Veterans are required to make normal progress toward the degree as stated by the major department. Information on Department of Veterans Affairs regulations is available from Academic Record Services, 1134 Murphy Hall.

Continuous Registration

Graduate students are normally required to register in all three terms of each academic year, including the term in which their degrees or certificates are to be awarded. If you are granted a formal leave of absence or are eligible to pay the filing fee for a degree (see below), you are exempt from this requirement. You must be registered in order to receive financial aid, use University facilities, or take any University examination except the master's comprehensive or doctoral final oral examination.

If you fail to register or to file for an official leave of absence by the end of the second week of instruction, you are assumed to have withdrawn from UCLA. You will then have to reapply and compete for readmission with all other graduate applicants if you wish to return to graduate study at UCLA.

Continuing graduate students studying or doing research outside California throughout a term may pay half the registration fee, plus all other fees in full. Petitions for the reduced fee are available from your department.

Employment and Degree Progress

Policy governing the employment of graduate students considers you primarily as a student rather than an employee and emphasizes your need to make timely progress toward your degree. You are limited to a maximum of 12 quarters of appointment in academic apprentice teaching titles and a maximum of 18 quarters in a combination of academic apprentice teaching and research titles. Appointment to any title limits your employment maximum to 50 percent time during the academic year.

University policy prohibits the employment of graduate students in academic titles. This policy was established to ensure that you (1) make timely progress toward your degree, (2) not be subject to the conflicting roles of student and faculty member, and (3) not be involved in the instruction of your peers.

Registration in the Final Term for Award of the Degree

(1) You must register in the final term in which the degree is to be conferred if you are (a) completing coursework, (b) using library or other University facilities, (c) taking up faculty time other than for a final reading of the thesis or dissertation or to administer the comprehensive or final examination, (d) a doctoral student and were not registered the term immediately preceding the term in which your dissertation is filed, or (e) receiving University funds in the form of a fellowship or appointment as a teaching assistant, reader, or graduate student researcher. If you were not continuously registered or on leave of absence and you are required to register to receive your degree, you must apply for readmission.

(2) If only the thesis or dissertation and/or comprehensive or final examination remain to be completed in your final term, you may be eligible to pay the filing fee instead of registering (see below).

(3) If you were registered in the preceding term and have completed all degree requirements, including final examinations and filing your thesis/dissertation, during the interval between terms and before the first day of instruction, you are not required to register (or pay the filing fee) to receive your degree at the end of the following term.

Filing Fee

If you have completed all requirements for a degree except filing the thesis or dissertation and/or taking the master's comprehensive or doctoral final oral examination, you may be eligible to pay a filing fee of half the registration fee instead of registering and paying all required fees. Applications are available from Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall. For eligibility conditions and further information on the filing fee and registration in the final term, please consult *Standards and Procedures for Graduate Study at UCLA*, available in 1255 Murphy Hall or in individual departments.

Health Evaluation

New students enrolling in the School of Dentistry, Education and Information Studies, Medicine, Nursing, or Public Policy and Social Research must complete and return to the Student Health Service the Health Evaluation forms provided by their departments. For clearance information, call (310) 794-7896.

Graduate Fees and Financial Support

Graduate Student Support
1252 Murphy Hall
(310) 825-1025

Fees

Although the exact cost of attending UCLA will vary according to your academic program, personal habits, tastes, and financial resources, there are some fees that all UCLA students must pay. Each entering and readmitted student is required to submit a Statement of Legal Residence to the Registrar's Office. Legal residents of California are not required to pay tuition at the University. Students classified as nonresidents must pay tuition of \$2,566 per term (for a full definition of residence and nonresidence, see the Appendix of this catalog).

At the time of registration each term, all graduate students (except those in the Schools of Dentistry, Law, Management M.B.A. program, and Medicine) must pay the following fixed fees. Students in those schools should refer to their individual school announcements for explanation of fees per term. **Fees for Fall Quarter 1995 are current as of publication date but are subject to change without notice by The Regents.**

Term Expenses for Fall 1995

University registration fee	\$ 237.00
Educational fee	1,028.00
Ackerman Student Union fee	2.50
Graduate Students Association fee	5.50
Wooden Recreation Center fee	11.00
Mandatory medical insurance	170.00
Total for California residents	\$1,454.00
Nonresident tuition fee	\$2,566.00
Total for nonresidents	\$4,020.00

Other Fees

Miscellaneous fees charged to UCLA graduate students include a \$50 charge for late payment of registration fees (after the fee deadline) or late filing of the Study List (after Friday of the second week of classes); \$50 for advancement to doctoral candidacy; a \$20 late fee if the UCLA Billing Statement has an unpaid balance in excess of \$25; and \$5 or less for most petitions and other special requests. A \$60 fine will be assessed if any check for registration fee payment is returned by a bank (i.e., stopped payment, insufficient funds, etc.). A complete list of fees may be found in the *Schedule of Classes*.

Fee Refunds

Students who formally withdraw from the University during the first five weeks of instruction or take an approved leave of absence by the end of the second week of classes may receive partial refunds of fees. For the refund schedule and more information, see Withdrawal in the Academics section of this catalog or consult the *Schedule of Classes* for policy details and specific refund dates for each term.

Nonresident Tuition Fellowships

A limited number of nonresident tuition fellowships are awarded each year to graduate students with distinguished academic records. Details of eligibility are available from your department.

Living Expenses

Printed below are the estimated yearly budgets for graduate California residents. Students admitted in fall 1995 to the D.D.S., J.D., M.B.A., and M.D. degree programs must add the \$2,000 professional school fee, and nonresidents must add the \$7,699 annual tuition fee to their total expenses for an accurate estimate. Expenses cover the three regular session terms of the 1995-96 academic year and do not include Summer Sessions. (Budgets for the Schools of Medicine, Dentistry, and Nursing are higher, reflecting the expense of specialized books and supplies; figures are available from your health professions counselor.) The budgets are designed to serve as a guide and are subject to change.

Estimated Annual Budgets for Graduate California Residents

	Commuter Living at Home	On-Campus Housing	Off-Campus Housing
University fees	\$4,366	\$4,366	\$4,366
Books and supplies	1,147	1,147	1,147
Food and rent	1,324	5,859	8,130
Transportation	2,552	1,771	2,742
Personal	1,733	1,850	906
Total Budget	\$11,122	\$14,993	\$17,291

For more information on housing, contact the UCLA Community Housing Office, 350 De Neve Drive (310-825-4491).

Financial Support

As a major center for graduate study, UCLA offers its qualified graduate students substantial support through several types of financial assistance.

Information on available funding for entering students is included in the *Application for Graduate Admission*. Readmitted students should also request the *Application for Graduate Admission*, and continuing graduate students should complete the Fellowship and Assistantship Application for Continuing Students. Completed applications must be returned by **January 8**. (Some departments have earlier deadlines; consult the application packet for details.)

UCLA Graduate Student Support, a booklet describing the full range of financial assistance available, is published annually and mailed to continuing students by the Graduate Division. Contact your department for more detailed information.

Fellowships

The University administers several awards on the basis of scholarly achievement. Most awards are available in open competition, though some are restricted to new students or to specific departments. Some fellowship and scholarship awards are made from University funds; others are made from endowment funds held in trust by the University and given by interested friends and alumni. Still others come from annual donations by educational foundations, industry, government, and individual benefactors.

Most fellowship, traineeship, and grant awards are for one academic year (three terms). Fellowships and grants provide stipends in varying amounts for qualified students. Nonresident tuition fellowships cover the tuition, for periods of one to three terms, of selected graduate students who are not California residents.

Assistantships

Academic apprenticeships train qualified students for careers in teaching and research, and compensate them for their services. **Teaching assistantships** provide experience in teaching undergraduates, with faculty supervision. (Teaching assistants, associates, and fellows are eligible to receive partial payment at the beginning of the term in the form of an interest-free advance loan check. Interested students should apply to their departments.) **Graduate student researcher appointments** give students experience working on faculty-supervised research projects.

Graduate Affirmative Action Awards

Graduate Affirmative Affairs Office
1252 Murphy Hall
(310) 206-1280

These programs were established to increase the graduate enrollment and retention of students from groups which have traditionally been underrepresented in graduate education. These groups include American Indians, blacks/African Americans, Chicanos/Mexican Americans, Latinos/Hispanics, Pilipino Americans, and Puerto Ricans. In addition, women in the sciences and engineering, Asian American men in the arts, humanities, and social sciences, and Asian American women in all areas are eligible for many of these awards.

As indicated below, the Graduate Division offers one need-based financial aid program (GAP) and several fellowships to underrepresented students. Students may apply for both financial aid and fellowships simultaneously. All applicants for fellowships must be U.S. residents. For more information on these programs and specific eligibility requirements for each fellowship, contact the Graduate Affirmative Affairs Office, 1252 Murphy Hall (310-206-1280).

(1) **Project 88** — Funded jointly by the UCLA Office of the Chancellor, the Graduate Division, and participating departments and schools, this program awards four-year fellowships on a competitive basis to historically underrepresented students (American Indian/Alaskan native, black/

African American, Chicano/Mexican American, Pilipino, and Puerto Rican) pursuing doctoral degrees. Asian American students pursuing doctoral degrees in the arts, humanities, and social sciences are also eligible.

(2) **Eugene Cota-Robles Fellowship** — This program is funded by the University of California Office of the President for entering Ph.D. students pursuing careers in research and teaching. All applicants must be U.S. citizens or permanent residents who are American Indian/Alaskan native, black/African American, Chicano/Mexican American, Latino/Hispanic, Pilipino, Asian American women (in all disciplines), and Asian American men in the social sciences and humanities. In addition, women in the physical and life sciences and engineering may apply regardless of ethnicity.

(3) **Graduate Opportunity Fellowship Program (GOFP)** — Funded by the University of California, this program provides fellowships to students from groups traditionally underrepresented in graduate programs and to women in fields such as engineering and the physical and life sciences.

(4) **Research Assistantship/Mentorship Program** — Funded by the University of California Office of the President, this program provides research assistantships for underrepresented doctoral students and is designed to encourage a close mentoring relationship between students and faculty members and to enhance research skills. The award provides registration fees, and students are paid a maximum salary of \$12,500 for the academic year.

(5) **Dissertation-Year Fellowship Program** — Funded by the University of California Office of the President, this program supports and encourages University of California underrepresented graduate students to complete the dissertation requirements for the Ph.D. degree and to enhance their qualifications as candidates for faculty teaching and research. The award provides a stipend, registration fees (including mandatory health insurance), and a research allowance.

(6) **Graduate Advancement Program (GAP)** — Awards are made on the basis of need as demonstrated by standard University financial aid criteria. These awards differ from conventional financial aid allocations in that GAP students receive a partial registration fee grant (nonresident tuition is not paid under this program) and a combination of loans and/or work-study.

Awards Based on Financial Need

Because the cost of a graduate education may present a financial hardship, students who require assistance in meeting educational costs are encouraged to apply for aid based on their financial need. Need is defined as the difference between allowable school-related expenses and your financial resources. Financial aid applicants must file the Free Application for Federal Student Aid (FAFSA).

Financial aid awards include work-study and low-interest loans. Students are usually awarded a financial aid "package" which is a combination of these forms of assistance. Further information is available from the Financial Aid Office, A129J Murphy Hall.

Requirements for Graduate Degrees

UCLA offers instruction leading to a broad range of master's and doctoral degrees, both academic and professional. Graduate students earn master's or doctoral degrees through distinguished achievement in study and research. Achievement in study is evaluated by means of the qualifying and comprehensive examinations. Achievement in research is judged by the merits of the thesis or dissertation.

The doctorate, and specifically the Doctor of Philosophy degree, is awarded in recognition of a candidate's in-depth knowledge of a broad field of learning, and for demonstrated ability to make original and distinguished contributions to the field. More generally, the degree is an affidavit of critical aptitude in scholarship, imaginative enterprise in research, and proficiency and style in communication.

University Minimum Standards

The requirements described here for master's and doctoral degrees are minimum standards set by the University. Individual schools or departments may set higher standards and may require additional courses and/or examinations for their master's degree. Each department also sets additional requirements for doctoral degrees according to the demands of the field of study. You are advised to consult the appropriate school announcement or your departmental graduate adviser for details.

Transfer of Credit

There are two general regulations governing transfer of credit. No courses completed before the award of the bachelor's degree may be applied toward a graduate degree unless you are a UCLA Departmental Scholar (see Academic Excellence in the Undergraduate Study section on this catalog). Also, courses taken for any other degree may not be applied toward a master's degree at UCLA unless you are enrolled in a Graduate Council-approved concurrent degree program (see Concurrent and Articulated Degree Programs later in this section).

From Within the University. You may petition to have units and grade points for graduate work completed at other campuses of the University applied toward satisfaction of master's degree requirements at UCLA. Such courses may fulfill up to one half of both the total course and graduate course requirements, and one third of the academic residence requirement, but may not have been used to fulfill the requirements for another degree.

From Outside the University. With approval of the dean of the Graduate Division and your major department, courses completed with a grade of B or better in graduate standing at institutions outside the University of California may apply toward UCLA master's programs. However, courses taken for any degree awarded at another institution may not be applied toward a graduate degree at UCLA. A maximum of two courses (eight quarter units or five semester units) may be applied, but they cannot be used to reduce either the minimum graduate course requirement or the academic residence requirement. (To convert semester units into quarter units, multiply the semester units by 1.5 — e.g., 12 semester units \times 1.5 = 18 quarter units. To convert quarter units into semester units, multiply the quarter units by .666 — e.g., 12 quarter units \times .666 = 7.99 or 8 semester units.)

From Summer Sessions. Regular session courses offered in UCLA Summer Sessions by regular faculty qualify for credit toward a higher degree with departmental approval. Courses offered by visiting faculty may apply, with a recommendation from the department chair. It is best to consult your departmental graduate adviser about applying Summer Sessions courses to your graduate program.

From UCLA Extension. Extension courses taken after July 1, 1969, can be applied only if they are **concurrent** courses prefixed by XLC (offered for students in degree programs and open to Extension students by petition) in the 100, 200, or 400 series, completed with a grade of B or better. By petition to the dean of the Graduate Division and with departmental approval, a maximum of two such courses may be applied toward the nine-course minimum and the five-graduate-course requirements for the master's degree. The master's program, then, would include at least three courses in the 200 or 500 series for academic degrees, or three courses in the 200, 400, or 500 series for professional degrees.

If your master's program requires more than nine courses, concurrent Extension courses may be applied toward one half of the course requirements over the minimum of nine.

Grades earned in Extension courses or in courses taken outside the University of California are not included in computing your grade-point average nor may they be used to remove scholarship deficiencies. Correspondence courses are not applicable to graduate degrees.

Academic Residence

Master's Degree. The minimum residence requirement consists of three academic terms in graduate standing at the University of California, including at least two terms at UCLA.

Doctoral Degree. The minimum residence requirement is two years (six terms) in graduate standing at the University of California, including one year (usually the second) in continuous residence at UCLA. If you earned a master's degree at UCLA, one year of this requirement will have been met. In most cases a longer period of residence is necessary, and from three to five years is generally considered optimal.

Academic residency for both degrees is established by successfully completing a minimum of one graduate or upper division course (four units) during a term.

You may earn one term of residence for summer study in either of these ways: (1) enroll in two six-week Summer Sessions taking at least two units of upper division and/or graduate work in each session OR (2) enroll in one eight-week session for at least four units of credit. Residence earned through Summer Sessions enrollment is limited to one third of the degree requirements.

To maintain satisfactory progress toward the degree, UCLA requires at least a B average in all courses taken in graduate standing at the University and in all courses applied toward a graduate degree, including those taken at another UC campus.

Foreign Language Requirements

Foreign language requirements are determined by individual departments and programs. If your program has a language requirement, you should fulfill it either before you begin graduate study or as soon as possible thereafter. All foreign language requirements must be satisfied before advancement to candidacy.

Many departments require graduate degree candidates to demonstrate proficiency in one or more foreign languages, so that you can acquire broad knowledge in your field of study and keep abreast of foreign developments in the field. You are urged to complete language requirements as early as possible in your graduate career. If your department requires two or more foreign languages, you must complete at least one before the University Oral Qualifying Examination (unless your department requires that both be completed before the examination).

Depending on your department's regulations, you may fulfill foreign language requirements either by passing the Graduate School Foreign Language Test (GSFLT) in French, German, Russian, or Spanish or (in languages not offered by GSFLT) by passing examinations given by UCLA language departments. You may register for the examination at the UCLA Extension Cashier's Office, 10995 Le Conte Avenue. UCLA enrollment is not required. Consult UCLA Extension for registration procedures.

Some departments allow students to fulfill language requirements either by passing departmental examinations or by completing coursework in a foreign language. Certain departments may require additional languages, special competence, or other special procedures. In some departments, English satisfies the foreign language requirement if it is not your native language.

For further details on foreign language requirements, consult your departmental graduate adviser.

Program of Study and Scholarship

Master's Degree

At least nine graduate and upper division courses (or any number of fractional courses totaling 36 units) must be completed in graduate standing; at least five (20 units) of the nine must be graduate-level courses.

UCLA offers master's degrees under two plans: Plan I, the Master's Thesis, and Plan II, the Master's Comprehensive Examination. Some departments offer both plans, and you must consult with your department to

determine the plan for meeting your degree requirements. University minimum requirements are the same under either plan.

Master's Thesis (Plan I)

After advancement to candidacy, students under Plan I must submit a thesis reporting on results of their original investigation of a problem. While the problem may be one of only limited scope, the thesis must show a significant style, organization, and depth of understanding of the subject.

A thesis committee, consisting of at least three faculty members who hold regular professorial appointments at the University, is nominated by the department and appointed by the dean of the Graduate Division for each student (consult the Graduate Division for more details on committee members' eligibility requirements). The thesis committee, which must be appointed before you may be advanced to candidacy, approves the subject and plan of the thesis, provides the guidance necessary to complete it, then reads and approves the completed manuscript. Approval must be unanimous among committee members.

Once the thesis committee and other concerned faculty have approved the subject for the thesis, work may begin. You are responsible for preparing the thesis in the proper form and for observing filing deadlines.

Master's Comprehensive Examination (Plan II)

Following advancement to candidacy, students under Plan II must pass a comprehensive examination administered by a committee consisting of at least three faculty members appointed by the department. In some departments the comprehensive examination may serve as a screening examination for admission to doctoral programs. Information concerning this examination and its format is available in your department.

Doctoral Degree

Doctoral programs are individualized and permit a high degree of specialization. The University does not specify course requirements for doctoral programs. Individual programs set their own requirements, which may include specific courses, and these must be completed before you take the University Oral Qualifying Examination. You will determine your course of study in consultation with a graduate adviser until the doctoral committee is appointed.

Doctoral Examinations before Advancement to Candidacy

Prior to advancement to candidacy, doctoral candidates fulfill the coursework, teaching, and/or examinations required by the major department or group. You are supervised during this period by a departmental adviser and/or departmental guidance committee. This committee administers a departmental written and, in some cases, oral examination (not to be confused with the University Oral Qualifying Examination) after you complete the recommended or required work. Once all departmental and foreign language requirements are met, the department chair consults with you and then nominates a doctoral committee.

University Oral Qualifying Examination

The doctoral committee, consisting of at least four faculty members nominated by your department, is appointed by the dean of the Graduate Division (consult the Graduate Division for details on committee membership). To determine your qualifications for advancement to candidacy, the committee administers the University Oral Qualifying Examination and, at its option, a written examination.

Advancement to Candidacy

Master's Degree

When you have completed approximately half the program for the master's degree (usually at least two terms), you should formally apply for advancement to candidacy. Application forms are available from your department and must be filed there no later than the second week of the

term in which you expect to receive your degree (by the end of the second week of the first Summer Session for a September degree).

You may not be advanced to candidacy until all departmental requirements for advancement, including foreign language examinations, have been satisfied. You then have one year from the date of advancement to complete all requirements for the degree, including your thesis or comprehensive examination. Candidacy expires at the end of one year and reinstatement during the term in which you plan to receive the degree is by petition only.

Doctoral Degree

You are eligible for advancement to doctoral candidacy after passing the University Oral Qualifying Examination with no more than one negative vote, completing four terms of academic residence and any additional departmental requirements, and maintaining a 3.0 grade-point average in graduate standing. You are officially advanced to candidacy on the date the completed application for candidacy form is received in Graduate Admissions/Student and Academic Affairs, provided the information on the form is correct and complete and the examination was conducted in accordance with Graduate Council regulations. The \$50 advancement to candidacy fee will appear on your next UCLA Billing Statement.

Candidate in Philosophy Degree

In several departments, as approved by the Graduate Council, the intermediate degree of Candidate in Philosophy (C.Phil.) is awarded to qualified students on advancement to candidacy for the Ph.D. degree.

The C.Phil. is not a terminal degree but gives formal recognition to a definite state of progress toward the doctorate. Academic requirements are the same as for advancement to candidacy for the Ph.D. (see above). Four terms in academic residence at UCLA are required. (Also refer to Academic Residence earlier in this section.)

The C.Phil. may not be conferred after or simultaneously with the Ph.D. For departments offering the C.Phil., see the degree chart at the end of this section. For further details, consult the Graduate Division.

Doctoral Dissertation

Once the doctoral committee approves the subject for your dissertation, the in-candidacy stage of the doctoral program begins and is devoted primarily to independent study and research and to the preparation of the dissertation, which demonstrates your ability for independent investigation. The doctoral committee guides your progress toward its completion. You are responsible for following instructions on the preparation of the dissertation and for observing filing deadlines.

Final Preparation and Filing of Thesis or Dissertation

For guidance in the final preparation of the thesis or in the preparation and submission of the dissertation and accompanying abstract, you may

- (1) Consult the theses and dissertations adviser, Office of the University Archivist, 390 Powell Library.
- (2) Read *Regulations for Thesis and Dissertation Preparation*, available in Graduate Admissions/Student and Academic Affairs or in the Archivist's Office.
- (3) Attend an orientation meeting on manuscript preparation and filing procedures conducted soon after the start of each term (see the Calendar at the beginning of this catalog).

Master's Thesis. When all members of the committee have approved the thesis and you are ready to file it, you must initiate the final steps in the process by submitting the original signature (approval) page, title page, and any other required forms to Graduate Admissions/Student and Academic Affairs where completion of degree requirements will be verified. After final approval by the dean of the Graduate Division, you must file the thesis with the theses and dissertations adviser by the pub-

lished deadline (approximately two weeks before the degree is to be awarded).

Doctoral Dissertation. When all members of the committee have approved the dissertation and you are ready to file it, you must submit the original signature (approval) page and title page to Graduate Admissions/Student and Academic Affairs where completion of degree requirements will be verified. After final approval by the dean of the Graduate Division, you must file two paper copies of the dissertation with the theses and dissertations adviser by the published deadline (approximately two weeks before the degree is to be awarded).

Deadlines for this academic year are

December 4 for Fall Quarter 1995

March 11 for Winter Quarter 1996

June 3 for Spring Quarter 1996

Doctoral Final Oral Examination

A final oral examination may be required at the option of any member of the doctoral committee, and in some departments is required of all doctoral candidates. The examination, for which *all* committee members must be present, may be held before you have prepared the final copy of your dissertation, but passing the examination (with no more than one negative vote of the committee members) does not imply approval of the final manuscript. Consult your doctoral committee chair or graduate adviser for further information.

Interdepartmental Degree Programs

In addition to graduate degree programs offered within schools and departments, UCLA offers interdisciplinary programs involving two or more participating departments. A total of 26 interdepartmental programs offer bachelor's, master's, and doctoral degrees in some combination; several units offer all three degrees. These programs are administered by interdepartmental committees made up of faculty whose membership is determined by research interest, not by departmental affiliation. By cutting across the usual lines of faculty division, a subject area is studied from the perspectives of different disciplines and a greater degree of program flexibility is achieved.

Interdepartmental degree programs which currently lead to advanced degrees are listed below. All are described more fully in the Curricula and Courses section of this catalog. For further information, contact the chair or graduate adviser of the specific program that interests you.

African Area Studies (M.A.)
 Afro-American Studies (M.A.)
 American Indian Studies (M.A.)
 Applied Linguistics (Ph.D.)
 Archaeology (M.A., Ph.D.)
 Asian American Studies (M.A.)
 Comparative Literature (M.A., Ph.D.)
 Environmental Science and Engineering (D.Env.)
 Folklore and Mythology (M.A., Ph.D.)
 Indo-European Studies (Ph.D.)
 Islamic Studies (M.A., Ph.D.)
 Latin American Studies (M.A.)
 Molecular Biology (Ph.D.)
 Neuroscience (Ph.D.)
 Romance Linguistics and Literature (M.A., Ph.D.)

Concurrent and Articulated Degree Programs

Each of the programs described thus far leads to a single degree — either master's or doctoral. UCLA also offers concurrent and articulated degree programs, which allow you to earn two degrees simultaneously by combining two free-standing degree programs into a coordinated course of study. You may petition to design your own articulated program

(with departmental and Graduate Division approval), but you may not apply credits for one degree to the other. Concurrent degree programs, which may not be individually designed, allow some credit overlap.

These programs accomplish several important objectives: they enable the University to respond to societal changes by creating new fields of study; they prepare students more fully for the world's complexities by combining the cultural (political/social/economic) aspects of their field with the tools of a professional degree; and they allow faculty members to cross departmental lines and interact on a broader scale.

Concurrent degree programs, by allowing a specified amount of credit to apply to both degrees, permit students to reduce the total number of courses required for the two degrees and thereby reduce the time normally required if courses were taken in sequence. Programs leading to concurrent degrees are offered in the following disciplines:

Education, M.A., Ph.D., M.Ed., or Ed.D. — Law, J.D.
 History, M.A. — Library and Information Science, M.L.I.S.
 Islamic Studies, Interdepartmental M.A. — Public Health, M.P.H.
 Latin American Studies, Interdepartmental M.A. — Urban Planning, M.A.
 Management, M.B.A. — Computer Science, M.S.
 Management, M.B.A. — Latin American Studies, Interdepartmental M.A.
 Management, M.B.A. — Law, J.D.
 Management, M.B.A. — Library and Information Science, M.L.I.S.
 Management, M.B.A. — Nursing, M.N.
 Management, M.B.A. — Public Health, M.P.H.
 Management, M.B.A. — Urban Planning, M.A.
 Urban Planning, M.A. — Law, J.D.

Articulated degree programs permit no credit overlap, and students must complete degree requirements separately for each degree. Programs leading to articulated degrees are offered in the following disciplines:

African Area Studies, Interdepartmental M.A. — Public Health, M.P.H.
 African Area Studies, Interdepartmental M.A. — Film and Television, M.F.A.
 Latin American Studies, Interdepartmental M.A. — Education, M.Ed. in Curriculum
 Latin American Studies, Interdepartmental M.A. — Library and Information Science, M.L.I.S.
 Latin American Studies, Interdepartmental M.A. — Public Health, M.P.H.
 Medicine, M.D. — Graduate Division health science major, Ph.D.
 Oral Biology, M.S. — Dentistry, D.D.S. or Certificate

Inquiries about concurrent and articulated degree programs should be directed to graduate advisers in the departments and schools involved. Contact Graduate Admissions/Student and Academic Affairs for information on designing your own articulated program.

General Policies and Regulations

Standards of Scholarship

To maintain satisfactory progress toward a graduate degree, UCLA requires at least a B (3.0) average in all courses taken in graduate standing at any campus of the University and in all courses applied toward advanced degrees. This standard applies to all graduate students, including candidates in certificate programs. In courses graded on an S/U basis, the grade of S (Satisfactory) is awarded for work which would otherwise receive a B or better. Grades S and U are not included in calculating grade-point averages.

Scholarship Probation

You are on probation and are subject to dismissal if your cumulative average in all work attempted in graduate standing falls below a B (3.0) or if work in any two consecutive terms falls below a B average. The dean of the Graduate Division, in consultation with your department, determines your eligibility to continue graduate study in probationary status. If you are allowed to continue, you must make timely progress toward improving your grade-point average.

Disqualification and Appeal

If you are subject to disqualification for reasons other than failure to maintain the minimum grade-point average, you will have your records reviewed by the Graduate Division, in consultation with the graduate adviser. If disqualification results, you may submit a written appeal to the dean of the Graduate Division for reconsideration. Contact Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall, for specific details on how to submit an appeal.

Appeals will be considered only if based on appropriate cause such as (1) procedural error, (2) judgments based on nonacademic criteria, (3) personal bias, or (4) specific mitigating circumstances contributing to performance. Alleged errors in academic judgment or evaluation are not considered appropriate causes for appeal.

In cases of appropriate cause, the dean of the Graduate Division refers the appeal to the Graduate Council's Committee on Degree Programs. You are required to submit a written statement on the basis for your appeal and are entitled to a personal appearance before the committee. After obtaining information on the matter from any appropriate person or

office, the committee makes a recommendation to the dean of the Graduate Division, who makes the final decision. In reporting the decision, the committee includes the basis for the decision, its effective date, and any specific recommendations.

Graduate Student Complaints

Because of the separation of functions within the University, students are sometimes uncertain where they should direct their complaints. The following information may be helpful.

If you have complaints of a scholastic or professional nature involving faculty, you should take them up with the faculty member concerned or, if that is not feasible, with the chair of the department. If the department as a whole is involved, you should take the matter to the appropriate divisional or school dean. Should the issue not be resolved at that level, you may appeal to the dean of the Graduate Division, 1237 Murphy Hall.

Complaints of misconduct against individual students should be made at the Office of the Dean of Students, 1206 Murphy Hall. Complaints of misconduct against officially recognized student organizations may be made at the Center for Student Programming (337 Plaza Building), Student and Campus Life (1104 Murphy Hall), or the Office of the Dean of Students (1206 Murphy Hall).

Complaints concerning alleged violation of the policies and regulations governing graduate study should be made to the dean or associate dean of the Graduate Division, 1237 Murphy Hall.

Complaints from teaching assistants about workloads and evaluations are governed by the provisions of the Teaching Assistant Grievance Procedures, which are spelled out in detail in the *Academic Apprentice Personnel Manual*. Copies are available from departments and from Graduate Student Support, 1252 Murphy Hall.

Complaints about a violation of University policy regarding the conduct of one or more faculty members should be handled as described in the Nondiscrimination, Harassment, and Faculty Code of Conduct sections in the Appendix.

Graduate Majors, Degrees, and Foreign Language Requirements

African Area Studies	M.A.	1 language (African) (Consult the department concerning additional foreign languages which may be required or recommended.)
Afro-American Studies	M.A.	1 language
American Indian Studies	M.A.	Completion of Linguistics 114 or Anthropology 243P
Anesthesiology	M.S. (Nurse Anesthesia)	None
Anthropology	M.A. Ph.D.	1 language 1 language, special proficiency (With departmental approval, a program of courses or other work may be substituted for a language.)
Applied Linguistics	C.Phil., Ph.D.	2 languages or 1 language, special proficiency
Archaeology	M.A. C.Phil., Ph.D.	1 language (Consult the department concerning additional foreign languages which may be required or recommended.) 2 languages (Consult the department concerning additional foreign languages which may be required or recommended.)
Architecture	M.Arch.I, M.Arch.II, M.A. Ph.D.	None 2 languages or 1 language, special proficiency, or proficiency in mathematics and computing
Art	M.A., M.F.A.	None
Art History	M.A. Ph.D.	2 languages (French and German unless otherwise specified) (Consult the department concerning additional foreign languages which may be required or recommended.) 2 languages (French and German unless otherwise specified), with additional language needs to be determined by student's committee
Asian American Studies	M.A.	1 language (2 years of Asian at university level or equivalent) or research tool
Atmospheric Sciences	M.S., C.Phil., Ph.D.	None
Biological Chemistry	M.S., Ph.D.	None
Biology	M.A., C.Phil., Ph.D.	None
Biomathematics	M.S., Ph.D.	None
Chemistry and Biochemistry		
Biochemistry	M.S., C.Phil., Ph.D.	None
Chemistry	M.S., C.Phil., Ph.D.	None
Classics	M.A. (Classics, Greek, or Latin) C.Phil., Ph.D. (Classics)	1 language (French or German or Italian by petition) or completion through course 5 with minimum grade of C 2 languages (French or Italian and German) or completion through course 5 with minimum grade of C
Comparative Literature	M.A., C.Phil., Ph.D.	2 languages, special proficiency (Consult the department concerning additional foreign languages which may be required or recommended.)
Dentistry	M.S., Ph.D. (Oral Biology) D.D.S., Postgraduate Certificate Programs	None None
Design	M.A., M.F.A.	None
Earth and Space Sciences		
Geochemistry	M.S., C.Phil., Ph.D.	None
Geology	M.S., C.Phil., Ph.D.	None
Geophysics and Space Physics	M.S., Ph.D.	None
East Asian Languages and Cultures	M.A. C.Phil., Ph.D.	1 year of Japanese for Chinese majors; 1 year of Chinese for Japanese majors 2 languages (French and German) (Consult the department concerning additional foreign languages which may be required or recommended.)
Economics	M.A., C.Phil., Ph.D.	None
Education	M.A., M.Ed., Ed.D., Ph.D. Ph.D. (Special Education, joint with CSULA)	None None

54 / Graduate Study

Engineering and Applied Science		
Aerospace Engineering	M.S., Ph.D.	None
Chemical Engineering	M.S., Ph.D.	None
Civil Engineering	M.S., Ph.D.	None
Computer Science	M.S., Ph.D.	None
Electrical Engineering	M.S., Ph.D.	None
Engineering	Engr., M. Engr.	None
Engineering and Applied Science	Certificate of Specialization	None
Manufacturing Engineering	M.S.	None
Materials Science and Engineering	M.S., Ph.D.	None
Mechanical Engineering	M.S., Ph.D.	None
Nuclear Engineering	M.S., Ph.D.	None
English	M.A.	Undergraduate foreign language study (required for admission to the graduate program), 1 language
	C.Phil., Ph.D.	Undergraduate foreign language study (required for admission to the graduate program), 2 languages; or 1 language, special proficiency
Environmental Science and Engineering	D.Env.	None
Ethnomusicology and Systematic Musicology	M.A. (Ethnomusicology)	1 language (French or German)
	C. Phil., Ph.D. (Ethnomusicology)	2 languages (French and German) and language relevant to dissertation research
Film and Television	M.A., M.F.A.	None
	C.Phil., Ph.D.	1 language
Folklore and Mythology	M.A.	1 language (French, German, Spanish, or other language by petition to department)
	Ph.D.	2 languages (Consult the department concerning additional foreign languages which may be required or recommended.)
French	M.A.	1 language (German, Italian, Latin, or Spanish) (Consult the department concerning additional foreign languages which may be required or recommended.)
	C.Phil., Ph.D.	2 languages, level 5 and 6 (German, Latin, Spanish, or Russian) (Consult the department concerning additional foreign languages which may be required or recommended.)
Geography	M.A., C.Phil., Ph.D.	Research tool
Germanic Languages	M.A. (German)	1 language (French) (Consult the department concerning additional foreign languages which may be required or recommended.)
	M.A. (Scandinavian)	1 language (French or German and Old Icelandic)
	C.Phil., Ph.D.	2 languages
History	M.A.	1 language
	C.Phil., Ph.D.	Minimum of 2 languages (except U.S. history which requires 1 language) (Consult the department concerning additional foreign languages which may be required or recommended.)
Indo-European Studies	C.Phil., Ph.D.	2 languages (French and German)
Islamic Studies	M.A.	1 language (French or German) (Consult the department concerning additional foreign languages which may be required or recommended.)
	C.Phil., Ph.D.	2 languages (French and German) (Consult the department concerning additional foreign languages which may be required or recommended.)
Italian	M.A.	1 language (French or German) (Consult the department concerning additional foreign languages which may be required or recommended.)
	C.Phil., Ph.D.	2 languages (French, German, Latin, or Spanish) (Consult the department concerning additional foreign languages which may be required or recommended.)
Latin American Studies	M.A.	2 languages (Spanish and Portuguese) (Required for admission to the graduate program. Consult the department concerning additional foreign languages which may be required or recommended. With departmental approval, a program of courses or other work may be substituted for a language.)
Law	J.D., LL.M.	None

Library and Information Science	M.L.I.S., Ph.D.	1 or 2 languages (Required for admission to the graduate program. Consult the department concerning additional foreign languages which may be required or recommended. With departmental approval, a program of courses or other work may be substituted for a language.)
	Certificate (Specialization in Library and Information Science)	None
Linguistics	M.A.	1 language (French, German, Italian, Japanese, Russian, Spanish, or, with departmental approval, a contact language for field research)
	C.Phil., Ph.D.	2 languages (French, German, Italian, Japanese, Russian, Spanish, or, with departmental approval, a contact language for field research)
Management	M.S., M.B.A., C.Phil., Ph.D.	None
Mathematics	M.A., M.A.T.	None
	C.Phil., Ph.D.	1 language (French, German, or Russian) (With departmental approval, a program of courses or other work may be substituted for a language.)
Medicine	M.D., Certificate of Postgraduate Medical Study	None
Microbiology and Immunology	M.S., Ph.D.	None
Microbiology and Molecular Genetics	M.A., Ph.D.	None
Molecular Biology	Ph.D.	None
Molecular and Medical Pharmacology	M.S., Ph.D. (Pharmacology)	None
Music	M.A.	1 language (French, German, Italian, or Spanish — consult the department concerning additional foreign languages which may be required or recommended.) 2 languages for historical musicology
	M.F.A.	1 language (French, German, or Italian) (Not admitting new students at this time.)
	M.M.	1 language — voice and choral conducting (French, German, Italian, or Spanish)

Academic Policies

Units and Grading Policy

UCLA students are responsible for understanding the grading policies and regulations established by the Academic Senate. Should any semantic variations exist between explanations in this catalog and regulations in the *Manual of the Academic Senate*, the manual will prevail in all cases. Copies of the Senate manual are available for review in the Academic Senate Office, 3125 Murphy Hall.

Grades

Instructors are required to assign a final grade for each student registered in a course. The following grades are used to report the quality of a student's work at UCLA:

Undergraduate Students	Graduate Students
A+= Extraordinary	A = Superior Achievement
A = Superior	B = Satisfactorily demonstrates potential for professional achievement
B = Good	C = Passed but work does not indicate potential for professional achievement
C = Fair	F = Failure
D = Poor	S = Satisfactory (achievement at grade B level or better)
F = Failure	U = Unsatisfactory
P = Passed (achievement at grade C level or better)	I = Incomplete
NP= Not Passed	IP = In Progress
I = Incomplete	DR= Deferred Report
IP = In Progress	
DR= Deferred Report	

For Undergraduate Students. The grades A, B, C, and D may be modified by a plus (+) or minus (-) suffix, to either raise or lower your grade-point average. The A+ grade will **not** raise your grade-point average because it carries the same number of grade points as the A grade. The grades A, B, C, and P denote satisfactory progress toward the bachelor's degree, but a D grade must be offset by higher grades in the same term for you to remain in good academic standing. An F grade yields no unit or course credit.

For Graduate Students. The grades A, B, and C may be modified by a plus or minus suffix. The grades A, B, and S denote satisfactory progress toward the degree, but a C grade must be offset by higher grades in the same term for you to remain in good academic standing. Courses in which a C grade is received, however, may be applied toward graduate degrees.

The Schools of Dentistry, Medicine, and Law maintain their own grading codes. If you are interested in programs in any of these schools, consult the appropriate school announcement.

Grade Points

In computing scholarship standing, a course counts as four quarter units. Partial or multiple courses are counted proportionally (e.g., one-half course is equal to two units).

Grade points per unit are assigned by the Registrar as follows:

A+ = 4.0	C+ = 2.3
A = 4.0	C = 2.0
A- = 3.7	C- = 1.7
B+ = 3.3	D+ = 1.3
B = 3.0	D = 1.0
B- = 2.7	D- = 0.7
	F, NP, U = 0

Courses in which you receive a P or S grade may count toward satisfaction of degree requirements, but these grades, as well as DR, I, IP, and NR, are disregarded in determining your grade-point average. (If an I grade is later removed and a letter grade assigned, units and grade points are included in subsequent grade-point averages.) NR indicates that no grade was received from the instructor.

Computing Grade-Point Average

Your grade-point average, or GPA, is determined by dividing the number of grade points earned by the number of units attempted. The number of grade points earned for a course equals the number of grade points assigned times the number of course units. For example, suppose you take three four-unit courses and receive grades of A-, B-, and C+.

To determine your GPA for the term, divide the total grade points earned (34.8) by the total course units attempted (12). Your GPA is 2.9.

Grade Points x Course Units = Total Grade Points

A- = 3.7	4	14.8
B- = 2.7	4	10.8
C+ = 2.3	4	9.2
	12	34.8

For satisfactory standing, undergraduate students must maintain a C average (2.0 GPA) and graduate students a B average (3.0 GPA) in all courses taken at any campus of the University (except UCLA Extension).

Only grades earned in regular session or Summer Sessions at any UC campus and grades earned by Letters and Science students in UCLA Extension courses prefixed by XLC are computed in the UCLA grade-point average. Grades earned at another institution or in UCLA Extension courses other than those prefixed by XLC do not affect your GPA.

Other schools and agencies may calculate grade-point averages differently from the University when evaluating your records for admission to graduate and professional school programs. You should contact them about their policies in this regard.

Passed/Not Passed (P/NP) Grades

Undergraduate students in good standing who are enrolled in at least 12 units (14 in the School of Engineering and Applied Science) may take certain courses on a Passed/Not Passed basis.

By alleviating grading pressures, this option allows you to explore areas in which you have little or no previous experience. The grade P is assigned for a letter grade of C or better. Units earned this way count toward satisfaction of degree requirements but do not affect your GPA. You will receive neither units nor course credit for an NP grade.

You may enroll in one course each term on a P/NP basis (two courses if you have not elected the P/NP option in the preceding term). You may not elect this option for Summer Sessions courses without an approved petition. Your department or school may require that you take some or all courses in your major for a letter grade. Certain other courses or programs may also be exempt from the P/NP option; consult your college or school for details.

You may make program changes to or from P/NP grading through the sixth week of instruction (see the *Schedule of Classes* Calendar for exact dates); changes after the first two weeks of class require a petition (available for purchase in the school supplies section at any ASUCLA Students' Store).

Certain undergraduate courses are offered only on a Passed/Not Passed basis and are designated PN in the *Schedule of Classes*.

Satisfactory/Unsatisfactory (S/U) Grades

Graduate students in good standing (minimum 3.0 GPA) may enroll for S/U grading in one graduate or upper division course outside the major field each term, in addition to any courses offered only on an S/U grading basis within the major. The grade S is assigned for a letter grade of

B or better, but units earned in this manner will not be counted in computing the GPA. You will receive neither units nor degree credit for a U grade. You may not elect the S/U option for Summer Sessions courses without an approved petition.

Courses taken on an S/U basis outside the major, and 500-series courses within the major, are applicable toward degree and/or academic residency requirements if so approved. Interdepartmental majors may not apply S/U courses to degree requirements, except for 500-series courses. Program changes to or from S/U grading may be made through the tenth week of instruction (see the *Schedule of Classes Calendar*); changes after the first two weeks of class require a petition (available for purchase in the school supplies section at any ASUCLA Students' Store).

Certain graduate courses are offered only on a Satisfactory/Unsatisfactory basis and are designated SU in the *Schedule of Classes*.

Incomplete (I) Grades

Once an I grade is assigned, it remains on your transcript along with the passing grade you may later receive for the course. Your instructor may assign the I grade when your work is of passing quality but is incomplete for a good cause (i.e., illness or other serious problems). It is your responsibility to discuss with the instructor the possibility of receiving an I grade as opposed to a nonpassing grade.

If an I grade is assigned, you may receive unit credit and grade points by satisfactorily completing the coursework as specified by the instructor. Do not reenroll in the course; if you do, it will be recorded twice on your transcript. If the work is not completed by the end of the next full term in residence, the I grade will lapse to an F, NP, or U as appropriate. Your college or school may extend this deadline in unusual cases (not applicable to graduate students).

Consult the *Schedule of Classes* for procedure instructions.

In Progress (IP) Grades

For certain courses extending over more than one term (identified by T1, T2, T3, or T4 in the *Schedule of Classes*, evaluation of student performance is deferred until the end of the final term of the course. Provisional grades of IP are assigned in the intervening term(s) and are replaced with the final grade when you complete the full sequence. The school or college faculty or the Graduate Council will determine credit if you do not complete the full sequence and petition for partial credit.

Deferred Report (DR) Grades

You may receive a DR grade when the instructor believes your work to be complete but cannot assign a grade because of disciplinary proceedings or other problems. If you are given a disciplinary DR grade, the Office of the Dean of Students will assist you in resolving the problem. For graduate students, the dean of the Graduate Division will set a deadline by which the DR will lapse to an F if the problem is not resolved and a grade assigned. The DR will be changed to a grade, or perhaps to an Incomplete, when the instructor provides written confirmation that you have resolved the situation. The DR grade is not included in determining your grade-point average.

Repetition of Courses

Certain courses, as noted in their course descriptions, may be repeated for credit. Other courses taken at the University (except UCLA Extension) may be repeated only according to the following guidelines:

(1) To improve your grade-point average, you may repeat only those courses in which you receive a grade of C- or lower; NP or U grades may be repeated to gain unit credit. Courses in which you received a letter grade may not be repeated on a P/NP or S/U basis. Courses originally taken on a P/NP or S/U basis may be repeated either on the same basis or for a letter grade.

(2) Repetition of a course more than once requires the approval of your college or school or the dean of the Graduate Division, and is granted only under extraordinary circumstances.

(3) Degree credit for a course will be given only once, but the grade assigned each time you take the course will be permanently recorded on your transcript.

(4) For undergraduates who repeat a total of 16 units or less, only the most recently earned letter grades and grade points will be computed in the grade-point average. After repeating 16 units, however, your GPA will be based on all letter grades assigned and total units attempted.

(5) For graduate students, all courses in which a letter grade is given, including repeated courses, will be used in computing the grade-point average.

Credit by Examination

Students with high scholastic standing may earn credit for regular University courses by taking examinations rather than enrolling in the courses. This is accomplished by establishing, with a UCLA faculty member, an individual plan of study which may include oral and written work in addition to other requirements. To be eligible for this privilege, undergraduate students must have completed a minimum of 12 units at UCLA. Graduate students must be registered at the time of the examination and are limited to a maximum of three courses taken in this manner.

The results of these courses are entered on your record in the same way as regular courses, and corresponding grade points are assigned. Graduate credit earned by examination may be applied toward minimum course requirements for master's degrees but cannot apply to academic residence requirements for master's or doctoral degrees.

You will need approval from the appropriate instructors, the department, and your college or school or the dean of the Graduate Division, from whom petitions for credit by examination (with fee) are available.

Correction of Grades

All grades except DR, I, and IP are final when filed by the instructor in the end-of-term course report. Thereafter, a grade change may be made only in case of a clerical or procedural error or other unusual circumstances. No grade may be revised by reexamination or, with the exception of the I and IP grades, by completing additional work. If you are dissatisfied with a grade, you should review your work with the instructor and receive an explanation of the grade assigned. All grade changes are recorded on your transcript. See the Appendix for further details and procedures for appealing grades.

Class Standing

Undergraduate classification is determined by the number of units completed.

Classification	Completed Units
Freshman	0 - 44.9
Sophomore	4 - 89.9
Junior	90 - 34.9
Senior	135 or more

In all campus units except the School of Engineering and Applied Science, you are required to earn a minimum of 180 units from all college-level coursework for the bachelor's degree at UCLA. A maximum of 208 units is allowed in the School of the Arts and Architecture, School of Nursing, and School of Theater, Film, and Television; in the College of Letters and Science a maximum of 216 units (228 for double majors and special programs) is allowed. In the School of Engineering and Applied Science, the minimum units allowed are between 180 and 200 (depending on the program); 213 maximum units are allowed. If you ex-

ceed the maximum, you may not be allowed to continue, except in rare cases approved by your college or school. See the degree requirements under each college and school for further details.

Graduate classification is based on your degree objective and whether or not you are advanced to candidacy for a doctorate.

Other Academic Policies

Concurrent Enrollment and Transfer of Credit

Concurrent enrollment means taking courses for credit in UCLA regular session (Fall, Winter, or Spring Quarter) and at another college institution (including UCLA Extension) at the same time. **Concurrent enrollment is not permitted except in extraordinary circumstances, and no credit will be given for courses taken concurrently elsewhere** without the approval of your college or school. This does not apply to UCLA Summer Sessions.

Undergraduate Students

During the summer or during a term when you are not registered at UCLA, you may elect to take courses for credit at UCLA Extension, a community college, or another four-year institution (see limitations below). The UCLA Office of Undergraduate Admissions and Relations with Schools makes the final decision on credit transferability, but it is your responsibility to select courses with catalog descriptions similar to courses offered in regular session at UCLA. You should avoid courses that are closely related to those you have already taken, as you cannot receive credit twice for the same or similar courses. If you wish to apply a specific course from another college toward satisfaction of degree requirements at UCLA, consult your college, school, or department counselor before taking the course.

Only grades earned in regular session or Summer Sessions at any UC campus other than UC Santa Cruz and grades earned by Letters and Science students in UCLA Extension courses prefixed by XLC are computed in the UCLA grade-point average. You may, however, receive unit credit and satisfy course requirements with transferable work taken elsewhere. When you have completed the work, you must have the other college send a copy of your transcript to the UCLA Office of Undergraduate Admissions and Relations with Schools (UARS); you must also fill out a Transfer Credit Evaluation Request form at UARS, 1147 Murphy Hall.

UCLA Extension. If you wish to receive degree credit for work taken through UCLA Extension, you should take courses that correspond in number to the undergraduate courses offered in regular session. The designation XL or XLC before the number of the Extension course signifies that the course is equivalent to the regular session course bearing the same number. Grades earned by Letters and Science students in courses prefixed by XLC are computed in the UCLA grade-point average. No degree credit is given for courses numbered X300 through X499. Remember that concurrent enrollment in Extension and regular session is not permitted.

Community College. The maximum number of community college units allowed toward the bachelor's degree is 105 quarter units (70 semester units). The UCLA Office of Undergraduate Admissions and Relations with Schools will not grant transfer credit for community college courses beyond 105 quarter units, but you may still receive subject credit for this coursework to satisfy lower division requirements. Consult your college or school counselors for possible further limitations. (To convert semester units into quarter units, multiply the semester units by 1.5 — e.g., 12 semester units \times 1.5 = 18 quarter units. To convert quarter units into semester units, multiply the quarter units by .666 — e.g., 12 quarter units \times .666 = 7.99 or 8 semester units.)

Graduate Students

With approval of the dean of the Graduate Division, certain courses completed outside of UCLA regular session may be applied toward the

master's degree. For more details, see Transfer of Credit under Requirements for Graduate Degrees in the Graduate Study section of this catalog.

Transcript of Record

The Registrar prepares, maintains, and permanently retains a record of each student's academic work. Student files of pertinent documents are maintained up to five years following your last date of attendance. You may view your documents in Academic Record Services, 1134 Murphy Hall, by calling (310) 206-4082 to make an appointment. Advance notice of 24 hours is required for viewing.

Your permanent record is your transcript, which reflects all undergraduate and graduate work completed in UCLA regular session and Summer Sessions. It lists chronologically your courses, units, grades, cumulative grade-point average, transfer credits, and total units.

The University Records System Access (URSA) allows all UCLA students via a touch-tone telephone to obtain course confirmation, UCLA grades for any completed term, GPA, completed units, and outstanding holds (i.e., restrictions from receiving services), to confirm registration fee payment and Registration Card mailing, to update and review selected student information, and to change the security code used to access URSA. Presently you can call URSA at (310) 208-0425 Monday through Saturday from 5 a.m. to midnight, including holidays (hours are subject to change). You can call as often as you wish. Access is given based on your nine-digit UCLA student I.D. number and your four-digit security code. The system is easy to use, explaining what to do at each step. A time limit is announced at the beginning of each call. If you exceed the limit, you will be disconnected. You may access the system for up to 10 years after your graduation or your last term of attendance. For additional information, consult the *Schedule of Classes*.

As needed, you may obtain a free printout of your grades for the most recent graded term at Academic Record Services, 1134 Murphy Hall, by presenting your valid current-term Registration Card and a photo I.D.

To have official transcripts sent to other schools, institutions, or agencies, complete a Transcript Request form (available in the Murphy Hall North Lobby) or write to the Registrar's Office, Attn: Transcripts, 1134 Murphy Hall, UCLA, Los Angeles, CA 90095-1429. Requests must include your name while in attendance at UCLA, your Social Security number and/or student I.D. number, your dates of attendance, and your signature for release.

Each transcript costs \$5; additional fees apply for transcripts requiring special delivery services. Although fax services are available, transcripts that are faxed are not considered official. Continuing students and former students with Student Billing and Receivables (SBAR) accounts may charge transcript orders to their accounts. Other requests must be accompanied by a check made payable to Regents-UC. Transcript fees are subject to change at any time. Requests will not be processed if you have outstanding financial, academic, or administrative obligations (holds) to the University. Transcripts of work completed elsewhere must be requested directly from the campus or institution concerned.

Transcripts for UCLA Extension courses must be ordered from UCLA Extension, P.O. Box 24901, Los Angeles, CA 90095.

Verification of Student Status

The Registrar verifies registration (fee payment) and enrollment status as a student is eligible. Verification cannot be issued if registration fees for the term have not been paid.

Verifications for loan forms and student aid guarantors are processed through the National Student Loan Clearinghouse, a nonprofit industry-sponsored organization representing schools, guarantors, lenders, servicers, and secondary markets for the sole purpose of standardizing, simplifying, and automating enrollment verifications and deferment processing. UCLA provides student enrollment verification data, including student names, mailing addresses, Social Security numbers, and enroll-

ment status, to the clearinghouse on a regular basis. Release of this information to the clearinghouse has been approved by the U.S. Department of Education and ruled in compliance with the Federal Family Educational Rights and Privacy Act (FERPA).

Submit all verification request forms (including "good student" auto insurance discounts and health insurance verifications) to Academic Record Services, 1134 Murphy Hall. Forms for clearinghouse participants will be forwarded to the clearinghouse by Academic Record Services.

Certificate of Resident Study for International Students

An international student who must leave the University and the country before completing a degree or certificate program may request a Certificate of Resident Study in addition to a formal transcript. The certificate cannot be awarded to a student if the studies involved are covered by a diploma or other certificate. The chair of your major department recommends the award of the certificate through a petition to the college, school, or Graduate Division. To be eligible to receive the certificate, you must have completed a program of at least nine courses with a minimum 2.0 grade-point average (2.5 for Graduate Division students) and have satisfactorily completed a research project over a period of nine months or more.

Registration Card

Your valid Registration Card (Reg Card) is your official student identification and is required, along with your UCLA Student I.D. Card, for all University services and student activities. Carry it with you as you will be asked to show it for student health services, library privileges, athletic and cultural student ticket rates, recreation center, check cashing, and many other campus services.

If you lose or do not receive your Reg Card, a temporary verification card (good for seven days) will be issued without fee at 1113 Murphy Hall after the fee deadline for the term. After the term begins, you may replace lost, destroyed, or mutilated cards at 1113 Murphy Hall for a \$3 fee. You must show proof of identity for verification or replacement cards.

If you have outstanding obligations (holds), proof of registration cannot be issued. For details on outstanding holds and initiating offices, call URSA at (310) 208-0425.

UCLA Student (Photo) I.D. Card

This card with photo is issued without charge to new or reentrant students from the beginning to the end of the first academic term and is valid with the current Reg Card. Both the Student I.D. Card and the current-term Reg Card are required for all University services and student activities.

You will need a current Reg Card and other valid identification (driver's license, passport, or California DMV I.D. card) to obtain your Student I.D. Card. There is a fee for issuing the card after your first academic term in attendance, for replacing lost or destroyed cards, and for issuing cards because of a name change affecting your University records.

Change of Name or Address

If you wish to change your name on your official University record, fill out a UCLA Correction or Change of Name form (available in the Murphy Hall North Lobby) and submit it to Academic Record Services, 1134 Murphy Hall. All name changes are recorded on your transcript. If you change your address, notify the Registration/Enrollment Office in 1113 Murphy Hall as soon as possible.

Leaving UCLA

Intercampus Transfer

Undergraduate students registered in a regular session at any campus of the University (or those previously registered who have not since registered at any other school) may apply for transfer to another campus of

the University. Obtain the *UC Application for Undergraduate Admission and Scholarships* and submit the required application fees with the application form. The filing periods are the same as those for new applicants (see Undergraduate Admission in the Undergraduate Study section of this catalog). Applications are available from the UCLA Office of Undergraduate Admissions and Relations with Schools, 1147 Murphy Hall, Los Angeles, CA 90095-1436, other University of California Undergraduate Admissions Offices, or your local community college.

Graduate students who wish to enroll as degree candidates at other UC campuses must apply for admission to those Graduate Divisions.

Absence during a Term

If you have to be absent from classes temporarily for reasons beyond your control, you should notify your instructors. Regardless of the reasons for absence, you are required to complete all coursework. If you cannot complete the work on time because your absence is late in the term or prolonged, you may request that the instructors assign an Incomplete grade (see Incomplete Grades earlier in this section).

One-Term Absence for Undergraduates

Undergraduate students who have completed at least one term at UCLA and fail to register for the following term may return to the University the next subsequent term as continuing students. If you plan to attend another institution (including UCLA Extension) during your absence, you should consult your college or school counselor before enrolling elsewhere (see Concurrent Enrollment and Transfer of Credit earlier in this section). If you are absent for two or more consecutive terms, you are no longer considered a continuing student and must apply for readmission (see Readmission in the Undergraduate Study section of this catalog for procedures and deadlines).

Leave of Absence for Graduate Students

Graduate students in good standing may be granted leaves of absence, normally for periods of one to three terms, on approval from the appropriate department and the Graduate Division. Leaves, which may be extended for a total of two years at the discretion of your department and with approval of the Graduate Division, must be requested before the end of the second week of classes (see Withdrawal below for fee refund procedures and more information). Request forms are available from Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall. For details on leaves of absence, see *Standards and Procedures for Graduate Study at UCLA*, available in the Graduate Division offices or in individual departments. Students on leaves of absence are not eligible to use University facilities (except libraries) or faculty time and cannot receive University financial support. Leaves of absence as described here do not apply to undergraduates.

Graduate students who fail to register for a term and do not take an official leave of absence are considered to have withdrawn from the University and must compete for readmission with all other applicants.

Cancellation

Before the first day of classes, you may cancel registration by mailing a written notice to the Registration/Enrollment Office, Attn: Cancellation Clerk, 1113 Murphy Hall, Los Angeles, CA 90095-1429. A \$10 service charge will be deducted from your fee refund.

Undergraduates who return to the University for the following term are considered continuing students. If you are absent longer than one term, you must apply for readmission (see Readmission in the Undergraduate Study section of this catalog for procedures and deadlines). If you cancel in your first term at UCLA, you must reapply for admission.

Graduate students who cancel their registration and do not apply for a formal leave of absence must compete for readmission to return to the University.

Withdrawal

Withdrawing from the University means discontinuing attendance in all courses in which you are enrolled. If you withdraw during a term, you need to file a Notice of Withdrawal, available from your academic dean's office (undergraduates) or departmental office (graduate students).

When you withdraw officially during the first five weeks of instruction (calendar days 1 to 35, beginning with the first day of instruction), a percentage of your registration fee will be refunded as follows:

- First and second weeks of instruction: 80% refund
- Third week of instruction: 60% refund
- Fourth week of instruction: 40% refund
- Fifth week of instruction: 20% refund
- After fifth week of instruction: no refund

If instruction begins in midweek, refund percentages may also change in midweek. Claims for refund must be presented within the academic (fiscal) year to which the claim is applicable. Consult the current *Schedule of Classes* for policy details and specific refund dates.

You may withdraw only if you have not taken any final examinations or otherwise completed the work in any of your classes. For undergraduates, one withdrawal places no restriction on readmission or continuation if you started the term in good academic standing. If you withdraw after one or more previous withdrawals or while in academic difficulty, a restriction may be placed on your continuance in undergraduate standing. Before withdrawing, you are urged to consult faculty, departmental, or college advisers to consider the full implications of this action.

Undergraduates may also withdraw from a term retroactively, provided no final examinations have been taken and no coursework has been completed. No withdrawals are accepted once you have officially graduated from the University.

If you register and subsequently discontinue coursework or stop payment on registration checks without an approved petition for withdrawal, leave of absence, or cancellation, you will receive F, NP, or U grades, as appropriate, for all courses in which you are enrolled for that term. A \$60 fine will be assessed if any check for registration fee payment is returned by a bank (i.e., stopped payment, insufficient funds, etc.). No fees will be refunded, and future registration privileges may be curtailed or revoked. Transcripts will not be issued if you have outstanding financial obligations to the University.

Undergraduate Students. If you return to the University for the term following withdrawal, you are considered a continuing student. If you return later than the following term, you must apply for readmission.

Graduate Students. If you do not register for a term, you are considered to have withdrawn from the University and must apply for readmission when you return.

Graduation from UCLA

Approximately eight out of every 10 UCLA freshmen eventually receive a baccalaureate degree, either from UCLA or from another campus or institution. According to a recent survey of UCLA alumni, one third of all UCLA baccalaureate recipients go on to graduate school. For information on academic requirements for graduation, see Undergraduate Degree Requirements in the Undergraduate Study section of this catalog.

Undergraduate Students

The awarding of the bachelor's degree does not happen automatically but is the culmination of several steps which begin when you identify the term you expect to complete degree requirements through URSA (consult the *Schedule of Classes* for complete instructions on using URSA to declare degree candidacy). **This must be done before you complete 160 units (172 for the School of Engineering and Applied Science) or a \$13 late candidacy fee will be assessed.** The identified term must fall within the academic year (four quarters) subsequent to the term in which you reach or expect to reach the 160-/172-unit mark.

Exceptions can be made by your degree auditor depending on your program of study (e.g., double majors).

You may request a review of your degree progress by a counselor in your college or school office at any time. Advisers in your major department are also available for counseling on departmental requirements.

The "degree expected term" you specify through URSA is used by the degree auditors to review your coursework and begin the audit of your completion of degree requirements. You cannot graduate without such an audit. If your expected graduation date changes and you have not yet completed 160/172 units, update your degree term through URSA. Once you have completed 160/172 or more units, a fee will be assessed each time you petition to change your "degree expected term" using the UCLA Declaration of Candidacy form.

Consult the latest *Schedule of Classes* for the deadline to declare candidacy for the current term (with fee if 160/172 or more units completed). Declaration of candidacy after the published deadline may result in a degree award date for the following term and additional candidacy penalty fees.

You can confirm your "degree expected term" at any time through URSA at (310) 208-0425. Declaring candidacy is not a guarantee of graduation. If you have requested through URSA that no public information (including your name) be released, you will not be included in the program booklet for Commencement ceremonies.

If you intend to complete degree requirements as a nonregistered student (take a course through UCLA Extension or at another institution, remove an incomplete grade, etc.), you must file a request to graduate "in absentia" with your degree auditor by the fifth-week candidacy deadline. Students graduating "in absentia" will be assessed the special order diploma fee in addition to the declaration of candidacy fee.

Students in the School of the Arts and Architecture, School of Nursing, School of Engineering and Applied Science, and School of Theater, Film, and Television are audited for degree requirements by staff members in their respective counseling/student affairs offices and should consult them regarding questions on degree requirements and school degree audit procedures.

Students in the College of Letters and Science who entered UCLA in Fall Quarter 1988 and thereafter are mailed a computer-generated **Degree Progress Report** once a year (copies can also be ordered at A316 Murphy Hall). This report includes a detailed evaluation of transfer credit, courses and grades for each completed term, degree requirements completed, and requirements still outstanding.

Students who entered prior to Fall Quarter 1988 are audited for degree requirements by the Registrar's degree auditors after completing 160 units, with a "degree expected term" within the subsequent two terms. You should receive information regarding your completion of requirements or any remaining degree requirements and/or deficiencies no later than your final term.

A "Summary of Shortages for the Bachelor's Degree" statement is mailed to each current-term candidate who does not satisfy degree requirements that term. If you receive such a notice, contact a degree auditor immediately to discuss your expected completion of the requirements.

Once you complete 180 units and reach the term you have declared as your "degree expected term," you are reviewed by your degree auditor for award of the degree each subsequent term while in continuous registration, including UCLA Summer Sessions. Keep your degree auditor informed of your plans for completing your degree.

Graduate Students

Candidates for both master's and doctoral degrees must be advanced to candidacy and complete all degree requirements, including the master's thesis or comprehensive examination, or doctoral dissertation, before the degree is conferred (consult the *Schedule of Classes* for filing dead-

lines). For full details on degree requirements and procedures for graduate students, see the Graduate Study section of this catalog.

Final Transcript

Official transcripts with your graduation date included are available approximately seven weeks after the end of the term. If you require earlier proof of graduation, contact your degree auditor.

Degree Date

Degrees are awarded at the end of Fall, Winter, and Spring Quarters and at the end of Summer Session C (mid-September). For the School of Law and School of Medicine degrees are awarded at the end of Fall and Spring Semesters. Consult the respective University calendars (quarter, summer sessions, semester) for the actual degree award date, which is the final day of the term.

Diplomas

Diplomas for both undergraduate and graduate students are available approximately three to four months after the degree award date. Information about obtaining your diploma in person (no fee) or by mail (with fee) is sent to you approximately seven weeks after the end of your final term. To expedite receipt of your diploma, you are encouraged to return the diploma mailer form and remit the mailing fee. Recorded information regarding diploma availability may be obtained by calling the Diploma Hot Line at (310) 825-8883. The Registrar's Office retains diplomas for five years from graduation date.

If your original diploma is destroyed, a duplicate may be ordered by contacting the Registrar's Office, Diploma Reorder, 1113 Murphy Hall. There is a fee for the replacement diploma, and it will bear a reissue date and the signatures of the current officials of the state and University.

Commencement

Each school and college conducts an academic ceremony for its graduates. Some of the ceremonies feature an address by the Chancellor, student speakers, and recognition of candidates who have achieved high academic distinction and honors, as well as prizes. Check with your school or college for eligibility requirements and program and time schedules.

Academic regalia (caps, gowns, and hoods) are available for rent/purchase at ASUCLA's Graduation Et Cetera (B Level of Ackerman Union, 310-825-2587). In addition, graduation announcements with printed enclosure cards, diploma covers, and diploma mounting are available. You may also purchase graduation announcements at the ASUCLA Campus Photo Studio (second floor of Ackerman Union) through mid-May. The studio is scheduled to move to the A Level of Ackerman Union during Spring Quarter 1996.

College and Schools

School of the Arts and Architecture

School of Dentistry

Graduate School of Education and Information Studies

College of Letters and Science

John E. Anderson Graduate School of Management

School of Medicine

School of Nursing

School of Public Health

School of Public Policy and Social Research

School of Theater, Film, and Television

School of the Arts and Architecture

Daniel Neuman, Acting Dean

The School of the Arts and Architecture at UCLA plays a vital role in the cultural and artistic life of the campus and community. Providing a full range of course offerings and degree programs, the school consists of six departments — Architecture and Urban Design, Art, Design, Ethnomusicology and Systematic Musicology, Music, and World Arts and Cultures (the recently merged Department of Dance and the World Arts and Cultures Program). Students have unparalleled opportunities to learn from and interact with distinguished faculty members who rank among the most innovative artists and architects of our time.

A balance of practice and theory, built on the academic foundation of the liberal arts, assures the understanding and appreciation of both the interdependence and integration of creativity, performance, and research. In educating the whole person, the school strives to empower and inspire the next generation of citizens to serve as cultural leaders of the twenty-first century.

Also under the School of the Arts and Architecture umbrella is an impressive array of public arts units, including the UCLA Center for the Performing Arts, one of the largest arts presenters in the nation, UCLA at the Armand Hammer Museum of Art and Cultural Center which houses the Grunwald Center for the Graphic Arts, the UCLA Fowler Museum of Cultural History, and the renowned Murphy Sculpture Garden. These institutions offer extraordinary access to leading anthropological, historical, and contemporary visual arts exhibitions and collections, and presentations by the world's most outstanding performing artists.

In addition to providing a rich and diverse environment on campus, the school offers students the opportunity to participate in community outreach programs designed around concerts, exhibitions, symposia, and dance productions presented in cooperation with groups throughout the greater Los Angeles area.

The departments of the School of the Arts and Architecture are integral to the rich and varied cultural life of the campus. The Department of Architecture and Urban Design provides architecture students with a unique opportunity to study buildings, cities, and their interdependence in one of the most structurally and ethnically diverse cities in the world. Students in the Department of Art are taught to understand the broad panorama of the visual arts emphasizing experimentation; with current restructuring, ceramics is now an area of specialization within the department. The Department of Design offers an exploration of the union of traditional design — graphics, visual communications — with the theories and techniques of design computation and logical systems. Students in the Department of Ethnomusicology and Systematic Musicology study the performance and context of music-making from a global perspective, and the Music Department offers specializations in composition, theory, and performance. The Department of World Arts and Cultures offers an innovative interdisciplinary arts curriculum based on the vital relationship between dance/performance and theory/criticism.

Informative brochures on the school are available from the Office of Recruitment, 1100 Dickson Art Center, UCLA, Los Angeles, CA 90095-1620 (310-825-9708).

If you are interested in obtaining instructional credentials for California elementary and secondary schools, consult the Graduate School of Education and Information Studies, 1009 Moore Hall (310-825-8328).

Majors and Degrees Offered

Architecture (M. Arch.I, M. Arch.II, M.A., Ph.D.)
Art (B.A., M.A., M.F.A.)
Dance (M.A., M.F.A.)
Dance/Movement Therapy (M.A.)
Design (B.A., M.A., M.F.A.)
Ethnomusicology (B.A., M.A., C.Phil., Ph.D.)
Music (B.A., M.A., M.F.A., M.M., C.Phil., D.M.A., Ph.D.)
World Arts and Cultures (B.A.)

Note: New students are not being admitted to the M.F.A. in Music at this time.

Undergraduate Study

Admission

In addition to the University of California Undergraduate Application, departments in the School of the Arts and Architecture require auditions, portfolios, or evidence of creativity. Detailed information on departmental requirements is mailed to you on receipt of your application. Deadline date for applications is November 30, 1995, for admission in Fall Quarter 1996.

The Study List

Each term the student Study List must include from 12 to 17 units. The school has no provision for part-time enrollment. After your first term, you may petition to carry more than 17 units (up to 20 units maximum) if you have an overall grade-point average of 3.0 (B) or better and have attained at least a B average in the preceding term with all courses passed. The petitions must be filed and approved by the Student Services Office by the end of the fourth week of instruction.

If you have not filed your Study List by the end of the second week of classes, you must obtain the consent of the Student Services Office to continue for that term.

Graduate Courses

Undergraduate students who wish to take courses numbered in the 200 series for credit toward the degree must petition for advance approval of the department chair and the dean of the school and must meet the specific qualifications. Courses numbered in the 400 and 500 series may not be applied toward the degree.

Concurrent Enrollment

Enrollment at another institution or UCLA Extension while enrolled at UCLA is not permitted.

Requirements for Bachelor of Arts Degrees

Each student must meet six kinds of requirements for the B.A. degree: University, school, and unit requirements, as well as residence, major, and scholarship requirements. The requirements are as follows.

University Requirements

For information on the Subject A or English as a Second Language (ESL) and American History and Institutions requirements, see Undergraduate Degree Requirements in the Undergraduate Study section of this catalog.

School of the Arts and Architecture students enrolled in English as a Second Language 33A, 33B, 33C, 35 must take the courses for a letter grade.

School Requirements

The general requirements of the School of the Arts and Architecture must be completed with a grade-point average of 2.0 or better.

General Education (GE) Course Requirements

Reciprocity with Other UC Campuses

Students who transfer to UCLA from other UC campuses and have met all general education requirements prior to enrolling at UCLA are not required to complete the School of the Arts and Architecture general education requirements. Written verification from the college dean at the other UC campus is required. Verification letters should be sent to the Student Services Office, School of the Arts and Architecture, 1100 Dickson Art Center, UCLA, Los Angeles, CA 90095-1620.

Intersegmental General Education Transfer Curriculum (IGETC)

Transfer students from California community colleges have the option to fulfill UCLA's lower division general education requirements by completing the Intersegmental General Education Transfer Curriculum prior to transfer. The curriculum consists of a series of subject areas and types of courses which have been agreed on by the University of California and the California community colleges. The IGETC significantly eases the transfer process, as all of UCLA's general education requirements are fulfilled when you complete it. If you select the IGETC, you must complete it entirely before enrolling at UCLA. Otherwise, you must fulfill the School of the Arts and Architecture general education requirements.

English Composition and Rhetoric

English 3 with a minimum grade of C should be completed by the end of your freshman year and may not be taken on a Passed/Not Passed basis.

Critical Reading and Writing

One course from English 4, Humanities 2A, 2B, or 2C with a minimum grade of C should be completed by the end of your sophomore year and may not be taken on a Passed/Not Passed basis. Humanities 2A, 2B, or 2C may not be applied toward the humanities/literature requirement if taken to meet this requirement.

Foreign Language

You may meet this requirement by (1) scoring 3, 4, or 5 on the Advanced Placement (AP) foreign language examination in French, German, or Spanish, (2) presenting a UCLA foreign language proficiency examination score indicating competency through level three, or (3) completing one college-level foreign language course equivalent to UCLA's level three or above with an average grade of C or better.

International students may petition to use an advanced course in their native language for this requirement. Students whose entire secondary education has been completed in a language other than English may petition to be exempt from the foreign language requirement.

Mathematics

One course (four units) in mathematics or statistics or an introductory course in computers selected from Mathematics 1, 2, 3A, 3B, 3C, 5, 31A, 31B, Program in Computing 1, 10A, 10B, 10C, Statistics 50.

Science

Two courses (eight units) from different departments in physical or biological sciences selected from Anthropology 7, 10, 12, 15, Astronomy 2A, 2B, 3, 3H, 4, 5, 6, 81, 82, Atmospheric Sciences 2, 2E, 3, 3E, 4, 5, 6, 6E, Biology 2, 5L, 6, 10, 12, 13, 21, 25, 30, 40, 50, 70, 80, Chemistry and Biochemistry 2, 11A, 11B, 15, Earth and Space Sciences 1, 2, 5, 8, 9, 15, 16, 17, 20, Geography 1, 2, 5, Microbiology and Molecular Genetics 6, 7, Physics 3A, 3B, 3C, 6A, 6B, 6C, 8A, 8B, 8C, 10, Physiological Science 3, 5, 6, 13, Psychology 15.

Social Sciences

Three courses (12 units), with at least one from each group:

Group A — Economics 1, 2, 5, History 1A, 1B, 1C, 3A through 3D, 4, 5A, 5B, 6A, 6B, 6C, 7A, 7B, 8A, 8B, 8C, 9A through 9D, 10A, 10B, 11A, 11B, 21, Political Science 10, 20, 30, 40, 50.

Group B — Afro-American Studies M5, Anthropology 8, 9, 33, Chicana and Chicano Studies 10B, Geography 3, 4, Psychology 10, Social Sciences 20, Sociology 1, 2, 3, 4, M5, 31, Women's Studies 10.

Humanities

Three courses (12 units), with at least one course in three of the four groups:

Group A — Arts — Art History 50, 51, 54, 55A, 55B, 56A, 56B, 57 (except art and design majors), Classics 42, 51, Ethnomusicology and Systematic Musicology 20A, 20B, 20C, 106A, 106B, 106C, M108A, 108B, M110A, M110B, M111, 113, M115, 117, 118, 120A, 120B, 121, 123, M124, M126, 128, 130, CM132, 136A, 136B, 146, 147, 156A, 156B, 157, 158A, 158B, 158C, 160A, 174 (except music and ethnomusicology majors), Film and Television 106A, 106B, 106C, 107, 108, 110A, 110B, 110C, 112, 113, 114, 116; Music 15, 136A, 136B, 136C, 158 (except music and ethnomusicology majors), Musicology 2A, 2B, 13, 122, 130, 133, 134, 135A, 135B, 135C, 139, 156, 189 (except music and ethnomusicology majors), Theater 101A, 101B, 101C, 102A through 102E, M103A through 103F, 104A, 104B, 104C, 105, 106, 107, 111A, 111B, 111C, World Arts and Cultures 128, 132A, C133, 134, 144, 181A through 181D, 182, 183, CM184, C187 (except world arts and cultures majors).

Group B — Culture and Civilization — Bulgarian 99, Chicana and Chicano Studies 10A, Chinese 50, Classics 10, 20, Folklore and Mythology 15, German 100A, 100B, 100C, Italian 42A, 42B, Japanese 50, Jewish Studies 10, Korean 50, Portuguese M42, M44, Romanian 99, Russian 99A, 99B, Slavic 99, Spanish M42, M44.

Group C — Literature — Classics 40, 41, English 10A, 10B, 10C, 70, 75, 80, 85, 90, 95A, 95B, 95C, 96, French 12, German 50A, 50B, Humanities 1A, 1B, 1C, 1D, 2A, 2B, 2C, Italian 50A, 50B, Portuguese 40A, 40B, Russian 25, Scandinavian 50, Spanish 60A, 60B, 60C, 61A, 61B, 61C, and selected upper division courses in English and in other language and literature departments. Humanities 2A, 2B, or 2C may not be applied toward the critical reading and writing requirement if taken to meet this requirement.

Group D — Philosophy/Religion — Ancient Near East 130, Anthropology 156, Chinese 160, 175, Classics 88A, M145A, M145B, 166A, 166B, East Asian Languages and Cultures 60, Indic 175, Iranian 170, Islamics 110, Japanese 160, 161, 175, Jewish Studies 130, Korean 160, 175, Philosophy 1, 2, 4, 5A, 6, 7, 8, 9, 21, 22, 31, 32.

Additional Upper Division Nonmajor Requirements

In addition to the general education requirements, you are required to take a minimum of 12 units of upper division nonmajor courses. Courses that do not apply on this requirement are studio, performance, activity, independent study, debate, children's theater, creative dramatics, internships, production, workshop, and field studies courses. Consult your school counselor prior to enrolling.

Unit Requirements

You must complete for credit, with a passing grade, no less than 180 units and no more than 208 units, of which at least 64 units must be upper division courses (numbered 100 through 199). No more than 16 units of CED courses and eight units of freshman seminars or 300-level courses may be applied toward the degree. Credit for 199 courses is limited to 16 units, eight of which may be applied to the major. All 199 courses must be taken for a letter grade.

UCLA Extension courses with the prefix X on those numbered in the 1 through 199, 200, 300, 400, or 800 series may not be applied toward the degree.

Credit earned through the College Board Advanced Placement Tests may be applied toward the general education requirements. Portions of Advanced Placement Test credit may be evaluated by corresponding UCLA course numbers (e.g., History 1C). If you take the equivalent UCLA course, unit credit for such duplication is deducted before graduation.

You may petition to be reviewed for a double major on an individual basis. Contact the Student Services Office for an outline of criteria required.

Residence Requirements

You are "in residence" while enrolled and attending classes at UCLA as a major in the School of the Arts and Architecture. Of the last 45 units completed for the bachelor's degree, 35 must be earned in residence in the School of the Arts and Architecture. No more than 18 of the 35 units may be completed in UCLA Summer Sessions.

Courses in UCLA Extension (either class or correspondence) may not be applied toward any part of the residence requirements.

Major Requirements

A major is composed of not less than 14 courses (56 units), including at least nine upper division courses (36 units). All majors include both lower and upper division courses. Those listed under "Preparation for the Major" (lower division) must be completed before upper division major work is undertaken.

You must complete your major with a scholarship average of at least a 2.0 (C) in all courses in order to remain in the major. All courses in your major department must be taken for a letter grade.

As changes in major requirements occur, you are expected to satisfy the new requirements insofar as possible. Hardship cases should be discussed with the departmental adviser,⁴ and petitions for adjustment should be submitted to the dean of the school when necessary.

Any department offering a major in the School of the Arts and Architecture may require a general final examination.

Scholarship and Minimum Progress

A 2.0 (C) average is required in all work attempted at the University of California, exclusive of courses in UCLA Extension and those graded Passed/Not Passed. A C average is also required in all upper division courses in the major taken at the University, as well as in all courses applied toward the general education and University requirements.

Minimum Progress. You are expected to complete satisfactorily at least 36 units during any three consecutive terms in residence; you are placed on probation if you fail to pass these units. You are subject to dismissal if you fail to pass at least 32 units in three consecutive regular terms in residence.

Honors

To receive **Dean's Honors** in the School of the Arts and Architecture, you must have at least 12 graded units per term with a grade-point average of 3.8 for less than 16 units of work (3.7 GPA for 16 or more units). The honor is posted on your transcript for the appropriate term. You are not eligible for Dean's Honors in any given term if you receive an Incomplete or a Not Passed (NP) grade, change a grade, or repeat a course.

Honors at graduation are awarded to students with superior grade-point averages. To be eligible, you must have completed 90 or more units for a letter grade at the University of California. The current levels of honors and the requirements for each level are *cum laude*, an overall average of 3.611; *magna cum laude*, 3.710; *summa cum laude*, 3.805. The minimum GPAs required are subject to change on an annual basis. Required GPAs in effect in your graduating year determine your eligibility.

Counseling and Program Planning

The School of the Arts and Architecture offers advising, program planning in the major and general education requirements, and individual meetings with departmental counselors, including a yearly degree check sent to each student. Prior to registration and enrollment in classes, each new student is assigned to a counselor in the major department. For further counseling information, contact the Student Services Office, School of the Arts and Architecture, 1100 Dickson Art Center (310-206-3564).

Graduate Study

The advanced degree programs offered in the School of the Arts and Architecture provide graduate students with unique research opportunities when combined with special resources, such as the University Research Library, the special collections of the Arts and Music Libraries, and the University's exhibition and performance halls.

The School of the Arts and Architecture cooperates with the UCLA John E. Anderson Graduate School of Management in offering a Master of Business Administration (M.B.A.) in Entertainment Management. Participating students serve term-long internships with such professional arts organizations as the Los Angeles County Museum of Art, the Mark Taper Forum, and the Los Angeles Philharmonic Orchestra.

A program in teaching is offered by the Graduate School of Education and Information Studies in each of the arts areas.

Fellowships, grants, and assistantships are available through the dean of the Graduate Division. The Graduate Affirmative Affairs Office provides counseling, academic support, and financial assistance to ethnic minority students.

Admission

In addition to requiring that applicants hold a bachelor's degree from an accredited U.S. institution or an equivalent degree of professional title from an international institution, each department in the school has limitations and additional requirements. In general, samples of your creative work (auditions, portfolios, computer programs, etc.) are required. Detailed information can be found in the departmental listings in the Curricula and Courses section of this catalog.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

Other Requirements

Requirements to fulfill each degree objective vary according to the degree and the department. See the Curricula and Courses section of this catalog for introductory information and procedures. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

School of Dentistry

Jay A. Gershen, Acting Dean

The UCLA School of Dentistry has developed a national and international reputation for its teaching and research activities. Challenging educational, training, and research programs prepare the dental student for a professional career dedicated to patient treatment and service. The curriculum is carefully designed to prepare students for changes in treatment modalities and health care delivery systems. Students become actively involved in preventive and clinical dental care immediately in their training and soon make valuable contributions to the clinical health team. The clinical instruction system emphasizes a patient care approach in which each patient is treated comprehensively. Students interact with

their colleagues, faculty, and dental auxiliary personnel in much the same way as they later will interact in a private or group practice.

Opportunity exists for dental students to undertake programs designed to meet their special needs; mandatory fourth-year selectives encourage more advanced training in an area of particular interest. In addition to basic and applied research programs within the school, students participate in community service programs such as the Wilson-Jennings-Bloomfield UCLA Venice Dental Center, the Roybal Children's Dental Center, and the Mobile Dental Clinic, the latter in conjunction with the University of Southern California. A graduate program and a number of postdoctoral specialty programs foster new lines of research which lead to better treatment options. An active continuing education program directed by UCLA faculty members provides a variety of short courses for members of the dental profession and their auxiliaries.

The UCLA School of Dentistry, which occupies facilities in the Center for the Health Sciences, offers a D.D.S. (Doctor of Dental Surgery) degree program, a number of postdoctoral programs, and Oral Biology M.S. and Ph.D. degree programs. Articulated D.D.S. and M.S. or certificate programs are also available. This catalog provides detailed information only on the M.S. and Ph.D. programs in Oral Biology, for which admission to the School of Dentistry is not required.

Degrees Offered

Surgery (D.D.S.)

Oral Biology (M.S.)

Pre dental Program

For details on the three-year pre dental curriculum, see the College of Letters and Science later in this section.

D.D.S. Degree Program

The UCLA dental curriculum leading to the degree of Doctor of Dental Surgery (D.D.S.) is based on the quarter system. The course of study usually takes four academic years of approximately nine months each, with three required Summer Quarters between the first/second, second/third, and third/fourth years. The curriculum is designed to provide students with clinical competence and broad experience in all phases of clinical dentistry within the four years.

The dental curriculum consists of three principal areas: basic health sciences courses, didactic dental courses, and clinical experience. The first two years of the curriculum are chiefly devoted to didactic, laboratory, and general clinical coursework. The final two years emphasize training and instruction in the clinical fields, including endodontics, fixed prosthodontics, operative dentistry, oral diagnosis and treatment planning, oral radiology, oral and maxillofacial surgery, anesthesiology, orthodontics, pediatric dentistry, periodontics, and removable prosthodontics.

For further details on the D.D.S. program and a listing of the courses offered, see the *Announcement of the UCLA School of Dentistry*, available from the Office of Student Affairs and Admissions, School of Dentistry, A3-042 Dentistry, UCLA, Los Angeles, CA 90095-1762.

Postdoctoral Programs

The School of Dentistry offers the following opportunities for postdoctoral study: a one-year general practice residency program; a one-year advanced education in general dentistry program; a one-year residency in maxillofacial prosthodontics; a four- or six-year oral and maxillofacial surgery residency training program; a three-year periodontics and combined orthodontic/pediatric dentistry program; two-year programs in the specialties of pediatric dentistry, prosthodontics, endodontics, and orofacial pain and dysfunction; and a 27-month program in orthodontics.

Information on these postdoctoral programs can be obtained by writing directly to Postdoctoral Programs, School of Dentistry, A3-042 Dentistry, UCLA, Los Angeles, CA 90095-1762.

Graduate School of Education and Information Studies

Theodore R. Mitchell, Dean

The UCLA Graduate School of Education and Information Studies (GSEIS) includes two departments — the Department of Education and the Department of Library and Information Science. Together, the two departments embody the school's commitment to understand and improve educational practice, information policy, and information systems in a diverse society. Research and doctoral training programs bring together faculties committed to expanding the range of knowledge in education, information science, and associated disciplines. The professional training programs seek to develop librarians, teachers, and administrators within the enriched context of a research university.

GSEIS is committed to developing expertise in both old and new methods of information storage and retrieval and to bringing innovative approaches in educational technology and information access to the schools and classrooms of the state and nation. In addition, GSEIS faculty members are engaged in research, teaching, and program development in the areas of management and leadership of schools and libraries, information policy formation, and information systems designs in organizations of all kinds.

Through its scholarship, its graduate training programs, and its partnerships with schools and educational professionals, GSEIS honors its commitment to improve practice in schools, universities, and libraries, enhance theoretical and applied research, expand the role of the university in policy creation, and advance the careers of professional leaders and specialists.

Together our commitment is to the highest quality professional education and to the application of research to the challenges facing a diverse and increasingly urbanized world.

The Graduate School of Education and Information Studies (GSEIS) offers programs of study leading to the degrees of M.A. in Education, Master of Education (M.Ed.), Master of Library and Information Science (M.L.I.S.), Doctor of Education (Ed.D.), Ph.D. in Education, Ph.D. in Library and Information Science, and joint Ph.D. in Special Education with California State University, Los Angeles. Several credential programs are available through the Department of Education, and a post-M.L.I.S. certificate program is offered by the Department of Library and Information Science.

Degrees Offered

Education (M.A., M.Ed., Ed.D., Ph.D.)

Library and Information Science (M.S.I.S., Ph.D.)

Special Education (Joint Ph.D. with California State University, Los Angeles)

School of Engineering and Applied Science

A.R. Frank Wazzan, Dean

For 50 years, the UCLA School of Engineering and Applied Science has enjoyed a respected reputation for technological innovation and pursuit of fundamental scientific knowledge. The school has always attracted top faculty, celebrated for distinguished teaching and research, to train and mentor students. The school has strong programs in traditional disciplines, including computer science, electrical engineering, manufacturing, and mechanical engineering, and growing programs exist in evolving fields such as optoelectronics, microsensors, industrial ecology, environmental cleanup and pollution prevention, wireless communications, composites, and new materials development.

As the twenty-first century approaches, the pace of technological development quickens, and engineers need to adapt faster to help meet societal needs and maintain U.S. leadership in the marketplace. Engineers must greatly expand their knowledge in their own disciplines and must be able to work as team members across disciplines to solve increasingly complex problems.

UCLA meets the needs of the marketplace by seeing that laboratory breakthroughs translate into technologies and products. Faculty members engage in mutual collaborations with industry, from applied research to technology goal setting. The school's educational mission nurtures innovation and provides a balanced approach to teaching and research.

Students receive their professional education through classroom investigation and real-world applications. The curriculum includes exposure to the humanities, social sciences, and fine arts and addresses the need to educate men and women about their responsibility to create, protect, and manage technology with due regard for ethics and human values. The challenges and rewards of a career in engineering have never been greater. If you can commit to a high standard of achievement, we invite you not only to join but also to contribute to the great success story of UCLA.

Degrees Offered

Aerospace Engineering (B.S., M.S., Ph.D.)
Chemical Engineering (B.S., M.S., Ph.D.)
Civil Engineering (B.S., M.S., Ph.D.)
Computer Science (B.S., M.S., Ph.D.)
Computer Science and Engineering (B.S.)
Electrical Engineering (B.S., M.S., Ph.D.)
Engineering (M.Engr., Engineer)
Engineering and Applied Science (Graduate Certificate of Specialization)
Manufacturing Engineering (M.S.)
Materials Engineering (B.S.)
Materials Science and Engineering (M.S., Ph.D.)
Mechanical Engineering (B.S., M.S., Ph.D.)
Nuclear Engineering (M.S., Ph.D.)

Undergraduate Study

Students in the School of Engineering and Applied Science (SEAS) may elect one of the eight four-year curricula listed below.

- (1) Bachelor of Science in Aerospace Engineering
- (2) Bachelor of Science in Chemical Engineering
- (3) Bachelor of Science in Civil Engineering

- (4) Bachelor of Science in Computer Science
- (5) Bachelor of Science in Computer Science and Engineering
- (6) Bachelor of Science in Electrical Engineering
- (7) Bachelor of Science in Materials Engineering
- (8) Bachelor of Science in Mechanical Engineering

For the departmental areas of instruction, consult the listings of the individual departments or refer to the *Announcement of the UCLA School of Engineering and Applied Science*, available from the Office of Academic and Student Affairs, 6426 Boelter Hall.

Admission

Applicants for admission to the school must satisfy the general admission requirements of the University as outlined in the section entitled Undergraduate Admission in the Undergraduate Study section of this catalog. You must select a specific major within the school when applying for admission. In the selection process many elements are considered, including grades, test scores, and academic preparation.

Freshman applicants are strongly advised to take the tests required by the University for admission on or before December 2. Reports of test scores are needed to give full consideration to admission requests; ask the testing agencies to send your results directly to the UCLA Undergraduate Admissions Office.

Applicants are encouraged to apply either at the freshman or junior level. Students who begin their college work at a California community college are expected to remain at the community college to complete the lower division requirements in chemistry, mathematics, physics, and the recommended engineering courses before transferring to the University. Experience indicates that transfer students who have completed the recommended lower division program in engineering at California community colleges are able to complete the remaining requirements for one of the B.S. degrees in six terms (two academic years) of normal full-time study. Some students who select certain majors, such as computer science and engineering or chemical engineering, may be required to complete additional lower division courses as prerequisites for the major sequence.

Admission as a Freshman

While many students take their first two years in engineering at a community college, an applicant may qualify for admission to the school in freshman standing. It is anticipated that admission will require that the following subjects be taken when satisfying the University admission requirements:

Algebra 2 years
Plane geometry 1 year
Trigonometry ½ year
Chemistry and physics with laboratory . . . 2 years

Freshman applicants whose entire secondary schooling was outside the U.S. must pass, with satisfactory scores, the Scholastic Assessment Test I: Reasoning Tests (verbal and mathematics sections) and Scholastic Assessment Test II: Subject Tests in Writing, Mathematics, and Physics before a letter of admission to engineering can be issued. Arrangements to take the tests in another country should be made directly with the Educational Testing Service, 1947 Center Street, Berkeley, CA 94704. Test scores should be forwarded to UCLA.

Credit for Advanced Placement Tests

You may fulfill part of the school requirements with credit allowed at the time of admission for College Board Advanced Placement Tests with scores of 5, 4, or 3. Students with Advanced Placement Test credit may exceed the 213-unit maximum by the amount of this credit. Advanced Placement Test credit for freshmen entering in Fall Quarter 1995 fulfills requirements in the School of Engineering and Applied Science as follows:

AP Test	Credit Allowed on School Requirements
Art History	8 lower division units toward humanities
Biology	Biology 2 (4 units) plus 4 lower division units free electives
Chemistry	8 lower division units toward general chemistry
Computer Science (A Test)	2 unassigned lower division computer science units
Computer Science (AB Test)	Computer Science 10C or 11 (4 units)
Note: Four units maximum for both computer science tests.	
Economics, Macroeconomics	Score 3 — 4 lower division units free electives Score 4 or 5 — Economics 2 (4 units)
Economics, Microeconomics	Score 3 — 4 lower division units free electives Score 4 or 5 — Economics 1 (4 units)
English, Composition and Literature	Score 3 — 8 lower division units (4 units humanities, 4 units free electives), Subject A Score 4 — English 3 (4 units), 4 units humanities, Subject A Score 5 — English 3 (4 units), English 4 (4 units), Subject A
English, Language and Composition	Score 3 — 8 lower division units free electives, Subject A Score 4 — English 3 (4 units), 4 lower division units free electives, Subject A Score 5 — English 3 (4 units), English 4 (4 units), Subject A
Note: Eight units maximum for Composition and Literature <i>and</i> for Language and Composition.	
Government and Politics, U.S.	4 lower division units toward social sciences
Government and Politics, Comparative	Political Science 50 (4 units toward social sciences)
History, U.S.	Score 3 — 8 lower division units toward social sciences Score 4 or 5 — History 7A-7B (8 lower division units toward social sciences)
History, European	History 1C (4 units) plus European history (4 lower division units toward social sciences)
French Language,	Score 3 — French 4 (8 units free electives) Score 4 — French 5 (8 units free electives) Score 5 — French 6 (8 units free electives)
Language, German	Score 3 — German 3 (8 units free electives) Score 4 — German 4 (8 units free electives) Score 5 — German 5 (8 units free electives)
Language, Latin (Vergil or Catullus/Horace)	4 units toward humanities
Mathematics (AB Test)	Score 3, 4, or 5 — Mathematics 31A (4 units)
Mathematics (BC Test)	Score 3, 4, or 5 — Mathematics 31A, 31B (8 units)
Note: Students who take both Mathematics examinations receive a maximum of eight units credit. Students who pass the Mathematics AB examination with a score of 3 may still take Mathematics 31A for credit. Students who pass the Mathematics BC examination with a score of 3 may still take Mathematics 31A, 31B, for credit.	
Music Literature	8 units toward fine arts
Music Theory	8 lower division units free electives
Note: If students have credit for both Music Theory <i>and</i> Music Literature, maximum credit is four lower division units for Music Theory and four lower division units for Survey of Music.	
Physics (B Test)	Physics General B — 8 lower division units toward physical sciences (free elective units only)
Physics (C — Mechanics)	Physics General C — 4 lower division units (credit determined on an individual basis)

Physics (C — Electricity and Magnetism) Physics General C — 4 lower division units (credit determined on an individual basis)

Note: If students have credit for Physics B and C — Mechanics or Physics B and C — Electricity and Magnetism or Physics B, C — Mechanics, and C — Electricity and Magnetism, maximum credit is four lower division units for Physics B and four lower division units for Physics C. If students have credit for Physics C — Mechanics and C — Electricity and Magnetism, maximum credit is eight lower division units for Physics C.

Spanish, Language or Literature Score 3 — Spanish 4 (8 units free electives)
Score 4 or 5 — Spanish 5 (8 units free electives)

Some portions of Advanced Placement Test credit are evaluated by corresponding UCLA course number. If you take the equivalent UCLA course, a deduction of UCLA unit credit is made prior to graduation.

If you have completed 36 quarter units at the time of the examination, you will receive no Advanced Placement Test credit.

Admission as a Junior

Applicants for admission to the school in junior standing should have completed 21 to 23 courses (84 to 92 quarter units) in good standing, including the following minimum subject requirements:

(1) Two and one-half courses in chemistry, equivalent to UCLA's Chemistry and Biochemistry 11A, 11B/11BL (only Chemistry and Biochemistry 11A is required for the computer science and engineering degree; the computer science degree does not require chemistry; the chemical engineering curriculum also requires Chemistry and Biochemistry 11C/11CL, 132A, 132B/132BL, which do not need to be taken prior to admission to UCLA); (2) six courses in mathematics, equivalent to UCLA's Mathematics 31A, 31B, 32A, 32B, 33A, 33B; (3) four courses in physics, equivalent to UCLA's Physics 8A, 8B, 8C, 8D (Physics 8D/8DL are not required for the civil engineering, computer science, or computer science and engineering degree), and physics laboratory courses (8AL, 8BL, 8CL, 8DL), depending on curriculum selected.

It is strongly recommended that transfer students complete a course equivalent to UCLA's English 3 in addition to the minimum admissions requirements.

Students transferring to the school from institutions which offer instruction in engineering subjects in the first two years, particularly California community colleges, are given credit for certain engineering core requirements.

Students who have been admitted to senior standing in the school on the basis of credit from another institution, from UCLA Extension, or from another college or school of the University must complete, after admission, eight upper division courses which satisfy part of their approved major field sequence.

Requirements for Bachelor of Science Degrees

The requirements for the Bachelor of Science degrees in Aerospace Engineering, Chemical Engineering, Civil Engineering, Computer Science, Computer Science and Engineering, Electrical Engineering, Materials Engineering, and Mechanical Engineering consist of completing the minimum number of required units (from 180 to 200 units, depending on the curriculum selected), the general University requirements, and the school requirements for scholarship and senior residence. You must also satisfy the curricular requirements for the curriculum you choose to follow.

University Requirements

University requirements in scholarship, Subject A or English as a Second Language (ESL), and American History and Institutions are discussed in detail in Undergraduate Degree Requirements in the Undergraduate Study section of this catalog.

Scholarship and Minimum Progress Requirements

In addition to the University requirement that you must earn at least a C (2.0) average in all courses taken at any University of California campus, at least a 2.0 grade-point average must be achieved in all upper division University courses offered in satisfaction of the subject and elective requirements of the curriculum. A 2.0 minimum grade-point average in upper division mathematics, upper division core courses, and the major field is also required for graduation.

Full-time undergraduate students in the School of Engineering and Applied Science must complete a minimum of 36 units in three consecutive terms in which they are registered.

Senior Residence Requirement

Of the last 48 units completed for the bachelor's degree, 36 must be earned in residence in the School of Engineering and Applied Science on this campus. No more than 16 of the 36 units may be completed in Summer Sessions at UCLA.

Study Lists and Credit Limitations

Study Lists require approval of the dean of the school or a designated representative. It is your responsibility to present Study Lists which reflect satisfactory progress toward the Bachelor of Science degree, according to standards set by the faculty; academic counselors in the Office of Academic and Student Affairs are available to help you. Study Lists or programs of study which do not comply with these standards may result in enforced withdrawal from the University or other academic action. You are expected to enroll in at least 12 units each term. If you enroll in less than 12 units, you must obtain approval by petition to the dean prior to enrollment in courses. The normal program is 16 units per term. You may not enroll in more than 18 units per term unless an Excess Unit Petition is approved in advance by the dean.

You must attain a minimum grade of C to satisfy the English 3 requirement, which must be met before you have completed 90 quarter units (a grade of C - does not satisfy this requirement).

After 213 quarter units, enrollment may not normally be continued in the school. You may petition the dean for special permission to continue work required to complete the degree. This regulation does not apply to Departmental Scholars.

After you have completed 105 quarter units (regardless of where these units have been completed), you will not receive unit credit or subject credit for courses completed at a community college.

Credit earned through the College Level Examination Program (CLEP) may not be applied toward the bachelor's degree.

No credit is granted toward the bachelor's degree for college foreign language courses equivalent to quarter levels one and two if the equivalent of level two of the same language was completed with satisfactory grades in high school.

Credit for Transfer Students

A course in digital computer programming, using a higher-level language such as FORTRAN, PASCAL, or C, satisfies the computer programming requirement. Many sophomore courses in circuit analysis, strength of materials, and properties of materials may satisfy Electrical Engineering 100, Civil and Environmental Engineering 108, and Materials Science and Engineering 14 requirements respectively. Check with the Office of Academic and Student Affairs.

Curricular Requirements

The curricula for the bachelor's degrees include the following categories, depending on curriculum selected:

(1) Twelve to 16 engineering major field courses (48 to 64 units), depending on curriculum followed.

(2) Three to 10 engineering core courses (12 to 40 units), depending on curriculum selected.

(3) Mathematics courses, ranging from four to 12 upper division units; see curricula in individual departments.

(4) SEAS general education (GE) course requirements: (a) English 3, which must be completed with a minimum grade of C within your first 90 units; (b) six courses from the humanities and social sciences, with at least two courses from each category; (c) one life sciences course (this requirement is automatically satisfied for chemical engineering majors).

All lower division courses taken to satisfy items b and c must be selected from the College of Letters and Science GE requirements list. Students interested in taking a foreign language to satisfy this requirement must first consult with an academic counselor in the Office of Academic and Student Affairs.

For item b, at least three courses must be in the same academic department or must otherwise reflect coherence in subject matter. Of the three, at least two must be upper division courses selected from an approved list available in the Office of Academic and Student Affairs.

(5) Free elective courses (four to eight units) may be selected in some programs (see curriculum requirements in individual departments). The free electives may be selected from any courses yielding credit acceptable to the University of California except CLEP and certain remedial courses. However, in programs which include free elective units, it is strongly recommended that you select additional technical courses for some of these units.

(6) The engineering design content of your program must total at least one half-year of design experience.

(7) The engineering science content of your program must include a minimum of one year of engineering science units.

Lists of courses approved to satisfy specific curricular requirements, as well as specifying design and engineering science credit in engineering courses, are available from the Office of Academic and Student Affairs.

The aerospace engineering, chemical engineering, civil engineering, computer science and engineering, electrical engineering, materials engineering, and mechanical engineering curricula are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology (ABET), the nationally recognized accrediting body for engineering programs.

Advising and Program Planning

As a new undergraduate, you must have your course of study approved by an academic counselor. After the first term, curricular and career advising is accomplished on a formal basis. You are assigned a faculty adviser in your particular specialization in your sophomore year or earlier.

In addition you are assigned, by major, to an academic counselor in the Office of Academic and Student Affairs who provides you with advice regarding general requirements for the degrees and University and school regulations and procedures. It is your responsibility to periodically meet with your academic counselor in the Office of Academic and Student Affairs, as well as with your faculty adviser, to discuss curriculum requirements, programs of study, and any other academic matters of concern.

You normally follow the curriculum in effect when you enter the school. California community college transfers may also select the curriculum in the catalog in effect at the time they began their community college work in an engineering program, providing attendance has been continuous since that time.

All SEAS undergraduate students may use the computerized SEAS Academic Program Planner, an interactive self-advising system which informs users immediately if their programs meet the requirements for graduation. Students beginning upper division coursework in the major are required to submit an Academic Program Proposal to the Office of Academic and Student Affairs for approval by the associate dean.

Academic counselors in the Office of Academic and Student Affairs are available to assist you with University procedures and to answer any questions you may have in regard to general requirements. Pay them a visit.

Passed/Not Passed Grading

You may take one course per term on a Passed/ Not Passed basis if you are in good academic standing and are enrolled in at least three and one-half courses (14 units) for the term. Only SEAS general education courses (with the exception of English 3) and free electives may be taken on a Passed/Not Passed basis. For more details on P/NP grading, see Units and Grading Policy in the Academics section of this catalog or consult the Office of Academic and Student Affairs.

Preparation for the Majors

The following lower division courses or their equivalents are required preparation for engineering majors:

Mathematics

Analytic geometry and calculus, 8 units; calculus of several variables, 8 units; matrices and differential equations, 4 units; infinite series, 4 units (total of 24 quarter units minimum).

UCLA equivalent courses: Mathematics 31A, 31B, 32A, 32B, 33A, 33B.

Physics

Calculus-based courses in mechanics of solids, vibration, wave motion, sound, fluids, heat, kinetic theory, electricity, magnetism, electromagnetic waves, light and relativity, with laboratory (total of 16 quarter units minimum).

UCLA equivalent courses: Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL, depending on curriculum selected. Physics 8D/8DL are not required for the civil engineering, computer science, or computer science and engineering degree.

Chemistry

Two quarters or two semesters of general chemistry with laboratory (total of 10 quarter units minimum).

UCLA equivalent courses: Chemistry and Biochemistry 11A, 11B/11BL. Only Chemistry and Biochemistry 11A is required for the computer science and engineering degree; chemistry is not required for the computer science degree. The chemical engineering curriculum also requires Chemistry and Biochemistry 11C/11CL, 132A, 132B/132BL.

Engineering

Digital computer programming, using a higher-level language such as FORTRAN, PASCAL, or C (4 units); other courses: statics, dynamics, graphics and descriptive geometry, surveying, circuit analysis, properties of materials, strength of materials, additional chemistry, additional computer science (total of 24 quarter units minimum).

UCLA equivalent courses: Computer Science 11; Civil and Environmental Engineering 15A and 15B; Electrical Engineering 5C; Mechanical, Aerospace, and Nuclear Engineering 20; engineering core courses; free electives. See specific undergraduate curricula for core courses, SEAS general education (GE) courses, and free electives.

Additional Courses

Life sciences (4 units), English composition (4 units), humanities/social sciences (total of 16 quarter units minimum).

UCLA equivalent courses: SEAS general education (GE) courses.

Honors

Departmental Scholars

If you are an exceptionally promising junior or senior, you may be nominated as a Departmental Scholar to pursue bachelor's and master's degree programs simultaneously. See Academic Excellence in the Undergraduate Study section of this catalog and the *Announcement of the UCLA School of Engineering and Applied Science* for details.

Dean's Honors List

Students following the engineering curricula are eligible to be named to the Dean's Honors List each term. Minimum requirements are a course load of 16 units (12 units of letter grade) with a grade-point average equal to or greater than 3.7.

Honors at Graduation

Students who have achieved scholastic distinction may be awarded the bachelor's degree with honors. To be eligible, you must have completed 90 or more units for a letter grade at the University of California and must have attained an overall grade-point average at graduation which places you in the top five percent of the school (GPA of 3.801 or better) for *summa cum laude*, the next five percent (GPA of 3.704 or better) for *magna cum laude*, and the next 10 percent (GPA of 3.540 or better) for *cum laude*.

Based on grades achieved in upper division courses, engineering students must have a 3.801 grade-point average for *summa cum laude*, a 3.704 for *magna cum laude*, and a 3.540 for *cum laude*. For all designations of honors, you must have a minimum 3.25 grade-point average in your major field courses. To be eligible for an award, you should have completed at least 80 upper division units at the University of California.

Tau Beta Pi

The UCLA chapter of Tau Beta Pi, the national engineering honor society, encourages high scholarship, provides volunteer tutors, and offers many services and programs "to foster a spirit of liberal culture in engineering colleges."

Special Programs and Activities

Extracurricular Activities

The faculty strongly encourages students to participate in the many extracurricular activities available on campus, especially those of most relevance to engineering. Among these are the student engineering society (the Engineering Society, University of California), student publications, and programs of the many technical and professional engineering societies in the Los Angeles area.

The student body takes an active part in shaping policies of the school through elected student representatives on the school's Executive Committee.

Women in Engineering

Women make up approximately 20 percent of the undergraduate and 13 percent of the graduate enrollment in the School of Engineering and Applied Science. Today's opportunities for women in engineering are excellent, as both employers and educators try to change the image of engineering as a "males only" field. Women engineers are in great demand in all fields of engineering.

The Society of Women Engineers (SWE), recognizing that women in engineering are still a minority, has established a UCLA student chapter which sponsors field trips and engineering-related speakers (often professional women) to introduce the various options available to women engineers. The UCLA chapter of SWE, in conjunction with other Los Angeles schools, also publishes an annual résumé book to aid women students in finding jobs and presents a career day for women high school students.

Continuing Education

Continuing education in engineering is developed and administered by the UCLA Extension (UNEX) Department of Engineering, Information Systems, and Technical Management in close cooperation with the School of Engineering and Applied Science. The department offers evening classes, short courses, certificate programs, special events, and education and training at the workplace. The office (515 UNEX, 10995 Le Conte Avenue) is open Monday through Friday. Call (310) 825-4100 for engineering and information systems class programs, (310) 825-3344 for short course programs, (310) 825-0328 for environmental sciences, and (310) 825-3858 for technical management programs. The fax number is (310) 206-2815.

Graduate Study

Admission

In addition to meeting the requirements of the Graduate Division, applicants to the graduate engineering programs are required to take the General Test of the Graduate Record Examination (GRE). In some cases applicants are also required to take the GRE Subject Test in Engineering, Mathematics, or a related area. Applicants for the graduate computer science programs are required to take the GRE General Test and Subject Test in Mathematics or Computer Science. Specific information about the GRE may be obtained from the department of interest.

Students entering the Engineer/Ph.D. program normally are expected to have completed the requirements for the master's degree with at least a 3.25 grade-point average and to have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having an M.S. degree.

Graduate students without adequate preparation may be admitted provisionally and may be required to take additional coursework which may not be applied toward the degree. After you arrive at UCLA, the adviser will help you plan a program which will remedy any such deficiencies.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

Admission forms, including a departmental supplement to the application, may be obtained by writing to the department in which you are interested, School of Engineering and Applied Science, UCLA, Los Angeles, CA 90095.

Undergraduate Courses

No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199, Civil and Environmental Engineering 106A, 108, 199, Computer Science 152A, 152B, 168L, 171L, 199, Electrical Engineering 100, 101, 102, 103, 110L, 199, Materials Science and Engineering 199, Mechanical, Aerospace, and Nuclear Engineering 102, 103, M105A, 105D, 199.

Individual departments within the school may impose certain restrictions on the applicability of other undergraduate courses toward graduate degrees. Consult with your graduate adviser on departmental requirements and restrictions.

Master of Science Degrees

Major Fields or Subdisciplines

The M.S. program is centered around one major field. The major fields and subdisciplines offered at the M.S. level in most cases parallel those listed below for the Ph.D. program. There are some differences (e.g., manufacturing engineering in the Department of Mechanical, Aerospace, and Nuclear Engineering is offered only at the M.S. level). Contact the department concerned regarding possible differences between the M.S. and

Ph.D. fields and subdisciplines. You are free to propose to the school any other field of study, with the support of your adviser.

Course Requirements

A total of nine courses is required for the M.S. degrees, including a minimum of five graduate courses. (Some fields require more than five; obtain specific information from your department of interest.) A majority of the total formal course requirement and of the graduate course requirement must consist of courses in the School of Engineering and Applied Science. In the thesis plan, seven of the nine courses must be formal courses, including at least four from the 200 series. The remaining two courses may be 598 courses involving work on the thesis. In the comprehensive examination plan, at least five of the nine courses must be in the 200 series; the remaining four courses may be either 200-series graduate or upper division undergraduate courses. No 500-series courses may be applied toward the comprehensive examination plan requirements.

Thesis Plan

The thesis must either describe some original piece of research that you have done, usually but not necessarily under the supervision of the thesis committee, or else provide a critical exposition of some topic in your major field of study. You would normally start to plan the thesis at least one year before the award of the M.S. degree is expected. There is no examination under the thesis plan.

Comprehensive Examination Plan

The comprehensive examination, which is offered every term, is required in written form only. Your comprehensive examining committee may conduct an oral query after review of the written examination. In case of failure, you may be reexamined once with the consent of your departmental graduate adviser.

Cooperative Degree Programs

The School of Engineering and Applied Science has established two joint degree programs with other schools and departments on campus which allow you to earn two master's degrees simultaneously: the M.B.A./M.S.-Computer Science and the M.A.-Latin American Studies/M.S.-Engineering. Contact the Office of Academic and Student Affairs for details.

Master of Engineering Degree

The Master of Engineering (M.Engr.) degree is granted to graduates of the Engineering Executive Program, a two-year work-study program consisting of graduate-level professional courses in the management of technological enterprises. For full details, write to the Office of Academic and Student Affairs, School of Engineering and Applied Science, 6426 Boelter Hall, UCLA, Los Angeles, CA 90095-1601, (310) 825-1704.

Engineer Degree

The School of Engineering and Applied Science offers an Engineer (Engr.) degree at a level equivalent to completion of preliminaries in the Ph.D. program. The Engineer degree represents considerable advanced training and competence in the engineering field but does not require the research effort involved in a Ph.D. dissertation.

Requirements for the Engineer degree are identical to those of the Ph.D. degree up to and including the oral preliminary examination, except that the Engineer degree is based on coursework. The minimum requirement is 15 (at least nine graduate) courses beyond the bachelor's degree, with at least six courses in the major field (minimum of four graduate courses) and at least three in each minor field (minimum of two graduate courses in each).

The Ph.D. and Engineer degree programs are administered interchangeably in the sense that a student in the Ph.D. program may exit with an Engineer degree or even pick up the Engineer degree enroute to the Ph.D. degree; similarly, a student in the Engineer degree program may

continue to the Ph.D. after receiving the Engineer degree. The time spent in either of the two programs may also be applied toward the minimum residence requirement and time limitation for the other program.

Doctoral Degrees

Major Fields or Subdisciplines

Chemical Engineering Department — Chemical engineering.

Civil and Environmental Engineering Department — Environmental engineering, geotechnical engineering, structures (structural mechanics and earthquake engineering), water resources engineering.

Computer Science Department — Artificial intelligence, computer network modeling and analysis, computer science theory, computer system architecture, programming languages and systems (software systems), scientific computing (biomedical systems, physical systems).

Electrical Engineering Department — Applied mathematics (established minor field only), applied plasma physics and fusion engineering, communications and telecommunications engineering, control systems, electromagnetics, integrated circuits and systems, operations research, quantum electronics, signal processing, solid-state electronics.

Materials Science and Engineering Department — Ceramics and ceramics processing, materials science, mechanical metallurgy, metallography and metals processing.

Mechanical, Aerospace, and Nuclear Engineering Department — Applied dynamic systems control, applied mathematics (established minor field only), applied plasma physics and fusion engineering, dynamics, fluid mechanics, heat and mass transfer, nuclear science and engineering, structural and solid mechanics.

Schoolwide Fields and Programs — For information regarding biocybernetics and man/machine/environment systems, contact the Office of Academic and Student Affairs, School of Engineering and Applied Science, 6426 Boelter Hall, UCLA, Los Angeles, CA 90095-1601, (310) 825-1704.

You may propose to the school any other field of study with the support of your adviser. Instructions on the definition of acceptable ad hoc fields and procedures for their approval are available in each department office.

All candidates must fulfill the minimum requirements of the Graduate Division. Major and minor fields may have additional course and examination requirements. For further information, contact the individual departments.

Graduate Certificate of Specialization

A certificate of specialization is available in all areas, except computer science, offered by the School of Engineering and Applied Science. Requirements for admission are the same as for the M.S. degree.

Each graduate certificate program consists of five 100- or 200-series courses, at least two of which must be at the graduate level. No work completed for any previously awarded degree or credential may be applied toward the certificate. Successful completion of a certificate program requires an overall minimum B average in all courses applicable to the certificate. In addition, graduate certificate candidates are required to maintain a minimum B average in 200-series courses used in the certificate program. A minimum of three terms of academic residence is required. The time limitation for completing the requirements of a certificate program is two calendar years. Details regarding the certificate programs may be obtained from each department office.

Courses completed for a Certificate of Specialization in the School of Engineering and Applied Science may subsequently be applied toward master's and/or doctoral degrees.

School of Law

Susan Westerberg Prager, Dean

By any standard, the UCLA School of Law is recognized as one of the nation's great law schools. This reputation is based on excellence in scholarship, a rigorous educational program, and the quality of the faculty which includes eminent authorities in all major fields of law.

The educational program at the UCLA School of Law is rigorous and competitive, but it takes place in a humane environment where there is a genuine spirit of community. The student body of the school is intellectually distinguished, interesting, and culturally diverse.

The school's strong clinical program offers courses in lawyering skills such as interviewing, counseling, negotiation, and trial advocacy. UCLA students, alumni, and faculty have collaborated to pioneer clinical legal education. Students see more focus on the attorney/client relationship; they see more of what will ultimately face them as lawyers and policy-makers.

An extensive and diversified student extern program, one of the most highly regarded moot court programs in the nation, and a basic philosophy that teaches law students to think clearly and analytically, but with compassion, all contribute to the distinction of the school.

The School of Law, one of two academic units at UCLA which operate on a semester (rather than quarter) system, offers a three-year curriculum leading to the J.D. degree. The school is accredited by the California Committee of Bar Examiners, is a member of the Association of American Law Schools, and is on the approved list of the American Bar Association. Graduates of the school are qualified to apply for admission to practice in any state in the U.S.

The school is designed to produce lawyers who are well-prepared for the various private and public roles which are assigned to members of the legal profession. Students do not undertake a specific major but have the opportunity to enroll in a wide variety of courses dealing with various legal fields.

Degrees Offered

Juris Doctor (J.D.)

Master of Laws (LL.M.)

Juris Doctor Degree

Admission

Students beginning their professional work are admitted only for the Fall Semester. You must have received a bachelor's degree from a university or college of approved standing before beginning work in the school. You are also required to take the Law School Admission Test (LSAT). The admissions committee considers grades and test scores and, in appropriate cases, such additional factors as ability in languages other than English, work experience or career achievement, previous positions of leadership or other special achievements, ethnic background, prior community or public service, unusual life experiences, overcoming a physical disability or other disadvantage, career goals, economic disadvantages, and any other characteristic which may indicate that you will contribute to the educational and other benefits of a diversified student body.

For detailed information about the academic programs offered by the School of Law, the fees, and the semester-system calendar by which it operates, obtain the *Announcement of the UCLA School of Law* by contacting the Law Admissions Office, School of Law, 71 Dodd Hall, UCLA, Los Angeles, CA 90095-1445.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

Residence and Unit Requirements

Candidates for the degree of Juris Doctor must pursue resident law school study for six semesters and successfully complete 87 units. The residence requirements may be satisfied as follows: (1) six semesters in regular session in this school or (2) two semesters in regular session (or equivalent) in a school which is accredited by the American Bar Association, coupled with four semesters in regular session (or equivalent) in this school.

Every first-year student is required to take the full schedule of required courses; second- and third-year students are required to take a minimum of 12 hours and may not take more than 16 hours each semester. The second- and third-year curriculum is elective, except for a required course in professional responsibility. In addition to the courses in the regular law school curriculum, students may take two courses for credit in other disciplines within the University. Graduate students may enroll in upper division law courses on a limited basis. Law courses are not open to non-UCLA students. Auditing is not permitted.

Attendance and Grades — The right to take examinations and the privilege of continuing as a student in the school are conditioned on regular classroom attendance. Information on the grading system, which is based on a letter-grade scale of A+ to F, may be obtained from the Office of the Assistant Dean for Students. Standards for satisfactory performance and for graduation are prescribed by the faculty and are published separately. They may also be obtained from the above office.

Curriculum

The school offers courses of instruction within the school and supervised educational experiences outside it in an effort to enable its students to think intelligently and to prepare them for careers of practice and public service. To this end the school employs several instructional techniques in a variety of subject areas.

In the first year of their legal education students are exposed to an intensive study of legal reasoning in a series of fields which have historically dominated legal thought. In conjunction with these courses students also receive training in the use of legal bibliography and in effective legal writing and oral advocacy.

In the second and third years students have an opportunity to engage in a number of different fields of law and law-related study.

Concurrent Degree Programs

The School of Law offers three concurrent degree programs which allow you to fulfill the requirements of the J.D. and another graduate degree simultaneously.

Education Program/J.D.

The School of Law and the Department of Education offer a concurrent plan which allows students to design a program of study leading to the J.D. and any advanced degree in education (M.Ed., M.A., Ed.D., or Ph.D.). If the program meets the degree requirements in both areas, students are awarded both degrees on its completion.

M.A. Urban Planning/J.D.

The School of Law and the Department of Urban Planning offer a concurrent plan of study providing an integrated curriculum for students planning to specialize in the legal aspects of urban problems. Education in planning offers an overview of theories and methods that permit identification and treatment of urban problems; education in law offers insight into the institutional causes and possibilities for treatment of these problems. Students pursue studies in both areas and receive both the J.D. and M.A. degrees at the end of four years.

Students interested in the program must apply and be admitted to the School of Law, the Urban Planning Department, and the Graduate Division.

M.B.A./J.D.

The School of Law and the John E. Anderson Graduate School of Management offer a concurrent program which enables students to prepare for careers where law and management overlap and where understanding of both fields is necessary. Examples of such areas would include public service, international trade, industrial relations, corporate law, and specialized areas of management consulting. The program makes it possible to earn the J.D. and M.B.A. in four academic years. Students interested in such a program should apply to both schools simultaneously.

Master of Laws Degree

The school offers a graduate law program leading to the Master of Laws (LL.M.) degree to outstanding international students interested in pursuing graduate studies. Law school graduates with outstanding records who may be interested in this program should contact Rita Saavedra, LL.M. Program, School of Law, 1242 Law, UCLA, Los Angeles, CA 90095-1476, for further information.

Clinical Programs

The UCLA School of Law offers one of the finest clinical education programs in the nation. Housed in a state-of-the-art clinical wing, the program provides extensive and rigorous practical training for student-lawyers prior to entry into the legal profession. Through simulated and actual client contact, students learn skills such as how to interview and counsel clients in litigation and nonlitigation matters, draft legal documents, examine and cross-examine witnesses, resolve legal disputes, and argue to a judge or jury. In the recently established Frank G. Wells Environmental Law Clinic, students derive hands-on experience working on a mixture of large and small cases, both federal and state, involving citizen enforcement actions under various environmental statutes, especially actions under the Clean Water Act against polluters of the Santa Monica Bay.

In community outreach law, students work on a variety of projects that involve them with members of the community. In one project students created a workshop to teach lay people about Proposition 187, the California law now being challenged in federal court which eliminated government benefits for illegal immigrants. Other innovative programs include a mediation clinic working with cases in the municipal courts and a public policy advocacy course that focuses on public interest policy questions.

In addition to the speciality clinics, students can choose from an extensive array of clinical subjects ranging from trial advocacy and alternative dispute resolution to fact investigation and pretrial procedures. Students in most clinical courses work with real clients under close faculty supervision, either at the school's Clinic Law Office or, for some courses, in public interest law settings.

The clinical wing includes a two-story Law Office designed with modern lawyering technology in mind: the student work rooms are equipped with computers that operate on a network, access legal research databases, and use electronic mail.

The School of Law was a pioneer of clinical legal education, and the program continues on the cutting edge of new methods for training lawyers. The program has received the Emil Gumpert Award for Excellence in the Teaching of Trial Advocacy, and clinical faculty members have authored numerous influential texts and articles that are used in clinical courses nationwide.

Extern Program

The school has one of the most extensive, best established, and most diversified student extern programs in the nation. Under supervision of experienced practitioners and judges, students perform legal work in

government law offices, public interest law firms, nonprofit agencies, and the chambers of state and federal judges.

In the semester-long program, students develop their legal skills outside the classroom context, gain practical experience in supervised settings, and acquire perspectives about the lawyering process or the judicial decision-making process. Students regularly report that the program is an excellent educational experience.

College of Letters and Science

Brian P. Copenhaver, Provost

"The Idea of a Multiversity' is a city of infinite variety. Some get lost in the city; some rise to the top within it; most fashion their lives within one of its subcultures. . . . It offers . . . a vast range of choices, enough literally to stagger the mind. In this range of choices . . . (one) encounters the opportunities and the dilemma of freedom."

Clark Kerr, *The Uses of the University*

With over 23,425 students and 800 faculty, UCLA's College of Letters and Science is the largest academic unit in the UC system. Underscoring the "multiversity" concept, its four academic divisions of humanities, physical sciences, social sciences, and life sciences provide the framework for more than 100 majors leading to the Bachelor of Arts or Bachelor of Science as well as to master's and doctoral degrees.

The undergraduate programs in the college stress a "liberal arts education" which brings together perspectives from many fields in a unified approach to learning. Students learn some of the ways issues are analyzed, questions posed, and knowledge organized. After sampling many general subjects, they concentrate on one field or subject and are required to pursue it rigorously and in depth, according to the standards of scholars in the field. When they reach the graduate level, they will pose their own questions, analyze academic issues of their own making and, through their research, participate in the creation of knowledge.

The primary units of the College of Letters and Science are the academic departments which are grouped in four divisions: humanities, life sciences, physical sciences, and social sciences. Each division is headed by a dean who reports directly to the provost.

In addition to departmental advising, the Division of Honors and Undergraduate Programs includes a network of student assistance within its components: College Counseling Service, Honors Programs, and Academic Advancement Program.

Humanities

The division's mission is to promote, through scholarly inquiry and transmission of ideas, sensitive, imaginative, and rigorous reflection on the human condition and to engage in thoughtful reflection on those deep and abiding questions that relate to what it is to be human. Faculty and students reflect on art, literature, philosophy, and other expressions of the human spirit, each of which deepens their understanding. The instructional goal is to engage students in this inquiry — to further their knowledge and competence to express themselves clearly, rigorously, with style and originality.

Programs in the humanities range from teaching the craft of composition in writing programs, to developing an appreciation of profound philosophical thinkers and writers from Asia, the Near East, Europe, England, and America. Pauline R. Yu is the divisional dean.

Life Sciences

Faculty and students in the division play an essential role in unlocking the secrets and mechanisms of life at the most fundamental level. The geography of Southern California is very conducive to life sciences research. An area as ecologically rich and diverse as Southern California is a natural laboratory for environmental physiologists and plant and animal ecologists.

Scientists in biology, microbiology and molecular genetics, and molecular biology conduct research in cell and developmental biology. Neurochemists, neurophysiologists, psychobiologists, and behavior biologists research the underlying mechanism of the neural basis of behavior. Physiological scientists examine the regulation of human movement, neural control of breathing, and environmental conditions such as weightlessness, which affect bone and muscle structure and function. Cognitive scientists are concerned with the nature of knowledge — how people learn, remember, associate, and think, and how computers relate to thought processes. Frederick A. Eiserling is the divisional dean.

Physical Sciences

The division's departments present the results of mankind's efforts to understand the physical aspects of the natural sciences, which include the study and understanding of the properties and characteristics of matter and energy; the science of numbers and order; studies of the origin and structure of the universe, solar system, and Earth; and climatic change. The bases for the physical sciences are the fundamental laws and proof of mathematics, chemistry, and physics. Studies in the physical sciences are experimental, theoretical, and observational.

Faculty and students are interested in such topics as the nature and evolution of the galaxies; ozone depletion; nuclear winter; greenhouse effect; molecular recognition, interactions, design, synthesis, and structure; evolution of life and the continents; computational mathematics and symbolic logic; superconducting materials; plasma fusion, space plasmas; and high-energy accelerator physics. Roberto Peccei is the divisional dean.

Social Sciences

The division's departments are guided by the ideal of creating a deeper understanding of cultures and heritages and helping young people make sense of the rapidly changing world. By studying and comparing diverse cultures with their own, students gain self-knowledge and global awareness.

Anthropology students study human communities and social systems, archaeological records, and artifacts. Communication studies students learn about the mass media of today and their technological advances, social uses, and abuses. Leading economists investigate the applications of economic principles to business decisions. The geographic purview extends from studying the effects of location on human behavior to the Earth's ecosystem. Courses in history bring about understanding of the forces that have shaped the many societies and cultures of this country and the world. Political scientists study the motivations of political behavior and the relations between today's superpowers. UCLA sociologists examine subjects ranging from the everyday interaction of people to the complexities of social organizations. Scott L. Waugh is the divisional dean.

Majors and Degrees Offered

- African Area Studies (M.A.)
- African Languages (B.A.)
- Afro-American Studies (B.A., M.A.)
- American Indian Studies (M.A.)
- American Literature and Culture (B.A.)
- Ancient Near Eastern Civilizations (B.A.)
- Anthropology (B.A., B.S., M.A., Ph.D.)

Applied Linguistics (C.Phil., Ph.D.)
 Applied Mathematics (B.S.)
 Arabic (B.A.)
 Archaeology (M.A., C.Phil., Ph.D.)
 Art History (B.A., M.A., Ph.D.)
 Asian American Studies (B.A., M.A.)
 Astronomy (M.S., M.A.T., Ph.D.)
 Astrophysics (B.S.)
 Atmospheric Sciences (B.S., M.S., C.Phil., Ph.D.)
 Biochemistry (B.S., M.S., C.Phil., Ph.D.)
 Biology (B.S., M.A., C.Phil., Ph.D.)
 Business Economics (B.A.)
 Cell and Molecular Biology (B.S.)
 Chemistry (B.S., M.S., C.Phil., Ph.D.)
 Chemistry/Materials Science (B.S.)
 Chicana and Chicano Studies (B.A.)
 Chinese (B.A.)
 Classical Civilization (B.A.)
 Classics (M.A., C.Phil., Ph.D.)
 Cognitive Science (B.S.)
 Communication Studies (B.A.)
 Comparative Literature (M.A., C.Phil., Ph.D.)
 Cybernetics (B.S.)
 Development Studies (B.A.)
 Earth Sciences (B.A.)
 East Asian Languages and Cultures (M.A., C.Phil., Ph.D.)
 East Asian Studies (B.A.)
 Economics (B.A., M.A., C.Phil., Ph.D.)
 Economics/International Area Studies (B.A.)
 Economics/System Science (B.S.)
 English (B.A., M.A., C.Phil., Ph.D.)
 English/Greek (B.A.)
 English/Latin (B.A.)
 European Studies (B.A.)
 Folklore and Mythology (M.A., Ph.D.)
 French (B.A., M.A., C.Phil., Ph.D.)
 French and Linguistics (B.A.)
 General Chemistry (B.S.)
 General Mathematics (B.S.)
 General Physics (B.A.)
 Geochemistry (M.S., C.Phil., Ph.D.)
 Geography (B.A., M.A., C.Phil., Ph.D.)
 Geography/Environmental Studies (B.A.)
 Geology (B.S., M.S., C.Phil., Ph.D.)
 Geology — Engineering Geology (B.S.)
 Geology — Paleobiology (B.S.)
 Geophysics — Applied Geophysics (B.S.)
 Geophysics and Space Physics (B.S., M.S., Ph.D.)
 German (B.A.)
 Germanic Languages (M.A., C. Phil., Ph.D.)
 Greek (B.A., M.A.)
 Greek and Latin (B.A.)
 Hebrew (B.A.)
 Hispanic Languages and Literatures (C.Phil., Ph.D.)
 History (B.A., M.A., C.Phil., Ph.D.)
 History/Art History (B.A.)
 Indo-European Studies (C.Phil., Ph.D.)
 Iranian Studies (B.A.)
 Islamic Studies (M.A., C.Phil., Ph.D.)
 Italian (B.A., M.A., C.Phil., Ph.D.)
 Italian and Special Fields (B.A.)
 Japanese (B.A.)
 Jewish Studies (B.A.)
 Latin (B.A., M.A.)
 Latin American Studies (B.A., M.A.)
 Linguistics (B.A., M.A., C.Phil., Ph.D.)
 Linguistics and Anthropology (B.A.)
 Linguistics and Computer Science (B.A.)
 Linguistics and East Asian Languages and Cultures (B.A.)
 Linguistics and English (B.A.)
 Linguistics and French (B.A.)
 Linguistics and Italian (B.A.)
 Linguistics and Philosophy (B.A.)
 Linguistics and Psychology (B.A.)
 Linguistics and Scandinavian Languages (B.A.)
 Linguistics and Spanish (B.A.)
 Mathematics (B.S., M.A., M.A.T., C.Phil., Ph.D.)
 Mathematics/Applied Science (B.S.)
 Mathematics of Computation (B.S.)
 Microbiology and Molecular Genetics (B.S., M.A., Ph.D.)
 Molecular Biology (Ph.D.)
 Musicology (B.A., M.A., C.Phil., Ph.D.)
 Near Eastern Languages and Cultures (M.A., C.Phil., Ph.D.)
 Near Eastern Studies (B.A.)
 Neuroscience (B.S.)
 Philosophy (B.A., M.A., C.Phil., Ph.D.)
 Physics (B.S., M.S., M.A.T., Ph.D.)
 Physiological Science (B.S., M.S., Ph.D.)
 Political Science (B.A., M.A., C.Phil., Ph.D.)
 Portuguese (B.A., M.A.)
 Psychobiology (B.S.)
 Psychology (B.A., M.A., C.Phil., Ph.D.)
 Public Administration (M.P.A.)
 Religion, Study of (B.A.)
 Romance Linguistics and Literature (M.A., C.Phil., Ph.D.)
 Russian Language and Literature (B.A.)
 Russian Studies (B.A.)
 Scandinavian (M.A.)
 Scandinavian Languages (B.A.)
 Slavic Languages and Literatures (B.A., M.A., C.Phil., Ph.D.)
 Sociology (B.A., M.A., C.Phil., Ph.D.)
 Spanish (B.A., M.A.)
 Spanish and Linguistics (B.A.)
 Spanish and Portuguese (B.A.)
 Teaching English as a Second Language (M.A.)
 Women's Studies (B.A.)

Undergraduate Study

The degree programs in the College of Letters and Science are designed to expose students to a variety of intellectual challenges by combining a wide distribution of courses and the opportunity to specialize in one particular field. To this end, you are required to select lower division courses that deal with the general foundations of human knowledge. In upper division courses you are relatively free to concentrate attention on one field of interest: your major.

You are expected to select a major by the beginning of your junior year. This may be a program of related upper division courses within a single department (departmental major) or a group of related courses involving

a number of departments (interdepartmental major) or, under certain circumstances, a group of courses selected to meet your special need (individual major). Preparation for a major often requires prior completion of courses known as "requisites."

Counseling Services

The College Counseling Service is located in A316 Murphy Hall. Staff members are specially trained to assist you with questions pertaining to academic regulations and procedures, selection of courses, and the many options and alternatives available to enhance your university education.

Some questions can be answered at the college information window or by calling (310) 825-1965. If you would like to confer with a counselor or counseling assistant (CA) regarding overall degree requirements, academic difficulty, program planning, or assistance in selecting a major, you can arrange an appointment at the information window. Group counseling sessions on a variety of academic issues are offered throughout the year.

For information on the ASK peer counselors, Orientation, and College Tutorial Services, see the Undergraduate Study section of this catalog.

Your Major

Most entering freshmen are unsure about specific academic goals and request to be admitted to the college as "undeclared." These students then explore fields of study by taking introductory courses in the physical and life sciences, social sciences, and humanities in search of an area that most excites their interest.

All students with 90 or more units toward a degree are expected to declare a premajor or a major. When you are ready to do so, obtain approval on a Petition for Declaration of Major from the department or interdepartmental degree committee which governs your intended major.

You can obtain help with your academic planning from a variety of resources, including the College Counseling Service in A316 Murphy Hall (310-825-1687 or 825-1965) and the Placement and Career Planning Center (310-825-2981). In addition, faculty members and counselors in each college department are available to discuss in detail the courses and programs in their respective fields.

Assessing Progress Toward Your Degree

One of your responsibilities as a UCLA student includes a regular monitoring of all requirements necessary for the degree. It is imperative that you read this catalog carefully and consult regularly with the Letters and Science counseling staff for confirmation of the requirements you need. Departmental counselors can advise you regarding progress and completion of your major requirements. It is important that you maintain an accurate assessment of progress toward your degree by utilizing departmental and College Counseling Service resources. To assist you in your degree planning, the College Counseling Service provides computerized Degree Progress Reports (DPRs) on request.

Minimum Progress

UCLA is a full-time institution, and it is expected that students will complete their undergraduate degree requirements promptly. The recommended study load for an undergraduate in the College of Letters and Science is 12 to 16 units per term. Normal progress (toward graduation in four years) may be defined as the completion of 45 units per year.

According to Academic Senate regulations, Letters and Science undergraduates who do not pass at least 36 units during any three consecutive terms will be placed on probation, and students who do not pass at least 32 units during three consecutive terms will be subject to disqualification from registration at the University. Exceptions may be granted by the college due to poor health, family responsibilities, or regular employment of 20 hours per week or more.

Majors

A major in the College of Letters and Science consists of at least nine and no more than 15 upper division courses (between 36 and 60 units). All courses applied toward the major and preparation for the major must be taken for a letter grade unless otherwise stipulated by the department. If you have been away from the University for several terms, you should consult with your major department or curriculum adviser concerning the requirements under which you will graduate.

There are three categories of majors in the College of Letters and Science: departmental majors, interdepartmental majors, and individual majors.

Departmental Majors

A departmental major consists of a group of related upper division courses, of which at least six courses are in one department. These majors are supervised by established campus departments. There are 88 departmental majors currently offered by the college.

Interdepartmental Majors

An interdepartmental major consists of at least 13 related upper division courses, of which no more than eight are in one department. These programs are administered by interdepartmental committees made up of faculty whose membership is determined by research interest, not by departmental affiliation. By cutting across the usual lines of departmental division, a subject area is studied from the perspectives of different disciplines and a greater degree of program flexibility is achieved.

The College of Letters and Science currently offers 25 interdepartmental majors. Although most lead to bachelor's degrees, there are some which lead to graduate degrees only. Check the list of majors and degrees for the programs which interest you.

African Area Studies
 Afro-American Studies
 American Indian Studies
 Applied Linguistics
 Archaeology
 Asian American Studies
 Chemistry/Materials Science
 Communication Studies
 Comparative Literature
 Cybernetics
 Development Studies
 East Asian Studies
 Economics/System Science
 European Studies
 Folklore and Mythology
 History/Art History
 Indo-European Studies
 Islamic Studies
 Latin American Studies
 Molecular Biology
 Near Eastern Studies
 Neuroscience
 Religion, Study of
 Romance Linguistics and Literature
 Women's Studies

You can find a detailed description of each of these majors under their respective heading in the Curricula and Courses section of this catalog.

Individual Majors

If you have some unusual but definite academic interest for which no suitable major is offered at the University and you have completed at least three terms of work (nine courses) at the University with a grade-point average of 3.4 or better, you may plan an individual major. The consent of

the Division of Honors and Undergraduate Programs and the assistance of a faculty adviser are required.

The major should consist of at least 12 and no more than 15 upper division courses, a majority of which are in departments offering a major in the college. A senior thesis is required. The title of the major will be entered in the memoranda column of your official transcript and, at your request, printed on your diploma (up to a maximum of 70 characters). If you do not elect to have the title printed or if it is longer than 70 characters, your diploma will read "Individual Field of Concentration." For further details about individual majors, contact the Honors Programs Office in A311 Murphy Hall (310-825-1553).

Life Sciences Core Curriculum

Students who wish to study life sciences have a choice of six majors, all of which lead to a Bachelor of Science degree: biology, cell and molecular biology, microbiology and molecular genetics, neuroscience, physiological science, and psychobiology. This choice reflects the diversity of undergraduate instruction in life sciences at UCLA. Despite this diversity, all of these majors require a common core of introductory courses which forms the foundation for any study of life sciences and which is required for more advanced courses in each major. The common core includes courses in chemistry, physics, and mathematics, as well as introductory courses in evolution and biodiversity, cellular and organismal biology, molecular biology, and genetics. During the first two years, students may also gain experience in a research laboratory through the Student Research Program. For more information on each major, see the individual departmental listings. For additional information on the life sciences core curriculum, see the website <http://www.lifesci.ucla.edu/score>.

If you are considering one of the life sciences majors, you are encouraged to declare a major as early as possible, even in your first year. In this way, you are identified by the life sciences advising offices and receive important curricular and other information. Because the core curriculum prepares you for any of the six majors, you have the flexibility to switch to another life sciences major at any time during your progression through the core curriculum. Note: The biology and psychobiology majors may require some courses in addition to the life sciences core curriculum as part of the preparation. Consult the course requirements for both majors.

Required: Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 11A, 11B/11BL, 11CL, 132A, 132B/132BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

All core curriculum courses must be passed with a grade of C – or better and must be completed with an overall grade-point average of 2.0 or better. If you receive a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, you are subject to dismissal from the major.

Transfer students with 80 or more units must complete the following courses prior to admission to UCLA: one year of general biology for majors equivalent to Life Sciences 1, 2, and 3; one year of general chemistry with laboratory; one year of calculus; and either one year of calculus-based physics or one year of organic chemistry.

Returning Students and Their Majors

If you return to the University to resume your studies after an absence of several years, you may find your previous major area of study no longer available. You then must select a current major in which to complete your studies. Consult the College Counseling Service for assistance.

Minors

The college is planning to offer minors in the 1995-96 academic year. For information about minors, contact your academic counselor.

Supplemental Programs

You may choose from 12 different programs which are not degree-granting majors, but are sequences of supplemental courses designed to enhance your work in certain areas. Each of these specializations must be taken jointly with an organized departmental or interdepartmental major:

- African Studies
- Asian American Studies
- Business and Administration
- Chicana and Chicano Studies
- Computing, Specialization in (anthropology, cybernetics, economics, geography, linguistics, mathematics, psychology, sociology)
- Diversified Liberal Arts
- Education
- International Relations
- Labor and Workplace Studies
- Organizational Studies
- Urban Studies
- Women's Studies

Detailed descriptions of the programs (except specialization in computing) are given under their respective headings in the Curricula and Courses section of this catalog. For descriptions of the specialization in computing, refer to the majors listed in parentheses above.

Student Research Program

For information on the Student Research Program (SRP), see *Alternative Academics* in the Undergraduate Study section of this catalog.

Double Majors

If you are in good academic standing, you may be permitted to have a double major consisting of departmental majors from two departments within this college. They must both be completed within the maximum limit of 228 units, and you must obtain the approval of both departments.

With few exceptions, double majors in the same department are unacceptable. You must designate one of the two majors as the principal one for the purpose of satisfying general education requirements. No more than five upper division courses may be common to both majors.

Courses outside the division of the principal major which are required in preparation for that major may be used to satisfy general education requirements. Courses required for the secondary major (including preparation for the major) also may satisfy general education requirements.

Changing Your Major

If you are in good academic standing and wish to change your major, you may petition to do so provided you can complete the new major within the 216-unit limit (228 for double majors and special programs). Petitions must be submitted to and approved by the department or committee in charge of the new major. Admission to certain majors may be closed or restricted; changes are normally not permitted if you are on probation or have begun your last term.

If you fail to attain a grade-point average of 2.0 (C) in preparation for the major or major courses, you may be denied the privilege of entering or continuing in that major. Some departments may have higher grade-point requirements for their preparation and major courses; consult the appropriate department regarding minimum standards.

The Study List

The required study load for undergraduate students in the College of Letters and Science is 12 to 16 units (three to four courses) per term. For exceptions, see *Minimum Progress* earlier in this section. Three courses are often recommended for students in the first term of the freshman year. All other students may carry four and one-half courses (18 units) without petition. After the first term, you may petition to enroll in as many as five courses if you attained at least a B average the preceding term in a pro-

gram of at least three graded courses. First-term transfer students from any other campus of the University may carry excess Study Lists on the same basis as students who have completed one or more terms at UCLA; however, they are not encouraged to do so.

Requirements for Bachelor's Degrees

Each student must meet three types of requirements for the Bachelor of Arts or Bachelor of Science degree: University requirements, college requirements, and department requirements (including preparation for the major and major requirements). For details on department requirements, see the department and major of your choice.

Structure of a Degree

Three types of degree requirements are included within the 180-unit minimum/216- or 228-unit maximum limits for the bachelor's degree:

University Requirements

- (1) Subject A or English as a Second Language (ESL)
- (2) American History and Institutions

College Requirements

- (1) English Composition or ESL Composition
- (2) Quantitative Reasoning
- (3) Foreign Language
- (4) General Education Course Requirements

Department Requirements

- (1) Preparation for the Major
- (2) Major Requirements

Electives

The remaining units, defined as electives, are courses which vary according to your interests and goals. When selecting your courses, keep the following degree criteria in mind:

Scholarship

You must attain an overall 2.0 minimum grade-point average in the 180/216 or 228 units required and must satisfy the scholarship requirements of your major department (usually a 2.0 average in the preparation and major courses, but it may be higher in the former, according to departmental requirements).

Academic Residence Requirement

See Academic Residence Requirements below.

Upper Division Unit Requirement

At least 72 units (18 courses) must be upper division (numbered 100-199).

University Requirements

For information on the Subject A or English as a Second Language (ESL) and American History and Institutions requirements, see Undergraduate Degree Requirements in the Undergraduate Study section of this catalog.

College Requirements

The College of Letters and Science has eight requirements which must be satisfied for the award of the degree: unit, major, scholarship, academic residence, English composition, quantitative reasoning, foreign language, and general education course requirements.

Unit Requirements

You must satisfactorily complete for credit a minimum of **180 units** (45 courses) for the bachelor's degree. At least **72 units** (18 courses) of the 180 units must be **upper division (numbered 100-199)**. A maximum of

216 (228 for double majors and special programs) units is allowed. If you have advanced placement (transfer) credit, you may exceed the unit maximum by the amount of that credit.

Scholarship and Major Requirements

You must attain at least a 2.0 (C) grade-point average in all courses undertaken at this University for receipt of the bachelor's degree. You must also attain a 2.0 GPA in a major and satisfy both the course and scholarship requirements of that major (including preparation for the major) in the College of Letters and Science.

Academic Residence Requirements

Sixty-eight of the last 80 units completed for the degree must be earned in residence in the college. **No more than 16 of the 68 units may be completed in UCLA Summer Sessions.** While enrolled in the college you must complete at least 10 upper division courses (40 units), including six courses in the major. These academic residence requirements apply to all students, both continuing and transfer.

English Composition Requirement

Note: You must complete the University's Subject A or English as a Second Language (ESL) requirement prior to completing the college's English Composition requirement.

You may satisfy the English Composition requirement by taking one course from English 3, 4, Humanities 2A, 2B, 2C, 2D. The course must be taken for a letter grade, and you must receive at least a C; a grade of C- is not acceptable. Humanities 2A, 2B, 2C, or 2D may be applied toward the humanities general education requirements; English 3 or 4 may not be applied.

The composition requirement may also be satisfied by scoring 4 or 5 on one of the College Board Advanced Placement Tests in English or by passing the English 3 Proficiency Examination. Students scoring 660 or better on the SAT II Subject Test in Writing are eligible for this proficiency examination.

You must satisfy the composition requirement within your first three terms in residence.

Transfer Students. You may take the English 3 Proficiency Examination (1) if you have completed a transferable English composition course with a Passed grade rather than a letter grade or (2) if you have completed, with a grade of C or better, a college-level English composition course that the Office of Undergraduate Admissions and Relations with Schools does not accept as equivalent to English 3. Like eligible freshmen, you must register for the examination in the Writing Programs Office, 271 Kinsey Hall, before the first day of enrollment for the term.

If you have credit for 90 or more units and have not satisfied the requirement, you are expected to include an acceptable composition course on your Study List during your first term in residence in the college. If you are required to take English 2 to satisfy the Subject A requirement, you should, on completion of that requirement, take an acceptable composition course in your second term in residence.

English as a Second Language (ESL) Students. If your native language is not English, you may satisfy the English Composition requirement by completing English as a Second Language 36 with a grade of C or better (C- or a Passed grade is not acceptable). Admission into course 36 is determined by completion of course 35 with a passing grade or proficiency demonstrated on the English as a Second Language Placement Examination (ESLPE).

Quantitative Reasoning and Foreign Language Requirements

In the College of Letters and Science you must demonstrate basic skills in quantitative reasoning and satisfy the foreign language requirement.

Note: All courses taken to satisfy these requirements must be completed with a grade of Passed or C or better. SAT I and II scores have been converted to a new scale effective April 1995.

Quantitative Reasoning. May be satisfied by achieving an SAT I mathematics score of 600 or better, a mathematics subject test score of 550 or better, or by completing one of the following courses: Anthropology 80; Biostatistics 100A, 100B, 100C, 100D; Computer Science 10C, 10F; Economics 40; Geography 40; Mathematics 1 (recommended only for students continuing into calculus), 2, or any higher numbered course except 38A, 38B, and 104; Philosophy 31; Political Science 6; Program in Computing 10A, 10B, 10C; Sociology 18, 109A; Statistics 50.

Foreign Language. May be satisfied by one of the following methods: (1) completing a college-level foreign language course equivalent to UCLA's level three or above **OR** (2) scoring 3, 4, or 5 on the College Board Advanced Placement (AP) foreign language examination in French, German, or Spanish, thereby earning college credit **OR** (3) presenting a UCLA foreign language departmental examination score indicating competency through level three (consult the *Schedule of Classes* for times and places of these regularly scheduled examinations).

If you wish to demonstrate proficiency in a language which is taught in a UCLA department but for which there is no scheduled examination, contact the appropriate department to arrange for one. If you wish to take an examination in a language not taught at UCLA, contact the College Counseling Service.

The following language courses may be used to fulfill the foreign language requirement:

African Languages (Linguistics) 1A-1B-1C (Swahili); 7A-7B-7C (Zulu); 11A-11B-11C (Yoruba); 31A-31B-31C (Bambara); 41A-41B-41C (Hausa); 51A-51B-51C (Amharic)

Afrikaans (Germanic Languages) 105A, 105B

Ancient Near East (Near Eastern Languages) 120A-120B-120C (Ancient Egyptian); 140A-140B-140C (Sumerian)

Arabic (Near Eastern Languages) 1A-1B-1C

Armenian (Near Eastern Languages) 101A-101B-101C, or 130A-130B and 131A

Berber (Near Eastern Languages) 101A-101B-101C

Bulgarian (Slavic Languages) 103A-103B-103C

Chinese (East Asian Languages) 1, 2, 3

Czech (Slavic Languages) 102A-102B-102C

Dutch (Germanic Languages) 103A-103B, 103C

French 1, 2, 3

German (Germanic Languages) 1, 2, 3

Greek (Classics) 1, 2, 3

Hebrew (Near Eastern Languages) 1A-1B-1C or 10A-10B-10C

Hungarian (Germanic Languages) 101A, 101B, 101C

Indigenous Languages of the Americas (Linguistics) 18A-18B-18C (Quechua)

Iranian (Near Eastern Languages) 1A-1B-1C (Persian)

Italian 1, 2, 3

Japanese (East Asian Languages) 1, 2, 3

Korean (East Asian Languages) 1, 2, 3

Latin (Classics) 1, 2, and 3, or 16 (Summer Sessions course)

Lithuanian (Slavic Languages) 101A-101B-101C

Polish (Slavic Languages) 102A-102B-102C

Portuguese (Spanish and Portuguese) 1, 2, 3

Romanian (Slavic Languages) 101A-101B-101C

Russian (Slavic Languages) 1, 2, and 3, or 11A-13B (two units each)

Scandinavian 1, 2, 3 (Swedish); 11, 12, 13 (Norwegian); 21, 22, 23 (Danish)

Semitics (Near Eastern Languages) 140A-140B, 141 (Akkadian)

Serbo-Croatian (Slavic Languages) 103A-103B-103C

Spanish (Spanish and Portuguese) 1, 2, 3

Turkic Languages (Near Eastern Languages) 101A-101B-101C (Turkish); 111A-111B-111C (Uzbek)

Ukrainian (Slavic Languages) 101A-101B-101C

Yiddish (Germanic Languages) 101A, 101B, 101C

General Education (GE) Course Requirements

The general education requirements of the college are intended to introduce undergraduates to the richness and diversity of the various academic disciplines. Within the four major divisions of the college — humanities, physical sciences, social sciences, and life sciences — you are encouraged to explore the different possibilities for further university study. Whether or not you have a specific educational goal, general education requirements are designed to broaden your intellectual perspective and to set you on the path to becoming an educated member of society.

The set of GE course requirements you will follow are specified on the list labeled Courses to Fulfill GE Requirements. You must earn units in four courses in the humanities (literature, philosophy, language and linguistics, culture and civilization, the arts), three courses in the physical sciences, four in the social sciences (two from historical analysis and two from social analysis), and three courses in the life sciences. In the humanities, at least one course must be from literature and no more than two may be from any single subgroup. In the physical sciences, two courses must be complementary and one must include a laboratory and/or demonstration component. In the life sciences, one course must include a laboratory and/or demonstration component.

All students entering UCLA in Fall Quarter 1995 with 45 or more quarter units are not required to complete the complementary course requirement in physical sciences.

Courses required to satisfy the major or other courses taken in the major department may not be used to satisfy the general education requirements. However, courses outside the major which are required as preparation for a major may be used to satisfy these requirements.

Course Exemptions. Students majoring in the humanities are exempt from two courses, one in their major subgroup and one other humanities course. Students majoring in the physical sciences are exempt from two courses in the physical sciences group. Students in the social sciences are exempt from two courses in the subgroup of their major, and students in life sciences are exempt from two courses in the life sciences grouping. At least 14 courses (12, with exemptions) must be completed.

Course Substitutions. Two lower division seminars which have been approved for GE credit may be substituted for courses on the Courses to Fulfill GE Requirements list. You may make no more than one such substitution per group (humanities, physical sciences, social sciences, life sciences). An annual list of GE seminars is published in the *General Education Handbook*, and descriptions are listed in the quarterly *Schedule of Classes* under Seminars and Special Programs for Undergraduates.

Advanced Placement Credit. For application of advanced placement (AP) credit on the general education requirements, see the Advanced Placement chart or consult the College Counseling Service.

Reciprocity with Other UC Campuses. Students who transfer to UCLA from other UC campuses and have met all general education requirements prior to enrolling at UCLA are not required to complete the college's GE requirements at UCLA. Written verification from the college dean at the other UC campus is required. Consult a Letters and Science counselor regarding your eligibility for this option.

Intersegmental General Education Transfer Curriculum. Transfer students from California community colleges have the option to fulfill UCLA's lower division general education requirements by completing the Intersegmental General Education Transfer Curriculum (IGETC) prior to transfer. The curriculum consists of a series of subject areas and types of courses which have been agreed on by the University of California and the California community colleges. Although general education or

transfer core courses are graduation requirements rather than admission requirements, you are advised to fulfill them prior to transfer. The IGETC significantly eases the transfer process, as all of UCLA's general education requirements are fulfilled when you complete it. If you select the IGETC, you must complete it entirely before enrolling at UCLA. Otherwise, you must fulfill the College of Letters and Science general education requirements.

General Education Groupings by Major

For the purpose of these requirements, departmental and interdepartmental majors are classified in the divisions listed below. Not all courses within a department apply on GE requirements in the division of the major (e.g., psychology is listed as a life science; however, Psychology 10 appears as a social science under social analysis).

(A) Humanities

A1: Literature

- African Languages
- American Literature and Culture
- Arabic
- Chinese
- English
- English/Greek
- English/Latin
- French
- German
- Greek
- Greek and Latin
- Hebrew
- Italian (including Italian and Special Fields)
- Japanese
- Latin
- Portuguese
- Russian Language and Literature
- Scandinavian Languages
- Slavic Languages and Literatures
- Spanish
- Spanish and Portuguese

A2: Philosophy

- Philosophy

A3: Language and Linguistics

- French and Linguistics
- Linguistics (including all Linguistics and special fields majors)
- Spanish and Linguistics

A4: Culture and Civilization

- Ancient Near Eastern Civilizations
- Classical Civilization
- Iranian Studies
- Jewish Studies
- Near Eastern Studies
- Religion, Study of
- Russian Studies

A5: The Arts

- Art History
- Musicology

(B) Physical Sciences

- Applied Mathematics
- Astrophysics
- Atmospheric Sciences

- Biochemistry
- Chemistry
- Chemistry/Materials Science
- Cybernetics
- Earth Sciences
- Economics/System Science
- General Chemistry
- General Mathematics
- General Physics
- Geology (including all specialization options)
- Geophysics (including all specialization options)
- Mathematics
- Mathematics/Applied Science
- Mathematics of Computation
- Physics

(C) Social Sciences

C1: Historical Analysis

- History
- History/Art History

C2: Social Analysis

- Afro-American Studies
- Anthropology
- Asian American Studies
- Chicana and Chicano Studies
- Communication Studies
- Development Studies
- East Asian Studies
- Economics (including all specialization options except Economics/System Science)
- European Studies
- Geography
- Geography/Environmental Studies
- Latin American Studies
- Political Science
- Sociology
- Women's Studies

(D) Life Sciences

- Biology
- Cell and Molecular Biology
- Cognitive Science
- Microbiology and Molecular Genetics
- Neuroscience
- Physiological Science
- Psychobiology
- Psychology

Courses to Fulfill GE Requirements

Courses with an asterisk indicate cross-listed courses which can fulfill GE requirements in only one group.

See Quantitative Reasoning and Foreign Language Requirements sections for courses to fulfill those requirements.

