## Undergraduate Study

For information on the special certificate program through which students may waive the Multisubject Assessment for Teachers (MSAT) in California, see the Diversified Liberal Arts Program and contact a counselor in the College of Letters and Science, A316 Murphy Hall, (310) 206-6681.

## Education Studies Minor

The education studies minor is intended to address the diverse information needs of the UCLA undergraduate community to (1) allow students to learn more about the multitude of contemporary professional research issues confronting the field of education, (2) help understand the complex interactions between the legal, social, political, and economic forces which influence and shape educational policies in America, (3) provide an introductory course sequence for students who wish eventually to pursue careers in education either as teachers or researchers, and (4) provide an analysis of current educational practices by which UCLA students can become better consumers of educational services as future parents, taxpayers, and citizens.

To enter the minor, students must have completed 32 units with a minimum overall 2.3 (C+) grade-point average and file an admission application with the education studies academic adviser in the Office of Student Services, 1009 Moore Hall. Applicants are expected to have a real commitment to inquiry into issues vital to education.

*Required Lower Division Courses:* Two policy and issues courses (eight units) from Education 91A through 91E, with grades of C+ or better.

*Required Upper Division Courses:* Two behavioral and social science perspective courses from Education M108, 180, C191A through 191F; two elective courses from M102, 125A,

M148; and one professional topics course from 197A through 197Z.

In addition to or in lieu of electives, students may select a concentration in community education leadership by completing three courses from Education 192, 197E, 197K through 197N.

Students with a 3.0 grade-point average may, after acceptance of a separate application, also select a concentration in advanced studies by taking Education 197X and 199 in addition to the course requirements for the minor.

All minor courses must be taken for a letter grade. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degrees

The Department of Education offers the Master of Arts degree and the Master of Education degree.

## Master of Arts

### Admission

The Master of Arts (M.A.) degree in Education is an academic master's degree designed to meet the needs of individuals preparing for careers in basic research or for advanced graduate study.

Qualifications for admission to a program of study in education, in addition to the University requirements for admission, are (1) scores for quantitative, verbal, and analytical sections of the Graduate Record Examination (GRE) and (2) at least three letters of recommendation documenting qualifications and/or professional experience.

Acceptance into a particular division is dependent on the availability of openings in that division and the applicant's desired emphasis area; preference is given to applicants with relevant background and experience. Admission to an initial advanced degree program occurs simultaneously with admission to graduate standing and to the Department of Education. No screening examination (other than described above) and no specific coursework are required for admission to a degree program. The Department of Education has an application form which must be completed in addition to the one used by the Graduate Division. Application forms and departmental brochures are available from the Office of Student Services, Graduate School of Education and Information Studies.

**Law/Education Concurrent Degree**

The Department of Education and the School of Law offer a concurrent degree program which allows students to design a program of study leading to the J.D. and any advanced degree in education (M.Ed., M.A., Ed.D., or Ph.D.). If the program meets the degree requirements in both schools, students are awarded both degrees on its completion. This program is not offered in 1996-97.

**Areas of Study**

The Master of Arts emphases in divisions 2 through 5 are the following:

**Educational Psychology**

Counseling, developmental studies in education, learning and instruction

**Higher Education and Work**

Education training, public policy analysis, research in higher education, and teaching in higher education

**Social Research Methodology**

Applied statistics and psychometrics, quantitative and qualitative research, evaluation methodology, and economic analysis

**Social Sciences And Comparative Education**

Social sciences, comparative and international education

**Curricular Divisions**

Contact the Office of Student Services regarding faculty member(s) to be consulted with respect to enrollment and research opportunities and/or course sequencing in each division or emphasis field.

**Division 1: Administration, Curriculum, and Teaching Studies**

Education M102, C191A, 206A, C206D, 220A, 220B, 223, 224, 229, 240, 241, 242, 246A, 246B, 251D, 260, 262A, 262B, 262F, 262J, 273A, 400, 401, 402, 403, 420A, 422, 423, 424A, 424B, 424C, 424G, 437A, 440C, 441A, 441B, 442B, 443, 444A, 444B, 447, 448A, 448B, 470A, 470B, 490A.

**Division 2: Educational Psychology**

Education 125A, 125B, 191F, 197F, 197G, 205, 212A, 212B, 212C, 213A, 213B, 213C, 214A, 214B, 214D, 214E, 214F, M215, 216, M217A through 217D, 217F, M217G, M217H-M217I, 225A, 225B, 227A, 227B, 227C, 232, 236, 256A, 256B, 257, 258A, 258B, 267, 271A, 280A, 280B, M281A, M281B, M281C, 415A, 415B, 421A, 421C, 421D, 421F, 433A, 433B, 501.

**Division 3: Higher Education and Work**

Education M148, 180, 181, 192, 209A, 209C, 209D, 214C, 234, 235, 238, 239, 248, 249A, 249B, 259A, 261E, 261F, 262I, 263, 410A-410B, 431A, 431B, 431C, 432, 437B, 461A, 462.

**Division 4: Social Research Methodology**

Education 200B, 200C, 202, 206C, 210A through 210E, 211A, 211B, 211C, 218A

through 218D, 219, 221, M222A, 222B, 222C, 228, 245, 251A, 251C, 251E, 255A-255B-255C, 272, 411A, 411B, 412A, 412B, 460.

**Division 5: Social Sciences and Comparative Education**

Education M108, 200A, M201C, C203, 204A through 204F, C207, 208A, 208C, C244, 252A, 252B, M252C, 253A through 253I, 254, 300.

**Teacher Education**

Education 100A-100B, 112, 264, 309A, 309B, 311, 312, 315A-315B, 316A-316B, 318A-318B, 320A-320B, 330A through 330D, 360, 409A, 409B, 413A-413B, 481, 489, 491A, 492.

**Academic Interinstitutional Programs**

Education 313A-313B, 313C-313D, 314A-314B, 317A, 317B, 317C, 319, 321A through 321D, 322A, 322B, 323, 326, 327, 328, 329, 331, 332.

**Special Studies**

Education 296A-296F, 299A-299B-299C, 310, 375, 498A-498B-498C, 499A-499B-499C, 596, 597, 598, 599.

**Undergraduate Minor in Education Studies**

See description of the minor for requirements.

**Course Requirements**

A minimum of nine upper division and graduate courses (36 units) must be completed in graduate standing although no specific upper division courses are necessary. Six courses (24 units) must be taken in the Education 200 and 500 series; no more than two 500-series courses (eight units) may be applied toward the divisional course minimum and toward the graduate course minimum.

Two research methods courses approved by the faculty adviser must be selected. Additional courses to complete the 36-unit requirement may be selected from offerings in Education and/or other departments with consent of the assigned faculty adviser and consent of division head. Courses must be completed with a grade of C or better and with an overall grade-point average of at least 3.0.

Contact the Office of Student Services regarding faculty member(s) to be consulted with respect to enrollment and research opportunities and/or course sequencing in each division or emphasis field.

**Comprehensive Examination Plan**

The comprehensive examination is concerned with central topics in the selected division and field of emphasis. Questions are comprehensive in nature and are designed to measure the breadth and depth of knowledge, as well as ability to focus that knowledge on specific problems.

The comprehensive examination is offered twice yearly, once in Fall Quarter and once in Spring Quarter.

Students may be passed, passed with honors, or failed on this examination. Students who fail this examination are given a second opportunity to take the examination at the discretion of

the student's adviser and a third opportunity on a two-thirds majority of all divisional faculty voting on this issue. No fourth sitting for the examination is permitted.

Students who fail the comprehensive examination, but who have been allowed to retake it, may do so at any scheduled sitting with consent of the divisional faculty.

**Thesis Plan**

Under this plan, students prepare a thesis which is a report of the results of original investigation. Before beginning work on the thesis, students must obtain approval of the subject and general plan from the Department of Education and the thesis committee chair.

The thesis committee must be formed and a petition for advancement to candidacy for the M.A. must be filed no later than one quarter prior to completion of course requirements for the degree.

The thesis and dissertation adviser and the Graduate Division publication, *Regulations for Thesis and Dissertation Preparation*, provide guidance in the final preparation of the manuscript. The department does not require a formal examination in connection with the thesis plan.

**Master of Education****Admission**

The Master of Education (M.Ed.) degree is a professional degree program designed for individuals preparing for mid-level professional positions in schooling or for advanced professional graduate study. Qualifications for admission to a program of study in education, in addition to the University requirements for admission are (1) scores for quantitative, verbal, and analytical sections of the Graduate Record Examination (GRE) and (2) at least three letters of recommendation documenting qualifications and/or professional experience.

The following requirements are applicable in accordance with selected emphases:

*Administrative and Policy Studies in Education.* Possession of a valid instructional credential is preferred. Applicants with a demonstrated commitment to improving American schooling are sought for admission.

*Bilingual/Cross-Cultural Education.* Completion of an approved program of professional preparation leading to a preliminary instructional credential is required, as is classroom experience (as a teacher or aide) for at least two years, at any level of schooling. Evidence of professional competence and conscientiousness, as well as the necessary second-language proficiency, are also required.

*Curriculum and the Study of Schooling.* Persons with above-average capabilities and interest in curriculum and instruction are sought. Experience as a practitioner in the emphasis field is advantageous.

*Teacher Education.* This is a two-year program leading to qualification for a Multiple or Single Subject Instructional Credential and a Master of Education degree. Individuals with the highest qualifications in all subject areas, particularly mathematics, science, and the humanities, are sought. Experience in working with children is advantageous.

### **Certificate (Credential) Programs**

The California Commission on Teacher Credentialing has authorized the Department of Education to offer professional programs that lead to the (1) Multiple Subject Instructional Credential with the Cross-Cultural Language and Academic Development (CLAD)/Bilingual Cross-Cultural Language and Academic Development (BCLAD) emphasis; (2) Single Subject Instructional Credential with the CLAD/BCLAD emphasis; and (3) Administrative Services Credential. Credential programs 1 and 2 are taken concurrently with the M.Ed. in Teacher Education; credential program 3 is taken with the M.Ed. in administrative program studies in education.

### **Latin American Studies/Education Program**

The Department of Education and the Latin American Studies Program offer an articulated degree program which allows students to combine study for the M.A. in Latin American Studies and the M.Ed., with an emphasis in curriculum. Articulated programs do not allow course credit to be applied toward more than one degree. This program is not offered in 1996-97.

### **Law/Education Program**

See the Admission section under Master of Arts. This program is not offered this year.

### **Areas of Study**

Administrative and policy studies in education; bilingual/cross-cultural education; curriculum and the study of schooling; teacher education.

### **Course Requirements**

A minimum of nine upper division and graduate courses (36 units) must be completed in graduate standing although no specific upper division courses are necessary. At least five courses (20 units) must be in the professional education (400) series. No 500-series courses may be applied toward the degree. Education 597 may be taken on an optional basis. A field experience minimally approximating one course is required for all M.Ed. emphases.

Information regarding specific course requirements in a selected M.Ed. emphasis may be obtained from the Office of Student Services.

### **Comprehensive Examination Plan**

The comprehensive examination for the M.Ed. degree in administrative studies is offered three times per year (Fall, Spring, and Summer Quarters). The M.Ed. examination in curriculum studies is offered in Fall and Spring Quarters. The M.Ed. examination in teacher education is offered only during the summer. The examination consists of

(1) A written examination designed to assess comprehension of professional knowledge basic to the selected field of emphasis, including key concepts and principles, major theoretical positions, and fundamental issues and understanding of the broad educational context in which the selected professional field resides.

(2) A performance component for the M.Ed. in curriculum studies designed to assess competency in the solution of problems in the selected professional field and is a test of whether knowledge can be applied in a real or simulated professional setting.

Information regarding examination foci for any selected M.Ed. emphasis is available from the faculty adviser.

Students may be passed, passed with honors, or failed on this examination. Students who fail this examination are given a second opportunity to take the examination at the discretion of the student's adviser and a third opportunity on a two-thirds majority of all divisional faculty voting on this issue. No fourth sitting for the examination is allowed.

Students who fail the comprehensive examination, but who have been allowed to retake it, may do so at any scheduled sitting with consent of the divisional faculty.

### **Thesis Plan**

None.

## **Doctoral Degrees**

The Department of Education offers the Doctor of Philosophy degree and the Doctor of Education degree.

## **Doctor of Philosophy**

### **Admission**

The Doctor of Philosophy (Ph.D.) degree in Education is a strongly research-oriented academic degree designed for individuals preparing for careers in basic research or college-level instruction. Major foci include theory, research methodology, basic studies, and in-depth knowledge in education and an approved cognate field.

To be admitted to the Ph.D. program, a student must have a bachelor's degree or equivalent. Applicants must also have demonstrated academic excellence and the potential for scholarly research. A student is admitted by a division and must formally apply for a change of division.

Qualifications for admission to a program of study in education, in addition to the University requirements for admission, are (1) scores for quantitative, verbal, and analytical sections of the Graduate Record Examination (GRE) and (2) at least three letters of recommendation documenting qualifications and/or professional experience.

Acceptance into a particular division is dependent on the availability of openings in that division and the applicant's desired emphasis

area; preference is given to applicants with relevant background and experience. Admission to an initial advanced degree program occurs simultaneously with admission to graduate standing and to the Department of Education. No screening examination (other than described above) and no specific coursework are required for admission to a degree program. The Department of Education has an application form which must be completed in addition to the one used by the Graduate Division. Application forms and departmental brochures are available from the Office of Student Services, Graduate School of Education and Information Studies.

### **Joint Ph.D. Program in Special Education**

A joint Ph.D. program in Special Education is offered by UCLA and California State University, Los Angeles. The goals of the joint program are (1) the stimulation and preparation of research workers of high competence in the various fields of special education; (2) improved preparation for potential teachers of exceptional individuals; and (3) improved preparation of personnel for research and in policy formation in the public schools of California. Students seeking information regarding emphases and requirements should consult the joint doctoral adviser at UCLA (1029B Moore Hall) or the chair of the Department of Special Education at CSULA.

### **Law/Education Program**

See the Admission section under Master of Arts.

## **Major Fields or Subdisciplines**

All divisions: administration, curriculum, and teaching; educational psychology; higher education and organizational change; social research methodology; social sciences and comparative education.

## **Course Requirements**

A program of study for a Ph.D. student is determined by the student and the faculty adviser and must conform to division and department requirements. A minimum of 18 courses is required as indicated below. At least 10 of the total courses must be in the 200 series:

(1) A sequential three-quarter research practicum (Education 299A-299B-299C) designed to provide an overview of research in the field of study. Students complete a research paper by the end of the sequence.

(2) Five courses from offerings in the student's selected division.

(3) Three upper division or graduate courses from other academic departments of the University related to the student's proposed area of research (the cognate).

(4) Appropriate research methods courses to enable demonstration of intermediate/advanced level competence in at least one area of research methodology. This requirement is satisfied by completing three methodology courses as specified in the list approved by the

Department of Education; the approved list is available in the Office of Student Services.

The remainder of the courses to complete the required total may be chosen by the student; such courses must be in compliance with the selected division's guidelines and must be approved by the student's faculty adviser. Divisional course requirements may be waived, under exceptional circumstances, by the division on petition by students and their advisers to the division head. Wherever additional academic background is needed, a faculty adviser may require other coursework.

## Written and Oral Qualifying Examinations

*Doctoral Screening Examination.* A written examination is taken after completion of appropriate coursework determined by the division. This examination is concerned with central topics in the selected division and field of emphasis. Questions are comprehensive in nature and are designed to measure the breadth and depth of knowledge, as well as to focus that knowledge on specific problems.

Students taking the doctoral screening examination ordinarily are not allowed to take more than nine courses before taking the examination. This limit is intended to ensure that students demonstrate basic competencies as early as possible in their doctoral training.

All students admitted to a doctoral program without a master's degree are required to take the doctoral screening examination.

In a first sitting for this examination, students may be passed with honors, passed at the master's level (the terminal master's), or failed. Students passed at the master's level are given one further opportunity to pass at the doctoral level; students who fail are given a second opportunity to take the examination at the master's level only.

Students who fail the doctoral screening examination, but who have been allowed to retake the examination, must do so at the next sitting. They can take up to 12 units per quarter until they have successfully completed the examination. Of these 12 units only four may be a doctoral 200- or 400-level course; the remainder must be the 597 course. After satisfying the above requirements, students are eligible to take the following qualifying examinations:

*Doctoral Written Qualifying Examination.* The examination is offered twice yearly, once in Fall Quarter and once in Spring Quarter. The written qualifying examination tests the core knowledge of the division and emphasis the student has selected. The questions on the examination reflect a research and theoretical orientation. Students may be passed, passed with honors, or failed on this examination. Students who fail this examination are given a second opportunity to take the examination at the discretion of the student's adviser and a third opportunity on a two-thirds majority of all divisional faculty voting on this issue. No fourth sitting for the examination is allowed.

Students who fail the doctoral written qualifying examination, but who have been allowed to retake it, may do so at any scheduled sitting with consent of the divisional faculty.

*University Oral Qualifying Examination.* The oral examination is conducted by the student's doctoral committee, which selects topics from both education and the cognate discipline(s) that are related to the student's written research proposal. On a majority vote of the doctoral committee, the University Oral Qualifying Examination may be repeated once.

## Doctor of Education

### Admission

The Doctor of Education (Ed.D.) degree is a professional degree designed to meet the needs of individuals preparing for careers of leadership and applied research in the schools and community educational programs. Major foci include practice, applied studies, and knowledge related to professional skills.

To be admitted into the Ed.D. program, applicants must have a bachelor's degree or equivalent; at least two years of successful professional experience in education or equivalent (may be completed prior to advancement to candidacy for all divisions except the administration, curriculum, and teaching studies division which requires the experience as a prerequisite to admission); and demonstrated evidence of potential for professional leadership. Students are admitted by a division and must formally apply for a change of division.

### Law/Education Program

See the Admission section under Master of Arts.

### Major Fields or Subdisciplines

The Ed.D. is offered for emphases in Divisions 1 through 4. Administration, curriculum, and teaching studies emphases are offered for school administrators, education policy analysts, curriculum developers and directors of curriculum, and teacher educators. Educational psychology emphases are offered for those interested in practical issues related to special education, educational technology, and computer-assisted instruction. Higher education and work emphases focus on administration in relation to corporate or proprietary education and training, community colleges, and continuing education. Social research methodology emphases are applied measurement and evaluation leadership.

### Course Requirements

A program of study for an Ed.D. student is determined by the student and faculty adviser, and must meet division and department requirements. A minimum of 18 courses is required as indicated below:

(1) Three research methods courses, with no more than two introductory (first tier) courses and at least one intermediate/advanced (second tier) course, selected from the departmental list approved for the Ed.D.

(2) Nine education courses, of which at least six must be from the Education 400 series; all courses must be approved by the faculty adviser.

(3) Three supplemental courses selected from offerings in the department (outside the student's field of emphasis) or in another UCLA professional school or department.

(4) A sequential three-quarter field practicum (Education 499A-499B-499C). Divisional course requirements may be waived, under exceptional circumstances, by the division on petition by students and their advisers to the division head. Whenever additional academic background is needed, a faculty adviser may require other coursework.

## Written and Oral Qualifying Examinations

*Doctoral Screening Examination.* A written examination is taken after the completion of appropriate coursework determined by the division. This examination is concerned with central topics in the selected division and field of emphasis. Questions are comprehensive in nature and are designed to measure the breadth and depth of knowledge, as well as to focus that knowledge on specific problems.

Students taking the doctoral screening examination ordinarily are not allowed to take more than nine courses before taking the examination. This limit is intended to ensure that students demonstrate basic competencies as early as possible in their doctoral training.

All students admitted to a doctoral program without a master's degree are required to take the doctoral screening examination.

In a first sitting for this examination, students may be passed, passed with honors, passed at the master's level (the terminal master's), or failed. Students passed at the master's level are given one further opportunity to pass at the doctoral level; students who fail are given a second opportunity to take the examination at the master's level only.

Students who fail the doctoral screening examination, but who have been allowed to retake the examination, must do so at the next sitting. They can take up to 12 units per quarter until they have successfully completed the examination. Of these 12 units, only four may be a doctoral 200- or 400-level course; the remainder must be the 597 course. After satisfying the above requirements, students are eligible to take the following qualifying examinations:

*Doctoral Written Qualifying Examination.* The written qualifying examination is offered twice yearly, once in Fall Quarter and once in Spring Quarter. The examination tests the core knowledge of the division and emphasis the student has selected. The questions on the examination reflect a professional orientation. Students may be passed, passed with honors, or failed on this examination. Students who fail this examination are given a second opportunity to take the examination at the discretion of the

student's adviser and a third opportunity on a two-thirds majority of all divisional faculty voting on this issue. No fourth sitting for the examination is allowed.

Students who fail the doctoral written qualifying examination, but who are allowed to retake it, may do so at any scheduled sitting with consent of the divisional faculty.

**University Oral Qualifying Examination.** The oral examination is conducted by the student's doctoral committee, which selects topics from education that are related to the student's written dissertation proposal. On majority vote of the doctoral committee, the University Oral Qualifying Examination may be repeated once.

## Education

### Lower Division Courses

**91A. Infant Care and Development.** Using scientific methods to answer questions about how to raise children, educational researchers, psychologists, and anthropologists try to replace myths and anecdotes with a verifiable understanding of children's development and problems and choices that parents face in raising children.

**91B. Child Care: Research, Practice, and Policy.** Examination of psychological research on influences of early child care on children's concurrent and subsequent development, with this research linked to basic research in developmental psychology and education. Discussion of influence of research on the policy process.

**91C. Elementary and Secondary Education.** Upper division standing preferred. Social sciences overview of major policy issues in American public education. General introduction to social sciences research in analysis of educational policy issues and to methods for exploring major policy issues. Topics include school finance, equal educational opportunity, testing and evaluation, teacher compensation, and school law.

**91D. The Teaching Profession.** Upper division standing preferred. Introduction to the field of education. Experts within Department of Education and experienced school personnel present a variety of topics in education and provide opportunity to visit diverse educational settings.

**91E. Perspectives of the American College.** Examination of historical conditions that have shaped American higher education and consequent differential characteristics, trends, and practices that bear on dynamics and impacts of contemporary colleges. Emphasis on interrelated research, academic, social, and policy issues underlying the diverse system of American higher education.

### Upper Division Courses

**100A-100B. Social Foundations and Cultural Diversity in American Education (2 units each).** (Formerly numbered 100.) Lecture, one hour; discussion, one hour. Prerequisite: credential program standing:

**100A.** Intensive consideration of American society, particularly its cultural diversity. Topics include historical development of American society, manifestations of cultures, and ways to learn about students' cultures. Examination of issues of racism, ethnic and gender differences, and students' personal attitudes toward people of different cultural, linguistic, and racial backgrounds.

**100B.** Intensive consideration of American society and perspectives of cultural diversity in the U.S. and California, and its impact on education and classroom instruction, with focus on cultural contact, dynamics of prejudice, clashes between values, and strategies for conflict resolution. Use of historical, philosophical, and sociological perspectives.

**M102. The Mexican American and the Schools.** (Same as Chicana and Chicano Studies M102.) Prerequisite: consent of instructor. Review of research and teaching strategies. Analysis of school policies and practices and their effect on development of Mexican American and Chicano youth and communities.

**M108. Sociology of Education.** (Same as Sociology M175.) Prerequisite: Sociology 1. Study of social processes and interaction patterns in educational organizations; relationship of such organizations to aspects of society, social class, and power; social relations within school, college, and university; formal and informal groups, subcultures in educational systems; roles of teachers, students, and administrators. Fieldwork may be required.

**112. Psychological Foundations of Education.** Prerequisite: consent of instructor. Analysis of learning processes in school situations. Processes of human motivation, affective, cognitive, social, and personal development of children and adolescents, evaluation of learning, individual differences, and implications of relevant theory and research for instructional practices.

**125A. Education of Exceptional Individuals.** Prerequisite: Psychology 10 or equivalent. Introduction to the field of special education, with emphasis on psychology of individual differences, learning characteristics of exceptional individuals, and application of research and theory to special education problems.

**125B. Principles for Teaching Exceptional Individuals.** Prerequisite: consent of instructor. Approaches for teaching exceptional individuals in special and regular education programs. Principles and assumptions underlying alternative approaches. Emphasis on individualizing curriculum and classroom management.

**M148. Women in Higher Education.** (Same as Women's Studies M148.) Limited to juniors/seniors. Education and career development of women in higher education. Specifically, emphasis on undergraduate and graduate women; women faculty and administrators; curricula, programs, and counseling services designed to enhance women's educational and career development, affirmative action, and other recent legislation.

**180. Social Psychology of Higher Education.** Overview of significant studies in social psychology of higher education. Focus on institutional characteristics and students' interpersonal and intrapersonal processes, with special emphasis on identifying and explaining effects of college experience on student development and achievement.

**181. Advanced Topics in Social Psychology of Higher Education.** Lecture, three hours; discussion, one hour. Prerequisites: course 180, consent of instructor. Critical analysis of social psychological inquiry into college attendance, preparation, persistence, and outcomes. Examination of intellectual and personal development of individuals vis-à-vis differential college environments and instructional experiences with respect to students' gender, culture, motivation, involvement, and expectations.

**C191A. Philosophy of Education: Ethics and Values.** Study of ethics and value theory in teaching and learning, educational organization and policy, and curriculum design and validation. Concurrently scheduled with course C206D.

**191B. Issues in Education: Historical Perspective.** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Exploration of such controversial issues in American education as access, diversity, parental choice, cultural literacy, teacher empowerment, and role of popular media in historical perspective.

**C191C. Economics of Education.** Introductory course in microeconomic and macroeconomic techniques applied to education. Methodologies illustrated principally in context of current issues in American education. Concurrently scheduled with course C244.

**C191D. Politics of Education.** Political dimensions of education institutions as organizations. Relationships between education institutions and political institutions in society. Political theory as a foundation for public policy analysis; interest groups in education policy formation and implementation. Concurrently scheduled with course C207.

**C191E. Educational Anthropology.** Recommended (but not prerequisite): Anthropology 9. Study of education through research and method of the cultural anthropologist. Interdependence of culture and education, with emphasis on cross-cultural studies of enculturation, schooling, values, cognition, language, and cultural change. Concurrently scheduled with course C203.

**191F. Educational Psychology.** Broad overview of educational psychology, with examination of relationship of teaching and learning; various perspectives as to how children learn; issues of teaching and learning that arise based on child's social class, ethnic background, gender, age, and level of ability.

**192. Theory and Practice of the Teaching and Learning Function.** Lecture, three hours; practicum placement. Prerequisite: consent of instructor. Analysis of learning theory and teaching practice in light of research on student characteristics, learning environments, student/instructor interaction, and outcomes of instruction. Application of theory and research to practice.

**197A-197Z. Current Issues in Education.** Lecture, three to four hours. Prerequisite: upper division standing. Variable topics course organized on selected current issues basis, integrating field observations and readings through seminar discussions. Consult *Schedule of Classes* for topics and instructors:

**197F. Laboratory in Education of Exceptional Children.** Lecture, one hour; laboratory, six to eight hours. Prerequisite: course 125A or consent of instructor. Six to eight hours per week of observation, research, and teaching of children with severe behavioral/emotional disorders and/or mental retardation in UCLA Neuropsychiatric Institute and Hospital School.

**197G. Advanced Laboratory in Education of Exceptional Children.** Lecture, one hour; laboratory, six to eight hours. Prerequisite: course 197F. Six to eight hours per week of research, teaching, and multidisciplinary team participation with children with severe behavioral/emotional disorders and/or mental retardation in UCLA Neuropsychiatric Institute and Hospital School.

**199. Special Studies.** Prerequisites: senior standing, consent of instructor. To be arranged with faculty member who will direct the study.

### Graduate Courses

**200A. Historical Research and Writing.** Methods of historical research and writing for students who are or who will be engaged in research and in report or paper or thesis writing, regardless of their field of interest.

**200B. Survey Research Methods in Education.** Prerequisite: course 210A or equivalent. Problems of conceptualization, organization, and gathering nonexperimental and quasi-experimental quantitative and qualitative data.

**200C. Analysis of Survey Data in Education.** Lecture, three hours; laboratory, two hours. Prerequisite: course 200B. Introduction to techniques of processing and analyzing nonexperimental and quasi-experimental quantitative data.

**M201C. History of American Education.** (Same as History M264.) History of educational thought and of social forces impinging on American education from the 1880s to the present. Analysis of relation between these ideas and forces, and aims and practices of American education today.

**202. Evaluation Theory.** Prevalent evaluation theories, systems for categorizing these theories, and process of theory development in educational evaluation.

**C203. Educational Anthropology.** Recommended (but not prerequisite): Anthropology 9. Study of education through research and method of the cultural anthropologist. Interdependence of culture and education, with emphasis on cross-cultural studies of enculturation, schooling, values, cognition, language, and cultural change. Concurrently scheduled with course C191E.

**204A. Introduction to Education and the Social Sciences.** Prerequisite: consent of division. Interdisciplinary course intended to introduce students to study of educational issues, texts, and movements of thought through social sciences and comparative perspectives.

**204B. Introduction to Comparative Education.** Examination of conceptual and methodological questions underlying comparative education. Particular attention to development of the field and to styles of social analysis which may be applied to comparative and cross-national studies in education.

**204C. Education and National Development.** Prerequisite: graduate standing or consent of instructor. Analysis of various social sciences perspectives and methodologies (including modernization, dependency, Marxist, neo-Marxist, liberation theology, and world-system theories of change and development) and changing notions of role of education in development of less-industrialized countries of the world.

**204D. Minority Education in Cross-Cultural Perspective.** Historical and contemporary analyses of educational policies with regard to ethnic, religious, and linguistic minorities through selected national and international case studies. Introduction to cross-cultural education in representative countries in relation to social, political, and economic systems.

**204E. International Efforts in Education.** Prerequisite: graduate standing or consent of instructor. Critical analysis of complex world of "development cooperation," with particular reference to bilateral and multilateral efforts in education.

**204F. Nonformal Education in Comparative Perspective.** Comparative and international study of organized and systematic educational activity for children, youth, and adults carried on outside of schools. Types of programs include, among others, consciousness raising, community action, skills training, literacy, and extension programs.

**205. Computers in the Educational Process.** Introduction to theory, experimentation, evaluation, and future of computer systems in education, with emphasis on computer-assisted instruction (CAI), and use of computers to teach programming and to foster development of writing, computational, and filing skills.

**206A. Philosophy of Education: Introduction.** Systematic introduction to the field, indicating ways in which philosophy serves to elucidate educational aims, content, methods, and values.

**206C. Introduction to Conceptual Analysis.** Conceptual analysis of recurrent and contemporary themes in the field. Emphasis on development of logical and linguistic skills used in analysis of educational problems and issues.

**C206D. Philosophy of Education: Ethics and Values.** Study of ethics and value theory in teaching and learning, educational organization and policy, and curriculum design and validation. Concurrently scheduled with course C191A.

**C207. Politics of Education.** Prerequisite: one approved research methods course required for master's or doctoral degree. Political dimensions of education institutions as organizations. Relationships between education institutions and political institutions in society. Political theory as a foundation for public policy analysis; interest groups in education policy formation and implementation. Concurrently scheduled with course C191D.

**208A. Perspectives on the Sociology of Education.** Sociological perspectives on current issues in educational policy and practice, including desegregation, decentralization, equality of educational opportunity, structure of educational organization, teacher/student relationships, reform in education at elementary, secondary, postsecondary levels.

**208C. Explanation in the Social Sciences and Educational Research.** Lecture, two hours; discussion, two hours. Prerequisite: graduate standing or consent of instructor. Overview of basic strategies and forms of explanation relevant to inquiry in education from vantage point of various social and behavioral sciences disciplines.

**209A. History of Higher Education.** Examination of development of postsecondary education in the U.S., with attention to social context and to scope and variety of institutions.

**209C. Problems in Research and Evaluation in Higher Education.** Critical review of research and evaluation studies of higher education, with special attention to need for studies of new programs and problems, and to design and methodology of evaluative research.

**209D. System of Higher Education.** Analysis of structure and function of American postsecondary education from systems perspective. Emphasis on structure of system and comparative characteristics (faculties, student bodies, finances, outputs) of different types of institutions.

**211A. Measurement of Educational Achievement and Aptitude.** Prerequisite: course 210A. Critical study of tests of achievement and aptitude, with emphasis on group tests; relation of achievement to aptitude; social implications of measurement of intelligence; elements of validity and reliability.

**211B. Measurement in Education: Underlying Theory.** Prerequisite: course 211A. Measurement theory as applied to testing, focusing primarily on classical test theory; implications of theories for test construction and selection; current status of validity and reliability theory.

**211C. Item Response Theory.** Prerequisites: courses 210C, 211B, or equivalent. Item response theory, applications to educational achievement tests, item bias, test information, test equating, computerized adaptive testing.

**212A. Learning and Education.** Models of learning, modeling, reinforcement, motivation, encoding, memory, transfer, individual differences, and instruction.

**212B. Motivation and Affect in Educative Process.** Prerequisites: courses 210A, 212A. Review of theoretical and empirical literature on motivational factors in school settings and conditions for acquisition of affective outcomes.

**212C. Cognition and Creativity in Education.** Prerequisite: course 212A. Review of theoretical and empirical literature on cognitive processes in school learning, including knowledge acquisition, comprehension, metacognition, and creativity.

**213A. Counseling Psychology in School and Community.** Analysis and in-class application of student personnel service theory and methods, with emphasis on student assessment and development, task groups, and evaluation.

**213B. Legal and Ethical Issues in Counseling Psychology.** Prerequisite: course 213A. Ethical and legal codes relevant to psychological services in schools and community; relation of value systems and personality; case studies in implications of personal values in counseling situations.

**213C. Group Counseling Theory and Process.** Lecture, three hours; discussion, one hour. Prerequisites: courses 213A, 214A, and 214B, or consent of instructor. Group productivity, leadership in groups, social perception, attitude formation, and effect of behavior changes in individuals and groups. Evaluation of social, psychological, and educational principles related to therapeutic experiences of individuals in small groups.

**214A. Counseling Theory and Practice.** Alternatives in counseling practice in relation to theories of personality development and functioning, research on effectiveness of counseling, professional issues in counseling, educational aspects of counseling.

**214B. Advanced Counseling Theory and Practice.** Limited to advanced degree candidates whose major interest is counseling and to selected high school and college counselors. Counseling procedures, educational planning, and methods for helping students handle personal problems that interfere with school progress; critical evaluation of procedures.

**214C. Principles of Career Planning.** Examination of nature of careers across ages and ethnic and sexual groups in order to determine implications for career planning in postindustrial society.

**214D. Career Counseling.** Depth study of current theories, principles, problems, and practices of career counseling.

**214E. Substance Abuse and Addiction.** Theory and practice of prevention and intervention in substance abuse and addiction from perspective of counseling and educational practice.

**214F. Student Problems: Social Context.** Designed to assist students in understanding the configuration of social forces that lead to student dysfunctions. Consideration of a number of contemporary social problems that are of concern to school counselors, educators in general, and behavioral scientists.

**M215. Personality, Motivation, and Attribution.** (Same as Psychology M239.) Current research and theory relating personality variables (e.g., attributional styles, self-esteem) to motivational concerns such as persistence and intensity of behavior. Perceived causes of outcomes in achievement and affiliative domains.

**216. Counseling Models from a Cross-Cultural Perspective.** Prerequisite: course 213A or consent of instructor. Research related to psychological, educational, and sociological characteristics of counseling clients within a cross-cultural perspective and implications for counseling models. Evaluation of counseling practices through analysis of school, community, and mental health settings.

**M217A. Social Development and Education.** (Same as Psychology M242D.) Biological and familial, school, and other influences on the child; development in context of current research and theoretical models; consideration of theoretical and methodological research on family, peer group, and school; application of developmental theory and research to educational practice.

**217B. Cognitive Development and Education.** Prerequisite: graduate standing. Critical review of theories and research in cognitive development, focusing on work of Piaget and Vygotsky, and relation of this work to issues in educational practice.

**M217C. Personality Development and Education.** (Same as Psychology M245.) Review of research and theory of critical content areas in personality development that bear on school performance: achievement motivation, self-concept, aggression, sex differences, empathy, and other social behaviors; review of status of emotional behavior in personality theory and development.

**217D. Language Development and Education.** Research and theory on how children develop their first language; sociolinguistic and psycholinguistic issues in preschool and primary years; bilingual and dialectal issues.

**217F. Human Development and the Educational Process.** Cognitive and social development; cultural, family, peer, and schooling influences on human development; application of developmental theory and research to educational practice.

**M217G-M217H-M217I. Child Abuse and Neglect (2 units, 2 units, 1 unit).** (Same as Community Health Sciences M245A-M245B-M245C, Dentistry M300.5A-M300.5B-M300.5C, Law M281A-M281B, Medicine M290A-M290B, Nursing M290A-M290B-M290C, and Social Welfare M290E-M290F-M290G.) Course M217G is prerequisite to M217H, which is prerequisite to M217I. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies. S/U or letter grading.

**219. Laboratory: Advanced Topics in Research Methodology.** Provides assistance in design of research and interpretation of data to advanced students from other divisions. Coverage of special topics not included in other courses on research methods.

**220A. Inquiry into Schooling: Organization and Change.** Critical analysis of issues in reconstruction of schooling; concepts of function and structure of schooling; organization theory; systems approaches in analysis of organization development and change.

**220B. Inquiry into Schooling: Curricular Problems and Policy Issues.** Inquiry into curriculum of schooling. Critical analysis of relationship of curricular decision making to social system and contextual variables.

**221. Computer Analyses of Empirical Data in Education.** Lecture, two hours; laboratory, two hours. Prerequisites: courses 209C (section 1), 210A, or equivalent. Designed to develop conceptual and technical skills needed for designing and executing empirical research utilizing statistical packages. Each student conducts two original studies. Equal emphasis on techniques of data analysis and interpretation of results.

**M222A. Laboratory for Naturalistic Observations: Developing Skills and Techniques.** (Same as Anthropology M236Q, Psychiatry M235, and Psychology M295.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some uses of observations and their implications for research in social sciences. Students expected to integrate observational work into their current research interests.

**222B. Design Issues in Naturalistic Research.** Lecture, three hours; discussion, one hour. Prerequisite: course M222A or consent of instructor. Issues in conceptualization and design of naturalistic research studies, particularly within educational settings. Specific topics include problem definition and focus, units of observation, sampling, controlled comparisons and meaningful variation, and reliability/validity concerns in observational research. Special attention to ethnographic studies.

**222C. Qualitative Data Reduction and Analysis.** Lecture, two hours; discussion, two hours. Prerequisite: course M222A or 222B or consent of instructor. Theory of and practice in qualitative data reduction and analysis. Discussion of data storage and retrieval systems, data manipulation techniques such as typologies and attribute spaces, and specific analytic perspectives. Interfacing qualitative and quantitative data.

**223. Aesthetics and the Curriculum.** Lecture, two hours; discussion, two hours. Examination of various ideas and theories in aesthetics and application of these in schooling contexts.

**224. Problems and Issues in Bilingual and Multicultural Education.** Introduction to development and implementation of bilingual and multicultural programs in the U.S. Analysis of program goals, models, typologies, and effectiveness.

**225A. Issues in Education of Exceptional Individuals.** Prerequisite: graduate standing. Analysis of major research regarding contemporary trends, issues, and programs for the exceptional; consideration of commonalities and differences among exceptional individuals.

**225B. Advanced Issues in Education of Exceptional Individuals.** Prerequisite: consent of instructor. Synthesis of developmental and educational theory relevant to study of exceptional individuals, including consideration of historical context of current research and applied issues in special education.

**226. Seminar: Special Topics in Writing, Rhetoric, and Educational Methodology.** Special topics seminar on writing in education that could focus on history of writing about education, social and political dimensions of it, its variation by discipline, and its uses in professional and public contexts.

**227A. Research on Learning Characteristics of Exceptional Individuals.** Prerequisite: course 225B. Overview of research and theory regarding learning characteristics of exceptional individuals and discussion of application of this work to educational practice.

**227B. Research on Cognitive and Language Characteristics of Exceptional Individuals.** Prerequisite: course 227A. Review of empirical and theoretical literature regarding language and cognitive development of exceptional individuals; focus on intervention programs developing language and cognition.

**227C. Research on Behavioral and Social Characteristics of Exceptional Individuals.** Prerequisite: course 227B. Analysis of social and emotional development of exceptional individuals and development of social competence in special education programs.

**228. Observation Methods and Longitudinal Studies.** Lecture, two hours; discussion, two hours. Prerequisites: course 210A or equivalent, consent of instructor. Design of observational and longitudinal studies. Formulation of study conclusions concerning influences on children's development. Conduct of observations; processing and analysis of data. Use of portable computers for recording observations.

**229. Special Studies on Educational Policy and Planning.** Research on selected topics in fields of administration, policy, curriculum, and teaching studies and on conceptualization of hypotheses and research programs on division topics and issues.

**230A. Introduction to Research Design and Statistics.** (Formerly numbered 210A.) Designed for graduate students. Key concepts and issues in design and conduct of social sciences research. Introduction to descriptive statistics and fundamentals of statistical inference.

**230B-230C. Linear Statistical Models in Social Science Research.** (Formerly numbered 210C, 218A.) Requisite: course 230A or passing score on screening examination. Integrated and unified approach to applications of linear statistical models in regression, analysis of variance, and experimental and quasi-experimental designs.

**230X. Applied Research Design and Statistics for Social Sciences.** (Formerly numbered 210B.) Requisite: course 230A or passing score on screening examination. Introduction to commonly used statistical methods in social sciences, including regression, analysis of variance, contingency tables. Emphasis on application and interpretation.

**231A. Multivariate Analysis.** (Formerly numbered 210D.) Requisite: courses 230B-230C. Review of multiple regression analysis, analysis of covariance. Introduction to matrix algebra. Introduction to multivariate normal distribution. Multivariate analysis of variance. Linear discriminant function. Analysis of repeated measurements. Canonical correlation. Principal components.

**231B. Factor Analysis.** (Formerly numbered 210E.) Requisites: courses 211B, 231A. Exploratory factor analysis, rotations, confirmatory factor analysis, multiple-group analysis.

**231C. Analysis of Categorical and Other Nonnormal Data.** (Formerly numbered 218D.) Requisites: courses 230B-230C. Regression analysis with dichotomous and polytomous dependent variables, log-linear modeling, coefficients of association for categorical variables, factor analysis, and structural equation modeling.

**231D. Advanced Quantitative Models in Nonexperimental Research: Multilevel Analysis.** (Formerly numbered 218B.) Requisites: courses 230B-230C. Examination of conceptual, substantive, and methodological issues in analyzing multilevel data (i.e., on individuals in organizational settings such as schools, corporations, hospitals, communities); consideration of alternative analytical models.

**231E. Structural Equation Modeling.** (Formerly numbered 218C.) Requisites: courses 231A, 231B. Extends path analysis (causal modeling) by considering models with measurement errors and multiple indicators of latent variables. Confirmatory factor analysis, covariance structure modeling, and multiple-group analysis. Identification, estimation, testing, and model building considerations.

**232. Instructional Analysis.** Prerequisite: consent of instructor. Theoretical and empirical analysis of instructional variables as they relate to diverse types of instructional strategies. Development of skill in techniques of conducting instructional research.

**233A. Professional Writing in Education.** Designed for first- and second-year doctoral students and intended to assist in professional development as writers, with focus on style and organization, scholarly genres, modes of discourse, and broader issues of conceptualization and method.

**233B. Professional Writing in Education.** Designed for students at proposal or dissertation stage, with focus on development, organization, and coherence of these scholarly documents, their conceptualization and method, and issues of audience and style.

**234. Education and Social Stratification.** Relationship between education and components of social stratification, including occupations and earnings. Competing theories used in studying education and social stratification; relevant research. Conclusions regarding individual career decisions, social policies, and theories of society.

**235. Education and Work.** Review of theoretical and empirical literature on issues concerning interface of education and work. Review of alternatives in school-to-work transition of youth and appraisal of present vocational training and manpower development programs.

**236. Human Abilities.** Prerequisite: course 210B or equivalent. Nature, development, and measurement of intellectual abilities and their relations to learning and instruction. Review of research and theory of models of ability and test development.

**238. Cross-National Analysis of Higher Education.** Comparative study of national systems of higher education: their division of work, basic values, structures of authority, modes of national integration, and types of change.

**239. Organization and Governance of Educational Systems.** Academic organizations, precollegiate and postsecondary, are most appropriately studied as complex, professionalized organizations. Emphasis on characteristics of educational institutions and systems as organizations: environmental relations, governance structures, processes, and patterns of decision making and policy-making.

**240. Cultural Foundations of U.S. Education: Policy and Practice.** Prerequisite: graduate standing or consent of instructor. Cultural foundations of persistent and troubling issues and tensions in American educational policy-making and practice.

**241. Research Methodology in School Administration.** Prerequisite: consent of instructor. Examination of research problems and strategies in school administration.

**242. Economic Analysis for Educational Policy and Planning.** Prerequisite: graduate standing. Introductory course focusing on concepts and quantitative methods from economics, statistics, and operations research applied to educational policy and planning issues. Instruction in programming microcomputers for instruction (BASIC) and management information systems (dBASE).

**C244. Economics of Education.** Introductory course in microeconomic and macroeconomic techniques applied to education. Methodologies illustrated principally in context of current issues in American education. Concurrently scheduled with course C191C.

**245. Seminar: Cost-Benefit Analysis in Education.** Conceptual and theoretical underpinnings of cost-benefit analysis, critical analysis of current cost-benefit studies, and procedures for conduct of cost-benefit studies.

**246A. Seminar: Mathematical Modeling in Educational Policy Analysis.** Prerequisite: course 242 or consent of instructor. Stochastic and deterministic modeling techniques as applied to educational policy and planning issues. Mathematics review and instruction in use of MPS (Mathematical Programming System) and development of software for Monte Carlo computer simulation studies in education.

**246B. Seminar: Operations Research — Systems Analysis in Education.** Prerequisite: course 242 or consent of instructor. Application of advanced mathematical modeling techniques of operations research to educational policy and planning. Design of computer-based management information systems in education using dBASE.

**248. Seminar: Perspectives on Lifelong Learning.** From interdisciplinary perspective, lifelong learning is studied theoretically and as an area of educational research, policy, and practice. Conceptual distinctions among major proponents of lifelong learning and implications for schooling.

**249A. Seminar: National Evaluations of Postsecondary Education.** Critical review of national evaluation studies of higher education, including programs of general education and professional and graduate school programs; emphasis on design, methodology, and interpretation of large-scale evaluation studies.

**249B. Seminar: Institutional Research and Program Evaluation.** Critical review of institutional evaluation studies, with consideration of scope of information needed for various purposes and problems of interrelating this information to appraise overall institutional functioning and effectiveness.

**251A. Seminar: Philosophy of Education, Epistemology.** Prerequisite: consent of instructor.

**251C. Seminar: Philosophy of Education, Social Science Problems — Methodological Perspectives.** Prerequisite: course 206C or consent of instructor.

**251D. Seminar: Philosophy of Education, Problems in Ethics and Values.** Prerequisite: course C206D or consent of instructor.

**251E. Seminar: Philosophy of Education, Selected Issues.**

**252A. Seminar: Educational Organizations.** Prerequisite: course 208A or consent of instructor.

**252B. Seminar: Education and Social Change.** Prerequisite: course 208A or consent of instructor.

**M252C. Human Resources and Economic Development.** (Same as Community Health Sciences M236.) Examination, in context of the developing countries, of interactions among economic development, population growth, levels of health and nutritional status, and educational investments.

**253A. Seminar: Current Problems in Comparative Education.**

**253B. Seminar: African Education.** Prerequisite: graduate standing or consent of instructor. Contemporary issues in African educational systems, including questions of access and equity, quality and efficiency, relevance and responsiveness, links between schools and communities, and policy and practice in education.

**253C. Seminar: Asian Education.**

**253D. Seminar: Latin American Education.**

**253E. Seminar: European Education.**

**253F. Seminar: Education in Revolutionary Societies.** Multidisciplinary and comparative study of socialist educational theory examined through writings of Marx, Lenin, Mao, and others. Implementation of this theory in specific case studies, along with comparative assessments of nonsocialist nations.

**253G. Seminar: The Asian American and Education.** Basic issues and topics related to Asian Americans in the field of education. Examples of issues and topics include Asian Americans and the community, socioeconomic status, education-to-work transition, language and culture question.

**253H. Seminar: The Chicano/Hispanic and Education.** Basic issues and topics related to the Chicano and other Hispanic groups in education. Review of literature on specific educational levels and Chicano/Hispanic student progress (e.g., early childhood, elementary, higher education; specific topics: assessment, access, tracking, segregation; implications for schooling).

**253I. Education and Social Change in the Middle East and Islamic World.** Critical and analytic examination of historical and current role of traditional and modern (Western) education in affecting social, political, and economic changes in countries of the Middle East and Islamic world (including Pacific Rim, South and Central Asia).

**254. Seminar: History of Education.** Prerequisite: course M201C. Study of current movements in historiography of education and critical reading of texts in history of education.

**255A-255B-255C. Seminars: Special Topics.** Prerequisite: consent of instructor. May be repeated for credit. **255A.** Measurement; **255B.** Design; **255C.** Data Analysis.

**256A. Seminar: Special Topics in School Learning.** Prerequisite: consent of instructor.

**256B. Seminar: Special Topics in Development.** Prerequisite: consent of instructor.

**257. Seminar: Research in Counseling Psychology.** Prerequisite: consent of instructor. In-depth analysis of selected research approaches/areas in counseling psychology.

**258A. Seminar: Problems in Instructional Research.**

**258B. Seminar: Problems in Instructional Development.**

**259A. Seminar: Research on Characteristics of Students.** Analysis of concepts, methodology, and conclusions or implications underlying and resulting from major research on student characteristics. Emphasis on differential impact of higher education on student and faculty development.

**260. Seminar: Principles of Curriculum and Instruction.**

**261E. Seminar: Education and Work.**

**261F. Seminar: Cognitive and Personal Development of College Students.** Examination of cognitive development of college students; issues of personal and social development, including leadership, and interpersonal relations and skills.

**262A. Seminar: The Social Studies.**

**262B. Seminar: Reading.**

**262F. Seminar: Research Topics in Bilingual/Multicultural Education.** Prerequisite: consent of instructor.

**262I. Seminar: Contemporary Issues in Education and Work.**

**262J. Seminar: Economic Education.**

**263. Seminar: Higher Education.**

**264. Seminar: Teacher Education.** Prerequisite: consent of instructor. Research, issues, and practices in preservice and in-service teacher preparation, evaluation, and certification. Social, philosophical, and methodological issues and current trends in America and abroad. Opportunities to observe, participate in, and discuss teacher education programs.

**267. Seminar: Educational Technology.**

**271A. Proseminar: Educational Psychology (2 units).** Introduction to a variety of research issues in the field of educational psychology, including topics related to human development, learning and instruction, counseling, and special education, and to different methodological approaches used to study them. S/U grading.

**272. Case-Study Research in Education Policy and Practice.** Use of case-study methods in education research, providing opportunities for applying methodological skills to actual case-study research projects. Focus on single and multiple case studies that investigate issues in education policy and practice.

**273A. Structure and Dynamics of Educational System.** Lecture, two hours; discussion, two hours. Overview of school administration, teaching, curriculum, and policy studies. Focus on American education as an institutional system wherein federal, state, and local policy, school administration, curriculum theory and design, and teaching are inextricably connected in the delivery of education.

**275. Race and Education.** Limited to graduate students. Examination of role of race in educational policy-making. Exploration of a broad interpretation of how schools contribute to racial stratification and inequality by linking sociological and sociopsychological theories of race, racial attitudes, and conflict to historical policy analysis.

**280A. Seminar: Selected Topics in Special Education (2 to 6 units).** Prerequisite: consent of instructor. Focus on research and clinical problems in special education. Introduction to a range of clinical services and research strategies. Exploration of current topics in the field.

**280B. Seminar: Exceptional Individuals.** Prerequisite: doctoral standing.

**M281A. Seminar: Human Behavioral Ecology.** (Same as Anthropology M229A and Psychiatry M279A.) Seminar, one hour; discussion, three hours. Prerequisite: consent of instructor. Examination of predictive models from animal behavioral ecology used to study human diet and subsistence; settlement patterns and territoriality; sharing and helping; reproduction and mortality. Comparison with other economic and ecological approaches in anthropology.

**M281B. Seminar: Reproduction, Families, and Parenting.** (Same as Anthropology M229B and Psychiatry M279B.) Prerequisite: consent of instructor. Guided forum for graduate students to discuss and broaden their studies of human reproduction and child rearing from varied viewpoints. Representation and debate of theories, questions, and methods from social and biological sciences.

**M281C. Seminar: Selected Topics in Human Ethology.** (Same as Anthropology M229C and Psychiatry M279C.) Seminar, one hour; discussion, three hours. Prerequisite: consent of instructor. Consideration of appropriateness and contributions of using animal behavior methodology in study of human behavior. Analysis: describing and recording behavior; causation; development, especially longitudinal studies; adaptation; evolutionary origins.

**296A-296F. Seminars: Research Topics in Education (2 units each).** Discussion, three hours. Prerequisite: consent of instructor. Advanced study and analysis of current topics in education. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

**299A-299B-299C. Research Practicum: Education (4 to 8 units each).** May be repeated for credit.

**300. Dissertation Writing Workshop: Interdisciplinary Seminar.** Seminar, one hour; discussion, two hours; laboratory, one hour. Prerequisite: consent of instructor. Limited enrollment. Introduction for doctoral candidates to dissertation writing as a genre that can be analyzed or broken down with its constituent parts and, vice versa, which is constructed out of materials that can be identified and analyzed. S/U grading.

**309A. Methodologies in Teaching Bilingual and English Language Development (3 units).** Lecture, two hours; discussion, one hour. Prerequisite: credential program standing. Pedagogy for bilingual and English development instruction. Topics include legal foundations of bilingual programs, educational issues, organizational approaches, and communicative approach; discussion of instructional strategies and activities.

**309B. Language Development in Content (3 units).** Lecture, two hours; discussion, one hour. Prerequisite: credential program standing. Discussion of competencies needed by all content area teachers of limited English-proficient students, including strategies for teaching in and through English. Designed to assist classroom teachers in developing their knowledge and necessary skills to assure English language learners access to core curriculum.

**310. Professional Communication for Graduate Students in Education (2 units).** Prerequisite: consent of instructor. Writing workshop on students' papers in progress to ensure professional standards. Analysis and group discussion of rhetorical and stylistic principles. May be repeated once. S/U grading.

**311. Principles and Methods of Computer Literacy and Classroom Application — K-12 (2 units).** Lecture, one hour; laboratory, 30 minutes. Prerequisite: consent of department. Introduction to use of computers in educational environment. Discussion of issues on why and how to integrate computers into curriculum and hands-on practice which allows students to demonstrate skills discussed. S/U grading.

**312. Basic Principles of Curriculum and Instruction.** Prerequisite: consent of instructor. Analysis and practice of basic principles and concepts for planning, conducting, and evaluating units of curriculum and instruction. Emphasis on study and utilization of a variety of instructional strategies and their application in elementary and secondary schools.

**313A-313B. Principles and Methods for Teaching Elementary Mathematics (6 to 12 units each).** Prerequisite: consent of instructor. Course 313A is prerequisite to 313B. Problem-solving strategies and geometry for elementary teachers. Use of concrete materials, computers, calculators, cooperative learning, and content for elementary teachers. S/U grading.

**313C-313D. Principles and Methods for Teaching Secondary Mathematics (6 to 12 units each).** Prerequisite: consent of instructor. Course 313C is prerequisite to 313D. Problem-solving strategies in algebra, geometry, and trigonometry for secondary mathematics teachers. Use of concrete materials, computers, calculators, cooperative learning, and content for secondary teachers. S/U grading.

**314A-314B. Principles and Methods for Curriculum, Instruction, and Leadership in Mathematics (6 to 12 units each).** Prerequisite: consent of instructor. Course 314A is prerequisite to 314B. Problem solving, curriculum development, implementation of California Mathematics Framework, strategies for encouraging women and minorities into mathematics, and leadership development. S/U grading.

**315A-315B. Principles and Methods for Teaching Reading for Multiple Subject Instruction (2 units each).** Prerequisite: consent of instructor. Course 315A is prerequisite to 315B. Reading instruction in elementary schools. Analysis of reading problems and programs; study of relationships between language/culture/cognition and reading. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Observation and participation in schools. S/U grading.

**316A-316B. Principles and Methods for Teaching Reading for Single Subject Instruction (2 units each).** Prerequisite: consent of instructor. Course 316A is prerequisite to 316B. Reading instruction in secondary schools. Analysis of reading problems and programs; study of relationships between language/culture/cognition and reading. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Observation and participation in schools. S/U grading.

**317A. Principles and Methods for Teaching Elementary Science — K-2 (6 to 12 units).** Prerequisite: consent of instructor. Conceptual teaching of science and incorporation of science process skills for grades K-2. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading.

**317B. Principles and Methods for Teaching Elementary Science — 3-4 (6 to 12 units).** Prerequisite: consent of instructor. Conceptual teaching of science and incorporation of science process skills for grades 3-4. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading.

**317C. Principles and Methods for Teaching Elementary Science — 5-6 (6 to 12 units).** Prerequisite: consent of instructor. Conceptual teaching of science and incorporation of science process skills for grades 5-6. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading.

**318A-318B-318C. Principles and Methods for Multiple Subject Instruction (2 units each).** (Formerly numbered 318A-318B.) Lecture, two hours; laboratory, one hour. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Focus on subjects commonly taught in elementary schools. S/U grading.

**319. Principles and Methods for Teaching Composition — 1-12 (6 to 12 units).** Prerequisite: consent of instructor. Drawing from current research and theory, participating teachers expand their repertoire of techniques for teaching writing and literature. Focus on drawing on expertise of classroom teachers and becoming teacher-writers in addition to writing teachers. S/U grading.

**320A-320B. Principles and Methods for Single Subject Instruction (2 units each).** Prerequisite: consent of instructor. Course 320A is prerequisite to 320B. Examination and development of instructional programs; analysis and practice of alternative instructional methods. Focus on subjects commonly taught in secondary schools. Observation and participation in schools. S/U grading.

**321A. Principles and Methods for Teaching Physics — 7-12 (6 to 12 units).** Prerequisite: consent of instructor. Conceptual teaching of physics and incorporation of science process skills for grades 7-12. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading.

**321B. Principles and Methods for Teaching Chemistry — 7-12 (6 to 12 units).** Prerequisite: consent of instructor. Conceptual teaching of chemistry and incorporation of science process skills for grades 7-12. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading.

**321C. Principles and Methods for Teaching Earth and Space Sciences — 7-12 (6 to 12 units).** Prerequisite: consent of instructor. Conceptual teaching of Earth and space sciences and incorporation of science process skills for grades 7-12. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading.

**321D. Principles and Methods for Teaching Life Sciences — 7-12 (6 to 12 units).** Prerequisite: consent of instructor. Conceptual teaching of life sciences and incorporation of science process skills for grades 7-12. Demonstrations, hands-on experiences, and development of teaching materials. S/U grading.

**322A. Principles and Methods for Using Computers in Science Instruction — K-12 (6 to 12 units).** Prerequisites: courses 317A, 317B, and 317C, or 321A, 321B, 321C, and 321D, consent of instructor. Use of computers and current proven computer software to teach science content and process conceptually at all grade levels. Development of teaching units. S/U grading.

**322B. Principles and Methods for Peer Leaders in Science Classrooms — K-12 (6 to 12 units).** Prerequisites: courses 317A, 317B, and 317C, or 321A, 321B, 321C, and 321D, consent of instructor. Develops qualities in teachers necessary for leadership positions in science education at all grade levels. Exploration of leadership roles; leadership behavior practice. S/U grading.

**323. Teacher-Researcher: Principles of Classroom Research (6 to 12 units).** Prerequisite: consent of instructor. Guidance of teachers conducting research in their language arts classroom, K through community college, with emphasis on naturalistic research techniques, research relevant to proposed studies, research conducted by other teacher-researchers, publication of findings. S/U grading.

**326. Principles and Methods for Teaching English/Language Arts — K-12 (6 to 12 units).** Prerequisite: consent of instructor. Emphasis on teaching a literature-based language arts program incorporating process skills, modeling, hands-on experiences, and development of teaching and teacher-training materials. S/U grading.

**327. Principles and Methods for Teaching Spanish Effectively (6 to 12 units).** Prerequisite: consent of instructor. Emphasis on proficiency-based foreign language teaching methods incorporating language assessment skills, modeling, hands-on experiences, and development of teaching and teacher-training materials. S/U grading.

**328. Principles and Methods for Integrating Content and Language Instruction (6 to 12 units).** Prerequisite: consent of instructor. Theoretical rationale for integrating language teaching and content instruction for ESL students at intermediate or advanced level in English. Various Sheltered English techniques described, modeled, and used in hands-on workshops involving peer and expert coaching. S/U grading.

**329. Integrating the Elementary School Curriculum — K-6 (6 to 12 units).** Prerequisite: consent of instructor. Open to credentialed teachers. Interdisciplinary strategies emphasizing reading and writing in the content areas, relating science and mathematics, and promoting enrichment follow-up activities in other disciplines such as social studies and art. S/U grading.

**330A. Observation and Participation (2 to 6 units).** Site-based fieldwork, 10 to 15 hours. Students are assigned to school sites with racially, culturally, and linguistically diverse student populations. Throughout observation and participation period, students analyze effective strategies for achieving learning for all students, including sociocultural approaches and appropriate use of educational technology. S/U grading.

**330B-330C. Student Teaching (6 units each).** (Not the same as courses 330B, 330C prior to Fall Quarter 1996.) Site-based fieldwork, 10 to 15 hours. Students are assigned to student teach in school sites with racially, culturally, and linguistically diverse student populations. Throughout student teaching period, students as novice teachers plan, implement, and assess daily lessons and units, as well as actively engage in reflecting on issues specific to school/community relations. S/U grading.

**330D. Classroom Residency and Teaching (8 units).** Site-based fieldwork, 10 to 15 hours. Students are employed by local school districts to teach as residents in school sites with racially, culturally, and linguistically diverse student populations. Students also work in collaborative teams through the Teacher Education Program to initiate a change project in their local school and/or complete a case study on the project. S/U grading.

**331. History and Geography Themes in U.S. History and World History Courses (6 to 12 units).** Prerequisite: consent of instructor. Emphasis on new curricular reform elements written into the 1987 California Framework. Lectures, seminars, and demonstrations on fundamental issues in history, with examples derived from the History/Social Science Framework. S/U grading.

**332. The Immigrant Experience (6 to 12 units).** Prerequisite: consent of instructor. Readings, films, interviews, and field trips to foster understanding of composition, origins, landscape expression, and ambitions of Los Angeles' new populations, since this city is the destination of many immigrant groups entering the U.S. S/U grading.