All honors sections of courses listed below also fulfill GE requirements. Inquire at the Honors Programs Office (A311 Murphy Hall) for information on courses which satisfy any of the areas of the general education requirements

(A) Humanities

Four courses, with at least one from Group A1 and no more than two courses from any single subgroup:

(1) Literature**Classics**

- 40. Survey of Greek Literature in Translation
- 41. Survey of Latin Literature in Translation

English

- 10A. English Literature to 1660
- 10B. English Literature, 1660 to 1832
- 70. Major British Authors before 1800
- 75. Major British Authors, 1800 to the Present
- 80. Major American Authors
- 85. The American Novel
- 90. Shakespeare
- 95A. Introduction to Poetry
- 95B. Introduction to Drama
- 95C. Introduction to Fiction
- 96. The Short Story in England and America

French

- 12. Introduction to Study of French Literature (in French)
- 114A, 114B, 114C. Survey of French Literature (in French)

German (Germanic Languages)

- 50A. Masterworks of German Literature in Translation: Medieval Period through Classicism
- 50B. Masterworks of German Literature in Translation: Romanticism to the Present
- 101A. Introduction to German Poetry (in German)
- 101B. Introduction to German Drama (in German)
- 101C. Introduction to German Narrative Prose (in German)

Humanities

- 1A. World Literature: Antiquity to Early Middle Ages
- 1B. World Literature: Late Middle Ages to the 17th Century
- 1C. World Literature: Age of Enlightenment to the 20th Century
- 1D. Great Books from the World at Large
- 2A. Survey of Literature: Antiquity to Early Middle Ages
- 2B. Survey of Literature: Late Middle Ages to the 17th Century
- 2C. Survey of Literature: Age of Enlightenment to the 20th Century
- 2D. Survey of Literature: Great Books from the World at Large

Italian

- 50A. Masterpieces of Italian Literature: From Its Origins to End of the Renaissance
- 50B. Masterpieces of Italian Literature: From the Baroque Period to the Present

Portuguese (Spanish and Portuguese)

- 40A, 40B. Portuguese, Brazilian, and African Literature in Translation
- 46. Brazilian Culture and Civilization
- 120A, 120B. Survey of Portuguese Literature (in Portuguese)
- 130A, 130B. Survey of Brazilian Literature (in Portuguese)

Russian (Slavic Languages)

- 25. The Russian Novel in Translation

Scandinavian

- 50. Introduction to Scandinavian Literature

Spanish (Spanish and Portuguese)

- 60A, 60B, 60C. Hispanic Literatures in Translation
- 88A. Lower Division Seminar: Reaching 2001 (Fantasy of Reality and Reality of Fantasy)

(2) Philosophy**Philosophy**

- 1. Beginnings of Western Philosophy
- 2. Introduction to Philosophy of Religion
- 4. Philosophical Analysis of Contemporary Moral Issues

- 6. Introduction to Political Philosophy
- 7. Introduction to Philosophy of Mind
- 8. Introduction to Philosophy of Science
- 21. Skepticism and Rationality
- 22. Introduction to Ethical Theory

(3) Language and Linguistics**Linguistics**

- 1. Introduction to Study of Language
- 2. Language in the U.S.
- 10. Structure of English Words
- 20. Introduction to Linguistics

Language

Formal University foreign language instruction at level four or higher; no more than one course at level four or higher may be used

Spanish and Portuguese

- M35. Spanish, Portuguese, and Nature of Language

(4) Culture and Civilization**Art History**

- *88A. Lower Division Seminar: Buddha's Life and Teachings in Art, Texts, and Worship

Chicana and Chicano Studies

- 10A. Introduction to Chicano Life and Culture

Chinese (East Asian Languages)

- 50. Chinese Civilization

East Asian Languages and Cultures

- 60. Introduction to Buddhism

Folklore and Mythology

- 15. Introduction to American Folklore Studies

French

- 14. Introduction to French Civilization

German (Germanic Languages)

- 100A. German Civilization and Culture before 1700
- 100B. Modern German Civilization and Culture from 1700 to 1919
- 100C. German Civilization and Culture in the 20th Century

History

- *9A. Introduction to Asian Civilizations: History of India
- *9C. Introduction to Asian Civilizations: History of Japan
- *9D. Introduction to Asian Civilizations: History of the Near and Middle East
- *10A, *10B. Introduction to Civilizations of Africa
- *11A, *11B. History of China

Italian

- 42A. Italian Civilization or Italy through the Ages: From Origins through the Renaissance
- 42B. Italian Civilization or Italy through the Ages: From the Enlightenment to Modern Italy
- 46. Italian Cinema and Culture

Japanese (East Asian Languages)

- 50. Japanese Civilization

Jewish Studies (Near Eastern Languages)

- 10. Social, Cultural, and Religious Institutions of Judaism

Korean (East Asian Languages)

- 50. Korean Civilization

Near Eastern Languages

- 50A. Introduction to Near Eastern Languages and Cultures: Ancient Near East
- 50B. Introduction to Near Eastern Languages and Cultures: Medieval Near East
- 50C. Introduction to Near Eastern Languages and Cultures: Modern Near East

Russian (Slavic Languages)

- 99A. Introduction to Russian Civilization
99B. Russian Civilization in the 20th Century

Slavic (Slavic Languages)

99. Introduction to Slavic Civilization

Spanish and Portuguese

- M42. Civilization of Spain and Portugal
M44. Civilization of Spanish America and Brazil

(5) The Arts**Art History**

50. Ancient Art
51. Medieval Art
54. Modern Art
55A. Africa, Oceania, and Native America
55B. Arts of Pre-Columbian America
56A. Art of India and Southeast Asia
56B. Introduction to Chinese Art
57. Renaissance and Baroque Art
*88A. Lower Division Seminar: Buddha's Life and Teachings in Art, Texts, and Worship

Classics

42. Cinema and the Ancient World

Design

10. Nature of Design

Ethnomusicology and Systematic Musicology

- 20A, 20B, 20C. Musical Cultures of the World
M108A, 108B. Music of Latin America
M110A, M110B. The African American Musical Heritage
113. Music of Brazil
136A, 136B. Music of Africa
147. Survey of Classical Music in India
174. Aesthetics of Music

Film and Television

- 106A. History of the American Motion Picture
106B. History of the European Motion Picture
106C. History of African, Asian, and Latin American Film
108. History of Documentary Film
112. Film and Social Change

Music

15. Art of Listening

Musicology

- 2A, 2B. Introduction to the Literature of Music
13. 20th-Century Music of the Western World
133. Bach
134. Beethoven
135A, 135B, 135C. History of Opera

Theater

- 102E. Theater of Non-European World
104C. History of American Theater: WWI to the Present

World Arts and Cultures

134. History of Dance in Culture and Performance
181A. Dance Cultures of Asia
182. Dance in Africa and the African Diaspora
C187. Dance in Native American Cultures

(B) Physical Sciences

Three courses from the following, two of which must be complementary and one of which must have a laboratory and/or demonstration component:

Astronomy

- 2A, 2B. Introduction to the Physical Universe
3. Astronomy: Nature of the Universe

4. Universe of Stars and Stellar Systems

5. Life in the Universe

6. Cosmology: Our Changing Concepts of the Universe

81. Astrophysics I: Stars and Nebulae

82. Astrophysics II: Stellar Evolution, Galaxies, and Cosmology

- 88A. Lower Division Seminar: Cosmic Evolution

Atmospheric Sciences

- 2, 2E. Air Pollution

- 3, 3E. Introduction to the Atmospheric Environment

4. California Weather and Climate

5. Climates of Other Worlds

- 6, 6E. Climate and Climatic Change

Chemical Engineering

2. Technology and the Environment

Chemistry and Biochemistry

2. Introductory Chemistry

- 11A, 11B. General Chemistry

- 11BL. General Chemistry Laboratory

15. Survey of Organic Chemistry and Biochemistry

- 15L. Laboratory in Elementary Organic Chemistry and Biochemistry

Civil and Environmental Engineering

3. Fundamentals of Environmental Engineering Science

Computer Science

2. Great Ideas In Computer Science

Earth and Space Sciences

1. Introduction to Earth Science

2. Earth History

5. Earth Science and Society: Geological Ecological Interactions

8. Earthquakes

9. Origin and Evolution of Solar System

- *15. Introduction to Oceanography

- *20. Natural History of Southern California

Geography

1. Physical Environment

Mathematics

2. Finite Mathematics

- 3A, 3B. Calculus for Life Sciences Students

5. Calculus for Liberal Arts Students

- 31A, 31B. Calculus and Analytic Geometry

- 31AQ, 31BQ. Calculus and Analytic Geometry with Computer Laboratory

- 31E. Calculus for Economics Students

Mechanical, Aerospace, and Nuclear Engineering

1. Energy: Resources, Conversion, Utilization, and the Environment

2. Toxic Waste Control

Physics

- 3A. General Physics: Mechanics of Solids and Fluids

- 3B. General Physics: Heat, Sound, Electricity and Magnetism

- 3C. General Physics: Light, Relativity, and Modern Physics

- 6A. Physics for Life Sciences Majors: Mechanics

- 6B. Physics for Life Sciences Majors: Electricity and Magnetism

- 6C. Physics for Life Sciences Majors: Light and Modern Physics

- 8A. Physics for Scientists and Engineers: Mechanics

- 8B. Physics for Scientists and Engineers: Waves, Sound, Heat

- 8C. Physics for Scientists and Engineers: Electricity and Magnetism

10. Physics

Complementary courses include Astronomy 2A/2B, 3/4, 3/5, 3/6, 81/82; Atmospheric Sciences 2/3, 2E/3E, 3/4, 3/5, 3/6, 3E/6E, 5/6; Chemistry and Biochemistry 11A/11B, 11A/15; Earth and Space Sciences 1/2, 1/8, 1/9, 1/15, 1/Geography 1; Mathematics 3A/3B, 3A/31B, 3A/31E, 3B/31A, 31A/31B, 31A/31E; Mechanical, Aerospace, and Nuclear Engineering 1/2, 2/Chemistry and Biochemistry 2; Physics 3A/3B, 6A/6B, 6A/8B, 6A/8C, 6B/8A, 8A/8B, 8A/8C.

Courses with a laboratory and/or demonstration component include Astronomy 2A, 2B, 3, 81, 82, Atmospheric Sciences 2, 3, 3E, 6E, Chemistry and Biochemistry 11BL, 15L, Earth and Space Sciences 1, 2, 15, 20, Geography 1, Mathematics 31AQ, 31BQ, Mechanical, Aerospace, and Nuclear Engineering 1, 2, Physics 3A, 3B, 3C, 6A, 6B, 6C, 8A, 8B, 8C, 10.

(C) Social Sciences

Four courses (two each from Groups 1 and 2):

(1) Historical Analysis

Two courses from a single sequence are recommended:

Classics

- 10. Survey of Classical Greek Culture
- 20. Survey of Roman Civilization

History

- 1A, 1B, 1C. Introduction to Western Civilization
- 3A, 3B, 3C. Introduction to History of Science
- 3D. Themes in History of Medicine
- 4. Introduction to History of Religions
- 5A, 5B. Survey of British History
- 6A, 6B, 6C. History of the American Peoples
- 7A, 7B. Survey of Political History of the U.S.
- 8B. Latin America: Reform and Revolution
- 8C. Latin American Social History
- *9A. Introduction to Asian Civilizations: History of India
- *9C. Introduction to Asian Civilizations: History of Japan
- *9D. Introduction to Asian Civilizations: History of the Near and Middle East
- *10A, *10B. Introduction to Civilizations of Africa
- *11A, *11B. History of China
- 21. World History, 1200 to 1800
- 22. Contemporary World History, 1870 to the Present

Political Science

- 10. Introduction to Political Theory

(2) Social Analysis

Afro-American Studies

- M5. Social Organization of Black Communities

American Indian Studies

- 10. Introduction to American Indian Studies

Anthropology

- 8. Archaeology: An Introduction
- 9. Sociocultural Anthropology
- 33. Culture and Communication

Asian American Studies

- 21. Asians and Pacific Islanders in American Society

Biology

- *11. Biomedical Research Issues in Minority Communities

Chicana and Chicano Studies

- 10B. Chicanos in American Society

Communication Studies

- 10. Introduction to Communication Studies

Economics

- 1, 2. Principles of Economics
- 5. Introductory Economics

Geography

- 3. Cultural Geography
- 4. Introduction to Economic Geography

Political Science

- 20. World Politics
- 30. Introduction to Political Economy
- 40. Introduction to American Politics
- 50. Introduction to Comparative Politics

Psychology

- 10. Introductory Psychology
- *88A. Lower Division Seminar: Stress, Adaptation, and Coping

Social Sciences

- 20. Racial Minorities in the U.S.

Sociology

- 1. Introductory Sociology
- 2. Changing Society and Making History
- 3. Sociology of Everyday Life
- 4. Jobs and Careers: Sociological Approach
- M5. Social Organization of Black Communities
- 31. Dilemmas of Third World Development

Women's Studies

- 10. Introduction to Women's Studies: Feminist Perspectives on Women and Society

(D) Life Sciences

Three courses from the following, one of which must have a laboratory and/or demonstration component:

Anthropology

- 7 (Human Evolution) or 12 (Principles of Human Evolution: Comparative Analysis)
- 10. Principles of Human Evolution: Genetic Basis
- 15. Human Biology and Behavior

Biology

- 2. Principles of Modern Biology
- 5L. Organismic and Environmental Biology Laboratory
- 6. Ecology, Evolution, and Behavior
- 10. Plants and Civilization
- *11. Biomedical Research Issues in Minority Communities
- 12. Biodiversity and Extinction: Crisis and Conservation
- 13. Evolution of Life
- 21. Field Biology
- 25. Oceans
- 30. Biology of Cancer
- 40. AIDS and Other Sexually Transmitted Diseases
- 50. Desert Life
- 70. Genetic Engineering and Society
- 80. The Green World: Plant Biology for Now and the Future
- 88E. Lower Division Seminar: Genetics and Society — Current Status and Future Applications
- 88F. Lower Division Seminar: Science and Scientists — Expectations and Realities

Earth and Space Sciences

- *15. Introduction to Oceanography
- 16. Major Events in History of Life
- 17. Dinosaurs and Their Relatives
- *20. Natural History of Southern California

Geography

- 2. Biogeography
- 5. People and the Earth's Ecosystems

Life Sciences

- 1. Evolution, Ecology, and Biodiversity
- 2. Cells, Tissues, and Organs
- 3. Introduction to Molecular Biology
- 4. Genetics

Microbiology and Molecular Genetics

- 6. Introduction to Microbiology
- 7. Developments in Biotechnology

Physiological Science

- 3. Introduction to Human Physiology
- 5. Issues in Human Physiology: Diet and Exercise

6. The Human Machine: Physiological Processes

13. Introduction to Human Anatomy

Psychology

15. Introductory Psychobiology

*88A. Lower Division Seminar: Stress, Adaptation, and Coping

Courses with a laboratory and/or demonstration component include Biology 2, 5L, 6, 10, 21, 50, 80, Earth and Space Sciences 15, 16, 17, 20, Geography 2, 5, Physiological Science 3, 5, 13.

Credit Limitations

Transfer students with credit from other institutions (advanced standing credit) receive a Degree Progress Report (DPR) from the Office of Undergraduate Admissions and Relations with Schools indicating the transferable units from their former institution(s); however, the following credit limitations may reduce the total number of transferred units which will apply toward the degree in the College of Letters and Science. Consult with a counselor in the College Counseling Service regarding these limitations.

The following credit limitations apply for all students enrolled in the college. In most cases units are not deducted until the final term before graduation. Consult a counselor in the College Counseling Service if you have questions.

Subject A

If you do not satisfy the Subject A requirement prior to enrolling at UC, you must pass an approved course or other program prescribed by your UC campus of residence. Only after satisfying the Subject A requirement can you take for transfer credit an English composition course *after* enrolling at UCLA. Consult a college counselor regarding Subject A equivalent courses from other UC campuses.

Community College

After completing 105 quarter units (26¼ courses) toward the degree in all institutions attended, you are allowed no further unit credit for courses completed at a community college.

Physical Education

No more than four units in physical education activities courses may be applied toward the bachelor's degree.

300- and 400-Level Courses

No more than two courses (eight units) in the 300 and 400 series of courses may be applied toward the bachelor's degree. Credit is not granted for X300 and X400 courses taken in UCLA Extension.

Performance Courses

No more than 12 units of music and/or dance performance courses (Ethnomusicology and Systematic Musicology 91A-91Z, Music 90A through 90N, and World Arts and Cultures 71B through 79Z, C171B through C179Z) may be applied toward the bachelor's degree whether taken at UCLA or another institution.

Foreign Language

Credit will not be allowed for completing a less advanced course in grammar and/or composition after you have completed a more advanced course. College credit for an international student's native language and literature is allowed for (1) courses taken in native colleges and universities or (2) upper division (advanced language courses only) and graduate courses taken at the University of California or another English-speaking institution of approved standing (no credit is allowed for lower division courses).

College Level Examination Programs

Credit earned through the College Level Examination Program (CLEP) and through the California State University English Equivalency Examination may not be applied toward the bachelor's degree.

Advanced Placement (AP) Tests

Advanced Placement (AP) Test credit may not be applied toward a degree unless you had less than 36 units of credit at the time of the examination(s). See the chart, "Credit for Advanced Placement Tests," for UCLA course equivalents and credit allowed for general education requirements.

ROTC Courses

For students contracted in the Aerospace Studies Department, 36 units of aerospace studies credit may be applied toward the requirements for the bachelor's degree; for students contracted in the Military Science Department, 26 units of military science credit may be applied; for students contracted in the Naval Science Department, 26 units of naval science credit may be applied.

Independent Study Courses

No more than two courses (eight units) of credit may be taken per term in special independent study courses. The total number of units allowed in such courses for a letter grade is 16; see specific restrictions under each departmental listing.

Physics 3A, 6A, 8A, 10

Any two or more courses from Physics 3A, 6A, 8A, and 10 are limited to a total of six units of credit.

Statistics

No credit is allowed for more than one lower division course in statistics (Anthropology 80, Economics 40, Geography 40, Political Science 6, Psychology 41, Sociology 18, Statistics 50) or for more than one sequence of such courses whether taken at UCLA or another institution.

Education Abroad Program

Students participating in the Education Abroad Program may receive a maximum of 48 units of credit toward the degree in addition to the eight units maximum allowable for the Intensive Language Program.

Credit by Examination

Within the College of Letters and Science, eligibility for credit by examination is usually limited to students who have been approved as Departmental Scholars or who are admitted to a departmental honors program or UCLA Honors Programs.

You may petition for credit by examination for one course at a time. The examination for that course must be taken successfully before you may petition for credit by examination in another course. Petitions for credit by examination (with fee) are available only through an appointment with a counselor in the Honors Programs Office, A311 Murphy Hall. Approval is given or withheld by the dean of the Division of Honors and Undergraduate Programs who may limit the number of such petitions you present.

Honors**College Honors**

College Honors is the highest academic recognition the College of Letters and Science confers on its undergraduates. The College Honors program provides the exceptional Letters and Science undergraduate an opportunity to pursue individual excellence.

College Honors is awarded to graduating seniors with an overall University of California grade-point average of 3.5 or better who have completed either 44 units of honors coursework or 36 units of honors coursework that include a senior research project/thesis based on original research. With the assistance of Honors Programs counselors, you integrate this coursework throughout your undergraduate education with other University, college, and major requirements for the bachelor's degree.

Credit for Advanced Placement Tests

Advanced Placement Test	UCLA Course Equivalents	Credit Allowed on GE Requirements
Art History	8 units	No application for art

Note: All UCLA course equivalents consist of lower division advanced placement units. You may not repeat for units or grade points any AP Test credit that has been given UCLA course number equivalency (e.g., History 7A-7B.)

gree. In this way, these units need not be above and beyond your other academic commitments.

Students in the College Honors program are entitled to specialized counseling within the division, some preferential pre-enrollment in classes each term, access to specially designed honors classes, eligibility for unique scholarships and research stipends, counseling on graduate and pre-professional programs, graduate library privileges, and a filing and mailing service for letters of recommendation. Incoming freshmen who are eligible for College Honors based on SAT scores and GPA and who file their housing application on time are also offered preferred on-campus student housing for the first year.

To qualify for College Honors, entering freshmen must (1) have an overall GPA of 3.85 or better and an SAT score of 1,300 or better (on one test date) or an ACT score of 31 or better or (2) graduate in the top three percent of their high school class or (3) qualify through the Honors Programs Educational Enhancement Program (see below). Certain entering transfer students may be admitted with a transfer GPA of 3.85 (or 3.5 if transferring from another UC campus or a college in the Transfer Alliance Program). Continuing UCLA and transfer students with at least 12 or more graded units at UCLA and a cumulative UC GPA of 3.5 or better who can complete the honors course requirements prior to graduation are encouraged to participate, as are both regularly qualified and potentially successful underrepresented minority students.

The Educational Enhancement Program offers low-income, minority, disabled, and other nontraditional students who might not otherwise be able to participate an opportunity to qualify for UCLA's College Honors program. Contact the Honors Programs Office for more information.

You may apply for admission to College Honors at A311 Murphy Hall. For further information, attend one of the group meetings offered regularly by the Honors Programs Office.

Honors at Graduation

Students who have achieved scholastic distinction may be awarded the bachelor's degree with honors. To be eligible, you must have completed 90 or more units for a letter grade at the University of California and must have attained an overall grade-point average at graduation which places you in the top five percent of College of Letters and Science graduates (GPA of 3.787 or better) for *summa cum laude*, the next five percent (GPA of 3.685 or better) for *magna cum laude*, and the next 10 percent (GPA of 3.526 or better) for *cum laude*. Coursework taken on the Education Abroad Program is applied toward honors at graduation. **The minimum GPAs required are subject to change on an annual basis.** Required GPAs in effect in your graduating year (fall, winter, spring, summer) determine your eligibility. Consult your graduation-year catalog for the requirements that apply to you.

Dean's Honors List

The Dean's Honors List recognizes high scholastic achievement in any one term. The following criteria are used to note Dean's Honors List on the student records: (1) a 3.75 GPA in any one term with at least 12 graded units and no grade of NP or I or (2) a 3.66 GPA and at least 56 grade points during the term, with no grade of NP or I. Dean's Honors List is automatically recorded on your transcript.

Departmental Scholar Program

Departments may nominate exceptionally promising undergraduate students (juniors and seniors) as UCLA Departmental Scholars to pursue bachelor's and master's degrees simultaneously.

Qualifications include completion of 24 courses (96 quarter units) at UCLA or the equivalent at a similar institution, the requirements in preparation for the major, and eligibility to participate in your college/school honors program. You must also have at least one term's coursework remaining at UCLA. To obtain both the bachelor's and master's degrees you must be provisionally admitted to the Graduate Division, fulfill requirements for each program, and maintain a minimum B average. No

course may be used to fulfill requirements for both degrees. If you are interested in becoming a Departmental Scholar, consult your department well in advance of application dates for graduate admission (see the Calendar at the beginning of this catalog). For further information, consult the Honors Programs Office.

Honors Collegium

The Honors Collegium is a unique and innovative educational alternative of seminars and courses designed primarily for students in their freshman and sophomore years. Some upper division courses are also offered. Refer to Honors Collegium later in this section for a complete description of the program.

Honors Programs Office

The Honors Programs Office, located in A311 Murphy Hall (310-825-1553, 825-3786), provides academic counseling and services for College Honors students, Departmental Scholars, Education Abroad Program students, and students pursuing individual majors. The division also provides counseling for Regents Scholars, National Merit Scholars, and Alumni Scholars during their first year of attendance. Services offered include academic counseling, degree checks, assistance with petitions and, for College Honors students only, letters describing the program to graduate and professional schools.

A variety of scholarships and awards for qualified continuing students and graduating seniors is also available.

In addition, the Honors Programs Office administers Phi Beta Kappa (national honor society).

Preparing for a Professional School

The programs that follow are not degree programs in the College of Letters and Science. The purpose of each grouping of courses is to assist you if you plan to apply to a professional school at the end of your sophomore (90 units) or junior (135 units) year.

If you are not accepted by a professional school or plan to receive your degree before entering, you must declare a major in the College of Letters and Science and complete the requirements for a degree without exceeding 216 units.

New students entering these curricula are listed as "undeclared" majors and are advised in the college unless an adviser is named below in the presentation of the curriculum.

Preprofessional Advising Office

Information and counseling on preparing for professional schools and assistance in filing applications and preparing for interviews are available through the Preprofessional Advising Office, A266 Murphy Hall. Workshops, drop-in counseling, reference letter services, and MCAT, DAT, AMCAS, LSAT, GRE, GMAT, and other applications are available. For more information, call (310) 825-1817.

Predental Curriculum: Three Years

The College of Letters and Science offers a predental curriculum designed to fulfill the basic educational requirements for admission to several dental schools and the general educational requirements of the College of Letters and Science. You should determine and satisfy the specific requirements of the dental schools to which you expect to apply.

To be adequately prepared for the predental curriculum, you should take the following subjects in high school: English, history, mathematics (algebra, geometry, and trigonometry), chemistry, physics, and foreign language.

The 135 quarter units of work required for admission to the UCLA School of Dentistry in this curriculum include the following:

General University Requirements: (1) Subject A; (2) American History and Institutions.

Specific UCLA School of Dentistry Requirements: (1) Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL, 132A, 132B/132BL, 153A, 153L; (2) English 3, 4; (3) Life Sciences 1, 2, 3, 4, and two biology courses with laboratory; (4) Physics 3A, 3B, and 3C, or 6A, 6B, and 6C, or 8A, 8B, and 8C; (5) Psychology 10.

Social sciences and humanities courses such as anthropology, history, economics, psychology, political science, appreciation of art and/or music, and philosophy should also be included.

For further information, consult *Admissions Requirements of U.S. and Canadian Dental Schools*, AADS, 1625 Massachusetts Avenue NW, Suite 101, Washington, DC 20036. Sample copies of the Dental Admission Test (DAT) are available in the Preprofessional Advising Office (310-825-1817).

Predental Hygiene Curriculum: Two Years

The University offers a four-year program in dental hygiene leading to the degree of Bachelor of Science. The first two years may be taken at Los Angeles; the last two years must be taken at the School of Dentistry at the University of California, San Francisco.

Admission to UCSF is by competitive application. The UCSF School of Dentistry reserves the right to limit enrollment if applications exceed available facilities and to require interviews and aptitude tests if they are necessary in the selection of the class. For further information, see the *Announcement of the School of Dentistry, UC San Francisco*.

The 90 quarter units of work required for admission to the School of Dentistry at UCSF include specific requirements as follows (the courses referred to are UCLA courses which fulfill the requirements):

Curriculum Requirements: (1) Subject A; (2) American History and Institutions (the examination in American History and Institutions may be taken at the UCSF School of Dentistry, but it is preferable to satisfy the requirements in the predental program); (3) Chemistry and Biochemistry 11A, 11B/11BL, 132A, 132B/132BL, 153A, 153L; (4) one year of English which includes English 3; (5) Life Sciences 1, 2, 3, 4; (6) Psychology 10 and one additional psychology course; (7) 16 units in social sciences and humanities, including foreign language (one course in speech and one in sociology are required). Courses in anatomy and physiology are strongly recommended. For more information, call the Preprofessional Advising Office at (310) 825-1817.

Premedical Studies: Four Years

If you intend to apply for admission to a medical school and wish to complete the requirements for a bachelor's degree before such admission, you should select a major within the College of Letters and Science. *Medical schools have no preference as to major. You should choose the major in which you are most interested and can do best.* In addition to fulfilling the requirements of the selected major, you should satisfy the specific requirements for medical schools to which you expect to apply.

High school preparation for premedical studies at the University should include English, three units; U.S. history, one unit; mathematics, three and one-half units; chemistry, one unit; physics, one unit; biology, one unit; foreign language (preferably French, German, or Spanish), two units. It is desirable that a course in freehand drawing be taken in high school.

The following courses are usually required for admission to the UCLA School of Medicine: (1) two years of college biology to include the study of organismic, cellular, molecular, developmental, and genetic biology, including at least one year of laboratory courses and one year of upper division courses (Life Sciences 1, 2, 3, and 4, plus additional life sciences courses to meet the general and laboratory coursework requirements); (2) Chemistry and Biochemistry 11A, 11B/11BL, 11CL, 132A, 132B/132BL, 153A, 153L; (3) 12 quarter units of English, including at least one course in English composition; (4) Physics 3A, 3B, and 3C, or 6A, 6B, and 6C, or 8A, 8B, and 8C. Courses in physical chemistry and calculus are strongly recommended. Course requirements for admission to other University of California medical schools vary slightly.

Because requirements for admission to medical schools outside the University of California also vary somewhat, you should consult the following publications: *Medical School Admission Requirements, U.S. and Canada*, Association of American Medical Colleges, 2450 N Street NW, Washington, DC 20037-1126; *The Education of Osteopathic Physicians*, AACOM, 6110 Executive Boulevard, Suite 405, Rockville, MD 20852; and *The New MCAT Student Manual* (also an AAMC publication available at the above AAMC address). For more information, call the Preprofessional Advising Office at (310) 825-1817.

Pre nursing Curriculum: Two Years

Note: The School of Nursing is suspending admissions to the undergraduate program for the 1996-97 academic year.

The University offers a four-year course of study leading to the Bachelor of Science degree in Nursing. The pre nursing curriculum in the College of Letters and Science is designed to prepare you for the program in the UCLA School of Nursing. You should apply to the School of Nursing when you have completed or have in progress 84 quarter credits, including the pre nursing courses listed below with grades of C or better, and a cumulative grade-point average of at least 2.8. Since you must apply during the Fall Quarter of the year prior to the year in which you wish to be enrolled, you must present your proposed curriculum for the remaining terms.

Because enrollment in the UCLA School of Nursing is limited, you should become familiar with the admission requirements as early as possible. Attend **open counseling sessions** in the UCLA School of Nursing (times are posted in the Office of Student Affairs, 2-200 Factor Building, 310-825-7181) and those given by the Preprofessional Advising Office (posted outside A266 Murphy Hall, 310-825-1817).

New students admitted to the college in this curriculum should declare pre nursing as their major. Weekly open counseling sessions are available through the College of Letters and Science. Students in the college who do not transfer to the UCLA School of Nursing must declare a major and be able to complete all degree requirements within 216 units.

Pre nursing Requirements for the UCLA School of Nursing: (1) Anthropology 9; (2) Chemistry and Biochemistry 11A, 11B/11BL, 11CL, 132A; (3) Community Health Sciences 130; (4) English 3; (5) Life Sciences 2, 3; (6) Microbiology and Molecular Genetics 6 or 10 or 101; (7) Physics 10 or one year of high school physics; (8) Physiological Science 13; (9) Psychology 10; (10) Sociology 1; (11) one four-unit humanities course from literature, philosophy, language and linguistics, culture and civilization, or the arts; (12) recommended electives in the social and life sciences. Life Sciences 4 is highly recommended. All required pre nursing courses must be completed for a letter grade.

Preoptometry Curriculum: Three Years

A three-year program designed to prepare you for admission to optometric schools may be completed in the College of Letters and Science. If you are planning to transfer to the School of Optometry at Berkeley, you should contact Assistant Dean Carter of the School of Optometry, University of California, Berkeley, CA 94720, (510) 642-9537, as early in your preprofessional studies as possible.

You will be adequately prepared for preoptometric studies if you have taken the following subjects in high school: English, history, mathematics (algebra, geometry, and trigonometry), chemistry, physics, and two years of one foreign language.

The 135 quarter units of work required for admission to the School of Optometry, UC Berkeley, include the following: (1) Subject A; (2) American History and Institutions.

Specific UC Berkeley School of Optometry Requirements: (1) Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL, 132A, 132B; (2) English 3, and 4 or 100; (3) Life Sciences 1, 3; (4) Mathematics 1, 3A, and 3B, or 3A, 3B, and 3C, or 31A, 31B, and Statistics 50 or Psychology 41; (5) Microbiology and Molecular Genetics 6 or 101; (6) Physics 3A, 3B, and 3C, or 6A, 6B, and 6C, or 8A, 8B, and 8C; (7) introductory anat-

omy (Physiological Science 13) and physiology (Biology 166); ¶(8) Psychology 10. Recommended: neuroanatomy, cell physiology, or additional statistics courses.

The balance of the 135 quarter units required for admission may be selected from social sciences, foreign languages, and humanities.

For further information, obtain the booklet *Information for Applicants to Schools and Colleges of Optometry* from the American Optometric Association, 243 Lindbergh Boulevard, St. Louis, MO 63141, or call the Preprofessional Advising Office at (310) 825-1817.

Prepharmacy Curriculum: Two Years

The School of Pharmacy on the San Francisco campus of the University offers a four-year curriculum leading to the degree of Doctor of Pharmacy. To be admitted to this curriculum you must have met all requirements for admission to the University and have completed, with an average grade of C (2.0) or better, at least 90 quarter units of the program below. Students taking prepharmacy work at the University of California are normally enrolled in the College of Letters and Science. If taken elsewhere, the courses elected must be equivalent to those offered at the University. To complete prepharmacy studies in the minimum time, you should take elementary chemistry, trigonometry, and a full year of intermediate algebra in high school.

Students who have completed the prepharmacy curriculum at Los Angeles cannot be assured of admission to the School of Pharmacy on the San Francisco campus. A personal interview may be required. Applicants should contact the school in early fall of the year preceding the September of proposed admission. Contact the Office of Student Affairs, School of Pharmacy. Applications may be obtained from the office of the Director of Admissions, University of California Medical Center, San Francisco, CA 94143-0446, (510) 476-2732. For further information, see the *Announcement of the School of Pharmacy, UC San Francisco*, which may be obtained from the Dean, School of Pharmacy, University of California Medical Center, San Francisco, CA 94143-0446.

Curriculum Requirements: (1) Subject A; (2) American History and Institutions; (3) Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL, 132A, 132B/132BL; (4) English 3, 4; (5) Life Sciences 1, 2, 3; (6) intermediate algebra and trigonometry (if not completed in high school), Mathematics 3A and 3B, or 31A and 31B; (7) Physics 3A and 3B, or 6A and 6B, or 8A and 8C/8CL; (8) 28 quarter units of electives selected from courses in foreign language, social sciences, and humanities.

For further information, call the Preprofessional Advising Office at (310) 825-1817.

Prephysical Therapy Curriculum: Three or Four Years

Students who intend to apply for admission to a physical therapy school should select a major (physiological science and psychology are commonly selected) and complete the following prerequisite courses: (1) Chemistry and Biochemistry 11A, 11B/11BL, 11CL, 15, 15L; (2) Life Sciences 1, 2, 3; (3) Physics 3A, 3B, 3C; (4) introductory anatomy (Physiological Science 13) and physiology (Biology 166); (5) Psychology 10, 115, 127, 130; (6) one course in statistics and one in computing. The prerequisite courses should be taken for a letter grade; GPAs for these courses should not be lower than 3.0, with no grade lower than a C.

You should write to schools with physical therapy programs early in your sophomore year for specific admission requirements and application deadlines. Information concerning in-state and out-of-state programs may be obtained from the American Physical Therapy Association, 1156 15th Street NW, Washington, DC 20005, and the Preprofessional Advising Office (310-825-1817).

Prepublic Health Studies

The professional and academic fields of public health need individuals from many disciplines. Candidates for graduate study may come from a wide variety of academic backgrounds and training, including mathemat-

ics and the physical, biological, and social sciences. Preparation typically includes a minimum of two courses each in mathematics, biological sciences, and social sciences, and one course in physical sciences.

Interested students and those who wish to apply to the UCLA School of Public Health should review the school's announcement booklet for additional requirements or recommendations for entry into the various programs of study. Information is available at the Preprofessional Advising Office (310-825-1817).

Prerespiratory Therapy Curriculum: One Year

Santa Monica College (SMC) and the UCLA Medical Center offer a two-year program in respiratory therapy accredited by the American Medical Association (AMA) through which you may obtain a Certificate of Completion.

The first year of the curriculum may be taken at UCLA or any other two- or four-year college/university. Many UCLA students opt to incorporate the first-year respiratory therapy curriculum into their UCLA science or premedical B.S./B.A. degree prerequisites and, after completing their UCLA degree, enter the second year at the SMC/UCLA Medical Center School of Respiratory Therapy. The only first-year course that must be taken at Santa Monica College is an introductory course on respiratory therapy as a profession (Respiratory Therapy 1).

The second year of the program (the formal respiratory therapy curriculum) is taken through Santa Monica College. It is a lecture, laboratory, and clinical program conducted at the UCLA Medical Center, beginning with summer school each year. Admission to the second year is by competitive application. Because enrollment in the second year is limited, you should become familiar with the admission requirements as early as possible.

Curriculum Requirements (First Year): (1) Respiratory Therapy 1 (taken at SMC in Fall/Spring Quarter); (2) general human anatomy with laboratory; (3) general chemistry with laboratory; (4) basic lower division English; (5) U.S. history or general political science; (6) any general humanities course (art, music, foreign languages, etc.); (7) microbiology with laboratory; (8) human physiology with laboratory; (9) general psychology; (10) speech or advanced English composition.

For further information and/or a counseling appointment, contact the SMC/UCLA Medical Center School of Respiratory Therapy at (310) 825-7222.

Prelaw Studies

Law schools have no preference with regard to specific majors or particular courses. However, two terms of English composition in preparing to apply to law school would be useful. Admission to law school is based on the quality of your academic work, LSAT scores, and other qualities as reflected in your written application, personal statement, and letters of recommendation. The College of Letters and Science offers advising on preparing for and applying to law schools through daily drop-in counseling, appointments, and workshops. For more information, call the Preprofessional Advising Office at (310) 825-1817.

For additional information, see the *Law School Admission Bulletin* available at the Admissions Office, UCLA School of Law, 71 Dodd Hall.

Graduate Study

The College of Letters and Science provides graduate students virtually unlimited opportunities for academic pursuit, faculty-sponsored research, and fieldwork relative to specific programs and career goals.

With Graduate Division approval and subject to University minimum requirements, each department sets its own standards for admission and other requirements for the award of the master's and doctoral degrees. See the Curricula and Courses section of this catalog for introductory information and procedures. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* avail-

able in the program office and accessible on the Graduate Division Gopher via the Internet.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

John E. Anderson Graduate School of Management

William P. Pierskalla, Dean

In today's rapidly changing global marketplace, it is essential that professional managers be conversant with the latest concepts and principles of management. At UCLA's John E. Anderson Graduate School of Management, which is consistently ranked among the best such schools in the nation, students prepare to become first-rate managers with both specialized skills and a broad understanding of the general economic, business, and managerial environment. This background enables them to become effective and efficient directors of organizations and people whether they are in the private, public, or not-for-profit sector.

Specifically, the Anderson School offers the business community a wide range of higher education programs that provide state-of-the-art information in a variety of fields. Through its faculty, the school advances the art and science of management by engaging in basic research in all fields of management and by educating scholars who can continue to create this new knowledge.

Anderson School students come from diverse professional and educational backgrounds and seek equally diverse personal and professional goals. Whether they choose to pursue the professional M.B.A., the academic M.S., or a Ph.D. in Management, they graduate with a broad understanding of people and organizations and with a sound technical background in the economic and mathematical concepts of management planning and decision making.

The John E. Anderson Graduate School of Management at UCLA offers a variety of programs leading to graduate degrees at the master's and doctoral levels. These include both an academic (M.S.) and professional (M.B.A.) master's, as well as a 21-month Executive M.B.A. Program designed for working managers who are moving from specialized areas into general management and a three-year Fully Employed M.B.A. Program for emerging managers. A Ph.D. in Management is also offered, as are a certificate Executive Program and research conferences and seminars for experienced managers.

The school offers an undergraduate minor in accounting and several undergraduate courses in management. Enrollment in these courses, although open to all University students who have completed the prerequisites, is limited.

Degrees Offered

- Master of Business Administration (M.B.A.)
- Master of Science (M.S.)
- Doctor of Philosophy in Management (Ph.D.)

Centers and Programs

Business Forecasting Project

Using large-scale econometric models, the Business Forecasting Project makes quarterly and long-term forecasts of the national and California economies, focusing on unemployment and employment by three-digit SIC code. Results of the forecasts are announced at confer-

ences attended by members of the media and leaders in business and government.

Center for Digital Media

The Center for Digital Media's mission is to become an internationally recognized institution for studying the effects of new media and digital technologies on organizations and the business environment, providing a wellspring of fresh ideas on innovation in the field. The center actively exploits its location in Southern California to develop mutually beneficial relationships with major industries, providing its industrial partners with research studies, networking, consulting, and recruiting opportunities, while providing faculty and students with the latest information, project financing, access to decision makers, and research topics related to digital media.

Center for International Business Education and Research

The Center for International Business Education and Research (CIBER) is dedicated to enhancing the teaching and understanding of issues related to the global marketplace. The center actively increases international business research across the campus through the direct funding of faculty research travel, graduate student research assistantships, and academic conferences.

Center for Technology Management

The program of the Center for Technology Management combines academic analysis and objectivity with the real-world needs and concerns of high-tech companies that manufacture advanced technology products or use them to produce other goods or services. The center's distinctive M.B.A. in Technology Management Program immerses students in the issues and concerns relative to technology in business today.

Harold Price Center for Entrepreneurial Studies

The Harold Price Center for Entrepreneurial Studies provides academic and extracurricular activities that prepare M. B. A. candidates for the challenge of business management in entrepreneurial environments. These efforts include teaching and curriculum development, student activities, and scholarly research. The interdisciplinary curriculum draws on faculty expertise in many areas.

Human Resources Round Table

The Human Resources Round Table (HARRT) is affiliated with the Anderson School and with UCLA's Institute of Industrial Relations. The program's mission is to enhance the profession of human resource management by linking the academic and practitioner human resource management communities.

Information Systems Research Program

The Information Systems Research Program (ISRP) was established to recognize the importance of maintaining close ties between the activities of practicing professionals and the activities of academics in the information systems area. The senior managers and technical professionals who belong to the Information Systems Associates participate in a number of activities to facilitate professional interchange and networking, such as the Information Systems Executive Leadership annual award dinner and the annual Information Systems Associates Symposium.

LEAD Program

The LEAD sponsors four-week summer institutes at outstanding business schools for qualified African American, Hispanic, and Native American students between their junior and senior years of high school. These programs are designed to introduce participants to the world of business, economics, finance, and management through a carefully tailored curriculum involving University faculty and guest lecturers from industry.

Office of Executive Education

Lifelong learning plays a critical role in the success of today's business leaders. The Anderson School's Office of Executive Education offers more than 40 innovative open enrollment and customized programs that address complex and rapidly changing business issues. The Executive Program covers such diverse areas as strategic planning, organizational design, and competitive positioning.

Riordan Programs

The Riordan Programs were established in 1986 by the Riordan Foundation in response to the growing demand for trained minority managers who can provide vision and leadership in culturally diverse communities. The programs offer Anderson School students opportunities to work with corporate leaders throughout the community, encouraging minority students to consider and prepare for careers in business.

School of Medicine

Gerald S. Levey, Dean and Provost

A modern school of medicine exists in many minds and in many places. It includes many more disciplines than all those available to such physicians as Copernicus and John Locke, famous for discoveries well beyond medicine then or now. UCLA School of Medicine faculty and students may be found in the Molecular Biology Institute and in the Department of Physiology, in the clinics, wards, and operating rooms of the UCLA Medical Center and Los Angeles County Harbor-UCLA Medical Center, in the Health Sciences Computer Center, in the Louise Darling Biomedical Library, and in dozens of other clinical and scientific facilities.

Regarded by many physicians and medical faculty to be among the best in the nation, UCLA's School of Medicine encompasses a wide range of clinical specialties, including neurology, obstetrics and gynecology, ophthalmology, orthopedic surgery, pediatrics, radiation oncology, and surgery. Graduate work leading to the M.S. and/or Ph.D. degrees is offered through the Graduate Division, either separately or in conjunction with the M.D. program, in 10 different disciplines.

Each department of the school is staffed by a distinguished faculty of respected researchers and practitioners. They have at their disposal some of the most technologically advanced equipment and facilities, including two of the nation's 56 hospital-based biomedical cyclotrons producing short-lived radioisotopes for biological research and diagnostic nuclear medicine procedures.

The UCLA School of Medicine offers an M.D. degree program, several allied health programs in affiliation with other hospitals and universities, and a number of postgraduate medical training programs. In addition to specialties in medicine, neurology, obstetrics and gynecology, ophthalmology, orthopedic surgery, pediatrics, radiation oncology, and surgery, which lead to the M.D. degree, a range of master's and doctoral degrees is offered through the Graduate Division.

Degrees Offered

- Anatomy and Cell Biology (M.S., C.Phil., Ph.D.)
- Anesthesiology — Nurse Anesthesia (M.S.)
- Biological Chemistry (M.S., Ph.D.)
- Biomathematics (M.S., Ph.D.)
- Microbiology and Immunology (M.S., Ph.D.)
- Neuroscience (Ph.D.)
- Pathology — Experimental Pathology (M.S., Ph.D.)
- Pharmacology (M.S., Ph.D.)
- Physiology (M.S., Ph.D.)
- Psychiatry and Biobehavioral Sciences Clinical Psychology Internship (Certificate)
- Radiological Sciences — Biomedical Physics (M.S., Ph.D.)

Note: The following Master of Science degrees require application to the doctoral degree program: Anatomy and Cell Biology, Microbiology and Immunology, Pharmacology, Physiology.

M.D. Degree Program

The four-year curriculum leading to the degree of Doctor of Medicine (M.D.) at UCLA is designed to develop a comprehensive scientific and humane approach to patient care that includes basic sciences, preventive medicine, diagnosis, and therapeutics. Clinical skills are taught in the context of anatomical, molecular, pathophysiological, and psychosocial factors in health, disease, and treatment.

During the first two years, which are devoted mainly to the basic sciences with only periodic, brief clinical exposure, instruction is primarily in the form of lectures, laboratory sessions, small-group problem-oriented instruction, demonstrations, and tutorials. In the last two years, instruction in patient care is given in the form of required and elective clinical rotations at the UCLA Medical Center and at the many affiliated hospitals.

All of the medical school departments participate in the medical curriculum leading to the M.D. degree. If you are interested in details on the M.D. curriculum and a listing of courses offered in each department, or if you wish to make application to the M.D. program, you should obtain a copy of the *Announcement of the UCLA School of Medicine* from the Office of Student Affairs, School of Medicine, 12-109 CHS, UCLA, Los Angeles, CA 90095-1720. See the College of Letters and Science earlier in this section for details on the four-year premedical studies program.

Graduate Programs

Master's and/or doctoral degrees are offered through the UCLA Graduate Division in the following fields: anatomy (Department of Neurobiology), biological chemistry, biomathematics, biomedical physics (Department of Radiological Sciences), experimental pathology, microbiology and immunology, neuroscience, nurse anesthesia, pharmacology, and physiology. Detailed information on these programs, for which admission to the School of Medicine is not required, is provided in the departmental listings in the Curricula and Courses section of this catalog.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

Additional Programs

Articulated Degree Programs

The School of Medicine offers an articulated degree program in conjunction with the Graduate Division which allows you to earn both the M.D. and Ph.D. in seven years, depending on your course of study and research. The Ph.D. may be awarded in one of several medical science fields. For more information, contact the Medical Scientist Training Program at (310) 794-1817.

In addition, an arrangement with the School of Public Health enables you to pursue the M.P.H. degree while attending medical school. Interested students should consult the Student Affairs Office in the School of Public Health.

Allied Health Programs

Programs in allied health include animal care technician, dental assistant, dental hygienist, dietetics technician, emergency medical technician, social work, pharmacy, respiratory therapist, vocational nurse, nurse anesthetist, operating room nurse, physician's assistant, physical therapist, radiologic technologist, radiation therapy technologist, and ultrasound technologist.

Information regarding these programs may be obtained from the Office of Allied Health Programs in the UCLA Center for the Health Sciences (310-794-8352).

Postgraduate Medical Training Programs

Postgraduate training programs, including residencies, are available at several off-campus sites in addition to those offered at the UCLA Medical Center. Programs at the allied institutions broaden the scope of the teaching programs by providing extensive clinical facilities, special population settings, and diverse practice modes. Information about these programs is available from the Office of Student Affairs, UCLA School of Medicine.

School of Nursing

Donna L. Vredevoe, Acting Dean

The School of Nursing was established at UCLA in 1949 and rapidly became a leading school of nursing in the U.S. Now the school enjoys a national and international reputation for excellence in teaching, research, and clinical practice.

One of the strengths of the school is its teaching of the scientific basis for nursing practice, leadership, and research. Related clinical experiences are arranged within the UCLA Medical Center, its affiliates, or in selected community sites. Education at the baccalaureate level is generic in preparing students for licensure as registered nurses and certification as public health nurses. At the master's level there are advanced practice options in primary care, acute care, and nursing administration. The majority of graduate students acquire expertise as nurse practitioners, with several options for clinical preparation in primary or acute care. The doctoral program prepares scholars who do original research, generate new theories, and build the scientific basis for professional nursing practice. Research is both basic and applied.

The School of Nursing has an exceptionally well-qualified faculty, and many have earned national and international reputations for excellence. The school is consistently ranked high for its teaching and research programs. The innovative curriculum is responsive to national needs in health care and the diversity of the patient population. Graduates of the program are sought by health care institutions and educational programs, and many alumni have become leaders in the field. Education in this research University with its full range of academic disciplines provides a rich environment for preparation in the health sciences.

The UCLA School of Nursing gives direction to interested potential applicants through monthly open counseling sessions. If you are interested in the academic programs offered, you are urged to attend a counseling session or request a copy of the *Announcement of the UCLA School of Nursing* by writing to the Student Affairs Office, School of Nursing, 2-200 Factor Building, UCLA, Los Angeles, CA 90095-1702 (310-825-7181, Tuesday through Thursday).

History and Accreditation

In 1949 The Regents of the University authorized the School of Nursing as one of the professional schools of the UCLA Center for the Health Sciences. This action paved the way for the development of an undergraduate basic program in nursing leading to the Bachelor of Science degree and made possible the establishment of a graduate program leading to the Master of Science degree. In 1965 the Master of Nursing degree was established as an alternate option to the M.S. degree. The Master of Science degree program was discontinued in 1971. The Regents approved the Doctor of Nursing Science degree program in 1986, and in Fall Quarter 1987 the first doctoral students were admitted.

The baccalaureate program has been continuously approved by the California Board of Registered Nursing since 1949. The School of Nursing became an agency member of the Department of Baccalaureate and Higher Degree Programs of the National League for Nursing in 1952. The Accrediting Service of the National League for Nursing has granted full accreditation to the programs since 1954.

Degrees Offered

Bachelor of Science (B.S.)
Master of Nursing (M.N.)
Doctor of Nursing Science (D.N.Sc.)

Philosophy of the School

The UCLA School of Nursing is guided by a philosophy which embodies the mission and goals of the University of California. The philosophy addresses nursing, the clients of nursing, and nursing students.

Nursing encompasses clinical practice, education, research, consultation, leadership, and service to the profession and the community. It involves individuals, families, groups, and communities as clients and the human and physical environments which interact with these clients. Nursing clients may be well or ill with health conditions that range from wellness to illness, so nursing activities include health promotion and maintenance, intervention and treatment, rehabilitation and restoration, and palliation. Nursing research is both applied and basic and has as its core actual or potential human responses to illness and as its goal the development of nursing science. Guided by ethical standards which consider the perspectives of the client, the health care provider, and the larger society, nursing has a social mission which encompasses the right and responsibility to provide health care to all its clients regardless of their disease status, race, or culture.

Persons who are the recipients of client-centered nursing care are considered as complex individuals who exist in relationship to others in their family and community. This complexity of person involves biological, behavioral, emotional, sociocultural, and spiritual dimensions. Each individual reflects a unique combination of these dimensions which interact dynamically with the environment. The clients of nursing are autonomous decision makers who have certain values and knowledge about themselves that not only are relevant but essential to successful health care outcomes. As a result, persons have a right and a responsibility to participate collaboratively with the nurse and other health professionals in their care.

Successful nursing students are active learners who bring unique gender, cultural, and ethnic life experiences to the professional practice of nursing. Students in all three programs (baccalaureate, master's, and doctoral) learn relevant theory, acquire practice skills, and are socialized into the profession of nursing. Increasing levels of complexity and sophistication of learning and socialization are expected of students in the different programs. Whether at the basic, specialist, or scholar level, nursing students learn to apply knowledge, skills, and professional attitudes in their practice which may include educative, administrative, and research arenas. While students have the right and responsibility to participate in their own learning, faculty members have the right and responsibility to structure the teaching/learning environment to facilitate learning. Individual academic counseling and a variety of one-on-one, small-group, and interactive learning formats assist students to meet program and individual learning goals.

School of Public Health

Abdelmonem A. Afifi, Dean

The emergence of public health as an independent discipline dates back over a century, when the field was concerned mainly with the epidemic of communicable diseases and some facets of sanitation. Changes in socioeconomic conditions, lifestyle, and other factors have brought such issues as accidents, aging, air pollution, alcoholism, drug addiction, smoking, mental health, homicide, and sexually transmitted diseases to the fore as community health problems. In time the following general statement evolved — "The mission of public health is to fulfill society's interest in assuring conditions in which people can be healthy."

Public health professionals can promote the health of the community through (1) research into the development of methodologies in biostatistics, epidemiology, demography, and techniques of prevention, (2) investigations into factors which influence health behavior, quality of and access to health care, health education, nutrition, environmental problems, and problems of special population groups such as mothers, children, and minorities, and (3) development of research into new areas that impact on the health of the community. Public health professionals are also responsible for translating knowledge of disease and health enhancement into resolution of health problems in the community. They are committed to the prevention of disease, promotion of health, and improvement in the quality of life.

To fulfill its national and international mission, the school (1) educates new professionals and leaders for the private and public sectors, (2) prepares researchers and educators of future professionals, (3) conducts research to define, protect, and improve conditions for a healthy public, and (4) contributes knowledge, expertise, and service to the community. It is the goal of the school to ensure that the protection and improvement of the public's health is accomplished by the most efficient and effective means, consistent with equity for all individuals in the state, the nation, and the world.

Degrees Offered

Biostatistics (M.S., Ph.D.)
 Environmental Health Sciences (M.S., Ph.D.)
 Environmental Science and Engineering (D.Env.)
 Epidemiology (M.S., Ph.D.)
 Health Services (M.S., Ph.D.)
 Preventive Medicine and Public Health (M.S.)
 Public Health (M.P.H., M.S., Dr.P.H., Ph.D.)

Departments and Programs

The School of Public Health offers graduate programs leading to both academic and professional degrees in five departments. The Department of Biostatistics develops statistical and analytical techniques for public health use. The Department of Community Health Sciences deals with five areas of study and program implementation, including behaviors which prevent disease and enhance health, health problems of high-risk groups (women, children, the aged, the poor, the disadvantaged, and racial and ethnic minorities), health promotion policy, community nutrition, and international health. The Department of Environmental Health Sciences elucidates health hazards in the general environment and in the workplace. The Department of Epidemiology is concerned with the nature, extent, and distribution of disease and health in populations. The Department of Health Services deals with the organization, financing, quality, and distribution of health care services. The school is also responsible for the administration of the interdepartmental degree program in environmental science and engineering.

Certain programs within the School of Public Health are not offered by the individual departments but are administered on a schoolwide level: the Master of Public Health; the Doctor of Public Health; the concurrent M.B.A./M.P.H. with the John E. Anderson Graduate School of Management; and two articulated M.A./M.P.H. degrees with African Area Studies and with Latin American Studies.

Admission

In addition to requiring that applicants hold a bachelor's degree from an accredited U.S. institution or an equivalent degree or professional title from an international institution, each department in the school has limitations and additional requirements. Detailed information can be found in the departmental listings in the Curricula and Courses section of this catalog. Help in deciding on a department is available in the school's Student Affairs Office.

For information on the proficiency in English requirements for international graduate students, see Graduate Admission in the Graduate Study section of this catalog.

Degree Requirements

Requirements to fulfill each degree objective vary according to the degree and the department. See the departmental listings in the Curricula and Courses section of this catalog for specific requirements and procedures.

Centers and Programs

UCLA Center for Health Policy Research

The UCLA Center for Health Policy Research was established in March 1994 to apply the expertise of UCLA faculty and researchers to meet national, state, and local community needs for health policy-related research and information. Building on the extensive health policy research of School of Public Health faculty, the center was established to accomplish three missions: (1) to conduct research on national, state, and local health policy issues, (2) to provide public service to policymakers and community leaders, and (3) to offer educational opportunities for graduate students and postdoctoral fellows.

The center, sponsored by the School of Public Health and the School of Public Policy and Social Research, provides a collaborative health policy research environment for UCLA's leading professional schools and academic departments. The center's staff assists faculty and other researchers to obtain extramural research and training funds, and it helps researchers manage and conduct research studies. Faculty from the Schools of Public Health, Public Policy and Social Research, and Medicine participate in center research projects and its public service and educational activities.

The center publishes its health policy research findings in a series of Policy Briefs, making policy-relevant information directly accessible to policymakers, public health and health care leaders, the media, and the general public. The center also publishes more extensive findings in a series of Policy Research Reports. In addition, the center sponsors lectures and seminars on health policy-related topics for students, faculty, and staff. For additional information, call (310) 825-5491.

UCLA Center for Health Promotion and Disease Prevention

Established in July 1991, the center is a joint endeavor of the UCLA Schools of Public Health and Medicine. The five full-time faculty members have their primary appointments in one of the clinical departments in the School of Medicine such as obstetrics, surgery, medicine, or pediatrics and, depending on their training, joint appointments in an appropriate department in the School of Public Health such as community health sciences, health services, or epidemiology. Within the School of Medicine, faculty members are involved in clinical activities and teaching, especially in the course on doctoring. Within the School of Public Health, they are engaged in teaching and research. Faculty research activities are wide-ranging and involve studies on the quality of life of men with prostate cancer, manpower requirements for the care of those with HIV infections, community interventions for asthma control in Latino children, systems for smoking cessation used by physicians caring for Latino patients, etc.

The center, through its members, has ties with a variety of local and national organizations concerned with managed care, as well as with the Veterans Administration and several other hospitals and professional organizations. It serves as the UCLA site for the activities of the Southern California AIDS Education and Training Center. The center is also responsible for overseeing the Preventive Medicine Residency Program.

UCLA Center for Occupational and Environmental Health

In 1977 a group of chemical workers in California became sterile after exposure to the pesticide DBCP, which now is known to be a carcinogenic and reproductive toxin. That incident prompted the California State Legislature to mandate the formation of occupational health centers in the northern and southern regions of the state. The purposes of the Center for Occupational and Environmental Health (COEH) are training occupational and environmental health professionals, conducting research, and providing patient services through consultation, education, and evaluation. The centers constitute the first state-supported institutions to provide occupational and environmental health leadership in the U.S.

UCLA's COEH is housed in the Center for the Health Sciences and involves the Schools of Public Health, Medicine, and Nursing. Active collaboration also occurs with the UCLA Center for Labor Research within the Institute of Industrial Relations and with faculty from the Schools of Engineering and Applied Science and Public Policy and Social Research.

Specific COEH programs within the School of Public Health include the following specialties and services:

Occupational Hygiene

Occupational hygienists are environmental specialists concerned with evaluation and control of the workplace environment for exposure to potentially dangerous agents, physical stresses, biologic agents, and ergonomic effects. Occupational hygienists provide insight into these problems based on their knowledge of the health effects of exposure to the substances involved and the physics and chemistry of the environment. These specialists work as part of interdisciplinary teams with epidemiologists, physicians, nurses, and toxicologists.

Occupational Epidemiology

Occupational and environmental epidemiologists conduct research to establish causal links between environmental exposure and adverse health outcomes. The study of exposure-response relationship is central to the role of the epidemiologists.

Occupational Ergonomics

Occupational ergonomics is the science of designing a work environment compatible with the capabilities and needs of the workforce. The primary goal of the program is to improve the design of the work environment for the prevention of occupational illnesses and injuries. Current research areas include static and dynamic strength modeling, task analysis, and identification and qualification of risk factors for cumulative trauma disorders.

Occupational Medicine

A joint occupational medicine residency between UCLA and USC provides specialty training for physicians in occupational medicine. The program leads to a master's degree in public health and board eligibility in occupational medicine. The first year of the program involves taking courses at the UCLA School of Public Health leading to an M.P.H. degree. In the second year, students participate in clinical and field rotations under the supervision of the Division of Occupational and Environmental Medicine at USC. A similar joint residency program in occupational medicine is offered with the UC Irvine COEH.

Service Outreach to the Community

The center has the task of providing expertise in occupational and environmental health to the community. Available services and opportunity for student activities include (1) consultative assistance to physicians, nurses, and occupational hygienists, (2) faculty evaluation of the work environment with potential occupational health hazards and surveillance of industrial workers exposed to hazardous substances, and (3)

continuing education opportunities for professionals, and educational programs for workers exposed to potential occupational health hazards.

Health Careers Opportunity Program

The Health Careers Opportunity Program (HCOP) was established at the UCLA School of Public Health in 1981 to increase the representation of American Indian, African American, and Latino minorities receiving graduate degrees in public health. The objectives of HCOP are threefold: (1) to increase the number of qualified and well-prepared underrepresented minority applicants, (2) to increase the number of American Indian, African American, and Latino applicants accepted and enrolled in the school, and (3) to develop and maintain an effective retention program.

Eligibility for HCOP services is based on the population parity model consistent with the State of California, Office of Statewide Health Planning and Development. In this model, a group is considered underrepresented if the percentage of a specific racial/ethnic group in the health professions is less than that group's percentage in the total population of the state. Thus, under the population parity model, culturally sensitive underrepresented minorities must meet all three of the following criteria to be HCOP-eligible at the UCLA School of Public Health: (1) must be African American, Latino, or American Indian, (2) must be a U.S. citizen or permanent resident, and (3) must have graduated from high school and an undergraduate college in the U.S.

The UCLA School of Public Health is nationally recognized for its successful program. HCOP has the largest enrollment of underrepresented minorities in a school of public health in the country. The activities associated with this comprehensive minority preparation, recruitment, enrollment, and retention program include the following:

- (1) Applicant and counselor conferences covering all aspects of the admission process.
- (2) Minority Peer Counseling Program for School of Public Health applicants. Sensitive and concerned minority students currently enrolled in the school serve as role models to potential applicants and give specific information about the course of study at the school.
- (3) Summer Enrichment Program in the biomedical sciences for undergraduate minorities to enhance their academic and research skills and to assist in the successful completion of their undergraduate work.
- (4) Alumni counseling and networking by graduates of the school to give insight into the various fields of public health.
- (5) Public Health Leadership Conference for students enrolled at targeted colleges and universities.
- (6) Summer Prologue Program for incoming underrepresented minority students which includes academic courses in the areas of writing, epidemiology, biostatistics, research, and computer skills.
- (7) Student Mentor Program, matching enrolled first-year HCOP graduate students with second-year students to provide a student support system.
- (8) Minority resource bank of fellowships and internships for enrolled graduate students.
- (9) Minority High School Student Summer Research Apprenticeship Program for rising juniors to stimulate an interest in pursuing careers in research and the health professions.

The HCOP Office is open weekdays from 9 a.m. to 5 p.m. to assist HCOP-eligible students with applications to UCLA and preparation for a career in public health (310-825-7449).

Office of Public Health Practice

The School of Public Health plays a unique role in community-based health promotion and disease prevention. To coordinate this important function, the school established the Office of Public Health Practice in 1992. The goals of the office are to (1) establish firm practice links with local and state departments, (2) strengthen the curriculum with innova-

tive community-based public health practice experience, (3) assist policy development affecting public health, (4) develop model interventions to address the leading public health problems of our diverse and multi-ethnic communities, and (5) develop continuing education programs, including an M.P.H. degree for working professionals. For additional information, call (310) 794-7028.

Southern California Injury Prevention Research Center

Injuries kill more people under the age of 45 than all other causes of death combined. The Southern California Injury Prevention Research Center (SCIPRC) is one of eight centers in the U.S. that focus on the problem of intentional (homicide, suicide, abuse) and unintentional (motor vehicle crash, drowning, falls) injuries through three phases of injury control — prevention, acute care, and rehabilitation — addressed through its research, training, and community service components.

The theme of SCIPRC is to research intentional and unintentional injuries among ethnic/racial minorities, socioeconomically disadvantaged persons, and other underserved populations. Highly focused, multidisciplinary community-based research projects are undertaken with the collaboration of public health scientists, clinicians, social scientists, and human factor engineers affiliated with the University of California (Los Angeles and Davis), University of Southern California, King/Drew and Rancho Los Amigos Medical Centers, Los Angeles County Department of Health Services, Edward R. Roybal Institute for Applied Gerontology, and California State Office of Traffic Safety and Departments of Health and Industrial Relations.

Graduate students can affiliate with SCIPRC through academic coursework in injury, research experience with ongoing investigations, and support for independent graduate student research.

School of Public Policy and Social Research

Archie Kleingartner, Acting Dean

Established July 1, 1994, the School of Public Policy and Social Research allows UCLA to link its faculty in a wide array of policy areas to the needs of the various communities that it exists to serve. The school's faculty members work collaboratively with other campus departments, the external communities, and government and private agencies to further a variety of initiatives.

The school has three academic departments — Policy Studies, Social Welfare, and Urban Planning. The Departments of Social Welfare and Urban Planning are fully operational and offer outstanding master's and doctoral programs. The Department of Policy Studies was established in 1994 along with the school.

In addition to its instructional programs, the school houses a wide array of research centers and institutes that allow faculty members from across the campus to come together to pursue topics of mutual interest, including the Center for Child and Family Policy Studies, Center for Communication Policy, Center for Health Policy Research, Center for Labor Research and Education, Center for North American Integration and Development, Lewis Center for Regional Policy Studies, Institute of Industrial Relations, and Institute of Transportation Studies. The research program connects the school firmly to the outside world and enriches the curriculum.

The School of Public Policy and Social Research offers graduate programs leading to the Master of Social Welfare (M.S.W.), Master of Arts (M.A.) in Urban Planning, and Ph.D. in Social Welfare and in Urban Planning. Further information about these programs can be found in the Curricula and Courses section of this catalog.

Degrees Offered

Social Welfare (M.S.W., Ph.D.)

Urban Planning (M.A., Ph.D.)

School of Theater, Film, and Television

Gilbert Cates, Dean

The School of Theater, Film, and Television consists of the Department of Theater and the Department of Film and Television, recognized national centers for higher education in production and performance as well as history, theory, and criticism. Whether exploring the ancient and sacred roots of theater or the latest secular rituals enacted by popular film, creating a dramatic character on a bare stage or a dramatic narrative on screen, or writing scripts or scholarly articles, all students study both the aesthetics and cultural significance of theater, film, and television. Through an intensive, multiple-discipline curriculum, the school defines the inherent differences of theater, film, and television, affirms their similarities, and encourages their interaction. As art forms and cultural interventions, theater, film, and television have in common the ability and power to reflect and shape our perception of a complex, diverse, and ever-changing world. We believe — as artists and scholars — that we have an obligation to reflect on this power and to use it responsibly.

Situated in the diverse and culturally rich environment of Los Angeles and drawing on the many resources of the campus at large, including the UCLA Center for the Performing Arts, Westwood Playhouse, and UCLA Film and Television Archive, the school provides the ideal setting for students to engage in the study and practice of art forms essential to a healthy and dynamic society.

The Department of Theater and the Department of Film and Television are essential components of the rich intellectual, cultural, and professional life of UCLA. Depending on the degree involved, the school's programs are either strongly professional in nature or oriented toward advanced scholarly study and research in an atmosphere that recognizes and often draws on studio practice. Students in undergraduate courses receive a broadly based, liberal education within the context of either theater or film and television. The Master of Fine Arts degree programs prepare talented and highly motivated students for careers in the worlds of theater, film, and television. The M.A. and Ph.D. programs engage students in the critical study and research of each medium, including its history, aesthetics, and theory, and prepare students for advanced research within the context of college and university teaching, as well as for writing and research in a variety of media-related professions.

In the Department of Theater, approximately 275 undergraduate and 125 graduate students interact with over 40 faculty members, outstanding guests of national and international standing, and a professional staff of 35 in an exciting artistic community of theater production and study. Resources include the three theaters of the Macgowan Hall complex. Specializations in the Master of Fine Arts program include acting, directing, playwriting, design, technology and production management, and the producers program.

The Department of Film and Television includes both production and critical studies programs, with approximately 265 graduate and 60 undergraduate students. The 50 faculty members include leading scholars as well as members of the Los Angeles and international film and television professional communities. In production, graduate specializations are offered in the areas of film and television production, screenwriting, animation, and the producers program. The critical studies program offers M.A. and Ph.D. degrees for the advanced scholarly study of film and television. The department's resources in Melnitz Hall include three sound stages, three television studios, extensive editing, scoring, and viewing facilities, and a complete animation laboratory for both traditional and computer-generated animation. The M.A. and Ph.D. programs are supported by the collections of the University's libraries and the UCLA Film and Television Archive, the largest in the U.S. outside the Library of Congress. This archive forms a unique and priceless resource for research and classroom instruction.

M.A. and Ph.D. faculty members and students also participate in various campus organized research units.

Informative brochures on the school are available from the Student Services Office, 103 East Melnitz Building, UCLA, Los Angeles, CA 90095-1622.

If you are interested in obtaining instructional credentials for California elementary and secondary schools, consult the Graduate School of Education and Information Studies, 1009 Moore Hall (310-825-8328).

Majors and Degrees Offered

Film and Television (M.A., M.F.A., C.Phil., Ph.D.)

Motion Picture/Television (B.A.)

Theater (B.A., M.A., M.F.A., C.Phil., Ph.D)

Undergraduate Study

Admission

In addition to the University of California Undergraduate Application, departments in the School of Theater, Film, and Television require applicants to submit additional supporting materials. Information on departmental requirements is mailed to you on receipt of your application. Deadline date for applications is November 30, 1995, for admission in Fall Quarter 1996.

The Study List

Each term the student Study List must include from 12 to 17 units. The school has no provision for part-time enrollment. After your first term, you may petition to carry more than 17 units (up to 20 units maximum) if you have an overall grade-point average of 3.0 (B) or better and have attained at least a B average in the preceding term with all courses passed. The petitions must be filed and approved by the Student Services Office by the end of the fourth week of instruction.

If you have not filed your Study List by the end of the second week of classes, you must obtain the consent of the dean of the school to continue for that term.

Graduate Courses

Undergraduate students who wish to take courses numbered in the 200 series for credit toward the degree must petition for advance approval of the department chair and the dean of the school and must meet specific requirements. Courses numbered in the 400 and 500 series may not be applied toward the degree.

Concurrent Enrollment

Enrollment at another institution or UCLA Extension while enrolled at UCLA is not permitted.

Requirements for Bachelor of Arts Degrees

Each student must meet six kinds of requirements for the B.A. degree: University, school, and unit requirements, as well as residence, major, and scholarship requirements. The requirements are as follows.

University Requirements

For information on the Subject A or English as a Second Language (ESL) and American History and Institutions requirements, see Undergraduate Degree Requirements in the Undergraduate Study section of this catalog.

School of Theater, Film, and Television students enrolled in English as a Second Language 33A, 33B, 33C must take the courses for a letter grade.

School Requirements

The general requirements of the School of Theater, Film, and Television must be completed with a grade-point average of 2.0 or better.

General Education (GE) Course Requirements

For specific courses that fulfill the general education requirements, refer to the lists below or consult the Student Services Office before enrolling. Note: Courses that include the study of theater, film, or television may not be applied toward any general education requirements.

Reciprocity with Other UC Campuses. Students who transfer to UCLA from other UC campuses and have met all general education requirements prior to enrolling at UCLA are not required to complete the School of Theater, Film, and Television general education requirements. Written verification from the college dean at the other UC campus is required. Verification letters should be sent to Director of Student Services, School of Theater, Film, and Television, 103 East Melnitz Building, UCLA, Los Angeles, CA 90095-1622.

Intersegmental General Education Transfer Curriculum (IGETC).

Transfer students from California community colleges have the option to fulfill UCLA's lower division general education requirements by completing the Intersegmental General Education Transfer Curriculum prior to transfer. The curriculum consists of a series of subject areas and types of courses which have been agreed on by the University of California and the California community colleges. The IGETC significantly eases the transfer process, as all of UCLA's general education requirements are fulfilled when you complete it. If you select the IGETC, you must complete it entirely before enrolling at UCLA. Otherwise, you must fulfill the School of Theater, Film, and Television general education requirements.

English Composition and Rhetoric

English 3 with a minimum grade of C or an AP score of 4 should be completed by the end of your freshman year and may not be taken on a Passed/Not Passed basis.

Critical Reading and Writing

One course from English 4, Humanities 2A, 2B, or 2C with a minimum grade of C or an AP score of 5 should be completed by the end of your sophomore year and may not be taken on a Passed/Not Passed basis. Humanities 2A, 2B, or 2C may not be applied toward the literature requirement if taken to meet this requirement.

Art and Philosophy

Five courses (20 units), with no more than two courses from any single group:

Group A — Art History 50, 51, 54, 55A, 55B, 56A, 56B, 57, Classics 51, Design 10.

Group B — World Arts and Cultures 134, 181A, 182, C187.

Group C — Ethnomusicology and Systematic Musicology 20A, 20B, 20C, M108A, 108B, M110A, M110B, 113, 136A, 136B, 147, 174, Music 15, Musicology 2A, 2B, 13, 133, 134, 135A, 135B, 135C.

Group D — Philosophy 1, 2, 4, 5A, 6, 7, 8, 21, 22.

Social Sciences

Three courses (12 units), with no more than two courses from any single group. Whenever possible, two courses from a single sequence are recommended:

Group A — Chinese 50, Classics 10, 20, East Asian Languages and Cultures 60, Folklore and Mythology 15, German 100A, 100B, 100C, Italian 42A, 42B, Japanese 50, Jewish Studies 10, Korean 50, Portuguese M42, M44, Russian 99A, 99B, Spanish M42, M44, Women's Studies 10.

Group B — History 1A, 1B, 1C, 3A through 3D, 4, 5A, 5B, 6A, 6B, 6C, 7A, 7B, 8B, 8C, 9A, 9C, 9D, 10A, 10B, 11A, 11B, Political Science 10, 20, 40, 50.

Group C — Anthropology 8, 9, 33, Psychology 10, Sociology 1, 2, 3, 4, 31.

Science

One course (four units) in physical sciences and one course (four units) in biological sciences:

Group A — Physical Sciences — Astronomy 2A, 2B, 3, 4, 5, 6, Atmospheric Sciences 2, 3, 4, 5, 6, Chemistry and Biochemistry 2, 11A, 11B, 15, Earth and Space Sciences 1, 2, 5, 8, 9, 15, Geography 1, Mathematics 2, 3A, 3B, 5, 31A, 31B, 31E, Physics 3A, 3B, 3C, 6A, 6B, 6C, 8A, 8B, 8C, 10.

Group B — Biological Sciences — Anthropology 7, 10, 12, 15, Biology 2, 6, 10, 13, 21, 25, 40, 70, Earth and Space Sciences 16, Geography 2, 5, Microbiology and Molecular Genetics 6, 7, Psychology 15.

Literature

Three courses (12 units) in literature are required, at least one of which must be upper division. Any literature course taken in the original language can fulfill this requirement. Humanities 2A, 2B, or 2C may not be applied toward the critical reading and writing requirement if taken to meet this requirement; English 4 may **not** be applied here.

Foreign Language Proficiency

You may meet this requirement by (1) scoring 3, 4, or 5 on the Advanced Placement (AP) foreign language examination in French, German, or Spanish, (2) presenting a UCLA foreign language proficiency examination score indicating competency through level three, or (3) completing one college-level foreign language course equivalent to UCLA's level three or above with an average grade of C or better.

International students whose entire secondary education has been completed in a language other than English may petition to be exempt from the foreign language requirement.

Unit Requirements

Double majors in the school, or between the school and other academic units, are not permitted.

You must complete for credit, with a passing grade, no less than 180 units and no more than 208 units, of which at least 64 units must be upper division courses (numbered 100 through 199). No more than 16 units of CED courses and eight units of freshman seminars or 300-level courses may be applied toward the degree. Credit for 199 courses is limited to 16 units, eight of which may be applied to the major. All 199 courses must be taken for a letter grade.

UCLA Extension courses with the prefix X on those numbered in the 1 through 199, 200, 300, 400, or 800 series may not be applied toward the degree.

Credit earned through the College Board Advanced Placement Tests may be applied toward the general education requirements. Portions of Advanced Placement Test credit may be evaluated by corresponding UCLA course numbers (e.g., History 1C). If you take the equivalent UCLA course, unit credit for such duplication is deducted before graduation.

Residence Requirements

You are "in residence" while enrolled and attending classes at UCLA as a major in the School of Theater, Film, and Television. Of the last 45 units completed for the bachelor's degree, 35 must be earned in residence in the School of Theater, Film, and Television. No more than 18 of the 35 units may be completed in UCLA Summer Sessions.

Courses in UCLA Extension (either class or correspondence) may not be applied toward any part of the residence requirements.

Major Requirements

A major is composed of not less than 14 courses (56 units), including at least nine upper division courses (36 units). The theater major includes both lower and upper division courses. Those listed under "Preparation for the Major" (lower division) must be completed before upper division major work is undertaken. The motion picture/television major requires upper division work only.

You must complete your major with a scholarship average of at least a 2.0 (C) in all courses in order to remain in the major. All courses in the school must be taken for a letter grade.

As changes in major requirements occur, you are expected to satisfy the new requirements insofar as possible. Hardship cases should be discussed with the departmental adviser, and petitions for adjustment should be submitted to the dean of the school when necessary.

Any department offering a major in the School of Theater, Film, and Television may require a general final examination.

Scholarship and Minimum Progress

A 2.0 (C) average is required in all work attempted at the University of California, exclusive of courses in UCLA Extension and those graded Passed/Not Passed. A C average is also required in all upper division courses in the major taken at the University, as well as in all courses applied toward the general education and University requirements.

Minimum Progress. You are expected to complete satisfactorily at least 36 units during any three consecutive terms in residence; you are placed on probation if you fail to pass these units. You are subject to dismissal if you fail to pass at least 32 units in three consecutive regular terms in residence.

Honors

To receive **Dean's Honors** in the School of Theater, Film, and Television, you must have at least 12 graded units per term with a grade-point average of 3.8 for less than 16 units of work (3.7 GPA for 16 or more units). The honor is posted on your transcript for the appropriate term. You are not eligible for Dean's Honors in any given term if you receive an incomplete or a Not Passed (NP) grade, change a grade, or repeat a course.

Honors at graduation are awarded to students with superior grade-point averages. To be eligible, you must have completed 90 or more units for a letter grade at the University of California. The levels of honors and the requirements for each level are *cum laude*, an overall average of 3.776; *magna cum laude*, 3.846; *summa cum laude*, 3.875.

Counseling and Program Planning

The School of Theater, Film, and Television offers advising, program planning in the major and general education requirements, and individual meetings with departmental counselors, including a yearly degree check sent to each student. Prior to registration and enrollment in

classes, each new student is assigned to a counselor in the major department. For further counseling information, contact the Student Services Office, School of Theater, Film, and Television, 103 East Melnitz Building (310-206-8441).

Graduate Study

The advanced degree programs offered in the School of Theater, Film, and Television provide graduate students with unique research opportunities when combined with special resources, such as the University Research Library, UCLA Film and Television Archive, special collections of the Arts Library, and the University's exhibition and performance halls.

The School of Theater, Film, and Television cooperates with the UCLA John E. Anderson Graduate School of Management in offering a Master of Business Administration (M.B.A.) in Entertainment Management. Participating students serve term-long internships with such professional arts organizations as the Los Angeles County Museum of Art, the Mark Taper Forum, and the Los Angeles Philharmonic Orchestra.

The producers program is an M.F.A. management program in the Departments of Theater and Film and Television, with options in either theater or film and television.

A program in teaching is offered by the Graduate School of Education and Information Studies in each of these areas.

Fellowships, grants, and assistantships are available through the dean of the Graduate Division. The Graduate Affirmative Affairs Office provides counseling, academic support, and financial assistance to ethnic minority students.

Admission

In addition to requiring that applicants hold a bachelor's degree from an accredited U.S. institution or an equivalent degree of professional title from an international institution, each department in the school has limitations and additional requirements. Detailed information can be found in the departmental listings in the Curricula and Courses section of this catalog.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

Other Requirements

Requirements to fulfill each degree objective vary according to the degree and the department. See the Curricula and Courses section of this catalog for introductory information and procedures. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Curricula and Courses

COURSE LISTINGS

In the following section, curricula and courses are listed alphabetically with the college or school administering the program identified in the program heading. Every effort has been made to ensure the accuracy of the information presented. However, all courses, course descriptions, instructor designations, and curricular degree requirements described herein are subject to change or deletion without notice. For up-to-date information, consult the quarterly *Schedule of Classes* or the website at <http://www.saonet.ucla.edu/stinfo/reg.htm>.

For a complete outline of graduate degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in program offices or accessible on the Graduate Division Gopher via the Internet.

Undergraduate Courses

Undergraduate courses are classified as lower division and upper division. **Lower division courses (numbered 1-99)** are often surveys offering preliminary introductions to the subject field. They are designed primarily for freshmen and sophomores, though upper division students may enroll for unit and grade credit. Lower division courses may not be applied toward graduate degrees.

Upper division courses (numbered 100-199) are open to all students who have met the requisites indicated in departmental requirements or the course description. Preparation generally includes at least one lower division course in the subject or two years of college work. With approval of the major department, graduate students may take 100-series courses toward satisfaction of master's degree requirements.

Lower division/first-year seminars (numbered 88) are departmentally sponsored courses designed to provide freshmen and sophomores the opportunity to participate in small classroom settings to enhance writing, verbal, and analytical skills. Many carry general education credit.

Variable topics courses (numbered 97 and 197) are offered at both the lower (97) and upper (197) division levels; topics within a defined subject area vary with the instructor and individual offerings. These topics have a fixed and permanent place in the regular curriculum.

Professional schools seminars (numbered 98) are designed by the faculty of the professional schools specifically for freshmen and sophomores. Outside of the professional schools, 98 courses are often offered as the lower division equivalent of 198 courses, defined below. Because they are temporary in nature, vary in content, and are offered irregularly, they are not listed in the catalog. Consult the *Schedule of Classes* for respective offerings.

Group special studies courses (numbered 198) are structured special studies for groups. They may be departmentally sponsored experimental and/or temporary in nature (e.g., courses taught by a visiting professor) or those which are being tested for permanent inclusion in the curriculum. Because they are temporary in nature, vary in content, and are offered irregularly, they are not listed in the catalog. Consult the *Schedule of Classes* for respective offerings.

Individual special studies courses (numbered 199, 199F, 199H, and 199I) involve supervised independent study and research requiring adequate background in the subject proposed for study. These courses are structured by the instructor and student at the time they are initiated and are open to juniors (with a minimum 3.0 GPA in the major field), seniors, and graduate students. To enroll, you must complete the appropriate petition (available from the department) and have it approved by both the instructor in charge and department chair.

Undergraduates may enroll in a maximum of eight units of 199, 199F, 199H, and/or 199I courses per term. After completing 16 units of 199 and/or 199H credit on a letter grade basis, you must take any additional 199 and/or 199H courses on a Passed/Not Passed basis. Independent field study courses (199F and 199I) must be taken on a Passed/Not Passed basis; a total of eight units is allowed. If you have an outstanding Incomplete grade in a 199, 199F, 199H, or 199I course, you may not register for another until the I grade is removed. See departmental listings and individual course descriptions for specific prerequisites and credit limitations.

Graduate Courses

Graduate courses numbered 200-299 are generally open only to graduate students who have completed basic undergraduate courses in the subject. Courses and seminars in the 200 series can fulfill the minimum graduate course requirement for any advanced degree.

With departmental and instructor consent, and subject to requirements in the appropriate college or school, undergraduate students may enroll in 200-series courses for unit credit toward the bachelor's degree. If you take a graduate course as an undergraduate, you may not apply that same course later toward a higher degree.

Graduate courses numbered 300-399 are highly specialized teacher-training courses which are not applicable toward University minimum requirements for graduate degrees. They are acceptable toward the bachelor's degree only at the discretion of the individual college or school.

Graduate courses numbered 400-499 are designed for professional programs leading to graduate degrees other than the M.A., M.S., and Ph.D. These courses may not be used to satisfy minimum graduate course requirements

for the M.A. or M.S. degree but may apply as electives.

Individual study and research courses (numbered 500-599) are reserved for advanced study and are not open to undergraduates. Courses are numbered as follows: 595/596 = directed individual study or research; 597 = preparation for master's comprehensive or doctoral qualifying examination; 598 = master's thesis research and preparation; and 599 = doctoral dissertation research and preparation. (Courses numbered 501 are not individual study and research but are cooperative programs held in conjunction with USC.) See individual departmental listings for specific limitations on 500-series courses.

Note: These definitions do not apply to the School of Law, which maintains its own course numbering system.

UCLA Extension Courses

In general, you may not attend UCLA Extension for degree credit if you are enrolled in UCLA regular session at the same time. However, certain Extension courses (numbered 1-199), prefixed by XL or XLC in the course listings, yield credit toward the bachelor's degree. Graduate students may petition to apply up to two XLC courses toward the master's degree. For more details, see Concurrent Enrollment in the Academics section of this catalog.

Concurrent and Multiple Listings

Concurrently scheduled courses (identified by a capital C before the course number) are pairs of courses, usually within a single department or program, for which credit is given at two levels — undergraduate and graduate. Concurrently scheduled courses are offered at the same time and place with the same instructor, but work levels and performance standards are evaluated differently for students at each level. (Concurrently scheduled courses as described here should not be confused with concurrent courses offered through UCLA Extension.)

Multiple-listed courses (identified by a capital M before the course number) are courses of the same format and level offered jointly by more than one department. For example, Language in Culture is offered by the Department of Anthropology (Anthropology M140) and the Department of Linguistics (Linguistics M146). You will find that particular course listed under both departments in the Curricula and Courses section.

Visiting Assistant Professor

Kobla Ladzekpo, M.A. (*Ethnomusicology and Systematic Musicology*)

Scope and Objectives

The basic objective of the African Area Studies Program is an intellectual one — to provide interested students with the opportunity to engage in intensive study and research on Africa on an interdisciplinary basis. The program offers high quality African area courses in a wide range of fields, including the social sciences, humanities, and professional fields. The Master of Arts is not a professional degree, but students are encouraged to enroll in courses in several professional schools on campus. Articulated degree programs are also offered.

Academic flexibility draws many students to the program. Because there are more than 30 active faculty members on campus with African interest and experience in many disciplines, students have multiple options to design individualized programs.

According to a recent survey, 45 percent of the program's graduates are continuing study at the postgraduate level, 25 percent are employed in higher education, and 30 percent work with international or foreign organizations in 20 countries.

Graduate Study

The following constitutes introductory information regarding graduate degree programs. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degrees

Admission

In addition to the University minimum requirements, applicants to the Master of Arts in African Area Studies are required to (1) submit three letters of recommendation, which normally should be from academic referees; (2) present a dossier containing a résumé describing academic, African-related, and professional experience and a research paper or other writing sample that well demonstrates their writing and analytical skills; and (3) take the Graduate Record Examination (GRE) General Test.

Also, applicants should have adequate preparation in undergraduate fields related to the

program. Required preparation for the Master of Arts in African Area Studies most typically consists of a Bachelor of Arts in the social sciences, humanities, or fine arts.

M.F.A. Film and Television/M.A. African Area Studies

The African Area Studies Program and the Department of Film and Television have an articulated degree program which allows students to combine study for the Master of Arts in African Area Studies with the Master of Fine Arts in Film and Television, with a specialization in motion picture/television.

M.P.H./M.A. African Area Studies

The African Area Studies Program and the School of Public Health have an articulated degree program whereby a student can work sequentially for the Master of Arts in African Area Studies and the Master of Public Health. By planning the concentration in public health while taking the M.A. in African Area Studies, it may be possible to shorten the amount of time it would normally take to complete both degrees.

Areas of Study

Each student chooses a disciplinary (or interdisciplinary) concentration which requires at least five courses. Most concentrations are in the social sciences, fine arts, humanities, public health, or urban and regional planning. Sociology and anthropology may be taken as a combined major, as may interdisciplinary courses in development studies.

Course Requirements

A minimum of nine courses is required for the M.A., at least five of which must be at the graduate level. The courses must be distributed between disciplines as follows:

(1) Major discipline: a minimum of five courses, of which three must be at the graduate level. Sociology and anthropology may be taken as a combined major. Other combined majors must be approved by the graduate adviser.

(2) A minimum of four other courses outside the major area, of which three must be at the graduate level.

Except for 500-series courses, University regulations indicate that a student in an interdepartmental degree program may not apply courses taken on an S/U grading basis toward the master's degree. By petition, the program will consider an exception for one of the nine required courses. Such petitions must be approved by a graduate adviser and the Graduate Division. One course in the 500 series may be applied toward the total course requirement and toward the minimum graduate course requirement. With consent of the graduate adviser, other 500-level courses may be allowed but may not be applied toward the minimum graduate course requirement.

Comprehensive Examination Plan

The comprehensive examination plan involves a four- to six- hour written examination. It is set by a three-person faculty committee, two members of which must be from the major discipline or field of concentration. The examination is taken in the last quarter of residence. In consultation with the graduate adviser, the student selects committee members for the examination. The chair of the committee receives questions from other members and is responsible for setting the examination questions and requirements. An additional oral examination may be held at the discretion of the examining committee. If the comprehensive examination is failed, it may be retaken only once.

Thesis Plan

The thesis option is available by permission of the graduate adviser. Upon obtaining permission, the student, in consultation with the graduate adviser, selects a faculty committee to supervise and assess the thesis. Two of the three faculty committee members, including the chair, must be from the area of concentration; a third member must be from another discipline. The thesis must reflect the major discipline or field of concentration. An oral defense may be required in some circumstances.

Graduate Courses

M229B. Africana Bibliography and Research Methods. (Same as Library and Information Science M229B.) Problems and techniques of research methodologies related to Africana studies. Emphasis on relevant basic and specialized reference materials, using full range of available information resources, including library collections of books, serials, and computerized databases.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

African Area Studies Course List

All courses are not offered every academic year. You should verify courses with the respective departments.

Courses with asterisks are special courses which may be applied toward the M.A. degree requirements with prior approval of the graduate adviser. These courses either do not exclusively focus on Africa or focus on Africa only in certain years.

African Languages (Linguistics) 1A-1B-1C. Elementary Swahili

AFRICAN STUDIES

*Interdepartmental Program
College of Letters and Science*

UCLA
10244 Bunche Hall
Box 951310
Los Angeles, CA 90095-1310
(310) 825-2944

Professors

Christopher Ehret, Ph.D. (*History*), Chair
Thomas J. Hinnebusch, Ph.D. (*Linguistics, African Languages*)
Richard L. Sklar, Ph.D. (*Political Science*)

Scope and Objectives

This special undergraduate program is designed primarily for (1) students who plan to live and work in Africa or who are interested in government and public service careers involving African affairs and (2) students who plan to pursue graduate work in one of the social sciences or Near Eastern and African languages, with primary concentration on the African field.

The philosophy of the specialization is that people with a solid background in one of the established disciplines can make the best contribution to an understanding of Africa and its problems. Thus, the specialization can be taken only jointly with work toward a bachelor's degree, normally in one of the following fields: anthropology, economics, geography, history, linguistics, political science, or sociology. Students completing this special program receive a degree with a major in a selected discipline and specialization in African studies. The chair of the committee in charge certifies completion of the program.

Special Undergraduate Program

Preparation for the Specialization

Required: History 10A-10B and either African Languages M190 or a three-term sequence in any African language.

Upper Division

Students are required to take a departmental major in the social sciences or, by special arrangement with the committee chair, in the humanities or arts. In addition, you are required to take an upper division course related to Africa in each of four departments.

For more information, contact the Assistant Graduate Adviser, African Studies Center, 10244 Bunche Hall (310-825-2944) or Professor Christopher Ehret, History, 6265 Bunche Hall (310-825-4093, 825-4601).

Paul Von Blum, J.D.

Scope and Objectives

Originally born during the late 1960s and early 1970s, the Afro-American studies major was designed to fill a void that existed at UCLA in terms of scholarly and curricular material relevant to the African American experience. Students and faculty currently associated with the program see the major as meeting a number of academic, personal, and social needs.

The program offers both a Bachelor of Arts and a Master of Arts degree. While it is important that students become expert within a traditional discipline, it is even more important that students examine both the truth and the fiction regarding the African American experience in the U.S. For African American students, this leads to a heightening of self-awareness and self-pride. For non-African American students, such a major provides a broadening of perspectives to take into account more than a singular cultural view.

The fundamental goal of the curriculum is to provide students with a comprehensive and multidisciplinary introduction to the crucial life experiences of African Americans. This goal is achieved in two primary ways. First, it provides an interdisciplinary exposure to particular features of the African American experience. Majors gain an in-depth understanding of the historical, anthropological, sociological, psychological, economic, and political aspects of African America. The curriculum also provides opportunities to study the literary, musical, and artistic heritage of peoples of African descent. Second, students gain expertise in the concepts, theories, and methods of a traditional academic discipline. Majors are required to select an area of concentration in one of the following fields: anthropology, economics, English, history, philosophy, political science, psychology, or sociology (concentrations in departments not listed must be approved by the program adviser).

Bachelor of Arts Degree

The B.A. program in Afro-American Studies is periodically revised; check with the program office for changes and/or updates.

Preparation for the Major

Required: History 10A and the lower division courses listed in one of the following concentrations, plus three courses from at least two additional concentrations (requisites for the courses listed must be completed before enrolling in a given course; this is especially important for the quantitative courses in economics and psychology): *anthropology* — Anthropology 8, 9, 10 (or 7), 12; *economics* — Economics 1, 2, 40, Mathematics 3A, 31E (or 3A and 3B, or 31A and 31B); *English* — English 3, 4, 10A, 10B, 10C (all must be taken in sequence); *history* — History 1A-1B-1C, 6A-6B-6C, 10B, and 99 or 100A; *philosophy* — Philosophy 4, 21, 22, 31; *political science* — Political Science 6, 20, 40, Sociology 1, Economics 1; *psychology* — Mathematics 2, Psychology 10, 41, 42, Biology 2, Anthropology 7, Physics 10 (or 3A or 6A or 8A), one year of high school chemistry (or Chemistry and Biochemistry 2 or 11A); *sociology* — Afro-American Studies M5 or Anthropology 34, Mathematics 2, Sociology 1, 18, Anthropology 9. You are strongly urged to complete the required lower division courses within the first two years of the major.

The Major

Required: (1) Anthropology M164, English M104A or M104B or M104C, History M158B-M158C; (2) four upper division and/or graduate courses in Afro-American studies (or four departmental courses that are multiple-listed with Afro-American Studies); (3) six upper division electives within the department of concentration selected from the approved courses listed below; (4) two upper division electives outside the department of concentration selected from the approved courses list. Note: You may petition the committee which administers the degree program to have a course not on the approved list accepted for the major. In arranging a course of study, you should select a combination of courses that best meets your current and future educational and career goals.

Approved courses (recommended courses are in bold):

Afro-American Studies **100B, C101A through C101Z, M104A, M104B, M104C, M144, M145, M158A, M158B, M158C, M158E, M164, M172, M197, 197B, 199**

Anthropology 110, **111, 115P, 120, 124, 125, 130, 135A, 135B, M136Q, 138, M140, 142A, 142B, M145, 150, 151, 152, 153, M154, 158, 161, M164, 167, M168, 171, 180, 182, 186, 199**

Economics **11, 101, 102, 103A through 103Z, 107, 110, 111, 112, 120, 121, 130, 133, M135, M136, 141, 144, 147A, 147B, 150, 151, 160, 161, 180, 183, 190, 191, 192, 199**

English 80, 85, 95A, 95B, 95C, 100, **M104A, M104B, M104C, M105, 106, M107A, M107B, M107C, 108A, 108B, 109, M111A, 114, 115A, 118, 131A through 131D, 136A, 136B, 136C, 140A, 140B, 141A, 141B, 142A, 142B, 143, 171A, 171B, 173B, 174B, 178, 188, 189, 190, M197, 199**

History 99, 100A, M104A, M104B, 107A, 107B, 109A, 109B, 135A, 135B, **145A, 145B, 146A, 146B, 147A, 147B, 148A, 148B, 148C, 149A, 149B, 154A, 154B, 156A, 156B, 156C, 156D, 156E, M158A through M158E, M159A, M159B, 160A, 160B, 161, 166, M175A, 175B, 175C, 176A, 176B, 177, 178A, 178B, 179A, 179B, 193A, 199**

Philosophy 100A, 100B, M101A, M101B, M102, **104, 124, 125, 126, 129, 150, 151A, 151B, 153A, 156, 166, 172, 178, 182, M192, 199**

Political Science **102, 104A, 104B, M105, M106, 111A, 111B, 111C, 113, 114A, 114B, 115, 116, 119A through 119Z, 120, 123A, 123B, 124, 125, 126, 131, 137A, 137B, M139A, M141A, 141B, 141C, 142A, 142B, 142C, 143A, 143B, M144B, 145A through 145D, 146E, 166A, 166B, 166C, 167A, 167B, 168, 199**

Psychology **42, 110, 111, 112B, 115, 116, 119D, 120, 121, 123, 127, 129A, 129B, 130, 132, 135, 136A, 136B, 137C, 137D, M138, M142, 150, 151, M163, M165, 170A, 170B, M172, 175, 177, 179A, 192, 193, 194, 197,**

199 (note: courses 110, 115, 120, 125, 127, 135, M142, and 151 should be taken by students planning to pursue graduate study in psychology)

Sociology **101, 102, 103, 104, 105, 113, 116, 132, 133, 134, 135, 136, M138, M144, 145, 147A, 147B, 148, 149, 156, 157, 158, 160, 169, 170, 171, 174, M175, M176, 182, 183, 184, 185, 186, 195A through 195Z, 197, 199**

Honors Option

Students participating in the honors option are required to complete an independent research paper or project undertaken with the guidance of a faculty member. If you are an Afro-American studies major with a grade-point average of 3.5 or better, you complete the honors option by writing an undergraduate thesis. For more information, contact the curriculum coordinator of the Afro-American Studies Program.

Double Major Option

Some students elect to complete the requirements of two majors (Afro-American studies and another). If you are interested in this option, you must maintain good academic standing and complete both majors within the 228-unit maximum imposed by the college. Courses used to satisfy the requirements for the principal major may also be used to satisfy the requirements for the secondary one, but no more than five courses may be common to both majors. Because of the complexity of the double major, you are encouraged to plan your curriculum early and to do so in consultation with the college counselors and/or the Afro-American Studies Program adviser or curriculum coordinator.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degree

Admission

Applicants for admission to the Master of Arts in Afro-American Studies degree program must possess a bachelor's degree in the social sciences or humanities and demonstrate an interest in African American studies either through their previous course of study or in their future plans. Students are selected on the basis of the following criteria: (1) official transcripts; (2) three academic letters of recommendation; (3) a minimum of 3.0 or B average in the junior/senior years of college; (4) a statement of purpose describing applicant's background in African American studies, proposed program of study, and future career goals; (5) scores on the verbal and quantitative sections of the Graduate Record Examination (GRE); (6) an original term paper or research

paper which best expresses the student's interests and abilities; and (7) other evidence of promise that is deemed relevant, such as work experience, accomplishments, or community and public service.

Admission to the program is limited to the Fall Quarter. Prospective students may request applications from the M.A. Degree Program in Afro-American Studies at the address given at the beginning of this listing.

Areas of Study

The M.A. in Afro-American Studies is interdepartmental, with formal support linkages to nine disciplinary departments: Anthropology, English, History, Linguistics, Music, Philosophy, Political Science, Psychology, and Sociology. Related courses are also offered in the following schools and departments: Art, Dance, Economics, Geography, Psychiatry and Biobehavioral Sciences, Theater, Folklore and Mythology, Latin American Studies, African Area Studies, Education, Library and Information Science, Management, Public Health, Social Welfare, and World Arts and Cultures.

Course Requirements

A total of 12 upper division and graduate courses are required for the degree. Of that number, only four may be selected from upper division listings. The program has a structured core of six required courses. Students are required to take Afro-American Studies M200A, three courses from 200B through 200F, 270A, and one graduate-level course in research methods (for social sciences students) or critical theory (for humanities students). The methods course should be selected from the list approved by the interdepartmental degree committee (students may petition to substitute an appropriate upper division course if their outside department's methods course is closed to nonmajors). These courses should normally be taken in the first year of study. The second year is devoted to acquiring disciplinary competence in the student's cognate field, and six courses must be selected from that discipline.

Eight units of 500-series courses (excluding 597 and 598) may be applied to either the total course requirement or the minimum graduate course requirement.

Comprehensive Examination Plan

Students may elect to complete the M.A. degree through the comprehensive examination option. The examination is administered by a committee consisting of at least three faculty members appointed by the program. The examination is offered on a regular basis.

Thesis Plan

The thesis is the final report on the results of the student's original investigation. Before beginning work on the thesis, students should consult closely with their academic adviser and the thesis committee.

Lower Division Courses

M5. Social Organization of Black Communities. (Same as Sociology M5.) Lecture, three hours; discussion, one hour. Analysis and interpretation of social organization of black communities, with focus on origins and development of black communities, competing theories and research findings, defining characteristics and contemporary issues.

6. Trends in Black Intellectual Thought. Overview of major intellectual trends that have shaped ways in which Afro-American thinkers have interpreted experiences of blacks in the U.S., drawing from such fields as history, philosophy, and literature.

Upper Division Courses

100B. Psychology from an Afro-American Perspective. Survey of psychological literature relevant to Afro-Americans, with emphasis on contributions of Afro-American psychologists. Topics include history of psychology, testing and intelligence, the family, personality and motivation, racism and race relations, education, community psychology, and future of Afro-American psychology.

C101A-C101Z. Special Topics in Afro-American Studies. Prerequisite: consent of instructor. Variable topics. May be repeated for credit. Concurrently scheduled with courses C201A-C201Z.

M102. Culture, Media, and Los Angeles (6 units). (Same as Asian American Studies M197H and Honors Collegium M102.) Lecture, four hours; screenings, two hours. Prerequisite: upper division standing. Role of media in society and its influence on contemporary cultural environment, specifically in Los Angeles; issues of representation as they pertain to race, ethnicity, gender, and sexuality. P/NP or letter grading.

M103A. African American Theater History: Slavery to Mid-1800s. (Same as Theater M103A.) Lecture, three hours. Prerequisite: upper division standing. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from slavery to the mid-1800s.

M103B. African American Theater History: Minstrel Stage to Rise of the American Musical. (Same as Theater M103B.) Lecture, three hours. Prerequisite: upper division standing. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from the minstrel stage to the rise of the American musical.

M103E. African American Theater History: The Depression to the Present. (Same as Theater M103E.) Lecture, three hours. Prerequisite: upper division standing. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from the Depression to the present.

M104A. Early Afro-American Literature. (Same as English M104A.) Prerequisite: satisfaction of Subject A requirement. Introductory survey of black American literature from the 18th century through World War I, including oral and written forms (folktales, spirituals, sermons; fiction, poetry, essays), by authors such as Phillis Wheatley, David Walker, Frances Harper, Frederick Douglass, Harriet Jacobs, Paul Laurence Dunbar, Charles W. Chesnut, Booker T. Washington, and Pauline Hopkins.

M104B. Afro-American Literature from the Harlem Renaissance to the 1960s. (Same as English M104B.) Prerequisite: satisfaction of Subject A requirement. Introductory survey of 20th-century black American literature from New Negro Movement of post-World War I period to the 1960s, including oral materials (ballads, blues, speeches) and fiction, poetry, and essays by authors such as Jean Toomer, Claude McKay, Langston Hughes, Sterling Brown, Nella Larsen, Zora Neale Hurston, Richard Wright, Ann Petry, James Baldwin, and Ralph Ellison.

M104C. Afro-American Literature since the 1960s. (Same as English M104C.) Prerequisite: satisfaction of Subject A requirement. Introductory survey of diverse forms of Afro-American literary expression produced from rise of Black Arts Movement of the 1960s to the present by writers such as Amiri Baraka, Nikki Giovanni, Alice Walker, Etheridge Knight, Toni Morrison, Martin Luther King, Jr., Paule Marshall, Ernest Gaines, Ishmael Reed, and Audre Lorde. P/NP or letter grading.

M110A-M110B. The African American Musical Heritage. (Same as Ethnomusicology M110A-M110B and Folklore M154A-M154B.) Prerequisite: consent of instructor. Study of African music and its impact on the Americas; survey of development of various African American musical genres from slave era to the present, including traditions in the West Indies and Central and South America.

M144. Ethnic Politics: African American Politics. (Formerly numbered M147.) (Same as Political Science M144B.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: Political Science 40, and one 140-level political science course or one upper division course on race or ethnicity from history, psychology, or sociology, or consent of instructor. Emphasis on dynamics of minority group politics in the U.S., touching on conditions facing racial and ethnic groups, with black Americans being the primary case for analysis. Three primary objectives: (1) to provide descriptive information about social, political, and economic conditions of the black community, (2) to analyze important political issues facing black Americans, (3) to sharpen students' analytical skills.

M145. Ellingtonia. (Same as Ethnomusicology M111.) Music of Duke Ellington, his life, and far-reaching influence of his efforts. Ellington's music, known as "Ellingtonia," is one of the largest and perhaps most important bodies of music ever produced in the U.S. Covers the many contributions of other artists who worked with Ellington, such as composer Billy Strayhorn and musicians Johnny Hodges, Cootie Williams, and Mercer Ellington.

M158A. Comparative Slavery Systems. (Same as History M158A.) Examination of the slavery experience in various New World slave societies, with emphasis on outlining similarities and differences among the legal status, treatment, and slave cultures of North American, Caribbean, and Latin American slave societies.

M158B-M158C. Introduction to Afro-American History. (Same as History M158B-M158C.) Survey of the Afro-American experience, with emphasis on the three great transitions of Afro-American life: transition from Africa to New World slavery, transition from slavery to freedom, and transition from rural to urban milieu.

M158E. African American Nationalism in First Half of the 20th Century. (Same as History M158E.) Critical examination of the African American search in first half of the 20th century for national/group cohesion through collectively built institutions, associations, organized protest movements, and ideological self-definition. P/NP or letter grading.

M164. The Afro-American Experience in the U.S. (Same as Anthropology M164.) Promotes understanding of contemporary sociocultural forms among Afro-Americans in the U.S. by presenting a comparative and diachronic perspective on the Afro-American experience in the New World. Emphasis on utilization of anthropological concepts and methods in understanding the origins and maintenance of particular patterns of adaptation among black Americans.

M166. Afro-American Sociolinguistics: Black English. (Same as Anthropology M145.) Lecture, three hours. Basic information on Black American English, an important minority dialect in the U.S. Social implications of minority dialects examined from perspectives of their genesis, maintenance, and social functions. General problems and issues in fields of sociolinguistics examined through a case-study approach.

M172. The Afro-American Woman in the U.S. (Same as Psychology M172 and Women's Studies M172.) Limited to juniors/seniors. Impact of social, psychological, political, and economic forces which impact on interpersonal relationships of Afro-American women as members of a large society and as members of their biological and ethnic group.

M175. Interracial Work, Friendship, and Love Relationships of African American Men and Women. (Same as Women's Studies M173.) Seminar, three hours. Examination of factors that influence development, maintenance, and dissolution of interracial relationships of African Americans in three areas: work life, friendships, and intimate love relationships. P/NP or letter grading.

M195. Investigative Journalism and Communities of Color. (Same as Asian American Studies M163.) Lecture, three hours. Role of investigative journalism in understanding interethnic conflict and cooperation. Exploration of different perspectives on issues by comparing mainstream, ethnic, and alternative media coverages.

M197. Topics in Afro-American Literature. (Same as English M197.) Variable specialized studies course in Afro-American literature. Topics include the Harlem Renaissance; Afro-American Literature in the Nadir, 1890 to 1914; Contemporary Afro-American Fiction. May be repeated for credit.

197B. Special Studies in Comparative Literature: Caribbean Literature. General introduction to literature of the English-speaking Caribbean by reviewing its historical and geographical background. To analyze the historical process toward self-determination in the literature, the following topics are included: (1) alienation and the search for community, (2) "external" relationships (the ancestor, the kinsman, the other), and (3) form and language.

199. Special Studies in Afro-American Studies (2 to 4 units). To be arranged with faculty member who will direct the study. Prerequisites: 3.0 GPA in the major, junior or senior standing, consent of instructor. Intensive directed research project. Eight units may be applied toward major requirements.

Graduate Courses

M200A. Advanced Historiography: Afro-American. (Same as History M200V.) Seminar, three hours. May be repeated for credit.

200B. Seminar: Political Economy of Race. Prerequisite: consent of instructor. Seminar on political economy, with special reference to black political economy and with focus on dynamics of allocation of wealth and power resources among social classes and racial and ethnic groups in the U.S. Presented in a context that is at once comparative and international, seminar emphasizes internationalism and transnationalism as well as the uniqueness of the Afro-American condition. Attempts to relate the black condition in the U.S. to the socioeconomic system of this country and to compare it to political, social, and economic conditions of African peoples elsewhere.

M200C. Selected Problems in Urban Sociology. (Same as Sociology M262.) Seminar. Prerequisite: consent of instructor.

M200D. Afro-American Sociolinguistics: Black English. (Same as Anthropology M243Q.) Lecture, three hours. Prerequisite: consent of instructor. Basic information on Black American English, an important minority dialect in the U.S. Social implications of minority dialects examined from perspectives of their genesis, maintenance, and social functions. General problems and issues in fields of sociolinguistics examined through a case study approach. Students required to conduct research in consultation with instructor and participate in group discussion.

M200E. Studies in Afro-American Literature. (Same as English M262.) Prerequisite: consent of instructor. Intensive research and study of major themes, issues, and writers in Afro-American literature. Discussions and research on aesthetic, cultural, and social backgrounds of Afro-American writing. May be repeated for credit.

200F. African American Psychology. Seminar. Prerequisite: consent of instructor. Survey of psychological literature as it pertains to persons of African American descent. Critical review of implications of "mainstream" research on African Americans, including discussion of research on the family, academic achievement, and psychological assessment (testing). Emphasis also on theoretical approaches advanced by African American scholars: African philosophy, perspectives on racism in psychology, and research in the black community.

C201A-C201Z. Special Topics in Afro-American Studies. Prerequisite: consent of instructor. Variable topics. May be repeated for credit. Concurrently scheduled with courses C101A-C101Z.

M211. Seminar: African American Music. (Same as Ethnomusicology M211.) Seminar, three hours. Prerequisites: Ethnomusicology M110A-M110B or consent of instructor, graduate standing. Intensive investigation of problems, theories, and methods of research related to study of African American music. Emphasis on relationship of problems to representative styles of African American music.

M240. Assessment and Treatment of Afro-American Families. (Same as Psychiatry M240.) Seminar, three hours. Designed for both mental health trainees and graduate students interested in developing and refining skills in assessment and treatment of African American families within a sociocultural context.

241. Special Topics in Afro-American Studies. Lecture, four hours; discussion, one hour. Intensive research and study of major themes and issues in various areas of Afro-American studies.

270A. Survey of Afro-American Research. Seminar, three hours. Overview of research methodologies in humanities and social sciences, with firsthand reports from faculty in various fields. Introduction to research in and related to Afro-American studies and application of such research.

596. Directed Readings and Tutorials. Provides students with umbrella under which they can pursue specialized interests from which there is insufficient demand to warrant offering a formal course.

597. Preparation for M.A. Comprehensive Examination (4 or 8 units). Prerequisites: graduate standing, consent of instructor. May not be applied toward M.A. course requirements. S/U grading.

598. Research for and Preparation of M.A. Thesis (4 or 8 units). Prerequisites: graduate standing, consent of instructor. May not be applied toward M.A. course requirements. S/U grading.

Scope and Objectives

Because UCLA possesses a substantial number of faculty in the humanities and social sciences engaged in teaching and conducting research on American Indians, the nation's first interdisciplinary M.A. program in American Indian Studies was established here.

The program draws primarily on existing courses in the participating departments, where research and research methodologies are of primary concern. Students are exposed to Indian-related research in a number of different disciplines; demonstration of research skills is required. You will graduate with the training you need to teach Native American studies or to serve in an administrative capacity in Indian programs. The M.A. program ranks among the top Indian studies programs in the country.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degree

Admission

A bachelor's degree from an accredited undergraduate institution is required for admission to the Master of Arts program in American Indian Studies. Applicants must demonstrate interest in American Indian studies either by formal coursework, independent study, or practical experience. As part of the application, applicants must submit a detailed account of their background, potential career plan, and interest in American Indian studies. Preference is given to individuals with undergraduate majors relevant to the proposed areas of concentration within the M.A. degree: anthropology, English, history, linguistics, literature, sociology, fine arts, or American Indian studies.

Entering students must meet the University's minimum admission requirement of a 3.0 grade-point average in all work completed during the last two undergraduate years and in all prior graduate work. The Graduate Record Examination (GRE) is not required, but applicants are encouraged to take the examination and submit test results as part of the docu-

ments supporting their enrollment application. At least three faculty letters of recommendation must be submitted. Admission to the program is limited to the Fall Quarter. Application forms and further information may be obtained from the Committee to Administer the M.A. Degree in American Indian Studies at the address given at the beginning of this listing.

Areas of Study

The American Indian Studies M.A. is an interdepartmental program with 13 participating academic schools and departments: Anthropology, Art, Education, English, Ethnomusicology and Systematic Musicology, Folklore and Mythology, History, Law, Library and Information Science, Linguistics, Music, Sociology, and Theater. The disciplines are grouped into four areas of concentration: history and law; expressive arts; social relations; and language, literature, and folklore. Courses related to the American Indian Studies M.A. are also offered in the following departments: Political Science, Social Welfare, and Psychology.

Course Requirements

A minimum of 10 courses is required, at least seven of which must be graduate courses. Four courses are required: American Indian Studies M200A, M200B, M200C, which must be taken in the first year, and one of the language/linguistics options described below, which must be taken by the end of the second year. In addition, one of the remaining six courses must be a graduate course concerned with research methodology.

One of the following courses must be completed to fulfill the language/linguistics requirement: (1) Linguistics 114; (2) Anthropology 243P; or (3) for native speakers of an American Indian language, an independent study course (taken with consent of the instructor) in either linguistics or anthropology, designed and supervised by a consenting faculty member, in which the objective of the course is to impart a structural knowledge of the student's language. These courses are designed to show how American Indian languages and communicative norms are primary vehicles for understanding American Indian cultures.

Students select one area of concentration: (1) history and law, (2) expressive arts, (3) social relations, (4) language, literature, and folklore. Students can petition for optional combinations of interdisciplinary work through the committee to administer the program. In addition to the four required courses, students must complete a minimum of four courses in an area of concentration. Three of these must be graduate-level courses. Two additional courses are to be chosen from other areas of concentration. Courses must be chosen from an approved list maintained by the program.

Two courses in the 500 series may be applied toward the 10-course requirement. However, only one 596 course may be applied toward the program requirement of seven graduate courses.

Comprehensive Examination Plan

A proposed comprehensive examination committee, composed of three faculty members (two from the major area of concentration and one from the minor area), must be submitted to the Graduate Advisory Subcommittee by the end of the fourth quarter of study. The comprehensive examination normally consists of a written examination in the major area of concentration and in the minor area of concentration. The written examination is typically followed by an oral discussion of the student's answers involving both the student and the committee members. The examination is designed and evaluated by the student's M.A. committee. Students should work closely with their committee members in preparing for the examination.

Thesis Plan

A proposed thesis committee, composed of three faculty members (two from the major area of concentration and one from the minor area), must be submitted to the Graduate Advisory Subcommittee by the end of the fourth quarter of study. Students must also submit a thesis proposal to their M.A. committee by the end of the fourth quarter of study. The M.A. thesis should demonstrate the student's ability to define and solve a significant problem in the area of concentration. It should give evidence of mastery of theory and methodology relevant to the topic, familiarity with literature in the field, competency in research techniques, and ability to make an original contribution to the field. Copies of the thesis must be submitted to each member of the committee by the fifth week of the quarter in which students expect to graduate.

Lower Division Course

10. Introduction to American Indian Studies. Lecture, four hours; discussion, one hour. Survey of selected Native North American cultures from pre-Western contact to the contemporary period, with particular emphasis on early cultural diversity and diverse patterns of political, linguistic, social, legal, and cultural change in postcontact period. P/NP or letter grading.

Upper Division Course

197. Special Topics in American Indian Studies. Variable topics selected from the following: Myth and Folklore of Indian Societies; Contemporary American Indian Literature; Social Science Perspectives of American Indian Life; Law and the American Indian; History of American Indians (cultural area); Dance and Music of American Indians (cultural area); American Indian Policy. Consult *Schedule of Classes* for topics and instructors. May be repeated twice for credit.

Graduate Courses

M200A. Advanced Historiography: American Indian Peoples. (Same as History M200W.) Seminar, three hours. Designed to familiarize students with major genres of literature related to American Indian history. Subjects include theories of Indian origins, historical demography, Euro-American attitudes toward Indian peoples, studies of U.S. Indian policy, and tribal histories. Standard theoretical approaches, including cultural ecology and dependency theory.

M200B. Cultural World Views of Native America. (Same as English M266.) Seminar, three hours. Exploration of written literary texts from oral cultures and other expressive cultural forms—dance, art, song, religious and medicinal ritual—in selected Native American societies, as these traditional and tribal contexts have been translated into contemporary literary texts (fiction, poetry, essay, and drama). Survey, from secondary sources, of interdisciplinary methodological approaches taken from literary analysis, structural anthropology, folklore, linguistics, and ethnomusicology. May be repeated for credit with instructor and/or topic change.

M200C. Contemporary Issues of the American Indian. (Same as Anthropology M269 and Sociology M275.) Introduction to most important issues facing American Indians as individuals, communities, tribes, and organizations in the contemporary world, building on historical background presented in course M200A and cultural and expressive experience of American Indians presented in course M200B.

201. Topics in American Indian Studies. Discussion, three hours. Prerequisite: consent of instructor.

Scope and Objectives

The Department of Anesthesiology in the School of Medicine, in conjunction with the Los Angeles County Olive View-UCLA Medical Center, offers a program leading to the M.S. degree in Nurse Anesthesia. Administratively housed at the Olive View-UCLA Medical Center, the program trains qualified registered nurses in the specialty of anesthesiology and prepares graduates for the national certification examination for nurse anesthetists. Graduates attain a high level of clinical competence combined with an extensive body of didactic knowledge relevant to the specialty. The program is designed to lead to careers in the clinical practice of nurse anesthesiology, with the opportunity to participate in research in the area.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degree**Admission**

The Master of Science program in Nurse Anesthesia is under review and admissions are currently closed.

Areas of Study

Consult the department.

Course Requirements

Thirty-six graduate and upper division units are required for the Master of Science degree in Nurse Anesthesia, of which 20 units must be at the graduate level.

Required courses are Anesthesiology 215A, 215B, 220, 221, 223, 225, 290; Education 210B; Physiology 100; four units from Anesthesiology 210A, 210B, 210C; Anesthesiology 597 or 598A; and Anesthesiology 598B.

Anesthesiology 598B may be repeated twice, but only four units of 500-level courses may be applied toward the graduate unit requirement. Courses in the 500 series may be taken for letter grades.

Professional courses are prerequisite to certification in the Nurse Anesthesia Program. Twenty-two units of professional courses are required as follows: Anesthesiology 400A through 400G, 401, 402A, 402B.

Students must complete all didactic, clinical, and thesis or comprehensive examination work to earn the M.S. degree.

The program does not discriminate on any basis unless a disability is determined by the selection committee to preclude the safe clinical practice of anesthesia.

Students must complete minimum requirements of the American Association of Nurse Anesthetists Council on Accreditation.

Eligibility to take the national certification examination is only granted after completion of all course requirements and successful thesis defense and filing.

Comprehensive Examination Plan

This plan is recommended for students planning doctoral study.

Thesis Plan

The thesis committee is established during the second year of the program. The thesis proposal is written and approved during the second year and must be completed (filed) by the end of the Spring Quarter of the third year.

Graduate Courses

210A. Chemistry and Physics of Nurse Anesthesia I (2 units). Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Study of principles of chemistry and physics as applied specifically to practice of anesthesia.

210B. Chemistry and Physics of Nurse Anesthesia II (2 units). Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Continuation of study of principles of chemistry and physics as applied specifically to practice of anesthesia.

210C. Chemistry and Physics of Nurse Anesthesia III (2 units). Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Continuation of study of chemistry and physics as related to anesthesia management, with specific emphasis on biochemistry as related to acid-base balance and theories of narcosis.

215A. Pharmacology of Nurse Anesthesia I. Lecture, four hours; discussion, one to two hours. Introduction to basic pharmacological principles as applied to administration of anesthesia. Study of uptake and distribution, mechanism of action, fate, and toxicology as related to anesthetic agents.

215B. Pharmacology of Nurse Anesthesia II. Lecture/discussion. Study of pharmacology of adjunct drugs influencing anesthesia administration, including their uptake and distribution, mechanism of action, fate, biotransformation, and toxicology.

220. Respiratory Anatomy and Physiology for Nurse Anesthetists (2 units). Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Study of structure and function of respiratory system, with emphasis on anatomy and physiology at cellular level.

221. Cardiovascular Anatomy and Physiology for Nurse Anesthetists (2 units). Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Integrated study of anatomy and physiology of cardiovascular system as related to management of anesthesia administration.

M222. Biological Control Systems. (Same as Electrical Engineering M243.) Prerequisite: Electrical Engineering 141 or equivalent. Introduction to application of control theory to modeling and analysis of biological control systems, such as respiratory system, cardiovascular system, and neuromuscular system. Emphasis on solving problems of current interest in biomedicine.

223. Anatomy and Physiology of Endocrine and Excretory Systems for Nurse Anesthetists (2 units). Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Integrated study of endocrine and excretory systems as related to management of anesthesia administration.

225. Anatomy and Physiology of Nervous System for Nurse Anesthetists (2 units). Lecture, two hours; discussion, one to two hours. Prerequisite: consent of instructor. Integrated study of anatomy and physiology of nervous system as related to management of anesthesia administration.

290. Anesthesia Seminar for Nurse Anesthetists (2 units). Discussion, two to three hours. Discussion of research methods, basic statistics, and critical scientific paper analyses in relation to anesthesia research and practice.

400A. Basic Clinical Anesthesia for Nurse Anesthetists I (2 units). Lecture, three hours; laboratory, 30 hours. Prerequisites: courses 402A, 402B. Correlation of techniques of anesthesia administration with basic science knowledge as applied in the clinical area with supervised practice. S/U grading.

400B. Basic Clinical Anesthesia for Nurse Anesthetists II (2 units). Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400A. Continuation of practice of techniques of anesthesia administration as applied in the clinical area with supervised practice. S/U grading.

400C. Basic Clinical Anesthesia for Nurse Anesthetists III (2 units). Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400B. Continuation of techniques of anesthesia administration as applied in the clinical area with supervised practice. S/U grading.

400D. Clinical Anesthesia for Nurse Anesthetists IV (2 units). Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400C. Practice of refinements of anesthesia techniques, with emphasis on specialized areas of anesthesia administration in supervised practice. S/U grading.

400E. Clinical Anesthesia for Nurse Anesthetists V (2 units). Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400D. Practice of refinements of anesthesia techniques, with emphasis on specialized areas of anesthesia administration in supervised practice. S/U grading.

400F. Clinical Anesthesia for Nurse Anesthetists VI (2 units). Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400E. Practice of refinements of anesthesia techniques, with emphasis on specialized areas of anesthesia administration in supervised practice. S/U grading.

400G. Clinical Anesthesia for Nurse Anesthetists VII (2 units). Lecture, two hours; laboratory, 30 hours. Prerequisite: course 400F. Practice of refinements of anesthesia techniques, with emphasis on specialized areas of anesthesia administration in supervised practice. S/U grading.

401. Legal Aspects and Bioethics (2 units). Lecture, two hours; discussion, 30 minutes to one hour. Prerequisite: consent of department. Introduction to history, bioethics, and legal aspects of nurse anesthesia. Exploration of psychology related to the patient undergoing surgery and anesthesia.

402A. Fundamentals of Anesthesia Practice for Nurse Anesthetists. Lecture, four hours; discussion, one to two hours. Prerequisite: consent of instructor. Introduction to basic principles of anesthesia administration, including preanesthetic assessment, physical examination, techniques and procedures, and anesthesia for specialized techniques and surgery.

402B. Fundamentals of Anesthesia Practice for Nurse Anesthetists (2 units). Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Continuation of techniques and procedures, and anesthesia for specialized techniques and surgery.

596. Directed Individual Study or Research (2 to 8 units). Prerequisite: second- or third-year graduate standing in nurse anesthesiology. Individualized clinical laboratory directed by the faculty. S/U grading.

597. Preparation for M.S. Comprehensive Examination (2 units). Prerequisite: consent of instructor. Opportunity to pursue comprehensive study in anesthesiology and related areas on individual basis, with opportunity for discussion of material with instructor. S/U grading.

598A. Research in Anesthesia I (2 units). Prerequisite: consent of instructor. Opportunity to pursue anesthesia research outlets for thesis preparation. Independent research of quality suitable for publication required. May be selected instead of oral comprehensive examination for completion of M.S. program. S/U grading.

598B. Research in Anesthesia II (2 units). Prerequisite: consent of instructor. Opportunity to pursue anesthesia research outlets for thesis preparation. Independent research of quality suitable for publication required. May be selected instead of oral comprehensive examination for completion of M.S. program. May be repeated twice for credit. S/U grading.

Scope and Objectives

Anthropology, the broadest of the social sciences, is the study of humankind. One of the strengths of anthropology as a discipline is its "holistic" or integrative approach; it links the life sciences and the humanities and has strong ties with disciplines ranging from biology and psychology to linguistics, political science, and the fine arts. Anthropological study is appropriate for people with a wide variety of interests: human cultures and civilizations both present and past, human and animal behavior, particular regions of the world such as Africa, Asia, Latin America, Oceania, etc.

The department recognizes the following four fields in anthropology:

Archaeology is diverse in both methodology and geographic coverage. The greatest strengths within the department lie in the study of cultural evolution, complex societies, hunt-

ers/gatherers, iconography, craft specialization, quantitative analysis, and political economy and include major programs focused on Western North America, the high cultures of Mesoamerica and South America, Europe, Africa, and the Caribbean.

Biological anthropology is a comprehensive program on evolutionary anthropology, with emphasis on the behavioral and reproductive ecology of humans and other primates. It includes training in evolutionary theory, behavioral ecology, human ethology, reproductive physiology and ecology, paleoanthropology, primate behavior and evolution, and mathematical modeling. Faculty members have engaged in fieldwork on several continents, particularly Africa, where ongoing projects include work on human reproductive ecology, dietary and subsistence ecology, human ethology, and primate behavior.

Linguistic anthropology is an interdisciplinary field which addresses the manifold ways in which communication and culture mutually define one another in different communities worldwide. Linguistic anthropologists at UCLA have a variety of backgrounds and research interests which include the ethnography of face-to-face communication, language contact and change, verbal art and performance, and language and education. Courses are offered in urban sociolinguistics, ethnographic approaches to discourse analysis, field methods, and conversational analysis, as well as in cross-cultural pragmatics (including visual aspects of communication).

Sociocultural anthropology concerns the examination and understanding of social systems and cultural perceptions, and the human capacities which have enabled them. Its goal is to understand their operation in specific settings and to understand the experience of individuals who live in these diverse systems. Faculty members have engaged in fieldwork in almost every area of the world, but most notably in Africa, South America, East and Southeast Asia, and Oceania. They have also engaged in ethnographic research among Americans with diverse ethnic identities and in various institutional settings.

Cutting across the four fields are three other categories of course offerings: **applied anthropology, regional cultures, and history, theory, and method.**

The department offers Bachelor of Arts and Bachelor of Science degrees in Anthropology for undergraduates; the graduate program leads to the Master of Arts and Ph.D. degrees. Studies in anthropology are particularly valuable for students planning careers in which an understanding of human behavior and cultural diversity is desirable, such as business, education, law, medicine, nursing, public health, social welfare, and urban planning. Because of its breadth of outlook, anthropology also offers an ideal basis for those seeking a general education in our increasingly interdependent world.

ANTHROPOLOGY

College of Letters and Science

UCLA
341 Haines Hall
Box 951553
Los Angeles, CA 90095-1553

Nicholas Blurton Jones, Ph.D.
Robert Boyd, Ph.D.
Carole H. Browner, Ph.D.
Christopher B. Donnan, Ph.D.
Alessandro Duranti, Ph.D.

Bachelor of Arts Degree

Preparation for the Major

Required: Anthropology 7, 8, 9, and one elective from 10, 15, 33, 34, 60, 60P, 80. *All courses must be taken for a letter grade, and you must maintain an overall 2.0 GPA.*

The Major

The major is designed for students interested in an anthropological understanding of human behavior. One of the strengths of anthropology is its cross-cultural "holistic" and integrative approach with many fields, such as biology, history, linguistics, the social sciences, and many of the humanities.

To provide a comprehensive understanding of the discipline as a whole, you must take two courses in the sociocultural anthropology field and one course in each of the other three fields (see "Scope and Objectives" above). One upper division survey core course is offered in each field (two in sociocultural anthropology), but you may take any course in the given area to fulfill this requirement. *All courses must be taken for a letter grade, and you must maintain an overall 2.0 GPA.*

You must complete 14 four-unit courses as follows:

- (1) Two upper division courses in the sociocultural anthropology field and one in each of the other three fields (archaeology, biological anthropology, and linguistic anthropology).
- (2) One upper division course in regional cultures.
- (3) Four additional upper division anthropology courses.
- (4) Four courses in related fields selected from a list maintained in the department.

Students considering graduate work in anthropology are strongly encouraged to take at least one course in the history and theory of anthropology and one course in methodology in addition to the upper division core courses in the four fields.

Concentrations for the Major

Concentrations, although not required, may help define and structure an anthropology major when you want emphasis in one of the four major fields. Whether or not you opt for a concentration, the requirements for the major must still be satisfied. It is possible to use courses within your specified concentration to fulfill overlapping requirements for the major. Exceptions to the requirements below are by petition only. More detailed information on the concentrations is available from the undergraduate adviser.

- (1) *Archaeology* — Anthropology 115P, 117 (fieldwork); two courses from 110, 111, 183; one methods course from M115A, M115B, C115R, M116Q, 117P, 118A, C126P, 129Q, 138; one quantitative methods course from 80, 180, 186; one area course from 112, 113P,

113Q, 113R, 114P, 114Q, 114R; three theory courses from 120, 124, 132, 133Q, 133R, 150, 152, 153, 156, 158, 186P, M189A, M189B, Geography 140, 148, Sociology 101

(2) *Biological Anthropology* — Anthropology 120; one quantitative methods course from 80, 180, 186; one methods course from 115P, M116Q, 117, 117P, 124R, C126P, 129P, 143; one human biology and behavioral ecology course from 124, 124Q, 186P, M189A, M189B; one paleoanthropology course from 121A, 121B, 121C, or both 12 and 129Q (credit will not be granted for both courses 7 and 12); one human genetics course from 125, Biology 135, CM156; one primate behavior course from Anthropology 128A, 128B, Biology 129

(3) *Linguistic Anthropology* — Anthropology 33, M140, Linguistics 20, Sociology CM124A; two methods courses from Anthropology 141, 142A, 143, Linguistics 103; one ethnography course from Anthropology 144, M145, 146, Linguistics 114; one course from Anthropology 133Q, 133R, 135A, 135B, 135C, Communication Studies 100, Linguistics 110, 127, Psychology M137J; one term of a non-European language

(4) *Sociocultural Anthropology* — Anthropology 130, 150; one primary course from three of the four subconcentrations listed below; two history, theory, and methods courses from 80, C126P, 139, 180, 182, 186, Sociology 101; one region and society course from 158, 171, 172R, M172T, 173Q, 174P, 174Q, 175R, 175S, 175T, 175U, 175V, 177; two additional courses from one of the subconcentrations listed below:

(a) *Applied and Development Subconcentration* — Primary courses: Anthropology 60, 60P, 161; additional courses: M155Q, 162, M162P, 167, M168, 186, Development Studies M100B

(b) *Ecological and Evolutionist Subconcentration* — Primary course: Anthropology 153; additional courses: 128A, 128B, 132, 158, 165, 186, 186P, Geography 140

(c) *Social Processes and Practice Subconcentration* — Primary courses: Anthropology 151, 152, M154; additional courses: 88A through 88Z, 128A, 128B, 153, 155, 156, 158, M162P

(d) *Psychocultural and Medical Subconcentration* — Primary courses: Anthropology 135A, 135B, 135C, 135T; additional courses: 135S, M168

* Honors Program

The honors program provides research-oriented students with opportunity to engage in original research and analysis under the close supervision of faculty members and culminates in an honors thesis. To be admitted you should have a cumulative GPA of 3.0 overall and a 3.5 cumulative GPA in your upper division anthropology courses. The application for admission must be submitted during Fall Quarter. Ideal candidates should have junior or senior standing and have completed at least two upper division anthropology courses. The proposal, re-

search, analysis, and writing of your paper take place over four terms through courses 197HA-197HD. Course 197HA should be taken in Winter Quarter and 197HB in Spring Quarter. Your research should be done in summer, and courses 197HC and 197HD should be taken in Fall and Winter Quarters of your graduation year. Contact the departmental honors adviser early in your studies for more information.

Bachelor of Science Degree

Preparation for the Major

Required: Anthropology 7 or 12, 8, 9, 10 or 15; Chemistry and Biochemistry 11A, 11B/11BL, 11CL; Life Sciences 1, 2, 3, 4; Mathematics 3A, 3B, and 3C, or 31A and 31B; Physics 3A, 3B, and 3C, or 6A, 6B, and 6C. *All courses must be taken for a letter grade, and you must maintain an overall 2.0 GPA.*

The Major

The major provides an overview of human evolution and is designed to prepare students for careers in anthropology and the health sciences, including medicine, dentistry, public health, and nursing. *All courses must be taken for a letter grade, and you must maintain an overall 2.0 GPA.*

You must complete 16 four-unit courses as follows:

- (1) Two upper division courses in the sociocultural anthropology field and one in each of the other three fields (archaeology, biological anthropology, and linguistic anthropology).
- (2) One upper division course in regional cultures.
- (3) Two statistics courses (sequential recommended).
- (4) Four additional upper division anthropology courses.
- (5) Four four-unit courses in related fields selected from a list maintained in the department.

Specialization in Computing

Majors in either anthropology bachelor's degree program may select a specialization in computing by (1) completing Program in Computing 10A, 10B, and 10C or 15, (2) completing one course from Anthropology 180 or 186, (3) completing either a 199 course that focuses on the integration of computer methods with anthropological studies or one course from Program in Computing 60, Computer Science 172, or Mathematics 61, or an equivalent course (subject to approval of the departmental computer committee), and (4) satisfying all the other requirements for a bachelor's degree in the specified major. You graduate with a bachelor's degree in your major and a specialization in computing. Interested students should contact the undergraduate adviser.

Graduate Study

The following constitutes introductory information regarding graduate degree programs. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degree

Admission

Admission to the Master of Arts graduate program in anthropology is restricted to the Fall Quarter. All applicants are required to have a B.A. degree or its equivalent from a recognized college or university. A minimum grade-point average of 3.0 or its equivalent is also required for the last two years of undergraduate work and for any postbaccalaureate work completed. The department does not require an applicant to have a degree in anthropology, but it is highly desirable. If a student with a B.A. or M.A. from another field is admitted, a program of background studies in anthropology is formulated. Knowledge of a foreign language is not required for admission, but completion of the M.A. language requirement is recommended before beginning graduate work. The *Application for Graduate Admission* must be submitted by December 15 for consideration for the Fall Quarter of the following year. The following supporting material must be submitted directly to the Anthropology Department by January 6: (1) official transcripts of record from each college or university at which work has been completed; (2) statement of purpose; (3) three letters of recommendation (preferably from anthropologists); (4) a research or term paper; and (5) Graduate Record Examination (GRE) scores sent by the testing agency.

Applicants applying for readmission to the program or petitioning to change their major to anthropology are treated in the same manner as first-time applicants. These students are required to submit (1) the appropriate application form and (2) the same supporting documents as new applicants by the stated deadline date. Graduate students who have been readmitted to the program are subject to any changes in departmental policy and regulations that have been instituted since the last time they were enrolled as an anthropology major.

The department requires that two faculty members sponsor an applicant before admission is recommended. Prospective sponsors are canvassed by the Departmental Admissions Committee, but it is also appropriate for applicants to contact potential sponsors.

For further information on the departmental program, a graduate information syllabus may be obtained without charge by writing to the address given at the beginning of this listing.

Areas of Study

Archaeology; biological anthropology; linguistic anthropology; and sociocultural anthropology.

Course Requirements

The minimum course load is 12 units per quarter. However, this may be waived for good cause by petition with the approval of the student's committee chair and the department chair. Students must be registered and enrolled at all times unless on an official leave of absence.

An M.A. degree requires 10 courses (40 units) taken for a letter grade, with a minimum 3.0 grade-point average. The 10 required courses are distributed as follows:

- (1) Two courses must be the graduate proseminar, Anthropology 200A-200B.
- (2) One course must be the graduate core seminar in the student's field of specialization (200 series).
- (3) Three courses must be graduate seminars (200 series).
- (4) Four courses may be upper division (100 series) designated elective courses.
- (5) Three courses may be outside the major with the approval of the three-member guidance committee.
- (6) Two courses may be independent studies. (Eight units of course 596 taken for a letter grade may be applied toward the total M.A. course requirement, but only four of these eight units are applicable to the minimum graduate-course requirement.)

Courses taken on a S/U basis, Anthropology 598, and 300- and 400-series courses may not be applied toward the fulfillment of the M.A. unit requirement.

Core Course Requirements. The purpose of the core course requirement is to ensure that students are versed in the major fields in anthropology. Courses taken while in graduate status at UCLA may be applied toward the unit requirement of the M.A. degree. These fields and courses have been designed to meet the minimal needs of students specializing in other subfields of study.

- (1) Archaeology — Anthropology 111
- (2) Biological — Anthropology 120G
- (3) Linguistic — Anthropology M140
- (4) Sociocultural — Anthropology 130, 150

Students must demonstrate basic knowledge in all fields by exercising one or a combination of the following three options:

- (1) Taking the core course with a passing grade of B or better.
- (2) Petitioning that coursework completed elsewhere, or at UCLA as an undergraduate, constitutes the equivalent of such courses.
- (3) Passing the subfield's core course examination given in the Spring Quarter.

A grade of B or better is required in any core course taken at UCLA. If students received a grade of B-, C+, or C, they may not repeat the core course, but must take the core course ex-

amination and pass or be subject to dismissal. If a grade of C- or below is received, students may repeat the course, but must receive a grade of B or better the second time the course is taken, or be subject to dismissal.

Comprehensive Examination Plan

None.

Thesis Plan

The purpose of the master's thesis is to demonstrate students' ability to generate and assemble a body of data, to analyze it, and to indicate its relevance to established anthropological thought as well as to write lucid prose. Students must submit an original paper based on field, laboratory, or library research to all three committee members by the end of the fifth quarter of residence. The thesis committee assists students in formulating the research paper, monitoring its progress, and evaluating the paper when submitted. It is essential that students maintain close contact with all three members while preparing the M.A. thesis. Consult the Graduate Division's publication, *Regulations for Thesis and Dissertation Preparation*, for instructions on the preparation and submission of the thesis.

Doctoral Degree

Admission

Students who are entering the graduate program with a Master of Arts degree, whether or not in anthropology, are required to demonstrate basic knowledge of the discipline before being permitted to begin the requirements for the doctorate. It is expected that students accomplish this during the first year of academic residence by completing (in accordance with the procedures and regulations stated in the M.A. degree section) the following:

- (1) Nominating a three-member departmental advisory committee.
- (2) Completing the core course requirement.
- (3) Establishing competency in a foreign language, equivalent to the master's level requirement.
- (4) Taking the graduate core seminar only in the student's field of specialization. This is required of all students even though they may already have a master's degree in anthropology.
- (5) Taking the graduate proseminars, Anthropology 200A-200B. This is required of all entering students.
- (6) Submitting to the student's departmental advisory committee, for evaluation, prior master's paper or a research paper that was written while in graduate status.

Only when these requisites have been met are students permitted to begin the requirements for the Ph.D. degree.

Major Fields or Subdisciplines

Archaeology; biological anthropology; linguistic anthropology; and sociocultural anthropology.

Course Requirements

The minimum course load is 12 units per quarter. However, this may be waived for good cause by petition with the approval of the student's committee chair and the department chair. Students must be registered and enrolled at all times unless on an official leave of absence.

Students who received their M.A. degree from this department are expected to enroll in three seminars, each with a different faculty member, between receipt of the master's degree and taking the doctoral qualifying examinations. The department does not require any specific courses or number of courses for receipt of the Ph.D.

Written and Oral Qualifying Examinations

The Ph.D. qualifying examination is composed of a written and oral examination. The timing of these examinations are set in consultation with the members of the doctoral committee and are to be taken within a 10-week period of time. Students must be registered and enrolled to take the qualifying examinations.

Written Examination. The written portion of the qualifying examination is administered by the three-member departmental doctoral committee. Students are examined in three subfields; two fields are drawn from a list maintained in the department and the third is specific to the student's dissertation interests and needs. In addition, students are expected to demonstrate competence in general anthropological theory. The format of the written examination is to be determined by the student's departmental doctoral committee. There must be a minimum of two weeks between completing the written examination and taking the oral portion of the qualifying examination.

Oral Examination. The oral portion of the doctoral qualifying examination is primarily a defense of the dissertation proposal and is administered by the four-member Ph.D. doctoral committee.

The committee determines the conditions for reexamination should students not pass either portion of the qualifying examination.

Lower Division Courses

7. Human Evolution. Lecture, three hours; discussion, one hour. Required as preparation for B.A. degree. Not open for credit to students with credit for course 12. Evolutionary processes and evolutionary past of the human species.

8. Archaeology: An Introduction. Lecture, three hours; discussion, one hour. Required as preparation for both bachelor's degrees. General survey of field and laboratory methods, theory, and major findings of anthropological archaeology, including case-study guest lectures presented by several campus archaeologists.

9. Sociocultural Anthropology. Lecture, three hours; discussion, one hour. Required as preparation for both bachelor's degrees. Introduction to study of culture and society in comparative perspective. Examples from societies around the world to illustrate basic principles of formation, structure, and distribution of human institutions. Of special concern is the contribution and knowledge that cultural diversity makes toward understanding the problems of the modern world. P/NP or letter grading.

10. Principles of Human Evolution: Genetic Basis. Lecture, three hours; discussion, one hour. Required as preparation for B.S. degree. Human population biology in the conceptual framework of evolutionary processes. Emphasis on genetic basis of evolution, population biology, and diversity among living populations.

12. Principles of Human Evolution: Comparative Analysis. Lecture, three hours; discussion, one hour. Required as preparation for B.S. degree. Not open for credit to students with credit for course 7. Human population biology in the conceptual framework of evolutionary processes. Emphasis on comparative primate behavior, structural anatomy, and the fossil record.

15. Human Biology and Behavior. Lecture, three hours; discussion, one hour. Human biology and behavior through the life cycle from conception to senescence. Discussion of natural selection, sexual selection, and life history theory. Factors influencing variation in fertility and mortality: reproductive ecology, growth, development, and aging.

33. Culture and Communication. Lecture, three hours; discussion, one hour. Introduction to ways in which culture and communication shape each other, with emphasis on importance of language as a symbolic and practical guide to people's behavior and understanding of each other's actions. Topics include language socialization, cross talk, and verbal and nonverbal communication.

34. Introduction to Urban Speech Communities. Lecture, three hours; discussion, one hour. Introduction to study of speech communities in metropolitan areas, with special focus on communities in Los Angeles. Emphasis on ways in which communities share and incorporate speech norms of urban society while maintaining rules for conduct and interpretation of speech within specific speech communities. Topics include language and identity, socialization, social dialects, and communication.

51. Social Inequality. Lecture, three hours; discussion, one hour; field studies component. Analysis of cultural causes and consequences of cultural differentiation in which social inequality based on ethnicity and social race, religion, gender, sexual orientation, age, and mental and physical disability is common factor.

60. Anthropology for Today. Lecture, three hours. Lectures, films, readings, and discussions, with focus on critical evaluation of anthropological method and theory to understand cultural aspects of a selection of pressing problems in the modern world. Examination of such domestic issues as poverty and social inequality, educational reform, public health and mental health, conflict and criminality, as well as such Third World issues as economic development, environmental protection, population control, political modernization, diplomacy, warfare, revolution, refugee and disaster relief, minority rights, and protection of indigenous peoples. Survey of ethical issues and career opportunities in applied anthropology.

60P. Internships in Applied Anthropology. Seminar, three hours. Enforced requisite: course 60. Designed to give students firsthand experience working in agencies in public and private sectors (e.g., refugee relief centers, drug rehabilitation programs, community development agencies, mental health clinics, etc.) selected for their relevance to individual students' prospective professional interests. Eight to 12 hours per week, complemented by weekly seminars, field evaluations, and preparation of a field journal.

80. Introduction to Quantitative Methods. Lecture, three hours; discussion, one hour. Data analysis as a way to reason with quantitative information. Topics include description (frequency distribution tables, histograms), population specification (mean and standard deviation, normal distribution), samples and estimation procedures (central limit theorem), and hypothesis testing (t-test, chi-square test).

88A-88Z. Lower Division Seminars. (Formerly numbered 88.) Seminar, three hours. Variable topics; consult *Schedule of Classes* or department for topics to be offered in a specific term. P/NP or letter grading.

88A. Diversity in American Cultures. Discussion of readings, followed by seminar presentations, with focus on cross-cultural analysis of attributes common to all societal forms in which differences culturally defined as significant affect both individual life chances and societal well-being.

Upper Division Courses

All upper division courses with letter designations (A, B, P, Q, etc.) may be taken independently unless otherwise stated.

Archaeology

110. World Archaeology. Prerequisites: course 8 and upper division standing, or consent of instructor. Broad survey of human culture history from its Stone Age beginnings to establishment of the primary civilizations of the Old and New Worlds. Intended for students with general interest in archaeology and in an anthropological approach to study of the past.

111. Study of Archaeology. Survey of contemporary prehistoric archaeology. Emphasis on what archaeologists do, and how and why they do it. Contributions of archaeology to the modern world. Intended for students with a desire to explore the nature of anthropological archaeology. (Core course for archaeology field.)

112. Old Stone Age Archaeology. Lecture, three hours. Prerequisite: course 8 or consent of instructor. Development of Paleolithic cultural traditions in Europe, Africa, Asia, and the New World. Emphasis on the ordering and interpretation of archaeological data, Pleistocene geology and chronology, and relationship between human cultural and biological evolution.

113P. Archaeology of North America. Lecture, three hours. Prehistory of North American Indians; evolution of Indian societies from earliest times to (and including) contemporary Indians; approaches and methods of American archaeology.

113Q. Prehistory and Ethnography of California. Lecture, three hours. Prerequisite: course 8 or 9. From earliest Californians through 10,000 years of history, study of diversity in California's original peoples. Aspects of technology, ideology, ecology, and social/political organization. Historic impacts on California Indians by Euro-Americans. P/NP or letter grading.

113R. Southwestern Archaeology. Examination of prehistory of the American Southwest from Early Man to historic times. Emphasis on describing and explaining cultural variation and change, employing an ecological and evolutionary perspective. Special attention to "Great Events" (agriculture, town living, and the Great Abandonment). Evolutionary processes generalized and related to contemporary world problems.

114P. Ancient Civilizations of Western Middle America (Nahuatl Sphere). Pre-Hispanic and Conquest period native cultures of Western Middle America, as revealed by archaeology and early colonial writings in Spanish and Indian languages. Toltec/Aztec and Mixteca civilizations and their predecessors, with emphasis on sociopolitical systems, economic patterns, religion, and aesthetic and intellectual achievements.

114Q. Ancient Civilizations of Eastern Middle America (Maya Sphere). Pre-Hispanic and Conquest period native cultures of Eastern Middle America, as revealed by archaeology and early colonial writings in Spanish and Indian languages. Lowland and Highland Maya civilizations and their predecessors, with emphasis on sociopolitical systems, economic patterns, religion, and aesthetic and intellectual achievements.

114R. Ancient Civilizations of Andean South America. Lecture, three hours. Prerequisite: course 8 or 9. Pre-Hispanic and Conquest period native cultures of Andean South America, as revealed by archaeology and early Spanish writing. The Inca and their predecessors in Peru, with emphasis on sociopolitical systems, economic patterns, religion, and aesthetic and intellectual achievements.

M115A-M115B. Historical Archaeology. (Formerly numbered M115S.) (Same as History M103A-M103B.) Lecture, three hours. P/NP or letter grading. **M115A.** World Perspective. Historical archaeology requires appreciation of historical sources, archaeology, and material culture. Thematic emphasis, with exploration of breadth of discipline both in the Old World and the Americas. **M115B.** American Perspective. Emphasis on historical archaeology in North America, particularly to some of the practical applications.

115P. Archaeological Field Training (4 to 8 units). Lecture, two hours; fieldwork, eight or more hours. Prerequisites: course 8, consent of instructor. Procedures of archaeological excavation, mapping, stratigraphy, collecting, and recording of archaeological data (field class conducted off campus). Summer field session in various locations set by individual instructor. P/NP or letter grading.

C115R. Strategy of Archaeology. (Formerly numbered 115R.) Seminar, three hours; outside study, nine hours. Prerequisite: upper division standing. Introduction to problem formulation, theory, and method in archaeology, with emphasis on development of research designs. Focus on how archaeological research is conceived and planned, with consideration of differing viewpoints and their usefulness. Concurrently scheduled with course C215R.

M116Q. Dating Techniques in Environmental Sciences and Archaeology. (Same as Geography M178.) Lecture, three hours; reading period, one hour. Prerequisite: consent of instructor. Introduction to scientific dating methods such as radiocarbon dating, radiation damage methods, biological dating techniques, and magnetic dating, and applications in environmental sciences, archaeology, and physical anthropology.

117. Archaeological Materials Analysis: Laboratory Methods. Lecture, three hours; laboratory, three hours. Prerequisite: course 8. Training in archaeological analysis of prehistoric cultural materials, including chipped and ground stone artifacts, vertebrate fauna, shellfish, ceramics, ornaments and beads, and craft production materials from sites worldwide. Introduction to electronic measurement instrumentation and computerization of archaeological data. P/NP or letter grading.

117P. Intensive Laboratory Training in Archaeology. Lecture, three hours; laboratory, four hours. Prerequisite: course 117 or equivalent. Archaeologists with special expertise in specific analytical techniques and topics oversee intensive laboratory training on a tutorial or small-class basis on one of the following topics: zooarchaeology, ethnobotany, lithic analysis, ceramic analysis, etc. May be repeated for credit with topic change. P/NP or letter grading.

118A. Museum Studies. Prerequisite: consent of instructor. Method and theory of museum operation. Discussion and demonstration of acquisition accession, storage, photography, conservation, and exhibition. Analysis of museum research, publication, and teaching, as well as museum administration and funding. Lectures and demonstrations structured to illustrate how various aspects of museum operation are interrelated.

118B. Museum Studies. Prerequisites: course 118A, consent of instructor. Two areas of museum operation are selected by students from those discussed and demonstrated in course 118A. Students are then required to develop expertise in these areas through a combination of library research and a series of assignments carried out in the museum.

M119. Topics in African History: Prehistoric Africa — Technological and Cultural Traditions. (Same as History M175A.) Lecture, three hours; outside study, nine hours. Survey of nondocumentary sources of early African history, with emphasis on archaeological evidence from origins of humanity until A.D. 1600. P/NP or letter grading.

Biological Anthropology

120. Survey of Biological Anthropology. Lecture, three hours. Prerequisites: courses 10, 12, or equivalent. Limited to majors and graduate students in anthropology. Survey of biological anthropology including all major subareas. Lecture/seminar format requires attendance at a recitation section in addition to lectures. (Core course for biological field.)

120G. Biological Anthropology in Review. Lecture, three hours; seminar, three hours. Corequisite: lecture portion of course 7. Limited to graduate students in anthropology. Designed for anthropology students who have a deficiency in biological anthropology. Seminar discussion based on basic evolutionary principles, behavior of nonhuman primates, hominid evolutionary history, and contemporary human variation.

121A. Primate Fossil Record. Lecture, three hours. Recommended (but not prerequisite): courses 10, 12. Course 121A should be taken before 121B and 121C. Introduction to method and theory in paleoanthropology. Primate evolution, Cretaceous through the Miocene.

121B. The Australopithecines. Lecture, three hours. Prerequisite: consent of instructor. Recommended: courses 10, 12, 121A. Morphology, ecology, and behavior of the genus *Australopithecus*. History of their discoveries and their place in human evolution.

121C. Evolution of the Genus *Homo*. Lecture, three hours. Prerequisite: consent of instructor. Recommended: courses 10, 12, 121A, 121B. Origin and evolution of the genus *Homo*, including archaic sapiens and Neanderthals. Morphology, ecology, and behavior of these groups. Course ends with appearance of modern man.

121P. Reconstructing Hominid Behavior and Paleopedology. Seminar, three hours. Use of paleontological, archaeological, ecological, and geological evidence to infer late Pliocene and early Pleistocene hominid behavior and environmental context of human evolution. P/NP or letter grading.

124. Evolution and Biology of Human Behavior. Comparative survey of behavior patterns of preliterate and Paleolithic peoples and those of nonhuman primates. Assessment of biological variables fundamental to human and prehuman behavior with regard to theories on evolution of human culture.

124P. Evolution of Human Sexual Behavior. Lecture, three hours. Prerequisite: consent of instructor. Recommended: course 7 or 10 or 12 or equivalent. Examination of human sexual relations and social behavior from an evolutionary perspective. Emphasis on theories and evidence for differences between men and women in their patterns of growth, maturation, fertility, mortality, parenting, and relations with members of the opposite sex.

124Q. Physiology of Human Behavior. Lecture, three hours. Prerequisites: upper division standing and/or consent of instructor. Overview of neural, physiological, and endocrine substrates of a variety of human behaviors, including sexual behavior, aggression, language, and affiliative behavior. Emphasis on evolutionary origins, developmental pathways, and cross-cultural expressions of behaviors examined. Focus on human behavior, with evidence from animal literature as well.

124R. Laboratory Methods in Human Behavioral Endocrinology (6 units). Lecture, three hours; laboratory, three hours (plus time to complete project). Prerequisite: course 124Q or consent of instructor. Introduction to laboratory methods in neuroendocrinology for students in social and behavioral sciences. Emphasis on field-compatible methods. Design and execution of a small research project.

125. Genetics of Human Diversity. Lecture, three hours. Survey of human biological diversity. Emphasis on genetics at the population level for both discrete and quantitative variation. Analytic methods and evolutionary hypotheses.

C126P. Introduction to Field Methods in Human Ecology. Lecture, three hours. Prerequisite: upper division or graduate standing. Survey of methods used in anthropological investigations emphasizing human biology and human ecology. Study design, physical assessment of nutritional status, growth and maturation, demographic surveys, systematic observation of behavior, energy expenditure, subsistence ecology, data analysis. Demonstrations and labs. Course fee required. Concurrently scheduled with course C226P. P/NP or letter grading.

127P. Primate Evolution. Prerequisite: upper division standing. Survey of primate paleontological and evolutionary record, encompassing prosimians, New and Old World monkeys, and hominoids. Attendant aspects of paleoecology and behavior.

128A. Primate Behavior Nonhuman to Human. Lecture, three hours. Prerequisite: upper division standing. Review of primate behavior as known from laboratory and field studies. Theoretical issues of animal behavior, with special reference to nonhuman primates. Discussion of human behavior as the product of such evolutionary processes. P/NP or letter grading.

128B. Behavioral Ecology of Primates. Lecture, three hours. Prerequisite: course 128A. Analysis of evolution of sociality, sexual strategies, parenting behavior, fighting and contests, and altruism and cooperation in primate species.

128P. Primate Behavioral Neurobiology: Evolutionary and Comparative Perspectives. Lecture, three hours. Prerequisite: course 7 or 12. Strongly recommended: course 128A, Biology 5, Chemistry 11A. Survey of use of nonhuman primates to model neurobiological bases of complex behavioral and emotional states in nonhuman primates. Attention to empathy, xenophobia, aggression, and social cognition. P/NP or letter grading.

129P. Laboratory Methods in Biological Anthropology: Skeletal. Lecture, three hours. Prerequisites: courses 10, 12, consent of instructor. Limited to majors and graduate students. Laboratory methodology and analysis of human variation on skeletal material.

129Q. Paleopathology. Lecture, one hour; laboratory, three hours. Prerequisites: course 129P, upper division standing, consent of instructor. Investigation into diseases, trauma, health status, subsistence activities, and ethnic mutilation (i.e., cranial deformation, trepanation) through analysis of human skeletal materials. Course has worldwide scope, with some emphasis on the New World.

Cultural Anthropology

130. Study of Culture. Lecture, three hours. Prerequisite: one lower division sociocultural anthropology course or equivalent, upper division standing. The 20th-century elaboration and development of the concept of culture. Examination of five major paradigms: culture as a human capacity, as patterns and products of behavior, as systems of meaning and cognition, as generative structure and semiotic system, as a component in social action and reality construction. (Core course for cultural field.)

132. Technology and Environment. Significance of material culture in archaeology and ethnology; problems of invention and the acceptance of innovations; ecological and sociological concomitants of technological systems; selected problems in material culture.

133Q. Symbolic Systems. Prerequisite: upper division standing or consent of instructor. Analysis of anthropological research and theory on cultural systems of thought, behavior, and communication expressed in a symbolic mode (as distinguished from discursive, instrumental, and causal modes). Methods for study of symbolic meaning, including the experiential approach.

133R. Aesthetic Systems. Lecture, three hours. Prerequisite: upper division standing. Provides framework for a cross-cultural understanding of aesthetic phenomena that meets the requirements of anthropological research. Human capacities for aesthetic experience; sociocultural formation of aesthetic production; ethno-aesthetics; experiential dimension of aesthetic production.

135A-135B. Introduction to Psychological Anthropology. Lecture, three hours. P/NP or letter grading.

135A. Historical Development. Prerequisite: course 9 or consent of instructor. Survey of the field of psychological anthropology, with emphasis on early foundations and historical development of the field. Topics include study of personality, pathology and deviance, altered states of consciousness, cognition, motivation, and emotion in different cultural settings.

135B. Current Topics and Research. Prerequisite: upper division standing or consent of instructor. Survey of the field of psychological anthropology, with emphasis on current topics and research. Topics include study of personality, pathology and deviance, altered states of consciousness, cognition, motivation, and emotion in different cultural settings.

135C. Seminar: Psychocultural Studies. Seminar, three hours. Prerequisites: course 9 or equivalent, consent of instructor. Firsthand exposure to current research in psychocultural studies. Various university scholars are brought in to discuss their on-going research. Using these presentations as models, students develop proposals for future research. P/NP or letter grading.

135S. Anthropology of Deviance and Abnormality. Lecture, three hours. Prerequisites: course 9 or equivalent, consent of instructor. Relationship between culture and recognition of, responses toward, and forms of deviant and abnormal behavior.

135T. Psychoanalysis and Anthropology. Lecture, three hours. Exploration of mutual relations between anthropology and psychoanalysis, considering both theory and method. History of and current developments in psychoanalysis; anthropological critiques of psychoanalytic theory and method, toward a cross-cultural psychoanalytic approach.

M136G. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (Same as Psychiatry M112.) Prerequisite: consent of instructor. Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Group and individual projects. Discussion of some of the uses of observations and their implications for research in social sciences.

138. Methods and Techniques of Ethnohistory. Introduction to problems and procedures of extracting cultural data from documentary sources and their interpretation and analysis. Relevant documentary sources of various New World regions are selected as case histories to illustrate more concretely problems and challenges in this major area of anthropological concern.

139. Field Methods in Cultural Anthropology. Lecture, three hours. Prerequisite: upper division standing. Corequisite: course 139L. Introduction to skills and tools of data ascertainment through fieldwork in cultural anthropology. Emphasis on techniques, methods, and concepts of ethnographical research and how basic observational information is systematized for presentation, analysis, and cross-cultural comparison.

139L. Field Methods in Cultural Anthropology. Laboratory, three hours. Prerequisite: upper division standing. Corequisite: course 139. Supervised practicum of field methods in cultural anthropology. Field methods and techniques presented in course 139 practiced and applied in simulated field situations. Discussion of styles of presenting ethnographical information.

Linguistic Anthropology

M140. Language in Culture. (Same as Linguistics M146.) Prerequisite: upper division standing or consent of instructor. Study of language as an aspect of culture; relation of habitual thought and behavior to language; and language and the classification of experience. Holistic approach to study of language, with emphasis on relationship of linguistic anthropology to fields of biological, cultural, and social anthropology, as well as archaeology. (Core course for linguistics field.)

141. Ethnography of Everyday Speech. Lecture, three hours. Prerequisites: course 33, upper division standing or consent of instructor. Course has two interrelated objectives: (1) to introduce students to ethnography of communication — description and analysis of situated communicative behavior — and the sociocultural knowledge which it reflects and (2) to train students to recognize, describe, and analyze relevant linguistic, proxemic, and kinesic aspects of face-to-face interaction.

142A-142B. Microethnography of Communication. Lecture, three hours. Course 142A or Sociology CM124A or consent of instructor is prerequisite to 142B. Students make primary records (sound tape, videotape, or film) of naturally occurring social interactions which are analyzed in class for interactive tasks, resources, and accomplishments displayed. Laboratory and fieldwork outside of class and minimal fees to offset costs of equipment maintenance and insurance required.

143. Field Methods in Linguistic Anthropology. Lecture, three hours. Prerequisite: Linguistics 20 or prior experience in linguistics. Practice in eliciting linguistic data from informants. Initial focus on phonetic transcription and phonological structures; introduction to skills and strategies pertinent to morphological, syntactic, and textual analysis. Practice with native speakers of non-Indo-European languages is normally an important aspect of student participation. P/NP or letter grading.