**360A-360B-360C. Team Seminars (6 units each).** (Formerly numbered 360.) Seminar, four hours; laboratory, two hours. Analysis and practice of basic principles and concepts of planning, conducting, and evaluating units of curriculum and instruction. Emphasis on study and utilization of constructivist strategies and their application in elementary and secondary schools. Examination of different methods of computer literacy and teaching subject matter. Students conduct ethnographic inquiry of the local community of their demonstration school. S/U grading.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**400. Foundations of Education Policy Analysis.** Prerequisite: consent of instructor. Principles of decision making and policy formation, implementation, and analysis in context of the educational system. Critical perspectives include effectiveness and equity of educational delivery systems and programs, and complex nature of educational governance in contemporary America.

**401. Structure and Functions of Schools as Complex Organizations.** Prerequisite: consent of instructor. Critical analysis of alternative assumptions about organizations, how they function, and why people in organizations behave as they do. Application to special circumstances of schools and to contemporary issues and problems in school leadership, improvement, and reform.

**402. Curriculum Principles and Practices.** Prerequisite: consent of instructor. Critical analysis of major concepts, underlying assumptions, policy issues, and processes in development and implementation of curriculum in the educational setting. Problems in formulation of purposes, selection of learning experiences, organization of curriculum, and curriculum evaluation.

**403. Teaching: Principles and Problems.** Prerequisite: consent of instructor. Current knowledge concerning good teaching and theoretical/conceptual, empirical, and/or ideological bases for these assertions. Alternative models of classroom teaching, their assumptions, and evidence of worth. Current policy issues and problems in generating and sustaining effective teaching.

**409A. Language Structure, Acquisition, and Development (3 units).** Lecture, two hours; discussion, one hour; ethnographic study. Prerequisite: credential program standing. Theoretical foundations of language structure and first and second language acquisition, with focus on major themes of current research that provide a framework for schooling of limited English-proficient students.

**409B. Language Structure and Acquisition (3 units).** Lecture, two hours; discussion, one hour; ethnographic study. Prerequisite: credential program standing. Rationale for bilingual/English language acquisition and development programs. Topics include historical and current theories and models of language programs that have implications for second language development and pedagogy. Consideration of psychological factors affecting first and second language development.

**410A-410B. Fundamental Issues in Higher Education, Work, and Adult Development.** Course 410A is prerequisite to 410B. Two-course sequence designed to orient new students to issues, ideas, and literature that constitute the division. Emphasis on underlying social and political issues that shape higher education, work, and adult development.

**410C. Perspectives on Higher Education.** Lecture, two hours; discussion, two hours. Overview of various social sciences theories used to analyze institutions and issues of contemporary higher education. Explanation of how theory and methodology affect research design and framing of research questions in studies of higher education. S/U or letter grading.

**411A. Introduction to Educational Evaluation.** Introduction to systematic evaluation as it applies to appraising educational programs. Consideration of program evaluation as means of improving quality of educationally relevant decisions.

**411B. Procedural Problems in Evaluation.** Assessment methodologies appropriate for evaluation problems. Writing evaluation proposals, developing program monitoring procedures, selecting appropriate evaluation design strategies, coping with ethical considerations in evaluation, framing the decision context, and reporting evaluation results.

**412A. Criterion-Referenced and Norm-Referenced Test Construction.** Prerequisite: course 211A. Construction of criterion- and norm-referenced assessment instruments. Appropriateness of different assessment devices considered in relation to research, development, and evaluation.

**412B. Intersecting Dimensions of Teaching and Testing.** Prerequisite: consent of instructor. Designed to develop acquisition of insights and skills based on symbiotic relationship between assessment and instruction when high-stakes educational achievement tests are used.

**413A. Methodology for Primary Language Instruction (3 units).** Lecture, two hours; discussion, one hour. Offered and required for Spanish and Korean BCLAD credential. Consideration of models for developing cultural and language skills of home speakers of language of emphasis; practice in use of activities to develop student ability to use language for real-world and academic purposes in culturally appropriate ways. Consideration of models for teaching academic content in primary language for delivery of core curriculum to bilingual students.

**413B. Culture of Emphasis (3 units).** Lecture, two hours; discussion, one hour. Offered and required for Spanish and Korean BCLAD credential. Conducted in Spanish and Korean. Discussion of commonalities of culture of emphasis in its home country or countries; major historical periods and events; values, belief systems, and expectations; migration and immigration; historical and contemporary demography.

**415A. Assessment in Counseling Psychology.** Prerequisites: courses 210A, 211A. Overview of rationale for and procedures used by counseling psychologists for assessing individuals in a multicultural society. Emphasis on standardized cognitive assessment instruments and specialized techniques for diagnosis, evaluation, and development of counseling strategies for at-risk populations.

**415B. Advanced Assessment in Counseling Psychology.** Prerequisites: course 415A, consent of instructor. Advanced course in assessment for counseling psychologists. Survey and demonstration of instruments of achievement, affective, and personality appraisal, with emphasis on testing and interplay between assessment and psychological functioning for reducing risks of failure in academic, personal, and social areas.

**420A. Principles of Curriculum.** Critical examination of basic concepts underlying determination of objectives, selection and organization of learning experiences, and evaluation process.

**421A. Programs and Research in Early Childhood Education.** Prerequisite: one course from development series. Examination of child care programs and research in early childhood education, including review of relation of research in developmental psychology and education to goals of early childhood education and day care.

**421C. Research and Evaluation of Early Childhood Programs.** Prerequisite: course 421A or equivalent or consent of instructor. Critical review of evaluation models (e.g., summative, formative, implementation) and their utility for improving and evaluating quality of child-related programs.

**421D. Parents and Community Agents in Child Development.** Prerequisite: one course from development series. Critical review of theoretical basis and effectiveness of training programs for parents of young and elementary school-aged children; relation of preschool parent programs to family development and role of programs in the community.

**421F. Issues in Application of Child Development and Educational Research to Social Policy.** Relationships among policymakers and social scientists in development, implementation, and evaluation of policies affecting children and their families. Students learn to design and conduct interviews, analyze legislative documents, and present analyses to policymakers.

**422. Inquiry into Schooling: Basic Issues.** Critical examination of basic issues and problems in organization and reconstruction of precollegiate schooling. Consideration of historical development and changing functions of schooling in American society; school organization; schooling alternatives; problems in management of educational change.

**423. The Humanistic Curriculum.** Consideration of philosophical and cultural foundations of humanistic curricular strategies. Review of techniques and procedures of affective education with a view to their place in overall theory of teaching and learning.

**424A. Social Studies in the Curriculum.** Advanced study in social studies curriculum development; problems in defining objectives and organizing single and multidisciplinary programs; critical review of literature on cognitive and affective learning in social science, with emphasis on experimental study of instructional programs.

**424B. Reading in the Curriculum.** Prerequisite: course 210A. Study of reading curricula and instructional procedures, with emphasis on rationale and research underlying their development and research comparing their effectiveness.

**424C. Language in the Curriculum.** Advanced study in school language curriculum; application to improvement of curriculum in the field.

**424G. Curriculum Design for Bilingual Education.** Prerequisite: consent of instructor. Advanced study of curriculum design for bilingual educational programs. Philosophical basis for bilingual programs; theories of learning and instruction applied to bilingual learner; language assessment; development of instructional component; program evaluation.

**431A. Administration in Higher Education.** Overview of college and university administration and introduction to policy research and analysis in postsecondary institutions. Case studies of administrative problems, policies, and practices. Management information systems, resource allocation, and issues related to responsibility, authority, and participation in administrative decisions.

**431B. Curriculum and Instruction in Higher Education.** Principles of curriculum and instruction in postsecondary programs. Theory and practices in goal setting, testing, media selection, and related instructional responsibilities. Preparing to teach college-level students.

**431C. Innovative Forms and Practices in Higher and Continuing Education.** New institutional forms (e.g., external degree programs and other nontraditional approaches to higher education, neighborhood learning centers, and peoples' colleges). Methodological innovations such as computer-assisted instruction, credit by examination, and independent study.

**432. Seminar: Professional Topics in Higher Education.**

**433A. Instructional Product Development.** Prerequisite: consent of instructor. Examination of procedures employed in systematic development of instructional products. Students acquire competencies associated with those procedures.

**433B. Technological Development in Educational Media.** Prerequisite: course 433A. Theory, current problems, and anticipated trends in instrumentation and systems development for instructional applications and research, including computer-aided instruction, communication satellites, and other advanced systems; theory and laboratory practice with instrumentation in educational research.

**437A. Principles of Curriculum in Economic Education.** Theories, principles, and concepts related to understanding the business and economic system; their application to teaching in secondary school.

**437B. Corporate Educational Programs.** History and scope of corporate training programs; current educational problems in training programs within industry as they are affected by automation and technological change.

**440C. Administration of the Instructional Program.** Examination of current educational problems in society and strategies of their solution through curriculum policy and practice; instructional design and operation; in-service training of teaching staffs.

**441A. Instructional Supervision A.** Analysis of teaching in light of research-substantiated elements of instruction: task analysis, appropriate objectives, principles that increase motivation, rate and degree of learning, retention and transfer, monitoring and adjusting instruction to meet needs and capacities of learners.

**441B. Instructional Supervision B.** Prerequisite: course 441A or equivalent. Basic techniques of script-taping instructional episodes, planning teacher conferences through analysis of script-tapes, conducting and analyzing growth-evoking teacher conferences. Conducting mini-lessons to demonstrate elements of good instruction.

**442B. Legal Aspects of Educational Management and Practice.** Examination of structures and kinds of law governing educational systems in the U.S.; constitutional dimensions of church/state relations; employees' civil rights and legal aspects of hiring, firing, and negotiating procedures; student attendance, control, and civil rights.

**443. Policy Analysis in Education.** Prerequisite: consent of instructor. Overview of political, economic, and legal context of educational policy formation. Included in examination are issues that impact on minorities (e.g., bilingual education, desegregation, affirmative action, role of subdominants in policy-making process).

**444A. Legal Aspects of Access to Public Education.** Prerequisite: course 442B or consent of instructor. Study of access to public education focused on issues of affirmative action, testing, tracking, bilingual/bicultural education, special education, correctional education, and malpractice suits.

**444B. Equality of Educational Opportunity through Desegregation and Finance Case Law.** Prerequisite: course 442B or consent of instructor. Concentrated review of definition of equality of educational opportunity as it is being developed by the courts in cases concerning desegregation and educational finance.

**447. Seminar: Educational Policy and Planning, Special Studies (1 to 4 units).** Prerequisite: consent of instructor.

**448A. Urban School Leadership.** Prerequisite: consent of instructor. Analysis of problems of urban school leadership. Emphasis on changing nature of the urban principalship, with considerable attention to role of other school and community agencies that interact with the urban school leader.

**448B. Urban Leadership Laboratory.** Prerequisite: consent of instructor. Analysis of and opportunity to practice human and technical skills requisite for success as an urban school leader. Topics include negotiations, conflict resolution, applied computer technology, and effective communication. Activities include gaming, simulation, computer programming, and group dynamics.

**460. Seminar: Special Issues in Evaluation.** Topics and instructors vary each term. Recent emphases included evaluation utilization and cost-effectiveness evaluation.

**461A. Seminar: Adult and Continuing Education.** Broad-ranging review of theory and practice in the field, with particular attention to college and university continuing education, but also to programs provided by industry, the professions, public schools, and other institutions.

**462. Seminar: Community College.** Topics include problems and practices in community college formation, instruction, student flow, administration, and/or evaluation.

**470A. Seminar: Large Systems and Individual Schools.** Prerequisite: consent of instructor.

**470B. Seminar: Educational Government.** Prerequisite: consent of instructor.

**481. Knowledge and Inquiry in the Classroom.** Prerequisite: consent of instructor. Logical features of instruction and their application to inquiry techniques in teaching and learning. Various conceptions of truth, belief, and fact and opinion, and their application to classroom learning situations.

**489. Instructional Strategies in Education.** Prerequisite: consent of instructor. Methods for academic instruction, including research and active participation in the adversary approach, forms of debate, role playing, interaction process analysis, and feedback instruments. Practical emphasis on social sciences and humanities instruction, K-12.

**490A. Instructional Decision Making.** Prerequisite: consent of instructor. Analysis of instructional models relevant to public school education. Assumptions, procedures, and constraints of each strategy considered in terms of learner and task variables. Laboratory experiences in classroom settings permit students systematically to apply and evaluate alternative instructional strategies.

**491A. Curricular Decision Making.** Prerequisite: consent of instructor. Examination of alternative solutions for practical problems that classroom teachers face in making curricular decisions. Analysis of the influence of psychological, societal, and institutional factors in curricular decisions.

**492. Evaluation of Teaching and Learning.** Prerequisite: consent of instructor. Relationship between appraisal instruments and information required for making decisions about teachers, pupils, and materials. Recent developments in evaluation of teaching and learning; use of modern appraisal techniques in classroom settings.

**498A-498B-498C. Directed Field Experience (4 to 8 units each).** May be repeated for credit.

**499A-499B-499C. Advanced Directed Field Experience (4 to 8 units each).** May be repeated for credit.

**501. Cooperative Program in Special Education (2 to 8 units).** Prerequisite: consent of UCLA academic adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Limited to UCLA doctoral students in special education. Used to record enrollment in practicum courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Independent Study (6 to 12 units).** Individual study or research for graduate students. May be repeated for credit.

**597. Preparation for Master's Comprehensive Examinations or Doctoral Qualifying Examinations (6 to 12 units).** Individual study for master's comprehensive examinations or for Ph.D. or Ed.D. qualifying examinations. May be repeated for credit. S/U grading.

**598. Thesis Research (6 to 12 units).** Research for and preparation of master's thesis. May be taken for a maximum of 12 units. S/U grading.

**599. Dissertation Research (6 to 12 units).** Research for and preparation of doctoral dissertation. May be repeated for credit. S/U grading.

# ELECTRICAL ENGINEERING

*School of Engineering and Applied  
Sciences*

UCLA  
58-121 Engineering IV  
Box 951594  
Los Angeles, CA 90095-1594  
(310) 825-2647  
<http://www.ee.ucla.edu/>

William J. Kaiser, Ph.D., *Chair*  
Nhan Levan, Ph.D., *Vice Chair*  
Oscar M. Stafstudd, Ph.D., *Vice Chair*  
John D. Villasenor, Ph.D., *Vice Chair*

## Professors

Asad A. Abidi, Ph.D.  
Nicolao G. Alexopoulos, Ph.D.  
A.V. Balakrishnan, Ph.D.  
Frank M.C. Chang, Ph.D.  
Harold R. Fetterman, Ph.D.  
Tatsuo Itoh, Ph.D. (*TRW Professor of Electrical Engineering*)  
Stephen E. Jacobsen, Ph.D., *Associate Dean*  
Chandrashekar J. Joshi, Ph.D.  
William J. Kaiser, Ph.D.  
Nhan Levan, Ph.D.  
Jia-Ming Liu, Ph.D.  
Dee-Son Pan, Ph.D.  
C. Kumar N. Patel, Ph.D.  
Yahya Rahmat-Samii, Ph.D.  
Izhak Rubin, Ph.D.  
Henry Samuelli, Ph.D.  
Oscar M. Stafstudd, Ph.D.  
Chand R. Viswanathan, Ph.D.  
Kang L. Wang, Ph.D.  
Paul K.C. Wang, Ph.D.  
Alan N. Willson, Jr., Ph.D., *Associate Dean*  
Jason C.S. Woo, Ph.D.  
Ming-C. Wu, Ph.D.  
Eli Yablonoitch, Ph.D.  
Kung Yao, Ph.D.

## Professors Emeriti

Frederick G. Allen, Ph.D.  
Francis F. Chen, Ph.D.  
Robert S. Elliott, Ph.D.  
Ellis F. King, M.S.  
Richard E. Mortensen, Ph.D.  
H.J. Orchard, M.Sc.  
Frederick W. Schott, Ph.D.  
Gabor C. Temes, Ph.D.  
Donald M. Wiberg, Ph.D.  
Jack Willis, B.Sc.

## Associate Professors

Abeer A.H. Alwan, Ph.D.  
Nicholas Bambos, Ph.D.  
Rajeev Jain, Ph.D.  
Bahram Jalali, Ph.D.  
Ioannis Kanellakopoulos, Ph.D.  
Helen R.L. Na, Ph.D.  
Gregory J. Pottie, Ph.D.  
Behzad Razavi, Ph.D.  
Vwani P. Roychowdhury, Ph.D.  
Ali H. Sayed, Ph.D.  
John D. Villasenor, Ph.D.

## Assistant Professors

Babak Daneshrad, Ph.D.  
William H. Mangione-Smith, Ph.D.  
Mani B. Srivastava, Ph.D.  
Lieven Vandenberghe  
Richard D. Wesel, Ph.D.

## Adjunct Professors

Donald Arnush, Ph.D.  
Klaas Bult, Ph.D.  
Uzi Efron, Ph.D.  
Eric R. Fossum, Ph.D.

Giorgio Franceschetti, Ph.D.  
Neville C. Luhmann, Jr., Ph.D.  
Joel Schulman, Ph.D.  
Pyotr Y. Ufimtsev, Ph.D.

#### Adjunct Associate Professors

Kenneth W. Iliff, Ph.D.  
Brian H. Kolner, Ph.D.  
Warren B. Mori, Ph.D.

## Scope and Objectives

The Electrical Engineering Department emphasizes teaching and research in the fields of integrated circuits and systems, communications and telecommunications, signal processing, solid-state electronics, quantum electronics, electromagnetics, microwave and millimeter wave electronics, control systems, operations research, and applied plasma physics and fusion engineering. In each of these fields, the department has state-of-the-art research programs exploring exciting new concepts and developments. Undergraduate students receive a B.S. degree in Electrical Engineering. Graduate research and training programs leading to the M.S. and Ph.D. degrees are also offered.

Laboratories are available for research in the following areas: analog and digital electronics, hybrid integrated circuits, integrated semiconductor devices, microwave and millimeter wave electronics, solid-state electronics, fiber optics, lasers and quantum electronics, and applied plasma physics. The department is associated with the Center for High-Frequency Electronics and the Institute of Plasma and Fusion Research, two research centers at UCLA.

## Undergraduate Study

### Bachelor of Science Degree

The ABET-accredited electrical engineering curriculum gives an excellent background for either graduate study or employment. The two main objectives are to provide (1) a deep and fundamental education in electrical engineering as well as in basic sciences and mathematics and (2) specialized education in one branch of electrical engineering so that students develop expertise in it.

#### The Major

Course requirements are as follows (186 minimum units required):

(1) Five core courses: Electrical Engineering 101, 102, 103, and two courses from Civil and Environmental Engineering 108, Materials Science and Engineering 14, Mechanical and Aerospace Engineering 102, 103, M105A (or Chemical Engineering M105A), 105D.

(2) Electrical Engineering 10, 110, 115A, 121A, 121B, 132A, 141, 161, Computer Science 51A, Mathematics 132; four courses selected from the laboratory courses offered by the Electrical Engineering Department, Computer Science 152A, 152B and, by petition only, Electrical Engineering 199; Mechanical and Aerospace Engineering 192A and either Electrical Engineering 131A or a course in statistical mechanics.

(3) Any five major field elective courses selected from those offered by the Electrical Engineering Department. With approval of the adviser, two may be selected from courses related to electrical engineering in other departments.

(4) Chemistry and Biochemistry 20A, 20B, 20L; Electrical Engineering 5C; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL.

(5) SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details. Electrical engineering majors are also required to satisfy the ethics and professionalism requirement by completing Engineering 95 or History 2A, which may be applied toward either the humanities or social sciences section of the GE requirements.

### Computer Engineering Option

Course requirements are as follows (185 minimum units required):

(1) Five core courses: Electrical Engineering 101, 102, 103, and two courses from Civil and Environmental Engineering 108, Materials Science and Engineering 14, Mechanical and Aerospace Engineering 102, 103, M105A (or Chemical Engineering M105A), 105D.

(2) Computer Science 51A, 111, 151B, 152A, 152B, Electrical Engineering 10, 110, 113, 113L, 115A, 115C, 131A, 132A (or Computer Science 118), and two electrical engineering/computer science electives to be approved by the associate dean.

(3) Four major field elective courses (16 units) selected from Computer Science 118, Electrical Engineering 115B, 115D, 116, 118, 121A, 121B, 132B, 141.

(4) Chemistry and Biochemistry 20A; Computer Science 31, 32, 33; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL.

(5) SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details. Electrical engineering majors are also required to satisfy the ethics and professionalism requirement by completing Engineering 95 or History 2A, which may be applied toward either the humanities or social sciences section of the GE requirements.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage, <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

In addition to meeting the requirements of the Graduate Division, applicants to the Master of

Science program in Electrical Engineering are required to take the General Test of the Graduate Record Examination (GRE).

For requirements for the Graduate Certificate of Specialization, consult *Program Requirements for UCLA Graduate Degrees*.

Application forms, including a departmental supplement to the application, may be obtained by writing to 56-125B Engineering IV, Box 951594, Los Angeles, CA 90095-2647 or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601.

## Areas of Study

### Communications and Telecommunications

Communication and telecommunication principles and engineering applications; channel and source coding; spread spectrum communication; cryptography; estimation and detection; algorithms and processing in communication and radar; satellite communication systems; stochastic modeling in telecommunication engineering; mobile radio engineering; telecommunication switching, queuing system, communication networks, local-area, metropolitan-area, and wide-area computer communication networks.

### Control Systems

State-space theory of linear systems, optimal control of deterministic linear and nonlinear systems, stochastic control, Kalman filtering, stability theory of linear and nonlinear feedback control systems, and computer-aided design of control systems.

### Electromagnetics

Electromagnetic theory; propagation and scattering; antenna theory measurement and design; microwave and millimeter wave sources; integrated microwave and millimeter wave circuits; printed circuit antennas; integrated and fiber optics; holography; electromechanics.

### Integrated Circuits and Systems

Analysis and design of analog and digital integrated circuits; architecture and layout of large-scale integrated processors; high-speed analog and digital integrated circuit design; implementations of signal processing algorithms; device and circuit intersections; computer aids for VLSI design and synthesis.

### Operations Research

Continuous and combinatorial optimization theory, including linear and nonlinear programming, network flows, graphs, and integer programming, and applications to problems of engineering design; applied stochastic processes, including renewal theory, Markov processes, fluctuation theory, stochastic dynamic programming, and applications to telecommunication and computer networks.

### Photonics and Optoelectronics

Laser principles including saturation, power, pulse evolution in amplifiers and oscillators,

resonator modes, beam propagation, coherence phenomena, specific laser systems, and typical applications, and optical logic circuits.

Optoelectronic principles including electro-optics, magneto-optics, acousto-optics, nonlinear optics, opto-optics, modulation, deflection, detection, holography, Brillouin scattering and Raman scattering.

#### Plasma Electronics

Fundamental plasma waves and instability; interaction of microwaves and laser radiation with plasmas; plasma diagnostics; controlled nuclear fusion.

#### Signal Processing

Digital signal processing theory; analysis and design of digital filters; digital speech processing; digital image processing; multirate digital signal processing; adaptive filtering; neural networks; communications signal processing.

#### Solid-State Electronics

The degree may be taken in either of the two special areas: solid-state physical electronics or semiconductor device physics and design.

### Course Requirements

At least nine courses are required, of which at least five must be graduate courses. In the thesis plan, seven of the nine must be formal courses, including at least four from the 200 series. The remaining two may be 598 courses involving work on the thesis. In the comprehensive examination plan, no units of 500-series courses may be applied toward the minimum course requirement. A majority of the courses must be in or related to electrical engineering and belong to one of the following specialized major fields described below.

Note: The following undergraduate courses are required for the B.S. degree in Electrical Engineering and cannot be used for any master's degree: Electrical Engineering 10, 110, 115A, 121A, 121B, 132A, 141, 161.

*Undergraduate Courses.* No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199; Civil Engineering 106A, 108, 199; Computer Science 152A, 152B, 171L, 199; Electrical Engineering 100, 101, 102, 103, 199; Materials Science and Engineering 110, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L, 199; Mechanical and Aerospace Engineering 102, 103, M105A, 105D, 199.

#### Communications and Telecommunications

*Prerequisite.* B.S. degree in Engineering or equivalent.

*Minimum Course Requirements.* Nine four-unit courses, of which at least six must be graduate courses.

*Thesis Plan.* Electrical Engineering 230A, 232A; two additional 200-level electrical engineering courses in the communications and telecommunications engineering area; three or more courses, of which at least two are 200-

level electrical engineering courses, subject to the approval of the student's adviser. Eight units (two courses) of Electrical Engineering 598 must be taken to cover the research work and preparation of the thesis. Both 598 courses count toward the minimum of nine courses.

*Comprehensive Examination Plan.* Electrical Engineering 230A, 232A; two additional 200-level courses in the communications and telecommunications engineering area; five or more courses of which at least two are 200-level electrical engineering courses, subject to the approval of the student's adviser.

#### Control Systems

*Prerequisite.* A bachelor's degree in electrical engineering or equivalent.

*Thesis Plan.* Seven graduate-level courses, of which at least five must be chosen from the list of courses covering the control systems fundamentals, and a thesis. The remaining courses are subject to the approval of the student's adviser. In addition, eight units (two courses) of Electrical Engineering 598 must be taken to cover the research work and thesis preparation.

*Comprehensive Examination Plan.* Nine courses, of which seven must be graduate level, and at least five must be chosen from the following list of courses covering the control systems fundamentals. The remaining courses are subject to the approval of the student's adviser.

Basic graduate courses in control systems: Electrical Engineering 240A, 240B, 240C, 241A, 241B, 241C, 242.

#### Electromagnetics

*Prerequisite.* B.S. degree in Electrical Engineering or equivalent.

*Thesis Plan.* Eight units (two courses) of Electrical Engineering 598 must be offered to cover the research work and preparation of the thesis. Both 598 courses count toward the minimum of nine courses, but only one can count toward the requirement of five graduate-level courses. A minimum of four graduate-level courses is to be selected from the Group II list.

The remaining courses may, subject to the approval of the student's adviser, be chosen as free electives from the 100 or 200 series in order to meet the overall requirements given above.

*Comprehensive Examination Plan.* At least seven courses must be chosen from those listed below in Groups I and II, and at least four of these seven courses must be chosen from Group II.

The remaining two courses may, subject to the approval of the student's adviser, be chosen as free electives from the 100 or 200 series in order to meet the overall requirements given above.

Group I: Electrical Engineering 162A, 162B, 163A, 163B, 163C, 172, M185.

Group II: Electrical Engineering 221C, 260A, 260B, 261, 262, 270.

#### Integrated Circuits and Systems

*Prerequisite.* B.S. degree in Electrical Engineering containing courses in electronics and integrated circuits equivalent to Electrical Engineering 115B, 115C, 118, and 121A. A written qualifying examination may be used to verify the background of beginning M.S. students who have not taken these courses. Those not passing the examination must take these 100-level courses before proceeding with graduate-level courses.

*Minimum Course Requirements.* Nine courses, of which at least five must be at the graduate level. A thesis must be completed under the direction of a faculty adviser.

*Thesis Plan.* All of the courses listed in Group I must be completed. In addition, three courses must be chosen from Groups II and III with, at most, one taken from Group III. The remaining two are free electives.

Group I: Electrical Engineering 118, 215A, 215B, M216A.

Group II: Electrical Engineering 115D, 116, 212A, 213A, 215D, 221A, 221B.

Group III: Computer Science 251A, 252A, 258D.

*Free Electives.* With some exceptions, all 100- and 200-level courses are acceptable as free electives subject to the approval of the faculty adviser. However, it is strongly recommended that courses from the fields of signal processing, solid-state, or communications be used as these free electives. Undergraduate School of Engineering and Applied Science core courses and Electrical Engineering 10, 110, 115A, 121A, 141, and 161 may not be used as free electives.

The normal courseload approved by a faculty adviser is such that it requires a full-time presence on campus and, as a rule, precludes part-time off-campus employment. The M.S. program should normally take four quarters and a summer for completion.

#### Operations Research

*Minimum Course Requirements.* At least nine courses, of which at least five must be at the graduate level. For the prerequisite structure, consult the department.

In consultation with an adviser, the student may elect the thesis plan or the comprehensive examination plan. M.S. students in either plan must take at least three courses from Group I and at least two courses from Group II.

Group I: Optimization (Mathematical Programming): Electrical Engineering 232E, 236A, 236B, 236C.

Group II: Applied Stochastic Processes and Dynamic Programming: Electrical Engineering 232A, 232B, 232C, 237.

*Thesis Plan.* Under the thesis plan, the student offers eight units (two courses) of Electrical En-

engineering 598 to represent thesis preparation and research. Only four of these units may be used to satisfy the graduate course requirement; however, the eight units can be used to satisfy the total course requirement.

**Comprehensive Examination Plan.** Under the comprehensive examination plan, the student may not apply any 500-level courses toward the course requirements.

#### Photonics and Optoelectronics

**Prerequisite.** A bachelor's degree in engineering or physics or equivalent.

**Thesis Plan.** Electrical Engineering 270, 271, either 272 or 273, 598 (twice), and four additional courses, of which at least one is a 200-level course.

**Comprehensive Examination Plan.** Electrical Engineering 270, 271, either 272 or 273, and six additional courses, of which at least two must be 200-level courses.

**Additional Courses.** With a few exceptions, all upper division and graduate courses in the *UCLA General Catalog* are acceptable, subject to the approval of the adviser. The exceptions are the following courses (which are not acceptable for any M.S. program in Electrical Engineering): (1) all school undergraduate core courses and (2) all department undergraduate core courses. Consult the departmental adviser for lists of these courses.

#### Plasma Electronics

**Prerequisite.** A bachelor's degree in engineering or physics or the equivalent.

**Thesis Plan.** Electrical Engineering M185, 285A, 285B, 598 (twice), and four additional courses from the list below. Of these, at least two must be 200-series courses, of which at least one must be in electrical engineering. If Electrical Engineering M185 was taken as an undergraduate, it may be replaced by any engineering course on the list below.

**Comprehensive Examination Plan.** Electrical Engineering M185, 285A, 285B, and six additional courses from the list below. Of these, at least three must be in the 200 series and at least one must be in electrical engineering. Of the remainder, at least one other course must be in engineering. If Electrical Engineering M185 was taken as an undergraduate, it may be replaced by any course on the list below. Other courses may be substituted with the consent of the departmental adviser.

**Additional Courses.** Electrical Engineering 115A, 115AL, 115B, 115BL, 115C, 116, 122AL, 123A, 123B, 124, 162A, 163A, 163B, 164AL, 172, M208A, M208B, 270, 271, 272, M286, M287; Mechanical and Aerospace Engineering 135, 150A, 150B, 235B, 250A, 252A, 252B; Physics 160, 180E, 222A, 222B, 222C, 231A, 231B, 231C.

#### Signal Processing

**Prerequisite.** B.S. degree in Electrical Engineering.

**Course Requirements.** Nine four-unit courses, of which at least six must be at the graduate level (200 series), must be completed. Eight units (two courses) of Electrical Engineering 598 can be used to cover the research work and preparation of the thesis. Both 598 courses count toward the minimum of nine courses, but only one can count toward the five graduate-level courses that are required. All four courses listed in Group I must be completed. At least three courses must be chosen from Group II. Two courses may be chosen as either free electives or 598.

Group I: Electrical Engineering 113, 211A, 212A, 214A.

Group II: Electrical Engineering 211B, 212B, 213A, 214B, M216A.

**Free Electives.** All 100- and 200-level courses in the *UCLA General Catalog* are acceptable with the exception of undergraduate core courses in the School of Engineering and Applied Science and undergraduate Electrical Engineering Department core courses. The choice of free electives must be approved by the student's faculty adviser. If Electrical Engineering 113 or equivalent has already been taken as an undergraduate, then a Group II course or a free elective may be substituted, subject to the faculty adviser's approval.

#### Solid-State Electronics

The degree may be taken in either of two special areas: solid-state physical electronics or semiconductor device physics and design.

**Prerequisite.** B.S. degree in Engineering or equivalent.

**Minimum Course Requirements.** Nine courses, of which at least five must be at the graduate level. Two units of Electrical Engineering 229S are also required. The program must include all core courses listed below with the remaining courses chosen from the options list. Additional options may be used with the consent of the adviser.

Eight units (two courses) of Electrical Engineering 598 must be included to cover the research work and preparation of the thesis. Both 598 courses count toward the minimum of nine courses, but only one can count toward the five required graduate-level courses.

**Solid-State Physical Electronics Requirements.** Core: Electrical Engineering 123B, 124, and 223. Options: at least two courses from Electrical Engineering 221A, 221B, 221C, 224, and 225, with the remaining courses from graduate courses and those upper division courses that are not required for a bachelor's degree in the Electrical Engineering Department, on approval of the graduate adviser.

**Semiconductor Device Physics and Design Requirements.** Core: Electrical Engineering 123B, 124, 221A, 221B (should have had 121A, 121B as prerequisites). Options: At least two courses from Electrical Engineering 221C, 222, 223, 224, 225, and 298 (in solid-state electronics), with the remaining courses from

graduate courses and those upper division courses that are not required for a bachelor's degree in the Electrical Engineering Department, on approval of the graduate adviser.

### Comprehensive Examination Plan

#### Communications and Telecommunications

A written comprehensive examination is administered by the communications and telecommunications field committee. In case of failure, the student may be reexamined once with the consent of the graduate adviser. This examination may be given as part of the written Ph.D. preliminary examination in the communications and telecommunications field.

#### Control Systems

A written comprehensive examination administered by a three-person committee, which is chaired by a member of the controls field committee, must be taken during the last quarter of study toward the M.S. degree. In case of failure, the student may be reexamined once with the consent of the graduate adviser.

#### Electromagnetics

A common six- to eight-hour comprehensive examination is offered once every quarter to students in this M.S. program. The examination must be taken during the quarter at the end of which the student is expected to graduate. In case of failure, the student may be reexamined once with the consent of the graduate adviser.

#### Integrated Circuits and Systems

The comprehensive examination plan is not offered.

#### Operations Research

Students take a common written examination during their last quarter of coursework. This examination is normally offered at the end of the Fall and Spring Quarters. In case of failure, the student may be reexamined once with the consent of the graduate adviser.

#### Photonics and Optoelectronics

Consult the department. In case of failure of the comprehensive examination, the student may be reexamined once with the consent of the graduate adviser.

#### Plasma Electronics

Consult the department. The majority of M.S. candidates proceed to the Ph.D. The Ph.D. qualifying examination may be taken to satisfy the M.S. comprehensive examination requirement.

#### Signal Processing

The comprehensive examination plan is not offered.

#### Solid-State Electronics

The comprehensive examination plan is not offered.

### Thesis Plan

Consult the department for information on the thesis plan for the areas of applied plasma physics and fusion engineering, communications and telecommunications, control sys-

tems, electromagnetics, operations research, and photonics and optoelectronics.

### Integrated Circuits and Systems

The student is expected to find a faculty adviser to direct a research project which culminates in an M.S. thesis. The thesis research must be conducted in the Integrated Circuits and Systems Laboratory concurrently with the coursework.

### Signal Processing

A thesis must be completed under the direction of a faculty adviser.

### Solid-State Electronics

A thesis is required. Consult the department for details.

## Doctoral Degree

### Admission

In addition to meeting the requirements of the Graduate Division, applicants to the Ph.D. program in Electrical Engineering are required to take the General Test of the Graduate Record Examination (GRE).

Students entering the Engineer or Ph.D. program normally should have completed the requirements for the master's degree with at least a 3.25 grade-point average and have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having the M.S. degree.

Application forms, including a departmental supplement to the application, may be obtained by writing to the student's department of interest or to 56-125B Engineering IV, Box 951594, Los Angeles, CA 90095-1594 or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601.

### Major Fields or Subdisciplines

Communications and telecommunications; control systems; electromagnetics; integrated circuits and systems; operations research; photonics and optoelectronics; plasma electronics; signal processing; solid-state electronics.

### Course Requirements

There is no formal course requirement for the Ph.D. degree, and one may theoretically substitute coursework by examinations. Normally, however, the student takes courses to acquire the knowledge needed for the written and oral preliminary examinations. The basic program of study for the Ph.D. degree is built around one major field and two minor fields. A detailed syllabus describing each major field can be obtained in the department office. The major field has a scope corresponding to a body of knowledge contained in six courses, at least four of which are graduate courses, plus the current literature in the area of specialization. Each major field named above is described in a

Ph.D. major field syllabus. Each minor field normally embraces a body of knowledge equivalent to three courses, at least two of which are graduate courses. Grades of B – or better, with a grade-point average of at least 3.33 in all courses included in the minor field, are required. If the student fails to satisfy the minor field requirements through coursework, a minor field examination may be taken (once only). The minor fields are usually chosen to support the major field and are usually subsets of other major fields.

For information on completing the Engineer degree, see Engineering Schoolwide Programs.

### Written and Oral Qualifying Examinations

The written qualifying examination is known as the Ph.D. preliminary examination in the School of Engineering and Applied Science. After mastering the body of knowledge defined in the major field, the student takes a preliminary examination in the major field. The examination typically consists of both a written part and an oral part, and the student passes the entire examination and not in parts. The oral part shall not exceed two hours, and in some major fields need not be required at all. A student who fails the examination may repeat it once only, subject to the approval of the major field committee. This major field examination, together with the three courses in each of the two minor fields, should be completed within six quarters after admission to the Ph.D. program.

After passing the written qualifying examination described above, the student is ready to take the University Oral Qualifying Examination, which should occur within three quarters after completing the written examination. The nature and content of the examination are at the discretion of the doctoral committee, but ordinarily include a broad inquiry into the student's preparation for research. The doctoral committee also reviews the prospectus of the dissertation at the oral qualifying examination.

*Note: Doctoral Committees.* A doctoral committee consists of a minimum of four members. Three members, including the chair, are "inside" members and must hold appointments at UCLA in the student's major department in the School of Engineering and Applied Science. The "outside" member must be a UCLA faculty member outside the student's major department.

## Electrical Engineering

### Lower Division Courses

**2. Principles and Advances in Electrical Engineering.** Lecture, three hours; outside study, nine hours. Open to freshmen and sophomores outside the School of Engineering and Applied Science. Particularly intended for students in humanities and arts. Topics include elementary treatment of fundamental concepts and advances in electrical engineering. P/NP or letter grading.

**5C. Introduction to UNIX and C.** Lecture, three hours; recitation, one hour; laboratory, five hours; outside study, three hours. Introduction to UNIX environment and C programming language. UNIX basics: file structure and manipulation. Technical document preparation. C-shell programming. Elementary C language concepts: input-output, variable types, operators, statements, arrays, and functions.

**10. Circuit Analysis I.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisites: Mathematics 33A (corequisite), Physics 8C. Introduction to linear circuit analysis. Resistive circuits, Kirchhoff laws, operational amplifiers, node and loop analysis, Thevenin and Norton theorem, capacitors and inductors, duality, first-order circuits, step response, second-order circuits, natural response, forced response.

### Upper Division Courses

**100. Electrical and Electronic Circuits.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisites: Mathematics 33A, 33B, Physics 8C. Electrical quantities, linear circuit elements, circuit principles, signal waveforms, transient and steady state circuit behavior, semiconductor diodes and transistors, small signal models, and operational amplifiers.

**101. Engineering Electromagnetics.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisites: Physics 8C, Mathematics 32A and 32B, or 33A and 33B. Electromagnetic field concepts, Maxwell equations, static and quasi-static electric and magnetic fields, energy flow and Poynting vector, waves in unbounded media, reflection and transmission of plane waves, radiation and antennas.

**102. Systems and Signals.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisites: Mathematics 33A, 33B, Physics 8C. Systems: input-output description, linearity, time-invariance, and causality. Impulse response functions, superposition and convolution integrals. Laplace transforms and system functions. Periodic signals. Fourier series and transforms. Frequency responses, responses of systems to periodic signals. Sampling theorem. Discrete-time systems and elements of z-transforms.

**103. Applied Numerical Computing.** Lecture, three hours; recitation, one hour; outside study, 11 hours. Prerequisites: course 5C or Computer Science 10C or 10F, Mathematics 33A, 33B. Introduction to numerical analysis and computing techniques: root finding, matrix computations for systems of linear equations, systems of nonlinear equations, numerical methods for ordinary differential equations, least squares, eigenvalue/eigenvector problem, applications to engineering problems.

**110. Circuit Analysis II.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 10. Corequisite: course 102. Sinusoidal excitation and phasors, AC steady state analysis, AC steady state power, network functions, poles and zeros, frequency response, mutual inductance, ideal transformer, application of Laplace transforms to circuit analysis.

**110L. Circuit Measurements Laboratory (2 units).** Laboratory, four hours; outside study, two hours. Prerequisite: course 10 or 100. Experiments with basic circuits containing resistors, capacitors, inductors, and op-amps. Ohm's law, voltage and current division, Thevenin and Norton equivalent circuits, superposition, transient and steady state analysis, and frequency response principles.

**113. Digital Signal Processing.** Lecture, three hours; recitation, one hour; outside study, nine hours. Prerequisites: courses 102, 110. Relationship between continuous-time and discrete-time signals. Z-transform. Discrete Fourier transform. Fast Fourier transform. Structures for digital filtering. Introduction to digital filter design techniques.

**113L. Digital Signal Processing Laboratory (2 units).** Laboratory, four hours; outside study, two hours. Prerequisite: course 113. Recommended: Computer Science 151B. Real-time implementation of digital signal processing algorithms on digital processor chips. Experiments involving A/D and D/A conversion, aliasing, digital filtering, sinusoidal oscillators, Fourier transforms, and finite wordlength effects.

**114. Introduction to Speech and Image Processing.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 113. Basic principles of data acquisition, filtering, feature extraction, transforms. Acoustic theory of speech production, speech analysis techniques, and modeling perceptual mechanisms in first half of course; image representation and basic image processing techniques in second half. Lecture supplemented by computer laboratory assignments.

**115A. Analog Electronic Circuits I.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 110. Equivalent circuit modeling of electron devices. Device/circuit/environment interactions. Design of single-stage amplifiers. Introduction to cascaded stages, coupling problems, and frequency responses.

**115AL. Analog Electronics Laboratory I (2 units).** Laboratory, four hours; outside study, two hours. Prerequisite: course 110L. Recommended: course 115A. Experimental determination of device characteristics, resistive diode circuits, single-stage amplifiers, compound transistor stages, effect of feedback on single-stage amplifiers.

**115B. Analog Electronic Circuits II.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 115A. Electron device/circuit/environment interactions, with emphasis on multi-stage amplifiers. Tuned amplifier considerations. Non-linear situations requiring graphical method of solution. Emphasis on design techniques, including economics, reliability, and realization of performance specifications.

**115BL. Analog Electronics Laboratory II.** Laboratory, four hours; outside study, eight hours. Prerequisite: course 115AL. Recommended: course 115B. Experimental and computer studies of multistage, wideband, tuned, and power amplifiers, and multiloop feedback amplifiers. Introduction to thick film hybrid techniques. Construction of amplifier using hybrid thick film techniques.

**115C. Digital Electronic Circuits.** Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisites: courses 115B, 121A, Computer Science 51A. Transistor-level digital circuit analysis and design. Modern logic families (TTL, ECL, NMOS, CMOS), integrated circuit (IC) layout, MSI digital circuits (flipflops, registers, counters, PLAs, etc.), computer-aided simulation of digital circuits.

**115D. Design Studies in Electronic Circuits.** Lecture, four hours; outside study, eight hours. Requisites: courses 115B, 115C, 118. Applications of distributed circuits. Operational amplifier applications and limitations. Power amplifiers. Feedback and stability. Precision analog circuits.

**116. Communication Circuits.** Lecture, four hours; outside study, eight hours. Requisites: courses 113, 115B, 132A. Review of analog and digital radio communication techniques. Noise, nonlinear distortion, automatic gain control, data transmission filters. Analog and digital oscillators and phase-locked loops. Basic modulation and demodulation techniques.

**116B. Digital VLSI Design.** Lecture, three hours; discussion, one hour; outside study, eight hours. Requisites: course 10, Computer Science 51A. VLSI design techniques involving architecture, register transfer language (RTL), logic, circuit and physical issues. Structured design methods. Discussion of datapath, control, interconnect, and input/output (I/O).

**118. Integrated Circuit Components.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisites: courses 115B, 121B. Realization of active and passive components in integrated circuit design. Passive components: resistors, capacitors, metal interconnections. Active devices: NPN and PNP BJTs, design rules; FET devices. Device interactions and layout rules.

**121A. Physical Principles of Semiconductor Devices.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisites: Materials Science 14, and Chemistry 11B or Physics 8E. Introduction to physics of semiconductors; survey of equilibrium and nonequilibrium electronic processes in semiconductors; principles of operation and design of p-n junction devices. Fabrication of semiconductor devices.

**121B. Principles of Semiconductor Device Design.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 121A. Introduction to principles of operation of bipolar and MOS transistors, equivalent circuits, high-frequency behavior, voltage limitations.

**122AL. Semiconductor Devices Laboratory.** Lecture, one hour; laboratory, six hours; outside study, five hours. Prerequisites: courses 121A, 121B (may be taken concurrently). Design fabrication and characterization of p-n junction and transistors. Students perform various processing tasks such as wafer preparation, oxidation, diffusion, metallization, and photolithography.

**123A. Fundamentals of Solid-State I.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisites: junior standing in engineering, Physics 8E. Fundamentals of solid-state, introduction to quantum mechanics and quantum statistics applied to solid-state. Crystal structure, energy levels in solids, and band theory and semiconductor properties.

**123B. Fundamentals of Solid-State II.** Lecture, three hours; outside study, nine hours. Prerequisite: course 123A. Discussion of solid-state properties, lattice vibrations, thermal properties, dielectric, magnetic, and superconducting properties.

**124. Semiconductor Physical Electronics.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 123A. Band structure of semiconductors, experimental probes of basic band structure parameters, statistics of carriers, carrier transport properties at low fields, excess carrier transport properties, carrier recombination mechanisms, heterojunction properties.

**129D. Semiconductor Processing and Device Design.** Lecture, two hours; laboratory, four hours; outside study, six hours. Requisites: courses 121A, 121B. Introduction to CAD tools used in integrated circuit processing and device design. Device structure optimization tool is based on PISCES; process integration tool is based on SUPREM. Course familiarizes students with the tools. Using CAD tools, a CMOS process integration to be designed.

**131A. Probability.** Lecture, four hours; recitation, one hour; outside study, 10 hours. Prerequisites: course 102, Mathematics 32B, 33B. Introduction to basic concepts of probability, including random variables and vectors, distributions and densities, moments, characteristic functions, and limit theorems. Applications to communication, control, and signal processing. Introduction to computer simulation and generation of random events.

**131B. Introduction to Stochastic Processes (5 units).** Lecture, four hours; outside study, 11 hours. Prerequisite: course 131A. Introduction to concepts of stochastic processes, emphasizing continuous- and discrete-time stationary processes, correlation function and spectral density, linear transformation, and mean-square estimation. Applications to communication, control, and signal processing. Introduction to computer simulation and analysis of stochastic processes.

**132A. Introduction to Communication Systems (5 units).** Lecture, four hours; recitation, one hour; outside study, 10 hours. Prerequisites: courses 102, 131A. Properties of signals and noise. Baseband pulse and digital signaling. Bandpass signaling techniques. Communication systems: digital transmission, frequency-division multiplexing and telephone systems, satellite communication systems. Performance of communication systems in presence of noise.

**132B. Data Communications and Telecommunication Networks (5 units).** Lecture, four hours; recitation, one hour; outside study, 10 hours. Prerequisite: course 131A. Layered communications architectures. Queueing system modeling and analysis. Error control, flow and congestion control. Packet switching, circuit switching, and routing. Network performance analysis and design. Multiple-access communications: TDMA, FDMA, polling, random access. Local, metropolitan, wide area, integrated services networks.

**136. Introduction to Engineering Optimization Techniques.** Lecture, four hours; recitation, one hour; outside study, seven hours. Prerequisites: course 103, Mathematics 32A, and 33A, or consent of instructor. Introduction to optimization techniques for engineering and science students. Minimization of unconstrained functions of several variables: steepest descent, Newton/Raphson, conjugate gradient, and quasi-Newton methods. Rates of convergence. Methods for constrained minimization: introduction to linear programming and gradient projection methods. Lagrangian methods. Students expected to use SEASnet computers.

**141. Principles of Feedback Control.** Lecture, three hours; recitation, one hour; laboratory, one hour; outside study, seven hours. Prerequisite: course 102 or consent of instructor. Classical methods of analysis and design of feedback control systems as applied to problems selected from engineering, biology, and related areas.

**142. Linear Systems: State-Space Approach.** Lecture, four hours; outside study, eight hours. Requisite: course 102. State-space methods of linear system analysis and synthesis, with application to problems in networks, control, and system modeling.

**151DL. Microelectromechanical Systems Design.** (Formerly numbered 151D.) Lecture, two hours; laboratory, two hours; outside study, eight hours. Requisites: courses 115A, 115B. Microelectromechanical systems design, combining lecture and laboratory instruction on microsensor and microactuator fundamental operating principles and high resolution electronic measurement methods for transducers. Emphasis on design of transducers and interface systems using device and system-level tools.

**161. Electromagnetic Waves.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 101. Transmission line theory, guided waves in enclosed waveguides, Smith chart, phase and group velocity, cavity resonators, waves in complex media.

**162A. Wireless Communication Links and Antennas.** Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: course 161. Basic properties of transmitting and receiving antennas and antenna arrays. Array synthesis. Adaptive arrays. Friis transmission formula, radar equations. Cell-site and mobile antennas, bandwidth budget. Noise in communication systems (transmission lines, antennas, atmospheric, etc.). Cell-site and mobile antennas, cell coverage for signal and traffic, interference, multipath fading, ray bending, and other propagation phenomena.

**162B. Antenna Design II.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 162A. Radiation patterns of horns, slots, and microstrip antennas. Equivalent source representations. Synthesis of sum and difference patterns. Dolph/Chebyshev excitation. Design of slot arrays with mutual coupling. Design of traveling wave antennas, reflectors, and lenses.

**163A. Introductory Microwave Circuits.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 161. Transmission lines description of waveguides, impedance transformers, power dividers, directional couplers, filters, hybrid junctions, nonreciprocal devices.

**163B. Microwave and Millimeter Wave Active Devices.** Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisites: courses 121A, 121B. MESFET, HEMT, HBT, IMPATT, Gunn, small signal models, noise model, large signal model, loadpull method, parameter extraction technique.

**163C. Active Microwave Circuits.** Lecture, three hours; outside study, nine hours. Prerequisites: courses 115A, 161. Theory and design of microwave transistor amplifiers and oscillators; stability, noise, distortion.

**164AL. Microwave Measurements Laboratory.** Lecture, two hours; laboratory, four hours; outside study, six hours. Prerequisite or corequisite: course 163A. Measurement techniques and instrumentation for active and passive microwave components; cavity resonators, waveguides, wavemeters, slotted lines, directional couplers. Design, fabrication, and characterization of microwave circuits in microstrip and coaxial systems.

**164BL. Active Microwave Circuit Design Laboratory.** Lecture, two hours; laboratory, four hours; outside study, six hours. Prerequisite: course 164AL. Application of contemporary analytic design techniques to development of microwave amplifiers and oscillators incorporating state-of-the-art commercially available microwave transistors (silicon bipolar and GaAs MESFET).

**172. Introduction to Lasers and Quantum Electronics.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 101 or equivalent or consent of instructor. Physical applications and principles of lasers, Gaussian optics, resonant cavities, atomic radiation, laser oscillation and amplification, cw and pulsed lasers.

**172L. Laser Laboratory.** Laboratory, four hours; outside study, eight hours. Prerequisite or corequisite: course 172 or consent of instructor. Properties of lasers, including saturation, mode-locking, and relaxation effects. Laser applications, including optics, modulation, communication, holography, interferometry, and nonlinear effects.

**173. Photonic Devices.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 101 or consent of instructor. Introduction to basic principles of photonic devices. Topics include crystal optics, dielectric optical waveguides, waveguide couplers, electro-optic devices, magneto-optic devices, acousto-optic devices, second-harmonic generation, optical Kerr effect, optical switching devices.

**173L. Photonics and Communication Laboratory.** Laboratory, four hours; outside study, eight hours. Requisite or corequisite: course 102. Recommended: course 132A. Introduction to measurement of basic photonic devices, including LEDs, lasers, detectors, and amplifiers; fiber-optic fundamentals and measurement of fiber systems. Modulation techniques, including A.M., F.M., phase and suppressed carrier methods.

**174. Semiconductor Optoelectronics.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisite: course 172 or consent of instructor. Introduction to semiconductor optoelectronic devices for optical communications, interconnects, and signal processing. Basic optical properties of semiconductors, pin photodiodes, avalanche photodiode detectors (APD), light-emitting diodes (LED), semiconductor lasers, optical modulators and amplifiers, and typical photonic systems.

**175. Fourier Optics.** Lecture, three hours; recitation, one hour; outside study, eight hours. Prerequisites: courses 102, 161. Two-dimensional linear systems and Fourier transforms. Foundation of diffraction theory. Analysis of optical imaging systems. Spatial filtering and optical information processing. Wavefront reconstruction and holography.

**M185. Introduction to Plasma Electronics.** (Same as Physics M122.) Lecture, three hours; outside study, nine hours. Requisite: course 101 or Physics 110A. Senior-level introductory course on electrodynamics of ionized gases and applications to materials processing, generation of coherent radiation and particle beams, and renewable energy sources.

**190D. Systems Design.** Lecture, two hours; laboratory, two hours; outside study, eight hours. Requisites: courses 113, 132A, 141. Advanced systems design integrating communications, control, and signal processing subsystems. Different project to be assigned yearly in which student teams create high-performance designs that manage trade-offs among subsystems.

**199. Special Studies (2 to 8 units).** Prerequisites: senior standing, consent of instructor. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Only two units may be applied toward degree; the two units must be approved by petition and can be used only as a replacement for a regular electrical engineering laboratory course. Students may take additional 199 courses, but they may not be applied toward degree.

## Graduate Courses

**M208A. Analytical Methods of Engineering I.** (Same as Mechanical and Aerospace Engineering M291A.) Requisites: Mathematics 131A, 132. Application of abstract mathematical methods to engineering problems. Review of elements of measure and integration,  $L_2$  theory — linear spaces and operators. Eigenvalue problems. Introduction to spectral theory — elementary distribution theory. Applications to problems in engineering.

**M208B. Analytical Methods of Engineering II.** (Same as Mechanical and Aerospace Engineering M291B.) Requisite: course M208A or Mechanical and Aerospace Engineering M291A. Application of modern mathematical methods to engineering problems. Review of spectral theory. Green's functions and eigenvalue problems for second-order ordinary differential equations and their adjoints. Discrete and continuous spectra for ordinary and partial differential equations. Initial and boundary value problems.

**208C. Semigroups of Linear Operators and Applications.** Lecture, four hours; other, eight hours. Prerequisite: course M208B or equivalent. Semigroups of linear operators over Hilbert spaces. Generator and resolvent, generation theorems, Laplace inversion formula. Dissipative operators and contraction semigroups. Analytic semigroups and spectral representation. Semigroups with compact resolvents. Parabolic and hyperbolic systems. Controllability and stabilizability. Applications.

**210. Adaptive Filtering.** Lecture, four hours; outside study, eight hours. Requisites: courses 113, 131B, Mathematics 115A. Optimal filtering and estimation, Wiener filters, linear prediction. Steepest descent and stochastic gradient algorithms. Frequency-domain adaptive filters. Method of least squares, recursive least squares, fast fixed-order and order-recursive (lattice) filters. Misadjustment, convergence, and tracking analyses, stability issues, finite precision effects. Connections with Kalman filtering. Nonlinear adaptive filters.

**211A. Digital Image Processing I.** Lecture, three hours; laboratory, four hours; outside study, five hours. Prerequisites: course 113, computer programming experience. Fundamentals of digital image processing theory and techniques. Topics include two-dimensional linear system theory, image transforms, and enhancement. Concepts covered in lecture applied in computer laboratory assignments.

**211B. Digital Image Processing II.** Lecture, three hours; laboratory, four hours; outside study, five hours. Prerequisite: course 211A. Advanced digital image processing theory and techniques. Topics include modeling, restoration, still-frame and video image compression, tomographic imaging, and multiresolution analysis using wavelet transforms.

**212A. Theory and Design of Digital Filters.** Lecture, three hours; outside study, nine hours. Prerequisite: course 113. Approximation of filter specifications. Use of design charts. Structures for recursive digital filters. FIR filter design techniques. Comparison of IIR and FIR structures. Implementation of digital filters. Limit cycles. Overflow oscillations. Discrete random signals. Wave digital filters.

**212B. Multirate Systems and Filter Banks.** Lecture, three hours; outside study, nine hours. Prerequisite: course 212A. Fundamentals of multirate systems; polyphase representation; multistage implementations; applications of multirate systems; maximally decimated filter banks; perfect reconstruction systems; paraunitary filter banks; wavelet transform and its relation to multirate filter banks.

**213A. Advanced Digital Signal Processing Circuit Design.** Lecture, three hours; outside study, nine hours. Prerequisites: courses 212A, M216A. Digital filter design and optimization tools, architectures for digital signal processing circuits; integrated circuit modules for digital signal processing; programmable signal processors; CAD tools and cell libraries for application-specific integrated circuit design; case studies of speech and image processing circuits.

**214A. Digital Speech Processing.** Lecture, three hours; laboratory, two hours; outside study, seven hours. Prerequisite: course 113 or equivalent. Theory and applications of digital processing of speech signals. Mathematical models of human speech production and perception mechanisms, speech analysis/synthesis. Techniques include linear prediction, filter bank models, and homomorphic filtering. Applications to speech synthesis, automatic recognition, and hearing aids.

**214B. Advanced Topics in Speech Processing.** Lecture, three hours; computer assignments, two hours; outside study, seven hours. Requisite: course 214A. Advanced techniques used in various speech-processing applications, with focus on speech recognition by humans and machine. Physiology and psychoacoustics of human perception. Dynamic Time Warping (DTW) and Hidden Markov Models (HMM) for automatic speech recognition systems, pattern classification, and search algorithms. Aids for hearing impaired.

**215A. Analog Integrated Circuit Design.** Lecture, three hours; outside study, nine hours. Prerequisite: course 115B. Bipolar and CMOS operational amplifier design; gain stages, frequency compensation, output stages; voltage references; analysis of noise and distortion; wideband amplifiers.

**215B. Advanced Digital Integrated Circuits.** Lecture, three hours; outside study, nine hours. Prerequisites: courses 115C, M216A. Analysis and comparison of modern logic families (CMOS, bipolar, BiCMOS, GaAs). MSI digital circuits (flipflops, registers, counters, PLAs). VLSI memories (ROM, RAM, CCD, bubble memories, EPROM, EEPROM) and VLSI systems.

**215D. Analog Microsystem Design.** Lecture, three hours; outside study, nine hours. Prerequisites: courses 113, 215A. Analog signal processing families. Discrete-time switched-capacitor circuits. Continuous-time filters. A/D and D/A converters. Samplers, modulators, oscillators. System-level circuit design.

**M216A. LSI in Computer System Design.** (Same as Computer Science M258A.) Lecture, four hours; laboratory, four hours. Prerequisites: graduate standing in computer science or electrical engineering, consent of instructor. LSI/VLSI design and application in computer systems. Fundamental design techniques that can be used to implement complex integrated systems on a chip.

**M216B-M216C. LSI in Computer System Design.** (Same as Computer Science M258B-M258C.) Lecture, four hours; laboratory, four hours. Prerequisite: course M216A. LSI/VLSI design and application in computer systems. In-depth studies of VLSI architectures and VLSI design tools. In Progress grading.

**217. Tomographic Image Reconstruction.** Lecture, three hours; laboratory, one hour; outside study, eight hours. Requisite: course 211A. Techniques used in tomographic imaging systems. Topics include reconstruction algorithms with nondiffracting sources, reconstruction algorithms for special geometries, reconstruction algorithms for diffraction sources, imaging artifacts and resolution analysis, applications of tomographic imaging.

**219A. Special Topics in Circuits and Signal Processing.** Lecture, three hours; outside study, nine hours. Prerequisite: consent of instructor. Advanced treatment of topics selected from research areas in circuit theory, integrated circuits, or signal processing.

**221A. Physics of Semiconductor Devices I.** Prerequisite: course 121A. Physical principles and design considerations of junction devices.

**221B. Physics of Semiconductor Devices II.** Prerequisite: course 121A. Principles and design considerations of field effect devices and charge-coupled devices.

**221C. Microwave Semiconductor Devices.** Prerequisite: course 121A. Physical principles and design considerations of microwave solid-state devices: Schottky barrier mixer diodes, IMPATT diodes, transferred electron devices, tunnel diodes, microwave transistors.

**222. Integrated Circuits Fabrication Processes.** Prerequisites: courses 118, 121A. Principles of integrated circuits fabrication processes. Technological limitations of integrated circuits design. Topics include bulk crystal and epitaxial growth, thermal oxidation, diffusion, ion-implantation, chemical vapor deposition, dry etching, lithography, and metalization. Introduction of advanced process simulation tools.

**223. Solid-State Electronics I.** Prerequisites: courses 124 and 270, or consent of instructor. Energy band theory, electronic band structure of various elementary, compound, and alloy semiconductors, defects in semiconductors. Recombination mechanisms, transport properties.

**224. Solid-State Electronics II.** Lecture, four hours; outside study, eight hours. Requisite: course 223. Techniques to solve Boltzmann transport equation, various scattering mechanisms in semiconductors, high field transport properties in semiconductors, Monte Carlo method in transport. Optical properties.

**225. Superlattices and Quantum Wells.** Prerequisite: course 223. Theoretical methods for circulating electronics and optical properties of semiconductor quantum wells, superlattices, and tunnel structures. Quantum size effects and low-dimensional systems. Application to semiconductor devices, including negative resistance diodes, transistors, and detectors.

**229. Seminars: Advanced Topics in Solid-State Electronics.** Prerequisites: courses 223, 224. Current research areas, such as radiation effects in semiconductor devices, diffusion in semiconductors, optical and microwave semiconductor devices, nonlinear optics, and electron emission.

**229S. Advanced Electrical Engineering Seminar (2 units).** Prerequisite: successful completion of Ph.D. major field examination or consent of instructor. Seminar on current research topics in solid-state and quantum electronics (Section 1) or in electronic circuit theory and applications (Section 2). Students report on a tutorial topic and on a research topic in their dissertation area. May be repeated for credit. S/U grading.

**230A. Estimation and Detection in Communication and Radar Engineering.** Prerequisite: course 131A or equivalent. Applications of estimation and detection concepts in communication and radar engineering; random signal and noise characterizations by analytical and simulation methods; mean square (MS) and maximum likelihood (ML) estimations and algorithms; detection under ML, Bayes, and Neyman/Pearson (NP) criteria; signal-to-noise ratio (SNR) and error probability evaluations.