144. American Indian Ethnolinguistics and Sociolinguistics. Prerequisite: prior coursework in either anthropology, linguistics, or American Indian studies. Introduction and comparative analysis of sociocultural aspects of language use in Native North American Indian speech communities. Specific foci include both micro- and macro-sociolinguistic topics. Micro-sociolinguistic topics are comprised of such issues as multilingualism, cultural differences regarding appropriate communicative behavior and variation within speech communities (e.g., male and female speech, baby talk, ceremonial speech, etc.). Macro-sociolinguistic considerations include language contact and its relationship to language change and language in American Indian education.

M145. Afro-American Sociolinguistics: Black English. (Formerly numbered 145.) (Same as Afro-American Studies M166.) Lecture, three hours. Basic information on Black American English, an important minority dialect in the U.S. Social implications of minority dialects examined from perspectives of their genesis, maintenance, and social functions. General problems and issues in fields of sociolinguistics examined through a case-study approach.

146. Language and Culture of Polynesia: Past, Present, and Future. Lecture, three hours. Introduction to Polynesian cultures and languages, with particular emphasis on past and present sociocultural systems, patterns of language structure and language use, verbal art, language socialization strategies, and forms of cultural assimilation and resistance to European contact. Fieldwork on contemporary Polynesian cultures in U.S. urban areas.

Social Anthropology

150. Study of Social Systems. Lecture, three hours. Prerequisite: course 9 or consent of instructor. Introduction to more specialized social anthropology courses. Evaluation of variation in sociocultural systems and how societies are organized and social relations maintained. Basic frameworks of anthropological analysis; historical context and development of social anthropology discipline.

151. Marriage, Family, and Kinship. Lecture, three hours. Prerequisite: course 9. Examination of understandings of kinship in cross-cultural perspective and impact of kinship on interpersonal relationships, gender roles, and sociocultural systems. Readings from popular materials and formal ethnographic accounts.

152. Politics: Tribe, State, Nation. Lecture, three hours. Cross-cultural examination of politics and political organization. Law and the maintenance of order; corporate groups; ideology. Relations of political institutions to other institutions of society and to issues of identity and representation.

153. Evolution of Human Societies. Lecture, three hours. Review of economic and ecological approaches to studying organization of production and exchange. Economic life viewed from three perspectives: adaptation, decision making, and social structure. Comparative theories discussed in context of ethnographic evidence from a wide variety of cultural systems.

M154. Women in Culture and Society. (Same as Women's Studies M154.) Lecture, three hours. Open to upper division social sciences majors. Comparative study of women's lives globally and locally from an anthropological perspective. Critical review of relevant theoretical and practical issues using ethnography, case studies, and student research and presentation. P/NP or letter grading.

155. Women's Voices: Their Critique of Anthropology of Japan. Lecture, three hours. Prerequisite: introductory sociocultural anthropology course. The anthropology of Japan has long viewed Japan as a homogeneous whole. Restoration of diversity and contradiction in it by listening to voices of Japanese women in various historical contexts. P/NP or letter grading.

M155Q. Women and Social Movements. (Formerly numbered M155.) (Same as Women's Studies M160.) Lecture/discussion, three hours. Recommended (but not prerequisite): prior women's studies or anthropology courses. Comparative studies of social movements (e.g., nationalist, socialist, liberal/reform), beginning with Russia and China and including Cuba, Algeria, Guinea-Bissau, Mozambique, Nicaragua, and Iran. Analysis of women's participation in social transformations and the centrality of gender interests. P/NP or letter grading.

156. Comparative Religion. Survey of various methodologies in comparative study of religious ideologies and action systems, including understanding particular religions through descriptive and structural approaches, and identification of social and psychological factors which may account for variation in religious systems cross-culturally.

158. Hunting and Gathering Societies. Lecture, three hours. Prerequisite: course 9. Survey of hunting and gathering societies. Examination of their distinctive features from both an ecological and cultural viewpoint. Discussion of the possibility of developing a general framework for synthesizing these two viewpoints. Use of this synthesis as a basis for illustrating the relevance of hunting and gathering societies as an understanding of complex societies.

158P. Pastoral Nomads. Lecture, three hours. Prerequisite: course 9 or 150 or consent of instructor. Survey of pastoral nomad societies. Consideration of environmental and social demands of livestock domestication and production. Focus on ecological features, cultural practices, and social organization, with special attention to historical interactions between pastoral nomads and settled peoples.

159. Warfare and Conflict. Lecture, three hours. Examination of conflict and violent confrontation as these have been treated in anthropological literature. Cross-cultural comparison of institutions such as raids, feuds, ritual warfare. Consideration of application of anthropology to study of militaries, modern warfare, and large-scale ethnic conflict.

Applied Anthropology

161. Development Anthropology. Lecture, three hours. Prerequisites: course 9 and upper division standing, or consent of instructor. Comparative study of planned and unplanned development, in particular as it affects rural societies. Emphasis on impact of capital, technological change and gender differences, economic differentiation and class, urban/rural relations, and migration. Discussion of theoretical issues in light of case studies.

162. Contemporary American Indian Problems. Contemporary problems of the American Indian both on and off the reservation. Topics include self-determination, land claims, activism, urban Indians, and role of the Bureau of Indian Affairs.

M162P. Destruction and Survival of Indigenous Societies. (Same as World Arts and Cultures M162P.) Lecture, three hours. Prerequisite: course 9 or upper division standing or consent of instructor. Clarification of concepts and forms of destruction and survival; analysis directed to different processes threatening the institutions of a group and its survival. Exploration of current theories of ethnocide and genocide for their relevance and validity. P/NP or letter grading.

M164. The Afro-American Experience in the U.S. (Same as Afro-American Studies M164.) Promotes understanding of contemporary sociocultural forms among Afro-Americans in the U.S. by presenting a comparative and diachronic perspective on the Afro-American experience in the New World. Emphasis on utilization of anthropological concepts and methods in understanding the origins and maintenance of particular patterns of adaptation among black Americans.

165. Demographic Problems in Nonindustrial Societies. Lecture, three hours. Prerequisite: course 9. Dynamic interaction between environment, cultural belief, social structure, and population in hunting and gathering, pastoral, horticultural, and agricultural societies. Principal theories of population change and current issues in population policy considered in light of the anthropological evidence.

167. Urban Anthropology. Open to upper division majors in social sciences, and others with consent of instructor. Survey of urbanization throughout the world, with emphasis on urban adaptation of rural migrants. Special focus on problems of rural/urban migration of ethnic minority groups and subsequent adaptation of them within the U.S. explored in terms of methods and perspectives of anthropology.

M168. Health in Culture and Society. (Same as Nursing M158.) Prerequisite: upper division standing. Examination of theories and methods of medical anthropology in relation to cross-cultural health systems, role networks, attitude and belief systems of the participants. Emphasis on interaction networks in health care systems.

Regional Cultures

Africa

171. Sub-Saharan Africa. Lecture, three hours. Prerequisite: upper division standing or consent of instructor. Issues of ecology and political economy; continuing impacts of colonialism, nationalism, and current challenges for development; changes in social relations. Examination of Africa's significance to development of anthropology. Cultural background for understanding events in contemporary Africa provided.

North America

172R. Cultures of the Pueblo Southwest. Lecture, three hours. Prerequisite: course 8 or 9 or upper division standing or consent of instructor. Survey of ethnographic and ethnohistorical research of Pueblo Indians (Hopi, Zuni, Tanoan, and Keresan) and their immediate neighbors. Basic information on history, languages, social organization, and traditional cultural systems of these groups.

M172T. Ethnohistory of Hispanic Cultures in the U.S. Southwest. (Same as Chicana and Chicano Studies M172T.) Lecture, three hours. Prerequisite: course 9 or consent of instructor. Ethnography of social and cultural adaptations of Hispanic peoples in the U.S. Southwest: their respective social organization, economic and political institutions, sacred and secular belief systems, and expressive cultures. P/NP (undergraduates), S/U (graduates), or letter grading.

Middle America

173Q. Latin American Communities. Overview of social and cultural anthropology of small communities in Latin America. Similarities and contrasts in social organization and interpersonal relations described in context of economic, political, and cultural environments.

South America

174P. Ethnography of South American Indians. Introduction to ethnography of South American Indians, with special emphasis on Lowland South America. Survey of history and development of man and society in this world area and examination of exemplary cultures symptomatic of various levels of cultural achievement.

174Q. Ethnology of South American Indians. Prerequisite: course 174P or consent of instructor. Introduction to ethnology of South American Indians, with special emphasis on Lowland South America. Methods and theories applied to study of man and culture on the subcontinent, including biological anthropology, linguistics, and sociocultural anthropology.

Asia

175R. Societies of Central Asia. Lecture, three hours. Overview of culture and society among the diverse peoples of Inner Asia, including Mongolia, Tibet, and Soviet Central Asia. Topics include environment and economic adaptation, politics in traditional isolation and within the framework of recent national integration, kinship, forms of marriage and status of women, religion and the social order in Hindu/Buddhist culture contact zone, and current problems of modernization. P/NP or letter grading.

175S. Japan. Lecture, three hours. Prerequisite: course 9. Overview of contemporary Japanese society. General introduction, kinship, marriage and family life, social mobility and education, norms and values, religions, patterns of interpersonal relations, social deviance. P/NP or letter grading.

175T. Civilizations of East Asia. Lecture, three hours. General anthropological introduction to the closely linked civilizations of China, Korea, and Japan, providing a comparative analysis of fundamental institutions such as family, state, and religion and assessing effects of urbanization and industrialization.

175U. Cultures of the Indonesian Archipelago. Lecture, three hours. Prerequisite: course 9 or consent of instructor. Introduction to past and contemporary civilizations and cultures of Indonesia, including Javanese, Balinese, Toraja, Dayak, and Minangkabau. Geographical, ecological, and historical overview with examination of such topics as religious and political ideas and institutions, art, symbolism and ritual, illness and healing, and psychological issues and themes.

175V. Ethnology of Korea: Re-Presenting Lives in Contemporary South Korea. Lecture, three hours. Examination of South Korea's contemporary structural positioning, with focus on its dynamic development out of a history of colonialism and war to capitalism; multiple and conflicting linkages of Korean people involving class, gender, family/kinship, and nation.

Middle East

176. Culture Area of the Middle East. Lecture, three hours. Study of the Middle East has suggested many theories as to developmental history of humankind, evolution of human society, birth of monotheism, and origin of agriculture, trade, and the city. Presentation of anthropological material relevant to understanding the Middle East as a culture area, and Islam as basis of its shared tradition.

Pacific

177. Cultures of the Pacific. Four major culture areas of Australia, Melanesia, Polynesia, and Micronesia. General geographical features, prehistory, and language distribution of the whole region. Distinctive sociocultural features of each culture area presented in context of their adaptive significance.

History, Theory, and Method

180. Quantitative Methods in Anthropology. (Formerly numbered 186A.) Lecture, three hours. Prerequisite: course 80 or equivalent. Methods of quantitative data analysis. Topics to be selected from linear regression analysis (univariate and multivariate), principal component analysis, discriminant analysis, cluster analysis, nonparametric tests, and log-linear models. Emphasis on computer-based applications of data analysis techniques.

182. History of Anthropology. Brief survey of development of Western social science, particularly anthropology, from Greek and Roman thought to emergence of evolutionary theory and concept of culture in the late 19th century. "Root paradigm" of Western social science and its influence on such notables as Durkheim, Freud, Hall, Lombroso, Marx, Piaget, Terman, and others. Consideration of how this influences ethnocentrism and Eurocentrism, sexism, racism, perception of deviance, and our view of culture in general.

183. History of Archaeology. Prerequisite: at least one upper division archaeology course or consent of instructor. Development of world archaeology from the Renaissance to the present, stressing how each of the major branches of archaeology has evolved a special character determined by peculiarities of its own data, methods, and intellectual affiliation.

184. History of Human Evolutionary Theory. The men, events, and spirit of the time which mark man's attempts to understand his origins and diversity.

186. Models and Modeling in Anthropology. (Formerly numbered 186B.) Lecture, three hours. Modeling from both individual and social structure viewpoints. Introduction to four groups of models, along with ethnographic examples—decision tree models, indifference curve and marginal cost models, adaptation and learning models, and information diffusion models.

186P. Models of Cultural Evolution. Lecture, two hours; discussion, one hour. Prerequisite: course 9 or 10 or equivalent. Introduction to Darwinian models of cultural evolution. How organic evolution has shaped the capacity for culture. How processes of cultural transmission and modification explain cultural variation in space and time. P/NP or letter grading.

M189A-M189B. Theoretical Behavioral Ecology. (Same as Biology M189A-M189B.) Lecture, three hours. Prerequisites: one upper division introduction to behavioral ecology course, one university-level mathematics course (preferably calculus or probability and statistics). Course M189A or consent of instructor is prerequisite to M189B. Students expected to do simple algebra, elementary calculus, and probability. A rich body of mathematical theory describing the evolution of animal behavior exists. Introduction to this body of theory at a pace and mathematical level that allows students to grasp this information. Within each area of theory (e.g., kin selection, optimal foraging theory, etc.), presentation of basic corpus of models so that students understand assumptions that underlie the models, and how main results are derived. Presentations supplemented by a survey of results printed in the literature, especially those derived using more advanced methods.

Special Studies

C191. Writing for Anthropology. Lecture, three hours. Prerequisite: course 9. Teaching of writing skills in various academic forms, including term papers, essay examinations, journal articles, and reports. Class projects require student writing and evaluation of professional writing. Emphasis on organization and presentation of a scholarly argument. Concurrently scheduled with course C291.

197H. Departmental Honors Seminar. Seminar, three hours. Prerequisites: junior standing, consent of instructor. Five discussion segments dealing with major debates, questions, and issues in each departmental field (archaeological, biological, linguistic, and sociocultural). Discussion each week in seminar format of readings on a major topic.

197HA. Beginning Seminar. Seminar, three hours. Prerequisites: anthropology honors program standing, consent of instructor. Survey of major research strategies in anthropology to aid honors students in developing research proposals.

197HB. Field Methods. Seminar, three hours. Prerequisites: anthropology honors program standing, consent of instructor. Survey of major field methods in anthropology to prepare students to conduct their own field research.

197HC. Data Analysis. Seminar, three hours. Prerequisites: anthropology honors program standing, consent of instructor. Survey of major forms of data analysis in anthropology to aid honors students in analysis of their own research data.

197HD. Writing for Anthropology. Seminar, three hours. Prerequisites: anthropology honors program standing, consent of instructor. Teaching of writing skills, with focus on how to write honors theses.

197K-197Z. Selected Topics in Anthropology (2 to 4 units each). Lecture or seminar, three hours. Study of selected topics of anthropological interest taught by resident and visiting faculty members. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit with consent of instructor. P/NP or letter grading.

199. Special Studies in Anthropology (2 to 8 units). Prerequisite: consent of instructor. Eight units may be applied toward upper division anthropology courses required for the major.

Graduate Courses

Admission to all graduate courses is subject to consent of instructor and completion of appropriate course requirements (when so indicated). Graduate courses are normally nonrepetitive in content but may be repeated for credit with consent of instructor and graduate counselor.

200A-200B. Proseminars: Practice of Anthropology. Seminar, three hours. Prerequisite: consent of instructor. Required of new graduate students. Discussion of anthropology as a four-field discipline and interconnections among the four major fields. Practice of anthropology as exemplified through faculty presentations of how research is conceived, formulated, and executed. Students develop individual research proposals. In Progress and S/U or letter grading.

M201A-M201B. Graduate Core Seminars: Archaeology (6 units each). (Same as Archaeology M201A-M201B.) Seminar, three hours. Required of anthropology students in archaeology field. Seminar discussions based on carefully selected list of 30 to 40 major archaeology works. These core seminars provide students with foundation in breadth of knowledge required of a professional archaeologist. Archaeological historiography, survey of world archaeology, and archaeological techniques. Emphasis on appreciation of the multidisciplinary background of modern archaeology and relevant interpretative strategies. May be repeated for credit with consent of adviser.

202. Biological Anthropology Colloquium. Seminar, three hours. Selected topics on status of current research in biological anthropology. May be repeated for credit. S/U or letter grading.

203A-203B-203C. Core Seminars: Sociocultural Anthropology. (Formerly numbered 203.) Seminar, three hours. Prerequisites: two courses from 130, 135A, 150, or equivalent, or consent of instructor:

203A. Historical and Philosophical Foundations of Anthropology. Examination of the theoretical writings that shaped foundations of anthropology as a scholarly discipline. Consideration of writings of Durkheim, Weber, Marx, and others.

203B. Sociocultural Systems and Ethnography: Anthropology at Mid-Century. Recommended (but not prerequisite): course 203A. Examination of development of major schools of sociocultural thought during middle decades of the 20th century. Emphasis on formation of sociocultural theories, concepts, and methodologies found in contemporary anthropology.

203C. Scientific and Interpretive Frameworks in Contemporary Anthropology. Recommended (but not prerequisite): course 203B. Examination of selected contemporary works and issues in the field of sociocultural anthropology.

204. Core Seminar: Linguistic Anthropology. Seminar, three hours. Prerequisite: consent of instructor. Theoretical and methodological foundations of study of language structure and language use from a sociocultural perspective. Discussion of linguistic, philosophical, psychological, and anthropological contributions to understanding of verbal communication as a social activity embedded in culture.

Archaeology

210. Analytical Methods in Archaeological Studies. Prerequisites: one term of statistics, consent of instructor. Data analysis procedures in archaeology. Emphasis on conceptual framework for analysis of archaeological data, beginning at level of the attribute and ending at level of the region.

M211. Regional Analysis in Archaeology. (Formerly numbered 211.) (Same as Archaeology M201C.) Lecture, three hours. Prerequisite: consent of instructor. Course 210 is not prerequisite to M211. Survey of analytical methods used in archaeology to study prehistoric settlement systems. Specific issues include settlement distribution with respect to natural resources, settlement hierarchy, and patterns of exchange.

212P. Selected Topics in Hunter/Gatherer Archaeology. Seminar, three hours. Prerequisite: consent of instructor. Prehistory and ethnohistory of hunter/gatherer peoples. Consideration of range of issues, including (but not limited to) technological innovations, exchange systems, settlement and mobility, and social change. May be repeated for credit. S/U or letter grading.

212Q. Problems in Southwestern Archaeology. Prerequisite: consent of instructor. Consideration of prehistoric cultural systems in the American Southwest, with emphasis on description and explanation of organizational variability and change. Specific research questions vary with each course offering. May be repeated for credit.

212R. Problems in Oceanic Archaeology. Lecture, three hours. Prerequisite: consent of instructor. Prehistory of Oceania. Content may vary, but problems considered include history and process of island occupation, island adaptation, and evolution of social stratification. May be repeated for credit.

M212S. Special Topics in Archaeology (6 units). (Same as Archaeology M205.) Lecture, three hours. Prerequisite: graduate standing in archaeology or in other departments. Open to undergraduates with consent of instructor. Special advanced topics in archaeology such as new strategies, methodologies, excavation projects, regional synthesis, or comparisons on a worldwide basis, including current work by core faculty of the program and special visitors.

213. Selected Topics in Old World Archaeology. Seminar, three hours. Prerequisite: consent of instructor. May be repeated for credit.

214. Selected Topics in Prehistoric Civilizations of the New World. Prerequisite: consent of instructor. Mesoamerican and Andean civilizations normally constitute major focus of seminar. May be repeated for credit.

215. Field Training in Archaeology (4 to 8 units). Prerequisite: prior experience in archaeology. Advanced training in archaeological excavation techniques, including organization of projects, supervision of field crews, methodology of field recording, and preliminary analysis of field data. May be repeated for credit.

C215R. Strategy of Archaeology. Seminar, three hours; outside study, nine hours. Prerequisite: consent of instructor. Introduction to problem formulation, theory, and method in archaeology, with emphasis on development of research designs. Focus on how archaeological research is conceived and planned, with consideration of differing viewpoints and their usefulness. Concurrently scheduled with course C115R. Complete research proposal required of graduate students.

M216. Dating Techniques in Environmental Sciences and Archaeology. (Same as Geography M278.) Lecture, three hours. Prerequisite: consent of instructor. Colloquium devoted to topics in dating techniques in environmental sciences, archaeology, and biological anthropology, as well as laboratory instruction and experimental work. May be repeated for credit.

217. Explanation of Societal Change. Prerequisite: consent of instructor. Examination of processes of societal evolution, emphasizing usefulness of a variety of explanatory models from general systems theory, ecology, anthropology, and other sources. Specific research questions vary with each course offering. May be repeated for credit.

218. Style and Ethnicity. Seminar, three hours. Prerequisite: consent of instructor. How stylistic variation in material culture informs on and mediates the shape, boundaries, and interrelations of ethnic groups. Aimed primarily toward archaeologists and ethnographers, seminar also welcomes students specifically interested in either material culture or style as such.

219. Complex Hunters/Gatherers in Theoretical Perspective. Seminar, three hours. Prerequisite: consent of instructor. Examination of economic, political, and social foundations of complex hunter/gatherer societies, with focus on theory of emergence of complex cultural organization and recognition of complex middle-range societies in the archaeological record. Role of craft specialization in cultural evolution. S/U or letter grading.

Biological Anthropology

220. Current Problems in Biological Anthropology. Seminar, three hours. Prerequisite: consent of instructor. Detailed examination of current research in biological anthropology (specific topics to be announced). Emphasis on nature of hypotheses and their testing in ongoing student and faculty research. May be repeated for credit.

221A-221B. Fossil Evidence for Human Evolution. Prerequisite: consent of instructor. Examination and analysis of fossil evidence for man's evolution.

223P. Biology and Ecology of Foraging Peoples. Prerequisite: consent of instructor. Detailed discussions of topical issues in study of foraging societies, including perspectives of cultural ecology and ethnoarchaeology. Primary emphasis on theoretical and practical topics in human ecology and biology, including health and nutrition, growth and development, life history variables, foraging, and sex differences.

C226P. Introduction to Field Methods in Human Ecology. Lecture, three hours. Prerequisite: upper division or graduate standing. Survey of methods used in anthropological investigations emphasizing human biology and human ecology. Study design, physical assessment of nutritional status, growth and maturation, demographic surveys, systematic observation of behavior, energy expenditure, subsistence ecology, data analysis. Demonstrations and labs. Course fee required. Concurrently scheduled with course C126P.

226P. Ecology of Human Reproduction. Seminar, three hours. Prerequisite: consent of instructor. Critical examination of current research concerning responsiveness of the human reproductive system to a variety of biobehavioral and ecological influences, including stress, exercise, nutrition, and disease. Influence of reproductive hormones on human behavior. Evolutionary and cross-cultural perspectives. S/U or letter grading.

M229A. Seminar: Human Behavioral Ecology. (Same as Education M281A and Psychiatry M279A.) Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Examination of predictive models from animal behavioral ecology used to study human diet and subsistence; settlement patterns and territoriality; sharing and helping; reproduction and mortality. Comparison with other economic and ecological approaches in anthropology.

M229B. Seminar: Reproduction, Families, and Parenting. (Same as Education M281B and Psychiatry M279B.) Prerequisite: consent of instructor. Guided forum for graduate students to discuss and broaden their studies of human reproduction and child rearing from varied viewpoints. Representation and debate of theories, questions, and methods from social and biological sciences.

M229C. Seminar: Selected Topics in Human Ethology. (Same as Education M281C and Psychiatry M279C.) Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Consideration of appropriateness and contributions of using animal behavior methodology in study of human behavior. Analysis: describing and recording behavior; causation; development, especially longitudinal studies; adaptation; evolutionary origins.

Cultural Anthropology

230P. Ethnology. Prerequisite: consent of instructor. Seminar on ethnological method and theory concentrating on ideational systems. May be repeated for credit.

230Q. Theories of Culture. Lecture, three hours. Prerequisite: consent of instructor. Exploration of aspects within culture theory: emergence of culture with modes of production, discovery of culture, and "cultural capital" and cultural change. Investigation of production of culture and transformations of meaning within cultural domains of politics, economy, and religion. S/U or letter grading.

231. Asian Americans: Personality and Identity. Prerequisite: graduate standing. Effect of class, caste, and race on the Asian American personality within the framework of anthropological theories.

232Q. Myth and Ritual. Prerequisite: consent of instructor. Nature and function of myth and ritual in nonindustrialized societies. Associated value systems and philosophies examined as infrastructure of culture rather than as phenomena proposed by structuralist rationalism and cultural material empiricism. May be repeated for credit.

M232R. South American Folklore and Mythology Studies. (Same as Folklore M257.) Prerequisite: course 174P or consent of instructor. Examination of oral traditions and related ethnological data from various South American Indian societies against the background of the religious systems of these people.

M232S. Ethnography of Humor. (Same as Folklore M214.) Lecture, three hours. Prerequisite: graduate standing in anthropology or folklore and mythology. Examination and analysis of selected humorous expressions and events in cross-cultural perspective, with emphasis on major psychological and sociocultural approaches to their study and interpretation.

232T. Person, Self, and Identity in Contemporary Anthropology. Seminar, three hours. Prerequisite: graduate standing or consent of instructor. Survey of anthropological literature on person, self, and identity. Conceptual and theoretical relationships among these terms and their use in contemporary ethnography. S/U or letter grading.

232V. Current Issues in Ethnography. Seminar, three hours. Prerequisite: graduate standing or consent of instructor. S/U or letter grading.

233P. Symbolic Anthropology. Prerequisite: course 133R or consent of instructor. Nature of symbolic relations (as distinguished from other referential ones), significance of symbolic systems (in terms of action, cognition, affectivity, contemplation), symbolic and isomorphic logic (as opposed to the causal one) are among questions to be selected for analysis and discussion. May be repeated for credit. S/U or letter grading.

233Q. Aesthetic Anthropology. Prerequisite: course 133R or consent of instructor. Selected questions concerning visual aesthetic phenomena in their relationships with the sociocultural context examined in depth. May be repeated for credit.

M234. Seminar: Psychocultural Studies. (Same as Psychiatry M210.) Seminar, three hours. Devoted to present state of research in psychocultural studies. Survey of work in child development and socialization, personality, psychobiology, transcultural psychiatry, deviance, learning, perception, cognition, and psychocultural perspectives on change.

M234P. Transcultural Psychiatry. (Same as Psychiatry M222.) Lecture, three hours. Prerequisite: consent of instructor. Consideration of psychiatric topics in cross-cultural perspective, such as studies of drug use, deviance, suicide, homicide, behavioral disorders, "culture specific" syndromes, non-Western psychiatries, and questions of "sick" societies. May be repeated for credit.

M234Q. Psychological Anthropology. (Same as Psychiatry M272.) Lecture, three hours. Prerequisite: consent of instructor. Various psychological issues in anthropology, both theoretical and methodological. Areas of interest include such things as culture and theory, culture and personality, and culture psychiatry. Discussion of questions relating to symbolic and unconsciousness process as they relate to culture. Topics vary from term to term. May be repeated for credit.

M234T. Anthropology of Human Body. (Same as Psychiatry M282.) Seminar, three hours. Exploration of how sociocultural and political dynamics shape perceptions of and understandings about the human body, and how, reciprocally, those perceptions and understandings influence social processes. Includes materials from both non-Western and Western societies.

M235. The Individual in Culture. (Formerly numbered M235A-M235B.) (Same as Psychiatry M213.) Seminar, three hours. Prerequisite: graduate standing.

M235S. Culture, Adaptation, and Intervention. (Same as Psychiatry M215.) Prerequisite: graduate standing. Role of ecological, social, and cultural influences on family adaptation, child competence, and interventions, including theory, empirical research, and applied/policy topics. Review and critique of current research in this field.

M236P. Cross-Cultural Studies of Socialization and Children. (Same as Psychiatry M214.) Seminar, three hours. Selected topics in cross-cultural study of socialization and child training. Methods, ethnographic data, and theoretical orientations. Emphasis on current research.

M236Q. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (Same as Education M222A, Psychiatry M235, and Psychology M295.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some uses of observations and their implications for research in social sciences. Students expected to integrate observational work into their current research interests.

238. Native American Revitalization Movements. Lecture, two hours; discussion, one hour. Examination of revitalization movements among native peoples of North America (north of Mexico). Specific revitalization includes Handsome Lake, 1870 and 1890 Ghost Dances, and Peyote Religion.

239P. Selected Topics in Field Ethnography (4 to 8 units). Seminar, three hours. Prerequisite: consent of instructor. Discussion and practicum in various techniques for collecting and analyzing ethnographic field data. S/U or letter grading.

Linguistic Anthropology

M241. Topics in Linguistic Anthropology. (Same as Linguistics M246C.) Prerequisite: consent of instructor. Problems in relations of language, culture, and society. May be repeated for credit.

242. Ethnography of Communication. Prerequisite: graduate standing or consent of instructor. Seminar devoted to examining representative scholarship from fields of sociolinguistics and ethnography of communication. Particular attention to theoretical developments including relationship of ethnography of communication to such disciplines as anthropology, linguistics, and sociology. Topical foci include style and strategy, speech variation, varieties of noncasual speech genres, languages and ethnicity, and nonverbal communication behavior.

243P. American Indian Ethnolinguistics and Sociolinguistics. Prerequisites: prior coursework in either anthropology, linguistics, or American Indian studies, consent of instructor. Social and cultural aspects of language use in Native North American speech communities. Specific foci include both micro-sociolinguistic topics (such as multilingualism, cultural differences regarding appropriate communicative behavior, and variation within speech communities) and macro-sociolinguistic topics (such as language contact, language change, and language in American Indian education). Graduate students conduct library and/or other research and participate in group discussion.

M243Q. Afro-American Sociolinguistics: Black English. (Same as Afro-American Studies M200D.) Lecture, three hours. Prerequisite: consent of instructor. Basic information on Black American English, an important minority dialect in the U.S. Social implications of minority dialects examined from perspectives of their genesis, maintenance, and social functions. General problems and issues in fields of sociolinguistics examined through a case study approach. Students required to conduct research in consultation with instructor and participate in group discussion.

244. Field Methods in Linguistic Anthropology. Seminar, three hours; work with informant, one hour. Prerequisite: Linguistics 20 or prior experience in linguistic analysis. Practice in eliciting and transcribing linguistic data from native informants. Initial focus on phonetic transcription and phonological structures; introduction to skills and strategies pertinent to morphological, syntactic, and pragmatic analysis. Practice with native speakers of non-Indo-European languages is important aspect of student participation. S/U or letter grading.

245. Linguistic and Intracultural Variation. Prerequisite: consent of instructor. Problem of variation as it impinges on disciplines of anthropology and linguistics. Among objectives of course are the following: to acknowledge importance of speech variation in anthropological linguistics research, to critically assess a broad and representative sample of modern scholarship devoted to study of intra-individual and inter-individual variation, and to evaluate utility and potential applicability of recent linguistic models to anthropological linguistics and anthropological theory.

246. Research Design and Field Training in Linguistic Anthropology. Prerequisite: consent of instructor. Supervised collection of linguistic information in the field. Students spend full time in the field for most of term. May be repeated for credit. S/U or letter grading.

247. Analysis of Linguistic Field Data. Seminar, three hours. Prerequisite: course 202 or 242 or 246 or consent of instructor. Supervised analysis of linguistic field data by students who have participated in a related field training course. Students work with their own as well as general project data in preparation of articles for professional journals. May be repeated for credit. S/U or letter grading.

248. Practicum in a Field Language (4 to 8 units). Prerequisite: consent of instructor. Intensive training in an indigenous language as preparation for work in the field.

M249A-M249B. Ethnographic Methods in Applied Linguistics A, B. (Same as Teaching English as a Second Language M270A-M270B.) Course M249A is prerequisite to M249B. Two-term sequence on ethnographic approaches to recording and analyzing communicative events and practices in their sociocultural context, involving student-initiated fieldwork in a community setting. Emphasis on hands-on activities within theoretical framework that considers language as a social and cultural practice. First term devoted to skills related to collecting socially and culturally meaningful data; second term devoted to production of ethnographic analysis, including how to present an analysis in form of a conference talk and how to develop an analysis into a grant or dissertation proposal.

Social Anthropology

250. Selected Topics in Social Anthropology. Seminar, three hours. Prerequisite: consent of instructor. Intensive examination of current theoretical views and literature. S/U or letter grading.

251P. Cultural Ecology. Prerequisite: consent of instructor. May be repeated for credit.

252P. Comparative Systems of Social Inequality. Seminar, three hours. Examination in historical and contemporary perspective of particular systems of structured social inequality based on rank, class, caste, ethnicity, gender, age, sexual preference, disability, etc., to develop a unified theory of social inequality. Examples from Asian, Pacific, European, African, and American cultures. S/U or letter grading.

252Q. Anthropology of Resistance. Lecture, one hour; discussion, two hours. Prerequisite: at least one upper division sociocultural anthropology course. Exploration of recent works in anthropology and other disciplines which address practice and resistance, as part of an effort to understand processes that have shaped modern and postcolonial society and culture.

253. Economic Anthropology. Prerequisite: consent of instructor. May be repeated for credit.

253P. Technology and Economy. Seminar, three hours. Prerequisite: consent of instructor. Analysis of technological systems and patterns of technical evolution in context of corresponding social and economic change (e.g., in labor organization, kinship, property rights), using examples mainly from Asian peasant societies, past and present. S/U or letter grading.

254. Kinship. Prerequisite: consent of instructor. May be repeated for credit.

255. Comparative Political Institutions. Prerequisite: consent of instructor. May be repeated for credit.

256. Anthropology of Conflict. Seminar, three hours. Open to undergraduates with consent of instructor. Examination of events and institutions associated with large-scale or ongoing conflict in a variety of settings. Particular consideration to roots of violence, violent manifestations and cross-cultural misunderstandings, and nature and content of armed confrontation. S/U or letter grading.

Applied Anthropology

260. Urban Anthropology. Prerequisite: course 167 or consent of instructor. Intensive anthropological examination of the urban setting as a human environment. S/U or letter grading.

261Q. Issues in Applied Anthropology. Seminar, three hours. Use of seminar format to explore selected domestic and international problems from applied anthropological perspective. Consideration of history of applied anthropology, ethics, and careers strategies.

M262P. Culture and Human Reproduction. (Same as Community Health Sciences M240.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Exploration of human behavior related to reproduction. Cross-cultural exploration of biological and behavioral factors, with particular reference to human adaptation.

263P. Gender Systems. Discussion, three hours. Prerequisite: consent of instructor. Current theoretical developments in understanding gender systems cross-culturally, with emphasis on relationship between systems of gender, economy, ideational systems, and social inequality. Selection of ethnographic cases from recent literature. S/U or letter grading.

M263Q. Advanced Seminar: Medical Anthropology. (Same as Community Health Sciences M244, Nursing M273, and Psychiatry M273.) Seminar, three hours. Prerequisite: consent of instructor. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works.

263R. Medicine in Chinese Culture. Seminar, three hours. Prerequisite: consent of instructor. Use of the rich historical material and anthropological studies of Chinese medicine to analyze social and symbolic complementarity of different therapeutic systems and current attempts at syncretization with Western biomedicine. S/U or letter grading.

265. Public Archaeology. Prerequisite: consent of instructor. Archaeology as part of the national heritage, both in the U.S. and other countries. Legal, ethical, cultural, and scholarly aspects of salvage and contact archaeology. Designed for researchers and managers of cultural resources.

M269. Contemporary Issues of the American Indian. (Same as American Indian Studies M200C and Sociology M275.) Introduction to most important issues facing American Indians as individuals, communities, tribes, and organizations in the contemporary world, building on historical background presented in American Indian Studies M200A and cultural and expressive experience of American Indians presented in American Indian Studies M200B.

M269P. Politics of Reproduction. (Same as Psychiatry M280.) Seminar, three hours. Examination of various ways that power, as it is structured and enacted in everyday activities, shapes human reproductive behavior. Case materials from diverse cultures illuminate how competing interests within households, communities, states, and institutions influence reproductive arrangements in society.

Regional Cultures

M272. Indians of South America. (Same as Latin American Studies M250A.) Lecture, three hours. Prerequisite: consent of instructor. Survey of literature and research topics related to Indian cultures of South America. May be repeated for credit.

273. Cultures of the Middle East. Seminar, three hours. Prerequisite: consent of instructor. Survey of literature and problems of various cultures of the Middle East.

274. Cultures of the Pacific Islands. Prerequisite: consent of instructor. Topics in contemporary sociocultural anthropology and classic ethnography of Melanesia, Polynesia, and Micronesia. May be repeated for credit.

277. Aspects of Chinese Society. Seminar, three hours. Prerequisite: consent of instructor. Anthropological perspective on historical evolution of and contemporary changes in such key institutions of Chinese society as family, lineage, and associations, setting individuals and groups in the larger political, economic, and class framework of society and state. S/U or letter grading.

History, Theory, and Method

281. Selected Topics in History of Anthropology. Prerequisite: consent of instructor. Particular problems in history of anthropology as dictated by interests of students and faculty. May be repeated for credit.

281P. Contemporary Problems in Africa. Seminar, three hours. Prerequisite: consent of instructor. Problematic issues in Africa in light of classical anthropological literature and recent work by anthropologists and other fieldworkers in Africa, with cases from eastern and southern Africa. S/U or letter grading.

282. Research Design in Cultural Anthropology. Prerequisite: consent of instructor. Primarily intended for graduate students preparing for fieldwork. Unique position of anthropology among the sciences and resulting problems for scientific research design. Review of typical research problems and appropriate methods. Students prepare their own research designs and present them for class discussion.

283. Formal Methods of Data Analysis in Anthropology. Seminar, three hours. Prerequisite: consent of instructor. Current topics and issues related to formal analysis of data and representation of cultural constructs: formal models of kinship terminologies, structural models of cognitive systems, graph theoretic models of networks, models of decision making, hierarchical information systems, stability in complex adaptive systems. S/U or letter grading.

M284. Qualitative Research Methodology. (Same as Community Health Sciences M216.) Discussion, three hours; laboratory, one hour. Prerequisite: consent of instructor. Intensive seminar/field course in qualitative research methodology. Emphasis on using qualitative methods and techniques in research and evaluation related to health care.

285. Schools, Domains, and Strategies in World Archaeology. Seminar, three hours. Prerequisite: consent of instructor. Comparative examination of schools of world archaeology, contrasting their respective databases, research strategies, and relations to allied intellectual disciplines. Archaeologists from all departments are welcome, as are students interested in history or philosophy of science.

285P. Selected Topics in Anthropological/Archaeological Theory. Seminar, three hours. Prerequisites: graduate standing and/or consent of instructor. Variable topics course on important theoretical subjects in anthropology and archaeology. May be repeated for credit. S/U or letter grading.

286P. Selected Topics in Computer Simulation and Modeling. Seminar, three hours. Prerequisite: course 180 or consent of instructor. Applications of computer simulations and/or models to specific problem areas of interest to anthropologists. Problem areas rotate with each offering and include cognitive ecological, demographic evolutionary, and other theoretical foci. S/U or letter grading.

287. Poststructural Theories. Seminar, three hours. Prerequisites: graduate standing, consent of instructor. Examination of development and application of poststructural theories in anthropology by exploring interdisciplinary connections, especially as they concern the concept of culture, narrative, ethnographic writing, reflexivity, politics of representation, historicity, and study of the self, identity, and the body. S/U or letter grading.

287P. Anthropology and Colonialism. Prerequisite: graduate standing. Exploration of multifaceted nature of colonialism and its cultural manifestations in a variety of geographical areas. Reconsideration of history of anthropology for, as Talal Asad argues, "anthropology emerged as a distinctive discipline at the beginning of the colonial era." S/U or letter grading.

287Q. Native American Historical Demography. Lecture, two hours; discussion, one hour. Examination of population history of Native Americans north of Mexico prior to and following contacts with Europeans, Africans, and others, circa 1492. Emphasis on number of American Indians and other Native Americans, their decline following European contact, and their recent resurgence.

C291. Writing for Anthropology. Lecture, three hours. Prerequisite: consent of instructor. Teaching of writing skills in various academic forms, including term papers, essay examinations, journal articles, and reports. Class projects require student writing and evaluation of professional writing. Emphasis on organization and presentation of a scholarly argument. Concurrently scheduled with course C191. Graduate students expected to prepare a higher level of the scholarly research paper. S/U or letter grading.

292. Making Oral Presentations. Lecture/student presentations, two hours; discussion, one hour. Prerequisite: graduate standing or consent of instructor. How to organize and present seminar reports, papers at scholarly conferences, and lectures to professional audiences. Opportunity for students to develop their speaking skills through actual practice in workshop atmosphere of mutual support and constructive criticism. S/U grading.

Special Studies

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching Anthropology (2 to 4 units). Seminar/workshop, three hours. Prerequisite: graduate standing. Required of all new teaching assistants. Workshop/seminar in teaching techniques, including evaluation of each student's own performance as a teaching assistant. Four-day workshop precedes beginning of term, followed by 10-week seminar during term designed to deal with problems and techniques of teaching anthropology. Unit credit may be applied toward full-time equivalence but not toward nine-course requirement for M.A. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Individual Studies for Graduate Students (2 to 8 units). Prerequisite: consent of instructor. Directed individual studies. S/U or letter grading.

597. Preparation for Ph.D. Qualifying Examinations (2 to 12 units).

598. Research for and Preparation of M.A. Thesis (2 to 8 units). Prerequisite: consent of instructor (faculty adviser). Preparation of research data and writing of M.A. thesis. S/U grading.

599. Research for Ph.D. Dissertation (2 to 12 units). Prerequisite: consent of instructor. Ph.D. dissertation research or writing. Students must have completed qualifying examinations and ordinarily take no other coursework.

APPLIED LINGUISTICS

*Interdepartmental Program
College of Letters and Science*

UCLA
3300A Rolfe Hall
Box 951531
Los Angeles, CA 90095-1531
(310) 825-4631

Professors

Roger W. Andersen, Ph.D. (*Teaching English as a Second Language and Applied Linguistics*)
Raimo A. Anttila, Ph.D. (*Linguistics*)
Lyle Bachman, Ph.D. (*Teaching English as a Second Language and Applied Linguistics*)
Marianne Celce-Murcia, Ph.D. (*Teaching English as a Second Language and Applied Linguistics*)
Susan R. Curtiss, Ph.D. (*Linguistics*)
Bruce P. Hayes, Ph.D. (*Linguistics*)
Thomas J. Hinnebusch, Ph.D. (*Linguistics*)
Nina M. Hyams, Ph.D. (*Linguistics*)
Patricia A. Keating, Ph.D. (*Linguistics*)
Edward L. Keenan, Ph.D. (*Linguistics*)
Pamela L. Munro, Ph.D. (*Linguistics*)
Elinor Ochs, Ph.D. (*Teaching English as a Second Language and Applied Linguistics*)
Emanuel A. Schegloff, Ph.D. (*Sociology*)
Russell G. Schuh, Ph.D. (*Linguistics*)
John H. Schumann, Ed.D. (*Teaching English as a Second Language and Applied Linguistics*),
Chair
Donca Steriade, Ph.D. (*Linguistics*)
Robert P. Stockwell, Ph.D. (*Linguistics*)

Professors Emeriti

George D. Bedell, Ph.D. (*Linguistics*)
Russell N. Campbell, Ph.D. (*Teaching English as a Second Language and Applied Linguistics*)
Victoria A. Fromkin, Ph.D. (*Linguistics*)
Evelyn R. Hatch, Ph.D. (*Teaching English as a Second Language and Applied Linguistics*)
Mazisi R. Kunene, Ph.D. (*Linguistics*)
Peter N. Ladefoged, Ph.D. (*Linguistics*)
Earl J. Rand, Ph.D. (*Teaching English as a Second Language and Applied Linguistics*)
Paul M. Schachter, Ph.D. (*Linguistics*)

Associate Professors

Hilda J. Koopman, Ph.D. (*Linguistics*)
Dominique L. Sportiche, Ph.D. (*Linguistics*)
Edward P. Stabler, Ph.D. (*Linguistics*)
Timothy A. Stowell, Ph.D. (*Linguistics*)

Assistant Professors

Asif Agha, Ph.D. (*Teaching English as a Second Language and Applied Linguistics*)
Marcyliena H. Morgan, Ph.D. (*Anthropology*)

Lecturers

Donna Brinton, M.A. (*Teaching English as a Second Language and Applied Linguistics*)
Janet Goodwin, M.A. (*Teaching English as a Second Language and Applied Linguistics*)
Christine Holten, M.A. (*Teaching English as a Second Language and Applied Linguistics*)
Linda Jensen, M.A. (*Teaching English as a Second Language and Applied Linguistics*)

Adjunct Professor

Ian Maddieson, Ph.D. (*Linguistics*)

Scope and Objectives

Since language permeates every aspect of our social, economic, political, and academic pursuits, it is small wonder that we have deep abiding curiosity about its origin, its use, and its acquisition. The UCLA doctoral program in applied linguistics provides a rich and supportive environment for graduate students and faculty to define and resolve questions that satisfy that curiosity.

Faculty members of the Department of Teaching English as a Second Language and Applied Linguistics, as well as professors in Anthropology, Linguistics, Psychology, Sociology, and Education, represent a wide range of expertise and experience in language-related research. Their guidance and collaboration with students as they apply relevant elements of linguistics, psycholinguistics, and sociolinguistics result in substantial research findings in the areas of discourse/grammar analysis, language acquisition, and language assessment. Graduates of the program are well prepared to pursue academic and professional careers at the highest level of service and inquiry.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degree

None.

Doctoral Degree

Admission

The basic requirement for admission to the doctoral program is the completion of the UCLA Master of Arts degree in Teaching English as a Second Language (TESL) or in Linguistics or the equivalent of one of these. Applicants with a graduate degree in TESL, linguistics, applied linguistics, psycholinguistics, or sociolinguistics from another recognized institution may be admitted provided they then make up the courses in one or the other of the two UCLA M.A. programs whose equivalents they have not yet taken. Applicants whose graduate degree is in other related disciplines (such as a foreign language, English, education, psychology, sociology, or anthropology) are advised to complete the UCLA M.A. in Linguistics or TESL before seeking admission to the Ph.D. program. Prospective candidates are required to submit the following items by the preceding December 15: (1) a statement of purpose describing their research background and the type of dissertation they hope to prepare; (2) three letters of recommendation from professors who are well acquainted with their academic background; (3) the M.A. thesis or

related research papers; (4) Graduate Record Examination (GRE) scores. International applicants should also submit their Test of English as a Foreign Language (TOEFL) scores.

The admissions committee considers all of the above criteria, as well as undergraduate and graduate grade-point averages, in deciding on the top candidates for the program.

Major Fields or Subdisciplines

Three areas of specialization are available: language acquisition, language assessment, and discourse/grammar analysis.

Course Requirements

Basic Preparation. Any of the following courses not already taken must be completed as early as possible and before advancement to candidacy for the degree. For basic preparation in linguistics, students can choose either a phonetics and phonology track, a syntax and semantics track, or a discourse analysis track. For all tracks, students must take both Linguistics 120A, 120B. Under the phonetics and phonology track, students would then take Linguistics 165A or 200A, followed by Linguistics 201 or 203 or 204. Under the syntax and semantics track Linguistics 165B, and Linguistics 200B or 215 are taken. Under the discourse analysis track, students would take Teaching English as a Second Language and Applied Linguistics 283, followed by Teaching English as a Second Language and Applied Linguistics 250 or 252 or Sociology C244A or C244B or Anthropology 204 or 242. For basic preparation in applied linguistics, students must take Teaching English as a Second Language and Applied Linguistics 241.

Units and Courses. As a breadth requirement, students must take at least 32 units of graduate-level coursework (in the 200 or 500 series). These 32 units may not include courses taken while completing basic preparation courses, Linguistics 275, Teaching English as a Second Language and Applied Linguistics 400, or Applied Linguistics 597 or 599. No more than eight of the 32 units may be in 596 courses, and these should be in Applied Linguistics 596, if possible. The 32 units must include eight units in one area outside the area of specialization.

Appropriate graduate courses taken at UCLA after completion of the M.A. but before admission to the doctoral program may be applied toward the eight-course requirement for the Ph.D. Credit may be transferred for up to two courses taken at another institution, but only for graduate-level courses taken after completion of the M.A. and preferably taken within the framework of UCLA's Applied Linguistics 501.

Within Graduate Division limits, courses that may be taken on an S/U basis include undergraduate courses taken as prerequisites to needed graduate courses, undergraduate courses not required, reading courses in a foreign language, graduate courses taken in addition to the required 32 units, Applied Linguis-

tics 501, 597, 599, Teaching English as a Second Language and Applied Linguistics 400, and Linguistics 275. All other courses must be taken for letter grades.

Written and Oral Qualifying Examinations

In lieu of a written qualifying examination, two original research papers of publishable quality in different areas of specialization are required. These may be revised or extended seminar papers but must be prepared after admission to the Ph.D. program. Students are to choose the topics of these papers in consultation with appropriate faculty members and with the consent of the Ph.D. program adviser. Each of the finished papers is evaluated by two faculty members.

The doctoral committee administers the University Oral Qualifying Examination, the focus of which is a prospectus of the dissertation which must be submitted to the committee prior to the examination. The committee also has the responsibility for determining the adequacy of the student's preparation for writing the dissertation. If prospectus and preparation are judged adequate, the choice of the dissertation topic is thereby approved, and the student becomes eligible for advancement to doctoral candidacy. In case of failure, the doctoral committee determines whether or not the student may be reexamined and if further courses must be taken before the reexamination.

Graduate Courses

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA program adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study (4 to 8 units). Prerequisite: doctoral standing. Independent study in an area of applied linguistics. Up to eight units may be applied toward Ph.D. course requirements. May be repeated for credit.

597. Preparation for Ph.D. Candidacy Examination (4 to 8 units). Prerequisite: completion of at least six courses of the 32-unit requirement for Ph.D. May not be applied toward the 32-unit requirement. May be repeated for credit. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (4 to 16 units). Prerequisite: advancement to Ph.D. candidacy. Required of all Ph.D. candidates each term they are registered and engaged in dissertation preparation. May be repeated for credit but may not be applied toward Ph.D. course requirements. S/U grading.

Applied Linguistics Course List

Discourse/Grammar Analysis

English 241. Studies in Structure of the English Language

- Linguistics 201.** Phonological Theory II
202. Language Change
203. Phonetic Theory
204. Experimental Phonetics
205. Morphological Theory
206. Syntactic Theory II
207. Formal Semantics

- C209A, C209B. Natural Language Processing I, II
210A, 210B. Field Methods I, II
214. Survey of Current Syntactic Theories
215. Syntactic Typology
220. Linguistic Areas
225. Linguistic Structures
251. Topics in Phonetics and Phonology I: Proseminar
252. Topics in Syntax and Semantics I: Proseminar
253. Topics in Language Variation I: Proseminar
254. Topics in Linguistics I: Proseminar
256A, 256B. Topics in Phonetics and Phonology II: Proseminar
257A, 257B. Topics in Syntax and Semantics II: Proseminar
258A, 258B. Topics in Language Variation II: Proseminar
259A, 259B. Topics in Linguistics II: Proseminar
263A-263B-263C. Seminars: Language Variation (only one of these may be applied toward the 32-unit requirement)
Teaching English as a Second Language and Applied Linguistics 249. Current Issues in Language Analysis
250. Advanced Seminar: Cohesion Analysis of English Structure
252. Advanced Seminar: Contextual Analysis of English Structure
263. Cross-Linguistic Topics in Functional Grammar I: Typology
264. Cross-Linguistic Topics in Functional Grammar II: Discourse
283. Discourse Analysis
285. Language Socialization
288. Discourse Laboratory
289. Current Issues in Language Use

Additional Courses in Other Departments

- Anthropology 204.** Core Seminar: Linguistic Anthropology
M234Q. Psychological Anthropology
242. Ethnography of Communication
245. Linguistic and Intracultural Variation
M249A-M249B. Ethnographic Methods in Applied Linguistics A, B
Education 204D. Minority Education in Cross-Cultural Perspective
German (Germanic Languages) C238. Linguistic Theory and Grammatical Description
Sociology C244A-C244B. Conversational Structures I, II
258. Talk and Social Institutions
266. Selected Problems in Analysis of Conversation
267. Selected Problems in Communication
Spanish (Spanish and Portuguese) 209. Dialectology
256A-256B. Studies in Spanish Linguistics

Scope and Objectives

The interdisciplinary program offers M.A. and Ph.D. degrees in Archaeology. It brings together interests and specialties represented by those departments offering courses in archaeology, as well as others offering courses relevant to archaeology.

The primary purpose of the program is to train scholars in archaeology for university-level teaching and research and other professional aims. Its resources are intended for those archaeology students whose academic goals cannot be met within any single department and who, consequently, require an individually designed plan of study combining academic preparation in two or more departments. Applications are especially encouraged from students whose interests may form bridges with disciplines and departments not offering archaeology (e.g., botany, chemistry, geology, mathematics, statistics, zoology, etc.). There are opportunities for participation in a variety of field, laboratory, and computer studies.

Graduate Study

The following constitutes introductory information regarding graduate degree programs. For

a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degree

Admission

Since the Archaeology program is interdisciplinary, any undergraduate major may be considered for admission to the Master of Arts program, although those applicants who have had little previous archaeological education may be admitted under probationary status and may be required to take a series of courses to make up deficiencies. A Graduate Record Examination (GRE) General Test report is required of all new applicants. The following application materials should be submitted directly to the chair of the program: an acceptable plan of study (including a statement of objectives, an outline of projected coursework, and a general indication of an M.A. paper); three letters of recommendation; a research paper preferably relevant to archaeology or comparable evidence of scholarly work. Applicants who have not completed a course in the history of archaeology or in quantitative methods in archaeology are required to take corresponding courses at UCLA. These courses do count toward the minimum course requirements for the degree. Applicants are accepted for admission for the Fall Quarter only. The program's *Study Guidelines* brochure will be sent on request to the Chair, Archaeology Program.

Areas of Study

Africa; analysis of archaeological materials; ancient Near East; Andean South America; Egypt; Islamic world; Caribbean; China and the Far East; classical Greece and Rome; dating techniques in archaeological sciences; Europe; India and Central Asia; Mesoamerica; Pacific; paleoenvironmental studies; Western North America.

Other areas of specialization are also available.

Course Requirements

A minimum of 42 units (nine courses, of which five must be graduate) taken for a letter grade are required, to be distributed as follows: a minimum of five courses (26 units) in the 200 and 500 series, including Archaeology M201A-M201B, M201C. Students must also take a laboratory-based course. This requirement can be met in the following ways: completion of Anthropology 117, 117P; completion of Archaeology M205 (courses taught by the directors of various laboratories); and, with the approval of the student's committee, an independent elective course. A minimum of two additional elective graduate courses is required. Archaeology M265 is recommended. The other units may be completed by taking either graduate or upper division courses. The proportion of gradu-

ate to undergraduate courses may vary depending on the student's preparation.

No graduate degree is awarded until the student has worked in the field. Both theoretical and practical knowledge of methods and techniques used in the field are necessary.

This requirement may be met by taking a regular UCLA field course such as Anthropology 115P, Archaeology 259, Ancient Near East 261, Classics C251E, or History 276. If a student wishes to fulfill this requirement by participation in fieldwork other than that in the courses listed above, the director of the project must submit a letter about the student's work to the chair of the Archaeology Program. Except for the courses listed above, any given formula to fulfill the requirement must be cleared in advance with the chair of the program.

Comprehensive Examination Plan

The comprehensive examination consists of three examinations, given at the completion of each section of Archaeology M201A, M201B, and M201C respectively. The comprehensive examinations are graded by a committee consisting of the chair of the Archaeology Program and the professor in charge of the course. The examinations are graded as high pass, pass, or no pass. Each section of the examination may be repeated once.

Thesis Plan

None.

Doctoral Degree

Admission

Completion of a master's program is required for the doctoral degree in Archaeology. Applicants who do not have a UCLA M.A. in Archaeology should refer to the Admission section under Master's Degree. The Graduate Record Examination (GRE) is required of all new applicants. Admission to the doctoral program for students completing a UCLA M.A. in Archaeology is based on (1) written recommendation by all three members of the M.A. committee; (2) submission of a plan of study, including projected coursework, choice of foreign language, description of qualifying examination components, and dissertation topics; and (3) quality of M.A. core examination results and M.A. paper.

Doctoral students entering the program with an M.A. from another university are required to pass the comprehensive core examination (see Master's Degree section) unless they can demonstrate to the chair and the members of the admissions committee that the examination should be waived.

Major Fields or Subdisciplines

Africa; analysis of archaeological materials; ancient Near East; Egypt; Islamic world; Andean South America; Caribbean; China and the Far East; classical Greece and Rome; dating techniques in archaeological sciences; Eu-

rope; India and Central Asia; Mesoamerica; Pacific; paleoenvironmental studies; Western North America.

Other areas of specialization are also available.

Course Requirements

Students must be enrolled in a minimum of 12 units per quarter. Formal course requirements include a graduate level course in research design, such as Anthropology 200A, 200B, 283, Archaeology M201C, and M265, if not taken during the M.A. program. Anthropology 285 and C291 are recommended as electives. Other course requirements are decided by the student's committee. Archaeology M201A-M201B are required. Additional requirements may be suggested by the dissertation committee.

No graduate degree is awarded until the student has worked in the field. Both theoretical and practical knowledge of methods and techniques used in the field are necessary.

This requirement may be met by taking a regular UCLA field course such as Anthropology 115P, Archaeology 259, Ancient Near East 261, Classics C251E, or History 276. If a student wishes to fulfill this requirement by participation in fieldwork other than that in the courses listed above, the director of the project must submit a letter about the student's work to the chair of the Archaeology Program. Except for the courses listed above, any given formula to fulfill the requirement has to be cleared in advance with the chair of the program.

Written and Oral Qualifying Examinations

Written Qualifying Examination. By the end of the fourth quarter of the doctoral program, after the foreign language requirement has been fulfilled, students take a written qualifying examination in the following three areas: (1) topical specialization; (2) analytical theory, method, and technique; and (3) regional culture history. If this examination is passed, students may then make arrangements to take the oral examination. If the written examination or any portion thereof is failed, students may make one further attempt if their committee deems it appropriate.

Oral Qualifying Examination. The University Oral Qualifying Examination must be taken by the end of the sixth quarter of the doctoral program. Students are required to submit to the doctoral committee a formal dissertation proposal of about 10 pages, including the particular research problem on which they will be examined during the oral qualifying examination.

Upper Division Course

C110. Archaeological Materials Identification and Characterization (6 units). Lecture, three hours; laboratory, four hours. Laboratory-oriented introduction for archaeologists to identification and quantitative description of solid materials, especially metals, ceramics, and other inorganic and some organic substances. Concurrently scheduled with course C210.

Graduate Courses

200. Archaeology Colloquium (1 or 6 units). Discussion, two hours. Prerequisite: archaeology major or consent of instructor. Required of all students. Development of archaeology as a discipline. Major intellectual trends and current issues in archaeology. Scientific and humanistic viewpoints presented by archaeologists from different academic departments. May be repeated for credit but may be applied only twice toward departmental M.A. requirements. S/U grading only for students enrolled for one unit.

M201A-M201B. Graduate Core Seminars: Archaeology (6 units each). (Same as Anthropology M201A-M201B.) Seminar, three hours. Required of all M.A. students. Seminar discussions based on carefully selected list of 30 to 40 major archaeology works. These compulsory core seminars provide students with foundation in breadth of knowledge required of a professional archaeologist. Archaeological historiography, survey of world archaeology, and archaeological techniques. Emphasis on appreciation of the multidisciplinary background of modern archaeology and relevant interpretative strategies. May be repeated for credit with consent of adviser.

M201C. Regional Analysis in Archaeology. (Same as Anthropology M211.) Lecture, three hours. Prerequisite: consent of instructor. Survey of analytical methods used in archaeology to study prehistoric settlement systems. Specific issues include settlement distribution with respect to natural resources, settlement hierarchy, and patterns of exchange.

M205. Special Topics in Archaeology (6 units). (Same as Anthropology M212S.) Lecture, three hours. Prerequisite: graduate standing in archaeology or in other departments. Open to undergraduates with consent of instructor. Special advanced topics in archaeology such as new strategies, methodologies, excavation projects, regional synthesis, or comparisons on a worldwide basis, including current work by core faculty of the program and special visitors.

C210. Archaeological Materials Identification and Characterization (6 units). Lecture, three hours; laboratory, four hours. Laboratory-oriented introduction for archaeologists to identification and quantitative description of solid materials, especially metals, ceramics, and other inorganic and some organic substances. Concurrently scheduled with course C110.

259. Fieldwork in Archaeology (2 to 12 units). Prerequisite: consent of instructor. Participation in archaeological field excavations or museum research under supervision of staff archaeologists at UCLA. Minimum of one month of field time away from campus required. May be repeated for credit with consent of adviser.

M265. Depositional History and Stratigraphic Analysis. (Same as Ancient Near East M265.) Lecture, two hours. Theoretical understanding of depositional processes ("laws") which lead to site formation and of stratigraphic procedures to be used in recovery of embedded cultural materials. Study of issues covered in the literature, with specific test cases from actual excavations and site reports. Coverage of theoretical implications of such disciplines as surveying and pedology with the help of specialists. S/U or letter grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Individual Studies for Graduate Students (2 to 12 units). Hours to be arranged. Prerequisite: consent of instructor. May be repeated for credit with consent of adviser.

597. Preparation for Ph.D. Qualifying Examinations (2 to 12 units). Prerequisites: completion of formal coursework, passing of language examinations before enrollment, consent of instructor. May be repeated for credit with consent of adviser. S/U grading.

598. M.A. Paper Preparation (2 to 12 units). Prerequisite: consent of instructor. May be repeated for credit with consent of adviser. S/U grading.

599. Ph.D. Dissertation Research and Preparation (2 to 12 units). Prerequisite: consent of instructor. May be repeated for credit with consent of adviser. S/U grading.

Related Courses in Other Departments

Related courses, not listed individually, include regional geography, ancient and regional history, ethnography, folklore, history of technology, and the Earth sciences. Also recommended are the appropriate modern and ancient languages for your area of study.

Most archaeology courses are taught in the various departments. The following is a list of such courses, by topic and department. You are encouraged to examine the course listings of all departments for a truly interdisciplinary course of study.

Scope and Objectives

The Department of Architecture and Urban Design at UCLA offers four degree programs tailored to the needs of different groups of students: M.Arch. I, M.Arch. II, M.A., and Ph.D.

M.Arch. I is a three-year first professional degree program which is accredited by the National Architectural Accrediting Board (NAAB). It does not assume any prior background in architecture. Students who do have some prior architecture background (e.g., a four-year undergraduate degree) may also enter the program and may petition to waive certain required courses and substitute more advanced electives in their place. M.Arch. I graduates normally pursue professional careers in architectural practice.

M.Arch. II is an advanced professional degree program for students who already hold a first professional degree in architecture. It provides opportunities for intensive concentration in a variety of areas of professional specialization.

The M.A. and Ph.D. degree programs provide opportunities to pursue research and scholarship in the field of architecture. Graduates typically pursue academic or applied research and consulting careers.

Graduate Study

The following constitutes introductory information regarding graduate degree programs. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degrees

The Department of Architecture and Urban Design offers a Master of Architecture I (M.Arch. I), a Master of Architecture II (M.Arch. II), and a Master of Arts in Architecture (M.A.).

Master of Architecture I

Admission

The Master of Architecture I program accepts applications from those holding a baccalaureate degree or its equivalent, comparable in standard and content to a bachelor's degree from the University of California. It accepts applications for admission from students with a broad diversity of backgrounds. Although no academic or experiential training in architecture is required, some students have had experience in the field prior to admission. First-year classes assume some familiarity with the history and culture of architecture, possession of basic graphics skills, and understanding of fundamental concepts of mathematics and physics. Applicants are also strongly advised to become familiar with basic works in the history and theory of architecture before entering the program. A suggested reading list is available from the graduate adviser. Entry into the program is, therefore, conditional upon having taken at least one college-level course in each of the following areas: Newtonian physics, mathematics, a university survey of the history of architecture (minimum one semester or two quarters) encompassing examples from antiquity to the present, and drawing or basic design. For further information on these prerequisites, contact the graduate adviser.

The Admissions Committee considers applications from those who, at the time of application, do not have these prerequisites. If applicants do not have the prerequisites, they must specify in the application how they plan to complete them before entry into the program. The graduate adviser can provide guidance on how to do so. Admission is only offered on the condition that the applicant produce satisfactory evidence of having completed prerequisites before commencing classes. Instructors may test background in these areas before admitting students to certain courses. If applicants lack this necessary proficiency, they may need to spend an additional year fulfilling curricular requirements.

- Applicants are required to submit three letters of recommendation, academic transcripts, a statement of purpose, and a creative portfolio. No admission tests are required. In addition to the application for graduate admission, the Departmental Supplement should be submitted and is available from the Admissions Office, Architecture and Urban Design Department, School of the Arts and Architecture.

The M.Arch. I program is a full-time program and does not accept part-time students. All new students must enter in the Fall Quarter. Additional information about the program may be obtained by writing directly to the admis-

sions officer of the Architecture and Urban Design Department.

English Language Proficiency. If an applicant's primary language is not English, a score of at least 580 on the Test of English as a Foreign Language (TOEFL) is required for admission. In addition, upon arrival at UCLA students are required to take the English as a Second Language Placement Examination (ESLPE) and, beginning in the first quarter of residence, to take any English as a Second Language courses needed, as determined by the results of the ESLPE. Because such courses do not count toward the minimum coursework requirement, expect to spend additional time in residence.

Areas of Study

Students are required to concentrate several elective courses within a single curricular area. A minimum of three elective courses must be taken within this curricular area, including two courses in theory and one studio or project application (Architecture and Urban Design 402, 403 series), during the second year of study.

Specializations are currently available in the following areas: architectural design; urban policy and design; policy, programming, and evaluation; architectural technology; design and computation; history and theories of architecture.

Course Requirements

A minimum of 116 units of coursework is required of which at least 26 four-unit courses must be taken at the graduate level (200 and 400 series). Students must take at least eight units per quarter and may take up to 16 units in a quarter.

Required Courses. All students must successfully complete the following courses:

Architecture and Urban Design 201A, 201B, 291, 401, 402, 403 series, 411, 412, 413, 414, 415, 416, 421, 422, 423, 425, 426, 431, 432, 433, 436, 441, 442, 498, 597, and an elective in professional practice.

Design Studios. Design studios offered for M.Arch. I students are classified in three levels: introductory (411), intermediate (412, 413, 414), and advanced (402, 403 series, 415, 416). Within a given level, the design studios may be taken in any sequence. Any of these studios may be repeated for credit.

If students maintain at least a B average in these studios, they automatically pass from the introductory to the intermediate level, from the intermediate level to the advanced level, and (for those students who plan to take the comprehensive examination in architectural design) from the advanced level to preparation for the comprehensive examination in architectural design. Students who do not maintain a B average in these studios are reviewed by a committee consisting of all design studio instructors, and are not be permitted to

advance unless explicitly allowed by that committee.

Elective Sequence. Students must complete an elective sequence consisting of at least three related courses, terminating in a 402, 403 series in advanced studio (normally in the spring of the second year). The elective sequence is intended to allow students to gain in-depth knowledge of a chosen area of specialization, and apply that knowledge in a design studio. Elective sequences are offered in the following areas: (1) urban design and policy, (2) policy, programming, and evaluation, (3) architectural technology, (4) design and computation, (5) history and theories of architecture.

Details of currently available and approved elective sequences are available from the graduate adviser. Students who wish to meet the elective sequence requirement with sequences not on this standard list must secure approval from the M.Arch. I curriculum committee.

Additional Elective Courses. As well as completing an elective sequence, students are expected to explore a variety of topics by taking additional elective courses. Within the Architecture and Urban Design Department, electives are offered in the five areas listed above. In addition, elective work outside the department may be taken.

Students are required to take at least 20 units of elective coursework (including the elective sequence). At least 16 units must be taken within the Department of Architecture and Urban Design. The usual pattern is as follows:

First year: Fall, Winter, Spring — none.

Second year: Fall, Winter, Spring — four units each term.

Third year: Fall, Winter — four units each term.

Many of the elective courses are organized in sequences that begin with an introductory course in the fall, continue on to a more advanced course in the winter, and culminate with a 402, 403 series studio in the spring. At the beginning of the Fall Quarter of the second year consult the academic adviser and carefully plan the elective coursework.

Waiving Required Courses. Students who believe they can demonstrate that they already have adequate background in topics covered by specific required courses may petition to waive those courses and replace them with electives. However, permission to waive required courses does not, in itself, reduce the minimum number of 29 courses required for the M.Arch. I degree, nor does it reduce the nine-quarter residence requirement.

A petition to waive an individual required course should be addressed to the faculty member responsible for that course and may be granted at the faculty member's discretion, possibly by means of a special examination. The petition should present evidence of adequate background in the specific topic of the

course, preferably through a transcript and a syllabus of the course.

Independent Study. In addition to the eight units of 597, students may also apply eight units of 596 coursework toward the elective course requirements for graduation. Of this total of 16 units of 500-series courses, eight units may be applied toward the graduate course requirement.

All independent work with 500-series course numbers must be undertaken with the guidance and approval of a departmental faculty member who evaluates the work on a satisfactory/unsatisfactory basis.

Course of Study. A normal, three-year path through the curriculum is listed below. Required courses other than design studios are normally only offered once a year, so failure to successfully complete one of these courses at the point shown may lengthen the time required to complete the program. Sections of Architecture and Urban Design 415 (advanced) required studios are normally available each quarter. Sections of Architecture and Urban Design 402, 403 series are available in spring and may be available in other quarters as well.

First Year

Fall: Architecture and Urban Design 201A, 201B, 411, 421.

Winter: Architecture and Urban Design 412, 422, 431, 436.

Spring: Architecture and Urban Design 413, 423, 432, 442.

Second Year

Fall: Architecture and Urban Design 414, 424, 433, elective (in sequence), additional elective.

Winter: Architecture and Urban Design 415 (or 401 or 402), 441, elective (in sequence).

Spring: Architecture and Urban Design 401 (or 402 or 403 or M404), elective in professional practice, additional elective.

Third Year

Fall: Architecture and Urban Design 291, 416, 426, elective.

Winter: Architecture and Urban Design 401 (or 402 or 415), 498, elective.

Spring: Architecture and Urban Design 597 or 598.

Comprehensive Examination Plan

All students are required to successfully complete a comprehensive examination and may choose to be examined in any one of the following areas: (1) architectural design, (2) urban design and policy, (3) policy, programming, and evaluation, (4) architectural technology, (5) design and computation, (6) history and theories of architecture.

The examinations are administered by the appropriate curriculum area committees.

Students who opt to take the comprehensive examination in architectural design must enroll in four units of Architecture and Urban Design 498, in addition to eight units of preparation for the comprehensive examination. All students must enroll in eight units of Architecture and Urban Design 597, supervised by the appropriate curriculum area committee. Course 597 may not be taken until all other required courses have been successfully completed. Details of the comprehensive examination policies, established by each curriculum area committee, are available from the graduate adviser.

Thesis Plan

None.

Master of Architecture II

Admission

The Master of Architecture II degree is a second professional degree program in architecture and urban design. The degree can be completed in four quarters in residence. It consists of one year of coursework, plus one or more academic terms to write a thesis or comprehensive examination and enroll in additional academic work as electives. In some areas of specialization more than one year of coursework may be necessary due to the sequence of prerequisites.

In this advanced professional degree program, the architectural graduate or experienced professional can study in specific areas to develop specialized conceptual and methodological skills and explore particular professional issues. The program is based on the concept of a combination of advanced theoretical studies and professional applications.

The M.Arch. II program emphasizes advanced studies in architecture and requires that applicants must hold a five-year Bachelor of Architecture degree or equivalent.

Applicants must state their major area of specialization on their application, as applicants are admitted to a specific major and option, and can only change by petition to the Advanced Graduate Studies Curriculum Committee.

Applicants are required to submit three letters of recommendation, academic transcripts, a statement of purpose, and a creative portfolio. No admission tests are required. In addition to the application for graduate admission, the Departmental Supplement should be submitted and is available from the Admissions Office, Architecture and Urban Design Department, School of the Arts and Architecture.

English Language Proficiency. If an applicant's primary language is not English, a score of at least 580 on the Test of English as a Foreign Language (TOEFL) is required for admission. In addition, upon arrival at UCLA students are required to take the English as a Second Language Placement Examination (ESLPE) and, beginning in the first quarter of residence, to take any English as a Second Language

courses needed, as determined by the results of the ESLPE. Because such courses do not count toward the minimum coursework requirement, expect to spend additional time in residence.

Areas of Study

Students are required to select their major area at the time of application to the program. The six major areas include architectural design; urban design; policy, programming, and evaluation; technology; design theory and methods; history, analysis, and criticism of architecture.

Course Requirements

A minimum of four academic quarters in residence is required. This is a full-time program, and students are expected to remain continuously in residence until all academic work is completed, unless a leave of absence is granted.

A minimum of 44 units of coursework (normally 11 four-unit courses) is required. At least 32 units must be at the graduate level. This includes eight units of Architecture and Urban Design 597 or eight units of course 598. The remaining 12 units may be either upper division (undergraduate) or graduate courses. Eight units of 596 courses may be included as part of the 44 total unit requirement but may not be part of the graduate course requirement.

Major Area. Students are required to select their major area at the time of application to the program, and must take a minimum of 32 units of coursework in that area. Requirements for each of the six major areas are established individually as follows:

Architectural Design

Students are required to complete at least 12 units of advanced design studio work, plus 12 units of approved seminar courses.

Urban Design and Policy

Students are required to complete a year-long sequence of related urban design studio and seminar courses, consisting of one studio and one seminar course each quarter.

Policy, Programming, and Evaluation

Students are required to complete an approved sequence of three core courses for this area, consisting of (1) two lecture/seminar courses which establish substantive foundations; (2) an Architecture and Urban Design 402, 403-series project course which explores applications; and (3) 12 units of elective coursework in this area.

Architectural Technology

Students are required to complete an approved sequence of three core courses for this area, consisting of (1) two lecture/seminar courses which establish substantive foundations; (2) an Architecture and Urban Design 402, 403-series project course which explores

applications; and (3) 12 units of elective coursework in this area.

Design and Computation

Students are required to complete an approved sequence of three core courses for this area, consisting of (1) two lecture/seminar courses which establish substantive foundations; (2) an Architecture and Urban Design 402, 403-series project course which explores applications; and (3) 12 units of elective coursework in this area.

History and Theories of Architecture

Students are required to complete an approved sequence of three core courses in this area, consisting of (1) two lecture/seminar courses which establish substantive foundations; and (2) an Architecture and Urban Design 402, 403-series project course which explores applications; and (3) 12 units of elective coursework in this area.

In partial fulfillment of the requirements for the M.Arch. II degree, students are required to complete either a thesis or a comprehensive examination.

Comprehensive Examination

The comprehensive examination consists of a design or research project on a topic approved by the comprehensive examination committee. The three-person examination committee consists of a chair and two other faculty members. The committee is established by the student at least one quarter before presentation of the comprehensive examination. Students must take at least eight units of Architecture and Urban Design 597 supervised by the chair of the examination committee.

The comprehensive examination must be submitted within two years after entry into the program.

The comprehensive examination is intended to provide the opportunity for the presentation of a design project or independent scholarly research in a professional format of the highest standard. This format must be approved in advance by the comprehensive examination committee.

The comprehensive examination differs from the thesis in three ways. First, an oral defense or public presentation may be required. Second, students submit a report of this work ready for binding for the permanent collection of the Arts Library, which may be as large as 11" x 17" and may include photographs or original drawings, if properly mounted. This report must contain the title page, abstract, signature page, and bibliography, as in a thesis. Third, the report must be submitted to and accepted by the departmental graduate adviser.

Thesis Plan

The thesis consists of a research project or a design project on a topic approved by the student's thesis committee. The three-person thesis committee consists of a chair and two other faculty members. The committee is estab-

lished by the student at least one quarter before presentation of the thesis. Students must take at least eight units of Architecture and Urban Design 598 supervised by the chair of the thesis committee.

The thesis must be submitted within two years after entry into the program.

The thesis is intended to provide the opportunity for the presentation of an independent scholarly research or design project in a written format in accordance with UCLA regulations for theses and dissertations. The thesis is filed at the University Archives after it meets the approval of the thesis committee and general University thesis requirements. This copy is microfilmed, then bound and placed in the permanent collection of the Arts Library.

The thesis and comprehensive plans are identical in terms of the quality of the work that is expected and the deadlines that apply.

Master of Arts

Admission

The Master of Arts program in Architecture offers an academic degree and prepares students to do specialized research or teaching in fields related to the architecture profession. Applicants are required to hold a baccalaureate degree (or its equivalent) comparable in standard and content to a bachelor's degree from the University of California. Applicants should possess the experience and knowledge that would allow advanced research in whatever aspect of architecture they plan to explore within the context of the master's program.

Applicants are required to submit three letters of recommendation, academic transcripts, a statement of purpose, and a creative portfolio. No admission tests are required. In addition to the application for graduate admission, the Departmental Supplement should be submitted and is available from the Admissions Office, Architecture and Urban Design Department, School of the Arts and Architecture.

English Language Proficiency. If an applicant's primary language is not English, a score of at least 580 on the Test of English as a Foreign Language (TOEFL) is required for admission. In addition, upon arrival at UCLA students are required to take the English as a Second Language Placement Examination (ESLPE) and, beginning in the first quarter of residence, to take any English as a Second Language courses needed, as determined by the results of the ESLPE. Because such courses do not count toward the minimum coursework requirement, expect to spend additional time in residence.

Areas of Study

Students are required to focus their work on a specific academic area or professional issue. Specializations are currently available in the following areas: policy, programming, and evaluation; architectural technology (including energy-conserving design); design and com-

putation; history and theories of architecture. In addition, students have the option of the open M.A. wherein they structure their own area of interest from the courses offered by the department.

Course Requirements

Candidates for the M.A. are expected to be in residence at UCLA for at least two years and undertake six quarters of study. Students must choose and pursue one area of specialization. A thesis or a comprehensive project is required. When the committee members have signed the thesis proposal, students may sign up for four and no more than eight units of Architecture and Urban Design 598 and begin work on the thesis itself. The course should be taken at some point during the last year of study.

Students are required to complete a minimum of 16 courses (64 units) of graduate or upper division work. At least five (20 units) of these courses must be 200-series courses and at least two (eight units) must be 500-series courses. No more than 20 units of 500-level courses may be counted toward the total unit requirement for the degree. Up to seven courses may be taken from upper division (undergraduate) or graduate courses offered campuswide.

The University of California minimum requirements for the Master of Arts degree must be completed.

Students must enroll in at least four and no more than eight units of course 598. Students may also apply 12 units of course 596 toward the unit requirements for graduation. Courses in the 400 series may not be applied toward the graduate course requirement for the M.A. degree, but a limited number may be applied toward elective course requirements.

Comprehensive Examination Plan

Students can choose to present a design project as a comprehensive examination (see M.Arch. I). This should be determined at least three months prior to the anticipated date of graduation.

Thesis Plan

Students can choose to do a research thesis. This should be determined at least three months prior to the anticipated date of graduation.

Doctoral Degree

Admission

Applicants must hold a bachelor's degree from an accredited college or university. It is anticipated that most applicants have completed a first professional degree in architecture (a five-year Bachelor of Architecture degree or a professional Master of Architecture degree). If applicants have degrees in other fields, they are also encouraged to apply but they may, at the discretion of the Ph.D. program committee, be required to complete specific coursework in

the Department of Architecture and Urban Design as a condition of admission.

Students must fulfill the requirements of the Graduate Division and the Architecture and Urban Design Department. The application dossier must include (1) short biographical résumé; (2) transcripts of academic record; (3) examples of research and/or creative work; (4) three letters of reference; (5) statement of purpose and proposed program of studies; (6) Graduate Record Examination (GRE) scores.

Where feasible, the Ph.D. program committee may require an interview. If an applicant's native language is other than English, they are required to pass the Test of English as a Foreign Language (TOEFL) before entering.

Admission to the program is granted to a small group each year, according to the following criteria:

- (1) Evidence of capacity for original scholarship and research in architecture, and ability to achieve eminence in the field.
- (2) Demonstration of an outstanding academic record through the evidence of grades (3.5 minimum grade-point average), GRE scores, and references.
- (3) Demonstration in the work submitted of adequate communication skills, particularly writing skills.
- (4) Presentation of a clear and realistic statement of purpose.

Major Fields or Subdisciplines

Students are required to undertake a program of study that includes one major area, normally drawn from the following offered by the Architecture and Urban Design Department: (1) policy, programming, and evaluation; (2) architectural technology; (3) design and computation; (4) history and theories of architecture.

Majors outside these areas, or combinations of some of them, may be undertaken, subject to the approval of the Ph.D. program committee, if supported by qualified departmental faculty members who are available and willing to provide the necessary instruction and guidance.

Each major field is organized and coordinated by a major field committee, consisting of faculty and students with active interests in that area. It is the responsibility of each such committee to initiate research programs, organize discussions, make curriculum and staffing recommendations, and serve as a source of consultation, guidance, and stimulation for the student.

Minor Field. Students are required to include in the program of study at least one minor field, which must be from outside the Department of Architecture and Urban Design.

The objectives of the minor field requirement are to assure adequate academic breadth in students' preparation, and to encourage participation by architecture Ph.D. students in the general intellectual life of the University. In

planning minor fieldwork, students are advised accordingly, and the choice must be approved by the adviser.

Due to the wide diversity of backgrounds of Ph.D. students in architecture, it is appropriate to allow some flexibility in requirements for completion of the minor. The normal method of completing and demonstrating competence in the minor field is to complete at least 16 units of coursework, which represent a unified course of study in that field, with grades of B or better. If a qualified departmental faculty member is willing to provide the necessary supervision, the Ph.D. program committee, in consultation with that faculty member and the student, may accept an alternative method of completing this requirement (for example, a substantial research project). Any proposal to complete the minor by such an alternative method must explicitly demonstrate, to the satisfaction of the Ph.D. program committee, that the objectives of the minor field requirement are met.

Course Requirements

Students must be in residence in the Ph.D. program a minimum of two years. (Note: this is an absolute minimum; longer residence requirements apply to most students, as detailed below.)

Generally, students are required to take sufficient coursework to provide adequate preparation for the qualifying examination and the dissertation. Minimum unit requirements are as follows:

All candidates are required to complete six quarters in residence and 72 units of coursework.

Students who hold a professional degree in architecture before admission to the program are required, in order to become eligible to take the qualifying examination, to complete four quarters in residence and 48 units of coursework.

Doctoral students with an M.Arch. I, M.Arch. II, or M.A. degree in Architecture and Urban Design from UCLA may petition the Ph.D. program committee to, at its discretion, reduce these requirements to a minimum of three quarters in residence and 36 units of coursework.

To be counted toward these requirements, units must be in graduate courses, at least 50 percent of the units must be courses in architecture and urban design, and an overall grade-point average of 3.0 or over must be maintained. In exceptional cases, and with the prior approval of the Ph.D. program committee, upper division courses may be applied toward these requirements to a strictly limited extent.

Students are required to take a proseminar in architectural theory. Normally, this is taken in the Fall Quarter of the first year.

Since the Ph.D. is an academic rather than a professional degree, it is expected that a substantial proportion of the coursework is in the

200 series. The minimum requirement is for at least 32 units to be in 200-series courses.

Students who are admitted to the Ph.D. program without having the background of a professional degree in architecture are required to take, in addition to the other course requirements, at least 24 units of graduate-level courses in architecture as recommended by the adviser and approved by the Ph.D. program committee.

No more than eight units of course 596 may be applied toward degree requirements, but eight units of course 597 and as many units of course 599 as necessary may be applied.

Written and Oral Qualifying Examinations

After successful completion of (1) the first-year review evaluating research skills, (2) mathematics, computing, or foreign language requirement, and (3) coursework requirements, as detailed above, students may apply to take the two qualifying examinations. The application to take the qualifying examinations must be made to the Ph.D. program committee. The committee application includes an outline and brief discussion of the proposed dissertation.

The purpose of the examinations is to establish broad mastery of the field of architecture, the required levels of competence in the major and minor fields, appropriateness of the proposed dissertation, and adequate preparation to undertake it.

The examinations consist of the following parts:

- (1) A comprehensive written and oral examination in the major field.
- (2) A written examination in the minor field (this may be waived under certain circumstances, see following).
- (3) The University Oral Qualifying Examination focusing primarily on the subject of the proposed dissertation.

It is the normal expectation that all parts of the qualifying examinations will not extend over more than two quarters.

The major and minor field examinations are conducted by a three-member examination committee appointed by the chair of the Architecture and Urban Design Department on the advice of the Ph.D. program committee. It consists of Academic Senate members who serve as the inside members of the doctoral committee.

The written examination in the major field is a substantial exercise followed by an oral presentation to the examination committee. The work must be completed at a standard that demonstrates that students have achieved the level of competence of a scholar specializing in the field, could teach an introductory course in the field, and can contribute to the progress of the field through scholarship and research.

The written examination in the minor field is a short exercise. This examination may be waived for candidates who hold a recognized master's degree in the field in which the minor is located, or at the discretion of the examination committee on the basis of outstanding grades (at least two A grades out of the four minor field courses).

The University Oral Qualifying Examination explores the proposed dissertation topic and the ability to undertake the proposed work successfully.

Students may receive academic credit for preparation for the qualifying examinations by enrolling in Architecture and Urban Design 597.

After passing the University Oral Qualifying Examination, students are advanced to candidacy. The Candidate in Philosophy degree is not awarded.

Lower Division Course

88. Lower Division Seminar: Special Topics in Architecture and Urban Design. Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in architecture and urban design approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

Upper Division Courses

M190. Human Environment: Introduction to Architecture and Urban Planning. (Formerly numbered Architecture and Urban Planning 190.) (Same as Urban Planning M190.) Lecture, three hours; outside study, nine hours. Kinds of problems that arise in creating and maintaining an environment for urban activities, and approaches and methods of architecture and urban planning in helping to cope with such problems. Complexities involved in giving expression to human needs and desires in provision of shelters and movement systems, to possibilities and limitations of technology and building forms, and to issues involved in relating the human-made to the natural environment. Students encouraged to comprehend major urban issues both as citizens and as potential technical experts.

C191. Introduction to Sustainable Architecture and Community Planning. (Formerly numbered Architecture and Urban Planning C191.) Lecture, three hours. Energy and alternative resource-conscious design integration into architectural and urban design: passive, active, and photovoltaic solar systems and recycling of water, waste, and building materials at scale of buildings and communities. Concurrently scheduled with course C247A.

C192. Modern and Postmodern Architecture. (Formerly numbered Architecture and Urban Planning C192.) Lecture, three hours. Examination of 20th-century architecture from revolutionary concepts of modern movement, including manifestations in international style, to current transcendence of that movement with postmodernism and a resurgent new modernism. Concurrently scheduled with course C282B.

C193. City Studies: Culture and City Form. (Formerly numbered Architecture and Urban Planning C193.) Lecture, three hours. Design of cities from early times to the present, with special emphasis on great 19th- and 20th-century cities of Europe and America. Establishment of basic principles of good city design. Discussion of current theories of city design. Concurrently scheduled with course C280.

199. Special Studies (2 to 8 units). (Formerly numbered Architecture and Urban Planning 199.) Prerequisite: consent of instructor. Independent research or investigation on a selected topic to be arranged with a faculty member. May be repeated for credit.

Graduate Courses

201A. Theory of Architecture (2 to 4 units). (Formerly numbered Architecture and Urban Planning 201A.) Lecture, 90 minutes; discussion, 90 minutes. Exploration of conceptual and historical structures that shape current issues in architectural theory. Readings in primary texts serve as framework for understanding the nature of speculative inquiry in an architectural context.

201B. Theory of Form (2 units). (Formerly numbered Architecture and Urban Planning 201B.) Lecture/studio, 90 minutes. Exploration of theories of form and composition through lectures and exercises.

203. Decision Making in Planning and Design. (Formerly numbered Architecture and Urban Planning 203.) Lecture, three hours. Exploration of challenges of decision making in general and in the design professions, which have far-reaching effects not only on clients but also on professionals' own prospects. Psychological and mathematical approaches for improving decision quality.

204. Imaging the Future. (Formerly numbered Architecture and Urban Planning 204.) Seminar, three hours. Introduction to social and technological forecasting, including nature and limitations of forecasting, ideology and values in forecasting, review of integrative forecasting techniques, and role of forecasting in environmental planning, design, and management processes.

M224A-M224B. Formal Theory of Composition. (Formerly numbered 224A-224B.) (Same as Design CM211, CM212.) Lecture, three hours; outside study, nine hours. Examination of design as a formal enterprise in which rules are adopted and then followed to compose, describe, and evaluate designs. Development in detail of historical, contemporary, and new examples in architecture, painting, sculpture, and other fine and applied arts. S/U or letter grading. **M224A.** Formal Grammars; **M224B.** Color Grammars. Prerequisite: course M224A.

M224C. Projects in Composition. (Same as Design CM213.) Lecture, three hours; outside study, nine hours. Prerequisites: courses M224A-M224B. Project class in which students pursue individual or group work using formal grammars, including design projects, analytical projects, or research papers. S/U or letter grading.

M225A-M225B-M225C. Fundamentals of Architectonics. (Formerly numbered 225A-225B-225C.) (Same as Design CM221, CM222, CM223.) Lecture, three hours; outside study, nine hours. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. S/U or letter grading. **M225A.** Proportion; **M225B.** Symmetry; **M225C.** Partition and Order.

226A. Introduction to Computer-Aided Design. (Formerly numbered Architecture and Urban Planning 226A.) Lecture, three hours; laboratory, one hour. Introduction to various electronic graphic representations used in design; functionality and structure of modern CAD systems.

226B. Computer-Aided Design and Visualization. (Formerly numbered Architecture and Urban Planning 226B.) Lecture, three hours; laboratory, one hour. Prerequisite: course 226A or equivalent. Intermediate course on use of CAD tools in design, concepts of project organization, design development, with emphasis on three-dimensional representations; introduction to computer-based visualization techniques.

226C. Computer Visualization. (Formerly numbered Architecture and Urban Planning 226C.) Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Concept and techniques of computer visualization of artifacts, including realistic rendering and animation.

M227A. Programming Computer Applications in Architecture and Urban Design. (Formerly numbered 227A.) (Same as Design CM241.) Lecture, three hours; outside study, nine hours. Introductory course in logic of computing through experiments in computer graphics programming. Investigation of both procedural and object-oriented approaches to programming. S/U or letter grading.

M227B. Introduction to Geometric Modeling. (Formerly numbered 227B.) (Same as Design CM242.) Lecture, three hours; outside study, nine hours. Prerequisite: course M227A. Survey of geometric and three-dimensional modeling, with emphasis on implementation of three-dimensional solids constructions and editing operations. Basic representations and operations on shapes and solids. S/U or letter grading.

M227C. User Interaction Techniques in Design. (Formerly numbered 227C.) (Same as Design CM243.) Lecture, three hours; outside study, nine hours. Prerequisite: course M227A or knowledge of C++ programming language. Programming techniques for implementing modern computer-user interfaces, specifically looking at issues relevant to building software tools for computer-aided problem solving in architecture and design. S/U or letter grading.

227D. Design and Building Models. (Formerly numbered Architecture and Urban Planning 227D.) Lecture, three hours. Review of range of information and knowledge potentially used in design. Knowledge representation, abstractions, and constructs. Logical structure of design information. Development of knowledge used in areas of design, how it can be identified, analyzed, and structured.

M228A-M228B-M228C. Computational Foundations of Design. (Formerly numbered 228A-228B-228C.) (Same as Design CM231, CM232, CM233.) Lecture, three hours; outside study, nine hours. Prerequisite: consent of instructor. S/U or letter grading. **M228A.** Algebra. Introduction to algebras of shapes and their applications in design practice and computer-aided design. **M228B.** Grammars. Computation in algebras: shape grammars and their formal properties. **M228C.** Applications. Applications of shape grammars in architecture and design.

242. Climate Responsive Design. (Formerly numbered Architecture and Urban Planning 242.) Prerequisite: professional degree in architecture or consent of instructor. Theory and method of design of buildings which specifically respond to local climate; intensive course in building climatology for advanced graduate studies students.

243. Energy Modeling. (Formerly numbered Architecture and Urban Planning 243.) Prerequisites: one course in building climatology and one course in environmental controls. Geometric description of a building and computerized modeling of its instantaneous energy flows, using one of the large energy analysis computer programs such as DOE 2.1B.

C247A. Introduction to Sustainable Architecture and Community Planning. (Formerly numbered Architecture and Urban Planning C247A.) Lecture, three hours. Energy and alternative resource-conscious design integration into architectural and urban design: passive, active, and photovoltaic solar systems and recycling of water, waste, and building materials at scale of buildings and communities. Concurrently scheduled with course C191.

247B. Energy/Resource-Conserving Solar Design and Practice. (Formerly numbered Architecture and Urban Planning 247B.) Lecture, three hours. Prerequisites: course C247A and one climatology course, or consent of instructor. Extension of concepts and sizing of integrated systems introduced in course C247A; stand-alone approaches particularly in developing countries; impacts of global warming, deforestation on architecture; recycling; programming for project studio 403B.

248A-248B. Passively Integrated Solar Systems. (Formerly numbered Architecture and Urban Planning 248A-248B.) Prerequisites: courses 242 and 442, or consent of instructor. Analysis of different passively integrated solar systems for heating and cooling buildings, considering their anticipated performance and suitability for different climates and building types. Focus on quantitative aspects, including calculations of performance in terms of energy saving and expected indoor comfort conditions. **248A.** Heating; **248B.** Cooling.

255A-255B. Climatic Issues in Urban Design. (Formerly numbered Architecture and Urban Planning 255A-255B.) Seminar, three hours. In-depth examination of impact of urban design (e.g., urban density, urban profile, public parks) on some aspect of urban climate, such as urban temperature, wind field, solar radiation availability, etc.

258. Urban Morphology. (Formerly numbered Architecture and Urban Planning 258.) Lecture, three hours. Exploration of urban space from structuralist perspective. Primary emphasis on relationships between socioeconomic, experiential, and formal structures of the urban environment.

M259. Advanced Real Estate Development for Planners and Architects. (Same as Urban Planning 259.) Discussion, three hours. Prerequisite: Urban Planning 216. Review of basic site planning and design, with emphasis on how development plans (including proposed design solutions) are iteratively modified to achieve economic and political feasibility. Organized as a studio to produce a buildable project, including design and finance plans, for a client. S/U or letter grading.

271. Elements of Urban Design. (Formerly numbered Architecture and Urban Planning 271.) Lecture, three hours. Introduction of basic knowledge of elements and methods of urban design. Multidisciplinary approach leading to understanding of political, socioeconomic, and technological framework of urban systems and its dynamic interrelations.

M272. Real Estate Development for Planners and Architects. (Formerly numbered Architecture and Urban Planning 272.) (Same as Urban Planning M272.) Lecture, two hours; workshop, two hours. Introduction to real estate development process specifically geared to students in planning, architecture, and urban design. Financial decision model, market studies, designs, loan packages, development plan, and feasibility studies. Lectures and projects integrate development process with proposed design solutions which are interactively modified to meet economic feasibility tests.

279. Housing for Developing Countries. (Formerly numbered Architecture and Urban Planning 279.) Discussion, three hours. Considerations of sociocultural, economic, and political factors, materials, structural systems, shelter accessories, and manufacturing technologies related to priorities of developing countries in housing policies and planning and design of shelter.

C280. City Studies: Culture and City Form. (Formerly numbered Architecture and Urban Planning C280.) Lecture, three hours. Design of cities from early times to the present, with special emphasis on great 19th- and 20th-century cities of Europe and America. Establishment of basic principles of good city design. Discussion of current theories of city design. Concurrently scheduled with course C193.

282A. Roots of Modernism. (Formerly numbered Architecture and Urban Planning 282A.) Lecture, three hours. Overview of developments in Western architecture during the 18th and 19th centuries, covering Romantic and historicist trends of the 1700s, eclectic preferences of the 1800s, and turn-of-the-century premodern developments including art nouveau.

C282B. Modern and Postmodern Architecture. (Formerly numbered Architecture and Urban Planning C282B.) Lecture, three hours. Examination of 20th-century architecture from revolutionary concepts of modern movement, including manifestations in international style, to current transcendence of that movement with postmodernism and a resurgent new modernism. Concurrently scheduled with course C192.

286A-286B. Ancient Architecture. (Formerly numbered Architecture and Urban Planning 286A-286B.) Lecture, three hours. Study of architectural developments from archaic Greece to the late Roman Empire. Examination of ancient buildings as functional constructs whose appearance was determined by aesthetic, religious, social, political, urban, and technological factors.

287. Architecture in Europe and the Middle East, 400-1500. (Formerly numbered Architecture and Urban Planning 287.) Lecture, three hours. Prerequisite: consent of instructor. Study of East/West relationships, cultural concerns, and social interactions as seen through some major urban and architectural developments in Europe and the Middle East.

288A-288B. Renaissance and Baroque Architecture. (Formerly numbered Architecture and Urban Planning 288A-288B.) Lecture, three hours. Examination of European architecture from the 15th to 17th century, with primary focus on developments in the Italian peninsula. Examination of Renaissance and baroque structures contextually, exploring changing cultural and theoretical values as well as aesthetic characteristics.

289. Special Topics in Architecture and Urban Design (2 to 4 units). (Formerly numbered Architecture and Urban Planning 289.) Prerequisite: consent of instructor. Selected academic topics initiated by students, student teams, or faculty and directed by a faculty member. May be repeated for credit.

290. Landscape Studies. (Formerly numbered Architecture and Urban Planning 290.) Lecture, three hours. Historical introduction to principles of garden and landscape design. Exploration of key issues through case studies of gardens, landscape architecture, and vernacular landscape.

291. Theory of Architectural Programming. (Formerly numbered Architecture and Urban Planning 291.) Lecture, three hours. Exploration of concepts and methods of architectural programming and its interrelation to design process; planning of design process; various techniques for determination of program contents, basic conditions, resources, and constraints; identification of solution types for given situations.

292. Social Meaning of Space. (Formerly numbered Architecture and Urban Planning 292.) Discussion, three hours. Evolution of concept of space from its origins in ritual and primitive social organizations, concentrating on the child's evolving conception of space, literature on perceptual development, and studies of adaptation to spatial order of the human-made environment.

294A-294B. Environmental Psychology. (Formerly numbered Architecture and Urban Planning 294A-294B.) Lecture, three hours. Introduction to models, concepts, and theories concerning impact of the environment on human behavior, perception, and thought. Review of research results concerning space perception, cognitive mapping, preferences and attitudes toward the environment, effects of crowding and stress, personal space and territoriality.

296. Proseminar: Architectural Theory. (Formerly numbered Architecture and Urban Planning 296.) Seminar, three hours. Orientation for Ph.D. students to tradition of architectural theory, scholarship, and research and to current research directions and questions, through intensive reading and critical discussion.

297. Group Process in Design. (Formerly numbered Architecture and Urban Planning 297.) Lecture, two hours; discussion, two hours; laboratory, two hours. Prerequisite: consent of instructor. Designed to equip students with knowledge and skills needed to work effectively in design processes with other professionals and with client and user groups in organizational and other settings where interaction is important in determining design outcomes.

298A-298D. Research Practicum in Architecture (2 to 4 units each). (Formerly numbered Architecture and Urban Planning 298A-298D.) Prerequisite: consent of instructor. In-depth examination of research methods in the various major fields. May be repeated for credit. **298A.** Research Practicum in Policy, Programming, and Evaluation; **298B.** Research Practicum in Technology; **298C.** Research Practicum in Design Theory and Methods; **298D.** Research Practicum in History, Analysis, and Criticism of Architecture.

375. Teaching Apprentice Practicum (1 to 4 units). (Formerly numbered Architecture and Urban Planning 375.) Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

401. Projects in Architecture. (Formerly numbered Architecture and Urban Planning 401.) Studio, eight hours. Prerequisite: consent of instructor. Students may choose from a number of different projects in relevant problem areas to be offered by faculty members. May be repeated for credit.

402. Projects in Urban Design. (Formerly numbered Architecture and Urban Planning 402.) Studio, eight hours. Prerequisite: consent of instructor. Students may choose from a number of different projects in relevant problem areas to be offered by faculty members. May be repeated for credit.

403A-403D. Projects with Specific Topics (2 to 4 units each). (Formerly numbered Architecture and Urban Planning 403A-403D.) Studio, eight hours. Prerequisites: prior courses of particular sequence or consent of instructor. **403A.** Projects in Policy, Programming, and Evaluation; **403B.** Projects in Architectural Technology; **403C.** Projects in Design and Computation; **403D.** Projects in History and Theories of Architecture.

M404. Joint Planning/Architecture Studio. (Formerly numbered Architecture and Urban Planning 404.) (Same as Urban Planning M404.) Lecture, one hour; discussion, one hour; studio, four hours. Prerequisite: consent of instructor. Opportunity to work on joint planning/architecture project for a client. Outside speakers; field trips. Examples of past projects include Third Street Housing, Santa Monica; New American House for nontraditional households; Pico-Aliso Housing, Boyle Heights; working with resident leaders at Los Angeles City public housing developments.

411. Introductory Design Studio. (Formerly numbered Architecture and Urban Planning 411.) Studio, 12 hours. Prerequisite: consent of instructor. Architectural composition is initially studied in terms of its separate elements. After each is studied by means of a manipulative exercise which allows for experimentation of its intrinsic possibilities, students then undertake a series of closely controlled exercises dealing with combining the elements. Design of a small building in which previously acquired knowledge is synthesized into a single design in latter part of course.

412. Building Design Studio. (Formerly numbered Architecture and Urban Planning 412.) Studio, 12 hours. Prerequisite: course 411. Design of project starts with exploration of architectural program in relation to design process and, particularly, implications of program on architectural forms and concepts. In second phase, structural elements are introduced to fulfill program requirements and to support and further develop intended forms and concepts.

413. Building Design with Landscape Studio. (Formerly numbered Architecture and Urban Planning 413.) Studio, 12 hours. Prerequisite: course 412. Building design and site planning in relation to water, landforms, and plants in natural landscape, with special attention to natural light, heat, and ventilation.

414. Major Building Design. (Formerly numbered Architecture and Urban Planning 414.) Studio, 12 hours. Prerequisite: second-year standing. Design projects which enable students to concentrate specifically on architectural issues, with emphasis either on treatment in breadth of large-scale projects or exploration in depth and detail of smaller-scale projects. Students learn to integrate structure, environmental control, physical context, and cultural environment in design of buildings and to present their ideas in graphic or model form.

415. Major Building Design II. (Formerly numbered Architecture and Urban Planning 415.) Studio, 12 hours. Prerequisite: course 414. Design projects which enable students to concentrate on specific architectural issues, with emphasis either on treatment in breadth of large-scale projects or exploration in depth and detail of smaller-scale projects. Students learn to integrate structure, mechanical systems, physical context, and cultural environment in design of buildings and to present their ideas in graphic or model form. Special emphasis on integration of environmental control systems.

416. Comprehensive Design Studio. (Formerly numbered Architecture and Urban Planning 416.) Studio, 12 hours. Prerequisites: completion of required coursework up to first term of third year, consent of instructor. Course completes regular required sequence of design work, preparing students for third-year thesis preparation. Comprehensive design projects are structured to test students on integration of structural aspects, mechanical systems, site planning, and climatic considerations within their design solutions.

421. Studio Support (2 units). (Formerly numbered Architecture and Urban Planning 421.) Lecture/studio, 90 minutes. Prerequisite: consent of instructor. Studio support course, related to course 411, which introduces sketching, drawing, drafting, perspectives, model building, and computer-aided design through lectures, seminars, and independent or studio-related exercises.

422. Studio Support (2 units). (Formerly numbered Architecture and Urban Planning 422.) Lecture/studio, 90 minutes. Prerequisite: consent of instructor. Studio support course, related to course 412, which introduces sketching, drawing, drafting, perspectives, model building, and computer-aided design through lectures, seminars, and independent or studio-related exercises.

423. Studio Support (2 units). (Formerly numbered Architecture and Urban Planning 423.) Lecture/studio, 90 minutes. Prerequisite: consent of instructor. Studio support course, related to course 413, which introduces theoretical and technical issues such as site planning, urban design, landscape design, design with climate, and building typology, etc., through lectures, seminars, and independent or studio-related exercises.

424. Studio Support (2 units). (Formerly numbered Architecture and Urban Planning 424.) Lecture/studio, 90 minutes. Prerequisite: consent of instructor. Studio support course, related to course 414, which introduces theoretical and technical issues such as programming and program manipulation, site planning, urban design, integration of technical systems, architectural expression, landscaping, and presentation, etc., through lectures, seminars, and independent or studio-related exercises.

425. Studio Support (2 units). (Formerly numbered Architecture and Urban Planning 425.) Lecture/studio, 90 minutes. Prerequisite: consent of instructor. Design development of project initiated in preceding studio (usually course 414). One room or part of building is developed in detail, with integration of a range of technical systems such as structures, mechanical systems, etc.

426. Studio Support (2 units). (Formerly numbered Architecture and Urban Planning 426.) Lecture/studio, 90 minutes. Prerequisite: consent of instructor. Studio support course, related to course 416, which introduces theoretical and technical issues such as programming and program manipulation, site planning, urban design, integration of technical systems, architectural expression, landscaping, and presentation, etc., through lectures, seminars, and independent or studio-related exercises.

428. Advanced Architectural Drawing. (Formerly numbered Architecture and Urban Planning 428.) Discussion, three hours; studio, three hours. Prerequisite: consent of instructor. Emphasis on exploration of interrelationship between drawing and design. Development of more advanced design strategies and modes of graphic exploration and presentation.

431. Structures I. (Formerly numbered Architecture and Urban Planning 431.) Lecture, three hours. Prerequisites: basic algebra, geometry, trigonometry, consent of instructor. Introduction to structural behavior and structural statics. Operations with forces and factors, both algebraically and graphically. Equilibrium of force systems; polygon of forces and funicular polygon. Internal actions; axial force and bending moment. Reactions, stability, and statical determinacy. Determinate frames. Plane trusses; analysis and design.

432. Structures II. (Formerly numbered Architecture and Urban Planning 432.) Lecture, three hours. Prerequisites: course 431, consent of instructor. Mechanics of structures and structural elements. Elastic materials: stress, strain, and stress-strain relations. Theory of bending: curvature, stress and strain distributions, centroid, moments of inertia, resisting and plastic moments. Design of beams for bending, shear, and deflections. Torsion members. Instability and design of columns. Design for combined bending and compression. Tensile structures; cables, pneumatic structures. Slabs and plates; shells and folded plates.

433. Structures III. (Formerly numbered Architecture and Urban Planning 433.) Lecture, three hours. Prerequisites: course 432, consent of instructor. Introduction to statically indeterminate analysis. Structural materials and loads. Wind loads: distribution with height, design for comfort, structure behavior under lateral loads. Steel construction and concepts for high-rise structures. Structural case studies in timber and steel. Introduction to earthquakes: seismology, magnitude, intensity, history. Seismic instrumentation. Case studies of recent earthquakes and damage. Earthquake design concepts and seismic code requirements.

434. Structures IV. (Formerly numbered Architecture and Urban Planning 434.) Lecture, three hours. Prerequisites: course 433, consent of instructor. Considerations of concrete structures. Materials of construction: cement aggregates, concrete mix design. Construction methods and structural systems. Reinforced concrete theory: elastic and ultimate strength analysis and design of beams, columns, and slabs. Case studies of concrete structures. Economics of high-rise concrete apartment buildings.

436. Building Construction. (Formerly numbered Architecture and Urban Planning 436.) Limited to M.Arch. I students. Principles of structure and enclosure; basic nature, production, classification of primary building materials. Building elements explored for formal and functional properties; production and assembly possibilities in factory and field, application and role within building. Hands-on project.

437. Construction Documents. (Formerly numbered Architecture and Urban Planning 437.) Studio, eight hours. Prerequisite: one course in basic building construction (such as 436) or consent of instructor. Office/field communications explored through design of simple structure and creation of key working drawings and outline specifications. Introduction to CADD (computer-aided design and drafting) systems.

438. Systems Building. (Formerly numbered Architecture and Urban Planning 438.) Prerequisite: consent of instructor. Discussion and survey of past and present developments in Europe, the U.S.S.R., and the U.S. Impacts, demands, socioeconomic and legal constraints, user needs, performance specifications. Systems engineering and design. Measurement regulation, modular coordination, closed systems, open systems, design of systems, subsystems, components, elements, and materials.

441. Environmental Control Systems. (Formerly numbered Architecture and Urban Planning 441.) Prerequisite: consent of instructor. Design of mechanical systems necessary for functioning of large buildings: air handling, fire and life safety, plumbing, vertical and horizontal circulation, communication and electrical power distribution, analysis of interaction of these systems and their integrated effects on architectural form of a building.

442. Building Climatology. (Formerly numbered Architecture and Urban Planning 442.) Prerequisite: basic physics. Design of buildings which specifically respond to local climate; utilization of natural energies, human thermal comfort; sun motion and sun control devices; use of plant materials and landform to modify microclimate.

444. Light and the Visual Environment. (Formerly numbered Architecture and Urban Planning 444.) Prerequisite: one course in building climatology or consent of instructor. Exploration of extent to which physical form of a building controls the luminous environment of its occupants; design of naturally and artificially illuminated interior spaces; parameters of human visual comfort.

445. Architectural Acoustics (2 to 4 units). (Formerly numbered Architecture and Urban Planning 445.) Lecture, three hours. Prerequisite: consent of instructor. Applied course in acoustical designing in architecture, including design of partitions to provide good sound insulation. Acoustical materials. Acoustical design of auditoriums. Control of noise in HVAC systems.

448. Communication and Diffusion of Innovation. (Formerly numbered Architecture and Urban Planning 448.) Seminar, three hours. Innovation in the building industry and design professions. Successful creation and introduction of innovative products, processes, and technologies. Students expected to contribute to the meager literature of the field through case studies and projects. Visitors and field trips.

461. Architectural Practice. (Formerly numbered Architecture and Urban Planning 461.) Seminar, three hours. Historical development of the profession; role of architect in contemporary society, current forms of practice and emerging trends. Contractual relationships, ethical responsibility, office management and promotion. Case studies of practical process.

496. Special Projects in Architecture (2 to 8 units). (Formerly numbered Architecture and Urban Planning 496.) Prerequisite: consent of instructor. Projects initiated either by individual students or student teams and directed by a faculty member. May be repeated for credit.

497. Special Projects in Urban Design (2 to 8 units). (Formerly numbered Architecture and Urban Planning 497.) Prerequisite: consent of instructor. Projects initiated either by individual students or student teams and directed by a faculty member. May be repeated for credit.

498. Program Development (4 to 8 units). (Formerly numbered Architecture and Urban Planning 498.) Studio, six to 10 hours. Prerequisite: consent of instructor. Structural investigation of relationship between verbal description and architectural design. S/U grading.

596. Directed Individual Research and Study in Architecture and Urban Design (2 to 8 units). (Formerly numbered 596A.) May be repeated for credit. S/U grading.

597. Preparation for Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units). (Formerly numbered 597A.) Prerequisite: consent of instructor. May be repeated for credit. S/U grading.

598. Preparation in Architecture/Urban Design for Master's Thesis (2 to 8 units). (Formerly numbered 598A.) Prerequisite: consent of instructor. May be repeated for credit. S/U grading.

599. Ph.D. Dissertation Research in Architecture (2 to 8 units). (Formerly numbered 599A.) Prerequisite: doctoral standing. May be repeated for credit. S/U grading.

ART

School of the Arts and Architecture

UCLA
1300 Dickson Art Center
Box 951615
Los Angeles, CA 90095-1615
(310) 825-3281

Professors

Chris Burden, M.F.A.
Henry T. Hopkins, M.A., *Chair*
Adrian Saxe, B.F.A.
Samuel Amato, B.F.A., *Emeritus*
William J. Brice, *Emeritus*
Raymond B. Brown, M.A., *Emeritus*
Elliot J. Elgart, M.F.A., *Emeritus*
Robert F. Heinecken, M.A., *Emeritus*
Lee Mullican, *Emeritus*

Associate Professors

Barbara Drucker, M.F.A.
Roger Herman, M.F.A.
Lari Pittman, M.F.A.
Charles Ray, M.F.A.
Nancy Rubins, M.F.A.

Assistant Professors

Paul McCarthy, M.F.A.
Patricia Wickman, M.F.A.

Lecturers

Anne Marie Karlsen, M.F.A.
Don Suggs, M.F.A.

Scope and Objectives

The Department of Art offers professional art training emphasizing experimentation and encouraging students to draw from many disciplines in their creative process. The department provides a strong background in the principal art traditions and contemporary studio practice. B.A. and M.F.A. degrees are offered in painting/drawing, new genres, photography, and sculpture. With the restructuring of the Department of Design, ceramics is now an area of specialization within the Department of Art.

Art courses include painting and drawing, sculpture, printmaking, photography, new alternative media (which include performance, installation, video, and other nontraditional media), and ceramics. Students are introduced to diverse media and ideas in lower division courses and have the opportunity to specialize in upper division. Individual expression is encouraged in a general way for those who wish careers requiring art-related knowledge and in a specific sense for those who go on to careers as professional artists.

The Department of Art curricula lead to the Bachelor of Arts, Master of Arts, and Master of Fine Arts degrees. All programs benefit from the rich and varied art resources at UCLA and in the Los Angeles community.

Bachelor of Arts Degree

Preparation for the Major

Required: Art 1A, 1B, 11A, 11B, 11D, 11E, 31, 32, and one course from Art History 50, 51, 55A, 55B, 56A, 56B, 57.

The Major

Required: A minimum of 13 upper division courses, including Art 100, 150, six courses from at least four of the following: 130, 133, 137, 140, 145, 147, 148, one course from Art History 101A through C119B, and four art electives.

Graduate Study

The following constitutes introductory information regarding graduate degree programs. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degrees

The Department of Art offers the Master of Arts in Art and the Master of Fine Arts.

Master of Arts

Admission

Students are admitted to the Master of Arts program in Fall Quarter only. Regular admission requires a B.A. or equivalent and faculty consent following the annual review of creative work in February. Applicants must submit slides (maximum 20) or videotape (if applying to the video field).

Provisional admission may be granted for work with faculty sponsors for three quarters, pending reconsideration of regular admission.

Areas of Study

Drawing, painting, sculpture, photography, ceramics, and alternative media. No limit to the variations, extent, or value of these designations is intended.

Course Requirements

A minimum of 36 quarter units in the department in courses numbered 130 to 280 is required, with a B average or better.

Within those 36 units, a minimum of 20 quarter units in the 200 series must be taken in the field of specialization, including four units of Art 276. In addition, four units of Art 280 are required as part of the 36 units.

A minimum total of 36 quarter units of art history, theory, and criticism in undergraduate or graduate study is also required, including Art 280. Art history courses completed as an

undergraduate count toward fulfilling the Art Department's 36-unit art history requirement, but do not count toward the 36 units required for the degree. Students with few or no art history courses in undergraduate study may take art history upper division or graduate courses at UCLA as electives to be counted toward the 36-unit art history requirement and toward the total units required for the degree. Subjects related to the special interests of the student may be substituted by petition.

A maximum of two 596 courses (eight units) may be applied toward the 36 units required for the degree.

Comprehensive Examination Plan

Each degree is granted on the basis of the quality of the student's work as demonstrated in the exhibition which accompanies the final comprehensive examination. The number of units of credit attained is irrelevant to this.

A review of work precedes the final comprehensive examination. The examination, usually oral, includes a formal exhibition of work and a document of vita, photo records of works, and a statement of the artist. The document is retained as property of the University.

Thesis Plan

None.

Master of Fine Arts

Admission

Students are admitted to the Master of Fine Arts program in Fall Quarter only. See Admission section for the M.A. in Art above. The M.A. is not prerequisite to the M.F.A., but may be elected as a stated degree objective. Usually, however, students proceed directly to the M.F.A. as a terminal degree. The unit requirements applied to the M.A. do not apply to the M.F.A., with the exception of accumulative art history units.

Areas of Study

Drawing, painting, sculpture, photography, ceramics, and alternative media. No limits to the variations, extent, or value of these designations is intended.

Course Requirements

A minimum of 72 quarter units in the department in courses numbered 130 to 280 is required, with a B average or better.

Within those 72 units, a minimum of 40 quarter units in the 200 series must be taken in the field of specialization, including four units of Art 276. In addition, eight units of Art 280 are required as part of the 72 units.

A minimum total of 40 quarter units of art history in undergraduate or graduate study is also required (including Art 280). Art history courses completed as an undergraduate count toward fulfilling the Art Department's 40-unit art history requirement but do not count toward the 72 units required for the degree. Students with

few or no art history courses in undergraduate study may take art history upper division or graduate courses at UCLA as electives to be counted toward the 40-unit art history requirement and toward the total units required for the degree. Subjects related to the special interests of the student may be substituted by petition.

A total of 12 units of Art 596 may be applied toward the 72 units required for the degree; four units may be applied toward the graduate course requirement.

Comprehensive Examination Plan

The comprehensive examination plan is the same as the plan offered for the Master of Arts in Art.

Thesis Plan

None.

Lower Division Courses

1A. Drawing. Studio, eight hours; five hours arranged. Course in basic drawing skills intended as preparation for work in a variety of media.

1B. Sculpture. Studio, eight hours; five hours arranged. Introduction to concepts and forms of contemporary sculpture to become familiar with tools and material to enable students to visually manifest their individual ideas. Presentation of work of contemporary artists.

11A. Painting. Studio, eight hours; five hours arranged. Prerequisites: courses 1A, 1B. Basics of painting: introduction to technical procedures, tools, and materials. Discussion of fundamental conceptual and formal concerns.

11B. Photography. Studio, eight hours; five hours arranged. Prerequisites: courses 1A, 1B. Fundamentals in technique, with emphasis on individual projects. Varied approaches, processes, and applications of the photographic medium within the context of art, supported by studies in theory, aesthetics, and history of photography.

11C. Printmaking. Studio, eight hours; five hours arranged. Prerequisites: courses 1A, 1B. Introductory survey of various technical and conceptual concerns in a variety of printmaking media as preparation for more focused study in particular media at upper division level.

11D. New Genres. Studio, eight hours; five hours arranged. Prerequisites: courses 1A, 1B. Introduction to projects in installation, performance, video, film, intermedia, and other nontraditional media and processes.

11E. Ceramics. Studio, eight hours; five hours arranged. Prerequisites: courses 1A, 1B. Introduction to ceramic materials and processes, with emphasis on personal and cultural expression in ceramic media. Discussion of ceramics in contemporary artistic practice and social history of ceramic art.

31. Modernism. Discussion, three hours. Survey of 20th-century European/American art, its antecedents, and its social and political context.

32. Survey of Critical Thought. Discussion, three hours. Overview of premodern, modern, and postmodern theory as reflected in critical writing and artistic practice, with emphasis on the 1940s to the present.

Upper Division Courses

100. Issues in Contemporary Art. Discussion, three hours. Prerequisites: courses 1A, 1B, 11A through 11D, 31, and 32, or consent of instructor. Selected topics in theoretical, critical, aesthetic, and historical studies and their relevance to practicing artists. May be repeated for a maximum of 16 units.

130. Advanced Drawing. Studio, eight hours; five hours arranged. Prerequisites: courses 1A, 1B, 11A through 11D, 31, and 32, or consent of instructor. Drawing as both an independent expressive medium and as a means of visualization. May be repeated for a maximum of 16 units.

133. Advanced Painting. Studio, eight hours; five hours arranged. Prerequisites: courses 1A, 1B, 11A through 11D, 31, and 32, or consent of instructor. Varied media and subjects to further develop students' technical and expressive means to implement their ideas. May be repeated for a maximum of 16 units.

137. Advanced New Genres. Studio, eight hours; five hours arranged. Prerequisites: courses 1A, 1B, 11A through 11D, 31, and 32, or consent of instructor. Emphasis to be selected by faculty from one or more of the following media: installation, performance, video, film, other nontraditional media and processes. May be repeated for a maximum of 16 units.

140. Advanced Printmaking. Studio, eight hours; five hours arranged. Prerequisites: courses 1A, 1B, 11A through 11D, 31, and 32, or consent of instructor. Selected studies in fine printmaking, historical and contemporary: woodcut, etching and engraving, lithography, silk screen, mixed media. May be repeated for a maximum of 16 units.

145. Advanced Sculpture. Studio, eight hours; five hours arranged. Prerequisites: courses 1A, 1B, 11A through 11D, 31, and 32, or consent of instructor. Selected studies in sculpture, historical and contemporary: modeling, carving, casting, welding, and other media; forms in space, including installations and non-studio pieces. May be repeated for a maximum of 16 units.

147. Advanced Photography. Studio, eight hours; five hours arranged. Prerequisites: courses 1A, 1B, 11A through 11D, 31, and 32, or consent of instructor. Selected projects in photography and related media, concentrating on development of individual students' artwork. Studio emphasis with special topics in theory and critical analysis. May be repeated for a maximum of 16 units.

148. Advanced Ceramics. Studio, eight hours; five hours arranged. Prerequisites: courses 1A, 1B, 11A through 11E, 31, and 32, or consent of instructor. Selected studies in ceramics, with emphasis on individualized creative experimentation with materials and techniques introduced in course. Methods and processes to be selected from a range of possibilities, including handforming and modeling, preparation and use of molds, slipcasting, and use of potter's wheel. May be repeated for a maximum of 16 units.

150. Senior Studio. Studio, eight hours; five hours arranged. Prerequisites: courses 1A, 1B, 11A through 11D, 31, and 32, or consent of instructor, senior standing. Advanced studio projects, with emphasis on analysis and criticism of individual creative work and ideas. May be repeated once for credit.

197. Honors Course. Hours to be arranged. Prerequisites: 3.0 GPA overall, 3.5 GPA in major, consent of instructor, junior or senior standing. Individual studies for majors. May be repeated once for credit.

199. Special Studies in Art (2 to 8 units). Hours to be arranged. Prerequisites: 3.0 GPA in major, consent of instructor, senior standing. Individual studies for majors. May be taken for a maximum of eight units.

Graduate Courses

Prerequisite for all courses: consent of instructor. All courses may be repeated for credit (unless otherwise noted) on recommendation of the adviser; they are not open to undergraduate students.

271. Painting (2 to 8 units). Studio, eight hours. Study in painting and associated media.

272. Graduate Printmaking (2 to 8 units). Studio, eight hours. Studies in traditional and experimental printmaking. Selected studies in intaglio, lithograph, woodcut, silk screen, photo printmaking, and mixed media.

273. Graduate Sculpture (2 to 8 units). Studio, eight hours. Studies in sculpture with specific attention to ongoing nature, specificity, and approach to each student's particular discipline. Individual studio visits and consultation.

274. Photography (2 to 8 units). Studio, eight hours. Studies concentrating on development of individual students' artwork. Studio emphasis with adjacent studies in theoretical and critical analysis. Specific attention to original, expressive, social, and humanistic values of art.

275. New Genre (2 to 8 units). Studio, eight hours. Prerequisite: consent of instructor. Studies in alternative media, including installation, performance, video, film, and other nontraditional media and processes.

276. Graduate Group Critique. Discussion, four hours; tutorial, to be arranged. Group critique/discussion of students' research. Additional tutorial meetings by arrangement with instructor. May be repeated for credit.

277. Graduate Ceramics (2 to 8 units). Studio, eight hours. Prerequisite: consent of instructor. Studies in ceramics and art with investigation of traditional and experimental processes and intellectual approaches to art practice utilizing ceramic media. Emphasis on development of a significant body of original work reflecting student's expressive and theoretical concerns. May be repeated for credit.

280. Graduate Seminar: Art. Discussion, three hours. Advanced topics in critical theory and study of contemporary art, with emphasis on individuals, issues, and methodologies. Possible areas of study from structuralism, deconstruction, feminist and psychoanalytic theory, commodification, and censorship. May be repeated for credit.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study or Research (2 to 8 units). Prerequisite: consent of instructor.

The Department of Art reserves the right to hold for exhibition purposes examples of any work done in classes and to retain for the permanent collection of its galleries such examples as may be selected.

David M. Kunzle, Ph.D.
Donald F. McCallum, Ph.D.

Joanna Woods-Marsden, Ph.D.

Assistant Professor

Barbara Zeitler, Ph.D.

Lecturers

Shelley M. Bennett, Ph.D.
Jean S. Weisz, Ph.D., *Senior Emerita*

Scope and Objectives

The department offers programs leading to the Bachelor of Arts, Master of Arts, and Ph.D. degrees. Art history courses survey Western and non-Western art from earliest human history to the present. Students learn to treat artistic monuments and trends from a historical point of view, analytically rather than subjectively. This curriculum prepares students for careers in which broad knowledge of art is important and provides students preparing for graduate study with a foundation for research requiring independent critical judgment.

The rich and varied art resources available at UCLA and throughout Southern California offer students extraordinary opportunities to supplement the formal curriculum.

Bachelor of Arts Degree

Preparation for the Major

Required: Two courses from Art History 50, 51, 54, 57 and two courses from 55A, 55B, 56A, 56B. It is strongly recommended that these courses be taken prior to enrollment in upper division courses.

The Major

Required: Eleven upper division art history courses as follows:

(1) A total of six courses (24 units) from the following 12 areas, distributed as follows: one course from three different areas in Group A (three courses total) and one course from three different areas in Group B (three courses total):

Group A — (1) 101A, 101B, M102A, M102B, M102C, M102D, M102E, (2) M102F, M102G, M102H, M102I, M102J, M102K, (3) 105A, 105B, 105C, 105D, 105E, (4) 106A, 106B, 106C, 106D, 108A, 108B, (5) 109A, 109B, 109C, 109D, (6) 110A, 110B, 110C, 110D, 110E, 110F, 110G, (7) C112A, C112B, C112C.

Group B — (8) 104A, 104B, C104C, (9) 114A, 114D, 114F, C115A, (10) 114C, 114E, C115B, C115C, C115D, C115E, C115F, (11) C117A,

C117B, C117C, 118D, 118E, (12) 118A, 118C, C119A, C119B.

(2) Five art history electives from the above 12 areas; courses 127, 197, and 199 may also be included.

Two terms of one foreign language or equivalent are also required. The language is in addition to the college foreign language requirements.

Art history majors should be aware that the upper division course requirements in the major (44 units) do not meet the upper division requirement of 72 units for graduation. Additional upper division units must be taken to reach the 72-unit total.

It is recommended that you have each term's program approved by the departmental adviser.

Graduate Study

The following constitutes introductory information regarding graduate degree programs. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degree

Admission

A minimum grade-point average of 3.25 overall and 3.5 in upper division art history courses is required of applicants to the Master of Arts in Art History program. The Graduate Record Examination (GRE) is required, although no minimum score has been established. Three letters of recommendation (preferably from art historians) are required. The statement of purpose submitted with the application is given weight in the evaluation and should be as specific as possible about the applicant's interests in art history. Also required are two writing samples (two 10-page research papers). In addition, applicants must have completed six full courses in the history of art (grades of B or better and not including studio courses), with at least two courses in Fields A and B noted below. Specific areas may not be offered in satisfaction of more than one requirement.

Applicants demonstrating exceptional promise but lacking some or all of the six required courses may, at the discretion of the graduate review committee, be admitted on condition that they make up those courses. Deficiencies must be made up during the first two quarters of residence and may not be applied toward the required courses for the degree. Instead of taking a course, the student may elect to substitute a competency examination in the deficient area.

Prospective students may contact the graduate counselor, Department of Art History, for brochures and information. The department has no special departmental application.

ART HISTORY

College of Letters and Science

UCLA
3209 Dickson Art Center

Susan B. Downey, Ph.D.
Cecelia F. Klein, Ph.D.

Areas of Study

Fifteen areas in three fields:

Field A: (1) Aegean; (2) Greek and Roman; (3) medieval and Byzantine; (4) Renaissance and baroque; (5) modern and contemporary; and (6) American.

Field B: (7) African; (8) oceanic; (9) Native North American; (10) pre-Columbian; (11) Islamic; (12) Indian and Southeast Asian; (13) Chinese; and (14) Japanese.

Field C: (15) Critical theory.

Course Requirements

The M.A. degree requires the completion of a major and two minors within the art history major. There are three major/minor options available to M.A. students.

Option I: Western Major

Major from Field A, areas 1-6 — four courses in one area.

First minor from Field A, areas 1-6 or from Field C, area 15 — two courses from one area other than the major selected from areas 1-6 or two courses from area 15, Field C.

Second minor from Field B, areas 7-14 — two courses in one area.

Option II: Non-Western Major

Major from Field B, areas 7-14 — four courses in one area.

First minor from Field B, areas 7-14 — two courses in one area other than the major selected from areas 7-14 or two courses from area 15, Field C.

Second minor from Field A, areas 1-6 — two courses in one area.

Option III: Critical Theory Major

Major from Field C, area 15 — two courses from Field C, area 15 plus four courses in one area from Field A, areas 1-6 or areas 7-14, Field B.

The first and second minors for this option are chosen as in options I and II based on the major selection from areas 1-6 or 7-14 — two courses in one area for each minor.

Instructors from the student's major and two minor areas normally serve on the thesis committee. If the student wishes to complete two of the three areas with one instructor, a petition explaining the reasons for this must be approved by the graduate review committee.

For major/minor options I and II, students are required to take a minimum of 10 graduate and upper division courses, of which at least eight must be in art history and of which at least six must be graduate courses in the 200 series and 596. At least four of these must be in the 200 series, and no more than two may be directed studies (596) projects. Course 598 is not applicable toward an advanced degree.

For major/minor option III, students are required to take a minimum of 13 graduate and upper division courses but may be required to

take up to 14 courses, of which at least eight must be in art history and of which at least six must be graduate courses in the 200 series and 596. At least four of these must be in the 200 series, and no more than two may be directed studies (596) projects. Course 598 is not applicable toward an advanced degree.

All students must take (1) Art History 200 and (2) either course 201 or 202. Courses to be taken should be determined in consultation with students' major and minor advisers with the stipulation that progress toward the M.A. may not be impeded by requiring a course not offered at least once every two years.

Upon completion of all course and foreign language requirements, the department requests the Graduate Division to appoint the thesis committee. After this committee has been appointed, students may petition for advancement to candidacy for the M.A. degree. Candidates have one calendar year after advancement to candidacy to complete all requirements for the degree.

Comprehensive Examination Plan

None.

Thesis Plan

The thesis committee consists of the student's major adviser and two other University of California faculty, one of whom must be a UCLA Art History faculty member. Normally, students' two minor advisers serve in this capacity. For details on the acceptable status of these members, see the publication, Standards and Procedures for Graduate Study at UCLA, available in Graduate Admissions/Student and Academic Affairs, 1255 Murphy Hall. Students and the major adviser must be in agreement on the members of the thesis committee.

At this time, the student selects, in consultation with and with the written consent of the thesis committee, a thesis topic in the major field. This thesis should deal succinctly with the topic in an independent, critical, and original fashion while taking fully into account the present state of research on the problem. It must be clearly written, correctly documented, and illustrated and must meet the minimum standards for the master's thesis as set out by the UCLA Graduate Division in Standards and Procedures for Graduate Study at UCLA. It should not exceed 50 pages in length and must be researched and written in consultation with the thesis committee members. If the thesis is rejected by one member of the committee, it may, at the request of the major adviser, be submitted to the graduate review committee for final judgment; otherwise, the student's candidacy must be terminated.

Doctoral Degree

Admission

The M.A. in Art History is usually required for admission to the Ph.D. degree program. However, students with an M.A. degree in other disciplines can apply for admission. The graduate

review committee determines the equivalency of the M.A. on an individual basis. An M.A. in Art History from another institution may be accepted as equivalent to that from UCLA or the holder may be accepted into the program at a stage determined by the graduate review committee. All incoming Ph.D. students must show evidence of having taken and passed with a grade of B or better at least two courses (upper division and/or graduate) in areas not related to the proposed major (as outlined in M.A. course requirements). Deficiencies must be made up during the first two quarters of residence and may not be applied toward the eight courses required for the Ph.D. degree.

The application must include, in addition to official transcripts, all of the following: (1) a standard statement of purpose (approximately 400 words); (2) a copy of the applicant's M.A. thesis or, if no thesis was written, one major research paper written at the M.A. level in the major or intended major field; (3) three or more letters of recommendation from individuals familiar with the applicant's scholarly work, of which one must be a detailed letter of assessment and endorsement from the individual who served as the major adviser for the M.A.; (4) a written statement from the intended Ph.D. major adviser of willingness to supervise the applicant's Ph.D. work; (5) evidence of reading fluency in two appropriate foreign languages; (6) Graduate Record Examination (GRE) scores.

If an applicant is applying directly to the Ph.D. program from the M.A. in Art History program at UCLA, there is a slightly modified procedure. For details, see the graduate counselor.

A reading knowledge of French and German is requisite for admission at the Ph.D. level for those majoring in all areas except Asian (i.e., Chinese, Japanese, South Asian, Southeast Asian), pre-Columbian and Latin American, Native North American, oceanic, Islamic, and Italian art history. An applicant may demonstrate this knowledge by (1) submitting proof of a GSFLT (Graduate School Foreign Language Test) score of 600 or better (for French, German, and Spanish only; examination not given for Italian); (2) taking and passing the relevant UCLA department language examinations; or (3) submitting proof of completion of UCLA's German 6 and/or French 5 with a grade of B or better. If an applicant plans on majoring in Japanese or Chinese art history, substitute either Chinese or Japanese respectively for either French or German. If an applicant plans on majoring in South Asian, Southeast Asian, or Islamic art history, substitute for either French or German an appropriate research language of South Asia, Southeast Asia, or the Islamic Middle East. The choice must be made in consultation with, and with the consent of, the major adviser. The Asian and Islamic requirements, however, are normally satisfied by enrolling in an appropriate course sequence for six consecutive quarters (normally beginning with the first quarter of graduate study) and by maintaining a grade of B or better. If

one intends to major in pre-Columbian and Latin American art history, applicants must demonstrate reading fluency in Spanish plus one additional foreign language. In the case of Spanish, UCLA's Spanish 25, passed with a grade of B or better, fulfills the requirement. Applicants intending to major in Native North American or oceanic art must master one European language and one additional foreign language. If an applicant intends to focus on Italian art history, competency in German and either French or Italian must be demonstrated. For the latter, UCLA's Italian 5, passed with a grade of B or better, satisfies the requirement.

If the applicant has passed a required foreign language at another institution, the relevant UCLA departmental foreign language examination must be taken and passed nonetheless, or an official recent (within two years) GSFLT score of 600 or better in the language must be submitted. Exceptions are granted only when the examination taken at another institution (1) has been passed within the past two years and (2) can be demonstrated to have been equivalent in nature to that of the UCLA departmental foreign language examination. Coursework in foreign languages taken at another institution may not be used as evidence of reading competence.

Major Fields or Subdisciplines

Twenty-two areas in three fields:

Field A: (1) Aegean; (2) American; (3) baroque; (4) Byzantine; (5) contemporary (post-1945); (6) eighteenth century; (7) Greek; (8) medieval; (9) nineteenth century; (10) Renaissance; (11) Roman; and (12) twentieth century.

Field B: (13) African; (14) Chinese; (15) Indian; (16) Islamic; (17) Japanese; (18) Native North American; (19) oceanic; (20) pre-Columbian; (21) Southeast Asian.

Field C: (22) critical theory.

Course Requirements

At the time of application to the Ph.D. program, the student selects a major field of study within art history; by the end of the second quarter of residence, an additional minor (or minors) is selected. The faculty member responsible for the minor serves as the minor adviser. The major and minor advisers are responsible for the student's course of study and completion of requirements within the field. In addition, the major adviser must be consulted regarding the student's overall course of study at least once each quarter. A change of adviser and of either the major or minor field must be changed by the graduate review committee.

If a student enters the Ph.D. program deficient in Art History 200 or its equivalent, it must be added to the total requirements. In some cases, course 201 may also be required if recommended by the faculty adviser.

The department offers three options in the selection of majors and minors.

Option I

Major from Field A, areas 1-12 or Field B, areas 13-21 — five courses in one area.

Minor from Fields A or B, areas 1-12 or 13-21 — three courses in one area other than the major field, or from Field C, three courses from area 22.

Option II

Major from Field A, areas 1-12 or Field B, areas 13-21 — five courses in one area.

Minor from an extra-departmental area such as history, anthropology, or film — three courses in one area.

Option III

Major from Field C, area 22 — four courses from Field C, area 22 plus four courses in one area from 1-12 or 13-21 in Fields A or B.

Minor from Fields A or B, areas 1-12 or 13-21 — three courses in one area not chosen as part of the major or three courses in one area from an extra-departmental area.

For major/minor options I and II, a minimum total of eight graduate and upper division courses is required, of which at least four must be art history courses on the graduate (200 and 596) level. Of this total, at least two must be taken, and up to five may be taken, as extra-departmental upper division and/or graduate courses on approval of the major or minor advisers (where applicable).

For Option III, a minimum total of 11 graduate and upper division courses is required, of which at least four must be art history courses on the graduate (200 and 596) level. Of this total, at least two must be taken, and up to five may be taken, as extra-departmental upper division and/or graduate courses on approval of the major or minor advisers (where applicable).

Written and Oral Qualifying Examinations

After completion of coursework and language study, students must take the Ph.D. written comprehensive examination to test breadth and depth of knowledge in the major and minor fields of study. If the examination is failed, or any part thereof, that portion may be repeated during the subsequent quarter of residence. No further repetition is allowed.

After passing the written comprehensive examination, the student selects a dissertation topic. The members of the doctoral committee are then nominated, and the committee is appointed by the dean of the Graduate Division.

After having submitted a dissertation proposal, the student then takes the University Oral Qualifying Examination, given by the doctoral committee. Assuming there is no more than one no pass vote, the student may initiate the procedure to become advanced to candidacy.

Lower Division Courses

50. Ancient Art. Lecture, three hours; quiz, one hour. Prehistoric, Egyptian, Mesopotamian, Aegean, Greek, Hellenistic, and Roman art and architecture.

51. Medieval Art. Lecture, three hours; quiz, one hour. Early Christian, Byzantine, Islamic, Carolingian, Ottoman, Romanesque, and Gothic art and architecture.

54. Modern Art. Lecture, three hours; quiz, one hour. Art and architecture from 1800 to the present in Europe and the U.S.

55A. Africa, Oceania, and Native America. Lecture, three hours; discussion, one hour. Comparative approach, emphasizing economic, cultural, and historical aspects of selected artistic traditions which developed outside the spheres of influence of major European and Asiatic civilizations.

55B. Arts of Pre-Columbian America. Lecture, three hours; discussion, one hour. Survey of sequence of cultures which developed in the area between (and including) Mexico and Peru from ca. 1000 B.C. to the Conquest.

56A. Art of India and Southeast Asia. Lecture, three hours; discussion, one hour. Survey of major artistic monuments of Indo-Iranian and Southeast Asian cultures, concentrating on formal and iconographical problems, as well as social and political conditions under which artworks were patronized and produced.

56B. Introduction to Chinese Art. Lecture, three hours; discussion, one hour. Introduction to discipline of Chinese art history. Fundamentals of formats, methods, and materials of Chinese art, visual and textual sources, peculiarities of patronage, traditional art history and criticism, and approaches to representation in premodern China.

57. Renaissance and Baroque Art. Lecture, three hours; discussion, one hour. History of art and architecture in Western Europe from 1400 to 1750.

88A-88Z. Lower Division Seminars. Lecture, three hours. Limited to freshmen. Variable topics; consult *Schedule of Classes* or department for topics to be offered in a specific term. P/NP or letter grading.

88A. Buddha's Life and Teachings in Art, Texts, and Worship. Development of Buddhist art in India through Buddha's teachings, expressed in art, architecture, texts, and ritual. Re-creation of Buddha's life by analyzing art and reading Buddhist texts of his life.

Upper Division Courses

101A. Egyptian Art and Archaeology. Lecture, three hours. Study of architecture, sculpture, painting, and minor arts during the Predynastic period and Old Kingdom.

101B. Egyptian Art and Archaeology of the Middle and New Kingdoms. Lecture, three hours. Prerequisite: course 50. Study of architecture, sculpture, painting, and minor arts during the Middle and New Kingdoms.

M102A. Minoan Art and Archaeology. (Same as Classics M153A.) Lecture, three hours. Prerequisite: course 50 or Classics 10 or equivalent. Study of development of art and architecture in Minoan Crete from ca. 3000 to 1000 B.C. P/NP or letter grading.

M102B. Mycenaean Art and Architecture. (Same as Classics M153B.) Lecture, three hours. Prerequisite: course 50 or Classics 10 or equivalent. Study of development of art and architecture in Mycenaean Greece from ca. 2000 to 1000 B.C. P/NP or letter grading.

M102C. Archaic Greek Art and Archaeology. (Same as Classics M153C.) Lecture, three hours. Prerequisites: course 50, Classics 10 or equivalent. Study of development of art and architecture of Greek world from approximately 800 through 490 B.C. P/NP or letter grading.

M102D. Classical Greek Art and Archaeology. (Same as Classics M153D.) Lecture, three hours. Prerequisites: course 50, Classics 10 or equivalent. Recommended: upper division classics or Greek courses. Study of development of art and architecture of Greek world from approximately 490 through 350 B.C. P/NP or letter grading.

M102E. Hellenistic Greek Art and Archaeology. (Same as Classics M153E.) Lecture, three hours. Prerequisites: course 50, Classics 10 or equivalent. Study of development of art and architecture of Greek world from middle of the 4th century B.C., including transmittal of Greek art forms to the Romans. P/NP or letter grading.

M102F. Etruscan Art. (Same as Classics M153F.) Lecture, three hours. Prerequisite: course 50 or Classics 20 or equivalent. Arts of Italic peninsula from ca. 1000 B.C. to end of the Roman Republic. P/NP or letter grading.

M102G. Roman Art. (Same as Classics M153G.) Lecture, three hours. Prerequisite: course 50. Art and architecture of Rome and its Empire from ca. 300 B.C. to A.D. 300. P/NP or letter grading.

M102H. Late Roman Art. (Same as Classics M153H.) Lecture, three hours. Prerequisites: courses 50, M102G. Art of Roman Empire from the 2nd through 4th century (A.D.). P/NP or letter grading.

M102I-M102J-M102K. Classical Archaeology. (Same as Classics M153I-M153J-M153K.) Lecture, three or four hours. Prerequisite: course 50 or Classics 10 or 20 or History 1A or equivalent. Knowledge of Greek and Latin not required. General introduction to study of Aegean, Greek, and Roman architecture, sculpture, and painting. P/NP or letter grading. **M102I.** Greco-Roman Architecture; **M102J.** Greco-Roman Sculpture; **M102K.** Greco-Roman Painting.

104A. Western Islamic Art. Lecture, three hours. From the Tigris and Euphrates Rivers to Spain, 7th to 16th century.

104B. Eastern Islamic Art. Lecture, three hours. From the Tigris and Euphrates Rivers through Afghanistan and parts of central Asia; Ottoman Empire.

C104C. Problems in Islamic Art. Lecture, three hours. Monuments or theoretical problems related to Islamic culture and artistic production. Concurrently scheduled with course C214.

105A. Early Christian Art. Lecture, three hours. Prerequisite: course 51 or consent of instructor. Origins and development of architecture, sculpture, and painting of early Christianity to the iconoclastic controversy.

105B. Early Medieval Art. Lecture, three hours. Prerequisite: course 51 or consent of instructor. Art and architecture of Western Europe from the Migration period until A.D. 1000.

105C. Romanesque Art. Prerequisite: course 51. Art and architecture of Western Europe in the 11th and 12th centuries.

105D. Gothic Art. Lecture, three hours. Prerequisite: course 51. Art and architecture of Europe in the 13th century.

105E. Byzantine Art. Lecture, three hours. Prerequisite: course 51 or consent of instructor. Theory and development of Byzantine art from the iconoclastic controversy to 1453 and diffusion of Byzantine art in Armenia, Georgia, the Caucasus, and Russia.

105F. Late Gothic Art and Architecture. Lecture, three hours. Strongly recommended (but not prerequisite): course 51. Art and architecture of Europe in the 14th and early 15th centuries. P/NP or letter grading.

106A. Italian Art of the Trecento. Lecture, three hours. Prerequisite: course 57 or consent of instructor. Art and architecture of the 14th century.

106B. Italian Art of the Quattrocento. Lecture, three hours. Prerequisite: course 57. Art and architecture of the 15th century.

106C. Italian Art of the Cinquecento. Lecture, three hours. Prerequisite: course 57. Art and architecture of the 16th century.

106D. Late Renaissance Art: Counter-Reformation. Lecture, three hours. Prerequisite: course 57 or consent of instructor. Painting, sculpture, and architecture of the late 16th and early 17th centuries considered in context of the Counter-Reformation.

108A-108B. Northern Renaissance Art. Lecture, three hours. Prerequisite: course 57. Course 108A is prerequisite to 108B. Painting and sculpture in the Northern Renaissance.

109A. Baroque Art. Lecture, three hours. Prerequisite: course 57. Art and architecture of Italy and Spain, 16th to late 17th century.

109B. Baroque Art. Lecture, three hours. Prerequisite: course 109A. Art and architecture of Northern Europe, 16th to late 17th century.

109C. European Art of the 18th Century. Lecture, three hours. Prerequisite: course 57. Painting, architecture, and sculpture of the 18th century examined in light of political and intellectual developments. Special emphasis on effect of the rise of democratic institutions, especially the French Revolution.

109D. Art and Architecture of Georgian England. Lecture, three hours.

110A. European Art of the 19th Century. Lecture, three hours. Prerequisite: course 54. Neoclassicism and Romanticism, with emphasis on France — development and influence of David, Ingres, and Delacroix.

110B. European Art of the 19th Century: Realism and Impressionism. Lecture, three hours. Prerequisite: course 54. Inquiry into problem of realism, with emphasis on French art, but including developments in England and Germany.

110C. European Art of the 19th and 20th Centuries: Postimpressionism to Surrealism. Lecture, three hours. Prerequisite: course 54. Study of major developments in modern art, 1880s to 1930, including Seurat, Cezanne, Gauguin, Van Gogh, Art Nouveau, Fauvism, German expressionism.

110D. Contemporary Art. Lecture, three hours. Prerequisite: course 54. European and American art since World War II.

110E. Art and Politics in the Contemporary Americas: Post-World War II U.S. Art and Politics. Prerequisite: course 54. Selective survey of media and art supporting, condoning, and resisting U.S. capitalism and imperialism, with special emphasis on Vietnam era and arts of protest.

110F. Selected Topics in Modern Art. Lecture, three hours. Prerequisite: course 54. Changing topics in modern art (post-1780) which reflect interests of individual regular and visiting faculty members. May be repeated once for credit. P/NP or letter grading.

110G. Art and Politics in the Contemporary Americas: Latin America. Prerequisite: course 54. Nationalist and revolutionary responses of Latin America to U.S. imperialism. Discussion of the cases of Mexico, Cuba, Chile, and Nicaragua.

C110H. Latin American Art of the 20th Century. Lecture, three hours. Mainstream modern and contemporary art and architecture of selected Latin American countries, including both modernist and postmodernist forms, considered in context of social and political concerns, both national and international. Concurrently scheduled with course C254. P/NP or letter grading.

C112A. American Art before the Civil War. Lecture, three hours. Painting, sculpture, and architecture in the U.S. from Colonial period through the Civil War. Concurrently scheduled with course C212A.

C112B. American Art in the Gilded Age, 1860 to 1900. Lecture, three hours. Painting, sculpture, and architecture in the U.S. from the Civil War to turn of the century. Concurrently scheduled with course C212B.

C112C. American Art, 1900 to 1945. Lecture, three hours. Painting, sculpture, and photography in the U.S. from 1900 to 1945. Concurrently scheduled with course C212C. P/NP or letter grading.

114A. Early Art of India. Lecture, three hours. Not open to freshmen. Survey of Indian art from Indus Valley cultures to the 10th century. Emphasis on Buddhist and Hindu backgrounds of the arts.

114C. Japanese Art. Lecture, three hours. Not open to freshmen. Japanese art from its beginning in prehistory through the 19th century. Emphasis on development of Buddhist art and its relationship with the culture.

114D. Later Art of India. Lecture, three hours. Not open to freshmen. Survey of Indian art from the 10th to 19th century. Decline of Buddhist art, last efflorescence of Hindu architecture, Muslim painting and architecture, and Rajput painting. P/NP or letter grading.

114E. Arts of Korea. Lecture, three hours. Art and archaeology of Korea from the Neolithic Period through the Yi dynasty. Particular emphasis on early archaeology and state formation, Buddhist art, Koryo ceramics, and Yi literati painting.

114F. Arts of Southeast Asia. Lecture, three hours. Not open to freshmen. Southeast Asian art from its beginning in prehistory through the 19th century. Study of art of selected cultures from Burma, Malaysia, Thailand, Cambodia, Vietnam, and Indonesia.

C115A. Advanced Indian Art. Lecture, three hours. Prerequisite: course 114A. Study in Indian sculpture and architecture. Concurrently scheduled with course C257.

C115B. Advanced Chinese Art. Lecture, three hours. Study in Chinese painting and sculpture. Concurrently scheduled with course C258.

C115C. Advanced Japanese Art. Lecture, three hours. Prerequisite: course 114C. Study in Japanese painting and sculpture. Concurrently scheduled with course C259.

C115D. Art and Material Culture, Neolithic to 210 B.C. Lecture, three hours. Genesis of Chinese civilization in light of new archaeological finds, including sites and works of art (e.g., ceramics, bronzes, jades). Concurrently scheduled with course C261A. P/NP or letter grading.

C115E. Art and Material Culture of Early Imperial China, 210 B.C. to A.D. 906. Lecture, three hours. Palaces and tombs of early imperial dynasties, impact of Buddhist art (cave temples), rise of new media and technologies. Concurrently scheduled with course C261B. P/NP or letter grading.

C115F. Art and Material Culture of Late Imperial China, 906 to 1911. Lecture, three hours. Secular and religious (Buddhist and Taoist) architecture, painting, sculpture, and various luxury industries (lacquer, porcelain, textiles, jade, bronze, furniture, wood and bamboo carving, etc.). Concurrently scheduled with course C261C. P/NP or letter grading.

C117A. Pre-Columbian Art of Mexico. Lecture, three hours. Prerequisite: course 55B or consent of instructor. Study of art of selected cultures of northern Mesoamerica from ca. 1200 B.C. to the Conquest, with emphasis on historical and iconographic problems. Concurrently scheduled with course C218A.

C117B. Pre-Columbian Art of the Maya. Lecture, three hours. Prerequisite: course 55B or consent of instructor. Study of art of selected Maya-speaking cultures of southern Mesoamerica from ca. 2000 B.C. to the Conquest, with particular emphasis on history and iconography. Concurrently scheduled with course C218B.

C117C. Pre-Columbian Art of the Andes. Lecture, three hours. Prerequisite: course 55B or consent of instructor. Study of art of selected cultures of Colombia, Ecuador, Peru, and Bolivia from ca. 4000 B.C. to the Conquest, with particular emphasis on history and iconography of art of Peru. Concurrently scheduled with course C218C.

118A. Arts of Oceania. Lecture, three hours. Prerequisite: course 55A or consent of instructor. Survey of arts of the major island groupings of the Pacific, emphasizing style-regions and broad historical relationships.

118C. Arts of Sub-Saharan Africa. Lecture, three hours. Survey, with emphasis on sculpture, of selected traditions within a style-region framework.

118D. Arts of Native North America. Lecture, three hours. Prerequisite: course 55A or consent of instructor. Survey of painting, sculpture, and other arts from the Eskimo to peoples of the Caribbean and Southwestern U.S.

118E. Advanced Studies in Non-Western Art. Lecture, three hours. Prerequisite: course 118A or 118C or 118D or consent of instructor. Selected topics in arts of non-Western peoples which reflect interests of individual regular and visiting faculty members. P/NP or letter grading.

C119A. Advanced Studies in African Art: Western Africa. Lecture, three hours. Selected topics in arts of peoples living west and north of Cameroun, with emphasis on special problems of theory and method. Concurrently scheduled with course C216A.

C119B. Advanced Studies in African Art: Central Africa. Lecture, three hours. Selected topics in arts of peoples of equatorial, southern, and eastern Africa, with emphasis on special problems of theory and method. Concurrently scheduled with course C216B.

127. Undergraduate Seminar. Lecture, three hours. Prerequisite: junior standing or consent of instructor. Selected aspects of art history explored through readings, discussion, research papers, and oral presentations. May be repeated twice.

197. Honors Course. Hours to be arranged. Prerequisites: 3.0 GPA overall, 3.5 in major, junior or senior standing, consent of instructor. Individual studies for majors. May be repeated once for credit.

199. Special Studies in Art (2 to 8 units). Hours to be arranged. Prerequisites: 3.0 GPA in major, senior standing, consent of instructor. Individual studies for majors. Eight units may be applied toward the major. P/NP or letter grading.

Graduate Courses

All courses may be repeated for credit (unless otherwise noted) on recommendation of the adviser; they are not open to undergraduate students.

200. Art Historical Theories and Methodologies. Discussion, three hours. Critical examination of history of the discipline of art history, with studies of various theoretical, critical, and methodological approaches to visual arts from antiquity to the present.

201. Topics in Historiography of Art History. Discussion, three hours. Critical examination of historiographic traditions of specific areas and fields within the discipline of art history, concentrating on particular time periods, geographical areas, artistic traditions, or the work of one or more authors.

202. Topics in Theory and Criticism in Art History. Discussion, three hours. Focused studies of various theoretical and critical traditions within art history, concentrating on particular issues, authors, or methodologies either within or across historical and cultural areas.

203. Museum Studies. Seminar, two hours. Various aspects of museum activities: concepts and historical evolution of art museums and collecting; methodology of exhibitions; problems involved in acquisition and evaluation of works of art.

204. Restoration, Preservation, and Conservation. Seminar, two hours. May not be repeated.

205. Studies in Prints. Seminar, two hours. Critical studies in history and connoisseurship of graphic arts in the Western world. Group or individual studies often culminate in professionally directed exhibitions produced by Grunwald Center for the Graphic Arts.

206. Studies in Drawings. Seminar, two hours. Critical studies in history and connoisseurship of draughtsmanship in the Western world. Individual studies emphasizing professional presentation. Group studies may culminate in exhibitions sponsored by Grunwald Center for the Graphic Arts.

210. Egyptian Art. Seminar, two hours. Prerequisites: courses 101A, 101B, M102A. Art in Egypt during the Late period and Greco-Roman period. Students should be ready to prepare for every meeting a briefing of a topic from archaeological memoirs, not to exceed 10 minutes. Some lectures.

211. Topics in Aegean Art. Seminar, two hours. Prerequisites: courses M102A and M102B, or consent of instructor. Art and architecture of Aegean Bronze Age (3000-1000 B.C.). Monuments or theoretical problems related to art and culture of Crete, Greece, the Cyclades, or Western Anatolia.

C212A. American Art before the Civil War. Lecture, three hours. Painting, sculpture, and architecture in the U.S. from Colonial period through the Civil War. Concurrently scheduled with course C112A.

C212B. American Art in the Gilded Age, 1860 to 1900. Lecture, three hours. Painting, sculpture, and architecture in the U.S. from the Civil War to turn of the century. Concurrently scheduled with course C112B.

C212C. American Art, 1900 to 1945. Lecture, three hours. Painting, sculpture, and photography in the U.S. from 1900 to 1945. Concurrently scheduled with course C112C. S/U or letter grading.

213. Advanced Studies in Islamic Art. Seminar, two hours. Art and architecture of Islamic world (Spain to Iran) from the 7th to 17th century. Monuments or theoretical problems related to Islamic culture and artistic production.

C214. Problems in Islamic Art. Lecture, three hours. Prerequisite: consent of instructor. Monuments or theoretical problems related to Islamic culture and artistic production. Concurrently scheduled with course C104C.

C216A. Advanced Studies in African Art: Western Africa. Lecture, three hours. Selected topics in arts of peoples living west and north of Cameroun, with emphasis on special problems of theory and method. Concurrently scheduled with course C119A.

C216B. Advanced Studies in African Art: Central Africa. Lecture, three hours. Selected topics in arts of peoples of equatorial, southern, and eastern Africa, with emphasis on special problems of theory and method. Concurrently scheduled with course C119B.

217. Primitivism and Art. Lecture, three hours. History of primitivism in visual arts and its institutional base from ancient Greece to the present, with emphasis on relevance to contemporary issues, critiques, and theory. S/U or letter grading.

C218A. Pre-Columbian Art of Mexico. Lecture, three hours. Prerequisite: course 55B or consent of instructor. Study of art of selected cultures of northern Mesoamerica from ca. 1200 B.C. to the Conquest, with emphasis on historical and iconographic problems. Concurrently scheduled with course C117A.

C218B. Pre-Columbian Art of the Maya. Lecture, three hours. Prerequisite: course 55B or consent of instructor. Study of art of selected Maya-speaking cultures of southern Mesoamerica from ca. 2000 B.C. to the Conquest, with particular emphasis on history and iconography. Concurrently scheduled with course C117B.

C218C. Pre-Columbian Art of the Andes. Lecture, three hours. Prerequisite: course 55B or consent of instructor. Study of art of selected cultures of Colombia, Ecuador, Peru, and Bolivia from ca. 4000 B.C. to the Conquest, with particular emphasis on history and iconography of art of Peru. Concurrently scheduled with course C117C.

219A. Oceanic Art. Discussion, two hours. Prerequisite: consent of instructor. Studies in selected topics in the art of Pacific islands.

219B. Pre-Columbian Art. Discussion, two hours. Prerequisite: consent of instructor. Studies in selected topics in art of pre-Hispanic Latin America.

219C. African Art. Discussion, two hours. Prerequisite: consent of instructor. Studies in selected topics in art of sub-Saharan Africa.

219D. Native North American Art. Discussion, two hours. Prerequisite: consent of instructor. Studies in selected topics in art of the American Indian.

220. Oceanic, Pre-Columbian, African, and Native North American Art. Discussion, two hours. Prerequisite: consent of instructor. Studies in selected topics comparing arts of Oceania, Africa, and pre-Columbian and Native North America.

221. Topics in Classical Art. Lecture, two to three hours. Studies in Parthian art. Site-by-site survey of the Near East (Afghanistan, Iran, Iraq, Syria) during period of Greek and Parthian control.

223. Classical Art. Seminar, two hours. Studies in Greco-Roman art and archaeology. Studies of specific periods, sites, or artistic media.

225. Medieval Art. Seminar, two hours. Studies in selected topics in Byzantine and European medieval art.

226A-226B. Medieval Art and Architecture. Studies in selected topics in Byzantine and European medieval art. Seminar extends over two consecutive terms. In Progress grading.

229. Renaissance and Baroque Paleography. Seminar. Prerequisites: knowledge of Italian, working knowledge of Latin. Workshop approach to documents pertaining to artistic commissions from the 15th to 17th century in Italy to study various aspects of handwriting in official and private deeds, correspondence, treatises, and inscriptions.

230. Italian Renaissance Art. Seminar, two hours. Prerequisite: knowledge of Italian. Study of various aspects of Leonardo's theoretical approach to art in terms of sources and impact on followers.

231. Leonardo and Renaissance Theory of Art. Seminar, two hours. Prerequisite: knowledge of Italian. Study of various aspects of Leonardo's theoretical approach to art in terms of sources and impact on followers.

235. Northern Renaissance Art. Seminar, two hours. Prerequisite: knowledge of German. Emphasis on selected topic (e.g., particular artist, trend, or problem). Research papers and oral reports required.

240. Baroque Art. Seminar, two hours. Emphasis on selected topic (e.g., particular artist, trend, or problem). Research papers and oral reports required. Language requirements depend on area of focus.

M241A-M241B. Seminars: Modern European History. (Same as History M230A-M230B.) Seminar, three hours. In Progress and S/U or letter grading.

244. Topics in European Art from 1700 to 1900. Lecture, two to three hours.

245. European Art from 1700 to 1900. Seminar, two hours.

246. Art and Architecture of Georgian England. Seminar, two hours.

253. Modern Art. Seminar, two hours. Changing topics in modern art (including illustration and other popular forms) which reflect interests of particular faculty members. Political and economic factors affecting arts of France and Germany at various times.