**230B. Digital Communication Systems.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 132A, 230A. Basic concepts of digital communication systems; representation of bandpass waveforms; signal space analysis and optimum receivers in Gaussian noise; comparison of digital modulation methods; synchronization and adaptive equalization; applications to modern communication systems.

**230C. Algorithms and Processing in Communication and Radar.** Prerequisite: course 230A. Concepts and implementations of digital signal processing algorithms in communication and radar systems. Optimum dynamic range scaling for random data. Algorithms for fast convolution and transform. Spectral estimation algorithms. Parallel processing, VLSI algorithms, and systolic arrays.

**230D. Signal Processing in Communications.** Lecture, four hours; other, eight hours. Prerequisite: course 230C. Basic digital signal processing techniques for estimation and detection of signals in communication and radar systems. Optimization of dynamic range, quantization, and state constraints; DFT, convolution, FFT, NTT, Winograd DFT, systolic array; spectral analysis-windowing, AR, and ARMA; system applications.

**231A. Information Theory: Channel and Source Coding.** Lecture, four hours; outside study, eight hours. Prerequisite: course 230A. Fundamental concepts of information theory with applications to digital communications. Entropy, information, and data compression; noisy compression (rate distortion theory); channel capacity; block and convolutional codes and decoding algorithms.

**231C. Rate Distortion Theory and Source Coding Techniques.** Prerequisites: courses 230A and 231A, or consent of instructor. Sources and distortion measures, rate distortion function and its evaluation for discrete and continuous sources, source coding theorems, comparisons of practical coding systems to theoretical bounds, speech and image quantization.

**231D. Spread Spectrum Communications.** Lecture, four hours; outside study, eight hours. Prerequisite: course 231A. Spread spectrum digital communication for personal communication systems. Review of digital modulations, channel coding; fading channels and diversity techniques; direct sequence and frequency-hopped spread spectrum systems; multiple-access schemes; application to cellular radio.

**231E. Channel Coding Theory.** Lecture, four hours; outside study, eight hours. Prerequisite: course 231A. Fundamentals of linear codes and decoding algorithms based on theory of finite fields such as Bose/Chaudhuri/Hocquenghem and Reed/Solomon codes; introduction to combined coding and modulation such as lattice codes and trellis coded modulation; constellation shaping; applications.

**232A. Stochastic Modeling with Applications to Telecommunication Systems.** Prerequisite: course 131A or equivalent. Introduction to stochastic processes as applied to study of telecommunication systems and traffic engineering. Renewal theory; discrete-time Markov chains; continuous-time Markov jump processes. Applications to traffic and queueing analysis of basic telecommunication system models.

**232B. Telecommunication Switching and Queueing Systems.** Prerequisite: course 232A. Queue modeling and analysis with applications to space-time digital switching systems and to integrated-service telecommunication systems. Fundamentals of traffic engineering and queueing theory. Queue size, waiting time, busy period, blocking, and stochastic process analysis for Markovian and non-Markovian models.

**232C. Telecommunication Architecture and Networks.** Prerequisite: course 232B. Analysis and design of integrated-service telecommunication networks and multiple-access procedures. Stochastic analysis of priority-based queueing system models. Queueing networks; network protocol architectures; error control; routing, flow, and access control. Applications to local-area, packet-radio, satellite, and computer communication networks.

**232D. Telecommunication Networks and Multiple-Access Communications.** Prerequisite: course 232B. Performance analysis and design of telecommunication networks and multiple-access communication systems. Topics include architectures, multiplexing and multiple-access, message delays, error/flow control, switching, routing, protocols. Applications to local-area, packet-radio, local-distribution, computer and satellite communication networks.

**232E. Graphs and Network Flows.** Prerequisite: course 136 or consent of instructor. Solution to analysis and synthesis problems which may be formulated as flow problems in capacity constrained (or cost constrained) networks. Development of tools of network flow theory using graph theoretic methods; application to communication, transportation, and transmission problems.

**236A. Linear Programming.** Prerequisite: Mathematics 115A or equivalent knowledge of linear algebra. Basic graduate course in linear and combinatorial programming. Simplex method, duality, geometry, decomposition, complementary pivot theory, and quadratic programming; introduction to computational complexity theory.

**236B. Nonlinear Programming.** Prerequisite: course 236A or equivalent. Basic graduate course in nonlinear programming. Convex sets and functions and their basic properties. Kuhn/Tucker points, saddle points, and nonlinear or conjugate duality theory. Development of algorithms and convergence theory.

**236C. Optimization Methods for Large-Scale Systems.** Prerequisite: course 236B. Theory and computational procedures for decomposing large-scale mathematical programming problems. Generalized linear programming, decomposition algorithms, column generation, economic implications. Application to stochastic programming and optimal control. Topics in nonconvex programming; minimizing concave functions on convex polyhedra, reverse convex programming.

**237. Dynamic Programming.** Prerequisite: course 232A. Introduction to mathematical analysis of sequential decision processes. Finite horizon model in both deterministic and stochastic cases. Finite-state infinite horizon model. Methods of solution. Detailed examples from inventory theory, finance, and transportation systems.

**239AS. Topics in Communication.** Prerequisite: consent of instructor. Topics in one or more special aspects of communication systems, such as phase-coherent communication systems, optical channels, time-varying channels, feedback channels, broadcast channels, networks, coding and decoding techniques. May be repeated for credit with topic change.

**239BS. Topics in Operations Research.** Prerequisite: consent of instructor. Treatment of one or more selected topics from areas such as integer programming; combinatorial optimization; network synthesis; scheduling, routing, location, and design problems; implementation considerations for mathematical programming algorithms; stochastic programming; applications in engineering, computer science, economics. May be repeated for credit with topic change.

**240A. Linear Dynamic Systems.** Prerequisite: course 142 or equivalent. State-space description of dynamic systems. Deduction of state spaces from input-output data. State controllability and observability. Stability and state feedback stabilizability; state observer.

**240B. Linear Optimal Control.** Prerequisites: courses 141 or equivalent and 240A, or consent of instructor. Introduction to optimal control, with emphasis on detailed study of LQR, or linear regulators with quadratic cost criteria. Relationships to classical control system design.

**240C. Optimal Control.** Prerequisite: course 240B. Applications of variational methods. Pontryagin maximum principle, dynamic programming and nonlinear programming to problems of optimal control theory and practical systems.

**241A. Stochastic Processes.** Prerequisite: course 131B or equivalent. Fundamentals and applications of second-order theory stochastic processes. Correlation and spectral density. Gaussian process, processing by dynamic systems, Bayes rule and conditional expectation; mean-square estimation and Kalman filtering.

**241B. Kalman Filtering.** Prerequisites: courses 240A, 241A. Statistical estimation theory, estimation of signal parameters in additive noise. Kalman filter theory: basic theory, steady state and frequency domain analyses, on-line estimation and colored noise. Likelihood ratios, Gaussian signals in Gaussian noise.

**241C. Stochastic Control.** Prerequisites: courses 240B, 241B. Estimation and control of linear discrete-time and continuous-time stochastic systems; separation theorem and applications; Kalman filtering.

**242. Nonlinear Control.** Prerequisite: course 240B. Techniques for studying nonlinear control systems, with emphasis on their stability; Liapunov direct method; input-output stability; Popov method; linearization.

**M243. Biological Control Systems.** (Same as Anesthesiology M222.) Prerequisite: course 141 or equivalent. Introduction to application of control theory to modeling and analysis of biological control systems, such as respiratory system, cardiovascular system, and neuromuscular system. Emphasis on solving problems of current interest in biomedicine.

**249S. Topics in Control.** Prerequisite: consent of instructor. Thorough treatment of one or more aspects of control theory and applications, such as computational methods for optimal control; stability of distributed systems; identification; adaptive control; nonlinear filtering; differential games; applications to flight control, nuclear reactors, process control, biomedical problems. May be repeated for credit with topic change.

**250A. MEMS Device Physics and Fabrication.** Lecture, three hours; discussion, one hour; outside study, eight hours. Recommended (but not prerequisite): integrated circuit processing knowledge. Introduction to physics and fabrication of microelectromechanical systems (MEMS) components. Surface, bulk, and other silicon micromachining principles. Material deposition and etching methods. Electronic, mechanical, and thermal properties of materials for MEMS. Fundamental transducer and actuator principles.

**250B. MEMS System Design.** Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: course 250A or equivalent. Introduction to microelectromechanical systems (MEMS) design methods, design rules, and state-of-the-art foundry capabilities. Capabilities and limitations of integration methods for MEMS electronics, sensors, and actuators. Electronic systems for MEMS transducers and actuators. Computer-aided design methods for MEMS integration. Design project required.

**250C. Microsensors and Microinstruments.** Lecture, three hours; laboratory, three hours, outside study, six hours. Prerequisite: course 250B or equivalent. Fundamentals of microelectromechanical systems (MEMS) microsensors and microinstruments. Measurement principles for MEMS transducers. Design methods and design constraints for sensitivity and stability. Implementation of control methods for improving measurement sensitivity, linearity, and reproducibility. Design project required, with emphasis on integration of sensors and actuators.

**260A-260B. Advanced Engineering Electrodynamics.** Prerequisites: courses 161, 162A. Advanced treatment of concepts in electrodynamics and their applications to modern engineering problems. Waves in anisotropic, inhomogeneous, and dispersive media. Guided waves in bounded and unbounded regions. Radiation and diffraction, including optical phenomena. Partially coherent waves, statistical media.

**261. Microwave and Millimeter Wave Circuits.** Prerequisite: course 163A or consent of instructor. Rectangular and circular waveguides, microstrip, stripline, finline, and dielectric waveguide distributed circuits, with applications in microwave and millimeter wave integrated circuits. Substrate materials, surface wave phenomena. Analytical methods for discontinuity effects. Design of passive microwave and millimeter wave circuits.

**262. Antenna Theory and Design.** Prerequisites: courses 162A, 162B. Antenna patterns. Sum and difference patterns. Optimum designs for rectangular and circular apertures. Arbitrary side lobe topography. Discrete arrays. Mutual coupling. Design of feeding networks.

**263. Reflector Antennas Synthesis, Analysis, and Measurement.** Lecture, four hours; other, eight hours. Prerequisites: courses 260A-260B or equivalent. Reflector pattern analysis techniques. Single and multi-reflector antenna configurations. Reflector synthesis techniques. Reflector feeds. Reflector tolerance studies, including systematic and random errors. Array-fed reflector antennas. Near-field measurement techniques. Compact range concepts. Microwave diagnostic techniques. Modern satellite and ground antenna applications.

**266. Computational Methods for Electromagnetics.** Prerequisites: courses 162A, 163A. Computational techniques for partial differential and integral equations: finite-difference, finite-element, method of moments. Applications include transmission lines, resonators, integrated circuits, solid-state device modeling, electromagnetic scattering, and antennas.

**267. Nonlinear Microwave Circuits.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 161, 163A, 163B. Nonlinear device modeling, harmonic balance and Volterra series analysis, application to mixers, frequency multipliers, and amplifiers.

**270. Applied Quantum Mechanics.** Lecture, four hours; outside study, eight hours. Prerequisites: modern physics (or course 123A), linear algebra, and ordinary differential equations courses. Principles of quantum mechanics for applications in lasers, solid-state physics, and nonlinear optics. Topics include eigenfunction expansions, observables, Schrödinger equation, uncertainty principle, central force problems, Hilbert spaces, WKB approximation, matrix mechanics, density matrix formalism, and radiation theory.

**271. Classical Laser Theory.** Lecture, four hours; outside study, eight hours. Prerequisite: course 172 or equivalent. Microscopic and macroscopic laser phenomena and propagation of optical pulses using classical formalism.

**272. Dynamics of Lasers.** Lecture, four hours; outside study, eight hours. Prerequisite: course 271 or consent of instructor. Ultrashort laser pulse characteristics, generation, and measurement. Gain switching, Q switching, cavity dumping, active and passive mode locking. Pulse compression and soliton pulse formation. Nonlinear pulse generation: soliton laser, additive-pulse mode locking, and parametric oscillators. Pulse measurement techniques.

**273. Nonlinear Optics.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 172 and 270, or consent of instructor. Nonlinear optical susceptibilities. Coupled-wave formulation. Crystal optics, electro-optics, and magneto-optics. Sum- and difference-frequency generation. Harmonic and parametric generation. Stimulated Raman and Brillouin scattering. Four-wave mixing and phase conjugation. Field-induced index changes and self-phase modulation.

**279S. Special Topics in Quantum Electronics.** Lecture, four hours; outside study, eight hours. Prerequisite: consent of instructor. Current research topics in quantum electronics, lasers, nonlinear optics, optoelectronics, ultrafast phenomena, fiber optics, and lightwave technology. May be repeated for credit. S/U or letter grading.

**285A. Plasma Waves and Instabilities.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 101, and M185 or Physics M122. Wave phenomena in plasmas described by macroscopic fluid equations. Microwave propagation, plasma oscillations, ion acoustic waves, cyclotron waves, hydro-magnetic waves, drift waves. Rayleigh/Taylor, Kelvin/Helmholtz, universal, and streaming instabilities. Application to experiments in fully and partially ionized gases.

**285B. Advanced Plasma Waves and Instabilities.** Prerequisites: courses M185, and 285A or Physics 222A. Interaction of intense electromagnetic waves with plasmas: waves in inhomogeneous and bounded plasmas, nonlinear wave coupling and damping, parametric instabilities, anomalous resistivity, shock waves, echoes, laser heating. Emphasis on experimental considerations and techniques.

**M287. Fusion Plasma Physics and Analysis.** (Same as Mechanical and Aerospace Engineering M237B.) Requisite: course M185. Fundamentals of plasmas at thermonuclear burning conditions. Fokker/Planck equation and applications to heating by neutral beams, RF, and fusion reaction products. Bremsstrahlung, synchrotron, and atomic radiation processes. Plasma surface interactions. Fluid description of burning plasma. Dynamics, stability, and control. Applications in tokamaks, tandem mirrors, and alternate concepts.

**296. Seminar: Research Topics in Electrical Engineering (2 units).** Seminar, two hours; outside study, four hours. Advanced study and analysis of current topics in electrical engineering. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

**298. Seminar: Engineering (2 to 4 units).** Prerequisites: graduate standing in electrical engineering, consent of instructor. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**475C. Manufacturing Systems.** Lecture, four hours; outside study, eight hours. Requisite: Mechanical and Aerospace Engineering 475B. Modeling and analysis of manufacturing systems. Assembly and transfer lines. Facility layout and design. Group technology and flexible manufacturing systems. Planning and scheduling. Task management, machine setup, and operation sequencing. Manufacturing system models. Manufacturing information systems. Social, economic, environmental, and regulatory issues.

**596. Directed Individual or Tutorial Studies (2 to 8 units).** Prerequisites: graduate standing in electrical engineering, consent of instructor. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

**597A. Preparation for M.S. Comprehensive Examination (2 to 12 units).** Prerequisites: graduate standing in electrical engineering, consent of instructor. Reading and preparation for M.S. comprehensive examination. S/U grading.

**597B. Preparation for Ph.D. Preliminary Examinations (2 to 16 units).** Prerequisites: graduate standing in electrical engineering, consent of instructor. S/U grading.

**597C. Preparation for Ph.D. Oral Qualifying Examination (2 to 16 units).** Prerequisites: graduate standing in electrical engineering, consent of instructor. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

**598. Research for and Preparation of M.S. Thesis (2 to 12 units).** Prerequisites: graduate standing in electrical engineering, consent of instructor. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units).** Prerequisites: graduate standing in electrical engineering, consent of instructor. Usually taken after student has been advanced to candidacy. S/U grading.

## ENGINEERING SCHOOLWIDE PROGRAMS

*School of Engineering and Applied  
Science*

UCLA  
6426 Boelter Hall  
Box 951601  
Los Angeles, CA 90095-1601  
(310) 825-2826

### Professors Emeriti

Edward P. Coleman, Ph.D.  
J. Morley English, Ph.D.  
Alfred C. Ingersoll, Ph.D.  
Herbert B. Nottage, Ph.D.  
Allen B. Rosenstein, Ph.D.  
Bonham Spence-Campbell, E.E.

### Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage, <http://www.gdnet.ucla.edu>.

### Master's Degree

#### Admission

The Engineering Executive Program, leading to the Master of Engineering degree (M.Engr.), enrolls a limited number of students in a two-year work-study program. It is specifically designed for experienced professionals who intend to go on to high-level executive positions in industry and government.

In addition to the University minimum requirements, the following are required: (1) five years of responsible full-time professional experience in engineering; (2) some formal study in statistics; (3) the Graduate Record Examination (GRE) General Test and Subject Test in Engineering, Mathematics, Business, or a related field. A screening interview with the coordinator of the Engineering Executive Program is required.

More information can be obtained from the Office of Academic and Student Affairs, 6426 Boelter Hall, School of Engineering and Applied Science, (310) 825-1704.

#### Areas of Study

Engineering management.

### Course Requirements

A total of 12 graduate courses are required for the Master of Engineering degree: Engineering 470A-470B-470C, 471A-471B-471C, 472A through 472D, 473A-473B.

*Undergraduate Courses.* No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199; Civil Engineering 106A, 108, 199; Computer Science 152A, 152B, 171L, 199; Electrical Engineering 100, 101, 102, 103, 199; Materials Science and Engineering 110, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L, 199; Mechanical and Aerospace Engineering 102, 103, M105A, 105D), 199.

Individual departments within the school may impose certain restrictions on the applicability of other undergraduate courses toward graduate degrees. Students should consult with the graduate adviser on departmental requirements and restrictions.

### Comprehensive Examination Plan

Consult the department.

### Thesis Plan

None.

### Engineer Degree

The School of Engineering and Applied Science offers an Engineer (Engr.) degree at a level equivalent to completion of preliminaries in the Ph.D. program. The Engineer degree represents considerable advanced training and competence in the engineering field, but does not require the research effort involved in a Ph.D. dissertation.

#### Admission

For information on admission to the program, see the Admission section for the corresponding departmental doctoral program.

#### Areas of Study

Consult the department.

### Course Requirements

Requirements for the Engineer degree are identical to those of the Ph.D. degree up to and including the oral preliminary examination, except that the Engineer degree is based on coursework. The minimum requirement is 15 (at least nine graduate) courses beyond the bachelor's degree, with at least six courses in the major field (minimum of four graduate courses) and at least three in each minor field (minimum of two graduate courses in each).

The Ph.D. and Engineer degree programs are administered interchangeably in the sense that students in the Ph.D. program may either exit with an Engineer degree or earn the Engineer degree enroute to one of the Ph.D. degrees offered by the school. Similarly, students in the Engineer degree program may continue to the Ph.D. after receiving the Engineer degree. The time spent in either of the two programs ap-

plies toward the minimum residence requirements and to the time limitation for the other program.

### Written and Oral Qualifying Examinations

Requirements for the Engineer degree are identical to those of the Ph.D. in Engineering up to and including the oral preliminary examination, except that the Engineer degree is based on coursework.

## Engineering

### Lower Division Courses

**95. Ethical and Professional Issues in Engineering and Computer Science.** Lecture, four hours; outside study, eight hours. Selected lectures, discussion, and oral and written reports related to profession of engineering. Lectures by practicing engineers, case studies, and small group projects on issues that involve conflicting demands on society. P/NP or letter grading.

**97. Introduction to Engineering Disciplines.** Lecture, four hours; discussion, four hours; outside study, four hours. Introduction to engineering as a professional opportunity for freshman students by exploring difference between engineering disciplines and functions engineers perform. Development skills and techniques for academic excellence through the team process. Investigation of national need underlying current effort to increase participation of historically underrepresented groups in the U.S. technological work force. P/NP grading.

### Graduate Courses

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**470A-470D. The Engineer in the Technical Environment (3 units each).** Limited to students in Engineering Executive Program. Theory and application of quantitative methods in analysis and synthesis of engineering systems for purpose of making management decisions. Optimization of outputs with respect to dollar costs, time, material, energy, information, and manpower. Case studies and individual projects.

**471A-471B-471C. The Engineer in the General Environment (3 units, 3 units, 1.5 units).** Limited to students in Engineering Executive Program. Influences of human relations, laws, social sciences, humanities, and fine arts on development and utilization of natural and human resources. Interaction of technology and society past, present, and future. Change agents and resistance to change. In Progress grading for courses 471B-471C only.

**472A-472D. The Engineer in the Business Environment (3 units, 3 units, 3 units, 1.5 units).** Limited to students in Engineering Executive Program. Language of business for the engineering executive. Accounting, finance, business economics, business law, and marketing. Laboratory in organization and management problem solving. Analysis of actual business problems of firm, community, and nation, provided through cooperation and participation with California business corporations and government agencies. In Progress grading (credit to be given on completion of courses 472B and 472D).

**473A-473B. Analysis and Synthesis of a Large-Scale System (3 units each).** Recitation, two and one-half hours. Limited to students in Engineering Executive Program. Problem area of modern industry or government is selected as class project, and its solution is synthesized using quantitative tools and methods. Project also serves as laboratory in organization for a goal-oriented technical group. In Progress and S/U grading.

**495. Teaching Assistant Training Seminar.** Prerequisites: graduate standing in engineering, appointment as a teaching assistant. Seminar on communication of engineering principles, concepts, and methods, preparation, organization of material, presentation, use of visual aids, grading, advising, and rapport with students. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

David Stuart Rodas, Ph.D.

### Adjunct Professor

Carolyn See, Ph.D.

## Scope and Objectives

The Department of English is dedicated to the study of the literatures and cultures of those parts of the world in which English is the primary language, and to the study of the history and structure of the English language itself. Although committed to no single method or approach, the department encourages an emphasis on British, American, and world literary history and requires of its undergraduate majors a firsthand acquaintance with many of the more influential writers who have helped during the past millennium to make English a global language that possesses richly diverse and highly influential literary cultures. Within the department, students are able to pursue a variety of approaches to the study of literary culture beyond the strictly historical—literary criticism, for example, or those that draw on the resources of such disciplines as sociology, psychology, and philosophy. Within the B.A. de-

gree in English, qualified students may elect a concentration either in creative writing or in world literature. The department also offers a Bachelor of Arts degree in American Literature and Culture. (UCLA students who were declared English majors with a concentration in American studies prior to Fall Quarter 1995 have the option to complete the work required by that concentration as described in the 1994-95 *UCLA General Catalog*.)

An understanding and appreciation of literature can furnish lifelong rewards. In addition to such personal benefits, the department seeks to impart the capacity to make balanced critical judgments and the ability to write the English language persuasively, with point and effect. Such skills are essential to success in a variety of professions for which the major in English can provide excellent preparation, including law, administration, business, and teaching.

A graduate program leading to the Master of Arts degree is available for students who wish to continue the study of literature at an advanced level. A parallel program continues to the Ph.D. degree. Because the Ph.D. program may require five years or more, it is intended only for qualified students who are seriously committed to advanced literary scholarship and, in some cases, to a career in college or university teaching.

## Undergraduate Study

### Admission to Courses in English

Students must have completed the Subject A requirement before taking any courses in English (other than English A or 2). For further information regarding Subject A, see the Undergraduate Study section of this catalog.

### Extra-Departmental Requirement in Foreign Literature or Foreign Language

All English majors must have completed either (1) level five or equivalent in any one foreign language or (2) level three or equivalent in one foreign language and two additional courses in foreign language or foreign literature, including foreign literature in translation (see course listings under Foreign Literature in Translation later in this chapter). Italian 46 may not be applied. Transfer students who have satisfied the College of Letters and Science foreign language requirement at the high school level through the IGETC program may satisfy the departmental requirement with five foreign literature in translation courses. The courses may be taken on a P/NP grading basis.

## Bachelor of Arts in English

The Bachelor of Arts degree has concentrations in creative writing and in world literature. An international students program in English is also offered.

### Preparation for the Major

*Required:* English 3, 4, 10A, 10B, 10C taken in the stated sequence (each course is a requi-

site for the next course). A grade of C or better is required in each course.

### The Major

*Required:* Twelve upper division English courses, including 141A or 141B, 142A, 142B, 143, at least one course from each of the 150 and 180 series, and six additional courses of which four must be selected from 140A, 140B, 142C, or 150 through 190.

Students are encouraged to choose additional electives from courses 140A through M197. English 140A is especially recommended if they plan graduate work in literature. They may wish to select several courses in the relevant classical and postclassical foreign literatures and thought.

### Optional Concentrations and Special Programs

The department offers optional concentrations in creative writing and in world literature, as well as a special program for international students. For all programs, the regular "Preparation for the Major" sequence as well as the departmental foreign language requirement apply. Because of the specialized nature of these programs, students should consult the departmental counselor before selecting and declaring one of them as a concentration.

#### Creative Writing Concentration

The creative writing concentration consists of English 142A and 142B and a minimum of 10 additional upper division English courses: three creative writing courses from 133 or 134, taken in a single genre (poetry or short story), three literature courses paralleling the creative writing specialization, and four electives selected from courses 140A through 190. Students may declare this program as a concentration only after they have completed three creative writing workshops in a single genre. Students may not enroll in more than one workshop (course 133, 134, or 135) per term or in more than two workshops with the same instructor. No student may take for credit more than three workshops in any one creative writing genre. Students planning to select this program should contact the departmental counselor for further details.

#### World Literature Concentration

The world literature concentration consists of nine upper division courses in English or American literature and six upper division courses in foreign literatures (at least one of which must be taught in the original language). The nine English courses must include 141A, 141B, or 143; 142A and 142B; at least one course from the 150 series; and four electives selected from courses 140A through 190 (students intending graduate work in literature are especially encouraged to take English 140A). A listing of acceptable courses may be obtained from the department.

#### International Students Program

The department offers a special program in English to bona fide international students

whose native language is other than English. For this program, students must satisfy all requirements listed under "Preparation for the Major"; they may fulfill the departmental foreign language requirement with their own native language. The following 12 courses are required for the program itself: English as a Second Language 103, 106, 109; two courses from English 100 through 199; 122; 142A, 142B; and four additional courses from 140A through M197C. Students who complete this program and wish to pursue graduate study should consult the departmental counselor about programs of study and requirements for admission.

### Bachelor of Arts in American Literature and Culture

#### Preparation for the Major

*Required:* English 3, 4, 10A, 10B, 10C taken in the stated sequence (each course is a requisite for the next course). A grade of C or better is required in each course.

#### The Major

*Required:* Thirteen upper division courses, including six in American literature selected from English 170A through 179, two of which must be devoted to literature written before 1900 (courses 170A, 170B, 171A, 171B, 173A, 174A); two courses from 142A, 142B, 143; one seminar from 187, 188, 189, or when treating American topics, 180X; one course from M102A, M102B, 103, M104A, M104B, M104C, M105A, M105B, 106, M107A (also M107C when treating American topics or figures), or 109; and three courses from 100 through 199 or from courses pertaining to American culture offered by other departments (of those courses applied toward the major from outside the Department of English, all three must usually come from one department or program and appear on a list of approved courses for the major).

### Honors Program

#### Admission

The honors program is open to majors with a 3.5 departmental and a 3.25 overall grade-point average. Students with lower GPAs may petition for admission to the program, but these grade-point averages must be achieved before graduation in order to qualify for honors. Students should apply by Spring Quarter of the junior year. For application forms and further information, contact the departmental counselor.

#### Requirements

All honors students are required to take English 140A during the junior year and one seminar from the English 180 through 189 sequence, preferably before the senior year. In Fall Quarter of the senior year, they must take course 199HA. During Winter and Spring Quarters, they take courses 199HB and

199HC, in which they write a thesis under the direction of a faculty member. The thesis determines whether they receive high honors, honors, or no honors.

### Waiver for Instructional Credential in English

Students interested in obtaining a single subject secondary school credential in English or multiple subject credential for elementary education should consult with a departmental counselor regarding availability and requirements for a waiver from the English subject matter examination required by the California Commission on Teacher Credentialing. Students interested in elementary school education are strongly urged to participate in the Diversified Liberal Arts Program (DLAP), administered by the College Counseling Service, A316 Murphy Hall. Students are also encouraged to select additional courses in language, children's literature, literature for adolescents, American literature, and literature for minorities as some of their electives. For additional information on courses leading to the credential, consult the Graduate School of Education and Information Studies at (310) 825-8328.

### Bachelor of Arts in English/Greek

See Classics.

### Bachelor of Arts in English/Latin

See Classics.

### Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

### Master's Degree

#### Admission

The department considers only applicants whose objective is the Ph.D.

#### Areas of Study

Literatures in English. See Course Requirements below.

#### Course Requirements

All graduate students in the program are required to take a minimum of 12 units or three courses per quarter.

Though all students are admitted directly into the Ph.D. program, students can decide to leave the program with an M.A. if they complete an acceptable thesis. Nine letter-graded English courses are required for the M.A. degree; these courses must be at the graduate level (200 or above).

All students at any stage of the program may take courses for S/U grades, but such courses cannot be used to satisfy any requirements for a degree. The work required for an S must be agreed on in advance with the instructor of the course.

### **Comprehensive Examination Plan**

Students in the Ph.D. program receive the M.A. after they have satisfied one foreign language requirement and passed the first qualifying examination (see Written and Oral Qualifying Examinations under Doctoral Degree below).

### **Thesis Plan**

Students elect the thesis plan for the M.A. after a maximum of two years in the program. They must request a committee from the vice chair a minimum of two quarters before completion of the program. The committee consists of three faculty members who meet as a group with the student to consider the thesis proposal. The thesis must not be less than 40 pages (10,000 words) or more than 60 pages (15,000 words) in length.

## **Doctoral Degree**

### **Admission**

All persons who are admitted into the graduate program of the Department of English at UCLA enter the first phase of the doctoral program, successful completion of which results in the Master of Arts. Those who enter UCLA with the master's degree may waive certain course requirements but must pass the first qualifying examination (which also grants admission into the second phase of the doctoral program). Those who decide they want a terminal Master of Arts degree from UCLA must write a thesis.

Admission to the program is based on a thorough review of the applicant's academic record. Ordinarily, holders of the B.A. are expected to meet these minimum requirements: an undergraduate major or program that prepares one for advanced study of literature; a grade-point average in English courses and in the junior and senior years of at least 3.5; and a score on the Graduate Record Examination (GRE) within the last five years of above 650 on both the verbal section of the General Test and the Literature in English Subject Test, or a combined score of 1,300. Applicants who hold the M.A. are expected to have a grade-point average of at least 3.7 in all graduate courses and a correspondingly higher score on the Subject Test. Applicants must submit a minimum of three letters of recommendation attesting to their ability to succeed in graduate study. A writing sample is also required. Care should be taken with the statement of purpose and the writing sample, since the quality of thought and argument these exhibit, as well as their style, weigh significantly in admissions decisions. For an application, write to the department.

### **Major Fields or Subdisciplines**

Literatures in English.

### **Course Requirements**

Fourteen letter-graded courses are required. These courses must be at the graduate level (200 or above). With the approval of the vice chair, Ph.D. students may take up to three of these courses in departments other than English (such as literature in another language, history, art history, Afro-American studies, film). English 201A and 201B are highly recommended.

Students take the first qualifying examination and to pursue the doctorate take English 596 each quarter, either under an individual professor or the vice chair. Students who elect to write an M.A. thesis take English 598 each quarter.

*Breadth.* Of the 14 letter-graded courses for the Ph.D., students are required to take a minimum of three courses in periods before 1800 and three in periods after 1800. Courses that straddle this chronological break, such as most of those in Romanticism, may satisfy either the pre- or the post-1800 requirement, but not both. (Classes in literary theory do not ordinarily satisfy the breadth requirement.)

*Philology.* All Ph.D. students must take English 210 or any two courses from 211, 212, or 213. When offered, either English 214 or 240 may be substituted for 210.

All students at any stage of the program may take courses for S/U grades, but such courses cannot be used to satisfy any requirements for a degree. The work required for an S must be agreed on in advance with the instructor of the course.

### **Written and Oral Qualifying Examinations**

*First Stage Evaluation.* At the beginning of the second year in the program, the graduate committee reviews students' files, which include the faculty's written reports on coursework as well as grades, and instructs the vice chair to advise students as to their progress in the program. Students who entered the program with an M.A. may petition the committee to grant credit toward the 14 course requirement for graduate courses taken elsewhere; at the committee's discretion, a maximum of six such courses may be credited toward the UCLA degree.

*First Qualifying Examination.* After students satisfy the 14-course requirement (including the breadth requirement and the philology requirement), ordinarily sometime early in their third year, they take the first qualifying examination. In anticipation of the oral portion of this examination, students are asked to designate the three fields in which they are examined. At least two of these fields must be historical, chosen in most cases from among the following: Anglo-Saxon, Middle English, Renaissance, earlier 17th century, Restoration and 18th century, Romantic, Victorian, 20th-century British, earlier American, 19th-century American, 20th-century American. If students wish, the third field may be a genre or a special field:

novel, drama, poetry, literary criticism, folklore/mythology, Celtic studies, African American literature, women's writing, history of the language, rhetoric, Asian American literature. The graduate committee also considers petitions for third fields designed by students themselves and not specified on this list.

Taking into account the fields designated, the vice chair appoints three faculty members to serve as the examining committee. Before it is appointed, each student, without giving an explanation, may exempt one person from the committee. Students are told the names of their committee members approximately two weeks before the examination. At that time, students submit to them the written work from any two seminars that they feel best reflects their performance. In most cases, this means two substantial seminar papers. The committee's review of these papers constitutes the first stage of the examination. A two-hour oral examination in the three fields designated constitutes the second stage of this examination. On the basis of overall performance, the committee decides whether students passed the examination as a whole and submits the results to the graduate committee. Students may retake the examination once, but before any failed examination is retaken, the graduate committee reviews the record as a whole and offers, through the vice chair, advice on how students should proceed.

There are no fixed reading lists for this examination; the department believes that part of students' intellectual maturity at this stage should be the capacity to determine what needs to be read in a particular field. Students need to remember that an oral examination can move readily from texts that they have not read to ones that they have. For general guidance, however, the department does provide extensive lists of suggested works in each field, doing so in full recognition that most students are not able to "master" the entire lists, and that they may well use the oral examination to demonstrate knowledge of works that do not appear on the lists at all.

*Second Stage.* As soon as possible after successful completion of the first qualifying examination, students select a dissertation director and begin to prepare the dissertation prospectus. Once students advance to this stage, they may take up to eight units of English 597 either under an individual professor or the vice chair, so that they can concentrate on the prospectus. Students are also encouraged to take any seminars that might prove useful.

*Second Qualifying Examination.* After students pass the second language requirement, and they and their dissertation director conclude that they are sufficiently prepared (but no later than three quarters after they have passed the first qualifying examination), they take the second qualifying examination (also called the University Oral Qualifying Examination). The examination is administered by a committee of four, consisting of a chair and two

other members from the English Department and one member from outside the department, nominated and appointed according to the regulations governing doctoral committees. The departmental members may but need not be the same as those on the first qualifying examination committee.

At least two weeks before the examination, students must submit their prospectus to each member of the committee. The prospectus must be a substantially researched overview of the proposed dissertation. The second qualifying examination, which normally lasts for about two hours, focuses on the issues raised by the proposed dissertation and attempts to ascertain both the feasibility of the project and students' preparation for it. Though this examination concentrates on the prospectus, students should be prepared to discuss a wide range of works that bear on the proposed dissertation. Students are encouraged to consult their committee in advance of the examination. The grading on the examination is pass or fail. The candidate may, at the discretion of the committee, repeat the examination, but only one repetition is allowed.

*Third Stage.* When students pass the second qualifying examination, they may advance to candidacy and receive the Candidate in Philosophy (C.Phil.) degree. Students now proceed with the writing of the dissertation and enroll each quarter in English 599. Students are encouraged to enroll in seminars in their field whenever they are offered. All course requirements (oral reports and term papers) may be satisfied through work connected with the dissertation.

## English

### Lower Division Courses

**A. Introduction to University Discourse (No credit).** See listing under English Composition.

**2. Approaches to University Writing.** See listing under English Composition.

**3. English Composition, Rhetoric, and Language.** See listing under English Composition.

**3H. English Composition, Rhetoric, and Language (Honors).** See listing under English Composition.

**4. Critical Reading and Writing.** Enforced requisite: course 3. Introduction to literary analysis, with close reading and carefully written exposition of selections from principal modes of literature: poetry, prose fiction, and drama. Minimum of four papers (three to five pages each) and two in-class essays. P/NP or letter grading.

**4H. Critical Reading and Writing (Honors).** Enforced requisite: course 3. Introduction to literary analysis, with close reading and carefully written exposition of selections from principal modes of literature: poetry, prose fiction, and drama. Minimum of four papers (three to five pages each) and two in-class essays.

**10A. English Literature to 1660 (5 units).** Lecture, three hours; discussion, one hour. Enforced requisites: courses 3, 4. Preparation: satisfaction of Subject A requirement. Study of selected works of the period, beginning with selections from Old English poetry and including writings by Chaucer, Spenser, Shakespeare, Donne, and Milton. Minimum of three papers (three to five pages each) or equivalent.

**10B. English Literature, 1660 to 1832 (5 units).** Lecture, three hours; discussion, one hour. Enforced requisites: courses 3, 4, 10A. Preparation: satisfaction of Subject A requirement. Study of selected works of the period, including writings by Dryden, Pope, Swift, Wordsworth, and Keats. Minimum of three papers (three to five pages each) or equivalent.

**10C. English Literature, 1832 to the Present (5 units).** Lecture, three hours; discussion, one hour. Enforced requisites: courses 3, 4, 10A, 10B. Preparation: satisfaction of Subject A requirement. Study of selected works of the period, including writings by Tennyson, Arnold, Browning, Joyce, and Eliot. Minimum of three papers (three to five pages each) or equivalent.

**20. Introduction to Creative Writing.** Enforced requisite: course 3. Preparation: satisfaction of Subject A requirement, submission of creative or expository writing samples to a screening committee. Designed to introduce fundamentals of creative writing. Emphasis either on poetry, fiction, or drama, depending on wishes of instructor(s) during any given term. Readings from assigned texts and weekly writing assignments required.

**70. Major British Authors before 1800.** Preparation: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 10A or 10B. Study of selected masterpieces of English literature before 1800, including works of such writers as Chaucer, Shakespeare, Donne, Milton, Swift, Pope, Johnson, and Fielding.

**75. Major British Authors, 1800 to the Present.** Preparation: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 10B or 10C. Study of selected masterpieces of English literature from 1800 to the present, including works of such writers as Wordsworth, Coleridge, Keats, Tennyson, Dickens, Browning, Yeats, Joyce, and Eliot.

**80. Major American Authors.** Preparation: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for any courses in the 170 series. Introduction to the chief American authors, with emphasis on poetry, nonnarrative prose, and short fiction of such writers as Poe, Dickinson, Emerson, Whitman, Twain, Frost, and Hemingway.

**85. The American Novel.** Lecture, three hours; discussion, one hour. Preparation: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for any 170-series courses. Development, with emphasis on form, of the American novel from its beginning to the present day. Includes works of such novelists as Hawthorne, Fitzgerald, Faulkner, Ellison, and Morrison. P/NP or letter grading.

**88A-88Z. Lower Division Seminars: Special Topics in English.** Seminar, three hours. Limited to 15 students. Content varies; see departmental counselor for information. P/NP or letter grading.

**88A.** Medieval Literature; **88B.** Renaissance Literature; **88C.** 17th-Century Literature; **88D.** 18th-Century Literature; **88E.** Romantic Literature; **88F.** Victorian Literature; **88G.** 20th-Century British Literature; **88H.** Colonial American Literature; **88I.** 19th-Century American Literature; **88J.** 20th-Century American Literature; **88K.** History of English Language; **88L.** Folklore and Mythology; **88M.** Literature and Society.

**90. Shakespeare.** Preparation: satisfaction of Subject A requirement. Not open for credit to English majors or students with credit for course 142A or 142B. Survey of Shakespeare's plays, including comedies, tragedies, and histories, selected to represent Shakespeare's breadth, artistic progress, and total dramatic achievement.

**95A. Introduction to Poetry.** Preparation: satisfaction of Subject A requirement. Recommended for instructional credential candidates. Study of critical issues (metrics, diction, figurative language, symbolism, irony and ambiguity, form and structure) and aesthetic issues, including evaluative criteria, followed by close critical analysis of a selection of representative poems. P/NP or letter grading.

**95B. Introduction to Drama.** Preparation: satisfaction of Subject A requirement. Examination of representative plays; readings may range from Greek to modern drama. Emphasis on critical approaches to dramatic text; study of issues such as plot construction, characterization, special uses of language in drama, methods of evaluation. P/NP or letter grading.

**95C. Introduction to Fiction.** Preparation: satisfaction of Subject A requirement. Introduction to prose narrative, its techniques and forms. Analysis of short and long narratives and of critical issues such as plot, characterization, setting, narrative voice, realistic and nonrealistic forms. P/NP or letter grading.

**96. The Short Story in England and America.** Preparation: satisfaction of Subject A requirement. Historical survey of the short story as a genre, from the 19th century to the present. P/NP or letter grading.

**97H. Honors Seminar for Freshmen and Sophomores.** Seminar, three hours. Enforced requisites: courses 3, 4. Limited to 15 students. Recommended for lower division students who anticipate entering English honors program during their junior year. Content varies; see departmental counselor for information.

### Upper Division Courses

**100. Introduction to Special Topics and Genres.** Prerequisite: satisfaction of Subject A requirement. Study of a particular topic, genre, or subgenre in literature such as satire, biography, parody, or a specialized classification of literature. May be repeated for credit. P/NP or letter grading.

**M101. Gay and Lesbian Literature.** (Formerly numbered 101.) (Same as Lesbian, Gay, and Bisexual Studies M101.) Preparation: satisfaction of Subject A requirement. Late-19th- and 20th-century fiction, drama, and poetry written on gay and lesbian themes. Special emphases (on different genres and on gay male or lesbian literature) vary with individual instructors.

**M102A. Asian American Literature to 1980.** (Formerly numbered M102.) (Same as Asian American Studies M112A.) Preparation: satisfaction of Subject A requirement. Survey of Asian American literature from early period of formation to cultural nationalist movement of late 1960s and 1970s. Works of such authors as Edith Eaton, Carlos Bulosan, Hisaye Yamamoto, Louis Chu, and Maxine Hong Kingston included. P/NP or letter grading.

**M102B. Asian American Literature since 1980.** (Formerly numbered M102.) (Same as Asian American Studies M112B.) Preparation: satisfaction of Subject A requirement. Survey of contemporary Asian American literature with emphasis on its growing ethnic diversity following influx of new immigrants. Works of such authors as Theresa Cha, Bharati Mukherjee, David Wong Louie, Garrett Hongo, and Jessica Hagedorn included. P/NP or letter grading.

**103. Jewish American Fiction.** Prerequisite: satisfaction of Subject A requirement. Study of the fiction of Jewish writers in America, such as Bellow, Malamud, and Roth, focusing on encounter of Jewish ethical ideals and social values with the contemporary environment.

**M104A. Early Afro-American Literature.** (Same as Afro-American Studies M104A.) Prerequisite: satisfaction of Subject A requirement. Introductory survey of black American literature from the 18th century through World War I, including oral and written forms (folktales, spirituals, sermons; fiction, poetry, essays), by authors such as Phillis Wheatley, David Walker, Frances Harper, Frederick Douglass, Harriet Jacobs, Paul Laurence Dunbar, Charles W. Chesnut, Booker T. Washington, and Pauline Hopkins.

**M104B. Afro-American Literature from the Harlem Renaissance to the 1960s.** (Same as Afro-American Studies M104B.) Prerequisite: satisfaction of Subject A requirement. Introductory survey of 20th-century black American literature from New Negro Movement of post-World War I period to the 1960s, including oral materials (ballads, blues, speeches) and fiction, poetry, and essays by authors such as Jean Toomer, Claude McKay, Langston Hughes, Sterling Brown, Nella Larsen, Zora Neale Hurston, Richard Wright, Ann Petry, James Baldwin, and Ralph Ellison.

**M104C. Afro-American Literature since the 1960s.** (Same as Afro-American Studies M104C.) Prerequisite: satisfaction of Subject A requirement. Introductory survey of diverse forms of Afro-American literary expression produced from rise of Black Arts Movement of the 1960s to the present by writers such as Amiri Baraka, Nikki Giovanni, Alice Walker, Etheridge Knight, Toni Morrison, Martin Luther King, Jr., Paule Marshall, Ernest Gaines, Ishmael Reed, and Audre Lorde. P/NP or letter grading.

**M105A. Early Chicana/Chicano Literature.** (Formerly numbered M105.) (Same as Chicana and Chicano Studies M105A.) Preparation: satisfaction of Subject A requirement. Survey of Chicana/Chicano literature from the 16th century through Zoot Suit Riots (1943), including both oral and written forms of literary expression (corridos, folktales, essays, memoirs, novels, and poetry) by such authors as Cabeza de Vaca, Juan Seguin, Americo Paredes, and Maria Ruiz Amparo Burton. P/NP or letter grading.

**M105B. Recent Chicana/Chicano Literature.** (Formerly numbered M105.) (Same as Chicana and Chicano Studies M105B.) Preparation: satisfaction of Subject A requirement. Survey of Chicana/Chicano literature since 1943, beginning with reactions to Zoot Suit Riots and continuing through Chicana/Chicano Movimiento to contemporary literature. Drama, novels, memoirs, essays, and poetry by such authors as Luis Valdez, Cherrie Moraga, Sandra Cisneros, Rodolfo Anaya, Rolando Hinojosa, Oscar Zeta Acosta, and Ana Castillo. P/NP or letter grading.

**106. Native American Literary Studies.** Prerequisite: satisfaction of Subject A requirement. Study of Native American oral cultures through translated documents (song-poems, life-stories, myths, tales, dream visions, speeches) and/or images in writing about Native Americans (poetry, fiction, history, anthropology, sociology).

**M107A. American Women Writers.** (Same as Women's Studies M107A.) Prerequisite: satisfaction of Subject A requirement. Survey of literary works by American women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by American women.

**M107B. British Women Writers.** (Same as Women's Studies M107B.) Prerequisite: satisfaction of Subject A requirement. Survey of literary works by British women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by British women.

**M107C. Special Topics in Women and Literature.** (Same as Women's Studies M107C.) Prerequisite: satisfaction of Subject A requirement. Variable specialized studies course in women and literature, with emphasis on a period, genre, particular theme, or nonnational literary grouping.

**108A-108B. The English Bible as Literature.** Prerequisite: satisfaction of Subject A requirement. Principal literary monuments of the Old and New Testaments in King James Version. **108A.** Old Testament; **108B.** New Testament.

**108C. The English Bible as Literature: Special Topics.** Prerequisite: satisfaction of Subject A requirement. Study of the English Bible, with attention to particular literary themes, motifs, and genres. Possible discussion of influence of the Bible on discrete periods or individual authors in English literature. May be repeated for credit.

**109. Interdisciplinary Approaches to Literature.** Prerequisite: satisfaction of Subject A requirement. Study of British or American literature in relation to other disciplines such as history, politics, philosophy, psychology. May be repeated for credit.

**110. Studies in Individual Authors.** Prerequisite: satisfaction of Subject A requirement. Specialized study of the work of a single poet, dramatist, prose writer, or novelist. May be repeated for credit.

**M111A. Literature of Myth and Oral Tradition.** (Same as Folklore M111.) Prerequisite: satisfaction of Subject A requirement. Study of myth, dramatic origins, oral epic, folktale, and ballad, emphasizing Indo-European and Semitic examples.

**M111B. Anglo-American Folk Song.** (Same as Ethnomusicology M124 and Folklore CM106.) Survey of Anglo-American balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values.

**M111C. British Folklore and Mythology.** (Same as Folklore M121.) Prerequisites: satisfaction of Subject A requirement, junior standing. Survey of folklore of the peoples of Britain, with attention to their history, function, and regional differences.

**M111D. Celtic Mythology.** (Same as Folklore M122.) Lecture, three hours; discussion, one hour. Survey of early materials, chiefly literary, for study of mythic traditions of the Celtic peoples, ranging from ancient Gaul to medieval Ireland and Wales.

**M111E. Survey of Medieval Celtic Literature.** (Same as Folklore M112.) Prerequisite: satisfaction of Subject A requirement. Knowledge of Irish or Welsh not required. General course dealing with Celtic literature from earliest times to the 14th century.

**M111F. Celtic Folklore.** (Same as Folklore M127.) Prerequisite: Folklore 101 or consent of instructor. Folkloric traditions of modern Ireland, Scotland, and other Celtic countries, with attention to current techniques of folkloristic research.

**M111G. Oral Traditions in Africa.** (Same as Folklore M155.) Prerequisite: upper division standing. Survey of African folk traditions: folktale, epic, heroic poetry, and folk song.

**112. Children's Literature.** Prerequisite: satisfaction of Subject A requirement. Study of historical backgrounds and development of types of children's literature, folklore and oral tradition, levels of interest, criticism and evaluation, illustration and bibliography.

**113. Literature for Adolescents and Young Adults.** Prerequisite: satisfaction of Subject A requirement. Analysis and evaluation of literature intended mainly for students in junior and senior high schools. Review of mature books that are popularly suggested for this age group; study of interests and reading habits of young adults.

**114. World Literatures in English.** Prerequisites: satisfaction of Subject A requirement, consent of instructor. Survey of contemporary literature from English-speaking regions of the world, reviewing major genres from several countries and making cross-comparisons with the literatures. Generalizations concerning the nature of the English used by such writers. May be repeated for credit.

**115A. American Popular Literature.** Prerequisite: satisfaction of Subject A requirement. Study of main currents of popular and cultural taste as reflected in such genres as dime novels, detective fiction, and Western stories.

**115B. British Popular Literature.** Prerequisite: satisfaction of Subject A requirement. Readings in the literature of the British masses, from 16th-century broadsides to contemporary novels. Examination of social functions of literature.

**116. Science Fiction.** Prerequisite: satisfaction of Subject A requirement. Study of science fiction and speculative literatures.

**117. Detective Fiction.** Prerequisite: satisfaction of Subject A requirement. Study of British and American detective fiction and the literature of detection.

**118. Film and Literature.** Prerequisite: satisfaction of Subject A requirement. Study of interdisciplinary relationships between film and literature, including theme and structure, and focusing on cinematic adaptations of literary works.

**119. Literature of California and the American West.** Prerequisite: satisfaction of Subject A requirement. Study of literature in English dealing with exploration, settlement, and emergent cultural awareness of the Western U.S. P/NP or letter grading.

**121. History of the English Language.** Prerequisite: satisfaction of Subject A requirement. Study directed toward English majors of main features in grammatical, lexical, and phonetic condition of the English language from Indo-European time to the present.

**122. Introduction to Structure of Present-Day English.** Prerequisite: satisfaction of Subject A requirement. Introduction to techniques of linguistic description as applied to pronunciation, grammar, and vocabulary of modern English.

**133. Creative Writing: Poetry.** (Formerly numbered 133A-133B-133C.) Preparation: satisfaction of Subject A requirement, submission of writing samples. Requisites: courses 3, 4. Weekly exercises in writing of poetry, with practice in standard forms and meters and study of techniques. Classroom discussion based on student use. Enrollment in more than one section per term not permitted. May be repeated for a total of 12 units. No more than eight units may be completed with same instructor. P/NP or letter grading.

**134. Creative Writing: Short Story.** (Formerly numbered 134A-134B-134C.) Preparation: satisfaction of Subject A requirement, submission of writing samples. Requisites: courses 3, 4. Three average-length stories to be completed each term. Some stories may, with instructor's consent, be substantial revisions of other stories presented. Classroom discussion based on stories presented. Enrollment in more than one section per term not permitted. May be repeated for a total of 12 units. No more than eight units may be completed with same instructor. P/NP or letter grading.

**135. Creative Writing: Drama.** (Formerly numbered 135A-135B-135C.) Preparation: satisfaction of Subject A requirement, submission of writing samples. Requisites: courses 3, 4. Exploration of capacity of each student to write for the theater. Class discussion of student writing, individual conferences, rehearsed readings, and laboratory productions. Enrollment in more than one section per term not permitted. May be repeated for a total of 12 units. No more than eight units may be completed with same instructor. P/NP or letter grading.

**137. Advanced Computer Techniques for Students of English.** Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C, and Program in Computing 1 and 10A or consent of instructor. Concurrent instruction in writing computer programs for literary study and in the kinds of literary research that can be aided by computers. BASIC is taught; students must know how to operate a computer. Principles of computer science neither assumed nor taught.

**140A. Criticism: History and Theory.** Requisites: courses 10A, 10B. Study of some major historical documents and theoretical statements in history of literary criticism, including works by such writers as Plato, Aristotle, Horace, Sidney, Dryden, Johnson, Kant, Coleridge, Wordsworth, Shelley, Arnold, James, Croce, and T.S. Eliot, with emphasis on major critical positions posed and developed by these writers, basis of their theoretical positions, and practical consequences of those positions. Possible discussion of recent trends in criticism.

**140B. Criticism: Special Topics.** Requisites: courses 10A, 10B. Study of limited periods and specialized issues and approaches in history of literary criticism, including moral, biographical, sociological, psychological, formal, structural, and deconstructionist. Area of concentration determined by instructor and listed in *Schedule of Classes*. Some study of literary texts, to illuminate the value and practical application of the approach, may be required.

**141A. Chaucer: *The Canterbury Tales*.** Requisites: courses 10A, 10B. Introductory study of Chaucer's language, versification, and historical and literary background, including analysis and discussion of his long major poem, *The Canterbury Tales*. Satisfies department's Chaucer requirement.

**141B. Chaucer: *Troilus and Criseyde* and Selected Minor Works.** Requisites: courses 10A, 10B. Intensive study of *Troilus and Criseyde* and selected minor works of Chaucer, such as *The Book of the Duchess*, *The House of Fame*, *The Parliament of Fowls*, etc. Satisfies department's Chaucer requirement.

**142A. Shakespeare: Poems and Early Plays.** Requisites: courses 10A, 10B. Intensive study of selected poems and representative comedies, histories, and tragedies through *Hamlet*.

**142B. Shakespeare: Later Plays.** Requisites: courses 10A, 10B. Intensive study of representative problem plays, major tragedies, Roman plays, and romances.

**142C. Shakespeare: Selected Topics.** Requisites: courses 10A, 10B. Designed for students interested in further study of Shakespeare. Limits of investigation set by individual instructors.

**143. Milton.** Requisites: courses 10A, 10B. Study of major works of Milton, with emphasis on *Paradise Lost*.

**150A. Early Medieval Literature.** Preparation: satisfaction of Subject A requirement. Requisites: courses 3, 4, 10A, 10B. Reading knowledge of Old English not required. Major prose and poetry of Anglo-Saxon England (600 to 1100), including epic, romance, history, saints' lives, and travel literature. Texts and topics include *Beowulf*, Vikings, poems on women, Bede, and King Alfred. P/NP or letter grading.

**150B. Later Medieval Literature.** (Formerly numbered 150.) Requisites: courses 10A, 10B. Reading and historical explication of major writers of the 14th and 15th centuries (e.g., the Gawain-poet, Langland, Gower, Malory, miracle and morality plays, prose, and lyrics). The more difficult texts read in modernized form.

**151. Elizabethan Literature.** Requisites: courses 10A, 10B. Study of English literature of the 16th century, with special emphasis on development and interrelationships of poetry, prose, fiction, and literary theory and criticism during reign of Elizabeth I.

**152A. Drama from the Beginning to 1576.** Requisites: courses 10A, 10B. English drama from its Latin and Anglo-Norman roots to opening of first public playhouse. P/NP or letter grading.

**152B. Drama, 1576 to 1642.** Requisites: courses 10A, 10B. Non-Shakespearean English drama from opening of first public playhouse to closing of the theaters. P/NP or letter grading.

**153. Literature of the Early 17th Century, 1600 to 1660.** Requisites: courses 10A, 10B. Study of major works as literary documents and as products of 17th-century thought. Work of Milton excluded.

**154. Literature of the Restoration and Earlier 18th Century, 1660 to 1730.** Requisites: courses 10A, 10B. Study of major works as literary documents and as products of the Restoration and earlier 18th-century thought.

**155. Literature of the Later 18th Century, 1730 to 1798.** Requisites: courses 10A, 10B. Study of major works as literary documents and as products of later 18th-century thought.

**156. Drama, 1660 to 1842.** Requisites: courses 10A, 10B. Survey of English drama from the Restoration to the Licensing Act.

**157. The Novel to 1832.** Requisites: courses 10A, 10B. Survey of works of major English novelists from Defoe through Scott.

**160. Earlier Romantic Literature.** Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Intensive study of writings by Blake, Wordsworth, Coleridge, and Austen, with collateral readings from such authors as Godwin, Burke, Paine, Radcliffe, Edgeworth, Baillie, C. Smith, Burns, Southey, D. Wordsworth, Lamb, DeQuincey, and Scott.

**161. Later Romantic Literature.** Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Intensive study of writings by Byron, Keats, Percy Shelly, and Mary Shelley, with collateral readings from such authors as Hazlitt, Hunt, Landor, Clare, Moore, Peacock, Landon, Aikin, Hemans, and Prince.

**162. Earlier Victorian Poetry and Prose.** Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of poetry and prose of the Victorian age from passage of the first Reform Bill through the high Victorian period, including such authors as Tennyson, Browning, Arnold, Carlyle, Mill, and Newman.

**163. Later Victorian Poetry and Prose.** Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of poetry and prose of the later Victorian age from Pre-Raphaelitism through the aesthetic and decadent movements, along with other intellectual trends, including such authors as Ruskin, Swinburne, Pater, Hopkins, Hardy, Wilde, and Yeats.

**164. The Novel, 1832 to 1900.** Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Survey of major English novelists from Dickens through Hardy.

**165. 20th-Century British Poetry.** Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Survey of major British poets, including Yeats, Eliot, Auden, and Hughes, from 1900 to the present.

**166. 20th-Century British Fiction.** Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Survey of major British novelists and short story writers, including Conrad, Joyce, Woolf, and Lawrence, from 1900 to the present.

**167. Drama, 1842 to 1945.** Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C (for theater and film and television majors the 10A, 10B, 10C prerequisites are waived). Survey of British and American drama, with its principal continental influences, from 1842 through World War II.

**168. Drama, 1945 to the Present.** Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of British and American drama, with its principal continental influences, since World War II.

**170A. American Literature to 1775.** (Formerly numbered 170.) Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Historical survey of American literature through the Colonial period. P/NP or letter grading.

**170B. American Literature, 1775 to 1832.** (Formerly numbered 170.) Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Historical survey of American literature during Revolutionary and early republic periods. P/NP or letter grading.

**171A. American Literature, 1832 to 1865.** (Formerly numbered 171.) Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Historical survey of American literature from Jacksonian era to end of the Civil War. P/NP or letter grading.

**171B. American Literature, 1866 to 1912.** (Formerly numbered 172.) Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Historical survey of American literature from end of the Civil War to founding of *Poetry* magazine. P/NP or letter grading.

**172A. American Literature, 1912 to 1945.** Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Historical survey of American literature from founding of *Poetry* magazine to end of World War II. P/NP or letter grading.

**172B. American Literature since 1945.** Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Historical survey of American literature since end of World War II. P/NP or letter grading.

**173A. American Fiction to 1900.** Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of American fiction (both novels and short stories) from its beginning to end of the 19th century. P/NP or letter grading.

**173B. American Fiction, 1900 to 1945.** (Formerly numbered 174.) Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of American novels and short stories from beginning of the 20th century to end of World War II. P/NP or letter grading.

**173C. American Fiction since 1945.** (Formerly numbered 177.) Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of American novels and short stories since end of World War II. P/NP or letter grading.

**174A. American Poetry to 1900.** Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of American poetry from Puritan period through end of the 19th century. P/NP or letter grading.

**174B. American Poetry, 1900 to 1945.** (Formerly numbered 173.) Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of American poetry from beginning of the 20th century to end of World War II. P/NP or letter grading.

**174C. American Poetry since 1945.** (Formerly numbered 176.) Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of American poetry since end of World War II. P/NP or letter grading.

**175. American Nonfictional Prose.** Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of American nonfictional prose (essays, autobiographies, travel narratives, and other). Particular genre and/or historical period vary with instructor. P/NP or letter grading.

**176. American Drama.** Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of American drama from its beginning to the present day. Historical period may vary with instructor. P/NP or letter grading.

**177. Special Topics in American Literature.** Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Focused study of some aspect or theme in American literature. May be repeated for credit. P/NP or letter grading.

**178. Perspectives in Study of American Culture.** Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Interdisciplinary study of American literature in its relationships to other disciplines, including art, architecture, film, history, music, politics, and various social sciences, with emphasis on application of literary methodology to historical survey of American culture. May be repeated for credit.

**179. American Literature in Comparative Context.** Prerequisites: satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Study of some aspect of American literature and its relationships to other national literature. P/NP or letter grading.

Courses 180 through 189 are designed to permit a small number of students (normally 15) to engage in concentrated study in an area in which they have a particular interest and in which they have taken adequate upper division background courses. **Requisites:** satisfaction of Subject A requirement, courses 3, 4, 10A, 10B, 10C. Consult *Schedule of Classes* for author, period, genre, or subject to be studied in a specific term. For further details, see the departmental counselor. Courses may be repeated for credit.

**180. Specialized Studies in Medieval Literature.**

**180X. Specialized Studies in Literature.**

**181. Specialized Studies in Renaissance Literature.**

**182. Specialized Studies in 17th-Century Literature.**

**183. Specialized Studies in 18th-Century Literature.**

**184. Specialized Studies in Romantic Literature.**

**185. Specialized Studies in Victorian Literature.**

**186. Specialized Studies in 20th-Century British Literature.**

**187. Specialized Studies in Colonial American Literature.**

**188. Specialized Studies in 19th-Century American Literature.**

**189. Specialized Studies in 20th-Century American Literature.**

**190. Literature and Society.** Preparation: satisfaction of Subject A requirement. Requisites: courses 3, 4, 10A, 10B, 10C. Intensive study of some aspect of relationship between literature and social, economic, or political history. May be repeated for credit. P/NP or letter grading.

**196. Interracial Encounters in Contemporary American Literature.** Prerequisites: satisfaction of Subject A requirement, courses 3, 4. Study of recent literary and cinematic texts produced by people from different ethnic backgrounds living in the U.S. and providing comparative cultural perspectives on living in a multiethnic society. P/NP or letter grading.

**M197A. Topics in Afro-American Literature.** (Formerly numbered M197.) (Same as Afro-American Studies M197A.) Variable specialized studies course in Afro-American literature. Topics include the Harlem Renaissance; Afro-American Literature in the Nadir, 1890 to 1914; Contemporary Afro-American Fiction. May be repeated for credit. P/NP or letter grading.