C254. Latin American Art in the 20th Century. Lecture, three hours. Mainstream modern and contemporary art and architecture of selected Latin American countries, including both modernist and postmodernist forms, considered in context of social and political concerns, both national and international. Concurrently scheduled with course C110H. S/U or letter grading.

255. American Art. Seminar, two hours. Prerequisite: course C112A or C112B or C112C or consent of instructor, depending on topic. Topics in American art from Colonial period to the present. Discussion of weekly readings, student oral presentations, and papers.

C257. Advanced Indian Art. Lecture, three hours. Prerequisite: course 114A. Study in Indian sculpture and architecture. Concurrently scheduled with course C115A.

C258. Advanced Chinese Art. Lecture, three hours. Study in Chinese painting and sculpture. Concurrently scheduled with course C115B.

C259. Advanced Japanese Art. Lecture, three hours. Prerequisite: course 114C. Study in Japanese painting and sculpture. Concurrently scheduled with course C115C.

260A. Indian Art. Lecture, two hours. Advanced studies in secular and religious artistic traditions of India. S/U or letter grading.

260B. Chinese Art. Lecture, two hours. Advanced studies in secular and religious artistic traditions of China. S/U or letter grading.

260C. Japanese Art. Lecture, two hours. Advanced studies in secular and religious artistic traditions of Japan. S/U or letter grading.

C261A. Art and Material Culture, Neolithic to 210 B.C. Lecture, three hours. Genesis of Chinese civilization in light of new archaeological finds, including sites and works of art (e.g., ceramics, bronzes, jades). Concurrently scheduled with course C115D. Extensive research paper required of graduate students. S/U or letter grading.

C261B. Art and Material Culture of Early Imperial China, 210 B.C. to A.D. 906. Lecture, three hours. Palaces and tombs of early imperial dynasties, impact of Buddhist art (cave temples), rise of new media and technologies. Concurrently scheduled with course C115E. S/U or letter grading.

C261C. Art and Material Culture of Late Imperial China, 906 to 1911. Lecture, three hours. Secular and religious (Buddhist and Taoist) architecture, painting, sculpture, and various luxury industries (lacquer, porcelain, textiles, jade, bronze, furniture, wood and bamboo carving, etc.). Concurrently scheduled with course C115F. S/U or letter grading.

265. Fieldwork in Archaeology (2 to 8 units). Participation in archaeological excavations or other archaeological research under supervision of the staff.

M270. Art Law. (Same as Law M301.) Prerequisite: consent of instructor. Knowledge of fine arts, arts management, or international law desirable. Limited enrollment; management and art history students may cross-register with consent of instructors. Legal issues related to the fine arts. Consideration of U.S. domestic law as well as international treaties and foreign law in addressing such controversial issues as the international trade in art, art in public places, and moral rights. Distinguished guest speakers and one field trip.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching Art History (1 to 4 units). Prerequisites: graduate standing and apprentice personnel employment as a teaching assistant, associate, or fellow. Required of all new teaching assistants during Fall Quarter of their TA appointment. Workshop/seminar in teaching techniques and pedagogical issues, consisting of readings, discussions, and guest speakers on selected topics. May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study or Research (2 to 8 units). Prerequisite: consent of instructor.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 12 units). Prerequisite: consent of instructor. S/U grading.

598. Research for and Preparation of M.A. Thesis (2 to 12 units). Prerequisite: consent of instructor. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (2 to 12 units). Prerequisite: consent of instructor. S/U grading.

Scope and Objectives

The Asian American Studies Program, an interdepartmental program supported by the Asian American Studies Center, promotes the study of Asian and Pacific peoples in the U.S. from several disciplines. An undergraduate major leading to a B.A. degree is available for those students who wish to pursue their studies about Asian Americans in more depth, while the graduate program leads to the M.A. degree. Students enrolled in an organized undergraduate major other than Asian American studies may pursue a specialization in the field.

A major goal of the program is to communicate the experiences of Asians as an American ethnic group. Courses examine the important issues and concerns of Asian Americans, including their history, social organization, and culture.

Bachelor of Arts Degree

The B.A. program provides a general introduction to Asian American studies for students who anticipate advanced work at the graduate level or careers in research, public service, and community work related to Asian Americans. Courses examine the important issues and concerns of Asian Americans, including their history, social organization, and culture. An overall grade-point average of 2.0 is required for admission to the major.

Preparation for the Major

Required: Asian American Studies 21 or Social Sciences 20.

The Major

Required: A total of 14 upper division courses, including Asian American Studies 100A-100B, one research methods course, two Asian American theme courses, two courses with focus on an Asian American subgroup, two ethnic/race/gender relations courses, two courses on Asian or an Asian subgroup's history/culture/social or political institutions, and three elective courses selected from Asian American studies or the approved list of interdepartmental courses. At least seven of the courses taken for the major must be from the approved list of interdepartmental courses (available in the program office each term).

You must also demonstrate proficiency equivalent to the completion of a one-year course of study in an Asian language prior to graduation.

No more than eight units of course 199 may be applied toward the major.

All courses applied toward the major must be taken for a letter grade (courses offered only on a P/NP grading basis are acceptable), and you must maintain an overall grade-point average of 2.0 in all courses.

Asian American Studies Specialization

The specialization augments study in a traditional field. Students participating in this program are required to complete both a departmental major and the Asian American studies specialization.

You must take Asian American Studies 100A-100B, one Asian American theme course, one course with focus on an Asian American subgroup, and two Asian American studies elective courses. No more than four units of course 199 may be applied toward the specialization.

All courses applied toward the specialization must be taken for a letter grade (courses offered only on a P/NP grading basis are acceptable), and you must maintain an overall grade-point average of 2.0 in all courses.

Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degree

Admission

In addition to the University's minimum requirements, applicants for the Master of Arts program in Asian American Studies are expected to present evidence of their previous interest in Asian American studies through courses taken at the undergraduate level, by research papers written independently or for related classes, or by work experience in an Asian American community. In any case, applicants are required to submit a paper or article, preferably on Asian Americans, directly to the program as part of the application. Three letters of recommendation are also required.

Areas of Study

Since the Asian American Studies Program is interdepartmental, its major fields are determined by the participating faculty from various departments.

Course Requirements

A total of 11 graduate and upper division courses is required for the degree. Of that number, seven must be graduate level (200 or 500 series). Three of the graduate courses must be selected from Anthropology 231, Education 204D, 253G, English M260A, History 201H, 245, Law M315, Sociology 235, 261, 263.

The remaining four of the minimum 11 courses must be approved by the faculty adviser. These four courses, three of which may be upper division, should be selected to give the student additional training in a discipline or greater understanding of a particular topic.

Two courses in the 500 series may be applied toward the 11 courses; only one of the two may be applied toward the required seven graduate courses.

Comprehensive Examination Plan

The M.A. degree may be completed through a written comprehensive examination. The written examination is administered by a committee consisting of at least three faculty members appointed annually by the administrative head of the interdepartmental program in Asian American Studies. The examination is based on an annually updated "Approved List of Core Works in Asian American Studies," a collection of books, novels, articles, and reports in the field of Asian American studies. The examination is normally offered during the break between Winter and Spring Quarters. Students must notify the administrative head of the interdepartmental program of their intention to take the written examination at least one academic quarter before it is administered. Students are given two chances to pass the examination. Academic credit for examination preparation is given through Asian American Studies 596.

Thesis Plan

Plan A (Thesis). The thesis is intended to provide the opportunity for independent scholarly research on the historical and contemporary experiences of the Asian American population and should be an original contribution to the field. It should be the length and quality of a publishable journal article. A thesis committee of three faculty members is normally constituted at the beginning of the student's second year in residence in the Fall Quarter, at which time the student is expected to submit a plan of research for approval. After approval and completion of the thesis, the committee conducts an oral examination on its subject, usually in the Spring Quarter of the second year. The approved thesis must be typed and filed according to University regulations governing master's theses. Academic credit for thesis research and preparation is given through Asian American Studies 598.

Plan B (Field Research Thesis). A field research thesis is recommended for students who are interested in the practical application of what they have learned in their graduate coursework or who are intending to pursue careers with Asian American community organizations and agencies. A field research thesis committee, consisting of three faculty members (one of whom is designated as the chair) and possibly the chief administrative officer of the client community organization, meets with the student and approves the project plan at the beginning of the student's second year in residence in the Fall Quarter. The chief administrative officer of the client community organization may either be appointed as an additional member of the committee, in which case the officer would be expected to read and sign the thesis as the fourth member, or serve as an unofficial and nonappointed consultant for the

student, in which case the officer would not sign the thesis. After the thesis is completed, the committee conducts an oral examination on the written report of the thesis, usually in the Spring Quarter of the student's second year. The approved thesis report must be typed and filed according to University regulations governing master's theses. Academic credit for field research is given through course 596 or 598.

Lower Division Course

21. Asians and Pacific Islanders in American Society. Lecture, three hours; discussion, one hour. Multidisciplinary examination of history and cultures of Asians and Pacific Islanders in the U.S. Topics include origins and history of migration to the U.S., social movements, ethnic images in literature and art, communities in the U.S. and California, and their current issues. P/NP or letter grading.

Upper Division Courses

100A-100B. Introduction to Asian American Studies. Introductory course on Asian American studies. **100A.** History of Asians in America; **100B.** Contemporary Asian American Communities.

101A. Field Studies Methods in Asian Pacific Communities. Lecture, three hours. Prerequisite: one course from Asian American Studies 100A through 197Z. Development of community profiles on Asian Pacific American communities of students' choice, using various field studies techniques of data collection. P/NP or letter grading.

101B. Internships in Asian Pacific Communities. Discussion, 90 minutes; fieldwork, eight hours minimum. Prerequisite: course 101A or another Asian American studies course (except 199) or consent of instructor. Integrates academic and empirical work by providing students the challenge of performing public service and community work in Asian Pacific or other multicultural communities, and of bringing their ongoing internship experiences back to classroom. P/NP grading.

103. Social Science Research Methods. (Not the same as course 103 prior to Winter Quarter 1995.) Lecture, three hours; discussion, one hour. Limited to juniors/seniors. Introduction to fundamentals of conducting social research on Asian Americans, providing experience in using some research methods and exercises in evaluating nature and quality of scientific research on Asian American issues. P/NP or letter grading.

105. Asian American Historiography. (Not the same as course 105 prior to Fall Quarter 1994.) Seminar on exploration of how works of history are written about Asian Americans. Focus on problems of historiography and method when considering source materials related to history and experience of Asian Americans. P/NP or letter grading.

M112. Asian American Literature. (Formerly numbered M102.) (Same as English M102.) Prerequisite: satisfaction of Subject A requirement. Prose and poetry by Americans of Chinese, Japanese, Filipino, Korean, or other Asian origins. Study of interaction of autobiography and fiction, nourishing and limiting influences of mainstream American and Asian literary traditions, and conflict between ideological and literary criteria. P/NP or letter grading.

113. Asian Americans and the Law. (Formerly numbered 103.) Survey of major federal and California case and legislative law directed specifically toward Asian Americans from 1850 to World War II and relocation. Major subject areas include anti-Asian labor legislation, legal prohibitions against Asians' right to testify, Japanese relocation orders, and equal educational opportunity for Asians. P/NP or letter grading.

115. Asian American Women. (Formerly numbered 105.) Lecture, three hours. Condition of Asian women in America. Topics include women in Asian American history, racial and cultural stereotypes, and contemporary issues. Methodological approaches to study of gender issues presented and evaluated. P/NP or letter grading.

M117. Asian American Personality and Mental Health. (Formerly numbered M107.) (Same as Psychology M107.) Lecture, three hours. Prerequisite: Psychology 10. Foundations of personality development and mental health among Asian Americans. Topics include culture, family patterns, achievements, stressors, resources, and immigrant and minority group status. P/NP or letter grading.

M119. Asian American Aesthetics. (Same as World Arts and Cultures M152.) Lecture, four hours; outside study, eight hours. Limited to juniors/seniors. Exploration of shared and distinctive aspects of aesthetics found among groups of Asian Americans through lecture, readings, and field study. Formal and informal expressions of the culture, with focus on origins, artists, arts activists, and reinterpretations of culture through the arts. Individual project required. P/NP or letter grading.

M123. Asian Pacific Americans in the U.S. Economy. (Same as Economics M189.) Lecture, three hours. Examination of several dimensions of Asian American participation, from labor market experience to use of government services to entrepreneurial activity. Attention to linking understanding of Asian American experience to public policies available to address problems of economically disadvantaged. P/NP or letter grading.

130A-130E. Asian American History and Experience. (Formerly numbered 195A-195E.) Lecture, three hours. Not open to freshmen. Survey of immigration history, settlement patterns, and experiences of specific Asian American populations. Examination of historical and contemporary sociocultural, economic, and political issues as they affect formation and character of various Asian American communities. P/NP or letter grading. **130A.** Filipino American Experience; **130B.** Korean American Experience; **130C.** Vietnamese American Experience; **130D.** Japanese American History; **130E.** Chinese American Experience.

M132A. Korean American Literature. (Same as Humanities M168.) Seminar, three hours. Comprehensive introduction to Korean American literature, with emphasis on Korean American experience, problems of gender, race, and class, nationalism, generational relationships, and impact of traditional Korean culture on Korean American literature. P/NP or letter grading.

M132B. Chinese Immigrant Literature and Film. (Same as Chinese M153 and Humanities M171.) Lecture, two hours; discussion, one hour; outside study, nine hours. In-depth look at Chinese immigrant experience by reading literature and watching films. Theories of diaspora, gender, and race to inform thinking and discussion of relevant issues.

M153. The U.S. and the Philippines. (Formerly numbered M196A.) (Same as History M153.) Lecture, three hours. Recommended (but not prerequisite): History 190A-190B, 190C. Examination of complex interrelationship between U.S. colonialism, Philippine nationalism, history of Filipino Americans, and Philippine diaspora in the 20th century.

M154. Chinese Immigration. (Formerly numbered M197D.) (Same as Sociology M153.) Lecture, two hours; discussion, one hour. Survey of sociological studies of Chinese immigration, with focus on international context, organization, and institutions of Chinese America and its interactions with the social environment. P/NP or letter grading.

M163. Investigative Journalism and Communities of Color. (Formerly numbered M197B.) (Same as Afro-American Studies M195.) Lecture, three hours. Role of investigative journalism in understanding interethnic conflict and cooperation. Exploration of different perspectives on issues by comparing mainstream, ethnic, and alternative media coverage.

171A-171E. Critical Issues in U.S.-Asia Relations. (Formerly numbered M196A-196E.) Lecture/seminar, three hours. Not open to freshmen. Critical examination of U.S. involvement in specific Asian countries, including study of historical, cultural, political, and socioeconomic factors that shape relations between Asia and the U.S. Examination of impact of relationships in the Pacific Rim and Asian Americans and their communities. P/NP or letter grading. **171A.** U.S.-Philippine Relations; **171B.** U.S.-Korea Relations; **171C.** U.S.-Vietnam Relations; **171D.** U.S.-Japan Relations; **171E.** U.S.-China Relations.

196. Seminar: Asian American Studies. Seminar, three to four hours. Limited to seniors in Asian American studies. Organized on a topics basis with readings, discussions, and papers. Consult Asian American Studies Center for topics to be offered in a specific term. P/NP or letter grading.

197A-197Z. Topics in Asian American Studies. (Formerly numbered 197.) Lecture, three to four hours. Prerequisite: junior/senior standing. Variable topics in Asian American studies on selected issues in education, literature, social process, public policy, and economic development. P/NP or letter grading.

M197H. Culture, Media, and Los Angeles (6 units). (Same as Afro-American Studies M102 and Honors Collegium M102.) Lecture, four hours; screenings, two hours. Role of media in society and its influence on contemporary cultural environment, specifically in Los Angeles; issues of representation as they pertain to race, ethnicity, gender, and sexuality.

199. Special Topics in Asian American Studies (2 to 4 units). Prerequisites: course 100A or 100B or comparable knowledge in Asian American studies, junior or senior standing, consent of instructor. Special individual studies on topics such as ethnic literature, public policies, economic development, immigrant education, and/or social policies related to Asian American studies. May be repeated for a maximum of eight units.

Graduate Courses

200A. Critical Issues in Asian American Studies. Prerequisites: graduate standing, consent of instructor. Examines and seeks to develop a critical appreciation of research literature on Asians in America and to develop alternative interpretations of the Asian American experience. Topics include Asian American history and economic/political and social/psychological issues.

200B. Critical Issues in Asian American Communities. Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Evaluation of traditional and contemporary theories and models of community for their appropriateness to understanding Asian Pacific American communities. Consideration of specific topics which explicate development, structure, and dynamics of Asian Pacific American communities in studying community issues and concerns.

200C. Critical Issues in Asian American Studies. Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Critical review of research methods, strategies, and philosophies in Asian American studies.

M261. Issues in Third World Literatures and Cultures. (Same as Comparative Literature M274.) Seminar, three hours; outside study, nine hours. Prerequisite: consent of instructor. Investigation of politics of power, gender, and race in the complex relationships between the so-called First World and Third World, using both theoretical and textual approaches. S/U or letter grading.

M297A-297Z. Topics in Asian American Studies. (Formerly numbered 297.) Prerequisite: graduate standing or consent of instructor. Selected topics in Asian American studies:

M297A. Topics in Asian American Literature. (Same as English M260A.) Lecture, three hours. Graduate seminar that examines and critically evaluates writings of Asian Americans.

M297B. Asian Migration to the U.S. (Same as Urban Planning M242A.) Emphasis on Asia as main regional source for international migrants. Topics include patterns and theories of international migration and their relevance to the Asian experience, sending and receiving country perspectives, research and policy issues. S/U or letter grading.

M297C. Urbanization in Asia — Policy Issues and Problems. (Same as Urban Planning M242B.) Urbanization in less-developed countries in Asia with specific reference to its peculiar features and characteristics, and relationship of urbanization to the development process. Topics include urbanization development, structural and policy determinants of urbanization, urban policy and strategies, and country case studies. S/U or letter grading.

M297D. Asian Americans and Legal Ideology. (Same as Law M315.) Exploration of Asian American experience as it relates to American legal system, considering both dominant and oppositional concepts of law. Consideration of primary historical documents to examine ways Asian Americans have been victims of the legal system, as well as astute manipulators of the legal system.

490. Writing Workshop for Graduate Students (2 units). Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Practice in writing reports, grant proposals, abstracts, theses, and article-length research papers. Analyzing rhetorical and stylistic features of essays in various Asian American journals helps students improve both their prose style and editorial abilities. Four units may be applied toward M.A. degree requirements. May be repeated once for credit. S/U grading.

596. Directed Individual Study or Research (2 to 8 units). Hours to be arranged. Prerequisite: consent of instructor.

598. Research for and Preparation of M.A. Thesis (2 to 8 units). Prerequisite: consent of instructor. Preparation of research data and writing of M.A. thesis. S/U grading.

Scope and Objectives

The atmospheric sciences present a wide variety of problems of compelling scientific interest and increasing social concern. This is exemplified by efforts to improve air quality, depredations caused by severe storms and floods, attempts to control or modify weather phenomena, problems of long-range weather forecasts and climate change, and expanding scientific frontiers into our outer atmosphere and atmospheres of other planets.

The department offers a broad curriculum in dynamic and synoptic meteorology, atmospheric physics and chemistry, and upper atmosphere and space physics.

The Bachelor of Science degree qualifies students for entry-level technical positions or represents valuable background for training in other professions. Master of Science and Ph.D. degree holders work in universities, research centers, laboratories, and government services and, increasingly, in the rapidly burgeoning private sector.

Bachelor of Science Degree

Preparation for the Major

Required: Atmospheric Sciences 2A or 6A, 3A, Chemistry and Biochemistry 11A, Mathematics 31A or 31AQ, 31B, 32A, 32B, 33A, 33B, Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL, Program in Computing 3.

The Major

Required: Atmospheric Sciences 94, 104A, 104B, 104C, C105, 161; two courses from Atmospheric Sciences CM140, C141, 143, 144, 146, 151, C152, C154, C162; two courses from Chemistry and Biochemistry 11B, 11C, 103, 110A, 110B, 113A, C113B, Mathematics 115A, 115B, 132, 135A, 135B, 136, 145, 146, M150A, 150B, Physics 110A, 110B, M122, 123, 131, 132, Statistics 154A, 154B. *Recommended:* Four units of Atmospheric Sciences 198 for students preparing for a career in the operational meteorology field.

Students preparing for graduate studies in atmospheric chemistry should take Chemistry and Biochemistry 11B, 103, Mathematics 115A, 135A, 136, Physics 8E, 131, 132; students preparing for graduate studies in upper atmosphere and space physics should take Mathematics 115A, 135A, Physics 8E, 110A, 110B, M122; students preparing for graduate studies in atmospheric dynamics and physics should take Atmospheric Sciences CM140, C141, C142, Mathematics 115A, 135A, 136, 145, Physics 8E, 131, 132.

Environmental Studies Sequences — The department offers two sequences of courses designed for students who wish to obtain a broader background in environmental problems, including air pollution, global climate change, and ozone depletion. One sequence is offered at the general education level (Atmospheric Sciences 2E, 3E, 6E) for all students seeking to fulfill GE requirements. Courses 2E/3E and 3E/6E fulfill the complementary course requirement; course 3E or 6E fulfills the laboratory and/or demonstration requirement. Completion of the three general education courses concludes the sequence.

The sequence of upper division courses (Atmospheric Sciences C142, 143, 144, 145, 146, 151) is designed for physical sciences, engineering, and life sciences majors or other qualified students. Completion of three of the courses constitutes fulfillment of the upper division sequence. Courses C142 or 144, 145, and 151 are recommended for students who wish to focus on air pollution; C142, 143, and 145 have a global climate change focus; and C142, 145, and 151 focus on ozone depletion.

Graduate Study

The following constitutes introductory information regarding graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degree

Admission

For the Master of Science degree in Atmospheric Sciences there are no admission requirements in addition to University minimum requirements and no application form in addition to the one used by Graduate Admissions/Student and Academic Affairs. Three letters of recommendation are required. For departmental brochures and information, write to Department of Atmospheric Sciences at the address given at the beginning of this listing. In addition to students holding bachelors' degrees in meteorology or atmospheric sciences, graduates with degrees in related disciplines — astronomy, chemistry, engineering, geophysics, oceanography, mathematics, and physics — are encouraged to apply for graduate status in the department. Programs are arranged by consultation between the student

and the department's graduate advisers, and considerable flexibility is maintained so that maximum advantage may be taken of previous education.

Areas of Study

Dynamic and synoptic meteorology; atmospheric physics and chemistry; upper atmosphere and space physics.

Course Requirements

A total of nine courses must be completed in graduate status, five of which must be in the 200 or 500 series. Students must attain a grade of B (3.0) or better in one course in each of two fields other than the field of specialization.

Only one 500-series course (four units) may be applied toward the minimum graduate course requirement for the M.S. degree.

Core Courses. General core: Atmospheric Sciences C200A, C200B; dynamic and synoptic core: C201A, 201B, 201C; atmospheric physics and chemistry core: M203A, C203B, 203C; upper atmosphere and space physics core: C205A, 205B, 205C.

Atmospheric Sciences C200A is required of all students without formal background in fluid dynamics. Atmospheric Sciences C200B is required of all students without formal background in the atmospheric sciences.

Dynamic/Synoptic Specialization. Students are required to answer five questions — one from the general core, two from the dynamic/synoptic core, one from the atmospheric physics and chemistry core, and one from the upper atmosphere and space physics core or, for those students with prior formal study in fluid dynamics and the atmospheric sciences, three questions from the dynamic/synoptic core and one each from the other two core groups.

Atmospheric Physics and Chemistry Specialization. Students are required to answer five questions (two questions chosen from the combined general core and dynamic/synoptic core question alternatives, two from the atmospheric physics and chemistry core, and one from the upper atmosphere and space physics core).

Upper Atmosphere and Space Physics Specialization. Students are required to answer five questions (two questions chosen from the combined general core and dynamic/synoptic core question alternatives, one from the atmospheric physics and chemistry core, and two from the upper atmosphere and space physics core).

The special oral examination for each student is designed based on an individual list of topics selected in consultation with the graduate advisers. This list should represent the equivalent of two courses in the student's area of

research specialization. The oral examination for each student is conducted by a Departmental Guidance Committee of three members, appointed by the chair of the department at the conclusion of the first year of study.

Comprehensive Examination Plan

The comprehensive examination, based on selected coursework, is conducted at the end of Fall and Spring Quarters. Grading of the examination is based on a 4.0 scale, with a 3.0 required for a pass at the M.S. level, and a 3.5 or better to continue for the Ph.D. Students are permitted two attempts to obtain the requisite grade either for termination at the M.S. level or for continuation toward a Ph.D. Students are encouraged to take the examination as soon as possible. The examination must, however, be attempted by the end of the student's first two years of study and, if necessary, be retaken at the earliest available time.

Thesis Plan

Students who have a grade-point average of 3.5 or better may petition the department to obtain the M.S. by writing an original thesis. The petition must be received by the graduate advisers at least one year before completion of the degree (at the end of the first year of study). Provided a high academic standard in coursework is maintained, the accepted thesis may be used instead of the comprehensive examination for continuation toward the Ph.D. degree.

Doctoral Degree

Admission

There are no admission requirements in addition to University minimum requirements and no application form in addition to the one used by Graduate Admissions/Student and Academic Affairs. Three letters of recommendation are required. For departmental brochures and information, write to Department of Atmospheric Sciences at the address given at the beginning of this listing. In addition to students holding bachelors' degrees in meteorology or atmospheric sciences, graduates with degrees in related disciplines — astronomy, chemistry, engineering, geophysics, oceanography, mathematics, and physics — are encouraged to apply for graduate status in the department. Programs are arranged by consultation between the student and the department's graduate advisers, and considerable flexibility is maintained so that maximum advantage may be taken of previous education.

Major Fields or Subdisciplines

Dynamic and synoptic meteorology; atmospheric physics and chemistry; upper atmosphere and space physics.

Course Requirements

For students entering the department with an M.S. degree, there are no specific course

requirements other than Atmospheric Sciences 270 in which a formal seminar attended and graded by all faculty members must be presented. The graduate advisers may, at their discretion, prescribe courses in areas in which they deem students to have insufficient background in order to help them pass the comprehensive examination.

Written and Oral Qualifying Examinations

Students having selected the comprehensive examination plan must also take an in-depth oral examination in their area of research specialization. Subsequently, a doctoral committee is appointed to conduct the University Oral Qualifying Examination on the selected dissertation topic and related areas, and the final dissertation defense which is required of all students. Each of these examinations must be passed in no more than two attempts.

Lower Division Courses

1. Introduction to Weather Maps and Weather Forecasting. Lecture, three hours. Introduction to weather maps and satellite imagery and their use in making a weather forecast. Discussions also include structure of the National Weather Service and services it provides to the general public. Course allows students to make weather forecasts for Los Angeles and one city east of the Rocky Mountains.

2. Air Pollution. Lecture, three hours; discussion, one hour. Causes and effects of high concentrations of pollution in the atmosphere. Topics include nature and sources of gaseous and particulate pollutants, their transport, dispersion, modification, and removal, with emphasis on atmospheric processes on scales ranging from individual sources to global effects; interaction with biosphere and oceans; stratospheric pollution.

2A. Air Pollution (5 units). Lecture, three hours; discussion, three hours. Preparation: major in physical sciences, life sciences, or engineering, or other majors who have completed Physics 6B and Mathematics 3A. Course for majors parallel to course 2; discussion section includes use of calculus. Discussion topics include composition of the atmosphere, air pollution, depletion of stratospheric ozone layer, global geochemical cycles, global greenhouse warming, polar ozone hole, nuclear winter.

2E. Air Pollution (5 units). Lecture, three hours; discussion, three hours. Course for students with interests in environmental studies parallel to course 2; discussion section focuses on intersection of science and policy for issues in local, regional, and global air pollution; use of case-study, approach and participation of experts from social, health, and life sciences in class discussions. Letter (majors) or P/NP or letter (nonmajors) grading.

3. Introduction to the Atmospheric Environment. Lecture, three hours; discussion, one hour. Nature and causes of weather phenomena, including winds, clouds, rain, lightning, tornadoes and hurricanes, solar and terrestrial radiation; phenomena of the higher atmosphere; ionosphere and auroras; causes of air pollution; proposed methods and status of weather modification.

3A. Introduction to the Atmospheric Environment (5 units). Lecture, three hours; discussion, three hours. Enforced requisite: Physics 8B. Course for majors parallel to course 3; discussion section includes use of calculus. Discussion topics include atmospheric thermodynamics, extratropical synoptic-scale disturbances, atmospheric aerosol and microphysical processes, clouds and storms, radiative processes, atmospheric dynamics.

3E. Introduction to the Atmospheric Environment (5 units). Lecture, three hours; discussion, three hours. Course for students with interests in environmental studies parallel to course 3; discussion section emphasizes environmental aspects of atmospheric phenomena, with focus on scientific issues of severe weather and climate change and particular attention to those topics that are relevant to policy issues. Letter (majors) or P/NP or letter (non-majors) grading.

4. California Weather and Climate. Lecture, three hours; discussion, one hour. Enforced requisite: course 3 or 3A. Sequel to course 3 dealing in greater detail with atmospheric phenomena relevant to the weather of California, and nature of weather and climate of various regions of the state. Topics include extratropical cyclones and fronts, thunderstorms, severe weather, sea and land breezes, Santa Ana winds, low-level temperature inversions, air pollution, climate change, and discussion of present weather.

5. Climates of Other Worlds. Lecture, three hours; discussion, one hour. Introduction to atmospheres of planets and their satellites in the solar system using information obtained during the recent planetary exploration program. Elementary description of origin and evolution of atmospheres on the planets. Climates on the planets, conditions necessary for evolution of life, and its resulting effect on planetary environment.

6. Climate and Climatic Change. Lecture, three hours; discussion, one hour. Introduction to physical causes of climate, classification of climate, and global distribution of climate types. Description of climate changes over time scales ranging from lifetime of Earth to el niño events. Discussion of causes of climatic change (e.g., long-term steady increase in solar luminosity, short-term fluctuations in solar luminosity, changes in Earth's orbit, changes in atmospheric composition, volcanoes, anthropogenic changes such as increased CO_x and nuclear war). State of the art in modeling and predicting climate.

6A. Climate and Climatic Change (5 units). Lecture, three hours; discussion, three hours. Enforced requisite: Physics 8D. Course for majors parallel to course 6; discussion section includes use of calculus. Discussion topics include atmospheric circulation, oceanic circulation, greenhouse effect, ice ages, ocean/atmosphere interactions, ozone hole, past climates, climate prediction.

6E. Climate and Climatic Change (5 units). Lecture, three hours; discussion, three hours. Course for students with interests in environmental studies parallel to course 6; discussion section places scientific and technological aspects of climate and climate change in context of societal impacts of climate variations. Discussion of modern methods used to predict climate change and their impact. Letter (majors) or P/NP or letter (nonmajors) grading.

8. Clouds, Rain, and Storms. Lecture, three hours; discussion, one hour. The raindrop and the ice crystal. Relation of meteorological conditions to cloud types. Precipitation mechanisms from clouds. Different scales of atmospheric cloud organization. Description and dynamics of spectacular weather systems, ranging from tornadoes to hurricanes. Severe weather forecasting.

10. Introduction to the Earth System. (Formerly numbered Honors Collegium 88.) Lecture, three hours; discussion, one hour; laboratory, one hour. Overview of Earth as a system of distinct, yet connected, physical and biological elements. Origins and characteristics of atmosphere, oceans, and land masses. Effects of biological processes in shaping the physical environment. Mechanisms that drive climate of Earth and that have produced a protective ozone shield around the planet. Exploration of possibility of technological solutions to global pollution problems.

88. Lower Division Seminar. Seminar, three hours. Variable topics; consult *Schedule of Classes* or department for topics to be offered in a specific term. P/NP or letter grading.

94. Survey of Atmospheric Sciences (2 units). Preparation: undergraduate physical sciences major. General introductory seminar on current research topics in atmospheric sciences. Students are directed in a library research project and prepare a brief class presentation/term paper under supervision of participating faculty member. P/NP or letter grading.

Upper Division Courses

104A. Atmospheric Thermodynamics. Lecture, three hours; discussion, two hours. Prerequisites: Mathematics 32B, Physics 8B. Basic thermodynamics, including first, second, and third laws. Atmospheric statics. Dry adiabatic processes. Phase changes of water and moist adiabatic processes. Introduction to cloud microphysics. Gravitational stability.

104B. Introduction to Dynamic Meteorology. Lecture, three hours; discussion, two hours. Prerequisite: course 104A. Kinematic properties of velocity field: streamlines and trajectories, vorticity and divergence. Equations governing atmospheric motions: equation of motion, equation of mass continuity, thermodynamic energy equation. Static equilibrium, pressure as vertical coordinate. Geostrophic flow. Circulation and vorticity. Quasi-geostrophic motion. Dynamics of extratropical cyclones, baroclinic instability, fronts.

104C. Introduction to Synoptic Meteorology. Laboratory, six hours. Prerequisite: course 104B. Weather map analysis. Thermodynamic diagrams. Satellite interpretation. Severe weather forecasting. Isentropic analysis.

C105. Advanced Synoptic Meteorology. Lecture, three hours; discussion, one hour. Prerequisites: course 104C and Program in Computing 3, or consent of instructor. Structure and analysis of the wave cyclone. Characteristics of frontal zones. Frontogenesis. Diagnosis of vertical velocity; quasi-geostrophic omega equation: derivation, applications, and alternative formulations. Sawyer/Eliassen equation. Diabatic effects on cyclogenesis. Modeling studies. Discussion of current research topics. Concurrently scheduled with course C227.

CM140. Introduction to Fluid Dynamics. (Same as Earth and Space Sciences M140.) Lecture, three hours; discussion, one hour. Corequisite: Physics 131. Equations of fluid motion. Circulation theorems. Irrotational flow. Vortex motion. Rotating frame. Hydrostatic and geostrophic balance. Sound and shock waves. Viscous flow. Concurrently scheduled with course C200A.

C141. Introduction to Geophysical Fluid Dynamics. Lecture, three hours. Prerequisite: Physics 131 or consent of instructor. Recommended: course CM140. Equations of motion in a rotating frame, with special emphasis on shallow-water model. Potential vorticity. Geostrophic motion. Gravity and Rossby waves. Geostrophic adjustment. Quasi-geostrophic motion. Laplace tidal equation. Kelvin and mixed Rossby gravity waves. Baroclinic instability. Concurrently scheduled with course C201A.

C142. Introduction to Atmospheric Science. Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 3B or 31B, Physics 6B or 8B. Introductory course for physical sciences, life sciences, or engineering majors interested in environmental issues. Introduction to atmospheric environment, with emphasis on structure, thermodynamics, and dynamics of extratropical atmosphere. Concurrently scheduled with course C200B.

143. Physical Oceanography. Lecture, three hours; discussion, one hour. Prerequisite: Mathematics 3B or 31B. Introductory course for physical sciences, life sciences, or engineering majors interested in environmental issues. Observations of temperature, salinity, density, and currents. Methods. Wind-driven and geostrophic currents. California Current and Gulf Stream. Internal waves. Surface waves and tides. Air/sea interactions. Coastal upwelling. Biological/physical interactions. El niño. Role of ocean in climate and global change. Santa Monica Bay field trip.

144. Air Pollution Meteorology. Lecture, three hours; discussion, one hour. Prerequisite: course C142 or consent of instructor. Structure of surface layer of the atmosphere, including its temperature, humidity, and winds; properties of regional weather systems and implications for air pollution transport and dispersion; turbulence and diffusion in lower atmosphere; advective transport and deposition processes for air pollutants; air pollutant source/receptor relationships in urban and regional air-sheds.

145. Physics and Chemistry of Atmospheric Environment. Lecture, three hours; discussion, one hour. Prerequisite: Physics 6C or 8D or consent of instructor. Introductory course for physical sciences, life sciences, or engineering majors interested in environmental issues. Structure and composition of the atmosphere; atmospheric evolution; chemical and photochemical processes; aerosol and cloud microphysical processes; radiation transfer in clear, cloudy, and polluted air; human influences on atmospheric composition and chemistry; effects on global climate.

146. Remote Sensing of the Environment. Lecture, three hours. Prerequisite: Physics 6B or 8D or consent of instructor. Introductory course for physical sciences, life sciences, or engineering majors interested in environmental issues. Introduction to properties of radiation in the atmosphere and principles of active and passive remote sensing of atmospheres and surfaces as it applies to monitoring of Earth's environment and global change.

151. Environmental Chemistry Laboratory. Lecture, two hours; laboratory, three hours. Laboratory experience for students who may wish to pursue a career in environmental science. Essential laboratory procedures to be performed in context of timely environmental issues involving smog formation, acid rain, and ozone depletion. Hands-on experience using scientific instruments and analytical techniques appropriate for environmental assessment.

C152. Physics of Clouds and Precipitation. Lecture, three hours. Recommended (but not prerequisite): Physics 110A. Thermodynamics of moist air, phase changes of water substance, latent heats, moist adiabatic processes; elementary cloud dynamics; cloud microstructure; microphysics of cloud droplets, nucleation phenomena, droplet hydrodynamics, coalescence and precipitation; ice physics; charge separation mechanisms; macrostructure of clouds and storms. Concurrently scheduled with course C203B.

C154. Introduction to Solar System Plasmas. Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 33A and Physics 8D, or consent of instructor. Introduction to basic plasma physical processes occurring in the sun, solar wind, magnetospheres, and ionospheres of planets, using simple fluid (magnetohydrodynamic) models as well as individual particle (radiation belt dynamics) approach. Solar-planetary coupling processes, geomagnetic phenomena, aurora. Concurrently scheduled with course C205A.

161. Numerical Methods in Atmospheric Sciences. Lecture, two hours; laboratory, three hours. Prerequisites: Mathematics 33B and Program in Computing 3, or consent of instructor. Numerical solutions of problems selected from atmospheric sciences. Matrix inversion. Solution of oscillation, decay, advection, and vorticity equations.

C162. Statistics in Atmospheric Sciences. Lecture, three hours; discussion, one hour. Prerequisite: Mathematics M150A or Statistics M152A or equivalent. Survey of methods used for data analysis in atmospheric sciences, with emphasis on practical applications. Methods include linear regression, factor analysis, and cluster analysis. Concurrently scheduled with course C213.

195. Senior Paper. Prerequisite: senior standing in atmospheric sciences. Supervised through individual consultation with an appropriate faculty member, students write a research paper on a topic of their own choosing within their area of concentration in the major. May be used for writing honors thesis.

198. Operational Meteorology (2 units). Laboratory, six hours. Prerequisites: course 104C, junior or senior standing in atmospheric sciences. Daily contact with weather data and forecasting, satellite and radar data. Introduction to weather forecasting for aviation, air pollution, marine weather, fire weather, and public use. Includes daily weather map discussions and visits to observing, radiosonde, and radar installations.

199. Special Studies in Meteorology (2 or 4 units). Prerequisite: consent of instructor. Special individual studies.

Graduate Courses

C200A. Introduction to Fluid Dynamics. (Formerly numbered C200.) Lecture, three hours; discussion, one hour. Corequisite: Physics 131. Equations of fluid motion. Circulation theorems. Irrotational flow. Vortex motion. Rotating frame. Hydrostatic and geostrophic balance. Sound and shock waves. Viscous flow. Concurrently scheduled with course CM140.

C200B. Introduction to Atmospheric Science. (Formerly numbered C201.) Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 3B or 31B, Physics 6B or 8B. Intended for graduate students with little or no prior background in atmospheric sciences. Introduction to atmospheric environment, with emphasis on structure, thermodynamics, and dynamics of extratropical atmosphere. Concurrently scheduled with course C142.

C201A. Introduction to Geophysical Fluid Dynamics. (Formerly numbered C202.) Lecture, three hours. Equations of motion in a rotating frame, with special emphasis on shallow-water model. Potential vorticity. Geostrophic motion. Gravity and Rossby waves. Geostrophic adjustment. Quasi-geostrophic motion. Laplace tidal equation. Kelvin and mixed Rossby gravity waves. Baroclinic instability. Concurrently scheduled with course C141.

201B. Atmospheric Wave Motions. (Formerly numbered 210A.) Lecture, three hours. Prerequisite: course C141/C201A. Wave motions in a compressible, stratified, and rotating atmosphere. Acoustic and gravity waves, anelastic and quasi-static approximations. Kelvin/Helmholtz instability. Quasi-static oscillations of a planetary atmosphere. Quasi-geostrophic motions. Baroclinic and barotropic instabilities. Propagation of planetary waves.

201C. Introduction to Atmospheric Turbulence and Convection. (Formerly numbered 226.) Lecture, three hours. Prerequisite: course C200A or consent of instructor. Small-scale nonhydrostatic motions in the atmosphere. Introduction to turbulence and thermal convection. Planetary boundary layer, effects of moisture on atmospheric motions, theory of moist convection, cumulus convection.

M203A. Introduction to Atmospheric Chemistry. (Same as Civil Engineering M262A.) Lecture, three hours. Prerequisite for undergraduates: Chemistry 11C. Principles of chemical kinetics, thermochemistry, spectroscopy, and photochemistry; chemical composition and history of Earth's atmosphere; biogeochemical cycles of key atmospheric constituents; basic photochemistry of troposphere and stratosphere, upper atmosphere chemical processes; air pollution; chemistry and climate.

C203B. Physics of Clouds and Precipitation. (Formerly numbered 203B.) Lecture, three hours. Thermodynamics of moist air, phase changes of water substance, latent heats, moist adiabatic processes; elementary cloud dynamics; cloud microstructure; microphysics of cloud droplets, nucleation phenomena, droplet hydrodynamics, coalescence and precipitation; ice physics; charge separation mechanisms; macrostructure of clouds and storms. Concurrently scheduled with course C152.

203C. Atmospheric Radiation. Lecture, three hours. Survey of atmospheric radiation and radiative processes; thermal radiation, infrared radiative transfer in atmospheres, energy balance relationships; solar radiation, Rayleigh and Mie scattering, atmospheric optics; radiation climatology, energy balance and climate; remote sensing of atmospheres.

C205A. Introduction to Solar System Plasmas. Lecture, three hours; discussion, one hour. Introduction to basic plasma physical processes occurring in the sun, solar wind, magnetospheres, and ionospheres of planets, using simple fluid (magnetohydrodynamic) models as well as individual particle (radiation belt dynamics) approach. Solar-planetary coupling processes, geomagnetic phenomena, aurora. Concurrently scheduled with course C154. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

205B. Descriptive Solar-Terrestrial Physics. (Formerly numbered 205C.) Lecture, three hours; discussion, one hour. Solar, interplanetary, magnetospheric, ionospheric, auroral, geomagnetic phenomenological background for studies in space physics. Complements theoretical space physics courses. Contextual understanding and literacy in space physics terminology provided. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

205C. Planetary Upper Atmospheres. (Formerly numbered 205B.) Lecture, three hours; discussion, one hour. Aeronomy of upper atmospheres of Earth and other planets and some of their satellites — thermospheric structure and morphology, circulations, and disturbances; ionospheres as collisional and magnetized (unmagnetized) plasmas: currents, drifts, and instabilities. Examples of upper atmospheric interaction with lower atmosphere and magnetosphere. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

Dynamic and Synoptic Meteorology

210. Dynamics of Planetary Circulations. (Formerly numbered 210B.) Lecture, three hours. Prerequisite: course 201B. Interaction between waves and mean zonal and meridional circulations. Vacillation. Regimes of thermally forced planetary circulations and their stability. Frontogenesis. Geostrophic turbulence. Forced planetary waves. Persistent anomalies of atmospheric circulation. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

212A. Numerical Methods in Geophysical Fluid Dynamics. Lecture, three hours. Prerequisite or corequisite: course C201A. Basic numerical methods for initial-boundary value problems in fluid dynamics, with emphasis on applications to atmospheric and oceanographic problems. Finite-difference methods and truncation error. Linear and nonlinear computational instability. Computational modes and computational boundary conditions. Nonlinear shallow-water equation model. Spectral methods. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

212B. Numerical Modeling of the Atmosphere I. Lecture, three hours. Prerequisites: courses 201B and 212A, or consent of instructor. Dynamics of numerical weather prediction and climate models and their computational design. Basic governing equations. Vertical and horizontal coordinates. Quasi-geostrophic and balanced models. Shallow-water equation model. Three-dimensional primitive equation models. Limited-area modeling. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

212C. Numerical Modeling of the Atmosphere II. Lecture, three hours. Prerequisite: course 201C or consent of instructor. Formulation of physical processes in numerical weather prediction and climate models. Planetary boundary layer processes. Turbulence closure models. Condensation processes. Parameterization of moist-convective processes. Cloudiness parameterization. Parameterization of gravity wave drag. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

C213. Statistics in Atmospheric Sciences. Lecture, three hours; discussion, one hour. Prerequisite: Mathematics M150A or Statistics M152A or equivalent. Survey of methods used for data analysis in atmospheric sciences, with emphasis on practical applications. Methods include linear regression, factor analysis, and cluster analysis. Concurrently scheduled with course C162. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

214. Theoretical Climatic Dynamics. Lecture, three hours. Radiative transfer and energy-balance models (EBMs). Multiple equilibrium climates and their stability. Coupled EBMs of the atmosphere and oceans. Climatic history of our planet. Continuum mechanics of ice sheets and mantle. Oscillatory models of Quaternary glaciation cycles. Transitions from equilibrium to periodic and aperiodic climate behavior. Climatic predictability. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

215. Ocean Circulation. Lecture, three hours. Prerequisites: course C200A, C201A. Phenomena, theory, and modeling of ocean circulations with global to regional scope. Circulation types include thermohaline and wind-driven currents. Examination of relationships between ocean circulations and smaller-scale motions, atmospheric climate, and biogeochemical transport. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

216A. Tropical Motions with Moist Processes. Lecture, three hours. Prerequisite: course 201C. Cumulus convection and the boundary layer in the tropics. Cloud clusters and mesoscale convection systems. Interaction of cumulus convection with large-scale environment. Tropical cyclones. Monsoon meteorology. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

216B. Wave Motions in the Tropical Atmosphere. Lecture, three hours. Prerequisite: course 201B. Basic theory of equatorially trapped waves. Observations of tropical wave disturbances. Generation mechanisms of tropical waves. Tropical 30-50 day oscillation. Quasi-biennial and semiannual oscillations. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

218. Dynamics of the Atmosphere/Ocean System. Lecture, three hours. Transfer of properties between atmosphere and ocean; wind-driven ocean currents; coastal upwelling. Air/sea interactions. Effects of oceans on climate. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

220. Dynamics of the Middle Atmosphere. Lecture, three hours. Prerequisites: courses C200B, C201A. Structure and composition of the middle atmosphere. Waves in the middle atmosphere, including tides, planetary waves, and gravity waves. Quasi-biennial oscillations. Stratospheric sudden warmings. Semiannual oscillations. Wave-mean flow interactions. Interactions between middle and lower atmosphere. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

221. Geophysical Turbulence. Lecture, three hours. Prerequisites: courses C200A, C201A. Phenomena, theory, and modeling of turbulence in Earth's oceans and atmosphere—from fine structure to planetary scale motions. Regimes of turbulence include homogeneous flows in two and three dimensions, shear flows, convection, stably stratified flows, and geostrophic motions. Examination of relationships between turbulence and its transport effects on general circulations. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

224A. Atmospheric Turbulence. Lecture, three hours. Kinematics of homogeneous and shear flow turbulence. Surface and planetary boundary layers, including heat transfer and turbulent convection. Survey of field and laboratory observations and their interpretation by theory. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

M224B. Atmospheric Diffusion and Air Pollution. (Same as Civil Engineering M262B.) Lecture, three hours. Nature and sources of atmospheric pollution; diffusion from point, line, and area sources; pollution dispersion in urban complexes; meteorological factors and air pollution potential; meteorological aspects of air pollution. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

C227. Advanced Synoptic Meteorology. Lecture, three hours; discussion, one hour. Prerequisites: course 104C and Program in Computing 3, or consent of instructor. Structure and analysis of the wave cyclone. Characteristics of frontal zones. Frontogenesis. Diagnosis of vertical velocity; quasi-geostrophic omega equation: derivation, applications, and alternative formulations. Sawyer/Eliassen equation. Diabatic effects on cyclogenesis. Modeling studies. Discussion of current research topics. Concurrently scheduled with course C105. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

228. Mesometeorology. Lecture, three hours. Prerequisite: consent of instructor. Observations of phenomena with length scales ranging from 20 km to 2,000 km. Topics include polar lows, airmass thunderstorms, multicell storms, supercell tornadoes, gust fronts, downbursts, microbursts, and the dry line. Discussions on design of field project. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

229. Mesoscale Modeling. Lecture, three hours. Prerequisites: courses 201C and 228, or consent of instructor. Numerical and analytical modeling of convective and mesoscale motions, from shallow heat sources to large complex systems. Model frameworks, assumptions, parameterizations, and solution techniques. Role of modeling efforts in understanding dynamic structure and behavior of systems. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

Atmospheric Physics and Chemistry

230A-230B. Atmospheric Chemistry I, II. Lecture, three hours. Prerequisite: course M203A or consent of instructor. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

230A. Photochemistry of troposphere; physical chemistry of surfaces and solutions; precipitation chemistry and acid rain; atmospheric organic chemistry; regional and global biogeochemical cycles; current issues in global change.

230B. Photochemistry of stratosphere and mesosphere; basic ionospheric processes; stratospheric pollution and the ozone layer; physical chemistry of upper atmosphere clouds and aerosols; comparative photochemistry of planetary atmospheres; observational techniques and results.

232. Chemical Transport Modeling. Lecture, three hours. Prerequisites: courses M203A and 230A-230B, or consent of instructor. Equations of tracer transport and chemical kinetics modeling in three dimensions; numerical techniques; coupled simulations of gas-phase and aerosol microphysics and chemistry; computational versus observational results; current problems in tracer modeling. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

234A-234B. Cloud and Precipitation Physics I, II. Lecture, three hours. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

234A. Prerequisite: course C203B or consent of instructor. Microstructure of atmospheric clouds; structure of the three phases of water substance, including surface effects; thermodynamic theory for equilibrium between the three phases of water substance, including surface effects; theory of homogeneous and heterogeneous nucleation of water drops and ice crystals.

234B. Prerequisite: course 234A. Theory of growth and evaporation of water drops and ice crystals by diffusion of water vapor; hydrodynamics of rigid bodies in a viscous medium; hydrodynamics of cloud drops, rain drops, and atmospheric ice particles; growth of cloud drops and atmospheric ice particles by collision.

240A. Radar Meteorology. Lecture, three hours. Radar detection of spherical and nonspherical particles; use of radar in studying size distributions of cloud and precipitation particles, precipitation intensity and amount, updraft velocities, horizontal wind speed, and turbulence; radar observations of convective clouds, thunderstorms, tornadoes, hurricanes, squall lines, and fronts; clear air echoes. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

240B. Remote Sensing. Lecture, three hours. Prerequisites: courses 203C and 240A, or consent of instructor. Theory and techniques of remote sensing; atmospheric spectroscopy; methods based on scattering, absorption, and extinction; passive and active techniques; inversion methods; remote sensing of terrestrial meteorological parameters and trace constituents; remote sensing of surfaces and biosphere; remote sensing of planetary atmospheres. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

244. Methods of Radiative Transfer. Lecture, three hours; laboratory, one hour. Prerequisites: courses 203C and 240B, or consent of instructor. Analytical and numerical methods of radiative transfer, pure scattering atmospheres, and Chandrasekhar's solution; discrete ordinates; n-stream representations; exponential sums; Monte Carlo techniques and three-dimensional problems; computational laboratory. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

Upper Atmosphere and Space Physics

250A. Solar System Magnetohydrodynamics. Lecture, three hours. Prerequisite: course C205A or consent of instructor. Derivation of MHD equations with two fluid aspects, generalized Ohm's law, small amplitude waves, discontinuities, shock waves, and instabilities. Applications to statics and dynamics of solar wind and planetary magnetospheres and to solar wind/magnetosphere/ionosphere coupling. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

250B. Solar System Microscopic Plasma Processes. Lecture, three hours. Prerequisite: course C205A or consent of instructor. Adiabatic charged particle dynamics; incoherent radiation processes; collective effects in a plasma; propagation characteristics of electrostatic and electromagnetic waves; introduction to resonant interaction between charged particles and plasma waves. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

256. Ionospheric Electrodynamics. Lecture, three hours. Ionospheric structure, currents, and electric fields; equatorial and high-latitude ionospheres; ionospheric control of magnetospheric phenomena. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

257. Radiation Belt Plasma Physics. Lecture, three hours. Prerequisite: course 250B or consent of instructor. Turbulent plasma instabilities and their relation to satellite observations and magnetospheric structure. Processes responsible for source, loss, and transport of energetic radiation belt particles. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

Special Studies

270. Seminar: Atmospheric Sciences (2 units). Lecture, one hour. May be repeated for credit. S/U or letter grading.

271. Seminar: Atmospheric Dynamics (2 units). Lecture, one hour. May be repeated for credit. S/U or letter grading.

M272A-M272B-M272C. Seminars: Climate Dynamics (2 to 4 units each). (Same as Earth and Space Sciences M270A-M270B-M270C and Geography M270A-M270B-M270C.) Lecture, two hours. Prerequisite: consent of instructor. Archaeological, geochemical, micropaleontological, and stratigraphic evidence for climate change throughout the geological past. Rheology and dynamics of climatic subsystems: atmosphere and oceans, ice sheets and marine ice, lithosphere and mantle. Climate of other planets. Modeling, simulation, and prediction of modern climate on monthly, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading.

273. Seminar: Atmospheric Physics (2 units). Lecture, one hour. May be repeated for credit. S/U or letter grading.

274. Seminar: Atmospheric Chemistry (2 units). Lecture, one hour. May be repeated for credit. S/U or letter grading.

M275A-M275B-M275C. Seminars: Space Physics (2 units each). (Same as Earth and Space Sciences M288A-M288B-M288C.) Lecture, one hour. Problems of current interest concerning particles and fields in space. May be repeated for credit. S/U grading.

276. Seminar: Mesoscale Processes (2 units). Seminar, one hour. Selected topics of current research interest in convection, extratropical cyclones, and fronts. May be repeated for credit. S/U or letter grading.

281. Special Topics in Dynamic Meteorology (2 to 4 units). Individual meetings with instructor to be arranged. Content varies from year to year. S/U grading.

283. Special Topics in Atmospheric Physics (2 units). Individual meetings with instructor to be arranged. May be repeated for credit. S/U or letter grading.

284. Special Topics in Atmospheric Chemistry (2 units). Individual meetings with instructor to be arranged. May be repeated for credit. S/U or letter grading.

285. Special Topics in Solar Planetary Relations (2 to 4 units). Individual meetings with instructor to be arranged. Selected topics of current research interest in solar wind, magnetospheric, or ionospheric physics.

296A-296K. Advanced Topics in Atmospheric Sciences (2 units each). Prerequisite: consent of instructor. Advanced study and analysis of current topics in atmospheric sciences. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

296A. Numerical Modeling of the Atmosphere.

296B. Synoptic and Mesoscale Meteorology.

296C. Numerical Mesoscale Modeling.

296D. Climate Dynamics.

296E. Numerical Modeling of the Atmosphere and Ocean.

296F. Hierarchical Modeling of Ocean/Atmosphere System.

296G. Upper Atmosphere and Space Physics.

296H. Recent Advances in Atmospheric Chemistry.

296I. Upper Atmospheric Dynamics.

296J. Experimental Mesoscale Meteorology.

296K. Tropical Meteorology.

375. Teaching Apprentice Practicum (1 to 4 units).

Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Studies for Graduate Students (2 to 8 units).

597. Preparation for Comprehensive Examinations (2 to 8 units).

598. Research and Preparation of M.S. Thesis (2 to 8 units).

599. Research for Ph.D. Dissertation (2 to 8 units).

Scope and Objectives

The biological chemistry graduate program prepares students for careers as independent research scientists and scholars. Laboratory research is the central element. Biological chemistry has grown to include studies of cellular, molecular, and developmental biology, molecular genetics and genetic engineering, and many aspects of the health sciences. The research activities of the department include these areas as well as the "classic" topics of metabolism, enzymology, and biomolecular structure. Courses and seminar programs are designed to provide students with the necessary background and approach to encourage their continuing growth in these rapidly changing areas of science.

Interaction with other graduate programs provides access to scientists in a variety of related disciplines. Through its primary affiliation with the School of Medicine, the department is also involved in the basic education of students who will be physicians, dentists, and other health professionals. Many of these students become involved in laboratory research in the department. In part because of this breadth of experience students find careers in many aspects of basic and applied scientific research and education. The department emphasizes study for the Ph.D., but candidates for the M.S. degree may be accepted under special circumstances.

Graduate Study

The following constitutes introductory information regarding graduate degree programs. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degree

Admission

The department only rarely and under special circumstances accepts students into the Master of Science program.

Areas of Study

Consult the department.

Course Requirements

All graduate students must take the first-year ACCESS curriculum. See course requirements in the Doctoral Degree section below. In addition to the core course requirements, elective courses must be taken to complete the total of nine courses (36 units) required for the degree.

No more than two courses (eight units) in the 500 series may be applied toward the total course requirement, and only one (four units) of the two courses may be applied toward the minimum graduate course requirement (20 units) for the degree.

With the consent of the graduate adviser, Biological Chemistry 596, 597, and 598 may be taken if they are appropriate to the program. Course 596 may be graded S/U or letter grade; 597 and 598 are graded S/U only.

Comprehensive Examination Plan

In general, the department prefers students to enter directly into the Ph.D. program, but if a student enters the master's program, the comprehensive examination plan is preferred. Only in exceptional situations is a student approved for the thesis plan. In either plan the student must pass a departmental written examination. Only course requirements and the written examination are needed to complete the comprehensive examination plan.

Thesis Plan

In addition to coursework, a written thesis is required. A thesis committee helps the student plan the thesis research, determines the acceptability of the thesis, administers a final examination (if deemed appropriate), and recommends appropriate action on the granting of the degree. In the event of an unacceptable thesis or performance on the final examination (if one is given), the thesis committee determines if it is appropriate for additional time to be granted to rewrite the thesis or to be reexamined.

Doctoral Degree

Admission

Students are admitted to the program through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences. In addition, under special circumstances, the department may admit students directly to the program in the first year. Application materials may be obtained from the ACCESS Program Office, 172 MBI, UCLA, Los Angeles, CA 90095-1570, (310) 206-6051.

M.D./Ph.D. Program

Applicants may apply for the M.D./Ph.D. program by making simultaneous applications for graduate status in the Biological Chemistry Department and for admission to the School of Medicine. Acceptance by both of the concerned units is necessary. Certain changes in the requirements (e.g., fewer required courses) allow some savings in time compared to separate M.D. and Ph.D. degrees.

Major Fields or Subdisciplines

Consult the department.

Course Requirements

Students are required to take four didactic courses (Biological Chemistry CM248, CM253, Neurobiology M209A, and Biological Chemistry CM267 or Microbiology and Immunology M229) and one additional four- to six-unit graduate-level course selected according to the student's preference. Three of these courses are taken in the first year as part of the ACCESS program, which also requires two two-unit seminar courses and Biology 201.

First-year students must arrange for at least three rotations in the laboratories of different faculty members to help in the selection of a research adviser through UCLA ACCESS.

After the first year, students spend most of their time on dissertation research. In addition to the general course requirements listed above, Ph.D. students are expected to complete courses 596, 597, and/or 599 during quarters in which research (596, 599) or study for written or oral examinations (597) is part of the program. Course 599 is for students who have passed their oral examinations; course 596 is for those who have not.

Written and Oral Qualifying Examinations

A satisfactory performance in rotations and the first-year courses as judged by the graduate student guidance committee and department faculty is required before students can select their doctoral committee.

The University Oral Qualifying Examination, which must be passed before students can be advanced to candidacy, is administered by a doctoral committee of four faculty members. The purpose is to evaluate students' ability to formulate and defend two short research proposals. One proposal is an original research

proposal that is not directly related to the dissertation research. This also fulfills the requirements for the written examination. The other proposal should discuss the proposed dissertation research. The doctoral committee determines whether students pass the examination and whether reexamination is allowed in case of failure. The examination may be repeated only once. It is expected that the oral qualifying examination will be completed before the beginning of the third year of graduate work.

Upper Division Courses

M140. Cell Biology: Cell Cycle (5 units). (Same as Biology M140.) Lecture, three hours; discussion, one hour. Prerequisites: Biology 100A or Life Sciences 3, Chemistry 11 series (may be taken concurrently), Life Sciences 4 or equivalent. Not open for credit to students with credit for Biology 100B or C139 or former Biology 143. Satisfies premedical requirements. Eukaryotic cellular structures and biogenesis at a molecular level. Biochemical and genetic analysis of cell cycle, signal transduction, and their involvement in development and cancer. Protein sorting and transport across cell membranes. Cytoskeletal components and cell-adhesion.

CM153G. Macromolecular Structure (6 units). (Same as Chemistry CM153G.) Lecture, five hours. Prerequisites: Chemistry 110A, 153A, 153B, 153C, 156, or equivalent. Chemical and physical properties of proteins and nucleic acids. Structure, cloning, and analysis of DNA; biosynthesis and processing of RNA; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. Concurrently scheduled with course CM253.

CM159A. Mechanisms in Regulation of Transcription I (2 units). (Same as Chemistry CM159A.) First five weeks. Lecture, four hours; outside study, two hours. Prerequisites: Chemistry 153B and 154, or consent of instructor. Not open to graduate students. Mechanisms that control transcription in bacteria. Repression and activation at promoters. Sigma factors and polymerase binding proteins. Signal transduction pathways in transcription. Control of termination. Concurrently scheduled with course CM259A. P/NP or letter grading.

CM159B. Mechanisms in Regulation of Transcription II (2 units). (Same as Chemistry CM159B.) Second five weeks. Lecture, four hours; outside study, two hours. Prerequisite: course CM159A. Not open to graduate students. Eukaryotic general transcriptional apparatus; sequence-specific promoter recognition; mechanisms of transcriptional activation and repression, including role of chromatin structure; transcription factors as targets of signal transduction pathways; transcription factors in embryogenesis. Concurrently scheduled with course CM259B. P/NP or letter grading.

CM169. Macromolecular Metabolism and Subcellular Organization (6 units). (Same as Biology CM169.) Lecture, five hours. Prerequisites: Chemistry 153A, 153B, 153C, consent of instructor. Recommended: course CM153G. Cell cycle; DNA replication and repair; structure and properties of cellular organelles; regulation of cell division; cell transformation; normal and aberrant expression of oncogenes; molecular aspects of development. Concurrently scheduled with course CM267.

CM178. Molecular Genetics (6 units). (Same as Biology CM178.) Lecture, five hours. Prerequisites: Biology 100B or C139 or M140, Chemistry 153A, 153B, Life Sciences 3, 4, consent of instructor. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics. Concurrently scheduled with course CM248.

195. Current Research in Biological Chemistry (2 units). Prerequisites: upper division standing, consent of instructor (based on personal interview). Readings, discussion of current research results, and presentation of recent literature on topics under investigation within a research group in biological chemistry. P/NP or letter grading.

199. Directed Individual Research Studies in Biological Chemistry (2 to 8 units). Laboratory, four to 20 hours. Prerequisites: upper division standing, consent of instructor (based on written research proposal and consultation with instructor). Individual research projects carried out under direction of a faculty member. P/NP or letter grading.

Graduate Courses

201A-201B. Biological Chemistry (5 units each). Prerequisites: organic chemistry; consent of instructor required for nonmedical students. Primarily for first-year medical students and runs throughout School of Medicine's second semester. General biochemistry with emphasis on mammalian systems. Structure, function, and metabolism of major cellular components. To receive credit, both courses must be taken together in same academic year. In Progress and S/U grading.

204. Biological Chemistry Laboratory (3 units). Discussion, one hour; laboratory, six hours. Prerequisite: consent of instructor required for nonmedical students. Experiments illustrating techniques and procedures in medically related biochemistry; analysis of experimental results. S/U or letter grading.

205. Biological Chemistry and Nutrition Lecture (Dental Students) (6 units). Lecture, six hours; computer laboratory. Prerequisite: dental student standing. Biochemical and genetic factors influencing normal and disease states: structure and metabolism of cellular constituents, intermediary metabolism and its regulation, endocrine and neurobiochemical mechanisms, connective tissue/mineralization. Includes computer laboratory and self-instruction on dietary assessment in dentistry.

220A-220B-220C. Research Laboratory Rotations (2 to 8 units each). Prerequisite: consent of instructor. Students arrange apprenticeships in laboratories of one or more departmental faculty members and engage in a research project under close faculty direction. Allows students to acquire in-depth laboratory experience in specific research areas and facilitates an informed decision on their part in selection of thesis/research adviser. S/U grading.

M221. Cellular and Molecular Neurochemistry. (Formerly numbered M221A.) (Same as Neurobiology M221, Neuroscience M240, Pharmacology M221, and Psychiatry M221.) Lecture, three hours; discussion, one hour. Prerequisite: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling. S/U or letter grading.

M223. Membrane Molecular Biology. (Same as Physiology M223.) Lecture, two hours; discussion, two hours. Prerequisite: course CM253 or consent of instructor. Advanced course in molecular aspects of membrane physiology and biochemistry covering lipids and physical chemistry of biological membranes; membrane biogenesis and targeting of proteins to membranes; pumps, carriers, and channels; receptors and transmembrane signaling. S/U or letter grading.

M233. Principles, Practices, and Policies in Biotechnology (2 units). (Same as Biology M233, Chemical Engineering M233, Chemistry M233, Microbiology M233, Microbiology and Immunology M233, and Radiological Sciences M233.) Prerequisite: graduate standing or consent of instructor. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. S/U or letter grading.

M237. Molecular and Cellular Foundations of Disease. (Same as Pathology M237.) Lecture, two hours; discussion, two hours. Prerequisites: one course each in molecular biology, cell biology, and biological chemistry. Discussion of key issues in disease mechanisms, with emphasis on experiments leading to understanding of these mechanisms. Identification of important questions still remaining unanswered. S/U or letter grading.

CM248. Molecular Genetics (6 units). (Formerly numbered M248.) (Same as Biology CM248 and Microbiology M248.) Lecture, five hours. Prerequisite: course CM153G or Chemistry CM153G or equivalent. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics. Concurrently scheduled with course CM178.

251A-251B-251C. Seminars: Transcriptional Regulation (2 units each). Prerequisite: consent of instructor. Advanced courses on mechanics of gene transcription in both eukaryotes and prokaryotes intended for students actively working or highly interested in transcription. S/U or letter grading.

CM253. Macromolecular Structure (6 units). (Formerly numbered M253.) (Same as Chemistry CM253.) Lecture, five hours. Prerequisites: Chemistry 110A, 153A, 153B, 153C, 156, or equivalent. Chemical and physical properties of proteins and nucleic acids. Structure, cloning, and analysis of DNA; biosynthesis and processing of RNA; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. Concurrently scheduled with course CM153G.

M255. Biological Catalysis. (Same as Biology CM252, Chemistry CM255, and Pharmacology M255.) Prerequisites: Biology 100A or Life Sciences 3, 100B or C139 or M140, Chemistry 110A, 153A, 153B, or equivalent, consent of instructor. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level.

M257. Physical Chemistry of Biological Macromolecules (2 units). (Same as Chemistry M257.) Prerequisites: Chemistry 110A and 153A, or consent of instructor. Theory of hydrodynamic, thermodynamic, and optical techniques used to study structure and function of biological macromolecules.

CM259A. Mechanisms in Regulation of Transcription I (2 units). (Same as Chemistry CM259A.) First five weeks. Lecture, four hours; outside study, two hours. Prerequisite: course CM253 or CM267 or consent of instructor. Mechanisms that control transcription in bacteria. Repression and activation at promoters. Sigma factors and polymerase binding proteins. Signal transduction pathways in transcription. Control of termination. Concurrently scheduled with course CM159A. In Progress grading (credit to be given only on completion of course CM259B).

CM259B. Mechanisms in Regulation of Transcription II (2 units). (Same as Chemistry CM259B.) Second five weeks. Lecture, four hours; outside study, two hours. Prerequisite: course CM259A. Eukaryotic general transcriptional apparatus; sequence-specific promoter recognition; mechanisms of transcriptional activation and repression, including role of chromatin structure; transcription factors as targets of signal transduction pathways; transcription factors in embryogenesis. Concurrently scheduled with course CM159B.

M263. Metabolism and Its Regulation. (Same as Chemistry M263.) Lecture, three hours. Prerequisites: courses 201A-201B, or Chemistry 153B, 153C, or 156, and 110A, or equivalent, or consent of instructor. Thermodynamic and kinetic aspects of metabolism; regulatory properties of enzymes; metabolic regulation; consideration of comparative aspects of metabolism in relation to physiological function.

M264A-M264B-M264C. Molecular Basis of Atherosclerosis: Selected Topics (2 units each). (Same as Chemistry M264A-M264B-M264C.) Prerequisite: consent of instructor. Biochemistry, morphology, and physiology of atherosclerosis. Emphasis on chemistry of lipoproteins and role of plasma lipoproteins in regulation of tissue lipid metabolism and development of atherosclerosis. Each course may be taken independently for credit.

M266A-M266B-M266C. Seminars: Molecular Embryology (2 units each). (Same as Biology M266A-M266B-M266C.) Prerequisite: consent of instructor. Advanced course in developmental genetics and biochemistry, with emphasis on early development. Intended mostly for students actively working or highly interested in embryology. S/U grading.

CM267. Macromolecular Metabolism and Subcellular Organization (6 units). (Formerly numbered M267.) (Same as Biology CM223 and Chemistry M267.) Lecture, five hours. Prerequisites: Chemistry 153A, 153B, 153C, consent of instructor. Recommended: course CM153G. Cell cycle; DNA replication and repair; structure and properties of cellular organelles; regulation of cell division; cell transformation; normal and aberrant expression of oncogenes; molecular aspects of development. Concurrently scheduled with course CM169.

M298. Seminar: Current Topics in Molecular Biology (2 units). (Same as Biology M298, Chemistry M298, Microbiology M298, Microbiology and Immunology M298, and Molecular Biology M298.) Prerequisite: consent of instructor and graduate adviser of interdepartmental Molecular Biology Ph.D. Program. Each student conducts or participates in discussions on assigned topics. May be repeated for credit.

596. Directed Individual Study and Research (2 to 12 units). Hours to be arranged. Prerequisite: consent of instructor. S/U grading.

597. Preparation for Examinations (2 to 4 units). Prerequisite: consent of graduate adviser. Individual study for Ph.D. qualifying examinations or M.S. comprehensive examination. S/U grading.

598. Preparation of M.S. Thesis. Prerequisite: consent of graduate adviser. Preparation of research data and writing of M.S. thesis. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (2 to 12 units). Prerequisite: consent of graduate adviser. Preparation of research data and writing of Ph.D. dissertation. S/U grading.

Carolee Caffrey, Ph.D.
Jaap Hillenius, Ph.D.
Steve Strand, Ph.D., *Senior*

Scope and Objectives

Studies in biology touch every aspect of life, and seeking answers to the problems of living organisms is a major challenge to modern biology. To meet this challenge, the Biology Department offers a wide spectrum of undergraduate and graduate instruction in population, organismic, developmental, cell, and molecular biology. All of these subject areas relate in some way to practical problems facing contemporary society, and all influence individual and collective decisions on matters ranging from environmental degradation to viruses and cancer.

The Bachelor of Science degrees combine essential background studies in mathematics, chemistry, and physics with a general introduction to all of the biological subjects, as well as advanced in-depth exposure to some of them. The Master of Arts and Ph.D. degrees provide opportunities for advanced, concentrated study. The Master of Arts degree requires, in addition to specified coursework, completion of either a comprehensive examination or the performance of original research culminating in a thesis. The Ph.D. degree requires independent and innovative research that ultimately results in a dissertation.

Bachelor of Science in Biology

The Bachelor of Science degree is divided into four areas of concentration which build on similar lower division introductory courses and differ primarily in the upper division requirements. The first area of concentration — general biology (GB) — is designed for students who desire exposure to a wide range of biological subjects and for most students who will later seek admission to health sciences-related professional schools. The remaining three areas of concentration — ecology, behavior, and evolution (EBE), marine biology (MB), and plant biology (PB) — provide more specialized instruction and strong preparation for employment or subsequent graduate study in the respective disciplines.

Preparation for the Majors

Life Sciences Core Curriculum (effective Fall Quarter 1995) — *Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 11A, 11B/11BL, 11CL, 132A, 132B/132BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

All core curriculum courses must be passed with a grade of C — or better and must be completed with an overall grade-point average of 2.0 or better. If you receive a grade of D or F₂ in two core curriculum courses, either in separate courses or repetitions of the same course, you are subject to dismissal from the major.

Transfer Students — In order to be admitted as biology majors, transfer students who have 80 or more units must have completed Life Sciences 1, 2, 3, or equivalent, one year of general chemistry with laboratory, and at least two of the following: (1) one year of calculus, (2) one year of calculus-based physics, or (3) two organic chemistry courses with laboratory.

General Biology (GB) Concentration

This concentration is designed for students with a broad interest in biology who desire to pursue careers in a wide range of biological and related fields. It provides excellent background preparation for postgraduate training in medicine and other health sciences, in tracks leading to academic and public service careers in biology, in biological industries, and even in nonbiological careers such as business, agriculture, and law. The concentration emphasis is breadth of training to expose students to all levels of modern biology.

Preparation for the Major: Life sciences core curriculum.

The Major: Three laboratory courses (Biology 5L, 101A, 103, 105, 110, 153/153L, 158, 162, 166, 167, M170; course 5L strongly recommended); two morphology and systematics/ecology, behavior, and evolution courses (Biology 103, 105, 110, 116, 120, 122, 129, 130, 135, 153/153L, Microbiology and Molecular Genetics 101); two developmental and molecular biology/physiology courses (Biology 121, 128, C134A or 134B, 138, C141, 146, 158, 162, 166, 167, 171, 179); two additional upper division biology courses; Chemistry and Biochemistry 153A, 153L; four additional upper division courses in biology, chemistry, mathematics (except Mathematics 104, 106), microbiology, physics, physiological science, or from Biomathematics 110, Biostatistics 100B, 100C, Earth and Space Sciences 116, Geography 112.

Ecology, Behavior, and Evolution (EBE) Concentration

This concentration is appropriate for students preparing for graduate study in ecology, behavior, and evolution. A strong field component involving study in terrestrial and marine locales such as coastal, desert, and mountain environments in California and the Southwest and in the Neotropics is required. This provides suitable background for such fields as environmental biology, animal behavior, conservation, forestry, teaching, museum work, and governmental positions dealing with environmental issues of wide importance and impact.

Preparation for the Major: Life sciences core curriculum; Mathematics 31A, 31B, and 32A must be taken to satisfy the calculus requirement.

The Major: One morphology and systematics course (Biology 103, 105, 110, or 130); one physiology course (Biology 146, 162, 166, or 167); one additional laboratory course (Biology 5L, 103, 105, 110, 146, 162, 166, or 167); three ecology, behavior, and evolution courses (Biology C119, 120, 122, 129, 135); one field quarter consisting of two to four courses from the Field Biology Quarter (FBQ), Marine Biology Quarter (MBQ), or equivalent; Chemistry and Biochemistry 153A, 153L; two or more upper division courses in biology, chemistry, geography, geology, mathematics (except Mathematics 104, 106), microbiology, or physics (recommended: taxon-oriented courses such as Biology 107, 111, 112, 113A, 114, 115, 152; other courses in ecological, behavioral, and evolutionary processes such as Biology 116, 117, 122, M127, 128, C134A, 168, in addition to courses listed above).

Marine Biology (MB) Concentration

This concentration is designed for students who wish to specialize in the area of marine sciences. Completion of this concentration provides students with both an excellent background in biology and specialization in various disciplines such as oceanography, subtidal and intertidal ecology, and physiology of marine organisms. Graduates are well prepared for postgraduate opportunities in the marine sciences, many other areas of biology, and medicine. The concentration provides valuable field experience with concomitant individual research opportunities in marine biology.

Preparation for the Major: Life sciences core curriculum; Statistics 50 or equivalent; Earth and Space Sciences 15 or Atmospheric Sciences 6 or 6A.

The Major: Biology C109, Chemistry and Biochemistry 153A; one laboratory course (Biology 5L, 110, 153/153L, 158, or M170); one marine organismic biology course (Biology 101A, 105, or 112); one physiology course (Biology 128, 162, 166, or 167); one ecology, behavior, or evolution course (Biology 116, C119, 120, 122, 129, or 135); one field quarter consisting of four courses from the Marine Biology Quarter (MBQ) or equivalent field courses given elsewhere (for a 16-unit equivalent — see undergraduate adviser); two physical, chemical, or geological oceanography courses from Anthropology M116Q, Atmospheric Sciences CM140, 143, Chemistry and Biochemistry 103, Earth and Space Sciences 100, 116, 119, 153, Geography 100, 101, 103, 113, 114, 123, 130, Mechanical, Aerospace, and Nuclear Engineering 103 (strongly recommended), 150A.

Plant Biology (PB) Concentration

This concentration prepares students for postgraduate programs in plant biology, including environmental biology, ecology, agricultural sciences, and plant molecular, developmental, and cellular biology. Students select key courses to obtain a sound, broad foundation in plant biology, learning state-of-the-art research techniques. They are also given opportunity to participate in individual supervised research projects using plants as experimental organisms.

Preparation for the Major: Life sciences core curriculum.

The Major: Biology 146 or 162, Chemistry and Biochemistry 153A; one laboratory course (Biology 5L, 101A, 103, 105, 110, 153/153L, 158, 162, 166, 167, or M170); one plant morphology or anatomy course (Biology 101A, 103, or 152); two molecular or cellular plant biology courses (Biology 121, C141, 150); one ecology or evolution course (Biology 120, 122, or 128); one field quarter course involving research in plant biology (Biology 118, 124, 128, or 148) or a laboratory internship (Biology 190 series or 199) which requires a written paper on some aspect of plant research; two additional upper division courses in biology, chemistry, computer science, geography, or microbiology.

Additional Requirements

(1) A maximum of eight units of Biology 190 or four units of Biology 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied.

(2) Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Biology majors must earn a C – or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major.

Honors Program

An overall grade-point average of 3.4 and a 3.4 in the major are required for graduation with honors. Highest honors are awarded to majors who have a GPA of 3.6 overall and a 3.6 in the major at graduation and who have successfully completed Biology 190A-190B.

Field Biology

The department offers two quarter-long programs of advanced courses in field biology: the Field Biology Quarter (FBQ) and the Marine Biology Quarter (MBQ). These programs focus on the biology of organisms living in their natural environments, emphasize independent student research projects, and take place at field sites away from the UCLA campus. The course composition varies somewhat from year to year, but each program always carries 16 units of course credit. The Field Biology Quarter occurs during Spring Quarter and involves some combination of Biology 103, 107, 113B, 114, 115, 118, 124, C125, C126,

131, 132, and 134B. The Marine Biology Quarter occurs during Fall Quarter and includes some combination of Biology 102, C104, 123, 147, 148, 163, 164, and 165. To participate, you must enroll in all courses in the respective program. It is strongly recommended that you complete Biology C109 or C215 prior to applying for MBQ. Participants in both programs are selected by personal interview during Winter Quarter. Although most participants are upper division biology majors, both programs are available to any upper division student with adequate biological background. Information and applications are available in the Undergraduate Advising Office.

Bachelor of Science in Cell and Molecular Biology

The Bachelor of Science degree in Cell and Molecular Biology (CMB) is designed especially for students who intend to go on to postgraduate work in biology or medicine and for students aiming for entry-level positions in biotechnology-related fields. Students are exposed to basic biological and molecular concepts underlying recent technical advances in molecular, cell, and developmental biology in both animals and plants. Areas of emphasis include cell biology, immunology, molecular biology, plant biology, developmental biology, and neurobiology, among others.

Preparation for the Major

Life Sciences Core Curriculum (effective Fall Quarter 1995) — *Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 11A, 11B/11BL, 11CL, 132A, 132B/132BL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

Effective Fall Quarter 1995 for all entering freshmen and transfer students, all core curriculum courses must be passed with a grade of C – or better and must be completed with an overall grade-point average of 2.0 or better. If you receive a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, you are subject to dismissal from the major.

Transfer Students — In order to be admitted as cell and molecular biology majors, transfer students who have 80 or more units must have completed one year of general biology for majors equivalent to Life Sciences 1, 2, and 3, one year of general chemistry with laboratory, one year of calculus, and either one year of calculus-based physics or one year of organic chemistry.

The Major

Required: Biology 100B or C139 or M140, 138 or C141, and four units from C174A through C174F; Chemistry and Biochemistry 110A, 153A, 153L, 156; a minimum of three elective core courses from Biology CM156, 157, CM160, CM169, M170, 171, any four units of C174A through C174F not used to satisfy the

requirement above, M175A, CM178, M185A, CM185B; 12 additional units selected from the following: any biology course listed above not used to satisfy the core requirement, Biology 110, 121, 142, 146, 150, 162, 166, M175B, M175C, 176, 188, Chemistry and Biochemistry 153C, Microbiology and Molecular Genetics 101, 102, C104A, C104B, C104C, C159; eight units of upper division laboratory experience selected from Biology 155, 158, 162, 166, 190A through 190D, 199.

Additional Requirements

(1) A maximum of eight units of Biology 190 or 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied. All 190 research must be performed in CMB faculty laboratories.

(2) Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. CMB majors must earn a C- or better in each course, and at least a 2.0 (C) overall average in all courses applied toward the major.

Graduate Study

The following constitutes introductory information regarding graduate degree programs. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degree

Admission

The department offers Master of Arts and Doctor of Philosophy degrees in Biology, with specialization in a wide spectrum of fields. Applicants who plan to enter graduate school are urged to seek the advice of staff members in their field of interest.

The department encourages applications from students in all areas of science, but expects successful applicants to have or to acquire a background comparable to the requirements for the bachelor's degree in biology at UCLA. A background in chemistry, physics, and mathematics is desirable. Deficiencies in these or other subjects should be made up at the earliest opportunity. Undergraduates who are prospective applicants should remedy their deficiencies by preparatory study at an appropriate institution. The Graduate Division or the department may initially restrict applicants with less distinguished accomplishments.

All applicants must take the General Test (verbal, quantitative, and analytical) of the Graduate Record Examination (GRE). The Subject Test in Biology or Biochemistry, Cell, and Molecular Biology is required.

Three letters of recommendation are required. These should be from professors, supervisors, or others who may provide an evaluation of accomplishments or potential in research, teaching, and related scholarly activities.

Applications, departmental brochures, and additional information may be obtained from the Graduate Affairs Office, Department of Biology, at the address given at the beginning of this listing.

The department is organized into two divisions. Applications should be directed to either Molecular, Cell, and Developmental Biology (Division I) or Biology (Division II). The major fields and subdisciplines are listed under faculty interests in the departmental brochure. *

Students are admitted in the Fall Quarter only. Applications to Biology (Division II) are reviewed by the division's admissions committee which advises prospective sponsors about the desirability of admission. Division I does not accept students whose sole objective is a master's degree.

Areas of Study

Study consists of coursework and research within the department and within related programs in biochemistry, geology, microbiology, and molecular biology on campus. For Division II students, opportunities are also available off campus for intensive study of marine biology at marine laboratories in the region in the Fall Quarter and of field biology in the Spring Quarter.

Course Requirements

The program consists of at least nine courses completed in graduate standing, of which at least five must be graduate (200 series) courses. The remainder may be courses in the 100, 200, or 500 series. No more than two 596 courses (eight units) may be applied toward the nine courses required for the degree; only one 596 course (four units) may be applied toward the minimum five graduate courses required. Courses graded S/U may not be applied toward the minimum requirement, except that an S/U-graded course outside the major and applicable to the degree may be applied, provided that no more than one such course is taken per quarter.

Specific course requirements are established individually for students by their guidance committee.

Comprehensive Examination Plan

Students who select this plan must take a three-hour examination prepared and graded by their committee or committee chair and approved by the graduate adviser. The examination is graded pass or fail. For students who fail, recommendation for or against a second examination must be made by the graduate adviser.

Thesis Plan

A thesis reporting the results of an original investigation, written to conform to the requirements of the Graduate Division, is presented to and approved by the master's thesis committee of three faculty. Before beginning work on the thesis, approval of the subject and general plan must be obtained from the faculty mem-

bers concerned and from the thesis committee.

Doctoral Degree

Admission

See Admission under Master's Degree above.

Each division separately determines admission of applicants to its own Ph.D. program. Applicants are admitted in the Fall Quarter only. Division I admits applicants only through the review process of UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, with the exception of applicants in the area of plant molecular biology, who may apply either through ACCESS or directly to the department. Applications to Division II are reviewed by the division's admissions committee which advises prospective sponsors about the desirability of admission.

Major Fields or Subdisciplines

See Areas of Study under Master's Degree above.

Course Requirements

Division I students are required to take a minimum of four graduate-level courses (200 series), preferably in the first year (see Graduate Affairs Office for course listing), and are strongly encouraged to rotate laboratory and/or course experience with several faculty members during the first year of study as an aid to choosing a permanent adviser. Division II Ph.D. students must complete a minimum of 20 units of graduate-level courses (200 series). In either division, students must enroll for full-time study, as defined by the Graduate Division.

Written and Oral Qualifying Examinations

Departmental Written Qualifying Examination (Division I). The departmental written qualifying examination is taken during the first two years in residence and is prerequisite to the doctoral oral qualifying examination. Students are required to complete and submit four written research proposals, prepared in conjunction with seminar courses in the M298 series.

Departmental Written Qualifying Examination (Division II). In order to assess students' knowledge as incoming students and as an aid in advising students in their studies, they are required to complete the departmental written qualifying examination at an early point in their graduate career.

The examination is taken in the latter half of the Spring Quarter of the first year. The examination consists of two parts, I and II. Part I is designed to test the ability to critically read and evaluate the literature in a designated area of specialty. Part II examines the breadth of academic knowledge and understanding (conceptual and synthetic) of the areas that define the subjects within integrative biology). The expected level of performance is that of a graduate student at the end of the first year.

Part I: Two weeks prior to the examination, students are provided with three papers in a specialty area which they designate from the following: (1) morphology and morphogenesis; (2) ecology and behavior; (3) evolution; (4) cell biology and physiology; (5) molecular biology and genetics. The three papers are selected by the guidance committee. On the day of the examination, students are provided with one of three papers, chosen by the departmental written qualifying examination committee, and are given three hours to provide a thorough critical analysis of the paper and demonstrate how the work compares and relates to similar work in the field.

Part II: During the Fall Quarter of the first year, students are provided with several questions assembled by the departmental written qualifying examination committee that define the breadth of knowledge expected of a first-year graduate student in the division. In the Spring Quarter of the first year, one week after the administration of Part I, students are provided with three questions taken from this list. All students receive the same questions and have four and one-half hours to provide written answers.

Both parts of the examination are graded Ph.D. pass, master's pass, or fail. Students who do not pass each part at the level required for their degree objective have two further opportunities to repeat the examination part to secure the required grade. These opportunities occur during the Spring Quarter of their second and third years. Students who do not pass both parts in three attempts are normally recommended to the Graduate Division for dismissal.

Oral Qualifying Examination. The University Oral Qualifying Examination is conducted by the doctoral committee as prescribed by the Graduate Division. It includes students' preparation, presentation, and defense of an original written research proposal. The examination is graded pass, fail, or repeat. A failure requires dismissal. The repeat is graded pass/fail. The examination must be completed by the end of the third year following first registration. Following successful completion of this examination, students are advanced to candidacy.

Lower Division Courses

If you have not completed the prerequisites indicated in the following course descriptions, you may be dropped from any of the courses at the discretion of the instructor.

2. Principles of Modern Biology. Lecture, three hours; laboratory, two hours. Designed for nonmajors. Not open to students with credit for former course 5 or 9 or Life Sciences 1 or 3. Major themes in biology, including evolution, behavior, ecology, cell biology, photosynthesis, genetics, organismal diversity, and energetics as they relate to events occurring on our Earth today. P/NP or letter grading.

5L. Organismic and Environmental Biology Laboratory. Discussion, two hours; laboratory, four hours. Enforced requisite: Life Sciences 1. Not open for credit to students with credit for course 101A, 101B, 105, 110, 153L, 158, 162, 166, 167, or 168. Introductory biology laboratory, including selected topics on genetics and molecular biology, anatomy, physiology, behavior, and ecology of plants and animals.

6. Ecology, Evolution, and Behavior. Lecture, three hours; discussion, two hours. Enforced requisite: Mathematics 3A or 31A. Not open to students with credit for Life Sciences 1. Survey of principles of population and community ecology, behavioral ecology, population genetics, and evolution.

10. Plants and Civilization. Lecture, three hours; demonstration, one hour. Designed for nonmajors. Origin of crop plants; man's role in development, distribution, and modification of food, fiber, medicinal, and other plants in relation to their natural history.

11. Biomedical Research Issues in Minority Communities. Limited to 30 students. Discussions and student presentations on biomedical research as it affects minority communities, with emphasis on methodology, design, consequences, and ethics of current research. Discussion leaders provide information on preparation and training for research careers. P/NP or letter grading.

12. Biodiversity and Extinction: Crisis and Conservation. Lecture, three hours; discussion, one hour. Examination of ecological and evolutionary principles necessary to understand nature and importance of worldwide environmental crisis. Research by students of specific conservation issues and presentation of results to class. P/NP or letter grading.

13. Evolution of Life. Lecture, three hours; discussion, one hour. Not open to life sciences majors. Limited to 100 students. Introduction to biology within the framework of evolutionary theory. Relationships of evolutionary thought to other areas of knowledge and society. Natural selection and origin of variation examined in context of genetics, molecular biology, physiology, phylogeny, population dynamics, behavior, and ecology. Emphasis on critical role of historical processes.

21. Field Biology. Lecture, three hours; discussion, two hours, or field trips, three to four hours. Recommended (but not requisite): course 2. Not open for credit to students with credit for course 6 or 122 or Life Sciences 1. Introduction to natural history of Western North America, especially Southern California. Classification, distribution, and ecology of common plants and animals.

25. Oceans. Lecture, three hours; discussion, two hours. Not open for credit to students with credit for Earth and Space Sciences 15. Physical and chemical processes that take place in oceans, with emphasis on their effects on organisms.

30. Biology of Cancer. Introduction to molecular, cellular, and clinical aspects of cancer and consideration of sociological and psychological impacts of cancer on the individual and society. P/NP or letter grading.

40. AIDS and Other Sexually Transmitted Diseases. Introduction to interdisciplinary debate surrounding the personal and societal response to AIDS and other sexually transmitted diseases. P/NP or letter grading.

50. Desert Life. Lecture, three hours; laboratory, two hours. Introduction to fundamental structural, physiological, and behavioral features of desert organisms, with special emphasis on deserts of Western North America. P/NP or letter grading.

70. Genetic Engineering and Society. Lecture, three hours; discussion, two hours. Designed for nonmajors. Not open to students with credit for former course 9 or 108 or Life Sciences 3 or 4. Basic principles of genetic engineering. Overview of genetic engineering techniques and relationship of genetic engineering to medicine, agriculture, and society. Emphasis on specific genetic engineering applications to generate discussion on its use in society.

80. The Green World: Plant Biology for Now and the Future. Lecture, three hours; laboratory, two hours. Designed for nonmajors. Basic principles of plant biology and introduction to techniques for manipulating plants for improved agriculture, sources of renewable "clean" energy, reclamation of deforested and nutritionally depleted soils, and "biological factories" to produce biodegradable plastics, antibodies, and other commodities. Underexploited agriculture crops also featured. P/NP or letter grading.

88A. Lower Division Seminar: Conservation of Biodiversity. Discussion, three hours; one weekend field trip. Introduction to patterns of biological diversity; selection, management, and use of natural reserves; human aspects on diversity; and effects of governmental and nongovernmental actions on biological conservation. P/NP or letter grading.

88B. Lower Division Seminar: Origin of Life. Seminar, three hours. Training in science not required. Biological evolution as a central element in Earth history; theories of the origin of life based on observations, experimental simulations, and speculations. Students are guided in making class presentations and in writing papers. P/NP or letter grading.

88C. Lower Division Seminar: Frontiers of Molecular Biology — Historical Perspective. Seminar, three hours. Limited to freshmen who have not completed former course 9 or Life Sciences 3; designed for nonmajors. Study of biology at molecular level has unlocked secrets of the gene, started the biotechnology revolution, and promises a new scientific age that will use gene therapy to cure human disease, produce superplants that grow in the desert, and uncover the mysteries of the mind. Exploration of origins and history of molecular biology by analyzing papers written by Mendel, Watson, Crick, and others who played a major role in changing society with their discoveries of new biological principles. P/NP or letter grading.

88D. Lower Division Seminar: Genetics and Society. Discussion, three hours. Some ways genetics affects us now and what changes are possible for our children. Examination of biological basis of inheritance in order to understand scientific methods and science teaching.

88E. Lower Division Seminar: Genetics and Society — Current Status and Future Applications. Seminar, three hours; outside study, nine hours. Recent advances in genetics have opened up new possibilities in fields of forensics, medicine, agriculture, and industry, with corresponding legal, social, and economic ramifications. Examination of scientific/genetic basis underlying genetic engineering, genetic screening, gene therapy, eugenics, DNA fingerprinting, cloning, etc., and discussion of current and future applications. P/NP or letter grading.

88F. Lower Division Seminar: Science and Scientists — Expectations and Realities (2 units). Examination of change from when science was done by individuals as an avocation without societal goals to contemporary science which is done by professionals and is driven by societal needs and pressures. P/NP or letter grading.

88G. Lower Division Seminar: Foundations of Molecular Biology (2 units). Seminar, 75 minutes. Enforced requisite: Life Sciences 3. Not open to students with credit for course 100A, Chemistry 153B, or Life Sciences 4. Coverage of some major scientific discoveries leading to development of modern molecular biology. Discussion of research discoveries in context of contemporary views and their impact on the field. P/NP or letter grading.

M88H. Lower Division Seminar: Limits of Biological Design through Physical Principles. (Same as Physics M88.) Lecture, three hours. Enforced requisites: Chemistry 11A, 11B, Life Sciences 1, 3, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A, Physics 6A, 6B, and 6C, or 8A, 8B, 8C, and 8D. Specific examples of diverse biological design such as scaling of metabolic activity, bone and muscle mass, cell size, cell membranes and pumps, heart and blood circulation, swim bladders, insect vision, magnetic bacteria, etc., studied quantitatively using elementary mathematics and physical principles.

Upper Division Courses

If you have not completed the prerequisites indicated in the following course descriptions, you may be dropped from any of the courses at the discretion of the instructor.

100A. Introduction to Developmental Molecular Biology. Lecture, three hours; discussion, one hour. Prerequisites: Chemistry 11 series (may be taken concurrently). Not open for credit to students with credit for former course 144. Introduction to principles of prokaryote and eukaryote molecular biology and their application to information storage and retrieval. Chromosome structure and function, gene transcription, RNA processing, basic principles of developmental biology, DNA synthesis and repair, gene regulation.

100B. Introduction to Cell Biology. Lecture, three hours; discussion, one hour. Prerequisites: course 100A or Life Sciences 3, Life Sciences 4 or equivalent, Chemistry 11 series (may be taken concurrently). Not open for credit to students with credit for course C139 or M140 or former course 143. Analysis of cell organization, structure, and function at molecular level. Cell membranes and organelles, membrane transport, cellular signaling, cytoskeleton and cell movement, intracellular trafficking, cell energetics.

101A. Biology of Lower Plants (6 units). Lecture, four hours; laboratory, six hours. Prerequisite: Life Sciences 1 or equivalent or consent of instructor. Introduction to biology of algae, fungi, and bryophytes, with emphasis on form, function, and development, and role of lower plants in the environment. Students are strongly encouraged to take both courses 101A and 101B since these represent a course sequence surveying the entire plant world as appropriate background for upper division courses in plant biology.

101B. Biology of Vascular Plants (6 units). Lecture, three hours; laboratory, six hours. Prerequisite: Life Sciences 1 or equivalent or consent of instructor. Introduction to the diversity in form and reproduction of vascular plants, with emphasis on development, evolution, and function. Students are strongly encouraged to take both courses 101A and 101B since these represent a course sequence surveying the entire plant world as appropriate background for upper division courses in plant biology.

102. Biology of Marine Invertebrates. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisite: Life Sciences 1 or equivalent or consent of instructor. Morphology, systematics, life histories and natural history, ecology, behavior, and physiology of marine invertebrates; emphasis on local invertebrates of Southern California and their habitats. Given off campus at a marine science center.

103. Plant Evolution and Systematics. Lecture, three hours; laboratory, three hours. Prerequisite: course 2 or Life Sciences 1 or equivalent or consent of instructor. Evolution, systematics, morphology, principles of taxonomy, phytogeography, phylogenetic analysis, speciation, and natural history of plants. P/ NP or letter grading.

C104. Experimental Invertebrate Zoology (6 units). Lecture, two hours; laboratory, 12 hours. Prerequisites: Life Sciences 1 or equivalent, consent of instructor. Advanced treatment of physiology, behavior, and ecology of invertebrates, with emphasis on independent laboratory and field investigations. Concurrently scheduled with course C212.

105. Biology of Invertebrates (6 units). Lecture, three hours; laboratory/field trips, six hours. Prerequisite: Life Sciences 1 or equivalent or consent of instructor. Introduction to systematics, evolution, natural history, morphology, and physiology of invertebrates.

106. Experimental Marine Invertebrate Biology (4 or 6 units). Lecture, two hours; laboratory, 12 hours. Prerequisites: courses 105, and 166 or 167 (either may be taken concurrently), or equivalent, or consent of instructor. Offered either as a six-unit quarter-long course or as a four-unit Marine Biology Quarter course. Advanced course of natural history, physiology, biochemistry of invertebrates, with emphasis on independent laboratory and field investigations.

107. Entomology (6 or 8 units). Prerequisite: Life Sciences 1 or equivalent or consent of instructor. Offered either as a six-unit quarter-long course or as an eight-unit Field Biology Quarter course. Six-unit course has lecture, three hours; laboratory, six hours; additional field trips. Morphology, physiology, development, systematics, behavior, and ecology of insects. Eight-unit course covers same basic lecture and laboratory material in two and one-half intensive weeks, followed by extended field trip where students do individual field projects in insect biology.

C109. Introduction to Marine Science. Lecture, three hours; laboratory, three hours; weekend field trips. Prerequisite: Life Sciences 1 or equivalent or consent of instructor. Strongly recommended for prospective MBQ students. Introduction to physical, chemical, and biological aspects of marine science. Emphasis on biological systems and natural communities. Concurrently scheduled with course C215.

110. Vertebrate Morphology (6 units). Lecture, three hours; laboratory, five hours. Prerequisite: Life Sciences 1 or equivalent. Study of vertebrate morphology, function, and evolution from viewpoint of comparative anatomy of adult forms, biomechanics, development, and paleontology. Laboratory study of selected vertebrates.

111. Biology of Vertebrates. Lecture, three hours; demonstration/field trips/discussion, three hours. Prerequisite: Life Sciences 1 or equivalent. Adaptations, behavior, and ecology of vertebrates.

112. Ichthyology. Lecture, two hours; laboratory, six hours; field trips. Prerequisite: Life Sciences 1 or equivalent or consent of instructor. Highly recommended: courses 110, 111. Biology of freshwater and marine fishes, with emphasis on their evolution, systematics, morphology, zoogeography, and ecology. Field trips examine fishes of the Southern California shoreline, tidepools, and coastal streams.

113A. Herpetology. Lecture, three hours; laboratory, one hour; weekend field trips. Prerequisite: Life Sciences 1 or equivalent. Vertebrate zoology course restricted to biology of reptiles and amphibians of the world, covering current systematics, ecology, behavior, morphology, and physiology of these animals.

113B. Field Herpetology. Prerequisite: Life Sciences 1 or equivalent. Recommended: course 111. Two weeks of off-campus research projects followed by two-week lecture course and offered only as part of *Field Biology Quarter*. Biology, particularly ecology and behavior, of reptiles and amphibians in their natural habitat. Students carry out supervised research projects, then write up and orally present their results in seminar fashion.

114. Ornithology. Lecture, two hours; laboratory/discussion/field trips, six hours. Prerequisites: course 111, consent of instructor. Limited enrollment. Systematics, distribution, physiology, behavior, and ecology of birds.

115. Mammalogy. Lecture, three hours; laboratory, four hours. Prerequisite: course 110 or 111 or equivalent or consent of instructor. Evolution, ecology, behavior, and physiology of mammals.

116. Conservation Biology. Lecture, three hours; discussion, two hours. Prerequisite: Life Sciences 1 or equivalent. Study of ecological and evolutionary principles as they apply to preservation of genetic, species, and ecosystem diversity. Discussion sections focus on interactions of science, policy, and economics in conserving biodiversity. Oral and written student presentation on specific conservation issues.

117. Evolution of Vertebrates. Lecture, three hours; laboratory, three hours. Prerequisite: course 110. Recommended: one general geology course. Fossil record of the evolution of vertebrates, with emphasis on paleobiology and morphology of tetrapods.

118. Plant Adaptations (8 units). Lecture, one hour; field trip, 10 hours. Prerequisites: completion of preparation for the major courses, consent of instructor. Five-week course offered only as part of *Field Biology Quarter*. Field-oriented introduction to mechanisms by which vascular plants adapt themselves to their abiotic and biotic environments using community, population, and ecophysiological levels of integration.

C119. Mathematical Ecology. Lecture, three hours. Prerequisites: Mathematics 31A, 31B, 32A. Differential equation models of population growth explore theory of evolutionary ecology to determine why natural environments of the world support the kinds of living organisms they do and why organisms of the world possess the adaptations they do. Concurrently scheduled with course C219.

120. Evolution. Lecture, three hours; discussion, two hours. Prerequisites: Life Sciences 1 or equivalent, Mathematics 3A and 3B, or 31A. Recommended: Life Sciences 4 or equivalent. Designed for biology majors specializing in environmental and population biology. Introduction to mechanics and processes of evolution, with emphasis on natural selection, population genetics, speciation, evolutionary rates, and patterns of adaptation. P/NP or letter grading.

121. Molecular Biology and Evolution. Lecture, three hours; discussion, one hour. Prerequisites: Life Sciences 3 and 4 or equivalent. Not open to students with credit for course 100A or former course 144. Molecular biology, with emphasis on evolutionary aspects. DNA replication, RNA transcription, protein synthesis, gene expression, and molecular evolution.

122. Ecology. Lecture, three hours; laboratory, three hours. Prerequisites: Life Sciences 1 or equivalent, and Mathematics 3A and 3B, or 31A, or consent of instructor. Highly recommended: Mathematics 31B, 32A. Recommended for biology majors specializing in environmental and population biology. Introduction to population and community ecology, with emphasis on growth and distributions of populations, interactions between species, and structure, dynamics, and functions of communities and ecosystems.

123. Ecology of Marine Communities. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisite: Life Sciences 1 or equivalent or consent of instructor. Field study of natural history and ecology of marine organisms and communities, involving independent research project. Given off campus at a marine science center.

124. Field Ecology (4 or 8 units). Lecture, two hours; laboratory or field trip, 10 hours. Prerequisite: Life Sciences 1 or equivalent. Recommended: courses 111, 120, 122. Offered either as a four-unit quarter-long course with weekend field trips or as a single field trip conducted between quarters, followed by lectures and tutorials for three weeks. When course is given as part of *Field Biology Quarter*, it is eight units and lasts for five weeks. Field and laboratory research in ecology; collection, analysis, and write-up of numerical data, with emphasis on design and execution of field studies.

C125. Tropical Animal Communication (4 or 8 units). (Formerly numbered 125.) Prerequisite: Life Sciences 1 or equivalent. Offered either as a four-unit quarter-long course or as an eight-unit *Field Biology Quarter* course. Four-unit course has lecture, three hours; discussion, two hours. Animal communication behavior, tropical vertebrate biology, and evolution of information processing systems. Eight-unit course covers same basic lecture material in five or six intensive weeks, followed by extended field trips where students do individual projects in animal communication. Concurrently scheduled with course C225.

C126. Behavioral Ecology (4 or 8 units). Prerequisites: course 6 or Life Sciences 1, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A, or consent of instructor. Not open for credit to students with credit for course 129. Offered either as a four-unit quarter-long course or as an eight-unit Field Biology Quarter course. Four-unit course has lecture, three hours; discussion, three hours. Animal communication behavior, island biogeography, and evolution of social behavior. Eight-unit course covers same basic lecture material in five intensive weeks, followed by extended field trip where students do individual projects in behavioral ecology. Concurrently scheduled with course C227.

M127. Soils, Plants, and Society. (Same as Geography M127.) Lecture, three hours; field trip. Prerequisites: Chemistry 11A, 11B/11BL, and 11CL, or equivalent, or consent of instructor. General treatment of soil development and morphology and physical and chemical properties of soils as they relate to plant growth and distribution; soil resources, management, conservation, and cultural aspects. Use of soil profiles examined on field trip to explain developmental phenomena.

128. Plant Physiological Ecology (4 or 8 units). Offered either as a four-unit quarter-long course or as an eight-unit Field Biology Quarter course. Four-unit course has lecture, three hours. Study of plant/environment interactions under natural conditions. Emphasis on transpiration and photosynthesis, leaf temperatures, and water movement in soil/plant/atmosphere continuum. Eight-unit course covers same basic lecture material in five intensive weeks, followed by extended field trips where students do individual research projects.

129. Animal Behavior. Lecture, three hours; discussion, two hours. Prerequisites: Life Sciences 1 and 4 or equivalent. Introduction to behavioral ecology. Methods and results of evolutionary approaches to study of animal behavior, including foraging strategies, social competition, sexual selection, mating systems, cooperation, and social organization.

130. Principles of Systematic Biology. (Formerly numbered 202.) Lecture, three hours; discussion, two hours. Prerequisite: course 6 or Life Sciences 1. Recommended: courses 120, 135. Concepts, principles, and methods of comparative biology as they apply to the inference of evolutionary relationships among organisms. Principles and application of biological nomenclature.

131. Insect Ecology (4 or 8 units). Lecture, two hours; laboratory or field trip, eight hours. Prerequisite: course 6 or Life Sciences 1. Recommended: courses 120, 122. Offered either as a four-unit quarter-long course with weekend field trips or as an eight-unit Field Biology Quarter course with amount of fieldwork increased accordingly. Analysis of ecological roles of insects in terrestrial communities, with emphasis on interactions with both plants and vertebrates. Group and individual field projects.

132. Field Behavioral Ecology (8 units). Lecture, two hours; laboratory/field trip, 10 hours. Prerequisite: Life Sciences 1 or equivalent. Recommended: course 129. Five-week course offered only as part of Field Biology Quarter. Field research in behavioral ecology, emphasizing animal communication. Design and execution of individual and small group field projects during extended field trip.

133. Vegetation and Ecosystem Dynamics. Lecture, three hours. Prerequisite: course 6 or Life Sciences 1. Introduction to form and functional relationships of major world vegetation types in relation to their physical environments.

C134A. Physiological Ecology of Desert Animals. (Formerly numbered C134.) Lecture, three hours; laboratory, one hour; field trips, four hours. Prerequisite: Life Sciences 1 or equivalent. Consideration of physiological, behavioral, morphological, and ecological mechanisms desert animals use to enhance their survival in an arid habitat. Concurrently scheduled with course C214.

134B. Field Physiological Ecology of Desert Animals (8 units). (Formerly numbered C134.) Prerequisite: Life Sciences 1 or equivalent. Two weeks of off-campus research projects with two-week lecture course (four hours per day) and offered only as part of Field Biology Quarter. Consideration of physiological, behavioral, morphological, and ecological mechanisms desert animals use to enhance their survival in an arid habitat. Students carry out supervised research projects, then write up and orally present their results in seminar fashion.

135. Population Genetics. Lecture, three hours; discussion, one hour. Prerequisite: Life Sciences 4 or equivalent. Highly recommended: Mathematics 31A, 31B. Basic principles of genetics of population, dealing with genetic structure of natural populations and mechanisms of evolution. Equilibrium conditions and forces altering gene frequencies, polygenic inheritance, molecular evolution, and methods of quantitative genetics.

138. Developmental Biology. Lecture, three hours; discussion, one hour. Prerequisites: course 100A or Life Sciences 3, and Life Sciences 4 or equivalent. Strongly recommended: course 100B or C139 or M140. Cellular and molecular basis of animal embryology.

C139. Molecular Cell Biology (6 units). Prerequisites: course 100A or Life Sciences 3, Chemistry 153A, consent of instructor. Not open for credit to students with credit for course 100B or M140 or former course 143. Introduction to cell biology for graduate students in basic medical sciences and selected undergraduates. Topics include membrane structure, assembly, and function; biogenesis of organelles, intercellular and intracellular signaling, immunity and gene structure, function and replication. Concurrently scheduled with course CM220.

M140. Cell Biology: Cell Cycle (5 units). (Same as Biological Chemistry M140.) Lecture, three hours; discussion, one hour. Prerequisites: course 100A or Life Sciences 3, Chemistry 11 series (may be taken concurrently), Life Sciences 4 or equivalent. Not open for credit to students with credit for course 100B or C139 or former course 143. Satisfies premedical requirements. Eukaryotic cellular structures and biogenesis at a molecular level. Biochemical and genetic analysis of cell cycle, signal transduction, and their involvement in development and cancer. Protein sorting and transport across cell membranes. Cytoskeletal components and cell-adhesion.

C141. Molecular Basis of Plant Differentiation and Development. (Formerly numbered 141.) Lecture, three hours; discussion, one hour. Prerequisites: Life Sciences 1, 3, and 4, or equivalent. In-depth study of basic processes of growth differentiation and development in plants and molecular mechanisms underlying these processes. Discussion of a variety of plant systems, with focus on developing critical understanding of current experimental basis of research in this field. Concurrently scheduled with course C239.

142. Seminar: Topics in Developmental Biology (2 units). Prerequisites: course 138, consent of instructor. Undergraduate seminar on topics in developmental biology. Reading and group discussions on current research. P/NP or letter grading.

146. Physicochemical Biology. Lecture, three hours; discussion, one hour. Prerequisites: Life Sciences 1 and 3 or equivalent, or consent of instructor, Physics 6C or equivalent. Physicochemical analysis of physiology of cells and organelles, with emphasis on membranes, thermodynamics of solute and water movement, light absorption, and subcellular energy transduction.

147. Biological Oceanography. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisites: Chemistry 11A, 11B/11BL, and 11CL, or consent of instructor, Life Sciences 1 and 3 or equivalent. Lectures include physical, chemical, and biological factors affecting abundance and distribution of organisms in marine environment. Laboratory includes experimental studies of local marine organisms, with emphasis on primary and secondary production and nutrient flux.

148. Biology of Marine Plants. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisites: Chemistry 11A, 11B/11BL, and 11CL, or consent of instructor, Life Sciences 1 and 3 or equivalent. Introduction to general biology of marine algae, including basics of structure reproduction, life histories, systematics, and introduction to physiology and ecology of marine algae. Techniques in culture and laboratory investigation and utilization of algae. Given off campus at a marine science center.

150. Plant Chemical and Molecular Communication. Lecture, three hours; discussion, two hours. Prerequisite: completion of preparation for the major courses. Introductory course in chemical ecology and how natural compounds affect gene expression. Emphasis on role of natural compounds in plant/microbe, plant/plant, and plant/herbivore interactions; synopsis of principles of plant defense mechanisms and responses to microbial infections.

C151. Tropical Ecology. Prerequisite: course 6 or Life Sciences 1. Broad introduction to biodiversity, community structure, and dynamics and ecosystem function of a range of tropical forest habitats. Discussion of such themes as biogeography, forest structure, plant growth forms, animal communities, herbivory, forest dynamics, and disturbance regimes. Concurrently scheduled with course C221. P/NP or letter grading.

152. Functional Plant Anatomy. Lecture, three hours; laboratory, six hours. Prerequisite: Life Sciences 1 or equivalent or consent of instructor. Structure and functional significance of various cell and tissue types in higher plants, plus patterns of growth and differentiation in roots, stems, leaves, flowers, and fruits.

153. Cellular Physiology: Functional Histology. Prerequisites: Chemistry 11A, 11B/11BL, 11CL, Life Sciences 1 and 3 or equivalent, Mathematics 3A, 3B, 3C, Physics 6A, 6B, 6C. Emphasis on how cellular organelles (nucleus, mitochondria, smooth and rough endoplasmic reticulum, golgi apparatus, lysosomes, cytoskeleton, plasma membrane, extracellular matrix) contribute to function of tissues and organs in vertebrates.

153L. Laboratory for Cellular Physiology: Functional Histology (2 units). Laboratory, four hours. Corequisite: course 153. Exploration of microanatomy of vertebrate tissues and organs.

155. Genetics Methods. Lecture, two hours; laboratory, eight hours; outside study, two hours. Gene mapping and detection and analysis of gene variants by means of inheritance patterns.

CM156. Human Genetics. (Same as Microbiology CM156.) Lecture, three hours; discussion, one hour. Prerequisites: course 100A or Life Sciences 3, Life Sciences 4 or equivalent. Strongly recommended: course 100B or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM256.

157. Gene Manipulation: Genetic Engineering. Lecture, three hours; discussion, two hours. Prerequisites: courses 100A or Life Sciences 3, 138, Life Sciences 4 or equivalent, consent of instructor. Strongly recommended: course 100B or C139 or M140. Survey of methods and applications of recombinant DNA research as applied to both basic scientific research and the biotechnology industry.

158. Cell Biology (6 units). Lecture, three hours; laboratory, six hours. Prerequisites: Chemistry 11A, 11B/11BL, 11CL, Life Sciences 1, 3, and 4, or equivalent. Cell biology of eukaryotic cells, with emphasis on correlation of structure and function at molecular, organellar, and cellular levels.

C159. Computational Biology. Lecture, three hours; laboratory, one hour. Prerequisites: Life Sciences 1 and 4, or consent of instructor. Introduction to computational biology. Topics include statistical and mathematical analysis, computer simulation, use of Internet for remote databases, and connections to supercomputers, with emphasis on biological applications and individual or group projects. Concurrently scheduled with course C275.

CM160. Biological Catalysis. (Same as Chemistry CM155.) Prerequisites: courses 100A or Life Sciences 3, 100B or C139 or M140, Chemistry 110A, 153A, 153B, or equivalent, consent of instructor. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level. Concurrently scheduled with course CM252.

162. Plant Physiology (6 units). Lecture, four hours; laboratory, four hours. Prerequisites: Chemistry 153A, 153L, Life Sciences 1 and 3 or equivalent. Basic aspects of plant function, including photochemical, biochemical, and physiological aspects of photosynthesis. Carbon and nitrogen metabolism and its regulation; organellar interactions and compartmentation. Water relations, ion transport, flowering, hormone action, and plant responses to stress.

163. Biology of Marine Tetrapods. Five-week intensive course. Lecture, five hours; laboratory and fieldwork, 15 hours. Prerequisites: Chemistry 11A, 11B/11BL, 11CL, Life Sciences 1 and 3 or equivalent. Highly recommended: course 111. Survey of "higher" vertebrates living in marine habitats, including estuarine amphibians, marine reptiles, seabirds, and marine mammals. Laboratory emphasizes observational and experimental approaches to study of morphology, systematics, ecology, and behavior of local marine birds and mammals. Given off campus at a marine science center.

164. Field Biology of Marine Fishes. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisite: Life Sciences 1 or equivalent or consent of instructor. Recommended: Mathematics 3A, 3B, 3C. Selected aspects of natural history, ecology, and behavior of the diverse assemblage of local marine fishes. Fieldwork strongly emphasized. Given off campus at a marine science center.

165. Ecological Physiology of Marine Vertebrates. Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Prerequisites: Chemistry 11A, 11B/11BL, and 11CL, or consent of instructor, Life Sciences 1 and 3 or equivalent. Recommended: Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A, Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL. Introduction to physiological adaptations of marine vertebrates to major physicochemical variables in the oceans of the world and to major marine habitats. Laboratory work emphasizes marine vertebrates of Southern California waters. Given off campus at a marine science center.

166. Animal Physiology (6 units). Lecture, three hours; laboratory, five hours. Prerequisites: Chemistry 11A, 11B/11BL, 11CL, Life Sciences 1 or 3 or equivalent. Not open for credit to students with credit for course 167 or former course 170. Introduction to physiological principles, with emphasis on organ systems and intact organisms.

167. Regulatory Physiology (6 units). Lecture, three hours; laboratory, five hours. Prerequisites: Chemistry 11A, 11B/11BL, 11CL, Life Sciences 1 and 3 or equivalent. Not open for credit to students with credit for course 166 or former course 170. Introduction to whole animal and organ physiology. Primary considerations to neuronal and endocrine regulations of body functions and integration of organ systems.

168. Insect Physiology. Lecture, two hours; laboratory, six hours. Prerequisite: course 158 or 166 or 167 or equivalent. Survey of physiology of insects, with emphasis on functional adaptations.

CM169. Macromolecular Metabolism and Subcellular Organization (6 units). (Same as Biological Chemistry CM169.) Lecture, five hours. Prerequisites: Chemistry 153A, 153B, 153C, consent of instructor. Recommended: Chemistry CM153G. Cell cycle; DNA replication and repair; structure and properties of cellular organelles; regulation of cell division; cell transformation; normal and aberrant expression of oncogenes; molecular aspects of development. Concurrently scheduled with course CM223.

M170. Biochemistry and Molecular Biology of Photosynthetic Apparatus. (Same as Chemistry CM170.) Lecture, three hours; discussion, two hours; outside study, seven hours. Prerequisites: Chemistry 153A and 153B, or Life Sciences 3 or equivalent, and Chemistry 153L. Recommended: Chemistry 153C, 154, Life Sciences 4 or equivalent. Light harvesting, photochemistry, electron transfer, carbon fixation, carbohydrate metabolism, pigment synthesis in chloroplasts and bacteria. Assembly of photosynthetic membranes and regulation of genes encoding those components. Emphasis on understanding of experimental approaches. P/NP or letter grading.

171. Principles of Neurobiology. Lecture, three hours; discussion, one hour. Prerequisites: course 166 and Life Sciences 3 or equivalent, or consent of instructor. Strongly recommended: course 100B or C139 or M140. Introduction to basic principles of neurobiology, including description of structure of neurons and nervous systems; ionic mechanisms responsible for generating membrane potentials, action potentials, and synaptic potentials; properties of synaptic transmission, information transduction and coding in sensory pathways, and neural control of movement; development of and trophic interactions between cells of nervous system.

M173. Anatomy and Physiology of Sense Organs. (Formerly numbered 173.) (Same as Physiological Science M173.) Lecture, three hours; discussion, one hour. Prerequisites: courses 171 (or Physiological Science 111A) or M175A-M175B (or Physiological Science M180A-M180B) or equivalent. Structure and function of sense organs. Adoption of quantitative and comparative approach to provide insight into evolution of sense organs in both invertebrates and vertebrates.

C174A-C174F. Advanced Topics in Cell and Molecular Biology (2 units each). (Formerly numbered 174A-174F.) Lecture, three hours; discussion, one hour. Series of five-week two-unit courses on recent developments in fields of cell and molecular biology. Two courses to be presented in succession in same term whenever offered; students may take either or both. Concurrently scheduled with courses C222A-C222F.

C174A. Molecular Evolution. Prerequisites: course 100B or C139 or M140, Chemistry 153B, Life Sciences 4 or equivalent. Current developments in the field of molecular evolution. Constructing evolutionary trees at molecular level; formal testing of evolutionary hypotheses using sequencing data.

C174B. Molecular Biology of Cell Nucleus. Prerequisites: course 100B or C139 or M140, Chemistry 153B, Life Sciences 4 or equivalent. Animal cell nucleus regulation of cell metabolism. Structure/function relationships, nuclear-cytoplasmic exchange, DNA replication and gene expression.

C174C. Eukaryotic DNA Replication and Cell Cycle Control. Prerequisites: course 100B or C139 or M140, Chemistry 153B, Life Sciences 4 or equivalent. Enzymatic mechanisms of DNA replication, protein kinases and cell cycle control, regulation of genes encoding DNA replication proteins.

C174D. Molecular Biology of Extracellular Matrix. Prerequisites: course 100B or C139 or M140, Chemistry 153B, Life Sciences 4 or equivalent. Recommended: course 138. Synthesis of key extracellular matrix proteins and their assembly into supramolecular structures. Interactions of matrix proteins with cells and their influence on tissue formation.

C174F. Molecular Parasitology. Examination of recent advances in molecular biology of parasites and host/parasite relationship. Specific topics include parasite development, antigenic variation in trypanosomes, RNA editing, prospects for parasitic vaccines.

M175A-M175B-M175C. Neuroscience: From Molecules to Mind (5 units each). (Same as Neuroscience M101A-M101B-M101C, Physiological Science M180A-M180B-M180C, and Psychology M117A-M117B-M117C.) Lecture, four hours; discussion, one hour. P/NP or letter grading.

M175A. Cellular and Systems Neuroscience. Prerequisites: Chemistry 132A, Life Sciences 2 or equivalent, Physics 6B or 8C. Not open for credit to students with credit for Physiological Science 111A. Students with credit for Biology 171 may enroll on a P/NP basis; course 171 may not be taken concurrently with this course. Cellular neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement.

M175B. Molecular and Developmental Neuroscience. Prerequisites: course 171 (or Physiological Science 111A or Psychology 115) or M175A (or Neuroscience M101A or Physiological Science M180A or Psychology M117A), Life Sciences 3, 4. Molecular biology of channels and receptors: focus on voltage dependent channels and neurotransmitter receptors. Molecular biology of supramolecular mechanisms: synaptic transmission, axonal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in developmental neurobiology.

M175C. Behavioral and Cognitive Neuroscience. Prerequisite: course 171 (or Physiological Science 111A or Psychology 115) or M175B (or Neuroscience M101B or Physiological Science M180B or Psychology M117B). Neural mechanisms underlying motivation, learning, and cognition.

176. Advanced Topics in Animal Virus/Host Interaction. Lecture, four hours; discussion, one hour; outside study, seven hours. Prerequisites: course 100A or Life Sciences 3, Life Sciences 4 or equivalent. Recommended: Chemistry 153B, Microbiology 102. Recent developments in fields of interaction of hosts with animal viruses. Emphasis on molecular and cellular approaches to understand host/virus interaction at level of entry, replication, assembly, and morphogenesis, as well as host defense and viral pathogenesis. P/NP or letter grading.

CM178. Molecular Genetics (6 units). (Same as Biological Chemistry CM178.) Lecture, five hours. Prerequisites: course 100B or C139 or M140, Chemistry 153A, 153B, Life Sciences 3, 4, consent of instructor. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics. Concurrently scheduled with course CM248.

179. Invertebrate Endocrinology. Lecture, three hours. Prerequisite: course 158 or 166 or 167 or consent of instructor. Comprehensive treatment of invertebrate endocrinology.

C180. Molecular and Cellular Immunology. Lecture, three hours; discussion, one hour. Prerequisites: courses 100A or Life Sciences 3, 100B or C139 or M140, Chemistry 153A, consent of instructor. Not open for credit to students with credit for course M185A. Comprehensive course for graduate students and selected undergraduates covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented with discussion section focusing on reading and analysis of primary research articles. Concurrently scheduled with course CM261.

181. Parasitology and Symbiosis (6 units). Lecture, three hours; laboratory, six hours. Prerequisites: Life Sciences 1 and 3 or equivalent. Introduction to principles, biology, and evolution of infectiousness, symbiosis, and parasitism, emphasizing protozoan and helminth parasites, including those of man.

M185A. Immunology (5 units). (Same as Microbiology M185A and Microbiology and immunology M185A.) Lecture, three hours; discussion, 90 minutes; outside study, 11½ hours. Prerequisites: Life Sciences 3 and 4 or equivalent. Recommended prerequisites or corequisites: course 100B or C139 or M140, Chemistry 153A, 153L. Not open for credit to students with credit for course C180/CM261. Introduction to experimental immunobiology and immunohistochemistry; cellular and molecular aspects of humoral and cellular immune reactions.

CM185B. Intermediate Immunology. (Same as Microbiology CM185B.) Lecture, three hours; discussion, one hour. Prerequisite: course M185A or equivalent. In-depth exploration of topics introduced in course M185A. Concurrently scheduled with course CM285.

188. Seminar: Biology and Society (2 units). Prerequisite: consent of instructor. Investigations and discussions of current socially important issues involving substantial biological considerations, either or both as background for policy and as consequences of policy. May be repeated once for credit.

M189A-M189B. Theoretical Behavioral Ecology. (Same as Anthropology M189A-M189B.) Lecture, three hours. Prerequisites: one upper division introduction to behavioral ecology course, one university-level mathematics course (preferably calculus or probability and statistics). Course M189A or consent of instructor is prerequisite to M189B. Students expected to do simple algebra, elementary calculus, and probability. A rich body of mathematical theory describing the evolution of animal behavior exists. Introduction to this body of theory at a pace and mathematical level that allows students to grasp this information. Within each area of theory (e.g., kin selection, optimal foraging theory, etc.), presentation of basic corpus of models so that students understand assumptions that underlie the models, and how main results are derived. Presentations supplemented by a survey of results printed in the literature, especially those derived using more advanced methods.

190A-190D. Honors Research in Biology (2 to 4 units each). Prerequisites: senior standing, consent of undergraduate adviser. Individual research designed to broaden and deepen students' knowledge of some phase of biology. Must be taken with Biology Department faculty for at least two terms and for a total of at least eight units. In Progress grading (credit to be given only on completion of course 190B). Students may elect to enroll in additional research through courses 190C-190D (letter grading). A report on progress must be presented to undergraduate adviser each term a 190 course is taken. Eight units may be applied toward Biology Department majors.

M191. Biological Bases of Psychiatric Disorders. (Same as Neuroscience M130, Physiological Science M181, Psychiatry M191, and Psychology M117J.) Prerequisite: course 171 or Neuroscience M101A or Physiological Science 111A or Psychology 115 or consent of instructor. Underlying brain systems involved in psychiatric syndromes and neurological disorders, including schizophrenia, depression, bipolar disorders, obsessive/compulsive disorder, eating disorders. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments.

192. Teaching Practicum in Biology (1 to 4 units). Prerequisites: junior or senior biology major, consent of department. Training and supervised practicum for advanced undergraduates in teaching biology. Students serve as junior teaching assistants and assist in preparation of materials and development of innovative programs. Consult Undergraduate Office for further information. May not be applied toward course requirements for biology or cell and molecular biology majors. May be repeated once for credit. P/ NP or letter grading.

193. Teaching Practicum in Cell and Molecular Biology (1 to 4 units). Prerequisites: junior or senior cell-and molecular biology major, consent of department. Training and supervised practicum for advanced undergraduates in teaching cell and molecular biology. Students serve as junior teaching assistants and assist in preparation of materials and development of innovative programs. Consult Undergraduate Office for further information. May not be applied toward course requirements for biology or cell and molecular biology majors. May be repeated once for credit. P/ NP or letter grading.

199. Special Studies (2 to 16 units). Prerequisite: consent of instructor and undergraduate adviser based on written proposal outlining the study or research to be undertaken. Studies to involve laboratory or field-related research, not literature surveys or library research. Proposal should be worked out in consultation with instructor and submitted for approval to undergraduate adviser before the day instruction begins in that term. At end of term a report describing progress of the study or research and signed by the student and instructor must be presented to undergraduate adviser. Students who wish to take more than eight units of course 199 in any one term must obtain authorization from department chair and appropriate dean. Only one 199 course may be applied toward Biology Department majors.

Graduate Courses

Consent of instructor is required for admission to all graduate courses. Additional prerequisites are stated in the course descriptions.

200A. Seminar: Integrative Biology (1 unit). (Formerly numbered 200.) Limited to and required of all first-year integrative biology graduate students. Orientation to integrative biological research through attendance at integrative biology division's weekly seminar series. S/U grading.

200B. Research Trends in Integrative Biology (2 units). (Formerly numbered 200.) Lecture, one hour; discussion, two hours. Limited to and required of all first-year integrative biology graduate students. Orientation to integrative biological research through attendance at integrative biology division's weekly seminar series, together with weekly discussions of recently published articles on related topics.

201. Use of the Computer in Biology (2 units). Lecture, two hours; laboratory, one hour. Introduction to use of IBM PC microcomputer and VAX minicomputer in biological research. S/U grading.

203. Marine Botany and Physiology. Lecture, two hours; discussion, one hour; laboratory, six hours; experimental project. Prerequisites: graduate standing, consent of instructor. Structure, reproduction, life histories, and biology of marine algae, with emphasis on physiological ecology and biochemistry. Techniques in culture and physiological, ecological, and biochemical investigation of algae. Given off campus at a marine science center.

204. Advanced Biology of Algae. Lecture, four hours; discussion, one hour. Prerequisite: consent of instructor. Consideration of current research in experimental phyecology. Topics include discussion of appropriate aspects of chemical and physical oceanography and limnology; algal physiology; biochemistry, physiological ecology, and algal processes in ocean and freshwater habitats.

205. Marine Invertebrate Biology. Lecture, four hours; laboratory, eight hours. Prerequisite: consent of instructor. Functional morphology, life histories, and systematics of marine invertebrates of all major and most minor taxa; emphasis on the living animal and its habitat. Given off campus at a marine science center.

206. Advanced Ichthyology. Lecture, three hours; laboratory, three hours. Prerequisite: course 111 or 112. Advanced study of various aspects of fish biology. Theme varies from year to year. May be repeated for credit.

208. Advanced Vertebrate Morphology. Lecture, two hours; laboratory, eight hours. Prerequisites: course 110 or equivalent, consent of instructor. Emphasis on a functional approach to evolution of vertebrate locomotor, feeding, and circulatory systems. Laboratory includes comparative and experimental analyses of morphological adaptation. Independent project required. May be repeated once for credit.

209. Behavior of Arthropods. Lecture, three hours; discussion, one hour. Prerequisites: course 105 or 107 or equivalent, consent of instructor. Advanced study of topics in behavior of terrestrial arthropods, including communication, feeding, reproductive, and social behavior. Emphasis on both mechanistic and adaptive approaches toward understanding behavior. Independent project required.

210. Advanced Ornithology. Lecture, two hours; laboratory, two hours; fieldwork, two hours. Prerequisites: course 114 or equivalent, consent of instructor. Advanced study of topics in modern avian biology. Emphasis on experimental approaches to investigations of physiology (energetics, nutrition, osmoregulation), ecology (population and community organization), and behavior (foraging, breeding, sociality).

211. Physiology and Ecology of Digestion. Lecture, two hours; discussion, two hours; laboratory, two hours. Prerequisite: course 166 or 167 or equivalent. Introduction to function of digestive systems and intestinal adaptations to diet, stage of development, and nutritional state. Principles of digestion and membrane transport emphasized in lecture and discussion sections; modern techniques taught in laboratory. Students conduct individual projects in lab and field.

C212. Experimental Invertebrate Zoology (6 units). Lecture, two hours; laboratory, 12 hours. Prerequisites: Life Sciences 1 or equivalent, consent of instructor. Advanced treatment of physiology, behavior, and ecology of invertebrates, with emphasis on independent laboratory and field investigations. Concurrently scheduled with course C104.

C214. Physiological Ecology of Desert Animals. Lecture, three hours; laboratory, one hour; field trips, four hours. Prerequisite: Life Sciences 1 or equivalent. Consideration of physiological, behavioral, morphological, and ecological mechanisms desert animals use to enhance their survival in an arid habitat. Concurrently scheduled with course C134A.

C215. Introduction to Marine Science. Lecture, three hours; laboratory, three hours; weekend field trips. Prerequisite: Life Sciences 1 or equivalent or consent of instructor. Strongly recommended for prospective MBQ students. Introduction to physical, chemical, and biological aspects of marine science. Emphasis on biological systems and natural communities. Concurrently scheduled with course C109.

216. Quantitative Methods in Behavior and Ecology. Lecture, two hours; laboratory, six hours. Prerequisites: course 122 or 129 or equivalent, consent of instructor. Quantitative methods of data collection and analysis in behavioral and ecological research. Lectures review general nature of quantitative problems that arise in behavior and ecology and statistical methods used to solve them. Laboratory exercises emphasize analysis, using comprehensive statistical software routines on personal microcomputers, of the kinds of data that frequently arise in field biological research.

217. Marine Ecology. Lecture, four hours; discussion, one hour. Prerequisites: graduate standing, consent of instructor. Structure, diversity, and energetics of marine communities; behavior, population dynamics, and biogeography of component species; associated oceanography and geology. Given off campus at a marine science center.

218. Oceanology. Lecture, four hours; discussion, one hour. Prerequisites: graduate standing, consent of instructor. Ecology and dynamics of pelagic and benthic associations; physicochemical properties of seawater and marine substrates and their biological significance; qualitative and quantitative methods of oceanology. Given off campus at a marine science center.

C219. Mathematical Ecology. Lecture, three hours. Prerequisites: Mathematics 31A, 31B, 32A. Differential equation models of population growth explore theory of evolutionary ecology to determine why natural environments of the world support the kinds of living organisms they do and why organisms of the world possess the adaptations they do. Concurrently scheduled with course C119.

CM220. Molecular Cell Biology (6 units). (Not the same as course C220 prior to Fall Quarter 1994.) (Same as Neurobiology M209A and Physiology M209A.) Prerequisite: consent of instructor. Not open for credit to students with credit for course 100B or M140 or former course 143. Introduction to cell biology for graduate students in basic medical sciences and selected undergraduates. Topics include membrane structure, assembly, and function; biogenesis of organelles, intercellular and intracellular signaling, immunity and gene structure, function and replication. Concurrently scheduled with course C139.

C221. Tropical Ecology. Prerequisite: course 6 or Life Sciences 1. Broad introduction to biodiversity, community structure, and dynamics and ecosystem function of a range of tropical forest habitats. Discussion of such themes as biogeography, forest structure, plant growth forms, animal communities, herbivory, forest dynamics, and disturbance regimes. Concurrently scheduled with course C151.

C222A-C222F. Advanced Topics in Cell and Molecular Biology (2 units each). Lecture, three hours; discussion, one hour. Series of five-week two-unit courses on recent developments in fields of cell and molecular biology. Two courses to be presented in succession in same term whenever offered; students may take either or both. Concurrently scheduled with courses C174A-C174F:

C222A. Molecular Evolution. Prerequisites: course 100B or C139 or M140, Chemistry 153B, Life Sciences 4 or equivalent. Current developments in the field of molecular evolution. Constructing evolutionary trees at molecular level; formal testing of evolutionary hypotheses using sequencing data. Original research proposal required. S/U or letter grading.

C222B. Molecular Biology of Cell Nucleus. Prerequisites: course 100B or C139 or M140, Chemistry 153B, Life Sciences 4 or equivalent. Animal cell nucleus regulation of cell metabolism. Structure/function relationships, nuclear-cytoplasmic exchange, DNA replication and gene expression. Original research proposal required.

C222C. Eukaryotic DNA Replication and Cell Cycle Control. Prerequisites: course 100B or C139 or M140, Chemistry 153B, Life Sciences 4 or equivalent. Enzymatic mechanisms of DNA replication, protein kinases and cell cycle control, regulation of genes encoding DNA replication proteins. Original research proposal required.

C222D. Molecular Biology of Extracellular Matrix. Prerequisites: course 100B or C139 or M140, Chemistry 153B, Life Sciences 4 or equivalent. Recommended: course 13B. Synthesis of key extracellular matrix proteins and their assembly into supramolecular structures. Interactions of matrix proteins with cells and their influence on tissue formation. Original research proposal required.

C222F. Molecular Parasitology. Examination of recent advances in molecular biology of parasites and host/parasite relationship. Specific topics include parasite development, antigenic variation in trypanosomes, RNA editing, prospects for parasitic vaccines. Original research proposal required.

CM223. Macromolecular Metabolism and Subcellular Organization (6 units). (Same as Biological Chemistry CM267 and Chemistry M267.) Lecture, five hours. Prerequisites: Chemistry 153A, 153B, 153C, consent of instructor. Recommended: Chemistry CM153G. Cell cycle; DNA replication and repair; structure and properties of cellular organelles; regulation of cell division; cell transformation; normal and aberrant expression of oncogenes; molecular aspects of development. Concurrently scheduled with course CM169.

224. Marine Molecular Biology (8 units). Lecture, three hours; laboratory, eight hours. Prerequisites: background in marine sciences, basic cell biology and biochemistry, consent of instructor. Ten-week intensive course designed to train marine biologists in advanced techniques of cell and molecular biology. Independent project required. Given off campus at a marine science center.

C225. Tropical Animal Communication (4 or 8 units). Prerequisite: Life Sciences 1 or equivalent. Offered either as a four-unit quarter-long course or as an eight-unit Field Biology Quarter course. Four-unit course has lecture, three hours; discussion, two hours. Animal communication behavior, tropical vertebrate biology, and evolution of information processing systems. Eight-unit course covers same basic lecture material in five or six intensive weeks, followed by extended field trips where students do individual projects in animal communication. Concurrently scheduled with course C125. S/U or letter grading.

M226A-M226B. Principles of Microbial Pathogenesis. (Same as Microbiology M226A-M226B and Microbiology and Immunology M226A-M226B.) Lecture, one hour; discussion, three hours. Prerequisites: Microbiology and Immunology 202A, 202B, 202C, and 202D, or equivalent, or consent of instructor. Lecture/discussion format designed to analyze basic pathogenesis of infections. Emphasis on molecular and cellular approaches to understand host-microbial interaction. **M226A.** Bacterial and Mycotic Infections; **M226B.** Parasitic and Viral Infections.

C227. Behavioral Ecology (4 or 8 units). Prerequisites: course 6 or Life Sciences 1, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A, or consent of instructor. Not open for credit to students with credit for course 129. Offered either as a four-unit quarter-long course or as an eight-unit Field Biology Quarter course. Four-unit course has lecture, three hours; discussion, three hours. Animal communication behavior, island biogeography, and evolution of social behavior. Eight-unit course covers same basic lecture material in five intensive weeks, followed by extended field trip where students do individual projects in behavioral ecology. Concurrently scheduled with course C126. S/U or letter grading.

228. Prokaryotic and Eukaryotic Gene Systems (2 units). Presentations concerning current experimental approaches in study of DNA replication, organization, transcription, and translation.

M229. Cellular Biology of Host/Pathogen Interactions (6 units). (Same as Microbiology M229 and Microbiology and Immunology M229.) Lecture, four hours; discussion, 90 minutes. Prerequisite: Biological Chemistry CM253 or consent of instructor. Molecular and cellular biology of pathogens, eukaryotic host cells, and interaction between pathogens and hosts.

M230B. Structural Molecular Biology. (Same as Chemistry M230B.) Lecture, three hours; discussion, one hour. Prerequisites: Physics 6C, Mathematics 3C, consent of instructor. Selected topics from principles of biological structure; structures of globular proteins and RNAs; structures of fibrous proteins, nucleic acids, and polysaccharides; harmonic analysis and Fourier transforms; principles of electron, neutron, and X-ray diffraction; optical and computer filtering; three-dimensional reconstruction. S/U or letter grading.

M230D. Structural Molecular Biology Laboratory (2 units). (Same as Chemistry M230D.) Laboratory, 10 hours. Corequisite: course M230B. Methods in structural molecular biology, including experiments utilizing single crystal X-ray diffraction, low angle X-ray diffraction, electron diffraction, optical diffraction, optical filtering, three-dimensional reconstruction from electron micrographs, and model building.

M231A-M231B-M231C. Advanced Evolutionary Biology. (Formerly numbered 231A-231B-231C.) (Same as Earth and Space Sciences M243A-M243B-M243C.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Series of advanced studies of concepts and methods in evolutionary biology. Topics may include speciation, extinction, coevolution, fossil record, rates of evolution, contributions of molecular biology in evolutionary studies, and development of evolutionary thought. Students encouraged to take each course in sequence. Themes vary from year to year. May be repeated for credit. S/U or letter grading. **M231A.** Mechanisms of Evolution. Prerequisites: courses 120 and/or 135 or equivalent; **M231B.** Patterns of Evolution; **M231C.** Molecular Evolution.

232. Advanced Ecology. Lecture, three hours; discussion, one hour; field trip, three hours. Prerequisite: course 122 or equivalent. Concepts and topics in ecology, evolutionary or behavioral ecology, or theoretical ecology. Topics vary from year to year and may include island biogeography, tropical biology, biodiversity, modeling in ecology, habitat selection, community structure and organization, and ecology and evolution of reproductive rates. May be repeated for credit. S/U or letter grading.

M233. Principles, Practices, and Policies in Biotechnology (2 units). (Same as Biological Chemistry M233, Chemical Engineering M233, Chemistry M233, Microbiology M233, Microbiology and Immunology M233, and Radiological Sciences M233.) Prerequisite: graduate standing or consent of instructor. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. S/U or letter grading.

234. Genetic Control of Development. (Formerly numbered 234A.) Topics at forefront of molecular developmental biology, including problems in oogenesis and early embryogenesis, pattern formation, axis determination, nervous system development, cellular morphogenesis, and cell-cell and cell-matrix interactions. S/U or letter grading.

236. Seminar: Marine Molecular Biology. Discussion, 10 hours. Prerequisites: course 224, consent of instructor. Seminar on current issues and work in marine molecular biology. Given off campus at a marine science center.

M237. Introduction to Cellular Physiology and Biophysics (6 units). (Same as Physiological Science M212 and Physiology M212.) Lecture, five hours. Prerequisites: Physiological Science 111A or Physiology M209A or equivalent, graduate standing, consent of department and instructor; for upper division undergraduates: consent of instructor. Development of fundamental physiological and biophysical concepts associated with all membranes, membrane channels and transporters, membrane potential, membrane excitability, electrical signal transmission and transduction, and muscle contraction and their application to study of basic cellular processes. Emphasis in laboratory on development of skills using computer programming languages, spreadsheets, and graphics for modeling and analysis of cellular processes.

C239. Molecular Basis of Plant Differentiation and Development. Lecture, three hours; discussion, one hour. Prerequisites: Life Sciences 1, 3, and 4, or equivalent. In-depth study of basic processes of growth differentiation and development in plants and molecular mechanisms underlying these processes. Discussion of a variety of plant systems, with focus on developing critical understanding of current experimental basis of research in this field. Concurrently scheduled with course C141. Preparation and presentation of term paper, in addition to other coursework, required of graduate students.

240. Physiology of Marine Animals. Lecture, four hours; discussion, one hour. Prerequisite: graduate standing or consent of instructor. Lecture and laboratory studies on cellular, tissue, organ, and animal physiology; regulatory biology; metabolic characteristics of cells, energy transformations. Given off campus at a marine science center.

242. Topics in Neurobiology. Lecture, three hours. Prerequisite: course 171 or equivalent. Selected current problems in neurobiology discussed in depth, with emphasis on analysis of original papers. May be repeated for credit.

243. Animal Communication. Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 3C, Physics 6C, consent of instructor. Open to qualified undergraduates with consent of instructor. Physical properties of animal signals and physiological mechanisms underlying their generation and reception. Lectures treat signal analysis, signal transmission, and receptor design in light of constraints placed on each of the sensory modalities. Examples of communication systems using visual, auditory, chemical, electrical, and magnetic cues, with emphasis on biological adaptations for efficiently signaling species-specific information.

244. Advanced Insect Physiology. Lecture, two hours; laboratory, five hours. Prerequisite: course 168 or consent of instructor. Detailed discussion of current problems in insect physiology, with advanced laboratory.

M246. Computer Analysis of Genetic Organization. (Same as Microbiology M246.) Lecture, two hours; laboratory, six hours. Prerequisite: Life Sciences 4 or Microbiology C159 or equivalent. Lectures and laboratory instruction in contemporary procedures for analysis of nucleic acid and protein sequence data with the computer. No prior computer experience necessary; students gain both general and specialized facility with IBM PC and Digital VAX computers.

247. Advanced Plant Biology. Lecture, three hours; discussion, two hours. Prerequisite: course C141 or 162 or equivalent. Open to undergraduates with consent of instructor. Designed to expose first-year graduate students to topics of current interest in plant biology. Subjects include plant genetics, growth and development, organelle structure, development and function, and plant-specific metabolic processes (photosynthesis, nitrogen fixation, metabolism of small molecules). S/U or letter grading.

CM248. Molecular Genetics (6 units). (Formerly numbered M248.) (Same as Biological Chemistry CM248 and Microbiology M248.) Lecture, five hours. Prerequisite: Chemistry CM153G or Biological Chemistry CM153G or equivalent. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics. Concurrently scheduled with course CM178.

251. Seminar: Systematics (2 units). Discussion, two to four hours. Prerequisite: consent of instructor. Current topics in systematic biology, including methods development and specific applications in study of phylogeny. Theme varies from year to year. May be repeated for credit.

CM252. Biological Catalysis. (Same as Biological Chemistry M255, Chemistry CM255, and Pharmacology M255.) Prerequisites: courses 100A or Life Sciences 3, 100B or C139 or M140, Chemistry 110A, 153A, 153B, or equivalent, consent of instructor. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level. Concurrently scheduled with course CM160. Graduate students required to write research paper and present oral report on it.

253. Seminar: Plant Structure (2 units).

254. Seminar: Plant Morphogenesis (2 units).

255. Seminar: Invertebrate Zoology (2 units).

CM256. Human Genetics. (Same as Microbiology CM256.) Lecture, three hours; discussion, one hour. Prerequisites: course 100A or Life Sciences 3, Life Sciences 4 or equivalent. Strongly recommended: course 100B or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM156. Independent research project required of graduate students.

257A. Gene Manipulation: Genetic Engineering. (Formerly numbered 257.) Lecture, three hours; discussion, two hours. Prerequisite: course 138. Survey of methods and applications of recombinant DNA research as applied to both basic scientific research and the biotechnology industry.

257B. Gene Manipulation: Advanced Course (2 units). Lecture, 90 minutes; discussion, one hour. Prerequisite: course 157 or 257A. Additional topics in methods and applications of recombinant DNA research as applied to both basic scientific research and the biotechnology industry. S/U or letter grading.

M258A. Molecular Genetic Mechanisms of Immune Response (2 units). (Same as Microbiology M258A and Microbiology and Immunology M258A.) Lecture, two hours; discussion, two hours. Prerequisite: course CM185B or CM285 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on immunoglobulin I and II, oncogenes of immune system, T cell antigen receptor, and loci affecting differentiation. S/U or letter grading.

M258B. Biology of B Cells: Development, Repertoire, and Activation (2 units). (Same as Microbiology M258B and Microbiology and Immunology M258B.) Lecture, two hours; discussion, two hours. Prerequisite: course CM185B or CM285 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on B cell development, repertoire, and growth and differentiative regulation. S/U or letter grading.

M258D. Molecular Interactions in Immune Responses (2 units). (Same as Microbiology M258D and Microbiology and Immunology M258D.) Lecture, two hours; discussion, two hours. Prerequisite: course CM185B or CM285 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on immunology of antibodies, antigens, and complement, antigenic recognition, antibody restriction. S/U or letter grading.

M258E. Immunopathology: Immunology of Disease (2 units). (Same as Microbiology M258E and Microbiology and Immunology M258E.) Lecture, two hours; discussion, two hours. Prerequisite: course CM185B or CM285 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on tolerance and autoimmunity, autoimmune disease models, immune complex disease, immediate hypersensitivity and its cellular basis, and natural and acquired immune deficiency disease. S/U or letter grading.

M258F. Immune Regulation (2 units). (Same as Microbiology M258F and Microbiology and Immunology M258F.) Lecture, two hours; discussion, two hours. Prerequisite: course CM185B or CM285 or Microbiology and Immunology 202A or consent of instructor. Reading and discussion of current research articles on idiotype networks, suppressor T cells, tolerance at T and B cell levels, and Ir gene control. S/U or letter grading.

259. Seminar: Herpetology (2 units). Discussion, three hours. Prerequisite: consent of instructor. Seminar on current approaches to herpetology. Main theme varies from year to year in areas such as biogeography, ecology, behavior, environmental physiology.

260. Seminar: Biology of Terrestrial Vertebrates (2 units).

CM261. Molecular and Cellular Immunology. (Formerly numbered M261.) (Same as Microbiology M261 and Microbiology and Immunology M261.) Lecture, three hours; discussion, one hour. Prerequisite: Biological Chemistry CM253 or consent of instructors. Comprehensive course for graduate students and selected undergraduates covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented with discussion section focusing on reading and analysis of primary research articles. Concurrently scheduled with course C180. Oral presentation required of graduate students. S/U or letter grading.

262. Seminar: Vertebrate Paleontology (2 units).

263. Seminar: Population Genetics (2 or 4 units). Discussion, three to six hours. Prerequisite: consent of instructor. Seminar on topics of current interest in population genetics, such as kin selection, sociobiology, cultural evolution, conservation genetics, etc.

264. Seminar: Stomatal Function. Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Open to undergraduates with consent of instructor. Structure and function of guard cells; gas exchange; environmental and hormonal regulation of stomatal responses; sensory transduction; stomatal adaptations.

265. Seminar: Biophysical Plant Ecology (2 units).

M266A-M266B-M266C. Seminars: Molecular Embryology (2 units each). (Same as Biological Chemistry M266A-M266B-M266C.) Prerequisite: consent of instructor. Advanced course in developmental genetics and biochemistry, with emphasis on early development. Intended mostly for students actively working or highly interested in embryology. S/U grading.

267. Seminar: Current Topics in Evolutionary Ecology (2 units).

268. Seminar: Population Biology (2 units).

269. Seminar: Animal Ecology (2 units). Discussion, three hours. Advanced study of specific topics in animal ecology and related fields.

270. Seminar: Environmental Physiology (2 units). S/U grading.

271. Seminar: Phycology and Mycology (2 units). Prerequisite: course 101A or equivalent or consent of instructor. Advanced study in biology of algae and fungi. Topics in physiological ecology, physiology, and biochemistry of algae and fungi, and their industrial uses. Algae and fungi as experimental organisms. Phylogeny and origin of eukaryote organisms. Evolutionary origin of chloroplasts.

272. Seminar: Marine Biology (2 units).

273. Seminar: Entomology (2 units). Discussion of specific topics in entomology and related fields. Main theme varies from year to year, but usually emphasizes areas such as behavior, ecology, and evolution. S/U grading.

274. Seminar: Behavioral Ecology (2 units). Discussion of theoretical and empirical aspects of topics in behavioral ecology. S/U or letter grading.

C275. Computational Biology. Lecture, three hours; laboratory, one hour. Prerequisites: Life Sciences 1 and 4 and graduate study, or consent of instructor. Introduction to computational biology. Topics include statistical and mathematical analysis, computer simulation, use of Internet for remote databases, and connection to supercomputers, with emphasis on biological applications and individual or group projects. Concurrently scheduled with course C159.

276. Seminar: Molecular Genetics (2 units). Topics vary each term.

277. Seminar: Genetics (2 units).

278. Seminar: Molecular Genetics of Development (2 units). Prerequisites: graduate standing, consent of instructor. Topics vary from year to year, with focus on establishment of position and pattern during embryogenesis by interaction of signal transduction systems and transcription factors. S/U or letter grading.

281. Seminar: Molecular Biology (2 units).

282. Seminar: Ichthyology (2 units). Prerequisite: course 111 or 112. Student presentations and discussion of specific topics in ichthyology. Theme varies from year to year. May be repeated for credit.

283. Seminar: Topics in Cell Biology (2 units). Discussion of various topics on biology of eukaryotic cells. Topics vary from year to year and include bioenergetics, motility, organelle DNA, membrane structure and function, oncogenic transformation, nuclear organization and function.

284. Seminar: Structural Macromolecules (2 units). Lecture, one hour; discussion, three hours. Presentation and discussion of current topics in extracellular active structural macromolecules — their synthesis, structure, and roles in cell and developmental biology.

CM285. Intermediate Immunology. (Formerly numbered CM285B.) (Same as Microbiology CM285 and Microbiology and Immunology M285.) Lecture, three hours; discussion, one hour. Prerequisite: course M185A or equivalent. Recommended corequisite: Chemistry 153B. In-depth exploration of topics introduced in course M185A. Concurrently scheduled with course CM185B.

286. Seminar: Plant Development (2 units). Lecture, one hour; discussion, two hours. Prerequisites: one plant physiology course and at least one advanced undergraduate or graduate plant development or biochemistry course. Seminar on specific topics in plant development. Content varies each term. S/U grading.

288. Seminar: Plant Cell Biology (2 units). Recommended (but not prerequisite): course 162.

289. Current Topics in Plant Molecular Biology (2 units). (Formerly numbered 296.) Discussion, one hour. Recent research developments in the field of plant molecular biology. Opportunities for graduate students to discuss individual research work. S/U grading.

M290. Seminar: Comparative Physiology (2 units). (Formerly numbered 290.) (Same as Physiological Science M290.) Seminar, two and one-half hours. Prerequisite: consent of instructor. Discussion of specific topics in comparative physiology of animals. Topics vary from year to year, with emphasis on systems physiology, neuroethology, or behavioral physiology. S/U or letter grading.

291. Seminar: Physiology and Biochemistry of Arthropods (2 units).

292. Seminar: Molecular Evolution (2 units). Discussion, three hours. Detailed analysis of current understanding of evolution of molecular sequences and structures.

296AA-296AZ. Advanced Topics in Molecular, Cellular, and Developmental Biology (2 units each). Discussion, three hours. Prerequisite: consent of instructor. Advanced study and analysis of current topics in cell, molecular, and developmental biology. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

296BA-296BZ. Seminars: Integrative Biology — Cellular, Organismic, and Population (1 to 4 units each). Discussion, three hours. Prerequisite: consent of instructor. Advanced study and analysis of current topics in cellular, organismic, and population biology. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

297. Advances in Molecular Analysis of Plant Development and Plant/Microbe Interactions (2 units). Prerequisite: consent of instructor. Recent advances in plant molecular biology, with emphasis on control of gene expression both during plant development and in plant/microbe interactions. S/U grading.

M298. Seminar: Current Topics in Molecular Biology (2 units). (Same as Biological Chemistry M298, Chemistry M298, Microbiology M298, Microbiology and Immunology M298, and Molecular Biology M298.) Prerequisite: consent of instructor and graduate adviser of interdepartmental Molecular Biology Ph.D. Program. Each student conducts or participates in discussions on assigned topics. May be repeated for credit.

299. Seminar: Parasitology (2 units).

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Preparation for Teaching Biology in Higher Education (2 units). Prerequisite: graduate standing. Study of problems and methodologies in teaching biology, which includes workshops, seminars, apprentice teaching, and peer observation. S/U grading.

496. Preparation for Teaching Biology in Higher Education (2 units). Prerequisite: graduate standing. Strongly recommended as sequel to course 495 discussions on teaching, theory, and development of advanced skills. Study of methods and approaches to teaching of specific areas in biology, with emphasis on laboratory teaching, instructor/student interaction, and undergraduate motivation. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual (or Tutorial) Studies (2 to 12 units).

596F. Directed Individual (or Tutorial) Studies (2 to 8 units). Given off campus at a marine science center.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examination (2 to 12 units). May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

598. M.A. Thesis Research and Writing (2 to 12 units).

599. Ph.D. Dissertation Research and Writing (2 to 12 units).

Lecturer

Jeffrey Gornbein, Ph.D.

Adjunct Professors

Janet D. Elashoff, Ph.D.
Alan B. Forsythe, Ph.D.
Arthur Peskoff, Ph.D.

Adjunct Assistant Professors

Julian Cook, Ph.D.
Eli Engel, M.D., Ph.D.
Hong Qian, Ph.D.
Janet S. Sinsheimer, Ph.D.

Scope and Objectives

As biology advances rapidly in quantitative research methods, both the need for and possibility of closely associated theoretical research increases. On numerous medical and medical science frontiers — such as genetics, molecular biology, oncology, pharmacology, neurosciences, and physiology — biomathematics is contributing both in its basic research and the development of specialized computer software to support investigation and health care. UCLA has one of the few departments in this relatively new, rapidly evolving field.

The Department of Biomathematics welcomes both undergraduate and graduate students in other majors to its courses in biomedical computing, modeling, and statistics. Premedical majors with mathematical/computer interests can receive early guidance toward an M.D./Ph.D. program in Biomathematics. The department is responsible for statistical and biomathematical training in the medical curriculum.

The department's orientation is away from abstract modeling and toward theoretical research vital to the advancement of current biomedical research frontiers. The doctoral program reflects this in requirements for advanced training in a biomedical research specialty and for the mathematical and computing skills required to contend realistically with complex phenomena encountered in biology and medicine. The art of biomathematical research is developed individually from the first year on. The master's program adapts to the various needs of researchers desiring supplemental biomathematical training, people preparing to provide methodological support to researchers in biology or medicine, or students pursuing a stepwise approach to graduate training in biomathematics.

Graduate Study

The following constitutes introductory information regarding graduate degree programs. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degree**Admission**

High academic achievement in one scientific or mathematical field is required. It is not nec-

Elliot M. Landaw, M.D., Ph.D., *Vice Chair*
Nathaniel Schenker, Ph.D.
A. James Sneyd, Ph.D.

essary to be proficient in both mathematics and biology, though some prior preparation in both fields is desirable. Both the General and Subject Tests of the Graduate Record Examination (GRE) should be taken. At least three letters of recommendation are required from faculty competent to evaluate qualifications for pursuing graduate study and a creative research career; additional letters are welcomed and may be requested.

In addition to completing the *Application for Graduate Admission*, applicants are required to complete a departmental application form, which should be sent directly to the department. All communications with the department, including requests for brochures and for the departmental forms, should be sent to Chair, Graduate Admissions Committee, Department of Biomathematics, at the address given at the beginning of this listing.

Admission to the Master of Science in Biomathematics program follows admission to the Graduate Division and approval by the departmental graduate admissions committee.

Course Requirements

Master's candidates must complete five graduate-level courses in biomathematics, three of which must be chosen from Biomathematics 201, 202, 203, and 204. If any of these five courses were completed as an undergraduate, the student may petition the department to count them in fulfillment of this requirement of specific background in biomathematics; however, in accord with Academic Senate regulations, they cannot be applied toward the minimum requirements stated below for the master's degree.

The master's candidate must complete the University minimum requirement of nine (36 units) of graduate and upper division courses taken in graduate standing, five (20 units) of which must be graduate courses. No more than two 596 courses may be applied toward the required nine courses, and none may be applied toward the graduate course requirement.

Comprehensive Examination Plan

A written comprehensive examination administered by a committee consisting of at least three faculty members appointed by the chair, with approval of the advising committee chair, covers material presented in the coursework. This is usually given during the summer.

Thesis Plan

Generally, students are required to follow the comprehensive examination plan. Permission to undertake a thesis plan must be given by the departmental advisory committee, which must approve the thesis committee, as well as plans for the thesis.

Doctoral Degree

Admission

High academic achievement in one scientific or mathematical field is required. It is not necessary to be proficient in both mathematics and biology, though some prior preparation in both fields is desirable. Both the General and Subject Tests of the Graduate Record Examination (GRE) should be taken. At least three letters of recommendation are required from faculty competent to evaluate qualifications for pursuing graduate study and a creative research career; additional letters are welcomed and may be requested.

In addition to completing the Graduate Admissions Office forms, applicants are required to complete a departmental application form, which should be sent directly to the department. All communications with the department, including requests for brochures and for the departmental forms, should be sent to Chair, Graduate Admissions Committee, Department of Biomathematics, at the address given at the beginning of this listing.

Admission to the doctoral program follows admission to the Graduate Division and approval by the departmental graduate admissions committee.

Major Fields or Subdisciplines

Students must complete the requirements for a field of special emphasis in biology. Presently approved fields of special emphasis for which courses of study have been developed include genetics, immunology, molecular biology, neurosciences, pharmacology, and physiology. Others may be added in response to requests from students.