**M197B. Topics in Chicana/Chicano Literature.** (Same as Chicana and Chicano Studies M197B.) Preparation: satisfaction of Subject A requirement. Variable specialized studies course in Chicana/Chicano literature. Topics include labor and literature; Chicana/Chicano visions of Los Angeles; immigration, migration, and exile; autobiography and historical change; Chicana/Chicano journalism; literary New Mexico; specific literary genres. May be repeated for credit. P/NP or letter grading.

**M197C. Topics in Asian American Literature.** (Same as Asian American Studies M197C.) Preparation: satisfaction of Subject A requirement. Variable specialized studies course in Asian American literature. Topics include specific genres (autobiography, poetry, or drama); specific nationalities within the Asian American community; and themes related to such problems as generational differences, gender politics, or interethnic encounters. May be repeated for credit. P/NP or letter grading.

**199. Special Studies in English (2 to 4 units).** Prerequisite: consent of instructor. Intensive directed research project. To enroll or obtain information, see departmental counselor.

**199HA. Honors Seminar.** Prerequisite: course 140A. Introduction to research techniques and study of various approaches and applications of critical methodology as it relates to interpretation and evaluation of texts.

**199HB-199HC. Honors Tutorial.** Prerequisites: course 199HA, consent of instructor. Tutorial in which students write these under direction of a faculty member. In Progress grading.

**199I. Independent Studies for Internships (2 to 4 units).** Prerequisite: consent of instructor. Independent studies course to be supervised jointly by Field Studies Office and faculty supervisor. Further supervision to be provided by business for which student is doing internship. P/NP grading.

## Graduate Courses

**200. Approaches to Literary Research.** Bibliographical tools of English and American literary scholarship; introduction to descriptive bibliography and basic methods of research. Periods covered vary.

**201A. History of Literary Criticism.** Study of major documents in Western literary theory from Plato through T.S. Eliot.

**201B. Modern Literary Criticism.** Study of developments and trends in 20th-century literary criticism.

**202. Enumerative and Descriptive Bibliography.** Problems in bibliography, texts, and editions, with practical application in compiling bibliographies, editing texts, and approaching literature through textual criticism.

**203. Computers and Literary Research.** Prior knowledge in this area not required. Practice in writing and using computer programs for analysis of literary style, content, and authorship.

**204. History of Rhetoric.** Reading of basic texts in history of rhetoric and selections from standard commentaries. Survey of classical period and medieval-to-modern period in alternate years.

**M205. Perspectives in American Folklore Research.** (Same as Folklore CM205.) Lecture, three hours. Prerequisite: Folklore 101 or consent of instructor. Examination of American folklore studies compared and contrasted with investigations in other countries, with emphasis on principal conceptual schemes and research orientations employed in study of folklore in American society.

**210. History of the English Language.** Detailed study of history, characteristics, and changing forms of the language from its origin until about 1900.

**211. Old English.** Study of Old English grammar, lexicon, phonology, and pronunciation to enable students to read the literature silently and aloud. Reading of as much of the more interesting Old English prose and poetry as can be read in a term.

**212. Middle English.** Prerequisite: course 211. Detailed study of linguistic aspects of Middle English and of representative examples of the better prose and poetry.

**213. Early Modern English.** Detailed study of phonology, morphology, syntax, and vocabulary of English between 1450 and 1750. Description and analysis of changes in the language in relation to intellectual, political, and social characteristics of the period.

**214. Modern English.** Description and analysis of modern English phonology, grammar, and vocabulary, using theory and techniques of contemporary linguistics. Survey of the evolution of American English and account of characteristic phonological and grammatical features of major regional varieties of English around the world.

**216A-216B. Old Irish.** Prerequisite: consent of instructor. Studies in grammar. Readings in the glosses and other texts. Comparative considerations.

**217A-217B. Medieval Welsh.** Prerequisite: consent of instructor. Studies in grammar. Readings in the Mabinogi and other texts. Comparative considerations.

**218. Celtic Linguistics.** Prerequisite: consent of instructor. Survey of salient features of Celtic linguistic stock in its Gaelic and British branches, with reference to position of Celtic within Indo-European languages.

**230. Workshop: Creative Writing (2 to 4 units).** Prerequisite: consent of instructor, following submission of writing samples in specified genre (poetry, fiction, or drama). May be repeated but may not satisfy more than one of the nine courses required for first qualifying examination nor any of the five courses required for second qualifying examination.

**M235. African Myth and Ritual.** (Same as Folklore M235.) Prerequisite: consent of instructor. Seminar on methods of analyzing African and African Diaspora myth and ritual.

Seminar courses (240 to the end of the 200 series) are open to all graduate students with adequate preparation and may be repeated for credit. Students must pre-enroll with the graduate counselor. Continuing students must sign up for seminars before the end of the preceding term. A prospectus announcing topics for all seminars is available in the department office in early summer for the ensuing academic year.

**240. Studies in History of the English Language.** Individual seminars dealing with any single historical period from Old English period to the present or development of a particular linguistic characteristic (phonology, syntax, semantics, dialectology) through various periods.

**241. Studies in Structure of the English Language.** Prerequisite: consent of instructor. Topics in various aspects of structure of modern English, especially syntax and semantics.

**242. Language and Literature.** Application of linguistics to literary analysis. Individual seminars dealing with a historical period (medieval and Renaissance, neoclassical, or 19th century and modern), specific authors, or contributions of specific groups of linguists to literary analysis.

**M243A. The Ballad.** (Same as Folklore M243A.) Prerequisite: consent of instructor. Study of English and Scottish popular ballads and their American derivatives, with some attention to European analogues.

**M243B. Problems in Ballad Scholarship.** (Same as Folklore M243B.) Prerequisite: course M243A or consent of instructor. Intensive investigation of a problem or problems in study of the popular ballad.

**244. Old and Medieval English Literature.** Studies in poetry and prose of Old and medieval English literature; limits of investigation set by individual instructor.

**245. Chaucer.**

**246. Renaissance Literature.** Studies in poetry and prose of Renaissance English literature, exclusive of Shakespeare; limits of investigation set by individual instructor.

**247. Shakespeare.**

**248. Earlier 17th-Century Literature.** Studies in poetry and prose of 17th-century English literature up to the Restoration; limits of investigation set by individual instructor.

**249. Milton.** Studies in poetry and prose of John Milton; limits of investigation set by individual instructor.

**250. Restoration and 18th-Century Literature.** Studies in English poetry and prose, 1660 to 1800; limits of investigation set by individual instructor.

**251. Romantic Writers.**

**252. Victorian Literature.** Studies in English poetry and prose of the Victorian period; limits of investigation set by individual instructor.

**253. Contemporary British Literature.**

**254. American Literature to 1900.** Studies in Colonial and 19th-century American literature; limits of investigation set by individual instructor.

**255. Contemporary American Literature.** Studies in contemporary American poetry and prose; limits of investigation set by individual instructor.

**256. Studies in the Drama.** Studies in drama as a genre from its beginning to the present; limits of investigation set by individual instructor.

**257. Studies in Poetry.** Studies in various themes and forms of poetry from Old English to the present; limits of investigation set by individual instructor.

**258. Studies in the Novel.** Studies in evolution of the genre from its beginning to the present; limits of investigation set by individual instructor.

**259. Studies in Criticism.**

**260. Studies in Literature and Its Relationship to the Arts and Sciences.** Studies in interrelationships of literature, arts, and sciences; limits of investigation set by individual instructor.

**M260A. Topics in Asian American Literature.** (Same as Asian American Studies M297A.) Lecture, three hours. Graduate seminar that examines and critically evaluates writings of Asian Americans.

**M262. Studies in Afro-American Literature.** (Same as Afro-American Studies M200E.) Prerequisite: consent of instructor. Intensive research and study of major themes, issues, and writers in Afro-American literature. Discussions and research on aesthetic, cultural, and social backgrounds of Afro-American writing. May be repeated for credit.

**263. Celtic Literature.** Lecture, three hours. Prerequisite: knowledge of one of the ancient or modern Celtic languages. Studies in poetry and prose of early and modern Celtic literatures, chiefly Irish and Welsh; limits of investigation set by individual instructor.

**264. Studies in Rhetoric.** Discussion, three hours. Special topics in classical and modern rhetoric, including substantial practice in rhetorical analysis of literary texts.

**M266. Cultural World Views of Native America.** (Same as American Indian Studies M200B.) Seminar, three hours. Exploration of written literary texts from oral cultures and other expressive cultural forms — dance, art, song, religious and medicinal ritual — in selected Native American societies, as these traditional and tribal contexts have been translated into contemporary literary texts (fiction, poetry, essay, and drama). Survey, from secondary sources, of interdisciplinary methodological approaches taken from literary analysis, structural anthropology, folklore, linguistics, and ethnomusicology. May be repeated for credit with instructor and/or topic change.

**272. Current Issues in Teaching English.** Focus on one of a variety of topics of special current interest.

**M298. Interdisciplinary Studies in the 17th and 18th Centuries.** (Same as History M298.) Topics vary according to participating faculty.

**M299. Interdisciplinary American Studies (6 units).** (Same as History M299.) Discussion, four hours. Readings, discussion, and papers on a common theme, team-taught by faculty from different departments. Topics vary according to participating faculty. May be repeated for credit with consent of instructors.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May not be substituted for any departmental enrollment requirements. May be repeated for credit. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study (2 to 4 units).** Prerequisite: consent of instructor. For students preparing for first qualifying examination or engaging in intensive directed research project. May not be applied toward any course requirement for degree. Consult graduate counselor to enroll or obtain information. S/U grading.

**597. Preparation for Ph.D. Examinations (4 to 12 units).** For second-stage Ph.D. students preparing for second qualifying examination. S/U grading.

**598. M.A. Research and Thesis Preparation (4 or 8 units).** Prerequisite: graduate standing. May not be applied toward any course requirement for degree. S/U grading.

**599. Ph.D. Dissertation Research (4 or 8 units).** Limited to Ph.D. candidates unable to enroll in seminars in their fields or to candidates concurrently enrolled in such seminars. (Exception to this rule must be requested by petition.) S/U grading.

## Scope and Objectives

Students need writing proficiency at every stage of their university careers. Although UCLA does not have a composition major, this program offers a series of courses introducing the varieties of university discourse and providing instruction in basic to high-level skills. Besides courses which satisfy the University's Subject A and English Composition requirements, the program offers writing courses linked with courses in other departments, intermediate and advanced courses in exposition, and language and composition courses for teachers. Special programs include the First-Year Intensive Program (FIPW) and the Transfer Intensive Program (TIP).

## Undergraduate Study

### Subject A

Every student who does not satisfy the Subject A requirement by presenting transfer credit or acceptable test scores is required to take, as early as possible during the first year in residence, either English A or 2. Placement in these courses is determined by performance

on the Subject A Examination. For more information regarding Subject A, see Undergraduate Degree Requirements in the Undergraduate Study section of this catalog.

## Composition Requirement

The College of Letters and Science and each of the University's professional schools set their own composition requirement. Completing English 3 with a grade of C or better meets the requirement in all divisions. For further information about the composition requirement, see the introductory copy for the college or school.

Students who score 700 or better on the SAT II Subject Test in Writing are eligible to take the English 3 Proficiency Examination. Outstanding performance on this examination fulfills the composition requirement. For further information, contact the Student Services Office.

## English Composition

### Lower Division Courses

**A. Introduction to University Discourse (No credit).** Lecture, five hours. Preparation: appropriate score on Subject A Examination. English A displaces four units on student's Study List but yields no credit toward a degree. First course in reading university-level texts and framing written responses that employ a range of rhetorical strategies from paraphrase to analysis. Emphasis on revision, developing syntactic variety and academic vocabulary, and editing for grammar and style. Completion of this course with a grade of C or better or demonstration of minimum competence on Subject A Examination is requisite to English 2.

**2. Approaches to University Writing.** Requisite: course A (C or better) or appropriate score on Subject A Examination. Second course in university-level discourse, with analysis and critique of university-level texts. Emphasis on revision for argumentative coherence and effective style. Completion of this course with a grade of C or better meets Subject A requirement.

**3. English Composition, Rhetoric, and Language.** Lecture, three hours. Enforced requisite: course 2 or English as a Second Language 35 (C or better). Preparation: satisfaction of Subject A requirement. Rhetorical techniques and skillful argument. Analysis of varieties of academic prose and writing of a minimum of five formal papers (three to five pages each). Completion of this course with a grade of C or better satisfies English Composition requirement.

**3H. English Composition, Rhetoric, and Language (Honors).** Lecture, three hours. Preparation: satisfaction of Subject A requirement. Rhetorical techniques and skillful argument. Analysis of varieties of academic prose and writing of a minimum of five formal papers (three to five pages each).

### Upper Division Courses

**100. Interdisciplinary Academic Writing.** (Formerly numbered 129.) Prerequisites: satisfaction of Subject A and English Composition requirements, sophomore standing or consent of instructor. Course in academic writing suitable for both lower and upper division students that helps them develop academic papers with a range of complexity and length. Focus on conventions of academic prose and genres across the disciplines. Written assignments include common forms of academic writing such as argument, research paper, and/or critical essay.

**110W. Writing Adjunct.** Prerequisite: satisfaction of Subject A and English Composition requirements. Students must be concurrently enrolled in a course offered in conjunction with English 110W (consult *Schedule of Classes* for courses so designated). Writing assignments use materials from adjunct course and reflect and develop analytic writing skills needed in that course. May be repeated for credit with consent of instructor. P/NP or letter grading.

**120A. Language Study for Teachers: Elementary School.** Prerequisite: satisfaction of Subject A and English Composition requirements. Survey of topics in English linguistics of special interest to elementary school teachers. Subjects include approaches to English grammar; language acquisition and development; language attitudes; regional and social dialects of American English; bilingual schooling; contribution of English language study to teaching of reading, writing, spelling, and literature.

**120B. Language Study for Teachers of English: Secondary School.** Prerequisite: satisfaction of Subject A and English Composition requirements. Review of terminology of English grammar and survey of development of modern grammars, with special attention to transformational-generative grammar. Introduction to basic concepts in sociolinguistics, dialectology, and stylistics, especially as applied to analysis and evaluation of writing assigned in secondary school.

**120C. Language Study for Teachers of Subjects Other Than English: Secondary School.** Prerequisite: satisfaction of Subject A and English Composition requirements. Introduction for teachers of subjects other than English to basic concepts in language acquisition, dialectology, sociolinguistics, and composition.

**129A-129D. Academic Writing in the Disciplines.** (Formerly numbered 100W.) Designed for juniors/seniors. Advanced study of writing conventions in specific disciplinary areas, with focus on analysis and development of writing expertise in common discursive forms, stylistic patterns, and research practices in the given discipline. Each course may be taken independently for credit. P/NP or letter grading. **129A.** Literature; **129B.** Social Sciences; **129C.** Physical and Life Sciences; **129D.** Fine Arts.

**130A. Composition for Teachers: Elementary School.** Prerequisite: satisfaction of Subject A and English Composition requirements. Preparation for future elementary school teachers of English composition in writing and criticism of the kinds of prose discourse usually taught in primary schools.

**130B. Composition for Teachers: Secondary School.** Prerequisite: satisfaction of Subject A and English Composition requirements. Preparation for future secondary school teachers of English composition in writing and criticism of the kinds of prose discourse usually taught in secondary schools.

**131A-131D. Specialized Writing.** (Formerly numbered 131A-131J.) Preparation: satisfaction of Subject A and English Composition requirements. Designed for juniors/seniors. Advanced writing course designed to help students develop stylistic, formal, and argumentative sophistication in various rhetorical contexts, including different sections that emphasize rhetorical values of major professions and research areas. Each course may be taken independently for credit. P/NP or letter grading. **131A.** Law and Politics; **131B.** Business and Social Policy; **131C.** Medicine and Public Health; **131D.** Media and Communications.

**132A-132D. Topics in Rhetoric and Writing.** (Formerly numbered 132.) Prerequisites: satisfaction of Subject A and English Composition requirements, upper division standing. Study of specific topics in relationship between rhetoric/writing and social or political history. Each course may be taken independently for credit. P/NP or letter grading. English majors who wish to use course to satisfy departmental prerequisites must take it for a letter grade. **132A.** Gender and Writing; **132B.** Autobiographical Writing; **132C.** Cultural Studies; **132D.** Variable Topics.

**136A-136B-136C. Practical Writing and Editing.** Lecture, three hours. Prerequisites: satisfaction of Subject A requirement, course 3, one course from 131 series, consent of instructor. Sequence in practical writing and editing ability specifically designed to prepare students for a career. Analysis of prose and literary styles necessary to the variety of writing in professional, nonacademic fields combined whenever possible with practical experience in a variety of writing internships and training in a wide range of editorial skills. In Progress grading for courses 136A-136B only.

**197F. Rhetoric in Modern American Culture.** Seminar, three hours. Requisite: course 100. One-term field studies course designed to provide students with academic background in and firsthand knowledge of media writing. P/NP or letter grading.

## Graduate Courses

**300. Teaching English.** Required of candidates for single subject credential in English. Study of theories of rhetoric, composition, reading, and literature as they apply to secondary school English curriculum.

**495A-495B. Supervised Teacher Preparation (2 units each).** Discussion, one hour; laboratory, 30 minutes. In Progress and S/U grading. **495A.** Required of all applicants for a teaching assistantship in English. Practical concerns of designing a course, creating assignments, grading papers, and holding conferences for English 3 classes. **495B.** Must be taken concurrently with first teaching assignment. Examination of specialized problems which occur in teaching English 3 and introduction to techniques for teaching English 2 and ESL.

**495C. Supervised Teacher Preparation (2 units).** Prerequisites: courses 495A-495B. S/U grading.

# ENVIRONMENTAL HEALTH SCIENCES

*School of Public Health*

UCLA

Frank C. Gomez, Dr.P.H.  
Mario Panaqua, B.A.  
Walter Wegst, Ph.D.

## Adjunct Assistant Professors

Edward J. O'Neill, M.D., M.P.H.  
David M. Pekelney, Ph.D.  
Diane L. Saber, Ph.D.

## Assistant Field Program Supervisor

Diane M. Perry, Ph.D. (*International Environmental Health*)

## Scope and Objectives

The Department of Environmental Health Sciences focuses its research and educational activities on the protection of human health from biological, chemical, and physical hazards in the environment. Its graduates are highly trained scientists and professionals capable of identifying and measuring agents of environmental concern; evaluating the health, environmental, and all other impacts of such agents; developing means for their effective management; and evaluating alternative policies directed at improving and protecting environments. Such training is accomplished through several degree programs which offer specialized study in selected academic areas of environmental health sciences such as air pollution, environmental chemistry, environmental management, environmental toxicology, industrial hygiene, and water quality. Graduates of the department pursue careers in the private or public sector as researchers, educators, managers, policymakers, and/or practitioners.

The department offers M.S. and Ph.D. degrees in Environmental Health Sciences and, through the School of Public Health, the M.P.H. and Dr.P.H. degrees with a specialization in environmental health sciences (see Public Health Schoolwide Programs). In addition, a unique doctoral degree (Doctor of Environmental Science and Engineering — D.Env.) is offered by the interdepartmental Environmental Science and Engineering Program which is administered through the department.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

Applicants who expect to concentrate in environmental health sciences should have a bachelor's (or master's) degree in chemistry, physics, biology, engineering, or other appropriate field. Preparation should include at least three quarters of general chemistry (including quantitative analysis) and two quarters of organic chemistry and/or biochemistry, mathematics

through calculus, three quarters of biological sciences, and three quarters of physics. Substitutions for these requirements are considered for applicants with an otherwise superior academic background.

See the Master of Public Health (M.P.H.) Admission section under Public Health Schoolwide Programs. Admission requirements for the Master of Science in Environmental Health Sciences are the same as for the M.P.H.

### Areas of Study

Consult the graduate adviser.

### Course Requirements

Students must complete at least one year of graduate residence at the University of California and a minimum of 10 full courses, at least five of which must be graduate courses in the 200 or 500 series. Only one 596 course (four units) and one 598 course (four units) may be applied toward the total course requirement; only four units of either course may be applied toward the minimum graduate course requirement. Environmental Health Sciences 597 may not be applied toward the degree requirements. No more than 18 full courses are required for the degree.

Mandatory schoolwide core courses include Biostatistics 100A, 100B, and Epidemiology 100. Each core course may be waived if the student has taken a similar course elsewhere and can pass the waiver examination.

Mandatory departmental core courses include Environmental Health Sciences 101, 201, 210, 230, 240, 250 (may be repeated for credit), 410A, 410B, M411, 598 (a maximum of one course may be applied toward the minimum total course requirement). In addition, elective courses should be selected in the student's area of specialization (e.g., air pollution, environmental chemistry, environmental management, environmental toxicology, industrial hygiene, water quality). Each core course can be waived if the student has taken a similar college-level course elsewhere and can pass the waiver examination.

Only courses in which a grade of C – or better is received may be applied toward the requirements for a master's degree. Students must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

In addition to the above course requirements students must complete a thesis (Plan I) or a project and take a comprehensive examination (Plan II).

### Comprehensive Examination Plan

If the comprehensive examination/report option (Plan II) is approved, the candidate completes a research activity (Environmental Health Sciences 596) of at least eight units in addition to the course requirements and prepares an in-depth written report which must be approved by the adviser and one other faculty member. A written comprehensive examination on the major area of study must be

passed. The examination is prepared by a committee of at least three faculty members. If the examination is failed, the student may be reexamined once.

### Thesis Plan

If the thesis option (Plan I) is approved, a thesis committee of three faculty members is established. The committee approves the thesis prospectus before the student files for advancement to candidacy. The thesis must be acceptable to the thesis committee.

## Doctoral Degree

### Admission

In addition to the University minimum requirements, the department requires (1) a bachelor's degree in chemistry, physics, biology, engineering, or other appropriate field. Preparation should include at least one year of chemistry (including organic chemistry or biochemistry), physics, biology, and mathematics through calculus; (2) a master's degree in a related field with a grade-point average of at least 3.5 for graduate studies; (3) a combined Graduate Record Examination (GRE) score of 1,200 for the verbal and quantitative sections, or 1,800 for the verbal, quantitative, and analytical sections; and (4) a score of at least 580 on the Test of English as a Foreign Language (TOEFL) for students whose undergraduate degree is from an institution whose primary language of instruction is not English.

Alternatively, for students who do not have a master's degree and wish to pursue a doctoral degree, the department requires (1) a junior/senior grade-point average of 3.25 (or other evidence of exceptional scholarship); (2) a combined Graduate Record Examination (GRE) score of 1,200 for the verbal and quantitative sections, or 1,800 for the verbal, quantitative, and analytical sections; (3) acceptance by a doctoral adviser in the department subsequent to filing the application for admission; and (4) a score of at least 580 on the Test of English as a Foreign Language (TOEFL) for students whose undergraduate degree is from an institution whose primary language of instruction is not English.

### Major Fields or Subdisciplines

Consult the graduate adviser.

### Course Requirements

The courses needed to pass the written examination in the major field depend on the field chosen.

Courses in the major field as recommended by the adviser and guidance committee are required, as are courses in a minor field related to environmental health sciences in a department outside the School of Public Health that grants a Ph.D. or in the Department of Biostatistics. This usually consists of three or four full courses, as specified by the department offering the minor.

For students who do not have a master's degree in the field of public health, the minimum

course requirements also include a full course in epidemiology, two full courses in biostatistics, and Environmental Health Sciences 101.

### Written and Oral Qualifying Examinations

Before advancement to candidacy, students must pass a written examination in the major field and the University Oral Qualifying Examination. Normally no more than one reexamination is allowed. Students must also complete the requirements in the minor field set forth by the offering department.

A doctoral committee, consisting of at least four faculty members who hold professorial appointments at UCLA, is nominated when the student is ready to take the University Oral Qualifying Examination. Two of the faculty must be tenured. Three of the four must hold appointments in Environmental Health Sciences; one must be an outside member who holds no appointment in Public Health; one of the four must be from the minor field.

At least two members of the doctoral committee (one from Environmental Health Sciences and one from another department) must hold the Ph.D. degree. The doctoral committee administers the oral qualifying examination after the student has successfully completed the written examination, advises the student on the course of study, and reviews the dissertation.

After passing the University Oral Qualifying Examination, the student may be advanced to candidacy and commence work on a dissertation in the principal field of study. The doctoral committee guides the student's progress toward completion of the dissertation.

## Environmental Health Sciences

### Upper Division Courses

**100. Introduction to Environmental Health.** Lecture, three hours; discussion, one hour. Prerequisites: one course each in chemistry and biology, consent of instructor. Introduction to environmental health, including coverage of sanitary principles and chronic and acute health effects of environmental contaminants.

**101. Environmental Health.** Lecture, three hours; discussion, one hour. Prerequisites: one course each in chemistry and biology, consent of instructor. Broad coverage of environmental health, including airborne and waterborne pollutants; pollutants from urban industrial and agricultural wastes; pollution from pesticide chemicals, mining, and energy production and consumption; chemical food additives; and occupational exposure to chemical and physical hazards.

**199. Special Studies (2 to 4 units).** Prerequisites: senior standing, consent of instructor and department chair (based on written proposal outlining course of study). Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only four units may be taken each term.

## Graduate Courses

**201. Seminar: Health Effects of Environmental Contaminants (2 units).** Prerequisites: courses 101, 210, 230, 250, consent of instructor. Emphasis on health effects of air, water, environmental pollutants on man and review of research literature. May be repeated for credit.

**202. Seminar: Environmental Chemistry (2 units).** Seminar, one hour. Prerequisites: courses 100 or 101, 410A, and 410B, or consent of instructor. Environmental chemistry aspects of environmental health sciences through multimedia analyses and biological and microbiological analyses. May be repeated for credit.

**203. Seminar: Ecotoxicology (2 units).** Discussion of various topics in ecotoxicology. Topics vary from term to term and include aspects of environmental chemistry, toxicology, and ecology. May be repeated for credit. S/U grading.

**210. Public Health and Environmental Microbiology.** Lecture, three hours. Prerequisites: one course each in biology, organic chemistry, and biochemistry, consent of instructor. Basic principles: cycling of matter, fates of natural and man-made compounds in the environment, wastewater and drinking water microorganisms and treatment, and public health microorganisms.

**211. Science and Politics of Environmental Regulation.** Lecture, three hours. Prerequisite: consent of instructor. Analysis of how science, law, administration, economics, and politics influence state and national environmental regulation from formulation to implementation, including rule making, public participation, federalism, enforcement, and judicial review.

**212. Applied Ecology.** (Formerly numbered Environmental Science 298B.) Prerequisite: one ecology course or consent of instructor. Application of ecological theory and principles to solve environmental problems, including conservation biology, assessment of environmental impacts, and restoration ecology and mitigation of environmental impacts.

**220. Biological Effects of Air Pollution.** Lecture, three hours; discussion, one hour. Prerequisites: one course each in chemistry and biology, consent of instructor. Survey of biological effects and assessment methods of air contaminants present in urban, industrial, and occupational environments.

**225. Atmospheric Transport and Transformations of Airborne Chemicals.** Prerequisites: science, engineering, or public health major, one year of calculus, and one course each in physics, organic chemistry, and physical chemistry, or consent of instructor. Role of regional or long-range transport, and atmospheric lifetimes and fates of airborne chemicals in phenomena such as photochemical smog, acid deposition, stratospheric ozone depletion, accumulation of greenhouse gases, and regional and global distribution of volatile toxic compounds.

**230. Environmental Management.** Lecture, four hours; discussion, one hour. Prerequisites: Economics 100, Political Science 142 or 143, Mathematics M112A, 115A, or equivalent. Introduction to foundations and principles of environmental management, decision making, and evaluation of environmental policies and programs.

**231. Environmental Decision Systems Analysis.** Lecture, four hours; discussion, one hour. Prerequisite: course 230. Techniques and models of systems analysis and concepts of general system theory as applied to comprehensive study, planning, evaluation, and management of environmental decision systems. Experimentation with relevant computer programs.

**232. Environmental Policy Decision Making.** Prerequisites: courses 230, 231, consent of instructor. Foundations, principles, and modeling of environmental policy decision making. Critical analysis of normative and behavioral models of action choices for protection and enhancement of environmental health, and development of an alternative model.

**235. Quantitative Methods for Environmental Assessment.** Lecture, four hours; discussion, one hour. Prerequisites: bachelor's degree in science, engineering, or public health, one term of statistics, and one year of advanced mathematics, or consent of instructor. Introduction to quantitative methods for evaluating health effects and environmental impacts of human activities; concepts of environmental assessments and planning. Assignments include statistics analysis, risk assessment, economic methods. Examples from U.S. and California regulations, policy, project environmental assessments.

**M239. Pollution Prevention (2 units).** (Same as Urban Planning M262C.) Seminar, one hour. Designed for graduate students. Series of talks by academics, policymakers, industry representatives, and public interest advocates addressing opportunities for and obstacles to adopting principles of pollution prevention, including several case studies of specific policy and industry initiatives in this area. S/U grading.

**240. Fundamentals of Toxicology.** Prerequisites: one course each in biology, organic chemistry, and biochemistry. Essential aspects of toxicology, with emphasis on the human species. Absorption, distribution, excretion, biotransformation, as well as basic toxicologic processes and organ systems.

**241. Environmental Toxicology: Trace Contaminants.** Lecture, three hours; discussion, one hour. Prerequisite: one organic chemistry course. Essentials of toxicology in relation to trace contaminants.

**242. Toxicodynamics.** (Formerly numbered 298C.) Lecture, two hours; discussion, two hours. Requisite: course 240. Examination of biochemical, cellular, and molecular mechanisms by which chemicals induce toxicity in a wide spectrum of organ systems and in a number of pathological conditions.

**M249. Toxics Reduction: Science, Engineering, and Policy Issues.** (Same as Chemical Engineering M290U and Urban Planning M262A.) Lecture, three hours. Requisites: Urban Planning 260A, 260B. Public health experts, industrial engineers, and planners are being asked to assess risks biologically active chemicals present and to take such risks into account in planning process. Examination of potential for toxics reduction and current state of government and industry activities in this area.

**250. Introduction to Occupational Safety and Health.** Prerequisite: consent of instructor. Scientific, legal policy, and historical issues in occupational health. Introduction to various related disciplines (e.g., occupational medicine, nursing, industrial hygiene, toxicology, epidemiology, health education).

**251. Introduction to Occupational Medicine (3 units).** Prerequisites: course 250, consent of instructor. Introduction to health effects of occupational exposures, including recognition, evaluation, and prevention of occupational diseases. Emphasis on concepts of disease mechanisms, manifestations, and prevention.

**252D. Properties and Measurement of Airborne Particles.** Prerequisites: one year each of chemistry, physics, and calculus. Basic theory and application of aerosol science to environmental health, including properties, behavior, sampling, and measurement of aerosols and quantitative problems.

**252E. Identification and Measurement of Gases and Vapors.** Lecture, three hours; discussion, one hour; other, two hours. Prerequisites: course 250, one year each of chemistry, physics, and calculus, consent of instructor. Theoretical and practical aspects of industrial hygiene sampling and measurement of gases and vapors.

**252F. Industrial Hygiene Measurements Laboratory (3 units).** Corequisites: courses 252D, 252E. Limited to industrial hygiene majors. Laboratory methods for sampling, measurement, and analysis of gases, vapors, and aerosols found in occupational environment.

**252G. Industrial and Environmental Hygiene Assessment.** Lecture, one hour; discussion, two hours; laboratory, two hours; other, four hours. Prerequisites: courses 101, 250, 252D, 252E, 252F. Environmental and industrial hygiene sampling strategies and assessment via walk-through surveys, lectures, group discussion, actual field measurements, laboratory calibrations, and analyses and reports, with emphasis on chemical, physical, and ergonomic hazards.

**253. Physical Agents in the Work Environment (2 units).** Prerequisites: course 250, one year of physics, consent of instructor. Physics, measurement methods, health effects, and control methods for radiation (ionizing and nonionizing), noise, and heat in the workplace environment.

**254. Health Hazards of Industrial Processes.** Lecture, two hours; four field trips. Prerequisites: courses 250, 255, consent of instructor. Industrial processes and operations and occupational health hazards that arise from them.

**255. Control of Airborne Contaminants in Industry.** Lecture, two hours; laboratory, two hours. Prerequisites: courses 250, 252D, one year of physics, consent of instructor. Principles and applications of control technology to industrial environments, including general and local exhaust ventilation, air cleaning equipment, and respiratory protection.

**256. Biological and Health Surveillance Monitoring in Occupational/Environmental Health.** Lecture, three hours; discussion, one hour; assignments, three hours. Principles and applications of biological monitoring and health surveillance to assess occupational and environmental exposures to organic and inorganic chemicals and physical factors.

**257. Critical Review of Scientific Basis of Occupational Standards.** Prerequisites: courses 240, 250, 251, Epidemiology 100, consent of instructor. Designed to provide students with opportunity to review scientific basis for association of selected occupational exposures with disease. Special emphasis on critical evaluations of the literature. Attention specifically to interface of science and regulatory standards.

**258. Identification and Analysis of Hazardous Wastes.** Lecture, three hours; discussion, one hour; laboratory, one hour; one field trip. Prerequisites: courses 250, 252E, Biostatistics 100A, consent of instructor. Designed to define, identify, label, and quantify hazardous wastes and how workers should be protected. Provides a critical understanding of all analytical aspects of hazardous wastes, health aspects, and regulation and practice of handling hazardous wastes.

**259. Occupational Ergonomics (2 units).** (Formerly numbered 298A.) Prerequisite: course 250. Exploration of ergonomic principles for study of worker's safety, health, and performance.

**259C. Seminar Series: Occupational Ergonomics (2 units).** (Formerly numbered 298C.) Prerequisites: courses 250 and 259, or consent of instructor. Emphasis on research methodology as applied to prevention and control of worker-related musculoskeletal disorders. Topics include applied anthropometry, biomechanical modeling, strength measurement, postural analysis, fatigue, and medical surveillance of cumulative trauma disorders. S/U grading.

**259D. Introduction to Occupational Safety (2 units).** (Formerly numbered 298A.) Prerequisite: graduate standing. Design and modification of products and industrial manufacturing processes to eliminate or control hazards arising out of mechanical, electrical, thermal, chemical, and potential energy sources.

**261. Chemical Behavior of Aquatic Systems.** Lecture, three hours. Prerequisites: course 101, Chemistry 11A, 11B, Mathematics 3A. Chemistry of ocean waters, rivers, groundwaters, and water treatment systems. Topics include thermodynamics of natural waters, acids and bases, carbon dioxide cycle, solubility reactions, oxidation and reduction, plus applied problems.

**262. Environmental Microbiology.** Lecture, three hours. Prerequisites: one course each in microbiology and biochemistry. Basic concepts of eutrophication, indicator organisms, aquatic microbes; assessment of biological treatment practices in water reuse and/or purification.

**263. Geochemistry of Groundwater (2 units).** Prerequisites: Biostatistics 100A, Chemistry 11A, 103, Earth and Space Sciences 1, consent of instructor. Geochemistry of groundwater as impacted by the geologic environment and other natural factors and changes in composition due to water use.

**264. Fate and Transport of Organic Chemicals in the Aquatic Environment.** Prerequisite: bachelor's degree in science, engineering, geophysics, chemistry, biology, or public health. Evaluation of how and where and in what form and concentration organic pollutants are distributed in aquatic environments. Study of mass transport mechanisms moving organic chemicals between phases, biological degradation and accumulation, and chemical reactions. Effect of humic substances on these processes.

**400. Field Studies in Environmental Health Sciences (2 or 4 units).** Prerequisite: consent of instructor. Field observation and studies in selected community environmental health organizations. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; four units may be applied toward 44-unit minimum total required for M.P.H. degree.

**401. Environmental Measurements.** Lecture, two hours; laboratory, four hours. Prerequisites: course 101, Chemistry 11A, 11CL, consent of instructor. Instrumental methods for laboratory and field applications to assess quantity of environmental pollutants in air, food, and water, and to assess degree of exposure to such factors as noise and radiation.

**410A. Instrumental Methods in Environmental Sciences.** Lecture, four hours; discussion, two hours; other, two hours. Prerequisites: one year each of physics, chemistry, and biology, consent of instructor. Theory and principles of instrumental methods through lectures and group discussions.

**410B. Instrumental Methods Laboratory in Environmental Health Sciences.** Lecture, one hour; discussion, one hour; laboratory, four hours; other, two hours. Prerequisites: course 101, one year each of physics, chemistry, and mathematics, consent of instructor. Laboratory techniques and instrumentation used in preparation and analysis of biological, environmental, and occupational samples.

**M411. Environmental Health Sciences Seminar (2 units).** (Same as Environmental Science M411.) Prerequisite: consent of instructor. Required of graduate students in environmental health sciences for one term each year. Current topics in environmental health sciences and environmental science and engineering. May be repeated for credit. S/U grading.

**461. Water Quality and Health.** Lecture, three hours; discussion, one hour. Prerequisites: courses 101, 401, consent of instructor. Introduction to water quality, with coverage of hydrology, water chemistry, and various chemical contaminants that may affect human health. Various treatment methods and health implications.

**462. Environmental Hygiene and Appropriate Technologies (2 units).** Prerequisite: consent of instructor. Environmental sanitation of water supplies in rural and developing areas. Review of water quality problems and solutions for nonurban, developing community. Technical, socioeconomic, and cultural problems associated with maintenance and delivery of high water quality.

**470. Environmental Hygiene Practices (2 units).** Prerequisites: courses 101, 230, 401, Epidemiology 100, consent of instructor. Field principles and practices of environmental sanitation as applicable to the sanitarian. Topics include theory, code enforcement, and inspection procedures for applicable environmental topic areas.

**495. Teacher Preparation in Environmental Health Sciences (2 units).** Prerequisites: 18 units of cognate courses in area of specialization, consent of department chair. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

**596. Directed Individual Study or Research (2 to 8 units).** Prerequisites: graduate standing, consent of instructor. Individual guided studies under direct faculty supervision. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit.

**597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations (2 to 8 units).** Prerequisites: graduate standing, consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**598. Master's Thesis Research (2 to 8 units).** Prerequisite: consent of instructor. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

**599. Doctoral Dissertation Research (2 to 8 units).** Prerequisite: consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

## Scope and Objectives

The UCLA Environmental Science and Engineering (ESE) Program was founded in 1973 by Nobel laureate Dr. Willard Libby, who perceived a need to train environmental scientists, engineers, and policymakers in a more interdisciplinary manner than is afforded by traditional Ph.D. programs. As the program enters its third decade, Dr. Libby's vision has in fact been realized with the evolution of the program from an experimental approach into a key component of the overall effort to train environmental professionals at UCLA.

To date the program has awarded the Doctor of Environmental Science and Engineering (D.Env.) degree to over 170 students, and UCLA remains unique in the country in awarding such a degree. Many graduates have gone on to occupy critical positions in environmental research, remediation, and policy throughout the major environmental agencies in California and the nation. Other graduates have risen to senior positions in private sector companies conducting environmental research and remediation. Still other graduates are applying scientific solutions to environmental problems at national laboratories such as Oak Ridge and Lawrence Livermore Laboratories and at research institutes such as the RAND Corporation.

Although participating interdepartmental faculty members are mainly from the College of Letters and Science and the School of Engineering and Applied Science, the program is administered through the School of Public Health where a core faculty is based in the Department of Environmental Health Sciences. No undergraduate major or master's degree is offered.

The program is designed to train multidisciplinary professionals with an appropriate balance of breadth and specific skills, based on a

strong master's-level foundation in a science or engineering discipline. The curriculum consists of formal coursework across a full spectrum of relevant physical, biological, social, and engineering disciplines, as well as interdisciplinary research training through nine-month problems courses. Because the D.Env. degree is not a specialized research degree in the manner of a Ph.D., the usual extended research training period in residence at UCLA associated with a Ph.D. is replaced by an 18- to 24-month internship in an appropriate government agency, national laboratory, or private industry, during which in-depth study of an environmental problem leads to a dissertation.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Doctoral Degree

### Admission

In addition to meeting University minimum standards, applicants for the Doctor of Environmental Science and Engineering degree (D.Env.) must have an excellent scholastic record and must be acceptable to the admissions committee. Generally, applicants must have achieved a grade-point average of at least 3.0 in undergraduate work and 3.5 in graduate work. The overall academic record, including Graduate Record Examination (GRE) scores and Test of English as a Foreign Language (TOEFL) scores when applicable, must reflect exceptional verbal and quantitative skills and drive toward academic achievement. The program is also interested in special qualities, awards, and achievements not reflected in the student's academic record. All applicants must file a narrative statement indicating how their professional goals can be met through the D.Env. program and submit three letters of recommendation.

In general, students entering the D.Env. program should have received a master's degree in some field of the sciences or engineering. Generalist master's degrees in such areas as environmental sciences or public health and master's degrees in the social sciences, or medical degrees may be accepted for admission if the applicant presents a record with appropriate courses in the sciences and mathematics and other special qualifications such as research experience.

Before being accepted unconditionally into the program, all students must have taken the following courses, which are considered preparation for the program: (1) biology — one year of introductory biology with laboratory; (2) chemistry — one year of general chemistry with laboratory, including analytical methods, and one quarter of organic chemistry, no laboratory re-

quired; (3) computer science — one course or equivalent experience in elementary programming and use of computer hardware and software; (4) geology — one course in introductory geology with laboratory; (5) mathematics — one year of calculus plus one course in elementary statistics; (6) physics — one year of introductory physics with laboratory. Any of these courses may be taken after the student has arrived at UCLA.

Admission to the Environmental Science and Engineering program is made through recommendation of a faculty committee who has reviewed the applicant's file and by concurrence of the program director and the Graduate Division. Subject to available funds, the program offers fellowships to eligible first-year students. Prospective students may write for descriptive brochures to the Director, Environmental Science and Engineering Program.

### Major Fields or Subdisciplines

Specialties within the program include, but are not limited to, the assessment and management of hazardous substances in the air, soil, and water environments; migration of contaminants in groundwater; health risks of toxic substances; mitigation of adverse effects on the biological environment; and environmental problems common to the U.S. and Mexico. Also, students may slant their work toward greater emphasis either on the science engineering side or on the science policy side of their specialty.

### Course Requirements

Course requirements consist of core courses, breadth courses, environmental science and engineering seminar, and problems courses.

*Core and Breadth Courses.* Sixteen course requirements must be satisfied, one of which can be waived based on prior coursework. Four of these are core courses (Environmental Health Sciences 212, 225, 235, 264) offered by program faculty. At least seven courses must be at the graduate level. Breadth electives are selected from a list of approved courses. Courses that are not on the list must be approved by the core faculty before they can be used to fulfill a breadth requirement. All core and breadth courses must be taken on a letter grade basis (not S/U). Courses must be taken from the following categories:

*Environmental Science (seven courses).* Courses which describe the characteristics of terrestrial, air, and water environments; the biota; the geological, biological, chemical, hydrological, and atmospheric processes of the environment; and the interrelationships between these compartments. Minimum requirements are as follows: Environmental Health Sciences 212, 225, 240, 264, an elective in environmental biology, microbiology or ecology, an elective in environmental geology, and an elective in atmospheric sciences.

*Environmental Engineering (five courses).* Courses in engineering, mathematics, and the applied physical and life sciences covering top-

ics such as modeling of environmental systems, fate and effects of environmental contaminants, design and evaluation of pollution control systems, plus courses which describe the tools and methods needed to address environmental problems, such as field and laboratory analytical methods, statistics, computer science, and advanced applied mathematics. Minimum requirements are as follows: Civil and Environmental Engineering 150, 155, and three electives.

*Environmental Management, Law, and Policy (four courses).* Courses which relate to the social and institutional factors relevant to environmental problem solving such as the development and implementation of regulations; dynamics of public participation; and socioeconomic analysis of current and historical trends in environmental and energy policy. Minimum requirements are as follows: Environmental Health Sciences 235, Urban Planning M264, and two electives.

*Credit for Prior Work.* Entering environmental science and engineering students may already have completed some of the required courses in their undergraduate and graduate work. One of the 16 required courses (including electives) can be waived based on prior coursework. Any other course requirement satisfied by previous work must be replaced with an elective in any field of environmental science and engineering that is pertinent to the goals of the student. Thus, a minimum of 15 courses must be completed after admission to the program. A minimum of 12 courses must be taken at UCLA or another University of California campus.

*Environmental Science and Engineering Seminar.* While completing core and breadth requirements, full-time students normally enroll in 18 units per quarter, including Environmental Science and Engineering M411 (seminar) which is required for two quarters each academic year.

*Problems Courses.* Problems courses constitute intensive multidisciplinary applied team research directed toward the solution of current environmental problems. Students are required to quantify and measure necessary parameters, perform critical evaluations, edit and process technical and socioeconomic information, meet deadlines, and communicate through a final report to the competent lay person as well as to the technical specialist. Usually two or three faculty from different academic disciplines oversee a team of student researchers. Before proceeding to the problems courses, students must have completed all but six of the required courses, successfully passed all core courses taken (B- grade or better), and maintained a cumulative GPA of 3.0 for all classes taken after entering the Environmental Science and Engineering Program. Twenty-four quarter units of the combined Environmental Science and Engineering 400 and 410 series courses must be completed during the three quarters prior to advancement to candidacy. The requirement may be met by completing three consecutive quarters (eight units per quarter) on a single theme;

or as a minimum, at least two consecutive quarters devoted to a single theme plus one quarter participation or activity approved by the faculty. Enrollment in more than one problems course per quarter is not allowed. No more than eight units of other coursework may be taken when enrolled in a problems course.

Normally, problems course credit is only earned from courses offered through the Environmental Science and Engineering Program. However, students may petition the faculty for permission to earn problems course credit through multidisciplinary environmental projects offered in other departments at UCLA.

### Written and Oral Qualifying Examinations

A two-tiered examination sequence, consisting of written and oral examinations, is required for advancement to candidacy to the D.Env. degree. The examinations must be successfully completed before the internship can begin. The purpose of the examinations is to test the student's understanding of the core and breadth areas, the master's field, current issues in the environmental field, and subjects covered in students' problems course experience. The written examination is administered by the core faculty of the program. The written examination may be repeated once. The oral examination is administered by the doctoral committee, a four-person faculty committee that guides the student through the remainder of the program. Generally, the doctoral committee is appointed during the second year of the student's tenure at UCLA. The oral examination may be repeated once.

**Internship.** After advancement to candidacy (see below), students begin an internship in their field of interest at an outside institution. Arrangements for the internship are the students' responsibility but program faculty will assist. The institution and the nature of the appointment must be approved by the doctoral committee and the Environmental Science and Engineering program director. Supervision during the field training experience will be by the doctoral committee and the field program supervisor. A letter of agreement between UCLA and the institution is required. During each long session quarter of internship the student must register at UCLA for eight units of Environmental Health Science 599.

No later than nine months after advancement to candidacy, at the beginning of the internship, the candidate is required to present a written prospectus of the dissertation and defend it before the doctoral committee.

## Environmental Science and Engineering

### Graduate Courses

**400A. Environmental Science and Engineering Problems Course (8 units).** Prerequisite: consent of instructor and program director. Primarily intended for students enrolled in environmental science and engineering doctoral program. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. In Progress grading (credit to be given only on completion of course 400C).

**400B. Environmental Science and Engineering Problems Course (8 units).** Prerequisites: successful completion of course 400A, consent of instructor and program director. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems. In Progress grading (credit to be given only on completion of course 400C).

**400C. Environmental Science and Engineering Problems Course (8 units).** Prerequisites: successful completion of course 400B, consent of instructor and program director. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems.

**400D. Environmental Science and Engineering Problems Course (8 units).** Prerequisite: successful completion of course 400C and of internship approved by doctoral committee and program director. Multidisciplinary technical and socioeconomic analysis and prognosis of significant current environmental problems.

**410A-410B-410C. Environmental Science and Engineering Workshops (2 units each).** (Formerly numbered 410.) Prerequisite: consent of instructor. Primarily intended for students enrolled in environmental science and engineering doctoral program who are conducting problems courses. Development of multidisciplinary skills essential to solution of environmental problems studied within courses 400A through 400D. Development of presentation skills. S/U grading.

**M411. Environmental Health Sciences Seminar (2 units).** (Same as Environmental Health Sciences M411.) Prerequisite: consent of instructor. Required of graduate students in environmental health sciences for one term each year. Current topics in environmental health sciences and environmental science and engineering. May be repeated for credit. S/U grading.

**412. Effective Technical Writing (2 units).** (Formerly numbered 298.) Lecture, one hour. Intended for environmental science and engineering doctoral students. Essentials of grammar, punctuation, syntax, organization, and format needed to produce well-written journal articles, research reports, memoranda, letters, and résumés. Emphasis on accuracy, clarity, conciseness, and avoidance of common errors in advanced technical writing, using critique, exercises, and examples. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual or Tutorial Studies (2 to 8 units).** Prerequisite: consent of instructor and program director. Supervised investigation of advanced environmental problems. S/U grading.

Paul Simon, M.D., M.P.H.

## Scope and Objectives

Epidemiology has been defined as the study of the distribution and determinants of disease and injury in human populations. Epidemiologists study variations of disease in relation to such factors as age, sex, race, occupational and social characteristics, place of residence, susceptibility, exposure to specific agents, or other pertinent characteristics. Also of concern are the temporal distribution of disease, examination of trends, cyclical patterns, and intervals between exposure to causative factors and onset of disease. The scope of the field extends from study of the patterns of disease to the causes of disease and to the control or prevention of disease. What distinguishes epidemiology from other clinical sciences is the focus on health problems in population groups rather than in individuals.

Epidemiology is a young field with constantly expanding boundaries. The range of activities that may be at least partly epidemiologic includes determination of the health needs of populations, investigation and control of disease outbreaks, study of environmental and industrial hazards, evaluation of preventive or curative programs or treatments, and evaluation of the effectiveness and efficiency of intervention or control strategies. Many tools of epidemiology are borrowed from other fields such as microbiology, immunology, medicine, statistics, demography, and medical geography.

There is a growing core of purely epidemiologic methodology which includes not only statistical methodology and principles of study design, but a unique way of thinking that is beyond the rote memorization of rules. The contribution of epidemiology to any study involving groups of people is being increasingly recognized and demanded.

Epidemiologists may work in many settings, including international health agencies, state and local health departments, federal government agencies and health programs, health maintenance organizations, colleges and universities, and numerous research projects privately and publicly sponsored.

The objectives of the Department of Epidemiology fall into three broad categories — research, teaching, and community service. Degrees offered include the M.S. and Ph.D. in epidemiology and, through the School of Public Health, the M.P.H. and Dr.P.H. with a specialization in epidemiology (see Public Health School-wide Programs).

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

See the Master of Public Health (M.P.H.) Admission section under Public Health School-wide Programs. Admission requirements for the Master of Science in Epidemiology are the same as for the M.P.H.

### Areas of Study

Consult the graduate adviser.

### Course Requirements

Students must complete at least one year of graduate residence at the University of California and a minimum of 56 units: 38 units of core courses and 18 units of elective courses. At least 20 units must be in the 200 or 500 series. A maximum of one seminar from Epidemiology 290 (two units) or 291 (two units), and one 596 course (four units) may be applied toward the total course requirements. If the student intends

to write a thesis, four units of Epidemiology 598 (thesis research) may also be applied to the 18-unit elective requirement.

Mandatory core courses are Epidemiology 200 (four units), 201A (six units), 201B (six units), 220 (four units), 290 (two units) or 291 (two units), Biostatistics 100A (four units) or 110A, 100B (four units) or 110B; one additional statistics course (four units) in regression or multivariate methods that is approved by the Department of Epidemiology; and Biostatistics 403 (four units) or Epidemiology 410A-410B (two units each) or equivalent. Equivalent courses must be approved by the department. Each core course may be waived if a similar course has been taken elsewhere and the student passes the waiver examination. A waiver course does not reduce the unit requirements. Elective courses include all those offered by the department with the exception of those stated above.

All courses included for advancement to candidacy, except Epidemiology 290 or 291, must have a letter grade (not S/U). Students must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California. In addition, students must maintain an average of no less than 3.0 (B) in Epidemiology 200, 201A-201B, and 220.

### Comprehensive Examination Plan

If the comprehensive examination option is chosen, a guidance committee of three Department of Epidemiology faculty is appointed. A comprehensive examination on the major area of study must be passed. If failed, the examination may be repeated once.

### Thesis Plan

If the thesis option is approved, a thesis committee of three faculty is appointed by the dean of the Graduate Division on recommendation of the department. The chair of the committee and at least one other member must hold academic appointments in the Department of Epidemiology. The committee approves the thesis prospectus before the student may file for advancement to candidacy. The thesis must be acceptable to the thesis committee.

## Doctoral Degree

### Admission

In addition to the University minimum requirements, the department requires (1) satisfactory performance on the Graduate Record Examination (GRE); (2) at least a 3.0 junior/senior grade-point average and at least a 3.5 grade-point average in graduate studies; and (3) approval by the department admissions committee, an academic adviser, and the department chair.

### Major Fields or Subdisciplines

Consult the graduate adviser.

### Course Requirements

Students must fulfill the course requirements for the M.S. degree in Epidemiology with an aver-

age of no less than 3.3 (B+) in Epidemiology 200, 201A-201B, and 220. Equivalent courses taken at other institutions may be used to fulfill these requirements subject to approval by the department. Continuation in the doctoral program is contingent on satisfying the 3.3 (B+) average grade-point requirement in the four core courses or their equivalent. Students must also take Epidemiology 202A (four units), Epidemiology 202B or one additional statistics course beyond the M.S. requirements (four units), one course on pathobiology (four units), and at least three quarters of Epidemiology 292 (two units per quarter). The statistics and pathobiology courses must be approved by the department. In addition, students must take at least 12 units of graduate-level courses (excluding 500-level courses) outside the department. The 12 units must be selected with the approval of the academic adviser. Students with prior postbaccalaureate coursework may petition for substitution of part or all of the 12-unit requirement. Recommendation for the degree is based on the attainments of the candidate rather than on the completion of specific courses.

## Written and Oral Qualifying Examinations

Before advancement to candidacy, students must pass the written doctoral examination of the Department of Epidemiology and the University Oral Qualifying Examination. Normally for the written doctoral examination no more than one reexamination is allowed. A doctoral committee, consisting of at least four faculty members who hold professorial appointments at UCLA, is nominated to the dean of the Graduate Division and, if approved, administers the oral qualifying examination after successful completion of the written examination. Two of the faculty must be tenured. Three of the four must hold appointments in the Department of Epidemiology; one must be an outside member who holds no appointment in Public Health.

After completing the course requirements and passing both the written doctoral examination and the oral qualifying examination, the student may be advanced to candidacy and complete work on a dissertation in the principal field of study.

## Epidemiology

### Lower Division Course

**88. Lower Division Seminar: Special Topics in Epidemiology.** Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in epidemiology approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

## Upper Division Courses

**100. Principles of Epidemiology.** Lecture, two hours; discussion, four hours. Prerequisite: one full biological sciences course. Not open for credit to students with credit for course 200. Introduction to epidemiology, including factors governing health and disease in populations.

**199. Special Studies (2 to 4 units).** Prerequisites: senior standing, consent of instructor and department chair (based on written proposal outlining course of study). Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only four units may be taken each term.

## Graduate Courses

**200. Epidemiology I.** Lecture, two hours; laboratory, four hours. Prerequisites: Biostatistics 100A (may be taken concurrently), one full biological sciences course, consent of instructor. Not open for credit to students with credit for course 100. Introduction to epidemiology, including factors governing health and disease in populations.

**201A-201B. Epidemiologic Methods I and II (6 units each).** Lecture, four hours; discussion, two hours; other, 12 hours. Prerequisites: Biostatistics 100A, 100B, at least two upper division biology or social sciences courses, consent of instructor. Recommended (but not prerequisite): course 100 or 200 or equivalent. Comprehensive coverage of concepts, principles, and methods in epidemiology, with emphasis on study design, statistical analysis, and causal inference. Theoretical and quantitative emphasis, focusing on investigation of disease etiology and other causal relationships in public health.

**202A-202B. Epidemiology: Theory and Methodology.** Prerequisites for course 202A: course 201B; for course 202B: course 202A, consent of instructor. Advanced principles and methods of epidemiologic analysis. Topics include relating prevalence and incidence, analysis of clustering and seasonality; measures of effect, sources of bias, regression to the mean, estimation and hypothesis testing in epidemiology; models for risk and rates; cohort analysis. S/U or letter grading.

**203. Topics in Theoretical Epidemiology (2 units).** Prerequisite: consent of instructor. Selected topics from current research areas in epidemiologic theory and quantitative methods. Topics selected from biologic models, epidemiologic models, problems in inference, model specification problems, design issues, analysis issues, and confounding. May be repeated for credit with consent of instructor. S/U grading.

**210. Public Health Research Using Available Data (2 units).** Lecture, one hour; discussion, one hour. Prerequisites: courses 100, 410A or Biostatistics 403 or equivalent, Biostatistics 100A, consent of instructor. Presentations and discussions of availability, concepts, content, and usefulness of already collected data in public health research. Major emphasis on public data such as National Center for Health Statistics surveys, vital statistics, census, etc.

**M214. Immunology of AIDS (2 units).** (Same as Microbiology M262B and Microbiology and Immunology M262B.) Lecture, one hour; discussion, one hour. Requisites: Microbiology and Immunology 202A, 202B, 202C, 202D, M258B. Lecture and student discussion of assigned publications. Topics include specific anti-HIV immune responses, activation of immune system by HIV, and basic mechanisms that underlie HIV-induced immunodeficiency. S/U or letter grading.

**220. Principles of Infectious Disease Epidemiology.** Lecture, three hours. Prerequisites: course 100 or 200 or equivalent, consent of instructor. Ascertainment of infection, transmission, and epidemiological parameters rather than clinical and pathological aspects. Specific diseases discussed in depth to illustrate epidemiologic principles.

**221. Prevalent and Emerging Infectious Diseases in the World.** Requisites: course 100 or 200, Biostatistics 100A, 100B. Course for graduate students and medical doctors seeking broad knowledge and detail on prevalent and emerging infectious diseases, including influenza/acute respiratory infections, cholera/diarrheal disease, tuberculosis, hepatitis B, malaria, measles, neonatal tetanus, HIV/AIDS, pertussis (whooping cough). S/U or letter grading.

**222. Arthropods as Vectors of Human Diseases.** Requisites: courses 100 or 200, 220. Comprehensive overview of morphology, systematics, natural history, host/vector/pathogen relationships, and spectrum of diseases carried by arthropods for graduate students, public health professionals, and medical doctors seeking information on global prevalence of arthropod-borne diseases.

**223A. Protozoal Diseases of Man.** Prerequisite: consent of instructor. May be taken concurrently with course 223B. Comprehensive overview of systematics, morphology, biology, host/parasite relationships, public health problems, and control of protozoa parasitic in man and animals.

**223B. Protozoal Diseases of Man (2 units).** Laboratory, four hours. Prerequisite or corequisite: course 223A. Laboratory methods of diagnosis and microscopic recognition of protozoa parasitic in man and animals. Intestinal protozoa and organisms occurring in blood and tissues of their hosts and pathology associated with these infections.

**224A. Helminthic Diseases of Man.** Prerequisite: consent of instructor. May be taken concurrently with course 224B. Comprehensive overview of systematics, morphology, biology, host/parasite relationships, public health problems, and control of nematodes, trematodes, and cestodes parasitic in man and animals.)

**224B. Helminthic Diseases of Man (2 units).** Laboratory, four hours. Prerequisite: consent of instructor. Diagnosis and practical microscopic recognition of nematodes, trematodes, and cestodes parasitic in man and animals. Pathology produced by these infections)

**227. AIDS: A Major Public Health Challenge.** Prerequisites: course 100 or 200 or equivalent, Biostatistics 100A or 110A, consent of instructor. Presentation of epidemiologic, biologic, psychological, and clinical characteristics of AIDS and HIV-1 infection. Discussion of policy implications and intervention strategies. S/U or letter grading.

**M228. Biology of HIV.** (Same as Microbiology and Immunology M275.) Lecture, three hours. Prerequisites: course 100 and Biostatistics 100A or equivalent, two biology courses, consent of instructor. Overview of virologic and immunologic aspects of HIV disease for epidemiology or other health disciplines. Brief discussion of clinical manifestations and biosafety in the laboratory.

**230. Epidemiology of Sexually Transmitted Diseases.** Prerequisites: course 100 or 200, consent of instructor. Sexually transmitted diseases; medical/biological aspects, epidemiology and control in developed and developing countries. S/U or letter grading.

**240. Cardiovascular Epidemiology (2 units).** Topics include definition, pathogenesis, descriptive epidemiology, magnitude of risk factors, strategies for prevention, lipoprotein metabolism, and epidemiology of diabetes, hypertension, and chronic lung disease.

**241. Epidemiology of Neurologic Disease (2 units).** Prerequisites: course 100 or 200, consent of instructor. Epidemiologic characteristics of selected chronic neurologic diseases, with particular emphasis on etiology and possible control.

**244. Research Methods in Cancer Epidemiology (2 units).** Prerequisites: course 100, Biostatistics 100A, consent of instructor. Biologic, quantitative, philosophical, and administrative considerations in epidemiologic cancer research. Hypothesis specification and choice of study design. Uses of descriptive epidemiology, cohort studies, case control studies. Clustering, screening, and cancer control. Means of identifying subjects and controls. Design of instruments. Sources of bias and confounding.

**246. Epidemiology of Aging (2 units).** Prerequisites: course 100 or 200 or equivalent, consent of instructor. Epidemiologic methods of estimating present and future burdens of aging: morbidity, disability, and dependency. Epidemiology of major disabling conditions affecting the elderly. Evaluation of possible intervention strategies. Methodologic issues in geriatric epidemiology. S/U or letter grading.

**247. Epidemiology of Injuries in the Elderly (2 units).** Prerequisite: course 100 or equivalent. Description of frequency of, risk factors for, and possibilities of preventing injuries in the elderly populations. Comparison of injury outcomes (morbidity and mortality) in younger vs. older populations. Emphasis on methodologic issues of studying elderly people. S/U or letter grading.

**248. Psychiatric Epidemiology (2 units).** Requisite: course 100 or 200. Introduction to basic concepts and research methods in psychiatric epidemiology. Topics include case definition, study design, instrumentation, and epidemiology of selected psychiatric disorders.

**251. Epidemiology of Nonintentional Injuries.** Lecture, three hours; discussion, two hours. Prerequisites: course 100 or 200, Biostatistics 100A, consent of instructor. Pertinent epidemiology methods for study of nonintentional trauma, including that from motor vehicle crashes, occupational exposures, falls, and other major external causes, which focus on research approaches, data sources, analytical techniques. Substantive findings on related subproblem areas presented for critical review.

**252. Epidemiology of Assault, Homicide, and Suicide (2 units).** Lecture, two hours; discussion, one hour. Prerequisites: course 100 or 200, consent of instructor. Presentation and evaluation of epidemiologic research approaches to study of violent injury, including description of incidence, study design, risk factor analysis, and control evaluation.