Course Requirements

The following courses are required: Biomathematics 201, 202, 203, 204, and eight units from 205, 206, 207, 208A, 220, M230.

Applied Mathematics. Five graduate courses with a grade-point average of 3.6 or better from an approved list, with two substitutions possible if especially appropriate to the student's research field. These courses should be approved in advance by the graduate advising committee. Consent may be given by the advising committee to count prior graduate courses for full or partial completion of this requirement. Pluses attached to a letter grade add .3 and minuses subtract .3. Students who take more than the minimum five courses are allowed to average their best five grades to meet the standard. At the discretion of the departmental advising committee, the grade-point standard can be relaxed if there is evidence of superior attainments in all other aspects of a student's training.

Biology. No formal requirement beyond preparation for the field of major biological emphasis.

Independent Research. Students are encouraged to take at least four units of Biomathe-

matics 596 with a member of the Biomathematics Department each year prior to taking the written comprehensive examination. As students progress, there is an increasing emphasis on research and encouragement to publish. Failure to advance in capacity for independent, creative research is a primary indication for recommended withdrawal from the program.

The following courses are recommended:

Mathematics. By individual study or coursework, students should have strength in linear algebra, differential equations, probability and statistics, and real and complex analysis. Offerings in the Department of Mathematics are especially recommended.

Statistics. Additional training in biostatistics is highly recommended.

Computer Methods. Students must be facile programmers and acquainted with numerical methods needed for their area of research. The numerical analysis sequence in the Department of Mathematics or supervised independent study is suggested.

Biology and Biological Chemistry. A broad background is expected, from molecular to organ-system levels. This probably will be provided in requirements for the field of major biological emphasis; supplemental coursework will be advised, if needed.

Written and Oral Qualifying Examinations

In the summer, the department offers a written comprehensive examination to test competence in biomathematics. Full-time students must take this by the end of two academic years of study and part-time students by the end of three. (The brochure, *Policies for the Written Comprehensive Examinations for the Doctorate in Biomathematics*, is available from the department.)

The qualifying examination in the field of major biological emphasis usually is the regular comprehensive examination for doctoral students in the field and is taken prior to the examination that advances them to candidacy. Students entering with a Ph.D. in a biological field are exempt from the above requirements. Students with an M.D. are exempt from the required coursework; exemption from the examination may be granted by the advising committee.

If a medical school's basic sciences curriculum is approved by the advising committee, a student who has completed the first two years of that curriculum at a level of academic performance acceptable for continuation to clinical training and who has passed Part I of the National Board Examinations is deemed to have met the biological sciences requirements for the doctoral degree in biomathematics.

The University Oral Qualifying Examination, administered by the doctoral committee appointed by the dean of the Graduate Division, critically probes the quality, scope, and feasi-

bility of the student's proposed dissertation work. It also explores the strength and integration of the student's biomathematical, mathematical, and biological research knowledge in the intended area of research. Advancement to candidacy follows, after passing this examination.

Upper Division Courses

106. Introduction to Cellular Modeling. Lecture, four hours; computer laboratory, two hours. Prerequisites: Mathematics 32A, some computer programming, consent of instructor (undergraduates). Designed for upper division science majors and biomedical graduate students. Introduction to modeling cells and cell systems, including intracellular biochemical networks, applications to cancer research. How to develop one's own computer models using IMSL mathematics subroutines.

108. Introduction to Modeling in Neurobiology. Lecture, four hours; computer laboratory, two hours. Prerequisites: Mathematics 32A, some computer programming, consent of instructor (undergraduates). Designed for upper division science majors and biomedical graduate students. Survey of wide variety of topics in neurobiological modeling, current neuronal modeling systems. Development of skills to formulate and program one's own studies using IMSL mathematics subroutines. P/NP or letter grading.

110. Elements of Biomathematics. Lecture, three hours; laboratory, three hours. Prerequisite: calculus. Analysis of deterministic models. Conditions under which deterministic and probabilistic descriptions of biological phenomena are appropriate. Both approaches are applied to selected examples in physiology and biology.

M153A-M153B. Introduction to Computational Statistics. (Same as Biostatistics M153A-M153B and Statistics M153A-M153B.) Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 115A, Statistics 152B. Linear and nonlinear regression analysis using package programs. Emphasis on relation between statistical theory, numerical results, and analysis of data. **M153A.** BMDP, SAS, and SPSS regression programs; general linear model theory; linear regression analysis; transforming and weighting; regression diagnostics; model building. **M153B.** Analysis of variance and covariance; nonlinear regression programs, analysis, and applications; maximum likelihood analysis; robust regression.

160. Introductory Biomathematics for Medical and Biological Research. Lecture, four hours; discussion, 90 minutes. Elementary statistics course that focuses on statistical concepts and critiques the literature, with emphasis on clinical research. Output from statistical computer packages discussed in class, but students do not use the computer themselves. Topics include descriptive statistics, t-tests, confidence intervals, linear regression and correlation, analysis of variance, nonparametric statistics, basic experimental design, sample size determination, article interpretation.

170A. Computer-Based Introductory Biomathematics for Medical and Biological Experimenters. Lecture, four hours; discussion, 90 minutes. Intensive elementary statistics course emphasizing design of experiments and analysis of data using statistical packages. Statistical topics similar to course 160 — descriptive statistics, t-tests, confidence intervals, linear regression and correlation, analysis of variance, nonparametric statistics, basic experimental design, sample size determination — but students also shown how to use the computer and run statistical software packages. Practical aspects of data collection and cleaning.

170B. Statistical and Mathematical Modeling in Medical and Biological Research. Lecture, four hours; discussion, 90 minutes. Second course in biomathematical methods. Topics include randomization methods, intermediate experimental design, contingency table analysis, analysis of variance, multiple linear regression, nonlinear regression, methods of classification, model checking, basic mathematical models including compartment models, and statistical computer software. Students have opportunity to design their own experiments and analyze them on the computer, and to analyze previously collected data.

172. Clinical Trials. Lecture, three hours; discussion, two hours. Prerequisite: Biostatistics 100C or 100D or Statistics 152B or equivalent. Topics include steps in bringing a possible therapy to clinical use; design of studies in animals to assess antitumor response; randomization, historical controls, p-values, size of study, stratification, and points; ethics of human experimentation; informed consent; three phases of human studies; indications for various types of controls, prognostic factors, survivorship studies, design of prognostic studies; organization of a clinical trial — administration, comparability, protocols, nursing and clinical standards, data collection and management.

190HA-190HB. Honors Research in Biomathematics. Prerequisites: upper division standing, consent of instructor and department chair. Individual research in some aspect of biomathematics designed to acquaint students in depth with mathematical models and computer applications in biology. Must be taken for at least two terms and for a total of at least eight units. Thesis required.

199. Special Studies in Biomathematics (2 to 8 units). Prerequisites: upper division standing, consent of instructor. Special studies in biomathematics, including either reading assignments or laboratory work or both, designed for proper training of students.

Graduate Courses

200. Research Frontiers in Biomathematics (2 units). Prerequisite: consent of instructor. Series of presentations by faculty members on research frontiers in biomathematics. S/U or grading.

201. Deterministic Models in Biology. Prerequisite: knowledge of linear algebra and differential equations. Examination of conditions under which deterministic approaches can be employed and conditions where they may be expected to fail. Topics include compartmental analysis, enzyme kinetics, physiological control systems, and cellular/animal population models.

202. Fourier Analysis in Biology. Prerequisite: knowledge of calculus, linear algebra, and probability. Introduction to theory of Fourier transforms and Fourier series from point of view of generalized functions. Elementary applications to differential equations, quantum mechanics, image reconstruction, X-ray crystallography, branching processes, and time series. Brief review of computational techniques based on fast Fourier transform.

203. Stochastic Models in Biology. Prerequisite: Mathematics M150A or equivalent experience in probability. Mathematical description of biological relationships, with particular attention to areas where conditions for deterministic models are inadequate. Examples of stochastic models from genetics, physiology, ecology, and a variety of other biological and medical disciplines.

204. Biomedical Data Analysis. Prerequisite: consent of instructor. Quantity and quality of observations have been greatly affected by present-day extensive use of computers. Problem-oriented study of latest methods in statistical data analysis and use of such arising in laboratory and clinical research.

205. Electric Potential Problems in Membranes, Cells, and Tissues. Prerequisite: knowledge of differential equations and electrostatics, or consent of instructor. Review of electrostatics; potential problems in rectangular, spherical, and cylindrical coordinates; modeling subthreshold electrical properties of cells; microelectrode measurements of intracellular potentials; boundary conditions for current flow across membranes; eigenfunction expansions and singular perturbation analysis of intracellular and extracellular potential distribution in spherical and cylindrical cells and syncytia; computation of potential barriers for ions traversing a membrane pore.

206. Introduction to Mathematical Oncology. Lecture, four hours; computer laboratory, two hours. Prerequisites: ordinary, partial differential equations, and one computer programming course or consent of instructor. Deterministic and stochastic modeling of cell metabolism, colony growth, and responses to radio-, chemo-, and immuno-therapeutic agents applied to carcinogenesis, therapy, emergence of resistance to therapy. Simulation, optimization methods introduced. Current literature review. S/U or letter grading.

207. Models in Genetics. (Formerly numbered 207A, 207B.) Lecture, three hours; discussion, one hour. Prerequisite: upper division probability and statistics; knowledge of basic genetics principles helpful. Topics include population genetics, genetic epidemiology, gene mapping, design of genetics experiments, DNA sequence analysis, and molecular phylogeny. Content varies from year to year.

208A. Modeling in Neurobiology for Mathematicians. (Formerly numbered 208.) Lecture, four hours; laboratory, two hours. Prerequisites: introductory ordinary, partial differential equations, programming experience. Introduction to electrochemical bases for nerve function and mathematical and computational methods for studying this, appropriate for physicists, engineers, and mathematicians. Survey of current leading research areas and software systems. S/U or letter grading.

208B. Modeling in Neurobiology for Biologists. (Formerly numbered 208.) Lecture, four hours; laboratory, two hours. Prerequisites: lower division calculus, some elementary programming experience. Introduction to neuronal modeling, including how to formulate models and study them with existing computer software (e.g., NODUS) or one's own simple programs that use IMSL subroutines. Survey of current leading research areas. S/U or letter grading.

211. Advanced Topics in Differential Equation Modeling in Biology. Prerequisite: course 201 or consent of instructor. Advanced topics in mathematical physiology, population biology, pattern formation, and biological excitable systems. Analytical and numerical approaches. Taught from research papers. S/U or letter grading.

220. Kinetic and Steady State Models in Pharmacology and Physiology. Recommended: knowledge of linear algebra, differential equations, and statistics. Designed for biologists and theoreticians. Modeling and data analysis in pharmacokinetics, enzyme kinetics, and endocrinology. Topics include compartmental and noncompartmental approaches, steady state analysis of transport and binding processes, and optimal experiment design.

M230. Computed Tomography: Theory and Applications. (Same as Radiological Sciences M230.) Prerequisite: consent of instructor. Computed tomography is a three-dimensional imaging technique being widely used in radiology and is becoming an active research area in biomedicine. Basic principles of computed tomography (CT), various reconstruction algorithms, special characteristics of CT, physics in CT, and various biomedical applications.

M231. Statistical Methods for Categorical Data. (Same as Biostatistics M210.) Lecture, three hours; discussion, one hour. Prerequisites: Biostatistics 100B or 110B, Statistics 152C or equivalent. Statistical techniques for analysis of categorical data; discussion and illustration of their applications and limitations.

M232. Statistical Analysis of Incomplete Data. (Same as Biostatistics M232.) Lecture, three hours; discussion, one hour. Prerequisite: Statistics 152C or equivalent. Discussion of statistical analysis of incomplete data sets, with material from sample survey, econometric, biometric, psychometric, and general statistical literature. Topics include treatment of missing data in statistical packages, missing data in ANOVA and regression imputation, weighting, likelihood-based methods, and nonrandom nonresponse models. Emphasis on application of methods to applied problems, as well as on underlying theory. S/U or letter grading.

M234. Applied Bayesian Inference. (Same as Biostatistics M234.) Lecture, three hours; discussion, one hour. Prerequisites: Biostatistics 200C, Statistics 152C. Bayesian approach to statistical inference, with emphasis on biomedical applications and concepts rather than mathematical theory. Topics include large sample Bayes inference from likelihoods, noninformative and conjugate priors, empirical Bayes, Bayesian approaches to linear and nonlinear regression, model selection, Bayesian hypothesis testing, and numerical methods. S/U or letter grading.

M270. Optimal Parameter Estimation and Experiment Design for Biomedical Systems. (Same as Computer Science M296B and Medicine M270D.) Lecture, four hours; outside study, eight hours. Prerequisite: Computer Science M296A or consent of instructor. Estimation methodology and model parameter estimation algorithms for quantifying (fitting) dynamic system models to real-world data. Theory and algorithms for designing optimal experiments for developing and quantifying models, with special focus on data sampling schedule design. Exploration in PC laboratory of applications software for model building and optimal experiment design.

273. Stochastic Modeling in Molecular Cellular Biophysics. Lecture, three hours; discussion, one hour. Prerequisite: Mathematics M150A or equivalent experience in probability, lower division physics, or physical chemistry. Most molecular systems are large collections of molecules; behavior of such a system is stochastic. Mathematical descriptions of biochemical reactions with and without energy dissipation, molecular structures, and biophysical techniques which measure various biological processes.

M280. Statistical Computing. (Same as Biostatistics M280 and Mathematics M280.) Lecture, three hours. Prerequisites: Mathematics 115A, Statistics 152C, or equivalent. Introduction to theory and design of statistical programs: computing methods for linear and nonlinear regression, dealing with constraints, robust estimation, and general maximum likelihood methods.

M281. Survival Analysis. (Same as Biostatistics M215.) Lecture, three hours; discussion, one hour. Prerequisites: Biostatistics 110B, Statistics 152C. Statistical methods for analysis of survival data. S/U or letter grading.

M282. Analysis of Repeated Measures Designs (5 units). (Same as Biostatistics M236.) Lecture, four hours; discussion, two hours. Prerequisites: Biostatistics 200A, 200B. Presentation of classical and modern theories for analysis of repeated measures designs, with focus on computation and robustness. S/U or letter grading.

596. Directed Individual Study or Research in Biomathematics (2 to 12 units). Individual study on topics not yet covered by offerings of department. May be repeated for credit with topic change.

597. Preparation for M.S. or Ph.D. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units). Prerequisite: consent of graduate adviser. Individual study. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (2 to 12 units). Prerequisite: consent of instructor. S/U grading.

BIOSTATISTICS

School of Public Health

UCLA

51-254 Center for the Health Sciences
Box 951772
Los Angeles, CA 90095-1772

Professors

Abdelmonem A. Afifi, Ph.D., *Dean*
Potter C. Chang, Ph.D.
William G. Cumberland, Ph.D.
Robert M. Elashoff, Ph.D., *Chair*
Donald Guthrie, Ph.D., *in Residence*
Robert I. Jennrich, Ph.D.
Jeremy M.G. Taylor, Ph.D., *in Residence*
Virginia A. Clark, Ph.D., *Emerita*
Wilfrid J. Dixon, Ph.D., *Emeritus*
Olive Jean Dunn, Ph.D., *Emerita*
Raymond J. Jessen, Ph.D., *Emeritus*
Frank J. Massey, Jr., Ph.D., *Emeritus*

Associate Professors

Dorota M. Dabrowska, Ph.D.
Virginia F. Flack, Ph.D.
Nathaniel Schenker, Ph.D., *Vice Chair*

Assistant Professors

Thomas R. Belin, Ph.D., *in Residence*
Robert E. Weiss, Ph.D.
Weng Kee Wong, Ph.D.

Lecturers

Martin L. Lee, Ph.D.
Jean L. Mickey, Ph.D., *Emerita*

Adjunct Associate Professors

Frederick J. Dorey, Ph.D.
James W. Sayre, Dr.P.H.

Adjunct Assistant Professors

Cheryl L. Faucett, Ph.D.
David W. Gjertson, Ph.D.
Hong Qian, Ph.D.
Janet Sinsheimer, Ph.D.
Hongyu Zhao, Ph.D.

Scope and Objectives

In recent years biostatistics has become one of the most stimulating areas of applied statistics. The field encompasses the methodology and theory of statistics as applied to problems in the life and health sciences. Biostatisticians are trained in the skilled application of statistical methods to the solution of problems encountered in public health and medicine. They collaborate with scientists in nearly every area related to health and have made major contributions to our understanding of AIDS, cancer, and immunology, as well as other areas. Further, biostatisticians spend a considerable amount of time developing and evaluating the statistical methodology used in those projects. The Department of Biostatistics offers M.S. and Ph.D. degrees in Biostatistics and, through the School of Public Health, the M.P.H. and Dr.P.H. degrees with a specialization in biostatistics (see Public Health Schoolwide Programs). All students receive a balanced education, blending theory and practice.

Graduate Study

The following constitutes introductory information regarding graduate degree programs. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degree

Admission

Applicants to the Master of Science program in Biostatistics must have completed a bachelor's degree. Majors in mathematics, computer science, or a field of application in biostatistics are preferred. Undergraduate preparation for the program should include Mathematics 31A, 31B, 32A, 32B, 33A, 33B (second-year calculus) or equivalent.

See the Master of Public Health (M.P.H.) Admission section under Public Health Schoolwide Programs. Admission requirements for the Master of Science in Biostatistics are the same as for the M.P.H.

Areas of Study

Consult the graduate adviser for the areas of specialization. Typical course plans are listed below.

Course Requirements

The M.S. degree requires a minimum of nine graduate and upper division courses, of which at least five must be graduate courses (200 and 500 series). The five required graduate courses must be in biostatistics or mathematical statistics, including at least three courses in biostatistics.

Two-Year Plan. Unless previously taken, the following courses must be included in the degree program: Biostatistics 110A, 110B, 115, 200A, 200B-200C, M215, 240A, 240B, 402A, 402B, 596; any three special topics courses from Biostatistics M210 through 214, 230, 231, M232, M234; and all courses numbered 250 and above, such that at least one of these three courses is in the 200 series; Statistics M152A, 152B.

Other courses in biostatistics or mathematical statistics, or in related areas such as biology, physiology, public health, management, or mathematics, are selected with the adviser's consent and approved by the chair.

A written report and written comprehensive examination covering the above course material must be passed.

One-Year Plan. The one-year plan is recommended only for exceptional students who have had a year course in probability and theoretical statistics plus one or more courses in applied statistics.

The following courses must be included in the degree program: Biostatistics 200A, 200B-200C, M215, 240A, 240B, 402A, 402B; two special topics courses in the numbered course

sequence defined in the two-year plan; Biostatistics 596.

A written report and written comprehensive examination covering the above course material must be passed.

Comprehensive Examination Plan

The written comprehensive examination covers the content of the required courses. No more than one reexamination after failure is allowed. Students who do not take the reexamination at the time specified by the department forfeit their right to reexamination.

Thesis Plan

None.

Doctoral Degree

Admission

Qualifications for admission are those currently specified by the Graduate Division. Normally, students receive an M.S. in Biostatistics at UCLA before admission to the Ph.D. program.

See the Doctor of Public Health (Dr.P.H.) Admission section under Public Health School-wide Programs. Admission requirements for the Ph.D. in Biostatistics are the same as for the Dr.P.H.

Major Fields or Subdisciplines

Consult the graduate adviser.

Course Requirements

Unless previously taken, the following courses must be included in the degree program: Biostatistics M250A-M250B, 251, 255; Mathematics 276A-276B; and at least three special topics courses from the Biostatistics 230, 270, and 280 series. Some substitution is accepted from courses in mathematics and biomathematics. In addition, the student's full program of study must be approved by the department and must include, at the graduate level, three areas of knowledge: biostatistics, mathematical statistics, and a third field such as biology, epidemiology, infectious diseases, medicine, microbiology, pharmacology, physiology, psychology, zoology, or public health. Students are required to participate in the biostatistics consulting laboratory for one term each year and in the advanced seminar in biostatistics each year.

Written and Oral Qualifying Examinations

Written qualifying examinations in biostatistics and mathematical statistics are taken before advancement to candidacy and can be repeated once only. The mathematical statistics examination is taken in the spring of the first year in residence; if failed, it must be retaken the following October. The written qualifying examination is taken in Fall Quarter of the second year.

A doctoral committee is nominated when the student is ready to take the University Oral Qualifying Examination. The doctoral committee consists of at least four faculty members who hold professorial appointments. Two of the faculty must be tenured. Two of the four must hold appointments in Public Health; one must be an outside member who holds no appointment in Public Health; one of the four must be from the minor field.

The University Oral Qualifying Examination is taken before advancement to candidacy and after successful completion of the written examinations. Administered by the doctoral committee, it is usually a defense of the dissertation proposal. A failed examination may be repeated once. The timing of reexaminations is specified by the department in the case of written examinations or by the student's committee in the case of the oral examination. Students who do not take the reexaminations at the specified time forfeit their right to reexamination.

Upper Division Courses

100A. Introduction to Biostatistics. Lecture, three hours; discussion, one hour; laboratory, one hour. Prerequisites: upper division standing, one biological or physical sciences course. Students who have completed courses in statistics may enroll only with consent of instructor. Not open for credit to students with credit for course 110A. Introduction to methods and concepts of statistical analysis. Sampling situations, with special attention to those occurring in biological sciences. Topics include distributions, tests of hypotheses, estimation, types of error, significance and confidence levels, sample size.

100B. Introduction to Biostatistics. Lecture, three hours; discussion, one hour; laboratory, one hour. Prerequisite: course 100A or equivalent. Not open for credit to students with credit for course 110B. Introduction to analysis of variance, linear regression, and correlation analysis.

100C. Introduction to Biostatistics. Lecture, three hours; discussion, one hour; laboratory, one hour. Prerequisite: course 100B or equivalent. Design of experiments, analysis of variance, multiple and polynomial regression analysis with biomedical applications.

100D. Introduction to Biostatistics. Lecture, three hours; laboratory, two hours. Prerequisite: course 100B or equivalent. Introduction to concepts of probability used in biomedical sciences. Enumeration statistics and nonparametric methods. Comparison of nonparametric with analogous parametric tests. Discussion of power and sample size.

110A. Basic Biostatistics. (Formerly numbered 101A.) Lecture, three hours; discussion, one hour; laboratory, one hour. Prerequisite: Mathematics 31B or equivalent. Not open for credit to students with credit for course 100A. Basic concepts of statistical analysis applied to biological sciences. Topics include random variables, sampling distributions, parameter estimates, statistical inference.

110B. Basic Biostatistics. (Formerly numbered 101B.) Lecture, three hours; discussion, one hour; laboratory, one hour. Prerequisite: course 110A. Not open for credit to students with credit for course 100B. Topics include elementary analysis of variance, simple linear regression; topics related to analysis of variance and experimental designs.

115. Topics in Estimation. (Formerly numbered 110C.) Lecture, three hours; discussion, one hour. Prerequisites: Statistics M152A, 152B. Small and large sample properties of common estimation techniques arising in biostatistical application.

M153A-M153B. Introduction to Computational Statistics. (Formerly numbered M101D-M101E.) (Same as Biomathematics M153A-M153B and Statistics M153A-M153B.) Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 115A, Statistics 152B. Linear and nonlinear regression analysis using package programs. Emphasis on relation between statistical theory, numerical results, and analysis of data. **M153A.** BMDP, SAS, and SPSS regression programs; general linear model theory; linear regression analysis; transforming and weighting; regression diagnostics; model building. **M153B.** Analysis of variance and covariance; nonlinear regression programs, analysis, and applications; maximum likelihood analysis; robust regression.

199. Special Studies (2 to 4 units). Prerequisites: senior standing, consent of instructor and department chair (based on written proposal outlining course of study). Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only four units may be taken each term.

Graduate Courses

200A. Biostatistics. Lecture, three hours; discussion, one hour; laboratory, one hour. Prerequisites: courses 100A, 100B, and 100C, or 110A, 110B, and 115. Topics in methodology of applied statistics, such as design, analysis of variance, regression. S/U or letter grading.

200B-200C. Biostatistics. Lecture, three hours; discussion, one hour; laboratory, one hour. Prerequisites: courses M153A, 200A. S/U or letter grading. **200B.** Multiple linear regression, including model validation, influence of observations, regression diagnostics; discriminant analysis; principal components; factor analysis and clinical trials. **200C.** Measures of association and analysis of categorical data, theory of generalized linear models.

M210. Statistical Methods for Categorical Data. (Formerly numbered M201E.) (Same as Biomathematics M231.) Lecture, three hours; discussion, one hour. Prerequisites: course 100B or 110B, Statistics 152C or equivalent. Statistical techniques for analysis of categorical data; discussion and illustration of their applications and limitations.

212. Distribution Free Methods. (Formerly numbered 201F.) Lecture, three hours; discussion, one hour. Prerequisites: course 100B or 110B, Statistics 152C, or equivalent. Theory and application of distribution free methods in biostatistics.

213. Statistical Simulation Techniques. (Formerly numbered 201G.) Lecture, three hours; discussion, one hour. Prerequisites: Statistics 152C, one computer programming course. Techniques for simulating important statistical distributions, with applications in biostatistics. S/U or letter grading.

214. Finite Population Sampling. (Formerly numbered 201H.) Lecture, three hours. Prerequisites: course 110B, Statistics 152B. Theory and methods for sampling finite populations and estimating population characteristics. S/U or letter grading.

M215. Survival Analysis. (Formerly numbered M201K.) (Same as Biomathematics M281.) Lecture, three hours; discussion, one hour. Prerequisites: course 110B, Statistics 152C. Statistical methods for analysis of survival data. S/U or letter grading.

216. Introduction to Statistical Methods for Biological Assays. (Formerly numbered 201M.) Lecture, three hours. Prerequisite: Statistics 152B. Topics include standard statistical procedures for estimation of relative potency, density of microorganisms, and density of radioactivity, models used for these procedures, and statistical considerations for designing such assays. S/U or letter grading.

219. Special Topics: Supplemental Topics. (Formerly numbered 201J.) Lecture, three hours; discussion, one hour. Prerequisite: course 100C. Topics in biostatistics not covered in other courses.

230. Statistical Graphics. (Formerly numbered 202J.) Lecture, three hours; discussion, two hours. Prerequisites: courses 110A, 110B, 200A, or equivalent. Graphical data analysis emphasizes use of visual displays of quantitative data to gain insight into data structure by exploring patterns and relationships, and to enhance classical numerical analyses, especially assumption validity checking. Principles of graph construction, graphical methods, and perception issues. S/U or letter grading.

231. Simultaneous Statistical Inference. (Formerly numbered 202G.) Lecture, three hours; discussion, one hour. Prerequisites: courses 200C, M250A, Statistics 152C. Methods and theory of simultaneous statistical inference.

M232. Statistical Analysis of Incomplete Data. (Formerly numbered M202F.) (Same as Biomathematics M232.) Lecture, three hours; discussion, one hour. Prerequisite: Statistics 152C or equivalent. Discussion of statistical analysis of incomplete data sets, with material from sample survey, econometric, biometric, psychometric, and general statistical literature. Topics include treatment of missing data in statistical packages, missing data in ANOVA and regression imputation, weighting, likelihood-based methods, and nonrandom nonresponse models. Emphasis on application of methods to applied problems, as well as on underlying theory. S/U or letter grading.

233. Statistical Methods in AIDS (2 units). (Formerly numbered 202K.) Prerequisites: courses 110A, 110B, M215, Mathematics M150A-150B, 151, or equivalent. Coverage of methods necessary to address statistical problems in AIDS research, including projection methods for the size of AIDS epidemic and methods for estimating incubation distribution. S/U or letter grading.

M234. Applied Bayesian Inference. (Formerly numbered M202H.) (Same as Biomathematics M234.) Lecture, three hours; discussion, one hour. Prerequisites: course 200C, Statistics 152C. Bayesian approach to statistical inference, with emphasis on biomedical applications and concepts rather than mathematical theory. Topics include large sample Bayes inference from likelihoods, noninformative and conjugate priors, empirical Bayes, Bayesian approaches to linear and nonlinear regression, model selection, Bayesian hypothesis testing, and numerical methods. S/U or letter grading.

235. Causal Inference. Lecture, three hours; discussion, one hour. Prerequisite: course 200A. Selection bias, confounding, ecological paradox, contributions of Fisher and Neyman. Rubin model for causal inference, propensity scores. Analysis of clinical trials with noncompliance. Addressing confounding in longitudinal studies. Path analysis, structural equation, and graphical models. Decision making when causality is disputed.

M236. Analysis of Repeated Measures Designs (5 units). (Same as Biomathematics M282.) Lecture, four hours; discussion, two hours. Prerequisites: courses 200A, 200B. Presentation of classical and modern theories for analysis of repeated measures designs, with focus on computation and robustness. S/U or letter grading.

240A. Research Resources in Biostatistics (2 units). Lecture, three hours. Introduction to various resources available in statistical research, such as how to obtain access to current index in statistics and introduction to SUN workstation laboratory. Report on research paper in a recent statistics journal required. S/U or letter grading.

240B. Seminar for Second-Year Biostatistics Master's Students (2 units). Lecture, three hours. How to give an oral presentation on research results, including audiovisual techniques for a scientific talk and organization for short and long talks. Presentation of a paper from their current research related to their master's report required of students. S/U or letter grading.

245. Advanced Seminar: Biostatistics (2 units). (Formerly numbered 204F.) Prerequisite: course 200C. Current research in biostatistics. May be repeated for credit. S/U grading.

M250A-M250B. Linear Statistical Models. (Formerly numbered M205A-M205B-M205C.) (Same as Mathematics M279A-M279B.) Lecture, three hours; discussion, one hour. Prerequisite: one upper division three-term theoretical statistics course. Topics include linear algebra applied to linear statistical models, distribution of quadratic forms, Gauss/Markov theorem, fixed and random component models, balanced and unbalanced designs. S/U or letter grading.

251. Multivariate Biostatistics. (Formerly numbered 206A-206B.) Lecture, three hours; discussion, one hour. Prerequisite: course M250A or equivalent. Multivariate analysis as used in biological and medical situations. Topics from multivariate distributions, component analysis, factor analysis, discriminant analysis, MANOVA, MANCOVA, longitudinal models with random coefficients. S/U or letter grading.

255. Advanced Topics and Probability in Biostatistics. Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 276A-276B or consent of instructor. Topics include conditioning, modes of convergence, basic limit results for empirical processes, von-Mises calculus, and notions of efficiency in statistics. Applications cover M-L-R estimation in two-sample and regression models, goodness of fit methods, smoothing techniques, and bootstrap.

270. Stochastic Processes. (Formerly numbered 207E.) Lecture, three hours. Prerequisites: upper division mathematics, including statistics and probability. Stochastic processes applicable to medical and biological research.

271. Mathematical Epidemiology. (Formerly numbered 207F.) Lecture, three hours. Prerequisites: course 270 or equivalent, upper division mathematics (including statistics and probability). Mathematical theory of epidemiology with deterministic and stochastic models and problems involved in applying the theory.

275. Advanced Survival Analysis. (Formerly numbered 207K.) Lecture, three hours; discussion, one hour. Prerequisites: course 255, Mathematics 276A-276B. Recommended: course M215. Censoring and truncation, single sample problems, K-sample comparisons, Cox regression model, hazard rate and density estimation, estimation in Markov chains and Markov renewal processes, multivariate models, competing risks. S/U or letter grading.

276. Inferential Techniques that Use Simulation. (Formerly numbered 207M.) Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 276A-276B. Recommended: Biostatistics 213. Theory and application of recently developed techniques for statistical inference that use computer simulation. Topics include bootstrap, multiple imputation, data augmentation, stochastic relaxation, and sampling/importance resampling algorithm.

277. Robustness and Modern Nonparametrics. Lecture, three hours. Prerequisite: Mathematics 276A. Topics include M-estimation, influence curves, breakdown point, bootstrap, jackknife, smoothing, nonparametric regression, generalized additive models, density estimation.

M280. Statistical Computing. (Formerly numbered M207J.) (Same as Biomathematics M280 and Mathematics M280.) Lecture, three hours. Prerequisites: Mathematics 115A, Statistics 152C, or equivalent. Introduction to theory and design of statistical programs: computing methods for linear and nonlinear regression, dealing with constraints, robust estimation, and general maximum likelihood methods.

285. Advanced Topics: Recent Developments. (Formerly numbered 207L.) Lecture, three hours; discussion, one hour. Advanced topics and developments in biostatistics not covered in Biostatistics M210 through 219 or 270 through 276 or in other courses. Possible topics include time-series analysis, classification procedures, correspondence analysis, etc. S/U or letter grading.

295. Application of Statistical Theories in Biomedical Research. Lecture, three hours; discussion, one hour. Prerequisite: Statistics 152C or 154B. Review of statistical theories essential to biostatistics. Illustration of applications by examples. Topics include delta method, order statistics, asymptotic properties of MLEs, iterative algorithms for MLEs, generalized likelihood ratio tests for categorical data, and transformations.

296A-296Z. Seminars: Research Topics in Biostatistics. Discussion, two hours. Prerequisite: consent of instructor. Advanced study and analysis of current topics in biostatistics. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

400. Field Studies in Biostatistics (2 or 4 units). Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; four units may be applied toward 44-unit minimum total required for M.P.H. degree.

402A. Principles of Biostatistical Consulting (2 units). Lecture, one hour; discussion, one hour. Prerequisites: course 100B or 110B and Statistics 152B. Presentation of structural format for statistical consulting. Role of statistician and client. Reviews of actual statistician/client interactions and case studies.

402B. Biostatistical Consulting. Discussion, two hours; laboratory, two hours. Prerequisite: course 402A. Principles and practices of biostatistical consulting. May be repeated for credit. S/U grading.

403. Computer Management of Health Data. Lecture, three hours; laboratory, two hours. Prerequisites: at least one statistics course, two research methodology courses, Program in Computing 1 or equivalent, consent of instructor. Concepts of health data management, design and maintenance of large databases on tapes or disks; computing tools and techniques facilitating data retrieval for statistical analysis, tabulation and report generation useful to biostatisticians, health planners, and other health professionals.

404. Principles of Sampling. Lecture, three hours; discussion, one hour. Prerequisites: course 100B, Epidemiology 100, or equivalent. Statistical aspects of design and implementation of a sample survey. Techniques for analysis of data, including estimates and standard errors. Avoiding improper use of survey data.

405. Demographic Materials and Methods. Lecture, three hours; laboratory, two hours. Prerequisite: course 100A or 110A. Sources of demographic information; description of human populations; calculation and interpretation of statistics used to measure and describe population growth, structure, geographic distribution, mortality, natality, and migration. S/U or letter grading.

406. Applied Multivariate Biostatistics. Lecture, three hours; laboratory, one hour. Prerequisites: course 100B, at least two other upper division research courses. Use of multiple regression, principal components, factor analysis, discriminant function analysis, logistic regression, and canonical correlation in biomedical data analysis. S/U grading optional for nondivision majors.

410. Statistical Methods in Clinical Trials. (Formerly numbered 401E.) Lecture, three hours; discussion, two hours. Prerequisite: course 100C or 100D or Statistics 152C or equivalent. Design of studies in animals to assess antitumor response; randomization, historical controls, p-values, size of study, and stratification in human experimentation; various types of controls; prognostic factors, survivorship studies, and design of prognostic studies; organization of clinical trials—administration, comparability, protocols, clinical standards, data collection and management. S/U grading optional for nondivision majors.

411. Statistical Methods for Longitudinal Data. (Formerly numbered 401F.) Lecture, three hours. Prerequisites: course 100C or 100D or Statistics 152C or equivalent, Epidemiology 100. Design and analysis of longitudinal or panel studies. S/U grading optional for non-division majors.

412. Statistical Methods for Case-Control Studies. (Formerly numbered 401G.) Lecture, three hours. Prerequisites: courses 100C and 100D, or 115. Statistical designs, sampling statistics, and analytic models of case-control studies. Special topics such as exploratory analyses, multiplicity of analyses, cross-validation, small sample performance of variance estimators, measurement error in the covariates, and incomplete data. S/U or letter grading.

419. Special Topics: Applied Statistics. (Formerly numbered 401H.) Lecture, three hours; discussion, one hour. Prerequisite: course 100C. Special topics in applied statistics not covered in other courses in professional series.

420. Database Management Systems. (Formerly numbered 203A.) Lecture, three hours; laboratory, two hours. Prerequisite: course 403 or equivalent. Database and database models applied to medical and public health studies; design of databases for efficient data retrieval and statistical analysis using package database management and statistical package programs.

421. Systems Analysis for Health Data. (Formerly numbered 203B.) Lecture, three hours; laboratory, two hours. Prerequisite: course 420. Health data computer processing as a total system; review of selected health information systems, statistical packages, and computer languages; design, development, testing, and maintenance of a computer system for managing health data.

495. Teacher Preparation in Biostatistics (2 units). Prerequisites: 18 units of cognate courses in area of specialization, consent of department chair. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

502. UCLA/Hawaii Western Consortium Exchange (4 to 16 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken at University of Hawaii, Manoa, as part of UCLA/UH Western Consortium Exchange Program. Only the equivalent of eight quarter units taken at UH may be applied toward degree. Extra units may be applied toward department requirements by petition to Public Health Student Affairs Office. UH letter-graded courses appear on UCLA transcript with letter grades, while UH Cr/NCR-graded courses appear as S/U grades. Grade points from these courses are not counted in UCLA grade-point average.

596. Directed Individual Study or Research (2 to 8 units). Prerequisite: graduate standing. Individual guided studies under direct faculty supervision. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit.

597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations (2 to 8 units). Prerequisite: graduate standing. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

598. Master's Thesis Research (2 to 8 units). Only four units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

599. Doctoral Dissertation Research (2 to 8 units). May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

Additional Coursework for Students Interested in Business and Administration

The specialization in business and administration is not a major, but a sequence of supplemental courses designed to prepare students for the complexities of a career in business and administration. Students complete one of the many majors in the College of Letters and Science, as well as a sequence of courses.

For example, if you are interested in international business, you might major in a foreign language to become familiar with the literature and culture of other countries, and then add this program to gain basic understanding of economics, accounting, and statistics. Other students interested in working for a governmental agency or nonprofit corporation might add this program to a social sciences major. Students with an interest in a liberal arts area, who are not planning to go to graduate school, may want to complete this program to prepare for a job in business while pursuing a major of their choice. (Note: This program may **not** be taken with any economics major.)

Completion of this program in addition to a Letters and Science major will give you the basic skills and knowledge most employers seek. Courses used to satisfy either the major or general education requirements may also be applied toward the requirements of this program.

A minimum grade of C - is necessary to apply courses to this program, with an overall C average in the specialization. All courses must be taken for a letter grade; the P/NP option is not acceptable. You may satisfy one of the field studies course requirements by completing an independent studies course (199), taken in an appropriate department with prior consent of the program faculty adviser. You also are required to seek guidance from a field studies coordinator in choosing and researching your topic.

To enter the specialization, you must file a petition with the College Counseling Service in the

College of Letters and Science. If you do not complete the program prior to graduation, you must petition out of the program to be eligible to graduate. (Such petitions are automatically granted; there is no penalty for not completing the program.) *All degree requirements, including the specific requirements for this specialization, must be fulfilled within 228 units.* A statement of completion is noted on your transcript and diploma when you have successfully completed the requirements for this specialization and for graduation.

For further information and help in assessing the appropriateness of this program and how it relates to your career/education goals, contact the College Counseling Service in the College of Letters and Science.

Core Courses

Required: Economics 1 and 2; Management 1A-1B; one statistics course; one mathematics course (except Mathematics A, 1, 38A, 38B, 104); two courses from English 4, 100, 110W, 129A through 129D, 131A through 131D, 132A through 132D, 136A, 136B, 136C (136A and 136B are In Progress courses; credit is given only on completion of both courses).

Analytical Skills

Required: Three courses from one of the following areas: (1) *quantitative methods and formal reasoning:* Anthropology 180, 186, Computer Science 141, Economics 141, 147A, 147B, Geography 171, Philosophy 9, 31, 32, Political Science 102, Program in Computing 10A, 10B, 10C, Psychology M142, 144, 150, 151, Sociology 104, 112, 113; (2) *administration:* Political Science M105, 142C, 143A, 143B, 145D, 146B, 146C, 146D, 151, 167B.

Field Studies

Required: Any three courses listed below, preferably from within **one** of the 10 fields (courses marked with an asterisk may **not** be applied toward this area if taken as part of the core):

(1) *Communications* — Communication Studies 100, 101, Sociology CM124A, CM124B, 135

(2) *Urban and Regional Development Studies* — Geography 148, M149, 150, 155, 157

(3) *Applied Psychology* — Linguistics 1 or 20, 10, Psychology 110, 111, 120, 121, 187A

(4) *Economy and Society* — Anthropology 60, 60P, 150, 167, History 149A, 149B, Political Science M141D, 142B, Psychology 175, Sociology 158, 168, 173

(5) *Economic Systems* — Economics 110, 180, 190, Political Science 124, 129, 130, Sociology 173

(6) *Professional Writing* — English 100,* 131A* through 131D,* 136A,* 136B*

(7) *Accounting* — Management 120A, 120B, 122, 123, 124, 127, 128

(8) *Artificial Intelligence* — Economics 141, 142, 148, Mathematics 142, 149, 172A, 172B

(9) *Operations Research* — Mathematics
115A, 115B, 141A, 141B

(10) *Labor Studies* — History 155A, 155B,
Political Science 142C, Psychology M137E,
Sociology 171

Visiting Professor

Jose Luis Valenzuela (*Theater*)

Scope and Objectives

Today there is a demand for individuals with extensive knowledge of the Chicano community. Opportunities exist in both the public and private sector that call for men and women academically prepared and aware of the history, culture, and current problems facing Chicano/Latino communities. The B.A. degree in Chicana and Chicano Studies provides students with the language and cross-cultural studies background that will enhance their qualifications for positions in schools, governmental organizations, and private enterprise.

Bachelor of Arts Degree

The B.A. program in Chicana and Chicano Studies is designed to provide systematic instruction for students who wish concentrated study of the Chicana/Chicano experience. Viewed as developmental, the program subjects the Chicana/Chicano reality to critical investigation, including social, economic, educational, historical, and political analysis. The major is recommended for students preparing for graduate study as well as for public service careers.

Preparation for the Major

Required: Chicana and Chicano Studies 10A, 10B, Spanish 5 or equivalent.

The Major

Required: A total of 15 upper division courses, including Chicana and Chicano Studies 101, nine courses from the approved list of Chicana and Chicano studies courses (available in the program office each term), one term of field studies, and three related study courses and one advanced seminar from the approved list of courses or by petition to the program director or undergraduate counselor. Related study includes courses with some Chicana/Chicano content, such as those on Mexico, Latin America, and the experiences of people of color in the U.S.

Recommended: English 110W; Library and Information Science 111C; the introductory course in two of the following: anthropology, economics, history, political science, sociology; one or more courses in Chicana/Chicano history, literature, feminism, social science.

Optional Multidisciplinary Senior Thesis — Prerequisite: senior standing. Chicana and Chicano studies majors have the option during their senior year to enroll in two 199 courses in their major concentration area, with the intention of producing a Chicana and Chicano studies undergraduate thesis related to the major concentration. Enrollment in the two 199 courses is with the advice and consent of a faculty member. The first term includes thesis conceptualization and formulation, along with preliminary data collection for the thesis. The second term entails completion of the data collection, analysis of the data, and termination of the thesis.

Course Limitations — No more than two 199 courses may be applied toward the major concentration; 199 courses applied toward the multidisciplinary senior thesis option may not also be applied toward the major concentration area. Registration in 199 courses must be approved in writing by the program director. No more than two CED courses may be applied toward the major concentration.

Chicana and Chicano Studies Specialization

The specialization complements study in a traditional field. Students participating in this program are required to complete both a departmental major and the Chicana and Chicano studies specialization. You must take Chicana and Chicano Studies 10A, 10B, 101, and four courses from the approved list of Chicana and Chicano studies courses (available in the program office each term).

Lower Division Courses

10A. Introduction to Chicano Life and Culture. Lecture, three hours; discussion, one hour. Enrollment priority to Chicana and Chicano studies majors. Introduction to central concepts and historical experiences which define Chicano culture, from exploring indigenous roots to examining current trends. Emphasis on diversity of the Chicano experience, gender as a central cultural variable, and particular socioeconomic conditions which have shaped cultural response.

10B. Chicanos in American Society. Lecture, three hours; discussion, one hour. Enrollment priority to Chicana and Chicano studies majors. Examination of conditions of Chicanos in the U.S., with particular attention to socioeconomic aspects of their experience. Additional emphasis on examination of role of women in both a family context and the workplace.

Upper Division Courses

101. Theoretical Concepts in Chicana and Chicano Studies. Lecture, three hours. Enrollment priority to Chicana and Chicano studies majors and students in the specialization. Examination of following theoretical concepts and practical concerns: self-definition, relationship between educational institutions and the Chicana/Chicano community, nature of critical Chicana/Chicano specific research, basic issues in Chicana/Chicano culture, and current problems facing the Chicano/Latino community.

M102. The Mexican American and the Schools. (Same as Education M102.) Prerequisite: consent of instructor. Review of research and teaching strategies. Analysis of school policies and practices and their effect on development of Mexican American and Chicano youth and communities.

M103C. Origins and Evolution of Chicano Theater. (Same as Theater M103C.) Lecture, three hours. Prerequisite: upper division standing. Exploration of development of Chicano theater from its beginning in legends and rituals of ancient Mexico to work of Luis Valdez (late 1960s).

M103D. Contemporary Chicano Theater. (Same as Theater M103D.) Lecture, three hours. Prerequisite: upper division standing. Study of recent trends in Chicano theater as reflected in works of contemporary Chicano dramatists and theater artists.

M105. The Chicano Experience in Literature. (Same as English M105.) Prerequisite: satisfaction of Subject A requirement. Study of literature in English by and about Chicanos. Survey of depiction of the Chicano experience in American literature generally, with emphasis on development of Chicano literature itself, its cultural backgrounds, and distinctive uses of language.

M108A. Music of Latin America: Mexico, Central America, and the Caribbean Isles. (Same as Ethnomusicology M108A.) Lecture, three hours. Prerequisite: consent of instructor. Survey of traditional and contemporary musical culture.

M110. Chicana Feminism. (Same as Women's Studies M132A.) Lecture, three hours. Prerequisite: Women's Studies 10 or consent of instructor. Examination of theories and practices of women who identify as "Chicana feminist." Analysis of writings of Chicanas who do not identify as feminist but whose practices attend to gender inequities faced by Chicanas both within the Chicana/Chicano community and the dominant society. Attention to Anglo-European and Third World women.

M114. Chicanos in Film/Video (6 units). (Same as Film and Television M117.) Lectures/screenings, eight hours; discussion, one hour. Examination of representation of Mexican Americans and Chicanos in four Hollywood genres — silent "greaser" films, social problem films, the Western, and the gang films — which are major genres that account for films "about" or "with" Mexican Americans produced between 1908 and 1980. Examination of recent Chicano-produced films that subvert or "signify" on these Hollywood genres, including *Zoot Suit*, *The Ballad of Gregorio Cortez*, and *Born in East L.A.* Consideration of shorter, more experimental work that critiques the Hollywood image of Chicanos.

M115. Musical Aesthetics in Los Angeles. (Same as Ethnomusicology M115.) Lecture, three hours. Confronting aesthetics from classical perspective of art as intuition, examination on a cross-cultural basis of diverse musical contexts within the vast multicultural metropolis of Los Angeles, with focus on various musical networks and specific experiences of the Chicano/Latino, African American, American Indian, Asian, rock culture, Western art music tradition, and the commercial music industry.

M116. Chicano/Latino Music in the U.S. (Same as Ethnomusicology M116.) Lecture, three hours. Prerequisite: consent of instructor. Historical and analytical examination of musical expression of Latino peoples that have inhabited present geographical boundaries of the U.S.

120. Immigration and the Chicano Community. Lecture, three hours. Discussion on relationship between international immigration and development of the Chicana/Chicano community. Examination of U.S. immigration policy and relationship between Mexican-origin population and other Latin American immigrants.

121. Issues in Latina/Latino Poverty. Lecture, three hours. Examination of nature and extent of urban and rural poverty confronting Latina/Latino population in the U.S. Special emphasis on antipoverty policies of government and nonprofit organizations and social planning and economic development strategies. Attention also to literature on the underclass.

122. Planning Issues in Latina/Latino Communities. Lecture, three hours. Exploration of socioeconomic, demographic, and political forces that shape low-income communities and analyses of planning intervention strategies. Emphasis on community and economic development and environmental equity.

125. U.S./Mexico Relations. Lecture, three hours. Examination of complex dynamics in relationship between Mexico and the U.S., using a political economy approach to study of asymmetrical integration between advanced industrial economies and developing countries.

131. Barrio Popular Culture. Lecture, three hours. Construction of a model by which to organize study of Chicano/Chicana popular culture by focusing on the barrio as a metaphor for community. Examination of beliefs, myths, and values of Chicano/Chicana culture and representations in icons, heroes, legends, stereotypes, and popular art forms through literature, film, video, music, mass media, and oral history.

132. Border Consciousness. Lecture, three hours. Investigation through history, popular culture, and mass media of bilingual and bicultural identities produced by geographical and cultural space between Mexico and the U.S. Special attention to border consciousness as site of conflict and resistance.

133. Chicana Lesbian Literature. Lecture, three hours. Exploration of intersection of radical First and Third World feminist politics, lesbian sexuality and its relationship to Chicana identity, representation of lesbianism in Chicana literature, meaning of *familia* in Chicana lesbian lives, and impact of Chicana lesbian theory on Chicana/Chicano studies.

134. Exhibiting Chicano/Chicana and Latino/Latina Cultures. Lecture, three hours. Cultural studies analyzing exhibitions of "minority" art that have occupied space in mainstream museums across the U.S. since the mid-1980s. Guiding questions include what mission does multiculturalism serve in the art world and how is multiculturalism an ethnographic method.

M145A-M145B. Introduction to Chicano Literature. (Formerly numbered M145.) (Same as Spanish M145A-M145B.) Lecture, three hours. Prerequisite: Spanish 25 or 25A. Recommended: Spanish 136B. Introduction to texts representative of the Chicano literary heritage. Sampling of genres, as well as historical and geographical settings and points of view characteristic of work written by Chicanos during the 20th century. Most required reading is in Spanish. Bilingual and English works are included and discussed. Reading and analysis of a number of important scholarly and critical statements pertaining to characteristics and development of the Chicano literary corpus.

M145A. Literature to 1960; **M145B.** Literature after 1960.

M146. Chicano Narrative. (Same as Spanish M146.) Lecture, three hours. Introduction to major narrative genres in Chicana/Chicano literary tradition — Corrido, Semblanza, chronicle, autobiography, novel, romance, and satire. Emphasis on way in which narrative forms are formed by and address specific social/historical problems.

M147A. Ethnic Politics: Chicano/Latino Politics. (Same as Political Science M144A.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: Political Science 40, and one 140-level political science course or one upper division course on race or ethnicity from history, psychology, or sociology, or consent of instructor. Introduction to political economy of racial domination in the U.S., concentrating on study of Mexican origin communities. Emphasis on identifying and explaining the historically changing relationship between class, race, and power by studying the interaction between state policies and practices, class and racial stratification systems, and cultural codes and modes of ideological discourse in each historical period.

M154. Contemporary Issues among Chicanas. (Same as Women's Studies M132B.) Prerequisite: Women's Studies 10 or consent of instructor. Overview of conditions facing Chicanas in the U.S., including issues on family, immigration, reproduction, employment conditions. Comparative analysis with other Latinas.

M155. Latinos in the U.S. (Same as Sociology M155.) Lecture, three hours; discussion, one hour. Prerequisites: Sociology 1 and junior standing, or consent of instructor. Exploration of history and social conditions of Latinos in Los Angeles as well as nationally, with particular emphasis on their location in the larger social structure and on comparisons with other minority groups. Topics include migration, family, education, and work issues. P/NP or letter grading.

M159A. History of the Chicano Peoples. (Same as History M159A.) Survey lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent (Indio-Mestizo-Mulato) north of the Rio through the 17th, 18th, and 19th centuries, with special focus on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical forces affecting the community. Social structure, economy, labor, culture, political organization, conflict, and international relations. Emphasis on social forces, class analysis, social, economic, and labor conflict, ideas, domination, and resistance. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and field research, and submission of a paper.

M159B. History of the Chicano Peoples. (Same as History M159B.) Survey lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent in the U.S. through the 20th century, with special focus on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical and policy issues affecting the community. Within a framework of domination and resistance, discussion deals with social structure, economy, labor, culture, political organization, conflict, and ideology. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and/or field research, and submission of a paper.

160. Language of U.S. Ethnic Minorities and Social Issues. Lecture, three hours. Overview of elements of, and social issues associated with, language use of urban ethnic populations. Topic include bilingual language acquisition, language change/decay, societal attitudes (including educational) toward nonstandard varieties, and sexism in language.

161. Sociolinguistics of U.S. Latinos. Lecture, three hours. Prerequisite: course 160. Development of major elements (and political issues) regarding Chicano/Chicana language. Topics include histories of American English, Mexican Spanish, and Chicano English/Spanish; Chicano language varieties and their complex sociolinguistic communities; bilingualism and education; issues of social instructions (e.g., law, medicine).

162. Urban Linguistic Methods. Lecture, three hours. Prerequisite: course 161. For ethnic- and self-understanding and community research, interviews are a critical but not instinctual technique. Introduction to oral history and sociolinguistic techniques — sampling, interviewing, observation. Group work required.

165. Language in Education. Lecture, three hours. Examination of language issues pertinent to educational systems, including language inequity, literacy, testing, and socialization, as well as institutional ideologies.

M172T. Ethnohistory of Hispanic Cultures in the U.S. Southwest. (Same as Anthropology M172T.) Lecture, three hours. Prerequisite: Anthropology 9 or consent of instructor. Ethnography of social and cultural adaptations of Hispanic peoples in the U.S. Southwest: their respective social organization, economic and political institutions, sacred and secular belief systems, and expressive cultures. P/NP (undergraduates), S/U (graduates), or letter grading.

197A-197Z. Special Topics in Chicana and Chicano Studies. Lecture, three hours. Some sections may require prior coursework or consent of instructor. Lecture or seminar format on selected topics in Chicana and Chicano studies. May be repeated for credit.

199. Independent Studies (2 to 4 units). Prerequisites: courses 10A, 10B, upper division standing, consent of interdepartmental Chicana and Chicano Studies Program faculty. Intensive directed research program. May be repeated for a maximum of eight units.

Related Courses in Other Departments

Related study includes courses with some Chicana/Chicano content, such as those on Mexico, Latin America, and the experiences of people of color in the U.S.

Anthropology 113Q. Prehistory and Ethnography of California

113R. Southwestern Archaeology

114P. Ancient Civilizations of Western Middle America (Nahautl Sphere)

114Q. Ancient Civilizations of Eastern Middle America (Maya Sphere)

M154. Women in Culture and Society

162. Contemporary American Indian Problems

172R. Cultures of the Pueblo Southwest

M172T. Ethnohistory of Hispanic Cultures in the U.S. Southwest

Art History C117A. Pre-Columbian Art of Mexico

C117B. Pre-Columbian Art of the Maya

Scope and Objectives

The Department of Chemical Engineering conducts undergraduate and graduate programs of teaching and research in the areas of thermodynamics, mass transfer, catalysis, semiconductor materials processing, electrochemistry and corrosion, high-temperature chemical kinetics and reaction engineering, combustion science, environmental reaction engineering, cryogenics and low-temperature processes, biochemical engineering, computer-aided process design and control, particle technology, pollution control, and polymer engineering. Students are trained in the fundamental principles of these fields while learning a sensitivity to society's needs — a crucial combination in addressing the question of how industry can grow and innovate in an era of economic, environmental, and energy constraints.

The undergraduate curriculum leads to a B.S. in Chemical Engineering, is accredited by ABET and AIChE, and includes bioengineering and environmental options. The department also offers graduate courses and research leading to M.S. and Ph.D. degrees. Both graduate and undergraduate programs closely relate teaching and research to important industrial problems.

Bachelor of Science Degree

The goal of the ABET-accredited chemical engineering curriculum is to provide a high quality, professionally oriented education in modern chemical engineering. The bioengineering and environmental options exist as subsets of courses within the accredited curriculum. Balance is sought between science and engineering practice.

The Major

Course requirements are as follows (193 minimum units required):

(1) Three general engineering courses: Chemical Engineering M105A, Civil and Environmental Engineering 108, Electrical Engineering 100.

(2) Chemical Engineering 100, 101A, 101B, 101C, 102, 103, 104A, 104B, 106, 107, 108A, 108B, 109; Chemistry and Biochemistry 113A, 132A, 132B/132BL.

(3) Two elective courses from Chemical Engineering 110, C111, 112, 113, C115, C116, C118, 119, C125, C140 and three upper division chemistry elective courses (except Chemistry and Biochemistry 110A). An upper division life or physical sciences course may be substituted for one chemistry elective with the approval of your faculty adviser.

(4) Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Civil and Environmental Engineering 15A and 15B or Mechanical, Aerospace, and Nuclear Engineering 20; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A, 8B/8BL, 8C/8CL, 8D/8DL.

(5) SEAS general education (GE) course requirements — see Curricular Requirements in the College and Schools section of this catalog for details.

Bioengineering Option

Course requirements are as follows (200 minimum units required):

(1) Three general engineering courses: Chemical Engineering M105A, Civil and Environmental Engineering 108, Electrical Engineering 100.

(2) Chemical Engineering 100, 101A, 101B, 101C, 102, 103, 104A, 104B, 106, 107, 108A, 108B, 109; Biology 100A or 108 or Microbiology and Molecular Genetics 101; Chemistry and Biochemistry 132A, 132B/132BL, 153A, 153L, 156.

(3) Two elective courses (Chemical Engineering C115 and C125; another chemical engineering elective may be substituted for one of these with approval of your faculty adviser); one upper division biology elective selected from Biology C141, 157, C174A through C174F (any two), M185A or one upper division microbiology elective selected from Microbiology and Molecular Genetics 102, C104A/C104B, C111, C112, C159.

(4) Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Biology 5, 9; Civil and Environmental Engineering 15A and 15B or Mechanical, Aerospace, and Nuclear Engineering 20;

Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A, 8B, 8C, 8D.

(5) SEAS general education (GE) course requirements — see Curricular Requirements in the College and Schools section of this catalog for details.

Environmental Option

Course requirements are as follows (198 minimum units required):

(1) Three general engineering courses: Chemical Engineering M105A, Civil and Environmental Engineering 108, Electrical Engineering 100.

(2) Chemical Engineering 100, 101A, 101B, 101C, 102, 103, 104A, 104B, 106, 107, 108A, 108B, 109; Chemistry and Biochemistry 113A, 132A, 132B/132BL.

(3) Two elective courses from Chemical Engineering 113, C118, 119, C140 (another chemical engineering elective may be substituted for one of these with approval of your faculty adviser) and three advanced chemistry electives in the environmental field from Atmospheric Sciences M203A, Biology M127, Chemistry and Biochemistry 103, Environmental Health Sciences 240, 241, 261 (other advanced chemistry courses may be selected in consultation with your faculty adviser).

(4) Atmospheric Sciences 2A; Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Civil and Environmental Engineering 15A and 15B or Mechanical, Aerospace, and Nuclear Engineering 20; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A, 8B/8BL, 8C/8CL, 8D/8DL.

(5) SEAS general education (GE) course requirements — see Curricular Requirements in the College and Schools section of this catalog for details.

Graduate Study

The following constitutes introductory information regarding graduate degree programs. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Go-phor via the Internet.

Master's Degree

Admission

In addition to meeting the requirements of the Graduate Division, applicants to the Master of Science program in Chemical Engineering are required to take the General Test of the Graduate Record Examination (GRE).

Applicants not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework which would not be applicable toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies.

For requirements for the Graduate Certificate of Specialization, see Engineering Schoolwide Programs in the Curricula and Courses section of this catalog.

Admission forms, including a departmental supplement to the application, may be obtained by writing to the address given at the beginning of this listing or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951609, Los Angeles, CA 90095-1601.

Areas of Study

Consult the department.

Course Requirements

The requirements for a Master of Science degree in Chemical Engineering are a thesis and at least 36 units (nine courses). Chemical Engineering 200, 210, and 220 are required for all master's degree candidates. Two courses may be 598 courses involving work on the thesis. Twelve units of the remaining requirements should be taken from courses offered by the Chemical Engineering Department, with at least eight units at the 200 level. The remaining four units may be taken from any field of sciences, mathematics, or engineering.

All master's degree candidates are required to enroll in the seminar, Chemical Engineering 299, during each quarter of residence.

A program of study which encompasses these requirements must be submitted to the Chemical Engineering Graduate Student Affairs Office for approval before the student's second quarter of residence.

Comprehensive Examination Plan

None.

Thesis Plan

Consult the graduate adviser.

Doctoral Degree

Admission

In addition to meeting the requirements of the Graduate Division, applicants to the Ph.D. program in Chemical Engineering are required to take the General Test of the Graduate Record Examination (GRE).

Admission to the Ph.D. program in Chemical Engineering requires a 3.25 grade-point average and successful completion of preliminary oral and written examinations administered by the faculty of the Chemical Engineering Department.

The preliminary oral examination tests the candidate's understanding of the fundamentals in the areas of thermodynamics, transport phenomena, and chemical kinetics and reactor design. It is recommended that the candidate take the three major field core courses covering these subjects, Chemical Engineering 200, 210, and 220, in preparing for this examination. Students whose first degree is in chemi-

cal engineering take the examination at the end of the first year in residence. Students whose first degree is not in chemical engineering (e.g., chemistry) take this examination at the end of the second year in residence.

The preliminary written examination consists of an original proposition prepared by the candidate submitted in written form, and defended orally before a departmental examination committee. The subject of the proposition must fall outside the area of the student's M.S. and planned Ph.D. research project but within the scope of the chemical engineering major field. The preliminary written examination is to be completed within a period of one month, at the beginning of the Fall Quarter following the student's successful completion of the preliminary oral examination.

Major Fields or Subdisciplines

Consult the department.

Course Requirements

The program of study for the Ph.D. program requires satisfying the chemical engineering major field and breadth requirements and a minor field requirement. The breadth requirement broadens the student's background in chemical engineering beyond the dissertation area and major field core courses and can be satisfied by a selection of 12 units of coursework offered by the Chemical Engineering Department. All of these units must be in letter-graded courses, and at least eight units must be 200-level courses. The minor field requirement is satisfied by taking 12 units of coursework outside the Chemical Engineering Department. All of these units must be in letter-graded courses, and at least four units should be 200-level courses. These courses may be taken in any field of science, mathematics, or engineering but must reflect a coherent body of knowledge. Each student must confer with the graduate adviser to plan an integrated program of study early in the first year.

A program of study to fulfill the major field, breadth, and minor field requirements must be submitted for approval to the Chemical Engineering Student Affairs Office no later than one quarter after successful completion of the preliminary written examination. The student must maintain a 3.3 or better grade-point average in courses which are used to satisfy the breadth and minor field requirements.

For information on completing the Engineer degree, see Engineering Schoolwide Programs in the Curricula and Courses section of this catalog.

Written and Oral Qualifying Examinations

The Ph.D. preliminary written examination consists of an original proposition prepared by the candidate submitted in written form, and defended orally before a departmental examination committee. The oral presentation and defense generally take one to two hours.

The subject of the proposition must fall outside the area of the student's Ph.D. research project but within the scope of the major field (chemical engineering). The topic should be set with the approval of the examination committee and may originate with the student or as a result of discussion with the committee members.

The proposition should be original in one or more of the following categories: (1) it involves a novel analysis of data published by other investigators; (2) it proposes and describes a novel commercial process, an instrument, or an experiment; (3) it develops a new mathematical model or method of analysis; (4) in some cases it may involve the conduct of an experimental project.

In addition to its creative aspects, the proposition should demonstrate the student's understanding of the literature and underlying science of the subject. A literature review in itself is not acceptable.

The examination is to be completed within a period of one month during the Fall Quarter following the student's successful completion of the Ph.D. preliminary oral examination.

The chair of the examination committee reports in writing to the department chair who in turn notifies the candidate on the outcome of the Ph.D. preliminary examination. Copies of these statements are placed in the candidate's file.

Failing the Ph.D. preliminary written examination may result in dismissal from the Ph.D. program.

After completion of the program of study as approved by the graduate adviser, the student must pass the University Oral Qualifying Examination conducted by a doctoral committee consisting of at least four faculty members nominated by the Department of Chemical Engineering in accordance with the regulations of the Graduate Division.

Lower Division Course

2. Technology and the Environment. Lecture, four hours; outside study, eight hours. Natural and anthropogenic flows of materials at global and regional scales. Case studies of natural cycles include global warming (CO₂ cycles), stratospheric ozone depletion (chlorine and ozone cycles), and global nitrogen cycles. Flow of materials in industrial economies compared and contrasted with natural flows; presentation of life-cycle methods for evaluating environmental impact of processes and products.

Upper Division Courses

100. Introduction to Chemical Engineering. Lecture, four hours; discussion, one hour; outside study, seven hours. Prerequisites: course M105A (may be taken concurrently), Mathematics 33A. Introduction to analysis and design of industrial chemical processes. Material and energy balances.

101A. Momentum Transfer. Lecture, four hours; discussion, one hour; outside study, seven hours. Prerequisites: course M105A, Mathematics 33A, 33B. Corequisite: course 109. Introduction to analysis of fluid flow in systems of interest to chemical engineering practice. Fundamentals of momentum transport, Newton law of viscosity, Navier/Stokes equations, interphase momentum transport and friction factors, flows in conduits and around submerged objects.

101B. Heat Transfer. Lecture, four hours; discussion, one hour. Prerequisite: course 101A. Introduction to analysis of heat transfer in systems of interest to chemical engineering practice. Fundamentals of thermal energy transport, Fourier law of heat conduction, forced and free convection, radiation, interphase heat transfer, heat exchanger analysis.

101C. Mass Transfer. Lecture, four hours; discussion, one hour. Prerequisites: courses 100, 101B, 102. Introduction to analysis of mass transfer in systems of interest to chemical engineering practice. Fundamentals of mass species transport, Fick law of diffusion, diffusion in chemically reacting flows, interphase mass transfer, multicomponent systems.

102. Chemical Engineering Thermodynamics. Prerequisites: courses 100, M105A. Thermodynamic properties of pure substances and solutions. Phase equilibrium. Chemical reaction equilibrium.

103. Separation Processes. Prerequisites: courses 100, 101B, 102. Application of principles of heat, mass, and momentum transport to design and operation of separation processes such as distillation, gas absorption, filtration, and reverse osmosis.

104A. Chemical Engineering Laboratory I (6 units). Lecture, two hours; laboratory, eight hours; outside study, four hours; other, four hours. Prerequisites: courses 100, 101B, 102. Measurements of temperature, pressure, flow rate, viscosity, and fluid composition in chemical processes. Methods of data acquisition, equipment selection and fabrication, and laboratory safety. Development of written and oral communication skills.

104B. Chemical Engineering Laboratory II (6 units). Lecture, two hours; laboratory, eight hours; outside study, four hours; other, four hours. Prerequisites: courses 101C, 103, 104A. Course consists of four experiments in chemical engineering unit operations, each of two weeks duration. Students present their results both written and orally. Written report includes sections on theory, experimental procedures, scaleup and process design, and error analysis.

M105A. Introduction to Engineering Thermodynamics. (Same as Mechanical, Aerospace, and Nuclear Engineering M105A.) Lecture, four hours; recitation, one hour. Prerequisites: Mathematics 32B, Physics 8B. Phenomenological thermodynamics. Concepts of equilibrium, temperature, and reversibility. First law and concept of energy; second law and concept of entropy. Equations of state and thermodynamic properties. Engineering applications of these principles in analysis and design of closed and open systems.

106. Chemical Reaction Engineering. Prerequisites: courses 100, 101C, 102. Fundamentals of chemical kinetics and catalysis. Introduction to analysis and design of homogeneous and heterogeneous chemical reactors.

107. Process Dynamics and Control. Prerequisites: courses 101C, 103, 106. Principles of dynamics modeling and start-up behavior of chemical engineering processes. Chemical process control elements. Design and applications of chemical process computer control.

108A. Process Economics and Analysis. Prerequisites: courses 103, 104B, 106. Integration of chemical engineering fundamentals such as transport phenomena, thermodynamics, separation operations, and reaction engineering and simple economic principles for purpose of designing chemical processes and evaluating alternatives.

108B. Chemical Process Computer-Aided Design and Analysis. Prerequisites: courses 103, 106, 108A, Computer Science 10F. Introduction to application of some mathematical and computing methods to chemical engineering design problems; use of simulation programs as an automated method of performing steady state material and energy balance calculations.

109. Mathematical Methods in Chemical Engineering. Lecture, four hours; recitation, two hours; outside study, six hours. Prerequisite: working knowledge of FORTRAN programming. Discussion of theory and applications of mathematics to chemical engineering problems, with focus on numerical and analytical techniques encompassing linear and nonlinear algebraic equations, finite difference methods, and ordinary and partial differential equations.

110. Intermediate Engineering Thermodynamics. Lecture, four hours; outside study, eight hours. Prerequisite: course 102. Principles and engineering applications of statistical and phenomenological thermodynamics. Determination of partition function in terms of simple molecular models and spectroscopic data; nonideal gases; phase transitions and adsorption; nonequilibrium thermodynamics and coupled transport processes.

C111. Cryogenics and Low-Temperature Processes. (Formerly numbered 111.) Lecture, four hours; outside study, eight hours. Prerequisites: courses 102 (or Materials Science 130), M105A. Fundamentals of cryogenics and cryoengineering science pertaining to industrial low-temperature processes. Basic approaches to analysis of cryofluids and envelopes needed for operation of cryogenic systems; low-temperature behavior of matter, optimization of cryosystems and other special conditions. Concurrently scheduled with course C211.

112. Polymer Processes. Prerequisites: course 101A, Chemistry 132A. Formation of polymers, criteria for selecting a reaction scheme, polymerization techniques. Polymer characterization. Mechanical properties. Rheology of macromolecules, modeling and experimental methods to characterize non-Newtonian fluids. Polymer process engineering.

113. Air Pollution Engineering. Lecture, four hours; preparation, two hours; outside study, six hours. Prerequisites: courses 101C and 102, or consent of instructor. Integrated approach to air pollution, including concentrations of atmospheric pollutants, air pollution standards, air pollution sources and control technology, and relationship of air quality to emission sources. Links air pollution to multimedia environmental assessment.

C114. Electrochemical Processes and Corrosion. Lecture, four hours; other, eight hours. Prerequisites: courses 102 (or Materials Science 130), M105A. Fundamentals of electrochemistry and engineering applications to industrial electrochemical processes and metallic corrosion. Primary emphasis on fundamental approach to analysis of electrochemical and corrosion processes. Specific topics include corrosion of metals and semiconductors, electrochemical metal and semiconductor surface finishing, passivity, electrodeposition, electroless deposition, batteries and fuel cells, electrosynthesis and bioelectrochemical processes. May be concurrently scheduled with course C214.

C115. Biochemical Reaction Engineering. Lecture, four hours; outside study, eight hours. Prerequisites: courses 101C and 106, or Chemistry 156, or consent of instructor. Use of previously learned concepts of biophysical chemistry, thermodynamics, transport phenomena, and reaction kinetics to develop tools needed for technical design and economic analysis of biological reactors. May be concurrently scheduled with course C215.

C116. Surface and Interface Engineering. Prerequisites: courses 101C, 102, 106. Description of thermodynamics and kinetics of surface phenomena: nucleation, growth, and coalescence of films; adsorption, desorption, diffusion, and reaction of gases on surfaces. Application of these concepts to electronic materials processing and catalyst design. May be concurrently scheduled with course C216.

C118. Multimedia Environmental Assessment. Lecture, four hours; preparation, two hours; outside study, six hours. Prerequisites: courses 101C and 102, or consent of instructor. Pollutant sources, estimation of source releases, waste minimization, transport and fate of chemical pollutants in environment, intermedia transfers of pollutants, multimedia modeling of chemical partitioning in environment, exposure assessment and fundamentals of risk assessment, risk reduction strategies. Concurrently scheduled with course C218.

119. Pollution Prevention for Chemical Processes. Lecture, four hours; recitation, one hour; preparation/outside study, seven hours. Prerequisite: course 108A or consent of instructor. Waste audits and emission inventories, process design and process flowsheeting for waste minimization, economic analysis of environmental projects, life-cycle analyses.

C125. Bioseparations and Bioprocess Engineering. Lecture, four hours; outside study, eight hours. Prerequisites: courses 101C and 103, or Chemistry 156, or consent of instructor. Separation strategies, unit operations, and economic factors used to design processes for isolating and purifying materials like whole cells, enzymes, food additives, or pharmaceuticals that are products of biological reactors. Concurrently scheduled with course C225.

C140. Fundamentals of Aerosol Technology. Lecture, four hours; outside study, eight hours. Prerequisite: course 101C. Technology of particle/gas systems with applications to gas cleaning, commercial production of fine particles, and catalysis. Particle transport and deposition, optical properties, experimental methods, dynamics and control of particle formation processes. Concurrently scheduled with course C240.

CM165. Bioprocess Technology. (Same as Microbiology CM165.) Lecture, two hours; laboratory, eight hours; outside study, two hours. Prerequisites: course C115, Chemistry 156, and Microbiology 101, or consent of instructor. Current bioprocess technologies involving microorganisms, especially extremophiles and animal cells, as vehicles for macromolecular and biomaterial production. Applications to processes including mineral leaching, remediation, and bioconversion. Emphasis on exploiting properties of diverse microorganisms. Exercises may vary yearly. Concurrently scheduled with course CM265.

199. Special Studies (2 to 8 units). Prerequisites: senior standing, consent of instructor. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit.

Graduate Courses

200. Advanced Engineering Thermodynamics. Prerequisite: course 102 or equivalent. Phenomenological and statistical thermodynamics of chemical and physical systems with engineering applications. Presentation of role of atomic and molecular spectra and intermolecular forces in interpretation of thermodynamic properties of gases, liquids, solids, and plasmas.

210. Advanced Chemical Reaction Engineering. Prerequisites: courses 101C, 106, or equivalent. Principles of chemical reactor analysis and design. Particular emphasis on simultaneous effects of chemical reaction and mass transfer on noncatalytic and catalytic reactions in fixed and fluidized beds.

C211. Cryogenics and Low-Temperature Processes. (Formerly numbered 211.) Lecture, four hours; outside study, eight hours. Prerequisites: courses 102 (or Materials Science 130), M105A. Fundamentals of cryogenics and cryoengineering science pertaining to industrial low-temperature processes. Basic approaches to analysis of cryofluids and envelopes needed for operation of cryogenic systems; low-temperature behavior of matter, optimization of cryosystems and other special conditions. Concurrently scheduled with course C111.

C214. Electrochemical Processes and Corrosion. Lecture, four hours; other, eight hours. Prerequisites: courses 102 (or Materials Science 130), M105A. Fundamentals of electrochemistry and engineering applications to industrial electrochemical processes and metallic corrosion. Primary emphasis on fundamental approach to analysis of electrochemical and corrosion processes. Specific topics include corrosion of metals and semiconductors, electrochemical metal and semiconductor surface finishing, passivity, electrodeposition, electroless deposition, batteries and fuel cells, electrosynthesis and bioelectrochemical processes. May be concurrently scheduled with course C114.

C215. Biochemical Reaction Engineering. Lecture, four hours; outside study, eight hours. Prerequisites: courses 101C and 106, or Chemistry 156, or consent of instructor. Use of previously learned concepts of biophysical chemistry, thermodynamics, transport phenomena, and reaction kinetics to develop tools needed for technical design and economic analysis of biological reactors. May be concurrently scheduled with course C115.

C216. Surface and Interface Engineering. Prerequisites: courses 101C, 102, 106. Description of thermodynamics and kinetics of surface phenomena: nucleation, growth, and coalescence of films; adsorption, desorption, diffusion, and reaction of gases on surfaces. Application of these concepts to electronic materials processing and catalyst design. May be concurrently scheduled with course C116.

217. Electrochemical Engineering. Prerequisite: course C114. Transport phenomena in electrochemical systems; relationships between molecular transport, convection, and electrode kinetics, along with applications to industrial electrochemistry, fuel cell design, and modern battery technology.

C218. Multimedia Environmental Assessment. Lecture, four hours; preparation, two hours; outside study, six hours. Prerequisites: courses 101C and 102, or consent of instructor. Pollutant sources, estimation of source releases, waste minimization, transport and fate of chemical pollutants in environment, intermedia transfers of pollutants, multimedia modeling of chemical partitioning in environment, exposure assessment and fundamentals of risk assessment, risk reduction strategies. Concurrently scheduled with course C118.

220. Advanced Mass Transfer. Prerequisite: course 101C or equivalent. Advanced treatment of mass transfer, with applications to industrial separation processes, gas cleaning, pulmonary bioengineering, controlled release systems, and reactor design; molecular and constitutive theories of diffusion, interfacial transport, membrane transport, convective mass transfer, concentration boundary layers, turbulent transport.

223. Design for Environment. Lecture, four hours; outside study, eight hours. Prerequisite: graduate standing in chemical engineering, materials science and engineering, or Master of Engineering program. Design of products for meeting environmental objectives; life-cycle inventories; life-cycle impact assessment; design for energy efficiency; design for waste minimization, computer-aided design tools, materials selection methods.

C225. Bioseparations and Bioprocess Engineering. Lecture, four hours; outside study, eight hours. Prerequisites: courses 101C and 103, or Chemistry 156, or consent of instructor. Separation strategies, unit operations, and economic factors used to design processes for isolating and purifying materials like whole cells, enzymes, food additives, or pharmaceuticals that are products of biological reactors. Concurrently scheduled with course C125.

230. Reaction Kinetics. Prerequisites: courses 106, 200, or equivalent. Macroscopic descriptions: reaction rates, relaxation times, thermodynamic correlations of reaction rate constants. Molecular descriptions: kinetic theory of gases, models of elementary processes. Applications: absorption and dispersion measurements, unimolecular reactions, photochemical reactions, hydrocarbon pyrolysis and oxidation, explosions, polymerization.

231. Molecular Dynamics. Prerequisite: course 106 or 110. Analysis and design of molecular-beam systems. Molecular-beam sampling of reactive mixtures in combustion chambers or gas jets. Molecular-beam studies of gas-surface interactions, including energy accommodations and heterogeneous reactions. Applications to air pollution control and to catalysis.

232. Combustion Processes. Prerequisite: course 106, 200, or Mechanical, Aerospace, and Nuclear Engineering 132A. Fundamentals: change equations for multicomponent reactive mixtures, rate laws. Applications: combustion, including burning of (1) premixed gases or (2) condensed fuels. Detonation. Sound absorption and dispersion.

M233. Principles, Practices, and Policies in Biotechnology (2 units). (Same as Biological Chemistry M233, Biology M233, Chemistry M233, Microbiology M233, Microbiology and Immunology M233, and Radiological Sciences M233.) Prerequisite: graduate standing or consent of instructor. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug-design, medical and microscopic imaging, and intellectual property issues. S/U or letter grading.

C240. Fundamentals of Aerosol Technology. (Formerly numbered 240.) Lecture, four hours; outside study, eight hours. Prerequisite: course 101C. Technology of particle/gas systems with applications to gas cleaning, commercial production of fine particles, and catalysis. Particle transport and deposition, optical properties, experimental methods, dynamics and control of particle formation processes. Concurrently scheduled with course C140.

250. Computer-Aided Chemical Process Design. Prerequisite: course 108B. Application of optimization methods in chemical process design; computer aids in process engineering; process modeling; systematic flowsheet invention; process synthesis; optimal design and operation of large-scale chemical processing systems.

260. Non-Newtonian Fluid Mechanics. Prerequisite: course M105A. Principles of non-Newtonian fluid mechanics. Stress constitutive equations. Rheology of polymeric liquids and dispersed systems. Applications in viscometry, polymer processing, biorheology, oil recovery, and drag reduction.

CM265. Bioprocess Technology. (Same as Microbiology CM265.) Lecture, two hours; laboratory, eight hours; outside study, two hours. Prerequisites: course C115, Chemistry 156, and Microbiology 101, or consent of instructor. Current bioprocess technologies involving microorganisms, especially extremophiles and animal cells, as vehicles for macromolecular and biomaterial production. Applications to processes including mineral leaching, remediation, and bioconversion. Emphasis on exploiting properties of diverse microorganisms. Exercises may vary yearly. Concurrently scheduled with course CM165.

290A-290Z. Special Topics (2 to 4 units each). Prerequisites: consent of instructor, additional prerequisites for each offering as announced in advance by department. Advanced and current study of one or more aspects of chemical engineering, such as chemical process dynamics and control, fuel cells and batteries, membrane transport, advanced chemical engineering analysis, polymers, optimization in chemical process design. May be repeated for credit with topic change. S/U or letter grading:

M290U. Toxics Reduction: Science, Engineering, and Policy Issues. (Same as Urban Planning M262A and Environmental Health Sciences M249.) Lecture, three hours. Prerequisites: Urban Planning 260A and 260B, or consent of instructor. Public health experts, industrial engineers, and planners are being asked to assess risks biologically active chemicals present and to take such risks into account in planning process. Examination of potential for toxics reduction and current state of government and industry activities in this area.

298A-298Z. Research Seminars (2 to 4 units each). Prerequisites: consent of instructor, additional prerequisites for each offering as announced in advance by department. Lectures, discussions, student presentations, and projects in areas of current interest. May be repeated for credit. S/U grading.

299. Departmental Seminar (2 units). Prerequisite: graduate standing in chemical engineering. Seminars by leading academic and industrial chemical engineers on development or application of recent technological advances in the discipline. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual or Tutorial Studies (2 to 8 units). Prerequisites: graduate standing in chemical engineering, consent of instructor. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

597B. Preparation for Ph.D. Preliminary Examinations (2 to 16 units). Prerequisites: graduate standing in chemical engineering, consent of instructor. S/U grading.

597C. Preparation for Ph.D. Oral Qualifying Examination (2 to 16 units). Prerequisites: graduate standing in chemical engineering, consent of instructor. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

598. Research for and Preparation of M.S. Thesis (2 to 12 units). Prerequisites: graduate standing in chemical engineering, consent of instructor. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units). Prerequisites: graduate standing in chemical engineering, consent of instructor. Usually taken after student has been advanced to candidacy. S/U grading.

Scope and Objectives

Chemistry is concerned with the composition, structure, and properties of substances, the transformations of these substances into others by reactions, and the kinds of energy changes that accompany these reactions. The department is organized in four interrelated and overlapping subdisciplines that deal primarily with the chemistry of inorganic substances (inorganic chemistry), the chemistry of carbon compounds (organic chemistry), the chemistry of living systems (biochemistry), and the physical behavior of substances in relation to their structures and chemical properties (physical chemistry).

Undergraduate Study

Admission

Students entering UCLA directly from high school who declare a chemistry or biochemistry major at the time of application are automatically admitted to that major.

UCLA students who wish to enter one of the majors must have a minimum grade of C- in each of the preparation for the major courses completed and a combined grade-point average of at least 2.0 in those courses. Grades in any completed courses for the major must also average at least 2.0.

Transfer or UCLA students with more than 84 quarter units are accepted into the departmental majors only if they have completed the following courses or their equivalents: the entire Chemistry and Biochemistry 11 series, Mathematics 31A, 31B, 32A, Physics 8A, 8C/8CL, and 8D/8DL, or 6A, 6B, and 6C (or a year of calculus-based physics). For *biochemistry* majors, a year of biology may replace the physics. For *chemistry* majors, Mathematics 32B is recommended.

Students with more than 105 quarter units are accepted into the departmental majors only if they have completed the following courses or their equivalents: the entire Chemistry and Biochemistry 11 series and one term of organic chemistry, Mathematics 31A, 31B, 32A, Physics 8A, 8C/8CL, and 8D/8DL, or 6A, 6B, and 6C (or a year of calculus-based physics). *Biochemistry* majors also should have completed a course in the biology of organisms; *chemistry* majors should have completed Mathematics 32B.

Entering transfer students who have successfully completed a year course (including laboratory) in general college chemistry intended for science and engineering students should enter course 132A. Transfer students should consult the department's Undergraduate Advising Office in 4016 Young Hall for assistance with the articulation of transfer coursework.

Box 951569

Los Angeles, CA 90095-1569

(310) 825-3958

Professors

Mario E. Baur, Ph.D. (*Physical Chemistry*)

Emily A. Carter, Ph.D. (*Theoretical Chemistry*)

Orville L. Chapman, Ph.D. (*Organic Chemistry*)

Steven G. Clarke, Ph.D. (*Biochemistry*)

Donald J. Cram, Ph.D. (*Saul Winstein Professor of Organic Chemistry, University Professor*)

Preliminary Examination for Chemistry and Biochemistry 11A

If you wish to enroll in Chemistry and Biochemistry 11A or 11AH, you must pass the Chemistry Diagnostic Test. The examination is administered at all first-year sessions of the summer Orientation Program and on the following dates: Monday, September 25, 1995, for Fall Quarter 1995; Thursday, November 16, 1995, for Winter Quarter 1996; and Thursday, March 1, 1996, for Spring Quarter 1996. Consult the department for times and locations.

If your performance on the examination does not qualify you for immediate admission to Chemistry and Biochemistry 11A, but you wish to enroll in a subsequent term, you may be eligible for enrollment in Los Angeles Valley College (LAVC) Chemistry 17. This course is given at UCLA during Fall Quarter specifically for UCLA students preparing for Chemistry and Biochemistry 11A. If you successfully complete LAVC course 17, you are entitled to admission to course 11A for the next three terms. Offered on a Passed/Not Passed basis, LAVC course 17 carries no UCLA graduation credit but does displace four units on your Study List. It is *not* an acceptable substitute for course 11A.

Advanced Placement in Chemistry

Students who have taken the Advanced Placement (AP) Chemistry Test and obtained a score of 4 or 5 receive eight units of chemistry credit and may petition for Chemistry and Biochemistry 11A equivalency, or may take course 11A or 11AH at UCLA. Everyone planning to take Chemistry and Biochemistry 11A or 11AH must take the Chemistry Diagnostic Test. If you received a score of 3 on the AP Chemistry Test, you receive eight units of chemistry credit but no course equivalency.

Credit Limitations

You may not take or repeat a chemistry or biochemistry course for credit if it is a requisite for a more advanced course for which you already have credit. This applies in particular to the repetition of courses (e.g., if you wish to repeat Chemistry and Biochemistry 11A, you must do so before completing course 11B).

Undergraduate Majors

The department offers three majors: chemistry (with concentrations in chemistry and physical chemistry), biochemistry, and general chemistry. The chemistry and biochemistry majors are designed to prepare students for graduate studies in each field, for entry into professional schools in the health sciences, and for careers in industries and businesses that depend on chemically and biochemically based technology. The general chemistry major is intended for students who wish to acquire considerable chemical background in preparation for careers outside chemistry.

Courses used to fulfill any of the requirements for any of the departmental majors must be taken for a letter grade. Seminar courses, indi-

vidual study courses, and research courses (e.g., 190, 199) may not be applied toward the requirements for the majors.

Requirements for the majors are outlined below. For additional information, contact the Undergraduate Advising Office in 4016 Young Hall.

Bachelor of Science in Chemistry

This program is for students who intend to pursue a career in chemistry.

Chemistry Concentration

Preparation for the Major: Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Mathematics 31A, 31B, 32A, 32B, 33A; Physics 8A, 8C/8CL, and 8D/8DL (8B/8BL strongly recommended), or 6A, 6B, and 6C. Physics 8 series is strongly recommended for students with interest in physical chemistry, biophysical chemistry, or physical organic chemistry. If physics courses from both the 6 and 8 series are taken, undue duplication must be avoided.

The Major: Chemistry and Biochemistry 110A, 110B, 113A, 114 (or 114H), 132A, 132B/132BL, 132C/132CL, either 136 or 144, 153A, 153L, 173, and two other upper division or graduate courses in the department, including at least one additional laboratory course from 136, 144, 154, 174, 184.

Physical Chemistry Concentration

This concentration is designed primarily for students who are interested in attending graduate school in physical chemistry/physics.

Preparation for the Major: Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A, 8C/8CL, 8D/8DL. To be admitted, you must complete the preparation courses with a grade-point average of 3.0 or better and file a petition with the Undergraduate Advising Office.

The Major: Chemistry and Biochemistry 110A, 110B, 113A, 114, 132A, 132B/132BL, 153A, 173; one additional upper division chemistry, electrical engineering, or physics laboratory course; and four additional elective courses selected from upper division or graduate courses in biophysical chemistry, electrical engineering, mathematics, physical chemistry, physical inorganic chemistry, physical organic chemistry, or physics and approved by the physical chemistry adviser. Consult the Undergraduate Advising Office for a list of approved electives.

Physics 8CL and 8DL must be taken prior to Chemistry and Biochemistry 132BL and 114, respectively.

By your junior year, you are strongly encouraged to join a research group within the physical chemistry division to obtain firsthand experience with state-of-the-art physical chemistry research.

Bachelor of Science in Biochemistry

This program is for students preparing for careers in biochemistry or other fields requiring extensive preparation in both chemistry and biology.

Preparation for the Major

Required: Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Life Sciences 2, 3, 4; Mathematics 31A, 31B, 32A (33A strongly recommended); Physics 6A, 6B, and 6C, or 8A, 8C/8CL, and 8D/8DL (8B/8BL strongly recommended). Physics 8 series is recommended for students with interest in biophysical chemistry. If physics courses from both the 6 and 8 series are taken, undue duplication must be avoided.

The Major

Required: Chemistry and Biochemistry 110A, 132A, 132B/132BL, 132C/132CL, 153A, 153B, 153C, 153L, 154, 156, Microbiology and Molecular Genetics 101, 101L; one additional upper division or graduate course in chemistry and biochemistry; two elective upper division or graduate courses (eight units) in biology, chemistry and biochemistry, mathematics, microbiology, or physics, which must be approved by the undergraduate adviser. Consult the Undergraduate Advising Office for a list of approved electives.

Bachelor of Science in General Chemistry

This program is for students who wish to acquire considerable chemical background in preparation for careers outside chemistry. The requirements are accordingly quite flexible. The major may be appropriate for some students who plan to enter professional schools, such as those of medicine, dentistry, or public health. This major cannot be taken as part of a double major.

Preparation for the Major

Required: Chemistry and Biochemistry 11A, 11B/11BL, 11C/11CL; Mathematics 31A, 31B, 32A, 33A; Physics 6A, 6B, and 6C, or 8A, 8C/8CL, and 8D/8DL. If physics courses from both the 6 and 8 series are taken, undue duplication must be avoided.

You must complete the preparation courses with at least a 2.0 grade-point average.

The Major

Required: Chemistry and Biochemistry 110A, 132A, 132B/132BL, 132C/132CL, 153A, 153L; three additional upper division courses in the department (at least one must be a laboratory course); six additional upper division courses. A 2.0 grade-point average is required in all upper division courses in the department. Acceptance into the major is based on an original written proposal that is coherent in terms of your interests and objectives. Your proposal should specify which courses you plan to apply toward

the major and requires the approval of the faculty adviser.

Graduate Study

The following constitutes introductory information regarding graduate degree programs. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degrees

Admission

Applicants planning to work toward the Ph.D. degree should not seek an M.S. degree first but should apply directly to the Ph.D. program.

Application materials may be obtained by writing to the address given at the beginning of this listing.

Areas of Study

Biochemistry; inorganic, organic, and physical chemistry.

Course Requirements

Chemistry. At least nine quarter courses (36 units) are required, of which at least five (20 units) must be graduate courses and the remainder upper division courses. Students must take a minimum of two courses in their major area and one course in an outside area. Choices may be made from the following:

Inorganic — Chemistry and Biochemistry 174, 207, 271A through 271Z, C275, C276A, 276B, 277, 279, C281.

Organic — Chemistry and Biochemistry 207, 232, 236, 241A through 241Z, 242, C243A, C243B, 244A, 244B, 245, C281.

Physical — Chemistry and Biochemistry C215A, C215B, 215C, 215D, C223A, C223B, 223C, 225.

Substitutions may be made with consent of the area adviser. With the consent of the graduate adviser, courses of directed individual study, but not research courses, may replace any of the courses listed above.

Up to 24 units of Chemistry and Biochemistry 596 or 598 may be applied toward the total course requirement; up to 20 units may be applied toward the minimum graduate course requirement.

Biochemistry. The M.S. in Biochemistry may be obtained by the thesis plan or the comprehensive examination plan. Up to 24 units of Chemistry and Biochemistry 596 or 598 may be applied toward the total course requirement; up to eight units may be applied toward the graduate course requirement. Specific course requirements vary for each plan (see below).

Comprehensive Examination Plan

Chemistry. In exceptional cases, the comprehensive examination plan is used in lieu of a thesis. Under this plan, chemistry students may apply an additional six units of Chemistry and Biochemistry 597 and six units of Chemistry and Biochemistry 228, 248, or 278 toward the graduate course requirement and the total course requirement. The comprehensive examination plan requires the satisfactory completion of three cumulative examinations

Biochemistry. For biochemistry students, 20 of the total 36 upper division and graduate units must be at the graduate level and include two of the following courses: Chemistry and Biochemistry CM253, M263, or M267 (10 to 12 units). Biochemistry students may apply six units of Chemistry and Biochemistry 258 and six units of Chemistry and Biochemistry 268 to the graduate course requirement and to the total course requirement. Courses must be approved by the biochemistry graduate adviser. With the exception of Chemistry and Biochemistry 258 and 596, all courses must be taken on a letter grade basis. The written requirements associated with the Winter and Spring Quarter student seminars must be satisfactorily completed.

Thesis Plan

Chemistry. The thesis plan is the preferred method of attaining the M.S. in Chemistry.

Biochemistry. For biochemistry students, 20 of the 36 required units must be at the graduate level and include two of the following courses: M253, M263, or M267 (10 to 12 units).

Doctoral Degrees

Admission

In addition to the University minimum requirements, an excellent undergraduate record is required of all applicants. Graduate Record Examination (GRE) General and Subject Tests are recommended. The GRE and the Test of English as a Foreign Language (TOEFL) are required for international students.

Each student admitted to graduate standing in chemistry is given orientation examinations at the beginning of the first quarter. The main purpose of the orientation requirement is to help the student and the student's adviser plan a course program. The examinations include material covered in upper division courses in physical, organic, and inorganic chemistry. All courses suggested because of deficiencies in undergraduate preparation are normally to be completed by the end of the first year.

There are no orientation examinations in biochemistry; the student plans a course program in consultation with the biochemistry graduate adviser.

Chemistry students are encouraged to become familiar with research activities of all faculty in the student's area of interest and to join a research group as soon as possible.

Biochemistry students rotate through three research groups during the Fall, Winter, and Spring Quarters, with a final selection made at the end of the Spring Quarter.

Application materials may be obtained by writing to the address given at the beginning of this listing. Students may also be admitted to the biochemistry program through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 172 MBI, UCLA, Los Angeles, CA 90095-1570, (310) 206-6051.

Course Requirements

Chemistry. Candidates in each area of specialization should normally complete as a minimum the coursework indicated below. Some of these requirements can be met on the basis of orientation examinations and courses taken prior to entry into the graduate program. If the projected research falls in an area which differs appreciably from that anticipated by the field requirements listed below, students may be permitted appropriate modifications.

Inorganic Chemistry — (1) Required background material: Chemistry and Biochemistry 173; (2) Chemistry and Biochemistry 174, C275, C276A, 276B; (3) two courses from Chemistry and Biochemistry 153C, 207, C213B, C215A, C215B, 215D, C223A, 232, 236, 241A through 241Z, 242, C243A, C243B, 244A, 244B, 245, 271A through 271Z, 279, C280, C281, or other graduate courses with the approval of the area adviser; (4) Chemistry and Biochemistry 278.

Organic Chemistry — (1) Required background material: Chemistry and Biochemistry 132A, 132B, 132C, 136; (2) Chemistry and Biochemistry C243A, 244A; (3) Chemistry and Biochemistry C243B or 244B; (4) one additional Chemistry and Biochemistry course from physical chemistry (C213B, 245) or inorganic chemistry (173, 174, C275, C276A) or biochemistry (153C); (5) two courses from Chemistry and Biochemistry 207, 232, 236, 241A through 241Z, 242, 245, C281; (6) Chemistry and Biochemistry 248.

Physical Chemistry — (1) Required background material: Chemistry and Biochemistry 110A, 110B, 113A; (2) Chemistry and Biochemistry C215A, C215B, C223A, C223B, or equivalent; (3) Chemistry and Biochemistry 228 each term; (4) one term of Chemistry and Biochemistry 218 (for presentation of research); (5) two courses (for letter grade credit) from Chemistry and Biochemistry 215C, 215D, 223C, 225; (6) two courses (with S/U grading option) from 215C, 215D, 221A through 221F, 223C, 225, C243A, C276A, 277, Physics 105A, 110A, 110B, 131, 132, 140, or upper division mathematics courses (subject to approval). Substitutions may be made with consent of the physical chemistry area adviser.

Biochemistry. Candidates should normally complete as a minimum the coursework indicated below. Some of these requirements can be met on the basis of courses taken prior to entry into the graduate program with consent

of the graduate adviser. Required coursework must be completed prior to advancement to candidacy.

(1) Required background material: one year organic chemistry, one course in physical chemistry or biophysical chemistry, one year of biochemistry, some coursework in the life sciences, and some biochemistry laboratory experience. Deficiencies in background may be made up after admission.

(2) Two of the following courses (10 to 12 units): Chemistry and Biochemistry CM253, M263, M267.

(3) Additional upper division or graduate courses to total 24 units, including units from item 2 above but not from items 4, 5, and 6 below. Eighteen units must be completed in the first year. Other courses may be substituted for Chemistry and Biochemistry M267 with the permission of the graduate adviser. These courses should be chosen in consultation with the biochemistry graduate or Ph.D. adviser.

(4) Chemistry and Biochemistry 258 during the first four quarters. Seminars offered in other departments may be substituted with permission of the graduate adviser.

(5) Chemistry and Biochemistry 268 during the first three quarters.

(6) Three laboratory rotations (Chemistry and Biochemistry 596) during the first year.

Written and Oral Qualifying Examinations

Chemistry. Rather than a single comprehensive examination, the department gives all chemistry Ph.D. candidates a series of written tests called cumulative examinations. These are designed to encourage and test the continued growth of professional competency through coursework, study of the literature, departmental seminars, and informal discussions with colleagues.

Three examinations are given per quarter at approximately monthly intervals. Students entering directly into the Ph.D. program who perform satisfactorily on the orientation examination in their special area may begin writing the examinations immediately. Students must begin by the start of their second quarter of residence and must continue until they have passed five. To remain in good standing, students should pass at least one of the first six examinations attempted and three out of nine. Fifteen attempts are normally the maximum. Students with a master's degree from an American university are required to pass three examinations out of nine attempts.

Biochemistry. The written examination requirement is coupled to the graduate student seminars (Chemistry and Biochemistry 258 or others). Seminars offered in other departments may be substituted with permission of the graduate adviser. Beginning with the Winter Quarter of the first year, each quarter students are required to submit written reports based on

the seminar course to the instructor and other designated faculty members.

(1) Winter Quarter — A presentation and written report based on the Fall Quarter rotation research experience or other designated topic is to be submitted to the instructor and rotation supervisor for grading.

(2) Spring Quarter — A written report which summarizes the current state of knowledge in a small, well-defined area and which identifies the general types of experiments needed for progress in that field is to be prepared for grading by the course instructors.

(3) Fall Quarter, Second Year — At the end of the preceding Spring Quarter, a research topic is selected from a list prepared by the division. An in-depth seminar of this topic which summarizes the current state of knowledge in a field and which indicates likely future directions must be presented. The written report should go beyond the information presented in the seminar and should propose specific experiments.

A failed report may be revised once. The written examination requirement for the biochemistry Ph.D. program is fulfilled after the student satisfactorily completes all three different types of reports.

Oral Qualifying Examination

The University Oral Qualifying Examination is based on the student's research proposal which should represent independent work and should offer the doctoral committee the opportunity to judge the student's ability to think creatively and to formulate significant ideas for research. The oral qualifying examination is to be attempted during the sixth quarter of residence by all biochemistry students and by chemistry students completing the written qualifying examinations by the end of the first year. All others must take the oral examination by the end of the seventh quarter. Failure to comply with this time schedule may result in disqualification from the Ph.D. program unless permission has been given by the area adviser. The committee's decision to advance students to candidacy, to allow them to repeat the oral, or to disqualify them is based on the quality of the written proposal, the adequacy of the oral presentation, the student's overall record at UCLA as reflected in coursework and examinations, and the student's research ability and productivity.

Lower Division Courses

2. Introductory Chemistry. Lecture, two hours; discussion, two hours. Not open to students with credit for course 11A. Concept of submicroscopic world of chemistry, ranging from protons to proteins in subject matter.

9. Beginning a Career in Molecular Sciences (1 unit). Limited to 50 freshmen/sophomores. Recommended for students considering a career in chemical sciences. Introduction to and discussion of research and career opportunities in molecular sciences; establishment of a faculty/student mentorship for each student to help in preparing a paper on a student-selected research topic. May be repeated twice.

10A. General Chemistry for Life Sciences Majors. Lecture, three hours; discussion, one hour; outside study, eight hours. Preparation: high school chemistry or equivalent background and three and one-half years of high school mathematics, successful completion of Chemistry Diagnostic Test. Introduction to physical chemistry needed for the life sciences. Quantum chemistry, atoms, atomic properties, and chemical bonding in molecules. Equilibria and thermodynamics through the first law. P/NP or letter grading.

10B. General Chemistry for Life Sciences Majors (2 units). First five weeks. Lecture, three hours; discussion, one hour; outside study, eight hours. Enforced requisite: course 10A (C – or better). Introduction to physical chemistry needed for the life sciences. Entropy, free energy, electrochemistry, and kinetics. P/NP or letter grading.

10BL. General and Organic Chemistry Laboratory for Life Sciences Majors (2 units). Lecture, one hour; laboratory, three hours; outside study, 2 hours. Enforced requisites: courses 10A (C – or better), 10B and 10C (corequisites). Introduction to volumetric, spectrophotometric, and potentiometric analysis. Use and preparation of buffers and pH meters. Synthesis and kinetics techniques using compounds of interest to students in life sciences. P/NP or letter grading.

10C. Organic Chemistry for Life Sciences Majors (2 units). Second five weeks. Lecture, three hours; discussion, one hour; outside study, eight hours. Enforced requisite: course 10B or 11B (C – or better). Introduction to organic compounds, functional groups, transition metal coordination chemistry, bioorganic and bioinorganic chemistry, isomerism, and stereochemistry. P/NP or letter grading.

10D. Organic Chemistry for Life Sciences Majors. Lecture, three hours; discussion, one hour; outside study, eight hours. Enforced requisite: course 10C (C – or better). Introduction to organic chemistry. Molecular orbital theory and photochemistry, structural characterization via spectroscopy, general classes of organic reactions. P/NP or letter grading.

10DL. General and Organic Chemistry Laboratory for Life Sciences Majors (3 units). Lecture, one hour; laboratory, six hours; outside study, two hours. Enforced requisites: courses 10B, 10BL, and 10C (C – or better), 10D (corequisite). Builds on techniques taught in course 10BL. Synthesis and analysis of compounds; purification by extraction, chromatography, recrystallization, and sublimation; characterization by mass spectroscopy, UV, NMR, and IR spectroscopy, optical activity, electrochemistry, pH titration. P/NP or letter grading.

11A. General Chemistry. Lecture, four hours; discussion, one hour. Preparation: high school chemistry or equivalent background and three and one-half years of high school mathematics, successful completion of Chemistry Diagnostic Test. Recommended: high school physics. Required of all majors in chemistry and biochemistry. (Students lacking prerequisites may qualify for admission by exceptional performance on Chemistry Diagnostic Test.) Atomic picture of matter; periodicity of chemical properties; types of chemical reactions; reaction stoichiometry; chemical reaction calculations; quantum theory; atomic and molecular structure and bonding.

11AH. General Chemistry (Honors). Lecture, four hours; discussion, one hour. Preparation: high school chemistry and physics or equivalent background and three and one-half years of high school mathematics. (Students lacking preparation may qualify for admission by exceptional performance on Chemistry Diagnostic Test.) All students who intend to take this course must take the Chemistry Diagnostic Test (enrollment is usually limited to students who have passed the examination). Honors course parallel to course 11A.

11B. General Chemistry. Lecture, three hours; discussion, one hour. Enforced requisite: course 11A (or 11AH, C – or better). Kinetic theory and thermodynamics of gas phase; thermochemistry; molecular interactions in liquids and solids; acid-base and solubility equilibria; free energy and reactivity.

11BH. General Chemistry (Honors). Lecture, three hours; discussion, one hour. Enforced requisite: course 11AH (B – or better). Honors course parallel to course 11B.

11BL. General Chemistry Laboratory (2 units). Laboratory, four hours; video laboratory, one hour. Enforced requisites: courses 11A and 11B (corequisite), (C – or better). Use of the balance; volumetric techniques; equilibria; thermochemistry; quantitative analysis using volumetric and potentiometric procedures; Beer's law.

11C. General Chemistry (3 units). Lecture, two hours. Enforced requisite: course 11B (or 11BH, C – or better). Chemical kinetics; electrochemistry; main group and transition metal reactivity; coordination chemistry; special topics such as carbon chemistry, polymers, ceramics, biological molecules.

11CH. General Chemistry (Honors). Lecture, three hours; discussion, one hour. Enforced requisite: course 11BH (B – or better). Honors course parallel to course 11C, but at a more advanced level.

11CL. General Chemistry Laboratory (3 units). Lecture, one hour; laboratory, six hours. Enforced requisite: course 11BL (C – or better). Rates of reactions; quantitative volumetric analysis; qualitative inorganic analysis; inorganic synthesis; column chromatography; colorimetric analysis. P/NP or letter grading.

15. Survey of Organic Chemistry and Biochemistry. Enforced requisite: course 11A (C – or better). Not open to students with credit for course 132A. Recommended for students in prenursing, prephysical therapy, and pre dental hygiene. Does not satisfy requirements for admission to medical and dental schools. Introduction to structures and reactions of organic compounds, particularly with respect to their roles and transformations in living systems.

15L. Laboratory in Elementary Organic Chemistry and Biochemistry (1 unit). Laboratory, four hours. Enforced corequisite: course 15 (C – or better). Does not satisfy requirements for admission to medical and dental schools. Introduction to quantitative work with aqueous solutions and to preparation, isolation, and characterization of organic compounds, particularly some of those important in living systems.

88A-88Z. Lower Division Seminars (2 units each). (Formerly numbered 88.) Seminar, two hours; outside study, four hours. Limited to freshmen/sophomores. General introduction to frontiers of molecular sciences or intensive exploration of a particular theme or topic. Consult *Schedule of Classes* for topics and instructors. P/NP or letter grading.

88A. Serendipity in Science. Limited to 20 freshmen. Inquiry into unexpected discoveries in science that have had significant impact on society and analysis of circumstances which brought these about, beginning with discovery of helium in the sun by Janssen in 1868 (using the newly developed field of spectroscopy). Discovery of X rays by Röntgen in 1895 and of radioactivity by Becquerel in 1896. Other topics include discoveries important to medicine, such as penicillin by Fleming in 1928 and *cis-platin* by Rosenberg in 1969.

96. Special Courses in Chemistry (1 to 4 units). To be arranged. May be repeated for a maximum of eight units.

Upper Division Courses

103. Environmental Chemistry. Lecture, four hours; discussion, one hour. Prerequisites: courses 110A, 132A, 132B/132BL, 153A, and 153L, or consent of instructor. Chemical aspects of air and water pollution, solid waste disposal, energy resources, and pesticide effects. Chemical reactions in the environment and effect of chemical processes on the environment.

110A. Physical Chemistry: Chemical Thermodynamics. Lecture, four hours; discussion, one hour. Prerequisites: course 11C, Physics 8A, 8C, and 8D, or 6A, 6B, and 6C, Mathematics 31A, 31B, 32A or 3C (for life sciences majors). Fundamentals of thermodynamics, chemical and phase equilibria, thermodynamics of solutions, electrochemistry.

110B. Physical Chemistry: Introduction to Statistical Mechanics and Kinetics. Lecture, four hours; discussion, one hour. Prerequisites: course 110A and Mathematics 32B, or consent of instructor. Strongly recommended: course 113A (for biochemistry majors course 156 may be substituted). Kinetic theory of gases, principles of statistical mechanics, statistical thermodynamics, equilibrium structure and free energy, relaxation and transport phenomena, macroscopic chemical kinetics, molecular-level reaction dynamics.

113A. Physical Chemistry: Introduction to Quantum Mechanics. Lecture, four hours; discussion, one hour. Prerequisites: course 11C, Physics 8A, 8C, and 8D, or 6A, 6B, and 6C, Mathematics 31A, 31B, 32A, 33A (may be taken concurrently). Departure from classical mechanics: Schrödinger vs. Newton equations; model systems: particle-in-a-box, harmonic oscillator, rigid rotor, and hydrogen atom; approximation methods: perturbation and variational methods; many-electron atoms, spin, and Pauli principle, chemical bonding.

C113B. Physical Chemistry: Introduction to Molecular Spectroscopy. Lecture, four hours; discussion, one hour. Prerequisite: course 113A. Interaction of radiation with matter, microwave spectroscopy, infrared and Raman spectroscopy, vibrations in polyatomic molecules, electronic spectroscopy, magnetic resonance spectroscopy. Concurrently scheduled with course C213B.

114. Physical Chemistry Laboratory. Lecture, two hours; laboratory, eight hours. Prerequisites: courses 11CL, 110A, 110B, and 113A, or consent of instructor. Lectures include techniques of physical measurement, error analysis and statistics, special topics. Laboratory includes spectroscopy, thermodynamic measurements, and chemical dynamics.

114H. Physical Chemistry Laboratory (Honors). Lecture, two hours; laboratory, eight hours. Prerequisites: courses 11CL, 110A, 110B, and 113A, with grades of B or better, or consent of instructor. Lectures include techniques of physical measurement, error analysis and statistics, special topics. Laboratory includes topics in physical chemistry to be selected in consultation with instructor.

C115A-C115B. Quantum Chemistry. Lecture, four hours; discussion, one hour. Prerequisites: course 113A, Mathematics 31A, 31B, 32A, 32B, 33A. Recommended: knowledge of differential equations equivalent to Mathematics 135A or Physics 131 and of analytic mechanics equivalent to Physics 105A. Course C115A or Physics 115B is prerequisite to C115B. Students entering course C115A are normally expected to take course C115B the following term. Designed for chemistry students with serious interest in quantum chemistry. Postulates and systematic development of nonrelativistic quantum mechanics; expansion theorems; wells; oscillators; angular momentum; hydrogen atom; matrix techniques; approximation methods; time dependent problems; atoms; spectroscopy; magnetic resonance; chemical bonding. May be concurrently scheduled with courses C215A-C215B.

121. Special Topics in Physical Chemistry. Prerequisite: course 110B. Recommended: course 113A, Physics 8D. Topics of considerable research interest presented at level suitable for students who have completed junior-year courses in physical chemistry.

C123A-C123B. Classical and Statistical Thermodynamics. Lecture, four hours; discussion, one hour. Prerequisite: course 110B or 156. Recommended: course 113A. Rigorous presentation of fundamentals of classical thermodynamics. Principles of statistical thermodynamics: probability, ensembles, partition functions, independent molecules, and the perfect gas. Applications of classical and statistical thermodynamics selected from diatomic and polyatomic gases, solid and fluid states, phase equilibria, electric and magnetic effects, ortho-para hydrogen, chemical equilibria, reaction rates, the imperfect gas, nonelectrolyte and electrolyte solutions, surface phenomena, high polymers, gravitation. May be concurrently scheduled with courses C223A-C223B.

125. Computers in Chemistry. Lecture, three hours. Prerequisites: courses 110A, 110B, 113A, working knowledge of FORTRAN IV or PL/1. Discussion of computer techniques, including matrix manipulation, solution of differential equations, data acquisition, and instrumental control, and their applications to chemical problems in quantum mechanics, thermodynamics, and kinetics.

132A. Organic Chemistry. Lecture, three hours; discussion, one hour. Prerequisites: courses 11B or 11BH, and 11CL (may be taken concurrently), with grades of C – or better, or consent of instructor. Structures and properties of organic molecules; chemical bond and its relation to organic molecular structure, stereochemistry, and reactivity; mechanisms and stereochemistry of organic reactions; physical/organic study of a chemical reaction; synthesis, properties, and reactions of alkanes, alkenes, alkynes, alkyl halides, ethers, and alcohols.

132AH. Organic Chemistry (Honors). Lecture, three hours; discussion, one hour. Prerequisites: courses 11B or 11BH, and 11CL (may be taken concurrently), with grades of B – or better, or consent of instructor. Honors course parallel to course 132A.

132B. Organic Chemistry. Lecture, three hours; discussion, one hour. Prerequisite: course 132A or 132AH with a grade of C – or better or consent of instructor. Corequisite: course 132BL. Introduction to infrared, ZH, and ZCC NMR spectroscopy; structure, reactivity, and spectroscopic properties of carbonyl and carboxyl derivatives, aromatic compounds, and amines; concepts of aromaticity; amino acids and the peptide bond.

132BH. Organic Chemistry (Honors). Lecture, three hours; discussion, one hour. Prerequisite: course 132A or 132AH with a grade of B – or better or consent of instructor. Honors course parallel to course 132B.

132BL. Organic Chemistry Laboratory (2 units). Lecture, one hour; laboratory, three hours. Prerequisites: courses 11CL, and 132A or 132AH, with grades of C – or better or consent of instructor. Corequisite: course 132B. Basic experimental techniques in organic synthesis (distillation, extraction, crystallization reaction setup and workup) and organic analytical chemistry (melting and boiling point, refractive index, chromatography, IR, NMR, GC). One-step synthesis of known organic compounds on microscale level.

132C. Organic Chemistry. Lecture, three hours; discussion, one hour. Prerequisites: courses 132B or 132BH, and 132BL, with grades of C – or better, or consent of instructor. Introduction to electron absorption and mass spectroscopy; modern NMR spectroscopy; pericyclic reactions; molecular orbital theory; polymers and organic materials; organic chemistry of silicon, phosphorus, and sulfur; organic synthesis; concepts and design; building blocks of biological systems: amino acids and the peptide bond, lipids, carbohydrates, and heterocycles; bioorganic chemistry; molecular modeling.

132CH. Organic Chemistry (Honors). Lecture, three hours; discussion, one hour. Prerequisite: course 132B or 132BH with a grade of B – or better or consent of instructor. Honors course parallel to course 132C.

132CL. Organic Chemistry Laboratory (2 units). Lecture, one hour; laboratory, four hours. Prerequisites: courses 132B or 132BH, and 132BL, with grades of C – or better, or consent of instructor. Corequisite: course 132C. Modern techniques in organic synthetic and analytical chemistry. Micro-preparative and semi-preparative scale single and multistep synthesis of known organic molecules. One- and two-dimensional multinuclear NMR techniques. CAS online literature search and written synthesis proposal.

136. Organic Structural Methods. Lecture, two hours; laboratory, eight hours. Prerequisites: courses 132A, 132B/132BL, and 132C/132CL, or equivalent, with grades of C – or better, or consent of instructor. Laboratory course in organic structure determination by chemical and spectroscopic methods; microtechniques.

C143A. Structure and Mechanism in Organic Chemistry. Lecture, three hours; discussion, one hour. Prerequisites: courses 110B, 113A, and 132C/132CL (may be taken concurrently), or equivalent, with grades of C- or better, or consent of instructor. Mechanisms of organic reactions. Acidity and acid catalysis; linear free energy relationships; isotope effects. Molecular orbital theory; photochemistry; pericyclic reactions. May be concurrently scheduled with course C243A.

C143B. Mechanism and Structure in Organic Chemistry. Lecture, three hours; discussion, one hour. Prerequisite: course C143A with a grade of C- or better or consent of instructor. Mechanisms of organic reactions; structure and detection of reactive intermediates. May be concurrently scheduled with course C243B.

144. Practical and Theoretical Introductory Organic Synthesis. Lecture, two hours; laboratory, eight hours. Prerequisites: courses 132C/132CL or equivalent. Lectures on modern synthetic reactions and processes, with emphasis on stereospecific methods for carbon-carbon bond formation. Laboratory methods of synthetic organic chemistry, including reaction techniques, synthesis of natural products, and molecules of theoretical interest.

153A. Biochemistry: Introduction to Structure, Enzymes, and Metabolism. Lecture, three hours; discussion, one hour; tutorial, one hour. Prerequisite: course 132B or 132BH with a grade of C- or better. Structure of proteins, carbohydrates, and lipids; enzyme catalysis and principles of metabolism, including glycolysis, citric acid cycle, and oxidative phosphorylation.

153B. Biochemistry: DNA, RNA, and Protein Synthesis. Lecture, three hours; discussion, one hour; tutorial, one hour. Prerequisite: course 153A. Nucleotide metabolism; DNA replication; DNA repair; transcription machinery; regulation of transcription; RNA structure and processing; protein synthesis and processing.

153BH. Biochemistry: DNA, RNA, and Protein Synthesis (Honors). Lecture, three hours; discussion, two hours. Prerequisite: course 153A. Honors course parallel to course 153B.

153C. Biochemistry: Biosynthetic and Energy Metabolism and Its Regulation. Lecture, three hours; discussion, one hour. Prerequisite: course 153A or consent of instructor. Metabolism of carbohydrates, fatty acids, amino acids, and lipids; photosynthetic metabolism and assimilation of inorganic nutrients; regulation of these processes.

CM153G. Macromolecular Structure (6 units). (Same as Biological Chemistry CM153G.) Lecture, five hours. Prerequisites: courses 110A, 153A, 153B, 153C, 156, or equivalent. Chemical and physical properties of proteins and nucleic acids. Structure, cloning, and analysis of DNA; biosynthesis and processing of RNA; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. Concurrently scheduled with course CM253.

153L. Biochemical Methods I (2 units). (Formerly numbered 153AL.) Lecture, one hour; laboratory, four hours. Prerequisites: courses 132B or 132BH, 132BL, 153A (may be taken concurrently). Integrated term-long project involving purification of an enzyme from meat obtained at local butcher, followed by characterization of purified enzyme, with emphasis on enzyme kinetics.

154. Biochemical Methods II. Lecture, two hours; laboratory, eight hours. Prerequisites: courses 153A, 153B, and 153L, or consent of instructor. Recommended: course 156. Two to three major laboratory projects using biochemical laboratory techniques to investigate contemporary problems in biochemistry. Topics include transcription activation, molecular basis of DNA-protein interactions, biochemical basis of platelet activation, and initiation of blood clotting cascade. Experiments entail characterizing function of proteins, nucleic acids, and lipids involved in these processes.

CM155. Biological Catalysis. (Formerly numbered C155.) (Same as Biology CM160.) Prerequisites: courses 110A, 153A, 153B, Biology 100A or Life Sciences 3, 100B or C139 or M140, or equivalent, consent of instructor. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level. Concurrently scheduled with course CM255.

156. Physical Biochemistry. Lecture, four hours; discussion, one hour. Prerequisites: courses 110A, 153A. Biochemical kinetics; solution thermodynamics of biochemical systems; multiple equilibria; hydrodynamics; energy levels, spectroscopy, and bonding; topics from structural, statistical, and electrochemical methods of biochemistry.

CM159A. Mechanisms in Regulation of Transcription I (2 units). (Same as Biological Chemistry CM159A.) First five weeks. Lecture, four hours; outside study, two hours. Prerequisites: courses 153B and 154, or consent of instructor. Not open to graduate students. Mechanisms that control transcription in bacteria. Repression and activation at promoters. Sigma factors and polymerase binding proteins. Signal transduction pathways in transcription. Control of termination. Concurrently scheduled with course CM259A. P/NP or letter grading.

CM159B. Mechanisms in Regulation of Transcription II (2 units). (Same as Biological Chemistry CM159B.) Second five weeks. Lecture, four hours; outside study, two hours. Prerequisite: course CM159A. Not open to graduate students. Eukaryotic general transcriptional apparatus; sequence-specific promoter recognition; mechanisms of transcriptional activation and repression, including role of chromatin structure; transcription factors as targets of signal transduction pathways; transcription factors in embryogenesis. Concurrently scheduled with course CM259B. P/NP or letter grading.

C161A. Plant Biochemistry. Lecture, three hours; discussion, one hour. Prerequisite: course 153C or equivalent or consent of instructor. Introduction to distinctive features of plant biochemistry. Topics include photosynthesis, nitrogen metabolism, plant cell wall metabolism, and secondary metabolism in relation to stress. Concurrently scheduled with course C261A.

C165. Metabolic Control by Protein Modification (2 units). First five weeks. Lecture, three hours; discussion, one hour. Prerequisites: courses 153A, 153B, 153C. Biochemical basis of controlling metabolic pathways by posttranslational modification of proteins, including phosphorylation and methylation reactions. Concurrently scheduled with course C265.

CM170. Biochemistry and Molecular Biology of Photosynthetic Apparatus. (Same as Biology M170.) Lecture, three hours; discussion, two hours; outside study, seven hours. Prerequisites: courses 153A and 153B, or Life Sciences 3 or equivalent, and course 153L. Recommended: courses 153C, 154, Life Sciences 4 or equivalent. Light harvesting, photochemistry, electron transfer, carbon fixation, carbohydrate metabolism, pigment synthesis in chloroplasts and bacteria. Assembly of photosynthetic membranes and regulation of genes encoding those components. Emphasis on understanding of experimental approaches. Concurrently scheduled with course C270. P/NP or letter grading.

173. Structural Inorganic Chemistry. Lecture, three hours; discussion, one hour. Prerequisite: course 110A. Recommended: courses 113A or 156, and 132B/132BL. Introductory survey of structure and bonding in inorganic compounds; molecular stereochemistry; donor/acceptor interactions; coordination compounds of transition metals; elements of crystal-field and ligand-field theory.

174. Inorganic and Metalorganic Laboratory Methods. Lecture, two hours; laboratory, eight hours. Prerequisites: courses 132A, 132B/132BL, and 173, or consent of instructor. Synthesis of inorganic compounds, including air-sensitive materials; dry-box, vacuum line, and high-pressure techniques; Schlenk methods; chromatographic and ion exchange separations.

C175. Inorganic Reaction Mechanisms. Lecture, three hours. Prerequisites: courses 110A, 110B, 113A, 173, or equivalent. Survey of inorganic reactions; mechanistic principles; electronic structure of metal ions; transition-metal coordination chemistry; inner- and outer-sphere and chelate complexes; substitution, isomerization, and racemization reactions; stereochemistry; oxidation/reduction, free radical, polymerization, and photochemical reactions of inorganic species. May be concurrently scheduled with course C275.

C176. Group Theory and Applications to Inorganic Chemistry. Lecture, three hours; discussion, one hour. Prerequisites: courses 113A, 173, or equivalent. Group theoretical methods; molecular orbital theory; ligand-field theory; electronic spectroscopy; vibrational spectroscopy. May be concurrently scheduled with course C276A.

C180. Solid-State Chemistry. Lecture, three hours. Prerequisite: course 173 or equivalent. Survey of new materials and methods for their preparation and characterization, with emphasis on band theory and its relationship to chemical, optical, transport, and magnetic properties, leading to a deeper understanding of these materials. Concurrently scheduled with course C280. P/NP or letter grading.

C181. Polymer Chemistry. Lecture, three hours; discussion, one hour. Prerequisites: courses 110A, 132A, 132B. Synthesis of organic and inorganic macromolecules, thermodynamic and statistical mechanical descriptions of unique properties of polymers, polymer characterization methods, and special topics such as conductive and biomedical polymers and polymeric reagents in synthesis. Concurrently scheduled with course C281.

184. Chemical Instrumentation. Lecture/quiz, two hours; laboratory, eight hours. Prerequisite: course 110A. Theory and practice of instrumental techniques of chemical and structural analysis, including atomic absorption spectroscopy, gas chromatography, mass spectrometry, nuclear magnetic resonance, polarography, X-ray fluorescence, and other modern methods.

190. Undergraduate Thesis Research. Prerequisites: two terms of course 199 on related material, consent of undergraduate adviser and research director. Final term of integrated one-year research project. May consist of experimental and/or theoretical research or, in some cases, comprehensive review of a given area. Thesis embodying totality of year's work to be submitted and oral presentation made. Course suggested, but not required, for those seeking departmental honors at graduation.

191. Advanced Undergraduate Research (1 unit). Prerequisites: four units of course 199B, consent of instructor and department. To be arranged with faculty member who will direct the research. Additional information may be obtained from undergraduate office. May be repeated for a maximum of four units.

196A-196F. Special Courses in Chemistry (1 to 4 units each). Hours to be arranged. Prerequisite: consent of undergraduate adviser (chemistry).

199A. Directed Individual Studies or Research for Undergraduate Students (2 to 8 units). (Formerly numbered 199A-199ZZ.) Prerequisites: junior standing with at least 3.0 GPA in the major or senior standing or consent of instructor, consent of department chair. To be arranged with faculty member who will direct the research. Additional information on requirements, enrollment petitions, and written proposal deadlines may be obtained from undergraduate office. May be taken for a maximum of eight units. P/NP grading.

199B. Directed Individual Studies or Research for Undergraduate Students (2 to 4 units). (Formerly numbered 199A-199ZZ.) Prerequisites: eight units of course 199A, junior standing with at least 3.0 GPA in the major or senior standing or consent of instructor, consent of department chair. To be arranged with faculty member who will direct the research. Additional information on requirements, enrollment petitions, and written proposal deadlines may be obtained from undergraduate office. May be taken for a maximum of four units. P/NP or letter grading.

Graduate Courses

205. Introduction to Chemistry of Biology. Lecture, three hours. Overview of biochemistry, pharmacology, and physiology, with emphasis on chemical interactions at molecular level.

206. Chemistry of Biology Seminar (2 units). Discussion, three hours; outside study, three hours. Limited to students supported by UCLA program in Chemistry/Biology Interface Predoctoral Training. Current research topics at interface of chemistry and biology. May be repeated for credit. S/U grading.

207. Organometallic Chemistry. Lecture/discussion, three hours. Prerequisite or corequisite: course C243A or consent of instructor. Survey of synthesis, structure, and reactivity (emphasizing a mechanistic approach) of compounds containing carbon bonded to elements selected from main group metals, metalloids, and transition metals, including olefin complexes and metal carbonyls; applications in catalysis and organic synthesis.

C213B. Physical Chemistry: Molecular Spectroscopy. Lecture, four hours; discussion, one hour. Prerequisite: course 113A. Interaction of radiation with matter, microwave spectroscopy, infrared and Raman spectroscopy, vibrations in polyatomic molecules, electronic spectroscopy, magnetic resonance spectroscopy. Concurrently scheduled with course C113B. Independent study project required of graduate students.

C215A-C215B. Quantum Chemistry: Methods. Lecture, four hours; discussion, one hour. Prerequisites: course 113A, Mathematics 31A, 31B, 32A, 32B, 33A. Recommended: knowledge of differential equations equivalent to Mathematics 135A or Physics 131 and of analytic mechanics equivalent to Physics 105A. Course C215A or Physics 115B is prerequisite to C215B. Students entering course C215A are normally expected to take course C215B the following term. Designed for chemistry students with serious interest in quantum chemistry. Postulates and systematic development of nonrelativistic quantum mechanics; expansion theorems; wells; oscillators; angular momentum; hydrogen atom; matrix techniques; approximation methods; time dependent problems; atoms; spectroscopy; magnetic resonance; chemical bonding. May be concurrently scheduled with courses C115A-C115B.

215C. Advanced Quantum Chemistry: Applications. Lecture, three hours; discussion, one hour. Prerequisites: course C215B, Physics 131, or equivalent. Topics in quantum chemistry selected from molecular structure, collision processes, theory of solids, symmetry and its applications, and theory of electromagnetic radiation. S/U or letter grading.

215D. Molecular Spectra, Diffraction, and Structure. Lecture, three hours; discussion, one hour. Prerequisites: course C215B, Physics 131, or equivalent. Selected topics from electronic spectra of atoms and molecules; vibrational, rotational, and Raman spectra; magnetic resonance spectra; X-ray, neutron, and electron diffraction; coherence effects. S/U or letter grading.

218. Physical Chemistry Student Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

219A-219Z. Seminars: Research in Physical Chemistry (2 units each). Discussion, three hours. Prerequisite: consent of instructor. Advanced study and analysis of current topics in physical chemistry. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

219B. Chemistry and Physics of Surfaces.

219C. Physical Chemistry of Complex Fluids.

219D. Computer Simulation in Chemistry. (Formerly numbered 220A.)

219E. Dynamics of Molecule-Molecule and Molecule-Surface Reactions.

219F. Environmental Chemistry and Global Cycling.

219G. Gas Phase Kinetics and Photochemistry.

219H. Spectroscopy and Dynamics of Molecules, Clusters, and Biological Systems.

219I. Spectroscopy of Isolated Molecules, Complexes, and Clusters.

219J. Chemistry and Biophysics of Interfaces.

219K. Statistical Mechanics of Disordered Systems.

219L. Modern Methods for Molecular Reactions and Structure.

219M. Chemistry of Materials at High Pressures.

219N. Cosmochemistry.

219O. Chemistry and Physics of Nanostructures.

219P. Statistical Mechanics of Complex Fluids.

221A-221Z. Advanced Topics in Physical Chemistry (2 to 4 units each). Prerequisite: consent of instructor. Each course encompasses a recognized specialty in physical chemistry, generally taught by a staff member whose research interests embrace that specialty. S/U or letter grading.

C223A-C223B. Classical and Statistical Thermodynamics. Lecture, four hours; discussion, one hour. Prerequisite: course 110B or 156. Recommended: course 113A. Presentation of fundamentals of classical thermodynamics. Principles of statistical thermodynamics: probability, ensembles, partition functions, independent molecules, and the perfect gas. Applications of classical and statistical thermodynamics selected from diatomic and polyatomic gases, solid and fluid states, phase equilibria, electric and magnetic effects, ortho-para hydrogen, chemical equilibria, reaction rates, the imperfect gas, nonelectrolyte and electrolyte solutions, surface phenomena, high polymers, gravitation. May be concurrently scheduled with courses C123A-C123B.

223C. Statistical Mechanics. Lecture, three hours; discussion, one hour. Prerequisites: courses C215B, C223B, Physics 131, or equivalent. Fundamentals of statistical mechanics; classical equations of state; Coulomb systems; phase transitions; quantum statistical mechanics; quantum corrections to the equation of state; density matrix; second quantization. S/U or letter grading.

225. Chemical Kinetics. Lecture, three hours; discussion, one hour. Prerequisites: courses C215B, C223B. Classical experimental and theoretical approaches to study of rates and mechanisms of chemical reactions. Modern experimental techniques and molecular-level theory of reaction dynamics. Examples of well-studied elementary reactions. S/U or letter grading.

M227. Molecular Genetics of Bacteria and Phage. (Same as Microbiology M227 and Microbiology and Immunology M227.) Lecture, three hours; discussion, one hour. Prerequisite: course CM253 or consent of instructor. Molecular and cellular biology of bacteria and bacteriophages.

228. Chemical Physics Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U or letter grading.

229. Introduction to Physical Chemistry Research (2 units). Lecture, 90 minutes. Intended primarily for entering physical chemistry graduate students. S/U grading.

M230B. Structural Molecular Biology. (Same as Biology M230B.) Lecture, three hours; discussion, one hour. Prerequisites: Physics 6C, Mathematics 3C, consent of instructor. Selected topics from principles of biological structure; structures of globular proteins and RNAs; structures of fibrous proteins, nucleic acids, and polysaccharides; harmonic analysis and Fourier transforms; principles of electron, neutron, and X-ray diffraction; optical and computer filtering; three-dimensional reconstruction. S/U or letter grading.

M230D. Structural Molecular Biology Laboratory (2 units). (Same as Biology M230D.) Laboratory, 10 hours. Corequisite: course M230B. Methods in structural molecular biology, including experiments utilizing single crystal X-ray diffraction, low angle X-ray diffraction, electron diffraction, optical diffraction, optical filtering, three-dimensional reconstruction from electron micrographs, and model building.

232. Stereochemistry and Conformational Analysis. Lecture/discussion, three hours. Prerequisite or corequisite: course C143A or consent of instructor. Molecular symmetry, chirality, prochirality, stereochemistry in vinyl polymers, atropisomerism, diastereomeric interactions in solution, conformations of acyclic and cyclic molecules.

M233. Principles, Practices, and Policies in Biotechnology (2 units). (Same as Biological Chemistry M233, Biology M233, Chemical Engineering M233, Microbiology M233, Microbiology and Immunology M233, and Radiological Sciences M233.) Prerequisite: graduate standing or consent of instructor. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. S/U or letter grading.

235A-235Z. Seminars: Research in Organic Chemistry (2 units each). Discussion, three hours. Prerequisite: consent of instructor. Advanced study and analysis of current topics in organic chemistry. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

235A. Synthesis of Natural Products and Biopolymers.

235B. Design, Preparation, and Characterization of New Organic Materials.

235C. Supramolecular Chemistry.

235D. Modern Photochemistry and Biooxidants.

235E. Theoretical and Physical Organic Chemistry.

235F. Synthetic Methods and Synthesis of Natural Products.

235G. Organometallic Chemistry and Organic Synthesis.

235H. Reaction Mechanisms in Molecular Biology.

235I. Fullerene Chemistry and Materials Science.

235J. Organic and Bioorganic Chemistry.

235K. Organic Chemistry in Organized and Restricted Media.

236. Spectroscopic Methods of Organic Chemistry. Lecture, three hours. Prerequisite or corequisite: course C243A or consent of instructor. Problem solving using proton and carbon 13 nuclear magnetic resonance, infrared spectroscopy, and mass spectrometry; new techniques in NMR, IR, and MS, with emphasis on Fourier transform NMR.

241A-241Z. Special Topics in Organic Chemistry (2 to 4 units each). Prerequisite or corequisite: course C243A or equivalent or consent of instructor. Each course encompasses a recognized specialty in organic chemistry, generally taught by a staff member whose research interests embrace that specialty.

- 242. Organic Photochemistry.** Lecture/discussion, three hours. Prerequisite or corequisite: course C243A or consent of instructor. Interactions of light with organic molecules; mechanistic and preparative photochemistry.
- C243A. Organic Chemistry: Structure and Mechanics.** Lecture, three hours; discussion, one hour. Prerequisites: courses 110B, 113A, and 132C/132CL (may be taken concurrently), or equivalent, with grades of C- or better, or consent of instructor. Mechanisms of organic reactions. Acidity and acid catalysis; linear free energy relationships; isotope effects. Molecular orbital theory; photochemistry; pericyclic reactions. May be concurrently scheduled with course C143A. S/U or letter grading.
- C243B. Organic Chemistry: Mechanism and Structure.** Lecture, three hours; discussion, one hour. Prerequisite: course C243A or consent of instructor. Mechanisms of organic reactions; structure and detection of reactive intermediates. May be concurrently scheduled with course C143B.
- 244A. Organic Synthesis: Methodology and Stereochemistry.** Modern synthetic reactions and transformations involving organic substrates. Special emphasis on reagents useful in asymmetric induction and stereoselective synthesis of structurally complex target molecules.
- 244B. Strategy and Design in Organic Synthesis.** Lecture, three hours. Prerequisite or corequisite: course C243A or consent of instructor. Theory behind the planning of syntheses of complex molecules from simpler ones. Organic reactions and their use in the synthetic process. Reasoning and art involved in organic synthesis.
- 245. Applications of Electronic Theory in Organic Chemistry.** Lecture, three hours; discussion, one hour. Prerequisite or corequisite: course C243A or consent of instructor. Review of molecular orbital theory; introduction to alternative theoretical methods; aromaticity and homoaromaticity; Hückel and Möbius conjugation; Woodward/Hoffmann theory of concerted pericyclic reactions; through-bond and through-space interactions; introduction to photoelectron spectroscopy; frontier molecular orbital theory; related special topics.
- 247. Organic Colloquium (2 units).** Seminars in organic chemistry and related areas presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.
- 248. Organic Chemistry Student Seminar (2 units).** Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U or letter grading.
- 249A. Problems in Advanced Organic Chemistry.** Introduction to organic chemistry research. Problems in organic reaction mechanisms, synthesis, structure determination, stereochemistry, spectroscopy, electronic theory, photochemistry, and organometallic chemistry. Intended primarily for first-year graduate students as preparation for cumulative examinations. S/U grading.
- 249B. Problems in Advanced Organic Chemistry (2 units).** (Formerly numbered 249.) Problems in organic reaction mechanisms, synthesis, structure determination, stereochemistry, spectroscopy, electronic theory, photochemistry, and organometallic chemistry, with emphasis on current literature. Intended primarily for first- and second-year graduate students as preparation for cumulative examinations. May be repeated for credit. S/U grading.
- 250. Topics in Biochemistry and Molecular Biology of Animal Cells.** Lecture, three hours. Prerequisites: courses 132A, 132B/132BL, 132C/132CL, or equivalent, 153A, 153B, 153C, courses in genetics and molecular biology, consent of instructor. Structure and organization of animal cells, cell-cell contact, motility of cell and mobility of cellular components, chromosome structure, interactions between cytoplasm and nucleus, genetic analysis in higher eukaryotic cells, biochemistry of tissue development and organization.
- 251A-251Z. Advanced Topics in Biochemistry (2 units each).** Prerequisite: consent of instructor. Each course encompasses a recognized specialty in biochemistry, generally taught by a staff member whose research interests embrace that specialty.
- CM253. Macromolecular Structure (6 units).** (Formerly numbered M253.) (Same as Biological Chemistry CM253.) Lecture, five hours. Prerequisites: courses 110A, 153A, 153B, 153C, 156, or equivalent. Chemical and physical properties of proteins and nucleic acids. Structure, cloning, and analysis of DNA; biosynthesis and processing of RNA; biosynthesis, purification, structure, and analysis of proteins; correlation of structure and biological properties. Concurrently scheduled with course CM153G.
- 254. Advanced Biochemical Methods.** Lecture, two hours; laboratory, eight hours. Prerequisite: course 156 or consent of instructor. Recommended: courses 153B, 153C. Theoretical and practical basis of metabolic, chromatographic, kinetic, electrophoretic, ultracentrifugal, isotopic, and other techniques as applied to biochemical systems.
- CM255. Biological Catalysis.** (Formerly numbered M255.) (Same as Biological Chemistry M255, Biology CM252, and Pharmacology M255.) Prerequisites: courses 110A, 153A, 153B, Biology 100A or Life Sciences 3, 100B or C139 or M140, or equivalent, consent of instructor. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level. Concurrently scheduled with course CM155. Graduate students required to write research paper and present oral report on it.
- 256A-256Z. Seminars: Research in Biochemistry (2 units each).** Discussion, three hours. Prerequisite: consent of instructor. Advanced study and analysis of current topics in biochemistry. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.
- 256A.** Biochemistry of Plasma Proteins.
- 256B.** Biochemistry of Protein Function.
- 256C.** Biochemistry and Molecular Genetics of Fungi.
- 256D.** Transcriptional Control Mechanisms in *Drosophila* Embryogenesis.
- 256E.** Secondary Metabolites in Higher Plants: Biosynthesis, Regulation, and Physiological Functions.
- 256F.** Current Topics in Prokaryotic Development.
- 256G.** Nucleic Acid Structure Determination by NMR.
- 256H.** Basic Mechanisms of Promoter Activation.
- 256J.** Contractile Proteins in Muscle Contraction and Cell Motility.
- 256K.** Biochemistry and Molecular Biology of *Chlamydomonas*.
- 256L.** Literature of Structural Biology.
- 256M.** Mechanism and Regulation of Transcription Termination in Eukaryotic Organisms.
- 256N.** Advanced Topics in Structural Biology.
- 256O.** Membrane Biophysics.
- 256P.** Analysis of Protein Structure.
- 256Q.** Biochemistry and Function of Ubiquinone in Yeast and Higher Eukaryotes.
- M257. Physical Chemistry of Biological Macromolecules (2 units).** (Same as Biological Chemistry M257.) Prerequisites: courses 110A and 153A, or consent of instructor. Theory of hydrodynamic, thermodynamic, and optical techniques used to study structure and function of biological macromolecules.
- 258. Biochemistry Student Seminar (2 units).** Seminars presented by graduate students on topics of current biochemical interest. May be repeated for credit. S/U grading.
- CM259A. Mechanisms in Regulation of Transcription I (2 units).** (Formerly numbered 259.) (Same as Biological Chemistry CM259A.) First five weeks. Lecture, four hours; outside study, two hours. Prerequisite: course CM253 or M267 or consent of instructor. Mechanisms that control transcription in bacteria. Repression and activation at promoters. Sigma factors and polymerase binding proteins. Signal transduction pathways in transcription. Control of termination. Concurrently scheduled with course CM159A. In Progress grading (credit to be given only on completion of course CM259B).
- CM259B. Mechanisms in Regulation of Transcription II (2 units).** (Formerly numbered 259.) (Same as Biological Chemistry CM259B.) Second five weeks. Lecture, four hours; outside study, two hours. Prerequisite: course CM259A. Eukaryotic general transcription apparatus; sequence-specific promoter recognition; mechanisms of transcriptional activation and repression, including role of chromatin structure; transcription factors as targets of signal transduction pathways; transcription factors in embryogenesis. Concurrently scheduled with course CM159B.
- C261A. Plant Biochemistry.** Lecture, three hours; discussion, one hour. Prerequisite: course 153C or equivalent or consent of instructor. Introduction to distinctive features of plant biochemistry. Topics include photosynthesis, nitrogen metabolism, plant cell wall metabolism, and secondary metabolism in relation to stress. Concurrently scheduled with course C161A.
- 262. Biological Energy Transductions.** Lecture, three hours. Prerequisites: courses 153B and 153C, or equivalent, or consent of instructor. Molecular basis of energy-transducing processes, including oxidative and photosynthetic phosphorylation, other energy-linked oxidative functions, membrane active transport, muscle contraction, and special sensory functions.
- M263. Metabolism and Its Regulation.** (Same as Biological Chemistry M263.) Lecture, three hours. Prerequisites: course 110A, one course from 153B, 153C, 156, or Biological Chemistry 201A-201B, or equivalent, or consent of instructor. Thermodynamic and kinetic aspects of metabolism; regulatory properties of enzymes; metabolic regulation; consideration of comparative aspects of metabolism in relation to physiological function.
- M264A-M264B-M264C. Molecular Basis of Atherosclerosis: Selected Topics (2 units each).** (Same as Biological Chemistry M264A-M264B-M264C.) Prerequisite: consent of instructor. Biochemistry, morphology, and physiology of atherosclerosis. Emphasis on chemistry of lipoproteins and role of plasma lipoproteins in regulation of tissue lipid metabolism and development of atherosclerosis. Each course may be taken independently for credit.
- C265. Metabolic Control by Protein Modification (2 units).** First five weeks. Lecture, three hours; discussion, one hour. Prerequisites: courses 153A, 153B, 153C. Biochemical basis of controlling metabolic pathways by posttranslational modification of proteins, including phosphorylation and methylation reactions. Concurrently scheduled with course C165.
- 266. Seminar: Techniques for Study of Gene Regulation (2 units).** Prerequisites: courses CM259A and CM259B, or consent of instructor. Seminar to discuss specific experimental approaches being taken in study of gene regulation. Emphasis on specific biochemical techniques being used to study regulatory protein-DNA interactions in diverse biological model systems.
- M267. Macromolecular Metabolism and Subcellular Organization (6 units).** (Same as Biological Chemistry CM267 and Biology CM223.) Lecture, five hours. Prerequisites: courses 153A, 153B, 153C, consent of instructor. Recommended: course CM153G. Cell cycle; DNA replication and repair; structure and properties of cellular organelles; regulation of cell division; cell transformation; normal and aberrant expression of oncogenes; molecular aspects of development.

268. Biochemistry Research Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students on topics of current biochemical research interest. May be repeated for credit. S/U or letter grading.

C270. Biochemistry and Molecular Biology of Photosynthetic Apparatus. Lecture, three hours; discussion, two hours; outside study, seven hours. Prerequisites: courses 153A and 153B, or Life Sciences 3 or equivalent and course 153L. Recommended: courses 153C, 154, Life Sciences 4 or equivalent. Light harvesting, photochemistry, electron transfer, carbon fixation, carbohydrate metabolism, pigment synthesis in chloroplasts and bacteria. Assembly of photosynthetic membranes and regulation of genes encoding those components. Emphasis on understanding of experimental approaches. Concurrently scheduled with course CM170.

271A-271Z. Advanced Topics in Inorganic Chemistry (2 to 4 units each). Prerequisite: consent of instructor. Each course encompasses a recognized specialty in inorganic chemistry, generally taught by a staff member whose research interests embrace that specialty.

272A-272Z. Seminars: Research in Inorganic Chemistry (2 units each). Discussion, three hours. Prerequisite: consent of instructor. Advanced study and analysis of current topics in inorganic chemistry. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading:

272A. Chemistry of Materials.

272B. Metalorganic, Inorganic Biometalorganic Chemistry.

272C. Inorganic Spectroscopy.

272D. Bioinorganic Chemistry and Biology of Transition Metals and Oxygen.

272E. Organometallic Synthesis and Chemical Vapor Deposition.

272F. Porphyrin-Based Lattice Clathrates.

272G. Issues in Chemical Education.

C275. Inorganic Chemistry: Reaction Mechanisms. Lecture, three hours. Prerequisites: courses 110A, 110B, 113A, 173, or equivalent. Survey of inorganic reactions; mechanistic principles; electronic structure of metal ions; transition-metal coordination chemistry; inner- and outer-sphere and chelate complexes; substitution, isomerization, and racemization reactions; stereochemistry; oxidation/reduction, free radical, polymerization, and photochemical reactions of inorganic species. May be concurrently scheduled with course C175.

C276A. Inorganic Chemistry: Group Theory and Spectroscopy. Lecture, three hours; discussion, one hour. Prerequisites: courses 113A, 173, or equivalent. Group theoretical methods; molecular orbital theory; ligand-field theory; electronic spectroscopy; vibrational spectroscopy. May be concurrently scheduled with course C176. S/U or letter grading.

276B. Physical Methods for the Characterization of Inorganic Compounds. Lecture, three hours. Prerequisite: course C276A or consent of instructor. Applications of spectroscopic techniques, including IR, Raman, visible, UV, NMR, ESR, and NQR, to elucidation of structure and bonding in inorganic and organometallic compounds.

277. Crystal Structure Analysis. Lecture, three hours. Theory and practice of modern crystallography, with emphasis on practical experience in structure determination. Topics include crystallographic symmetry, scattering theory, data collection, Fourier analysis, heavy atom techniques, direct methods, isomorphous replacement, crystallographic refinement, error analysis, and common pitfalls. S/U or letter grading.

278. Inorganic Chemistry Student Seminar (2 units). Seminars presented by staff, outside speakers, postdoctoral fellows, and graduate students. May be repeated for credit. S/U or letter grading.

279. Bioinorganic Chemistry. Lecture, three hours. Prerequisites: courses 110A and either 156 or 173. Role of metal ions in biology; introduction to metalloenzymes and metalloproteins; metal ion interactions with nucleic acids; metal ion metabolism.

C280. Solid-State Chemistry. (Formerly numbered 280.) Lecture, three hours. Prerequisite: course 173 or equivalent. Survey of new materials and methods for their preparation and characterization, with emphasis on band theory and its relationship to chemical, optical, transport, and magnetic properties, leading to a deeper understanding of these materials. Concurrently scheduled with course C180. S/U or letter grading.

C281. Polymer Chemistry. Lecture, three hours; discussion, one hour. Prerequisites: courses 110A, 132A, 132B. Synthesis of organic and inorganic macromolecules, thermodynamic and statistical mechanical descriptions of unique properties of polymers, polymer characterization methods, and special topics such as conductive and biomedical polymers and polymeric reagents in synthesis. Concurrently scheduled with course C181.

282. Introduction to Inorganic Chemistry Research (2 units). Lecture, 90 minutes. Discussion of current research in inorganic chemistry, intended primarily for entering inorganic chemistry graduate students. S/U grading.

M298. Seminar: Current Topics in Molecular Biology (2 units). (Same as Biological Chemistry M298, Biology M298, Microbiology M298, Microbiology and Immunology M298, and Molecular Biology M298.) Prerequisite: consent of instructor and graduate adviser of interdepartmental Molecular Biology Ph.D. Program. Each student conducts or participates in discussions on assigned topics. May be repeated for credit.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

400. Safety in Chemical and Biochemical Research (2 units). Survey of safe laboratory practices for experimental research in organic, inorganic, and physical chemistry and biochemistry. Topics include laser safety, cryogenic hazards, high- and low-pressure experimentation, gas and carcinogen handling, chemical spills, fire extinguishing, and chemical disposal. S/U grading.

495. Teaching College Chemistry (2 units). Lecture, two hours; discussion, two hours; 20 hours training during week prior to Fall Quarter. Course for teaching assistants designed to deal with problems and techniques of teaching college chemistry. S/U grading.

596. Directed Individual Study or Research (2 to 16 units). To be arranged with faculty member who will direct the study or research. May be repeated for credit. S/U grading.

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 4 units). Prerequisite: consent of graduate adviser (chemistry). S/U grading.

598. Research for and Preparation of M.S. Thesis (2 to 16 units). Each faculty member supervises research of M.S. students and holds research group meetings, seminars, and discussions with the students.

599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units). Each faculty member supervises research of Ph.D. students and holds research group meetings, seminars, and discussions with the students.

CHEMISTRY/ MATERIALS SCIENCE

*Interdepartmental Program
College of Letters and Science*

UCLA
6532 Boelter Hall

Jeffrey I. Zink, Ph.D. (*Chemistry and Biochemistry*)

Assistant Professors

Mark S. Goosky, Ph.D. (*Materials Science and Engineering*)
James R. Heath, Ph.D. (*Chemistry and Biochemistry*)

Scope and Objectives

The undergraduate major is designed for students who are interested in solid-state chemistry, the preparation of engineering materials such as semiconductors, glasses, ceramics, metals, and polymers, the reactivity of such materials in different environments, and how chemical compositions affect properties. It provides appropriate preparation for graduate studies in many fields emphasizing interdisciplinary research involving chemistry, engineering, and applied science.

Bachelor of Science Degree

Preparation for the Major

Required: Chemistry and Biochemistry 11A or 11AH, 11B or 11BH, 11BL, 11C or 11CH, 11CL, English 3, Materials Science and Engineering 14, Mathematics 31A, 31B, 32A, 32B, 33A, Physics 8A, 8B or 8BH, 8C or 8CH, 8CL, 8D or 8DH, 8DL, Program in Computing 10A.

The Major

Required: Chemistry and Biochemistry 110A, 110B, 113A, C113B or C115A-C115B, 114, 132A, 173, eight units from C123A, C123B, 132B or 132BH, 132BL, 132C or 132CH, 132CL, 174, C175, C176; Materials Science and Engineering 120, 131L or 161L, 131, 150, 160, eight units from 110, 111, 121, 122, 130, 132, 143A, 162.

For further information, contact Leslie Hinman, Materials Science and Engineering, 6531 Boelter Hall, (310) 825-8916.

Assistant Professor

Thomas C. Harmon, Ph.D.

Senior Lecturer

George J. Tauxe, M.S., *Emeritus*

Adjunct Professor

Keith D. Stolzenbach, Ph.D.

Scope and Objectives

The civil and environmental engineering programs at UCLA include structural engineering, structural mechanics, geotechnical engineering, earthquake engineering, water resources engineering, and environmental engineering.

The ABET-accredited civil engineering curriculum leads to a B.S. in Civil Engineering, a broad-based education in structural engineering, geotechnical engineering, water resources engineering, and environmental engineering. This program is an excellent foundation for entry into professional practice in civil engineering or for more advanced study.

At the graduate level, M.S. and Ph.D. degree programs are offered in the areas of structures (including structural/earthquake engineering and structural mechanics), geotechnical engineering, water resources engineering, and environmental engineering. In these areas, research is being done on a variety of problems ranging from basic physics and mechanics problems to

critical problems in earthquake engineering and in the development of new technologies for pollution control and water distribution and treatment.

Bachelor of Science in Civil Engineering

The objective of the civil engineering curriculum is to give graduating seniors an academically sound and practical background in civil engineering. A balanced program, including engineering science, design, and laboratory courses in civil engineering, is stressed. The ongoing goal of the program is to produce well-qualified graduates for the engineering profession or for graduate civil engineering schools in the U.S.

The Major

Course requirements are as follows (180 minimum units required):

(1) Eight core courses: Chemical Engineering M105A or Mechanical, Aerospace, and Nuclear Engineering M105A, Civil and Environmental Engineering 11, 108, Electrical Engineering 100, 103, Materials Science and Engineering 14, Mechanical, Aerospace, and Nuclear Engineering 102, 103.

(2) Civil and Environmental Engineering 120, 121, 130, 135A, 151, 153; one mathematics course from Mechanical, Aerospace, and Nuclear Engineering 174, 191A, 192A, 192B, 192C, 192D.

(3) Thirty-two elective units, to be selected from the courses listed below, which must include eight units of laboratory:

Engineering Mechanics — Civil and Environmental Engineering 130F, 130L, Mechanical, Aerospace, and Nuclear Engineering 166C, 168.

Geotechnical Engineering — Civil and Environmental Engineering 128L, Earth and Space Sciences 100, 139.

Structures — Civil and Environmental Engineering 135B, 135C, 135L, 137, 137L, 141, 142, 142L, 142X (two units), 143, 144, 147.

Systems Analysis — Civil and Environmental Engineering 106A, M140, 175.

Water Resources and Environmental Engineering — Civil and Environmental Engineering 150, 155, 156A, 156B, 157A, 157B, 157C, 163, 164.

(4) Chemistry and Biochemistry 11A, 11B/11BL; Civil and Environmental Engineering 15A, 15B; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A/8AL, 8B/8BL, 8C.

(5) SEAS general education (GE) course requirements — see Curricular Requirements in the College and Schools section of this catalog for details.

(6) One free elective course.

Graduate Study

The following constitutes introductory information regarding graduate degree programs. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degree

Admission

In addition to meeting the requirements of the Graduate Division, applicants to the Master of Science program in Civil Engineering are required to take the General Test of the Graduate Record Examination (GRE).

Students not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework that cannot be applied toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies.

For requirements for the Graduate Certificate of Specialization, see Engineering School-wide Programs in the Curricula and Courses section of this catalog.

Application forms, including a departmental supplement to the application, may be obtained by writing to the address at the beginning of this listing or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601.

Areas of Study

Environmental engineering; geotechnical engineering; structural mechanics; structural/earthquake engineering; water resource systems engineering.

Course Requirements

At least nine courses are required, a majority of which must be in the Civil and Environmental Engineering Department. At least five of the courses must be at the 200 level. In the thesis plan, seven of the nine must be formal 100- or 200-series courses. The remaining two may be 598 courses involving work on the thesis. In the comprehensive examination plan, 500-series courses may not be applied toward the nine-course requirement. A minimum 3.0 grade-point average is required in all coursework.

Each major field has a set of required preparatory courses which are normally completed during undergraduate studies. Equivalent courses taken at other institutions can satisfy the preparatory course requirements. The preparatory courses cannot be used to satisfy course requirements for the master's degree; courses must be selected in accordance with the lists of required graduate courses and elective courses for each major field.

Environmental Engineering

Required Preparatory Courses. Chemistry and Biochemistry 11A, 11B/11BL; Mathematics 33A, 33B; Mechanical, Aerospace, and Nuclear Engineering 103, M105A; Civil and Environmental Engineering 150 or 151, 153; Physics 8A/8AL, 8B/8BL, 8C.

Required Graduate Courses. Civil and Environmental Engineering 254A, 255A, 255B.

Elective Courses. Civil and Environmental Engineering 155, 157B, 157C, 163, 164, 253, 254B, 254C, 258A, 261, 265A, 265B; a maximum of two of the following courses for students electing the thesis plan or a maximum of three of the following courses for students electing the comprehensive examination plan: Civil and Environmental Engineering 150, 250A, 250B, 250C, 251, 252, 260, M262A, M262B; Chemical Engineering 101C or Mechanical, Aerospace, and Nuclear Engineering 105D; Chemical Engineering 106, 210, C240; Computer Science 270A, 271A, 271B; Electrical Engineering 236A, 236B, 236C; Environmental Health Sciences 240, 241, 252D, 255, 262, 264, 410A, 410B; Mechanical, Aerospace, and Nuclear Engineering 175, 274, 275.

Geotechnical Engineering

Required Preparatory Courses. Civil and Environmental Engineering 108, 120, 121, 128L.

Required Graduate Courses. Civil and Environmental Engineering 220, 221, 222, 223, 228L.

Elective Courses. Civil and Environmental Engineering 135A, 142, 229, 235A, 235B, 235C, 245, 250B; Mechanical, Aerospace, and Nuclear Engineering 256A; Earth and Space Sciences 139.

Structural Mechanics

Required Preparatory Courses. Civil and Environmental Engineering 130, 135A, 135B.

Required Graduate Courses. Civil and Environmental Engineering 232, 235A, 235B, 236, M237A.

Elective Courses. Civil and Environmental Engineering 130F, 130L, 135C, 137, M140, M230, 231, 233, 234, 235C, M237C, M240, 275, 276; Mechanical, Aerospace, and Nuclear Engineering 269B.

Structural/Earthquake Engineering

Required Preparatory Courses. Civil and Environmental Engineering 135A, 135B, 141, 142.

Required Graduate Courses. Civil and Environmental Engineering 235A, 246; at least three of the following courses: Civil and Environmental Engineering 241, 242, 244, 245.

Elective Courses. Civil and Environmental Engineering 120, 121, 130, 135C, 137, 142L, 143, 175, 221, 222, 223, 232, 235B, 236, M237A, M240, 275, 276.

Water Resource Systems Engineering

Required Preparatory Courses. Chemistry and Biochemistry 11A, 11B/11BL, Mathematics 33A, 33B; Mechanical, Aerospace, and Nuclear Engineering 103, M105A; Civil and Environmental Engineering 150 or 151, 153; Physics 8A/8AL, 8B/8BL, 8C.

Required Graduate Courses. A minimum of five of the following courses: Civil and Environmental Engineering 250A, 250B, 250C, 251, 252, 253, 260, 265A, 265B.

Elective Courses. Civil and Environmental Engineering 150, 164, 255A, 255B; a maximum of two of the following courses for students electing the thesis plan or a maximum of three of the following courses for students electing the comprehensive examination plan: Atmospheric Sciences C200B, M203A, 218; Computer Science 270A, 271A, 271B; Electrical Engineering 236A, 236B, 236C, 237; Environmental Health Sciences 225, 264; Mechanical, Aerospace, and Nuclear Engineering 274, 275; Mathematics 269A, 269B, 269C.

Students may petition the department for permission to pursue programs of study which differ from the above norms.

Comprehensive Examination Plan

In addition to the course requirements, under this plan there is a comprehensive written examination covering the subject matter contained in the program of study. The examination is administered by a comprehensive examination committee, which may conduct an oral examination in addition to the written examination. In case of failure, the examination may be repeated once with the consent of the graduate adviser.

Thesis Plan

In addition to the course requirements, under this plan students are required to write a thesis on a research topic in civil and environmental engineering supervised by the thesis adviser. An M.S. thesis committee reviews and approves the thesis. No oral examination is required.

Doctoral Degree**Admission**

In addition to meeting the requirements of the Graduate Division, applicants to the Ph.D. program in Civil Engineering are required to take the General Test of the Graduate Record Examination (GRE).

Applicants to the Ph.D. program normally should have completed the requirements for the master's degree with at least a 3.25 grade-point average and have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having the M.S. degree.

Students not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework which would not be applicable toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies.

Application forms, including a departmental supplement to the application, may be obtained by writing to the address at the beginning of this listing or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601.

Major Fields or Subdisciplines

Environmental engineering; geotechnical engineering; structures (includes structural mechanics and earthquake engineering); water resource systems engineering.

Course Requirements

There is no formal course requirement for the Ph.D. degree, and one may theoretically substitute coursework by examinations. Normally, however, the student takes courses to acquire the knowledge needed for the written and oral preliminary examinations. The basic program of study for the Ph.D. degree in Civil Engineering is built around one major field and two minor fields. The major field has a scope corresponding to a body of knowledge contained in a detailed Ph.D. field syllabus available on request from the department office. Each minor field normally embraces a body of knowledge equivalent to three courses, at least two of which are graduate courses. Grades of B- or better, with a grade-point average of at least 3.33 in all courses included in the minor field, are required. If the student fails to satisfy the minor field requirements through coursework, a minor field examination may be taken (once only). The minor fields are chosen to support the major field and are usually subsets of other major fields.

For information on completing the Engineer degree, see Engineering Schoolwide Programs in the Curricula and Courses section of this catalog.

Written and Oral Qualifying Examinations

After mastering the body of knowledge defined in the three fields, the student takes a written preliminary examination in the major field. When this examination is passed and all coursework is completed, the student proceeds to take an oral preliminary examination which encompasses the major and minor fields. Both preliminary examinations should be completed within the first two years of full-time enrollment in the Ph.D. program. Students may not take an examination more than twice.

After passing both preliminary examinations, the student is ready to take the University Oral Qualifying Examination. The nature and con-

tent of the examination are at the discretion of the doctoral committee but ordinarily include a broad inquiry into the student's preparation for research. The doctoral committee also reviews the prospectus of the dissertation at the oral qualifying examination.

Lower Division Courses

3. Fundamentals of Environmental Engineering Science. Lecture, four hours; outside study, eight hours. Quantitative analysis of sources, transformations, and effects of pollutants in water, air, and soil. Topics include drinking water, wastewater, hazardous wastes, radioactive wastes, and atmospheric emissions.

11. Patterns of Problem Solving. Introduction to creative patterns of problem solving and decision making. Discussion of attitudes and techniques productive in problem solving. Heuristic guides for knowledge acquisition, problem presentation, and problem solution. Tools and concepts for decision making that include technology and human values.

12. Applied Patterns of Problem Solving. Prerequisite: course 11. Application of tools and methods discussed in course 11 to a major problem of a social and technical nature. Experience in team problem solving and decision making.

15A. Introduction to Computing in Civil Engineering (2 units). Lecture, two hours; laboratory, two hours. Overview of operating systems for microcomputers, file editors, spreadsheets, database programs. SEASnet facilities. Introduction to programming. Civil engineering applications.

15B. Introduction to FORTRAN Programming (2 units). Lecture, two hours; laboratory, two hours. Prerequisite: course 15A. Introduction to programming using structured FORTRAN. Selected topics in programming, with emphasis on numerical techniques as applied to engineering problems.

Upper Division Courses

106A. Problem Solving in Engineering Economy. Lecture, four hours; outside study, eight hours. Prerequisite: upper division standing. Problem-solving and decision-making framework for economic analysis of engineering projects. Foundation for understanding corporate financial practices and accounting. Decisions on capital investments and choice of alternatives for engineering applications in all fields. Introduction to use of engineering economics in analysis of inflation and public investments.

108. Introduction to Mechanics of Deformable Solids. Lecture, three hours; recitation, two hours; outside study, seven hours. Prerequisite: Mathematics 33A. Review of equilibrium principles; forces and moments transmitted by slender members. Concepts of stress and strain. Material constitution (stress-strain relations). Yield criteria. Structural applications to trusses, beams, shafts, columns, and pressure vessels.

120. Principles of Soil Mechanics. Lecture, four hours; outside study, eight hours. Prerequisite: course 108. Soil as a foundation for structures and as a material of construction: Soil formation, classification, physical and mechanical properties, compaction, bearing capacity, earth pressures, consolidation, and shear strength.

121. Design of Foundations and Earth Structures. Prerequisite: course 120. Design methods for foundations and earth structures. Site investigation, including determination of soil properties for design. Design of footings and piles, including stability and settlement calculations. Design of slopes and earth retaining structures.

128L. Soil Mechanics Laboratory. Lecture, one hour; laboratory, eight hours; outside study, three hours. Prerequisite: course 120. Laboratory experiments to be performed by students to obtain soil parameters required for assigned design problems. Soil classification, grain size distribution, Atterberg limits, specific gravity, compaction, expansion index, consolidation, shear strength determination. Design problems, report writing.

130. Elementary Structural Mechanics. Lecture, four hours; outside study, eight hours. Prerequisite: course 108. Analysis of stress, strain; phenomenological material behavior, fatigue, cumulative damage; bending, extension of beams, unsymmetrical sections, stiffened shell structures; torsion of beams, stress function, warping, thin-walled cross-sections; shear stresses; plate analysis; instability, failure of columns, plates, approximate methods, empirical formulas.

130F. Experimental Fracture Mechanics. Lecture, two hours; laboratory, six hours; outside study, four hours. Prerequisite: course 108 or equivalent. Elementary introduction to fracture mechanics and experimental techniques used in fracture, crack tip stress fields, strain energy release rate, fracture characterization, compliance calibration, surface flaws, fatigue crack growth and fatigue life of structural components, mixed mode fracture, and individual projects.

130L. Experimental Structural Mechanics. Lecture, two hours; laboratory, six hours; outside study, four hours. Prerequisite or corequisite: course 130 or equivalent. Lecture and experiments in limit analysis of various aspects of structures. Elastic and plastic analysis of structural elements in multiaxial stress states. Buckling of columns, plates, and shells. Effects of actual boundary conditions on structural performance. Evaluation of structural fasteners.

135A. Elementary Structural Analysis. Lecture, four hours; outside study, eight hours. Prerequisite: course 108 or consent of instructor. Introduction to structural analysis, classification of structural elements; analysis of statically determinate trusses, cables, beams, and frames; deflections in elementary structures; introduction to virtual work; analysis of indeterminate structures; introduction to force method of analysis.

135B. Intermediate Structural Analysis. Lecture, four hours; outside study, eight hours. Prerequisite: course 135A or consent of instructor. Analysis of truss and frame structures using matrix methods; matrix force methods; matrix displacement method; analysis concepts based on theorem of virtual work; moment distribution.

135C. Computer Analysis of Structures. Lecture, four hours; outside study, eight hours. Prerequisite: course 135A. Recommended: course 135B. Matrix displacement and force methods of structural analysis, with emphasis on their application in computer analysis. Development of approximate analysis techniques for estimation/verification of computer results. Discussion of structural principles, including symmetry/antisymmetry, superposition, and Mueller/Breslau principle for influence lines.

135L. Structural Design and Testing Laboratory. Lecture, two hours; laboratory, eight hours. Prerequisites: courses 15A, 15B, 135A, or equivalent, senior standing, consent of instructor. Limited enrollment. Computer-aided optimum design, construction, instrumentation, and test of a small-scale model structure. Use of computer-based data acquisition and interpretation systems for comparison of experimental and theoretically predicted behavior.

137. Elementary Structural Dynamics. (Formerly numbered M137.) Lecture, four hours; outside study, eight hours. Prerequisite: course 135B or consent of instructor. Basic structural dynamics course for civil engineering students. Elastic free, forced vibration, and earthquake response spectra analysis for single and multidegree of freedom systems. Axial, bending, and torsional vibration of beams.

137L. Mechanical Vibrations Laboratory. Lecture, two hours; laboratory, six hours; outside study, four hours. Prerequisite or corequisite: course 137 or Mechanical, Aerospace, and Nuclear Engineering 169A. Calibration of instrumentation for dynamic measurements. Determination of natural frequencies and damping factors from free vibrations. Determination of natural frequencies, mode shapes, and damping factors from forced vibrations. Dynamic similitude.

M140. Numerical Optimization Methods for Engineering Design. (Same as Mechanical, Aerospace, and Nuclear Engineering M192F.) Lecture, four hours; outside study, eight hours. Prerequisites: courses 15A and 15B or Mechanical, Aerospace, and Nuclear Engineering 20, Mathematics 32A, 33A. Recommended: Mathematics 115A. Systematic presentation of numerical optimization methods for engineering design; one-dimensional minimization, unconstrained minimization, linearly constrained minimization, general nonlinear problems, approximation concepts, duality. Optimization problem statements. Advantages and limitations of numerical optimization. Applications.

141. Steel Structures. Lecture, four hours; outside study, eight hours. Prerequisites: courses 135A, 135B. Introduction to building codes. Fundamentals of modeling of steel frame components and systems. Load resistance factor design of tension members and compression members.

142. Design of Reinforced Concrete Structures. Lecture, three hours; recitation, three hours; outside study, six hours. Prerequisite: course 135A. Beams, columns, and slabs in reinforced concrete structures. Properties of reinforced concrete materials. Design of beams and slabs for flexure, shear, anchorage of reinforcement, and deflection. Design of columns for axial force, bending, and shear. Ultimate strength design methods.

142L. Reinforced Concrete Structural Laboratory. Lecture, two hours; laboratory, six hours; outside study, four hours. Prerequisite: course 142 or consent of instructor. Limited enrollment. Design considerations used for reinforced concrete beams, columns, slabs, and joints evaluated using analysis and experiments. Links between technical theory, building codes, and experimental results.

142X. Reinforced Concrete Construction Laboratory (2 units). Laboratory, four hours; outside study, two hours. Prerequisite: junior standing. Design and fabrication methods used for reinforced concrete structures. Preparation of engineering drawings. Fabrication of near full-scale reinforced concrete elements in the laboratory.

143. Design of Prestressed Concrete Structures. Prerequisite: course 135A. Prestressing and post-tensioning techniques. Properties of concrete and prestressing steels. Loss of prestress. Analysis of sections for flexural stresses and ultimate strength. Design of beams by allowable stress and strength methods. Load balancing design of continuous beams and slabs.

144. Structural Systems Design. Lecture, four hours; outside study, eight hours. Prerequisites: courses 137, 141, 142, consent of instructor. Limited enrollment. Design course for civil engineering students, with focus on aspects of complete structural systems. Introduction to construction concepts. Design of concrete, steel, and masonry gravity and lateral load systems. System selection using realistic criteria. Project involving design of a building.

147. Design and Construction of Tall Buildings. Lecture, four hours; outside study, eight hours. Prerequisites: course 141, consent of instructor. Limited enrollment. Introduction to total design process and professional participants. Systematic presentation of advantages and limitations of different structural forms and systems. Identification of critical design factors influenced by tallness. Foundation systems. Construction site visits, costing, and scheduling.

150. Engineering Hydrology. Lecture, four hours; outside study, eight hours. Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 103 or consent of instructor. Recommended: elementary probability. Precipitation, climatology, stream flow analysis, flood frequency analysis, groundwater, snow hydrology, hydrologic simulation. Possible field trips.

151. Introduction to Water Resources Engineering. Lecture, four hours; outside study, eight hours. Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 103 or consent of instructor. Principles of hydraulics, flow of water in open channels and pressure conduits, reservoirs and dams, hydraulic machinery, hydroelectric power. Introduction to system analysis and design applied to water resources engineering.

153. Introduction to Environmental Engineering Science. Lecture, four hours; outside study, eight hours. Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 103. Water, air, and soil pollution: sources, transformations, effects, and processes for removal of contaminants. Water quality, water and wastewater treatment, waste disposal, air pollution, global environmental problems. Field trip.

155. Unit Operations and Processes for Water and Wastewater Treatment. Lecture, four hours; outside study, eight hours. Prerequisite: course 153 or consent of instructor. Biological, chemical, and physical methods used to modify water quality. Fundamentals of phenomena governing design of engineered systems for water and wastewater treatment systems. Field trip.

156A. Environmental Chemistry Laboratory. (Formerly numbered 156.) Lecture, four hours; laboratory, four hours; outside study, four hours. Prerequisites: course 153 (may be taken concurrently), Chemistry 11A, 11B, or equivalent. Basic laboratory techniques in analytical chemistry related to water and wastewater analysis. Selected experiments include gravimetric analysis, titrimetry spectrophotometry, redox systems, pH and electrical conductivity. Concepts to be applied to analysis of "real" water samples in course 156B.

156B. Water Quality Control Laboratory. Lecture, four hours; laboratory, four hours; outside study, four hours. Prerequisites: Chemistry 11A, 11B, or equivalent. Characterization and analysis of typical natural waters and wastewaters for inorganic and organic constituents. Selected experiments include solids, nitrogen species, oxygen demand, chlorine, alkalinity, hardness, and trace analysis. Discussion of relevance of these measurements to water resource engineering.

157A. Design of Water Resource Structures. Lecture, four hours; outside study, eight hours. Prerequisites: course 151, Mechanical, Aerospace, and Nuclear Engineering 103. Review design of hydraulic structures, pertinent fluid mechanics, and hydraulic theory and applications. Examples of failures and successes of hydraulic structures. Class project and field trip required.

157B. Design of Water Treatment Plants. Lecture, two hours; discussion, two hours; laboratory, four hours; other, four hours. Prerequisite: course 155. Water quality standards and regulations, overview of water treatment plants, design of unit operations, pre-design of water treatment plants, hydraulics of plants, process control, and cost estimation.

157C. Design of Wastewater Treatment Plants. Lecture, four hours; outside study, eight hours. Prerequisite: course 155. Process design of wastewater treatment plants, including primary and secondary treatment, detailed design review of existing plants, process control, and economics.

163. Air Pollution Control. Lecture, four hours; outside study, eight hours. Prerequisite: senior standing or consent of instructor. Sources of air pollutants, their atmospheric transport, dispersion, and photochemical reaction. Design and operational basis for stationary and mobile source control systems. Overview of current regulatory trends.

164. Waste and Hazardous Waste Management. Lecture, four hours; outside study, eight hours. Prerequisites: course 153 and Mechanical, Aerospace, and Nuclear Engineering 103, or consent of instructor. Waste sources and handling. Resource recovery processes and system design. Site selection, design and operation for landfill disposal. Leachate transport, monitoring, and design for groundwater protection.

175. Introduction to Elements of Decision Making. Lecture, four hours; outside study, eight hours. Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 192D or equivalent mathematics course. Elements of decision making and decision process. Decision and utility theory. Formulation of utility functions and objective functions. Subjective probabilities. Bayesian approach to value of information. Risk sharing and group decisions. Methods of eliciting judgments; bias and scoring rules. Individual and team decision making.

199. Special Studies (2 to 8 units). Prerequisites: senior standing, consent of instructor. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit.

Graduate Courses

220. Shear Strength of Soil and Stability of Slopes. Prerequisite: course 120. Detailed study of fundamental concepts of shear strength of soils, strength determining factors, methods of strength measurement. Slope stability and stability analysis techniques using circular and noncircular failure surfaces, effect of side forces, total and effective stress analyses.

221. Foundation Engineering. Prerequisites: courses 120, 220. Principles of foundation design, including theory of consolidation, impeded drainage, stress distribution, settlement analysis, allowable bearing capacity for shallow foundations, piles, and piers; laterally loaded piles.

222. Soil Dynamics. Lecture, four hours; outside study, eight hours. Prerequisite: course 120. Stress-strain behavior of soils under cyclic loads. Behavior of soil deposits and earth structures during earthquakes. Liquefaction of saturated cohesionless deposits. Fundamentals of vibrations of machine foundations.

223. Earth Pressures and Earth Retaining Structures. Lecture, four hours; outside study, eight hours. Prerequisite: course 120. Basic concepts of theory of earth pressures behind retaining structures, with special application to design of retaining walls, bulkheads, and excavation bracing; effects of flexibility of bulkheads, creep in soils, and construction techniques.

228L. Advanced Soil Mechanics Laboratory. Prerequisites: courses 120, 121, 220, 221. Lectures and laboratory studies of advanced aspects of soil properties and their application to design. Permeability, consolidation, strength testing, pore water pressure measurements, advanced instrumentation and measurement techniques. Preparation of engineering reports.

229. Seminar: Advanced Topics in Soil Mechanics. Lecture, four hours; outside study, eight hours. Prerequisite: consent of instructor. Topics may vary each term to cover subjects such as earth dam design, seepage through soils, consolidation, constitutive laws, finite difference and finite element methods with special application in soil mechanics, theories of elasticity and plasticity, and case histories.

M230. Elasticity. (Same as Mechanical, Aerospace, and Nuclear Engineering M256B.) Lecture, four hours; outside study, eight hours. Prerequisite: Mechanical, Aerospace, and Nuclear Engineering 256A or consent of instructor. Equations of linear elasticity; uniqueness of solution; Betti/Rayleigh reciprocity; Saint-Venant's principle; simple problems involving spheres and cylinders; special techniques for plane problems. Airy stress function, complex variable method, transform method; three-dimensional problems, torsion, entire space and half-space problems; boundary integral equations.

231. Inelastic Effects in Structures and Materials. Prerequisite: course 130 or equivalent or consent of instructor. Analogy between inelastic strain and applied force in stress analysis. Mathematical and physical theories of plasticity and creep and their basic assumptions. Static and dynamic analysis of inelastic beams, columns, frames, and plates. Localized plastic deformation in materials.

232. Theory of Plates and Shells. Prerequisite: course 130 or Mechanical, Aerospace, and Nuclear Engineering 156B. Small and large deformation theories of thin plates; energy methods; free vibrations; membrane theory of shells; axisymmetric deformations of cylindrical and spherical shells, including bending.

233. Mechanics of Composite Material Structures. Lecture, four hours; outside study, eight hours. Prerequisites: courses M230 and 232, or consent of instructor. Elastic, anisotropic stress-strain-temperature relations. Analysis of prismatic beams by three-dimensional elasticity. Analysis of laminated anisotropic plates and shells based on classical and first-order shear deformation theories. Elastodynamic behavior of laminated plates and cylinders.

234. Advanced Topics in Structural Mechanics. Prerequisites: graduate standing in engineering, consent of instructor. Current topics in composite materials, computational methods, finite element analysis, structural synthesis, nonlinear mechanics, and structural mechanics in general. Topics may vary from term to term.

235A. Advanced Structural Analysis. Lecture, four hours; outside study, eight hours. Prerequisite: course 135A. Recommended: course 135B. Review of matrix force and displacement methods of structural analysis; virtual work theorem, virtual forces, and displacements; theorems on stationary value of total and complementary potential energy, minimum total potential energy, Maxwell/Betti theorems, effects of approximations, introduction to finite element analysis.

235B. Finite Element Analysis of Structures. Prerequisites: courses 130 and 235A, or consent of instructor. Direct energy formulations for deformable systems; solution methods for linear equations; analysis of structural systems with one-dimensional elements; introduction to variational calculus; discrete element displacement, force, and mixed methods for membrane, plate, shell structures; instability effects.

235C. Nonlinear Structural Analysis. Prerequisite: course 235B or consent of instructor. Classification of nonlinear effects; material nonlinearities; conservative, nonconservative material behavior; geometric nonlinearities, Lagrangian, Eulerian description of motion; finite element methods in geometrically nonlinear problems; postbuckling behavior of structures; solution of nonlinear equations; incremental, iterative, programming methods.

236. Stability of Structures I. Prerequisite: course 130 or 135B or equivalent. Elastic buckling of bars. Different approaches to stability problems. Inelastic buckling of columns and beam columns. Columns and beam columns with linear, nonlinear creep. Combined torsional and flexural buckling of columns. Buckling of plates.

M237A. Dynamics of Structures. (Same as Mechanical, Aerospace, and Nuclear Engineering M269A.) Prerequisite: course 137. Principles of dynamics. Determination of normal modes and frequencies by differential and integral equation solutions. Transient and steady state response. Emphasis on derivation and solution of governing equations using matrix formulation.

M237C. Introduction to Probabilistic Dynamics. (Same as Mechanical, Aerospace, and Nuclear Engineering M269C.) Prerequisite: course 137. Response of structural and mechanical systems to random vibrations. Stationary and nonstationary excitations. Response of systems with random parameters. Discrete and continuous linear systems. Applications to earthquakes, wind sway of buildings, gust response, vibrations due to gearing inaccuracies, train vibrations.

M240. Optimum Structural Design. (Same as Mechanical, Aerospace, and Nuclear Engineering M267A.) Prerequisite: course 235A or Mechanical, Aerospace, and Nuclear Engineering 261A or consent of instructor. Synthesis of structural systems; analysis and design as optimization problems; techniques for synthesis and optimization; application to aerospace and civil structures.

241. Advanced Steel Structures. Lecture, four hours; outside study, eight hours. Prerequisites: courses 137, 141, 235A. Performance characterization of steel structures for static and dynamic loads. Analysis and load resistance factor design of beams, columns, and plates for biaxial loads. Composite steel-concrete members.

242. Advanced Reinforced Concrete Design. Lecture, four hours; outside study, eight hours. Prerequisite: course 142. Design of building and other structural systems for vertical and lateral loads. Earthquake forces. Ductility in elements and systems. Columns: secondary effects and biaxial bending. Slabs: code and analysis methods. Footings, shear walls, diaphragms, chords, and collectors. Detailing for ductile behavior. Retrofitting.

244. Structural Loads and Safety for Civil Structures. Prerequisite: course 141 or 142 or 143 or 144. Modeling of uncertainties in structural loads and structural mechanics; structural safety analysis; and calculation of capacity reduction factors.

245. Earthquake Ground Motion. Lecture, four hours; outside study, eight hours. Prerequisite: course 137. Methods for determination of site ground motion. Seismology and seismicity. Plate tectonics. Source, path, and site effects, waveforms associated with earthquakes. Use of Fourier and response spectra. Attenuation methods for prediction of site response. Typical strong ground motion records.

246. Structural Response to Ground Motions. Prerequisite: course 137. Spectral analysis of ground motions: response, time, and Fourier spectra. Response of structures to ground motions due to earthquakes and nuclear explosions. Computational methods to evaluate structural response. Response analysis, including evaluation of contemporary design standards. Limitations due to idealizations.

250A. Surface Water Hydrology. Lecture, four hours; outside study, eight hours. Prerequisite: course 150 or consent of instructor. In-depth study of surface water components of hydrologic cycle. Hydrologic mass balance analysis, hydrologic error analysis using systems investigation and physical hydrology. Stochastic hydrology: time-series analysis, Markovian streamflow generating models, and generation of multivariate synthetic streamflows. Applications.

250B. Groundwater Hydrology. Lecture, four hours; outside study, eight hours. Prerequisite: course 150 or consent of instructor. Theory of movement and occurrence of water in subterranean aquifers. Steady flow in confined and unconfined aquifers. Mechanics of wells; steady and unsteady radial flows in confined and unconfined aquifers. Theory of leaky aquifers. Parameter estimation. Seawater intrusion. Numerical methods. Applications.

250C. Mathematical Modeling of Contaminant Transport in Groundwater. Lecture, four hours; laboratory, eight hours. Prerequisites: courses 250B and 253, or consent of instructor. Phenomena and mechanisms of hydrodynamic dispersion, governing equations of mass transport in porous media, various analytical and numerical solutions, determination of dispersion parameters by laboratory and field experiments, coupled and multiphase pollution problems, computer programs and applications.

251. Water Resources Systems Engineering. Lecture, four hours; outside study, eight hours. Prerequisite: course 151. Application of mathematical programming techniques to water resources systems. Topics include reservoir management and operation; optimal timing, sequencing and sizing of water resources projects; and multiobjective planning and conjunctive use of surface water and groundwater. Emphasis on management of water quantity.

252. Engineering Economic Analysis of Water and Environmental Planning. Lecture, four hours; outside study, eight hours. Prerequisites: course 106A, one or more courses from Economics 1, 2, 11, 100, and 101, or consent of instructor. Economic theory and applications in analysis and management of water and environmental problems; application of price theory to water resource management and renewable resources; benefit-cost analysis with applications to water resources and environmental planning.

253. Mathematical Models for Water Quality Management. Lecture, four hours; outside study, eight hours. Prerequisite: course 153. Development of mathematical models for simulating environmental engineering problems. Emphasis on numerical techniques to solve nonlinear partial differential equations and their application to environmental engineering problems.

254A. Aquatic Chemistry. (Formerly numbered 254.) Lecture, four hours; outside study, eight hours. Prerequisites: course 155 or consent of instructor, Chemistry 11B, Mathematics 33B. Chemistry of natural waters and wastewaters, including acid/base, complexation, precipitation/dissolution, oxidation/reduction, and adsorption reactions. Emphasis on prediction of equilibrium concentrations of dissolved constituents of natural waters. Introduction to kinetics of chemical reactions in aqueous solutions.

254B. Chemical Kinetics and Process Dynamics in Aquatic Systems. Lecture, four hours; outside study, eight hours. Prerequisite: course 254A. Principles of chemical kinetics with specific applications to air/water/soil environments. Topics include fundamentals, data analysis, reaction mechanisms, transport considerations, estimation of reaction rates under environmental conditions, current research on chemical kinetics in natural and engineered systems.

254C. Aquatic Surface Chemistry. Lecture, four hours; outside study, eight hours. Prerequisite: course 254A. Principles of surface chemistry as applied to geochemistry of natural waters, soils, and sediments and to water and wastewater technology; adsorption and desorption; precipitation and dissolution; surface catalysis.

255A. Physical and Chemical Processes for Water and Wastewater Treatment. Lecture, four hours; outside study, eight hours. Prerequisites: courses 155 and 254A, or consent of instructor. Review of momentum and mass transfer, chemical reaction engineering, coagulation and flocculation, granular filtrations, sedimentation, carbon adsorption, gas transfer, disinfection, oxidation, and membrane processes.

255B. Biological Processes for Water and Wastewater Treatment. Lecture, four hours; outside study, eight hours. Prerequisites: courses 254A and 255A, or consent of instructor. Fundamentals of environmental engineering microbiology; kinetics of microbial growth and biological oxidation; applications for activated sludge, gas transfer, fixed-film processes, aerobic and anaerobic digestion, sludge disposal, and biological nutrient removal.

258A. Membrane Separations in Aquatic Systems. Prerequisite: course 254A. Applications of membrane separations to desalination, water reclamation, brine disposal, and ultrapure water systems. Discussion of reverse osmosis, ultrafiltration, electrodialysis, and ion exchange technologies from both practical and theoretical standpoints.

259A. Selected Topics in Environmental Engineering (2 units). (Formerly numbered 259.) Lecture, two hours; outside study, four hours. Prerequisite: consent of instructor. Review of recent research and developments in environmental engineering. Water and wastewater treatment systems, nonpoint pollution, multimedia impacts. May be repeated for credit. S/U grading.

259B. Selected Topics in Water Resources (2 to 4 units). Lecture, four hours; outside study, eight hours. Prerequisite: consent of instructor. Review of recent research and developments in water resources. Water supply and hydrology, global climate change, economic planning, optimization of water resources development. May be taken for a maximum of four units. S/U or letter grading.

260. Advanced Topics in Hydrology and Water Resources. Lecture, four hours; other, eight hours. Prerequisites: courses 250A, 250B, and 251, or consent of instructor. Current research topics in inverse problem of parameter estimation, experimental design, conjunctive use of surface and groundwater, multiobjective water resources planning, and optimization of water resource systems. Topic may vary from term to term.

261. Colloidal Phenomena in Aquatic Systems. (Formerly numbered 255C.) Lecture, four hours; outside study, eight hours. Prerequisites: courses 254A and 255A, or consent of instructor. Colloidal interactions, colloidal stability, colloidal hydrodynamics, surface chemistry, adsorption of pollutants on colloidal surfaces, transport of colloids in porous media, coagulation, and particle deposition. Consideration of applications to colloidal processes in aquatic environments.

M262A. Introduction to Atmospheric Chemistry. (Same as Atmospheric Sciences M203A.) Lecture, three hours. Prerequisite for undergraduates: Chemistry 11C. Principles of chemical kinetics, thermochemistry, spectroscopy, and photochemistry; chemical composition and history of Earth's atmosphere; biogeochemical cycles of key atmospheric constituents; basic photochemistry of troposphere and stratosphere, upper atmosphere chemical processes; air pollution; chemistry and climate.

M262B. Atmospheric Diffusion and Air Pollution. (Same as Atmospheric Sciences M224B.) Lecture, three hours. Nature and sources of atmospheric pollution; diffusion from point, line, and area sources; pollution dispersion in urban complexes; meteorological factors and air pollution potential; meteorological aspects of air pollution. S/U grading for majors with consent of instructor after successful completion of written and oral comprehensive examination and for nonmajors at discretion of major department.

265A. Mass Transfer in Environmental Systems. (Formerly numbered 265.) Lecture, four hours; computer applications, two hours; outside study, eight hours. Prerequisite: graduate standing in civil engineering or consent of instructor. Phase equilibrium concepts; mass transfer in laminar and turbulent flow; mass transfer to particles and at air/water interface; molecular diffusion and diffusion in porous solids; transport in porous media.

265B. Contaminant Transport in Soils and Groundwater. Lecture, four hours; computer applications, two hours; outside study, six hours. Prerequisites: courses 250B, and 265A or consent of instructor. Principles of mass transfer as they apply in soil and groundwater, independent estimation of transport model parameters; remediating hazardous waste sites.

275. Multiattribute Decision Making with Conflicting Objectives. Lecture, four hours; outside study, eight hours. Prerequisite: course 175. Structuring of models for multiattribute decision problems. Theory of quantifying preferences over multiple objectives. Multiattribute utility theory. Analytic hierarchy process. Structuring of models for conditional strategies under conflict situations. Theory of metagames and metarationality.

276. Perspectives of Systems Representation. Prerequisite: course 275 or consent of instructor. Mathematical and conceptual models used in analysis and synthesis of engineering. Sociotechnical systems. Mathematical representations of interpretative models. Decomposition using tools of graph theory and information theory. Guides to choice of models. Interaction of human and computer in the modeling process.

296A-296Z. Advanced Topics in Civil Engineering (2 to 4 units each). Prerequisite: consent of instructor. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

297AA-297ZZ. Seminars: Current Topics in Civil Engineering (2 to 4 units each). (Formerly numbered 296AA-296ZZ.) Prerequisite: consent of instructor. Lectures, discussions, and student presentations and projects in areas of current interest in civil engineering. May be repeated for credit. S/U grading.

298. Seminar: Engineering (2 to 4 units). Prerequisites: graduate standing in civil engineering, consent of instructor. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching Assistant Training Seminar (2 units). Prerequisite: appointment as teaching assistant in Civil and Environmental Engineering Department. Seminar on communication of civil engineering principles, concepts, and methods; teaching assistant preparation, organization, and presentation of material, including use of visual aids; grading, advising, and rapport with students. S/U grading.

596. Directed Individual or Tutorial Studies (2 to 8 units). Prerequisites: graduate standing in civil engineering, consent of instructor. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

597A. Preparation for M.S. Comprehensive Examination (2 to 12 units). Prerequisite: graduate standing in civil engineering, consent of instructor. Reading and preparation for M.S. comprehensive examination. S/U grading.

597B. Preparation for Ph.D. Preliminary Examinations (2 to 16 units). Prerequisites: graduate standing in civil engineering, consent of instructor. S/U grading.

597C. Preparation for Ph.D. Oral Qualifying Examination (2 to 16 units). Prerequisites: graduate standing in civil engineering, consent of instructor. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

598. Research for and Preparation of M.S. Thesis (2 to 12 units). Prerequisites: graduate standing in civil engineering, consent of instructor. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units). Prerequisites: graduate standing in civil engineering, consent of instructor. Usually taken after student has been advanced to candidacy. S/U grading.

Scope and Objectives

The general objective of the Classics Department is to provide a thorough knowledge of the Greek and Roman languages and culture. To this end, it offers elementary and advanced courses in the languages, the reading and analysis of Greek and Roman authors, the history of Greek and Roman literature, classical art, archaeology, mythology, philosophy, and religion. The department is also strong in three fields which are not commonly taught in classics departments, namely classical linguistics, medieval Latin, and Byzantine studies.

Bachelor of Arts degrees are offered in Classical Civilization, in Greek, in Latin, and in Greek and Latin. Other undergraduate degrees include the B.A. in English/Greek and in English/Latin, offered jointly with the English Department. Students considering a major in the department should consult the adviser as soon as possible in their University career, but in no case later than the point at which they are about to take upper division courses. Graduate degrees include the Master of Arts in Classics (Greek and Latin), Greek, and Latin, and the Ph.D. in Classics.

Bachelor of Arts in Classical Civilization

The civilizations of ancient Greece and Rome have made important contributions to the political, social, artistic, and intellectual development of the Western world. The purpose of the classical civilization major is to provide a formal and balanced introduction to the historical and cultural experiences of the ancient Greeks and Romans. The program of study is structured, yet not rigid. Lower division survey courses and requirements in elementary language study, ancient history, and classical art establish an essential background of knowledge, while electives encourage individual and specialized interests. The program offers a broad range of courses in the fields of language, literature, history, mythology, religion, philosophy, art, and archaeology. The major serves as excellent and rewarding preparation for a professional career in medicine, law, business, journalism, communications, or the arts.

Preparation for the Major

Required: Classics 10, 20, and either 40 or 41.

The Major

Required: (1) Greek 3 or Latin 3; (2) two courses in Greek or Roman history (History 115B, 115C, 116A, 116B, 117A, 117B, 118); (3) two courses in classical art or archaeology (Classics M153A through M153K); (4) seven upper division courses in the department (courses in related fields not offered by the department may be substituted by petition and with approval of the undergraduate adviser) — no more than three may be selected from Greek 100 through 133 or Latin 100 through 133, and Classics 195 may be applied as only one course toward the major; (5) one senior seminar (Classics 197); with approval of the undergraduate adviser, a senior paper (Classics 199) may be substituted for the senior seminar.

Bachelor of Arts in Greek

Preparation for the Major

Required: Greek 1, 2, 3 and Latin 1, 2, 3, or equivalent.

The Major

Required: (1) Nine upper division courses in Greek, including course 110; (2) one upper division course in Latin; (3) Classics 143 and either 140 or 141; (4) two courses in Greek or Roman history (History 115B-115C, 116A-116B, 117A-117B); (5) two additional courses in one or two of the related areas: classical archaeology (Classics M153A through M153K), classical linguistics (Classics 180), classical mythology (Classics 161, 162, 168), Greek and Roman religion (Classics 166A, 166B), ancient philosophy (Classics M145A, Philosophy M101A, M101B, M102, Greek 121, 122, 123, 124), Byzantine civilization (Classics M170), medieval Latin literature (Latin 131, 133). Total courses required: 16.

Bachelor of Arts in Greek and Latin

Preparation for the Major

Required: Greek 1, 2, 3 and Latin 1, 2, 3, or equivalent.

The Major

Required: (1) Twelve upper division courses, six in Greek and six in Latin, including Greek 110 and Latin 110; (2) one course from Classics 140, 141, 142, 143; (3) one course in Greek or Roman history (History 115B, 115C, 116A, 116B, 117A, 117B); (4) one additional course in two of the related areas: classical archaeology (Classics M153A through M153K), classical linguistics (Classics 180), classical mythology (Classics 161, 162, 168), Greek and Roman religion (Classics 166A, 166B), ancient philosophy (Classics M145A, Philosophy M101A, M101B, M102, Greek 121, 122, 123, 124), Byzantine civilization (Classics M170),

medieval Latin literature (Latin 131, 133). Total courses required: 16.

Bachelor of Arts in Latin

Preparation for the Major

Required: Greek 1, 2, 3 and Latin 1, 2, 3, or equivalent.

The Major

Required: (1) Nine upper division courses in Latin, including course 110; (2) one upper division course in Greek; (3) Classics 141 and either 142 or 143; (4) two courses in Greek or Roman history (History 115B-115C, 116A-116B, 117A-117B); (5) two additional courses in one or two of the related areas: classical archaeology (Classics M153A through M153K), classical linguistics (Classics 180), classical mythology (Classics 161, 162, 168), Greek and Roman religion (Classics 166A, 166B), ancient philosophy (Classics M145A, Philosophy M101A, M101B, M102, Greek 121, 122, 123, 124), Byzantine civilization (Classics M170), medieval Latin literature (Latin 131, 133). Total courses required: 16.

Note: Students in the Greek, Latin, and Greek and Latin majors are permitted to take Greek 200A-200B-200C and Latin 200A-200B-200C. Two of these courses may replace one course in requirement 3 of the Greek major and Latin major and requirement 2 of the Greek and Latin major, as well as two courses in requirement 1 of all three majors, thereby reducing the total number of required courses by one.

Bachelor of Arts in English/Greek

Preparation for the Major

Required: English 4, 10A, 10B, 10C, Greek 1, 2, 3.

The Major

Required: (1) Seven courses from English 140A through 190 selected in consultation with an adviser in the Department of English; (2) seven upper division or graduate courses in Greek, including courses 100 and either 101A or 101B, selected in consultation with an adviser in the Department of Classics (of these seven courses, at least two must be in poetry and two in prose). Total courses required: 14.

Bachelor of Arts in English/Latin

Preparation for the Major

Required: English 4, 10A, 10B, 10C, Latin 1, 2, 3.

The Major

Required: (1) Seven courses from English 140A through 190 selected in consultation with an adviser in the Department of English; (2) seven upper division or graduate courses in Latin, including courses 105A and 113, select-

ed in consultation with an adviser in the Department of Classics (of these seven courses, at least two must be in poetry and two in prose). Total courses required: 14.

Honors Program

The honors program is open to students in each of the departmental majors. To qualify for graduation with departmental honors, you must (1) complete all requirements for your major, (2) have a cumulative grade-point average of 3.5 or better in upper division courses in the department and an overall GPA of 3.0 or better, and (3) complete Classics 195 with a grade of A- or better.

To qualify for graduation with departmental highest honors, you must (1) complete all requirements for your major, (2) have a cumulative GPA of 3.85 or better in upper division courses in the department and an overall GPA of 3.65 or better, and (3) complete Classics 195 with a grade of A.

Graduate Study

The following constitutes introductory information regarding graduate degree programs. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degree

Admission

Requirements for admission to the Master of Arts programs are a UCLA B.A. degree, or the equivalent, with a major in classics for the Classics M.A., Greek for the Greek M.A., or Latin for the Latin M.A.; a grade-point average of at least 3.0 in the major; a statement of purpose; three letters of recommendation, normally from previous instructors in the classics; and Graduate Record Examination (GRE) scores. Applicants for the Classics M.A. program who are deficient in Greek or Latin may be admitted to the Greek or Latin program, then permitted to transfer into the classics program when the deficiencies have been removed.

Areas of Study

The department offers M.A. degrees in Classics (Greek and Latin), Greek, and Latin.

Course Requirements

The courses presented for the Classics M.A. must include (1) Classics 287, (2) Greek or Latin 210, and (3) any five of 200A-200B-200C-series courses. Courses for the Greek M.A. are (1) Classics 287, (2) Greek 210, and (3) Greek 200A-200B-200C. Courses for the Latin M.A. are (1) Classics 287, (2) Latin 210, (3) Latin 200A-200B-200C. The six-unit 200A-200B-200C courses test the appropriate part of the departmental reading lists in a one-hour translation examination. The remaining courses are

to be selected in consultation with the graduate adviser.

No more than two half seminars, each counting as two units, may be applied toward the M.A. course requirements. No more than one course in the 500 series may be applied toward the M.A. course requirements.

No more than one 596 course may be applied toward the M.A. course requirements.

Comprehensive Examination Plan

The department follows the comprehensive examination plan. Before the examination, students are expected to complete the departmental reading lists in Greek authors for the Greek M.A., or Latin authors for the Latin M.A., or in Greek and Latin authors for the Classics M.A. The examination consists of a three-hour written test in Greek and Latin literature (Greek for Greek M.A., Latin for Latin M.A., Greek and Latin for Classics M.A.) in two parts: (1) passages for translation at sight and for generic identification and comparison; (2) an essay question combining periods kept separate in the 200A-200B-200C courses (for Classics M.A., combining Greek and Latin). It is to be taken no later than one quarter after the fulfillment of the M.A. course requirements. It may be repeated once, in the quarter following the first attempt; in exceptional cases and with the consent of the departmental faculty, more than once. For admission into the Ph.D. program, a grade of B+ or better is required.

Thesis Plan

None.

Doctoral Degree

Admission

A UCLA M.A. degree in Classics, Greek, or Latin with a comprehensive examination grade of B+ or better, or an equivalent degree from another university is required.

In addition to an M.A. degree, the department requires a statement of purpose. If applicants do not have a UCLA M.A., they must also submit three letters of recommendation, normally from previous instructors in the classics, and Graduate Record Examination (GRE) scores. While there is no minimum required score, the GRE is used as a criterion in uncertain cases, and to assess applications for teaching assistantships and other financial assistance from the department. The application may be obtained by writing to the address given at the beginning of this listing.

Major Fields or Subdisciplines

The department offers the Ph.D. in Classics with major fields in classical literature and philology; classical linguistics; Byzantine Greek; and medieval Latin.

Course Requirements

Classical Literature and Philology. M.A. degree holders in Greek only or Latin only must take two 200A-200B-200C courses in the

other language. In addition, five (or more) 200-series courses are required of all Ph.D. students, including Greek 210 and Latin 210 unless taken previously. Required courses, except for Greek 210 and Latin 210, are in addition to those taken for the M.A.

Classical Linguistics. M.A. degree holders in Greek only or Latin only must complete the Classics M.A. course requirements by taking two 200A-200B-200C courses in the other language. A minimum of five (full) seminars is required for this major field: Classics 180 (or an equivalent undergraduate or graduate course taken at UCLA or elsewhere), Classics 240, Greek 242, 243, Latin 242, and either Classics 230A-230B or one quarter of Vedic (Indic M222A, presupposing three quarters of upper division classical Sanskrit).

Byzantine Greek. M.A. degree holders in Greek only or Latin only must complete the Classics M.A. course requirements by taking 200A-200B-200C courses in the other language. A minimum of five (full) seminars from the following is required for this major field: Greek 210, at least two seminars from 231A-231B-231C, 240A-240B, 245, History 216A-216B.

Medieval Latin. M.A. degree holders in Greek only or Latin only must complete the Classics M.A. course requirements by taking 200A-200B-200C courses in the other language. A minimum of five (full) seminars is required for the following for this major field: Latin 130 or 120, 131, 133 (or equivalent undergraduate or graduate courses taken at UCLA or elsewhere); Latin 210; at least two seminars from Latin 231A-231B, 243 or 219A or History 219B; Greek 231A or 231B or 231C (or an upper division medieval language course such as French 115A, 115B, 115C, German 122, Italian 113A, 113B, 114A, 114B, 190, Spanish M118A, M118B, 122, 123, or an equivalent undergraduate or graduate course taken at UCLA or elsewhere); History 217.

Most classics, Greek, and Latin seminars may be taken in one of two ways: (1) as full seminars, with the requirement of a final paper (or an equivalent workload, such as a final examination, as designated by the instructor) to be presented to the instructor and assessed as part of the final grade; full seminars carry four units, with a regular letter grade or (2) as half seminars, requiring full participation in the course but no paper (or equivalent as described above). Half seminars carry two units and are normally taken for an S/U grade only, except that arrangements may be made with the instructor beforehand, at the instructor's discretion, for a letter grade to be given.

Written and Oral Qualifying Examinations

The major fields have separate reading lists. All lists include the reading list in Greek and in Latin authors for the M.A. in Classics. The major fields have the following examination structure:

Classical Literature and Philology: (1) Two one and one-half hour translation examinations, one in Greek, one in Latin, which may be taken concurrently or separately, consisting of passages from the Ph.D. reading list and other literature (M.A. degree holders in Greek only or Latin only take an additional two-hour examination in sight translation from the other language); (2) a 15- to 22-page research paper on a field or author of the student's choosing outside the area of the student's specialization (submitted either before or after the comprehensive examination); (3) a written three-hour examination in the area of the student's specialization and prospective dissertation topic.

Classical Linguistics: (1) A written three-hour translation examination in classical Greek or Latin (half from reading list and half at sight); (2) a written three-hour examination consisting of passages of ancient texts covered in the required course, for translation and comment; (3) a two-hour written examination in comparative grammar.

Byzantine Greek: (1) A written three-hour translation examination in classical Greek (half from the reading list and half at sight); (2) a written three-hour examination on Byzantine Greek (translation from reading list, sight translation, questions pertaining to the list of recommended secondary literature).

Medieval Latin: (1) A written three-hour translation examination in classical Latin (half from the reading list and half at sight); (2) a written three-hour examination on medieval Latin (translation from reading list, sight translation, questions pertaining to the list of recommended secondary literature).

Each qualifying examination may normally be retaken twice. Promptly on the completion of the last qualifying examination, the University Oral Qualifying Examination is administered by the doctoral committee, probing the candidate's knowledge of the major field (and possible stipulated areas outside the specialization) and discussing a formal dissertation proposal.

Classics

Lower Division Courses

10. Survey of Classical Greek Culture (5 units). Lecture, two to three hours; discussion, 90 minutes; outside study, 1½ hours. Knowledge of Greek not required. Lectures, many illustrated, on Greek life and culture from age of Homer to Roman Conquest. Discussion of art, literature, philosophy, and mythology.

20. Survey of Roman Civilization (5 units). Lecture, three hours; discussion, one hour; outside study, 11 hours. Knowledge of Latin not required. Study of life and culture of Rome from time of its foundation to end of antiquity. Survey of art, literature, and political thought of the Romans. Selections from Latin authors read in translation.

40. Survey of Greek Literature in Translation (5 units). Lecture, three hours; discussion, one hour; outside study, 11 hours. Readings in English of Greek literature from the beginning to Roman times to demonstrate the sweep of Greek literary achievement and the foundations it laid for subsequent literary developments. P/NP or letter grading.

41. Survey of Latin Literature in Translation (5 units). Lecture, three hours; discussion, one hour; outside study, 11 hours. Readings in English to emphasize unique achievements of Latin literature, particularly in such areas as drama, epic, satire, oratory, and history. P/NP or letter grading.

42. Cinema and the Ancient World. Lecture, three hours; discussion, 90 minutes. Use of popular cinema to introduce students to ancient Greek and Roman culture; limits of investigation set by individual instructor. P/NP or letter grading.

50F. Power and Imagination in Ancient Rome. Lecture, 90 minutes; discussion, 90 minutes. Freshman seminar designed to survey major aspects of Roman civilization, including art, religion, literature, and politics. P/NP or letter grading.

51. Art and Archaeology of the Classical World. Lecture, three hours; discussion, one hour. Survey of a major period, theme, or medium of Greek and Roman art and archaeology at discretion of instructor. P/NP or letter grading.

55. Origins and Nature of English Vocabulary. Lecture, three hours. Origins and nature of English vocabulary, from Proto-Indo-European prehistory to current slang. Topics include the Greek and Latin component in English (including technical terminology), the alphabet and English spelling, semantic change and word formation, vocabulary in literature and film.

M70. Survey of Medieval Greek Culture. (Same as History M70.) Lecture, three to four hours. Classical roots and medieval manifestation of Byzantine civilization: political theory, Roman law, pagan critique of Christianity, literature, theology, and contribution to the Renaissance (including discovery of America).

88A-88Z. Lower Division Seminars. Seminar, three hours. Variable topics; consult *Schedule of Classes* or department for topics to be offered in a specific term. P/NP or letter grading.

88A. Socrates. Examination of evidence for Socrates' life and thought, through texts from Plato, Xenophon, and Aristophanes, in an attempt to see how Socrates worked and affected those around him.

88C. Comparative Mythology. Ways of studying myth through history, especially in ancient Near Eastern and Indo-European cultures. Comparison of myths on both diffusional and genetic models. Reconstruction of protomyths common to prehistoric Western Asia and Europe.

88D. The Greek Symposium. Freshman seminar on the topic of the Greek symposium, an institution that permits students to understand many major features of Greek culture and society.

Upper Division Courses

140. Topics in History of Greek Literature. Lecture, three hours. Prerequisites: courses 10, 40. Investigation of a specific issue in the understanding of Greek literature, such as definition of a genre or evaluation of a particular author. May be repeated for credit with topic change. P/NP or letter grading.

141. Topics in History of Latin Literature. Lecture, three hours. Prerequisites: courses 20, 41. Investigation of a specific issue in the interpretation of Latin literature, such as definition of a genre or evaluation of a particular author. May be repeated for credit with topic change. P/NP or letter grading.

142. Ancient Epic. Lecture, three hours. Prerequisites: courses 10 or 20, and 40 or 41. Homer's *Iliad* and *Odyssey*, Vergil's *Aeneid*, and Ovid's *Metamorphoses*, studied in translation.

143. Ancient Drama. Lecture, three hours. Prerequisites: courses 10 or 20, and 40 or 41. Study of Greek and/or Latin drama in translation. P/NP or letter grading.

144. Generic and Topical Studies in Ancient Literature. Lecture, three hours. Prerequisites: courses 10 or 20, and 40 or 41. Investigation of a problem in ancient literature that involves discussion of both Greek and Roman material. May be repeated for credit with topic change. P/NP or letter grading.

M145A. Ancient Greek and Roman Philosophy. (Formerly numbered 145A.) (Same as Philosophy M103A.) Lecture, three hours; outside study, nine hours. Study of some major Greek and Roman philosophical texts, including those of pre-Socratics, Plato, Aristotle, and Hellenistic philosophers, with emphasis on historical and cultural setting of the texts, their literary form, interrelations, and contribution to discussion of basic philosophical issues.

M145B. Later Ancient Greek Philosophy. (Formerly numbered 145B.) (Same as Philosophy M103B.) Lecture, three hours; outside study, nine hours. Prerequisite: one course from M145A, Philosophy 1, 100A, M101B, or M102, or consent of instructor. Study of some major texts in Greek philosophy of the Hellenistic and Roman periods. Readings vary and include works by Stoics, skeptics, philosophers of science, Neoplatonists, etc. P/NP or letter grading.

M146A. Plato — Earlier Dialogues. (Same as Philosophy M101A.) Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: one philosophy course or consent of instructor. Study of selected topics in early and middle dialogues of Plato.

M146B. Plato — Later Dialogues. (Same as Philosophy M101B.) Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: course M146A. Study of selected topics in middle and later dialogues of Plato.

M147. Aristotle. (Same as Philosophy M102.) Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: one philosophy course or consent of instructor. Study of selected works of Aristotle.

150A. Origins of the Western View of Women: The Female in Greek Thought. Lecture, three hours. Prerequisites: course 10 or equivalent, consent of instructor. Interdisciplinary study of concept of the female in various forms of thought developed by the Greeks (e.g., epic, tragedy, comedy, history, political philosophy, gynecology). Special emphasis on how these texts lay the foundation for the Western view of women.

150B. Origins of the Western View of Women: The Female in Roman and Early Christian Thought. Lecture, three hours. Prerequisites: course 20 or equivalent, consent of instructor. Interdisciplinary study of concept of the female in Roman and early Christian thought. Special emphasis on status of the female with regard to sexuality, procreation, and the sacred.

C151E. Archaeological Field Techniques (12 units). Off-campus field archaeology, 36 hours. Prerequisites: at least one classical archaeology course, consent of instructor. Training in techniques of archaeological research in the field, including topographic and area survey, mapping and recording artifacts, excavation and data analysis. Conducted in Mediterranean area. Concurrently scheduled with course C251E. P/NP or letter grading.

152. The Ancient City. Lecture, three to four hours. Prerequisites: courses 10 and 20, or History 1A, or equivalent. Study of urban planning in the ancient world, with particular attention to cities of classical Greece and Rome, but with consideration also to comparable developments in the ancient Near and Far East. Examination of questions of architectural space and organization, of form, design, and function of major municipal areas and buildings, and of provision of public amenities by detailed reference to significant archaeological sites and contemporary sources.

M153A. Minoan Art and Archaeology. (Same as Art History M102A.) Lecture, three hours. Prerequisite: course 10 or Art History 50 or equivalent. Study of development of art and architecture in Minoan Crete from ca. 3000 to 1000 B.C. P/NP or letter grading.

M153B. Mycenaean Art and Architecture. (Same as Art History M102B.) Lecture, three hours. Prerequisite: course 10 or Art History 50 or equivalent. Study of development of art and architecture in Mycenaean Greece from 2000 to 1000 B.C. P/NP or letter grading.

M153C. Archaic Greek Art and Archaeology. (Same as Art History M102C.) Lecture, three hours. Prerequisites: course 10 or equivalent, Art History 50. Study of development of art and architecture of Greek world from approximately 800 through 490 B.C. P/NP or letter grading.

M153D. Classical Greek Art and Archaeology. (Same as Art History M102D.) Lecture, three hours. Prerequisites: course 10 or equivalent, Art History 50. Recommended: upper division classics or Greek courses. Study of development of art and architecture of Greek world from approximately 490 through 350 B.C. P/NP or letter grading.

M153E. Hellenistic Greek Art and Archaeology. (Same as Art History M102E.) Lecture, three hours. Prerequisites: course 10 or equivalent, Art History 50. Study of development of art and architecture of Greek world from middle of the 4th century B.C., including transmittal of Greek art forms to the Romans. P/NP or letter grading.

M153F. Etruscan Art. (Same as Art History M102F.) Lecture, three hours. Prerequisite: course 20 or Art History 50 or equivalent. Arts of Italic peninsula from ca. 1000 B.C. to end of the Roman Republic. P/NP or letter grading.

M153G. Roman Art. (Same as Art History M102G.) Lecture, three hours. Prerequisite: Art History 50. Art and architecture of Rome and its Empire from ca. 300 B.C. to A.D. 300. P/NP or letter grading.

M153H. Late Roman Art. (Same as Art History M102H.) Lecture, three hours. Prerequisites: course M153G, Art History 50. Art of Roman Empire from the 2nd through 4th century (A.D.). P/NP or letter grading.

M153I-M153J-M153K. Classical Archaeology. (Same as Art History M102I-M102J-M102K.) Lecture, three or four hours. Prerequisite: course 10 or 20 or Art History 50 or History 1A or equivalent. Knowledge of Greek and Latin not required. General introduction to study of Aegean, Greek, and Roman architecture, sculpture, and painting. P/NP or letter grading. **M153I.** Greco-Roman Architecture; **M153J.** Greco-Roman Sculpture; **M153K.** Greco-Roman Painting.

161. Introduction to Classical Mythology. Lecture, three to four hours. Prerequisite: course 10 or History 1A or equivalent. Origins of classical myth; substance of divine myth and heroic saga; place of myth in religion; survey of study of classical mythology.

162. Classical Myth in Literature. Use of myth in principal authors and genres of Greek and Roman literature, with examples of its influence in later literatures.

165. Ancient Athletics. Prerequisite: course 10 or History 1A or equivalent. Study of ancient Greek and Roman athletics and their connections with religion, politics, literature, and art.

166A. Greek Religion. Prerequisite: course 10 or equivalent. Study of the religion of the ancient Greeks.

166B. Roman Religion. Prerequisite: course 20 or equivalent. Study of the religion of the ancient Romans.

167. Greek and Roman Magic. Lecture, three hours. Prerequisite: course 10 or 20. Study of beliefs about supernatural phenomena in the ancient world, including witches, ghosts, vampires, and magic spells, attested in both literary and archaeological sources. P/NP or letter grading.

168. Introduction to Comparative Mythology. Prerequisite: course 161 or consent of instructor. Religious, mythical, and historical traditions of Greece and Rome compared with each other and with those of other ancient Near Eastern and European societies.

M170. Power and Imagination in Byzantium. (Same as History M122.) Lecture, three hours. Prerequisites: course M70 or History 123A-123B. Study of relations of authority and the intelligentsia in the highly centralized Byzantine Empire. Topics include criticism of the emperor, iconoclasm, intellectual freedom, attempts at reform.

180. Introduction to Classical Linguistics. Prerequisites: Greek 3, Latin 3. Basics of comparative grammar of Greek and Latin in relation to one another and in the frame of Indo-European linguistics.

190. The Medieval Book. Seminar, three hours. Prerequisites: courses 10, 20, and 40 or 41, senior standing in Greek and Latin, Greek, Latin, or classical civilization. History of the book from manuscript to printing, with attention to construction, layout, decoration, and script, as well as changing cultural and historical contexts, medieval methods of information retrieval, and transition from script to print culture.

195. Senior Honors Paper. (Formerly numbered 195A-195B-195C.) Supervised through individual consultation with an appropriate faculty member, students revise paper written in a prior upper division course into substantial piece of academic writing.

197. Senior Seminar. Lecture, three hours. Prerequisite: senior standing. Seminar on important themes, periods, genres of ancient Greek and Roman world that take an innovative interdisciplinary approach to questions old and new. Class presentations and papers.

199. Special Studies in Classics (2 to 8 units). Prerequisites: senior standing, consent of instructor.

Graduate Courses

200. History of Classical Scholarship.

201B. Topics in Ancient History: Roman World (2 or 4 units). Seminar, three hours. Introduction to basic methods and approaches to study of Roman history by intensive examination of selected topics, including readings of ancient texts and modern scholarship. S/U or letter grading.

230A-230B. Language in Ancient Asia Minor. Prerequisite: consent of instructor. Survey of the language situation in Anatolia in 2nd and 1st Millennium B.C. Readings in Hittite, Palaic, Luwian, Hieroglyphic, Lycian, and Lydian texts. Anatolian-Greek relationships and survivals in classical and Hellenistic times.

240. Etruscology. Prerequisite: consent of instructor. Survey of scholarly research on Etruscan language and culture, with analysis of epigraphic material.

244. Textual Criticism: Studies in Preparation of a Critical Edition of Greek and/or Latin Texts. Seminar, three hours. Different steps required in preparation of a critical edition of an ancient text: localizing manuscripts; collation; establishing the stemma; selecting the right reading on basis of knowledge of the context, of the language of the author, and of the sources; emendations; formulation of *apparatus criticus* and *apparatus fontium*.

245. Computing and Classics. Introduction to processing and analysis of digitized texts of classical authors for purposes of literary history and criticism.

246. Greek and Latin Meter. Prerequisite: consent of instructor. Comprehensive study of meter as it functions in classical poetry.

251A. Seminar: Classical Archaeology — Aegean Bronze Age (2 or 4 units).

251B. Seminar: Classical Archaeology — Greco-Roman Architecture.

251C. Seminar: Classical Archaeology — Greco-Roman Sculpture.

251D. Seminar: Classical Archaeology — Greco-Roman Painting (2 or 4 units). Discussion, three hours. Prerequisite: consent of instructor. Studies in style and iconography of various periods of ancient Greek and Roman painting. May be repeated for credit with consent of instructor.

C251E. Archaeological Field Techniques (12 units). Off-campus field archaeology, 36 hours. Prerequisites: at least one classical archaeology course, consent of instructor. Training in techniques of archaeological research in the field, including topographic and area survey, mapping and recording artifacts, excavation and data analysis. Conducted in Mediterranean area. Concurrently scheduled with course C151E. S/U or letter grading.

252. Topography and Monuments of Athens. Detailed studies in topography and monuments of Athens, combining evidence of literature, inscriptions, and actual remains.

253. Topography and Monuments of Rome. Detailed studies in topography and monuments of ancient Rome, combining evidence of literature, inscriptions, and actual remains.

260. Topics in Ancient Religion. Seminar, three hours. Prerequisite: consent of instructor.

268. Seminar: Comparative Mythology. Prerequisites: course 168, consent of instructor. Advanced study of selected topics in comparing Greek and Roman traditions with other ancient Near Eastern and European societies.

267. Graduate Colloquium in Classical Literature. Survey of basic methods of and approaches to classical scholarship, including textual criticism, literary interpretation and theory, hermeneutics, interdisciplinary studies, and computer applications to classics. Emphasis varies from year to year, depending on instructor(s). May be repeated for credit with topic change. S/U grading.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

380. Research Apprentice Practicum. Discussion, three hours. Prerequisite: apprentice personnel employment as a graduate student researcher in the department on Philodemus Translation Project. Training in textual reconstruction, translation, and annotation for those working as graduate student researchers on Philodemus Translation Project (text and facing translation of fragmentary aesthetic treatises of Philodemus, teacher of Vergil).

596. Directed Individual Study or Research (2 to 8 units).

597. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units).

599. Research for Ph.D. Dissertation (2 to 8 units).

Greek

Lower Division Courses

1. Elementary Greek (5 units). Lecture, five hours; outside study, 10 hours.

2. Elementary Greek (5 units). Lecture, five hours; outside study, 10 hours. Enforced requisite: course 1.

3. Elementary Greek (5 units). Lecture, five hours; outside study, 10 hours. Enforced requisite: course 2.

Upper Division Courses

Note: Greek 3 is requisite to 100, which is requisite to 101A through 106 and 110 through 124.

100. Readings in Greek Prose. Prerequisite: course 3. Reading of Plato's *Apology* or a text of comparable difficulty.

101A. Homer: *Odyssey*.

101B. Homer: *Iliad*.

102. Lyric Poets. Selections from Archilochus to Bacchylides.

103. Aeschylus.

104. Sophocles.

105. Euripides.

106. Aristophanes.

107. Hesiod. Lecture, three hours. Prerequisite: course 100. Reading of *Theogony* and excerpts from *Works and Days*, with emphasis on Hesiod's place in Greek literature and his role in transmission of Greek mythology.

110. Study of Greek Prose. Work in sight reading and grammatical analysis of Attic prose texts; writing Attic prose.

111. Herodotus.

112. Thucydides.

113. Attic Orators.

115. Xenophon. Lecture, three hours. Prerequisite: course 100. Reading of one major work of Xenophon — the *Memorabilia*, *Cyropaedia*, *Anabasis*, *Hellenica*, or *Oeconomicus* — in Greek. P/NP or letter grading.

121. Plato.

122. Plato: *Republic*.

123. Aristotle: *Poetics* and *Rhetoric*.

124. Aristotle: *Ethics*.

130. Readings in the New Testament. Prerequisite: course 3.

131. Readings in Later Greek. Prerequisite: course 100. Topics vary from year to year and include "Longinus," On the Sublime; Marcus Aurelius; Arrian; the Second Sophistic; Plutarch; later epic; epigram; epistolographi Graeci.

132. Survey of Byzantine Literature. Prerequisite: course 100. Readings based on (1) *Anthology of Byzantine Prose*, ed. Nigel Wilson and (2) *Oxford Book of Medieval and Modern Greek Verse*, ed. C.A. Trypanis, or if unavailable, *Poeti bizantini*, ed. R. Cantarella. In addition, necessary historical and cultural background provided by readings and lectures.

133. Readings in Byzantine Literature. Prerequisite: course 132. Topics vary from year to year and include Procopius, Agathias, Michael Psellus, the Alexiad of Anna Comnena, and Digenis Akritas.

199. Special Studies in Greek (2 to 8 units). Prerequisites: senior standing, consent of instructor.

Graduate Courses

The 200-series courses which are designated A and B (e.g., 201A-201B) are double courses. Course A is a preseminar and is normally requisite to course B, a seminar. Seminars numbered 201A through 233 (except 210) may be taken for either two or four units. If a seminar is taken for four units, a paper is required.

200A-200B-200C. History of Greek Literature (6 units each). Prerequisite: consent of instructor. Lectures on history of Greek literature, supplemented on the part of the student by independent reading of Greek texts in original language.

201A-201B. Homer: *Iliad* (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading.

202A-202B. Homer: *Odyssey* and the Epic Cycle (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading.

203. Hesiod (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading.

204. Homeric Hymns (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading.

205. Seminar: Aeschylus (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading.

206A-206B. Sophocles (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading.

207A-207B. Euripides (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading.

208A-208B. Aristophanes (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading.

209A-209B. Seminars: Hellenistic Poetry (2 or 4 units each). (Formerly numbered 209.) S/U (two-unit course) or letter (four-unit course) grading.

210. Advanced Greek Prose Composition. Prerequisite: course 110 or equivalent.

211A-211B. Herodotus (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading.

212A-212B. Thucydides (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading.

213. Seminar: Greek Historiography (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading.

214. Demosthenes (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading.

215. Early Greek Orators (2 or 4 units). Studies in works of Antiphon, Andocides, and Lysias. S/U (two-unit course) or letter (four-unit course) grading.

216. Menander (2 or 4 units). Prerequisite: reading knowledge of classical Greek. S/U (two-unit course) or letter (four-unit course) grading.

217A-217B. Greek Lyric Poetry (2 or 4 units each). Prerequisite: consent of instructor. S/U (two-unit course) or letter (four-unit course) grading. **217A.** Archaic Lyric. Study of lyric poetry of Archaic period, both choral and monodic, with elegiac and iambic included. **217B.** Pindar and Bacchylides. Study of choral odes of Pindar and Bacchylides, with special attention to conventions of the epinician.

220. Seminar: Greek Novel (2 or 4 units). Lecture, three hours. Study of the Greek romance and its place in Greek literature. Two texts (Chariton: *Chaereas and Callirhoe* and Longus: *Daphnis and Chloe*) studied in some detail. S/U (two-unit course) or letter (four-unit course) grading.

221. Seminar: Pre-Socratic Philosophers (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading.

222A-222B. Plato (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading.

223A-223B. Aristotle (2 or 4 units each). S/U (two-unit course) or letter (four-unit course) grading.

224. Seminar: Post-Aristotelian Philosophy (2 or 4 units). S/U (two-unit course) or letter (four-unit course) grading.

229. Sight Translation (2 to 4 units). Discussion, three hours. Prerequisite: graduate standing. Practice in translation of previously unseen texts from a variety of authors and genres. Topics include peculiarities of style and vocabulary of the distinct genres, literary vs. scholarly translation, semantic properties of particular words and constructions.

231A-231B-231C. Seminars: Later Greek and Byzantine Literature (2 or 4 units each). Prerequisite: consent of instructor. Studies in various aspects of Byzantine Greek language and literature. Topics vary from year to year. Each course may be taken independently and may be repeated for credit with topic change. S/U (two-unit course) or letter (four-unit course) grading.

233. Byzantine Poetry (2 or 4 units). Study of main representatives of both religious and secular poetry. S/U (two-unit course) or letter (four-unit course) grading.

240A-240B. History of the Greek Language. Prerequisite: consent of instructor. **240A.** Linguistic history of classical Greek. **240B.** Postclassical, medieval, and modern Greek.

241. Greek Epigraphy. Survey of Greek historical inscriptions, chiefly Attic.

242. Greek Dialects and Historical Grammar. Prerequisite: consent of instructor. Linguistic situation in early Greece. Readings in classical Greek dialectal texts. Greek grammar in context of common Greek and Indo-European linguistics.

243. Mycenaean Greek. Prerequisite: consent of instructor. Script, language, and grammar of the Linear B inscriptions; their relevance to ancient Greek linguistic and cultural history.

244. Greek Papyrology. Prerequisites: reading knowledge of Greek, consent of instructor. Introduction to Greek papyri, considered both as historical documents and as carriers of literature.

245. Greek Paleography. Studies in development of book hand in Greek manuscripts earlier than the invention of printing.

596. Directed Individual Study or Research (2 to 8 units).

597. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units).

599. Research for Ph.D. Dissertation (2 to 8 units).

Latin

Lower Division Courses

1. **Elementary Latin (5 units).** Lecture, five hours; outside study, 10 hours.
- 1G. **Elementary Latin for Graduate Students (No credit).** Concurrently scheduled with course 14.
2. **Elementary Latin (5 units).** Lecture, five hours; outside study, 10 hours. Enforced requisite: course 1.
3. **Elementary Latin (5 units).** Lecture, five hours; outside study, 10 hours. Enforced requisite: course 2 or 14.
14. **Elementary Latin: Intensive (10 units).** Lecture, 10 hours; outside study, 20 hours. All declensions of nouns and adjectives, all conjugations in indicative mood, and primary uses of subjunctive mood. Emphasis on development of ability to read easy selections of classical prose.

Upper Division Courses

Note: Latin 3 is requisite to 100, which is normally requisite to all other 100-series courses in classical Latin authors.

100. **Readings in Latin Prose and Poetry.** Lecture, three hours. Prerequisite: course 3 or equivalent. Close study of a prose text supplemented with related readings in poetry. Attention to historical and cultural context. Course is normally requisite to other courses in the Latin 100 series.
101. **Plautus.**
102. **Terence.**
103. **Lucretius.**
104. **Ovid.**
- 105A. **Beginning Vergil: Selections from Aeneid I-VI.** Lecture, three hours. Prerequisite: course 100 or consent of instructor. Reading of one or more books from first half of the *Aeneid*, designed especially for students with only limited experience in reading Latin poetry.
- 105B. **Advanced Vergil.** Lecture, three hours. Prerequisite: course 105A or equivalent or consent of instructor. Reading and discussion of Vergil's *Eclogues*, *Georgics*, and/or second half of the *Aeneid*. May be repeated for credit with change in readings. P/NP or letter grading.
106. **Catullus.**
107. **Horace.**
108. **Roman Elegy.** Selections from Catullus, Tibullus, and Propertius.
109. **Roman Satire.** Selections from *Epistles* of Horace, *Satires* of Juvenal, and *Epigrams* of Martial.
110. **Study of Latin Prose.** (Formerly numbered 110A-110B.) Lecture, three hours. Work in sight reading and grammatical analysis of classical prose texts; writing of classical prose.
111. **Livy.**
112. **Tacitus.**
113. **Cicero: The Orations.**
114. **Roman Epistolography: Cicero and Pliny.**
115. **Caesar.**
116. **Roman Novel.** Lecture, three hours. Prerequisite: course 100 or equivalent. Reading and discussion of either Petronius' *Satyricon* or Apuleius' *Metamorphoses* and development of the genre of prose novel in antiquity. May be repeated for credit with change in author and text.
117. **Sallust.**
118. **Seneca.** Selection of Seneca's works read in Latin.
120. **The Vulgate.** Lecture, three hours. Prerequisite: course 3 or consent of instructor. Reading of selected chapters of St. Jerome's translation of the Bible, with emphasis on unclassical features of the Latin.

121. **Patristic Texts.** Lecture, three hours. Prerequisite: course 100. Reading and discussion of one or more Latin patristic texts (especially works of Ambrose, Augustine, and/or Jerome), with emphasis on specific features of patristic, as opposed to classical, Latin.

130. **Introduction to Medieval Latin.** Prerequisite: course 3 or consent of instructor. Reading of easy prose texts, with emphasis on basic language training.

131. **Medieval Latin Prose.** Prerequisite: course 130 or consent of instructor. Extensive reading of selected texts in prose, with emphasis on idiosyncrasies of medieval Latin.

133. **Medieval Latin Poetry.** Prerequisite: one upper division Latin language course or consent of instructor.

199. **Special Studies in Latin (2 to 8 units).** Prerequisites: senior standing, consent of instructor.

Graduate Courses

The 200-series courses which are designated A and B (e.g., 203A and 203B) are double courses. Course A is a preseminar and is normally requisite to course B, a seminar. Seminars numbered 201 through 231B (except 210) may be taken for either two or four units. If a seminar is taken for four units, a paper is required.

200A-200B-200C. **History of Latin Literature (6 units each).** Prerequisite: consent of instructor. Lectures on history of Latin literature, supplemented on the part of the student by independent reading of Latin texts in the original.

201. **Roman Epic Tradition (2 or 4 units).** Seminar, three hours. Close study of one epic poet other than Vergil (e.g., Ennius, Lucan, Valerius Flaccus, Statius, Silius Italicus), with attention to the literary tradition of epic. May be repeated for credit with topic change. S/U (two-unit course) or letter (four-unit course) grading.

202. **Seminar: Catullus (2 or 4 units).** Detailed consideration of entire Catullian corpus. S/U (two-unit course) or letter (four-unit course) grading.

203A. **Elegiac Poetry (2 or 4 units).** S/U (two-unit course) or letter (four-unit course) grading.

203B. **Propertius (2 or 4 units).** S/U (two-unit course) or letter (four-unit course) grading.

204A-204B. **Vergil's Aeneid (2 or 4 units each).** S/U (two-unit course) or letter (four-unit course) grading.

205A. **Seminar: Vergil's Bucolics (2 or 4 units).** S/U (two-unit course) or letter (four-unit course) grading.

205B. **Seminar: Vergil's Georgics (2 or 4 units).** Close reading of Vergil's text; careful evaluation of influential criticism on the poem, much of it recent; examination of the work's place within the tradition of rural poetry. S/U (two-unit course) or letter (four-unit course) grading.

206. **Horace (2 or 4 units).** S/U (two-unit course) or letter (four-unit course) grading.

207. **Roman Comedy (2 or 4 units).** Prerequisite: consent of instructor. Survey of history of Roman comedy. Reading of one comedy by Plautus or Terence, with emphasis on language and meter. S/U (two-unit course) or letter (four-unit course) grading.

208. **Ovid (2 or 4 units).** Prerequisite: reading knowledge of classical Latin. Detailed study of poetic works of Ovid. Readings in the original with discussion of secondary literature and scholarship. May be repeated for credit with topic change. S/U (two-unit course) or letter (four-unit course) grading.

209. **Seminar: Roman Satire (2 or 4 units).** Detailed study of an individual satirist, with attention to his position in development of the satirical genre in Roman literature. Choice of author varies from year to year. Close study of the text, of characteristics of the writer as a social critic and artist, and of contemporary literary and social environment. S/U (two-unit course) or letter (four-unit course) grading.

210. **Advanced Latin Prose Composition.** Prerequisite: course 110.

211A-211B-211C. **Seminars: Roman Historians (2 or 4 units each).** Study of considerable portions of writings of the following. S/U (two-unit course) or letter (four-unit course) grading. 211A. Sallust; 211B. Livy; 211C. Tacitus.

215. **Seminar: Roman Novel (2 or 4 units).** Works such as Petronius' *Satyricon* and Apuleius' *Metamorphoses*: study of literary problems. May be repeated for credit with topic change. S/U (two-unit course) or letter (four-unit course) grading.

216. **Roman Rhetoric (2 or 4 units).** Seminar, three hours. Close study of one rhetorical text (e.g., *Rhetorica ad Herennium*, Cicero's *de Oratore*, Seneca's *Controversiae* or *Suasoriae*, Quintilian's *Institutio*), with attention to its place in rhetorical tradition. May be repeated with topic change. S/U (two-unit course) or letter (four-unit course) grading.

220. **Cicero's Orations (2 or 4 units).** Seminar, three hours. S/U (two-unit course) or letter (four-unit course) grading.

221A. **Cicero's Philosophical Works (2 or 4 units).** S/U (two-unit course) or letter (four-unit course) grading.

221B. **Cicero: De Natura Deorum (2 or 4 units).** S/U (two-unit course) or letter (four-unit course) grading.

222. **Seminar: Roman Stoicism (2 or 4 units).** Prerequisite: reading knowledge of Greek and Latin. S/U (two-unit course) or letter (four-unit course) grading.

223. **Lucretius (2 or 4 units).** S/U (two-unit course) or letter (four-unit course) grading.

224. **Seneca (2 or 4 units).** Seminar, three hours. Detailed study of one work of prose or poetry by the younger Seneca. Emphasis on literary and philological problems, with some attention to philosophical and historical matters as well. May be repeated with topic change. S/U (two-unit course) or letter (four-unit course) grading.

229. **Sight Translation (2 to 4 units).** Discussion, three hours. Prerequisite: graduate standing. Practice in translation of previously unseen texts from a variety of authors and genres. Topics include peculiarities of style and vocabulary of the distinct genres, literary vs. scholarly translation, semantic properties of particular words and constructions.

231A-231B. **Seminars: Medieval Latin (2 or 4 units each).** Prerequisite: at least one upper division Latin course or consent of instructor. Studies in various areas of the language and literature of medieval Latin. May be repeated for credit with consent of instructor. S/U (two-unit course) or letter (four-unit course) grading.

232. **Vulgar Latin.** Prerequisite: consent of instructor. History and characteristics of popular Latin; its development into early forms of the Romance languages.

235. **Late Latin Poetry (2 or 4 units).** Seminar, three hours. Close study, with attention to literary and historical background, of work of one or several poets who flourished between the death of Ovid and fall of the Roman Empire. May be repeated with change in author.

236. **Late Latin Prose (2 or 4 units).** Seminar, three hours. Close study, with attention to literary and historical background, of work of one or several prose authors who flourished between the death of Tacitus and fall of the Roman Empire. May be repeated with change in author.

240. **History of the Latin Language.** Prerequisite: consent of instructor. Development of Latin from the earliest monuments until its emergence in the Romance languages.

242. Italic Dialects and Latin Historical Grammar. Prerequisite: consent of instructor. Linguistic situation in early Italy. Readings in Oscan, Umbrian, and early Latin texts. Latin grammar in context of Italic and Indo-European linguistics.

243. Seminar: Latin Paleography. Studies in development of book hand in Latin manuscripts earlier than the invention of printing.

245. Neo-Latin (2 or 4 units). Seminar, three hours. Prerequisites: course 100, at least two other upper division Latin courses. Survey of texts by one or more authors from Renaissance to the present, written on related topics. S/U or letter grading.

370. Teaching Latin. Prerequisite: graduate standing or consent of instructor. Techniques for teaching; organization of courses; review of content of curriculum offered in junior and senior high schools.

495. College Teaching of Latin (2 units). Prerequisites: appointment as a teaching assistant, consent of instructor. Methodology of instruction in conjunction with classroom practice. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research (2 to 8 units).

597. Study for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units).

599. Research for Ph.D. Dissertation (2 to 8 units).

Scope and Objectives

The major in communication studies is an interdisciplinary program leading to a Bachelor of Arts degree. It seeks to provide students with a comprehensive knowledge of the nature of human communication, the symbol systems by which it functions, the environments in which it occurs, its media, and its effects. Employing critical and empirical approaches, the major draws its resources from the social sciences, humanities, and fine arts. Two areas of specialization are offered: the specialization in mass communication centers on formal and institutional communication systems and the macrocosmic social contexts in which they function; the specialization in interpersonal communication centers on face-to-face communicative interaction in the small group environment.

Bachelor of Arts Degree

Students selecting the major in communication studies must complete the required lower division requisites and a minimum of 15 upper division courses as set forth below. Enrollment in the major is limited. Admission to the major is by application to the committee in charge. Applications are available during Spring Quarter in the program office.

Preparation for the Major

Required Lower Division Courses: Communication Studies 10, Psychology 10, Sociology 1, Speech 1, Anthropology 33 or Linguistics 1, Program in Computing 1, one course from Economics 40, Sociology 18, or Statistics 50.

You are encouraged but not required to complete as many lower division preparation for the major courses as possible before admission to the program.

Writing Requirement

Required: English 131D.

The Major

Required Core Courses: Communication Studies 100 and 101 and one course from Anthropology M140, Communication Studies 102, or Psychology 122.

Specializations

Mass Communication — (1) Communication Studies 140, 152, and one course from Political Science 141B, Psychology 137B, Sociology 133; (2) *systems, institutions, and policies* — two courses from Communication Studies M147 (or Sociology M176), 153, 155, 156, 165, 170, 177, 180, 187; (3) *media content/criticism/history* — two courses from Communication Studies 160, M161 (or Political Science M141D), 171, Film and Television 106A, 108, 110A, either Communication Studies 175 or Film and Television 116; (4) *electives in interpersonal communication* — two courses from Communication Studies 115, 120, 130, M144A or M144B or Sociology CM124A or CM124B, Psychology 135 or Sociology 132, Sociology 135, 160; (5) *general electives* — two courses from one of the following groups: (a) *American studies* — English 115A, History 148A, 148B, 148C, 150A, 150B, 156A, 156B, Political Science 114A, 114B; (b) *language theory* — Communication Studies M124, 150, Linguistics 170, Philosophy 172, Psychology 122 or 123; (c) *social systematics* — Communication Studies M144A or M144B or Sociology CM124A or CM124B, Anthropology 133R, 135A, 135B, 142A, 142B, Sociology 134.

Interpersonal Communication — (1) Four courses (at least one of which must be Communication Studies 115 or 120) from Communication Studies 115, 120, M144A or M144B or Sociology CM124A or CM124B, Sociology 132 or Psychology 135, Sociology 135 or Psychology 137A; (2) *heterogeneous groups communication* — three courses from Anthropology 141, Communication Studies 130, Psychology 137C, M165, 174, 177, 178, either Sociology 156 or 160; (3) *electives in mass communication* — two courses from Communication Studies 140, M147 (or Sociology M176), 152, 153, 155, 165, 170, 180, 187; (4) *general electives* — two courses from one of the following groups: (a) *media content/criticism/history* — Communication Studies 160, M161 (or Political Science M141D), 171, 189, 197C, Film and Television 106A, 108, 110A, either Communication Studies 175 or Film and Television 116; (b) *language theory* — Communication Studies M124, 150, Linguistics 170, Philosophy 172, Psychology 122 or 123; (c) *social systematics* — Communication Studies M144A or M144B or Sociology CM124A or CM124B, Anthropology 133R, 135A, 135B, 142A, 142B, Sociology 134.

Lower Division Courses

10. Introduction to Communication Studies. Introduction to fields of mass communication and interpersonal communication. Study of modes, media, and effects of mass communication, interpersonal processes, and communication theory.

88A-88Z. Lower Division Seminars: Special Topics in Communication Studies. (Formerly numbered 97A-97Z.) Seminar, three hours. Variable topics courses; consult *Schedule of Classes* for topics to be offered in a specific term. P/NP or letter grading. **88A.** Mass Communication Theory; **88B.** Systems, Institutions, and Policies; **88C.** Media Content/Criticism and History; **88D.** American Studies; **88E.** Language/Interaction Structures; **88F.** Social Systematics; **88G.** Interpersonal Communication Theory; **88J.** Heterogeneous Groups Communication:

88C. Future of Mass Communication. (Formerly numbered 97C.) Limited to freshmen. Current state of mass media in the world and, through analysis of trends, content, and societal forces, speculation on future of the media over next 25 years.

Upper Division Courses

100. Communication Theory. Prerequisite: course 10 or Linguistics 1 or Sociology 1 or Psychology 10 or consent of instructor. Analysis of fundamental nature of human communication; its physical, linguistic, psychological, and sociological bases. Study of theoretical models explicating the process and constituents of the communicative act.

101. Freedom of Communication. Analysis of legal, political, and philosophical issues entailed in rights of free expression, access to an audience, and access to information. Study of court decisions governing freedom of communication in the U.S.

102. Code of Human Communication. Prerequisite: course 10 or Linguistics 1 or Sociology 1 or Psychology 10 or consent of instructor. Structural analysis and description of human communication codes; development of language; characteristics of the source, channels, and destination in human communication.

115. Dyadic Communication and Interpersonal Relationships. Prerequisite: course 100. Developmental approach to study of communication in dyadic relationships. Analysis of differences in the stages of relationships in terms of communication rules and verbal and nonverbal messages.

M116. Communication and Conflict in Couples and Families. (Same as Psychology M176.) Lecture, 90 minutes; discussion, 90 minutes. Prerequisites: Psychology 10 or 11, 41, and 127, or consent of instructor. Examination of (1) dysfunctional communication and conflict in couples and families and (2) relationship of these processes to individual psychopathology, marital discord, and family disruption (e.g., separation and divorce).

M117. Rhetoric of Rule. (Same as French M143.) Lecture, three hours. Exploration of how and why power is symbolically constructed by comparing Louis XIV's and President Clinton's attempts to manipulate their image in the "media" of their respective cultures.

120. Principles and Types of Group Communication. Prerequisite: course 100 or consent of instructor. Analysis of purposes, principles, and types of small group communication. Particular emphasis on organization of and participation in problem-solving discussion.

M124. Psychology of Language and Gender. (Same as Psychology M137J and Women's Studies M137J.) Lecture, three hours. Prerequisites: Psychology 10 or equivalent, junior standing. Examination of current topics at intersection of gender and language. Topics include sex differentiation in language cross-culturally; sex bias in lexicon and usage; sex differences in lexicon, syntax, phonology, and nonverbal behavior; development of sex-differentiated language in children; "women's" and "men's" language in various racial/ethnic/class/sexual preference groups; and conversational interaction.

130. Cultural Factors in Interpersonal Communication. Prerequisite: course 100 or consent of instructor. Study of cultural factors as they affect the quality and processes of interpersonal communication; exercises in participation, analysis, and criticism of interethnic and interracial communications in the small group configuration.

140. Theory of Persuasive Communication. Prerequisite: course 100 or consent of instructor. Dynamics of communication designed to influence human conduct; analysis of structure of persuasive discourse; integration of theoretical materials from relevant disciplines of humanities and social sciences.

142. Rhetorical Theory. Prerequisite: course 100 or consent of instructor. Survey of major classical and neoclassical treatises on rhetoric. Analysis of theories of Plato, Aristotle, Cicero, Quintilian, St. Augustine, Blair, Whately, Campbell, and other leading works in theory of rhetoric.

M144A-M144B. Conversational Structures I, II. (Same as Sociology CM124A-CM124B.) Lecture, three hours; discussion, one hour. P/NP or letter grading. **M144A.** Introduction to some structures which are employed in organization of conversational interaction, such as turn-taking organization, organization of repair, and some basic sequence structures with limited expansions. **M144B.** Prerequisite: course M144A. Consideration of some more expanded sequence structures, story structures, topical sequences, and overall structural organization of single conversations.

M147. Sociology of Mass Communication. (Same as Sociology M176.) Prerequisite: course 100 or consent of instructor. Studies in relationship between mass communication and social organization. Topics include history and organization of major media institutions, social forces that shape production of mass media news and entertainment, selected studies in media content, and effects of media on society.

150. Methodologies in Communication Research. Lecture, three hours. Prerequisite: course 100 or consent of instructor. Critical studies of quantitative and qualitative methodologies in communication research.

152. Analysis of Communication Effects. Prerequisite: course 100 or consent of instructor. Survey of experimental and field research on effects of communications. Study of source, message, and environmental factors affecting audience response.

153. The Media and Aggression Against Women. Lecture, two hours; discussion, two hours. Prerequisite: course 152 or consent of instructor. Study of the growing body of literature on relationship between mass media and aggression against women. Consideration of both role of the media as reflecting cultural values and scripts and its potentially powerful role as a socializing agent of the culture. Analysis of research on role of individual differences among members of a culture as mediators of the impact of the media.

155. Communication Technology and Public Policy. Prerequisite: course 10. Introduction to modern communication technology and policy, with special attention to current policy issues, institutions which make policy decisions, and social, economic, and technological trends which create policy problems. Modern communication technologies surveyed include cable television, teletext, viewdata, and satellite, microwave cellular, and subcarrier communication.

156. Human/Computer Communication. Prerequisite: completion of the seven preparation for the major courses. Limited to communication studies majors. Survey of behavioral, design, and evaluation issues in human/computer communication. Readings from disciplines of psychology, sociology, computer science, communication, and library and information science. Students perform several on-line assignments in learning to use different technologies. Term paper required.

160. Political Communication. Prerequisites: courses 100 and 101, or consent of instructor. Study of nature and function of communication in the political sphere; analysis of contemporary and historical communications within established political institutions; state papers; deliberative discourses; electoral campaigns.

M161. Electoral Politics: Mass Media and Elections. (Same as Political Science M141D.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 160. Assessment of manner in which Americans' political beliefs, choices, and actions are influenced by mass media presentations, particularly during election campaigns. Topics include processes of political attitude formation and change, different types of media "effects," and role of the media in the American political process.

165. Agitational Communication. Prerequisites: courses 100 and 101, or consent of instructor. Theory of agitation; agitation as a force for change in existing institutions and policies in a democratic society. Intensive study of selected agitational movements and the technique and content of their communications.

170. Legal Communication. Prerequisites: courses 100 and 101, or consent of instructor. Study of trial and appellate processes as systems of communication. Analysis of elements of the juridical process as they affect the quality of communication content. Study of rules of evidence, jury behavior, and structure of legal discourse.

171. Seminar: Theories of Freedom of Speech and Press. Prerequisites: course 101, consent of instructor. Exploration of relationship between freedoms of speech and press and values of liberty, self-realization, self-government, truth, dignity, respect, justice, equality, association, and community. Study of the significance of these values examined in connection with issues such as obscenity, defamation, access to media, and control of commercial, corporate, and government speech.

175. Criticism and the Public Arts. Prerequisite: course 10 or consent of instructor. Introduction to methods and problems of criticism in the public arts. Study of several types of critical methods: formalistic, analogue, pragmatic, and aesthetic criticism. Topics include definition of art and criticism, aesthetic media, genre and resources of film, television, theater, and public discourse, varieties of critical method, problems of critical judgment.

177. Libel and Freedom of Expression. Lecture, two hours; discussion, two hours. Prerequisite: course 101 or consent of instructor. Intensive study of law of defamation and its relationship to the free flow of information in a democracy. Examination of rationale, scope, and effects of libel laws. Topics include application of libel laws to public official, public figure, and private plaintiffs and media and nonmedia defendants; group libel, privileged libel, and libelous fiction.

180. Politics of Censorship. Discussion, two hours; simulation teaching, three hours. Prerequisites: course 101, consent of instructor. Examination of the process and substance of debates over government and private censorship by having students become active participants in a term-long simulated battle over a current issue such as book censorship, pornography, or UNESCO's proposed "New World Information Order."

185. Field Studies in Communication (2 to 4 units). Prerequisites: course 10, junior standing, consent of instructor. Fieldwork in communication. Students participate in two-hour seminar sessions and spend seven hours in approved community settings each week for each two units of credit. May be taken for a maximum of four units per term. P/NP grading.

187. Ethical and Policy Issues in Institutions of Mass Communication. Prerequisites: courses 10, 101. Intensive examination of ethical and policy issues arising from interaction of media institutions (print, film, broadcasting, and new technologies) and societal institutions (Congress, federal agencies, courts, the Presidency, schools, churches, political action groups, advertisers, and audiences).

189. Multicultural Television and Society. (Formerly numbered 197C.) Study and evaluation of cross-cultural, social, and psychological characteristics of selected national and international television programs and their implications for social learning in children. Designed to systematically study multicultural attributes related to sociocultural images and portrayals of television programs using various evaluation models and techniques.

191H. Research Methods in Communication (Honors). Lecture, three hours. Prerequisites: course 10, junior standing. Provides a working understanding of research methods in communication studies, particularly related to study of mass media effects, to give students the background necessary to design, implement, and report their own research project.

196H. Undergraduate Honors Proseminar. Prerequisites: senior standing, 3.5 GPA in communication studies major, 3.3 GPA overall. Limited enrollment. Variable topics course involving specialized study of selected aspects of the field of human communication.

197A-197Z. Special Topics in Communication Studies. Lecture, three hours. Prerequisite: completion of preparation for the major courses or consent of instructor. Variable topics courses; consult *Schedule of Classes* for topics to be offered in a specific term. **197A.** Mass Communication Theory; **197B.** Systems, Institutions, and Policies; **197C.** Media Content/Criticism and History; **197D.** American Studies; **197E.** Language/Interaction Structures; **197F.** Social Systematics; **197G.** Interpersonal Communication Theory; **197J.** Heterogeneous Groups Communication.

199. Special Studies (2 to 8 units). To be arranged with faculty member who will direct the study. Prerequisites: senior standing, consent of instructor. Independent studies for seniors who desire intensive or specialized investigation of selected research topics.

199H. Special Studies for Honors Candidates (2 to 8 units). To be arranged with faculty member who will direct the study. Prerequisites: senior and honors program standing. Independent studies for honors undergraduates who desire intensive or specialized investigation of selected research topics.

COMMUNITY HEALTH SCIENCES

School of Public Health

UCLA
36-070/36-071 Center for the Health Sciences
Box 951772
Los Angeles, CA 90095-1772
(310) 825-5379/825-5308

Professors

Carol S. Aneshensel, Ph.D.
Emil Berkanovic, Ph.D.
Linda B. Bourque, Ph.D.
E. Richard Brown, Ph.D.
Osman M. Galal, M.D., Ph.D.
Michael S. Goldstein, Ph.D.
Gail G. Harrison, Ph.D., *Chair*
David Heber, M.D., Ph.D.
Dean T. Jamison, Ph.D.
Snehendu B. Kar, Dr.P.H., M.Sc.
Joel D. Kopple, M.D., *in Residence*
Virginia C. Li, Ph.D., M.P.H.
Charlotte G. Neumann, M.D., M.P.H.
Michael G. Ross, M.D., M.P.H., *in Residence*
John F. Schnelle, Ph.D., *in Residence*
Susan C. Scrimshaw, Ph.D.
Judith M. Siegel, Ph.D., M.S.Hyg., *Associate Dean for Academic Programs*

Professors Emeriti

Roslyn B. Alfin-Slater, Ph.D.
Isabelle F. Hunt, Dr.P.H., R.D.
Edward B. Johns, Ed.D.
Alfred H. Katz, D.S.W., M.S.
Alfred K. Neumann, M.D., M.A., M.P.H., F.A.B.P.M.
Edward L. Rada, Ph.D.
Marian E. Swendseid, Ph.D.
Daniel M. Wilner, Ph.D.

Associate Professors

Deborah C. Glik, Sc.D.
Neal Halfon, M.D., M.P.H.
Donald E. Morisky, Sc.D., M.S.P.H., *Vice Chair*

Assistant Professors

Marjorie Kagawa-Singer, Ph.D.
Dawn M. Upchurch, Ph.D.
Steven P. Wallace, Ph.D.

Lecturers

Helene G. Brown, B.S.
Marianne Parker Brown, M.P.H.
Michael R. Cousineau, Dr.P.H.
Janis S. Fidler, Ph.D.
Paul M. Fleiss, M.D., M.P.H.
Patrice E.F. Jelliffe, R.N., M.P.H., *Researcher*
Celia Kaplan, Dr.P.H.
Joanne Leslie, Ph.D.
Ronald L. Linder, Ed.D.
Mario Panaqua, B.A.
Sora Park, M.P.H.
Ruth F. Richards, M.P.H., M.A., *Emerita*

Adjunct and Visiting Professors

Edith M. Carlisle, Ph.D., *Adjunct, Researcher*
Wen-Pin Chang, M.D., M.P.H., D.M.Sc., *Visiting*
James M. Iacono, Ph.D., *Adjunct*
Steve Rottman, M.D., *Adjunct*

Adjunct Associate Professors

Daniel H. Ershoff, Dr.P.H.
Susan B. Sorenson, Ph.D.

Adjunct Assistant Professors

Martin Anderson, M.D.
Barbara A. Berman, Ph.D.
Roger A. Clemens, Dr.P.H.
Stewart A. Laidlaw, Ph.D.
Kevin J. Malotte, Ph.D.
Antronette K. Yancey, M.D., M.P.H.

Assistant Field Program Supervisor

Marta G. Sorini, M.P.H.

Scope and Objectives

The Department of Community Health Sciences focuses on the health-related behaviors of individuals within the context of the social structure, community, health care systems, and family unit. Of particular interest is how health-related behaviors of individuals are influenced by and interact with conditions in the social, cultural, physical, and biological environment to influence health status, with particular emphasis on identifying, evaluating, and discouraging health-damaging behaviors and facilitating health-promoting behaviors. The curriculum seeks to integrate basic and applied public health theories and methods in applying them to real problems of human populations. Assessment, planning, and evaluation are common themes in the department's educational programs, which provide concentrations in the areas of health education/promotion, international family health, public health nutrition, public health policy, and sociocultural

aspects of health. Students specializing in maternal and child health work across several of these concentrations and may select courses from other departments as well.

The department offers both professional (M.P.H. and Dr.P.H.) and academic (M.S. and Ph.D.) degree programs. Graduates of the professional programs generally assume positions in the planning, administration, and evaluation of public health programs and policies, both in the U.S. and abroad, which have as their objective the maintenance and improvement of the health of individuals, families, communities, and populations. Graduates of the doctoral programs assume teaching and research positions in a wide variety of settings, including universities, government agencies, nongovernmental organizations, international health agencies, and research centers.

Graduate Study

The following constitutes introductory information regarding graduate degree programs. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degrees

Admission

See the Master of Public Health (M.P.H.) Admission section under Public Health School-wide Programs. Admission requirements for the Master of Science in Public Health are the same as for the M.P.H.

Master of Science in Preventive Medicine and Public Health

The program is not admitting new students at this time.

Areas of Study

Consult the graduate adviser.

Course Requirements

Students must complete at least one year of residence in graduate status at the University of California and a minimum of 10 full courses, at least five of which must be graduate courses in the 200 or 500 series. Only one 596 course (four units) and one 598 course (four units) may be applied toward the total course requirement; only four units of either course

may be applied toward the minimum graduate course requirement. Community Health Sciences 597 may not be applied toward the degree requirements. No more than 18 full courses are required for the degree.

Mandatory core courses include Biostatistics 100A, 100B, and Epidemiology 100. Each core course may be waived for students who have taken a similar course elsewhere and can pass the waiver examination.

Community Health Sciences 210, 211A-211B, 212, Biostatistics 406, and four to six depart-

ment courses (selected from an approved list) are required. Elective courses, selected in consultation with an adviser, must include the Community Health Sciences 270 series, 283 and research methods courses. Normal program length is six quarters.

Only courses in which a grade of C – or better is received may be applied toward the requirements for a master's degree. Students must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

Comprehensive Examination Plan

If the comprehensive examination/report option is approved, a guidance committee of three faculty members is appointed. A written comprehensive examination on the major area of study must be passed. Students who fail may be reexamined once.

The preparation of a major written research report is required, and it must be approved by the guidance committee which also must certify successful completion of all degree requirements.

Thesis Plan

If the thesis option is approved, a thesis committee is established. The committee approves the thesis prospectus before the student may file for advancement to candidacy. The thesis must be acceptable to the thesis committee.

Doctoral Degree

Admission

In addition to the University minimum requirements, the department requires (1) satisfactory performance on the Graduate Record Examination (GRE); (2) completion of the M.S. in Public Health or an appropriately related field (applicants who have a Master of Public Health need to satisfy the course requirements of the M.S. in Public Health before or after admission); (3) at least a 3.0 junior/senior undergraduate grade-point average, at least a 3.5 GPA in graduate studies or demonstrated superiority in graduate work, and at least a B in each of the mandatory core courses; (4) a positive recommendation by one or more faculty members of the Community Health Sciences Department; (5) approval by the doctoral admissions committee and the department chair. Screening examinations may be required by the department.

Students must satisfy the core requirements for the M.P.H. or M.S. in Public Health (depending on their background) at a level acceptable to the doctoral program. Coursework may be waived by examination if equivalent courses have been taken elsewhere.

Major Fields or Subdisciplines

Behavioral sciences and health education.

Course Requirements

The courses needed to pass the written examination in the major field depend on the field chosen.

The minor must be in a field cognate to the major field in public health. A strong minor is required, with at least four full graduate courses (16 units) or equivalent from a department that grants a Ph.D. Biostatistics is the only department considered cognate to a major in the School of Public Health.

Written and Oral Qualifying Examinations

Before advancement to candidacy, students must pass a written examination in the major field, complete the requirements in a minor field, and pass an oral qualifying examination on the major and minor fields. Normally no more than one reexamination is allowed.

A doctoral committee is nominated when the student is ready to take the University Oral Qualifying Examination. The doctoral committee consists of at least four faculty members who hold professorial appointments. Two of the faculty must be tenured. Two of the four must hold appointments in Public Health; one must be an outside member who holds no appointment in Public Health; one of the four must be from the minor field.

After passing the University Oral Qualifying Examination, the student may be advanced to candidacy and commence work on a dissertation in the student's principal field of study. The doctoral committee guides the student's progress toward completion of the dissertation.

Lower Division Courses

19. Peer Health Counselor Training. Limited to students in Peer Health Counselor Program. Analysis of student health care issues as related to campus health care delivery system and to health care consumer. Identification of health needs, determination of appropriate resources, delivery of preventive and self-care education, and delineation of peer health counselor's role.

88. Lower Division Seminar: Special Topics in Community Health Sciences. Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in community health sciences approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

Upper Division Courses

100. Behavioral Sciences and Health Education. Lecture, three hours; discussion, one hour. Development of broad appreciation of psychosocial factors as they affect health and their implications for public health. Review of theories, models, and modalities of health education for health promotion and disease prevention interventions.

130. Nutrition and Health (2 units). Prerequisites: one biology course, one chemistry course, consent of instructor. Not open for credit to nutrition majors. Basic and clinical nutrition theory and practice for students in health sciences curricula.

132. Health, Disease, and Health Services in Latin America. Prerequisite: consent of instructor. Introduction to health, disease, and health services in Latin America, with emphasis on epidemiology, health administration, medical anthropology, and nutrition.

187. Health Education for Teacher Credentials (2 units). Limited to students in teacher education credential program. Required for California State Instructional Credential. Teaching/learning process as applied to personal and community health. Topics include psychoactive drugs (alcohol, tobacco, and narcotics), human sexuality, nutrition, and community health resources.

189. Community Cancer Education. Lecture, three hours; project and fieldwork, one hour. Prerequisites: Biology 30 or equivalent, consent of instructor. Exploration of process of cancer education through community resources, culminating in student-generated community field-study proposal and presentation.

196A. Introduction to Health Promotion Fieldwork. (Formerly numbered 198A.) Lecture, two hours; discussion, one hour; laboratory, six hours. Limited to juniors/seniors. Training and experience in health promotion and health education in selected ethnic communities, including participation in supervised fieldwork at sites throughout Los Angeles.

196B. Advanced Health Promotion Fieldwork. (Formerly numbered 198B.) Lecture, two hours; discussion, one hour; laboratory, six hours. Prerequisite: course 196A or consent of instructor. Application of skills and experience gained in course 196A to development and provision of additional health education and health promotion in selected ethnic communities.

199. Special Studies (2 to 4 units). Prerequisites: senior standing, consent of instructor and department chair (based on written proposal outlining course of study). Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only four units may be taken each term.

Graduate Courses

200. Global Health Problems. Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Overview of health profile of the world in the 20th century. Global health problems and methods by which they have been dealt in context of the Alma Ata goal of "health for all by year 2000."

210. Community Health Sciences. (Not the same as course 210 prior to Fall Quarter 1994.) Lecture, three hours. Prerequisite: one social sciences course. Basic concepts, relationships, and policy issues in the field of community health, variability in definitions of health and illness, correlates of health and illness behavior, impact of social and community structure on health status, major contemporary approaches to health promotion and health education at community level. Use of comparative international perspective.

211A-211B. Program Planning, Research, and Evaluation in Community Health Sciences. (Formerly numbered 210, 211, 217.) Lecture, three hours; discussion, one hour; outside assignments, eight hours. Prerequisite: course 210. Course 211A is prerequisite to 211B. Development, planning, and administration of public health programs in community settings. Introduction to range of research methods and techniques used in designing and conducting health research, with particular emphasis on evaluation of community-based public health programs. Course organized into three modules.

212. Advanced Social Research Methods in Health. Lecture, four hours; laboratory, two hours; outside assignments, eight hours. Prerequisites: courses 211A-211B, Biostatistics 100B, 406, consent of instructor. Problems of health survey design and data collection; measurement issues in data analysis and interpretation; use of computer for analysis of large-scale survey data using various statistical techniques.

213. Research in Community and Patient Health Education. Lecture, three hours; discussion, two hours. Prerequisites: course 210, consent of instructor. Application of conceptual, theoretical, and evaluation skills to community-based health education risk-reduction programs. Computer applications, data management, and research methodologies taught through microcomputer and mainframe computer management and analysis of program databases.

214. Issues in Program Evaluation. Discussion, three hours; reading and research paper, one hour. Prerequisite: course 212 or consent of instructor. Advanced seminar which explores problems of planning and implementing evaluation research in context of local demonstration projects.

215. Advanced Topics in Health Survey Research Methods. Lecture, two hours; discussion, two hours. Prerequisite: course 212 or consent of instructor. Special topics in health survey research methods. Design of special purpose surveys; recent interviewing techniques; diaries and memory aids; measurement error, including response bias, social desirability, response validity; telephone interviewing; obtaining data on sensitive issues; ethics and confidentiality of survey research data.

M216. Qualitative Research Methodology. (Same as Anthropology M284.) Discussion, three hours; laboratory, one hour. Prerequisite: consent of instructor. Intensive seminar/field course in qualitative research methodology. Emphasis on using qualitative methods and techniques in research and evaluation related to health care.

218. Questionnaire Design and Administration. Lecture, two hours; discussion, one hour; laboratory, one hour; outside assignments. Prerequisites: courses 211A-211B, consent of instructor. Design, testing, field use, and administration of data collection instruments, with particular emphasis on questionnaires.

219. Logic of Multivariate Analysis. (Formerly numbered 298B.) Discussion, three hours; laboratory, one hour. Prerequisites: two quantitative data analysis courses, one multivariate analysis course, doctoral standing, consent of instructor. Translation of social theory into a data analytic plan, application of this analytic plan to real data, and interpretation of results obtained through multivariate analysis. S/U grading.

230. Family and Sexual Violence. Lecture, three hours; community, three to four hours. Prerequisite: consent of instructor. Examination of rape, incest, and spouse and elder abuse. Presentation of definitions, causes, outcomes of research on family and sexual violence, as well as response of social service, medical, and criminal justice systems.

231. Maternal and Child Nutrition. Prerequisite: consent of instructor. Nutrition of mothers, infants, and children in countries at various levels of socioeconomic development; measures for prevention and treatment of protein/calorie malnutrition; relationship between nutrition and mental development; impact of ecological, socioeconomic, and cultural factors on nutrition, nutrition education, and service.

233. Hunger and Food Insecurity as Public Health Issues. (Formerly numbered 298T.) Lecture, three hours. Prerequisite: course 231 or 443 or equivalent or consent of instructor. Public health aspects of hunger and food insecurity in historical and international perspectives, including measurement and identification of vulnerability, prevention, and options for relieving acute food shortage.

234. Obesity and Nutrition: Multidisciplinary Perspective (2 units). (Not the same as course 234 prior to Fall Quarter 1994.) Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisites: admission to UCLA postdoctoral fellowship training program in obesity and nutrition, or graduate standing in public health or biological sciences and consent of instructors. Multidisciplinary introduction at advanced graduate level to research methods and topics on obesity and related conditions in humans and in relevant animal and in vitro models. S/U or letter grading.

235. The Family and Mental Health. Lecture, two hours; discussion, two hours; assignments, eight hours. Prerequisite: consent of instructor. Emphasis on how social organization of the family, relationships among family members, and extrafamilial roles of family members contribute to or detract from psychological well-being of spouses, parents, and children.

M236. Human Resources and Economic Development. (Same as Education M252C.) Examination, in context of the developing countries, of interactions among economic development, population growth, levels of health and nutritional status, and educational investments.

237. Evolving Paradigms of Prevention: Interventions in Early Childhood. Seminar, three hours; fieldwork, one hour. Prerequisites: graduate standing, consent of instructor. Introduction to use of early childhood interventions as means of preventing adverse health and developmental outcomes. Concepts of developmental vulnerability, approaches to assessment, models of service delivery, evaluation and cost-benefit issues, funding, and other policy issues.

238. Evolving Paradigms of Prevention: Interventions in Adolescence. (Formerly numbered 298N.) Seminar, three hours. Prerequisites: graduate standing, consent of instructor. Introduction to organizing principles which underlie health assessment and intervention in adolescent populations (identity formation, access to care, knowledge/attitudes/behavior influences) and provide a basis for understanding pivotal issues in health enhancement, morbidity, and mortality.

239. Is There an (Ethnic) Identity Crisis in Our Health Care System? Lecture, three hours. Integration of cross-cultural findings in health care with current American (U.S.) health care system paradigms to facilitate designing culturally based public health programs and train culturally competent practitioners.

M240. Culture and Human Reproduction. (Same as Anthropology M262P.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Exploration of human behavior related to reproduction. Cross-cultural exploration of biological and behavioral factors, with particular reference to human adaptation.

242. Advanced Seminar: Population and Family Health (2 units). Prerequisites: doctoral standing, consent of instructor. Current research in population and family health. May be repeated for credit. S/U grading.

243A-243B-243C. Seminars: Preventive Medicine (2 units each). Prerequisite: consent of instructor. Three-term sequence devoted to analysis of current issues, practices, research literature, and policy and trends in preventive medicine. Discussion of administrative, epidemiologic, and clinical methods. S/U grading.

M244. Advanced Seminar: Medical Anthropology. (Same as Anthropology M263Q, Nursing M273, and Psychiatry M273.) Seminar, three hours. Prerequisite: consent of instructor. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works.

M245A-M245B-M245C. Child Abuse and Neglect (2 units, 2 units, 1 unit). (Same as Dentistry M300.5A-M300.5B-M300.5C, Education M217G-M217H-M217I, Law M281A-M281B, Medicine M290A-M290B, Nursing M290A-M290B-M290C, and Social Welfare M290E-M290F-M290G.) Course M245A is prerequisite to M245B, which is prerequisite to M245C. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies. S/U or letter grading.

246. Women's Roles and Family Health. Lecture, two hours; discussion, one hour. Prerequisite: consent of department. Rapidly changing roles of women throughout the world are having important effects on women's own health and that of their families. Analysis of multidisciplinary research from both developing and industrialized countries to provide basis for in-depth discussion of programmatic and policy implications.

M252. Health Policy Analysis. (Same as Health Services M233.) Lecture, three hours. Prerequisite: Health Services 100 or equivalent. Conceptual and procedural tools for analysis of health policy, emphasizing role of analysis during various phases of the life cycle of public policy.

M267. Structure and Function of Nutrients Implicated in Etiology of Chronic Disease. (Same as Epidemiology M276.) Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisite: one prior organic chemistry course. Basic nutrition course for public health and science majors.

271. Health-Related Behavior Change. Prerequisite: course 210 or consent of instructor. Unified behavioral science approach to natural determinants of change, as foundation for planned change in health-related behavior at community, group, and individual levels.

272. Social Epidemiology. Lecture, two hours; discussion, one hour. Prerequisite: Epidemiology 100 or consent of instructor. Relationship between sociological, cultural, and psychosocial factors in etiology, occurrence, and distribution of morbidity and mortality. Emphasis on lifestyles and other socioenvironmental factors associated with general susceptibility to disease and subsequent mortality.

273. Social Epidemiology of Chronic Disease. Lecture, two hours; discussion, one hour. Prerequisite: Epidemiology 100 or consent of instructor. Relationship between sociological, cultural, and psychosocial factors in etiology, occurrence, and distribution of chronic diseases. Topics include hypertension, coronary heart disease, and cancer. Emphasis on lifestyles and other socioenvironmental factors associated with chronic diseases.

M274. Health Professions. (Same as Sociology M249A.) Lecture, three hours. Prerequisite: course 210 or consent of instructor. Sociological examination of concepts "health" and "illness" and role of various health professionals, especially physicians. Attention to meaning of professionalization and professional/client relationships within a range of organizational settings.

M275. Health and Illness Behavior. (Same as Sociology M249B.) Prerequisites: course 210 and Epidemiology 100, or consent of instructor. Sociocultural factors affecting differential patterns of health behavior, illness behavior, and sick-role behavior.

276. Alcohol and Drug Abuse: Social Policy Perspectives (3 units). Prerequisite: consent of instructor. Alternative models of alcohol and other drug addictions examined and implications assessed for public policy regarding their control. Prevention efforts and findings from California and national surveys, with primary emphasis on alcohol use and abuse.

277. Advanced Community Health Education. Lecture, two hours; discussion, two hours. Prerequisite: course 210. Before planning the educational components of a health program, one must assess behaviors and factors influencing the health problem. Conceptual, theoretical, and evaluative skills developed and applied in constructing a community-based educational program.

278. Social and Behavioral Perspectives on Work and Health. Prerequisites: course 470 and Environmental Health Sciences 250, or consent of instructor. Discussion of current social and behavioral research, issues, and perspectives on work and health.

279. Advanced Community Organization Seminar. Seminar, three hours. Prerequisite: course 487 or consent of instructor. Advanced seminar on theoretical and practical problems in community organization, with readings and term projects focusing on participation, leadership, outreach, coalitions, and related issues of community organization and social change applied to health problems.

280. International Health Education: Training and Development. Prerequisites: course 210 and one upper division research methods or epidemiology course, or consent of instructor. Introduction to an international perspective of health education and health promotion. Survey of current developments in health education in both developed and developing countries.

281. Alcoholism and Drug Abuse among Women. Prerequisite: consent of instructor. Discussion of psychosocial aspects of abuse of alcohol and other drugs among women. Topics include etiology, prevention, treatment, hormonal influences, and role of the family. Emphasis on current theoretical perspectives and research findings.

282. Communication in Health Promotion and Education. Lecture, two hours; discussion, two hours. Prerequisites: course 210, consent of instructor. Design, implementation, and evaluation of interpersonal communication strategies for health promotion programs. Equal emphasis on communication theories, models, and empirical research literature and on specific applications in health programs and case studies.

283. Aging and Health Behavior. Discussion, three hours. Prerequisite: course 210 or consent of instructor. Graduate seminar intended to explore sociocultural determinants of health-related behaviors among the aged.

284. Ecology of Mental Health. Lecture, three hours. Prerequisites: course 210, Epidemiology 100, and Biostatistics 100A, or consent of instructor. Analysis of occurrence and distribution of mental disorders in the community and relationships to social structure. Problems of classification, definition, measurement in sociopsychiatric epidemiology, sociocultural and social-psychological factors in mental disorders.

285. Aging, Health, and Society. Lecture, three hours; discussion, one hour. General introduction to major social issues affecting health of the elderly in America. Leading gerontological theories and major issues that affect the aged, showing how those theories and issues influence health status, health promotion, and illness among the elderly.

286. Seminar: Behavioral Sciences and Health (2 to 4 units). Lecture, two hours. Prerequisite: consent of instructor. Recent significant contributions of behavioral sciences to understanding health and illness, with selected and varying topics each term. May be repeated for credit. S/U grading.

M287. Politics of Health Policy. (Same as Health Services M287.) Lecture, three hours; discussion, one hour. Prerequisites: course 210 or Health Services 200A-200B. Examination of politics of health policy process, including effects of political structure and institutions; economic and social factors; interest groups, classes, and social movements; media and public opinion; and other factors.

288A-288B. Current Problems in Health Education. (Formerly numbered 288.) Lecture, one hour; discussion, three hours. Prerequisites: course 210 and three other public health and/or social sciences courses, or consent of instructor. Current problems and findings in health education content areas, such as nutrition, mental health, family health, consumer health, safety, and communicable and chronic diseases. In Progress and S/U grading.

290. Race, Class, Culture, and Aging. (Formerly numbered 298.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Experience of aging for African American, Latino, and Asian elderly examined in context of their families, communities, and the nation. Exploration of cultural and structural influences on health and lived experiences of those elders.

291. Health Policy and the Aged. Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Examination of political, economic, and social forces that shape health policy for the aged, identifying failings in those policies within framework of broader health policy problems.

292. Communication and Media Development in Health Promotion/Education. Lecture, three hours; field practice, one hour. Prerequisites: course 210 or prior social sciences courses or consent of instructor. Selected aspects of communications planning, social marketing, mass media, and communications evaluation theory and practice. *

293. Social and Behavioral Research in AIDS: Roundtable Discussion (2 units). (Formerly numbered 298.) Review and discussion of research programs directed toward identification of psychosocial, biobehavioral, environmental, and community factors related to prevention and control of AIDS/HIV.

294. Social and Behavioral Factors of AIDS/HIV: A Global Perspective. (Formerly numbered 298.) Prerequisites: course 100 and Epidemiology 100 or prior social sciences courses, or consent of instructor. Overview of social and behavioral factors which influence both the transmission as well as prevention of HIV/AIDS throughout the world.

296A-296L. Advanced Research Topics in Behavioral Sciences and Health Education (2 to 4 units each). Prerequisite: consent of instructor. Advanced study and analysis of current topics in behavioral sciences and health education. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading:

296A. AIDS Prevention.

296M-296Z. Advanced Research Topics in Population and Family Health (2 to 4 units each). Prerequisite: consent of instructor. Advanced study and analysis of current topics in population and family health. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading:

296M. Advanced Research Methods.

400. Field Studies in Public Health (2 or 4 units). Prerequisite: consent of instructor. Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; four units may be applied toward 44-unit minimum total required for M.P.H. degree.

411. Issues in Cancer Prevention and Control. Open to juniors, seniors, and graduate students with consent of instructor. Introduction to causes and characteristics of the cancer epidemic, cancer control goals for the nation, and interventions designed to encourage smoking cessation/prevention, cancer screening, and other dietary, psychosocial, and lifestyle changes.

M417. Injury Prevention Strategies and Countermeasures (2 units). (Same as Epidemiology M417.) Prerequisites: Epidemiology 100 or equivalent, consent of instructor. Lectures with discussion on injury prevention strategies and countermeasures, including critical review of effectiveness in the public health context. Emphasis on major public health injury problems from assaultive, self-inflicted, or unintentional causes. S/U or letter grading.

430A. International Health Agencies and Programs. Prerequisite: consent of instructor. Historical development and functions of international health organizations. Key problems and trends in international health. Bilateral programs, medical/religious missions, private foundations, and others disseminating information, money, and services.

430B. Advanced Issues in International Health. Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. In-depth focus on major health care issues confronting recipient less-developed countries and donors of technical and financial assistance.

431. Research in Women's Health: Theories and Methods. Prerequisite: consent of instructor. Interdisciplinary perspective critically examining research on women's health. Overview of scientific inquiry and methods; gender roles; status attainment and medical sociology. Review of current data on women's health.

M432. Perinatal Health Care: Principles, Programs, and Policies. (Formerly numbered 432.) (Same as Obstetrics and Gynecology M432.) Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Comprehensive examination of perinatal health care, including perinatal epidemiology, outcome measures, public programs, controversies surrounding new technology, regionalization, organization of services at federal, state, and county levels, and medical/legal issues.

433. Reproductive Health: Demographic Applications. Introductory aspects of population dynamics; reproductive biology (male and female); contraceptive methods; fertility-related behaviors and STDs; methods to measure contraceptive (life tables) and program (evaluation) effectiveness.

434A. Maternal and Child Health in Developing Areas. Prerequisite: course 231 or consent of instructor. Major health problems of mothers and children in developing areas, stressing causation, management, and prevention. Particular reference to adapting programs to limited resources in cross-cultural milieu.

434B. Recent Developments in Maternal and Child Health in Disadvantaged Countries (2 units). Prerequisite: course 231 or consent of instructor. Analytic in-depth consideration of recent advances in the field of international maternal and child health, with special reference to developing countries.

435. Seminar: Advanced Issues in Women's Health (2 units). (Formerly numbered 298S.) Prerequisites: course 246 or 431, consent of instructor. Provides a more advanced and in-depth understanding of ways in which scientists "know" and considerations of women's place in scientific discourse. Examination of a series of case studies as a starting point for discussion.

436A-436B. Child Health, Programs, and Policies. (Formerly numbered 436.) Prerequisite: Health Services 100. Course 436A is prerequisite to 436B. Examination of history of child health policy trends and determinants of health, structure, and function of health service system; needs, programs, and policies affecting especially at-risk populations.

437. Preventive Medicine and the Family. Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Comprehensive review and evaluation of scientific background and application of principles of preventive medicine, with primary focus on the family and the disadvantaged.

438. Research Seminar: Community Child Health Services (2 units). Discussion, one hour; laboratory, one hour; field trips, two hours. Prerequisite: consent of instructor. Examination and development of evaluation strategies for existing community child health services at the local level and development of evaluation strategies for selected topics in programmatic areas. Emphasis on collaborative research and consultation skills, with participation of local health department personnel.

439. Health Services in Child Day Care. Lecture, two hours; discussion, two hours; one field trip, three hours. Prerequisite: consent of instructor. Assessment of needs, planning, and development of health and nutrition services for young children in day care and related child development programs.

440. Child Health Policy. Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Analysis of development and characteristics of child health programs and policies; issues related to health services for children examined according to chronological development of child; relationship of health programs to programs of nutrition, day care, education, and welfare; strategies for achieving change and politics of developing a child health policy.

441. Advanced Program Planning and Evaluation in International Health. Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Theory, guidelines, and team exercise for planning community health/family planning projects in the U.S. and in developing countries. Phases include community needs identification; goal setting; budget and work plan development; funding; staffing; evaluation design; data and cost analysis; and project presentation.

443. Assessment of Family Nutrition. Prerequisite: course 231 or consent of instructor. Assessment of nutritional status of families in developing countries, with special reference to limited resources, terrain, and cross-cultural considerations, stressing anthropometric methods and techniques.

444. Anthropometric and Dietary Aspects of Nutritional Assessment. Lecture, two hours; laboratory, two hours. Prerequisite: course 443 or consent of instructor(s). Practical skills in anthropometric and dietary assessment, including selection of appropriate methods, data gathering and handling, and analysis and presentation.

445. Food and Nutrition Planning: Policies and Programs in World Context. Lecture, two hours; discussion, two hours. Prerequisite: course 434A or consent of instructor. Discussion of policies regarding improvement of food supplies and their global impact on health of disadvantaged families, including review of effect of many factors, with emphasis on need for multidisciplinary action, food and nutrition planning, and external assistance.

446. Nutrition Education and Training: Third World Considerations. Lecture, two hours; discussion, one hour; student participation, one hour. Prerequisite: course 434A or consent of instructor. Problems and priorities in nutrition education and training for families and health workers in Third World countries, including new concepts in primary health care services, mass media, communications, and governmental and international interventions.

447. Health Issues in the Middle East. Prerequisite: course 200 or 231 or 434A or consent of instructor. Recommended: background in Islamic or Middle Eastern studies. Current health issues and problems of countries in the Middle East and implications for socioeconomic development. Review of economic, demographic, and cultural variation of the region to provide background for discussion of trends and patterns of health and nutritional status of population in the area.

448. Nutrition Policies and Programs: Domestic and International Perspectives. Lecture, two hours; discussion, two hours; field visits. Prerequisites: one nutrition sciences course and/or nutrition program experience. Nutrition programs and policies in the U.S. and developing countries compared and contrasted. Analysis of role of major international, governmental, and nongovernmental agencies. Emphasis on meeting needs of vulnerable populations.

470. Introduction to Occupational Health Education. Lecture, one hour; discussion; two hours; outside assignment, one hour. Prerequisites: course 210, two sociology or anthropology courses or equivalent, consent of instructor. Health education theory and practice as applied to occupational health and safety. Emphasis on design and evaluation of education programs dealing with health and safety issues for workplace settings.

474. Self-Care and Self-Help in Community Health. Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Review of background, principles, concepts, programs, and research concerning the emerging field of self-care in health.

480. Health Education in Clinical Settings. Lecture, two hours; discussion, two hours. Prerequisites: courses 271, 282, Health Services 100, consent of instructor. Analysis of role, methods, and techniques of health education pertaining to hospitals, clinics, and patient education. Observation and discussion of clinical activities in the medical center in relation to the process of health education.

482. Practicum: Community Health Sciences. Discussion, two hours; fieldwork, up to 20 hours. Prerequisites: courses 210, 211A-211B, consent of instructor. Understanding of professional practice in health-related organizations.

483. Social Interventions for Health Promotion and Evaluation. Lecture, two hours; discussion, one hour; seminar, one hour. Prerequisites: courses 210, 271, or equivalent, one social sciences or research methods course, consent of instructor. Selected social intervention strategies for health promotion and health education programs. Emphasis on theories, working assumptions, methodologies, and impacts of selected strategies within contexts of planned change in health-related behaviors.

487. Community Organization for Health. Lecture, three hours; fieldwork, four to six hours. Prerequisites: course 210, three public health, sociology, or anthropology courses or equivalent. Theory and practice of community organizations, including models and strategies of community organization and their application to health problems and health policy. Particular attention to use of community organization for health promotion and to change public policy.

490. Professional Writing for Public Health (2 units). Prerequisite: consent of instructor. Practice in writing reports, grant proposals, abstracts, and article-length research papers. Analyzing rhetorical and stylistic features of essays in various professional journals to help participants improve both their prose style and their editorial abilities. S/U or letter grading.

495. Teacher Preparation in Public Health (2 units). Prerequisites: 18 units of cognate courses in area of specialization, consent of department chair. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

502. UCLA/Hawaii Western Consortium Exchange (4 to 16 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken at University of Hawaii, Manoa, as part of UCLA/UH Western Consortium Exchange Program. Only the equivalent of eight quarter units taken at UH may be applied toward degree. Extra units may be applied toward department requirements by petition to Public Health Student Affairs Office. UH letter-graded courses appear on UCLA transcript with letter grades, while UH Cr/Ncr-graded courses appear as S/U grades. Grade points from these courses are not counted in UCLA grade-point average.

596. Directed Individual Study or Research (2 to 8 units). Prerequisites: graduate standing, consent of instructor. Individual guided studies under direct faculty supervision. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit.

597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations (2 to 8 units). Prerequisites: graduate standing, consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

598. Master's Thesis Research (2 to 8 units). Prerequisite: consent of instructor. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

599. Doctoral Dissertation Research (2 to 8 units). Prerequisite: consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

COMPARATIVE LITERATURE

Interdepartmental Program
College of Letters and Science

UCLA

Core Committee

Professors

Emily Apter, Ph.D. (*French, Comparative Literature*)
Kathleen L. Komar, Ph.D. (*German, Comparative Literature*)
Ross P. Shideler, Ph.D. (*Scandinavian, Comparative Literature*), Chair
Samuel Weber, Ph.D. (*English, Comparative Literature*)
Arnold J. Band, Ph.D., Emeritus (*Hebrew, Comparative Literature*)
Pier-Maria Pasinetti, Ph.D., Emeritus (*Italian, Comparative Literature*)

Associate Professors

Katherine C. King, Ph.D. (*Classics, Comparative Literature*)
Lucia Re, Ph.D. (*Italian, Comparative Literature*)
C.P. Haun Saussy, Ph.D. (*Chinese, Comparative Literature*)

Assistant Professors

Ali Behdad, Ph.D. (*English, Comparative Literature*)
Shu-mei Shih, Ph.D. (*Chinese, Comparative Literature*)

Affiliated Faculty

Professors

Michael J.B. Allen, Ph.D., D.Litt. (*English*)
Calvin B. Bedient, Ph.D. (*English*)
A.F. Braunmuller, Ph.D. (*English*)
Frederick L. Burwick, Ph.D. (*English*)
James E. Goodwin, Ph.D. (*English*)
Peter Haidu, Ph.D. (*French*)
Michael Heim, Ph.D. (*Czech and Russian Literature*)
Carroll B. Johnson, Ph.D. (*Spanish*)
Henry A. Kelly, Ph.D. (*English*)
Peter H. Lee, Ph.D. (*Korean*)
Maximilian E. Novak, D.Phil., Ph.D. (*English*)
Stephen Yenser, Ph.D. (*English*)
Richard D. Lehan, Ph.D., Emeritus (*English*)

Associate Professors

Jean-Claude Carron, Docteur ès Lettres (*French*)
King-Kok Cheung, Ph.D. (*English*)
Donald J. Cosentino, Ph.D. (*English*)
Albert D. Hutter, Ph.D. (*English*)
Shuhsi Kao, Ph.D. (*French*)
Robert M. Maniquis, Ph.D. (*English*)
José Monleón, Ph.D. (*Spanish*)
Vincent P. Pecora, Ph.D. (*English*)

Assistant Professors

Kenneth Reinhard, Ph.D. (*English*)
Jenny Sharpe, Ph.D. (*English*)

Scope and Objectives

Standing at the forefront of innovative literary analysis and criticism, comparative literature is one of the most exciting fields in the humanities. As a discipline it requires exceptional linguistic ability and high intellectual caliber. UCLA's graduate interdepartmental program offers students the opportunity to work with faculty in any of the University's language and literature departments as well as with the Comparative Literature Program faculty.

Comparative literature at UCLA focuses on those elements which define literature in general, such as genre, period, theme, language, and theory. Courses are designed to provide students with a historical understanding of the concepts of genre and period by studying specific genres and periods or literary movements. Paradigmatic or thematic courses offer another way of examining literature synchronically or diachronically regardless of language boundaries.

Courses in literary criticism and theory inquire into the premises of specific critical approaches, and of criticism itself, in order to provide further insight into the intellectual and moral concerns of literature and the world it reflects. Thus, through the study of these various assumptions and aspects of literature and criticism, students learn not only to cross linguistic boundaries, but to join them — to compare and to contrast, to analyze and, finally, to synthesize the text and the subtext, the structure and the history which define, undermine, and transcend the text and its reader.

Graduate Study

The following constitutes introductory information regarding graduate degree programs. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degree

Admission

A bachelor's degree in literature, ancient or modern, is a prerequisite for admission to the Master of Arts program in Comparative Literature. Applicants whose B.A. program lacks a literature major are required to demonstrate the equivalent knowledge and comprehension of one literature before being considered a graduate student in good standing. Applicants are expected to have at least a 3.4 grade-point average in upper division literature courses, take the Graduate Record Examination (GRE), and submit three letters of recommendation. Literary proficiency in one foreign language and at least an elementary knowledge of a second one are expected.

Areas of Study

Each student's study plan should combine the work in the major and minor literatures by fo-

cus on a limited area in which these literatures may be explored. The area may be a literary period such as Romanticism, a genre such as the novel, or a theoretical problem.

The major literature is the area of primary concentration. The student specializes in one historically defined period (such as medieval, Renaissance and baroque, neoclassicism and 18th century, Romanticism to modern), but a general knowledge of the major literature is a prerequisite for the specialization.

In the minor literature, the student focuses on a period comparable to the area of specialization in the major literature, although the student may not have as much historical depth and breadth as in the major literature.

Course Requirements

The following 12 courses are the minimal course requirements. Some students take extra courses to make up deficiencies.

(1) Four courses in comparative literature: Comparative Literature 200; one course from Comparative Literature 290, 291, 292, or 293; two courses that deal with primary texts in a comparative context (courses on genre, period, or a special topic that examines primary texts).

(2) Five courses (a minimum of three must be graduate courses; the other two may be upper division) in the major literature.

(3) Three courses, at least one of which must be graduate, in the minor literature. Periods, genres, or problems in the minor literature which lend themselves to comparison with similar elements in the major literature should be studied.

Of the above required courses, eight units at most may be in the 500 series. Course 596 or 597 may be applied toward the minimum course requirement, but only one of the courses may be applied toward the graduate course requirement.

Comprehensive Examination Plan

The examination for the M.A. is both written and oral, testing both historical knowledge and comprehension of methodology. There are three possible results of the examination: the student receives an M.A. degree and is allowed to progress toward the Ph.D., the student is granted a terminal M.A., or the student fails the examination altogether. The program allows a maximum of two attempts to pass the M.A. examinations.

The written examinations test skill in literary analysis and detailed knowledge of specified works in the major and minor literatures. The examinations are based on reading lists from the works of at least 15 authors in the major literature and the works of at least 10 authors in the minor literature. Normally, the reading list consists of approximately 24 to 30 works in the major literature and 12 to 15 works in the minor literature. For more details on the reading

list, contact the program office at the address given at the beginning of this listing.

Thesis Plan

None.

Doctoral Degree

Admission

For entrance into the Ph.D. program, an M.A. degree in Comparative Literature is normally required. Applicants who have an M.A. degree in one national literature, extensive knowledge of a second, and the ability to read literary texts in a third language may be considered for admission. Three letters of recommendation should be submitted. Those entering with any degree other than an M.A. in Comparative Literature from UCLA are required to pass a Permission to Proceed Examination before being allowed to continue toward the Ph.D. It should be taken within the first year of residence.

Major Fields or Subdisciplines

The study plan for the Ph.D. should combine the work in one major and two minor literatures by focusing on a limited area in which these literatures may be explored. This area may be a literary period or a particular aspect common to several literatures (e.g., a genre like tragedy or the novel, or a phenomenon like neoclassicism or the baroque). It may also be a critical or theoretical problem, involving analyses of styles or modes of interpretation; comparisons of classical and modern genres and themes; questions about the artistic process in different art forms; or problems in literary aesthetics or epistemology. A related field such as art history or film may be substituted for one minor literature after program approval of a student's petition.

Course Requirements

All students entering with an M.A. must take a minimum of six graduate courses, and often up to 12 courses. If the M.A. is not in Comparative Literature at UCLA, the student must take three of the required six courses in comparative literature and one from each of the major and minor literatures. Other relevant or necessary courses are determined in consultation with a graduate adviser. None of the minimum required courses may be in the 500 series. Although only six courses are required, students are strongly advised to take at least two and usually three courses in each chosen literature.

For those who have taken the M.A. in Comparative Literature at UCLA, the following courses are required: two courses in comparative literature, one of which should be theoretically oriented; two to three courses in the second minor; two courses in the major, preferably in the period of emphasis, plus whatever additional courses might be required by the comparative literature committee and/or graduate advisers. None of the minimum required courses may be in the 500 series.

Written and Oral Qualifying Examinations

The examinations are both written and oral and may be taken over a period of two to three quarters. The written examinations are based on reading lists for the major and two minor literatures.

Ph.D. qualifying examinations should be taken at the end of the second year after the M.A. However, they must be taken by the end of the third year after the M.A. (ninth quarter). These examinations are composed of written and oral sections.

There is one three-hour historical examination in the major area. The reading list for this examination consists of 40 items chosen in consultation with the examining professor and with the approval of a core member of the comparative literature committee. No more than 20 of these items may be in the approximately 100-year period of emphasis.

For the minor fields, there are two options:

(1) The student takes one three-hour written examination in each minor field, based on approved reading lists of 25 to 30 items or

(2) The student takes one three-hour written examination in the minor field not included in the M.A. examinations and, with the approval of the program chair and the agreement of the examining professor, in lieu of the written examinations in the minor literature originally presented for the M.A., may arrange with the examining professor to write a paper of 20 to 30 pages on a topic or topics to be chosen in consultation with the examining professor. The paper would also be based on approved reading lists.

The student submits a detailed dissertation prospectus (usually of approximately 20 pages) for the University Oral Qualifying Examination.

The two- to three-hour oral qualifying examination raises questions pertaining to all written examinations as well as any questions concerning the dissertation prospectus. All three of the candidate's fields should be included in the discussion.

The University Oral Qualifying Examination must be taken within 60 days after the last written examination is passed. The program allows a maximum of two attempts to pass the Ph.D. examinations.

Graduate Courses

200. Methodology of Comparative Literature (6 units). Seminar, four hours. Prerequisite: consent of instructor. Study of methodology of comparative literature and theory of literature.

202. Classical Tradition: Epic. (Formerly numbered C207.) Seminar, three hours. Prerequisite: reading knowledge of Greek, Latin, or Italian. Analysis of *Iliad*, *Odyssey*, *Aeneid*, *Gerusalemme Liberata*, and *Paradise Lost* both in relation to their contemporary societies and to literary traditions. Emphasis on how poets build on work of their predecessors. S/U or letter grading.

203. Classical Tradition: Tragedy. (Formerly numbered C211.) Seminar, three hours. Prerequisite: knowledge of one appropriate foreign language, usually Greek or French. Analysis of selected Greek dramas and their re-creations in Rome, in the Renaissance, and in the modern period. S/U or letter grading.

C204. Satire. (Formerly numbered C212.) Lecture, three hours. Examination of satire both in texts generally recognized as models of the genre as well as in others, including examples of satirical discourse. Special attention to two important literary problems: role played by authors and narrators in relation to treatment of characters before possible audiences and importance of contextual values in interpretation of satire. Concurrently scheduled with Humanities C104. Graduate students required to prepare papers based on texts read in original languages whenever possible and may meet as a group one additional hour each week. S/U or letter grading.

C205. Comic Vision. Lecture, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Literary masterpieces, both dramatic and nondramatic, selected to demonstrate varieties of comic expression. May be concurrently scheduled with Humanities C105. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week. S/U or letter grading.

206. Archetypal Heroes in Literature. (Formerly numbered C229.) Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Survey and analysis of function and appearance of such archetypal heroes as Achilles, Ulysses, Prometheus, Oedipus, and Orpheus in literature from antiquity to the modern period. S/U or letter grading.

207. Allegory and Some Allegories. (Formerly numbered 210.) Seminar, three hours. Prerequisites: graduate standing, reading knowledge of French, German, Italian, Latin, Greek, or Chinese. Historical perspective on topic of allegory, with readings from texts traditionally held to be examples of the genre. Defining allegory is simple; saying which works count as examples of allegory, and why, is much harder. Authors include Prudentius, Augustine, Dante, Spenser, Donne, Tung Yueh, Hegel, Baudelaire, and Mallarmé. S/U or letter grading.

C222. Renaissance Drama. (Formerly numbered C245.) Lecture, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Broad introduction to subject matter and types of plays in the Renaissance, with consideration of historical and literary influences on the plays. Readings include works of such dramatists as Tasso, Machiavelli, Lope de Vega, Racine, Jonson, Shakespeare. May be concurrently scheduled with Humanities C122. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week. S/U or letter grading.

C240. Dramatic Theory and Criticism in German and English Romanticism. (Formerly numbered C271.) Seminar, three hours. Prerequisite: reading knowledge of German. Generic conception of drama in critical essays of the Schlegels, Tieck, Jean Paul, Coleridge, De Quincey, and Hazlitt, with emphasis on role of the actor and the idea of dramatic action as discussed by the critics. May be concurrently scheduled with Humanities C140. S/U or letter grading.

C250. The 19th-Century Novel. (Formerly numbered C275.) Seminar, three hours. Prerequisite: reading knowledge of French or German. Comparative study of the 19th-century novel in England and on the continent. Novels selected so as to allow seminar to concentrate on a particular tradition or critical problem. May be concurrently scheduled with Humanities C150. S/U or letter grading.

C251. Crisis of Authority. (Formerly numbered C278.) Seminar, three hours. Prerequisites: graduate standing or consent of instructor, reading knowledge of one appropriate foreign language. Darwin's *Origin of Species* undermines the notion of a traditional fatherly God and reflects a major transition between the 19th and 20th centuries. Threat to, or collapse of, a divinely author(iz)ed and male-dominated society appears in writers such as G. Eliot, Zola, Ibsen, Strindberg, Conrad, Hardy, Woolf, and Camus. May be concurrently scheduled with Humanities C151. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week. S/U or letter grading.

C252. Symbolist Tradition in Poetry. (Formerly numbered C280.) Seminar, three hours. Prerequisite: reading knowledge of either French or German. Study of symbolist tradition in 19th- and 20th-century English, French, and German poetry. May be concurrently scheduled with Humanities C152. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week. S/U or letter grading.

C253. Poetry and Poetics of Post-Symbolist Period. Lecture, three hours. Prerequisite: consent of instructor. Study of poetic trends, such as surrealism or imagism, and poets in first half of the 20th century. Texts may include poets such as W.B. Yeats, E. Pound, T.S. Eliot, Marianne Moore, Paul Valéry, Stefan George, R.M. Rilke, Gunnar Ekelof, or Wallace Stevens. May be concurrently scheduled with Humanities C153. S/U or letter grading.

C260. Literature and the Visual Arts, 1700 to the Present. Lecture, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Knowledge of art history valuable but not required. Assuming that literature and the visual arts are in some degree expressions of cultural and philosophical patterns of eras, course studies relationships between primarily English writers from 1700 to the present and movements in painting, architecture, and sculpture. Interdisciplinary investigation of similarities and differences between the plastic and verbal arts in comparative study. May be concurrently scheduled with Humanities C160. Graduate students required to read works in original languages.

C261. Fiction and History. (Formerly numbered C276.) Seminar, three hours. Analysis of use of historical events, situations, and characters in literary works of the Renaissance and/or modern period. Texts and individual assignments range from Renaissance historical narratives (Italian humanists, Machiavelli) to 19th- and 20th-century novels by authors such as Stendhal, Verga, Tomasi di Lampedusa, Carpentier, and Kundera. Use of fictional methods by historians. Emphasis on how aesthetic, ideological, and political factors influence authors' choice and use of historical material. May be concurrently scheduled with Humanities C161. Graduate students required to prepare papers based on texts read in original languages. S/U or letter grading.

262. The Psychological Novel. (Formerly numbered 292.) Seminar, three hours. Prerequisites: major in literature, reading knowledge of French. Comparative study of French and English novels which both precede and follow development of psychoanalysis. Selected readings of Freud, in addition to the required fiction. S/U or letter grading.

C263. Crisis of Consciousness in Modern Literature. (Formerly numbered C209.) Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Study of modern European and American works which are concerned both in subject matter and artistic methods with the growing self-consciousness of human beings and their society, focusing on works of Kafka, Rilke, Woolf, Sartre, and Stevens. May be concurrently scheduled with Humanities C163. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week. S/U or letter grading.

C264. The Modern Continental Novel. (Formerly numbered C285.) Seminar, three hours. Prerequisite: reading knowledge of at least one appropriate foreign language. Study of the modern novel's development from naturalism toward a mythic or symbolic level. Use of authors such as Gide, Proust, Mann, Joyce, Nabokov, and Grass to focus on development of themes such as primitivism vs. authority, change vs. stability, and the self-conscious narrative. Concurrently scheduled with Humanities C164. Graduate students required to prepare papers based on texts read in original languages and to meet as a group one additional hour each week. S/U or letter grading.

265. Intertextuality in Literature and Film. Discussion, three hours. Study of relationships between literature and film from perspective of intertextuality grounded in theorists Mikhail Bakhtin and Jacques Derrida and elaborated by critics Barthes, Chatman, and Kristeva. Focus on processes of inscription, reiteration, transformation, filiation, and dissemination during consideration of representative types of intertextuality. S/U or letter grading.

C267. Theory and Texts of the Fantastic. (Formerly numbered C273.) Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Attempt to define the fantastic as a theoretical genre separate from the wider genre of fantasy. Critical texts by Todorov and Brooke-Rose. Primary texts by Hoffmann, Nerval, James, Poe, Borges, Casares, Cortazar, Landolfi, and Calvino. May be concurrently scheduled with Humanities C167. Graduate students required to prepare papers based on texts read in original languages and may meet as a group one additional hour each week. S/U or letter grading.

C270. Alternate Traditions: In Search of Female Voices in Contemporary Literature. (Formerly numbered C284.) Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Investigation of narrative texts by contemporary French, German, English, American, Spanish-American, African, and Asian women writers from a cross-cultural perspective. Common themes, problems, and techniques. May be concurrently scheduled with Humanities C170. Graduate students required to prepare papers based on texts read in original languages whenever possible. S/U or letter grading.

271. Imaginary Women. (Formerly numbered 227.) Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Examination of archetypal female figures in classical/traditional literatures and their reincarnations in modern African American, Anglo-American, Asian American, European, Native American, and Spanish-American literatures. Particular emphasis on position of women in the cultures and ideology of the authors. S/U or letter grading.

C272. The Postmodern Novel. (Formerly numbered C286.) Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Study of the postmodern novel as it developed out of modernism. Postmodernism defined in three different ways — philosophically, scientifically, and economically. Emphasis on relationship of recent novels to theories of structuralism and poststructuralism. Readings include authors such as Borges, Beckett, Nabokov, Pynchon, Fuentes, Grass, Böll, and Calvino. Concurrently scheduled with Humanities C172. Graduate students required to meet as a group one additional hour each week. S/U or letter grading.

C273. Postmodernism and the Third World. (Formerly numbered C290.) Seminar, three hours. Prerequisite: reading knowledge of one appropriate foreign language. Exploration of intersection between concepts of postmodernism and Third World culture and politics, including topics such as post-Marxism and revolution; historical thought; gender, ethnicity, imperialism, and their relationship to cultural politics; and recent Latin American literary production. Concurrently scheduled with Humanities C173. S/U or letter grading.

M274. Issues in Third World Literatures and Cultures. (Same as Asian American Studies M261.) Seminar, three hours; outside study, nine hours. Prerequisite: consent of instructor. Investigation of politics of power, gender, and race in the complex relationships between the so-called First World and Third World, using both theoretical and textual approaches. S/U or letter grading.

275. Nationalism and Immigration Today. Seminar, three hours; outside study, nine hours. Prerequisites: graduate standing or consent of instructor, knowledge of one appropriate foreign language. Literary and social discourses on issues of nationalism, immigration, and the politics of identity in our postcolonial era, with consideration of broad range of texts (aesthetic representations, theoretical reflections, and legal documents). S/U or letter grading.

285. Translation Workshop. (Formerly numbered 230.) Seminar, three hours. Prerequisites: solid reading knowledge of at least one foreign language, consent of instructor. Open to qualified undergraduates with proper language preparation. Theory and practice of literary translation. Analyses of significant theoretical contributions to the field. Weekly exercises in translation technique with genres, periods, and authors at discretion of participants. S/U or letter grading.

290. Contemporary Theories of Criticism. (Formerly numbered 201.) Seminar, three hours. Prerequisite: course 200 or equivalent. Advanced course in theory of literature focusing on structuralist, psychoanalytic, and Marxist approaches. S/U or letter grading.

291. Problems in Theory of Literature. (Formerly numbered 202.) Seminar, three hours. Prerequisites: course 290 or equivalent, reading knowledge of French or German. Study of specific topics in theory of literature for advanced students in criticism and literary theory. May be repeated for credit. S/U or letter grading.

292. Problems of the Sign in Literature. (Formerly numbered 203.) Seminar, three hours. Inquiry into theoretical bases and implications of the sign as metaphysical, logical, and grammatical categories. Many texts central to Western thinking dwell on the sign as a concept-tool in order to focus on the relationship between words and things, language and reality, the linguistic medium in its meaning-producing functions. Excerpts from Plato, Aristotle, Augustine, Locke, Vico, and Hegel lead to a discussion of "sciences" envisioned by Saussure (semiology) and Peirce (semiotics) and propounded by contemporary theorists such as Barthes, Hjeltmlev, and Greimas. S/U or letter grading.

293. Psychoanalytic Approaches to Literature. (Formerly numbered 204.) Seminar, three hours. Prerequisite: course 200 or equivalent criticism course in English. Study of development of modern psychoanalytic approaches to literature, with particular stress on affective theories of criticism. Readings include Freud and early psychoanalytic critics, contemporary psychoanalytic critics of literature, and modern British and American psychoanalytic theorists (Winnicott, Schafer) whose work is applicable to literary theory. S/U or letter grading.

C295. Heidegger, Language, and Literature. (Formerly numbered C288.) Seminar, three hours. Knowledge of German not required. Close reading of essays contained in the collection *Poetry, Language, and Thought*, including "The Origin of the Work of Art," "The Thing," and "Language." Concurrently scheduled with Humanities C195. S/U or letter grading.

C296. Derrida as a Reader of Heidegger. (Formerly numbered C289.) Seminar, three hours. Retracing of certain of Derrida's attempts to read Heidegger, beginning with the essay, "Restitutions," in *Truth and Painting*. Other writings include *Of Spirit: Heidegger and the Question* and *Geschlecht*. May be concurrently scheduled with Humanities C196. S/U or letter grading.

297. Death and the Limits of Representation. (Formerly numbered 287.) Seminar, three hours; outside study, nine hours. Prerequisite: reading knowledge of one appropriate foreign language. Examination of fundamental shifts in the relationship that obtains between thinking and death which are closely tied to rethinking of the status and structure of representation. May be repeated once for credit. S/U or letter grading.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Preparation for Teaching Literature and Composition. Lecture, three hours. Seminar on problems and methods of presenting literary texts as exemplary materials in the teaching of composition. Deals with theory and classroom practice and involves individual counseling and faculty evaluation of TAs' performance. May not be applied toward M.A. course requirements. S/U grading.

596. Directed Individual Study or Research (2 to 12 units). Prerequisite: graduate standing in comparative literature. Necessary for students in comparative literature who need additional individual study and research. May be repeated for credit. S/U grading.

596X. Directed Individual Study (2 to 4 units). Preparation for foreign language examination. S/U grading.

597. Preparation for M.A. and Ph.D. Examinations (2 to 12 units). Prerequisite: graduate standing. Preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be repeated for credit. S/U grading.

599. Research for Ph.D. Dissertation (2 to 12 units). Prerequisite: doctoral standing. Research for and preparation of Ph.D. dissertation. May be repeated for credit. S/U grading.

COMPUTER SCIENCE

School of Engineering and Applied Science

UCLA
4732 Boelter Hall
Box 951596
Los Angeles, CA 90095-1596
(310) 825-3886

Professors

Alfonso F. Cardenas, Ph.D.
Wesley W. Chu, Ph.D.
Joseph J. DiStefano III, Ph.D.
Michael G. Dyer, Ph.D.
Milos D. Ercegovic, Ph.D., *Vice Chair*
Mario Gerla, Ph.D.
Sheila A. Greibach, Ph.D.
Richard E. Korf, Ph.D.
David F. Martin, Ph.D.
Richard R. Muntz, Ph.D., *Chair*
D. Stott Parker, Jr., Ph.D.
Carlo Zaniolo, Ph.D. (*Norman E. Friedmann Professor of Knowledge Sciences*)

Professors Emeriti

Algirdas A. Avizienis, Ph.D.
Bertram Bussell, Ph.D.
Jack W. Carlyle, Ph.D.
Gerald Estrin, Ph.D.
Thelma Estrin, Ph.D.
Walter J. Karplus, Ph.D.

Leonard Kleinrock, Ph.D.
 Allen Klinger, Ph.D.
 Lawrence P. McNamee, Ph.D.
 Michel A. Melkanoff, Ph.D.
 Judea Pearl, Ph.D.
 Thomas A. Rogers, Ph.D.
 Jacques J. Vidal, Ph.D.

Associate Professors

Rajive L. Bagrodia, Ph.D.
 Jason (Jinsheng) Cong, Ph.D.
 Eliezer M. Gafni, Ph.D.
 David R. Jefferson, Ph.D.
 Andrew B. Kahng, Ph.D.
 David A. Rennels, Ph.D., *Vice Chair*
 Josef Skrzypek, Ph.D.
 Yuval Tamir, Ph.D.

Assistant Professors

Elias Koutsoupias, Ph.D.
 Miodrag Potkonjak, Ph.D.

Senior Lecturer

Leon Levine, M.S., *Emeritus*

Adjunct Professors

Boris Kogan, Ph.D.
 Gerald J. Popek, Ph.D.

Scope and Objectives

Computer science is concerned with the design, modeling, analysis, and applications of computer-related systems. Its study at UCLA provides education at the undergraduate and graduate levels necessary to understand, design, implement, and use the software and hardware of digital computers and digital systems. The programs provide comprehensive and strongly related studies of subjects in computer system architecture, computer network modeling and analysis, distributed computer systems, programming languages and systems, artificial intelligence, computer science theory, and scientific computing.

The undergraduate and graduate studies and research projects in computer science are supported by extensive computing resources. In addition to the departmental computing facility, there are nearly a dozen laboratories specializing in areas such as distributed systems, multimedia computer communications, VLSI systems, VLSI CAD, and artificial intelligence. The Biocybernetics Laboratory is devoted to multidisciplinary research involving the application of engineering and computer science methods to problems in biology and medicine.

The Bachelor of Science degree may be attained either through the computer science and engineering major or through the computer science major described below.

The School of Engineering and Applied Science offers M.S. and Ph.D. degrees in Computer Science, as well as minor fields for graduate students seeking engineering degrees. In cooperation with the John E. Anderson Graduate School of Management, the Computer Science Department offers a concurrent degree program which enables students to obtain the M.S. in Computer Science and the M.B.A. (Master of Business Administration).

Bachelor of Science in Computer Science and Engineering

The ABET-accredited computer science and engineering curriculum at UCLA provides the education and training necessary to design, implement, test, and utilize the hardware and software of digital computers and digital systems. This curriculum has major components from the Computer Science and Electrical Engineering Departments. Within the curriculum students study all aspects of computer systems from electronic design through logic design, MSI, LSI, and VLSI concepts and device utilization, machine language design, implementation and programming, operating system concepts, system programming, networking fundamentals, higher-level language skills, and application of these systems. Students are prepared for employment in the high-technology industries which interface with information and digital systems.

The Major

Course requirements are as follows (180 minimum units required):

- (1) Four core courses: Computer Science 31, 32, 33, 51A.
- (2) Computer Science 111, 112, 118, 131, 151B, 180, 181, Electrical Engineering 10, 102, 103, 110, Statistics 154A; four laboratory units (Computer Science 152A, 152B); one course from Computer Science 161, 163, 168; two computer science/electrical engineering electives (excluding Electrical Engineering 100) and two computer science/electrical engineering laboratories.
- (3) Three upper division elective courses from the Computer Science Department, one of which must be from 132, 171, 172, 173, M196B. Course 199 may normally be taken only as a free elective; however, you may petition for exceptions in extraordinary situations.
- (4) Chemistry and Biochemistry 11A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61; Physics 8A/8AL, 8B/8BL, 8C/8CL.
- (5) SEAS general education (GE) course requirements — see Curricular Requirements in the College and Schools section of this catalog for details.
- (6) One free elective course.

*Bachelor of Science in Computer Science

The computer science curriculum is designed to accommodate students who want professional preparation in computer science but do not necessarily have a strong interest in computer systems hardware. The curriculum consists of major components in computer science, a minor or technical support area, and a core of courses from the social sciences, life sciences, and humanities. Within the curriculum, you study subject matter in software engi-

neering, principles of programming languages, data structures, computer architecture, theory of computation and formal languages, operating systems, distributed systems, computer modeling, computer networks, compiler construction, and artificial intelligence. Majors are prepared for employment in a wide range of industrial and business environments.

The program is accredited by the Computer Science Accreditation Commission (CSAC) of the Computing Sciences Accreditation Board (CSAB), a specialized accrediting body recognized by the Commission on Recognition of Postsecondary Accreditation (CORPA).

The Major

Course requirements are as follows (180 minimum units required):

- (1) Four core courses: Computer Science 31, 32, 33, 51A.
- (2) Computer Science 111, 112, 118, 131, 132, 151B, 180, 181, Statistics 154A; one course from Computer Science 161, 163, 168; Mathematics 141A or Electrical Engineering 103; four laboratory units (Computer Science 152A, 152B).
- (3) Two elective upper division computer science courses.
- (4) A minor or technical support area composed of a coherent group of three upper division courses selected from astronomy, atmospheric sciences, biology, chemical engineering, chemistry and biochemistry, civil and environmental engineering, Earth and space sciences, economics, electrical engineering, library and information science, linguistics, management, materials science and engineering, mathematics, mechanical, aerospace, and nuclear engineering, molecular biology, physics.
- (5) Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61; Physics 8A/8AL, 8B/8BL, 8C/8CL.
- (6) SEAS general education (GE) course requirements — see Curricular Requirements in the College and Schools section of this catalog for details. Computer science students must also select two additional humanities/social sciences courses and one additional life sciences course. Chemistry 11A may be substituted for one of the life sciences courses.
- (7) Two free elective courses.

Graduate Study

The following constitutes introductory information regarding graduate degree programs. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degree

Admission

In addition to meeting the requirements of the Graduate Division, applicants to the Master of Science programs in Computer Science are required to take the General Test of the Graduate Record Examination (GRE). In addition, applicants are required to take the Subject Test in Mathematics or Computer Science.

For requirements for the Graduate Certificate of Specialization, see Engineering School-wide Programs in the Curricula and Courses section of this catalog.

Admission forms, including a departmental supplement to the application, may be obtained by writing to the address given at the beginning of this listing or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601.

M.B.A./M.S. Computer Science

The John E. Anderson Graduate School of Management and the Department of Computer Science in the School of Engineering and Applied Science offer a concurrent degree program which enables the student to complete the requirements for the M.S. in Computer Science and the M.B.A. in three academic years. Contact the Anderson School for details.

Areas of Study

Artificial intelligence; computer science theory; computer system architecture; computer programming languages and systems; foundation of programming and database and knowledge-based systems; computer network modeling and analysis; scientific computing (two options); biological systems, physical systems.

Course Requirements

Course Requirement. A total of nine courses is required for the M.S. degree, including a minimum of five graduate courses. No specific courses are required, but a majority of both the total number of formal courses and the total number of graduate courses must consist of courses offered by the Computer Science Department.

Breadth Requirement. Candidates for the M.S. in Computer Science must satisfy the computer science breadth requirement by the end of the fourth quarter in graduate residence at UCLA. This requirement is satisfied by mastering the contents of six undergraduate courses in computer science chosen from the following two groups:

Group I: Four required courses or equivalent from Computer Science 51A, 143 or 180, 151B, 181.

Group II: Two required courses or equivalent from Computer Science 111, 112 or 118, 131

or 132, 161 or 163 or 168, 171 or 174, 172 or 173 or 270A.

In addition, for each degree the student must complete at least one class per quarter for three quarters of Computer Science 201 with grades of Satisfactory.

Competence in any or all courses may be demonstrated in one of three ways:

(1) Satisfactory completion of the course at UCLA with a grade of B – or better.

(2) Satisfactory completion of an equivalent course at another university with a grade of B – or better.

(3) Satisfactory completion of a final examination in the courses at UCLA.

Comprehensive Examination Plan. In the comprehensive examination plan, at least five of the nine courses must be 200-series courses. The remaining four courses may be either 200-series or upper division courses. No units of 500-series courses may be applied toward the comprehensive examination plan requirements.

Thesis Plan. In the thesis plan, seven of the nine courses must be formal courses, including at least four from the 200 series. The remaining two courses may be 598 courses involving work on the thesis.

Comprehensive Examination Plan

Consult the department.

Thesis Plan

The thesis is a report on the results of the student's investigation of a problem in the student's major field of study under the supervision of the thesis committee, which approves the subject and plan of the thesis and reads and approves the complete manuscript. While the problem may be one of only limited scope, the thesis must show a significant style, organization, and depth of understanding of the subject. A student should normally start to plan the thesis at least one year before the award of the M.S. degree is expected. There is no examination under the thesis plan.

Doctoral Degree

Admission

In addition to meeting the requirements of the Graduate Division, applicants to the Ph.D. degree program in Computer Science are required to take the General Test of the Graduate Record Examination (GRE). In addition, applicants are required to take the Subject Test in Mathematics or Computer Science.

Applicants normally should have completed the requirements for the master's degree with at least a 3.25 grade-point average and have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having the M.S. degree.

Admission forms, including a departmental supplement to the application, may be obtained by writing to the address given at the beginning of this listing or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601.

Major Fields or Subdisciplines

Artificial intelligence; computer science theory; computer system architecture; computer programming languages and systems; foundation of programming and database and knowledge-based systems; computer network modeling and analysis; scientific computing (two options); biological systems, physical systems.

Course Requirements

Course Requirement. There is no formal course requirement for the Ph.D. degree, and the student may theoretically substitute examinations for coursework. Normally, however, the student takes courses to acquire the knowledge needed for preparation for the written and oral preliminary examinations. The basic program of study for the Ph.D. degree is built around one major field and two minor fields; the major and at least one minor must be in computer science. The major field corresponds to a body of knowledge contained in six courses, at least four of which are graduate courses, plus the current literature in the area of specialization. A detailed syllabus for each major field can be obtained from the Student Affairs Office in the Computer Science Department. Each minor field normally embraces a body of knowledge equivalent to three courses, at least two of which are graduate courses. Grades of B – or better, with a grade-point average of at least 3.33 in all courses included in the minor field, are required. By petition and administrative approval, a minor field may be satisfied by examination.

Breadth Requirement. Candidates for the Ph.D. degree in Computer Science must satisfy the computer science breadth requirement by the end of the fourth quarter in graduate residence at UCLA. This requirement is satisfied by mastering the contents of six undergraduate courses in computer science chosen from the following two groups:

Group I: Four required courses or equivalent from Computer Science 51A, 143 or 180, 151B, 181.

Group II: Two required courses or equivalent from Computer Science 111, 112 or 118, 131 or 132, 161 or 163 or 168, 171 or 174, 172 or 173 or 270A.

In addition, for each degree the student must complete at least one class per quarter for three quarters of Computer Science 201 with grades of Satisfactory.

Competence in any or all courses may be demonstrated in one of three ways:

- (1) Satisfactory completion of the course at UCLA with a grade of B – or better.
- (2) Satisfactory completion of an equivalent course at another university with a grade of B – or better.
- (3) Satisfactory completion of a final examination in the courses at UCLA.

For information on completing the Engineer degree, see Engineering Schoolwide Programs in the Curricula and Courses section of this catalog.

Written and Oral Qualifying Examinations

After mastering the body of knowledge defined in the three fields and passing the breadth requirement, the student takes a written preliminary examination in the major field. When the examination is passed and all coursework is completed, the student may be required to take an oral preliminary examination which encompasses the major and minor fields. The examination may be waived by the faculty on the recommendation of the major field committee for a student deemed to be making strong progress toward the degree. A student may not take a preliminary examination more than twice.