**253. Acute Traumatic and Chronic Repetitive Injuries from Work-Related Exposures (2 units).** Lecture, two hours; discussion, one hour. Prerequisites: course 100 or equivalent, Biostatistics 100A, consent of instructor. Lectures and discussions on magnitude, scope, research approaches, and intervention strategies for work-related acute traumatic and chronic repetitive (musculoskeletal) injuries. Emphasis on injury research methods for all external causes of injury, utilizing epidemiology for high-risk group and risk-factor identification and injury prevention. S/U or letter grading.

**M255. Keeping Children Safe: Causes and Prevention of Pediatric Injuries (2 units).** (Same as Community Health Sciences M255.) Injuries have been leading killer of children in the U.S. for decades. Children have specific risk factors for injuries, many of which are preventable. Presentation of approaches to research and prevention of pediatric injuries. S/U or letter grading.

**260. Environmental Epidemiology (2 units).** Lecture, one hour; discussion, one hour. Requisite: course 100 or 200. Methodological problems and approaches of epidemiology for assessing health impact of major types of environmental exposure.

**261. Occupational Epidemiology.** Lecture, two hours; discussion, two hours. Prerequisites: course 100 or 200 or equivalent, consent of instructor. Methodological considerations, approaches, and limitations in epidemiological studies of occupational groups and environments.

**268. Introduction to Pharmacoepidemiology (2 units).** Prerequisites: course 200, consent of instructor. Pharmacoepidemiology is application of epidemiologic knowledge, reasoning, and methods to study of effects and uses of drugs. Survey of contemporary roles of pharmacoepidemiology in drug development and public health, with historical background of its evolution and projections of future prospects. S/U grading.

**270. Epidemiology and Health Policy (2 units).** Prerequisites: courses 100 or 201A-201B, Biostatistics 100B or 110B, Health Services 100, consent of instructor. Application of epidemiologic methods and findings in health services research, population health planning, and health policy to provide framework for integrating causal inference with decision making. Emphasis on conceptual and methodologic issues confronting researchers, clinicians, planners, administrators, and legislators.

**M276. Structure and Function of Nutrients Implicated in Etiology of Chronic Disease.** (Same as Community Health Sciences M267.) Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisite: one prior organic chemistry course. Basic nutrition course for public health and science majors.

**280. Parasitic Diseases and Global Health.** Prerequisite: consent of instructor. Overview of major human parasitic diseases in terms of their biology, occurrence, distribution, and transmission in nature; diseases they cause and impact they have on health of populations; interaction with other disease states; and interventional strategies for their control.

**290. Seminar: Epidemiology — Infectious and Tropical Disease (2 units).** Review of research on specific diseases of public health importance. May be repeated for credit. S/U or letter grading.

**291. Seminar: Epidemiology — Methodology (2 units).** Prerequisites: course 100 or 200, consent of instructor. Review of current epidemiologic research contained in recent medical literature. May be repeated for credit. S/U or letter grading.

**292. Advanced Seminar: Epidemiology (2 units).** Prerequisites: course 201B, consent of instructor. Current research in epidemiology. May be repeated for credit. S/U grading.

**293. International HIV/AIDS Seminar (2 units).** Prerequisite: consent of instructor. Ongoing discussion of worldwide pandemic of HIV/AIDS, with emphasis on problems of surveillance, reporting, and intervention. Discussion of recent literature. Presentations by fellows from other countries. S/U grading.

**400. Field Studies in Epidemiology (2 or 4 units).** Prerequisite: consent of instructor. Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; four units may be applied toward 44-unit minimum total required for M.P.H. degree.

**401. Database Theory and Practical Applications in Injury Epidemiology (2 units).** Requisite: course 201A. Exploration of theory and practical strategies for database construction and manipulation, selection, and use of desktop-computing database applications using a variety of examples from epidemiological research.

**402. Advanced Data Analysis in Occupational and Environmental Epidemiology.** Lecture, two hours; laboratory, two hours. Requisites: courses 201A-201B, or 201A and 261, one data management course. Development of strategies for analyzing data in occupational and environmental settings. Use of multivariate data analysis techniques typically used in occupational cohort studies, nested case-control studies, and ecologic studies in environmental epidemiology. S/U or letter grading.

**410A. Management of Epidemiologic Data (2 units).** Prerequisites: course 100, Biostatistics 100A (one course may be taken concurrently with consent of instructor). Concepts, collection, and management of data, with particular emphasis on databases in chronic infectious diseases. Introduction to personal computers and appropriate software for epidemiologic studies.

**410B. Management of Epidemiologic Data (2 units).** Prerequisites: course 410A or equivalent, consent of instructor. Data management for various epidemiologic study designs, confidentiality concerns; data management systems; introduction to mainframe computer.

**411. Research Resources in Epidemiology (2 units).** Lecture, one hour; discussion, one hour. Prerequisites: course 100 or 200, Biostatistics 100A, consent of instructor. Instruction and practical experience in use of varied bibliographic aids and sources of information, building of reference files, and presentation of research findings for publication.

**414. Practical Epidemiologic Investigations (2 to 4 units).** Lecture, one to two hours; laboratory, one to two hours. Prerequisites: course 100 or 200 or equivalent, consent of instructor. Practical approaches to epidemic investigations presented through problem sets based on actual outbreaks. Data collection, analysis, and written presentation of findings.

**415. Epidemiology for Developing Countries.** Requisites: courses 100 and/or 200, Biostatistics 100A. Practical use of epidemiology, microcomputers, and spreadsheet models for estimating morbidity and mortality, developing intervention or prevention strategies, and setting program priorities in Third World settings.

**417. Injury Prevention Strategies and Countermeasures (2 units).** (Formerly numbered M417.) Requisite: course 100. Lectures with discussion on injury prevention strategies and countermeasures, including critical review of effectiveness in the public health context. Emphasis on major public health injury problems from assaultive, self-inflicted, or unintentional causes. S/U or letter grading.

**418. Rapid Epidemiologic Surveys in Developing Countries.** Requisites: courses 100 and/or 200, Biostatistics 100A. Presentation of how to do health surveys in Third World countries. Practical assistance for planning and organizing surveys, including use of microcomputers to develop and test the questionnaire, select the sample, process and analyze data, and prepare final report.

**419. Data Management and Applied Epidemiologic Analysis Using SAS.** Lecture, two hours; laboratory, two hours. Requisites: course 100 or 200 (may be taken concurrently), Biostatistics 100A. Practical issues in data management and epidemiologic analysis using SAS programming language. Use of data sets from national surveys and from epidemiologic studies to illustrate data management and analysis capabilities of SAS.

**495. Teacher Preparation in Epidemiology (2 units).** Prerequisites: 18 units of cognate courses in area of specialization, consent of department chair. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

**596. Directed Individual Study or Research (2 to 8 units).** Prerequisites: graduate standing, consent of instructor. Individual guided studies under direct faculty supervision. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit.

**597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations (2 to 8 units).** Prerequisites: graduate standing, consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**598. Master's Thesis Research (2 to 8 units).** Prerequisite: consent of instructor. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

**599. Doctoral Dissertation Research (2 to 8 units).** Prerequisite: consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

## ETHNOMUSICOLOGY

*School of the Arts and Architecture*

UCLA  
2539 Schoenberg Hall Annex  
Box 951657  
Los Angeles, CA 90095-1657

(310) 206-3033

Timothy Rice, Ph.D., *Chair*

### Professors

Kenneth Burrell, B.A.  
Jacqueline C. DjeDje, Ph.D.  
Daniel Neuman, Ph.D., *Dean*  
James W. Porter, M.A.  
A. Jihad Racy, Ph.D.  
Timothy Rice, Ph.D.

### Professors Emeriti

Peter C. Crossley-Holland, M.A.  
Charlotte A. Heth, Ph.D.  
Mantle L. Hood, Ph.D.  
William R. Hutchinson, Ph.D.  
Nazir A. Jairazbhoy, Ph.D.  
J.H.K. Nketia, B.A.

### Associate Professors

Roger Kendall, Ph.D.  
Steven J. Loza, Ph.D.

### Assistant Professors

Tara Browner, Ph.D.  
Cheryl Keyes, Ph.D.  
Roger Savage, Ph.D.

### Lecturers

Tsun Y. Lui, *Emeritus*  
Suenobu Togi, *Senior Emeritus*  
Gerald Wilson  
Ikuko Yuge, B.A.

### Adjunct Professor

Benjamin Suchoff, Ed.D.

### Visiting Associate Professor

Amy Catlin, Ph.D.

### Visiting Assistant Professors

Nati Cano  
Kobla Ladzekpo, M.A.  
Danny Lee

## Scope and Objectives

Ethnomusicology is a research field that combines the various techniques of musical analysis with the methods of the social sciences and humanities (i.e., the study of cultural systems including music). Although originally focused on folk, tribal, and Asian classical music traditions, ethnomusicology at UCLA includes the study of all styles of music in the world, including popular music, jazz, and even Western classical music when approached from a cultural analysis perspective. The undergraduate and graduate programs in ethnomusicology provide students with broad knowledge of world musics and methods currently used in their study.

The object of systematic musicology, a multi-disciplinary field, is to answer fundamental questions on the nature and properties of music, not only as art but as empirical phenomena. At UCLA, this research orientation integrates the perspectives of aesthetics and philosophy, music theory, acoustics, sociology, psychology, organology, and semiotics, any of which can be cross-cultural, focusing on the systems or models discernible through these disciplines.

## Undergraduate Study

### Bachelor of Arts Degree

#### Admission

Applicants are reviewed individually, based on a questionnaire, grade-point average, two letters of recommendation, test scores, a personal statement of purpose, and an interview/audition. Applicants who are unable to travel to UCLA have the option of submitting a videotape of musical performance, following departmental guidelines.

#### Preparation for the Major

*Required:* Ethnomusicology 10A-10B-10C, 20A-20B-20C, and 16 units of performance organizations (courses 91A-91Z).

#### The Major

*Required:* Ethnomusicology M180, 181, 190, six elective courses selected from 106A, 106B, 106C, M108A, 108B, M110A, M110B, 113 through 121, M126, 128, 130, 136A through 172B, 174, C179, 199E, 199S, and four upper division courses from other departments related to the area of concentration and selected in consultation with a faculty adviser.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

### Master's Degree

#### Admission

Applicants for the Master of Arts in Ethnomusicology must have completed a bachelor's degree in music or a field related to ethnomusicology. Applicants whose degree is not in music are required to provide evidence of their musical aptitude and ability.

Applicants for either degree are required to submit, in addition to the regular Graduate Division requirements (1) a statement of purpose, (2) three letters of recommendation, (3) a research or term paper, and (4) proof of musical background or performance ability (a degree in music, official transcripts showing at least two years of music coursework, including music history and theory, or an in-person audi-

tion or monitored recording in any musical tradition). No application can be considered until all of the above materials have been received.

Dossiers are reviewed by the faculty to assess each applicant's potential as a graduate student in this field at UCLA.

#### Admission Timetable

Note: Applicants for fellowships must adhere to the earlier deadlines; all monies are awarded by March 15.

December 30 — Application for admission/fellowship is due.

January 15 — Supplementary application materials are due.

By March 15 — Notice of acceptance or denial is sent.

February 28 — Late applications received by February 28 are reviewed only if there is space available in the program.

Applicants on a waiting list for admission are notified as soon as a decision can be reached. Failure to meet any deadline may result in a delay in action or no action on an application for admission, as well as that for a fellowship or assistantship.

#### Areas of Study

The Department of Ethnomusicology offers the degree of Master of Arts in the field of ethnomusicology, with an optional specialization in systematic musicology. Degrees in composition, performance, and historical musicology are offered through other departments.

#### Course Requirements

Students are required to complete a minimum of nine courses, five of which must be at the graduate level. Only four units of Ethnomusicology 596, and four units of 597 or 598 may be applied toward the total course requirement. No more than four units of all types of 500-series courses may be applied toward the minimum graduate course requirement. Upper division courses that may be applied toward the minimum of nine courses include Music 106B, 109A, 109B, 109C, 112A, 112B, 116, 117, 118A, 118B, 123A, 123B, 123C, 151A, 151B, 156, C175 (four units only), and Ethnomusicology 106A, 106B, 106C, 113, M126, 128, 130, 136A, 136B, 146, 147, 156A, 156B, 157, 158A, 158B, 158C, 160A, 160B, 170, 173, 176, M180, 181. Ethnomusicology 598 serves to guide the preparation of the thesis and should normally be taken during the last quarters of residence.

*Ethnomusicology.* In addition to a five-course core (Ethnomusicology 200, C201A-C201B, 281A, and 282), students must take two courses in one or more music culture areas (i.e., music of Japan, China), one course from the Department of Anthropology, and one elective from the department's graduate or upper division offerings, selected courses in Western music, a related discipline, or particular area outside the department as approved by the student's mentor. Students who have not taken

Ethnomusicology 20A-20B-20C or the equivalent before entering are required to audit these courses. Course 290 may be taken but cannot count toward M.A. course requirements. One quarter of Ethnomusicology 292F may be counted to satisfy one of the electives. Students must enroll in a minimum of two quarters of ethnomusicology performance organizations, Ethnomusicology 91A -91Z, which are not applied to their degree.

*Specialization in Systematic Musicology.* In addition to a six-course core (Ethnomusicology 200, 201A, C203, one course from 271, 273, 275, 283, or Musicology 269, and two terms of Ethnomusicology 279), students must take one course in a music culture area, two electives from the department's graduate or upper division offerings, and selected courses in Western music, a related discipline, or particular area outside the department as approved by their mentors.

#### Comprehensive Examination Plan

To choose the comprehensive examination plan option, students must first submit a research paper written during their master's studies as evidence of their writing and scholarly abilities. For ethnomusicology: competence in the field is then tested with two written examinations: (1) theory and method in ethnomusicology and (2) a world music culture area or approved topic reflecting the student's course of study. For systematic musicology, competence is tested with a take-home examination on a topic to be determined by the student's major adviser. A discussion of the general field of systematic musicology is included in the final oral examination. The examinations are administered by a three-member committee, no more than one of whom shall be outside the department. The comprehensive examination is normally completed within three years of beginning M.A. coursework. Any failed examinations may be retaken only once, during the next two quarters. The department requires a final oral examination under both the comprehensive and thesis plans.

#### Thesis Plan

Students may elect either the thesis or comprehensive examination.

The thesis is an extended essay or other equivalent presentation involving the original investigation of a problem or subject of limited scope, approved by the program committee in the student's area. The presentation must demonstrate significant style, organization, creativity, and depth of understanding of the subject.

A three-year limit from the beginning of the M.A. coursework is normally imposed for the completion of the thesis. Students who do not meet this deadline are required to take the comprehensive examination at the end of their third year in order to be considered for advancement to the Ph.D. program.

The thesis topic and the composition of the master's committee are approved by the pro-

gram committee in the student's area before nomination to the Graduate Division. The department requires a final oral examination under both thesis and comprehensive examination plans.

## Doctoral Degree

### Admission

Applicants for the Ph.D. must normally have completed an M.A. or equivalent degree in one of the following: ethnomusicology, systematic musicology, Western music, a non-Western music tradition, a related discipline, or area studies with a music specialization. Applicants who are accepted but whose qualifications do not meet the requirements for the department's M.A. degree are required to complete remedial coursework as recommended by the program committee before proceeding with doctoral work.

Applicants are required to submit, in addition to the regular Graduate Division requirements (1) a statement of purpose, (2) three letters of recommendation, (3) a research or term paper (the M.A. thesis, if it is available), and (4) proof of musical background or performance ability (a degree in music, official transcripts showing at least two years of music coursework, including music history and theory, or an in-person audition or monitored recording in any musical tradition). No application can be considered until all of the above materials have been received.

Dossiers are reviewed by the faculty to assess each applicant's potential as a graduate student in that field at UCLA.

### Admission Timetable

Note: Applicants for fellowships must adhere to the earlier deadlines; all monies are awarded by March 15.

December 30 — Application for admission/fellowship is due.

January 15 — Supplementary application materials are due.

By March 15 — Notice of acceptance or denial is sent.

February 28 — Late applications received by February 28 are reviewed only if there is space available in the program.

Applicants on a waiting list for admission are notified as soon as a decision can be reached. Failure to meet any deadline may result in a delay in action or no action on an application for admission, as well as that for a fellowship or assistantship.

### Major Fields or Subdisciplines

The Department of Ethnomusicology offers the degree Doctor of Philosophy in the field of ethnomusicology, with an optional specialization in systematic musicology. Degrees in composition, performance, and historical musicology are offered through other departments.

### Course Requirements

Students may petition to their area on the advice of their graduate adviser for exemption

from specific requirements on the basis of equivalent work done at the M.A. level.

Students may complete the residence requirement by electing courses recommended by their mentor from the 200- or 100-level courses listed under the course requirements for the M.A. degree.

*Ethnomusicology.* In addition to a five-course core (Ethnomusicology 200, 201A, 201B, 281A, and 282), 10 additional courses are required, including one music culture seminar, at least six of which must be at the 200 level or higher and must include three quarters of Ethnomusicology 290, and one course from 271, 273, 275, or 283. Students may count one quarter of Ethnomusicology 292F to satisfy one of their electives. The remainder may be selected from the graduate offerings in the department or selected courses in Western music, a related discipline, or particular area outside the department as guided by students' mentors. No more than two 500-series courses and two courses outside the department may be counted toward the degree. Students must enroll in a minimum of three quarters of ethnomusicology performance organizations (Ethnomusicology 91A-91Z), which are not applied to their degree. Students are normally expected to conduct field research for one year.

*Specialization in Systematic Musicology.* In addition to a six-course core (Ethnomusicology 200, 201A, C203, two courses of 279, and one from Ethnomusicology 271, 273, 275, 283, or Musicology 269), nine other courses are required, including one music culture seminar, at least six of which must be at the 200 level or higher and must include three additional quarters of Ethnomusicology 279. The remainder may be selected from the graduate offerings in the department or selected courses in Western music, a related discipline, or particular area outside the department as guided by students' mentors. No more than two 500-series courses and two courses outside the program may be counted toward the degree.

Students who do not have an M.A. in Ethnomusicology from UCLA may be required, in consultation with their mentor, to take other relevant and necessary courses beyond the 10 specified.

### Written and Oral Qualifying Examinations

When the student and the committee feel the student is ready to take the qualifying examinations, the student should submit a schedule to the Student Services Office and the committee members listing the order in which the examinations are to be taken. Staff from the Student Services Office acts as proctor for the tests. Normally, the five written examinations are spread over a two-week period but should be completed within three weeks. Examinations not passed may be repeated once in consultation with the guidance committee and after a stipulated period of time. An oral examination

may be scheduled at the discretion of the departmental guidance committee.

*Ethnomusicology.* The written examinations for ethnomusicology students without a specialization consist of the following:

- (1) General ethnomusicology, history, theory, and method. (Students who took the comprehensive examination option for the M.A. have already done this.)
- (2) Concepts and terminologies in world music.
- (3) Student's principal musical area.
- (4) One from organology, aesthetics of music, psychology of music, sociology of music, acoustics, or comparative music theory.
- (5) A second musical area or related discipline (e.g., anthropology).

*Specialization in Systematic Musicology.* The written examinations for students with a specialization in systematic musicology consist of the following:

- (1) General systematic musicology, history, theory, and method.
- (2) Concepts and terminologies in world music.
- (3) History and analysis of Western music.
- (4-5) Two areas to be selected from the following: organology, aesthetics of music, psychology of music, sociology of music, acoustics, or comparative music theory.

After completion of the written and oral qualifying examinations, students may submit the dissertation topic and request for a doctoral committee for approval. The dissertation topic and the composition of the doctoral committee are approved by the program committee in the student's area before nomination to the Graduate Division.

## Ethnomusicology

### Lower Division Courses

**1A-1B. Fundamentals of Sound and Music of the World (2 units, 4 units).** Lecture, two hours; laboratory, one hour. Acoustical makeup of sound (pitch, tone quality); tuning systems; modes and scales; harmony and polyphony; rhythm and meter; notational systems; relationships of music to culture. Laboratory includes ear training and instrumental techniques.

**10A-10B-10C. World Music Theory and Musicianship.** Lecture, two hours; discussion, four hours; laboratory, two hours. Limited to ethnomusicology and world arts and cultures majors. Course 10A is requisite to 10B, which is requisite to 10C. Introduction to and participation in musical systems of selected world cultures through aural and written notations, vocal and instrumental skills, melodic and rhythmic dictation, improvisation, and composition.

**15. American Life in Music.** Lecture, three hours. Impact of ethnicity, race, gender, and other social processes on American music in the late 20th century; use of and creativity in music to respond to and shape contemporary social processes. P/NP or letter grading.

**20A-20B-20C. Musical Cultures of the World.** Survey of musical cultures of the world (excluding Western art music), role of music in society and its relationship to other arts; consideration also to scale structure, instruments, musical forms, and performance standards. **20A.** Europe and the Americas; **20B.** Near East and Africa; **20C.** South Asia, Southeast Asia, and the Far East.

**91A-91Z. World Music Performance Organizations (2 units each).** Activity, three hours. Group performance of traditional vocal and instrumental music of world cultures. May be repeated for credit without limitation. P/NP or letter grading. **91A.** Music and Dance of the American Indians; **91B.** Music of Bali; **91C.** Music and Dance of the Balkans; **91D.** Music of China; **91E.** Music and Dance of Ghana; **91F.** Music of India; **91G.** Music of Japan; **91H.** Music of Java; **91J.** Music of Korea; **91K.** Music of Mexico; **91L.** Music of Persia; **91M.** Music of Thailand; **91N.** Music of the Near East; **91P.** Music of African Americans; **91Z.** Open Ensemble.

## Upper Division Courses

**106A-106B-106C. Music of the American Indians.** American Indian music studied within broader context of styles, cultural values, and sources, including films, recordings, lectures, and limited group singing and dancing. **106A.** Eastern California-Yuman, Great Basin, and Northwest Coast Areas; **106B.** Athabaskan, Pueblo, Plains, and Modern Pan-Indian Trends; **106C.** Sociology of American Indian Music.

**M108A-108B. Music of Latin America.** Lecture, three hours. Prerequisite: consent of instructor. Course M108A is not prerequisite to 108B. Survey of traditional and contemporary musical culture. **M108A.** Mexico, Central America, and the Caribbean Isles. (Formerly numbered 108A.) (Same as Chicana and Chicano Studies M108A.); **108B.** Latin South America.

**M110A-M110B. African American Musical Heritage.** (Same as Afro-American Studies M110A-M110B and Folklore M154A-M154B.) Study of African music and its impact on the Americas; survey of development of various African American musical genres from slave era to the present, including traditions in the West Indies and Central and South America.

**M111. Ellingtonia.** (Same as Afro-American Studies M145.) Music of Duke Ellington, his life, and far-reaching influence of his efforts. Ellington's music, known as "Ellingtonia," is one of the largest and perhaps most important bodies of music ever produced in the U.S. Covers the many contributions of other artists who worked with Ellington, such as composer Billy Strayhorn and musicians Johnny Hodges, Cootie Williams, and Mercer Ellington.

**113. Music of Brazil.** Lecture, three hours. Prerequisite: consent of instructor. History of ethnic and art music in Brazil, with some reference to Portuguese antecedents.

**M115. Musical Aesthetics in Los Angeles.** (Formerly numbered 115.) (Same as Chicana and Chicano Studies M115.) Lecture, three hours. Confronting aesthetics from classical perspective of art as intuition, examination on a cross-cultural basis of diverse musical contexts within the vast multicultural metropolis of Los Angeles, with focus on various musical networks and specific experiences of the Chicano/Latino, African American, American Indian, Asian, rock culture, Western art music tradition, and the commercial music industry.

**M116. Chicano/Latino Music in the U.S.** (Formerly numbered 116.) (Same as Chicana and Chicano Studies M116.) Lecture, three hours. Prerequisite: consent of instructor. Historical and analytical examination of musical expression of Latino peoples who have inhabited present geographical boundaries of the U.S.

**117. American Popular Music.** Survey of history and characteristics of American popular music and its relationship to American culture, with emphasis on 20th-century popular music and its major composers, including comparison between traditional pre-1950 popular music and trends in post-1950 popular music.

**118. Development of Rock.** Prerequisite: consent of instructor. History of rock from the 1950s to the 1970s. In-depth survey of stylistic trends illustrated by pertinent examples and accompanied by extensive musical analysis.

**120A-120B. Development of Jazz.** Introduction to jazz; its historical background and its development in the U.S.

**121. Cross-Cultural Perspectives in Jazz.** Prerequisite: consent of instructor. Exploration of assimilation and retention of jazz from the U.S. in various countries, with particular emphasis on cultural and social features which form the basis for new jazz-ethnic music blends.

**123. Music of Bebop.** Lecture, three hours. Study of jazz bebop tradition, including analysis of compositions and song forms, styles of improvisation, and developments from 1940 to the present.

**M124. Anglo-American Folk Song.** (Same as English M111B and Folklore CM106.) Survey of Anglo-American balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values.

**M126. Folk Music of Western Europe.** (Same as Folklore M181.) Prerequisite: consent of instructor. Introduction to forms and styles of traditional music in Western Europe. Historical and ethnological perspectives on this music combined with numerous recorded examples from major cultural subdivisions of the region.

**M127. Jazz Keyboard Harmony (1 unit).** (Same as Music M127.) Laboratory, two hours. Study of jazz harmony through use of piano keyboard. Development of basic keyboard skills in order to manipulate essential chord voicings and harmonic passages in jazz music. Instruction in basic jazz theory.

**128. Folk Music of Eastern Europe.** Prerequisite: consent of instructor. Introduction to forms and styles of traditional music in Eastern Europe (including the Balkans). Historical and ethnological aspects of the music illustrated by numerous recorded examples from major cultural subdivisions of the area.

**M129A-M129B-M129C. Jazz Theory and Improvisation (2 units each).** (Same as Music M129A-M129B-M129C.) Lecture, four hours. Elements of jazz theory and improvisation. **M129A.** Basic jazz harmonic constructions, as well as melodic, rhythmic, and harmonic concepts, and how to apply those elements to personal efforts in improvisations. **M129B.** Requisite: course M129A with a grade of C or better. Medium-level jazz harmonic constructions. **M129C.** Requisite: course M129B with a grade of C or better. Advanced-level jazz harmonic constructions.

**130. Folk Music of the Mediterranean.** Lecture, three hours. Prerequisite: consent of instructor. Introduction to forms and styles of traditional music in the Mediterranean basin, particularly features of contrast, similarity, and cross-cultural interaction. Historical and ethnological aspects of the music illustrated by numerous recorded examples from major cultural subdivisions of the area.

**CM132. Celtic Folk Music.** (Same as Folklore CM132.) Prerequisite: consent of instructor. Survey and analysis of indigenous traditional music in lands where a Celtic language is or was spoken into modern times. Instrumental and vocal genres, context and performance, social value and ideology. Concurrently scheduled with course CM232. P/NP or letter grading.

**136A-136B. Music of Africa.** Prerequisite: consent of instructor. Investigation of historical aspects, social functions, musical instruments, and relationships of music to other art forms in selected areas of Africa.

**146. Folk Music of South Asia.** Lecture, three hours; laboratory, one hour. Prerequisite: consent of instructor. Illustrated survey of some regional genres, styles, and musical instruments found in India and Pakistan, with special reference to religious, social, economic, and cultural context of their occurrence.

**147. Survey of Classical Music in India.** Examination of melodic, metric, and formal structures of Indian classical music in context of religious, socio-cultural, and historical background of the country.

**156A-156B. Music of China.** Lecture, three hours; laboratory, two hours. Prerequisite: consent of instructor. **156A.** History and theory of music of China, including survey of various provinces and their instrumental techniques. **156B.** Prerequisite: course 156A. Introduction to various notational systems. Analysis of representative styles.

**157. History of Chinese Opera.** Prerequisite: consent of instructor. Survey of dramatic elements in Chinese operas, incorporating singing, dance, and acrobatics. Emphasis on traditional and modern Peking opera and its relation to Cantonese and other genres.

**158A-158B-158C. Studies in Chinese Instrumental Music.** Lecture, three hours; laboratory, one hour. Prerequisite: consent of instructor. **158A.** Study of literature, major sources, paleography, theory, and philosophy of the Ch'in, including transcription and analysis. **158B.** Study of literature, major sources, paleography, theory, and philosophy of the P'i P'a, including transcription and analysis. **158C.** Comprehensive study of Chinese musical instruments, classification system, specific musical notation, and use in context of Chinese society.

**160A. Survey of Music in Japan.** Lecture, three hours. Survey of main genres of Japanese traditional music, including Gagaku, Buddhist chant, Biwa music, Koto music, Shamisen music, and music used in various theatrical forms.

**160B. Studies in Japanese Court Music.** Lecture, two hours; laboratory, one hour. Prerequisite: minimal musical ability. In-depth study of Japanese court music, including historical background, with emphasis on understanding the instrumental techniques and notation of various instruments of the court orchestra.

**170. Acoustics.** Lecture, three hours. Prerequisite: consent of instructor. Interrelationship of acoustical and musical phenomena. Tuning systems, consonance and dissonance, tone quality. Lecture, demonstration, and discussion; tours of instrumental collections and acoustical research facilities.

**171. Instruction in Advanced Jazz Performance (2 units).** Laboratory, one hour. Prerequisite: advanced performance ability as demonstrated by audition. Study of jazz repertoire and techniques for specific instruments and voice. May be repeated for a maximum of 12 units.

**172A-172B. Psychology of Music.** **172A.** Designed for nonmajors. Introduction to psychology of music; historical background and the broad field of study, including use of music as a stimulus, tests and measurements, and related modes of musical behavior. **172B.** Prerequisite: course 172A or consent of instructor. Study of psychological factors and problems in music from points of view of listener, performer, and composer.

**173. Experimental Research in Music.** Prerequisite: consent of instructor. Recommended for music majors in all specializations. Theories and processes in various modes of musical experimentation: physical, perceptual, psychological, pedagogical, quantificational, statistical procedures.

**174. Aesthetics of Music.** Lecture, three hours. Designed for nonmajors. Historical survey of musical aesthetic thought and practice. Selected readings and musical examples.

**175. Sociology of Music.** Intended for ethnomusicology, musicology, and music majors. Introduction to sociology of music, its principles and basic concepts, and its critical significance for sociomusicological inquiry, including study of popular music, ethnomusicology, and cultural politics of music. P/NP or letter grading.

**M177. Jazz Combo (2 units).** (Same as Music M177.) Small group performance of various styles in ensembles of three to 10 musicians. May be repeated for a maximum of 12 units.

**C179. Proseminar: Systematic Musicology.** Seminar, three hours. Prerequisite: consent of instructor. Introduction to systematic musicology, including basic readings in aesthetics/philosophy; anthropology, sociology, and ethnomusicology; psychology and acoustics. May be concurrently scheduled with course C203.

**M180. Analysis of Traditional Music.** (Same as Folklore M180.) Intended for ethnomusicology, musicology, and folklore majors. Intensive study of methods and techniques necessary to understand traditional music.

**181. Anthropology of Music.** Intended to ethnomusicology, musicology, and anthropology majors. Cross-cultural examination of music in context of social behavior and how musical patterns reflect patterns exhibited in other cultural systems, including economic, political, religious, and social structure.

**M186. Senior Recital or Research Paper (2 units).** (Same as Music M186.) Preparation and performance of one-hour senior recital of jazz repertoire or preparation of a senior paper (topic and length to be approved by assigned adviser). P/NP grading.

**190. Study of Ethnomusicology.** (Formerly numbered C190A.) Lecture, three hours. Requisites: courses 10A-10B-10C, 20A-20B-20C. Intended for ethnomusicology majors. Introduction to history of the field, basic fieldwork and analysis methods, and current issues in research.

**199E. Special Studies in Ethnomusicology (2 to 4 units).** Hours to be arranged. Prerequisites: senior standing, 3.0 GPA, consent of instructor and department chair. Individual studies in ethnomusicology resulting in research project. May be repeated for a maximum of eight units.

**199S. Special Studies in Systematic Musicology (2 to 4 units).** Hours to be arranged. Prerequisites: senior standing, 3.0 GPA, consent of instructor and department chair. Individual studies in systematic musicology resulting in research project. May be repeated for a maximum of eight units.

## Graduate Courses

**200. Research Methods and Bibliography (6 units).** Lecture, three hours. Prerequisite: graduate standing. Guided writing, utilizing specific bibliography, in ethnomusicology and systematic musicology.

**201A-201B. Proseminars: Ethnomusicology.** (Formerly numbered C201A-C201B.) Lecture, three hours. Designed for graduate students. Basic literature and schools of thought in the field of ethnomusicology from the late 19th century to the present.

**C203. Proseminar: Systematic Musicology.** Seminar, three hours. Prerequisite: consent of instructor. Introduction to systematic musicology, including basic readings in aesthetics/philosophy; anthropology, sociology, and ethnomusicology; psychology and acoustics. May be concurrently scheduled with course C179.

**207. Seminar: North American Indian Music.** Seminar, three hours. Prerequisite: course 106A or 106B or 106C or consent of instructor. Survey of representative musical styles of Native North American Indians, including problems of transcription, methods of analysis, symbolic implications of song texts. Emphasis on interrelationship between music and cultural context. Influence of Western music in acculturative contexts.

**208. Seminar: Latin American Music.** Seminar, three hours. Prerequisite: consent of instructor. Review of bibliographic, methodological, and philosophical bases of musical research in Latin America, working from both general and specific perspectives. Exploration of research problems and investigations on specific musical cultures and distinct genres of musical expression.

**M211. Seminar: African American Music.** (Formerly numbered 211.) (Same as Afro-American Studies M211.) Seminar, three hours. Prerequisites: courses M110A-M110B or consent of instructor, graduate standing. Intensive investigation of problems, theories, and methods of research related to study of African American music. Emphasis on relationship of problems to representative styles of African American music.

**228. Seminar: Balkan Music.** Seminar, three hours. Prerequisite: course 128 or consent of instructor. Major issues in study of Balkan music, including song text analysis, music instruments, dance music, rituals and customs, minorities, and ideology.

**CM232. Celtic Folk Music.** (Same as Folklore CM232.) Prerequisite: consent of instructor. Survey and analysis of indigenous traditional music in lands where a Celtic language is or was spoken into modern times. Instrumental and vocal genres, context and performance, social value and ideology. Concurrently scheduled with course CM132. S/U or letter grading.

**237. Seminar: African Music.** Seminar, three hours. Prerequisite: course 136A or 136B or consent of instructor. Intensive investigation of musical style; historical, social, and cultural aspects of indigenous musical traditions and related art forms.

**240. Music of Arabic-Speaking Near East.** Lecture, three hours. Prerequisite: course 282 or course in ear training, analysis, and theory or consent of instructor. Investigation of historical and cultural backgrounds, main musical styles, relationship between theory and practice and emphasis on mode and improvisation, and 20th-century trends. Concurrent participation in Near East performance ensemble (course 91N) required.

**241. Music of Iran and Other Non-Arabic-Speaking Communities.** Lecture, three hours. Prerequisite: course 282 or course in ear training, analysis, and theory or consent of instructor. Comparative study of music of Iran and other related areas, including Turkey, with particular reference to their historical and cultural background, sources on music theory and aesthetics, instruments, style, technique of improvisation, and contemporary practice. Concurrent participation in Near East performance ensemble (course 91N) required.

**248A-248B. Classical Music of India.** Lecture, three hours. Prerequisite: course 146 or 147 or consent of instructor. Study of history, theory, and practice of north and south Indian classical music. During first term, emphasis on music history and traditional theory; second term, analysis of present-day forms, styles, techniques, and musical instruments. Concurrent participation in Indian performance group (course 91F) required.

**250A-250B. Music of Indonesia.** Lecture, three hours. Prerequisite: course 20C or consent of instructor. During first term, emphasis on music and related performing arts of Java. Focus on music and performing arts of Bali and other Indonesian islands during second term. Concurrent participation in one Indonesian performance group (course 91B or 91H) required.

**252. Seminar: Music of Mainland Southeast Asia.** Seminar, three hours. Prerequisite: course 20C or consent of instructor. Presentation of materials concerning musical performance traditions of Laos, Cambodia, Vietnam, Thailand, and Burma, both in mainland Southeast Asia and in the American context, with perspectives from archaeology, history, performance theory, applied anthropology, and ethnomusicology.

**271. Seminar: Acoustics of Music (6 units).** Seminar, three hours. Prerequisite: course 170 or consent of instructor. Selected topics in acoustics, including laboratory methodologies and practical applications. Topics include Western and non-Western instruments, tuning systems, psychoacoustics, and methods of spectral analysis. May be repeated once for credit.

**273. Seminar: Psychology of Music (6 units).** Seminar, three hours. Prerequisite: course 173 or consent of instructor. Selected topics in psychology of music, including recent findings in brain research, musical perception, learning, cognition, memory, therapy, affect, meaning, and measurement. May be repeated once for credit.

**275. Seminar: Aesthetics of Music (6 units).** Seminar, three hours. Prerequisite: course 176 or consent of instructor. Specific topics in Western and non-Western aesthetic thought, including value, meaning (semiotics), historical development of theoretical perspectives and critical theory, and interpretation. May be repeated once for credit.

**279. Seminar: Systematic Musicology.** Seminar, three hours. Prerequisites: course 170, consent of instructor. Exploration of specific topics in general field of systematic musicology covering disciplines such as anthropology, acoustics, aesthetics, music perception, philosophy, organology, sociology, and experimental approaches. May be repeated for credit.

**281A-281B. Seminars: Field and Laboratory Methods in Ethnomusicology (6 units each).** Seminar, three hours; laboratory, two hours. Prerequisites: courses 201A-201B. Fieldwork concepts and methods using technical equipment, conducting interviews, dealing with ethical issues, and designing research projects.

**282. Seminar: Analysis (6 units).** Seminar, three hours. Prerequisites: graduate standing in ethnomusicology, or course M180 and consent of instructor. Intensive discussion of techniques used in ethnomusical analysis, including transcription and notation, with emphasis on analysis of musical performance and music events.

**283. Seminar: Study of Musical Instruments (Organology) (6 units).** Seminar, three hours. Prerequisites: courses 201A-201B or consent of instructor. Musical instruments studied in terms of their structures, performance contexts, cultural significance, and patterns of change.

**284. Seminar: Anthropology of Music.** Prerequisites: courses 201A-201B. Analysis of current anthropological paradigms and issues that have major impact on ethnomusicology.

**285. Seminar: Comparative Music Theory (6 units).** Seminar, three hours. Prerequisite: consent of instructor. Comparative study of codified music theories of select cultures — Western and non-Western — considered in themselves and as expressions of their societies. Theory considered as a science of music; its place between cultural values and artistic practice in different civilizations.

**M287. Seminar: Folk Music.** (Same as Folklore M258.) Seminar, three hours. Prerequisite: consent of instructor.

**290. Seminar: Ethnomusicology (6 units).** Seminar, three hours. Prerequisites: courses 20A-20B-20C, 200, and 201A-201B, or consent of instructor. May be repeated for credit.

**292A-292Z. Seminars: Special Topics in Ethnomusicology.** Prerequisites: graduate standing, consent of instructor. Designed to utilize special interests and expertise of regular and visiting faculty; topics of current interest presently offered in ethnomusicology program.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Introductory Practicum for Teaching Apprentices in Ethnomusicology and Systematic Musicology (2 units).** Eight weekly two-hour sessions, plus intensive training session during Fall Quarter registration week. Prerequisite: appointment as teaching apprentice in Ethnomusicology and Systematic Musicology Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching ethnomusicology and systematic musicology at college level. May not be applied toward degree requirements. S/U grading.

**596. Directed Individual Studies (2, 4, or 6 units).** Only four units may be applied toward M.A. minimum course requirements.

**597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations (2 or 4 units).** May be repeated for credit. S/U grading.

**598. Guidance of M.A. Thesis (4, 8, or 12 units).** May be repeated for credit. S/U grading.

**599. Guidance of Ph.D. Dissertation (4, 8, or 12 units).** May be repeated for credit. S/U grading.

## EUROPEAN STUDIES

*Interdepartmental Program  
College of Letters and Science*

UCLA  
11371 Bunche Hall  
Box 951446

Geoffrey W. Symcox, Ph.D., *Chair*

### Professors

Ehrhard Bahr, Ph.D. (*Germanic Languages*)  
Ivan T. Berend, Ph.D. (*History*)  
Rogers Brubaker, Ph.D. (*Sociology*)  
Bernard D. Frischer, Ph.D. (*Classics*)  
Michael Heim, Ph.D. (*Slavic Languages and Literatures*)  
Michael Mann, Ph.D. (*Sociology*)  
Peter H. Reill, Ph.D. (*History*)  
David Sabeau, Ph.D. (*History*)  
Debora L. Silverman, Ph.D. (*History*)  
Geoffrey W. Symcox, Ph.D. (*History*)

### Associate Professor

Gail Kligman, Ph.D. (*Sociology*)

### Assistant Professors

Richard Anderson, Ph.D. (*Political Science*)  
Stephen Frank, Ph.D. (*History*)  
Malina Stefanovska, Ph.D. (*French*)

## Scope and Objectives

The European Studies Program provides undergraduates with an opportunity to study Europe from the vantage points of several disciplines in the humanities and social sciences. Its primary goals are twofold: to enable students to cross the existing boundaries between and within the humanities and social sciences and to develop approaches to European society and culture consonant with the dramatic changes taking place in that region. Not only has the Cold War model of distinct eastern and western blocs lost the bulk of its explanatory power, but European culture, economy, and social structure have been

transformed by immigration, unification, Americanization, and new developments in the intellectual and political realms.

The events of recent years make it clear that the University and its students require new academic approaches to the region. The demise of the Soviet Bloc, the increased ethnic conflict throughout the region, the migration of peoples within Europe and from other parts of the world, the challenges of a rapidly evolving global economic system, and the uncertainties inherent in the process of unification — all these developments call into question the intellectual configurations that have long dominated our thinking. Today the regions of Europe provide a laboratory for examining — and finding solutions for — everything from efforts to integrate people of color to changes in the family and the status of women. They challenge us to consider new philosophical, artistic, and literary approaches and require us to come to grips with the collapse of socialist command economies in the East and the exhaustion of once-successful welfare states in the West.

To enable students to consider these questions, the European studies major offers an interdisciplinary program leading to the Bachelor of Arts degree. Students are required to (1) study a European language other than English, (2) develop a historical perspective on European issues, (3) examine European culture, society, politics, and economy, and (4) acquire basic analytical and theoretical skills. Central to this effort are a series of core seminars and a senior essay to encourage majors to delve into a research topic of their choice.

## Undergraduate Study

### Bachelor of Arts Degree

The curriculum is designed to serve the needs of students who wish to (1) approach the study of Europe from a structured, interdisciplinary perspective, (2) pursue graduate work in disciplines permitting the study of Europe, (3) orient their professional life toward European affairs in fields such as law, business, diplomacy, journalism, and human services, and (4) acquire valuable skills in foreign languages and writing that will assist them in their careers.

### Admission

Interested students should meet with the program chair no later than the beginning of the sophomore year to discuss requirements and formulate their course of study. Students are expected to declare the major at the end of their sophomore year, following normal UCLA procedures, and must have a minimum grade-point average of 2.5 in all preparation courses. Transcripts and course plans demonstrating that they will have completed all lower division requirements by the end of their junior year must be presented.

### Foreign Language Requirement

Students must prepare for the major by studying a European language other than English.

This language — the declared foreign language — helps to focus the major and determine options for the period of study abroad. Students are expected to fulfill the specific requisites of their selected language department (French, Germanic Languages, Italian, Slavic Languages and Literatures, Spanish and Portuguese) for entrance into upper division courses. Students who wish to study Latin or Greek are also required to demonstrate proficiency in a modern language. In most cases, courses 1, 2, 3, 4, 5, 6, or the equivalent fulfill the requirement (Italian and Spanish have slightly different course numbers and requirements). Students must complete the lower division foreign language requirement by the end of the sophomore year.

### Preparation for the Major

*Required:* (1) *Geography* — demonstrated competency in geography by passing an examination given annually by the program; (2) *humanities and the arts* — one course from Philosophy 1, 2, 4, 5A, 6, 7, 8, 21, or 22; one lower division introductory language department course in literature or civilization that focuses on the declared foreign language; one course from Art History 54, 57, Musicology 2B, or 13; (3) *social sciences* — Economics 1 or 5; two courses from History 1A, 1B, 1C; two courses from Geography 3, 5, Political Science 10, 20, 30, 50, Sociology 1, 2, 18, Women's Studies 10.

By carefully selecting courses for the Preparation for the Major, students can fulfill their general education requirements in the social sciences, foreign language, quantitative reasoning, and humanities.

### The Major

*Required:* (1) At least one upper division course in the literature of the declared foreign language, with instruction and reading assignments in that language (see the list of approved courses below); (2) one course from History 124A, 124B, 125A through 125F, 126A through 126F, 127A, 127B, 128A, 128B, 128C, 129A, 129B, 129C, 131A through 131D, 132A, 132B, 133A, 133B, 134A, 134B, 141A, 141B, or 141C; (3) European Studies 101 and 199; (4) at least eight electives selected from the list of approved courses, with a minimum of three courses from humanities and three from social sciences. Electives must either continue the regional focus, introduce a theoretical and methodological perspective, or introduce a rationally conceived comparative point of view (sample programs are on file in the program office).

During their senior year students must write an extended paper offering original research on a topic of interest to them. Topics must be approved by a faculty adviser selected by the student and endorsed by the program's executive committee.

Students must consult with the program chair to design their upper division coursework.

**Study in Europe**

The program expects students to spend at least one term — and preferably a full academic year — studying in the European country most relevant to their work. This is normally done under the auspices of the University of California Education Abroad Program; however, alternative arrangements can be made at UCLA if students have financial or personal considerations that may prevent them from going overseas. To obtain UCLA credit after returning to campus, students must have their foreign transcripts evaluated by the program faculty and staff.

**European Studies****Upper Division Courses**

**101. Introduction to European Studies.** Discussion, three hours; outside study, nine hours. Limited to and required of European studies majors. Interdisciplinary seminar that introduces students to central topics, themes, and concepts of European studies, including the individual and the state, cultural life, economic relations, nationalism, immigration, and international relations.

**102. Special Topics in European Studies.** Discussion, three hours; outside study, nine hours. Prerequisite: consent of instructor. Variable topics. May be repeated for credit.

**199. Seminar for Thesis Writers.** Discussion, three hours; outside study, nine hours. Limited to and required of senior European studies majors. Seminar on research methods for required senior thesis in European studies.

**Course List**

All courses are not offered every academic year. Students should contact the individual departments or the European studies staff for information about the availability of specific courses.

**Anthropology**

- 130. Study of Culture
- 132. Technology and Environment
- 133Q. Symbolic Systems
- 133R. Aesthetic Systems
- M140. Language in Culture
- 150. Study of Social Systems
- M154Q. Gender Systems: Global
- 156. Comparative Religion
- 159. Warfare and Conflict
- 182. History of Anthropology
- 183. History of Archaeology

**Art History**

- M102A. Minoan Art and Archaeology
- M102B. Mycenaean Art and Architecture
- M102C. Archaic Greek Art and Archaeology
- M102D. Classical Greek Art and Archaeology
- M102E. Hellenistic Greek Art and Archaeology
- M102F. Etruscan Art
- M102G. Roman Art
- M102H. Late Roman Art
- M102I-M102J-M102K. Classical Archaeology
- 105A. Early Christian Art
- 105B. Early Medieval Art
- 105C. Romanesque Art
- 105D. Gothic Art
- 105E. Byzantine Art
- 105F. Late Gothic Art and Architecture

- 106A. Italian Art of the *Trecento*
- 106B. Italian Art of the *Quattrocento*
- 106C. Italian Art of the *Cinquecento*
- 106D. Late Renaissance Art: Counter-Reformation
- 108A-108B. Northern Renaissance Art
- 109A, 109B. Baroque Art
- 109C. European Art of the 18th Century
- 109D. Art and Architecture of Georgian England
- 110A. European Art of the 19th Century
- 110B. European Art of the 19th Century: Realism and Impressionism
- 110C. European Art of the 19th and 20th Centuries: Postimpressionism to Surrealism
- 110D. Contemporary Art

**Bulgarian (Slavic Languages)**

- 154. Survey of Bulgarian Literature

**Classics**

- 140. Topics in History of Greek Literature
- 141. Topics in History of Latin Literature
- 142. Ancient Epic
- 144. Generic and Topical Studies in Ancient Literature
- M145A. Ancient Greek and Roman Philosophy
- M145B. Later Ancient Greek Philosophy
- 150A. Origins of the Western View of Women: The Female in Greek Thought
- 150B. Origins of the Western View of Women: The Female in Roman and Early Christian Thought

Bruce Yonemoto, *Visiting*

## Scope and Objectives

The purpose of the Film and Television Department is to develop in its students a scholarly, creative, and professional approach to the film and television arts. The aim of the department is to train graduates who will eventually make original contributions in their chosen field.

The department offers graduate programs leading to the Master of Arts, Master of Fine Arts, and Ph.D. degrees in Film and Television.

## Undergraduate Study

### Bachelor of Arts Degree

The undergraduate film and television major encourages development of a personal vision which incorporates creative, practical, intellectual, and aesthetic values. Within the context of a liberal arts education, the program provides a broad background in the field and in the diversity of film and television practice, including courses in history and theory, critical thinking, animation, screenwriting, and the fundamentals of film, video, and television production.

Students are admitted for Fall Quarter only. Admission is highly competitive, and only a limited number of students can be accepted each year. Prior to entry, students are expected to complete at least 84 quarter units (56 semester units) with a 3.0 grade-point average or better and the general education requirements of the School of Theater, Film, and Television. Applicants are also required to submit a portfolio of original written work consisting of (1) a personal essay, (2) a critical essay on a film or major television program, and (3) a creative writing sample. For further information on admission requirements, contact the Student Services Office, School of Theater, Film, and Television, UCLA, 103 East Melnitz Building, Box 951622, Los Angeles, CA 90095-1622.

### Preparation for the Major

*Required:* Film and Television 106A, 106B or 106C, 110A, and one theater course (history, literature, or production).

## The Major

*Required:* Film and Television 115, 130A, 130B, 150, 154, 163, 185, 192; one critical studies elective (not previously taken as preparation for the major) from 106B, 106C, 107, 108, 112, 113, 114; and a senior concentration (at least 20 units) from one of the following areas: (1) *film production* — courses 175A, 175B, 178, (2) *television and video production* — courses 176A, 176B, 187A, 187B, 187C, (3) *screenwriting* — courses 135, 199, (4) *animation* — courses 181A, 181B, 181C, (5) *critical studies* — courses 106A, 106B, 106C, 107, 108, 110C, 112, 113, 114, 116, 127.

Students should be mindful of the exigencies inherent in filmmaking and be prepared to meet the additional demands of time and costs.

Students are required to perform assignments on each other's projects. In addition, the department reserves the right to hold for its own purposes examples of any work done in classes and to retain for distribution such examples as may be selected.

Consult the *Schedule of Classes* for courses limited to majors only.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degrees

The Department of Film and Television offers the Master of Arts degree and the Master of Fine Arts degree in Film and Television.

## Master of Arts

### Admission

Students are admitted in the Fall Quarter only. Admission is competitive, and only a limited number of students are accepted each year. The department does not have an application in addition to the one used by Graduate Admissions, and no screening examination prior to admission is required.

Additional admission requirements are noted under each specific degree program description.

Applicants must submit a sample of scholarly or critical writing, a statement of purpose, three letters of recommendation, and other information such as a résumé, Graduate Record Examination (GRE) scores, and proof of competence in English for international students whose native tongue is not English (such as TOEFL scores) that may be required to establish the quality of their work in the specialization.

## Areas of Study

The program requires that students be conversant in both film and television, as they are tested on each in the comprehensive examination.

## Course Requirements

A minimum of nine courses is required, five of which must be 200-level courses in film and/or television history, theory, and criticism. Of the five courses, Film and Television 206C, 208B, and 217 are required core courses. In addition, Film and Television 200 is required of all students. All five of the graduate-level courses must be completed with a grade of B or better.

Only eight units of Film and Television 596A, 596B, 596C, and 598 may be applied toward the total course requirement for the degree, and none of these courses may be applied toward the minimum graduate course requirement.

Students who wish to write a thesis-length paper may petition the critical studies committee to do so; if approved, this would be done through a two-quarter thesis course.

## Comprehensive Examination Plan

The written examination is taken at home over two full consecutive days and examines a broad range of knowledge in film and television. After completion, the committee grades the student either pass or fail. The student may be reexamined on any failed portions of the examination when it is next regularly scheduled, or within the year following the term in which it was first taken. The examination is required of all M.A. students applying to the Ph.D. program.

## Thesis Plan

None.

## Master Of Fine Arts

### Admission

Students are admitted in the Fall Quarter only. Admission is competitive, and only a limited number of students are accepted each year. The department does not have an application in addition to the one used by Graduate Admissions, and no screening examination prior to admission is required. Applicants with diverse backgrounds and undergraduate majors in areas other than film and television are encouraged. Applicants must state clearly the degree objective (M.F.A.) and the area of specialization desired within the program: animation, film/television production, screenwriting, or producer's program. All areas of specialization require three letters of recommendation.

Applicants intending to concentrate in film/television production must submit a description of a film or television project that may possibly be undertaken in graduate study. The description should be in proposal or treatment form, two to three pages in length. This material is nonreturnable.

Applicants intending to concentrate in writing must submit samples of creative writing such as screenplays, short stories, plays, or poems.

Applicants intending to concentrate in animation must submit a description of an animation project that may possibly be undertaken in graduate study, preferably in storyboard form. Other creative work may be submitted.

Applicants intending to concentrate in the producer's program may submit a portfolio of supporting material which shows evidence of creative background, or a substantial statement of purpose and resume.

## M.F.A. Film and Television/M.A. African Area Studies

The African Area Studies Program and the Department of Film and Television have an articulated degree program which allows students to combine study for the Master of Arts in African Area Studies with the Master of Fine Arts in Film and Television, with a specialization in motion picture/television.

## Areas of Study

Consult the department.

## Course Requirements

A total of 18 courses is required for the degree, five of which must be at the graduate level. At least three courses must be in the 200 series in film history, aesthetics, or structure. Course requirements for each specialization are available in the Student Services Office, Department of Film and Television.

Only 16 units of Film and Television 596 may be applied toward the total course requirement, and only eight of these units may be applied toward the minimum graduate course requirement. Only four units of Film and Television 596A and four units of 596B may be taken prior to advancement to candidacy. Film and Television 596C through 596F may be taken only after advancement to candidacy.

Fieldwork and internships are not required but may be taken as courses which may be applied toward the degree.

## Comprehensive Examination Plan

The comprehensive plan is satisfied by students fulfilling projects appropriate to their specializations. No later than the beginning of the final quarter of residence, the student must file the appropriate documents for advancement to candidacy and receive approval for the advancement from the M.F.A. advisory committee.

## Thesis Plan

None.

## Doctoral Degree

### Admission

Students are admitted in the Fall Quarter only. Admission is competitive, and only a limited number of students are accepted each year. The department does not have an application in addition to the one used by Graduate Admissions, and no screening examination prior to admission is required.

Completion of an M.A. or M.F.A. degree equivalent to that offered by the UCLA Department of

Film and Television is required. In exceptional cases, students with an M.A. outside the field are considered for direct admission to the program. The dossier submitted for admission must contain a letter describing reasons for wishing to earn the Ph.D., the master's thesis or writing samples that demonstrate a high level of ability to write criticism or historical narrative, three letters of recommendation, Graduate Record Examination (GRE) scores, and proof of competence in English for international students whose native language is not English (such as Test of English as a Foreign Language scores).

## Major Fields or Subdisciplines

Students are expected to understand film and television within their social contexts as significant forms of art and communication, and to achieve by disciplined study a mastery of their history, theory, and criticism.

## Course Requirements

During the first six quarters, 13.5 courses must be taken. During the first year of residence, Film and Television 211B, 215, and 273 must be completed, while Film and Television 274 is required in the Fall and Spring Quarters of the second year in residence. Two independent study courses in the specific field of the dissertation must also be taken in the second year. In addition to this core sequence, Film and Television 496 is also required. Further, students must select nine graduate elective courses, at least six of which must be from film and television.

Each student must select courses from two areas of concentration, chosen to broaden their familiarity and competence in related subject areas. A suggested list of concentrations is as follows: film theory, criticism, narrative studies, film and the other arts, authors, genres, documentary, film history, American film, European film, non-Western film and television, television studies, media and society, film and television as a business enterprise, and film and television production. It is expected that the dissertation topic will emerge from one of the concentrations.

## Written and Oral Qualifying Examinations

After completion of all language and course requirements, students are eligible to take and required to pass the Ph.D. written qualifying examination. This examination, which is given in the Spring Quarter only, is taken at home over four full consecutive days. After the student passes the written examination, a doctoral committee is formed to administer the University Oral Qualifying Examination. Students are advanced to candidacy only on successful completion of this examination.

# Film and Television

## Upper Division Courses

**106A. History of the American Motion Picture (6 units).** Lecture/screenings, eight hours; discussion, one hour. Historical and critical survey, with examples, of the American motion picture both as a developing art form and as a medium of mass communication. May be repeated once for credit with consent of department and topic change.

**106B. History of the European Motion Picture (6 units).** Lecture/screenings, eight hours; discussion, one hour. Historical and critical survey, with examples, of the European motion picture both as a developing art form and as a medium of mass communication. May be repeated once for credit with consent of department and topic change.

**106C. History of African, Asian, and Latin American Film (6 units).** Lecture/screenings, eight hours; discussion, one hour. Critical, historical, aesthetic, and social study — together with exploration of the ethnic significance — of Asian, African, Latin American, and Mexican films.

**107. Experimental Film (6 units).** Lecture/screenings, eight hours; discussion, one hour. Study and analysis of unconventional developments in the motion picture.

**108. History of Documentary Film (6 units).** Lecture/screenings, eight hours; discussion, one hour. Philosophy of documentary approach in the motion picture. Development of critical standards and examination of techniques of teaching and persuasion used in selected documentary, educational, and propaganda films.

**110A. History of Broadcasting.** Lecture/viewing, six hours; discussion, one hour. Critical survey of broadcasting here and abroad. Consideration of social responsibilities and educational implications of broadcasting.

**110C. World Media Systems.** Lecture/viewing, four hours; discussion, one hour. Prerequisites: course 110A or equivalent, upper division standing, consent of instructor. Global analysis of internal and external broadcasting services, with emphasis on their motives, origins, technologies, and programming. Special attention to political, economic, and regulatory constraints and common world media issues.

**112. Film and Social Change (6 units).** Lecture/screenings, eight hours; discussion, one hour. Development of documentary and dramatic films in relation to and as a force in social development.

**113. Film Authors (6 units).** Lecture/screenings, eight hours; discussion, one hour. In-depth study of a specific film author (director or writer). May be repeated once for credit with consent of department and topic change.

**114. Film Genres (6 units).** Lecture/screenings, eight hours; discussion, one hour. Study of a specific film genre (e.g., Western, gangster cycle, musical, silent epic, comedy, social drama). May be repeated once for credit with consent of department and topic change.

**115. Stylistic Studies for the Moving Image: Theory and Practice.** Lecture, four hours; screenings, four to eight hours. Drawing heavily on a wide array of historical examples and using laser disc technologies, examination of many expressive strategies potentially usable in creation of moving image art forms: iconography, editing, composition, kineshetics, sound, narrative, discourse, and performance.

**116. Film Criticism.** Lecture, four hours; laboratory, to be arranged. Study of and practice in film criticism.

**M117. Chicanos in Film/Video (6 units).** (Same as Chicana and Chicano Studies M114.) Lecture/screenings, eight hours; discussion, one hour. Examination of representation of Mexican Americans and Chicanos in four Hollywood genres — silent “greaser” films, social problem films, the Western, and the gang film — which are major genres that account for films “about” or “with” Mexican Americans produced between 1908 and 1980. Examination of recent Chicano-produced films that subvert or “signify” on these Hollywood genres, including *Zoot Suit*, *The Ballad of Gregorio Cortez*, and *Born in East L.A.* Consideration of shorter, more experimental work that critiques the Hollywood image of Chicanos.

**126. Acting for Film and Television.** Laboratory, six hours. Prerequisite: consent of instructor. Projects in acting for television, video, and film. May be repeated twice for credit.

**127. Problems and Ethical Issues in Film and Telecasting.** (Formerly numbered 110B.) Lecture, three hours; laboratory, eight to 10 hours. Relevant and highly interactive lecture/discussion/workshop. Student production teams create multimedia presentations designed to provide meaningful information, raise consciousness, stimulate discussion, and provoke debate about today’s powerful media messages (i.e., news, advertising, violence, sex, minority representation).

**128. Media and Ethnicity.** Prerequisite: consent of instructor. Utilizing the Asian American experience, exploration of impact and uses of media on contemporary American ethnic communities. Role and techniques of media influence besides community utilization and production.

**CM129. Contemporary Topics in Theater, Film, and Television (2 units).** (Same as Theater CM129.) Lecture, two hours; screenings, two hours. Prerequisite: upper division or graduate standing in theater/film and television. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in the collaborative effort; examination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated for a maximum of six units. Concurrently scheduled with course CM229.

**130A. Screenwriting Fundamentals (2 units).** Lecture, one hour. Corequisite for graduate students enrolled in course 431. Examination of screenwriting fundamentals: structure, character and scene development, conflict, locale, theme, history of drama. Review of authors such as Aristotle, Egri.

**130B. Screenwriting Fundamentals Workshop.** Discussion, three hours. Prerequisite: consent of instructor. Problems in film and television writing.

**130C. Advanced Scene Writing Workshop.** Discussion, three hours. Requisites: courses 130A, 130B. Limited to film and television majors. Conception and writing of story, script outline, and first act for feature-length screenplay.

**131. Nontheatrical Screenwriting for Film and Television (4 or 8 units).** Discussion, three hours. Prerequisite: consent of instructor. Research and writing of documentary, technical, educational, industrial, and propaganda scripts. May be repeated for a maximum of 12 units.

**135. Advanced Screenwriting Workshop (8 units).** Workshop, three hours. Prerequisites: course 130B and/or consent of instructor. Course in film and television writing. Original screenplays to be developed. May be repeated twice for credit.

**150. Cinematography.** Lecture, three hours; laboratory, three hours. Limited to film and television majors. Introduction to image control in motion picture photography through exposure, lighting, and selection of film, camera, and lens. Supervised projects in photography to complement material covered in lecture.

**151. Film and Television Image Laboratory.** Lecture, three hours; laboratory, to be arranged. Prerequisite: consent of instructor. Limited to film and television majors. Techniques of image manipulation, design, and art direction. May be repeated twice for credit (if repeated, students required to design and complete a short film).