After passing the preliminary examination, the student should form a doctoral committee and prepare to take the University Oral Qualifying Examination. The doctoral committee consists of four faculty members, one of whom must be from outside the School of Engineering and Applied Science. The nature and content of the examination are at the discretion of the doctoral committee, but ordinarily include a broad inquiry into the student's preparation for research. The doctoral committee also reviews the prospectus of the dissertation at the oral qualifying examination.

Lower Division Courses

1. Principles of Computer Science. Lecture, four hours; laboratory, two hours; other, six hours. Not open for credit to computer science majors. Introduction to fundamental scientific principles of computation. Programming in LISP. Systems software, including interpreters, and operating systems. Computer hardware design and implementation. Theory of computation, including computability and complexity. Applications, including artificial intelligence and scientific computing.

2. Great Ideas in Computer Science. (Formerly numbered 98.) Lecture, four hours; outside study, eight hours. Broad coverage for liberal arts and social sciences students of computer science theory, technology, and implications, including artificial and neural machine intelligence, computability limits, virtual reality, cellular automata, artificial life, programming languages survey, and philosophical and societal implications.

10C. Introduction to Programming/PASCAL. Lecture, four hours; discussion, two hours. Exposure to computer organization and capabilities. Basic principles of programming (using PASCAL as example language): algorithmic, procedural problem solving. Program design and development. Control structures and data structures. Character strings and word processing.

10F. Introduction to Programming/FORTRAN. Lecture, four hours; discussion, two hours. Open to mathematics and computer science majors; open to graduate students on S/U grading basis only. Description and use of FORTRAN programming language. Selected topics in programming techniques. Programming and running of several problems.

11. Introduction to PASCAL. Lecture, four hours; discussion, two hours; other, six hours. Limited to majors in computer science and engineering and computer science majors. Open to graduate students on S/U grading basis only. Not open to students with credit for course 10C, 10F, or Program in Computing 10A. Human factors in programming and program design. Exposure to computer organization and capabilities, data representation, professional ethics. Principles of programming (using PASCAL as example language): algorithm design and procedural abstraction. Program design and development. Control structures and data structures.

23. Introduction to Computer Science III. Lecture, four hours; recitation, two hours. Prerequisites: courses 21, 22. Design and specification of algorithmic solutions. Design and specification of data structures, complexity analysis of algorithms and data structures. Implementation of algorithms and data structures in C programming language. Performance analysis of computer programs.

31. Introduction to Computer Science I. Lecture, four hours; discussion, two hours; outside study, six hours. Limited to majors in computer science and engineering and computer science majors. Introduction to computer science via theory, applications, and programming. Operators and control structures. Functions, parameters, scope rules. Recursion. Arrays, strings, pointers. Object-oriented programming, classes, data abstraction. Input/output. Examples and exercises from computer science theory and applications.

32. Introduction to Computer Science II. Lecture, four hours; discussion, two hours; outside study, six hours. Prerequisite: course 31. Limited to majors in computer science and engineering and computer science majors. Not open to students with credit for course 23. Object-oriented programming, overloading, inheritance, polymorphism. Object-oriented view of data structures: lists, stacks, queues. Memory management. Sorting and searching algorithms and their performance. Trees, graphs, and associated algorithms. Case studies and exercises from computer science applications.

33. Systems Programming (5 units). (Formerly numbered 24.) Lecture, four hours; discussion, two hours; outside study, nine hours. Prerequisite: course 32. Limited to majors in computer science and engineering and computer science majors. Not open to students with credit for former course 24. Introductory course on assembly language and operating systems fundamentals. Number systems, machine language, and assembly language. Procedure calls, stacks, interrupts, and traps. Assemblers, linkers, and loaders. Operating systems concepts: processes and process management, I/O programming, memory management, file systems.

51A. Logic Design of Digital Systems. Lecture, four hours; recitation, two hours; outside study, six hours. Prerequisite: Physics 8C. Introduction to digital systems. Specification and implementation of combinational and sequential systems. Standard logic modules and programmable logic arrays. Specification and implementation of algorithmic systems: data and control sections. Number systems and arithmetic algorithms. Error control codes for digital information.

Upper Division Courses

111. Operating Systems Principles. Lecture, four hours; laboratory, two hours; outside study, six hours. Prerequisites: courses 32 or equivalent, 33. Introduction to design and performance evaluations of modern operating systems. Mapping and binding of addresses. Organization of multiprogramming and multiprocessing systems; interrupts, process model, and interlocks. Resource allocation models and problem of deadlocks. Scheduling, synchronization. Memory management, virtual memory. I/O control, file systems.

112. Computer System Modeling Fundamentals. Lecture, four hours; outside study, eight hours. Prerequisites: upper division standing or Statistics 154A, consent of instructor. Basic tools necessary for performance evaluation and design of distributed computer systems, including such topics as combinatorics, generating functions, probability theory, transforms, Markov chains, baby queueing theory. Presentation of this set of tools in a fashion that is rich with examples from computer systems field.

118. Computer Network Fundamentals. Lecture, four hours; discussion, two hours. Prerequisite: upper division standing. Investigation of functions required to operate computer communications networks. Development of methodology for implementing these functions in procedures called protocols. Organization around ISO-OSI seven-layer architecture, with review of each layer. Specific functions defined and available alternatives studied. Presentation of several applications and case studies based on existing public and private networks.

130. Software Engineering. Lecture, four hours; laboratory, two hours; outside study, six hours. Prerequisite: course 32. Structured programming, program specification, program proving, modularity, abstract data types, composite design, software tools, software control systems, program testing, team programming.

131. Programming Languages. Lecture, four hours; laboratory, two hours; outside study, six hours. Prerequisites: courses 32, 33. Study, comparison, and evaluation of alternative strategies for language specification, data description, data control, program modularity, instruction sequencing, and language implementations. Use of a few languages selected from FORTRAN 77, ADA, SNOBOL 14, LISP, MODULA 2, and PROLOG to illustrate particular implementations of some of above features.

132. Compiler Construction. Lecture, four hours; discussion, two hours; outside study, six hours. Prerequisites: courses 32, 131, 181. Compiler structure; lexical and syntactic analysis; semantic analysis and code generation; theory of parsing.

141. Basic Methods of Data Organization. Lecture, four hours; laboratory, two hours; outside study, six hours. Prerequisite: course 32 or consent of instructor. Fundamental techniques for organizing and manipulating data, stressing relationships to performance, time/storage trade-offs. Sequential and linked storage allocation for linear lists, multilinked structures. Trees: implementation, traversals, mathematical properties. Graphs and networks: memory representation, algorithms. Dynamic storage allocation. External storage devices. Database concepts and architectures. Topics include sorting-searching, algorithmic analysis, graph theory, concepts underlying file management.

143. Introduction to Database Systems. Lecture, four hours; discussion, two hours; laboratory, two hours; outside study, four hours. Prerequisite: course 32 or consent of instructor. Information systems and database systems in enterprises. File organization and secondary storage structures. Relational model and relational database systems. CODASYL and other data management approaches. Database design principles. Transactions, concurrency, and recovery. Integrity and authorization.

151B. Computer Systems Architecture. Lecture, four hours; discussion, two hours; outside study, six hours. Prerequisite: course 51A. Recommended: courses 33, 152A. Machine organization and design, formal descriptions, comparative study of machine instruction sets and formats, data representation and floating point, addressing structures, mechanization of procedure calls, memory organization and management, microprogramming, I/O processing and interrupts, and reliability aspects.

151C. Design of Digital Systems. Lecture, four hours; discussion, two hours. Prerequisites: courses 51A, 151B, 152A. Design of complex digital systems using hierarchical approaches and regular structures. Combinational, sequential, and algorithmic systems. Microprogramming and firmware engineering. Cost/performance measures and technology constraints. Use of design tools. Design project.

152A. Introductory Digital Design Laboratory (2 units). Laboratory, four hours. Prerequisite: course 51A. Hands-on design, implementation, and debugging of digital logic circuits, use of computer-aided design tools for schematic capture and simulation, implementation of complex circuits using programmed array logic, design projects.

152B. Computer Design and Interfacing Laboratory (2 units). Laboratory, four hours. Prerequisite: course 151B. Design and implementation of computer I/O interfaces and device controllers, implementation of microprogrammed machines.

161. Fundamentals of Artificial Intelligence. Lecture, four hours; laboratory, two hours. Prerequisite: course 23 or equivalent. Introduction to fundamental problem solving and knowledge representation paradigms of artificial intelligence. Introduction to LISP with regular programming assignments. State-space and problem reduction methods, brute-force and heuristic search, planning techniques, two-player games. Knowledge structures including predicate logic, production systems, semantic nets and primitives, frames, scripts. Special topics in natural language processing, expert systems, vision, and parallel architectures.

163. Introduction to Natural Language Processing. Lecture, four hours; laboratory, two hours. Prerequisite: course 130 or 131 or consent of instructor. Role of syntax, semantics, and pragmatics in human language processing by computers. Natural language generators and parsers, inference, and conceptual analysis. Modeling conceptual processes and representing semantic knowledge by means of computer problems.

168. Vision in Man and Machine. Lecture, four hours; discussion, two hours; outside study, six hours. Prerequisite: course 161 or consent of instructor. Use of computational aspects of processing visual information to present a unified treatment of early vision, allowing transfer of concepts from analysis of natural vision to synthesis of machine vision. Extraction, processing the manipulation of image attributes. Their organization into data structures and processing by dedicated computing architectures. Issues in image segmentation based on aggregation of feature descriptions.

168L. Computer Vision Laboratory (2 to 4 units). Laboratory, eight hours. Prerequisites: course 168, senior standing, consent of instructor. Image acquisition, storage, processing, and analysis. Design and implementation of algorithms for low-level vision. Experiments in motion, texture, color, edge detection, binary and gray-level images. Scheme-based personal computer vision station.

170A. Introduction to Scientific Computing. Lecture, four hours; laboratory, two hours; outside study, six hours. Prerequisite: senior standing in computer science or consent of instructor. Introduction to scientific modeling and simulation, using the very high-level computer languages MATHEMATICA and MAPLE. Extensive coverage of programming in MATHEMATICA, with applications involving engineering modeling; simulation term project required.

171. Real-Time Computer Systems. Prerequisite: senior standing or consent of instructor. Survey of fundamentals, with emphasis on hardware and systems concepts. Adapting digital computers to interfaces, including multiprogramming, bus structure, interrupt, and time-sharing considerations. Digital communication, remote consoles, sampling, quantizing, multiplexing, analog-digital conversion, and data reconstruction.

171L. Real-Time Systems Laboratory (2 to 4 units). Laboratory, four to eight hours. Prerequisites: senior standing, consent of instructor. Recommended: courses 152A, 171 (may be taken concurrently). Tests and measurements of digital and analog signals and systems as encountered in data acquisition, on-line computing, telecommunication facilities, terminals, modems, interfaces, and standards (e.g., RS 232, IEEE488). May be repeated for credit with consent of instructor.)

172. Simulation and Models. Lecture, four hours; other, eight hours. Prerequisite: course 23. Recommended: one statistics course. Model formulation and programming for discrete event systems in the simulation language GPSS. Statistical considerations: design of experiments, random number generation, analysis of model results. Computer exercises.

173. Random Data Analysis and Measurement Procedures. Prerequisite: Electrical Engineering 102 or equivalent. Practical aspects of random data analysis and measurement procedures. Statistical properties of random data, correlation, spectral density, input/output relationships, statistical errors, coherence functions, data acquisition, and processing techniques.

174. Elements of Computer Graphics. Lecture, two hours; laboratory, two hours; outside study, eight hours. Prerequisite: course 23 or equivalent. Hardware and software elements of computer graphics systems. Graphics languages. Graphic workstations and specialized I/O devices. Design and development of interactive graphics programs.

180. Introduction to Algorithms and Complexity. Lecture, four hours; discussion, two hours; outside study, six hours. Prerequisites: course 32, Mathematics 61, junior standing in computer science. Introduction to design and analysis of algorithms. Design techniques: divide-and-conquer, greedy method, dynamic programming; selection of prototypical algorithms; choice of data structures and representations; complexity measures: time, space, upper, lower bounds, asymptotic complexity; NP-completeness.

181. Introduction to Formal Languages and Automata Theory. Lecture, four hours; discussion, two hours; outside study, six hours. Prerequisites: Mathematics 61 and junior standing in computer science, or consent of instructor. Grammars, automata, and languages. Finite-state languages and finite-state automata. Context-free languages and pushdown story automata. Unrestricted rewriting systems, recursively enumerable and recursive languages, and Turing machines. Closure properties, pumping lemmas, and decision algorithms. Introduction to computability.

190. Computer Science Design Project. Lecture, four hours; outside study, eight hours. Prerequisite: senior standing with adequate background in hardware, software, and computer applications. Limited to majors in computer science and engineering and computer science majors. Basic concepts of design of projects in computer science, including interpretation of specifications, subtasking, design of experiments, data analysis and performance evaluation, cost engineering, reliability, and societal and safety considerations.

196A. Introduction to Bioengineering and Cybernetics (2 units). Prerequisite: calculus. Strongly recommended for students with potential interest in bioengineering or cybernetics as a major. Introductory survey of topics in bioengineering and cybernetics disciplines. Lectures presented by faculty currently performing research in one of the areas; some sessions include laboratory tours. P/NP grading.

M196B. Modeling and Simulation of Biological Systems (5 units). (Same as Medicine M196B.) Lecture, four hours; discussion, one hour; laboratory, two hours; outside study, eight hours. Prerequisite: Electrical Engineering 102 or Mathematics 115A. Introduction to dynamic system modeling, compartmental modeling, and computer simulation methods for studying biomedical systems. Basics of numerical simulation algorithms, translating biomodeling goals and data into mathematic models and implementing them for simulation and analysis. Modeling software exploited for class assignments in PC laboratory.

C196L. Biomedical Systems/Biocybernetics Research Laboratory. Lecture, one hour; laboratory, three hours; outside study, eight hours. Prerequisite: course M196B or consent of instructor. Special laboratory techniques and experience in biocybernetics research. Laboratory instruments, their use, design, and/or modification for research in life sciences. Special research hardware, firmware, software. Use of simulation in experimental laboratory. Laboratory automation and safety. Comprehensive experiment design. Radioactive isotopes and kinetic studies. Experimental animals, controls. Concurrently scheduled with course C296L.

199. Special Studies (2 to 8 units). Prerequisites: upper division standing, consent of instructor. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit.

Graduate Courses

201A-201B-201C. Computer Science Seminars (2 units each). Prerequisite: graduate standing in computer science. Lectures on current research topics in computer science. May be repeated for credit. In Progress and S/U grading.

202. Advanced Computer Science Seminar. Prerequisite: completion of major field examination in computer science or consent of instructor. Current computer science research into theory of, analysis and synthesis of, and applications of information processing systems. Each member completes one tutorial and one or more original pieces of work in the specialized area. May be repeated for credit.

209AA-209ZZ. Research Seminars: Computer Science (2 to 4 units each). Prerequisite: consent of instructor. Discussion of advanced topics and current research in algorithmic processes that describe and transform information: theory, analysis, design, efficiency, implementation, and application. May be repeated for credit. S/U grading.

212A. Queueing Systems Theory. Prerequisites: course 112 and Electrical Engineering 131A, or consent of instructor. Resource sharing issues and theory of queueing (waiting-line) systems. Review of Markov chains and baby queueing theory. Method of stages. $M/E_r/1$, $E_r/M/1$. Bulk arrival and bulk service systems. Series-parallel stages. Fundamentals of open and closed queueing networks. Intermediate queueing theory: $M/G/1$; $G/M/m$. Collective marks. Advanced queueing theory: $G/G/1$; Lindley integral equation; spectral solution. Inequalities, bounds, approximations.

212B. Queueing Applications: Scheduling Algorithms and Queueing Networks. Prerequisite: course 212A. Priority queueing. Applications to time-sharing scheduling algorithms: FB, Round Robin, Conservation Law, Bounds. Queueing networks: definitions; job flow balance; product form solutions — local balance, $M \rightarrow M$; computational algorithms for performance measures; asymptotic behavior and bounds; approximation techniques — diffusion — iterative techniques; applications.

214. Data Transmission in Computer Communications. Prerequisites: course 112, graduate standing in computer science. Discrete data streams, formats, rates, transductions; digital data transmissions via analog signaling in computer communication; media characteristics, systems methodologies, performance analysis; modem designs; physical interfaces in computer communication links; national/international standards; tests and measurements.

215. Computer Communications and Networks. Prerequisite: course 112. Resource sharing; computer traffic characterizations; multiplexing; network structure; packet switching and other switching techniques; ARPANET and other computer network examples; network delay and analysis; network design and optimization; network protocols; routing and flow control; satellite and ground radio packet switching; local networks; commercial network services and architectures. Optional topics include extended error control techniques; modems; SDLC, HDLC, X.25, etc.; protocol verification; network simulation and measurement; integrated networks; communication processors.

216. Distributed Multiaccess Control in Networks. Prerequisites: courses 212A, 215. Topics from the field of distributed control and access in computer networks, including terrestrial distributed computer networks; satellite packet switching; ground radio packet switching; local network architecture and control.

218. Advanced Computer Networks. (Formerly numbered 218A.) Lecture, four hours; outside study, eight hours. Prerequisites: courses 112 and 118, or consent of instructor. Review of seven-layer ISO-OSI model. High-speed networks: LANs, MANs, ATM. Flow and congestion control; bandwidth allocation. Interneting.

219. Current Topics in Computer System Modeling Analysis (2 to 12 units). Prerequisite: consent of instructor. Review of current literature in an area of computer system modeling analysis in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with consent of instructor.

221. Economics of Computers. Prerequisite: consent of instructor. Basic economic factors in data processing. Buyers and sellers; products; applications; major cost factors. Selection and operation of a data processing system.

M222. Control and Coordination in Economics. (Same as Economics M222A.) Lecture, three hours. Prerequisite: graduate standing in economics or engineering or consent of instructor. Recommended: appropriate mathematics course. Stabilization policies, short- and long-run dynamics and stability analysis; decentralization, coordination in teams; certainty equivalence and separation theorems; stochastic and learning models. Bayesian approach to price and output rate adjustment. S/U or letter grading.

231A. Advanced Topics in Programming Languages. Prerequisite: course 131. Presentation, analysis, and discussion of specialized programming languages, new higher-level languages, and new and/or advanced features of programming languages.

232A. Operational Semantics of Programming Languages. Lecture, four hours; outside study, eight hours. Prerequisites: courses 131, 181, or equivalent. Introduction to formal semantics. Interpreter-based operational definitions. Induction and structural operational semantics. Proving equivalence between structural and interpreter-based operational definitions. Static and dynamic semantics. Example operational definitions of functional, imperative, concurrent, logic, and object-oriented programming languages.

232B. Semantics of Programming Languages. Prerequisites: courses 131 and 181, or consent of instructor. Denotational semantics of programming languages. Notation and foundations. Expressions, commands, declarations, and other constructs. Environments, stores, and continuations. Examples. Relations between semantic definitions of programming languages. Applications of current research interest.

233A. Parallel Programming. Lecture, four hours; other, eight hours. Prerequisites: courses 111, 131. Mutual exclusion and resource allocation in distributed systems; primitives for parallel computation: specification of parallelism, interprocess communication and synchronization, atomic actions, binary and multiway rendezvous; synchronous and asynchronous languages: CSP, ADA, LINDA, MAISIE, UC, and others; introduction to parallel program verification.

233B. Verification of Concurrent Programs. Lecture, four hours; other, eight hours. Prerequisite: course 233A. Formal techniques for verification of concurrent programs. Topics include safety, liveness, program and state assertion-based techniques, weakest precondition semantics, Hoare logic, temporal logic, UNITY, and axiomatic semantics for selected parallel languages.

234A. Correctness Proofs. Prerequisite: consent of instructor. Theoretical and practical aspects of correctness proofs. Partial correctness, total correctness, and termination. Axiomatic semantics and proof systems. Abstraction and correctness of implementations. Formulation, execution, and assessment of correctness proofs. Topics of current research interest.

235A. Logic Programming and PROLOG. Lecture, four hours; outside study, eight hours. Prerequisite: graduate standing in computer science. Logic programming; PROLOG as an approximation thereof; PROLOG programming techniques; translation and definite clause grammars; rewriting and interpreters; implementation of PROLOG; constraint logic programming and other proposed extensions to PROLOG; parallel logic programming systems.

239. Current Topics in Computer Science: Programming Languages and Systems (2 to 12 units). Lecture, four hours. Prerequisite: consent of instructor. Review of current literature in an area of computer science programming languages and systems in which instructor has developed special proficiency as a consequence of research interests. May be repeated for credit with topic change.

240A. Databases and Knowledge Bases. Lecture, four hours; outside study, eight hours. Prerequisite: course 143. Theoretical and technological foundation of Intelligent Database Systems, which merge database technology, knowledge-based systems, and advanced programming environments. Rule-based knowledge representation, spatio-temporal reasoning, and logic-based declarative querying/programming are salient features of this technology.

241A. Object-Oriented and Semantic Database Systems. (Formerly numbered 241AL.) Lecture, three and one-half hours; recitation, 30 minutes; laboratory, one hour; outside study, eight hours. Prerequisite: course 143 or equivalent. Object and database principles. Data models and accessing. Database systems architecture and functional components. Extended relational systems. Object and semantic systems. Systems comparison. Database design, organization, indexing, and performance. Other topics at discretion of instructor.

241B. Pictorial and Multimedia Database Systems. Lecture, three and one-half hours; recitation, 30 minutes; outside study, nine hours. Prerequisites: courses 143, 241A. Pictorial and multimedia information system requirements. Data models and accessing; alternatives. Database systems. Visual languages and communication. Hypertext. Database design and organization, logical and physical. Database heterogeneity and distribution. Other topics at discretion of instructor.

243B. Abstract Data Types and Program Specification. Lecture, four hours; outside study, eight hours. Prerequisites: courses 32 or equivalent, 181. Notions of abstract data type and abstract program specification permit one to understand how programs manipulate data, independently of their implementations. These notions also give powerful techniques for program structuring and verification. Programming exercises.

244A. Distributed Database Systems. Lecture, four hours; outside study, eight hours. Prerequisites: courses 215 and/or 241A. File allocation, intelligent directory design, transaction management, deadlock, strong and weak concurrency control, commit protocols, semantic query answering, multidatabase systems, fault recovery techniques, network partitioning, examples, trade-offs, and design experiences.

245A. Intelligent Information Systems. Lecture, four hours; outside study, eight hours. Prerequisites: courses 241A and 255A, or consent of instructor. Knowledge discovery in database, knowledge-base maintenance, knowledge-base and database integration architectures, and scale-up issues and applications to cooperative database systems, intelligent decision support systems, and intelligent planning and scheduling systems; computer architecture for processing large-scale knowledge-base/database systems.

249. Current Topics in Data Structures (2 to 12 units). Prerequisite: consent of instructor. Review of current literature in an area of data structures in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with consent of instructor.

251A. Advanced Computer Architecture. Lecture, four hours; other, eight hours. Prerequisites: courses 51A, 111, and 151B, or consent of instructor. Functional and structural models of computer systems. Architecture and organization at microprogramming, machine language, and operating system level. Processor organization and system control. Arithmetic processors: algorithms and implementation. Storage system organization: hierarchy and management. Communication organization and control.

251B. Parallel Computer Architectures. Prerequisite: course 251A. Parallel algorithmic structures and computer organizations. Effect of sequencing mechanisms, granularity, coupling, and locality. Organizations of control, memory, interconnection, and processing elements. Performance evaluation measures. Detailed discussion of system organization and performance of vector computers, array computers, loop-level multiprocessors, process-level multiprocessors, and data-flow computers.

252A. Arithmetic Algorithms and Processors. Lecture, four hours; outside study, eight hours. Prerequisite: course 251A or consent of instructor. Number systems: conventional, redundant, signed-digit, and residue. Types of algorithms and implementations. Complexity measures. Fast algorithms and implementations for two-operand addition, multioperand addition, multiplication, division, and square root. On-line arithmetic. Evaluation of transcendental functions. Floating-point arithmetic and numerical error control. Arithmetic error codes. Residue arithmetic. Examples of contemporary arithmetic ICs and processors.

253A. Design of Fault-Tolerant Systems. Lecture, four hours; outside study, eight hours. Prerequisite or corequisite: course 251A or consent of instructor. Fundamental concepts of dependable computing. Design methodology for fault-tolerant systems. Analytic models and measures, modeling tools. Design for critical applications: long-life, real-time, and high-availability systems. Tolerance of design faults: design diversity and fault-tolerant software.

253B. Advanced Topics in Fault-Tolerant Computing. Lecture, four hours; outside study, eight hours. Prerequisite: course 253A. Fault tolerance in distributed systems: protocols and network redundancy. Design of fault-tolerant software: N-version programming and recovery blocks. Relationship between fault tolerance and system security. Case studies of contemporary fault-tolerant systems. Review of recent research results.

253C. Testing and Testable Design of VLSI Systems. Lecture, four hours; outside study, eight hours. Prerequisite: course 51A or consent of instructor. Detailed study of various problems in testing and testable designs of VLSI systems, including fault modeling, fault simulation, testing for single stuck faults and multiple stuck faults, functional testing, design for testability, compression techniques, and built-in self-test.

254A. Computer Memories and Memory Systems. Prerequisite: course 251A or consent of instructor. Generic types of memory systems; control, access modes, hierarchies, and allocation algorithms. Characteristics, system organization, and device considerations of ferrite memories, thin film memories, and semiconductor memories.

255A. Distributed Processing Systems. Lecture, four hours; outside study, eight hours. Prerequisites: courses 215 and/or 251A. Task partitioning and allocation, interprocess communications, task response time model, process scheduling, message passing protocols, replicated file systems, interface, cache memory, actor model, fine grain multicomputers, distributed operating system kernel, error recovery strategy, performance monitoring and measurement, scalability and maintainability, prototypes and commercial distributed systems.

256A. Advanced Scalable Architectures: Systems, Building Blocks, and Technology. Lecture, four hours; outside study, eight hours. Prerequisite: course 251A or consent of instructor. State-of-the-art scalable multiprocessors and multicomputers. High-performance VLSI building blocks. Capabilities and limitations of VLSI technology. Interdependency among implementation technology, packaging, chip microarchitecture, and system architecture. Mechanisms for exploiting parallelism. Current research areas. Examples of chips and systems.

M258A. LSI in Computer System Design. (Same as Electrical Engineering M216A.) Lecture, four hours; laboratory, four hours. Prerequisites: graduate standing in computer science or electrical engineering, consent of instructor. LSI/VLSI design and application in computer systems. Fundamental design techniques that can be used to implement complex integrated systems on a chip.

M258B-M258C. LSI in Computer System Design. (Same as Electrical Engineering M216B-M216C.) Lecture, four hours; laboratory, four hours. Prerequisite: course M258A. LSI/VLSI design and application in computer systems. In-depth studies of VLSI architectures and VLSI design tools. In Progress grading.

258D. VLSI CAD Techniques. Prerequisite: graduate standing in computer science or electrical engineering or consent of instructor. In-depth study of latest advances in computer-aided VLSI design techniques, including building block layout, placement and routing algorithms, simulation, design verification and timing, analog/digital synthesis techniques, testing, silicon compilation, expert system applications, and automatic performance optimization.

258E. Foundations of VLSI CAD Algorithms. Lecture, four hours; other, eight hours. Prerequisites: one course in analysis and design of algorithms, consent of instructor. Basic theory of combinatorial optimization for VLSI physical layout, including mathematical programming, network flows, matching, greedy and heuristic algorithms, and stochastic methods. Emphasis on practical application to computer-aided physical design of VLSI circuits at high-level phases of layout: partitioning, placement, graph folding, floorplanning, and global routing.

258F. Physical Design Automation of VLSI Systems. Lecture, four hours; other, eight hours. Prerequisite: consent of instructor. Detailed study of various physical design automation problems of VLSI circuits, including logic partitioning, floorplanning, placement, global routing, channel and switchbox routing, planar routing and via minimization, compaction and performance-driven layout. Discussion of applications of a number of important optimization techniques, such as network flows, Steiner trees, simulated annealing, and generic algorithms.

258G. Logic Synthesis of Digital Systems. Lecture, four hours; outside study, eight hours. Prerequisites: courses 51A and 180, or consent of instructor. Detailed study of various problems in logic-level synthesis of VLSI digital systems, including two-level Boolean network optimization; multilevel Boolean network optimization; technology mapping for standard cell designs and field-programmable gate-array (FPGA) designs; retiming for sequential circuits; and applications of binary decision diagrams (BDDS).

258H. Analysis and Design of High-Speed VLSI Interconnects. Lecture, four hours; outside study, eight hours. Prerequisites: courses M258A and 258F, or consent of instructor. Detailed study of various problems in analysis and design of high-speed VLSI interconnects at both IC and packing levels, including interconnect capacitance and resistance, lossless and lossy transmission lines, cross-talk and power distribution noise, delay models and power dissipation models, interconnect topology and geometry optimization, and clocking for high-speed systems.

259. Current Topics in Computer Science: System Design/Architecture (2 to 12 units). Lecture, four hours. Prerequisite: consent of instructor. Review of current literature in an area of computer science system design in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with topic change.

261A. Problem Solving and Search. Lecture, four hours; outside study, eight hours. Prerequisite: course 23 or equivalent. Examination in depth of that part of artificial intelligence concerned with problem-solving behavior, including problem spaces, brute-force search, heuristic search, two-player game searches, planning, subgoaling, GPS, macro-operators, and abstraction. Emphasis on mathematical rigor and complexity analyses of search algorithms.

262A. Reasoning with Partial Beliefs. Prerequisite: course 112 or Electrical Engineering 131A or equivalent. Review of several formalisms for representing and managing uncertainty in reasoning systems; presentation of comprehensive description of Bayesian inference using belief networks representation.

262B. Knowledge-Based Systems. Prerequisite: course 262A. Machine representation of judgmental knowledge and uncertain relationships. Inference on inexact knowledge bases. Rule-based systems — principles, advantages, and limitations. Signal understanding. Automated planning systems. Knowledge acquisition and explanation producing techniques.

262C. Computer Methods of Data Analysis and Model Formation. Prerequisite: course 112 or equivalent or consent of instructor. Techniques of using computers to interpret, summarize, and form theories of empirical observations. Mathematical analysis of trade-offs between computational complexity, storage requirements, and precision of computerized models.

262Z. Current Topics in Cognitive Systems. Prerequisites: course 262A, consent of instructor, additional prerequisites for each offering as announced in advance by department. Theory and implementation of systems which emulate or support human reasoning. Current literature and individual studies in artificial intelligence, knowledge-based systems, decision support systems, computational psychology, and heuristic programming theory. May be repeated for credit with topic change.

263A. Language and Thought. Prerequisite: consent of instructor. Recommended: understanding of LISP. Introduction to natural language processing. Representation and manipulation of conceptualizations underlying processes of thought for natural language comprehension and generation. Process models of story comprehension, question answering, paraphrasing, machine translation. Conceptual dependency theory, scripts, plans, goals, expectation-based parsing.

263B. Language and Memory. Prerequisites: course 263A, knowledge of LISP or PROLOG. Recommended: course 264A. Advanced natural language processing. Emphasis on organization of human memory for language comprehension. Episodic and semantic memory. Subjective understanding and modeling ideologies. Language acquisition, processes of generalization during comprehension. Cross-contextual reminders and thematic abstraction.

264A. Artificial Intelligence Programming I. Prerequisite: consent of instructor. Recommended: knowledge of LISP or PROLOG. Introduction to tools, techniques, and issues in artificial intelligence programming. Functional programming for artificial intelligence applications. Review of LISP and introduction to lexically scoped LISPs (e.g., T, SCHEME). Lambda calculus, closures, data-driven and object-oriented programming, flavors, d-nets, resolution-based deductive systems.

264B. Artificial Intelligence Programming II. Prerequisite: course 264A or consent of instructor. Techniques of logic programming. Artificial intelligence programming languages (e.g., PROLOG, AMORD, DUCK, CONNIVER, PLANNER, QA4, KRLL, ACTORS, etc.) and artificial intelligence features (e.g., nonmonotonic logics, data-dependencies for truth maintenance, meta-rules, semantic networks, frame-based systems).

265A. Machine Learning. Prerequisites: courses 263A, 264A, consent of instructor. Introduction to machine learning. Learning by analogy, inductive learning, modeling creativity, learning by experience, role of episodic memory organization in learning. Examination of BACON, AM, EURISKO, HACKER, teachable production systems. Failure-driven learning.

267A. Neural Models. Prerequisites: graduate standing, consent of instructor. Review of major neurophysiological milestones in understanding brain architecture and processes. Focus on brain theories that are important for modern computer science and, in particular, on models of sensory perception, sensory-motor coordination, and cerebellar and cerebral structure and function. Students required to prepare a paper analyzing research in one area of interest.

267B. Artificial Neural Systems and Connectionist Computing. Prerequisites: graduate standing, consent of instructor. Analysis of major connectionist computing paradigms and underlying models of biological and physical processes. Examination of past and current implementations of artificial neural networks along with their applications to associative knowledge processing, general multisensor pattern recognition including speed and vision, and adaptive robot control. Students required to prepare a paper analyzing research in one area of interest.

268. Machine Perception. Prerequisites: graduate standing, consent of instructor. Course 168 may be taken concurrently. Computational aspects of processing visual and other sensory information. Unified treatment of early vision in man and machine. Integration of symbolic and iconic representations in process of image segmentation. Computing multimodal sensory information by "neural-net" architectures.

268CN. Computational Neuroscience. Lecture, four hours; discussion, two hours; outside study, eight hours. Prerequisite: consent of instructor. Computational neuroscience as a paradigm of formal analysis and demonstrations of how to correctly interpret sensory data by discovering constraints from the natural world. Neural networks and connectionist models as a paradigm for parallel and concurrent computation and application to problem of vision, multimodal sensory interpretation, and learning.

268S. Seminar: Computational Neuroscience (2 units). Prerequisite: consent of instructor. Intended for students undertaking thesis research. Discussion of advanced topics and current research in computational neuroscience. Neural networks and connectionism as a paradigm for parallel and concurrent computation in application to problems of perception, vision, multimodal sensory integration, and robotics. May be repeated for credit. S/U grading.

269. Seminar: Current Topics in Artificial Intelligence (2 to 4 units). Prerequisite: consent of instructor. Review of current literature and research practicum in an area of artificial intelligence in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with topic change.

270A. Computer Methodology: Advanced Numerical Methods. Prerequisites: graduate standing in computer science or engineering, Electrical Engineering 103 or Mathematics 141B or comparable experience with numerical computing. Principles of computer treatment of selected numerical problems in algebraic and differential systems, transforms and spectra, data acquisition and reduction; emphasis on concepts pertinent to modeling and simulation and the applicability of contemporary developments in numerical software. Computer exercises.

271A. Modeling and Simulation of Lumped Parameter Systems. Lecture, eight hours. Recommended (but not prerequisite): course 270A or equivalent. Characterization of electrical, electromechanical, and other engineering problems by systems of nonlinear ordinary differential equations. Survey of integration algorithms. Digital simulation languages for continuous systems. Real-time simulation using array processor and multi-processor computer systems.

271B. Modeling and Simulation of Distributed Parameter Systems. Lecture, eight hours. Recommended (but not prerequisite): course 270A or equivalent. Mathematical formulation of engineering field problems governed by partial differential equations. Finite difference and finite element approximations. Principal algorithms for solving elliptic, parabolic, and hyperbolic partial differential equations. Supercomputers, vector processors, multiprocessors, and array processors.

271C. Seminar: Advanced Simulation Methods (2 units). Prerequisite: course 271A or equivalent. Discussion of advanced topics in simulation of systems characterized by ordinary and partial differential equations. Topics include (among others) simulation languages, dataflow machines, array processors, and advanced mathematical modeling techniques. Topics vary each term. May be repeated for credit. S/U grading.

272. Advanced Discrete Event Simulation and Modeling Techniques. Lecture, four hours; outside study, eight hours. Prerequisite: course 172 or consent of instructor. In-depth study in discrete event simulation and modeling techniques, including building valid and credible simulation models, output analysis of systems, comparisons of alternative system configurations. Variance reduction techniques, simulation models of computer systems and manufacturing systems.

273A. Digital Processing of Engineering and Statistical Data. Prerequisite: course 173. Computer methods for processing engineering and statistical data. Algorithms to evaluate recursive filter functions, Fourier series, power spectral, analysis correlation computations, and statistical testing.

276A. Pattern Analysis and Machine Intelligence. Prerequisites: graduate standing, consent of instructor. Fundamentals of pattern recognition, feature extraction and selection, autonomous learning, clustering, and machine intelligence.

276B. Structured Computer Vision. Prerequisites: graduate standing, consent of instructor. Methods for computer processing of image data. Systems, concepts, and algorithms for image analysis, radiologic and robotic applications.

276C. Speech and Language Communication in Artificial Intelligence. Prerequisite: course 276A or 276B or consent of instructor. Topics in human-computer communication: interaction with pictorial information systems, sound and symbol generation by humans and machines, semantics of data, systems for speech recognition and understanding. Use of speech and text for computer input and output in applications.

279. Current Topics in Computer Science: Methodology (2 to 12 units). Lecture, four hours. Prerequisite: consent of instructor. Review of current literature in an area of computer science methodology in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics. May be repeated for credit with topic change.

280A-280ZZ. Algorithms. Lecture, four hours; outside study, eight hours. Prerequisites: course 180 or equivalent, consent of instructor, additional prerequisites for each offering as announced in advance by department. Selections from design, analysis, optimization, and implementation of algorithms; computational complexity and general theory of algorithms; algorithms for particular application areas. Subtitles of some current sections: Principles of Design and Analysis (280A); Distributed Algorithms (280D); Graphs and Networks (280G). May be repeated for credit with consent of instructor and with topic change.

281A. Computability and Complexity. Prerequisite: course 181 or compatible background. Concepts fundamental to study of discrete information systems and theory of computing, with emphasis on regular sets of strings, Turing-recognizable (recursively enumerable) sets, closure properties, machine characterizations, nondeterminisms, decidability, unsolvable problems, "easy" and "hard" problems, PTIME/NPTIME.

281D. Discrete State Systems. Prerequisite: consent of instructor. Recommended: course 181. Finite-state machines, transducers, and their generalizations; regular expressions, transduction expressions, realizability; decomposition, synthesis, and design considerations; topics in state and system identification and fault diagnosis, linear machines, probabilistic machines, applications in coding, communication, computing, system modeling, and simulation.

284A-284ZZ. Topics in Automata and Languages. Prerequisites: course 181, additional prerequisites for each offering as announced in advance by department. Selections from families of formal languages, grammars, machines, operators; pushdown automata, context-free languages and their generalizations, parsing; multidimensional grammars, developmental systems; machine-based complexity. Subtitles of some current and planned sections: Context-Free Languages (284A), Parsing Algorithms (284P). May be repeated for credit with consent of instructor and with topic change.

287A. Theory of Program Structure. Prerequisite: course 181. Models of computer programs and their syntax and semantics; emphasis on programs and recursion schemes; equivalence, optimization, correctness, and translatability of programs; expressive power of program constructs and data structures; selected current topics.

288S. Seminar: Theoretical Computer Science (2 units). Prerequisites: courses 280A, 281A, consent of instructor. Intended for students undertaking thesis research. Discussion of advanced topics and current research in such areas as algorithms and complexity models for parallel and concurrent computation, and formal language and automata theory. May be repeated for credit. S/U grading.

289A-289ZZ. Current Topics in Computer Theory (2 to 12 units each). Prerequisite: consent of instructor. Review of current literature in an area of computer theory in which instructor has developed special proficiency as a consequence of research interests. Students report on selected topics.

M296A. Modeling Methodology for Biomedical Systems. (Same as Medicine M270C.) Lecture, four hours; outside study, eight hours. Recommended (but not prerequisite): course M196B, some intermediate knowledge of linear systems analysis or linear algebra (e.g., Mathematics 115A, Electrical Engineering 141, 142, Mechanical, Aerospace, and Nuclear Engineering 171A, 171C, or equivalent). Development of dynamic systems modeling methodology for physiological, biomedical, pharmacological, chemical, and related systems, including dynamic system experiment/model development, multicompartamental, non-compartamental, and input/output models, linear and nonlinear. Emphasis on model applications, limitations, and relevance in biomedical sciences and other limited data environments. Problem solving in PC laboratory.

M296B. Optimal Parameter Estimation and Experiment Design for Biomedical Systems. (Same as Biomathematics M270 and Medicine M270D.) Lecture, four hours; outside study, eight hours. Prerequisite: course M296A or consent of instructor. Estimation methodology and model parameter estimation algorithms for quantifying (fitting) dynamic system models to real-world data. Theory and algorithms for designing optimal experiments for developing and quantifying models, with special focus on data sampling schedule design. Exploration in PC laboratory of applications software for model building and optimal experiment design.

M296C. Advanced Topics and Research in Biomedical Systems Modeling and Computing. (Same as Medicine M270E.) Lecture, four hours; outside study, eight hours. Prerequisite: course M296A or consent of instructor. Research techniques and experience on special topics involving models, modeling methods, and model/computing in biological and medical sciences. Review and critique of the literature. Research problem searching and formulation. Approaches to solutions. Individual M.S.- and Ph.D.-level project training.

C296L. Biomedical Systems/BioCybernetics Research Laboratory. Lecture, one hour; laboratory, three hours; outside study, eight hours. Prerequisite: course M196B or consent of instructor. Special laboratory techniques and experience in bioCybernetics research. Laboratory instruments, their use, design, and/or modification for research in life sciences. Special research hardware, firmware, software. Use of simulation in experimental laboratory. Laboratory automation and safety. Comprehensive experiment design. Radioactive isotopes and kinetic studies. Experimental animals, controls. Concurrently scheduled with course C196L.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching Assistant Training Seminar (2 units). Prerequisite: graduate standing in Computer Science Department. Seminar on communication of computer science materials in classroom: preparation, organization of material, presentation, use of visual aids, grading, advising, and rapport with students. S/U grading.

497D-497E. Field Projects in Computer Science. Prerequisite: consent of instructor. Students are divided into teams led by instructor; each team is assigned an external company or organization which they investigate as a candidate for possible computerization, submitting a team report of their findings and recommendations. In Progress grading.

596. Directed Individual or Tutorial Studies (2 to 8 units). Prerequisites: graduate standing in computer science, consent of instructor. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

597A. Preparation for M.S. Comprehensive Examination (2 to 12 units). Prerequisites: graduate standing in computer science, consent of instructor. Reading and preparation for M.S. comprehensive examination. S/U grading.

597B. Preparation for Ph.D. Preliminary Examinations (2 to 16 units). Prerequisites: graduate standing in computer science, consent of instructor. S/U grading.

597C. Preparation for Ph.D. Oral Qualifying Examination (2 to 16 units). Prerequisites: graduate standing in computer science, consent of instructor. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

598. Research for and Preparation of M.S. Thesis (2 to 12 units). Prerequisites: graduate standing in computer science, consent of instructor. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units). Prerequisites: graduate standing in computer science, consent of instructor. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. S/U grading.

Scope and Objectives

The major in cybernetics is designed primarily for highly motivated undergraduates interested in interdisciplinary activities in life sciences, behavioral sciences, and engineering and computer sciences. Preparation for the major consists of a broad foundation in basic sci-

ences — chemistry, biology, physics, and mathematics, plus introduction to psychology and computing. The major itself provides an introduction to modeling, information processing, control and system analysis, with emphasis on quantitative ideas and methodologies. Mathematical and other analytical skills are essential in the major.

Cybernetics majors have four options for in-depth studies: life sciences, behavioral sciences, engineering and applied mathematical sciences, or an integration of courses from these areas that form a coherent cybernetics curriculum. The major is appropriate preparation for employment or for graduate studies in any of these areas, with emphasis on interdisciplinary activities. It is also appropriate preparation for professional school studies in medicine, public health, management, dentistry, and engineering.

Bachelor of Science Degree

Precybernetics Major

You may apply for the precybernetics major via petition if you are a sophomore and have taken at least three of the premajor mathematics courses with a 2.7 GPA or better and three other premajor courses. Together, all preparation for the major courses, including mathematics, must be completed with at least a 3.0 GPA and a minimum grade of C in all courses. Transfer students must meet the same academic requirements, based on all courses transferred from another institution which satisfy premajor requirements, and must have completed one 12-unit term of residence in regular session at UCLA.

Preparation for the Major

Required: A minimum of 74 units, including Chemistry and Biochemistry 11A, 11B/11BL, 11CL, 132A; Life Sciences 1, 2, 3; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A, 8B, 8C; Program in Computing 10A; Psychology 10.

The Major

Admission to the major is by petition only and is based on successful completion of all preparation for the major courses and requirements (2.7 GPA in mathematics, 3.0 GPA overall, and a minimum grade of C in all courses).

The major consists of a methodology core (five and one-half courses), a specialization area (seven courses), and a cybernetics breadth requirement (three courses). Each course in the major must be passed with a grade of C or better.

Methodology Core — Four subject areas as follows:

(1) One overview course: Computer Science 196A.

(2) Two courses in probability and statistics from one of the following groups: (a) Statistics M152A and 152B, or (b) Mathematics M150A

and Statistics 152B, or (c) Electrical Engineering 131A and Statistics 152B.

(3) Two courses in signals and control systems (one from each group): (a) Electrical Engineering 102 and (b) Electrical Engineering 141 or Mechanical, Aerospace, and Nuclear Engineering 171A.

(4) One course in modeling and computer simulation: Computer Science M196B.

Applications/Specialization Areas — A minimum of seven courses in either life sciences, behavioral sciences, engineering and applied mathematics, or an integration of courses from these areas. A continually updated and approved list of courses in each specialization area is available in the program office and the College Counseling Service.

With few exceptions, courses in the life sciences area are in biology, microbiology, chemistry, and biochemistry, as well as in departments of the School of Medicine. Courses in the behavioral sciences area are in psychology and linguistics. And courses in the engineering and applied mathematics area are in engineering, computer science, and mathematics.

Cybernetics Breadth Requirement — One course from each of the applications/specialization areas selected from the current approved list.

Specialization in Computing

You may select this area as an option in the existing applications/specialization areas. Program in Computing 10B, 10C, 30, and 60 are required, in addition to six courses selected from an approved list. You graduate with a bachelor's degree in cybernetics and a specialization in computing.

Honors Program

Junior and senior majors who have completed all preparation for the major courses and have an overall grade-point average of 3.0 or better and a 3.5 or better in required major courses may apply for admission to the honors program, in which honors-designated sections of selected courses are required. Students pursuing highest honors must, in addition, complete a senior thesis based on an approved research topic. Those who successfully complete the program (3.0 GPA or better overall, 3.5 or better in major coursework, and a grade of B or better in required honors courses) are awarded a degree with honors. At the discretion of the faculty sponsor and the interdepartmental committee, students demonstrating exceptional ability on the senior research thesis are awarded highest honors.

Upper Division Course

195H. Honors Thesis. Limited to cybernetics honors majors. Honors thesis preparation and submission, under direction of a faculty sponsor on Cybernetics Interdepartmental Committee. P/NP grading.

DENTISTRY

School of Dentistry

UCLA
A3-042 Dentistry
Box 951668
Los Angeles, CA 90095-1668
(310) 825-6401

The UCLA School of Dentistry offers one lower division and two upper division courses for pre dental students. Dentistry 199 and 199H are individual special studies courses for UCLA undergraduates with definitive research interests and abilities applicable to dentistry. The subject areas include oral biology, clinical research, and dental health policy. Interested students should contact the associate dean of reseach at (310) 825-6401 to obtain the names and areas of interest of participating School of Dentistry faculty.

Lower Division Course

88. Lower Division Seminar: Special Topics in Dentistry. Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in dentistry approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

Upper Division Courses

199. Individual Special Studies (2 to 8 units). Prerequisite: consent of department. Studies in dentistry and related subject areas appropriate for the training of particular students, with required reading assignments or laboratory work leading to a final oral or written examination. P/NP or letter grading.

199H. Individual Special Studies (Honors) (2 to 8 units). Prerequisite: consent of department. Studies in dentistry and related subject areas appropriate for the training of particular students, with required paper submitted at end of course in addition to final examination (paper to be of publication quality as judged by course mentor). P/NP or letter grading.

DESIGN

School of the Arts and Architecture

UCLA

Madeleine Sunkees, B.Ed., *Emerita*

Scope and Objectives

The Department of Design offers students the opportunity to study in the areas of visual communication design, theory, and design computation. The program balances aesthetic sensitivities with logical reasoning, formal theorizing with practical application, and contemporary thought with historical hindsight.

The department offers a foundation of core courses, including color theory, form, drawing, visual technologies, and history. It then provides introductions to the history and study of design, the relationship of design to computation, directions in visual communication design, formal mathematical methods in design, and societal issues. At the upper division level these themes are developed in courses covering subjects from multimedia to computer-aided design, from formal theories to shape grammars.

Design students are encouraged to work in experimental modes where materials and processes give new information and allow familiar visual and spatial relationships to be seen in new and diverse ways. Through a balance of courses in theory, criticism, and practice, students develop methods and new forms, both functional and expressive.

The Department of Design curricula lead to the Bachelor of Arts, Master of Arts, and Master of Fine Arts degrees. All programs benefit from the rich and varied art resources at UCLA and in the Los Angeles community.

Bachelor of Arts Degree

Preparation for the Major

Required: Design 21, 22, 23, 24, and one course from Design 10, Art 31, or Art History 50 through 57.

The Major

Required: Fourteen upper division courses, selected in consultation with your adviser, including a minimum of three courses from comparative and theoretical studies (Design 101

through 105) and eight courses from the following area studies in design: (1) theories of design (courses C111 through C123), (2) design and computation (courses C131 through C143), (3) visual communication design (courses 154 through 159). No more than four courses may be selected from items 1 and 2. Three additional upper division courses must be selected from the area studies in design listed above and/or from major electives (courses 106 and 165C through 199). In consultation with and with approval of your faculty adviser, other nonmajor courses may be taken.

It is recommended that you have each term's program approved by the departmental adviser.

Note: Consult the *Schedule of Classes* for courses restricted to majors only.

Graduate Study

The following constitutes introductory information regarding graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degrees

The Department of Design offers a Master of Arts degree and a Master of Fine Arts degree.

Master of Arts

Admission

Applicants for admission to the Master of Arts in Design are expected to hold a bachelor's degree from an accredited institution. The bachelor's degree need not be in design. A minimum grade-point average of 3.0 overall in undergraduate upper division work is required. The application dossier must include (1) three letters of recommendation; (2) transcripts of academic record; (3) statement of purpose; (4) sample of work related to studies in design and computation; (5) Graduate Record Examination (GRE) scores; (6) proof of competence in English for applicants whose native language is not English (minimum score of 550 on the Test of English as a Foreign Language).

Acceptance is by a majority vote of the design faculty. Formal faculty review of graduate applicant dossiers takes place toward the end of the Winter Quarter. Students are admitted for the Fall Quarter only.

Areas of Study

Consult department.

Course Requirements

Although a new curriculum is approved for this degree, to date the courses that comprise this curriculum have not been submitted or approved.

Comprehensive Examination Plan

The written comprehensive examination is offered each quarter. A committee of at least three members appointed by the department administers the comprehensive examination. The comprehensive examining committee may conduct an oral query after reviewing the written examination. In case of failure, reexamination may be conducted once only with the consent of the departmental graduate adviser.

Thesis Plan

None.

Master of Fine Arts

Admission

Applicants for admission to the Master of Fine Arts program in Design are expected to hold a bachelor's degree from an accredited institution. The bachelor's degree need not be in art or design. A minimum grade-point average of 3.0 overall in undergraduate upper division work is required. An acceptable portfolio is required, in the form of slides (maximum 20) or videotape or floppy disk. A statement of purpose is also considered. Formal faculty review of graduate applicant portfolios takes place toward the end of the Winter Quarter. Students are admitted for the Fall Quarter only.

Areas of Study

Visual communication design.

Course Requirements

Although a new curriculum is approved for this degree, to date the courses that comprise this curriculum have not been submitted or approved.

Comprehensive Examination Plan

The comprehensive examination consists of an oral examination and a concentrated body of work which is presented as the master's statement. Also required is an accompanying record of the project, consisting of documentation in the form of slides of physical work, research material, and other visual material, and may include a written statement as determined by the graduate guidance committee.

Thesis Plan

None.

Lower Division Courses

10. Nature of Design. (Formerly numbered 30A.) Lecture, three hours; discussion, one hour. Open to nonmajors. Understanding the design process, with emphasis on development of a visual language; study of historic, scientific, technological, economic, and cultural factors influencing design in our physical environment.

21. Color. Studio, six hours; outside study, six hours. Introduction to theories of color to understand interdependence and interaction of color and form, color and quantity, color and placement, and the after-image. P/NP or letter grading.

22. Form. Studio, six hours; outside study, six hours. Interrelation of two-dimensional surfaces and three-dimensional forms with traditional and experimental materials as a foundation for creativity; origination and solution of problems. P/NP or letter grading.

23. Drawing. Studio, six hours; outside study, six hours. Translation of perception through delineation, drawing, and other descriptive media. Emphasis on development of students' motor control by means of freehand and mechanical drawing and by development of analytical and objective observation from life and three-dimensional objects. P/NP or letter grading.

24. Visual Technologies. Studio, six hours; outside study, six hours. Introduction to computer and digital representations and their generation and manipulation. P/NP or letter grading.

32B. Visual Presentation. Studio, six hours. Translation of idea through delineation, drawing, and other descriptive media.

32C. Drawing Methodologies. Studio, eight hours. Fundamentals of graphic representation, including orthographic and isometric projection methods, mechanical drawing and drafting, layout techniques, and introductory computer-aided drafting.

35A. Introduction to Photography. Lecture, two hours; studio, four hours. Introduction to camera operation, photo processing, laboratory and lighting procedures.

35B. Introduction to Tools and Processes. Lecture, two hours; studio, four hours. Introductory design shop course to develop necessary skills with traditional tools and power equipment, including fundamentals of joining, fastening, and finishing both natural and industrial materials, and their appropriate application in fabrication of design prototypes.

Upper Division Courses

101. Introduction to Study of Design. Lecture, three hours; outside study, nine hours. Prerequisite: completion of preparation for the major courses. Limited to juniors/seniors. Historical introduction to principles of design, theories about design process, and culture of artifacts from classical times to the present day. P/NP or letter grading.

102. Introduction to Design and Computation. Lecture, three hours; outside study, nine hours. Prerequisite: completion of preparation for the major courses. Limited to juniors/seniors. Introduction to use of computational methods in representation, creation, and study of designs. Discussion of spatial algorithms, recursive procedures, and formal grammars and languages. Presentation of elementary applications in design. P/NP or letter grading.

103. Introduction to Visual Communication. Lecture, three hours; outside study, nine hours. Prerequisite: completion of preparation for the major courses. Limited to juniors/seniors. Introduction to methodology of design in context of visual communication, with focus on integrative themes and representative case studies that encourage independent student investigation. P/NP or letter grading.

104. Design and Society: Society and Design. Lecture, three hours; outside study, nine hours. Prerequisite: completion of preparation for the major courses. Limited to juniors/seniors. Open to nonmajors with consent of instructor. Historical and thematic examination of how design affects society from classical antiquity to the 20th century in order to understand historically how each type and application of design related to sociological context in which it existed. Consideration of how various design practices and techniques related to each other. P/NP or letter grading.

105. Formal Methods in Design. Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: completion of preparation for the major courses. Limited to juniors/seniors. Investigation and elaboration of mathematical ideas and techniques important as background to formal computational work in design. Topics include sets, relations, and functions; symmetry transformations and their groups; Boolean algebras; graph theory; automata theory and grammars. P/NP or letter grading.

106. Modern Design History. (Formerly numbered 161E.) Lecture, three hours. Limited to juniors/seniors. Open to nonmajors. Historical survey of development of Western industrial culture. Studies of major factors influencing transition from industrial societies to postindustrial information societies.

C111. Formal Theory of Composition: Formal Grammars. Lecture, three hours; outside study, nine hours. Prerequisites: completion of preparation for the major courses, course 102 or 104 or 105 or consent of instructor. Examination of design as a formal enterprise in which rules are adopted and then followed to compose, describe, and evaluate designs. Development in detail of historical, contemporary, and new examples in architecture, painting, sculpture, and other fine and applied arts. Concurrently scheduled with course CM211. P/NP or letter grading.

C112. Formal Theory of Composition: Color Grammars. Lecture, three hours; outside study, nine hours. Prerequisites: completion of preparation for the major courses, course C111 or consent of instructor. Examination of design as a formal enterprise in which rules are adopted and then followed to compose, describe, and evaluate design. Development in detail of historical, contemporary, and new examples in architecture, painting, sculpture, and other fine and applied arts. Concurrently scheduled with course CM212. P/NP or letter grading.

C113. Projects in Composition. Lecture, three hours; outside study, nine hours. Prerequisites: completion of preparation for the major courses, courses C111 and C112, or consent of instructor. Project class in which students pursue individual or group work using formal grammars, including design projects, analytical projects, or research papers. Concurrently scheduled with course CM213. P/NP or letter grading.

C121. Fundamentals of Architectonics: Proportion. Lecture, three hours; outside study, nine hours. Prerequisite: completion of preparation for the major courses. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. Concurrently scheduled with course CM221. P/NP or letter grading.

C122. Fundamentals of Architectonics: Symmetry. Lecture, three hours; outside study, nine hours. Prerequisite: completion of preparation for the major courses. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. Concurrently scheduled with course CM222. P/NP or letter grading.

C123. Fundamentals of Architectonics: Compartment and Order. Lecture, three hours; outside study, nine hours. Prerequisite: completion of preparation for the major courses. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. Concurrently scheduled with course CM223. P/NP or letter grading.

C131. Computational Foundations of Design: Algebra. Lecture, three hours; outside study, nine hours. Prerequisite: course 102, 104, or 105, or consent of instructor. Introduction to algebras of shapes and their applications in design practice and computer-aided design. Concurrently scheduled with course CM231. P/NP or letter grading.

C132. Computational Foundations of Design: Grammars. Lecture, three hours; outside study, nine hours. Prerequisite: course C131 or consent of instructor. Computation in algebras: shape grammars and their formal properties. Concurrently scheduled with course CM232. P/NP or letter grading.

C133. Computational Foundations of Design: Applications. Lecture, three hours; outside study, nine hours. Prerequisites: courses C131 and C132, or consent of instructor. Applications of shape grammars in architecture and design. Concurrently scheduled with course CM233. P/NP or letter grading.

C141. Programming Computer Applications in Architecture and Urban Design. Lecture, three hours; outside study, nine hours. Introductory course in logic of computing through experiments in computer graphics programming. Investigation of both procedural and object-oriented approaches to programming. Concurrently scheduled with course CM241. P/NP or letter grading.

C142. Introduction to Geometric Modeling. Lecture, three hours; outside study, nine hours. Prerequisite: course C141 or Computer Science 141. Survey of geometric and three-dimensional modeling, with emphasis on implementation of three-dimensional solids constructions and editing operations. Basic representations and operations on shapes and solids. Concurrently scheduled with course CM242. P/NP or letter grading.

C143. User Interaction Techniques in Design. Lecture, three hours; outside study, nine hours. Prerequisite: course C141 or knowledge of C++ programming language. Programming techniques for implementing modern computer-user interfaces, specifically looking at issues relevant to building software tools for computer-aided problem solving in architecture and design. Concurrently scheduled with course CM243. P/NP or letter grading.

154. Design for Print Media. Studio, six hours; outside study, six hours. Prerequisites: completion of preparation for the major courses, course 103. Introduction to procedures to create, plan, and produce visual communication design. Emphasis on acquiring and working with visual vocabulary to gain mastery of conceptual and creative procedures by learning technical skills to translate ideas and concepts into visual design and graphic imagery. P/NP or letter grading.

155. Design for Print and Electronic Media. Studio, six hours; outside study, six hours. Prerequisites: completion of preparation for the major courses, course 103, 154. Integration of print and information technology, including video, animation, and multimedia design. Continued emphasis on fully integrating visual vocabulary with mastery of conceptual and creative procedures utilizing various information technologies. P/NP or letter grading.

156. Design for Electronic Media. Studio, six hours; outside study, six hours. Prerequisites: completion of preparation for the major courses, courses 103, 154. Introduction to motion graphics and information design for animated electronic media, including video, CD-ROM, and computer applications. Focus on role of designer as visual communicator and design manager/collaborator, with a range of "time and motion" alternatives. P/NP or letter grading.

157. Design for Interactive Media. Studio, six hours; outside study, six hours. Prerequisites: completion of preparation for the major courses, courses 103, 154, 156. Emphasis on graphic and information design for interactive multimedia applications. Introduction to multimedia and hypertext. Focus on learning role of conceptual designer as visual communicator and design manager who interfaces with appropriate production specialists and media application experts. P/NP or letter grading.

158. Design for Environmental Communication. Studio, six hours; outside study, six hours. Prerequisites: completion of preparation for the major courses, courses 103, 154. Introduction to environmental communication design through experience in the design studio. Focus on aesthetic issues concerning creation of design elements incorporating concepts of spatial dimension, human/environmental scale, motion, and time. Overview of history, technologies, and future of environmental graphics. P/NP or letter grading.

159. Senior Project in Communication Design. Lecture, two hours; discussion, two hours; laboratory, two hours; outside study, six hours. Prerequisites: completion of preparation for the major courses, courses 103, 154, one course from 155 through 158, senior standing. Individual studies organized and conceptualized by senior students. Proposal for research and development of design and production of a body of work within parameters of visual communication design major. May be repeated once for credit.

165C. Communication Design: Video Image. Studio, six hours. Use of video technology (video systems, cameras, displays, editing, storage, and reproduction devices) to integrate image, sound, time, and motion. Emphasis on expression, continuity, and sequential patterns for video communication.

182. Design Processes: World Cultures. Studio, six hours; outside study, six hours. Introduction to early development of tools, cloth, shelters, symbols, and embellishments in world cultures. P/NP or letter grading.

183. Material Processes: Fiber Structure. Studio, six hours; outside study, six hours. Use of basic hand methods of construction to develop both two- and three-dimensional forms, utilizing pliable materials but not to exclude other media. P/NP or letter grading.

184. Material Processes: Surface Embellishment. Studio, six hours; outside study, six hours. Use of hand processes and a variety of materials to develop simple to complex surface pattern systems as a means for creative expression. P/NP or letter grading.

189. Topics in Design. Lecture/discussion, three hours; laboratory, to be arranged. Prerequisite: consent of adviser and instructor. Examination by faculty members of specific problems relevant to design theory and performance. Topics announced in advance. May be repeated for a maximum of 16 units.

193. Proseminar: Design—Senior Studies. Proseminar, three hours. Prerequisite: consent of adviser. Open to senior and advanced students through design faculty advisers. Examination by faculty members of specific problems relevant to design theory and performance. Topics announced in advance. May be repeated twice.

197. Honors Course. Hours to be arranged. Prerequisites: 3.0 GPA overall, 3.5 GPA in major, consent of instructor, junior or senior standing. Individual studies for majors. May be repeated once for credit.

199. Special Studies in Design (2 to 8 units). Hours to be arranged. Prerequisites: 3.0 GPA in major, consent of instructor, senior standing. Individual studies for majors. May be taken for a maximum of eight units.

Graduate Courses

Prerequisite for all courses: consent of instructor. All courses may be repeated for credit (unless otherwise noted) on recommendation of the adviser; they are not open to undergraduate students.

CM211. Formal Theory of Composition: Formal Grammars. (Same as Architecture and Urban Design M224A.) Lecture, three hours; outside study, nine hours. Examination of design as a formal enterprise in which rules are adopted and then followed to compose, describe, and evaluate designs. Development in detail of historical, contemporary, and new examples in architecture, painting, sculpture, and other fine and applied arts. Concurrently scheduled with course C111. S/U or letter grading.

CM212. Formal Theory of Composition: Color Grammars. (Same as Architecture and Urban Design M224B.) Lecture, three hours; outside study, nine hours. Prerequisite: course CM211. Examination of design as a formal enterprise in which rules are adopted and then followed to compose, describe, and evaluate design. Development in detail of historical, contemporary, and new examples in architecture, painting, sculpture, and other fine and applied arts. Concurrently scheduled with course C112. S/U or letter grading.

CM213. Projects in Composition. (Same as Architecture and Urban Design M224C.) Lecture, three hours; outside study, nine hours. Prerequisites: courses CM211, CM212. Project class in which students pursue individual or group work using formal grammars, including design projects, analytical projects, or research papers. Concurrently scheduled with course C113. S/U or letter grading.

CM221. Fundamentals of Architectonics: Proportion. (Same as Architecture and Urban Design M225A.) Lecture, three hours; outside study, nine hours. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. Concurrently scheduled with course C121. S/U or letter grading.

CM222. Fundamentals of Architectonics: Symmetry. (Same as Architecture and Urban Design M225B.) Lecture, three hours; outside study, nine hours. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. Concurrently scheduled with course C122. S/U or letter grading.

CM223. Fundamentals of Architectonics: Composition and Order. (Same as Architecture and Urban Design M225C.) Lecture, three hours; outside study, nine hours. Inquiry concerning architecture of spatial configurations from both a historical position and a mathematical viewpoint. Concurrently scheduled with course C123. S/U or letter grading.

CM231. Computational Foundations of Design: Algebra. (Same as Architecture and Urban Design M228A.) Lecture, three hours; outside study, nine hours. Prerequisite: consent of instructor. Introduction to algebras of shapes and their applications in design practice and computer-aided design. Concurrently scheduled with course C131. S/U or letter grading.

CM232. Computational Foundations of Design: Grammars. (Same as Architecture and Urban Design M228B.) Lecture, three hours; outside study, nine hours. Prerequisite: consent of instructor. Computation in algebras: shape grammars and their formal properties. Concurrently scheduled with course C132. S/U or letter grading.

CM233. Computational Foundations of Design: Applications. (Same as Architecture and Urban Design M228C.) Lecture, three hours; outside study, nine hours. Prerequisite: consent of instructor. Applications of shape grammars in architecture and design. Concurrently scheduled with course C133. S/U or letter grading.

CM241. Programming Computer Applications in Architecture and Urban Design. (Same as Architecture and Urban Design M227A.) Lecture, three hours; outside study, nine hours. Introductory course in logic of computing through experiments in computer graphics programming. Investigation of both procedural and object-oriented approaches to programming. Concurrently scheduled with course C141. S/U or letter grading.

CM242. Introduction to Geometric Modeling. (Same as Architecture and Urban Design M227B.) Lecture, three hours; outside study, nine hours. Prerequisite: course CM241. Survey of geometric and three-dimensional modeling, with emphasis on implementation of three-dimensional solids constructions and editing operations. Basic representations and operations on shapes and solids. Concurrently scheduled with course C142. S/U or letter grading.

CM243. User Interaction Techniques in Design. (Same as Architecture and Urban Design M227C.) Lecture, three hours; outside study, nine hours. Prerequisite: course CM241 or knowledge of C++ programming language. Programming techniques for implementing modern computer-user interfaces, specifically looking at issues relevant to building software tools for computer-aided problem solving in architecture and design. Concurrently scheduled with course C143. S/U or letter grading.

280. Communication Design: Graphics/Video/Computer (2 to 8 units). Studio, two to four hours. Advanced exploration of graphic and electronic imaging processes. Emphasis on research and individual creative manipulation of graphic media and electronic technologies. Development of original concepts and expressive applications.

284. Ceramics (2 to 8 units). Studio or studio/seminar, to be arranged. Prerequisite: consent of instructor. Advanced creative research utilizing ceramic media. Emphasis on development of original, expressive, individually produced ceramic art.

287. Form and Structure (2 to 8 units). Studio or studio/seminar, to be arranged. Prerequisite: consent of instructor. Exploration of form, with emphasis on expressive experimentation in materials and processes.

288. Fiber Structures (2 to 8 units). Laboratory, two to four hours. Advanced formative work in traditional and experimental processes of fabric construction utilizing fiber media.

290. Design Seminar: Collaborative View. Seminar, three hours. Critical and theoretical examination of concepts underlying the creative process, including initiation of an idea, its development, and its social and historical context.

292. Shelter (2 to 8 units). Development of individual projects to investigate concepts of shelter. Exploration of traditional and contemporary forms, methods, and materials.

293. Interior Space Design (2 to 8 units). Concept and practice of designing interior spaces. Evaluation of visual and functional needs for interior spaces (ranging from personal to social spaces) in two- and three-dimensional projects involving color, light, surface, materials, equipment, furniture, etc.

294. Industrial Design (2 to 8 units). Laboratory, two to four hours. In-depth studies in topics such as design and management, person/object compatibility, visual identity programs, containing systems, transportation, design for developing countries, ergonomics, urban components, area studies, materials, and processes.

295. Exhibition Design (2 to 8 units). Laboratory, two to four hours. Interpretation and presentation of materials for exhibition. Students may elect to work with instructor and gallery staff on regularly scheduled productions or they may outline their own project and proceed by producing studies, renderings, or schematics or by fabricating models.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research (2 to 8 units). Prerequisite: consent of instructor.

The Department of Design reserves the right to hold for exhibition purposes examples of any work done in classes and to retain for the permanent collection of its galleries such examples as may be selected.

Scope and Objectives

This undergraduate major aims to provide a liberal education in relation to the critical issues and problems common to developing countries from a global or theme-oriented perspective. It is designed for students who are interested in careers related to international development in academia or in public or private agencies.

Bachelor of Arts Degree

Preparation for the Major

You must be a sophomore in good standing to enter the major. No specific courses are required as preparation for the major, but you should have some beginning experience in the social sciences at the college level.

The Major

Required: Fifty-six units of upper division courses (including the four core courses, Development Studies 100A-M100B, and Economics 110 or 111), taken for a letter grade, and the foreign language requirement. (For the quantitative methods requirement, some lower division courses are accepted in place of upper division courses.) Courses applied toward the major may be selected from the list in item 5 below. Substitutions may be made only with consent of the faculty adviser.

The major consists of six parts (courses marked with an asterisk have requisites):

- (1) Development Studies 100A-M100B.
- (2) Economics 110* or 111*.
- (3) Four core courses (two should be from the same discipline) from Anthropology 130*, 150*, Economics 112*, 191*, Geography 121, 133, Political Science 115, 167A*, 168*, Sociology 101, 184.
- (4) One course in quantitative methods from Anthropology 180*, 186, Biostatistics 100A, Economics 40, Geography 171*, Political Science 6, Sociology 18, 104, 112*, 113*, Statistics 50.
- (5) Twenty-four units of elective courses, including at least 16 units to be divided equally between two of the world's developing areas (e.g., Africa, Central and Eastern Europe/Central Asia, East Asia, Latin America, the Near East, South and Southeast Asia), selected from Anthropology 151*, 152, 153, M154, 161*, 165*, 167, 171, 173Q, 174P, 175R, 175T, 177, 180*, 186, Community Health Sciences 132, Economics 103A through 103Z*, 120*, 130*, 150*, 151*, 171*, 180*, 191*, 192*, Education M108*, C203*, 204B, 204C, 204D, 204F, 228*, 234, 238, 252B*, 253B,

253C, Geography 122*, 124*, M128*, 135, 142, 148*, 151*, 181, 182A, 182B, 186, 187, 188, 189, History 106A, 106B, 106C, 107A, 107B, 109A, 109B, 110A, 110B, 111A, 111B, 112A through C112D, 113, 134A, 134B, 165A, 165C, 166, 167A through 167D, 168, 169*, 170A, 171, 173, 174, M175A through 175Z*, 176A, 176B, 176C, 177, 178A, 178B, 179A, 179B, 182A*, 182B*, 183A*, 183B*, 184*, 188A, 188B, 188C, 190A, 190B, 197E, Latin American Studies 197, 199*, Political Science 124*, 130, 131*, 156A, 156B, 157, 159, 163A, 163B, 164, 166A through 166D, 167A*, 168*, C197A through C197D*, Sociology 105*, 116, 156, 157, 160, 186, 187, 188, 190, Urban Planning 232A, 232B, 235A*, 235B*, 236A, 246, 266, 267A*, 267B*, 269. Consult the program counselor regarding other possible electives that may be applied toward the major.

(6) Twenty-four quarter units in one modern foreign language or the equivalent in transfer units. You may also take a proficiency examination administered and evaluated by members of the program faculty (or by outside faculty for languages not familiar to program faculty).

Honors Program

Development studies majors who have completed Development Studies 100A-M100B and who have a 3.5 grade-point average in all courses offered for the major are eligible to formally apply for the honors program. In addition to completing all courses required for the major, you must take courses 195A-195B-195C, in which you research, write, and present an honors thesis. To receive honors at graduation, you must have at least a 3.5 GPA in courses applied toward the major (including 195A-195B-195C) and an overall GPA of 3.0.

Highest honors are awarded to students who complete the major (including courses 195A-195B-195C) with a 3.75 GPA and who produce an exceptional thesis.

Upper Division Courses

100A-M100B. Introduction to Development Studies. Seminar, three hours. Two-term seminar for undergraduates designed to examine concepts and issues arising from economic, social, and political change in the Third World. **100A.** Economic Development and Culture Change. (Formerly numbered M100A.) Prerequisites: Anthropology 9 or consent of instructor, some beginning experience in social sciences at college level. **M100B.** Political Economy of Development. (Same as Political Science M197G.) Prerequisite: some beginning experience in social sciences at college level.

195A-195B-195C. Directed Studies for Honors. Prerequisites: courses 100A-M100B, 3.5 GPA in courses offered for the major, formal application to honors program, consent of instructor. **195A.** Research, discussion, and planning of honors thesis. **195B-195C.** Research, preliminary drafting, and final writing of honors thesis. In Progress grading for course 195B (credit to be given only on completion of course 195C).

DIVERSIFIED LIBERAL ARTS

*Interdepartmental Program
College of Letters and Science*

UCLA
A316 Murphy Hall
Box 951430
Los Angeles, CA 90095-1430
(310) 206-6661, 825-9315

Undergraduate Certificate Program

The Diversified Liberal Arts Program (DLAP) is not a major, but a special certificate program through which you may waive the Multisubject Assessment for Teachers (MSAT) in California. The MSAT examination must be passed (or the DLAP completed) before students in elementary school teaching credential programs may begin their student teaching. To earn an elementary school teaching credential, you must complete an accredited program offered through a graduate school of education.

To earn the certificate in diversified liberal arts, you must complete a major in the College of Letters and Science. You must also complete DLAP requirements in four areas: (1) language and literature, (2) mathematics and science, (3) history and social science, (4) arts and culture.

Requirements for one of these areas are normally satisfied by courses taken for your major; in addition, you must complete a pattern of courses in specified areas.

You must petition for admission to the program and are advised to do so as soon as possible. Transfer students may petition to have suitable courses completed at other institutions applied toward the course requirements of this program. The college certifies completion of the program.

If you do not complete the program prior to graduation, you must petition out of the program to be eligible to graduate.

For further information about the program and a complete list of courses that apply, contact a counselor in the College of Letters and Science, A316 Murphy Hall (310-206-6681). For information regarding the Teacher Credential

Program in the Graduate School of Education and Information Studies, see a counselor in 1009 Moore Hall (310-825-8328).

EARTH AND SPACE SCIENCES

College of Letters and Science

UCLA
3806 Geology

Assistant Professors

Craig E. Manning, Ph.D. (*Geochemistry, Geology*)
Mary R. Reid, Ph.D. (*Geology, Geochemistry*)
Paul J. Tackley, Ph.D. (*Planetary Science*)

Adjunct and Visiting Professors

Donald Hallinger, M.S., *Visiting (Geology)*
Paul M. Menfield, Ph.D., *Adjunct (Environmental Geology)*
Floyd F. Sabins, Jr., Ph.D., *Adjunct (Geology)*

Adjunct Associate Professor

Frank Kyte, Ph.D. (*Geochemistry*)

Adjunct Assistant Professor

Steven Salyards, Ph.D. (*Seismology*)

Scope and Objectives

The disciplines of geology, geochemistry, geophysics, paleobiology, and space physics are concerned with the structure and evolution of the solar system, Earth, and life: essentially, the physical environment and its interaction with biota. These studies entail the application of fundamental physics and chemistry to a broad subject area stretching from astronomy at one extreme to biology at the other. Areas which are emphasized at UCLA include isotope and trace element analyses, petrology and mineralogy, sedimentology, paleobiology and organic geochemistry, structural geology and tectonophysics, seismology, the Earth's interior, planetary physics, and space plasmas.

The variety of techniques applied lead to several specializations within the five main disciplines. Students completing their studies with a B.S. or M.S. degree usually are employed by industry. Many are employed in environment-related activities; others are involved in mineral or oil exploration or in construction. Students attaining the Ph.D. degree are usually employed by universities or governmental and industrial research groups.

The Bachelor of Arts program in Earth Sciences is intended to provide a broad background in Earth sciences that is especially appropriate for students intending to become K through 12 teachers in Earth, physical, or life sciences. It may also be of interest to students who plan careers in environmental sciences, law, government, business, journalism, public health, medicine, or dentistry. Those who intend to become professional geologists, geochemists, or geophysicists and/or to continue into graduate studies in Earth or space sciences are urged to pursue one of the B.S. degrees.

Bachelor of Science in Geology

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 2, 51A, 51B, 61; Biology 2; Chemistry and Biochemistry 11A, 11B/11BL; Mathematics 31A, 31B, 32A; Physics 8A/8AL, 8B/8BL, and 8C/8CL or 6B; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C - .

The Major

Required: Earth and Space Sciences 103A, 103B, 103C, 111, 112, 116, 121A-121B, 135, and three additional courses from C107, C109, 119, 129, 133, 134, 136C, 137, 139, 141, 150, 152.

Students with an interest in nonrenewable natural resources are advised to take courses 136C, 137, 139, 141, and/or 150. Those interested in geochemistry are advised to take Earth and Space Sciences 103C, C107, C109, 119, 121A-121B, C126, and/or Chemistry and Biochemistry 110A, 110B, 114, 132A, 132B, 153A, 184.

Bachelor of Science in Geology — Engineering Geology

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 51A, 51B, 61; Chemistry and Biochemistry 11A, 11B/11BL; Mathematics 31A, 31B, 32A, 33A; Physics 8A/8AL, 8B/8BL, 8C/8CL; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. *Recommended:* Mathematics 32B. All courses must be passed with a minimum grade of C - .

The Major

Required: Earth and Space Sciences 103A, 103B, 111, 112, 121A-121B, 135, 139; Civil and Environmental Engineering 108, 120, 121, 128L, 150; one course from Earth and Space Sciences C126, 129, 134, 136C, 137, 141, 150, Geography 100, Civil and Environmental Engineering 151, 155.

Bachelor of Science in Geology — Paleobiology

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 2, 51A, 51B, 61; Biology 5L; Chemistry and Biochemistry 11A, 11B/11BL, 11CL; Life Sciences 1, and 3 or 4. All courses must be passed with a minimum grade of C - .

The Major

Required: Earth and Space Sciences 103B, 111, 112, 116; Chemistry and Biochemistry 132A, 132B/132BL, 153A, 153L; six courses from Chemistry and Biochemistry 153B, 154, Biostatistics 110A, 110B, Biology 101A, 101B, 102, 105, 110, 111, 117, 120, 122, 123, 147, 148, Earth and Space Sciences 119, 121A-121B, 133, 141.

Bachelor of Science in Geophysics — Applied Geophysics

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 51A, 51B, 61; Chemistry and Biochemistry 11A; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C - .

The Major

Required: Earth and Space Sciences 111, 112, 136A, 136B, 136C, 152; Physics 105A, 105B, 110A, 110B, 114; two courses from Earth and Space Sciences 103A, 103B, C107, 134, 137, 139, 153, 154, 155, 205, 265, Mathematics 140A, 140B, 140C, Physics 112, 115A, 116, 131, 132, Statistics M152A, 152B, or other courses with consent of adviser.

Bachelor of Science in Geophysics — Geophysics and Space Physics

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 9; Chemistry and Biochemistry 11A, 11B/11BL, 11C; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL; Program in Computing 3 (recommended) or 10A or more advanced placement by examination. All courses must be passed with a minimum grade of C - .

The Major

Required: Earth and Space Sciences 134, M140, 152, 153, 154, 155; Physics 105A, 105B, 110A, 110B, 112; Physics 131 or Mathematics 145; two upper division courses from the physical sciences, engineering, or mathematics (must be approved by the undergraduate adviser).

Students planning to do graduate work in specialized careers in Earth sciences should, when possible, take appropriate courses in departments outside the major in addition to those already specified. Suggested graduate programs for various fields of emphasis are available in the Student Affairs Office, 3683 Geology, and provide guidelines in selecting upper division courses.

Qualified undergraduate students may, with consent of their advisers and the instructor, take Earth and Space Sciences graduate courses numbered from 200A through 249.

Bachelor of Arts in Earth Sciences

Preparation for the Major

Required: Earth and Space Sciences 1 or 1H, 2, 9, 15, 51A, 51B, 61; Biology 2 or Life Sciences 1; Chemistry and Biochemistry 11A, 11B/11BL; Mathematics 3A, 3B, and 3C, or 31A and 31B; Physics 6A, 6B, and 6C, or 8A/8AL and 8B/8BL. All courses must be passed with a minimum grade of C - .

The Major

Required: Earth and Space Sciences 103A, 103B, 111, 112, 116; five additional upper division courses from Earth and Space Sciences other than 100 or 120, English 129C, Geography 100/100A, 101/101A, 104, 105/105A, 106/106A, 107, 113, or other upper division physical sciences, life sciences, or engineering courses by petition.

Honors in Geology or Geophysics

The honors program in geology or geophysics is intended to provide exceptional students an opportunity for advanced research and study under the tutorial guidance of a member of the faculty. Requirements for admission to candidacy are the same as those required for admission to the Honors Programs of the College of Letters and Science. Qualified students wishing to enter the program must submit a completed application form to the departmental honors committee near the end of their junior year. Honors in geology or geophysics are awarded at graduation to those students who have a cumulative GPA of 3.5, who have completed at least 90 graded units at the University of California, and who have completed a minimum of two terms (eight units) of Earth and Space Sciences 199H leading to the preparation of a satisfactory honors thesis. Students demonstrating exceptional ability are awarded highest honors.

Graduate Study

The following constitutes introductory information regarding graduate degree programs. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

The Department of Earth and Space Sciences offers programs leading to the M.S. and Ph.D. degrees in Geochemistry, in Geology, and in Geophysics and Space Physics.

Geochemistry

Master's Degree

Admission

A bachelor's degree in chemistry, geology, physics, or a related field is required. Applicants must have outstanding records in the basic sciences, physics, chemistry, and mathematics. Recent Graduate Record Examination (GRE) General Test and Subject Test scores are required; the Subject Test may be in any appropriate field of science. Students planning to work for the Ph.D. degree are not encouraged to obtain the M.S. degree.

Areas of Study

The program in geochemistry offers study in biogeochemistry, crystal chemistry, experimental petrology, isotopic studies of stable and radioactive elements, marine geochemistry, meteorite research, planetology, and lunar geochemistry.

Course Requirements

A minimum of nine courses is required for the degree, at least six of which must be graduate-level courses. Sixteen units of 500-series courses may be applied toward the total course requirement for the M.S. in Geochem-

istry. Twelve units may be applied toward the minimum graduate course requirement.

Each course of study is worked out individually by the advising committee in consultation with the student. Students are expected to attain, either through previous training or through prescribed coursework, a common mastery of the subject matter in Earth and Space Sciences 51A, 51B, C107, C109, 234B, and Chemistry and Biochemistry 110A, 110B, as well as more advanced courses in particular fields, and some familiarity with the methods of field geology (Earth and Space Sciences 61, 111G strongly recommended). Students are required to register in one of the following each quarter: Earth and Space Sciences 235A, 235B, 235C or 295A, 295B, 295C.

Comprehensive Examination Plan

The advising committee prepares and administers the final examination (which normally is oral). In the preparation for this examination, the committee takes proper recognition of the fact that some students are better qualified in chemistry and others in geology. However, it is required that a distinct competence in one of these fields be matched by at least an adequate performance in the other. In most cases, a failed final examination can be repeated one additional time.

Thesis Plan

The thesis must be approved by the student's research director (who usually is the chair of the advising committee), as well as by the other members of the student's advising committee. If students choose the thesis plan, no examination is required.

Doctoral Degree

Admission

A bachelor's degree in chemistry, geology, physics, or a related field is required. Applicants must have outstanding records in the basic sciences, physics, chemistry, and mathematics. Recent Graduate Record Examination (GRE) General Test scores are required; the Subject Test is optional and may be in any appropriate field of science. Students planning to work for the Ph.D. degree are not encouraged to obtain the M.S. degree.

Major Fields or Subdisciplines

- The program in geochemistry offers study in biogeochemistry, crystal chemistry, experimental petrology, isotopic studies of stable and radioactive elements, marine geochemistry, meteorite research, planetology, and lunar geochemistry.

Course Requirements

Students are expected to complete at least the minimum number of courses which are required for the M.S. degree. Each course of study is worked out individually by the advising committee in consultation with the student. Students are expected to attain, either through

previous training or through prescribed coursework, a common mastery of the subject matter in Earth and Space Sciences 51A, 51B, C107, C109, 234B, and Chemistry and Biochemistry 110A, 110B, as well as more advanced courses in particular fields, and some familiarity with the methods of field geology (Earth and Space Sciences 61, 111G strongly recommended). Students are required to register in one of the following each quarter: Earth and Space Sciences 235A, 235B, 235C or 295A, 295B, 295C.

Written and Oral Qualifying Examinations

Written Qualifying Examination. This examination must be taken before the end of the first year of the doctoral program if the student has a master's degree; otherwise, it must be taken before the end of the second year of enrollment. It may be given in either a question/answer format or in a proposal format, at the discretion of the student.

The question/answer format is a conventional written examination that covers the field of geochemistry and related areas of geology and chemistry. It may be followed by an oral part, at the discretion of the examining committee.

The proposal format is based on three written research proposals prepared by the student and submitted to the examining committee at least 10 days before the examination. The proposals must be concise, must entail three dissimilar projects, and one of them should cover the intended dissertation topic. The proposals are presented briefly to the examining committee orally, and the committee examines their originality and scientific merit. The oral examination is not necessarily limited to the topics of the proposals.

In case of failure, an examination of either format can be repeated at the discretion of the examining committee.

University Oral Qualifying Examination. After passing the written qualifying examination, students must consult their faculty adviser and the graduate adviser regarding nomination of the doctoral committee and arrange a time for the examination. At least a week before this examination, students must provide each member of the doctoral committee with a written prospectus of their proposed dissertation research. The subject matter covered in the examination includes, but is not limited to, the proposed research. Repetition of a failed examination is at the option of the doctoral committee.

Geology

Master's Degree

Admission

A bachelor's degree in geology, biology, chemistry, physics, or other science is required. Applicants must have outstanding records in the

relevant basic sciences and mathematics. Recent Graduate Record Examination (GRE) General Test scores are required. Subject Test scores are optional and may be in any appropriate subject.

Qualified students may proceed directly toward the Ph.D. degree without first obtaining an M.S. degree.

Areas of Study

The program in geology offers study in geomorphology, glaciology, micropaleontology, mineral deposits, mineralogy, organic geochemistry, paleobiology, petrology, paleontology, sedimentology, stratigraphy, structural geology, tectonophysics, and other fields.

Course Requirements

Each course of study is worked out individually by the advising committee in consultation with the student. It may include appropriate courses offered by other departments. Unless students have already passed Earth and Space Sciences 61 and 111, they are required to take either 195G or the sequence 61, 111G in their first year of residence. Depending on students' performance in course 195G, they may subsequently be required to take all or part of the undergraduate sequence. Students are required to register in one of the following each quarter: Earth and Space Sciences 235A, 235B, 235C or 295A, 295B, 295C.

Courses applied toward the 36-unit minimum requirement must be from the 100, 200, or 500 series in the physical or life sciences. At least 24 units must be graduate-level courses, of which at least four units must be a geology seminar (Earth and Space Sciences 251 through 260). Except for courses 597 and 598, courses graded on an S/U basis are not applicable toward the requirements. The advising committees may require additional courses in light of individual educational objectives and backgrounds.

Eight units of 500-series courses may be applied toward the total course requirement for the M.S. in Geology. Four units may be applied toward the minimum graduate course requirement.

Comprehensive Examination Plan

This plan is recommended for those continuing to the Ph.D. degree. The examination is administered by the student's three-member advising committee and one additional member who is appointed by the graduate adviser following consultation with the student. It consists of a six-hour written part and a subsequent oral part. The written part covers the student's major field of study, whereas the oral part may be more general in scope. If the examination is failed, the committee may, on the basis of the student's academic performance, recommend either termination of graduate study or further coursework followed by another examination. Reexamination is not normally permitted more than once.

Thesis Plan

This plan is normally required for students not continuing to the doctorate. The thesis committee consists of the three-member advising committee, whose chair is the supervisor of the thesis research. One member of the committee may be from another department. The thesis subject may be selected at once and the research undertaken concurrently with coursework. In any event, it should normally be selected within the first year of residence. The completed thesis must be approved by the thesis committee. If it is not, the committee may, on the basis of the student's academic performance, recommend either termination of graduate study or further coursework or research or both, leading to submission of a revised thesis. Revision and resubmission is not normally permitted more than once.

Doctoral Degree

Admission

A bachelor's degree in geology, biology, chemistry, physics, or other science is required. Applicants must have outstanding records in the relevant basic sciences and mathematics. Recent Graduate Record Examination (GRE) General Test scores are required. Subject Test scores are optional and may be in any appropriate subject.

Qualified students may proceed directly toward the Ph.D. degree without first obtaining an M.S. degree.

Major Fields or Subdisciplines

The program in geology offers study in geomorphology, glaciology, micropaleontology, mineral deposits, mineralogy, organic geochemistry, paleobiology, petrology, paleontology, sedimentology, stratigraphy, structural geology, tectonophysics, and other fields.

Course Requirements

Students are expected to complete at least the minimum number of courses which are required for the M.S. degree and must take a geology seminar each year. Each course of study is worked out individually by the advising committee in consultation with the student. It may include appropriate courses offered by other departments. Unless students have already passed Earth and Space Sciences 61 and 111, they are required to take either 195G or the sequence 61, 111G in their first year of residence. Depending on students' performance in course 195G, they may subsequently be required to take all or part of the undergraduate sequence. Students are required to register in one of the following each quarter: Earth and Space Sciences 235A, 235B, 235C or 295A, 295B, 295C.

Written and Oral Qualifying Examinations

Written Qualifying Examination. This examination must be taken before the end of the first year of the doctoral program if the student has

a master's degree; otherwise, it must be taken before the end of the second year of enrollment. It is administered by the advising committee augmented by a fourth member who is appointed by the graduate adviser in consultation with the student and serves as chair of the examining committee. It is given in either a question/answer format or a proposal/proposition format, which the student may select.

The question/answer format consists of a two-part examination. The first part is written and can cover any aspect of geology in which the student has had training. The second part is oral, is taken no later than a week after the first part, and can cover subjects from the written part and the field of the proposed dissertation, although it is not limited to these topics.

The proposal/proposition format consists of an oral examination based on three written research proposals or scientific propositions in any combination, which must be submitted to the examining committee at least 10 days before the examination. One of the essays must specify the intended dissertation research. The examination is concerned with the originality and soundness of the proposals and propositions, their scientific significance, and the quality of their elucidation and defense, although it is not limited to these topics.

University Oral Qualifying Examination. After passing the written qualifying examination, the student must consult a faculty adviser and the graduate adviser regarding nomination of the doctoral committee and arrange a time for the examination. At least a week beforehand, the student must provide each member of the doctoral committee with a written prospectus of the proposed dissertation research. The subject matter covered in the examination includes, but is not limited to, the proposed research. Repetition of a failed examination is at the option of the doctoral committee.

Geophysics And Space Physics

Master's Degree

Admission

A bachelor's degree in a physical science, engineering, mathematics, or other field is required. Undergraduate work must include junior- or senior-level courses in mathematical methods, dynamics, electromagnetism, and thermodynamics. Recent Graduate Record Examination (GRE) General Test scores are required. Subject Test scores are desirable, preferably in Physics, although Mathematics or Geology are also acceptable.

Undergraduate preparation for admission to the program in geophysics and space physics with specialization in applied geophysics is the equivalent of the B.S. in the Applied Geophysics specialty, including Earth and Space Sciences 111, 112, 136A, 136B, 136C, 152, Physics 105A, 105B, 110A, 110B, and 114. Exceptions may be allowed, but in particular,

deficiency in geophysical fieldwork must be made up.

Areas of Study

The program in geophysics and space physics offers study in Earth's interior (seismology, gravity, thermal regime, geomagnetism, tectonics), geophysical fluid dynamics (turbulence, rotating systems, stability, hydromagnetism), planetology (orbital dynamics, planetary interiors, surfaces and atmospheres, solar-system origin), space physics (magnetosphere, radiation belts, solar wind, magnetic fields, cosmic rays), and applied geophysics. Other comparable areas of study are also possible.

The objective of the program in geophysics and space physics with specialization in applied geophysics is to provide advanced technical training to students who plan to do detailed analysis of geophysical data in industry, mainly in petroleum exploration.

Course Requirements

Courses applied toward the 36-unit minimum requirement must include courses Earth and Space Sciences 200A, 200B, 200C and at least 12 additional units of 200-series (graduate) courses, of which at least half must fall within a single field of concentration (geophysics, geophysical fluid dynamics, planetology, or space physics) which students select with the advice and approval of their faculty adviser, and the remainder must contribute to their general competence in geophysics and space physics.

For the program in geophysics and space physics with specialization in applied geophysics, courses applied toward the 36-unit minimum requirement must include Earth and Space Sciences 200A and 202, plus at least two courses from 203, 204, 205, 222. Eight additional units of graduate-level courses are required; courses recommended are Earth and Space Sciences 200B, 208, M224A, M224B. Up to eight units of course 596 or 598 may count toward the graduate-level course requirements. Except for course 596 or 598, courses graded on a S/U basis do not apply toward the minimum requirement.

Comprehensive Examination Plan

Students may choose one of two options for this examination: (1) a written six-hour examination in question/answer format or (2) an examination in written proposal/oral format. The proposal format consists of an oral examination based on (but not restricted to) two written research proposals which, along with a written statement of their field, must be submitted to the examining committee before the examination. The breadth of the subject matter of the proposals must be approved by the examining committee.

In either format, the examination tests students' general knowledge of their field (e.g., Earth's interior, geophysical fluid dynamics, planetology, or space physics) as defined by

students in a written statement to which they must get the examining committee's concurrence before arranging the examination. The examining committee consists of three or more faculty members, appointed by the graduate adviser in consultation with the student, of whom at least three must be from the department and one must be from outside the student's field of concentration. Courses in the 500 series and courses graded on a S/U basis may not be applied toward the minimum requirement.

The comprehensive examination plan is not offered for the program in geophysics and space physics with specialization in applied geophysics.

Thesis Plan

At least three members of the thesis committee must be from the department. Eight units of 500-series courses (596, 598) may be applied toward the total course requirement.

A thesis is required for the program in geophysics and space physics with specialization in applied geophysics. A qualifying examination on the suitability of the proposed thesis should be taken by the fourth quarter of residence. A final examination must be taken on the adequacy of the completed thesis. The examining committee consists of three or more faculty members, appointed by the graduate adviser in consultation with the student, of whom at least three must be from the department.

Doctoral Degree

Admission

A bachelor's degree in a physical science, engineering, mathematics, or other field is required. Undergraduate work must include junior- or senior-level courses in mathematical methods, dynamics, electromagnetism, and thermodynamics. Recent Graduate Record Examination (GRE) General Test scores are required. Subject Test scores are desirable, preferably in Physics, although Mathematics or Geology are also acceptable.

Qualified students may proceed directly toward the Ph.D. degree, although most obtain the M.S. degree in the process.

Major Fields or Subdisciplines

The program in geophysics and space physics offers study in Earth's interior (seismology, gravity, thermal regime, geomagnetism, tectonics), geophysical fluid dynamics (turbulence, rotating systems, stability, hydromagnetism), planetology (orbital dynamics, planetary interiors, surfaces and atmospheres, solar-system origin), space physics (magnetosphere, radiation belts, solar wind, magnetic fields, cosmic rays), and applied geophysics. Other comparable areas of study are also possible.

Course Requirements

Six courses are required, three fundamental physics courses and three courses in the major geophysics disciplines. Students must attain a grade-point average of 3.3 or better, on a 4.0 scale in the six courses.

Fundamental Physics Examinations. Courses satisfying the fundamental physics requirement may be chosen from the following: Earth and Space Sciences 201, 202, 203, Physics 210A, 210B, 215A, 220, 222A, 231A, Chemistry and Biochemistry C223A. Exceptions are that students may not get credit for both examinations in the following pairs due to overlap of subject matter: Earth and Space Sciences 201 and Physics 220; Earth and Space Sciences 203 and Physics 210A; Earth and Space Sciences 203 and Physics 210B; Physics 215A or Chemistry and Biochemistry C223A.

In addition to the above listed courses, students may petition to count toward this requirement either or both of Physics 221A and 221B. Approval of a petition depends on relevance of quantum mechanics to more advanced study planned by the student. Other substitutions may be petitioned in exceptional cases. Students who can demonstrate they have mastered the material elsewhere may petition for course credit. The fundamental physics examinations must all be passed prior to undertaking the departmental written qualifying examination.

Courses in the Three Major Geophysics Disciplines. Earth and Space Sciences 200A, 200B, 200C, on solid Earth, oceans and atmospheres, and space plasma physics must be passed with an average grade of 3.3 or better. These examinations must be attempted by the fourth quarter of enrollment. Students not achieving the necessary level of achievement by the sixth quarter of enrollment are not eligible to continue in the Ph.D. program and may not attempt the departmental written qualifying examination. Exceptions to this requirement may be granted by petition under extenuating circumstances.

Written and Oral Qualifying Examinations

Written Qualifying Examination. Students may choose one of two options for this examination: (1) a written six-hour examination in question/answer format or (2) an examination in written proposal/oral format. The proposal format consists of an oral examination based on (but not restricted to) two written research proposals which must be submitted to the examining committee at least 10 days before the examination. The breadth of the subject matter of the proposals must be approved by the examining committee.

The examination tests students' general knowledge of their field (Earth's interior, geophysical fluid dynamics, planetology, or space physics) as defined by students in a written statement to which they must get the examining committee's concurrence before arranging

the examination. The examining committee consists of three or more faculty members, appointed by the graduate adviser in consultation with students, of whom at least three must be from the department and one must be from outside the students' field of concentration.

University Oral Qualifying Examination. After passing the field examination, students must consult their faculty adviser and the graduate adviser regarding nomination of the doctoral committee and arrange a time for the examination as soon as possible. The examination determines the suitability of the chosen problem for the Ph.D. dissertation and their capacity to pursue research on the problem, but it is not limited to these topics. A written prospectus on their topic must be handed to the committee at least 10 days before the examination. Repetition of a failed examination is at the option of the doctoral committee. If students do not pass this examination within five years after entering the program, they are subject to dismissal.

Lower Division Courses

1. Introduction to Earth Science. Lecture, three hours; laboratory, two hours. Not open to students with credit for or currently enrolled in course 1H or 100. Elements of Earth science; study of Earth materials; nature and interpretation of geologic evidence; study of geologic processes; historical aspects of geology.

1H. Fundamentals of Earth Science. Lecture, three hours; laboratory, two hours; two field days. Not open to students with credit for or currently enrolled in course 1 or 100. Particularly recommended for future physical sciences majors with strong high school or some lower division preparation. Introduction to Earth materials, physical geology, and tectonics, with examples of geophysical and geochemical methods.

2. Earth History. Lecture, three hours; laboratory, three hours; fieldwork. Enforced prerequisite: course 1 or 1H. Methods of historical science; consideration of special problems related to physical and biological evolution of Earth from earliest time to the present.

5. Earth Science and Society: Geological Ecological Interactions. Lecture, three hours; discussion, two hours; field trips. Geologic aspects of major environmental problems, with emphasis on lithosphere/biosphere interactions. Problems of exploration and exploitation of fossil fuel resources. Comparison of society-produced materials and natural cycles.

8. Earthquakes. Lecture, three hours; discussion, one hour. Causes and effects of earthquakes, with special emphasis on problems of living with earthquakes in Southern California. Topics include relationship between earthquakes and local and regional geology, types of earthquakes, past and future earthquakes in California, earthquake engineering, disaster preparedness, and prospects for predicting or controlling earthquakes.

9. Origin and Evolution of Solar System. Lecture, three hours; discussion, one hour. Properties of sun, planets, asteroids, and comets. Astronomical observations relevant to understanding the solar system and its origin. Dynamical problems, including examination of fallacious hypotheses. Meteoritic evidence regarding earliest history of the solar system. Chemical models of solar nebula. Space exploration and its planning.

15. Introduction to Oceanography. Lecture, three hours; discussion, one hour. Not open for credit to students with credit for Biology 25. Processes responsible for chemical composition of ocean and current circulation patterns. Seafloor spreading and morphology of ocean floor. Biological productivity, marine ecology, and minerals forming in the ocean.

16. Major Events in History of Life. Lecture, three hours; laboratory, two hours. Designed for nonmajors. History of life on Earth as revealed through the fossil record. P/NP or letter grading.

17. Dinosaurs and Their Relatives. Lecture, three hours; laboratory, two hours; one optional field trip. Designed for nonmajors. Exploration of biology, evolution, and extinction of dinosaurs and close relatives, in context of history of biosphere. Information from paleontology, biology, and geology.

20. Natural History of Southern California. Lecture, one hour; laboratory, three hours; four field weekends; outside study, eight hours. Identification, distribution, diversity of native plants and communities; identification and interpretation of rocks, minerals, and geologic features and geologic history of physiographic regions of Southern California. Emphasis on field-based learning. P/NP or letter grading.

51A. Mineralogy-Lithology. Lecture, three hours; laboratory, six hours. Enforced prerequisite: course 1 or 1H. Recommended: completion of chemistry requirement. Mineralogic crystal chemistry; relation of physical properties to structure. Structural classification and petrogenesis of major minerals and rocks. Laboratory study of crystallography and identification of minerals and igneous, sedimentary, and metamorphic rocks in hand sample.

51B. Optical Mineralogy-Petrography. Lecture, three hours; laboratory, six hours. Enforced prerequisite: course 51A. Preparation: one introductory high school or college physics course. Principles of optical crystallography. Utilization of optical properties to identify nonopaque minerals in immersion media and in thin section. Study of common igneous, sedimentary, and metamorphic rocks in thin section.

61. Elements of Field Geology. Lecture, two hours; laboratory, three hours; fieldwork, one day per week. Enforced prerequisites: courses (1 or 1H) and 2. Majors must have completed or be concurrently enrolled in course 51B. Techniques of geologic mapping; preparation of geologic reports; methods of mapping faults and folds, sedimentary, igneous, and metamorphic terrains, and Quaternary deposits; introduction to field methods in engineering and environmental geology, petroleum geology, and mining geology and mineral exploration; interpretation of geologic maps; field exercises in pace-and-compass topographic and geologic mapping.

Upper Division Courses

100. Principles of Earth Science. Lecture, three hours. Designed for nonmajors. Not open to students with credit for course 1 or 1H. Fundamentals of physical geology and Earth history; major problems of geology, such as continental drift and development of large-scale features of Earth; physical and biological evolution.

103A. Igneous Petrology (6 units). Lecture, two to three hours; laboratory, six hours; field trips. Prerequisites: courses 51A, 51B, Chemistry 11B, Mathematics 31B, Physics 8B. Recommended: Mathematics 32A. Mineralogy, chemical composition, and field occurrence of igneous rocks with reference to their origin by melting in earth. Introduction to thermodynamics as applied to petrology. Formation of magma, its movement, eruption, crystallization, and chemical evolution. Petrologic structure of the crust and mantle and its relation to seismology. Overview of petrological and chemical evolution of Earth, moon, and other planets from their origin to the present. P/NP or letter grading.

103B. Sedimentary Petrology (6 units). Lecture, two to three hours; laboratory, six hours; field trips. Prerequisite: course 103A. Recommended: course 61. Study of sedimentary rocks based on characteristics of sedimentary particles and dynamics of depositional processes. Lectures focus on development of depositional facies models, and laboratories emphasize recognition of sedimentary deposits from each major depositional facies. P/NP or letter grading.

103C. Metamorphic Petrology (6 units). Lecture, two to three hours; laboratory, six hours; field trips. Prerequisite: course 103B. Interpretation of metamorphic rocks based on field occurrence, mineralogical composition, texture, and application of physical and chemical principles. P/NP or letter grading.

C106. Physical Geochemistry. Lecture, three hours; outside study, nine hours. Prerequisite: course 51B or equivalent. Basic principles of physical chemistry for geologic applications. Thermodynamics and kinetics of reactions among minerals, natural waters, and magmas; construction and interpretation of phase diagrams; case studies of important geochemical and environmental issues. Concurrently scheduled with course C206. P/NP or letter grading.

C107. Geochemistry. (Formerly numbered 131.) Lecture, three hours; discussion, one hour. Prerequisite: junior, senior, or graduate standing in physical sciences or consent of instructor. Origin and abundance of the elements and their isotopes; distribution and chemistry of the elements in Earth and its environment. Concurrently scheduled with course C207. P/NP or letter grading.

C109. Isotope Geochemistry. (Formerly numbered C130.) Lecture, three hours; discussion, one hour. Prerequisite: junior, senior, or graduate standing in physical or biological sciences or consent of instructor. Theoretical aspects of isotope behavior: stable and radiogenic isotopes. Principles of geochronology. Use of isotopes as tracers in crust and mantle processes. Stable isotopes as indicators of environment and paleoclimate. Concurrently scheduled with course C209. P/NP or letter grading.

111. Stratigraphic and Field Geology (6 units). Lecture, two hours; laboratory, three hours; fieldwork, one day per week. Prerequisite: course 61 or consent of instructor. Principles of stratigraphy; geologic mapping of a selected area; preparation of a geologic report.

111G. Field Geology (2 to 4 units). Prerequisite: graduate standing or consent of instructor. Geologic mapping, principles of stratigraphy, structural geology, and map interpretation.

112. Structural Geology (6 units). Lecture, three hours; laboratory, six hours. Prerequisite: course 1 or consent of instructor. Recommended: course 51B. Planar and linear structures at different scales in sedimentary, metamorphic, and igneous rocks. Faults and folds, their description, classification, and kinematic and dynamic analysis. Deformation, strength, fracture, and rheological properties of rocks. P/NP or letter grading.

116. Paleontology. Lecture, three hours; laboratory, three hours; field trips. Prerequisite: Biology 5 or consent of instructor. Review of major groups of fossil organisms and their significance in geology and biology.

119. Continental Drift and Plate Tectonics. Lecture, three hours. Prerequisites: upper division standing and one introductory geology course (course 1, 1H, 100, or equivalent), or consent of instructor. Classical concepts of sedimentation and tectonics. Alfred Wegener's theory of continental drift and ensuing controversy. Physiography of continents and oceans. Geophysical evidence regarding nature of ocean floor. Magnetic stratigraphy. Seafloor spreading. Plate tectonic model and its driving mechanisms. Tectonic, igneous, and metamorphic processes at plate boundaries.

120. Rubey Colloquium: Major Advances in Earth Science. Lecture, three hours. Prerequisite: upper division standing. Lectures on major advances in Earth science offered by distinguished authorities (including regular faculty). Supervision of continuity and assessment of student performance by a faculty member. Content varies from year to year. If laboratory work is required, course 199 must be taken concurrently.

121A-121B. Advanced Field Geology (6 units each). Fieldwork, four weeks each. Prerequisites: courses 61, 103B, 111. Problems in field geology; preparation of geologic maps and cross-sections; preparation of written geologic reports in the field and a final written summary geologic report of selected areas.

C126. Advanced Igneous Petrology. (Formerly numbered C132.) Lecture, three hours; laboratory, three hours; field trips. Prerequisite: course 103A or consent of instructor. Understanding the genesis of igneous rocks based on geochemical, tectonophysical, and other geological evidence and principles. Concurrently scheduled with course C226. P/NP or letter grading.

129. Hydrogeology. (Formerly numbered 129A-129B.) Lecture, three hours. Prerequisites: course 1 or 1H or 100 or equivalent, upper division standing. Hydrogeologic controls of groundwater occurrence, movement, quality, and management. Hydrologic equation, groundwater/surface water relationships, water wells, pumping tests, pollution, artificial recharge, seawater intrusion, safe yield of groundwater basins, groundwater models.

133. Regional Geology. Lecture, three hours; discussion, two hours. Prerequisites: courses 61 and 111, or consent of instructor. Application of geologic, stratigraphic, paleontologic, biologic, and climatic principles to a specific province or provinces. Emphasis on tectonic evolution of selected regions.

134. Computing in Earth and Space Sciences. Lecture, three hours; laboratory, three hours. Prerequisite: Program in Computing 3 or 10A or consent of instructor. Original programming and application of software to generate and test hypotheses with non-ideal or incomplete data sets. Interpolation/extrapolation with graphics to generate hypotheses; forward modeling from fundamental equations to explore implications; probabilistic testing of models against data. Examples and exercises from the Earth and space sciences. Introduction to software used in research and industry.

135. Introduction to Applied Geophysics. Lecture, three hours; laboratory, one hour. Prerequisites: Physics 8A, 8B, 8C or 6B, Mathematics 31A, 31B, 32A, and Program in Computing 3 or 10A, or consent of instructor. Not open for credit to students with credit for course 136A. Principles and techniques of gravimetric, seismic, magnetic, and other geophysical methods of exploration for ores, petroleum, and other economic minerals.

136A. Applied Geophysics. Lecture, three hours; laboratory/field trips, three hours. Prerequisites: Physics 8A, 8B, 8C, 8D, Mathematics 33A, Program in Computing 3 or 10A. Not open for credit to students with credit for course 135. Seismic reflection and refraction, Fourier analysis and deconvolution, vibroseis, synthetic seismograms, marine seismics, seismic interpretation, gravity and magnetic fields, inversion uniqueness and depth rules.

136B. Applied Geophysics. Lecture, three hours; laboratory/field trips, six hours. Prerequisites: course 136A and Program in Computing 3 or 10A, or consent of instructor. Principles and techniques of exploration for mineral deposits using natural and artificial electric and magnetic fields. Methods include self potential, resistivity, induced polarization, electromagnetics, magnetotellurics, magnetics.

136C. Field Geophysics (6 units). Lecture, three hours; discussion, one hour; laboratory, two hours; fieldwork, 10 hours. Prerequisites: course 135 or 136A, consent of instructor. Application of seismic, gravimetric, magnetic, electrical, and other geophysical methods to geologic and engineering problems. Practical aspects of geophysical exploration, including planning, data collection, data reduction, and interpretation. Fieldwork on unsolved problems (week-long field trip).

136D. Advanced Field Geophysics (6 units). Lecture, six hours; laboratory, six hours; fieldwork, 12 hours. Prerequisites: course 135 or 136A, consent of instructor. Application of seismic reflection, seismic refraction, gravity, magnetic, electrical, and electromagnetic methods to geologic problems. Planning, data collection, data reduction, and interpretation. Use of computer in applied geophysics.

137. Petroleum Geology. Lecture, three hours. Prerequisites: courses 61 and 111, or consent of instructor. Geology applied to exploration for and production of natural gas and petroleum; techniques of surface and subsurface geology; problems of petroleum geology.

139. Engineering and Environmental Geology. Lecture, two and one-half hours. Prerequisite: course 1 or 100. Recommended: course 111. Principles and practice of soil mechanics and foundation engineering in light of geologic conditions, recognition, prediction, and control or abatement of subsidence, landslides, earthquakes, and other geologic aspects of urban planning and subsurface disposal of liquids and solid wastes.

M140. Introduction to Fluid Dynamics. (Same as Atmospheric Sciences CM140.) Lecture, three hours; discussion, one hour. Corequisite: Physics 131. Equations of fluid motion. Circulation theorems. Irrotational flow. Vortex motion. Rotating frame. Hydrostatic and geostrophic balance. Sound and shock waves. Viscous flow.

141. Basin Analysis. Lecture, three hours; laboratory, six hours. Prerequisites: courses 103B, 111. Interpretation of sedimentary rock records in terms of tectonics and basin evolution. Sedimentary patterns in modern plate settings serve to focus interpretations of deformed rocks in complex structural regions.

150. Remote Sensing for Earth Sciences. Lecture, three hours. Open to upper division and graduate students. Remote sensing related to development of natural resources. Characteristics of electromagnetic spectrum and review of remote sensing devices. Applicability to land-use classification, soil survey, urban studies, vegetation classification; emphasis on geologic interpretation of imagery.

152. Physics of the Earth. Lecture, three hours; discussion, one hour. Prerequisites: Physics 8A, 8B, 8C, Mathematics 31A, 31B, and 32A, or consent of instructor. Application of physics to structure and evolution of the solid Earth. Seismology, convection and heat flow, gravity, geomagnetism, rock magnetism, and relation of these topics to plate tectonics and other problems of current geophysical interest.

153. Oceans and Atmospheres. Lecture, three hours; discussion, one hour. Prerequisites: Physics 8A, 8B, 8C, Mathematics 31A, 31B, and 32A, or consent of instructor. Physics and chemistry of Earth's oceans and atmosphere; origin and evolution of planetary atmospheres; biogeochemical cycles, atmospheric radiation and climate, energetics and dynamics of oceanic and atmospheric circulation systems. P/NP or letter grading.

154. Solar Terrestrial Physics. Lecture, three hours; discussion, one hour. Prerequisite or corequisite: Physics 110B. Particle and electromagnetic emissions from the sun under quiet and under disturbed conditions. Solar wind. Magnetospheres and ionospheres of Earth and other planets. Geomagnetic phenomena and the aurora.

155. Planetary Physics. Lecture, three hours; discussion, one hour. Prerequisites: Mathematics 31A, 31B, 32A, Physics 8A, 8B, and 8C, or consent of instructor. Formation of solar nebula; origin of planets and their satellites; comets, asteroids, and meteorites; celestial mechanics and dynamics; physics of planetary interiors, surfaces, and atmospheres.

195G. Field Geology for Graduate Students (2 to 4 units). Lecture, two hours; four to five field trips. Prerequisite: course 121B or equivalent or consent of instructor. Required of new graduate students in geology program. Advanced techniques in field geologic mapping, exposing students to igneous, metamorphic, and sedimentary terranes with varying amounts of tectonism. May be repeated for credit. P/NP or letter grading.

199. Special Studies in Earth and Space Sciences (2 to 8 units). May be repeated for credit.

199H. Honors Research in Earth and Space Sciences. Prerequisites: senior standing, consent of departmental honors committee. Individual research designed to broaden and deepen students' knowledge of some phase of Earth and space sciences.

Graduate Courses

200A. Introduction to Geophysics and Space Physics I: The Solid Earth and Planets. Lecture, three hours. Prerequisites: Physics 105A, 110A, 112, and 131, or consent of instructor. Geochemistry, cosmochemistry, and petrology; geotectonics; gravity field; seismology; heat transfer, thermal and mechanical evolution of the mantle; core and geomagnetism; lunar and planetary interiors.

200B. Introduction to Geophysics and Space Physics II: Oceans and Atmospheres. Lecture, three hours. Prerequisites: Physics 105A, 110A, 112, and 131, or consent of instructor. Evolution, chemistry, and heat balance of oceans and atmospheres; molecular spectra, radiative transfer, and planetary observations; dynamics of oceans and atmospheres.

200C. Introduction to Geophysics and Space Physics III: Plasmas — Aeronomy and the Interplanetary Medium. Lecture, three hours. Prerequisites: Physics 105A, 110B, 112, and 131, or consent of instructor. Solar surface features, heating and expansion of corona, solar wind, plasma and magnetic fields, interaction of the solar wind with Earth, magnetospheric phenomena.

201. Classical Mechanics. Lecture, three hours. Kinematics, variational principles and Lagrange equations, rotational dynamics. Hamilton equations of motion, linear and nonlinear perturbation theory, applications to solar system.

202. Continuum Mechanics. Lecture, three hours. Kinematics and dynamics of continuous media. Properties of stress, strain, and rate-of-strain tensors. Conservation laws. Elasticity and viscosity. Heat transfer, boundary layers, and dynamical similarity. S/U or letter grading.

203. Electrodynamics. Prerequisite: upper division electromagnetic theory course or consent of instructor. Maxwell equations and boundary conditions; momentum, angular momentum, and energy of electromagnetic fields; plane electromagnetic and magnetohydrodynamic waves; wave guides, simple radiating systems, and diffraction.

204. Time-Series Analysis and Spectral Estimation. Lecture, three hours. Prerequisites: intermediate courses in calculus (including linear algebra and complex variables) and computer programming (including FORTRAN). Basic methods in time-series analysis, including spectral estimation, prediction, and signal detection, in application to problems in geophysics, atmospheric physics, and space physics. Topics include Fourier transforms (continuous, discrete, FFT), time series (Z-transforms, deconvolution), maximum entropy spectral analysis, autoregressive and moving average methods (AR, MA, ARMA), and multichannel prediction and spectral analysis.

205. Inverse Theory and Data Interpretation. Lecture, three hours. Prerequisites: Mathematics 115A, M150A-150B, and 151, or consent of instructor. Inverse modeling problem — determination of model parameters consistent with experimental data, considering effects of random errors and nonuniqueness. Emphasis on linear and quasi-linear problems; nonlinear problems also discussed. Tools used include matrix theory, quadratic forms, orthogonal rotations, statistics, principal axis transformation for rectangular matrices, Bachus/Gilbert resolving kernels, and Lagrange multipliers. Examples from a broad range of physical sciences.

C206. Physical Geochemistry. Lecture, three hours; outside study, nine hours. Prerequisite: course 51B or equivalent. Basic principles of physical chemistry for geologic applications. Thermodynamics and kinetics of reactions among minerals, natural waters, and magmas; construction and interpretation of phase diagrams; case studies of important geochemical and environmental issues. Concurrently scheduled with course C106. Additional independent research project and oral presentation required of graduate students. S/U or letter grading.

C207. Geochemistry. Lecture, three hours; discussion, one hour. Prerequisite: junior, senior, or graduate standing in physical sciences or consent of instructor. Origin and abundance of the elements and their isotopes; distribution and chemistry of the elements in Earth and its environment. Concurrently scheduled with course C107. Additional homework and class presentation required of graduate students. S/U or letter grading.

208. Geothermics. Lecture, two and one-half hours; discussion, 30 minutes. Prerequisite: Mathematics 33A or consent of instructor. Basic concepts of heat transfer applied to solutions of geological and geophysical problems, including continental heat flow, cooling of oceanic lithosphere, solidification of magmas, thermal and subsidence history of sedimentary basins, frictional heating on fault zones, mantle geotherms, temperature in descending slabs, thermal convection in geothermal regions.

C209. Isotope Geochemistry. (Formerly numbered C232.) Lecture, three hours; discussion, one hour. Prerequisite: junior, senior, or graduate standing in physical or biological sciences or consent of instructor. Theoretical aspects of isotope behavior: stable and radiogenic isotopes. Principles of geochronology. Use of isotopes as tracers in crust and mantle processes. Stable isotopes as indicators of environment and paleoclimate. Concurrently scheduled with course C109. Additional literature survey, which may result in class presentation, expected of graduate students. S/U or letter grading.

219. Planetary and Orbital Dynamics. Planetary rotations, satellite orbits, and tidal dissipation; planetary orbital system; resonance effects and chaos; spin-orbit and orbit-orbit coupling; planetary rings.

220. Principles of Paleobiology. Lecture/discussion, three hours. Prerequisite: graduate standing in science. Open to qualified undergraduates in biological and physical sciences with consent of instructor. Current and classic problems in paleobiology, with emphasis on interdisciplinary problems involving aspects of biology, geology, organic geochemistry, and cosmology. Content varies from year to year. May be repeated for credit.

221. Field Geology. Lecture, one hour; discussion, one hour; fieldwork, 10 days. Prerequisites: course 121B, or 195G and consent of instructor. Planning, execution, and presentation of geologic mapping projects at professional level. Resolution of problems in Southern California geology from synthesis of new and published research. Field area varies from year to year. May be repeated for credit.

222. Introduction to Seismology. Lecture, three hours. Types of seismic waves; travel-time seismology; epicenter location; amplitude variations; seismograph theory; explosion seismology; seismicity; focal conditions; surface wave analysis; microseisms and tsunamis.

M224A. Elastodynamics. (Same as Mechanical, Aerospace, and Nuclear Engineering M257A.) Lecture, four hours; outside study, eight hours. Prerequisites: Mechanical, Aerospace, and Nuclear Engineering 256A and M256B, or consent of instructor. Equations of linear elasticity, Cauchy equation of motion, constitutive relations, boundary and initial conditions, principle of energy. Sources and waves in unbounded isotropic, anisotropic, and dissipative solids. Half-space problems. Guided waves in layered media. Applications to dynamic fracture, nondestructive evaluation (NDE), and mechanics of earthquakes.

M224B. Elastic Wave Propagation II. (Same as Mechanical, Aerospace, and Nuclear Engineering M257B.) Prerequisite: course M224A. Diffraction and scattering of elastic waves by isolated cracks and inclusions; normal mode theories for vibration of finite elastic bodies; dynamic theories of fracture; representative applications in engineering and seismology.

225A. Physics and Chemistry of Planetary Interiors I. Chemical compositions of Earth and planets; high-pressure and temperature effects, phase transitions, and equations of state; variations of density and temperature with depth; thermal and compositional evolution.

225B. Physics and Chemistry of Planetary Interiors II. Lateral inhomogeneities in Earth: seismic velocities, petrology, geothermal and gravitational variations; evidences of motion; remanent magnetism, seismic motions; postglacial rebound; plate tectonics; rheology of mantle; thermal convection.

C226. Advanced Igneous Petrology. (Formerly numbered C236.) Lecture, three hours; laboratory, three hours; field trips. Prerequisite: course 103A or graduate standing or consent of instructor. Understanding the genesis of igneous rocks based on geochemical, tectonophysical, and other geological evidence and principles. Concurrently scheduled with course C126. Graduate students required to read more recommended references, make class presentations on particular topics resulting from that reading, and lead seminar-type discussions on their selected topics. S/U or letter grading.

229. Planetary Atmospheres. Lecture, three hours. Prerequisite: course 200B or consent of instructor. Planetary atmospheric structure, dynamics, and composition. Topics include spacecraft observations; origin and evolution of atmospheres; photochemistry, radiation mechanisms, and transport; atmospheric waves and general circulation; wave-mean flow and turbulence; remote sensing and inversion techniques.

230. X-Ray Crystallography. Lecture, three hours; laboratory, three hours. Prerequisite: course 51B. Point, translation, and space group symmetry, diffraction of X-ray, reciprocal lattice theory, single crystal X-ray methods, diffraction symmetry and elementary crystal structure analysis.

231. Crystal Chemistry and Structure of Minerals. Lecture, three hours; laboratory, three hours. Prerequisite: course 51B. Bonding, interatomic configurations, polymorphic transformations, isotypism, thermal and positional disorder; survey of structures of common minerals, and relation of physical and chemical properties to crystal structure.

233. Mineral Physics and Equations of State. Lecture, three hours. Prerequisite: consent of instructor. Interrelationship of physical properties of rock-forming minerals: optical reflectivity, refraction index, sound velocity, elastic constants, specific heat, and thermal expansivity. Determination of pressure, volume, and temperature relationships and planet-forming compounds. Variation of elastic constants with temperature and pressure. Application of shock-wave experiments to equations of state.

234A. Thermodynamic and Geometric Principles of Phase Equilibria. Prerequisites: course 51B and Chemistry 110B, or consent of instructor. Thermodynamic bases of phase transformations and of phase rules. Geometric representation of multicomponent systems using pressure, temperature, chemical potential, molal volume, and fugacity of oxygen, water, and other volatile components as variable parameters.

234B. Petrologic Phase Equilibria. Lecture, three hours; discussion, three hours. Prerequisites: course 51B and Chemistry 110B, or consent of instructor. Principles governing homogeneous and heterogeneous equilibria, with selected applications to mineral stability relations in igneous and metamorphic rocks (fractional crystallization, partial melting, hydrothermal solutions, element partitioning in coexisting phases).

235A-235B-235C. Current Research in Geochemistry (1 unit each). Prerequisite: graduate standing in Earth and space sciences. Seminars presented by staff, outside speakers, and graduate students stressing current research in Earth and planetary chemistry. May be repeated for credit. S/U grading.

237. Geochemistry of Solutions. Lecture, three hours. Prerequisites: courses 103A, 103C, Chemistry 110A, and 110B, or consent of instructor. Classical thermodynamics applied to mineral solutions, silicate melts, and low- and high-temperature aqueous solutions and gases. Chemical kinetics and its application to geologic problems.

238. Metamorphic Petrology. Lecture, three hours; laboratory, six hours. Prerequisite: one introductory petrology and petrography course or consent of instructor. Interpretation of metamorphic rocks in light of observation, theory, and experiment. Geological relations, petrographic evidence, metamorphic zoning, thermodynamics of phase equilibria, projections, chemographic relationships, use of piezobirefringent haloes, Rayleigh depletion model, isotopic fractionation, environmental factors of metamorphism. Laboratory study of representative metamorphic rocks and suites of rocks selected to illustrate topics discussed in lectures.

239. Structural Petrology of Deformed Rocks. Discussion, three hours; laboratory, three hours. Prerequisites: courses 51B, 112. Recommended: courses 245A-245B, 249. Use of universal stage. Microscopic study of textures, structures, and preferred orientations of minerals in tectonites. Deformation mechanisms in crystals and aggregates. Theories of development of preferred orientation. Application of experimental data to interpretation of microfabrics.

240. Space Plasma Physics. Lecture, three hours. Prerequisite: course 203 or Physics 210A. Physics of plasmas in space, including treatments based on magnetohydrodynamics and kinetic theory. Applications to solar or planetary winds; steady-state magnetospheres; magnetospheric convection; substorm processes; magnetic merging; field-aligned currents and magnetosphere/ionosphere coupling; ring current dynamics; and wave particle instabilities.

241. Sedimentary Petrology. Lecture, two hours; laboratory, six hours. Prerequisites: courses 51B, 103B. Texture, composition, structure, and modes of origin of sedimentary rocks. Content varies from year to year.

242. Sandstone Petrology. Lecture, two hours; laboratory, four hours. Prerequisite or corequisite: course 141. Petrographic study of sandstones, with emphasis on provenance, petrofacies, and paleotectonic reconstructions.

M243A-M243B-M243C. Advanced Evolutionary Biology. (Same as Biology M231A-M231B-M231C.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Series of advanced studies of concepts and methods in evolutionary biology. Topics may include speciation, extinction, coevolution, fossil record, rates of evolution, contributions of molecular biology in evolutionary studies, and development of evolutionary thought. Students encouraged to take each course in sequence. Themes vary from year to year. May be repeated for credit. S/U or letter grading. **M243A.** Mechanisms of Evolution. Prerequisites: Biology 120 and/or 135 or equivalent; **M243B.** Patterns of Evolution; **M243C.** Molecular Evolution.

244. Tectonics of Sedimentary Basins. Lecture, two hours; discussion, two hours; field trips. Prerequisites: courses 103B, 119. Recommended: course 141. Plate-tectonic settings of sedimentary basins. Basin analysis, stratigraphy, paleoenvironments, sedimentology, and related subjects in context of plate-tectonic controls on basin evolution.

245A-245B. Stress and Deformation. Lecture, three hours. Prerequisites: Physics 8A, 8B, Mathematics 32A, and 32B, or consent of instructor. Recommended: Mathematics 33A. Scalars, vectors, tensors; subscript notation; rotation and inversion of axes, transformation matrix; stress; finite homogeneous strain, rotation; infinitesimal strain, strain rate; Mohr's circle construction and other graphical methods; flow laws.

246. Stress in the Lithosphere. Lecture, three hours. Prerequisite: course 202 or 245A or Civil Engineering 108 or consent of instructor. Overcoring, hydrofracture, fault plane solutions, seismic stress drops; effects of erosion, cooling, Earth ellipticity, topography, and density anomalies. State of stress in plate boundaries and interiors. Application of finite element and analytic methods to stress determination.

247. Glaciology. Lecture, three hours. Prerequisite: course 245A or equivalent or consent of instructor. Occurrence and classification of glaciers; accumulation and ablation; glacier budget; mechanical properties of ice; glacier flow; crevasses; textural and structural features; thermal relationships; bed slip; climatic response; catastrophic advances.

248. Advanced Structural Geology. Lecture, three hours; discussion, two hours. Prerequisite: course 111. Principles governing fracture, folding, and flow of rocks; solutions of structural problems at various scales; regional tectonic problems.

249. Structural Analysis of Deformed Rocks. Discussion, three hours; laboratory, three hours. Prerequisites: courses 111 and 112, or consent of instructor. Recommended: course 248. Geometrical analysis of megascopic structures in terranes with complex or multiple deformations. Analysis of strain from deformed primary features. Interpretation of structural history in metamorphic terranes.

250. Advanced Engineering and Environmental Geology. Lecture, three hours; required field trips. Prerequisite: course 139 or consent of instructor. Current topics in engineering and environmental geology, including slope stability, hazardous waste disposal, grading codes, slip rates and recurrence intervals of active faults, computer and remote sensing applications, and case histories.

251. Seminar: Mineralogy. Lecture, three hours. Examination of groups of rock-forming minerals (e.g., feldspars), integrating such aspects as crystal structure, crystal chemistry, phase equilibria, and petrogenesis.

252. Seminar: Geochemistry. Lecture, two hours; discussion, two hours. Phase equilibria under crustal conditions, chemistry of ocean waters, recent and ancient sediments, structure and chemistry of upper mantle, geochronology, cosmochronology, and cosmochemistry.

253. Seminar: Petrology. Lecture, three hours. Problems of igneous or metamorphic petrology: methods of evaluating physical conditions of metamorphism; diffusion in mineralogic systems; origin of ultramafic rocks and problems of the mantle; element fractionation among coexisting phases; other current subjects in the field. S/U or letter grading.

254. Seminar: Sedimentology. Lecture, three hours. Processes of sediment transport and deposition; deep sea sediments; deltas and estuaries; petrology of carbonates, sandstones, and lutes; stratigraphy; paleoenvironmental studies.

255. Seminar: Structural Geology and Tectonics. Lecture, three hours. Flow and fracture in Earth's crust from microscopic to continental scale and in experiments. Examples may include metamorphic terranes, glaciers, plutons, volcanoes, and consolidated or unconsolidated sediments. Modern concepts of oceanic basins; processes leading to segregation of continental-type rocks.

256. Seminar: Glaciology and Geomorphology. Lecture, three hours. Glacier physics, theoretical geomorphology, river mechanics, statistical models.

257. Seminar: Paleontology. Lecture/discussion, three hours. Prerequisite: consent of instructor. Advanced topics in paleobiology, biostratigraphy, paleoecology, and paleobiogeography, with emphasis on relations to other disciplines.

258. Seminar: Mineral Deposits. Lecture, three hours. Problems of distribution, composition, and formation of mineral deposits; mineral economics; investigations of opaque minerals by microscopic or other techniques.

259. Seminar: Paleotectonics. Lecture, two hours; discussion, two hours. Prerequisite: course 244 or consent of instructor. Basin evolution and paleogeography, with emphasis on the Phanerozoic of the Western U.S.

260. Seminar: Advanced Topics in Geology (2 to 4 units). Topics vary. May be repeated for credit.

261. Topics in Magnetospheric Plasma Physics. Lectures, discussions, and exercises on specific advanced topics in magnetospheric plasma physics. Previous courses examined magnetic storms, magnetospheric substorms, ultralow frequency waves, and adiabatic particle motion in Earth's radiation belts.

265. Instrumentation, Data Processing, and Data Analysis in Space Physics. Lecture, three hours. Principles, testing, and operations of magnetometers and other instruments. Data processing, display, and archiving. Time-series analysis techniques, including filtering. Fourier series, eigenanalysis, and power spectra.

268. Seminar: Resource Analysis. Lecture, three hours. Prerequisite: consent of instructor. Geological, geophysical, economic, and technological factors in studies of optimum use of mineral and energy resources. Emphasis on different mineral or energy sources from time to time.

M270A-M270B-M270C. Seminars: Climate Dynamics (2 to 4 units each). (Same as Atmospheric Sciences M272A-M272B-M272C and Geography M270A-M270B-M270C.) Lecture, two hours. Prerequisite: consent of instructor. Archaeological, geochemical, micropaleontological, and stratigraphic evidence for climate change throughout the geological past. Rheology and dynamics of climatic subsystems: atmosphere and oceans, ice sheets and marine ice, lithosphere and mantle. Climate of other planets. Modeling, simulation, and prediction of modern climate on monthly, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading.

282. Seminar: Geophysics. Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Seismology, geophysical prospecting, electromagnetic prospecting. Selected topics in Earth physics. Content varies from year to year. May be repeated for credit.

M285. Origin and Evolution of Solar System. (Same as Astronomy M285.) Dynamical problems of solar system; chemical evidences from geochemistry, meteorites, and solar atmosphere; nucleosynthesis; solar origin, evolution, and termination; solar nebula, hydromagnetic processes, formation of planets and satellite systems. Content varies from year to year. May be repeated for credit. S/U grading.

286A-286B-286C. Seminars: Planetology (2 units each). Problems of current interest concerning moon, planets, and meteorites. May be repeated for credit. S/U grading.

287A-287B-287C. Seminars: Seismology and Earth's Interior (2 units each). Problems of current interest in seismology and Earth's interior. May be repeated for credit. S/U grading.

M288A-M288B-M288C. Seminars: Space Physics (2 units each). (Same as Atmospheric Sciences M275A-M275B-M275C.) Lecture, one hour. Problems of current interest concerning particles and fields in space. May be repeated for credit. S/U grading.

289A-289B-289C. Seminars: Fluid Dynamics (2 units each). Problems of current interest in fluid dynamics, with emphasis on geophysical applications. May be repeated for credit. S/U grading.

290. Seminar: Time-Series Analysis (2 units). Discussion, three hours. Discussion of recent research in spectral estimation, filtering, and signal detection applied to geophysical problems. S/U grading.

295A-295B-295C. Current Research in Earth and Space Sciences (1 unit each). Prerequisite: graduate standing in Earth and space sciences. Seminars presented by outside speakers, staff, and/or graduate students describing current research. Written reports required. May be repeated for credit. S/U grading.

296A-296Z. Research Topics in Earth and Space Sciences (1 unit each). Discussion, one to three hours. Prerequisite: graduate standing in Earth and space sciences or consent of instructor. Advanced study and analysis of current topics in Earth and space sciences. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

296A. Rock Deformation, Structural Geology, Tectonics.

296B. Volcanology and Geochemistry of Volcanic Rocks.

296C. Seismology and Solid Earth Physics.

296D. Thermal Evolution of Lithosphere.

296E. Sedimentation and Tectonics.

296F. Seismology.

296G. Planetary and Orbital Dynamics.

296H. Space Plasma Physics.

296I. Earthquakes.

296J. Metamorphic Petrology.

296K. Quantitative and Molecular Paleobiology.

296L. Magnetic Phenomena.

296M. Planetary Physics.

296N. Martian Surface and Atmosphere.

296O. Tectonics and Stratigraphy.

296P. Chemical Geodynamics.

296Q. Paleobiology.

296R. Planetary and Space Physics.

296S. Precambrian Paleobiology.

296T. Geophysical Fluid Dynamics.

296U. Geomorphology and Geological Physics.

296V. Cosmochemistry.

296W. Structural Geology, Tectonics.

297. Advanced Techniques in Geological Research (2 to 4 units). S/U grading.

298. Advanced Topics in Earth and Space Sciences (2 to 4 units).

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

501. Cooperative Program (2 to 8 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study and/or Research (2 to 12 units). May be repeated. S/U or letter grading.

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units). S/U grading.

598. M.S. Research and Thesis Preparation (2 to 12 units). May be repeated. S/U grading.

599. Ph.D. Research and Dissertation Preparation (2 to 12 units). S/U grading.

Scope and Objectives

The Department of East Asian Languages and Cultures aims to provide students with an exposure to the rich cultural heritage of China, Japan, Korea, and India. This is accomplished through courses in language, literature, religion, thought, archaeology, and other aspects of culture. For undergraduates the department offers a program leading to the B.A. degree in Chinese or Japanese, in which the emphasis is on the language and culture of China or Japan. The language program aims to develop the four skills of speaking, aural comprehension, reading, and writing in a balanced and mutually supportive manner.

At the graduate level, the department offers a program leading to an M.A. degree in several fields of East Asian culture. The program aims to give students a solid mastery of these fields preparatory to careers in teaching or in areas such as journalism, business, banking, or government service. The Ph.D. program, which is very selective, trains research scholars for academic careers in specialized fields.

Classes for Nonmajors

The department offers the following courses in which knowledge of Asian languages is not required: Chinese 50, 150, 151, 160, 175, 190, East Asian Languages and Cultures 60, 61, 88, 161, 162, Indic 175, Japanese 50, 90, 150, 151, 160, 161, 175, M182, Korean 50, 150, 151, 160, 175, 180A, 180B, 180C.

Buddhist Courses

The department also offers the following courses in Buddhism: Chinese 160, 165, 265A-265B, East Asian Languages and Cultures 60, 61, 161, 162, 265A-265B, Japanese 160, 165, 265A-265B, Korean 160, 165, 265A-265B.

Bachelor of Arts in Chinese

Preparation for the Major

Required: Chinese 1, 2, 3, 4, 5, 6, 50, History 9C, and 11A or 11B. *Recommended:* Anthropology 9, Chinese 110A, and English 4.

The Major

Required: A total of 11½ courses, of which seven must be upper division language courses, including at least two vernacular language courses from Chinese 100A, 100B, 100C, 101A, 101B, 101C, and at least four classical language courses from 110A, 110B, 110C, 140A, 140B, 140C, 165.

The remaining four and one-half required courses must include Chinese 150 or 151; one course from 160, 175, 190; East Asian Languages and Cultures 199 (at least two units in the senior year); Art History C115D, C115E, or C115F; and either History 182A, 182B, 183A, 183B, or 184.

English 95A, 95B, 95C, and additional courses in Chinese history are recommended. Students planning to undertake graduate study are urged to include in their undergraduate program additional courses in classical Chinese and beginning courses in Japanese or Korean. Those planning to undertake advanced graduate study are urged to gain a reading knowledge of French or German.

Bachelor of Arts in Japanese

Preparation for the Major

Required: Japanese 1, 2, 3, 4, 5, 6, 50, History 9C, and 11A or 11B. *Recommended:* Anthropology 9 and English 4.

The Major

Required: A total of 12½ courses, of which seven must be upper division language courses selected from Japanese 100A, 100B, 100C, 130A, 130B, 140A, 140B, 140C, C149. The seven courses must include 100B and 130A or 130B.

The remaining five and one-half required courses must include Japanese 120 or CM122 or CM123; 150 or 151; one course from 160 or 175; East Asian Languages and Cultures 199 (at least two units in the senior year); Art History 114C; and either History 187A, 187B, or 187C.

English 95A, 95B, 95C, and additional courses in Japanese history are recommended. Students planning to undertake graduate study

are urged to include in their undergraduate program three courses in classical Japanese and beginning courses in Chinese or Korean. Those planning to undertake advanced graduate study are urged to gain a reading knowledge of French or German.

Graduate Study

The following constitutes introductory information regarding graduate degree programs. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degree

Admission

Applicants to the Master of Arts program are expected to (1) meet general University requirements for the undergraduate major, (2) present a B.A. degree from a department of East Asian Languages and Cultures similar to UCLA's department, and (3) have taken a minimum of three quarter courses or the equivalent in classical Chinese for Chinese majors, classical Japanese for Japanese majors, or a minimum of three years of modern Korean for Korean majors. Applicants with a B.A. in another field or from a department whose requirements are less rigorous are admitted only if they meet the requisite standards within one year. Selection is based on (1) prior scholastic performance (at the junior, senior, and/or graduate levels), (2) recommendations by professors, (3) score on the Graduate Record Examination (GRE), (4) statement of purpose focusing on research interests, and (5) an undergraduate term paper or comparable writing sample in English. All materials must be complete before the application is considered. Students transferring from other departments must also fulfill the above requirements.

International applicants are required to take the Test of English as a Foreign Language (TOEFL), administered by the Educational Testing Service, unless this test is not offered in the country of residence. A test in translation from Chinese, Japanese, or Korean into English must be taken, either with the comprehensive examinations or earlier.

Areas of Study

The department recognizes three areas of specialization at the M.A. level: Chinese language and culture, Japanese language and culture, or Korean language and culture. A comparative or interdisciplinary field may be incorporated into an area of specialization.

Course Requirements

Nine courses are required for the degree, six of which must be graduate courses. Course 200 in the appropriate field is required for the Chinese, Japanese, or Korean major.

With the consent of the department, up to two courses taken outside the department (for which the grade of S/U is acceptable) may be applied toward the nine courses. No more than two courses in the 500 series may apply toward the divisional minimum of nine courses required for a master's degree, and only one of these two courses may be counted toward the minimum of six graduate courses required for the degree. Courses used to meet the language requirements and admission standards do not apply toward the total course requirement. At least one seminar in each of the student's comprehensive examination fields must be taken.

International students may also be required to take English as a Second Language 33A, 33B, 33C, 34, 36, or other English as a Second Language courses.

Comprehensive Examination Plan

The comprehensive examination consists of the submission of three seminar research papers (all two-quarter sequences) and evaluation of them by the ad hoc committee chaired by the candidate's principal adviser and an oral examination based on those papers. A translation examination in the student's area of specialization must also be taken. The evaluation of three seminar papers by the ad hoc committee and the oral examination based on the papers determines whether students are admitted to the Ph.D. program.

Thesis Plan

This plan is recommended for students intending to proceed to the Ph.D. Students who have completed at least one year of graduate work with excellence may petition to the department to present a thesis for the M.A. degree. If this plan is chosen, the student must have a letter of support from a faculty member who will serve as thesis director. The remaining members for the thesis committee are selected in consultation with the graduate adviser. Final acceptance of the thesis plan is contingent on the approval of a thesis proposal. The thesis must be 40 to 60 pages in length and follow the rules and style set by the University. Information on these regulations is available from the Graduate Division. After acceptance of the thesis, there is an oral examination related to the thesis. Students are required to take an examination in translation in their area of specialization.

Doctoral Degree

Admission

An M.A. degree in the field or in a related field is required for admission to the Ph.D. program. Selection among qualified applicants from outside the department is based on (1) prior scholastic performance, (2) three letters of recommendation, (3) score on the Graduate Record Examination (GRE), (4) statement of purpose focusing on research interests, and (5) a

recent research paper in English. Applicants with an M.A. in the department are judged on their M.A. record.

Students applying from foreign institutions are encouraged to complete an M.A. in the department before proceeding to the Ph.D. program.

Major Fields or Subdisciplines

The department emphasizes four major fields at the Ph.D. level: (1) Chinese language and literature with the subdisciplines of poetry, drama, fiction, and modern literature; (2) Japanese language and literature with the subdisciplines of ancient, medieval, early modern, and modern literature; (3) Korean language and literature with the subdisciplines of culture, Buddhism, classical poetry and fiction, and modern literature; and (4) Buddhist studies with the subdisciplines of Chinese Buddhism, Japanese Buddhism, and Korean Buddhism. A comparative or interdisciplinary field may be incorporated into an area of specialization. In addition, a program in ancient Chinese civilization or Japanese linguistics may be arranged by petition.

Course Requirements

Students entering the program with an M.A. in a different field, or in the same field but from another institution, must meet the standards of the department's M.A. coursework in addition to fulfilling Ph.D. course requirements. A minimum of five graduate courses (not including courses taken to meet the language requirements) beyond the M.A. degree is required for the Ph.D. In addition, if the student's major field is Chinese two years of modern Japanese must be taken with grades of S and a written examination which tests the ability to translate Japanese studies in the student's field of study. If the student's major field is Japanese, two years of modern Chinese, classical Chinese, or modern Korean must be taken and passed with grades of S and a written examination which tests the ability to translate Chinese or Korean studies in the student's field of study. If the student's major field is Korean, two years of modern Chinese, classical Chinese, or modern Japanese must be taken with grades of S and a written examination which tests the ability to translate Chinese or Japanese studies in the student's field of study. Those majoring in Buddhist studies are encouraged to take Sanskrit and/or Pali and Parsi with grades of B or better or S.

Written and Oral Qualifying Examinations

Students must take written examinations as follows:

For the major in Chinese literature: (1) a general examination in Chinese literature covering the following three fields: modern Chinese literature, traditional fiction and drama, and traditional Chinese poetry; (2) examinations in three approved fields which must be chosen from at least two groups as follows: (a) Chi-

nese poetry, Chinese fiction and drama, and modern Chinese literature; (b) ancient Chinese civilization, Chinese Buddhism or another field of Chinese thought or religion; (c) an outside field from within the department; or (d) a field offered in another department or interdepartmental program.

For the major in Japanese literature: (1) a general examination in Japanese literature; (2) examinations in two approved fields which cannot be from the same group, as follows: (a) ancient, medieval, early modern, or modern Japanese literature; (b) Japanese Buddhism, another field of Japanese thought or religion, or Japanese linguistics; (c) Chinese or Korean literature; or (d) a field offered in another department or interdepartmental program.

For the major in Korean literature: (1) a general examination in Korean literature; (2) examinations in three approved fields which must be chosen from at least two of the following groups: (a) Korean poetry, Korean fiction, modern Korean literature; (b) Korean Buddhism, Korean thought; (c) Chinese or Japanese literature; or (d) a field offered in another department or interdepartmental program.

For the major in Buddhist Studies: (1) a general examination in the major field; (2) an examination in an approved subfield within the major field; (3) a general examination in another approved field inside or outside the department.

For the major in ancient Chinese civilization or Japanese linguistics: (1) an examination in the major language area; (2) a general examination in the major field; (3) an examination in an approved subfield within the major field; (4) a general examination in another approved field inside or outside the department.

Once all language and course requirements are satisfied, the qualifying examinations can be taken. All examinations must be completed within a four-week period. With the consent of the department, the examinations may be repeated only once. Students are required to take an examination in translation in their area of specialization.

After successful completion of the written examinations, the department appoints a doctoral committee whose chair serves as the student's dissertation adviser. Preferably within six months, but no more than a year after the written examinations, the student must pass the University Oral Qualifying Examination on the dissertation proposal. With the department's consent, the examination may be repeated only once.

Chinese

Lower Division Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition.

1. Elementary Modern Chinese. Lecture, two hours; discussion, three hours. Not open to students who have learned, from whatever source, enough Chinese to qualify for more advanced courses. Introduction to fundamentals of standard Chinese, including pronunciation, grammar, and Chinese characters, with emphasis on all four basic language skills — speaking, listening comprehension, reading, and writing.

1A. Elementary Modern Chinese for Advanced Beginners. Lecture, two hours; discussion, two hours; outside study, eight hours. Preparation: ability to speak and listen to Mandarin Chinese at elementary level. Designed for students who already have listening and speaking skills at elementary level but cannot read and write characters. Training in standard Mandarin pronunciation, grammar, and reading and writing skills. P/NP or letter grading.

2. Elementary Modern Chinese. Lecture, two hours; discussion, three hours. Continuation of course 1.

2A. Elementary Modern Chinese for Advanced Beginners. Lecture, two hours; discussion, two hours; outside study, eight hours. Continuation of course 1A. P/NP or letter grading.

3. Elementary Modern Chinese. Lecture, two hours; discussion, three hours. Continuation of course 2.

3A. Elementary Modern Chinese for Advanced Beginners. Lecture, two hours; discussion, two hours; outside study, eight hours. Continuation of course 2A. P/NP or letter grading.

4. Intermediate Modern Chinese. Lecture, two hours; discussion, three hours. Enforced requisite: course 3. Designed to strengthen communicative skills of listening, speaking, reading, and writing. Grammar reviews, knowledge of idiomatic expressions, and both traditional and simplified characters.

4A. Intermediate Modern Chinese for Advanced Beginners. Lecture, two hours; discussion, two hours; outside study, eight hours. Enforced requisite: course 3A. Designed to develop students' communicative skills of reading and writing at intermediate level, with attention to syntactic analysis, review of grammar, idiomatic expressions, and development of vocabulary. P/NP or letter grading.

5. Intermediate Modern Chinese. Lecture, two hours; discussion, three hours. Enforced requisite: course 4. Continuation of course 4.

5A. Intermediate Modern Chinese for Advanced Beginners. Lecture, two hours; discussion, two hours; outside study, eight hours. Continuation of course 4A. P/NP or letter grading.

6. Intermediate Modern Chinese. Lecture, two hours; discussion, three hours. Enforced requisite: course 5. Continuation of course 5.

6A. Intermediate Modern Chinese for Advanced Beginners. Lecture, two hours; discussion, two hours; outside study, eight hours. Continuation of course 5A. P/NP or letter grading.

50. Chinese Civilization. Lecture, three hours; discussion, one hour. Knowledge of Chinese not required. Survey of development of outstanding aspects of Chinese culture from prehistoric to modern times.

Upper Division Courses

100A-100B-100C. Advanced Modern Chinese. Lecture, two hours; discussion, two hours. Prerequisite: course 6 or consent of instructor. Materials selected from contemporary Chinese publications, with emphasis on social sciences. Texts analyzed for their linguistic features and social and cultural background. Readings, compositions, informal debates on topical issues, and oral presentations. P/NP or letter grading.

101A-101B-101C. Readings in Modern Expository Chinese. Lecture, three hours. Prerequisite: course 100C or consent of instructor. Selected readings in modern essays taken from literary texts. In addition, students work with material in the area of their professional interests.

110A-110B-110C. Introduction to Classical Chinese. Lecture, three hours. Prerequisite: course 3 or consent of instructor. Grammar and readings in selected texts.

120. Introduction to Chinese Linguistics. Lecture, three hours. Prerequisite: course 6 or consent of instructor. Discussion of issues of Chinese phonology, morphology, and syntax. Case studies of seemingly idiosyncratic properties of Chinese in light of current theory of universal grammar.

130A-130B. Readings in Modern Chinese Literature. Readings/discussion, three hours. Prerequisite: course 100B or consent of instructor. Readings and discussion of works of modern Chinese literature.

140A-140B-140C. Readings in Classical Chinese Literature. (Formerly numbered 140A-140B-140C, 143A-143B, 145A-145B.) Readings/discussion, three hours; outside study, nine hours. Prerequisite: course 110C. Readings and discussion of works of classical Chinese literature. **140A.** Poetry; **140B.** Tang and Sung Prose; **140C.** Fiction.

150. Chinese Literature in Translation: Classical Literature. Lecture, three hours; discussion, one hour. Prerequisite: English 3 or one course from Humanities 1A, 1B, 1C, 1D, 2A, 2B, 2C. Readings from English translations of masterpieces of the Chinese literary tradition, including most major genres (historical narrative, fiction, *shih* and *tz'u* poetry, drama, folk poetry, expository prose).

151. Chinese Literature in Translation: Modern Literature. Lecture, three hours; discussion, one hour. Prerequisite: English 3 or one course from Humanities 1A, 1B, 1C, 1D, 2A, 2B, 2C. Knowledge of Chinese not required. Lectures and reading of representative works from 1900 to the present in English translation.

152. Topics in Contemporary Chinese Literature and Culture. Lecture, two hours; discussion, one hour; outside study, nine hours. Investigation of various topics in contemporary Chinese literature and culture, including politics and poetics of Chinese post-modernism, nativism, feminism, mass culture, and media.

M153. Chinese Immigrant Literature and Film. (Same as Asian American Studies M132B and Humanities M171.) Lecture, two hours; discussion, one hour; outside study, nine hours. In-depth look at Chinese immigrant experience by reading literature and watching films. Theories of diaspora, gender, and race to inform thinking and discussion of relevant issues.

160. Chinese Buddhism. Lecture, three hours. Knowledge of Asian languages not required. Introduction and development of Buddhism in China, interaction between Buddhism and Chinese culture, rise of Chinese schools of Buddhism such as Pure Land and Zen, contributions to Chinese culture.

165. Introduction to Chinese Buddhist Texts. Lecture, three hours. Prerequisite: course 100A or 110C or Korean 100A or Japanese 100A. Readings in Buddhist texts written in literary Chinese and taken from translated Indian sutras, indigenous exegetical materials, Chinese apocryphal scriptures, and Ch'an writings. Problems in translation from Indo-European languages into Chinese; evolution of Chinese Buddhist terminology. Coverage varies. May be repeated for credit with consent of instructor.

170. Readings in Chinese Philosophical Texts. Lecture, three hours. Prerequisite: course 110C or consent of instructor. May be repeated for credit with consent of instructor.

175. Introduction to Chinese Thought. Lecture, three hours. Knowledge of Asian languages not required. General survey of indigenous Chinese thought from Chou period to circa 1800, covering Confucianism, Taoism, Mo-tzu, legalists, influence of Buddhism, development of neo-Taoism and neo-Confucianism.

190. Archaeology in China. (Formerly numbered 190A-190B.) Lecture, three hours. Early Chinese study of their own past, types of artifacts, beginnings of scientific archaeology, and surveys of major excavations of sites of all periods.

195. Chinese Etymology and Calligraphy. Lecture, three hours. Prerequisite: one year of classical Chinese or consent of instructor. Covers (1) development of the Chinese writing system from the "Pottery Inscriptions" 6,000 years ago to modern "Simplified Forms" and the studies of Six Scripts principles which were used to form Chinese characters and (2) aesthetic training of calligraphic art and its appreciation, with focus on ways of recognizing and interpreting the "Cursive Style," a common form of handwriting.

Graduate Courses

200. Bibliography and Methods of Research in Chinese. Required of all graduate students in Chinese. Lectures and discussion on research methodologies for dealing with traditional Chinese materials, with emphasis on bibliography training (including most up-to-date indexes in Chinese studies), punctuation practice, knowledge of textual criticism, and rare book editions.

M201. China — Seminar: Classical Historiography and Readings in Classical Studies. (Same as History M281.) Discussion, three hours. Prerequisite: two years of classical Chinese or working knowledge of classical Chinese. Readings in historiography and selected genres of historical documents.

205. Methods and Issues in 20th-Century Chinese Literature and Culture. Seminar, three hours; outside study, nine hours. Methodology course for all incoming graduate students in 20th-century Chinese literature and culture. Discussion of major theoretical and textual issues and methods.

210. Modern Chinese Literary History. (Formerly numbered 231A-231B.) Lecture, three hours. Prerequisite: graduate standing. Discussion of history of modern Chinese literature, focusing on sources, controversies, major literary genres, and critical approaches to studying the relationship between literature and history.

211. Chinese Poetry I: *Shi Jing* and Related Texts. Readings/discussion, three hours. Centered on a philological and literary-critical reading of the Zhou dynasty collection, *The Book of Odes (Shi Jing)*, examination of role of poetry in Zhou culture, interrelationships of poetry, music, and ritual, and problems of textual transmission and interpretation.

212. Chinese Poetry II: Han to Six Dynasties. Readings/discussion, three hours. Readings from major genres and authors between end of Qin dynasty in 207 B.C. and founding of Sui dynasty in A.D. 589 (main text to be the anthology *Wen xuan* compiled ca. 531). Genres include *Fu*, *Yuefu*, and *Shi* poetry, as well as a sampling of historical and philosophical theoretical texts. Authors include Song Yu, Sima Xiangru, Zuo Si, Ban Gu, Cao Zhi, Lu Ji, Tao Yuanming, and Xie Lingyun.

220A-220B. Western Theory and Chinese Texts. Seminar, three hours; outside study, nine hours. Discussions to be framed by Western literary and cultural theory, investigating both challenges and limitations Western theory may pose for Chinese literary and cultural studies. Specific topics vary from year to year. In Progress and S/U or letter grading.

230A-230B. Seminars: Selected Topics in Modern Chinese Literature. Seminar, three hours. Prerequisite: consent of instructor. Selected readings in 20th-century Chinese literature, emphasizing fiction. Discussion of individual research projects. May be repeated for credit. In Progress grading.

241A-241B. Heaven, Earth, and Monarchy in Ancient China. Seminar, three hours. Prerequisite: working knowledge of classical Chinese. Close reading of chapters from the Han dynasty collection of writings on the forms of music, social interaction, education, marriage, and mourning in the Zhou royal court, with discussion of topics in recent cultural semiology and anthropology. In Progress grading.

245A-245B. Seminars: Traditional Chinese Narrative and Drama. Seminar, three hours. Prerequisite: reading knowledge of colloquial and literary Chinese. Seminar topics alternate yearly between traditional narrative and drama, with emphasis on generic, hermeneutical, and historical approaches. Topics in narrative selected from genres from Chou through Ch'ing periods. Topics in drama selected from *tsa-chü* and *ch'uan-ch'i*. May be repeated for credit with consent of instructor. In Progress grading.

250A-250B. Chinese Literary Criticism. Seminar, three hours; outside study, nine hours. Issues in production and interpretation of literary works, as formulated by Chinese critics from classical age onward.

265A-265B. Seminars: Chinese Buddhist Texts. Seminar, three hours. May be repeated for credit with consent of instructor. In Progress grading.

290A-290B. Seminars: Selected Topics in Chinese Archaeology. Seminar, three hours. Prerequisite: course 190 or consent of instructor. Discussion and research on major problems about Chinese archaeology and different interpretations to the most important archaeological finds, with emphasis on studies of the Xia and Shang cultures and Xia and Shang dynasties. May be repeated for credit. In Progress grading.

295A-295B. Seminars: Selected Topics in Chinese Cultural History. Seminar, three hours. Prerequisite: consent of instructor. Discussion and research on major problems related to Chinese culture, such as beginnings of the Chinese civilization and Chinese dynastic history. Other topics include cultural developments of ancient and medieval China. May be repeated for credit. In Progress grading.

East Asian Languages and Cultures

Lower Division Courses

60. Introduction to Buddhism. Lecture, three hours; discussion, one hour. Knowledge of Asian languages not required. General survey of development of Buddhism in India, focusing on those religious doctrines and meditative practices most essential to various Asian traditions of the religion.

61. Introduction to Zen Buddhism. Lecture, three hours; discussion, one hour. Knowledge of Asian languages not required. Introduction to Zen traditions and to interplay between Zen and other fundamental cultural and religious concerns in East Asia. Topics include role of Zen within Buddhist thought and practice, artistic and literary arts, society, and daily life.

88. Cross-Cultural Understanding in the Pacific Rim: Case Study of U.S., Japan, and Thailand. Seminar, three hours. Development of skills to analyze intercultural communications through readings, discussions, lectures, interviews, and films, with focus on three countries of the Pacific Rim region — U.S., Japan, and Thailand.

Upper Division Courses

161. Buddhist Literature in Translation. Readings, three hours. Prerequisite: prior course on Buddhism or traditional Asian religions. Readings from variety of Buddhist literature of Indic and non-Indic origin, with emphasis on key Buddhist themes and critical issues in cross-cultural interpretations of Asian religious texts.

162. Buddhist Meditation Traditions. Lecture, three hours. Knowledge of Asian languages not required. Survey of theory and practice of meditation in Buddhism, with emphasis on Theravada and Zen schools. Topics include various typologies of meditation, symbiotic relationship between meditation and soteriology, and processes by which doctrinal innovation prompts changes in meditative praxis.

C197. Life Writing in East Asia. Seminar, three hours; outside study, nine hours. Readings of biography and autobiography as elements of East Asian cultural traditions, with focus rotating between China, Japan, and Korea. Readings in English and relevant East Asian languages. Concurrently scheduled with course C297.

199. Special Studies in East Asian Languages and Cultures (2 to 4 units). Prerequisites: senior standing in department or advanced reading knowledge of Chinese or Japanese, consent of instructor. Required of senior majors. Special individual studies. May be repeated once with consent of instructor.