**152. Film and Television Sound Recording.** Lecture, three hours; laboratory, to be arranged. Prerequisite: consent of instructor. Limited to film and television majors. Introduction to principles and practices of film and television sound recording, including supervised exercises.

**153. Motion Picture Lighting.** Lecture, three hours; laboratory, three hours. Requisite: course 150. Limited to film and television majors. Introduction to principles and tools of lighting used in visual storytelling through lectures, discussions, and screenings. Creative lighting techniques covering topics such as people, environment, spatial relationships, movement, color, special effects, and continuity.

**154. Film Editing.** Lecture, three hours; laboratory, to be arranged. Prerequisite: consent of instructor. Limited to film and television majors. Introduction to artistic and technical problems of film editing, with practical experience in editing of image and synchronous sound.

**163. Directing the Camera.** Workshop, eight hours. Limited to film and television majors. Investigation of expressive potential of the image within and beyond the narrative from a directorial perspective. Experiments with working methodologies which stimulate visual creativity and positioning the image as the fundamental element of cinematic expression.

**164. Directing the Actor.** Prerequisite: consent of instructor. Exercises in analysis of script and character for purpose of directing actors. Emphasis on eliciting best possible performance from the actor. May be repeated twice for credit.

**165. Advanced Narrative Television Directing.** Laboratory, six hours. Requisites: courses 130B, 185. Limited to film and television majors. Supervised exercises in television multicamera direction, with emphasis on creative use of cameras, sound, composition, and communication with those in front of and behind the camera. May be repeated twice for credit.

**175A-175B. Undergraduate Film Production (8 units, 4 to 8 units).** Prerequisite: consent of instructor. Limited to film and television majors. **175A.** Lecture, four hours; laboratory, eight hours. Writing, preproduction, and production for a short 16mm nonsynch film. **175B.** Lecture, three hours; laboratory, eight hours. Completion of postproduction (editing, creation of nonsynch sound tracks) for short film begun in course 175A.

**176A-176B. Advanced Undergraduate Video Production (8 units, 4 units).** Discussion, three hours; laboratory, to be arranged. Requisite: course 185. Limited to film and television majors. Completion of a video production (no more than 20 minutes), including its writing, production, and editing.

**177. Film and Television Acting Workshop (2 units).** Laboratory, four hours. Prerequisite: consent of instructor. Workshop providing opportunities for students to rehearse, perform, and evaluate their scenes under supervision and criticism of instructor. Three different production styles to which performers may need to adjust are (1) preproduction rehearsals with director, (2) single-camera experience, and (3) multiple-camera experience. May be repeated twice for credit (to accommodate performer’s circumstance).

**178. Film and Television Production Laboratory (2 or 4 units).** Laboratory, to be arranged. Supervised laboratory experience in various aspects of film and television production. May be repeated for a maximum of 12 units, but only eight units may be applied toward film and television major.

**181A. Animation Design in Film and Television.** Lecture, three hours; laboratory, three hours. Prerequisite: consent of instructor. History and use of creative arts used in animation to form effective communication on film.

**181B. Writing for Animation (4 to 8 units).** Lecture, six hours; laboratory, to be arranged. Prerequisites: course 181A, consent of instructor. Research and practice in creative writing and planning for animated film. May be repeated for a maximum of 16 units.

**181C. Animation Workshop (4 or 8 units).** Lecture, six hours; laboratory, to be arranged. Prerequisites: course 181A, consent of instructor, storyboard at first class meeting. Organization and integration of various creative arts used in animation to form a complete study of a selected topic. May be repeated for a maximum of 16 units.

**185. Undergraduate Television and Video Production (8 units).** Laboratory, six hours (additional hours to be arranged). Prerequisite: consent of instructor. Limited to film and television majors. Instruction and exercises in basic techniques of television and video production.

**186. Introduction to Documentary Video Production (8 units).** Lecture, three hours; laboratory, three hours; fieldwork, 12 hours. Limited to film and television majors. Viewing and discussion of selected documentaries and instruction in various production skills necessary to create video documentaries. Completion of a series of exercises from conceptualization through postproduction, culminating in production of short documentary.

**187A-187B-187C. Producing and Directing Remote Multicamera Production (4 units, 6 units, 6 units).** Lecture/laboratory, three hours (additional hours to be arranged). **187A.** Professionally oriented lecture/laboratory/field workshop course designed to provide disciplined planning, responsible leadership, and organizational and problem-solving skills required in deadline remote production. Emphasis on clarity of vision, storytelling, effective execution of pitch, preproduction, shoot, and editorial. **187B-187C.** Instruction and supervised productions of the remote experience, with focus on development and execution of concept. Experience closely patterned after professional experiences in working with talent, production venues, and production logistics of remote on-location video programs.

**192. Film and Television Internship (4 to 8 units).** Field experience, to be arranged. Prerequisite: consent of instructor. Limited to senior film and television majors. Internship at film and television industry organizations. May be taken for a maximum of eight units.

**193A. Film Curatorship.** Lecture, two hours; discussion, two hours; laboratory, four hours. Prerequisite: consent of instructor. Study of principles and techniques of film curatorship and research, including but not limited to acquisitions, cataloging, storage, and retrieval systems. Special attention to application of new technology, equipment, and program materials to film archival-library design for research and teaching.

**193B. Television Curatorship.** Lecture, two hours; discussion, two hours; laboratory, four hours. Prerequisite: consent of instructor. Study of principles and techniques of television curatorship and research, including but not limited to acquisitions, cataloging, storage, and retrieval systems. Special attention to application of new technology, equipment, and program materials to television archival-library design for research and teaching.

**199. Special Studies in Film and Television (2 to 8 units).** Prerequisites: senior standing, 3.0 GPA in major, consent of instructor. May be taken for a maximum of eight units.

## Graduate Courses

Certain graduate courses concerned with individual student projects may be repeated for credit on recommendation of the departmental graduate adviser. Graduate courses are not open to undergraduate students.

**200. Bibliography and Methods of Research in Film and Television (6 units).** Discussion, three hours; laboratory, four to six hours (additional screenings and/or video laboratory work as required). Prerequisites: graduate standing, consent of instructor. Examination and study of research methods, techniques, and resources related to film and television research, including development of computer skills for preparation of bibliographies, on-line database searching and retrieval and, when appropriate, use of computer/videodisc technology for research.

**203. Seminar: Film and Other Arts (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Studies in interrelationships between film and fine arts, or performing arts, or literature, with emphasis on ways these other arts have influenced film. May be repeated twice for credit.

**206A. Seminar: European Film History (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: course 106B, graduate standing, consent of instructor. Studies in selected historical movements such as expressionism, socialist realism, surrealism, neorealism, New Wave, etc. May be repeated twice for credit.

**206C. Seminar: American Film History (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: course 106A, graduate standing, consent of instructor. Study of central topics in American film history. May be repeated twice for credit.

**207. Seminar: Experimental Film (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Studies of form, style, politics, and history of experimental, innovative, avant-garde, and minority film and video.

**208A. Seminar: Film Structure (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Examination of various film conventions, both fictional and nonfictional, and of role of structure in motion picture.

**208B. Seminar: Classical Film Theory (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Study of principal topics and lines of inquiry that characterize theoretical writings of Arnheim, Eisenstein, Bazin, Mitry, etc.

**208C. Seminar: Contemporary Film Theory (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: course 208B, graduate standing, consent of instructor. Study of redefinition of aims and methods of film theory through contemporary writings.

**209A. Seminar: Documentary Film (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Nonfictional film and its relation to contemporary culture.

**209B. Seminar: Fictional Film (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Film as fiction and its relation to contemporary culture. May be repeated once for credit.

**209D. Seminar: Animated Film.** Discussion, three hours; laboratory, three hours. Prerequisites: graduate standing, consent of instructor. Critical study of animated film: its historical development, structure, style, use, and relation to contemporary culture.

**210. Seminar: Contemporary Broadcast Media.** Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Consideration of issues raised by recent developments in television and radio, commercial and public, associated with innovations in satellite, cable, and cartridge systems.

**211A. Seminar: Historiography.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Limited to film and television M.A. candidates. Beginning examination of function and methods of writing film and television history as seen in works of key historians in the U.S. and Europe.

**211B. Seminar: Historiography.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Limited to film and television Ph.D. candidates. Examination of function and methods of writing film and television history as exemplified by key works in this tradition, with attention to central issues of historical thought on the media.

**215. Seminar: Theory and Method.** Discussion, three hours. Limited to film and television Ph.D. candidates. Examination of major modes of theoretical reflection that bear on film and television through study of central texts of such traditions as phenomenology, auterism, semiology, psychoanalysis, sociology, etc.

**217. Seminar: Television History.** Discussion, four hours; viewing, to be arranged. Prerequisite: course 110A or equivalent. Examination of origins and development of American television. Topics include industry structure, economics, policy and regulation, and programming.

**218. Culture, Media, and Society.** Lecture, four hours; screenings, to be arranged. Prerequisite: consent of instructor. Emphasis on "discourse of the other(s)." Thematization of the other is concerned with theories of "difference" rather than similarity or identity — with how other cultures enter into politics of representation and representation of politics through metaphors of (1) difference without opposition, (2) heterogeneity without hierarchy, and/or (3) otherness without ethnocentrism. Examination of how women, national minorities, and Third World peoples have been rendered others; place of the cinematic apparatus in this process and how academization of others is positioned vis-à-vis mainstream critical discourse.

**219. Seminar: Film and Society (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Study of ways film affects and is affected by social behavior, belief, and value systems; considered in relation to role of media in society. May be repeated once for credit.

**220. Seminar: Television and Society.** Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Study of ways television forms affect and are affected by social behavior, belief, and value systems; study of technological and economic aspects of the medium. May be repeated once for credit.

**221. Seminar: Film Authors (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Intensive examination of works of outstanding creators of films. May be repeated twice for credit.

**222. Seminar: Film Genres (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Studies of patterns, styles, and themes of such genres as the Western, gangster, war, science fiction, comedy, etc. May be repeated twice for credit.

**223. Seminar: Visual Perception.** Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Aesthetic, psychological, and physiological principles of vision as they relate to ways in which man "sees" film and television, with emphasis on ways in which these are different from other visual experiences.

**224. Computer Applications for Film Study.** Survey of computer applications relevant to film study, principally computer-videodisc systems and image capture technology.

**CM229. Contemporary Topics in Theater, Film, and Television (2 units).** (Same as Theater CM229.) Lecture, two hours; screenings, two hours. Prerequisite: upper division or graduate standing in theater/film and television. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in the collaborative effort; examination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated for a maximum of six units. Concurrently scheduled with course CM129.

**242. Digital Imagery and Visualization.** Lecture, three hours; laboratory, three hours. Introductory hands-on investigation of techniques of digital still imaging and aesthetics of digital image, in context of examining dynamics of cultural constructions and visual codes. Students conceive and produce several digital image visualizations.

**243. Moving Digital Image.** Lecture, three hours; laboratory, three hours. Investigation of different ways of creating and manipulating linear moving images (digital video) on desktop computers, exploring both creative and theoretical aspects of this production environment. Students conceive and produce a number of short projects.

**244. Interactive Multimedia Authoring.** Lecture, three hours; laboratory, three hours. Introduction to expressive and aesthetic potential of interactive digital media and its theoretical issues. Exploration of methodologies and tools for media integration, interface design, and interactive audiovisual construction. Students conceive, produce, and master individual interactive multimedia projects.

**245. Creative Authoring for World Wide Web.** Lecture, three hours; laboratory, three hours. Exploration of creative aspects of the World Wide Web as medium for personal/collective expression. Students produce Web works and serve them on line. Contextualization of medium by looking at its history, embedded ideology, and sociopolitical consequences.

**246. Issues in Electronic Culture (6 units).** Discussion, three hours; laboratory, three hours. Critical studies seminar with major hands-on laboratory component that explores impact of new digital technologies on contemporary culture and aesthetics. Students do laboratory projects using visualization, image manipulation tools, and Internet authoring tools.

**247. Production Planning in Film and Television.** Discussion, three hours. Prerequisite: consent of instructor. Analysis of procedures and problems in preparing a script for film or television production, with emphasis on role of production manager in breaking down scripts, setting up shooting schedule, planning postproduction, and preparing budgets.

**248. Advanced Digital Media Workgroup.** Discussion, four hours; laboratory, two hours. Designed for students with previous laboratory course experience, course provides opportunity to create larger-scale digital media works with advanced software tools and techniques in a small process-oriented, creative workshop environment.

**249. Digital Revolution.** Lecture, four hours; discussion, one hour; laboratory, one hour. Comprehensive survey to introduce students to emerging digital technologies, resulting new media, and their artistic, economic, and social implications. Topics include digital editing, digital previsualization, multimedia, World Wide Web, interactive television, and virtual reality.

**268. Seminar: Short Film.** Seminar, two hours; discussion, two hours. Prerequisites: graduate standing, consent of instructor. Study of problems presented by conceptualization of form and structure of the short film, with classical and student examples.

**270. Seminar: Film Criticism (6 units).** Discussion, three hours; film screenings, four to six hours. Prerequisites: graduate standing, consent of instructor. Study of key aesthetic questions of analysis and evaluation in relation to central works of motion picture criticism. May be repeated once for credit.

**271. Seminar: Television Criticism.** Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Analysis of major forms of television production and criticism it has elicited. May be repeated once for credit.

**273. Seminar: Contemporary Film and Television Criticism (6 units).** Discussion, three hours; film and television screenings, four to six hours. Limited to film and television Ph.D. candidates. Study and practice of analytic and critical response, with emphasis on contemporary film and television.

**274. Seminar: Research Design.** Discussion, three hours. Prerequisite: second-year standing in film and television Ph.D. program. Examination of general principles that govern formulation of major research projects and preparation of a prospectus for Ph.D. dissertation.

**276. Seminar: Non-Western Films.** Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Study of aesthetic and ideological impulses of selected films from Asia, Africa, and Latin America.

**277. Seminar: Narrative Studies.** Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Study of writings on theory of narrative structure and their significance for analysis of film forms.

**289A-289B-289C. Current Business Practices in Film and Television.** Prerequisites: course 247, graduate standing, consent of instructor. Examination of current status of financing/production/distribution agreements, union agreements, music, copyright, etc., necessary to understand the film and television industry. May be taken in any sequence.

**291A-291B-291C. Role of Management in Entertainment Industry.** Prerequisites: course 247, graduate standing, consent of instructor. Study of artistic, social, and economic criteria for decision making in production and distribution of motion pictures and entertainment programs. May be taken in any sequence.

**292A-292B-292C. Network Television Management and Decision Making.** Lecture, two hours; discussion, two hours. Prerequisites: course 247, graduate standing, consent of instructor. Study of business structure and economic, social, and artistic criteria currently utilized by network television management. Only eight units may be taken for credit.

**293. Seminar: Film and Television Curatorship.** Discussion, three hours (additional hours as required). Prerequisites: graduate standing, consent of instructor. Study and practice of issues in archival research and administration.

**298A-298B. Special Studies in Film and Television (2 to 4 units each).** Lecture/discussion. Prerequisites: graduate standing, consent of instructor. Seminar study of problems in film and television, organized on topic basis. May be repeated once for credit.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**400. Film Image Design Laboratory.** Lecture, two hours; laboratory, six hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Conception and design of nonnarrative film imagery. One-minute experiments in the relation of meaning to technique, including manipulation of optics, photochemistry, elements of electronic processes, and display of time and motion. May be repeated once for credit.

**402A-402B. Advanced Fiction Workshops (8 units each).** Laboratory, 12 hours; fieldwork, to be arranged. Prerequisites: courses 405, 409, 410A-410B-410C, 433, consent of instructor. Limited to 10 film and television graduate students per section. Production of a 10-minute fictional film or video project. Students budget, preplan, and complete photography on location and/or in studio by end of first term. In second term students must complete postproduction of their projects.

**403A-403B-403C. Advanced Documentary Workshops (4 to 8 units each).** Lecture/discussion/laboratory, 16 to 24 hours; fieldwork, to be arranged. Prerequisites: courses 405, 409, 410A-410B-410C, 433, consent of instructor. Limited to film and television graduate students. Production of advanced individual documentary film or video projects. Students conceptualize, research, write, shoot (on location), and edit projects to completion. May be repeated once for credit.

**404A-404B. Advanced Abstract/Experimental Media Workshops (8 units each).** Lecture/discussion/laboratory, 12 hours; fieldwork, to be arranged. Prerequisites: courses 405, 409, 410A-410B-410C, 433, consent of instructor. Limited to 10 students per section. Production of a 20-minute abstract or experimental film, video, or multimedia project. Students plan, design, and shoot their projects in first term and work as crew for each other in rotating assignments. In second term students must complete postproduction of their projects.

**405. Television Production Workshop (8 units).** Laboratory, eight hours; other, to be arranged. Prerequisite: consent of instructor. Limited to film and television graduate students. Basics of television production and direction, focusing on studio multiple camera with minimal use of remote camera. Use of various formats of video production, including scripted and nonscripted projects, culminating in a narrative three-camera project.

**406. Experimental Video Workshop.** Laboratory, six hours; other, to be arranged. Prerequisite: consent of instructor. Limited to film and television graduate students. Introduction to independent and experimental video with examination of impact of new video technologies in television, covering concepts of video art, new television, digital video, high-definition TV, and film and tape postproduction.

**407. Video Documentary Workshop (8 units).** Laboratory, 12 hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Exploration of documentary video, including screening a variety of international works and producing a short documentary project using single-camera field production techniques.

**408A-408B. Video Editing.** Discussion, four hours; laboratory, to be arranged. Prerequisite: consent of instructor. Limited to film and television graduate students. Individual instruction in electronic editing. **408A.** On-Line Editing; **408B.** Off-Line Editing.

**409. Directing the Actor for the Camera Workshop.** Workshop, six hours; laboratory, to be arranged; laboratory preparation, two to four hours. Prerequisite: consent of instructor. Limited to film and television M.F.A. production program graduate students. Team-taught with five weeks designed to give the director actor/camera techniques, and five weeks to offer basic strategies to elicit good performances from actors. Emphasis on problems faced when directing actors for film.

**410A-410B-410C. Film Production Workshops (8 units, 12 units, 8 units).** Lecture/discussion/laboratory, 24 hours; fieldwork, to be arranged. Prerequisites: courses 405, 409, consent of instructor. Limited to film and television graduate students. Production workshop spanning three terms, designed to give hands-on experience in all aspects of film production (the tools and a practicum of the medium) as each student writes/directs/edits a 10-minute film.

**417. Lighting for Film and Television (6 units).** Lecture, three hours; discussion, one hour; laboratory, six hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Lectures, supervised exercises on a stage or in an exterior, screenings of scenes, and discussions aimed at learning to master the lighting to create an appropriate mood or atmosphere of a premeditated scene recorded on a film or through an electronic system. May be repeated twice for credit.

**418. Cinematography and Directing (12 units).** Lecture, six hours; discussion, two hours; laboratory, 16 hours. Prerequisites: course 417, consent of instructor. Limited to film and television graduate students. Supervised filming of short dramatic projects on the sound stage and at exterior locations that explore the complexity of the process, emphasizing balance and collaboration essential to both directing and photography in its varied technical, production, and creative aspects.

**419. Advanced Cinematography.** Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisites: courses 417, 418, consent of instructor. Limited to film and television graduate students. Advanced study of principles of cinematography, with emphasis on exposure, lighting, and selection of film, camera, and lenses.

**423A. Direction of Actors for Film and Television.** Lecture, four hours; workshop. Prerequisites: first film project, consent of instructor. Limited to film and television graduate students. Required of all production majors shooting a fiction thesis. Exercises in analysis of script and character for purpose of directing actors in film and television productions. Emphasis on eliciting best possible performance from the actor. May be repeated twice for credit.

**423B. Advanced Direction of Actors for Film and Television.** Studio workshop, six hours. Prerequisites: course 423A, consent of instructor. Limited to film and television graduate students. Advanced study and practice of directing actors before a camera. Emphasis on developing techniques to immediately enhance communication between director and actor on the set in order to maintain continuity from shot to shot.

**431. Introduction to Film and Television Screenwriting.** Lecture, three hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Introductory course in problems of film and television screenwriting.

**433. Writing the Short Screenplay.** Lecture, three hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Conception, development, and writing of a 20-minute film or video script in either fiction, documentary, or experimental medium, to be produced in one of the advanced workshops.

**434. Advanced Screenwriting (8 units).** Discussion, three hours. Prerequisites: course 135, consent of instructor. Advanced problems in writing of original film and television screenplays. May be repeated twice for credit.

**435. Advanced Writing for Short Film and Television Screenplays.** Discussion, three hours. Prerequisites: courses 402A-402B or 403A-403B or 404A-404B, consent of instructor. Limited to film and television graduate students. Required of students planning fiction projects. Final screenwriting course in which students write their thesis project (no longer than 30 minutes in length).

**437. Nontheatrical Writing for Film and Television.** Discussion, three hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Advanced problems in the field of documentary and special feature programs, with emphasis on research and preproduction. May be repeated for a maximum of 16 units.

**451. Advanced Design for Film and Television.** Laboratory, to be arranged. Prerequisite: consent of instructor. Limited to film and television graduate students. Advanced study and practice of techniques and methods of design for motion pictures. Art direction for advanced workshop productions. May be repeated for a maximum of 12 units.

**452A. Film and Television Sound Recording.** Lecture, three hours; laboratory, four hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Principles and practices of film and television sound recording, including supervised exercises.

**452B. Music Recording Workshop.** Lecture, four hours; laboratory, eight hours. Prerequisite: consent of instructor. Supervised exercises in studio music recording techniques, with emphasis on special requirements for motion pictures and television.

**452C. Film and Television Sound Rerecording.** Lecture, three hours; laboratory, three hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Recording of sprocketed media: basics of mixing 16mm and 35mm film soundtracks to single stripe or three stripe magnetic film. Overview of prepping tracks for final mix. Fundamentals of Automatic Dialogue Replacement and Foley. Rerecording and video/audio postproduction of unsprocketed media: emphasis on multitrack tape and nonlinear disk-based recording and editing systems. Includes all track building approaches, from production sound electronic editing, Automatic Dialogue Replacement, Foley, backgrounds, hard FX and MX through final mix. Techniques of combining sprocketed and unsprocketed media in postproduction.

**454A-454B. Advanced Film Editing.** Lecture, three hours; laboratory, to be arranged. Prerequisite: consent of instructor based on submission of a rough cut and/or copy of screenplay. Limited to film and television thesis and advanced project students in postproduction phase of thesis or advanced project. Organization and operation of postproduction process.

**459A-459B. Directing for Film and Television.** Lecture, three hours. Prerequisite: consent of instructor. Limited to film and television graduate students. Analysis and exploration, with specific scenes, of differences and many similarities in directorial approach to same literary material in theater, film, and television.

**464A-464B. Advanced Film Directing (8 units each).** Hours to be arranged. Prerequisite: consent of instructor. Limited to film and television graduate students. Special problems in direction of fictional and documentary films.

**466A-466B. Advanced Professional Video Workshops (8 units each).** Lecture, three hours; laboratory, to be arranged. Prerequisites: courses 405, 410A-410B-410C, 423A, consent of instructor. Limited to film and television graduate students. Hands-on problems in working with various interrelated disciplines in a professional production experience, including interaction with students of design and acting from Department of Theater.

**468. Creative Location Film Production (8 units).** Lecture, four hours; discussion, four hours; laboratory, to be arranged. Requisites: courses 247, 405, 410A-410B-410C, 423A, 433, and/or graduate student in directing or producer's program. Problems of location, production, directing, and cinematography in various "real-life" practical locations. Practical application of solving problems and communication within limitations of production experience.

**475. Film I (8 units).** Discussion, three hours; laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Study of basic techniques of film production, including preproduction planning and production of a group short film.

**476. Video I (8 units).** Discussion, three hours; laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Study of basic techniques of television and video production, including completion of one or more projects.

**478. Video II (8 units).** Discussion, three hours; laboratory, to be arranged. Prerequisites: courses 185, 405 or 476, graduate standing, consent of instructor. Group experience in video production with each member rotating on crew work in production of individual or collective projects.

**482A-482B. Advanced Animation Workshops (4 or 8 units each).** Lecture, three hours; laboratory, to be arranged. Prerequisites: courses 181A, 181B, 181C, consent of instructor. Advanced organization and integration of various creative arts used in animation, resulting in production of a complete animated film. May be repeated for a maximum of 16 units.

**486. Directed Individual Study: Preparation to Advance to Candidacy for M.F.A. in Production (2 to 4 units).** Preparation for thesis production, four to eight hours. Prerequisites: graduate standing in M.F.A. production program, consent of instructor. Specialized development and organization of proposed thesis project prior to advancement to candidacy. Should be taken term before student plans to advance to candidacy.

**487. Directed Individual Study: Postproduction Laboratory.** Laboratory, eight hours. Prerequisites: graduate standing in M.F.A. production program, consent of instructor. Completion of projects in final stages of postproduction. May not be repeated.

**488A. Interactive Animation (4 to 8 units).** Lecture, six hours; laboratory, to be arranged. Prerequisites: courses 181A, 181C, 489A, consent of instructor. Organization and integration of various creative arts used in animation and interactive media to form complete study of a selective interactive animation project. May be repeated for a maximum of 16 units.

**488B. Advanced Interactive Animation (4 to 8 units).** Lecture, six hours; laboratory, to be arranged. Prerequisites: course 488A, consent of instructor. Organization and integration of various creative arts used in animation and interactive animation to form completed project of a selected interactive topic. May be repeated for a maximum of 16 units.

**489A. Computer Animation in Film and Video (4 to 8 units).** Lecture, six hours; laboratory, four to eight hours; other, to be arranged. Prerequisites: courses 181A, 181C, a completed animated film, consent of instructor. Instruction in and supervised production of computer animation. May be repeated for a maximum of 16 units.

**489B. Production in Computer Animation (4 to 8 units).** Lecture, six hours; laboratory, four to eight hours. Prerequisite: course 489A. Instruction in creation, preparation, and production of a complete and original computer animation film or tape. May be repeated for a maximum of 16 units.

**496. Practice of Teaching Film and Television (2 units).** Discussion. Required once of all teaching assistants or associates in department. Orientation and preparation of graduate students who have responsibility to assist in teaching undergraduate courses in department; discussion of problems common to the teaching experience. May not be applied toward M.A., M.F.A., or Ph.D. May be repeated. S/U grading.

**498. Professional Internship in Film and Television (4, 8, or 12 units).** Full- or part-time at a studio or on a professional project. Prerequisites: graduate standing, advanced standing in M.F.A. program, consent of instructor. Internship at various film, television, or theater facilities accentuating creative contribution, organization, and work of professionals in their various specialties. Given only when projects can be scheduled.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596A. Directed Individual Studies: Research (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**596B. Directed Individual Studies: Writing (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**596C. Directed Individual Studies: Directing (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**596D. Directed Individual Studies: Design (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**596E. Directed Individual Studies: Acting (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**596F. Directed Individual Studies: Production (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**597. Preparation for Ph.D. Qualifying Examinations in Film and Television (2 to 12 units).** Hours to be arranged. May be taken for a maximum of 12 units. S/U grading.

**598. M.A. Thesis in Film and Television (2 to 12 units).** Hours to be arranged. Prerequisite: advancement to M.A. candidacy. Research and writing for M.A. thesis. May be taken for a maximum of 12 units. S/U grading.

**599. Ph.D. Dissertation in Film and Television (2 to 12 units).** Hours to be arranged. Prerequisite: advancement to Ph.D. candidacy. Research and writing for Ph.D. dissertation. May be repeated. S/U grading.

Johannes Wilbert, Ph.D. (*Anthropology*)

### Associate Professors

Steven Lattimore, Ph.D. (*Classics*)

Colin Quigley, Ph.D. (*World Arts and Cultures*)

Beverly J. Robinson, Ph.D. (*Theater*)

### Assistant Professor

Cheryl Keyes, Ph.D. (*Ethnomusicology*)

### Adjunct and Visiting Assistant Professors

Tim Tangherlini, Ph.D., *Adjunct (Scandinavian)*

Peter Tokofsky, Ph.D., *Visiting (Germanic Languages)*

## Scope and Objectives

The interdisciplinary Folklore and Mythology Program, which leads to the Master of Arts and Ph.D. degrees, provides coordinated study of the traditional lifestyles of specific societies and culture areas, on the one hand, and systematic training in the research methods and investigative techniques of cross-cultural study, on the other. Courses focus on the nature, history, and functions of such traditional forms as narrative, music, art, dance, religion, festival, and speech and consider the part they play in human development and cultural existence. The program examines the ways in which human traditions both reflect and contribute to continuity and consistency in thought and life.

Trained folklorists pursue careers in teaching, research, governmental agencies, museum work and administration, performing groups and arts management, social work, the medical and legal professions, and business. Their responsibilities include documenting cultural and ethnic traditions, introducing traditional artists and their works to interested audiences, describing transformations of traditional processes and forms, and preserving on tape and film the customs and mores of social groups and individuals.

A variety of undergraduate courses offered by departments or by faculty participating in the interdepartmental program is also available to all University students. Those with undergraduate preparation in folklore and mythology studies may continue their work on the graduate level. For planning coursework, students should consult departmental counselors and the chair of the committee which administers the interdepartmental program.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

Two letters of recommendation from former instructors or other comparable references are required, as well as a writing sample (such as published work, course paper, or report on research/observations). Information on the verbal Graduate Record Examination (GRE) is desirable.

### Areas of Study

Consult the department.

## Course Requirements

All degree candidates, whether electing the thesis or comprehensive examination plan, must complete the following courses: Folklore and Mythology 200A, 200B, and at least one course from each of the following groups:

Group 1: One course in folk song, folk music, or folk dance (e.g., Folklore and Mythology C206, M243B, M258, or CM284).

Group 2: One course in the folklore and mythology of a specific culture or culture area.

Group 3: One course in folktale, legend, or myth (e.g., Folklore and Mythology 215 or 216).

Group 4: One additional form/genre-based graduate course in folklore and mythology studies (e.g., Folklore and Mythology 213, M214, 217, 218, or C275).

Group 5: One graduate seminar in an area of folklore and mythology (e.g., Folklore and Mythology 228, M235, or 259).

Only eight units of course 596 may be applied toward the minimum course requirements.

## Comprehensive Examination Plan

Students who plan to pursue a Ph.D. degree in Folklore and Mythology must elect this plan and complete a minimum of 10 courses (six in the 200 series; two 596 courses may be included). After completion of the coursework, students are expected to demonstrate competence in a written examination requiring a grasp of (1) theoretical bases, major documents, and research methods and techniques of folklore and mythology studies; (2) two forms of folklore and mythology; and (3) the folklore and mythology of a specific country, continent, or geographical area. If it is requested by the student or by the members of the M.A. committee, the student must also complete a final oral examination following the successful completion of the written comprehensive examination sequence.

## Thesis Plan

If this plan is selected, the student must complete a minimum of 10 courses (six in the 200 series; two 596 courses may be included) and submit an acceptable thesis, prepared under the direction of a member of the program faculty. Submission of the thesis is followed by an oral examination covering the fields of folklore and mythology studies.

The thesis committee, composed of three or more faculty members chosen with the approval of the chair of the interdepartmental committee, is appointed no later than the quarter before expected completion of the requirements. No outside members are required.

## Doctoral Degree

### Admission

Requirements for admission to the doctoral program include completing the requirements for the M.A. degree in Folklore and Mythology (or equivalent) and the written and oral com-

prehensive examinations. A writing sample (such as published work, course paper, or report on research/observations) is required of all applicants. Applicants are admitted to the doctoral program on the recommendation of the interdepartmental committee (provisional admission may be secured in order to complete the admission requirements).

### Major Fields or Subdisciplines

Students must develop a competency in (1) a major field of folklore and mythology and (2) an area of concentration within a related discipline. These areas are selected with the approval of the guidance committee.

### Course Requirements

Before attempting the qualifying examination, students must complete a minimum of nine courses or seminars in the 200 series (or substitutes recommended by the guidance committee) in (1) a major field of folklore and mythology; (2) at least five of the minimum number of nine courses required for the Ph.D. are to be selected from courses carrying folklore prefixes; (3) the number of graded Folklore and Mythology 596 courses that can be counted among the minimum of nine courses required for the Ph.D. is limited to two; (4) of the minimum number of nine courses required for the Ph.D., at least two are to be folklore seminars (e.g., Folklore and Mythology 228, M235, M258, 259, M270A, M270B).

### Written and Oral Qualifying Examinations

After the required preparation, a written examination and the University Oral Qualifying Examination are completed covering (1) the student's specialization in folklore and mythology and (2) the student's related area of concentration. The examinations are administered by a committee appointed with the approval of the interdepartmental committee and include one or more members from the student's related discipline.

## Folklore and Mythology

### Lower Division Courses

**15. Introduction to American Folklore Studies.** Lecture/discussion. Cultural/historical survey of role of folklore in development of American civilization and of influence of the American experience in shaping folklore in American society; attention also to representative areas of inquiry and analytical procedures.

**88. Poetics of Myth.** Seminar, three hours; outside study, nine hours. Exploration of categories myth and mythology as they have been formulated, applied, and expanded in both Western and non-Western traditions from time of ancient Sumer to the present.

### Upper Division Courses

**101. Introduction to Folklore.** Survey of various forms of folklore and examination of their historical and social significance.

**C105. Perspectives in American Folklore Research.** Lecture, three hours. Prerequisite: course 101 or consent of instructor. Examination of American folklore studies compared and contrasted with investigations in other countries, with emphasis on principal conceptual schemes and research orientations employed in study of folklore in American society. Concurrently scheduled with course CM205.

**CM106. Anglo-American Folk Song.** (Same as English M111B and Ethnomusicology M124.) Survey of Anglo-American balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values. May be concurrently scheduled with course C206.

**C107. Folklore in Urban Environments.** Lecture, three hours. Prerequisites: course 15 or 101 and/or consent of instructor. Exploration of expressive and symbolic dimensions of complex urban life, focusing on how immigrants, migrants, residents, and workers shape their experiences through dynamic interplay of community, ethnicity, culture, and religion. Concurrently scheduled with course C207.

**108. Afro-American Folklore and Culture.** Prerequisite: course 101 or consent of instructor. Study of traditional genres or forms of Afro-American folklore and their cultural functions.

**M111. Literature of Myth and Oral Tradition.** (Same as English M111A.) Prerequisite: satisfaction of Subject A requirement. Study of myth, dramatic origins, oral epic, folktale, and ballad, emphasizing Indo-European and Semitic examples.

**M112. Survey of Medieval Celtic Literature.** (Same as English M111E.) Prerequisite: satisfaction of Subject A requirement. Knowledge of Irish or Welsh not required. General course dealing with Celtic literature from earliest times to the 14th century.

**113. The Arthurian Tradition.** Prerequisite: consent of instructor. Survey of traditions related to British King Arthur from medieval times to the present day. Coverage includes both oral traditions and written texts; attention also to modern versions of Arthurian material in other mediums (e.g., opera, film).

**118. Folk Art, Folklife, and Material Culture.** Prerequisite: junior standing. General course concerned with folk art, aesthetics, and material culture and with theoretical concepts and methodologies utilized in their analysis.

**M119. Fairy Tales in Literature and Society (5 units).** (Same as German M119L.) Lecture, four hours. History and reception of folklore collections in Europe, with particular attention to ideology and influence of Grimms' tales. Study and interpretation of selected tales in English and their transformations and appropriation in literature, film, advertising, and pedagogy.

**M121. British Folklore and Mythology.** (Same as English M111C.) Prerequisites: satisfaction of Subject A requirement, junior standing. Survey of folklore of the peoples of Britain, with attention to their history, function, and regional differences.

**M122. Celtic Mythology.** (Same as English M111D.) Lecture, three hours; discussion, one hour. Survey of early materials, chiefly literary, for study of mythic traditions of the Celtic peoples, ranging from ancient Gaul to medieval Ireland and Wales.

**124. Finnish Folk Art and Technology.** Material manifestations of Finnish folk culture: village layout and architecture, folk technology, arts and crafts, textiles, costumes, and design.

**M126. Baltic and Slavic Folklore and Mythology.** (Same as Slavic M179.) Lecture, three hours. General course for students interested in folklore and mythology and for those interested in Indo-European mythic antiquities.

**M127. Celtic Folklore.** (Same as English M111F.) Prerequisite: course 101 or consent of instructor. Folkloric traditions of modern Ireland, Scotland, and other Celtic countries, with attention to current techniques of folkloristic research.

**M128. Hungarian Folklore and Mythology.** (Same as Hungarian M135.) General course for students in folklore and mythology, with emphasis on types of folklore and varieties of folklore research.

**M129. Folklore and Mythology of the Ugric Peoples.** (Same as Hungarian M136.) Survey of traditions of the smaller Ugric nationalities (Voguls, Ostyaks, etc.).

**130. North American Indian Folklore and Mythology Studies.** Prerequisite: course 101 or consent of instructor. Examination of folkloristic and mythological data recorded from various North American Indian peoples within contexts of principal ideological frameworks which have been evolved historically for analysis of such data.

**131. Folklore of India.** Prerequisite: course 101 or consent of instructor. Survey of folklore of India, with special reference to content and dissemination of oral epics, ballads, legends, and beliefs.

**CM132. Celtic Folk Music.** (Same as Ethnomusicology CM132.) Prerequisite: consent of instructor. Survey and analysis of indigenous traditional music in lands where a Celtic language is or was spoken into modern times. Instrumental and vocal genres, context and performance, social value and ideology. Concurrently scheduled with course CM232. P/NP or letter grading.

**C136. Carnival and Festivity.** Lecture, three hours; fieldwork, one hour; outside study, eight hours. History and ethnography of Carnival and related celebrations in Europe and the Americas. Topics include creolization of traditions; carnivalesque as a mode of bodily, political, and artistic behavior; carnival plays; politics of festival and street theater; representations of "Others." Concurrently scheduled with course C236. P/NP or letter grading.

**M140. Italian Novella from Boccaccio to Basile.** (Same as Italian M140.) Lecture, three hours; outside study, nine hours. Analysis of development of the Italian novella in its structure, historical context, and folk material. Special emphasis on how the Italian novella influenced other European literatures. P/NP or letter grading.

**M142. Introduction to Jewish Folklore.** (Same as Jewish Studies M143.) Nature of Jewish folklore; narrative, folk song, folk art, folk religion, and methods and perspectives used in their analysis.

**C145. Applied Folkloristics.** Prerequisite: junior standing. Introduction to methods and issues in application of folklore studies to such areas as education, health, museums, organization development, tourism, environmental planning, economic and community development, aging, art therapy, and public sector folklife. Concurrently scheduled with course C245.

**M149. Folk Literature of the Hispanic World.** (Same as Spanish M149.) Lecture, three hours. Study of history and present dissemination of principal forms of folk literature throughout the Hispanic countries.

**M150. Russian Folk Literature.** (Same as Russian M150.) Lecture, three hours. Lectures and readings in Russian.

**M154A-M154B. African American Musical Heritage.** (Same as Afro-American Studies M110A-M110B and Ethnomusicology M110A-M110B.) Study of African music and its impact on the Americas; survey of development of various African American musical genres from slave era to the present, including traditions in the West Indies and Central and South America.

**M155. Oral Traditions in Africa.** (Same as English M111G.) Prerequisite: upper division standing. Survey of African folk traditions: folktale, epic, heroic poetry, and folk song.

**163. Folklore and Oral History.** Prerequisite: junior standing. Examination of relationships between folk tradition and oral history; how history may be derived from tradition; how traditions are embedded in historical sources; how the folk traditionalize history to reflect their point of view.

**C165. Film and Folklore.** Prerequisite: junior standing. Introduction to film criticism and folklore methodology. Topics include early examples of folklore on film, changing conceptions of folklore and uses of films about folklore, and examples of films by, with, and for folklorists. Concurrently scheduled with course C265.

**M170. Russian Folklore.** (Same as Russian M170.) Lecture, three hours. Lectures and readings in English. General introduction to Russian folklore, including survey of genres and related folkloric phenomena.

**172. Folklore in Ethnic Context.** Prerequisite: course 15 or 101 or consent of instructor. Role of folklore in ethnic relations; processes by which ethnic folklore is generated, transmitted, and maintained by immigrant groups and subsequent generations.

**C175. Food Customs and Symbolism.** Prerequisite: junior standing. Introduction to foodways, with particular attention to customs and symbolism in America. Topics include sensory realm, child rearing practices, foodsharing, food and identity, food and its emotional significance, aversions and taboos, advertising, changing food habits, and the American diet. Concurrently scheduled with course C275.

**M180. Analysis of Traditional Music.** (Same as Ethnomusicology M180.) Intended for ethnomusicology, musicology, and folklore majors. Intensive study of methods and techniques necessary to understand traditional music.

**M181. Folk Music of Western Europe.** (Same as Ethnomusicology M126.) Prerequisite: consent of instructor. Introduction to forms and styles of traditional music in Western Europe. Historical and ethnological perspectives on this music combined with numerous recorded examples from major cultural subdivisions of the region.

**M182. Japanese Folklore.** (Same as Japanese M182.) Lecture, three hours. Knowledge of Japanese not required. Lectures/discussions on native religious rituals (festivals) and observances of the Japanese, with special emphasis on artistic behavior. Discussion of Shinto, Shinto/Buddhist syncretism, and other non-Buddhist belief systems found in Japan.

**183. Korean Folklore.** Lecture, three hours. Survey of Korean folklore and its perspectives and methods — oral literature, performing folk arts, social folk custom, and material culture.

**CM184. Dance and Folklore.** (Same as World Arts and Cultures CM184.) Consideration of vernacular tradition as a site for cultural configuration, social construction, representation, and display of national, ethnic, and other affinity identities. Emphasis on various European and European-American dance idioms. Concurrently scheduled with course CM284.

**M185. The Hero in the Bible and the Ancient Near East.** (Same as Ancient Near East M194.) Lecture, three hours. Investigation of concepts of the hero/heroine in literatures of ancient Mesopotamia, Canaan, and Israel. Texts include epics of Gilgamesh and Aghat, Hebrew Bible, and New Testament. All texts read in translation.

**190. Selected Topics in Folklore and Mythology Studies.** Prerequisite: course 15 or 101 or consent of instructor. Proseminar focusing on selected problems, data, or themes in folklore and mythology studies. May be repeated twice for credit.

**199. Special Studies in Folklore (2 to 4 units).** Prerequisites: senior standing, consent of instructor.

## Graduate Courses

**200A. Folklore Bibliography, Theory, and Research Methods.** (Formerly numbered 200A, 200B.) Lecture, three hours; discussion, one hour. Prerequisite: graduate standing in folklore and mythology or consent of instructor. Basic course in theory, current trends, and bibliography for folklore graduate students, including research techniques in contemporary folkloristics.

**200B. Folklore Collecting and Field Research.** (Formerly numbered 200C.) Lecture, three hours; discussion, one hour. Prerequisite: course 200A or consent of instructor. Discussion/demonstration of theoretical concepts and practical techniques of data gathering and field research in folklore.

**M202. Folklore Archiving.** (Same as Library and Information Science M202.) Lecture, two hours; laboratory, two hours. Exploration and analysis of alternative data indexing, storage, and retrieval systems and procedures for folklore archival collections, supplemented by firsthand experience in creating and managing databases, utilizing both manual and computerized techniques.

**CM205. Perspectives in American Folklore Research.** (Same as English M205.) Lecture, three hours. Prerequisite: course 101 or consent of instructor. Examination of American folklore studies compared and contrasted with investigations in other countries, with emphasis on principal conceptual schemes and research orientations employed in study of folklore in American society. Concurrently scheduled with course C105.

**C206. Anglo-American Folk Song.** Survey of Anglo-American balladry and folk song, with attention to historical development, ethnic background, and poetic and musical values. May be concurrently scheduled with course CM106.

**C207. Folklore in Urban Environments.** Lecture, three hours. Prerequisites: course 200A and/or consent of instructor. Exploration of expressive and symbolic dimensions of complex urban life, focusing on how immigrants, migrants, residents, and workers shape their experiences through dynamic interplay of community, ethnicity, culture, and religion. Concurrently scheduled with course C107.

**208. Afro-American Folklore and Culture.** Prerequisite: graduate standing. Theoretical and methodological constructs which have contributed to the body of black cultural expression in the U.S.

**213. Folk Belief and Custom.** Prerequisites: course 101 and one course from 118, M121, M122, 124, M126, M128, M149, M150, Anthropology 156, German 134, 240A, 240B, 240C. Study of beliefs and customs in the folk community: life cycle, calendrical and agricultural customs, and legal antiquities.

**214. Ethnography of Humor.** (Formerly numbered M214.) Lecture, three hours. Designed for graduate folklore and mythology students. Examination and analysis of selected humorous expressions and events in cross-cultural perspective, with emphasis on major psychological and sociocultural approaches to their study and interpretation.

**215. Popular Legend.** Prerequisite: course 200A or consent of instructor. Study of categories of legendry and their relation to myth, custom, ritual, popular beliefs, and ballads.

**216. Folktale.** Prerequisite: course 200A or consent of instructor.

**217. Folk Speech.** Lecture, three hours. Study of ethnography of communication and its relevance to study of social and regional dialects, proverbs, riddles, onomastics, folk poetry and verse, and traditional humor.

**218. Folk Art, Craft, and Aesthetics.** Lecture, three hours. Prerequisite: course 200A. Examination of research orientations and findings in regard to what has been called folk art, craft, and aesthetics. Major perspectives and areas of inquiry from latter part of the 19th century to the present.

**228. Seminar: Topics in Celtic Folklore and Mythology.** Seminar, three hours. Prerequisites: course 200A, coursework in Celtic studies. Preparation for advanced study of and research in important areas of Irish oral tradition and folklore/mythology scholarship. Possible topics include pagan Celtic Britain/Ireland; comparative Celtic mythology; Celtic origin legends; literary and oral saints' legends; the Irish Fenian (Ossianic) tradition of ballads (*laoidhe/duain*) and prose tales; "fairy" beliefs; collecting and archiving methods of the Irish Folklore Commission; folklore studies and nationalism.

**M230A-M230B. Folk Tradition in Italian Literature.** (Same as Italian M230A-M230B.) Lecture, two hours.

**CM232. Celtic Folk Music.** (Same as Ethnomusicology CM232.) Prerequisite: consent of instructor. Survey and analysis of indigenous traditional music in lands where a Celtic language is or was spoken into modern times. Instrumental and vocal genres, context and performance, social value and ideology. Concurrently scheduled with course CM132. S/U or letter grading.

**M235. African Myth and Ritual.** (Same as English M235.) Prerequisite: consent of instructor. Seminar on methods of analyzing African and African Diaspora myth and ritual.

**C236. Carnival and Festivity.** Lecture, three hours; fieldwork, one hour; outside study, eight hours. History and ethnography of Carnival and related celebrations in Europe and the Americas. Topics include creolization of traditions; carnivalesque as a mode of bodily, political, and artistic behavior; carnival plays; politics of festival and street theater; representations of "Others." Concurrently scheduled with course C136. S/U or letter grading.

**240. Introduction to Jewish Folk Literature.** Prerequisites: upper division standing and consent of instructor, or graduate standing. Examination of both historic and generic methods used in study of Jewish folk literature.

**M241. Folklore and Mythology of the Near East.** (Same as Near Eastern Languages M241.) Prerequisite: course 101 or equivalent.

**M243A. The Ballad.** (Same as English M243A.) Prerequisite: consent of instructor. Study of English and Scottish popular ballads and their American derivatives, with some attention to European analogues.

**M243B. Problems in Ballad Scholarship.** (Same as English M243B.) Prerequisite: course M243A or consent of instructor. Intensive investigation of a problem or problems in study of the popular ballad.

**C245. Applied Folkloristics.** Prerequisite: graduate standing. Introduction to methods and issues in application of folklore studies to such areas as education, health, museums, organization development, tourism, environmental planning, economic and community development, aging, art therapy, and public sector folklife. Concurrently scheduled with course C145.

**248. Theory and Method in Latin American Folklore Studies.** Historical survey of folklore scholarship in Latin America, with emphasis on theoretical bases, methods, and techniques employed in study and analysis of traditional tales, songs, music, linguistic expression.

**M249. Folk Literature of the Spanish and Portuguese Worlds.** (Same as Portuguese M249 and Spanish M249.) Lecture, three hours. Intensive study of folk literature of the Spanish and Portuguese cultures as represented in (1) ballad and poetry, (2) narrative and drama, (3) speech.

**251. Seminar: Finno-Ugric Folklore and Mythology.** Advanced studies in folk traditions and mythologies of the Finno-Ugric speaking nations.

**M257. South American Folklore and Mythology Studies.** (Same as Anthropology M232R.) Prerequisite: Anthropology 174P or consent of instructor. Examination of oral traditions and related ethnological data from various South American Indian societies against the background of the religious systems of these people.

**M258. Seminar: Folk Music.** (Same as Ethnomusicology M287.) Seminar, three hours. Prerequisite: consent of instructor.

**259. Seminar: Folklore.** Prerequisite: course 200A or consent of instructor. Seminar focusing on selected topics in folklore and mythology. May be repeated for credit.

**260. Organizational Folklore, Culture, and Symbolism.** Prerequisite: graduate standing. Folklore in organizational settings (stories, rituals, rites, metaphors, etc.) and role of folklore in organization development as information source, diagnostic, and intervention to improve personnel practices, climate, and leadership.

**M261. Alternative Perspectives in Italian Culture: Studies of Folk Tradition in Italian Literature.** (Same as Italian M260A.) Lecture, three hours; out-side study, 18 hours. Open to undergraduates with consent of instructor. The conspicuous diversity animating Italian society articulated through class, gender, and ethnolinguistic groups to be studied across a range of texts, some selected from the literary canon, but others purely oral (tales, songs, proverbs, cures and curses, secular and ritual drama).

**C265. Film and Folklore.** Prerequisite: graduate standing. Introduction to film criticism and folklore methodology. Topics include early examples of folklore on film, changing conceptions of folklore and uses of films about folklore, and examples of films by, with, and for folklorists. Concurrently scheduled with course C165.

**M270A-M270B. Seminars: Japanese Ritual Arts.** (Same as Japanese M270A-M270B.) Seminar, three hours. Reading knowledge of Japanese not required. Discussions and readings on ritual (performing) arts of Japan comprising music, dance, storytelling, viewing, purification, divination, disguise, mimicry, and competitive as well as acrobatic arts, with special emphasis on religio-magical purposes and symbolic structure of these arts. In Progress grading.

**C275. Food Customs and Symbolism.** Prerequisite: junior standing. Introduction to foodways, with particular attention to customs and symbolism in America. Topics include sensory realm, child rearing practices, foodsharing, food and identity, food and its emotional significance, aversions and taboos, advertising, changing food habits, and the American diet. Concurrently scheduled with course C175.

**CM284. Dance and Folklore.** (Same as World Arts and Cultures CM284.) Consideration of vernacular tradition as a site for cultural configuration, social construction, representation, and display of national, ethnic, and other affinity identities. Emphasis on various European and European-American dance idioms. Concurrently scheduled with course CM184.

**M286A-M286B. Studies in Hispanic Folk Literature.** (Same as Spanish M286A-M286B.) Lecture, two hours.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**400A-400B-400C. Directed Professional Activities.** Prerequisite: consent of program chair. Directed individual projects in professional editing, bibliography, discography, filmography, festival direction, and other professional activities. May not be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

**495. Teaching Folklore and Mythology.** Lecture, three hours. Prerequisite: course 200A. Analysis and design of alternative organizational schemes, teaching aids and techniques, and evaluation methods for folklore and mythology courses at the college level, with opportunities for observation and apprentice teaching. May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, program chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Studies in Folklore (2 to 6 units).**

**597A. Preparation for M.A. Comprehensive Examination (2 to 4 units).** Prerequisites: graduate standing in folklore and mythology, consent of instructor. S/U grading.

**597B. Preparation for Ph.D. Qualifying Examinations (4 to 8 units).** Prerequisites: successful completion of M.A. comprehensive examination, consent of instructor. S/U grading.

**598. M.A. Thesis Preparation (2 to 4 units).**

**599. Ph.D. Dissertation Research (4 to 8 units).** Prerequisite: advancement to Ph.D. candidacy. S/U grading.

C180A-C180B. Studies in Dance Ethnography  
181A. Dance Cultures of Asia  
181B. Dance in Southeast Asia  
181C. Dance in East Asia  
181D. Dance in South Asia  
182. Dance in Africa and the African Diaspora  
183. Dance in Latino American Cultures  
C187. Dance in Native American Cultures  
280A-280B. Advanced Studies in Dance Ethnology

## FOREIGN LITERATURE IN TRANSLATION

### Scope and Objectives

The following courses offered in the departments of language and literature do not require reading knowledge of any foreign language.

#### Afrikaans (Germanic Languages)

114. Afrikaans Literature in Translation

#### Ancient Near East (Near Eastern Languages)

150A. Survey of Ancient Near Eastern Literatures in English: Mesopotamia  
150B. Survey of Ancient Near Eastern Literatures in English: Egypt  
150C. Survey of Ancient Near Eastern Literatures in English: Syria and Palestine

#### Arabic (Near Eastern Languages)

150. Introduction to Arabic Literature and Culture  
151. Survey of Modern Arabic Literature in English

#### Armenian (Near Eastern Languages)

150A-150B. Survey of Armenian Literature in English

#### Bulgarian (Slavic Languages)

154. Survey of Bulgarian Literature

**Chinese (East Asian Languages)**

- 150A. Lyrical Traditions  
 150B. Traditional Narrative and Drama  
 151. Chinese Literature in Translation: Modern Literature  
 152. Topics in Contemporary Chinese Literature and Culture  
 M153. Chinese Immigrant Literature and Film

**Classics**

40. Survey of Greek Literature in Translation  
 41. Survey of Latin Literature in Translation  
 140. Topics in History of Greek Literature  
 141. Topics in History of Latin Literature  
 142. Ancient Epic  
 143. Ancient Drama  
 144. Generic and Topical Studies in Ancient Literature

**Comparative Literature**

All undergraduate courses

**Czech (Slavic Languages)**

- 155A-155B. Czech Literature

**Dutch (Germanic Languages)**

113. Modern Dutch and Flemish Literature in Translation

**East Asian Languages and Cultures**

161. Buddhist Literature in Translation

**English**

- 108A-108B. The English Bible as Literature  
 108C. The English Bible as Literature: Special Topics

**French**

63. Contemporary French Theater  
 64A-64B-64C. The French Novel in Translation  
 162. Modern French Thought in Translation  
 163. Contemporary French Theater in Translation  
 164A-164B-164C. The French Novel in Translation  
 165. Topics in French Literature in Translation

**German (Germanic Languages)**

- 50A. Masterworks of German Literature in Translation: Medieval Period through Classicism  
 50B. Masterworks of German Literature in Translation: Romanticism to the Present  
 51. Masterworks of Germanic or East Central European Literatures in English Translation  
 119A. German Literature in the Age of Chivalry, in English Translation  
 119B. Weimar Classicism and Its Influence, in English Translation  
 119C. The Faust Tradition from the Renaissance to the Modern Age, in English Translation  
 119D. Romantic Heritage in German Literature, in English Translation  
 119E. Pattern and Chaos: Modern German Literature and Thought, in English Translation  
 119F. From Dream to Nightmare: The German-Jewish Experience, in English Translation  
 M119G. Interwar Central European Prose  
 M119H. Postwar Central European Prose

**Humanities**

All courses

**Hungarian (Germanic Languages)**

- 121A-121B. Survey of Hungarian Literature in Translation

**Iranian (Near Eastern Languages)**

- 150A-150B. Survey of Persian Literature in English

**Italian**

- 42A-42B. Italy through the Ages in English  
 46. Italian Cinema and Culture  
 50A-50B. Masterpieces of Italian Literature in English  
 102A-102B-102C. Italian Cultural Experience in English  
 110. Dante in English

121. Literature and Film  
 122. Italian Theater  
 M140. Italian Novella from Boccaccio to Basile  
 150. Modern Fiction in Translation  
 M158. Women in Italian Culture  
 M230A-M230B. Folk Tradition in Italian Literature  
 M260A. Alternative Perspectives in Italian Culture: Studies of Folk Tradition in Italian Literature

**Japanese (East Asian Languages)**

150. Japanese Literature in Translation: Classical  
 151. Japanese Literature in Translation: Modern  
 154. Postwar Japanese Culture through Literature

**Jewish Studies (Near Eastern Languages)**

- M150A-150B. Hebrew Literature in English  
 151A-151B. Modern Jewish Literature in English

**Korean (East Asian Languages)**

150. Korean Literature in Translation: Classical  
 151. Korean Literature in Translation: Modern

**Old Norse Studies (Germanic Languages)**

40. The Heroic Journey in Northern Myth, Legend, and Epic  
 C139. The Saga  
 C140. Viking Civilization and Literature

**Polish (Slavic Languages)**

- 152A-152B-152C. Survey of Polish Literature

**Romanian (Slavic Languages)**

152. Survey of Romanian Literature

**Portuguese (Spanish and Portuguese)**

- 40A-40B. Portuguese, Brazilian, and African Literature in Translation  
 46. Brazilian Culture and Civilization

**Russian (Slavic Languages)**

25. The Russian Novel in Translation  
 118. Russian Literature to Middle Ages and Enlightenment  
 119. Golden Age and the Great Realists  
 120. Literature and Revolution  
 124A-124G. Studies in Russian Literature  
 125. The Russian Novel in Its European Setting  
 126. Survey of Russian Drama

**Scandinavian**

50. Introduction to Scandinavian Literature  
 141. Backgrounds of Scandinavian Literature  
 142. Scandinavian Literature of the 19th Century  
 143. Scandinavian Literature of the 20th Century  
 C144. Henrik Ibsen on the World Stage  
 C145. Getting Married: Strindberg and Battle of the Sexes  
 C146. Kierkegaard and Foundations of Existentialism  
 C147. Pan's Prophets: Knut Hamsun and Other Interpreters of Nature as Modern Idyll  
 C180. Literature and Scandinavian Society  
 C182. Theory of the Scandinavian Novel  
 184. Hans Christian Andersen  
 C186. Voices of Women in Scandinavian Literature  
 187. Scandinavian Film: Bergman and Others

**Serbo-Croatian (Slavic Languages)**

- 154A-154B. Yugoslav Literature

**Slavic (Slavic Languages)**

- M125. Interwar Central European Prose  
 M126. Postwar Central European Prose

**Spanish (Spanish and Portuguese)**

- 60A-60B-60C. Hispanic Literatures in Translation

**Ukrainian (Slavic Languages)**

152. Ukrainian Literature

**Yiddish (Germanic Languages)**

- 121A. 20th-Century Yiddish Poetry in English Translation

- 121B. 20th-Century Yiddish Prose and Drama in English Translation  
 121C. Special Topics in Yiddish Literature in English Translation

**Scope and Objectives**

The UCLA French Department is a major West Coast center for the study of French. In recent decades French critical thought has maintained a dominant position in the Western world. The department seeks to give its students not only a background in the various fields of French studies, but also opportunity to relate literary, linguistic, and cultural study to examination of the critical intellectual questions of our time.

The lower division program is designed to provide practical competence in French after one year and thorough basic knowledge of the language after two years.

The upper division program is chiefly devoted to perfecting linguistic skills and to the study of French culture and literature. Courses in linguistics and business French are also offered. Students graduating with a Bachelor of Arts in French should be fully fluent in French and

possess a thorough background in French literature and culture. All three plans lead to the Bachelor of Arts degree and subsequently to graduate studies in French.

The graduate program comprises training in the various fields of French literature and thought, as well as in literary criticism, analysis, and theory. A number of courses in linguistics and stylistics are also offered. The department offers both the M.A. and Ph.D. degrees.

## Undergraduate Study

### Bachelor of Arts Degrees

#### Preparation for the Majors

*Required:* French 1, 2, 3, 4, 5, 6, 12, or equivalent. Students normally take course 6 before undertaking course 12. Students receiving a grade of A in course 5 may enroll in course 12 concurrently with course 6, with consent of instructor. Students in Plan III must also take Linguistics 20.

#### The Major

Three plans are offered by the department:

##### Plan I: French Studies in Literature and Culture

Plan I leads to the Bachelor of Arts in French. *Required:* Thirteen upper division courses, including French 100, 101, 102; two courses from 114A, 114B, 114C; at least six courses in French literature and/or culture selected from upper division offerings in the department in language, civilization, literature, or the arts. Two upper division elective courses from outside the department may be substituted in the major program with consent of the undergraduate adviser.

Candidates for an instructional credential must take 13 upper division French Department courses, including French 105, in order to qualify for a waiver for the single subject instructional credential in French.

##### Plan II: Interdisciplinary French Studies

Plan II, with emphasis on French culture, leads to the Bachelor of Arts in French and is a core program in French allowing for individual selection of relevant courses in related fields such as humanities, social sciences, women's studies, and linguistics. *Required:* Thirteen upper division courses, including French 100, 101, 102; two courses from 114A, 114B, 114C; at least two courses in French literature; one additional elective course normally selected from upper division offerings in the department in language, civilization, literature, or the arts; five upper division elective courses in fields relevant to French studies to be selected in or outside the department in consultation with the undergraduate adviser.

##### Plan III: French and Linguistics

Plan III leads to the Bachelor of Arts in French and Linguistics. In addition to the normal preparation for the major, students are required to complete the sixth term of work in one other foreign language or the third term in each of

two other foreign languages. Linguistics 20 is required as preparation for the major. *Required:* Twelve upper division courses, including French 100, 101, 102; two courses from 103, 105, 107, 108A, 108B, 109; two courses from 114A, 114B, 114C; Linguistics 103, 110, 120A, 120B, and 165A or 165B.

It is strongly advised that students who intend to pursue advanced degrees begin preparation for the language requirements at the undergraduate level.

If students' knowledge of French exceeds the preparation usually received in courses preparing for the major and if they demonstrate the requisite attainment in French 100, 101, or 102, they may substitute for those courses in grammar and composition an equivalent number of upper division courses in the French Department in consultation with an adviser. All prospective French majors who are native or quasi-native speakers of French must see the undergraduate adviser before beginning upper division work in the major.

All majors must complete a minimum of nine courses of appropriate upper division work in the UCLA French Department. A maximum of eight units of course 199 may be applied toward the elective requirements for the major if approved in advance by the undergraduate adviser. Students must maintain a C average in upper division major courses in order to remain in any of the French majors.

Coursework taken on a Passed/Not Passed basis is not acceptable in any area of the major program.

It is recommended that students intending to major in French consult the undergraduate adviser before enrolling in upper division courses.

### Honors Program

The department encourages those students in the French majors with initiative and independence of mind who desire an enriched individualized course of study to apply for the honors program.

The honors program is designed for French majors who have fulfilled their lower division requirements and have a 3.5 departmental grade-point average. Students whose GPA falls between 3.3 and 3.5 should submit a composition from an advanced language or literature course to the honors committee. If the work submitted meets with approval, students are admitted to the program.

To graduate with departmental honors, students must complete a minimum of two honors projects in the context of nonhonors upper division courses (French 115A and above) taken for honors credit. They must do an honors project (a research paper of 12 to 15 pages) in addition to the regular course requirements. An honors contract must be signed before the end of the third week of the term. After completing the project, students fill out a completion form.

On the basis of their coursework and field of interest, students are expected to formulate a research topic they wish to pursue in greater depth. They take course 170 where they receive regular personal supervision from a faculty member in the research, methodology, and writing of their approximately 20- to 25-page honors thesis (honors projects and the honors thesis are not to be confused). Course 170 counts toward the requirements for the French majors as outlined above.

Students may begin the honors program toward the end of their junior year or during their senior year. The honors projects and course 170 may be taken over two terms minimum. Students are allowed to enroll in graduate courses with the consent of the instructor but cannot use those courses to replace an honors project. Departmental honors are recorded on the final transcript if students fulfill all requirements for the program. They may submit their final honors thesis for the departmental prize.

### Instructional Credential in French

Students interested in obtaining a single subject instructional credential in French should consult a departmental counselor regarding requirements for a waiver from the French subject matter examination required by the California Commission on Teacher Credentialing. For additional information on courses leading to the credential, consult the Graduate School of Education and Information Studies, 1009 Moore Hall, (310) 828-8328.

### French Minor

To enter the French minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Courses:* French 6 or equivalent and one course from 12, 14, or 15.

*Required Upper Division Courses:* French 100 and four additional departmental courses in language, culture, or literature to be selected in consultation with an undergraduate counselor.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

### Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

### Master's Degree

#### Admission

Applicants to the Master of Arts program in French must hold a Bachelor of Arts in French or the equivalent. The Graduate Record Examination (GRE) General Test, a sample of writ-

ten work in French, and three letters of recommendation are also required and should be sent to the department.

### Areas of Study

The corpus of French literature is divided into three chronological periods, each including two centuries: (1) medieval and Renaissance, (2) classical (17th and 18th centuries), and (3) modern (19th and 20th centuries, with franco-phone literature as an option).

### Course Requirements

A total of 11 courses in French is required, including French 201 and 203 (which should be taken as early as possible), at least two courses in each of the three periods, and one additional course in the period not covered on the M.A. examination. For Plan I (thesis) candidates, this is the period of specialization which is not covered on the oral qualifying examination. At least eight of these courses must be at the graduate level. Four units of course 596 (or 598 for students in Plan I) may be substituted for one required century course on approval of the graduate adviser or thesis director.

Students are required to consult with the graduate adviser to ensure full historical coverage of French literature.

### Comprehensive Examination Plan

Students must pass written examinations, four hours in length, in each of the two periods prepared and an oral examination in French, normally 30 minutes, covering the two periods of the written examination. The examinations are given in the Fall and Spring Quarters.

Each period examination contains at least one question requiring textual analysis.

Three results are possible: fail, pass without admission to the doctoral program (terminal M.A.), or pass with admission to the doctoral program. The decision concerning admission to the doctoral program is made by the M.A. examination committee (Plan II) on the basis of an overall appraisal of the student's record as well as of the results of the M.A. examination.

Students who either fail or pass without admission to the doctoral program are permitted to retake the examination once, at a date no more than a year after the first attempt.

### Thesis Plan

Students may apply to the chair of the department for admission into Plan I (thesis plan) after completing at least six graduate-level courses (200 series), four of which must be literature courses in the French Department.

The minimum admission requirements are a 3.5 graduate GPA in French and letters from two graduate professors in the department specifically recommending admission into this plan. A brief statement of the proposed thesis topic is also required.

Final admission into Plan I (i.e., permission to write the thesis) is contingent on passing a one-hour oral examination, administered by the departmental masters' committee, on the

two periods other than the proposed period of specialization (in which the thesis is written). This examination is normally taken during the fourth quarter (but no later than the sixth quarter) after admission. The thesis committee (normally consisting of three departmental faculty members) is appointed only after the student has passed this examination. If the student fails this examination, the examining committee determines whether the student may be permitted another attempt or be advised to take the comprehensive examination (Plan II).

For the purpose of course requirements, the period of specialization for the thesis is considered the period not covered on the M.A. examination; course 598 may be counted as one of the four courses required in this period.

The thesis should demonstrate proficiency in the methods and concepts of literary research; a suitable length is normally about 75 pages. A tentative outline of the proposed thesis must be approved in writing by the thesis committee before work on the thesis is begun. Final approval of the thesis by the committee is also required.

Three results are possible: fail, pass without admission to the doctoral program (terminal M.A.), or pass with admission to the doctoral program. The decision concerning admission to the doctoral program is made by the M.A. thesis committee on the basis of an overall appraisal of the student's record as well as of the results of the M.A. thesis.

Students who either fail or pass without admission to the doctoral program are permitted to resubmit the thesis once, at a date no more than a year after the first attempt.

## Doctoral Degree

### Admission

For UCLA students applying to the Ph.D. program in French, completion of the master's degree in French with recommendation for admission to the doctoral program is required. Outside applicants must hold the M.A. degree in French or equivalent, submit three letters of recommendation and a sample of written work in French, and take the Graduate Record Examination (GRE) General Test.

Admitted students holding the M.A. or an equivalent degree from another institution must take an oral *examen de passage* in two periods of literary history (to be chosen in consultation with the graduate adviser) in order to be formally admitted to the doctoral program. This examination, administered by the M.A. committee, should be taken during the first year in residence. In case of failure it may be repeated once.

### Major Fields or Subdisciplines

The corpus of French literature is divided into three chronological periods, each including two centuries: (1) medieval and Renaissance, (2) classical (17th and 18th centuries), and (3)

modern (19th and 20th centuries, with franco-phone literature as an option).

### Course Requirements

The following courses are required: (1) French 201 and 203, if not already covered at the M.A. level; (2) at least three additional seminars taken after obtaining the M.A. (a balance should be sought between theoretical and literary-historical relevance to the student's proposed period of specialization); (3) at least two graduate courses in other departments related to the area of specialization. In addition, students are expected to follow the guidance committee's suggestions in taking courses in preparation for the doctoral qualifying examination. Guidance committees are particularly careful to ensure that students admitted with the M.A. from other institutions cover thoroughly in coursework the period not examined in the *examen de passage*.

### Written and Oral Qualifying Examinations

Two written examinations of three hours each, based on individual reading lists of approximately 15 works each, established by the examiner in consultation with the candidate are required: (1) on the historical area related to the proposed dissertation topic and (2) in areas of critical theory relevant to the proposed dissertation topic. These examinations are to be taken within a period of one week. At the discretion of the guidance committee, students may be permitted to retake a failed written examination once.

After passing the written examinations, the student is admitted to the University Oral Qualifying Examination. The oral should be taken during the same quarter as the written qualifying examinations. The student must provide the examiners with a 20- to 30-page prospectus of the proposed dissertation, including an outline and a bibliography. The examination, normally of two hours duration, bears on the written examinations and on the proposed dissertation subject.

## French

### Lower Division Courses

If students have taken French elsewhere, they must take a placement test administered by the department. Depending on the results of the placement test or with recommendation of an instructor, they may be permitted to enroll in a course of study at a more advanced level.

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition.

**1. Elementary French.** Lecture, five hours.

**1G. Elementary French for Graduate Students (3 units).** Preparation for GSFLT or other language examinations. A passing grade does not imply satisfaction of language requirements. S/U grading.

**2. Elementary French.** Lecture, five hours. Enforced requisite: course 1 (C – or better).

**2G. Elementary French for Graduate Students (3 units).** Enforced requisite: course 1G. Preparation for GSFLT or other language examinations. A passing grade does not imply satisfaction of language requirements. May be repeated. S/U grading.

**3. Elementary French.** Lecture, five hours. Enforced requisite: course 2 (C – or better).

**4. Intermediate French.** Lecture, five hours. Enforced requisite: course 3 (C – or better).

**5. Intermediate French.** Lecture, five hours. Enforced requisite: course 4 (C – or better).

**6. Intermediate French.** Enforced requisite: course 5 (C – or better).

**10A-10D. French Conversation (2 units each).** Discussion, three hours. Enforced requisite: course 3 (B or better).

**12. Introduction to Study of French Literature.** Lecture, two hours; discussion, one hour. Enforced requisite: course 6. Principles of literary analysis as applied to selected texts in poetry, theater, and prose.

**14. Introduction to French Civilization.** Lecture, three hours; outside study, nine hours. Knowledge of French not required. Study of contemporary French institutions and issues in political, cultural, and socio-economic realms. Structure of and recent developments in French society.

**15. Theory and Correction of Diction.** Enforced requisite: course 6. French pronunciation, diction, intonation in theory and practice; phonetic transcription, phonetic evolution of the modern language; remedial exercises; recordings.

**41. French Cinema and Culture.** Lecture, three hours; film screenings, three hours. Introduction to French culture and literature through study of major films of cultural and literary significance. P/NP or letter grading.

**63. Contemporary French Theater.** Lecture, three hours. Introduction to contemporary French drama in translation. Topics to be announced each term. P/NP or letter grading.

**64A-64B-64C. The French Novel in Translation.** Lecture, three hours. Introduction to French novel masterpieces from variety of perspectives, including literary history, themes, and relations with other arts (film and music). Topics and titles to be announced each term. P/NP or letter grading.

## Upper Division Courses

Requisites to all upper division courses taken in partial fulfillment of the French major are French 6, 12, or equivalent. Credit is ordinarily not allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition. Courses 105 through 109 are not sequential and may be taken in any order, provided the requisites for each course are fulfilled.

**100. Introduction to Written Expression.** Lecture, three hours. Prerequisite: course 6 or equivalent. Development of writing techniques in French, with emphasis on revision of grammatical structures.

**101. Intermediate Exposition.** Lecture, three hours. Prerequisite: course 100 or equivalent. Development of narrative techniques in writing, with emphasis on editing for grammar and style.

**102. Advanced Exposition.** Lecture, three hours. Prerequisite: course 101 or equivalent. Development of analytic writing skills in French, with emphasis on rhetorical techniques and skillful argument.

**103. Composition and Style.** Lecture, three hours. Prerequisite: course 102 or equivalent. Designed to develop proficiency in composition and style, with concentration on three linguistic skills of reading, writing, and translating.

**105. Structure of French.** Lecture, three hours. Prerequisites: course 15, consent of instructor. Prior background in linguistics not required. Introduction to linguistic analysis of French in areas of phonology, morphology, syntax, and language variation.

**107. Advanced Oral Expression.** Lecture, three hours. Prerequisite: course 100 or consent of instructor. Communicative and rhetorical strategies; techniques of oral exposition, argumentation, and analysis.

**108A-108B-108C. Advanced Practical Translation.** Lecture, three hours:

**108A.** Prerequisite: course 103 with a grade of B or consent of instructor. Introduction to translation of advanced texts of general interest, with work in theory of translation.

**108B.** Prerequisite: course 108A or consent of instructor. Practice in translation of technical documents and texts; comparative stylistics of translation.

**108C.** Prerequisite: course 108B or consent of instructor. Advanced work in areas of general and specialized interest.

**109. French Business: Its Language and Culture.** Lecture, three hours. Prerequisite: course 6 or equivalent. Study of language of economics and business in France as well as its specific practices and customs.

**114A-114B-114C. Survey of French Literature.** Lecture, three hours. Prerequisite: course 12 or consent of instructor. Survey of French literature from the medieval period through the 20th century:

**114A.** Medieval and Renaissance Literature. Masterpieces of medieval and Renaissance literature, including examples of epic (*La Chanson de Roland*), romance (Chrétien de Troyes' *Yvain*), and Renaissance prose and poetry (including Marot, Du Bellay, Ronsard, Rabelais, Marguerite de Navarre, and Montaigne).

**114B.** 17th and 18th Centuries. Study of selections from major works of classicism and the Enlightenment, including those by Racine, Pascal, La Fayette, La Fontaine, Laclous, Diderot, Voltaire, and Rousseau.

**114C.** 19th and 20th Centuries. Study of major literary movements and writers of the period, including works by Hugo, Baudelaire, Balzac, Stendhal, Flaubert, Zola, Gide, Proust, Sartre, Robbe-Grillet, and Duras.

**115A-115B-115C. Medieval French Literature.** Lecture, three hours:

**115A.** Invention of Love in the 12th Century. Selections from the broad range of lyric poetry and narrative romance in which is first elaborated "romantic" (sometimes called "courtly") love. Readings include works of the troubadours and *trouvères*, different versions of the Tristan-myth, a romance of Chrétien de Troyes, and first part of *Romance of the Rose*.

**115B.** Medieval Knight: Heroism and Its Social Problems. Readings in literature and history of medieval warfare and its ideals in relation to social structure of the time. Texts include *La Chanson de Roland*, *Raoul de Cambrai*, *La Mort le roi Artu*, crusade history, and Georges Duby's *Guerriers et paysans*.

**115C.** Comic Structure and Social Class. Medieval comedy, to be studied in relation to class structures and their evolution in the Middle Ages, takes a number of forms. Often obscene in the *fabliaux*, it can turn parodic in the *Roman de Renart*, simultaneously satiric, fantastic, and religious in the bourgeois drama of Arras, and utterly charming in the unclassifiable *Aucassin et Nicolette*.

**116A-116B-116C. Renaissance.** Lecture, three hours: **116A.** La Pléiade and 16th-Century Poetry. Study of the linguistic and poetic "revolution" brought about by *Delfance et Illustration* (1549), including texts by Marot, Scève, Labé, Du Bellay, and Ronsard.

**116B.** The Novel and Other Early 16th-Century Prose. Emphasis on Rabelais, with other texts by Marguerite de Navarre and Jean Calvin.

**116C.** Late French Humanism. Emphasis on Montaigne's *Essais*, with other texts from the Religious Wars period.

**117A-117B-117C. 17th Century.** Lecture, three hours:

**117A.** Theater. Study of French comedy and/or tragedy through representative works, including those by Corneille, Molière, and Racine.

**117B.** Prose. Study of 17th-century philosophers, moralists, and/or novelists such as Pascal, La Rochefoucauld, La Bruyère, La Fayette, and La Fontaine.

**117C.** Culture and Society. Study of 17th-century political, social, religious, and courtly aspects, including libertine and *salons milieux*, la Fronde, and Versailles.

**118A-118B-118C. 18th Century.** Lecture, three hours:

**118A.** Satire. Readings include Montesquieu's *Lettres persannes*, Diderot's *Neveu de Rameau* and *Rêve de d'Alembert*, and Voltaire's *Contes*.

**118B.** The Novel. Readings include Prévost's *Manon Lescaut*, Diderot's *La Religieuse* and *Jacques le fataliste*, excerpts from Rousseau's *Julie*, and Laclos' *Les Liaisons dangereuses*.

**118C.** Theater. Readings include selected plays of Marivaux and Beaumarchais, as well as selections from theoretical writings of Diderot and Rousseau.

**119A-119D. 19th Century.** Lecture, three hours:

**119A.** Romanticism. Readings of representative poets, novelists, and playwrights of the Romantic era such as Chateaubriand, Lamartine, Hugo, Vigny, Balzac, and Stendhal.

**119B.** Generation of 1848. Readings of representative writers of the 1840s and the Second Empire such as Baudelaire, Nerval, Balzac, Flaubert, and Mérimée. May also include the *théâtre à thèse* and Parnassian poetry.

**119C.** Naturalism and Symbolism. Study of naturalism in the novel and drama as represented by Zola, Maupassant, and Becque, and of symbolism in the poetry of Baudelaire, Verlaine, Rimbaud, and Mallarmé.

**119D.** Turn of the Century. Study of genres and trends from 1885 through World War I, with emphasis on prose writers such as Huysmans, Laforgue, Barrès, Alain-Fournier, Jarry, Roussel, France, and Romain-Roland.

**120A-120D. 20th Century.** Lecture, three hours:

**120A.** Early 20th-Century Writers. Readings of works by Claudel, Apollinaire, Valéry, Gide, and Proust.

**120B.** Literature from 1918 to 1945. Study of works by surrealists and other major writers such as Céline, Malraux, Giraudoux, and Anouilh.

**120C.** Post-World War II Literature. Study of works by existentialists and other major writers such as Robbe-Grillet, Beckett, Genet, Ponge, and Duras.

**120D.** Post-May 1968 Literature. Study of representative works from the "revolution" of 1968 to the present.

**121A-121B. Contemporary Francophone Literature.** Lecture, three hours:

**121A.** French-African Literature. Survey of literary works of French expression north and south of the Sahara from World War II to the present.

**121B.** Quebec Literature. Survey of modern *Québécois* literary works.

**124. The Short Story.** Lecture, three hours. Survey of short fiction forms in France and the French-speaking world.

**125. Evolution of French Comedy.** Lecture, three hours. Study of history and evolution of comedy from the Middle Ages to the theater of the absurd.

**130A-130B-130C. History of French Civilization and Institutions.** Prerequisites: courses 6, 12:

**130A.** France from Prehistoric Times to the End of the Middle Ages. Lecture, three hours. Fourth hour may be required for viewing films and other laboratory activities.

**130B.** From the Renaissance to the End of the "Ancien Régime." Lecture, three hours. Fourth hour may be required for viewing films and other laboratory activities.

**130C.** From the End of the "Ancien Régime" to 1918. Lecture, three hours. Fourth hour may be required for viewing films and other laboratory activities.

**132. Contemporary France.** Lecture, three hours. Social, cultural, and political institutions and/or movements in 20th-century France.

**140. Women's Studies in French Literature.** Lecture, three hours. Exploration of a selected aspect of the situation of women in French literature as author, character, symbol, etc.

**141. Cinema and Literature in France.** Lecture, three hours (additional hours may be required for viewing films and other laboratory activities). Study of interaction between cinema and literature in its generic, thematic, and sociocultural aspects.

**142. Poetry and Music.** Lecture, three hours. Interdisciplinary study of relation between music and literature, with emphasis on the setting of poetical texts to music, from the troubadours to modern times.

**M143. Rhetoric of Rule.** (Same as Communication Studies M117.) Lecture, three hours. Exploration of how and why power is symbolically constructed by comparing Louis XIV's and President Clinton's attempts to manipulate their image in the "media" of their respective cultures.

Courses 150 through 156 may be repeated once for credit with consent of major adviser.

**150. Studies in Medieval Literature.**

**151. Studies in 16th-Century Literature.**

**152. Studies in 17th-Century Literature.**

**153. Studies in 18th-Century Literature.**

**154. Studies in 19th-Century Literature.**

**155. Studies in 20th-Century Literature.**

**156. Studies in Contemporary Literature of French Expression.**

**157. Studies in French Critical Theory and Philosophy.** Lecture, three hours. Prerequisite: consent of instructor. Advanced study of major concepts in contemporary French thought, with attention to its influence on French literature and culture, and its application to literary and nonliterary texts.

**158. Studies in History of Ideas.** Lecture, three hours. Specific themes which address a particular problem of French literature, civilization, or ideas. May be repeated for credit with consent of major adviser.

The following courses may not be taken for graduate credit but may be taken as the equivalent of out-of-department electives by undergraduate majors.

**162. Modern French Thought in Translation.** Lecture, three hours. Reading and discussion of contemporary works in translation.

**163. Contemporary French Theater in Translation.** Lecture, three hours; discussion, one hour.

**164A-164B-164C. The French Novel in Translation.** Lecture, three hours. Texts and authors to be studied announced in advance for each offering.

**165. Topics in French Literature in Translation.** Lecture, three hours. To be announced each term. May not be taken for major or graduate credit but may be considered as an out-of-department elective for purpose of satisfying major requirements.

**170. Honors Program in French.** Prerequisites: junior or senior standing in French with 3.5 GPA in major, completion of two honors projects, consent of department. Individual study on a topic leading to an honors thesis of approximately 20 to 25 pages to be written under guidance of a faculty member.

**199. Special Studies in French (2 to 8 units).** Prerequisites: junior or senior standing, consent of instructor, consultation with undergraduate adviser. May be repeated once.

## Graduate Courses

**201. Literary Research and Composition.** Lecture, three hours. Introduction to graduate-level literary research, including writing scholarly papers, compilation and presentation of bibliography, and practical work in computer use of data bank.

**202. Historical and Philosophical Background to French Literary Criticism.** Lecture, three hours.

**203. Contemporary Theories.** Lecture, three hours. Introductory study of representative texts from the works of major modern theoreticians, which may include works by Althusser, Barthes, Derrida, Foucault, Genette, Greimas, Kristeva, and Lacan.

**205. Techniques of Literary Analysis.** Lecture, three hours. Practice in close analysis of literary texts, including *explication de texte*.

**210A. Phonology and Morphology from Vulgar Latin to French Classicism.** Lecture, three hours. Evolution of the French language. Required of candidates for Ph.D. in Romance Linguistics and Literature who specialize in philology.

**210B. Syntax and Semantics from Vulgar Latin to French Classicism.** Lecture, three hours. Evolution of the French language. Required of candidates for Ph.D. in Romance Linguistics and Literature who specialize in philology.

**214. Problematics of Medieval Language and Literature.** Lecture, three hours. Prerequisite to courses 215A through 215D and 250A through 250C. Introduction to Old French and the problematics of medieval literature.

**215A-215D. Medieval Literature.** Lecture, three hours. Prerequisite: course 214:

**215A.** Lyric Types.

**215B.** Narrative Types.

**215C.** Theater — Comic and Religious.

**215D.** Discursive Texts.

**216A-216B-216C. Renaissance.** Lecture, three hours:

**216A.** Early Renaissance French Literature. Selected readings of works from first half of the 16th century, including those by Marot, Rabelais, Marguerite de Navarre, and Scève.

**216B.** Poetic "Revolution" of 1549. Readings of works by Ronsard and Du Bellay, with selections from other writers of the 1550s.

**216C.** Late Renaissance Literature. Selected readings of works by major writers of the period from 1560 to 1600, including d'Aubigné, Sponde, Chassignet, and Montaigne.

**217A-217D. 17th Century.** Lecture, three hours:

**217A.** Theater. Analysis of representative comedies and/or tragedies, including those by Corneille, Molière, and Racine.

**217B.** Prose. Readings of selected works by philosophers, moralists, and/or novelists, including Pascal, La Rochefoucault, La Bruyère, La Fayette, and La Fontaine.

**217C.** Poetry. Selected readings of works by major poets, including Racan, Voiture, Saint-Amant, Racine, La Fontaine, and Boileau.

**217D.** Culture and Society. Study of political, social, religious, and courtly aspects, including libertine and *salons milieux*, la Fronde, and Versailles.

**218A-218B-218C. 18th Century.** Lecture, three hours:

**218A.** Topics in the Early Enlightenment. Selected readings from major works of the period from 1680 to 1747.

**218B.** Topics in the Enlightenment. Selected readings from major works of the period from 1748 to 1765.

**218C.** Topics in the Late Enlightenment. Selected readings from major works of the period from 1766 to 1791.

**219A-219D. 19th Century.** Lecture, three hours:

**219A.** Topics in Romanticism. Readings in literature of the Romantic period.

**219B.** Topics in Realism and Naturalism. Readings in realist and naturalist novel and theater.

**219C.** Topics in Symbolism. Readings in symbolist poetry and prose.

**219D.** Poetry. Study of development of French poetry throughout the 19th century.

**220A-220D. 20th Century.** Lecture, three hours:

**220A.** Turn of the Century. Readings of works by post-symbolist writers, as well as Valéry, Gide, and Proust.

**220B.** Literature from 1918 to 1945. Readings of works by surrealist writers, as well as Céline, Malraux, and Anouilh.

**220C.** Post-World War II Literature. Readings of works by existentialist writers, as well as Robbe-Grillet, Beckett, and Ponge.

**220D.** Cinema and Literature. Comparative study of interrelations between cinematic and literary forms.

**221A-221B-221C. French-African Literature.** Lecture, three hours:

**221A.** Introduction to Study of French-African Literatures. In-depth survey of French-African literatures prior to independence.

**221B.** French-African Literature of Madagascar and Bantu Africa. Readings and analysis of major works since independence.

**221C.** French-African Literature of Berbero-Sudanese and Arabo-Islamic Africa. Readings and analysis of major works since independence.

**222. Quebec Literature.** Lecture, three hours. Study of selected poems, novels, and plays in their cultural context.

**241. Introduction to Generative Anthropology.** Lecture, three hours. Prerequisite: consent of instructor. Discussion of principles of generative anthropology and their application to study of literary texts and related cultural phenomena.

**242. Introduction to Study of Narrative.** Lecture, three hours. First survey of modern French methodology for critical analysis and interpretation of narrative, with examples from all periods of French literature.

Seminars 250A through 260B may be repeated for credit.

**250A. Major Medieval Texts.** Seminar, three hours. Prerequisite: course 214. Intensive study of individual texts from multiple perspectives, such as *La Chanson de Roland*, a romance of Chrétien de Troyes, *Le Roman de la rose*, or François Villon's *Grand Testament*.

**250B. Structures of Medieval Literature.** Seminar, three hours. Prerequisite: course 214. Advanced study of a variety of texts in terms of textual and historical structures.

**250C. Problems in Medieval Literature.** Seminar, three hours. Prerequisite: course 214. Exploratory study of a theoretical problem, such as subjectivity and representation in medieval literature, minor or nonclassified texts, individuality and convention, or opposition of religion and secularism.

**251A-251B. Studies in the Renaissance.**

**252A-252B. Studies in the Baroque.**

**253A-253B. Studies in the 17th Century.**

**254A-254B. Studies in the 18th Century.**

**255A-255B. Studies in the 19th Century.**

**256A-256B. Studies in Contemporary Literature.**

**257A-257B. Studies in French-African Literature.**

**258A-258B. Studies in Literary Criticism.**

**259A-259B. Studies in Philosophy and Literature.**

**260A-260B. Studies in History of Ideas.** Particular problems in French literature and ideas.

**370. Teaching French in Secondary School.** Lecture, three hours; discussion, one hour. Required of all candidates for general secondary instructional credential in French.

**375. Teaching Apprentice Practicum (1 to 4 units).**

Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching French at College Level.** Lecture, three hours; discussion, one hour. Prerequisite: graduate standing. Theory and practice of language teaching. S/U grading.

**596. Directed Individual Studies or Research (2 to 4 units).**

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units).** May be repeated for a maximum of 16 units. S/U grading.

**598. Research for and Preparation of M.A. Thesis (2 to 4 units).** Prerequisite: consent of instructor. A maximum of four units may be applied toward M.A. degree requirements. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation (2 to 8 units).** S/U grading.

## GEOGRAPHY

*College of Letters and Science*

UCLA  
1255 Bunche Hall  
Box 951524  
Los Angeles, CA 90095-1524

(310) 825-1071

Jonathan D. Sauer, Ph.D.  
Werner H. Terjung, Ph.D.  
Benjamin E. Thomas, Ph.D.  
Norman J.W. Thrower, Ph.D.

### Associate Professors

Judith A. Carney, Ph.D.  
Michael R. Curry, Ph.D.  
J. Mark Ellis, Ph.D.  
Chi-Fun Cindy Fan, Ph.D.  
David L. Rigby, Ph.D.

### Assistant Professors

Johannes J. Feddema, Ph.D.  
Joshua S.S. Muldavin, Ph.D.  
Marilyn N. Raphael, Ph.D.  
Melissa Savage, Ph.D.  
Laurence C. Smith, Ph.D.

## Scope and Objectives

Geography is concerned primarily with interpreting and explaining the occurrence, distribution, and interrelationships of the physical and social elements which can be seen in the landscape. The geographer concentrates on two essential questions: where are things located? and why are they located where they are? The answer to the former is largely descriptive, but the answer to the latter involves theory and analysis. The geographer's challenge is to provide continuing interpretation of the constantly changing physical and human landscapes on the Earth's surface.

The research and teaching interests of the faculty, are highly ranked nationally by the Conference Board of the Associated Research Councils, cover major areas of geographical knowledge and underlie both the undergraduate and graduate instructional programs. These areas of interest may be broadly grouped into urban and regional development studies, spatial demography and social processes in the city, culture and environment in the modern world, physical geography, and biogeography.

Geography is an especially attractive major for liberal arts students. Its body of theory and its methodologies provide ideas and techniques applicable to a wide range of questions about our environment; it also provides both the regional and world perspectives required of responsible citizens.

The department offers two undergraduate majors that lead to the Bachelor of Arts degree: (1) the major in geography and (2) the major in geography/environmental studies. The majors prepare students for employment opportunities in both the public and private sectors (in environmental analysis, assessment, and management, map making and remote sensing, regional analysis, economic and urban spatial analysis, and teaching) and for graduate study in law, management, urban and regional planning, education, other biophysical and social sciences, and applied programs, as well as in geography.

Producing geographers of high quality is the principal goal of the graduate program, designed primarily for students pursuing the Ph.D. degree. The Master of Arts degree, which involves coursework and a thesis, serves as an essential building-block of the doctoral program. The doctorate is awarded to those students who have achieved the level of geographical knowledge and training required of a professional geographer. The degree recognizes the ability of students to make scholarly contributions in their fields of specialization and to undertake advanced research in those areas.

## Undergraduate Study

### Bachelor of Arts in Geography

Geography majors are encouraged to consult with the undergraduate adviser for the planning of a program suitable to their particular and individual objectives.

### Preparation for the Major

*Required:* Geography 1, 2, 3, 4, 40. All courses must be taken for a letter grade.

### The Major

*Required:* Ten upper division geography courses taken for a letter grade, which must include (1) five courses from one of the "Concentrations for the Major" listed below, (2) three additional courses in at least two different concentrations, (3) one regional course, and (4) one procedures course.

### Major Concentrations

By the end of the junior year and no later than the beginning of the senior year, students are required to declare their specific concentration by filing a statement with the undergraduate adviser. The purpose of the concentration requirement is to expose students to systematic in-depth work within a specific area of geography. Completion of a concentration requires five upper division geography courses. Students must take a concentration's required course(s), if any, before declaring that concentration. They must select one of the following concentrations and meet its course requirements:

(1) *Urban and Regional Development Studies:* Five courses from 135, 148, 150, 155, 157, 159A.

(2) *Spatial Demography and Social Processes in the City:* Course 142 and four courses from 143, 144, 150, 156, 159B.

(3) *Culture and Environment in the Modern World:* Five courses from 130, 133, 134, 135, 136, 140, 151, 159C.

(4) *Physical Geography:* Courses 100/100A, 104, 105/105A, and two courses from 101, 103, 106, 107, 113, 159D.

(5) *Biogeography:* Five courses from 108, 111, 112, 118, 122, 123, 159E, 163.

### Foreign Language/Mathematics Requirement

Every geography major is required to pass five quarter courses in foreign language (in no more than two languages) or mathematics, in any combination. In foreign language, the department accepts UCLA foreign language departmental proficiency examination scores as evidence of foreign language competency. In mathematics, only Mathematics 2, 3A, 3B, 3C, 31A, 31B, 32A, 32B, 33A, or equivalent are acceptable. A grade of Passed or C (or better) is required in all courses intended to satisfy this requirement.

## Allied Fields

Students must develop some competence in an allied field. This requirement consists of at least two upper division courses selected from at least one of the following disciplines: Afro-American studies, anthropology, art history, Asian American studies, atmospheric sciences, biology, chemistry, Chicana and Chicano studies, communication studies, Earth and space sciences, economics, folklore, history, management, philosophy, physics, political science, psychology, public health, sociology, women's studies. Urban Planning 187 and M190 are also acceptable. Other disciplines require departmental consent.

## Honors Program

Honors in the geography major may be obtained through procedures described under Geography 199HA-199HB.

## Bachelor of Arts in Geography/Environmental Studies

The major in geography/environmental studies develops and deepens students' understanding of environmental issues; it explores problem-solving approaches from an interactive people/nature viewpoint and involves analysis of social, physical, and biotic environmental systems. The major's uniqueness lies in its emphasis on its geographical perspective of human impacts on natural systems, as well as of implications of global change on local and regional human systems.

### Preparation for the Major

*Required:* Geography 1, 2, 3, 4, 5, 40. All courses must be taken for a letter grade. *Recommended:* Biology 21, Chemistry and Biochemistry 2 or 11A, Life Sciences 1, Mathematics 3A, 3B, Philosophy 6, Physics 3A or 10. Students considering graduate work are strongly advised to include Chemistry and Biochemistry 11A, 11B, Mathematics 31A, 31B, and 32A in their program.

Students are strongly advised to complete all requisites before beginning upper division work in the major.

### The Major

*Required:* Twelve upper division geography courses taken for a letter grade which must be distributed as follows: (1) *natural systems core* — two courses from 100, 103, 104, 105, 106, 108, 112; (2) *human systems core* — two courses from 118, 133, 134, 140, 142, 148, 150; (3) *environmental studies cluster* — five courses from 107, 110, 114, 116, 120, 121, 123, 124, 125, 126, M128, 129, 131, 135, 136; (4) *procedures* — two courses (eight units) from 100A, 101A (two units), 105A (two units), 106A (two units), 160, 163, 167 (six units), 168, 169, 170, 171, M178; and (5) *regions* — one course from 122, 135, 136, 156, 180, 181, 182A, 182B, 183, 185, 186, 187, 188, 189, or 190.

Geography/environmental studies majors are advised to complete the required courses in the natural and human systems cores before taking courses in the environmental studies cluster.

At least two upper division courses should be taken as electives in other social sciences departments (Anthropology, Economics, History, Political Science, Sociology), the Urban Planning Department (School of Public Policy and Social Research), or the School of Public Health. The courses should be complementary and/or supplementary to the major as students have constructed it.

## Foreign Language/Mathematics Requirement

Every geography/environmental studies major is required to pass five quarter courses in foreign language (in no more than two languages) or mathematics, in any combination. In foreign language, the department accepts UCLA foreign language departmental proficiency examination scores as evidence of foreign language competency. In mathematics, only Mathematics 2, 3A, 3B, 3C, 31A, 31B, 32A, 32B, 33A, or equivalent are acceptable. A grade of Passed or C (or better) is required in all courses intended to satisfy this requirement.

## Honors Program

Honors in the geography/environmental studies major may be obtained through procedures described under Geography 199HA-199HB.

## Computing Specialization

Majors in geography and geography/environmental studies may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, 30, 60, and Mathematics 61 with a minimum grade of C in each course (Mathematics 32A and 32B are also highly recommended), and (3) completing at least two courses from Geography 104, 167, 168, 171. Students graduate with a bachelor's degree in their major and a specialization in computing.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

Application to the Master of Arts program in Geography may be made for admission to any quarter. An official application, a complete set of transcripts of prior university coursework, the results of the Graduate Record Examination (GRE) General Test, a statement of purpose, and three letters of evaluation must be

submitted. Normally applicants should have (1) completed the undergraduate major in geography or in a related field, (2) received a B.A. or B.S. degree, (3) attained at least a 3.3 grade-point average in courses taken in the junior and senior years in the major, (4) attained a high GRE score (normally well above 1,200) in the combined verbal and quantitative sections, and (5) strong letters evaluating past academic and/or professional performance and indicating potential for high achievement in graduate studies. Exceptions to the guidelines may be made for students whose records indicate unusual promise.

In addition, a faculty member must be willing to serve as interim adviser.

The Test of English as a Foreign Language (TOEFL) is normally required of all international applicants whose native language is not English.

## Areas of Study

Students commonly specialize in one or more of the following areas of geographical knowledge: environmental studies, geomorphology, climatology, biogeography, cartography, and economic, social, cultural/historical, population, and urban geography. At the M.A. level students emphasize at least one of these specialized areas. However, because geographical knowledge and its associated research questions frequently transcend disciplinary and subdisciplinary boundaries, students, in consultation with knowledgeable faculty members, are expected to refine and deepen their research interests further, within, across, and beyond these organized research and teaching areas.

## Course Requirements

Students must complete at least six courses in addition to the three required core courses (Geography 298A, 298B, 298C), for a minimum of 36 units. The core courses must be completed within two years and with a grade of B or better in each. For students entering with a geography major, they should be completed in the first year. Two 100-level courses and four units of a 500-level course may be applied toward the minimum coursework requirement. The course program must have the approval of the faculty mentor.

Two 500-series courses may be applied toward the minimum course requirement for the M.A. degree but not toward the minimum graduate course requirement.

*Individual Study Courses.* The following rules pertain to individual study courses (Geography 199, 596, 597, 598, 599):

- (1) Before enrolling in one of these courses, students must consult with the responsible faculty member and work out a program of study and consultation.
- (2) All 500-series courses can be taken on an S/U basis only.
- (3) Students may enroll in Geography 597, 598, or 599 as often as required.

*Teaching Courses.* Geography 375 and Geography 495 cannot be applied to the minimum of nine courses for the M.A.

### Comprehensive Examination Plan

None.

### Thesis Plan

Students must present a thesis, based in whole or in part on original investigation. Selection of a thesis topic, creation of a scientific design, and conduct of the investigation should proceed under the supervision of the student's M.A. committee. The thesis proposal should include the exact nature of the problem to be researched, an outline of the subject matter, the proposed methods of research, the degree of originality involved, and the anticipated time of completion of the study. The entire thesis project must be carried out in close consultation with all members of the thesis committee.

## Doctoral Degree

### Admission

Application may be made for admission to any quarter. Applicants must submit an official application, a complete set of transcripts of prior university coursework, the results of the Graduate Record Examination (GRE) General Test, a statement of purpose, and three letters of evaluation. Normally applicants should have (1) completed the undergraduate major in geography or in a related field, (2) received a B.A. or B.S. degree, (3) attained at least a 3.3 grade-point average in courses taken in the junior and senior years and in the major, or a 3.5 GPA in graduate courses for students entering with an M.A., (4) attained a high GRE score (normally well above 1,200) in the combined verbal and quantitative sections, and (5) strong letters evaluating past academic and/or professional performance and indicating potential for high achievement in graduate studies. Exceptions to the guidelines may be made for students whose records indicate unusual promise.

Admission to the Ph.D. program usually requires an M.A. or M.S. degree. Applicants must provide clear evidence of ability to conduct substantive research and to articulate ideas clearly in writing. In addition, a faculty member must be willing to serve as interim adviser. Under rare circumstances, students may proceed directly toward the Ph.D. degree without taking a master's degree. Students must have completed one year in the M.A. program, have three department faculty members review their dossiers and unanimously recommend such a course of action, and pass a four-hour qualifying examination set and evaluated by three faculty members competent in their area of specialization. The pass must be unanimous and receive the approval of at least two thirds of the voting faculty in a formal faculty meeting.

The Test of English as a Foreign Language (TOEFL) is normally required of all international applicants whose native language is not English.

## Major Fields or Subdisciplines

Students commonly specialize in one or more of the following areas of geographical knowledge: environmental studies, geomorphology, climatology, biogeography, cartography, and economic, social, cultural/historical, population, and urban geography. The written qualifying examinations for the Ph.D. include one examination each in three of these fields selected by the student in consultation with an adviser. However, because geographical knowledge and its associated research questions frequently transcend disciplinary and subdisciplinary boundaries, students are expected to refine and deepen their research interests further, in consultation with knowledgeable faculty members, within, across, and beyond these organized research and teaching areas.

### Course Requirements

Students must successfully complete, within two years and with a grade of B or better in each, the required core courses (Geography 298A, 298B, and 298C) if these have not already been taken at the M.A. level. Students entering with a geography degree should complete them in the first year. At least three graduate geography courses in addition to the M.A. coursework (excluding Geography 298A, 298B, 298C, 375, 495, and the 500 series) are required as are three upper division or graduate courses in one or two fields (outside of geography) allied to the student's major research area or subdisciplinary specialization, subject to approval of the guidance committee. The allied field requirement must be met before taking the oral qualifying examination. Each quarter, the program of coursework must be approved by the guidance committee and the graduate adviser.

*Individual Study Courses.* The following rules pertain to individual study courses (Geography 199, 596, 597, 598, 599):

- (1) Before enrolling in one of these courses, students must consult with the responsible faculty member and work out a program of study and consultation.
- (2) All 500-series courses can be taken on an S/U basis only.
- (3) Students may enroll in Geography 597, 598, or 599 as often as required.

*Teaching Courses.* Geography 375 and Geography 495 cannot be applied to the minimum course requirements for three courses for the Ph.D.

## Written and Oral Qualifying Examinations

The written qualifying examination, consisting of five written examinations and administered by the guidance committee, must be taken no later than the sixth quarter of the Ph.D. program (exceptions may be made in the case of students entering from disciplines outside of geography). Three papers pertain to three substantive fields of geographical inquiry in which the student is specializing; one general paper

addresses the major issues, developments, and debates in the field at large; and one paper involves a field problem. The examination may be taken over a period of no more than two weeks. In case of failure, the student may make one more attempt, but no sooner than three months nor longer than one year from the first examination.

Preparation of the dissertation proposal follows successful completion of the written qualifying examination. The dissertation proposal should specify the research question, describing in some detail the problem to be studied, its scientific background, and outline of the subject matter, the proposed methods of research, the degree of originality involved, and a timetable for completion of the degree. It is to be written in consultation with the official doctoral committee. Committee members should receive the dissertation proposal at least one month before the oral examination. The proposal must be approved unanimously by the committee before the oral examination can take place.

The University Oral Qualifying Examination, conducted by the official doctoral committee, focuses on the dissertation proposal. After successfully completing the oral examination, the student is eligible for advancement to candidacy. In instances of failure, the oral examination may be repeated once.

## Geography

### Lower Division Courses

Contact the department office to learn of additional offerings, seminar topics, and specific instructors.

- 1. Physical Environment.** Lecture, three hours; laboratory, two hours. Study of Earth's physical environment, with particular reference to the nature and distribution of landforms and climate.
- 2. Biogeography.** Lecture, three hours; discussion, 90 minutes; outside study, seven and one-half hours. Study of Earth's biosphere, with particular reference to evolution and disturbance of plants, animals, and soils. P/NP or letter grading.
- 3. Cultural Geography.** Lecture, three hours; discussion, 90 minutes. Broad examination of basic cultural variables in human occupation of Earth's surface. Ecological, spatial, and historical approaches.
- 4. Introduction to Economic Geography.** Lecture, three hours; laboratory, one hour. Introduction to basic concepts used in modern urban and economic geography. Emphasis on giving better understanding of effects of location on human behavior. Discussion and practical exercises on analysis of problems in the Los Angeles urban environment.
- 5. People and the Earth's Ecosystems.** Lecture, three hours; laboratory, two hours. Examination of historical and contemporary roles of man as a major agent of biological change in Earth's ecosystems.
- 40. Geographical Statistics.** Lecture, three hours; laboratory, 90 minutes; outside study, seven and one-half hours. Satisfies statistics requirement for geography major. Presentation and interpretation of data, descriptive statistics and measures of spatial patterns, introduction to statistical inference and measures of association. P/NP or letter grading.

**88A-88Z. Lower Division Seminars: Geography.** (Formerly numbered 88.) Discussion, three hours; reading period, one hour. Seminars designed to explore various themes and issues pertinent to environment and people. Seminar topics advertised in department during previous term. P/NP or letter grading.

## Upper Division Courses

**100. Principles of Geomorphology.** Lecture, three hours; reading period, one hour. Prerequisite: course 1 or consent of instructor. Recommended: course 100A. Study of processes that shape the world's landforms, with emphasis on weathering, mass movement and fluvial erosion, transport, deposition; energy and material transfers; space and time considerations.

**100A. Principles of Geomorphology: Field and Laboratory (2 units).** Laboratory/fieldwork, six hours. Corequisite: course 100. Field and laboratory investigations of weathering, mass movement, fluvial erosion, transport, deposition; related geomorphic phenomena. P/NP or letter grading.

**101. Coastal Geomorphology.** Lecture, three hours; reading period, one hour. Prerequisite: course 1 or consent of instructor. Recommended: course 101A. Study of origin and development of coastal landforms, emphasizing past and present changes, hydrodynamic processes, sediment transfers, and such features as beaches, estuaries, lagoons, deltas, wetlands, dunes, seacliffs, and coral reefs, together with coastal zone management. P/NP or letter grading.

**101A. Coastal Geomorphology: Field and Laboratory (2 units).** Laboratory/fieldwork, six hours. Corequisite: course 101. Field and laboratory investigations of coastal landforms, emphasizing past and present changes, hydrodynamic processes, sediment transfers, and such features as beaches, estuaries, lagoons, deltas, wetlands, dunes, and seacliffs, together with coastal zone management.

**103. Paleoclimatology and Ice-Age Environments.** Lecture, three hours; discussion, one hour. Prerequisite: course 1 or consent of instructor. Study of past climates and their environmental impact, with emphasis on the last three million years, including evidence for glacial and interglacial oscillations, historic changes, paleogeographic reconstruction, external and internal forcing mechanisms, and human implications. P/NP or letter grading.

**104. Climatology.** Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Examination of the many relations between climate and the world of man. Application of basic energy budget concepts to the microclimates of relevance to ecosystems of agriculture, animals, man, and urban places. P/NP or letter grading.

**105. Hydrology.** Lecture, three hours; reading period, one hour. Prerequisite: upper division standing or consent of instructor. Corequisite: course 105A. Recommended: courses 40, 104, or equivalent. Role of water in geographic systems: hydrologic phenomena in relation to climate, landforms, soils, vegetation, and cultural processes and impacts on the landscape. Field projects required. P/NP or letter grading.

**105A. Hydrology: Field and Laboratory (2 units).** Laboratory/fieldwork, six hours. Corequisite: course 105. Field and laboratory investigations into role of water in geographic systems: hydrologic phenomena in relation to climate, landforms, soils, vegetation, and cultural processes and impacts on the landscape. Students solve applied hydrology problems in laboratory and make hydrologic measurements in the field.

**106. Soils.** Lecture, three hours; reading period, one hour. Prerequisites: course 1 or equivalent and Chemistry 11A, or consent of instructor. Corequisite: course 106A. Study of origins, evolution, properties, and utilization of soils, with special emphasis on world's major soil groups.

**106A. Soils: Laboratory (2 units).** Laboratory/fieldwork, six hours. Corequisite: course 106. Study of natural development of soils, physical and chemical properties of soil, and uses of soil. Analysis of pH, moisture, texture, nutrients, and organics. Includes one-day field trip.

**107. Soil and Water Conservation.** Lecture, three hours; discussion, one hour. Prerequisite: course 1. Recommended: course 105 or 106 or Civil Engineering 150 or equivalent. Limited to juniors/seniors. Systematic study of processes of and hazards posed by erosion, sedimentation, and pollution and techniques needed to conserve soil and maintain environmental quality. Scope includes agriculture, forest engineering, mining, and other rural uses of land. P/NP or letter grading.

**108. World Vegetation.** Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Characteristics, distribution, environmental and cultural relationships of world's principal vegetation patterns. P/NP or letter grading.

**110. Population and Natural Resources.** Lecture, three hours; reading period, one hour. Prerequisite: upper division standing or consent of instructor. Examination of debate about environmental change and ability of the planet to maintain a growing population. Introduction and evaluation of basic demographic processes in context of food production, energy use, and environmental degradation. Discussion of major debates about use of resources in context of increasing population in developing countries and decreasing population in Western countries. P/NP or letter grading.

**111. Forest Ecosystems.** Lecture, three hours; reading period, one hour; field trips. Prerequisites: course 2, Life Sciences 1 or equivalent. Limited to juniors/seniors. Evaluation of ecological principles as they apply to forests. Emphasis on constraints of physical environment, biotic interactions, succession, disturbances, and long-term environmental change. P/NP or letter grading.

**112. Analytical Animal Geography.** Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 2 or Life Sciences 1, 40. Limited to juniors/seniors. Analysis of processes of expanding and contracting distribution areas. Focus on island biogeography and its implications for biodiversity trends in natural and anthropogenic environments. P/NP or letter grading.

**113. Clastic Sedimentation Processes in Geomorphology.** Lecture, three hours. Prerequisites: courses 1, 100, and 105, or equivalent, or consent of instructor. Recommended: courses 101, 103, 107, or equivalent. Study of clastic sedimentation transport and deposition processes in geomorphology. Topics include basic fluid mechanics and sediment transport; tectonic framework of sedimentation; general overview of depositional environments; and more detailed discussion of selected environments.

**114. Ideas of Nature and Environmental Values.** Lecture, three hours; reading period, one hour. Limited to juniors/seniors. History of ideas of nature and the environment. Relationship of those ideas to contemporary ethical and political concerns about the environment and the place of humans within it. P/NP or letter grading.

**M115. Environmentalism: Past, Present, and Future (4 to 6 units).** (Same as Urban Planning CM189.) Discussion, three hours; optional field study, five to 10 hours. Exploration of history, politics, and theories of environmental movements, dynamics of race, class, and gender in relation to environmental agendas, and potential role of environmentalism in reshaping our society. Readings, discussion, and research papers. Offered annually as a graduate research seminar and biannually as an undergraduate upper division lecture and field studies program. P/NP or letter grading.

**116. Origins and Histories of Crop Plants.** Lecture, three hours; reading period, one hour. Prerequisite: course 2 or equivalent. Limited to juniors/seniors. Geographic patterns of domestication and diffusion of useful plants from antiquity to the present, based on detailed case histories of selected species. P/NP or letter grading.

**118. Medical Geography.** Lecture, three hours; reading period, one hour. Prerequisite: course 5 or consent of instructor. Examination of patterns of population/place/disease interactions and some effects of change and development on disease etiology and problems of health care.

**120. Conservation of Resources: North America.** Prerequisites: courses 1 and 2, or equivalent, or upper division standing. Analysis of basic principles and problems associated with conservation of natural resources in the U.S. and Canada.

**121. Conservation of Resources: Underdeveloped World.** Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Analysis of principles and problems of conservation of natural resources of the underdeveloped world. P/NP or letter grading.

**122. Wildlife Conservation in Eastern Africa.** Lecture, three hours; reading period, one hour. Prerequisite: course 5. Limited to juniors/seniors. Analysis of tropical ecosystems of eastern Africa, including wildlife communities, vegetation, climate, and human impact. Discussion of national park systems and their natural and anthropogenic ecological dynamics. P/NP or letter grading.

**123. Bioresource Management.** Lecture, three hours; discussion, one hour. Prerequisites: courses 2, 5. Recommended: course 40. Limited to juniors/seniors. Theory and practice of management and conservation of biorecources. Introduction to wildlife management, endangered species conservation, and design and maintenance of National Parks and ecological reserves. P/NP or letter grading.

**124. Environmental Impact Analysis.** Lecture, three hours; discussion, one hour. Prerequisites: course 40, two environmental studies cluster courses. Introduction to interdisciplinary analysis of local and regional impacts on environmental systems. Evaluation of state and federal concepts for analysis of environmental impact. P/NP or letter grading.

**125. Health and the Global Environment.** Lecture, three hours; reading period, one hour. Impact of the environment and lifestyle on individual health examined from a geographical perspective, with examples from both developed and developing countries. P/NP or letter grading.

**126. Geography of Extinction.** Lecture, three hours; reading period, one hour. Prerequisites: course 5, upper division standing. Geographic and taxonomic survey and analysis of biotic extinctions over the past 15,000 years. Identification of extinction factors and pathways through case studies of extinct and endangered species and communities. P/NP or letter grading.

**M127. Soils, Plants, and Society.** (Same as Biology M127.) Lecture, three hours; field trip. Prerequisites: Chemistry 11A, 11B/11BL, and 11CL, or equivalent, or consent of instructor. General treatment of soil development and morphology and physical and chemical properties of soils as they relate to plant growth and distribution; soil resources, management, conservation, and cultural aspects. Use of soil profiles examined on field trip to explain developmental phenomena.

**M128. Global Environment and Development: Problems and Issues.** (Formerly numbered 128.) (Same as Urban Planning CM128.) Lecture, three hours; discussion, one hour. Requisite: course 5. Designed for juniors/seniors. Questions of population, resource use, Third World poverty, and the environment. Analysis of global economic restructuring and its connections to changing organization of production and resulting environmental impacts. Examination of emergent local and regional coalitions for self-reliance and sustainable development. Case studies from Africa, Latin America, Asia, and the U.S. P/NP or letter grading.

**129. Seminar: Environmental Studies.** Seminar, three hours; reading period, two hours. Prerequisites: one course each from natural and human systems cores, three environmental studies cluster courses, senior standing. Qualitative/quantitative analysis of problems associated with rational protection and use of selected environmental systems (urban, rural, forest, desert, coastal, water, soil, or others). P/NP or letter grading.

**130. Geographical Discovery and Exploration.** Lecture, three hours; reading period, one hour. Prerequisites: courses 1 and 3, or equivalent, or upper division standing. Survey of history of exploration, from earliest times to modern, with emphasis on period from Marco Polo to the present.

**131. Environmental Change.** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Examination of natural forces producing environmental changes over past two million years. How present landscape reflects past conditions. Effects of environmental change on people. Increasing importance of human activity in environmental modification. Focus on impact of natural and anthropogenic changes on forests. P/NP or letter grading.

**133. Cultural Geography of the Modern World.** Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Evolutionary and structural approach to sociocultural geography of the modern world system, with particular emphasis on structure and functioning of its core, semi-periphery, and periphery. P/NP or letter grading.

**134. Space, Place, and Nature in Western Thought.** Lecture, three hours. Limited to juniors/seniors. History of development of basic ideas of geography — space, place, and nature — in Western thought. Relationship between those ideas and conceptions of science, knowledge, and inquiry. P/NP or letter grading.

**135. African Ecology and Development.** Lecture, three hours. Limited to juniors/seniors. Overview of contemporary ecological and development issues in sub-Saharan Africa. P/NP or letter grading.

**136. Technology, Nature, and the American Landscape.** Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Study of evolution of cultural landscapes of the area that is now the U.S. Examination of past geographies and of geographical change through time. P/NP or letter grading.

**140. Political Geography.** Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Spatiality of political activity, spatial constitution of political power, control over space as central component to political struggles. Studies at local, national, state, and global scales. P/NP or letter grading.

**142. Population Geography.** Lecture, three hours; reading period, one hour. Prerequisite: upper division standing or consent of instructor. Study of social and behavioral perspectives influencing people in their patterns of demographic change, migration, and mobility, with special emphasis on spatial relationships and selected case studies. P/NP or letter grading.

**143. Geography of Health Care.** Lecture, three hours. Examination of geography of health care delivery and planning, focusing on factors which influence accessibility and utilization of health services by consumers. Spatial aspects of organization of health care influence who gets care where. P/NP or letter grading.

**144. Ethnicity in the American City.** Lecture, three hours; reading period, two hours. Recommended (but not prerequisite): course 142. Limited to juniors/seniors. Designed to encourage and facilitate critical thinking about geographical aspects of ethnicity in contemporary America, with focus specifically on non-white ethnic minorities (blacks, Hispanics, Asian Americans, and Native Americans). Use of a comparative perspective to explain changing distribution, social, economic, and political behavior, and adjustment problems these groups face in the contemporary American city. P/NP or letter grading.

**148. Economic Geography.** Lecture, three hours; reading period, one hour. Prerequisite: course 4 or upper division standing. Geographical aspects of economic production and growth. General theory of the space-economy. Land-use processes. Location of industry. Regional development. P/NP or letter grading.

**M149. Transportation Geography.** (Same as Urban Planning M149.) Prerequisite: course 3 or 4 or upper division standing. Study of geographical aspects of transportation, focusing on characteristics and functions of the various modes and on complexities of intra-urban transport.

**150. Urban Geography.** Lecture, three hours; reading period, one hour. Prerequisite: upper division standing or consent of instructor. Analysis of development, functions, spatial patterns, and geographic problems of American cities. P/NP or letter grading.

**151. Historical Geography of Cities.** Prerequisites: courses 3 and 4, or equivalent, or upper division standing. Survey of diffusion and growth of cities in Western civilization. Development of city systems and evolution of urban internal spatial structure.

**152. Cities of Europe.** Lecture, three hours; reading period, one hour. Designed for juniors/seniors. Urbanization of Europe, growth of city systems and internal spatial structure, functions, and geographic problems of contemporary European cities. Particular attention to historical development and landscapes of capital cities such as Rome, Paris, and Berlin. P/NP or letter grading.

**155. Industrial Location and Regional Development.** Lecture, three hours. Prerequisite: course 4 or Economics 1 or 2 or 5 or 11 or upper division standing. Reexamination of industrial location theory in light of contemporary theories of industrial organization and local labor markets. Consideration of empirical patterns of industrialization and regional growth, with special reference to Frostbelt/Sunbelt shifts and offshore relocation. P/NP or letter grading.

**156. Metropolitan Los Angeles.** Lecture, three hours; reading period, one hour. Prerequisite: upper division standing or consent of instructor. Study of origins, growth processes, internal structure and pattern, interactions, environmental and spatial problems of the Los Angeles metropolitan area. P/NP or letter grading.

**157. Models of Regional Growth and Change.** Lecture, three hours; reading period, one hour. Prerequisite: course 4. Recommended: course 40. Examination of empirical and theoretical issues of regional growth and change. Introduction to supply and demand-based models of regional development.

**159A-159E. Problems in Geography.** Discussion, three hours; reading period, one hour. Prerequisites: completion of three courses in a concentration, senior standing. Seminar course in which students carry out intensive research projects developed from courses within a concentration. P/NP or letter grading.

## Procedures

**160. Field and Laboratory Analysis in Geomorphology.** Laboratory/fieldwork, eight hours. Prerequisite: one course from 100, 101, 103, or 105, or consent of instructor. Limited to geography and environmental studies majors, with enrollment priority to seniors, then to juniors. Students must pre-enroll in department during prior term. Examination of field and laboratory procedures and intellectual concepts used in observation, measurement, analysis, and interpretation of landforms, constituent materials, and relevant processes. P/NP or letter grading.

**163. Field Analysis in Biogeography.** Fieldwork, eight hours. Prerequisites: courses 2, 5, 108, and 112, or consent of instructor. Examination of field procedures and intellectual concepts used in observation, measurement, analysis, and interpretation of phenomena pertinent to biogeography and interrelated human influences. P/NP or letter grading.

**166. Images of Earth: The World from Above.** Lecture, three hours. Use of maps, charts, diagrams, and other images to show how Earth has been represented through the ages, how they have been influenced by current ideas and, in turn, how they have themselves influenced the course of events. P/NP or letter grading.

**167. Cartography (6 units).** Lecture, two hours; laboratory, six hours; outside study, three hours. Prerequisites: three courses from 1 through 5. Limited to juniors/seniors. Survey of the field of cartography. Theory and construction of map projections, compilation procedures, principles of generalization, symbolization, terrain representation, lettering, drafting and scribing, and map reproduction methods. P/NP or letter grading.

**168. Introduction to Geographic Information Systems.** (Formerly numbered 170.) Lecture, two hours; laboratory, two hours; outside study, two hours. Designed for juniors/seniors. Introduction to basic geographic information systems (GIS) concepts and spatial analysis. Data structures, topology, and attribute information. Laboratory exercises use database query, manipulation, and spatial analysis to address "real world" problems. P/NP or letter grading.

**169. The Earth from Above.** Lecture, three hours; reading period, one hour. Prerequisites: courses 1, 2, 3, and 4, or consent of instructor or upper division standing. Interface between cartography and remote sensing. By means of a wide variety of imagery from maps and satellite photos, different landscapes analyzed and explained. P/NP or letter grading.

**170. Advanced Geographic Information Systems.** (Not the same as course 170 prior to Spring Quarter 1997.) Lecture, three hours; discussion, one hour. Requisite: course 168. Introduction to full geographic information systems (GIS) functionality, using ARC/INFO on UNIX workstations. Spatial manipulation, query, and computation of datasets carried out in project-oriented approach. P/NP or letter grading.

**171. Quantitative Analysis.** Lecture, three hours; laboratory, one hour. Prerequisite: course 40 or equivalent. Introduction to methods of measurement and interpretation of geographic distributions and associations. P/NP or letter grading.

**M178. Dating Techniques in Environmental Sciences and Archaeology.** (Same as Anthropology M116Q.) Lecture, three hours; reading period, one hour. Prerequisite: consent of instructor. Introduction to scientific dating methods such as radiocarbon dating, radiation damage methods, biological dating techniques, and magnetic dating, and applications in environmental sciences, archaeology, and physical anthropology.

## Regions

**180. North America.** Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Delimitation and analysis of principal geographic regions of the U.S. and Canada. P/NP or letter grading.

**181. Mexico, Central America, Caribbean.** Lecture, three hours; reading period, one hour. Prerequisite: upper division standing. Study of geographic factors, physical and cultural, that are basic to understanding the historical development of Middle America and the contemporary economic and cultural geography of Mexico and countries of Central America and the West Indies. P/NP or letter grading.

**182A. Spanish South America.** Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Study of geographic factors, physical and cultural, that are basic to understanding the historical development of Spanish South America and the contemporary economic and cultural geography of the individual Spanish-speaking countries. P/NP or letter grading.

**182B. Brazil.** Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Study of geographic factors, physical and cultural, that are basic to understanding the historical development of Portuguese South America and the contemporary economic and cultural geography of Brazil. P/NP or letter grading.

**183. Europe.** Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Study of geographic conditions and their relation to economic, social, and political problems in Europe. P/NP or letter grading.

**184. Russia.** Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Study of geographic conditions and their relation to economic, social, and political problems in Russia and former Soviet lands. P/NP or letter grading.

**185. South and Southeast Asia.** Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Regional synthesis with varying emphasis on the people of South or Southeast Asia in their physical, biotic, and cultural environment and its dynamic transformation. P/NP or letter grading.

**186. Contemporary China.** Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Systematic geographic analysis of elements of landscape, resources, population, and socioeconomic characteristics of the People's Republic of China. Dynamics that have led to China's major role in the East Asian and international scene, with special attention to China-Japan and Sino-American relations and their geographic bases. P/NP or letter grading.

**187. Middle East.** Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Analysis of economic, social, and political geography of the area extending from Iran to Morocco and from Turkey to Sudan. Emphasis on geographical themes and problems during historical and modern times. P/NP or letter grading.

**188. Northern Africa.** Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Analysis of economic, social, and political geography of the area including Mediterranean Africa, Sahara, Sudanic belt, and eastern Horn. Emphasis on geographical themes and problems during historical and modern times. P/NP or letter grading.

**189. Middle and Southern Africa.** Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Regions of Africa south of the Sahara (middle and southern Africa) in terms of physical features, human settlement, economic production, and political patterns. P/NP or letter grading.

**190. Australasia.** Lecture, three hours; discussion, one hour. Limited to juniors/seniors. Regional synthesis of physical and cultural features which characterize Australia, New Zealand, and the islands of the South Pacific. P/NP or letter grading.

**191. California.** Lecture, three hours; reading period, one hour. Limited to juniors/seniors. Systematic and regional treatment of geography of California, including physical, cultural, and economic aspects and detailed studies of the various regions. P/NP or letter grading.

## Special Studies

**199. Special Studies (2 to 8 units).** Hours to be arranged. Prerequisites: junior standing with a B average in the major or senior standing, consent of instructor.