Graduate Courses

202. Proseminar: Functional Approaches to Japanese/Korean Linguistics. Seminar, three hours; outside study, nine hours. Prerequisites: three years of Japanese or Korean, one year of any East Asian language, and one functional linguistics course or consent of instructors. Survey of recent empirical and theoretical research in syntax, semantico-pragmatics, theory of language change, and comparative sociolinguistics in Japanese/Korean. May be repeated for credit with consent of instructors. S/U or letter grading.

230A-230B. Seminars: Theoretical Topics in East Asian Literature. Seminar, three hours. Prerequisite: reading knowledge of at least one East Asian language. Concerns of literary theory which are brought to the fore by reading of literature from or about East Asia. Readings from both Western and Eastern theorists; issues of translation, comparison, and categorization. In Progress grading.

240A-240B. Seminars: Topics in East Asian Literary History. Seminar, three hours. Prerequisite: reading knowledge of at least one East Asian language. Critical issues common to literary historiography in East Asia, including periodization, canon, ideology, interaction between high and low culture, the written and the oral, etc. In Progress grading.

245A-245B. Seminars: Position of Modernity in East Asian Literature. Seminar, three hours. Prerequisites: graduate standing, at least five years of an East Asian language. Course 245A concerned with conceptual architecture and archaeology of modernity, with readings largely from European sources. In-class debate probes relevance of these readings for work as Asianists. Focus on Asian writings in course 245B. In Progress grading.

265A-265B. Seminars: Selected Topics in Buddhist Studies. Seminar, three hours. Coverage varies. May be repeated for credit. In Progress grading.

C297. Life Writing in East Asia. Seminar, three hours; outside study, nine hours. Readings of biography and autobiography as elements of East Asian cultural traditions, with focus rotating between China, Japan, and Korea. Readings in English and relevant East Asian languages. Concurrently scheduled with course C197. Additional readings and research required of graduate students.

299. Independent Study (2 to 6 units). (Formerly numbered 299A-299B.) Prerequisite: graduate standing. Guided research and writing of a research paper. May be repeated, but only four units may be applied toward M.A. degree. May not be applied toward Ph.D. degree. S/U or letter grading.

301. Teaching an East Asian Language as a Foreign Language.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495C. Teaching Chinese at College Level (2 to 4 units). Prerequisite: appointment as teaching assistant in Chinese. Study in team-teaching, teaching methodology, developing course materials, and testing. Participation in peer observations and workshops required. Students receive unit credit toward full-time equivalence but not toward any degree requirements. S/U grading.

495J. Teaching Japanese at College Level (2 to 4 units). Prerequisite: appointment as teaching assistant in Japanese. Study in team-teaching, teaching methodology, developing course materials, and testing. Participation in peer observations and workshops required. Students receive unit credit toward full-time equivalence but not toward any degree requirements. S/U grading.

495K. Teaching Korean at College Level (2 to 4 units). Prerequisite: appointment as teaching assistant in Korean. Study in team-teaching, teaching methodology, developing course materials, and testing. Participation in peer observations and workshops required. Students receive unit credit toward full-time equivalence but not toward any degree requirements. S/U grading.

501. Cooperative Program (2 to 6 units). Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Studies (2 to 4 units). S/U grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (4 to 8 units). S/U grading.

598. Research for and Preparation of M.A. Thesis (4 to 8 units). Prerequisite: consent of instructor. Maximum of eight units may be applied toward M.A. degree requirements. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation (4 to 8 units). S/U grading.

Indic

Upper Division Courses

110A. Elementary Sanskrit. Lecture, three hours. Introduction to script and grammar, with reading exercises and attention to significance of Sanskrit for the understanding of other Indo-European languages.

110B. Intermediate Sanskrit. Lecture, three hours. Prerequisite: course 110A or equivalent. Advanced aspects of grammar and reading of literary texts.

110C. Advanced Sanskrit. Lecture, three hours. Prerequisite: course 110B or equivalent. Reading of entire *Bhagavadgita* or comparable amount of other Sanskrit literature.

115. Readings in Sanskrit. Lecture, three hours. Prerequisite: course 110C or equivalent. Extensive reading in such texts as best serve students' needs.

175. Introduction to Indic Philosophy. Lecture, three hours. Survey of main trends in Indian philosophy from ancient to modern times.

Graduate Courses

M222A-M222B. Vedic. (Same as Iranian M222A-M222B.) Lecture, three hours. Prerequisite: knowledge of Sanskrit equivalent to course 110C. Characteristics of Vedic dialect and readings in Rig-Vedic hymns. Only course M222B may be repeated for credit.

230. Selected Readings in Sanskrit Texts. Lecture, three hours. May be repeated for credit with consent of instructor. S/U or letter grading.

234A-234B. Introduction to Panini's Grammar. Lecture, three hours. Prerequisite: course 110C or equivalent. Reading of selected passages of the text, with introduction to Panini's technique. S/U or letter grading.

236A-236B. Pali and Prakrits. Lecture, three hours. Prerequisites: knowledge of Sanskrit equivalent to course 110B, consent of instructor. Grammatical studies and reading of texts. Comparative considerations. S/U or letter grading. **236A.** Pali; **236B.** Prakrits.

Japanese

Lower Division Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition.

1. Elementary Modern Japanese. Lecture, two hours; discussion, three hours. Not open to students who have learned, from whatever source, enough Japanese to qualify for more advanced courses. Introduction to modern Japanese with attention to conversation, grammar, and written forms. Conversation drill based on material covered in class.

2. Elementary Modern Japanese. Lecture, two hours; discussion, three hours. Continuation of course 1.

3. Elementary Modern Japanese. Lecture, two hours; discussion, three hours. Continuation of course 2.

4. Intermediate Modern Japanese. Lecture, three hours; discussion, two hours. Enforced requisite: course 3. Continuation of course 3. Readings in modern Japanese, with emphasis on comprehension and structural analysis.

5. Intermediate Modern Japanese. Lecture, three hours; discussion, two hours. Enforced requisite: course 3. Continuation of course 4.

6. Intermediate Modern Japanese. Lecture, three hours; discussion, two hours. Enforced requisite: course 3. Continuation of course 5.

50. Japanese Civilization. Lecture, three hours; discussion, one hour. Knowledge of Japanese not required. Survey of development of Japanese culture and its relationship to the Asiatic mainland. P/NP or letter grading.

90. Japanese Aesthetics and Tea Ceremony. Lecture, three hours. Introduction to Japanese aesthetics in theory and practice, including study of ritual and specific trends in Japanese aesthetics such as imperfection asymmetry, suggestion, miniaturization, indirectness, *wabi, sabi, hie-kare, yugen*, especially as reflected and practiced in the tea ceremony.

Upper Division Courses

100A-100B-100C. Advanced Modern Japanese. Lecture, two hours; discussion, three hours (100A-100B) and one hour (100C). Prerequisite: course 6. Emphasis on comprehension, structure, and proficiency in reading, composition, and conversation in modern Japanese.

101A-101B. Advanced Readings in Modern Japanese. Lecture, two hours; discussion, 90 minutes. Prerequisite: course 100C. Advanced readings and discussion for students planning to do advanced coursework or research on Japan. Topics selected from magazines, journals, and books related to humanities and social sciences.

110. Introduction to Classical Japanese. Lecture, three hours; outside study, nine hours. Prerequisite: course 100C or consent of instructor. Introduction to fundamentals of classical Japanese. Grammar and reading of selected texts.

120. Introduction to Japanese Linguistics. Lecture, three hours. Prerequisite: course 3 or equivalent. Introduction to Japanese grammar and sociolinguistics through reading, discussion, and problem solving in phonology, syntax, semantics, and discourse pragmatics.

CM122. Structure of Japanese I. (Same as Linguistics M176A.) Lecture, three hours. Prerequisites: course 120 or equivalent or consent of instructor, two years of Japanese. Discussion of many seemingly idiosyncratic characteristics of Japanese syntax and semantics in light of word-order typology and universal grammar, often in form of a contrastive analysis of Japanese and English. Concurrently scheduled with course C222.

CM123. Structure of Japanese II. (Same as Linguistics M176B.) Lecture, three hours. Prerequisite: two or more years of Japanese language study or consent of instructor. Survey of Japanese language at three different levels of organization: (1) word level — word class, verbal morphology and semantics; (2) clause/sentence level — tense, aspect, modality; (3) discourse level — point of view, ellipsis, topicalization. Concurrently scheduled with course C223.

CM127. Contrastive Analysis of Japanese and Korean. (Same as Korean CM127 and Linguistics M178.) Lecture, three hours. Prerequisites: two years of Japanese or Korean, one introductory linguistics course. Critical reading and discussion of selected current research papers in syntax, pragmatics, discourse, and sociolinguistics from perspective of contrastive study of Japanese and Korean. May be repeated for credit with consent of instructor. Concurrently scheduled with course CM227.

130A-130B-130C. Readings in Modern Japanese Literature. (Formerly numbered 130, 131, 133.) Readings/discussion, three hours. Prerequisite: course 6. Readings and discussion of works by modern Japanese writers.

140A-140B-140C. Readings in Classical Japanese Literature. (Formerly numbered 140, 141, 142.) Discussion, three hours; readings/outside study, nine hours. Prerequisite: course 110 or consent of instructor. Readings and discussion of works of classical Japanese literature. **140A.** Heian; **140B.** Medieval; **140C.** Edo.

C149. Introduction to Kambun and Other Literary Styles. (Formerly numbered 149.) Lecture, three hours; outside study, nine hours. Prerequisite: course 140A or 140B or consent of instructor. Introduction to Kambun, the Japanese literary rendering of classical Chinese, and Sorobun, the epistolary style. Concurrently scheduled with course C249.

150. Japanese Literature in Translation: Classical. Lecture, three hours; discussion, one hour. Prerequisite: English 3 or one course from Humanities 1A, 1B, 1C, 1D, 2A, 2B, 2C. Knowledge of Japanese not required. Survey of Japanese literature from the beginning to 1600, emphasizing Chinese, Buddhist, and Western influences.

151. Japanese Literature in Translation: Modern. Lecture, three hours; discussion, one hour. Prerequisite: English 3 or one course from Humanities 1A, 1B, 1C, 1D, 2A, 2B, 2C. Knowledge of Japanese not required. Survey of Japanese literature from the 16th century to post-World War II.

154. Postwar Japanese Culture through Literature. Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: English 3 or one course from Humanities 1A, 1B, 1C, 1D, 2A, 2B, 2C. Use of fiction and film to explore Japanese culture in postwar era in a broad cross-disciplinary and cross-cultural context. P/NP or letter grading.

160. Japanese Buddhism. Lecture, three hours. Knowledge of Asian languages not required. Development of Buddhism in Japan in its cultural context, with emphasis on key ideas and teachings.

161. Religious Life in Modern Japan. Lecture, three hours. Religious transformations accompanying rapid industrialization, urbanization, militarism, and defeat in the Pacific War, including analyses of Shinto mythology, secular positivism, Buddhist reform movements, new religions, and continuing role of traditional village/family religious rites.

165. Introduction to Japanese Buddhist Texts. Lecture, three hours. Prerequisite: course 140B or C149 or Chinese 165 or consent of instructor. Readings in Buddhist texts written by Japanese in literary Chinese, Kambun, and mixed Japanese/Chinese literary styles concerning textual commentaries, doctrinal treatises, hagiographies, temple histories, etc. Coverage varies. May be repeated for credit with consent of instructor.

175. Introduction to Japanese Thought. Lecture, three hours. Knowledge of Asian languages not required. General survey of Japanese thought from early to modern times, including analyses of Shinto mythology, forms of Confucianism, ethic of bushido, National Learning School, and modern Japanese philosophers such as Nishida Kitaro and Watsuji Tetsuro. Attention also to representative types of contemporary thinking about Japanese thought, especially the question of what might qualify as recognizably "Japanese" in aesthetics, ethics, and philosophy.

C180. Readings in Japanese Literary Thought. Discussion, three hours; outside study, nine hours. Prerequisite: course 110 or consent of instructor. Reading and translation of commentaries of *monogatari* and *waka* from Heian, Kamakura, Muromachi, and Edo periods. Introduction to Japanese hermeneutics. Concurrently scheduled with course C280.

M182. Japanese Folklore. (Same as Folklore M182.) Lecture, three hours. Knowledge of Japanese not required. Lectures/discussions on native religious rituals (festivals) and observances of the Japanese, with special emphasis on artistic behavior. Discussion of Shinto, Shinto/Buddhist syncretism, and other non-Buddhist belief systems found in Japan.

190. Introduction to Japanese Aesthetics. Lecture, three hours; outside study, nine hours. Knowledge of Japanese not required. Introduction to field of modern and premodern Japanese aesthetics, with focus on hermeneutics of literary arts. Analysis of metalanguage in formulation of aesthetic judgment. P/NP or letter grading.

M196. Seminar: Comparative Japanese Law — Selected Readings (2 units). (Same as Law M519.) Designed to introduce students to a variety of Japanese-language legal materials. Reading of law review articles and other sources as time permits (e.g., selections from contracts, cases, or treatises); titles vary from term to term. Classroom work may be coordinated with outside research projects with consent of instructor.

C197. Personalities in Japanese Civilization. (Formerly numbered 88.) Seminar, three hours; outside study, nine hours. Five weeks of introductory lectures and five weeks of student presentations based on instructor-guided student research. Concurrently scheduled with course C297.

Graduate Courses

200. Bibliography and Methods of Research in Japanese. Lecture, three hours. Required of all graduate students in Japanese.

210. Issues in Modern Japanese Literature. Lecture, three hours. Introduction to issues in the field of modern Japanese literature, with readings in primary and secondary sources. Topics vary.

211. No and Kyogen. (Formerly numbered 243A-243B.) Lecture, three hours. Prerequisite: one year of classical Japanese. Readings of selected No and Kyogen texts from Muromachi and Edo periods, as well as readings of critical writings and discussion of theories. May be repeated for credit with consent of instructor.

212. Kyoto through Classical Japanese Literature. (Formerly numbered 290.) Discussion, three hours. Prerequisite: knowledge of Japanese. Investigation of history and life of the city as seen through Japanese literature.

C222. Structure of Japanese I. Lecture, three hours. Prerequisites: course 120 or equivalent or consent of instructor, two years of Japanese. Discussion of many seemingly idiosyncratic characteristics of Japanese syntax and semantics in light of word-order typology and universal grammar, often in form of a contrastive analysis of Japanese and English. Concurrently scheduled with course CM122.

C223. Structure of Japanese II. Lecture, three hours. Prerequisite: two or more years of Japanese language study or consent of instructor. Survey of Japanese language at three different levels of organization: (1) word level — word class, verbal morphology and semantics; (2) clause/sentence level — tense, aspect, modality; (3) discourse level — point of view, ellipsis, topicalization. Concurrently scheduled with course CM123.

224A-224B. Seminars: Selected Topics in Japanese Discourse Linguistics. Seminar, three hours. Prerequisite: course CM122 or equivalent. Critical reading and discussion of selected topics in Japanese discourse linguistics. May be repeated for credit with consent of instructor. In Progress grading.

225A-225B. Seminars: Linguistic Analysis of Japanese Narratives. Seminar, three hours. Prerequisite: course CM122 or consent of instructor. Analysis of selected modern and classical Japanese narratives. Emphasis on exploration of how grammatical features such as tense, aspect, voice, and point of view are utilized to achieve desired literary effects. May be repeated for credit with consent of instructor. In Progress grading.

226. Survey of Functional Linguistics. (Formerly numbered 226A-226B.) Lecture, four hours; outside study, eight hours. Survey of recent empirical and theoretical research in several areas of functional linguistics, which has served as backbone for development of Japanese discourse linguistics. May be repeated for credit with consent of instructor. S/U or letter grading.

CM227. Contrastive Analysis of Japanese and Korean. (Same as Korean CM227.) Lecture, three hours. Prerequisites: two years of Japanese or Korean, one introductory linguistics course. Critical reading and discussion of selected current research papers in syntax, pragmatics, discourse, and sociolinguistics from perspective of contrastive study of Japanese and Korean. May be repeated for credit with consent of instructor. Concurrently scheduled with course CM127.

228. Fundamentals in Discourse Data Analysis. Lecture, three hours. Designed to prepare students to conduct research in natural discourse data, both spoken and written, for linguistic analysis. Discussion of discourse taxonomy, data collection methodologies, data organization, analytical frameworks.

235A-235B. Seminars: Selected Topics in Modern Japanese Fiction. Seminar, three hours. May be repeated for credit with consent of instructor. In Progress grading.

240A-240B. Seminars: Selected Topics in Japanese Literature. Seminar, three hours. May be repeated for credit. In Progress grading.

241A-241B. Seminars: Japanese Classics. Seminar, three hours. Prose and poetry from early times to 1868. May be repeated for credit with consent of instructor. In Progress grading.

245A-245B. Seminars: Medieval Japanese Literature. Seminar, three hours. Prerequisite: one year of classical Japanese. Selected readings in travel poetry, travel diaries, and other genres of Japanese travel literature of Heian, Kamakura, Nambokucho, and Muromachi periods. May be repeated for credit with consent of instructor. In Progress grading.

C249. Introduction to Kambun and Other Literary Styles. Lecture, three hours; outside study, nine hours. Prerequisite: course 140A or 140B or consent of instructor. Introduction to Kambun, the Japanese literary rendering of classical Chinese, and Sorobun, the epistolary style. Concurrently scheduled with course C149. Graduate students cover more text and submit one additional translation.

265A-265B. Seminars: Japanese Buddhist Texts. Seminar, three hours. May be repeated for credit with consent of instructor. In Progress grading.

M270A-M270B. Seminars: Japanese Ritual Arts. (Same as Folklore M270A-M270B.) Seminar, three hours. Reading knowledge of Japanese not required. Discussions and readings on ritual (performing) arts of Japan comprising music, dance, storytelling, viewing, purification, divination, disguise, mimicry, and competitive as well as acrobatic arts, with special emphasis on religio-magical purposes and symbolic structure of these arts. In Progress grading.

C280. Readings in Japanese Literary Thought. Discussion, three hours; outside study, nine hours. Prerequisite: course 110 or consent of instructor. Reading and translation of commentaries of *monogatari* and *waka* from Heian, Kamakura, Muromachi, and Edo periods. Introduction to Japanese hermeneutics. Concurrently scheduled with course C180. Additional translations required of graduate students.

290A-290B. Seminars: Japanese Philosophy of Art. Seminar, three hours. Prerequisites: course 110 or consent of instructor, reading knowledge of Japanese. Reading and discussion of selected topics on philosophy of literary arts. May be repeated once with consent of instructor. In Progress grading.

C297. Personalities in Japanese Civilization. Seminar, three hours; outside study, nine hours. Five weeks of introductory lectures and five weeks of student presentations based on instructor-guided student research. Concurrently scheduled with course C197. Additional work required of graduate students.

Korean

Lower Division Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition.

1. Elementary Modern Korean. Lecture, two hours; discussion, three hours. Not open to students who, from whatever source, already know the language. Introduction to standard spoken Korean and Korean writing, with emphasis on conversation.

2. Elementary Modern Korean. Lecture, two hours; discussion, three hours. Continuation of course 1.

2A. Accelerated Elementary Korean. Lecture, two hours; discussion, three hours; outside study, seven hours. Preparation: ability to speak and listen to Korean at an elementary level. Designed for students who know how to speak but do not know how to read and/or write in Korean. Emphasis on formal aspects of standard Korean (alphabet spelling, basic grammar, reading, writing) in lieu of courses 2 and 3. P/NP or letter grading.

3. Elementary Modern Korean. Lecture, two hours; discussion, three hours. Continuation of course 2.

3A. Accelerated Elementary Korean. Lecture, two hours; discussion, three hours; outside study, seven hours. Enforced requisite: course 2A. Continuation of course 2A. P/NP or letter grading.

4. Intermediate Modern Korean. Lecture, two hours; discussion, three hours. Enforced requisite: course 3. Continuation of course 3. Conversation, composition, and readings with structural analysis in modern Korean.

4A. Intermediate Korean for Korean Speakers. Lecture, two hours; discussion, three hours; outside study, seven hours. Enforced requisite: course 3A. Not open to students who have attended elementary school in Korea for more than one year. Designed for students who seek training in written components of standard Korean (spelling, reading, writing, and grammar) at intermediate level. P/NP or letter grading.

5. Intermediate Modern Korean. Lecture, two hours; discussion, three hours. Enforced requisite: course 3. Continuation of course 4.

5A. Intermediate Korean for Korean Speakers. Lecture, two hours; discussion, three hours; outside study, seven hours. Continuation of course 4A. P/NP or letter grading.

6. Intermediate Modern Korean. Lecture, two hours; discussion, three hours. Enforced requisite: course 3. Continuation of course 5.

6A. Intermediate Korean for Korean Speakers. Lecture, two hours; discussion, three hours; outside study, seven hours. Continuation of course 5A. P/NP or letter grading.

50. Korean Civilization. Lecture, three hours; discussion, one hour. Knowledge of Korean not required. General survey of development of Korean culture within context of political, social, and economic history.

Upper Division Courses

100A-100B-100C. Advanced Modern Korean. Lecture, two hours; discussion, three hours. Prerequisite: course 6 or equivalent. Course 100A or consent of instructor is prerequisite to 100B, which is prerequisite to 100C. Continuation of course 6. Readings of modern prose and poetry, with emphasis on grammar and Sino-Korean.

101A-101B-101C. Advanced Readings in Modern Korean. Lecture, three hours. Prerequisite: course 100C or equivalent. Advanced readings and discussion for students planning to do advanced coursework or research on Korea. Topics selected from magazines, journals, and books related to humanities and social sciences.

CM120. Structure of Korean. (Same as Linguistics M177.) Lecture, three hours. Prerequisites: two years of Korean, or one year of Korean and some knowledge of linguistics. Discussion of major syntactic, semantic, and pragmatic characteristics of Korean in light of linguistic universals, with brief introduction to formation, typological features, and phonological structure of Korean. Concurrently scheduled with course C220.

CM127. Contrastive Analysis of Japanese and Korean. (Same as Japanese CM127 and Linguistics M178.) Lecture, three hours. Prerequisites: two years of Japanese or Korean, one introductory linguistics course. Critical reading and discussion of selected current research papers in syntax, pragmatics, discourse, and sociolinguistics from perspective of contrastive study of Japanese and Korean. May be repeated for credit with consent of instructor. Concurrently scheduled with course CM227.

130A-130B. Readings in Modern Korean Literature. Readings/discussion, three hours. Prerequisite: course 101A or consent of instructor. Readings and discussion of major modern Korean literary texts.

150. Korean Literature in Translation: Classical. Lecture, three hours. Prerequisite: English 3 or one course from Humanities 1A, 1B, 1C, 1D, 2A, 2B, 2C. Knowledge of Korean not required. Survey of Korean literature from the beginning to the present day, with all readings from English translations. Poetry and prose to the end of the 19th century.

151. Korean Literature in Translation: Modern. Lecture, three hours. Prerequisite: English 3 or one course from Humanities 1A, 1B, 1C, 1D, 2A, 2B, 2C. Knowledge of Korean not required. Survey of Korean literature from the beginning to the present day, with all readings from English translations. Literature of the 20th century.

160. Korean Buddhism. Lecture, three hours. Knowledge of Asian languages not required. Introduction and development of Buddhism in Korea, interactions between indigenous Korean culture and Sinitic traditions of Buddhism, Korean syntheses of imported Buddhist theological systems and meditative techniques, and independent Son (Zen) schools of Korea.

165. Introduction to Korean Buddhist Texts. Lecture, three hours. Prerequisites: course 100A and/or Chinese 110C. Introduction to reading Korean Buddhist texts written in Sino-Korean and taken from indigenous doxographic materials and philosophical writings, Korean Buddhist apocryphal scriptures, native exegetical commentaries, and Son (Zen) texts. Coverage varies. Texts may be read in either Sino-Korean or literary Chinese. May be repeated with consent of instructor.

175. Introduction to Traditional Korean Thought. Lecture, three hours; discussion, one hour; outside study, eight hours. General survey of Korean thought from the earliest records to the 20th century, including shamanism, Taoism, Buddhism, Christianity, and neo-Confucianism. Korean traditions and those found in India, China, Japan, and the West

176. Introduction to Korean Confucian Texts. Lecture, three hours. Prerequisite: course 100C or equivalent. Reading in Koryo and Choson texts on politics, society, and culture. Coverage varies. Texts may be read in either Sino-Korean or literary Chinese. May be repeated with consent of instructor.

177. Introduction to Modern Korean Thought. Lecture, two hours; discussion, one hour; outside study, nine hours. Prerequisite: course 50. Survey of Korean thought in the 20th century, including religious thought, political thought, feminism, nationalism, and economic thinking and practice.

180A-180B-180C. Cultural History of Korea. Lecture, three hours; discussion, one hour. Prerequisite: course 50. Examination of evolution of Korean culture and society within context of political and institutional industry. Consideration of both higher and popular culture. **180A.** Through 1259; **180B.** 1260 through 1876; **180C.** Since 1876.

197A. Seminar: Traditional Korea. Seminar, three hours; outside study, nine hours. Prerequisite: consent of instructor. Selected issues of interpretation in Korean history from earliest times through the mid-19th century. Coverage varies from term to term and includes such topics as state formation, international relations, or "sprouts of capitalism" thesis.

197B. Seminar: Contemporary Korean Society and Culture. Seminar, three hours; outside study, nine hours. Prerequisite: course 177 or 180C or consent of instructor. Selected topics in modern Korean history.

Graduate Courses

200. Bibliography and Methods of Research in Korean. Lecture, three hours. Prerequisites: graduate standing, reading knowledge of Korean and Chinese. Review of basic Western and modern Korean reference books, with concentration on Korean literature and language, and survey of basic bibliographical material. In addition, introduction to most important primary sources in student's field of specialization.

210. Thought and Society in Korea. (Formerly numbered 290A-290B.) Readings/discussion, three hours. Prerequisites: graduate standing, reading knowledge of Korean. Readings in Korean intellectual history and its social, political, and economic background from the rise of neo-Confucianism in the 14th century to the 20th century.

211. Thought and Society in Modern Korea. Discussion, three hours; outside study, nine hours. Prerequisites: graduate standing, reading knowledge of Korean. Critical examination of list of books central to field of modern Korean history, including such topics as Korean capitalism and communism, intellectual history, social movements, and the Korean War.

C220. Structure of Korean. Lecture, three hours. Prerequisites: two years of Korean, or one year of Korean and some knowledge of linguistics. Linguistic analysis of Korean for those who concentrate on Korean language. Discussion of major syntactic, semantic, and pragmatic characteristics of Korean in light of linguistic universals. Concurrently scheduled with course CM120.

CM227. Contrastive Analysis of Japanese and Korean. (Same as Japanese CM227.) Lecture, three hours. Prerequisites: two years of Japanese or Korean, one introductory linguistics course. Critical reading and discussion of selected current research papers in syntax, pragmatics, discourse, and sociolinguistics from perspective of contrastive study of Japanese and Korean. May be repeated for credit with consent of instructor. Concurrently scheduled with course CM127.

230A-230B. Seminars: Literary Translation from Korean. Seminar, three hours. Prerequisite: reading knowledge of Korean. In consultation with instructor, students select works to be translated. Devoted to skill of producing accurate and readable translations, with emphasis on problems and techniques unique to poetry and prose. At end of term, students expected to produce publishable translations. May be repeated once with consent of instructor. In Progress grading.

235A-235B. Seminars: Topics in Modern Korean Literature. Seminar, three hours. Prerequisite: graduate standing or at least five years of Korean. Recommended: reading knowledge of Chinese or Japanese. Study of a selected period, movement, theme, or author of 20th-century Korean literature, with critical review of secondary works in Western and Korean languages. May be repeated for credit with consent of instructor. In Progress grading.

240A-240B. Seminars: Classical Korean Fiction. Seminar, three hours. Prerequisite: reading knowledge of Korean. Formal and thematic study of tales of the marvelous, romance, satirical stories, diaries, and *p'ansori* fiction. Status of fiction in society and culture, fiction as imaginative representation of the writer's relationship to real conditions of existence. Latest Western theory of narratology applied in analysis. In Progress grading.

245A-245B. Seminars: Classical Korean Poetry. Seminar, three hours. Prerequisite: reading knowledge of Korean. Critical reading and analysis of classical Korean poetry, including discussion of literary and cultural contexts of poetic genres. Nature of codes, conventions that make meaning possible. Review of latest Korean scholarship. May be repeated once with consent of instructor. In Progress grading.

265A-265B. Seminars: Korean Buddhist Texts. Seminar, three hours. Prerequisite: consent of instructor. Selected topics in Korean Buddhist texts. Coverage varies. In Progress grading.

295A-295B. Seminars: Topics in Traditional Korean Cultural History. Seminar, three hours; outside study, nine hours. Prerequisite: reading knowledge of Korean or literary Chinese. Discussion and research on major topics in Korean cultural history, such as Confucianization of Korean society, Practical Learning movement of late Choson dynasty, or Korean reactions to the West in Eastern learning and enlightenment movements of the 19th century. May be repeated for credit. In Progress grading.

296A-296B. Seminars: Topics in Modern Korean Cultural History. Seminar, three hours; outside study, nine hours. Prerequisites: graduate standing, reading knowledge of Korean. Graduate research seminar on selected topics in modern Korean history. In Progress grading.

Scope and Objectives

This undergraduate major is an area studies program of the East Asian region which is divided into three areas of concentration — China, Japan, and Korea. It offers a social science approach, combined with language study and work in the humanities.

Bachelor of Arts Degree

Two years of language and a total of 13 upper division courses, including courses in the social sciences, culture, and language, must be taken for graduation. You must take a minimum of nine courses in the area of your choice. The remainder must be taken in another area of concentration within the major. No more than eight courses may be from a single department. You should select the courses from the lists below. Courses on East Asia not listed below, offered only on a temporary basis, may also be applied toward the major. At the discretion of the adviser, you may be advised to take theory classes applicable to the major

requirements. Courses marked with an asterisk are those on East Asia in general.

China Concentration

Preparation for the Major: Chinese 1, 2, 3, 4, 5, 6, History 11A-11B, Sociology 1.

The Major: A minimum of nine courses selected from Art History C115B, C115D, C115E, C115F, Chinese 150, 151, 160, 175, 190, and up to three upper division language courses or equivalent, East Asian Languages and Cultures 161, 162, Economics 190,* 191,* 192.* Ethnomusicology and Systematic Musicology 156A, 156B, 157, 158A, 158B, 158C, Geography 186, History 182A, 182B, 183A, 183B, 184, Political Science 135, 159, Sociology 188,* and a 199 special studies course in Chinese or in any social sciences or humanities department.

Japan Concentration

Preparation for the Major: History 9C, Japanese 1, 2, 3, 4, 5, 6, Sociology 1.

The Major: A minimum of nine courses selected from Anthropology 175S, Art History 114C, C115C, East Asian Languages and Cultures 161, 162, Economics 190,* 191,* 192.* Ethnomusicology and Systematic Musicology 160A, 160B, History 185, 186, 187A, 187B, 187C, Japanese 150, 151, 160, 175, M182, 190, and up to three upper division language courses or equivalent, Political Science 136, 160, Sociology 188,* 189, Theater 102A, and a 199 special studies course in Japanese or in any social sciences or humanities department.

Korea Concentration

Preparation for the Major: Korean 1, 2, 3, 4, 5, 6, 50, Sociology 1.

The Major: A minimum of nine courses selected from Anthropology 175V, Art History 114E, East Asian Languages and Cultures 161, 162, Economics 190,* 191,* 192.* Korean 150, 151, 160, 175, 180A, 180B, 180C, and three upper division language courses or equivalent, Sociology 188,* Theater 102E,* and a 199 special studies course in Korean or in any social sciences or humanities department.

Aaron Yelowitz, Ph.D.

Scope and Objectives

UCLA's Economics Department is ranked among the 10 best in the nation according to a recent survey conducted by the Conference Board of the Associated Research Councils. Its undergraduate program is designed for students who wish to gain a thorough understanding of economic analysis. Emphasis is on economic principles applied to resolving interpersonal conflicts of interest and coordinating productive activity in a world of scarce resources. Because students must gain a thorough theoretical and technical competence before extensive study of the applied specializations in the discipline, the analytic core of the major in economics is closely structured. Some courses are appropriate for nonmajors, but the curriculum is most suitable for students who wish to make the study of economics the

primary focus in their undergraduate education.

The undergraduate major provides analytical training in reference to socioeconomic phenomena and provides an excellent theoretical background for those pursuing graduate education in law, management, public administration, journalism, social welfare, architecture and urban planning, and education, as well as economics.

The graduate program is designed primarily for students pursuing the Ph.D. degree. The doctorate is awarded to those students who have achieved the level of study and training required for a professional economist. The degree recognizes students' ability to make scholarly contributions in their fields of specialization and to undertake advanced research in those areas.

Bachelor of Arts in Economics

Preconomics Major

While you are completing the lower division preparation courses for the major, you may be classified as a preeconomics major. You are eligible to apply for the major once you have completed the preparation courses and at least one 12-unit term in residence at UCLA. Application for the major should be filed at the undergraduate counselor's office in 2253 Bunche Hall by the time you attain 135 quarter units.

Preparation for the Major

Required: Economics 1, 2, 11, 40 (or Statistics 50 as a substitute for course 40); English 4 or 100 or 129B; Mathematics 31A, and 31B or 31E. All courses must be taken for a letter grade. A 2.0 (C) grade is required in each pre-major course. To enter the major, you must have a 2.5 grade-point average in the economics and mathematics preparation courses and a GPA of at least 2.0 in any upper division courses taken for the major before applying.

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval; consult the undergraduate counselor before enrolling in any courses for the major.

The Major

Required: Nine upper division courses in economics which must include Economics 101, 102, and one course from at least three different fields in economics selected from the list below (all courses must be taken for a letter grade). Economics 100, 110, and 190 may not be included among the nine upper division courses. One or two of the nine courses may be selected from Management 120A, 120B, 130A, 130B, and/or 133 (Learning Center

courses or courses transferred from other institutions may not be applied toward this option).

To graduate you must have at least a 2.0 grade-point average in your upper division major courses, with grades of C- or better in Economics 101 and 102. All upper division courses for the major must be taken for a letter grade. Transfer credit is subject to department approval; consult the undergraduate counselor before enrolling in any courses for the major.

Major Fields

Economic theory (courses 101, 102, 103A-103Z, 104, 105AH, 105BH, 107); economic development (courses 111, 112); regional economics (courses 120, 121); public finance (courses 130, 133, M135, M136); statistics, mathematical economics, and econometrics (courses 141, 142, 143, 144, 145, 146, 147A, 147B, 148); labor economics (courses 150, 151, 152); money and banking (courses 160, 161); government and industry (courses 170, 171, 172, 173, 174, 175, 176, 177); economic institutions (courses 180, 181A, 181B, 182, 183, 184); international economics (courses 191, 192).

Bachelor of Arts in Business Economics

This program offers a major for students seeking a business orientation in their study of economics. It does not replicate the traditional undergraduate business school curriculum. Instead, it offers a more tightly focused curriculum that is guided by the rigorous logic and integrative perspective of economics. It is designed to prepare students for graduate education in business, economics, and law. The program requires students to include specific courses offered by the department and the John E. Anderson Graduate School of Management (see The Major).

Admission

Enrollment in the program is limited. Applications for admission are handled exclusively by the Department of Economics. To apply you must have completed at least 72 quarter units (but no more than 135 quarter units), one 12-unit term in residence in regular session at UCLA, and all courses listed under Preparation for the Major. In addition, you must (1) be enrolled in UCLA regular session at the time of application, (2) have a 2.0 (C) minimum grade in each preparation course, (3) have a 3.0 (B) overall average in all preparation courses except English, and (4) have a 2.0 (C) grade-point average in your upper division courses taken for the major before applying (Economics 101 applies on the major preparation grade-point average).

Note: The requisite grade-point averages plus completion of the preparation for the major courses do not guarantee admission to the program. Admission is on a competitive basis, using the above qualifications as minimum standards for consideration. You must petition

to enter the major at the business economics counselor's office in 2250B Bunche Hall.

Prebusiness Economics Major

While you are completing the preparation courses for the major, you may be classified as a prebusiness economics major. (Transfer students who wish to enter UCLA as prebusiness economics majors must meet the admission screening requirements. For information, contact the Office of Undergraduate Admissions and Relations with Schools.)

Preparation for the Major

Required: Economics 1, 2, 11, 40 (or Statistics 50), 101; English 4 or 100 or 129B; Management 1A-1B; Mathematics 31A, and 31B or 31E. All courses must be taken for a letter grade.

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval.

The Major

Required: Economics 102 and at least two courses from 104, 173, 174, 177, 184; four other upper division courses in economics in at least two different fields (no more than two may be taken in the government and industry field); four upper division courses from Management 108, 120A, 120B, 122, 123, 124, 127, 130A, 130B, 133, 140, 175. Transfer credit for any of the major courses is subject to department approval. In addition, some graduate courses from the Anderson Graduate School of Management may be applied toward the major with department consent prior to taking the courses. Consult the business economics counselor before enrolling in any courses for the major.

All upper division major courses must be taken for a letter grade. To graduate you must have at least a 2.0 grade-point average in your upper division major courses, with at least a C- in each course. (Economics 101 applies on the preparation for the major, therefore requiring a minimum grade of C.)

Bachelor of Arts in Economics/International Area Studies

This program is for students who wish to attain specialized knowledge of a particular geographical area in addition to the economics analysis provided by the major. It should be useful to those who plan careers in international business or government service. The department encourages participation in the University of California Education Abroad Program or other recognized international study programs. Experience in foreign firms or institutions would be an advantage but yields no academic unit credit toward the major.

Admission

Qualified students must apply for the major through the undergraduate counselor in 2253 Bunche Hall. To apply you must have completed at least 72 quarter units (but no more than 135 units), one 12-unit term in residence in regular session at UCLA, and all courses listed under Preparation for the Major (except for the second year of your foreign language). In addition, you must be enrolled in UCLA regular session at the time of application. All courses must be completed for a letter grade. A minimum 2.0 (C) grade is required in each premajor course, with a combined 2.5 GPA in the economics and mathematics courses. You must also have a 2.0 (C) grade-point average in your upper division courses taken for the major before applying. Language course preparation need not be completed at the time of admission but must be completed before preparing the research paper required in Economics 193. Your program as a whole must be approved by the Economics Department counselor before you are admitted to the major.

Preeconomics/International Area Studies Major

While you are completing the preparation courses for the major, you may be classified as a preeconomics/international area studies major.

Preparation for the Major

Required: Economics 1, 2, 11, 40 (or Statistics 50), 101, 102; Mathematics 31A, and 31B or 31E. You also must complete at least the first year (or equivalent) of the two required years of a modern foreign language which is spoken in the geographical area of your major concentration.

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval; consult the undergraduate counselor before enrolling in any courses for the major.

The Major

Required: A total of 12 upper division courses selected from economics and the Approved Noneconomics Courses listed below for your concentration. Eight economics courses are required, including Economics 191, 192, 193, and five courses from at least two different fields in economics (selected from the Major Fields listed under the economics major). Economics 101 and 102 (which are required for the premajor) cannot be used to satisfy this requirement. The four remaining upper division courses are social sciences courses related to your concentration and must be chosen from the approved courses listed below. You are required to include selections from at least two different departments. Economics 193 must be completed in your last year before graduation and includes the preparation of a research paper on the economy of the country or region

of your concentration. In addition, you must show two-year proficiency (or equivalent) in a modern foreign language related to your concentration. The noneconomics courses, the research paper, and the language learned must show consistency of purpose.

One or two courses from Management 120A, 120B, 130A, 130B, 133 may be substituted for one or two of the economics electives (Learning Center courses or courses transferred from other institutions may not be applied toward this option).

To graduate in the major you must achieve a 2.0 GPA for both economics and noneconomics courses, with a grade of C – or better in each course.

Concentrations for the Major

When you declare your major, you must also select a concentration that includes a geographical area where the foreign language you have taken is spoken, and you must complete four of the approved noneconomics courses listed, including courses from at least two different departments. You may not use courses that are not on your concentration list unless you have petitioned and received approval in advance. Consult the undergraduate counselor in 2253 Bunche Hall regarding the petition process.

(1) East Asia

Languages: Chinese, Japanese, Korean
Approved Noneconomics Courses: Anthropology 175S, 175T, Chinese 175, Geography 186, History 182A, 182B, 183A, 183B, 184, 185, 187A, 187B, 187C, 190A, 190B, Japanese 175, Korean 175, 180A, 180B, 180C, Political Science 135, 136, 159, 160, Sociology M153, 188, 189

(2) Europe

Languages: French, German, Italian, Portuguese, Spanish
Approved Noneconomics Courses: French 109, 130B, 132, Geography 183, German 100A, 100B, 100C, History 117A, 124A, 124B, 125A, 125C through 125F, 126A through 126F, 128A, 128B, 128C, 129A, 129B, 129C, 130A, 132A, 132B, 133A, 133B, 134A, 134B, 141A, 141B, 141C, 142A, 142B, Hungarian 130, Italian 102B, Political Science 127A, 152, 153, 153A, 154, 155, 157, 158A

(3) Latin America

Languages: Portuguese, Spanish
Approved Noneconomics Courses: Geography 181, 182A, 182B, History 165A, 166, 167A through 167D, 168, 170A, 171, 172, 173, 174, Political Science 130, 131, 163A, 163B, Sociology 186

(4) Middle East

Languages: Arabic, Hebrew, Persian, Turkish
Approved Noneconomics Courses: Geography 187, History 106C, 107B, 108A, 110B, 111B, Islamic Studies 110, Jewish Studies

142, Political Science 132A, 164, Sociology 187, Turkic Languages 180

(5) Former Soviet Union

Languages: Armenian, Russian
Approved Noneconomics Courses: Geography 184, History 112A, 112B, 112C, 113, 124A, 124B, 131A through 131D, Political Science 128A, 128B, 156A, Turkic Languages 180

(6) Individual Concentration

Language, geographical area, and noneconomics courses to be approved in advance by the economics/international area studies faculty adviser

Specialization in Computing

Majors in economics, business economics, and economics/international area studies may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, Mathematics 61, and two courses from Program in Computing 10C, 15, 30, 60, and (3) completing at least two courses from Economics 104, 143, 144, 145, 146, 147A, 147B, 199, with the additional provision that the courses taken must make substantial use of computers. A grade of C – or better is required in each course, with a combined GPA of at least 2.0. You graduate with a bachelor's degree in your major and a specialization in computing.

Bachelor of Science in Economics/System Science

The degree is described following the Economics Department courses.

Honors Program

The departmental honors program is open to majors in economics, business economics, and economics/international area studies who have a cumulative grade-point average of at least 3.5 in all courses taken at UCLA prior to application.

To qualify for departmental honors at graduation, you must (1) select at least seven of the required upper division economics courses from the approved list designated for departmental honors, (2) complete a senior thesis acceptable to the departmental honors committee, (3) present your thesis in Economics 195H, and (4) complete your major requirements with at least a 3.5 GPA in the economics courses. Highest honors are awarded at the discretion of the departmental honors committee based on grade-point average and quality of the senior thesis.

Economics 195H and 199, the courses used for thesis preparation, may be counted as upper division courses toward the field in which the thesis is written (for purposes of satisfying the requirements for the major). Further information and application forms are available

from the undergraduate counselor in 2253 Bunche Hall.

Graduate Study

The following constitutes introductory information regarding graduate degree programs. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Master's Degree

Admission

The department admits only applicants whose objective is the Ph.D.

Areas of Study

Economic theory; econometrics; information and uncertainty; mathematical economics; monetary theory; economic history; public finance; labor economics; industrial organization; international economics; and development economics.

Course Requirements

The department requires nine upper division and graduate-level courses in Economics completed while in graduate status at UCLA. At least five of the nine courses must be graduate-level courses in the Economics Department, one of which must be either Economics 207 or 241 or 242. Each course must be completed with a grade of B or better.

With prior approval of the vice chair for graduate affairs, students may offer a maximum of two courses from departments outside economics. However, these may not substitute for the five graduate-level economics courses required.

With the prior approval of the vice chair for graduate affairs, four units of Economics 596 may be applied toward the total course requirement and the minimum graduate course requirement.

Comprehensive Examination Plan

In addition to the course requirements, candidates for the M.A. degree must satisfactorily complete a written comprehensive examination requirement that involves passing two examinations. This requirement may be fulfilled by one of the following:

- (1) Master's-level (M) passes in comprehensive examinations for two of the three first-year sequences and a grade of B or better in all three courses in the remaining sequence.
- (2) Master's-level (M) passes in the comprehensive examination for one of the three first-year sequences and in one doctoral field examination.
- (3) Master's-level (M) passes in two doctoral field examinations.

Examinations are graded H (Ph.D. honors pass), P (Ph.D. pass), M (M.A. pass), and F (fail).

Thesis Plan

None.

Doctoral Degree

Admission

Applicants for the Ph.D. program in Economics who satisfy the University minimum requirements are eligible to apply. It is strongly recommended that applicants have undergraduate training in economics, mathematics, and statistics. Applicants must also submit a full record of prior university experience, three letters of reference, and scores on the Graduate Record Examination (GRE) General Test and Subject Test in Economics. International applicants must also submit scores for the Test of English as a Foreign Language (TOEFL).

The department admits students only for the Fall Quarter of each academic year. The deadline for submitting the *Application for Graduate Admission* is December 15.

Major Fields or Subdisciplines

Economic theory; econometrics; information and uncertainty; mathematical economics; monetary theory; economic history; public finance; labor economics; industrial organization; international economics; and development economics.

Course Requirements

The standard first-year core sequences are defined as the first-year graduate courses in microeconomic theory (Economics 201A-201B-201C), macroeconomic theory (Economics 202A-202B-202C) and quantitative methods (Economics 203A, 203B, 203C).

Written and Oral Qualifying Examinations

All Ph.D. qualifying examinations are intended to determine competency in the overall field. While the courses offered are intended to prepare students for the field examinations, and while the professors of the courses are normally also the examiners, the qualifying examination is not restricted solely to the material explicitly presented in course lectures or assigned exercises. Students are assisted in acquiring knowledge of the overall field by course reading lists that include recommended supplementary and complementary readings.

The department offers written qualifying examinations in the areas listed below (with preparatory courses shown in parentheses):

Core Sequences. Microeconomic theory (Economics 201A-201B-201C); macroeconomic theory (Economics 202A-202B-202C); quantitative methods (Economics 203A, 203B, 203C).

Elective Doctoral Fields. Econometrics (Economics 203B, 203C, 231A, 231B, M232A, 232B); information and uncertainty (Economics 211A-211B, 212A); mathematical economics (213A-213B, 214A); monetary economics (221A-221B); economic history (241, 242); public finance (251A, 251B, 252); labor economics (261A-261B); industrial organization (271A-271B, 271C); international economics (281A, 281B, 281C); development economics (286A, 286B, 287A, 287B).

Examinations are graded H (Ph.D. honors pass), P (Ph.D. pass), M (M.A. pass), and F (fail).

Students must pass (with a P or better) the qualifying examinations for two of the standard first-year core sequences — microeconomic theory, macroeconomic theory, or quantitative methods — by the end of Spring Quarter of their second year.

Students must satisfy an additional requirement in the remaining first-year core sequence that may be met by (1) earning a Ph.D. pass on the corresponding qualifying examination or (2) earning a grade of B or better in all three courses.

Students must pass (with a P or better) qualifying examinations in three doctoral elective fields, usually by the end of the second year even if they passed all three first-year core sequence qualifying examinations.

Written qualifying examinations can be repeated, but students may sit for no more than seven in total.

Qualifying examinations in all core sequences are offered twice a year (September and June). Doctoral field qualifying examinations are offered at least once a year.

By employing the breadth option, students may substitute a field by coursework, defined as three graduate-level courses for one of the three elective fields. Courses used to satisfy this requirement cannot include any courses used in the core sequence requirements nor can they include courses preparatory for the written qualifying examinations which the student is using for field requirements. The breadth option must include Economics 207 or 241 or 242. Students may apply courses at the graduate level (200 level) outside the Economics Department on written preapproval by the vice chair for graduate affairs. Only courses in which a minimum grade of B is earned may be used to satisfy this requirement.

A written paper must be completed by the end of the student's third year. This paper is to be read and evaluated by a member of the Economics Department faculty, who must certify in writing that it satisfied this requirement. This paper could be based on or be an extension of an optional or required paper for a course. Alternatively, the paper could be one presented in a workshop or an outgrowth of a research assistantship or independent study. Ideally, the paper would be related to the student's doctoral dissertation. The materials of

this paper may be used as the basis for presentation in a departmental workshop, as well as the basis for the dissertation.

Before advancing to the University Oral Qualifying Examination, students are required to present a paper in a departmental workshop. It is recommended that this be completed by the end of the third year.

The University Oral Qualifying Examination, administered by the student's doctoral committee, is scheduled after successful completion of all written qualifying examinations, course requirements, the written paper and workshop requirements, and the submission of a written dissertation proposal. The examination focuses on, but is not limited to, the dissertation proposal.

Lower Division Courses

1. Principles of Economics. Lecture, three hours; discussion, one hour. Not open to students with credit for course 100. Introduction to principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on allocation of resources and distribution of income through the price system.

2. Principles of Economics. Lecture, three hours; discussion, one hour. Not open to students with credit for course 100. Introduction to principles of economic analysis, economic institutions, and issues of economic policy. Emphasis on aggregate economics, including national income, monetary and fiscal policy, and international trade.

5. Introductory Economics. Lecture, three hours. Not open to students with credit for course 1, 2, or 100. Principles of economics as tools of analysis. Presentation of a set of concepts with which to analyze a wide range of social problems that economic theory illuminates. May not be used to fulfill entrance requirements for any Economics Department major.

11. Microeconomic Theory. (Formerly numbered 101A.) Lecture, three hours. Enforced requisites: courses 1, 2, Mathematics 31A, and (31B or 31E). Laws of demand, supply, returns, and costs; price and output determination in different market situations.

40. Introduction to Statistical Methods. Lecture, three hours; discussion, one hour. Not open to students with credit for Mathematics M150A-150B, 151, Statistics 50, M152A, or 152B. Elements of statistical analysis. Presentation and interpretation of data; descriptive statistics; theory of probability and basic sampling distributions; statistical inference, including principles of estimation and tests of hypotheses; introduction to regression and correlation.

88A. Lower Division Research Seminar: Microeconomics. Discussion, three hours. Enforced requisite: course 1. Limited to 10 freshmen/sophomores. Seminar in which students do intensive research project under guidance of regular faculty. Students select topics in consultation with instructor (topics limited to material covered in course 1), write papers, and present them at the seminar.

88B. Lower Division Research Seminar: Macroeconomics. Discussion, three hours. Enforced requisite: course 2. Limited to 10 freshmen/sophomores. Seminar in which students do intensive research project under guidance of regular faculty. Students select topics in consultation with instructor (topics limited to material covered in course 2), write papers, and present them at the seminar.

99. Lower Division Seminar (2 or 4 units). Enforced requisites: courses 1 and 2 (B or better). Preparation: overall 3.0 grade-point average. Designed to provide an instructional vehicle for student research projects. May not be used to fulfill entrance requirements for any Economics Department major.

Upper Division Courses

Courses 1 and 2, or 5 or 100 are requisite to all upper division courses in economics.

100. Economic Principles and Problems. Lecture, three hours. Prerequisite: upper division standing. Not open to students with credit for course 1, 2, or 5. Principles of economics with application to current economic problems. May not be used to fulfill entrance requirements for any Economics Department major.

101. Microeconomic Theory. (Formerly numbered 101B.) Lecture, three hours; discussion, one hour. Prerequisite: course 11. Theory of factor pricing and income distribution; general equilibrium; implications of pricing process for optimum allocation of resources; interest and capital.

102. Macroeconomic Theory. Lecture, three hours. Prerequisites: course 11, Mathematics 31A, and 31B or 31E. Theory of income, employment, and price level. Analysis of secular growth and business fluctuations; introduction to monetary and fiscal policy.

103A-103Z. Upper Division Research Seminars: Applications of Economic Theory. Lecture, three hours. Prerequisites: course 11 and others as set by instructor. Limited enrollment seminars in which students usually write a research paper on a topic selected in consultation with instructor.

M103A. Political and Economic Issues in the Proliferation of Nuclear Weapons. (Same as Political Science M139A.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Interdisciplinary approach to the problem of nuclear proliferation. Economic aspects of acquisition of nuclear weapons and economic aspects of nuclear energy treating technological, bargaining, and stability issues.

103B. Economics of Energy. Prerequisites: courses 11, 101, 102. Topics include pricing and taxation of exhaustible resources, interactions between energy and the economy, institutions such as OPEC and oil price controls, oil debt and balance of payments, energy conservation, and future technologies.

104. Managerial Economics. Lecture, three hours. Prerequisite: course 11. Enrollment priority to business economics students. Application of economic principles to business decisions. Allocating joint costs. Implicit costs of capacity constraints. Problems in capital budgeting, financing, and pricing. Role of interest rates in business decisions.

105AH. Topics in Microeconomics (Honors). Lecture, three hours. Prerequisites: courses 11, 101, and departmental honors program standing or consent of instructor. Introduction to Walrasian and Nash equilibrium. Modeling of selected applied topics such as peak load pricing, pricing of externalities, strategic pricing.

105BH. Topics in Macroeconomics (Honors). Lecture, three hours. Prerequisites: courses 11, 101, and departmental honors program standing or consent of instructor. Imperfect information-based models of monetary business cycles: theory and evidence. Real business cycle models: role of shocks and interindustrial technology structure in explaining fluctuations. Policy analysis and policy intervention in a world with rational maximizing agents: recent perspectives.

107. History of Economic Theory. Lecture, three hours. Prerequisite: course 1 or 100. Survey of economic analysis from Grecian antiquity to the early 20th century, concentrating on the 18th and 19th centuries; special attention to selected writers, including Aristotle, mercantilists, Physiocrats, Hume, Smith, Malthus, Ricardo, Marx, marginalists, and Marshall.

110. Economic Problems of Underdeveloped Countries. Lecture, three hours. Prerequisite: course 1 or 100. Limited to non-Economics Department majors. Not open for credit to students with credit for course 111 or 112. Survey of major issues of development economics. Economic structure of low-income countries and primary causes for their limited economic growth. Economic goals and policy alternatives open to their leaders. Possible roles of developed countries. May not be applied toward any Economics Department major.

111. Theories of Economic Growth and Development. Lecture, three hours. Prerequisite: course 11. Growth models, theory of production under constraints, relative factor prices and their impact on choice of technology, investment criteria, role of the market, economic planning in less developed areas.

112. Policies for Economic Development. Lecture, three hours. Prerequisite: course 102 or 111. Suggested strategies for economic development: inflation, balanced growth, industry vs. agriculture, import substitution, export-oriented expansion, foreign aid, and others. Selected case studies.

120. Introduction to Urban and Regional Economics. Lecture, three hours. Prerequisite: course 11 or consent of instructor. Survey of broad range of policy and theoretical issues that are raised when economic analysis is applied in an urban setting. Topics include urbanization and urban growth, housing markets, location decisions of households and firms, transportation, urban labor markets, and local public sector.

121. Urban Economic Analysis. Lecture, three hours. Prerequisites: courses 11, 101. Urban economic analysis requires development of analytical tools that are different in some respects from standard methodology presented in courses 11 and 101. Construction and implementation of these tools, with applications to urban location decisions, housing, transportation, labor markets, and local public sector.

130. Public Finance. Lecture, three hours. Prerequisites: courses 11 and 101, or consent of instructor. Role of government in a market economy. Alternative justifications for government intervention. Principles and effects of spending programs (especially social insurance and health), taxation, deficit financing, and federal credit programs. Taxation in an open economy. Properties of public choice mechanisms.

133. State and Local Finance. Lecture, three hours. Prerequisite: course 130. Division of functions and revenues between state and local governments; revenues, expenditures, and indebtedness of these governments. Analyses of state and local tax systems.

M135. Economic Models of Public Choice. (Same as Political Science M105.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: course 11, any lower division political science course, and junior/senior standing, or consent of instructor. Analysis of methods and consequences of arriving at collective decisions through political mechanisms. Topics include free-rider problem, voting and majority choice, demand revelation, and political bargaining.

M136. Economic Models of Political Conflict and Conflict Resolution. (Same as Political Science M106.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: course 11, any lower division political science course, and junior/senior standing, or consent of instructor. Biological, cultural, and organizational sources of political conflict. Role of threats, promises, commitments. Models of the onset and termination of conflict. Conduct of war: strategy and tactics.

141. Principles of Statistical Decision. Lecture, three hours. Prerequisite: course 40 or equivalent. Errors of first and second kind; economic loss functions; prior probabilities and Bayes theorem. Analysis of classical and Bayesian approaches. Application to inventory and production problems. Value of information and implications for sampling design.

142. Probabilistic Microeconomics. Lecture, three hours. Prerequisites: courses 11, 101. Combination of basic probability introduced in course 40 with microeconomic models presented in courses 11 and 101 in order to explain phenomena such as insurance, job search, and stock market behavior. Optimal production and consumption under uncertainty. Review of probability and introduction to alternative measures of risk and risk aversion.

143. Applied Regression Analysis. Lecture, three hours; discussion/computer tutorial, one hour. Prerequisite: course 40 or equivalent. Not open to students with credit for course 147A or 147B. Review of simple regression; assumptions of classical linear regression model; multiple regression, estimation, and inference; violations of assumptions of classical model (multicollinearity, heteroskedasticity, autocorrelation); autoregressive models, dummy variables. Emphasis on practical experience with regression analysis and interpretation; matrix algebra not required.

144. Introduction to Mathematical Methods in Economics. Lecture, three hours. Prerequisites: courses 11, 101, two calculus courses. Introduction to use of mathematics in economic analysis. Topics include partial differentiation, optimization, integration, and differential and difference equations, with applications to the theory of the household and the firm, capital theory, and economic dynamics.

145. Topics in Mathematical Economics. Lecture, three hours. Prerequisite: course 144. Possible topics include game theory; competitive equilibrium analysis; examination of market failure and role for market intervention.

146. Linear Models in Economics. Lecture, three hours. Prerequisite: one linear or matrix algebra course. Not open for credit to students with credit for Mathematics 144 or Electrical Engineering 136. Possible topics include duality theory of linear programming and simplex algorithm, input-output analysis, and two-person zero-sum games.

147A. Introduction to Econometrics. Lecture, three hours. Prerequisites: two calculus courses and course 143 (or Mathematics M150A-150B or Statistics M152A, 152B), or consent of instructor. Introduction to econometrics, including review of matrix algebra and statistical theory; linear regression model; model specification; data collection; estimation and hypothesis testing; and introduction to simultaneous equations models. Original econometric paper required.

147B. Applications of Econometrics. Lecture, three hours. Prerequisite: course 147A. Econometric models and data; forecasting, policy analysis, estimation of simultaneous equations models, applications of econometrics. Major original econometric paper required.

148. Introductory System Theory. Lecture, three hours. Prerequisites: Mathematics 33A, 33B. Introduction to modeling and analysis of dynamic systems, with emphasis on examples from social and life sciences. Linearity, impulse responses, stability, state variables, algorithms for filtering and control.

150. Wage Theory. Lecture, three hours. Prerequisites: courses 11 and 101, or consent of instructor. Supply and demand for labor. Analysis of government, union, and other constraints on competitive system of wage determination. Wage level and structure. Wages and human capital theory.

151. Labor, Wages, and Income. Lecture, three hours. Prerequisite: course 150 or consent of instructor. Selected topics in labor theory; income distribution; business cycles and unemployment; investments in human capital and life cycles; migration; human fertility; marriage and divorce, etc.

152. Trade Unions and Professional Associations. Lecture, three hours. Comparative behavior of unions and professional associations; criteria for wage maximization; quantification of gains; analysis of legal framework applying to such organizations.

160. Money and Banking. Lecture, three hours. Prerequisite: course 102. Principles of money and banking in the U.S.; legal and institutional framework; money supply process; instruments, effects, and practice of monetary policy.

161. Monetary Theory. Lecture, three hours. Prerequisite: course 160. Nature of money and monetary exchange; level and term structure of interest rates; level and growth rate of money; transmission of monetary shocks; theory and practice of monetary policy.

170. Monopoly and Competition. Lecture, three hours. Prerequisite: course 11. Comparison of economic and legal treatments of the competitive process. Monopoly competition, and collusion as economic theory, as antitrust doctrine, and as fact. Source of monopoly. Predatory behavior. Misleading practices in theory and policy. General problem of relationship between private rights of action and competitive entry.

171. Industrial Organization: Theory and Tactics. Lecture, three hours. Prerequisite: course 11. Study of pricing and output decisions of firms under conditions of less than perfect competition or monopoly; theories of oligopoly and monopolistic competition; information costs and advertising; examination of pricing practices such as price discrimination, tie-in selling, predatory pricing, and resale price maintenance.

172. Economic Analysis of Laws and Legal Institutions. Lecture, three hours. Prerequisite: course 11. Application of economic theory to legal rule formulation: study of economic nature and consequences of alternative legal arrangements, with special reference to property rights. Application of economic theory to analysis of effects of laws relative to property contracts, torts, crimes, taxation, and constitutional issues. Analysis of legal process.

173. Centralized Markets. Lecture, three hours. Prerequisite: course 11. Enrollment priority to business economics students. Organization and function of stock, bond, commodity, and foreign exchange markets. Theory and evidence related to efficiency of these markets in evaluating information, to their role in facilitating risk-bearing and capital allocation. Interrelationship between business finance and organized capital markets.

174. Organization of the Firm. Lecture, three hours. Prerequisite: course 11. Enrollment priority to business economics students. Role of the firm in traditional economic theory and modern developments in the theory of the firm. Functions of ownership and management in face of risk and opportunism. Internal organization of the firm. Problem of separation of ownership from control in the modern corporation. Determinates of firm size, vertical integration, and degree of specialization of activities of firms. Decision making within the firm in a democratic setting.

175. Economics of Transportation. Lecture, three hours. Prerequisite: course 11. Economic characteristics of transport; functions of the different agencies; pricing and resource allocation in transport; public regulation of transport; urban transport; modern transport problem.

176. Business and Government. Lecture, three hours. Prerequisites: courses 11, 101. Several aspects of interaction between business and government, including regulation of prices, entry, working conditions, natural resource use, policies of taxation, and subsidy of business.

177. Contractual Arrangements in Business. Lecture, three hours. Prerequisites: courses 11, 101. Enrollment priority to business economics students. Economic and legal determinants of contractual arrangements adopted by business. Franchise contracts, rights-of-first refusal, and tie-in contracts. Legal constraints and efficiency of different contractual arrangements.

180. Comparative Systems: Transformation of Socialist Economies. Lecture, three hours. Prerequisites: courses 11, 101. Comparative analysis of capitalist and socialist economies. Models of transition from centrally planned to free market economies. Analysis and critique of actual implementation. Future prospects.

181A. Development of Economic Institutions in Western Europe. Lecture, three hours. Prerequisite: upper division standing. European economic history, 900 to 1700. Custom, command, and market modes of organization. Evolution of property rights, contract forms, and monetary arrangements. Decline of feudal institutions, especially serfdom. Open field village and enclosures. Crafts manufacturing and guild organization. Development of banking. Public finances and role of government.

181B. Development of Economic Institutions in Western Europe. Lecture, three hours. Prerequisite: upper division standing. European economic history, 1700 to 1914. Industrial revolution in Britain and its spread to the continent. Rise of factories, industrial firms, and unions. Changes in standard of living and demographic consequences. Imperial expansion and decline of Britain. Worldwide diffusion of economic growth and the Gerschenkron hypothesis.

182. Centralized Economics Systems. Lecture, three hours. Prerequisites: courses 11, 101. Introduction to theory of centralized systems and examination of some centralized economies. Considerable attention to economy of the U.S.S.R.; some attention to other economies selected in light of the centralized model and with view to the march of current events.

183. Development of Economic Institutions in the U.S. Lecture, three hours. Study of changing economic conditions in the U.S. from Colonial times to the early 20th century and effects of these changes on American society.

184. History of Enterprise and Entrepreneurship in the American Economy. Lecture, three hours. Enrollment priority to business economics students. Study of role of innovation in history of American enterprise. Examination of specific episodes of salient entrepreneurial innovation, as well as general theoretical and empirical treatments.

M189. Asian Pacific Americans in the U.S. Economy. (Same as Asian American Studies M123.) Lecture, three hours. Examination of several dimensions of Asian American participation, from labor market experience to use of government services to entrepreneurial activity. Attention to linking understanding of Asian American experience to public policies available to address problems of economically disadvantaged. P/NP or letter grading.

190. International Economics. Lecture, three hours. Prerequisite: course 1 or 100. Limited to non-Economics Department majors. Not open to students with credit for course 191 or 192. General introduction to international economics, based on examination of theory of trade and the means and significance of balance of payments adjustments, with analysis of major issues of international commercial and monetary policy confronting national and international agencies. May not be applied toward any Economics Department major.

191. International Trade Theory. Lecture, three hours. Prerequisite: course 101. Not open to students with credit for course 190. Theory of international trade: bases, direction, terms, volume, and gains of trade. Effects of tariffs, quantitative restrictions, and international integration. Effects of free and restricted trade on economic welfare and political stability.

192. International Finance. Lecture, three hours. Prerequisite: course 102. Not open to students with credit for course 190. Emphasis on interpretation of the balance of payments and adjustment to national and international equilibria through changes in price levels, exchange rates, and national income. Other topics include making international payments, determination of exchange rates under various monetary standards, capital movements, exchange controls, and international monetary organization.

193. Research in International Area Studies Seminar. Lecture, three hours. Limited to economics/international area studies seniors. Students prepare research paper on economy of the country or region of specialization.

195H. Honors Thesis Seminar. Seminar, three hours. Limited to seniors in departmental honors program. Seminar in which students present results of their senior theses.

199. Special Studies in Economics (2 or 4 units). Prerequisites: courses 11, 101, junior/senior standing, consent of instructor. May be repeated but may be applied only once toward the major requirements.

Graduate Courses

Foundations of Economics

200. Mathematical Methods in Economics. Lecture, three hours. Should be taken prior to enrollment in course 201A. Examination of mathematical methods used in graduate-level courses in microeconomics, macroeconomics, and quantitative methods. Topics include real analysis, linear algebra and matrices, calculus of many variables, static optimization, convex analysis, and dynamics and dynamic optimization. S/U grading.

201A-201B-201C. Microeconomics. Lecture, three hours:

201A. Theory of the Firm and Consumer. Two input/two output model. Walrasian equilibrium and Pareto efficiency. Choice over time — consumer savings and firm investment decisions. Choice under uncertainty — state claims model, asset pricing.

201B. General Equilibrium and Welfare Economics. Meaning of competition in general equilibrium. Decentralization and appropriation roles of prices. Increasing returns. Public goods. Pecuniary and nonpecuniary externalities. Mechanism design.

201C. Basic Concepts and Techniques of Noncooperative Game Theory and Information Economics. Nash equilibrium and subgame perfection. Games with incomplete information. Models of strategic market behavior. Screening and signaling. Bargaining models. Theory of the firm.

202A-202B-202C. Macroeconomics. Lecture, three hours:

202A. Dynamics and Growth Theory. Essential techniques and concepts from dynamical mathematics and neoclassical growth theory. Linear and nonlinear dynamical systems. Dynamic programming and control theory. Stochastic dynamics. Determinacy of equilibrium. Descriptive, optimal, and overlapping generations models of accumulation. Stochastic growth theory. Increasing returns and applications to economic development.

202B. Business Cycles. Survey of representative agent and complete market models of short-run fluctuations. Facts about fluctuations and long-term growth. Real business cycle theory. Calibrating and simulating dynamic models. Asset prices, money, and inflation. Taxation of factor incomes. Cyclical aspects of employment.

202C. Topics in Macroeconomics. Heterogeneous-agent models of endogenous fluctuations and growth. General equilibrium techniques in macroeconomics. Overlapping fluctuations model with national debt. Fiscal policy. Externalities, indeterminacy, and growth. Expectations and business cycles. Money and monetary policy. Historical overview of mainstream macroeconomics. Wicksell and Keynes. Monetarist controversy. New classical and new Keynesian macroeconomics.

203A. Probability and Statistics for Econometrics. Lecture, three hours. Provides statistical tools necessary to understand econometric techniques. Random variables, distribution and density functions, sampling, estimators, estimation techniques, hypothesis testing, and statistical inference. Use of economic problems and examples. S/U or letter grading.

203B. Introduction to Econometrics: Single Equation Models. Lecture, three hours. Estimation of basic linear regression model, testing hypotheses, generalized least squares, serial correlation, heteroskedasticity, multicollinearity, error-in-variables, distributed lags, qualitative dependent variables, and forecasting. S/U or letter grading.

203C. Introduction to Econometrics: Systems Models. Lecture, three hours. Multivariate regression, simultaneous equation estimation, identification, and latent variables. S/U or letter grading.

204A-204Z. Applications of Economic Theory. Lecture, three hours:

M204L-M204M-M204N. Seminars: Pharmaceutical Economics and Policy (1 unit, 1 unit, 2 units). (Formerly numbered M204L.) (Same as Health Services M204A-M204B-M204C.) Seminar, three hours every other week for three terms. Prerequisites: courses 201A-201B-201C or equivalent, Health Services 236 or equivalent, or consent of instructor, graduate standing in public health or economics. Various topics in economics of pharmaceutical industry, including rates of innovation, drug regulation, and economic impact of pharmaceuticals. In Progress grading.

205. Economic Modeling. Lecture, three hours. Development of modeling skills by considering a sequence of economic issues (e.g., peak load pricing, regulation, monopoly, capital asset pricing, Pareto efficiency). Emphasis on multivariate constrained optimization. S/U or letter grading.

207. History of Economic Thought. Lecture, three hours. Topics from classical economics, including work of Smith, Ricardo, and Mill, and developments from the 1870s, including contributions of major figures of the marginalist revolution, the socialist controversy, and history of welfare economics. S/U or letter grading.

Economic Theory

211A-211B. Economics of Uncertainty, Information, and Games. Lecture, three hours. Prerequisites: course 201C, introductory probability. Theory of individual decision making under uncertainty, applied to topics such as asset pricing models, adverse selection, moral hazard, bargaining, signaling, auctions, and search. S/U or letter grading.

212A-212Z. Topics in Advanced Theory. Lecture, three hours. Current research in microeconomic theory. Content varies. Courses in this sequence not ordinarily given every year. May be repeated for credit. S/U or letter grading:

212A. Search Theory. Prerequisites: calculus, introductory probability. Price searching, queueing, Brownian motion, martingales, and applications to the theory of the firm.

212B. Applied Game Theory. Prerequisites: calculus, introductory probability. Use of theory of Bayesian games to study bargaining, monetary theory, and oligopoly. Use of theory of mechanisms to study auction design and imperfectly competitive markets.

213A-213B. General Equilibrium and Game Theory. Lecture, three hours. Prerequisite: course 201C or consent of instructor. Selected advanced theoretical topics of current interest and introduction to modern mathematical economics, including general equilibrium theory and game theory. S/U or letter grading.

214A-214Z. Topics in Mathematical Economics. Lecture, three hours. Prerequisite: course 213B or consent of instructor. Current research in mathematical economics. Content varies. Ordinarily only two courses in this sequence given every year. May be repeated for credit. S/U or letter grading:

214A. General Equilibrium Theory. Prerequisite: course 201C or equivalent or consent of instructor. Core convergence theorem, cooperative and noncooperative approach to competitive equilibrium theory, perfectly competitive equilibria, the no-surplus condition, and applications to mechanism theory and incomplete market models.

M214B. Game Theory. (Same as Mathematics M261 and Political Science M208A.) Lecture, three hours. Prerequisite: graduate standing in mathematics or consent of instructor. Bargaining theory, the core, the value, other solution concepts. Applications to oligopoly, general exchange and production economies, and allocation of joint costs.

M214C. Large Economies. (Same as Political Science M208C.) Prerequisites: course 213A or suitable mathematics courses. Consideration of economics with a continuum of consumers and with a continuum of goods. Basic model applied to perfectly competitive equilibrium, the core, location models, and other models with nonconvex preferences and/or technology.

M215. Topics in Applied Game Theory. (Same as Political Science M208B.) Lecture, three hours. Prerequisites: calculus or introductory probability, and graduate standing in economics or consent of instructor. Survey and applications of major solution concepts to models of bargaining, oligopoly, cost allocation, and voting power. S/U or letter grading.

219A-219B-219C. Workshops: Economic Theory and Mathematical Economics. Lecture, three hours. Prerequisite: consent of instructor. Workshops for predissertation and dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.

Also see Management 200 (game theory and information economics), 203A (decision theory), 203B (economics of information)

Monetary Economics

221A-221D. Monetary Economics I to IV. (Formerly numbered 221A-221B.) Lecture, three hours. S/U or letter grading:

221A. Prerequisites: courses 202A-202B-202C. Dynamic methods in business cycles and economic growth. Multiperiod life-cycle models. Sustainable public deficits. Money and inflationary finance. Human capital. Endogenous fluctuations and regime switching. Econometrics of multiple equilibrium models. Political economy of government deficits and inflation.

221B. Emphasis on theoretical, historical, and policy aspects of monetary economics. Financial intermediation, bank panics, asset price volatility, game theoretic models of policy, inflation, implication of monopolistic competition, search and coordination failures, central bank operations, and evolution of monetary institutions.

221C. Prerequisites: courses 202A-202B-202C. Emphasis on quantitative dynamic models useful in study of equilibrium business cycles and public finance. Recursive competitive equilibria in representative agent overlapping-generation models, including models with money, taxes, liquidity constraints, and other distortions.

221D. Prerequisites: courses 202A-202B-202C. Emphasis on applied macroeconomics, with topic change each year. Students select a particular data set to study. Each week class studies an article from recent work in applied macroeconomics or applied econometrics which teaches a technique or suggests a theoretical restriction on the data. Subgroups of students report back to class using the technique on their selected data set.

222A-222Z. Topics in Monetary Economics. Lecture, three hours. Current research in monetary economics. Content varies. May be repeated for credit. S/U or letter grading:

M222A. Control and Coordination in Economics. (Same as Computer Science M222.) Prerequisite: graduate standing in economics or engineering or consent of instructor. Recommended: appropriate mathematics course. Stabilization policies, short- and long-run dynamics and stability analysis; decentralization, coordination in teams; certainty equivalence and separation theorems; stochastic and learning models. Bayesian approach to price and output rate adjustment.

228A-228B-228C. Proseminars: Monetary Economics. Lecture, three hours. Prerequisite: consent of instructor. Workshops for predissertation and dissertation writers. Literature surveys or research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper or presentation required. S/U grading.

229A-229B-229C. Workshops: Monetary Economics. Lecture, three hours. Prerequisite: consent of instructor. Workshops for predissertation and dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.

Also see Management 239A, 239B, 239C (Ph.D. sequence in finance), 239D (advanced topics in finance), 239X-239Y-239Z (finance workshops)

Econometrics

231A. Econometrics: Single Equation Models. Lecture, three hours. Linear regression model, specification error, functional form, autocorrelation, nonlinear estimation, distributed lags, nonnormality, univariate time series, qualitative dependent variables, aggregation, structural change, and errors-in-variables. S/U or letter grading.

231B. System Models. Lecture, three hours. Multivariate regression, errors-in-variables, simultaneous equations, identification, proxy variables, latent variables, factor analysis of panel data, asymptotic distribution theory. S/U or letter grading.

232A-232Z. Topics in Econometrics. Lecture, three hours. Prerequisites: courses 231A, 231B. Current research in econometrics. Content varies. Courses in this sequence not ordinarily given every year. May be repeated for credit. S/U or letter grading.

M232A. Bayesian Econometrics. (Same as Political Science M208E.) Subjective probability, introduction to decision theory, Bayesian analysis of regression, sensitivity analysis, simplification of models, criticism.

232B. Time Series. Stationary stochastic processes, Box/Jenkins methods, spectral analysis, forecasting, rational expectation models, analysis of macroeconomic data.

239A-239B-239C. Workshops: Econometrics. Lecture, three hours. Prerequisite: consent of instructor. Workshops for predissertation and dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.

Economic History

241. Economic History of Western Europe. Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Seminar on European economic history, with emphasis on evolution of institutions and growth. Serfdom, medieval agriculture and the agricultural revolution, demographics, industrial revolution, imperial expansion, and decline of Britain. S/U or letter grading.

242. Economic History of the U.S. Lecture, three hours. Seminar on American economic history. Onset of industrialization, relative economic backwardness of the South, slavery, technological change, rise in industrial concentration, women in the labor force, development of financial markets. S/U or letter grading.

243A-243Z. Topics in Economic History. Lecture, three hours. Current research in economic history. Content varies. May be repeated for credit. S/U or letter grading.

249A-249B-249C. Von Grep Workshops: History of Entrepreneurship in the U.S. Economy. Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Workshops for advanced graduate students. Research in progress discussed by visiting experts, UCLA faculty members, graduate students. S/U grading.

Public Finance

251A. Theory and Policy of Taxation. Lecture, three hours. Examination of influence of taxation on economic efficiency and incidence of taxation in first part of course. Topics include tax equivalences, Ramsey rules, and alternative forms of taxation. Special tax provisions, tax incentives, and progressivity in taxation in second part of course. S/U or letter grading.

251B. Cost-Benefit Analysis of Public Projects and Programs. Lecture, three hours. Prerequisite: course 251A. Presentation of those aspects of applied capital theory that are relevant in decisions concerning investment projects in first part of course. Differences between social and private benefits and costs (shadow prices) for foreign exchange, capital, and labor, with applications to public investment decisions, in second part of course. S/U or letter grading.

252. Economics of Federalism. Lecture, three hours. Theories of perfect games and social organization. Role of government, collective goods, collective defense, local public goods, spillovers, and intergovernmental relations. S/U or letter grading.

253A-253Z. Topics in Public Finance. Lecture, three hours. Current research in public finance. Content varies. Topics include Social Security taxes and programs, unemployment insurance, public provision of medical care, theory of public goods, and theory of public choice. May be repeated for credit. S/U or letter grading.

254A-254B-254C. Workshops: Public Economics. Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Workshops for advanced graduate students. Research in progress discussed by graduate students, UCLA faculty members, visiting experts. S/U grading.

Labor Economics

261A-261B. Labor Economics I, II. Lecture, three hours. S/U or letter grading.

261A. Wage determination in competitive labor markets. Extension of wage determination to schooling and occupational choice, life-cycle earnings profiles, discrimination, minimum wage legislation, and unionism. Emphasis on empirical literature.

261B. Prerequisite: course 261A. Models of life-cycle learning and work behavior, with particular emphasis on recent literature examining labor force behavior and experience of women.

262A-262Z. Topics in Labor Economics. Lecture, three hours. Current research in labor economics. Content varies. May be repeated for credit. S/U or letter grading.

269A-269B-269C. Workshops: Labor Economics. Lecture, three hours. Prerequisite: consent of instructor. Workshops for predissertation and dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.

Industrial Organization

271A-271B. Industrial Organization, Price Policies, and Regulation I, II. Lecture, three hours. S/U or letter grading.

271A. Major economic aspects of property rights system. The firm and the market compared from perspective of alternative arrangements for allocating resources. Traditional problems of competition, monopoly, and industrial concentration. Brief analysis of those portions of antitrust policy bearing on industrial structure.

271B. Prerequisite: course 271A. Study of firm organization and pricing under conditions of less than perfect competition; information costs and advertising; economic and legal analysis of marketing practices such as discrimination, tie-in selling, resale price maintenance, exclusive dealing, and territorial arrangements.

271C. Mathematical Theory in Industrial Organization. Lecture, three hours. Prerequisites: courses 201A-201B-201C. Formal modeling of theory of industrial organization: principal-agent problem, entry deterrence, endogenous price discrimination, monopolistic competition, new approaches to rationality. S/U or letter grading.

272A-272Z. Topics in Industrial Organization. Lecture, three hours. Current research in industrial organization. Content varies. May be repeated for credit. S/U or letter grading.

273A. Public Utility Regulation. Lecture, three hours. Theory, practice, and consequences of regulation in electric power, gas, water, telecommunications, broadcasting, and other regulated industries; experiences of unregulated monopoly and public enterprises by way of contrast. S/U or letter grading.

273B. National Transport Policy. Lecture, three hours. Regulation of surface and air carriers, pricing and investment in public transport facilities, policy toward merchant marine. S/U or letter grading.

279A-279B-279C. Workshops: Business Organization. Prerequisite: consent of instructor. Workshops for predissertation and dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.

Also see Management 262 (pricing policy)

International Economics

281A. International Trade Theory. Lecture, three hours. Theoretical and empirical analysis of microeconomic relationships among countries. Determinants of commodity and factor flows, prices, and factor rewards. Effects of trade barriers. S/U or letter grading.

281B. International Finance. Lecture, three hours. Theory and evidence on balance of payments, exchange rate determination, international transmission of inflation and business cycles, macroeconomic policy in open economies, alternative monetary systems. S/U or letter grading.

281C. International Economics. Lecture, three hours. Theoretical and empirical analysis of interrelation between flows of capital, people, and goods. Applications to current policy. S/U or letter grading.

282A-282Z. Topics in International Economics. Lecture, three hours. Current research in international economics. Content varies. May be repeated for credit. S/U or letter grading.

283. Economics of Soviet External Involvement. Lecture, three hours. Prerequisite: consent of instructor. Interrelations between Soviet economy and the U.S.S.R.'s international behavior. Major topics, considered in various regional contexts of Soviet activity, include (1) extent of the U.S.S.R.'s global involvement, (2) domestic economic constraints on that involvement, and (3) external influences on Soviet domestic economic development. S/U or letter grading.

284. Soviet Economic Theory and Organization. Lecture, three hours. Overall strategy of planning used by U.S.S.R. planners and specific planning methods, interpreted broadly to cover not only instructions and objectives but also institutional arrangements. Intended and unintended outcomes of the methods. S/U or letter grading.

285A-285B-285C. Workshops: International Economics. Lecture, three hours. Prerequisite: consent of instructor. Workshops for predissertation and dissertation writers. Research in progress presented, discussed, and criticized by visiting experts, UCLA faculty members, advanced graduate students. Research paper required. S/U grading.

Development Economics

286A. Economic Development. Lecture, three hours. Prerequisites: courses 201C, 202C. Study of theoretical and empirical problems related to developing countries. Emphasis on relation between international trade and economic development, dynamic aspects of commercial policies, inflation, stabilization, structural adjustment, growth and migration. S/U or letter grading.

286B. Analysis and Appraisal of Development Projects. Lecture, three hours. Prerequisite: course 286A. Methodology for evaluating investment projects, with special attention to types of issues that arise in developing countries. Discussion of social versus private evaluation criteria; applications to highway, electricity, and irrigation projects. S/U or letter grading.

287A-287Z. Topics in Development Economics. Lecture, three hours. Current research in development economics. Content varies. Courses in this sequence not ordinarily given every year. May be repeated for credit. S/U or letter grading.

287A. Economic Problems of Latin America. Economic history of Latin America. The great depression, import substitution and industrialization, inflation and growth, free market experiments, and economic integration.

287B. Economic Development in East Asia. Recent economic history of East Asia, focusing on postwar development of Japan, Korea, and China. Emphasis on role of international investment and trade, especially with the U.S., in area's economic development.

Urban Economics

291A-291B. Urban Economics. Lecture, three hours. Course 291A is prerequisite to 291B. Implications of urbanization for economic analysis. Development of theory in course 291A; emphasis on policy in 291B. Use of monocentric model of urban land use to introduce location and transportation costs. Examination of housing, transportation, and local public services.

293A-293Z. Topics in Urban Economics. Lecture, three hours. Current research in urban and regional economics. Content varies. Serves as forum for presentation of papers on urban economics by students, UCLA faculty members, and visitors. May be repeated for credit. S/U or letter grading.

Special Studies

299A-299B-299C. Workshops: Preparing a Dissertation Proposal. Lecture, three hours. Workshops for third-year graduate students who are preparing for oral qualifying examination. Presentation of journal articles for critical analysis to develop students' analytical skills. Presentation of students' own research for critical analysis by fellow students and faculty. Workshops open to research in all fields of economics. S/U grading.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching College Economics (2 units). Discussion, one hour; laboratory, three hours. Prerequisite: graduate standing. Required of all new teaching assistants. Classroom practice in teaching, with individual and group instruction on related educational methods, materials, and evaluation. May be repeated for credit. S/U grading.

596. Individual Study (2 to 8 units). Directed individual study or research. S/U grading.

597. Individual Study: Graduate Examinations (2 to 8 units). Directed individual study in preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. S/U grading.

599. Individual Research: Ph.D. Dissertation (2 to 8 units). Prerequisite: advancement to Ph.D. candidacy. Directed individual research in preparation of Ph.D. dissertation. S/U grading.

ECONOMICS/SYSTEM SCIENCE

*Interdepartmental Program
College of Letters and Science*

UCLA
2263 Bunche Hall
Box 951477
Los Angeles, CA 90095-1477
(310) 825-1011

Professors

Masanao Aoki, Ph.D. (*Economics*)
Bryan C. Ellickson, Ph.D. (*Economics*)
Michael D. Intriligator, Ph.D. (*Economics*)
Stephen E. Jacobsen, Ph.D. (*Electrical Engineering*)

Scope and Objectives

The major is an alternative to the regular departmental major in economics and combines work in the School of Engineering and Applied Science with preparation in economic theory and in those aspects of mathematics and statistics necessary for the study of quantitative aspects of economics and systems theory. The major is appropriate for students with interests in such areas as economic theory, mathematical economics, econometrics, feedback and control systems, optimization, computing techniques, and the modeling and analysis of various socioeconomic systems.

Bachelor of Science Degree

Admission

This interdepartmental major is in the process of being disestablished as there is no longer a system science department in the School of Engineering and Applied Science. Therefore, students admitted to the University for Fall Quarter 1993 and thereafter cannot enter this major. You can pursue one of the alternate programs available in mathematics/applied science (see Mathematics later in this chapter).

Students admitted to the preeconomics/system science major prior to Fall Quarter 1993 can apply for admission to the economics/system science major or to one of the alternate programs. All preeconomics/system science students applying for admission to the major are subject to the minimum entrance requirements as listed in the 1992-93 *UCLA General Catalog*.

Preparation for the Major

Required: Economics 1, 2, 11; Computer Science 10C or 10F or Program in Computing 3 or 10A; Mathematics 31A, 31B, 32A, 32B, 33A,

33B. All courses must be completed for a grade of C- or better.

Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the major. Transfer credit for any of the above is subject to department approval; consult the undergraduate counselor in 2253 Bunche Hall before enrolling in any courses for the major.

The Major

Required: Thirteen upper division courses as follows: five courses in economics selected from Economics 101 and above, including 101, 102, and one course from 141, 142, 144, 145, 146, 147A, 147B; six courses in system science selected from Electrical Engineering 102, 103, 131A, 131B, 136, 141, 142, including 131A (or Mathematics M150A or Statistics M152A) and 131B (or Mathematics 151 or Statistics 152B); two courses in mathematics selected from Mathematics 110A and above (such mathematics courses may not also be applied toward the system science requirements).

Recommended courses include Electrical Engineering 141 and 142 in the area of dynamic systems analysis and Electrical Engineering 136 in the area of optimization.

All upper division major courses must be completed for a grade of C- or better, with an overall 2.0 GPA.

Concepción Valadez, Ph.D.
Wellford Wiims, Ph.D.

Assistant Professors

Daniel G. Solorzano, Ph.D.
Amy S. Wells, Ph.D.

Lecturer

Edward (Chip) Anderson, Ph.D.

Scope and Objectives

The undergraduate specialization in education is designed to (1) allow students to learn more about the multitude of professional and research issues in the field of education and to understand the complex interactions between social, political, and economic forces which influence and shape educational policies in America, (2) provide an introductory educational sequence for students who wish to pursue careers in education either as teachers or researchers, and (3) present an information base in the area of education by which UCLA students can become better consumers of educational services as future parents, taxpayers, and citizens.

The teaching philosophy is governed by a need to address these objectives with a logical and time-efficient course structure—lower division courses that provide an introduction to educational policy, upper division social and behavioral sciences courses (sociology, political science, history, philosophy, anthropology, economics, psychology) taught in the Graduate School of Education and Information Studies, upper division elective courses in which students can pursue their own specific interests in the area of education, and a special studies research experience. The specialization must be taken in conjunction with a departmental or interdepartmental major.

Special Undergraduate Program

Enrollment is limited but includes sophomores and upper division students. To enter the specialization you must submit a formal application to the Office of Student Services in the Graduate School of Education and Information Studies. All courses applied toward the specialization must be taken for a letter grade.

Preparation for the Specialization

Required: Two courses from Education 91A through 91E.

Upper Division

Required: Two social sciences courses from Education M108, 112, C191A through C191E; two elective courses from Education 100A-100B, M102, 125A, M148, 180, 181, 192, 197. Additional courses will be applicable as approved.

After successfully completing the six required courses with at least a 2.5 GPA, you must complete one special studies research experience (Education 199) or practicum course (Education 197) with a professor in the Department of Education. Internship research areas include administration, curriculum, and teaching studies; higher education; psychological foundations and educational research methods; and social sciences (history, economics, anthropology, sociology, philosophy).

For further information and application forms, contact the Graduate School of Education and Information Studies Office of Student Services at the program address.

Scope and Objectives

As one of the top-ranked public graduate program in education in the nation, the Department of Education is guided by a commitment to integrate theory and practice and to improve educational practice and policy. The department attracts prominent scholars and is internationally recognized for its research centers in evaluation, higher education, child development, and urban education. Whether students choose to pursue a Ph.D., an Ed.D., a master's degree, or a services or instructional credential, they will graduate with a broad understanding of educational theory and tested practice.

Graduate Study

The following constitutes introductory information regarding graduate degree programs. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible on the Graduate Division Gopher via the Internet.

Curricular Divisions

Contact the Office of Student Services regarding faculty member(s) to be consulted with respect to enrollment and research opportunities and/or course sequencing in each division or emphasis field.

Division 1 — Administration, Curriculum, and Teaching Studies

Education M102, C191A, 206A, C206D, 220A, 220B, 223, 224, 229, 240, 241, 242, 246A,

246B, 251D, 260, 262A, 262B, 262F, 262J, 273A, 400, 401, 402, 403, 420A, 422, 423, 424A, 424B, 424C, 424G, 437A, 440C, 441A, 441B, 442B, 443, 444A, 444B, 447, 448A, 448B, 470A, 470B, 490A.

Division 2 — Educational Psychology

Education 125A, 125B, 191F, 197F, 197G, 205, 212A, 212B, 212C, 213A, 213B, 213C, 214A, 214B, 214D, 214E, 214F, M215, 216, M217A through 217D, 217F, M217G, M217H-M217I, 225A, 225B, 227A, 227B, 227C, 232, 236, 256A, 256B, 257, 258A, 258B, 267, 271A, 280A, 280B, M281A, M281B, M281C, 415A, 415B, 421A, 421C, 421D, 421F, 433A, 433B, 501.

Division 3 — Higher Education and Work

Education M148, 180, 181, 192, 209A, 209C, 209D, 214C, 234, 235, 238, 239, 248, 249A, 249B, 259A, 261E, 261F, 262I, 263, 410A-410B, 431A, 431B, 431C, 432, 437B, 461A, 462.

Division 4 — Social Research Methodology

Education 200B, 200C, 202, 206C, 210A through 210E, 211A, 211B, 211C, 218A through 218D, 219, 221, M222A, 222B, 222C, 228, 245, 251A, 251C, 251E, 255A-255B-255C, 272, 411A, 411B, 412A, 412B, 460.

Division 5 — Social Sciences and Comparative Education

Education M108, 200A, M201C, C203, 204A through 204F, C207, 208A, 208C, C244, 252A, 252B, M252C, 253A through 253I, 254, 300.

Teacher Education

Education 100A-100B, 112, 264, 309A, 309B, 311, 312, 315A-315B, 316A-316B, 318A-318B, 320A-320B, 324A through 324D, 330A through 330D, 360, 409A, 409B, 413A-413B, 481, 489, 491A, 492.

Academic Interinstitutional Programs

Education 313A-313B, 313C-313D, 314A-314B, 317A, 317B, 317C, 319, 321A through 321D, 322A, 322B, 323, 326, 327, 328, 329, 331, 332.

Special Studies

Education 296A-296F, 299A-299B-299C, 310, 375, 498A-498B-498C, 499A-499B-499C, 596, 597, 598, 599.

Undergraduate Specialization in Education Program

Education 91A through 91E, 191B through C191E, 197A-197Z, 199.

Master's Degrees

The Department of Education offers the Master of Arts degree and the Master of Education degree.

Master of Arts

Admission

The Master of Arts (M.A.) degree in Education is an academic master's degree designed to meet the needs of individuals preparing for careers in basic research or for advanced graduate study.

Qualifications for admission to a program of study in education, in addition to the University requirements for admission, are (1) scores for quantitative, verbal, and analytical sections of the Graduate Record Examination (GRE) and (2) at least three letters of recommendation documenting qualifications and/or professional experience.

Acceptance into a particular division is dependent on the availability of openings in that division and the applicant's desired emphasis area; preference is given to applicants with relevant background and experience. Admission to an initial advanced degree program occurs simultaneously with admission to graduate standing and to the Department of Education. No screening examination (other than described above) and no specific coursework are required for admission to a degree program. The Department of Education has an application form which must be completed in addition to the one used by the Graduate Division. Application forms and departmental brochures are available from the Office of Student Services, Graduate School of Education and Information Studies.

Law/Education Concurrent Degree

The Department of Education and the School of Law offer a concurrent degree program which allows students to design a program of study leading to the J.D. and any advanced degree in education (M.Ed., M.A., Ed.D., or Ph.D.). If the program meets the degree requirements in both schools, students are awarded both degrees on its completion. This program is not offered in 1995-96.

Areas of Study

The Master of Arts emphases in divisions 2 through 5 are the following:

Educational Psychology

Counseling, developmental studies in education, learning and instruction.

Higher Education and Work

Education training, public policy analysis, research in higher education, and teaching in higher education.

Social Research Methodology

Applied statistics and psychometrics, quantitative and qualitative research, evaluation methodology and economic analysis.

Social Sciences and Comparative Education

Social sciences, comparative and international education.

Course Requirements

A minimum of nine upper division and graduate courses (36 units) must be completed in graduate standing although no specific upper division courses are necessary. Six courses (24 units) must be taken in the Education 200 and 500 series; no more than two 500-series courses (eight units) may be applied toward the divisional course minimum and toward the graduate course minimum.

Two research methods courses approved by the faculty adviser must be selected. Additional courses to complete the 36-unit requirement may be selected from offerings in Education and/or other departments with consent of the assigned faculty adviser and consent of division head. Courses must be completed with a grade of C or better and with an overall grade-point average of at least 3.0.

Contact the Office of Student Services regarding faculty member(s) to be consulted with respect to enrollment and research opportunities and/or course sequencing in each division or emphasis field.

Comprehensive Examination Plan

The comprehensive examination is concerned with central topics in the selected division and field of emphasis. Questions are comprehensive in nature and are designed to measure the breadth and depth of knowledge, as well as ability to focus that knowledge on specific problems.

The comprehensive examination is offered twice yearly, once in Fall Quarter and once in Spring Quarter.

Students may be passed, passed with honors, or failed on this examination. Students who fail this examination are given a second opportunity to take the examination at the discretion of the student's adviser and a third opportunity on a two-thirds majority of all divisional faculty voting on this issue. No fourth sitting for the examination is permitted.

Students who fail the comprehensive examination, but who have been allowed to retake it, may do so at any scheduled sitting with consent of the divisional faculty.

Thesis Plan

Under this plan, students prepare a thesis which is a report of the results of original investigation. Before beginning work on the thesis, students must obtain approval of the subject and general plan from the Department of Education and the thesis committee chair.

The thesis committee must be formed and a petition for advancement to candidacy for the M.A. must be filed no later than one quarter

prior to completion of course requirements for the degree.

The theses and dissertations adviser and the Graduate Division publication, *Regulations for Thesis and Dissertation Preparation*, provide guidance in the final preparation of the manuscript. The department does not require a formal examination in connection with the thesis plan.

Master of Education

Admission

The Master of Education (M.Ed.) degree is a professional degree program designed for individuals preparing for mid-level professional positions in schooling or for advanced professional graduate study. Qualifications for admission to a program of study in education, in addition to the University requirements for admission are (1) scores for quantitative, verbal, and analytical sections of the Graduate Record Examination (GRE) and (2) at least three letters of recommendation documenting qualifications and/or professional experience.

The following requirements are applicable in accordance with selected emphases:

Administrative and Policy Studies in Education. Possession of a valid instructional credential is preferred. Applicants with a demonstrated commitment to improving American schooling are sought for admission.

Bilingual/Cross-Cultural Education. Completion of an approved program of professional preparation leading to a preliminary instructional credential is required, as is classroom experience (as a teacher or aide) for at least two years, at any level of schooling. Evidence of professional competence and conscientiousness, as well as the necessary second-language proficiency, are also required.

Curriculum and the Study of Schooling. Persons with above-average capabilities and interest in curriculum and instruction are sought. Experience as a practitioner in the emphasis field is advantageous.

Teacher Education. This is a two-year program leading to qualification for a Multiple or Single Subject Instructional Credential and a Master of Education degree. Individuals with the highest qualifications in all subject areas, particularly mathematics, science, and the humanities, are sought. Experience in working with children is advantageous.

Certificate (Credential) Programs

The California Commission on Teacher Credentialing has authorized the Department of Education to offer professional programs that lead to the (1) Multiple Subject Instructional Credential with the Cross-Cultural Language and Academic Development (CLAD)/Bilingual Cross-Cultural Language and Academic Development (BCLAD) emphasis; (2) Single Subject Instructional Credential with the CLAD/BCLAD emphasis; and (3) Administrative Ser-

vices Credential. Credential programs 1 and 2 are taken concurrently with the M.Ed. in Teacher Education; credential program 3 is taken with the M.Ed. in administrative program studies in education.

Latin American Studies/Education Program

The Department of Education and the Latin American Studies Program offer an articulated degree program which allows students to combine study for the M.A. in Latin American Studies and the M.Ed., with an emphasis in curriculum. Articulated programs do not allow course credit to be applied toward more than one degree. This program is not offered in 1995-96.

Law/Education Program

See the Admission section under Master of Arts. This program is not offered this year.

Areas of Study

Administrative and policy studies in education; bilingual/cross-cultural education; curriculum and the study of schooling; teacher education.

Course Requirements

A minimum of nine upper division and graduate courses (36 units) must be completed in graduate standing although no specific upper division courses are necessary. At least five courses (20 units) must be in the professional education (400) series. No 500-series courses may be applied toward the degree. Education 597 may be taken on an optional basis. A field experience minimally approximating one course is required for all M.Ed. emphases.

Information regarding specific course requirements in a selected M.Ed. emphasis may be obtained from the Office of Student Services.

Comprehensive Examination Plan

The comprehensive examination for the M.Ed. degree in administrative studies is offered three times per year (Fall, Spring, and Summer Quarters). The M.Ed. examination in curriculum studies is offered in Fall and Spring Quarters. The M.Ed. examination in teacher education is offered only during the summer. The examination consists of

(1) A written examination designed to assess comprehension of professional knowledge basic to the selected field of emphasis, including key concepts and principles, major theoretical positions, and fundamental issues and understanding of the broad educational context in which the selected professional field resides.

(2) A performance component for the M.Ed. in curriculum studies designed to assess competency in the solution of problems in the selected professional field and is a test of whether knowledge can be applied in a real or simulated professional setting.

Information regarding examination foci for any selected M.Ed. emphasis is available from the faculty adviser.

Students may be passed, passed with honors, or failed on this examination. Students who fail this examination are given a second opportunity to take the examination at the discretion of the student's adviser and a third opportunity on a two-thirds majority of all divisional faculty voting on this issue. No fourth sitting for the examination is allowed.

Students who fail the comprehensive examination, but who have been allowed to retake it, may do so at any scheduled sitting with consent of the divisional faculty.

Thesis Plan

None.

Doctoral Degrees

The Department of Education offers the Doctor of Philosophy (Ph.D.) degree and the Doctor of Education (Ed.D.) degree.

Doctor of Philosophy

Admission

The Doctor of Philosophy (Ph.D.) degree in Education is a strongly research-oriented academic degree designed for individuals preparing for careers in basic research or college-level instruction. Major foci include theory, research methodology, basic studies, and in-depth knowledge in education and an approved cognate field.

To be admitted to the Ph.D. program, a student must have a bachelor's degree or equivalent. Applicants must also have demonstrated academic excellence and the potential for scholarly research. A student is admitted by a division and must formally apply for a change of division.

Qualifications for admission to a program of study in education, in addition to the University requirements for admission, are (1) scores for quantitative, verbal, and analytical sections of the Graduate Record Examination (GRE) and (2) at least three letters of recommendation documenting qualifications and/or professional experience.

Acceptance into a particular division is dependent on the availability of openings in that division and the applicant's desired emphasis area; preference is given to applicants with relevant background and experience. Admission to an initial advanced degree program occurs simultaneously with admission to graduate standing and to the Department of Education. No screening examination (other than described above) and no specific coursework are required for admission to a degree program. The Department of Education has an application form which must be completed in addition to the one used by the Graduate Division. Application forms and departmental brochures are available from the Office of Student

Services, Graduate School of Education and Information Studies.

Joint Ph.D. Program in Special Education

A joint Ph.D. program in Special Education is offered by UCLA and California State University, Los Angeles. The goals of the joint program are (1) the stimulation and preparation of research workers of high competence in the various fields of special education; (2) improved preparation for potential teachers of exceptional individuals; and (3) improved preparation of personnel for research and in policy formation in the public schools of California. Students seeking information regarding emphases and requirements should consult the joint doctoral adviser at UCLA (1029B Moore Hall) or the chair of the Department of Special Education at CSULA.

Law/Education Program

See the Admission section under Master of Arts.

Major Fields or Subdisciplines

All divisions: administration, curriculum, and teaching; educational psychology; higher education and organizational change; social research methodology; social sciences and comparative education.

Course Requirements

A program of study for a Ph.D. student is determined by the student and the faculty adviser and must conform to division and department requirements. A minimum of 18 courses is required as indicated below. At least 10 of the total courses must be in the 200 series:

- (1) A sequential three-quarter research practicum (Education 299A-299B-299C) designed to provide an overview of research in the field of study. Students complete a research paper by the end of the sequence.
- (2) Five courses from offerings in the student's selected division.
- (3) Three upper division or graduate courses from other academic departments of the University related to the student's proposed area of research (the cognate).
- (4) Appropriate research methods courses to enable demonstration of intermediate/advanced level competence in at least one area of research methodology. This requirement is satisfied by completing three methodology courses as specified in the list approved by the Department of Education; the approved list is available in the Office of Student Services.

The remainder of the courses to complete the required total may be chosen by the student; such courses must be in compliance with the selected division's guidelines and must be approved by the student's faculty adviser. Divisional course requirements may be waived, under exceptional circumstances, by the divi-

sion on petition by students and their advisers to the division head. Wherever additional academic background is needed, a faculty adviser may require other coursework.

Written and Oral Qualifying Examinations

Doctoral Screening Examination. A written examination is taken after completion of appropriate coursework determined by the division. This examination is concerned with central topics in the selected division and field of emphasis. Questions are comprehensive in nature and are designed to measure the breadth and depth of knowledge, as well as to focus that knowledge on specific problems.

Students taking the doctoral screening examination ordinarily are not allowed to take more than nine courses before taking the examination. This limit is intended to ensure that students demonstrate basic competencies as early as possible in their doctoral training.

All students admitted to a doctoral program without a master's degree are required to take the doctoral screening examination.

In a first sitting for this examination, students may be passed with honors, passed at the master's level (the terminal master's), or failed. Students passed at the master's level are given one further opportunity to pass at the doctoral level; students who fail are given a second opportunity to take the examination at the master's level only.

Students who fail the doctoral screening examination, but who have been allowed to retake the examination, must do so at the next sitting. They can take up to 12 units per quarter until they have successfully completed the examination. Of these 12 units only four may be a doctoral 200- or 400-level course; the remainder must be the 597 course. After satisfying the above requirements, students are eligible to take the following qualifying examinations:

Doctoral Written Qualifying Examination. The examination is offered twice yearly, once in Fall Quarter and once in Spring Quarter. The written qualifying examination tests the core knowledge of the division and emphasis the student has selected. The questions on the examination reflect a research and theoretical orientation. Students may be passed, passed with honors, or failed on this examination. Students who fail this examination are given a second opportunity to take the examination at the discretion of the student's adviser and a third opportunity on a two-thirds majority of all divisional faculty voting on this issue. No fourth sitting for the examination is allowed.

Students who fail the doctoral written qualifying examination, but who have been allowed to retake it, may do so at any scheduled sitting with consent of the divisional faculty.

University Oral Qualifying Examination. The oral examination is conducted by the student's doctoral committee, which selects topics from both education and the cognate discipline(s)

that are related to the student's written research proposal. On a majority vote of the doctoral committee, the University Oral Qualifying Examination may be repeated once.

Doctor of Education

Admission

The Doctor of Education (Ed.D.) degree is a professional degree designed to meet the needs of individuals preparing for careers of leadership and applied research in the schools and community educational programs. Major foci include practice, applied studies, and knowledge related to professional skills.

To be admitted into the Ed.D. program, applicants must have a bachelor's degree or equivalent; at least two years of successful professional experience in education or equivalent (may be completed prior to advancement to candidacy for all divisions except the administration, curriculum, and teaching studies division which requires the experience as a prerequisite to admission); and demonstrated evidence of potential for professional leadership. Students are admitted by a division and must formally apply for a change of division.

Law/Education Program

See the Admission section under Master of Arts.

Major Fields or Subdisciplines

The Ed.D. is offered for emphases in Divisions 1 through 4. Administration, curriculum, and teaching studies emphases are offered for school administrators, education policy analysts, curriculum developers and directors of curriculum, and teacher educators. Educational psychology emphases are offered for those interested in practical issues related to special education, educational technology, and computer-assisted instruction. Higher education and work emphases focus on administration in relation to corporate or proprietary education and training, community colleges, and continuing education. Social research methodology emphases are applied measurement and evaluation leadership.

Course Requirements

A program of study for an Ed.D. student is determined by the student and faculty adviser, and must meet division and department requirements. A minimum of 18 courses is required as indicated below:

- (1) Three research methods courses, with no more than two introductory (first tier) courses and at least one intermediate/advanced (second tier) course, selected from the departmental list approved for the Ed.D.
- (2) Nine education courses, of which at least six must be from the Education 400 series; all courses must be approved by the faculty adviser.

(3) Three supplemental courses selected from offerings in the department (outside the student's field of emphasis) or in another UCLA professional school or department.

(4) A sequential three-quarter field practicum (Education 499A-499B-499C). Divisional course requirements may be waived, under exceptional circumstances, by the division on petition by students and their advisers to the division head. Whenever additional academic background is needed, a faculty adviser may require other coursework.

Written and Oral Qualifying Examinations

Doctoral Screening Examination. A written examination is taken after the completion of appropriate coursework determined by the division. This examination is concerned with central topics in the selected division and field of emphasis. Questions are comprehensive in nature and are designed to measure the breadth and depth of knowledge, as well as to focus that knowledge on specific problems.

Students taking the doctoral screening examination ordinarily are not allowed to take more than nine courses before taking the examination. This limit is intended to ensure that students demonstrate basic competencies as early as possible in their doctoral training.

All students admitted to a doctoral program without a master's degree are required to take the doctoral screening examination.

In a first sitting for this examination, students may be passed, passed with honors, passed at the master's level (the terminal master's), or failed. Students passed at the master's level are given one further opportunity to pass at the doctoral level; students who fail are given a second opportunity to take the examination at the master's level only.

Students who fail the doctoral screening examination, but who have been allowed to retake the examination, must do so at the next sitting. They can take up to 12 units per quarter until they have successfully completed the examination. Of these 12 units, only four may be a doctoral 200- or 400-level course; the remainder must be the 597 course. After satisfying the above requirements, students are eligible to take the following qualifying examinations:

Doctoral Written Qualifying Examination. The written qualifying examination is offered twice yearly, once in Fall Quarter and once in Spring Quarter. The examination tests the core knowledge of the division and emphasis the student has selected. The questions on the examination reflect a professional orientation. Students may be passed, passed with honors, or failed on this examination. Students who fail this examination are given a second opportunity to take the examination at the discretion of the student's adviser and a third opportunity on a two-thirds majority of all divisional faculty voting on this issue. No fourth sitting for the examination is allowed.

Students who fail the doctoral written qualifying examination, but who are allowed to retake it, may do so at any scheduled sitting with consent of the divisional faculty.

University Oral Qualifying Examination. The oral examination is conducted by the student's doctoral committee, which selects topics from education that are related to the student's written dissertation proposal. On majority vote of the doctoral committee, the University Oral Qualifying Examination may be repeated once.

Lower Division Courses

91A. Infant Care and Development. Using scientific methods to answer questions about how to raise children, educational researchers, psychologists, and anthropologists try to replace myths and anecdotes with a verifiable understanding of children's development and problems and choices that parents face in raising children.

91B. Child Care: Research, Practice, and Policy. Examination of psychological research on influences of early child care on children's concurrent and subsequent development, with this research linked to basic research in developmental psychology and education. Discussion of influence of research on the policy process.

91C. Elementary and Secondary Education. Upper division standing preferred. Social sciences overview of major policy issues in American public education. General introduction to social sciences research in analysis of educational policy issues and to methods for exploring major policy issues. Topics include school finance, equal educational opportunity, testing and evaluation, teacher compensation, and school law.

91D. The Teaching Profession. Upper division standing preferred. Introduction to the field of education. Experts within Department of Education and experienced school personnel present a variety of topics in education and provide opportunity to visit diverse educational settings.

91E. Perspectives of the American College. Examination of historical conditions that have shaped American higher education and consequent differential characteristics, trends, and practices that bear on dynamics and impacts of contemporary colleges. Emphasis on interrelated research, academic, social, and policy issues underlying the diverse system of American higher education.

Upper Division Courses

100A-100B. Social Foundations and Cultural Diversity in American Education (2 units each). (Formerly numbered 100.) Lecture, one hour; discussion, one hour. Prerequisite: credential program standing:

100A. Intensive consideration of American society, particularly its cultural diversity. Topics include historical development of American society, manifestations of cultures, and ways to learn about students' cultures. Examination of issues of racism, ethnic and gender differences, and students' personal attitudes toward people of different cultural, linguistic, and racial backgrounds.

100B. Intensive consideration of American society and perspectives of cultural diversity in the U.S. and California, and its impact on education and classroom instruction, with focus on cultural contact, dynamics of prejudice, clashes between values, and strategies for conflict resolution. Use of historical, philosophical, and sociological perspectives.

M102. The Mexican American and the Schools. (Same as Chicana and Chicano Studies M102.) Prerequisite: consent of instructor. Review of research and teaching strategies. Analysis of school policies and practices and their effect on development of Mexican American and Chicano youth and communities.

M108. Sociology of Education. (Same as Sociology M175.) Prerequisite: Sociology 1. Study of social processes and interaction patterns in educational organizations; relationship of such organizations to aspects of society, social class, and power; social relations within school, college, and university; formal and informal groups, subcultures in educational systems; roles of teachers, students, and administrators. Fieldwork may be required.

112. Psychological Foundations of Education. Prerequisite: consent of instructor. Analysis of learning processes in school situations. Processes of human motivation, affective, cognitive, social, and personal development of children and adolescents, evaluation of learning, individual differences, and implications of relevant theory and research for instructional practices.

125A. Education of Exceptional Individuals. Prerequisite: Psychology 10 or equivalent. Introduction to the field of special education, with emphasis on psychology of individual differences, learning characteristics of exceptional individuals, and application of research and theory to special education problems.

125B. Principles for Teaching Exceptional Individuals. Prerequisite: consent of instructor. Approaches for teaching exceptional individuals in special and regular education programs. Principles and assumptions underlying alternative approaches. Emphasis on individualizing curriculum and classroom management.

M148. Women in Higher Education. (Same as Women's Studies M148.) Limited to juniors/seniors. Education and career development of women in higher education. Specifically, emphasis on undergraduate and graduate women; women faculty and administrators; curricula, programs, and counseling services designed to enhance women's educational and career development, affirmative action, and other recent legislation.

180. Social Psychology of Higher Education. Overview of significant studies in social psychology of higher education. Focus on institutional characteristics and students' interpersonal and intrapersonal processes, with special emphasis on identifying and explaining effects of college experience on student development and achievement.

181. Advanced Topics in Social Psychology of Higher Education. Lecture, three hours; discussion, one hour. Prerequisites: course 180, consent of instructor. Critical analysis of social psychological inquiry into college attendance, preparation, persistence, and outcomes. Examination of intellectual and personal development of individuals vis-à-vis differential college environments and instructional experiences with respect to students' gender, culture, motivation, involvement, and expectations.

C191A. Philosophy of Education: Ethics and Values. Study of ethics and value theory in teaching and learning, educational organization and policy, and curriculum design and validation. Concurrently scheduled with course C206D.

191B. Issues in Education: Historical Perspective. Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Exploration of such controversial issues in American education as access, diversity, parental choice, cultural literacy, teacher empowerment, and role of popular media in historical perspective.

C191C. Economics of Education. Introductory course in microeconomic and macroeconomic techniques applied to education. Methodologies illustrated principally in context of current issues in American education. Concurrently scheduled with course C244.

C191D. Politics of Education. Political dimensions of education institutions as organizations. Relationships between education institutions and political institutions in society. Political theory as a foundation for public policy analysis; interest groups in education policy formation and implementation. Concurrently scheduled with course C207.

C191E. Educational Anthropology. Recommended (but not prerequisite): Anthropology 9. Study of education through research and method of the cultural anthropologist. Interdependence of culture and education, with emphasis on cross-cultural studies of enculturation, schooling, values, cognition, language, and cultural change. Concurrently scheduled with course C203.

191F. Educational Psychology. Broad overview of educational psychology, with examination of relationship of teaching and learning; various perspectives as to how children learn; issues of teaching and learning that arise based on child's social class, ethnic background, gender, age, and level of ability.

192. Theory and Practice of the Teaching and Learning Function. Lecture, three hours; practicum placement. Prerequisite: consent of instructor. Analysis of learning theory and teaching practice in light of research on student characteristics, learning environments, student/instructor interaction, and outcomes of instruction. Application of theory and research to practice.

197A-197Z. Current Issues in Education. (Formerly numbered 197.) Lecture, three to four hours. Prerequisite: upper division standing. Variable topics course organized on selected current issues basis, integrating field observations and readings through seminar discussions. Consult *Schedule of Classes* for topics and instructors:

197F. Laboratory in Education of Exceptional Children. (Formerly numbered 325A.) Lecture, one hour; laboratory, six to eight hours. Prerequisite: course 125A or consent of instructor. Six to eight hours per week of observation, research, and teaching of children with severe behavioral/emotional disorders and/or mental retardation in UCLA Neuropsychiatric Institute and Hospital School.

197G. Advanced Laboratory in Education of Exceptional Children. (Formerly numbered 325B.) Lecture, one hour; laboratory, six to eight hours. Prerequisite: course 197F. Six to eight hours per week of research, teaching, and multidisciplinary team participation with children with severe behavioral/emotional disorders and/or mental retardation in UCLA Neuropsychiatric Institute and Hospital School.

199. Special Studies. Prerequisites: senior standing, consent of instructor. To be arranged with faculty member who will direct the study.

Graduate Courses

200A. Historical Research and Writing. Methods of historical research and writing for students who are or who will be engaged in research and in report or paper or thesis writing, regardless of their field of interest.

200B. Survey Research Methods in Education. Prerequisite: course 210A or equivalent. Problems of conceptualization, organization, and gathering nonexperimental and quasi-experimental quantitative and qualitative data.

200C. Analysis of Survey Data in Education. Lecture, three hours; laboratory, two hours. Prerequisite: course 200B. Introduction to techniques of processing and analyzing nonexperimental and quasi-experimental quantitative data.

M201C. History of American Education. (Same as History M264.) History of educational thought and of social forces impinging on American education from the 1880s to the present. Analysis of relation between these ideas and forces, and aims and practices of American education today.

202. Evaluation Theory. Prevalent evaluation theories, systems for categorizing these theories, and process of theory development in educational evaluation.

C203. Educational Anthropology. Recommended (but not prerequisite): Anthropology 9. Study of education through research and method of the cultural anthropologist. Interdependence of culture and education, with emphasis on cross-cultural studies of enculturation, schooling, values, cognition, language, and cultural change. Concurrently scheduled with course C191E.

204A. Introduction to Education and the Social Sciences. Prerequisite: consent of division. Interdisciplinary course intended to introduce students to study of educational issues, texts, and movements of thought through social sciences and comparative perspectives.

204B. Introduction to Comparative Education. Examination of conceptual and methodological questions underlying comparative education. Particular attention to development of the field and to styles of social analysis which may be applied to comparative and cross-national studies in education.

204C. Education and National Development. Prerequisite: graduate standing or consent of instructor. Analysis of various social sciences perspectives and methodologies (including modernization, dependency, Marxist, neo-Marxist, liberation theology, and world-system theories of change and development) and changing notions of role of education in development of less-industrialized countries of the world.

204D. Minority Education in Cross-Cultural Perspective. Historical and contemporary analyses of educational policies with regard to ethnic, religious, and linguistic minorities through selected national and international case studies. Introduction to cross-cultural education in representative countries in relation to social, political, and economic systems.

204E. International Efforts in Education. Prerequisite: graduate standing or consent of instructor. Critical analysis of complex world of "development cooperation," with particular reference to bilateral and multilateral efforts in education.

204F. Nonformal Education in Comparative Perspective. Comparative and international study of organized and systematic educational activity for children, youth, and adults carried on outside of schools. Types of programs include, among others, consciousness raising, community action, skills training, literacy, and extension programs.

205. Computers in the Educational Process. Introduction to theory, experimentation, evaluation, and future of computer systems in education, with emphasis on computer-assisted instruction (CAI), and use of computers to teach programming and to foster development of writing, computational, and filing skills.

206A. Philosophy of Education: Introduction. Systematic introduction to the field, indicating ways in which philosophy serves to elucidate educational aims, content, methods, and values.

206C. Introduction to Conceptual Analysis. Conceptual analysis of recurrent and contemporary themes in the field. Emphasis on development of logical and linguistic skills used in analysis of educational problems and issues.

C206D. Philosophy of Education: Ethics and Values. Study of ethics and value theory in teaching and learning, educational organization and policy, and curriculum design and validation. Concurrently scheduled with course C191A.

C207. Politics of Education. Prerequisite: one approved research methods course required for master's or doctoral degree. Political dimensions of education institutions as organizations. Relationships between education institutions and political institutions in society. Political theory as a foundation for public policy analysis; interest groups in education policy formation and implementation. Concurrently scheduled with course C191D.

208A. Perspectives on the Sociology of Education. Sociological perspectives on current issues in educational policy and practice, including desegregation, decentralization, equality of educational opportunity, structure of educational organization, teacher/student relationships, reform in education at elementary, secondary, postsecondary levels.

208C. Explanation in the Social Sciences and Educational Research. Lecture, two hours; discussion, two hours. Prerequisite: graduate standing or consent of instructor. Overview of basic strategies and forms of explanation relevant to inquiry in education from vantage point of various social and behavioral sciences disciplines.

209A. History of Higher Education. Examination of development of postsecondary education in the U.S., with attention to social context and to scope and variety of institutions.

209C. Problems in Research and Evaluation in Higher Education. Critical review of research and evaluation studies of higher education, with special attention to need for studies of new programs and problems, and to design and methodology of evaluative research.

209D. System of Higher Education. Analysis of structure and function of American postsecondary education from systems perspective. Emphasis on structure of system and comparative characteristics (faculties, student bodies, finances, outputs) of different types of institutions.

210A. Introduction to Research Design and Statistics. Fundamentals of research design. Language of research. Planning and conduct of research. Interpretation and reporting of research outcomes. Introduction to descriptive statistics: mean, median, mode, variance. Introduction to normal curve.

210B. Statistical Inference. Prerequisite: knowledge of research designs and univariate descriptive statistics. Regression, correlation, inference, normal curve tests, t-tests, simple and factorial analysis of variance, and selected nonparametric tests.

210C. Analysis of Variance. Prerequisite: course 210B or equivalent. Completely randomized designs, randomized block designs, nested designs, and their combinations into advanced factorial designs using fixed, random, and mixed models. Analysis of covariance, introduction to multiple regression and quasi-experimental designs.

210D. Multivariate Analysis. Prerequisite: course 210C or equivalent. Review of multiple regression analysis, analysis of covariance. Introduction to matrix algebra. Introduction to multivariate normal distribution. Multivariate analysis of variance. Linear discriminant function. Analysis of repeated measurements. Canonical correlation. Principal components.

210E. Factor Analysis. Prerequisites: courses 210D, 211B. Exploratory factor analysis, rotations, confirmatory factor analysis, multiple-group analysis.

211A. Measurement of Educational Achievement and Aptitude. Prerequisite: course 210A. Critical study of tests of achievement and aptitude, with emphasis on group tests; relation of achievement to aptitude; social implications of measurement of intelligence; elements of validity and reliability.

211B. Measurement in Education: Underlying Theory. Prerequisite: course 211A. Measurement theory as applied to testing, focusing primarily on classical test theory; implications of theories for test construction and selection; current status of validity and reliability theory.

211C. Item Response Theory. Prerequisites: courses 210C, 211B, or equivalent. Item response theory, applications to educational achievement tests, item bias, test information, test equating, computerized adaptive testing.

212A. Learning and Education. Models of learning, modeling, reinforcement, motivation, encoding, memory, transfer, individual differences, and instruction.

212B. Motivation and Affect in Educative Process. Prerequisites: courses 210A, 212A. Review of theoretical and empirical literature on motivational factors in school settings and conditions for acquisition of affective outcomes.

212C. Cognition and Creativity in Education. Prerequisite: course 212A. Review of theoretical and empirical literature on cognitive processes in school learning, including knowledge acquisition, comprehension, metacognition, and creativity.

213A. Counseling Psychology in School and Community. Analysis and in-class application of student personnel service theory and methods, with emphasis on student assessment and development, task groups, and evaluation.

213B. Legal and Ethical Issues in Counseling Psychology. Prerequisite: course 213A. Ethical and legal codes relevant to psychological services in schools and community; relation of value systems and personality; case studies in implications of personal values in counseling situations.

213C. Group Counseling Theory and Process. Lecture, three hours; discussion, one hour. Prerequisites: courses 213A, 214A, and 214B, or consent of instructor. Group productivity, leadership in groups, social perception, attitude formation, and effect of behavior changes in individuals and groups. Evaluation of social, psychological, and educational principles related to therapeutic experiences of individuals in small groups.

214A. Counseling Theory and Practice. Alternatives in counseling practice in relation to theories of personality development and functioning, research on effectiveness of counseling, professional issues in counseling, educational aspects of counseling.

214B. Advanced Counseling Theory and Practice. Limited to advanced degree candidates whose major interest is counseling and to selected high school and college counselors. Counseling procedures, educational planning, and methods for helping students handle personal problems that interfere with school progress; critical evaluation of procedures.

214C. Principles of Career Planning. Examination of nature of careers across ages and ethnic and sexual groups in order to determine implications for career planning in postindustrial society.

214D. Career Counseling. Depth study of current theories, principles, problems, and practices of career counseling.

214E. Substance Abuse and Addiction. Theory and practice of prevention and intervention in substance abuse and addiction from perspective of counseling and educational practice

214F. Student Problems: Social Context. Designed to assist students in understanding the configuration of social forces that lead to student dysfunctions. Consideration of a number of contemporary social problems that are of concern to school counselors, educators in general, and behavioral scientists.

M215. Personality, Motivation, and Attribution. (Same as Psychology M239.) Current research and theory relating personality variables (e.g., attributional styles, self-esteem) to motivational concerns such as persistence and intensity of behavior. Perceived causes of outcomes in achievement and affiliative domains.

216. Counseling Models from a Cross-Cultural Perspective. Prerequisite: course 213A or consent of instructor. Research related to psychological, educational, and sociological characteristics of counseling clients within a cross-cultural perspective and implications for counseling models. Evaluation of counseling practices through analysis of school, community, and mental health settings.

M217A. Social Development and Education. (Same as Psychology M242D.) Biological and familial, school, and other influences on the child; development in context of current research and theoretical models; consideration of theoretical and methodological research on family, peer group, and school; application of developmental theory and research to educational practice.

217B. Cognitive Development and Education. Prerequisite: graduate standing. Critical review of theories and research in cognitive development, focusing on work of Piaget and Vygotsky, and relation of this work to issues in educational practice.

M217C. Personality Development and Education. (Same as Psychology M245.) Review of research and theory of critical content areas in personality development that bear on school performance: achievement motivation, self-concept, aggression, sex differences, empathy, and other social behaviors; review of status of emotional behavior in personality theory and development.

217D. Language Development and Education. Research and theory on how children develop their first language; sociolinguistic and psycholinguistic issues in preschool and primary years; bilingual and dialectical issues.

217F. Human Development and the Educational Process. Cognitive and social development; cultural, family, peer, and schooling influences on human development; application of developmental theory and research to educational practice.

M217G-M217H-M217I. Child Abuse and Neglect (2 units, 2 units, 1 unit). (Same as Community Health Sciences M245A-M245B-M245C, Dentistry M300.5A-M300.5B-M300.5C, Law M281A-M281B, Medicine M290A-M290B, Nursing M290A-M290B-M290C, and Social Welfare M290E-M290F-M290G.) Course M217G is prerequisite to M217H, which is prerequisite to M217I. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies. S/U or letter grading.

218A. Multiple Regression Analysis. Prerequisite: course 210B. Regression-based techniques for analyzing quantitative data; multiple regression methods, multiple correlation, partial correlation; introduction to general linear model, with direct application to educational inquiry.

218B. Advanced Quantitative Models in Non-experimental Research: Multilevel Analysis. Prerequisites: course 218A or equivalent, consent of instructor. Examination of conceptual, substantive, and methodological issues in analyzing multilevel data (i.e., on individuals in organizational settings such as schools, corporations, hospitals, communities); consideration of alternative analytical models.

218C. Structural Equation Modeling. Prerequisites: courses 210D, 210E, 218B, or equivalent. Extends path analysis (causal modeling) by considering models with measurement errors and multiple indicators of latent variables. Confirmatory factor analysis, covariance structure modeling, and multiple-group analysis. Identification, estimation, testing, and model building considerations.

218D. Analysis of Categorical and Other Nonnormal Data. Prerequisites: courses 210D, 210E. Regression analysis with dichotomous and polytomous dependent variables, log-linear modeling, coefficients of association for categorical variables, factor analysis, and structural equation modeling.

219. Laboratory: Advanced Topics in Research Methodology. Provides assistance in design of research and interpretation of data to advanced students from other divisions. Coverage of special topics not included in other courses on research methods.

220A. Inquiry into Schooling: Organization and Change. Critical analysis of issues in reconstruction of schooling; concepts of function and structure of schooling; organization theory; systems approaches in analysis of organization development and change.

220B. Inquiry into Schooling: Curricular Problems and Policy Issues. Inquiry into curriculum of schooling. Critical analysis of relationship of curricular decision making to social system and contextual variables.

221. Computer Analyses of Empirical Data in Education. Lecture, two hours; laboratory, two hours. Prerequisites: courses 209C (section 1), 210A, or equivalent. Designed to develop conceptual and technical skills needed for designing and executing empirical research utilizing statistical packages. Each student conducts two original studies. Equal emphasis on techniques of data analysis and interpretation of results.

M222A. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (Same as Anthropology M236Q, Psychiatry M235, and Psychology M295.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some uses of observations and their implications for research in social sciences. Students expected to integrate observational work into their current research interests.

222B. Design Issues in Naturalistic Research. Lecture, three hours; discussion, one hour. Prerequisite: course M222A or consent of instructor. Issues in conceptualization and design of naturalistic research studies, particularly within educational settings. Specific topics include problem definition and focus, units of observation, sampling, controlled comparisons and meaningful variation, and reliability/validity concerns in observational research. Special attention to ethnographic studies.

222C. Qualitative Data Reduction and Analysis. Lecture, two hours; discussion, two hours. Prerequisite: course M222A or 222B or consent of instructor. Theory of and practice in qualitative data reduction and analysis. Discussion of data storage and retrieval systems, data manipulation techniques such as typologies and attribute spaces, and specific analytic perspectives. Interfacing qualitative and quantitative data.

223. Aesthetics and the Curriculum. Lecture, two hours; discussion, two hours. Examination of various ideas and theories in aesthetics and application of these in schooling contexts.

224. Problems and Issues in Bilingual and Multicultural Education. Introduction to development and implementation of bilingual and multicultural programs in the U.S. Analysis of program goals, models, typologies, and effectiveness.

225A. Issues in Education of Exceptional Individuals. Prerequisite: graduate standing. Analysis of major research regarding contemporary trends, issues, and programs for the exceptional; consideration of commonalities and differences among exceptional individuals.

225B. Advanced Issues in Education of Exceptional Individuals. Prerequisite: consent of instructor. Synthesis of developmental and educational theory relevant to study of exceptional individuals, including consideration of historical context of current research and applied issues in special education.

227A. Research on Learning Characteristics of Exceptional Individuals. Prerequisite: course 225B. Overview of research and theory regarding learning characteristics of exceptional individuals and discussion of application of this work to educational practice.

227B. Research on Cognitive and Language Characteristics of Exceptional Individuals. Prerequisite: course 227A. Review of empirical and theoretical literature regarding language and cognitive development of exceptional individuals; focus on intervention programs developing language and cognition.

227C. Research on Behavioral and Social Characteristics of Exceptional Individuals. Prerequisite: course 227B. Analysis of social and emotional development of exceptional individuals and development of social competence in special education programs.

228. Observation Methods and Longitudinal Studies. Lecture, two hours; discussion, two hours. Prerequisites: course 210A or equivalent, consent of instructor. Design of observational and longitudinal studies. Formulation of study conclusions concerning influences on children's development. Conduct of observations; processing and analysis of data. Use of portable computers for recording observations.

229. Special Studies on Educational Policy and Planning. Research on selected topics in fields of administration, policy, curriculum, and teaching studies and on conceptualization of hypotheses and research programs on division topics and issues.

232. Instructional Analysis. Prerequisite: consent of instructor. Theoretical and empirical analysis of instructional variables as they relate to diverse types of instructional strategies. Development of skill in techniques of conducting instructional research.

234. Education and Social Stratification. Relationship between education and components of social stratification, including occupations and earnings. Competing theories used in studying education and social stratification; relevant research. Conclusions regarding individual career decisions, social policies, and theories of society.

235. Education and Work. Review of theoretical and empirical literature on issues concerning interface of education and work. Review of alternatives in school-to-work transition of youth and appraisal of present vocational training and manpower development programs.

236. Human Abilities. Prerequisite: course 210B or equivalent. Nature, development, and measurement of intellectual abilities and their relations to learning and instruction. Review of research and theory of models of ability and test development.

238. Cross-National Analysis of Higher Education. Comparative study of national systems of higher education: their division of work, basic values, structures of authority, modes of national integration, and types of change.

239. Organization and Governance of Educational Systems. Academic organizations, precollegiate and postsecondary, are most appropriately studied as complex, professionalized organizations. Emphasis on characteristics of educational institutions and systems as organizations: environmental relations, governance structures, processes, and patterns of decision making and policy-making.

240. Cultural Foundations of U.S. Education: Policy and Practice. Prerequisite: graduate standing or consent of instructor. Cultural foundations of persistent and troubling issues and tensions in American educational policy-making and practice.

241. Research Methodology in School Administration. Prerequisite: consent of instructor. Examination of research problems and strategies in school administration.

242. Economic Analysis for Educational Policy and Planning. Prerequisite: graduate standing. Introductory course focusing on concepts and quantitative methods from economics, statistics, and operations research applied to educational policy and planning issues. Instruction in programming microcomputers for instruction (BASIC) and management information systems (dBASE).

C244. Economics of Education. Introductory course in microeconomic and macroeconomic techniques applied to education. Methodologies illustrated principally in context of current issues in American education. Concurrently scheduled with course C191C.

245. Seminar: Cost-Benefit Analysis in Education. Conceptual and theoretical underpinnings of cost-benefit analysis, critical analysis of current cost-benefit studies, and procedures for conduct of cost-benefit studies.

246A. Seminar: Mathematical Modeling in Educational Policy Analysis. Prerequisite: course 242 or consent of instructor. Stochastic and deterministic modeling techniques as applied to educational policy and planning issues. Mathematics review and instruction in use of MPS (Mathematical Programming System) and development of software for Monte Carlo computer simulation studies in education.

246B. Seminar: Operations Research — Systems Analysis in Education. Prerequisite: course 242 or consent of instructor. Application of advanced mathematical modeling techniques of operations research to educational policy and planning. Design of computer-based management information systems in education using dBASE.

248. Seminar: Perspectives on Lifelong Learning. From interdisciplinary perspective, lifelong learning is studied theoretically and as an area of educational research, policy, and practice. Conceptual distinctions among major proponents of lifelong learning and implications for schooling.

249A. Seminar: National Evaluations of Postsecondary Education. Critical review of national evaluation studies of higher education, including programs of general education and professional and graduate school programs; emphasis on design, methodology, and interpretation of large-scale evaluation studies.

249B. Seminar: Institutional Research and Program Evaluation. Critical review of institutional evaluation studies, with consideration of scope of information needed for various purposes and problems of interrelating this information to appraise overall institutional functioning and effectiveness.

251A. Seminar: Philosophy of Education, Epistemology. Prerequisite: consent of instructor.

251C. Seminar: Philosophy of Education, Social Science Problems — Methodological Perspectives. Prerequisite: course 206C or consent of instructor.

251D. Seminar: Philosophy of Education, Problems in Ethics and Values. Prerequisite: course C206D or consent of instructor.

251E. Seminar: Philosophy of Education, Selected Issues.

252A. Seminar: Educational Organizations. Prerequisite: course 208A or consent of instructor.

252B. Seminar: Education and Social Change. Prerequisite: course 208A or consent of instructor.

M252C. Human Resources and Economic Development. (Same as Community Health Sciences M236.) Examination, in context of the developing countries, of interactions among economic development, population growth, levels of health and nutritional status, and educational investments.

253A. Seminar: Current Problems in Comparative Education.

253B. Seminar: African Education. Prerequisite: graduate standing or consent of instructor. Contemporary issues in African educational systems, including questions of access and equity, quality and efficiency, relevance and responsiveness, links between schools and communities, and policy and practice in education.

253C. Seminar: Asian Education.

253D. Seminar: Latin American Education.

253E. Seminar: European Education.

253F. Seminar: Education in Revolutionary Societies. Multidisciplinary and comparative study of socialist educational theory examined through writings of Marx, Lenin, Mao, and others. Implementation of this theory in specific case studies, along with comparative assessments of nonsocialist nations.

253G. Seminar: The Asian American and Education. Basic issues and topics related to Asian Americans in the field of education. Examples of issues and topics include Asian Americans and the community, socioeconomic status, education-to-work transition, language and culture question.

253H. Seminar: The Chicano/Hispanic and Education. Basic issues and topics related to the Chicano and other Hispanic groups in education. Review of literature on specific educational levels and Chicano/Hispanic student progress (e.g., early childhood, elementary, higher education; specific topics: assessment, access, tracking, segregation; implications for schooling).

253I. Education and Social Change in the Middle East and Islamic World. Critical and analytic examination of historical and current role of traditional and modern (Western) education in affecting social, political, and economic changes in countries of the Middle East and Islamic world (including Pacific Rim, South and Central Asia).

254. Seminar: History of Education. Prerequisite: course M201C. Study of current movements in historiography of education and critical reading of texts in history of education.

255A-255B-255C. Seminars: Special Topics. Prerequisite: consent of instructor. May be repeated for credit. **255A.** Measurement; **255B.** Design; **255C.** Data Analysis.

256A. Seminar: Special Topics in School Learning. Prerequisite: consent of instructor.

256B. Seminar: Special Topics in Development. Prerequisite: consent of instructor.

257. Seminar: Research in Counseling Psychology. Prerequisite: consent of instructor. In-depth analysis of selected research approaches/areas in counseling psychology.

258A. Seminar: Problems in Instructional Research.

258B. Seminar: Problems in Instructional Development.

259A. Seminar: Research on Characteristics of Students. Analysis of concepts, methodology, and conclusions or implications underlying and resulting from major research on student characteristics. Emphasis on differential impact of higher education on student and faculty development.

260. Seminar: Principles of Curriculum and Instruction.

261E. Seminar: Education and Work.

261F. Seminar: Cognitive and Personal Development of College Students. Examination of cognitive development of college students; issues of personal and social development, including leadership, and interpersonal relations and skills.

262A. Seminar: The Social Studies.

262B. Seminar: Reading.

262F. Seminar: Research Topics in Bilingual/Multicultural Education. Prerequisite: consent of instructor.

262I. Seminar: Contemporary Issues in Education and Work.

262J. Seminar: Economic Education.

263. Seminar: Higher Education.

264. Seminar: Teacher Education. Prerequisite: consent of instructor. Research, issues, and practices in preservice and in-service teacher preparation, evaluation, and certification. Social, philosophical, and methodological issues and current trends in America and abroad. Opportunities to observe, participate in, and discuss teacher education programs.

267. Seminar: Educational Technology.

271A. Proseminar: Educational Psychology (2 units). Introduction to a variety of research issues in the field of educational psychology, including topics related to human development, learning and instruction, counseling, and special education, and to different methodological approaches used to study them. S/U grading.

272. Case-Study Research in Education Policy and Practice. Use of case-study methods in education research, providing opportunities for applying methodological skills to actual case-study research projects. Focus on single and multiple case studies that investigate issues in education policy and practice.

273A. Structure and Dynamics of Educational System. Lecture, two hours; discussion, two hours. Overview of school administration, teaching, curriculum, and policy studies. Focus on American education as an institutional system wherein federal, state, and local policy, school administration, curriculum theory and design, and teaching are inextricably connected in the delivery of education.

275. Race and Education. Limited to graduate students. Examination of role of race in educational policy-making. Exploration of a broad interpretation of how schools contribute to racial stratification and inequality by linking sociological and sociopsychological theories of race, racial attitudes, and conflict to historical policy analysis.

280A. Seminar: Selected Topics in Special Education (2 to 6 units). Prerequisite: consent of instructor. Focus on research and clinical problems in special education. Introduction to a range of clinical services and research strategies. Exploration of current topics in the field.

280B. Seminar: Exceptional Individuals. Prerequisite: doctoral standing.

M281A. Seminar: Human Behavioral Ecology. (Same as Anthropology M229A and Psychiatry M279A.) Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Examination of predictive models from animal behavioral ecology used to study human diet and subsistence; settlement patterns and territoriality; sharing and helping; reproduction and mortality. Comparison with other economic and ecological approaches in anthropology.

M281B. Seminar: Reproduction, Families, and Parenting. (Same as Anthropology M229B and Psychiatry M279B.) Prerequisite: consent of instructor. Guided forum for graduate students to discuss and broaden their studies of human reproduction and child rearing from varied viewpoints. Representation and debate of theories, questions, and methods from social and biological sciences.

M281C. Seminar: Selected Topics in Human Ethology. (Same as Anthropology M229C and Psychiatry M279C.) Lecture, one hour; discussion, three hours. Prerequisite: consent of instructor. Consideration of appropriateness and contributions of using animal behavior methodology in study of human behavior. Analysis: describing and recording behavior; causation; development, especially longitudinal studies; adaptation; evolutionary origins.

296A-296F. Seminars: Research Topics in Education (2 units each). Discussion, three hours. Prerequisite: consent of instructor. Advanced study and analysis of current topics in education. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

299A-299B-299C. Research Practicum: Education (4 to 8 units each). May be repeated for credit.

300. Dissertation Writing Workshop: Interdivisional Seminar. Lecture, one hour; discussion, two hours; laboratory, one hour. Prerequisite: consent of instructor. Limited enrollment. Introduction for doctoral candidates to dissertation writing as a genre that can be analyzed or broken down with its constituent parts and, vice versa, which is constructed out of materials that can be identified and analyzed. S/U grading.

309A. Methodologies in Teaching Bilingual and English Language Development (3 units). Lecture, two hours; discussion, one hour. Prerequisite: credential program standing. Pedagogy for bilingual and English development instruction. Topics include legal foundations of bilingual programs, educational issues, organizational approaches, and communicative approach; discussion of instructional strategies and activities.

309B. Language Development in Content (3 units). Lecture, two hours; discussion, one hour. Prerequisite: credential program standing. Discussion of competencies needed by all content area teachers of limited English-proficient students, including strategies for teaching in and through English. Designed to assist classroom teachers in developing their knowledge and necessary skills to assure English language learners access to core curriculum.

310. Professional Communication for Graduate Students in Education (2 units). Prerequisite: consent of instructor. Writing workshop on students' papers in progress to ensure professional standards. Analysis and group discussion of rhetorical and stylistic principles. May be repeated once. S/U grading.

311. Principles and Methods of Computer Literacy and Classroom Application — K-12 (2 units). Lecture, one hour; laboratory, 30 minutes. Prerequisite: consent of department. Introduction to use of computers in educational environment. Discussion of issues on why and how to integrate computers into curriculum and hands-on practice which allows students to demonstrate skills discussed. S/U grading.

312. Basic Principles of Curriculum and Instruction. Prerequisite: consent of instructor. Analysis and practice of basic principles and concepts for planning, conducting, and evaluating units of curriculum and instruction. Emphasis on study and utilization of a variety of instructional strategies and their application in elementary and secondary schools.

313A-313B. Principles and Methods for Teaching Elementary Mathematics (6 to 12 units each). Prerequisite: consent of instructor. Course 313A is prerequisite to 313B. Problem-solving strategies and geometry for elementary teachers. Use of concrete materials, computers, calculators, cooperative learning, and content for elementary teachers. S/U grading.

313C-313D. Principles and Methods for Teaching Secondary Mathematics (6 to 12 units each). Prerequisite: consent of instructor. Course 313C is prerequisite to 313D. Problem-solving strategies in algebra, geometry, and trigonometry for secondary mathematics teachers. Use of concrete materials, computers, calculators, cooperative learning, and content for secondary teachers. S/U grading.

314A-314B. Principles and Methods for Curriculum, Instruction, and Leadership in Mathematics (6 to 12 units each). Prerequisite: consent of instructor. Course 314A is prerequisite to 314B. Problem solving, curriculum development, implementation of California Mathematics Framework, strategies for encouraging women and minorities into mathematics, and leadership development. S/U grading.

315A-315B. Principles and Methods for Teaching Reading for Multiple Subject Instruction (2 units each). Prerequisite: consent of instructor. Course 315A is prerequisite to 315B. Reading instruction in elementary schools. Analysis of reading problems and programs; study of relationships between language/culture/cognition and reading. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Observation and participation in schools. S/U grading.

316A-316B. Principles and Methods for Teaching Reading for Single Subject Instruction (2 units each). Prerequisite: consent of instructor. Course 316A is prerequisite to 316B. Reading instruction in secondary schools. Analysis of reading problems and programs; study of relationships between language/culture/cognition and reading. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Observation and participation in schools. S/U grading.

317A. Principles and Methods for Teaching Elementary Science — K-2 (6 to 12 units). Prerequisite: consent of instructor. Conceptual teaching of science and incorporation of science process skills for grades K-2. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading.

317B. Principles and Methods for Teaching Elementary Science — 3-4 (6 to 12 units). Prerequisite: consent of instructor. Conceptual teaching of science and incorporation of science process skills for grades 3-4. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading.

317C. Principles and Methods for Teaching Elementary Science — 5-6 (6 to 12 units). Prerequisite: consent of instructor. Conceptual teaching of science and incorporation of science process skills for grades 5-6. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading.

318A-318B. Principles and Methods for Multiple Subject Instruction (2 units each). Prerequisite: consent of instructor. Course 318A is prerequisite to 318B. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Focus on subjects commonly taught in elementary schools. Observation and participation in schools. S/U grading.

319. Principles and Methods for Teaching Composition — 1-12 (6 to 12 units). Prerequisite: consent of instructor. Drawing from current research and theory, participating teachers expand their repertoire of techniques for teaching writing and literature. Focus on drawing on expertise of classroom teachers and becoming teacher-writers in addition to writing teachers. S/U grading.

320A-320B. Principles and Methods for Single Subject Instruction (2 units each). Prerequisite: consent of instructor. Course 320A is prerequisite to 320B. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Focus on subjects commonly taught in secondary schools. Observation and participation in schools. S/U grading.

321A. Principles and Methods for Teaching Physics — 7-12 (6 to 12 units). Prerequisite: consent of instructor. Conceptual teaching of physics and incorporation of science process skills for grades 7-12. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading.

321B. Principles and Methods for Teaching Chemistry — 7-12 (6 to 12 units). Prerequisite: consent of instructor. Conceptual teaching of chemistry and incorporation of science process skills for grades 7-12. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading.

321C. Principles and Methods for Teaching Earth and Space Sciences — 7-12 (6 to 12 units). Prerequisite: consent of instructor. Conceptual teaching of Earth and space sciences and incorporation of science process skills for grades 7-12. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading.

321D. Principles and Methods for Teaching Life Sciences — 7-12 (6 to 12 units). Prerequisite: consent of instructor. Conceptual teaching of life sciences and incorporation of science process skills for grades 7-12. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading.

322A. Principles and Methods for Using Computers in Science Instruction — K-12 (6 to 12 units). Prerequisites: courses 317A, 317B, and 317C, or 321A, 321B, 321C, and 321D, consent of instructor. Use of computers and current proven computer software to teach science content and process conceptually at all grade levels. Development of teaching units. S/U grading.

322B. Principles and Methods for Peer Leaders in Science Classrooms — K-12 (6 to 12 units). Prerequisites: courses 317A, 317B, and 317C, or 321A, 321B, 321C, and 321D, consent of instructor. Develops qualities in teachers necessary for leadership positions in science education at all grade levels. Exploration of leadership roles; leadership behavior practice. S/U grading.

323. Teacher-Researcher: Principles of Classroom Research (6 to 12 units). Prerequisite: consent of instructor. Guidance of teachers conducting research in their language arts classroom, K through community college, with emphasis on naturalistic research techniques, research relevant to proposed studies, research conducted by other teacher-researchers, publication of findings. S/U grading.

324A. Observation and Participation: Multiple Subject Instruction (2 to 6 units). Prerequisite: consent of instructor. Six hours per week of observation and participation in classrooms in which multiple subjects are taught, normally in elementary schools. Preparation for supervised teaching. S/U grading.

324B. Supervised Teaching: Multiple Subject Instruction (2 to 10 units). Prerequisites: course 324A, consent of instructor. Practice teaching under daily supervision of a teacher in a classroom in which multiple subjects are taught, normally in an elementary school. S/U grading.

324C. Supervised Teaching: Multiple Subject Instruction (2 to 10 units). Prerequisites: course 324B, consent of instructor. Advanced practice teaching under daily supervision of a teacher in a classroom in which multiple subjects are taught, normally in an elementary school. S/U grading.

324D. Supervised Teaching: Multiple Subject Instruction (2 to 10 units). Prerequisites: course 324C, consent of instructor. Advanced practice teaching under daily supervision of a teacher in a classroom in which multiple subjects are taught, normally in an elementary school. S/U grading.

326. Principles and Methods for Teaching English/Language Arts — K-12 (6 to 12 units). Prerequisite: consent of instructor. Emphasis on teaching a literature-based language arts program incorporating process skills, modeling, hands-on experiences, and development of teaching and teacher-training materials. S/U grading.

327. Principles and Methods for Teaching Spanish Effectively (6 to 12 units). Prerequisite: consent of instructor. Emphasis on proficiency-based foreign language teaching methods incorporating language assessment skills, modeling, hands-on experiences, and development of teaching and teacher-training materials. S/U grading.

328. Principles and Methods for Integrating Content and Language Instruction (6 to 12 units). Prerequisite: consent of instructor. Theoretical rationale for integrating language teaching and content instruction for ESL students at intermediate or advanced level in English. Various Sheltered English techniques described, modeled, and used in hands-on workshops involving peer and expert coaching. S/U grading.

329. Integrating the Elementary School Curriculum — K-6 (6 to 12 units). Prerequisite: consent of instructor. Open to credentialed teachers. Interdisciplinary strategies emphasizing reading and writing in the content areas, relating science and mathematics, and promoting enrichment follow-up activities in other disciplines such as social studies and art. S/U grading.

330A. Observation and Participation: Single Subject Instruction (2 to 6 units). Prerequisite: consent of instructor. Six hours per week of observation and participation in classrooms in which single subjects are taught, normally in secondary schools. Preparation for supervised teaching. S/U grading.

330B. Supervised Teaching: Single Subject Instruction (2 to 10 units). Prerequisites: course 330A, consent of instructor. Practice teaching under daily supervision of a teacher in a classroom in which a single subject is taught, normally in a secondary school. S/U grading.

330C. Supervised Teaching: Single Subject Instruction (2 to 10 units). Prerequisites: course 330B, consent of instructor. Advanced practice teaching under daily supervision of a teacher in a classroom in which a single subject is taught, normally in a secondary school. S/U grading.

330D. Supervised Teaching: Single Subject Instruction (2 to 10 units). Prerequisites: course 330C, consent of instructor. Advanced practice teaching under daily supervision of a teacher in a classroom in which a single subject is taught, normally in a secondary school. S/U grading.

331. History and Geography Themes in U.S. History and World History Courses (6 to 12 units). Prerequisite: consent of instructor. Emphasis on new curricular reform elements written into the 1987 California Framework. Lectures, seminars, and demonstrations on fundamental issues in history, with examples derived from the History/Social Science Framework. S/U grading.

332. The Immigrant Experience (6 to 12 units). Prerequisite: consent of instructor. Readings, films, interviews, and field trips to foster understanding of composition, origins, landscape expression, and ambitions of Los Angeles' new populations, since this city is the destination of many immigrant groups entering the U.S. S/U grading.

360. Teaching Clinical Practicum. Discussion, two hours; fieldwork, two hours. Prerequisite: consent of instructor and director of Teacher Education Laboratory. Seminar and directed field experience. Examination and analysis of different methods of subject matter instruction.

375. Teaching Apprentice Practicum (1 to 4 units). Prerequisite: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

400. Foundations of Education Policy Analysis. Prerequisite: consent of instructor. Principles of decision making and policy formation, implementation, and analysis in context of the educational system. Critical perspectives include effectiveness and equity of educational delivery systems and programs, and complex nature of educational governance in contemporary America.

401. Structure and Functions of Schools as Complex Organizations. Prerequisite: consent of instructor. Critical analysis of alternative assumptions about organizations, how they function, and why people in organizations behave as they do. Application to special circumstances of schools and to contemporary issues and problems in school leadership, improvement, and reform.

402. Curriculum Principles and Practices. Prerequisite: consent of instructor. Critical analysis of major concepts, underlying assumptions, policy issues, and processes in development and implementation of curriculum in the educational setting. Problems in formulation of purposes, selection of learning experiences, organization of curriculum, and curriculum evaluation.

403. Teaching: Principles and Problems. Prerequisite: consent of instructor. Current knowledge concerning good teaching and theoretical/conceptual, empirical, and/or ideological bases for these assertions. Alternative models of classroom teaching, their assumptions, and evidence of worth. Current policy issues and problems in generating and sustaining effective teaching.

409A. Language Structure, Acquisition, and Development (3 units). Lecture, two hours; discussion, one hour; ethnographic study. Prerequisite: credential program standing. Theoretical foundations of language structure and first and second language acquisition, with focus on major themes of current research that provide a framework for schooling of limited English-proficient students.

409B. Language Structure and Acquisition (3 units). Lecture, two hours; discussion, one hour; ethnographic study. Prerequisite: credential program standing. Rationale for bilingual/English language acquisition and development programs. Topics include historical and current theories and models of language programs that have implications for second language development and pedagogy. Consideration of psychological factors affecting first and second language development.

410A-410B. Fundamental Issues in Higher Education, Work, and Adult Development. Course 410A is prerequisite to 410B. Two-course sequence designed to orient new students to issues, ideas, and literature that constitute the division. Emphasis on underlying social and political issues that shape higher education, work, and adult development.

410C. Perspectives on Higher Education. Lecture, two hours; discussion, two hours. Overview of various social sciences theories used to analyze institutions and issues of contemporary higher education. Explanation of how theory and methodology affect research design and framing of research questions in studies of higher education. S/U or letter grading.

411A. Introduction to Educational Evaluation. Introduction to systematic evaluation as it applies to appraising educational programs. Consideration of program evaluation as means of improving quality of educationally relevant decisions.

411B. Procedural Problems in Evaluation. Assessment methodologies appropriate for evaluation problems. Writing evaluation proposals, developing program monitoring procedures, selecting appropriate evaluation design strategies, coping with ethical considerations in evaluation, framing the decision context, and reporting evaluation results.

412A. Criterion-Referenced and Norm-Referenced Test Construction. Prerequisite: course 211A. Construction of criterion- and norm-referenced assessment instruments. Appropriateness of different assessment devices considered in relation to research, development, and evaluation.

412B. Intersecting Dimensions of Teaching and Testing. Prerequisite: consent of instructor. Designed to develop acquisition of insights and skills based on symbiotic relationship between assessment and instruction when high-stakes educational achievement tests are used.

413A-413B. Methodology for Primary Language Instruction (3 units each). Lecture, two hours; discussion, one hour. Prerequisite: credential program standing. Conducted in Spanish. **413A.** Required for BCLAD. Characteristics of bilingual programs, instructional delivery in bilingual classrooms, and factors to consider in selection and use of primary language materials. **413B.** Cultural similarities and differences among Spanish speakers in California. Causes for patterns of immigration into the U.S., manifestations of culture, and contributions of Spanish speakers to the U.S. and California.

415A. Assessment in Counseling Psychology. Prerequisites: courses 210A, 211A. Overview of rationale for and procedures used by counseling psychologists for assessing individuals in a multicultural society. Emphasis on standardized cognitive assessment instruments and specialized techniques for diagnosis, evaluation, and development of counseling strategies for at-risk populations.

415B. Advanced Assessment in Counseling Psychology. Prerequisites: course 415A, consent of instructor. Advanced course in assessment for counseling psychologists. Survey and demonstration of instruments of achievement, affective, and personality appraisal, with emphasis on testing and interplay between assessment and psychological functioning for reducing risks of failure in academic, personal, and social areas.

420A. Principles of Curriculum. Critical examination of basic concepts underlying determination of objectives, selection and organization of learning experiences, and evaluation process.

421A. Programs and Research in Early Childhood Education. Prerequisite: one course from development series. Examination of child care programs and research in early childhood education, including review of relation of research in developmental psychology and education to goals of early childhood education and day care.

421C. Research and Evaluation of Early Childhood Programs. Prerequisite: course 421A or equivalent or consent of instructor. Critical review of evaluation models (e.g., summative, formative, implementation) and their utility for improving and evaluating quality of child-related programs.

421D. Parents and Community Agents in Child Development. Prerequisite: one course from development series. Critical review of theoretical basis and effectiveness of training programs for parents of young and elementary school-aged children; relation of preschool parent programs to family development and role of programs in the community.

421F. Issues in Application of Child Development and Educational Research to Social Policy. Relationships among policymakers and social scientists in development, implementation, and evaluation of policies affecting children and their families. Students learn to design and conduct interviews, analyze legislative documents, and present analyses to policymakers.

422. Inquiry Into Schooling: Basic Issues. Critical examination of basic issues and problems in organization and reconstruction of precollegiate schooling. Consideration of historical development and changing functions of schooling in American society; school organization; schooling alternatives; problems in management of educational change.

423. The Humanistic Curriculum. Consideration of philosophical and cultural foundations of humanistic curricular strategies. Review of techniques and procedures of affective education with a view to their place in overall theory of teaching and learning.

424A. Social Studies in the Curriculum. Advanced study in social studies curriculum development; problems in defining objectives and organizing single and multidisciplinary programs; critical review of literature on cognitive and affective learning in social science, with emphasis on experimental study of instructional programs.

424B. Reading in the Curriculum. Prerequisite: course 210A. Study of reading curricula and instructional procedures, with emphasis on rationale and research underlying their development and research comparing their effectiveness.

424C. Language in the Curriculum. Advanced study in school language curriculum; application to improvement of curriculum in the field.

424G. Curriculum Design for Bilingual Education. Prerequisite: consent of instructor. Advanced study of curriculum design for bilingual educational programs. Philosophical basis for bilingual programs; theories of learning and instruction applied to bilingual learner; language assessment; development of instructional component; program evaluation.

431A. Administration in Higher Education. Overview of college and university administration and introduction to policy research and analysis in post-secondary institutions. Case studies of administrative problems, policies, and practices. Management information systems, resource allocation, and issues related to responsibility, authority, and participation in administrative decisions.

431B. Curriculum and Instruction in Higher Education. Principles of curriculum and instruction in postsecondary programs. Theory and practices in goal setting, testing, media selection, and related instructional responsibilities. Preparing to teach college-level students.

431C. Innovative Forms and Practices in Higher and Continuing Education. New institutional forms (e.g., external degree programs and other nontraditional approaches to higher education, neighborhood learning centers, and peoples' colleges). Methodological innovations such as computer-assisted instruction, credit by examination, and independent study.

432. Seminar: Professional Topics in Higher Education.

433A. Instructional Product Development. Prerequisite: consent of instructor. Examination of procedures employed in systematic development of instructional products. Students acquire competencies associated with those procedures.

433B. Technological Development in Educational Media. Prerequisite: course 433A. Theory, current problems, and anticipated trends in instrumentation and systems development for instructional applications and research, including computer-aided instruction, communication satellites, and other advanced systems; theory and laboratory practice with instrumentation in educational research.

437A. Principles of Curriculum in Economic Education. Theories, principles, and concepts related to understanding the business and economic system; their application to teaching in secondary school.

437B. Corporate Educational Programs. History and scope of corporate training programs; current educational problems in training programs within industry as they are affected by automation and technological change.

440C. Administration of the Instructional Program. Examination of current educational problems in society and strategies of their solution through curriculum policy and practice; instructional design and operation; in-service training of teaching staffs.

441A. Instructional Supervision A. Analysis of teaching in light of research-substantiated elements of instruction: task analysis, appropriate objectives, principles that increase motivation, rate and degree of learning, retention and transfer, monitoring and adjusting instruction to meet needs and capacities of learners.

441B. Instructional Supervision B. Prerequisite: course 441A or equivalent. Basic techniques of script-taping instructional episodes, planning teacher conferences through analysis of script-tapes, conducting and analyzing growth-evoking teacher conferences. Conducting mini-lessons to demonstrate elements of good instruction.

442B. Legal Aspects of Educational Management and Practice. Examination of structures and kinds of law governing educational systems in the U.S.; constitutional dimensions of church/state relations; employees' civil rights and legal aspects of hiring, firing, and negotiating procedures; student attendance, control, and civil rights.

443. Policy Analysis in Education. Prerequisite: consent of instructor. Overview of political, economic, and legal context of educational policy formation. Included in examination are issues that impact on minorities (e.g., bilingual education, desegregation, affirmative action, role of subdominants in policy-making process).

444A. Legal Aspects of Access to Public Education. Prerequisite: course 442B or consent of instructor. Study of access to public education focused on issues of affirmative action, testing, tracking, bilingual/bicultural education, special education, correctional education, and malpractice suits.

444B. Equality of Educational Opportunity through Desegregation and Finance Case Law. Prerequisite: course 442B or consent of instructor. Concentrated review of definition of equality of educational opportunity as it is being developed by the courts in cases concerning desegregation and educational finance.

447. Seminar: Educational Policy and Planning, Special Studies (1 to 4 units). Prerequisite: consent of instructor.