**199HA-199HB. Honors in Geography I, II.** Hours to be arranged. Prerequisites: 3.25 GPA overall, at least five upper division geography courses with a 3.5 GPA.

**199HA.** Independent study course taught by two faculty members who assist student with bibliographic research and/or field research on a topic of mutual interest to student and the faculty members. Successful completion of course 199HA entails preparation of a detailed bibliography and outline (to be evaluated by the two faculty members) for writing of a substantial paper during course 199HB. If that work is determined to be of A quality, student is allowed to continue in honors program. If that work is graded B or below, credit is awarded, but student is not permitted to continue in honors program. **199HB.** Devoted to writing of substantial paper researched and outlined in course 199HA. It also is evaluated by the two faculty members. If paper is determined to be of A quality, student graduates with honors in geography. If paper is graded B or below, credit is awarded, but student does not receive honors.

**199I. Independent Studies for Internships (2 to 4 units).** Prerequisite: consent of instructor. Independent studies course to be supervised jointly by Field Studies Office and faculty adviser. Further supervision to be provided by placement for which student is doing internship. May not be applied toward major requirements. P/NP grading.

## Graduate Courses

### Environment

**200. History and Paradigms of Geomorphology.** Lecture, two hours; discussion, one hour; reading period, eight hours. Prerequisites: course 100, two courses from 101, 103, 105, 106, 107. Analysis of geomorphic theories since the scientific revolution, with emphasis on catastrophism, uniformitarianism, glacial theories, isostasy and eustasy, evolution and cyclicity, thermodynamics and mechanics, quantification, and current paradigms. View of each theme in its contemporary milieu.

**201. Coastal Geomorphology Seminar.** Discussion, three hours; reading period, five hours; fieldwork. Prerequisites: courses 100, 101. Discussion of selected topics pertaining to geomorphic processes and responses observable in the coastal zone. May be repeated for credit.

**202. Fluvial Geomorphology Seminar.** Discussion, three hours; reading period, five hours; fieldwork. Prerequisites: courses 100 and 105, or Civil Engineering 150. Discussion of selected topics pertaining to action of running water in shaping the physical landscape. May be repeated for credit.

**203. Glacial Geomorphology Seminar.** Discussion, three hours; reading period, five hours; fieldwork. Prerequisites: courses 100, 103. Discussion of selected topics pertaining to action of snow and ice in arctic and alpine environments. May be repeated for credit.

**204A-204B-204C. Advanced Climatology.** Lecture, three hours; laboratory, one hour. Prerequisites: course 104, first year of calculus, and acquaintance with FORTRAN IV, or consent of instructor. Courses must be taken in sequence. Introduction to tools and concepts of environmental physics of relevance to natural and man-made landscapes. Such basic intellectual, mathematical, and computer programming tools are of special concern to physical geographers, ecologists, and architects.

**205. Seminar: Climatology.** Discussion, three hours; reading period, one hour. Prerequisites: courses 204A-204B-204C or equivalent, consent of instructor. Selected topics. May be repeated for credit.

**208. Advanced Biogeography: Plants.** Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: courses 108 and 110 or 116, or equivalent, or consent of instructor. Intensive review and analysis of physical and cultural factors influencing plant distributions.

**212. Advanced Biogeography: Animals.** Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course 112 or 117 or equivalent or consent of instructor. Intensive review and analysis of biophysical and cultural factors influencing animal distributions.

**213. Seminar: Biogeography.** Discussion, three hours; reading period, two hours. Prerequisites: course 208 or 212 or equivalent, consent of instructor. Related research projects growing out of course 208 or 212. May be repeated for credit.

**215. Quaternary Studies: Physical Aspects.** Discussion, three hours; reading period, two hours; fieldwork, three hours. Prerequisite: at least one course from 200 through 205 or an appropriate graduate course in atmospheric sciences or Earth and space sciences. Analysis of the changing physical environment of the Quaternary period. May be repeated for credit.

**217. Quaternary Studies: Ecological Aspects.** Discussion, three hours; reading period, two hours. Prerequisites: courses 202 or 204A-204B-204C or 208 or 212 or an appropriate graduate course in anthropology, botany, Earth and space sciences, or zoology, or consent of instructor. Analysis of ecological aspects of environmental change during the Quaternary period. May be repeated for credit.

**218. Advanced Medical Geography.** Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course 118 or consent of instructor. In-depth study of selected topics in medical geography and intense review of recent research.

**223. Seminar: Humid Tropics.** Seminar, three hours; reading period, two hours. Prerequisite: graduate standing. Selected topics. Biophysical and cultural complexes of the humid tropics, with emphasis on problems related to human settlement and livelihood. May be repeated for credit. S/U or letter grading.

**227. Water Quality Management.** Discussion, three hours; reading period, one hour. Prerequisites: graduate standing, consent of instructor. Discussion of basic technical, regional planning, and public policy issues in water quality management.

**M229. Resource-Based Development Issues: First World and Third World — Environmental Issues and Processes.** (Formerly numbered 229.) (Same as Urban Planning M267A.) Discussion, three hours. Recommended (but not requisite): Urban Planning 266. Some major issues associated with development of specific natural resources. Topics include nature of particular resource (or region associated with it), its previous management, involvement of the state, corporations, and local groups, and environmental and social impact of its development.

## Human Geography

**230. Political Ecology.** Seminar, three hours; reading period, three hours. Prerequisite: graduate standing or consent of instructor. Exploration of theoretical constructs and approaches to analyses of development and the environment associated with political ecology. Examination of relations between poverty, ecological degradation, and global restructuring. Case studies of changing production organization and ecology of land-use patterns within different and emergent economic and political contexts. S/U or letter grading.

**231. Terminology and Theory in Political Economy: Deconstruction and Reconstruction of Approaches in Research, Writing, and Practice.** Discussion, three hours; reading period, three hours. Prerequisite: graduate standing or consent of instructor. Deconstruction of oft-used terms in intellectual discourse with goal of making assumptions more explicit, analysis more concise, and use of theory to inform practice (and vice versa) more successful. Attempt to reconstruct a more concise and useful terminology to inform theoretical inquiry and research practice. S/U or letter grading.

**232. Advanced Cultural Geography.** Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: course 133 or equivalent or consent of instructor. Lectures and discussions around specific aspects of development of cultural landscape in different geographic environments.

**233. Seminar: Cultural Geography.** Discussion, three hours; reading period, two hours. Prerequisites: course 232 or 236 or equivalent, consent of instructor. Discussions on particular topics in cultural geography. Content may vary from year to year. May be repeated for credit.

**234. Environment and Subsistence in Indigenous Cultures.** Seminar, three hours. Discussion on resource management strategies and environmental issues in indigenous cultures. Topics vary from year to year.

**236. Advanced Historical Geography of the U.S.** Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisites: course 136, consent of instructor. Some major themes in American historical geography.

**237. Seminar: Historical Geography.** Discussion, three hours; reading period, two hours. Prerequisites: course 236, consent of instructor. Theory and practice of historical geography in North America and Europe. May be repeated for credit.

**240. Advanced Political Geography: Geopolitics.** Lecture, two hours; discussion, one hour; reading period, one hour. Intensive study of theories and principles of geopolitics. Selected regions used as examples of differing techniques of study in geopolitics. S/U or letter grading.

**241. Seminar: Political Geography.** Discussion, three hours; reading period, two hours. Prerequisites: course 240 or equivalent, consent of instructor. Related research projects growing out of course 240. May be repeated for credit.

**242. Advanced Population Geography.** Lecture, three hours; reading period, one hour. Prerequisite: course 142 or equivalent or consent of instructor. Study of population dynamics and migration, spatial variation in population composition, and population resource problems, diffusion, and epidemiology.

**248. Location and Space Economy.** Lecture, two hours; discussion, one hour; reading period, one hour. Methods of locational analysis as applied to problems of regional growth and development. S/U or letter grading.

**249. Seminar: Economic Geography.** Discussion, three hours; reading period, two hours. Prerequisites: course 248 or equivalent, consent of instructor. Related research projects growing out of course 248. May be repeated for credit.

**250. Urban Systems.** Lecture, two hours; discussion, one hour; reading period, one hour. General study of hierarchy of urban places, including diffusion within urban hierarchy and theories to account for location and size distribution of cities. S/U or letter grading.

**251. Seminar: Urban Geography.** Discussion, three hours; reading period, two hours. Prerequisites: course 250 or equivalent, consent of instructor. Related research projects growing out of course 250. May be repeated for credit.

**252. Location and Social Structure within the City.** Lecture, two hours; discussion, one hour; reading period, one hour. Study of links between urban social and urban spatial structure, emphasizing urban residential land use, social areas of the city, and accessibility and urban form. S/U or letter grading.

**254. Migration and Residential Mobility.** Lecture, two hours; discussion, one hour; reading period, one hour. Prerequisite: consent of instructor. Description and modeling of national, regional, and intra-urban migration.

## Procedures

**260. Advanced Field and Laboratory Analysis in Geomorphology.** Laboratory/fieldwork, 10 hours. Prerequisites: graduate standing, two courses from 200, 201, 202, 203, 215. Examination of advanced field and laboratory procedures used in contemporary geomorphic research, with emphasis on scientific design, instrumentation, and data evaluation.

**261. Advanced Field Analysis: Cultural Geography (8 units).** Fieldwork, once a week from 8 to 5. Prerequisites: one or more courses from 232, 233, 250, 251. Field methods and analysis applied to the cultural landscape, especially in Southern California, with particular reference to settlement, agriculture, and environmental modification.

**262. Advanced Field Analysis: Biogeography (8 units).** Fieldwork, 10 hours. Prerequisite: consent of instructor. Observation, measurement, and analysis of biogeographic phenomena, including identification and evaluation of biotic populations and communities and their modifications resulting from the impact of human activity.

**265. Geographical Bibliography.** Lecture, one hour; discussion, two hours; reading period, one hour. Prerequisite: consent of instructor. Survey of the literature of geography, with special reference to periodicals. Intended for beginning graduate students.

**267. Advanced Cartography.** Laboratory, three hours; independent study, two hours. Prerequisite: course 167 or equivalent or consent of instructor. Advanced work in theory and practical application of modern cartographic principles. Special emphasis on terrain representation, quantitative and computer mapping, scribing, color separation, and reproduction of maps.

**268. Advanced Projects in Geographic Information Systems (GIS)/Remote Sensing.** Discussion, one hour; laboratory, three hours. Recommended prerequisite: course 169 or 170 or Earth and Space Sciences 150. Familiarity with a GIS or image processing package expected. Individualized research projects conducted on UNIX platforms within a structured course environment. All aspects of a modest but original project, including data acquisition, ingestion, and analysis; interpretation of results and presentation in publication-style format.

**269. Remote Sensing of Environment.** Laboratory, three hours; independent study, two hours. Prerequisite: course 167 or equivalent or consent of instructor. Study of aerial photographs and other remote sensing images as tools for geographical research. Particular attention to analysis of landscapes and interpretation of interrelationships of individual features in their physical and cultural complex.

**M270A-M270B-M270C. Seminars: Climate Dynamics (2 to 4 units each).** (Same as Atmospheric Sciences M272A-M272B-M272C and Earth and Space Sciences M270A-M270B-M270C.) Seminar, two hours. Prerequisite: consent of instructor. Archaeological, geochemical, micropaleontological, and stratigraphic evidence for climate change throughout the geological past. Rheology and dynamics of climatic subsystems: atmosphere and oceans, ice sheets and marine ice, lithosphere and mantle. Climate of other planets. Modeling, simulation, and prediction of modern climate on monthly, seasonal, and interannual time scale. May be repeated for credit. S/U or letter grading.

**M272. Spatial Statistics.** (Same as Urban Planning M215.) Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisite: consent of instructor. Specific techniques useful in analysis of spatial data and modeling of spatial distributions.

**273. Seminar: Model Building for Spatial Analysis.** Discussion, three hours. Prerequisite: consent of instructor. Discussions of philosophy and methodology of model building, with emphasis on problems unique to models of spatial structure. Individual research topics. May be repeated for credit.

**M278. Dating Techniques in Environmental Sciences and Archaeology.** (Same as Anthropology M216.) Lecture, three hours. Prerequisite: consent of instructor. Colloquium devoted to topics in dating techniques in environmental sciences, archaeology, and biological anthropology, as well as laboratory instruction and experimental work. May be repeated for credit.

## Regions

Courses 280 through 291 may be repeated for credit (lecture, two hours; discussion, two hours).

**280. North America.** Prerequisite: course 180 or consent of instructor.

**281. Middle America.** Prerequisites: course 181, consent of instructor.

**282. South America.** Prerequisites: course 182A or 182B, consent of instructor.

**283. Europe.** Prerequisites: course 183, consent of instructor.

**284. Soviet Union.** Prerequisites: course 184, consent of instructor.

**285. South and Southeast Asia.** Prerequisites: course 185, consent of instructor.

**286. Geography of Contemporary China.** Seminar, three hours; reading period, two hours. Prerequisite: graduate standing or consent of instructor. S/U or letter grading.

**287. Middle East.** Prerequisites: course 187, consent of instructor.

**288. Northern Africa.** Prerequisites: course 188, consent of instructor.

**289. Middle and Southern Africa.** Prerequisites: course 189, consent of instructor.

**290. Australasia.** Prerequisites: course 190, consent of instructor.

**291. Arid Lands.** Prerequisites: courses 104, 106, 108, 116, 120, 148, or equivalent, consent of instructor. Investigation of physical and cultural complexes of the world's arid regions. Salient factors include climate, landforms, water, soils, natural vegetation, and various aspects of human occupation, including future possibilities for human utilization.

**292. Advanced Regional Geography: Selected Regions.** Lecture, three hours; discussion, one hour. Prerequisite: appropriate upper division regional course. Lecture series devoted to a specific region at discretion of instructor. May be repeated for credit.

## Seminar

**295. Seminar: Geographic Thought.** Discussion, three hours; reading period, two hours. Prerequisites: graduate standing, consent of instructor. Discussion and study of topics significant to growth of modern philosophy of geography.

## Core Courses

**298A. Philosophical Issues in Geographical Inquiry.** Lecture, three hours. Prerequisite: consent of instructor. Discussion of geographical research within context of philosophical debates concerning the nature of scientific inquiry.

**298B. History of Modern Geography.** Lecture, three hours; reading period, one hour. Prerequisite: consent of instructor. Evolution of the field of geography in the 19th and 20th centuries, with emphasis on professionalization of geography and its emergence as a modern academic discipline.

**298C. Statistical Methods for Geographic Research.** Lecture, three hours; laboratory, two hours. Prerequisite: course 171 or equivalent. Use of linear models, discriminant functions, and factor analysis to analyze problems in geography.

## Special Studies

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching College Geography (2 units).** Discussion, one hour; laboratory, three hours. Prerequisite: consent of instructor. Classroom practice in teaching, with individual and group instruction on related educational methods, materials, and evaluation. May be repeated for credit. S/U grading.

**596. Directed Individual Study or Research (2 to 8 units).** Prerequisite: consent of instructor. May be repeated for credit. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations (2 to 8 units).** Prerequisite: consent of instructor. Independent study. May be repeated for credit. S/U grading.

**598. Research for and Preparation of M.A. Thesis (2 to 8 units).** Prerequisite: consent of instructor. Independent study. May be repeated for credit. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation (2 to 8 units).** Prerequisite: consent of instructor. Independent study.

Carl W. Hagge, Ph.D.  
Victor A. Oswald, Jr., Ph.D.  
Donald J. Ward, Ph.D.  
Terence H. Wilbur, Ph.D.

## Associate Professor

Jill Anne Kowalik, Ph.D. (*German*)

## Assistant Professor

Christopher M. Stevens, Ph.D. (*Germanic Linguistics  
and Philology*)

## Lecturer

Jutta Landa, Ph.D. (*German*)

## Scope and Objectives

The Department of Germanic Languages offers an extraordinary scope of Germanic languages and literatures, including philology, linguistics, and folklore. This broad range of studies offers training in specialized fields, in addition to providing strong background in the literary and cultural traditions. The courses of instruction are designed to enable students to become effective teachers and productive scholars in either German or Germanic languages and literatures, including Germanic folklore, Hungarian, and Finnish.

Undergraduate majors in both German and Scandinavian languages lead to Bachelor of Arts degrees. The graduate program offers Master of Arts degrees in Germanic Languages and in Scandinavian and a Ph.D. in Germanic Languages, with a variety of specialized fields available. The department also offers courses in Afrikaans, Dutch, Hungarian, Old Norse studies, and Yiddish.

## Undergraduate Study

### Bachelor of Arts in German

Three plans are offered by the department:

### Plan A: Language and Literature

Plan A is comprised of lower division courses in the German language and upper division courses in German language, linguistics, literature, civilization, and folklore. While the nucleus of the undergraduate program consists of training in language and literature, students majoring in German are prepared for a wide range of graduate studies and activities in related fields.

#### Preparation for the Major

German 1, 2, 3, 4, 5, 6, or equivalent. Students who have completed two semesters of college-level German language courses should enroll in course 4. Placement examinations may be given in instances where the proper level is difficult to determine. Native speakers of German must consult the undergraduate adviser. For additional information, all students are encouraged to contact the undergraduate adviser.

#### The Major

Thirteen upper division German courses as follows: German 108A-108B; one course from 100A, 100B, or 100C; one course from 129, 137, or C138; five courses from 101A, 101B, 101C, 104, 105, 106, 107, 121A, 121E, 122, 123, 124, 126, 127, 132; two departmental electives (any upper division courses not taken to satisfy another requirement); two additional electives in the humanities (any upper division courses in the humanities division, although courses in Germanic languages are recommended). Native speakers of German should consult the undergraduate adviser before enrolling in course 108A, 108B, or 128. German majors, especially those who wish to pursue graduate studies in German, are encouraged to enroll in courses in German history and philosophy in those respective departments and are strongly urged to acquire reading knowledge of French.

### Plan B: German Studies/German Studies with European Studies Emphasis

Plan B is comprised of lower division courses in the German language and upper division courses in German language, linguistics, literature, folklore, and one allied field such as history, musicology, or philosophy. If the allied field is in art history or political science, where not enough courses with a German focus are offered, the emphasis is on European studies. While the majority of courses are in language and literature, students majoring in Plan B are prepared for a wide range of graduate studies, including the allied field, with emphasis on interdisciplinary studies.

#### Preparation for the Major

German 1, 2, 3, 4, 5, 6, or equivalent. Students who have completed two semesters of college-level German language courses should enroll in German 4. Placement examinations may be given in instances where the proper level is difficult to determine. Native speakers of German must consult the undergraduate adviser. For additional information, all students are encour-

aged to contact the undergraduate adviser. All German studies allied fields and those with a European studies emphasis should be identified and confirmed by the undergraduate adviser in writing *before* the major is declared.

#### The Major

Nine upper division German courses (Group I — two courses from German 102, 108A, 108B, 128, 129, 137; Group II — two courses from 104, 105, 106, 107, 130; Group III — three courses from 100A, 100B, 100C, 121A through 121E, 134; Group IV — two courses from 122, 123, 124, 126, 127, 132) and four upper division allied field courses selected from History 125B through 125F, 126A through 126E, 129A, 129B, 129C, 135A, 135B, 191E through 191G or Musicology 126A, 126B, 126C, C127A through C127F, 133, 134, 135A, 135B, 135C, 188A through 188F, 189 or Philosophy 100C, C110, C111, 115, 116, 117, 177A, 177B, 178, 189. For the European studies emphasis, the four upper division allied field courses should be selected from Art History 105A through 105F, 109B, 109C, 110A through 110D or Geography 183, Political Science 116, 123A, 123B, 127A, 127B, 129, 152C, 153A, 153B, 155 or from allied fields such as Dutch, English, French, Hungarian, Spanish, Yiddish, etc. Plan B majors who wish to pursue graduate studies are strongly urged to acquire reading knowledge of French. A term or more of study/work-study/internship experience in a German-speaking country or the country of the European studies emphasis is highly recommended.

### Plan C: Germanic Languages

Plan C is intended for students primarily interested in Germanic languages and linguistics and is designed for those who wish to pursue graduate work in Germanic, general, applied, historical, or Indo-European linguistics. Students who wish to pursue graduate work in German literature should select Plan A rather than this plan.

#### Preparation for the Major

German 1, 2, 3, 4, 5, 6, Linguistics 20, and five terms of a second Germanic language or three terms of a second Germanic language and two or three terms of a third. Relevant languages include any Germanic language (two terms of Hungarian may be applied by petition to the undergraduate adviser). Students who have completed two semesters of college-level German language courses should enroll in course 4. Placement examinations may be given in instances where the proper level is difficult to determine. Native speakers of German must consult the undergraduate adviser. For additional information, all students are encouraged to contact the undergraduate adviser.

#### The Major

Thirteen upper division courses, including German 108A-108B, 129, 137, C138, four German literature or linguistics elective courses, and four linguistics elective courses from another department (e.g., Linguistics 103, 110, 120A,

120B, 127, 170; courses in departments other than Linguistics may be applied by petition to the undergraduate adviser).

## Honors Program

To qualify for graduation with departmental honors, students must earn a cumulative grade-point average of 3.6 or better in upper division German courses and a 3.3 overall GPA, and complete German 195 with a grade of A. Contact the departmental honors adviser for procedures, special arrangements, possible exceptions, and other information.

## Instructional Credential in German

Students desiring the general secondary instructional credential in German should consult the Graduate School of Education and Information Studies, 1009 Moore Hall (310-825-8328), and the Department of Germanic Languages.

## German Minor

To enter the German minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Courses:* German 5 and 6 or equivalent.

*Required Upper Division Courses:* Any five German courses (excluding German literature in translation).

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Germanic Languages Minor

To enter the Germanic languages minor, students must have an overall grade-point average of 2.0 or better.

*Required Upper Division Courses:* Seven courses in any of the following languages and literatures: Afrikaans, Dutch, German (excluding German literature in translation), Hungarian, Old Norse, Scandinavian languages, Yiddish.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

A bachelor's degree in German, Germanic linguistics, or Linguistics with a minor in German and a minimum grade-point average of 3.0 from an accredited U.S. institution or the equivalent is required for admission to the Master of Art degree in Germanic Languages. Applicants with deficiencies in undergraduate preparation may be admitted but are required to take remedial courses, as recommended by the graduate adviser. Three letters of recommendation are required. Graduate Record Examination (GRE) scores are required from applicants from the U.S. and other English-speaking countries.

### Areas of Study

There are four M.A. plans that differ with respect to course requirements and comprehensive examinations. Plan A is for students who plan to terminate their studies with the M.A. and an instructional credential. Plan B is for students whose main interests are literary and linguistic rather than pedagogical and for students who plan to proceed toward the Ph.D. Plan C is for students with main interests in German studies who plan to terminate their studies with the M.A. Plan D is for students whose main interests are in Germanic linguistics who plan to proceed toward the Ph.D.

### Course Requirements

Plan A requires a minimum of nine upper division and graduate courses, of which at least six courses must be graduate level (200 or 500 series). In addition, German 128, 129 (or equivalent), and 370 are required. Undergraduate credit for these courses is applicable in satisfaction of these requirements.

Plan B requires a minimum of nine upper division and graduate courses, of which at least six courses must be graduate level (200 or 500 series). One seminar must be included.

Plan C requires a minimum of nine upper division and graduate courses (at least six must be graduate courses), with six in the major field (German) and three in a related field such as history, musicology, philosophy, or political science. All related field courses must be in the 200 series. One major field and one related field seminar must be included.

Plan D requires a minimum of nine upper division and graduate courses beyond the language requirements, of which at least six courses must be graduate level (200 or 500 series) and of which up to four courses may be from other departments in a relevant area (e.g., linguistics, applied linguistics, Indo-European linguistics, Romance linguistics). German 217, C238, and one seminar must be included. Half of the coursework should be in synchronic linguistics and half in diachronic linguistics. All coursework must be approved in advance by the graduate adviser.

German 596, 597, and 598 are graded S/U. Course 596 may be taken only twice during graduate study (M.A. and Ph.D. programs.). Course 597 may be taken once before the M.A. degree; course 598 may be taken once. A maximum of two 500-series courses may be applied to the course requirements. However, if course 596 is taken twice before the M.A., it may not be applied to the eight graduate courses required after completion of the M.A. Graduate students are expected to attend and participate in departmental lectures and colloquia.

### Comprehensive Examination Plan

Examinations are offered each quarter, beginning with the written part during the fifth week of each quarter. Under exceptional circumstances, the chair of the department will receive petitions for M.A. examinations during the summer recess.

One examination committee is appointed for each quarter. The members of the committee administer the written and oral examinations.

For Plans A and B there are three examinations with the following structures:

*One four-hour written examination.* Three areas of study are required. A two-hour examination is required for the primary area. Two additional areas of study are chosen from those listed below. A one-hour examination is required for each of the two areas.

For Plan A, students must choose history and structure of Germanic languages as one area of study. Students who choose German literature after 1600 are advised to choose the German literature before 1600 and history and structure of Germanic languages area as well. Students who choose only the areas of history and structure of Germanic languages and German literature after 1600 must take German 202A and 202B.

- (1) German literature before 1600
- (2) History and structure of Germanic languages
- (3) German literature after 1600
- (4) Dutch and Afrikaans
- (5) Old Norse studies
- (6) Yiddish
- (7) Folklore
- (8) Hungarian

*Bibliography Question.* On the Monday following the completion of the written examinations, a bibliography take-home question is given out that is based on the primary concentration. The question is to be completed and returned no later than the following Monday.

*A one-hour oral examination.* A one-hour oral examination follows in the week in which the bibliography question is returned.

For Plan C, students submit two essays of approximately 10,000 words in the major field of German Studies, and 7,500 words in the extra-

departmental related field, written under the guidance of a three-member faculty committee, one of whose members must be from another department. After satisfactorily completing the essays, students must pass a one-hour oral examination that has a comprehensive component as well as testing the student in the fields represented by both essays.

For Plan D, the M.A. examination consists of three written examinations of two hours each, followed by a one-hour oral examination. Students are examined in the following areas: one examination on the history of Germanic languages, theory, and historical linguistics; one examination on the structure of Germanic languages, theory, and synchronic linguistics; one examination on languages and dialects. Students may select one modern language, one philological language, and a third language of their choice. This examination includes translation and parsing. To continue toward the Ph.D., the student must receive a pass with the recommendation to continue.

After the written examinations have been taken, the M.A. committee decides whether the student may proceed to the oral examination. If the student fails the oral examination, the M.A. committee decides whether the entire examination must be repeated or only the oral portion. The examination may be repeated only once without petition.

If the student applies for the M.A. under Plan B (to proceed toward the Ph.D.) and is awarded a terminal M.A., the examinations may be repeated if the student chooses not to have the M.A. degree officially awarded before the reexamination.

## Thesis Plan

In lieu of the written examination requirement for Plans A, B, and D, students may submit a thesis to the department. Students in Plan B who elect to submit a thesis must, however, complete a two-hour oral examination in the area of their thesis as well as in two other areas of concentration in order to be approved for further doctoral study. Students in Plan D who elect the thesis option are required to take one two-hour written examination in addition to the thesis.

The following additional rules apply to the thesis option:

(1) The thesis committee must consist of three members, one of whom serves as director. The student selects the director, and the other two members are appointed by the chair in consultation with the student.

(2) No committee member from outside the department is required, except in the case of Plan C. For this plan, one member must be from the related field.

(3) The thesis committee should be established no later than the end of the fourth quarter of the candidate's graduate studies. At that time, the thesis committee must approve the

plan for the thesis in writing and submit a copy to the graduate adviser.

(4) No 598 course is required, although students may take one such course in preparation for the degree.

(5) Candidates who fail the examination may repeat it once without petitioning the department. The examination must be repeated no later than one quarter following the quarter in which the first examination was failed.

(6) The *Schedule of Classes* specifies the date for filing of the final draft of a thesis with the student's committee and the date on which revised and completed theses may be filed with the University. The examinations must be taken prior to date on which revised and completed theses may be filed with the University.

## Doctoral Degree

### Admission

An M.A. degree in German or a Germanic language from an accredited U.S. institution or equivalent (e.g., *Staatsexamen* in German) is required. In case of significant deficiencies in prior training, the graduate advisers make appropriate study or course recommendations. All deficiencies must be removed prior to application for admission to candidacy for the qualifying examinations. Applicants with an M.A. in fields other than German (e.g., in Comparative Literature or in Linguistics) are required to pass the written part of the M.A. comprehensive examination within three quarters after admission to the department. Three letters of recommendation are also required.

### Major Fields or Subdisciplines

Not applicable.

### Course Requirements

Students must have completed eight graduate courses (at least four in the Department of Germanic Languages) beyond the M.A. degree, three of which must be seminars. If students have already taken a seminar in preparation for their M.A. degree, only two of these eight courses must be seminars.

### Written and Oral Qualifying Examinations

Students must (1) pass the graduate reading examination in French; (2) pass a departmental reading examination either in a modern Scandinavian language or in Dutch-Flemish, Afrikaans, Latin, or in Yiddish (or an approved substitute language); (3) successfully complete three seminars; (4) pass the qualifying examinations. Written examination may be repeated in case of failure. The faculty must decide whether students who fail the examination twice may be permitted another repeat.

The written examinations may be taken any time after admission to the doctoral program and fulfillment of all prerequisite requirements. The written qualifying examinations consist of six hours of total examination time. Students in

literature are expected to cover six different areas: one author, one genre, one period, one theoretical or historical problem, and two special topics of their choosing. Students in linguistics complete a three-hour examination in five target languages, and a second three-hour examination in linguistic theory. Students in Old Norse are examined for two hours in language, two hours in theoretical problems of interpretation, and two hours on issues concerning social and historical context.

After the student has completed the written examinations successfully, the chair of the guidance committee schedules the University Oral Qualifying Examination to be administered by the doctoral committee as soon as possible after completion of the written examinations.

## German

### Lower Division Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition. Students with demonstrated preparation may be permitted to transfer to a more advanced course with consent of the instructor.

**1. Elementary German.** Lecture, five hours; laboratory, one hour; outside study, five hours minimum. P/NP or letter grading.

**1G. Elementary German for graduate students.** Preparation for Graduate Division foreign language reading requirement. May not be applied toward degree requirements. S/U grading.

**2. Elementary German.** Lecture, five hours; laboratory, one hour; outside study, five hours minimum. Enforced requisite: course 1. P/NP or letter grading.

**2G. Elementary German for Graduate Students.** Preparation for Graduate Division foreign language reading requirement. May not be applied toward degree requirements. S/U grading.

**3. Elementary German.** Lecture, five hours; laboratory, one hour; outside study, five hours minimum. Enforced requisite: course 2. P/NP or letter grading.

**4. Intermediate German.** Lecture, five hours; laboratory, one hour; outside study, five hours minimum. Enforced requisite: course 3. P/NP or letter grading.

**5. Intermediate German.** Lecture, four hours; laboratory, one hour; outside study, four hours. Enforced requisite: course 4. P/NP or letter grading.

**6. Intermediate German.** Lecture, four hours; laboratory, one hour; outside study, four hours minimum. Enforced requisite: course 5. P/NP or letter grading.

**8. Elementary German: Intensive (12 units).** Lecture, 15 hours; laboratory, five hours; outside study, 16 hours. Intensive basic course in German equivalent to courses 1, 2, and 3. P/NP or letter grading.

**10. Intermediate German: Intensive (12 units).** Lecture, 20 hours; laboratory, four hours. Enforced requisite: course 3. Intensive intermediate course in German equivalent to courses 4, 5, and 6. P/NP or letter grading.

**12. German Conversation (2 units).** Enforced requisite: course 1. Use of German language teaching films; students have opportunity to practice spoken German in small groups.

**14. Intermediate Conversation (2 units).** Enforced requisite: course 3. Students have opportunity to practice spoken German in small groups.

**50A-50B. Masterworks of German Literature in Translation.** Lecture, three hours. May not be applied toward completion of the major in German:

**50A. Medieval Period through Classicism.** Study and analysis of selected masterworks in English translation, including works from the earliest period, such as the heroic and courtly epic, to authors such as Grimmelshausen, Lessing, Schiller, and Goethe.

**50B. Romanticism to the Present.** Study and analysis of selected masterworks in English translation, including authors such as E.T.A. Hoffmann, Heine, Fontane, Rilke, Kafka, Brecht, Thomas Mann, Hesse, Grass, Böll, and Christa Wolf.

**51. Masterworks of Germanic or East Central European Literatures in English Translation.** Lecture, three hours. Study and analysis of masterworks of Germanic or East Central European literatures (Dutch and Afrikaans, Hungarian, Old Norse, or Yiddish). Examination of one particular literature per term.

**88. Lower Division Seminar.** Discussion, three hours. Course of variable content limited to topics of current interest and offered whenever a staff member is available.

## Upper Division Courses

Requisite for all upper division courses (except 100A, 100B, 100C, 119A through M119H, 121A, 121B, 121C) is course 6 or equivalent or consent of instructor.

Courses in the German 119 literature series may not be applied toward completion of the major in German.

### Courses Open to Majors and Nonmajors

No credit is given to graduate students in German

**100A. German Civilization and Culture before 1700.** Lecture, three hours; discussion, one hour; outside study, five hours minimum. Lectures, discussions, and readings in English; knowledge of German not required. Study of development of German civilization and institutions from earliest times to 1700. Study of German culture as represented in its literature, art, music, and architecture. P/NP or letter grading.

**100B. Modern German Civilization and Culture from 1700 to 1919.** Lecture, three hours; discussion, one hour; outside study, five hours minimum. Lectures, discussions, and readings in English; knowledge of German not required. Study of development of German civilization and institutions from 1700 to 1919. Study of German culture as represented in its literature, art, music, and architecture. P/NP or letter grading.

**100C. German Civilization and Culture in the 20th Century.** Lecture, three hours; discussion, one hour; outside study, five hours minimum. Lectures, discussions, and readings in English; knowledge of German not required. Study of development of German culture and institutions from 1919 to the present, emphasizing developments in literature, arts, and architecture. P/NP or letter grading.

**101A. Introduction to German Poetry.** Close analysis of representative examples of German lyric poetry from early as well as modern literary periods, including systematic consideration of poetic conventions and forms, diction, tone, imagery, symbolism, and metrics. Course should be taken at beginning of literary studies.

**101B. Introduction to German Drama.** Analysis of selected examples of drama (e.g., tragedy, comedy, one-act play, lyric drama, lyric theater, etc.), including systematic introduction to dramatic forms, techniques, and theories. Texts selected from modern literature as well as from other periods. Course should be taken at beginning of literary studies.

**101C. Introduction to German Narrative Prose.** Analysis of significant examples of narrative prose (e.g., short story, novella, novel, fairy tale, etc.), including systematic introduction to narrative forms, techniques, styles. Texts selected from modern literature as well as from older periods. Course should be taken at beginning of literary studies.

**102. Business German.** Lecture, three hours. Prerequisite: course 6 or equivalent. Introduction to business terminology and correspondence. Topics include economic and political developments and principles of business in German-speaking countries.

**103. German Translation.** Prerequisite: course 108B with a grade of B or better or consent of instructors. German/English and English/German translation of literary texts, newspaper and magazine articles, business documents, and letters.

**104. Introduction to German Enlightenment, Sturm und Drang, and Classicism.** Lecture, three hours. Reading and discussion of representative works by Lessing, Goethe, and Schiller; their historical and social background, their relationship to music (Bach, Mozart) and philosophy (Leibniz, Kant), as well as their place in the history of ideas.

**105. Introduction to German Literature from Romanticism to Realism.** Lecture, three hours. Reading and analysis of selected works from Romanticism to realism.

**106. Introduction to Modern Literature.** Analysis of selected works of the period from 1890 to 1945.

**107. Introduction to Contemporary Literature.** Analysis of selected works of the period from 1945 to the present time.

**108A-108B. Conversation and Composition on Contemporary German Culture and Society I, II.** Lecture, three hours. Prerequisite: course 6 or equivalent. Course 108A or equivalent is prerequisite to 108B. Advanced language courses, with focus on speaking and writing proficiency through themes connected with contemporary German culture and society.

### Courses Not Open for Credit to Majors or Graduate Students in German

**119A. German Literature in the Age of Chivalry, in English Translation.** Lecture, three hours. Study and analysis of literary monuments in English translation in their social and cultural settings, including courtly love lyrics, Arthurian epics, and heroic epics. May not be applied toward completion of the major in German.

**119B. Weimar Classicism and Its Influence, in English Translation.** Lecture, three hours. Study and analysis of works in English translation from the classic age of German literature and concentrating on major works of Lessing, Goethe, and Schiller and their reflection in the modern period. May not be applied toward completion of the major in German.

**119C. The Faust Tradition from the Renaissance to the Modern Age, in English Translation.** Lecture, three hours. Readings and discussions in English of the Faust theme and tradition in European literature and intellectual history, including chapbook of *Doktor Faustus*, Christopher Marlowe's and Goethe's Faust dramas, and Bulgakow, as well as Thomas Mann's novel, *Doktor Faustus: The Life of the German Composer Adrian Leverkühn*. May not be applied toward completion of the major in German.

**119D. Romantic Heritage in German Literature, in English Translation.** Lecture, three hours. Study and analysis of literary works in English translation that reflect German Romantic imagination from end of the 18th century into the 20th century. May not be applied toward completion of the major in German.

**119E. Pattern and Chaos: Modern German Literature and Thought, in English Translation.** Lecture, three hours. Selected works in English translation of German authors, poets, and thinkers from the late 19th through the 20th century, such as Nietzsche, Thomas Mann, Kafka, Brecht, Grass, and Christa Wolf. Topics vary from term to term. May not be applied toward completion of the major in German. May be repeated for credit.

**119F. From Dream to Nightmare: The German-Jewish Experience, in English Translation.** Lecture, three hours. Study and analysis of works in English translation reflecting the process of German-Jewish assimilation and disenfranchisement, including authors such as Mendelssohn, Heine, Schnitzler, Kafka, Feuchtwanger, Anne Frank, Sachs, Celan, and Becker.

**M119G. Interwar Central European Prose.** (Same as Comparative Literature M162 and Slavic M125.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative authors of the 1920s and 1930s in translation. Special attention to relation between literature and historical and ethnic concerns. P/NP or letter grading.

**M119H. Postwar Central European Prose.** (Same as Comparative Literature M166 and Slavic M126.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative contemporary authors in translation. Special attention to relation between art and ideology. P/NP or letter grading.

**M119I. Fairy Tales in Literature and Society (5 units).** (Same as Folklore M119.) Lecture, four hours. History and reception of folklore collections in Europe, with particular attention to ideology and influence of Grimm's tales. Study and interpretation of selected tales in English and their transformations and appropriation in literature, film, advertising, and pedagogy.

**M119K. Tristan, Isolde, and History of Heterosexuality.** (Same as Women's Studies M119.) Lecture, three hours; outside study, nine hours. Tristan and Isolde are among the more famous and enduring of European literary lovers, and following their tradition from Middle Ages to the present provides opportunity to consider a host of issues — from questions of genre to those of kinship, from representation of love to tyranny of gender, and history of heterosexuality. P/NP or letter grading.

### Courses Open for Credit to Majors, Nonmajors, and Graduate Students in German

**121A. Special Problems in Literature.** Lecture or seminar, three hours. Prerequisite: upper division standing. Varying topics of current importance and immediate relevance to literary study. Designed to introduce students to contemporary trends in literary study and predominantly concerned with topics related to German literature and criticism.

**121B. German Film in Cultural Context: Early German Film.** Lecture, one hour; discussion, one hour; screenings, two to two and one-half hours. Survey of German film from the Weimar to Adenauer eras. Viewing and discussion of films by Lang, Murnau, Sternberg, Wiene, Staudte, etc., with respect to their cultural, sociopolitical, and cinematographic codes.

**121C. German Film in Cultural Context: New German Film.** Lecture, one hour; discussion, one hour; screenings, two to two and one-half hours. Survey of new German film as it evolved in the late 1960s. Viewing and discussion of films by Fassbinder, Herzog, Schlöndorff, Sanders-Brahms, Wenders, and other German-speaking filmmakers, with respect to their cultural, sociopolitical, and cinematographic codes.

**121D. Selected Topics in German Culture and Civilization.** Lecture, three hours. Required of all German majors who are candidates for standard instructional credential in secondary teaching.

**121E. Women in German Literature.** Lecture, three hours. Prerequisite: upper division standing or consent of instructor. Role of women writers and image of women in German literature of various periods (e.g., Romanticism, 19th century, early 20th century, contemporary). Readings to be selected to represent the period of literature being taught in any given term.

**122. Studies in German Literature before 1750.** Prerequisites: three upper division courses (including course 100A) or consent of instructor. Readings and analysis of major works from the Middle Ages to the baroque.

**123. Goethe.** Lecture, three hours. Prerequisites: courses 100A or 100B and 104, or consent of instructor. Reading and discussion of representative works (except *Faust*) from Goethe's early period to his maturity and old age.

**124. Romanticism.** Prerequisites: courses 100A or 100B and 105, or consent of instructor. Reading and analysis of major works of the Romantic period. Authors include Tieck, Novalis, E.T.A. Hoffmann, and Eichendorff.

**126. Advanced Study in Modern Literature.** Prerequisites: courses 100A or 100B or 100C and 106, or consent of instructor. Reading and analysis of a wide range of literature from 1890 to 1945.

**127. Advanced Study in Contemporary Literature.** Prerequisites: courses 100A or 100B or 100C and 107, or consent of instructor. Analysis of a wide range of German literature from 1945 to the present.

**128. Advanced Conversation and Composition on Current and Historical Topics.** Lecture, three hours. Prerequisites: courses 108A-108B or equivalent. Advanced language course that establishes continuity between current affairs and cultural heritage of German-speaking countries and builds on courses 108A-108B to teach complex speaking and writing skills of analysis and criticism.

**129. Language and Linguistics.** Lecture, three hours. Prerequisite or corequisite: course 108A. Theories and methods of linguistics, with emphasis on structure of modern standard German, its phonology, morphology, syntax, semantics, and pragmatics. Other topics include diachronic, spatial, and social variation of German (i.e., its historical development, dialectology, and sociolinguistics).

**130. Methodology of Literary Criticism.** Prerequisite: senior standing or consent of instructor. Introduction to methodology of literary criticism, including systematic study of motif, topos, plot, space and time, semantics, stylistics, rhetoric, metrics, imagery (emblem, metaphor, allegory, symbol), structural elements (act, stanza, book, flashback, anticipation, interior monologue), narrator and reader response, humor and irony, hermeneutics.

**132. Goethe's *Faust*.** Prerequisites: courses 100A or 100B and 123, or consent of instructor. Detailed interpretation of Goethe's *Faust*, Parts I and II, together with general consideration of other treatments of the *Faust* theme in European literature.

**134. German Folklore.** Survey of various genres of German folklore.

**137. Current Topics in Germanic Linguistics.** Lecture, three hours. Prerequisite or corequisite: course 108A. Recommended: course 129. In-depth look at one topic within the field of Germanic linguistics. Topics include phonetics and phonology, morphology and syntax, semantics and pragmatics, social and spatial variation (i.e., sociolinguistics and dialectology of German), and history of German.

**C138. Linguistic Theory and Grammatical Description.** Lecture, three hours. Prerequisites: course 129 and Linguistics 20, or consent of instructor. Crucial problems in structure of Dutch and German, considered from such theoretical frameworks as sign-oriented linguistics, functional linguistics, discourse grammar, and cognitive linguistics. Discussion of formal linguistic approaches. Concurrently scheduled with course C238.

**195. Senior Thesis Course.** Extensive reading, research, and writing of senior thesis. May be used for writing honors thesis.

**199. Special Studies (2 to 4 units).** Requisite: consent of instructor. To be arranged with faculty member who directs the study (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). Independent studies course for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite.

## Graduate Courses

**201A. Bibliography, Research Methods, and Scholarly Writing.** Lecture, three hours. Introduction to current state of advanced research and analysis of literary and philological materials, with emphasis on bibliographies and such tools of research as reference works, series publications, journals, archives, literary histories, and computer data banks. Practical exercises in analysis of sources, compilation and presentation of bibliographies, and writing of research papers.

**201C. Theories of Literary Criticism.** Lecture, three hours. Analysis and discussion of foundations of literary criticism and current theories such as hermeneutics, positivism, psychoanalytical criticism, social historical approaches, intellectual history (*Geistesgeschichte*), New Criticism, Marxist Criticism, Russian and Czech Formalism, structuralism, and semiotics.

**202A. Middle High German.** Introduction to grammar, syntax, and vocabulary of the Middle High German language. Exercises in reading Middle High German literary works, combined with study of socio-cultural contexts in which works of the medieval period were produced and performed.

**202B. Readings in Middle High German Literature.** Extensive reading of literary monuments of the medieval period in Germany. Introduction to cultural and literary history of the Middle Ages.

**203A. The Courtly Epic.** Analysis of major epics of the medieval period in Germany, such as Hartmann's *Erec* and *Iwein*, Wolfram's *Parzival*, and Gottfried's *Tristan*. Study of courtly society, as well as introduction to methods of interpretation and analysis.

**203B. The Courtly Lyric.** Analysis of medieval songs of courtly performers, beginning with Der von Kurenberg and ending with Johannes von Hadlaub. Study of sociocultural context in which the songs were produced and performed, and introduction to methods of interpretation and analysis.

**203C. The Heroic Epic.** Survey of German heroic literature, beginning with *Hildebrandslied* and including such works as *Nibelungenlied*, *Kudrun*, and the Dietrich epics. Methods of analysis and interpretation, as well as analysis of thematic and formal characteristics of the different epics.

**204. Renaissance and Reformation Literature.** Literature of the 15th and 16th centuries, including introduction to and study of the early New High German language. Selected readings from works of authors such as Sebastian Brant, Martin Luther, Hans Sachs, and Johann Fischart.

**205. Baroque Literature.** Definition of the term baroque; development of modern baroque scholarship; influence of foreign models; analysis of sample theoretical writings (prosodies) and of representative poems, dramas, novels, and prose satires of the 17th century.

**206A. Enlightenment and Sentimentalism.** Study of representative authors of the earlier part of the 18th century from Gottsched through Lessing, including authors such as Leibniz, Thomasius, Wolff, Bodmer and Breitinger, Johann Elias Schlegel, Haller, Brockes, Anacreontic poets, Gessner, Klopstock, Mendelssohn, and Wieland.

**206B. *Sturm und Drang*.** Study of representative authors of the *Sturm und Drang* period, such as Herder, Forster, Gerstenberg, Leisewitz, Klinger, Wagner, R.M. Lenz, Moritz, Heinse, Schubart, and the young Goethe and Schiller.

**207A. Classicism: Goethe.** Selected topics from works of Goethe in the period from 1786 to 1832, such as *Iphigenie auf Tauris*, *Torquato Tasso*, *Wilhelm Meisters Lehrjahre*, *Die natürliche Tochter*, *Pandora*, and poetry selections.

**207B. Classicism: Schiller.** Selected topics from critical and dramatic works of Schiller in the period from 1793 to 1805, such as *Über Anmut und Würde*, *Über das Erhabene*, *Wallenstein*, *Maria Stuart*, *Jungfrau von Orleans*, and *Wilhelm Tell*.

**208. Romanticism.** Analysis of selected works of the Romantic period by authors such as Wackenroder, Tieck, the brothers Schlegel, Novalis, Hölderlin, Brentano, Arnim, the brothers Grimm, "Bonaventura," E.T.A. Hoffmann, Eichendorff, and others. Course may be genre or topic oriented.

**209A. 19th-Century Lyrics.** Development of German lyric poetry from the classic/Romantic period to symbolism. Discussion of forms, attitudes, tendencies. Analyses may include poetry by Romantic authors, as well as Heine, Platen, the political poets of *Vormärz*, Droste-Hülshoff, Keller, Storm, C.F. Meyer, Nietzsche, George, and others.

**209B. 19th-Century Drama.** Reading and analysis of selected dramas by Kleist, Büchner, Hebbel, Grillparzer, and others. Discussion and analyses may include topics such as *Schicksalstragödie*, bourgeois trivial drama, sociopolitical drama, historical drama, *Viennese Volkstheater*.

**209C. 19th-Century Narrative Prose.** Analysis of German prose works from Romanticism to naturalism. Discussion of the problem of reality and literary realism with respect to narrative techniques. Authors may include Heine, Büchner, Droste-Hülshoff, Stifter, Gotthelf, Keller, C.F. Meyer, Fontane, and the early naturalists.

**210A. Naturalism and Symbolism.** Sociological background and theoretical writings concerning naturalism and symbolism. Analysis of representative poems, dramas, and shorter narratives by authors such as Holz, G. Hauptmann, George, Hofmannsthal, and Rilke.

**210B. Expressionism and Neorealism.** Historical and sociological background in the period from 1910 to 1933. Literary magazines, theoretical writings, poetry of expressionism and Dadaism, expressionist dramas, and shorter narratives. Definition and representative works of neorealism.

**210C. 20th-Century Novel to 1945.** Analysis of selected 20th-century novels written prior to 1945. Authors of different literary and historical eras, such as Broch, Döblin, Hesse, Kafka, Heinrich Mann, Thomas Mann, and Rilke.

**211A. Contemporary Novel.** Study of selected novels in the period from 1945 to the present. Works by authors from West and East Germany, Austria, and Switzerland, such as Böll, Grass, Handke, Frisch, and Christa Wolf, analyzed and placed in context of literary, cultural, and political trends.

**211B. Contemporary Lyrics and Drama.** Study of selected dramas and poems in the period from 1945 to the present. Works by authors from West and East Germany, Austria, and Switzerland, such as Dürrenmatt, Frisch, Handke, Celan, and Brecht, analyzed and placed in context of literary, cultural, and political trends.

**217. History of the German Language.** Historical survey of development of the standard literary German language from the time of Indo-European unity through proto-Germanic, West Germanic, medieval period, Reformation, baroque period, and Enlightenment until its final codification at the end of the 19th century.

**230. Survey of Germanic Philology.** Systematic survey of major problems in the field of Germanic linguistics: origin and historical diffusion of Germanic dialects and their classification; problems in evolution of nominal and verbal morphology of the various dialects; problems in phonological evolution of the various dialects.

**231. Gothic.** Systematic study of phonology and grammar of the Gothic language, with readings in Wulfila's translation of the Bible and introduction to history of the Goths and their place in the development of modern Europe.

**232. Old High German.** Introduction to earliest phases of German literature, with extensive readings in major documents of that period (750 to 1050). Emphasis on grammatical interpretation of these documents and identification of dialects used in their composition.

**233. Old Saxon.** Introduction to study of earliest documents in Old Low German. Readings in the *Heliand* and study of the *Old Saxon Genesis*.

**C238. Linguistic Theory and Grammatical Description.** Lecture, three hours. Prerequisites: course 129 and Linguistics 20, or consent of instructor. Crucial problems in structure of Dutch and German, considered from such theoretical frameworks as sign-oriented linguistics, functional linguistics, discourse grammar, and cognitive linguistics. Discussion of formal linguistic approaches. Concurrently scheduled with course C138. Graduate students meet as a group one additional hour each week and write research papers of greater length and depth.

**240A. Theories, Methods, and History of Germanic Folklore.** History of Germanic folklore studied in context of European cultural history. Evolution of theories and methods of the discipline as developed by Herder, the Grimms, Bolte, Meier, Naumann, Bausinger, and others.

**240B. Folk Song and Ballad.** Analysis of poetic and musical aspects of German folk songs and ballads. Study of thematic and formalistic evolution of text and music, combined with introduction to theories and methods of analysis of folk music and function of folk song in its social context.

**240C. Oral Prose Genres.** Study of thematic and formal characteristics of legends, folktales, jests, proverbs, and riddles. Role of popular narrative in its sociocultural context in German history and survey of methods of analysis of narratives, texts, and contexts.

**245B. Germanic Antiquities.** Survey of prehistory and early history of Germanic civilization from the Bronze Age to the end of the migrations on basis of archaeological, historic, and philological evidence. Uses of methods of comparative ethnography, religion, and myth to interpret evidence.

**251. Seminar: Syntax and Phonology of German.** Topics selected from the field of contemporary German syntax and phonology according to needs and preparation of students enrolled (e.g., *Dialektgeographie*, generative phonology, generative syntax, *Valenztheorie*, *Texttheorie*).

**252. Seminar: Historical and Comparative Germanic Linguistics.** Topics selected from the field of historical German phonology and syntax according to needs and preparation of students enrolled (e.g., West Germanic problem and classification of the Germanic languages, development of Germanic verbal and nominal morphology, proto-Germanic syntax).

**253. Seminar: Medieval Literature.** Selected topics in medieval literature, with emphasis on problems in literary analysis and applicability of various types of analysis to medieval texts.

**254. Seminar: Renaissance and Reformation.** Selected literary or philological problems, such as a particular genre, author, or theme. Studies on textual analysis or pertinent research to apply methods of literary history to literature of the 15th and 16th centuries.

**255. Seminar: Baroque Literature.** Selected problems of German baroque literature, such as a particular genre, author, or theme. Textual analysis supplemented by critical review of research and application of methods of literary analysis pertinent to literature of this age.

**256. Seminar: Enlightenment and *Sturm und Drang*.** Selected topics in 18th-century literature, such as utopian literature, love and money as motifs, family structure and family life, image of women and women's literature, Jacobin literature, seduction and betrayal as motifs, nobility and middle class in 18th-century literature. Textual analysis and review of current research.

**257. Seminar: Age of Goethe.** Selected topics in German literature between 1775 and 1832, such as Schiller's theoretical writings, Goethe's *Faust II*, Goethe's *Wanderjahre* and *West-östlicher Divan*, Goethe's *Faust I* and Hegel's *Phänomenologie des Geistes*, the French Revolution and German classicism. Textual analysis and review of current research.

**258. Seminar: Romanticism.** Discussion of a specific author or topic from the Romantic period, possibly in close connection with course 208. Critical review of secondary works.

**259. Seminar: 19th-Century Literature.** Discussion of a specific author or topic of 19th-century literature, possibly in close connection with course 209A, 209B, or 209C. Critical review of secondary works.

**260. Seminar: Modern Period.** Selected genre, author, or theme of 20th-century German literature prior to 1945.

**261. Seminar: Contemporary Literature.** Study of selected works, a specific author, genre, period, or topic from 1945 to the present. Texts analyzed and placed in context of literary, cultural, and political trends.

**262. Seminar: Germanic Folklore.** Detailed research on individual aspects of Germanic folklore. Topic selected generally is from course in the German 240 series that preceded the seminar. Emphasis on problems of theory and method.

**263. Seminar: Theories of Literature.** Specialization in literary theories, such as *Rezeptionsästhetik*, Neo-Marxist Criticism, New Criticism, psychoanalytic criticism or sociology of literature, structuralism, semiology, and hermeneutics.

**370. Teaching German in Secondary Schools.** Lecture, three hours; discussion periods. Prerequisite: graduate standing or consent of instructor. Required of all candidates for general secondary instructional credential in German.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495A. Preparation for College Teaching of German (2 units).** Study of problems and methods in teaching German on college level, with emphasis on teaching and testing the listening, speaking, reading, and writing skills. May not be applied toward M.A. course requirements. S/U grading.

**495B. College Teaching of German: Special Problems (2 units).** Prerequisite: course 495A or consent of instructor. Study of contemporary issues in German language pedagogy, with emphasis on textbook evaluation and proficiency-oriented instruction. May not be applied toward M.A. course requirements. S/U grading.

**596. Directed Individual Study or Research.** To be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once; however, only one course in the 500 series may be applied toward M.A. graduate course requirement. S/U grading.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations.** To be arranged with faculty member who directs the study (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be taken only once before and only once after M.A. degree, except for Ph.D. candidates with a formal minor field of studies who may take course twice after M.A., once in the major and once in the minor. Only one course in the 500 series may be applied toward M.A. graduate course requirement. S/U grading.

**598. Research for and Preparation of M.A. Thesis (4 to 12 units).** To be arranged with faculty member who directs the study (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). Only one course in the 500 series may be applied toward M.A. graduate course requirement. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation (4 to 12 units).** To be arranged with faculty member who directs the study (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated. S/U grading.

## Afrikaans

### Upper Division Courses

**105A. Elementary Afrikaans.** Lecture/language laboratory. Introduction to a sister language of modern Dutch and a national language of South Africa. Grammar, practice in listening, speaking, reading, and writing.

**105B. Intermediate Afrikaans.** Lecture/language laboratory. Prerequisite: course 105A or equivalent. Grammatical exercises; reading and linguistic analysis of texts from both literary and nonliterary sources.

**114. Afrikaans Literature in Translation.** Lecture, three hours. Readings and analysis of works by selected authors such as Brink, Joubert, Krige, Leroux, Marais, and Rabie and selected poets such as Breytenbach, Eybers, Lion Cachet, W.E.G. Louw, Van Wyk Louw, and Opperman.

**135. Introduction to Afrikaans Literature.** Discussion, three hours. Prerequisite: course 105B or equivalent. Analysis of selected works from founding of the Genootskap van Regte Afrikaners in 1875 to the present time, including novels by recent writers such as Leroux and Brink, as well as work of poets such as Eybers, Opperman, W.E.G. Louw, Van Wyk Louw, and Breytenbach.

**199. Special Studies in Afrikaans (2 to 4 units).** Requisite: consent of instructor. Independent studies course for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite.

### Graduate Courses

**596. Directed Individual Study or Research in Afrikaans.** To be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations.** To be arranged with instructor (see department for I.D. number). S/U grading.

## Dutch

### Upper Division Courses

**100. Modern Dutch Culture and Society.** Lecture, three hours. Lectures, discussions, and readings in English. Survey of art, architecture, literature, film, Dutch government (including 'Pillarization' — *verzuiling*), the two World Wars, housing policy, mass media, and rise of a multiracial society.

**103A-103B. Elementary Dutch.** Lecture/language laboratory. Course 103A or equivalent is prerequisite to 103B. Introduction to the standard language of the Netherlands and one of the three standard languages of Belgium. Practice in grammar, listening, speaking, reading, and writing.

**103C. Intermediate Dutch.** Lecture/language laboratory. Prerequisite: course 103B or equivalent. Grammatical exercises, conversation, reading and analysis of simple texts.

**104A-104B. Accelerated Dutch (6 units each).** Lecture, four hours; discussion, one hour; laboratory, two hours. Covers material in courses 103A-103B, 103C in two terms rather than three.

**113. Modern Dutch and Flemish Literature in Translation.** Lecture, three hours. Readings and analysis of works by selected authors of the Netherlands and northern (Flemish) Belgium such as Boon, Claus, Couperus, Hermans, Mulisch, Multatuli, and Reve and selected poets such as Campert, Gezelle, Gorter, Kloos, Lucebert, Nijhoff, Van Ostaïjen, and Vroman.

**120. Introduction to Dutch Studies.** Prerequisite: consent of instructor. Brief review of Dutch grammar. Reading and discussion of selections from contemporary Dutch literature, contemporary Dutch literary criticism, and modern Dutch linguistics. Emphasis on developing reading skill and on acquiring familiarity with and appreciation of the scope of 20th-century Neerlandistiek.

**131. Introduction to Modern Dutch Literature.** Discussion, three hours. Prerequisite: course 103B or 120 or equivalent. Selected works of literature of the Netherlands and northern (Flemish) Belgium from the mid-1850s to the present, including novels by such writers as Multatuli, Couperus, Hermans, Mulisch, and Reve and poetry by such groups as the symbolist *Beweging van Tachtig* and the post-War *Beweging van Vijftig*.

**199. Special Studies in Dutch (2 to 4 units).** Requisite: consent of instructor. Independent studies course for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite.

## Graduate Courses

**596. Directed Individual Study or Research in Dutch.** To be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor—see department for I.D. number). May be repeated once. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations.** To be arranged with faculty member who directs the study (see department for I.D. number). S/U grading.

## Hungarian

### Upper Division Courses

**101A. Elementary Hungarian.** Introduction to grammar and reading exercises, with emphasis on the spoken language.

**101B. Elementary Hungarian.** Prerequisite: course 101A or equivalent. Grammatical exercises, conversation, and reading of texts.

**101C. Elementary Hungarian.** Prerequisite: course 101B or equivalent. Conversation and readings in literary texts.

**101D. Advanced Hungarian.** Prerequisites: courses 101A, 101B, 101C, or equivalent. Grammar, conversation, vocabulary building.

**101E. Advanced Hungarian.** Prerequisites: courses 101A through 101D or equivalent. Conversation, reading, and discussion of literary texts.

**101F. Advanced Hungarian.** Prerequisites: courses 101A through 101E or equivalent. Conversation and review of Hungarian grammar from a typological point of view.

**120A-120B. Readings in Hungarian.** Prerequisite: course 101C or equivalent. Selections of Hungarian prose and poetry read in the original.

**120C. Readings in Hungarian Literature.** Prerequisites: reading knowledge of Hungarian, course 101C or equivalent. Selections of Hungarian prose and poetry read in the original. Discussion conducted in Hungarian.

**121A-121B. Survey of Hungarian Literature in Translation.** Intended for students in general and comparative literature, as well as students interested in Finno-Ugric studies. Survey of main trends and contacts with other literatures.

**130. Hungarian Civilization and Culture.** Study of Hungarian civilization and institutions from earliest times to the present. Study of Hungarian culture as represented in its arts (literature, fine arts, music).

**M135. Hungarian Folklore and Mythology.** (Same as Folklore M128.) General course for students in folklore and mythology, with emphasis on types of folklore and varieties of folklore research.

**M136. Folklore and Mythology of the Ugric Peoples.** (Same as Folklore M129.) Survey of traditions of the smaller Ugric nationalities (Voguls, Ostyaks, etc.).

**199. Special Studies in Hungarian (2 to 4 units).** Requisite: consent of instructor. Independent studies course for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite.

## Old Norse Studies

### Lower Division Course

**40. The Heroic Journey in Northern Myth, Legend, and Epic.** Comparison of the journeys of heroes. Readings in mythology, legend, folktale, and epic, including *Nibelungenlied*, *Volsunga saga*, *Eddas*, and *Beowulf*. Cultural and historic backgrounds to the texts. All readings in English.

### Upper Division Courses

**C139. The Saga.** Seminar, three hours. The sagas are the largest extant medieval prose literature. Texts in English, with selections from the different types of Icelandic sagas. Consideration of the history and society that produced these narratives. Concurrently scheduled with course C268.

**C140. Viking Civilization and Literature.** Lecture, three hours. History, society, and culture of early Scandinavians. All texts in English, including readings in Old Norse sagas and *Eddas*. Concurrently scheduled with course C241.

**C145. Old Norse Literature and Society.** Seminar, three hours. Critical issues in medieval Scandinavian studies. May be repeated for credit. Concurrently scheduled with course C272.

**151. Elementary Old Norse.** Introduction to grammar and pronunciation of Old Norse. Selected readings from the sagas and *Prose Edda*.

**152. Intermediate Old Norse.** Prerequisite: course 151 or equivalent. Continued grammar, pronunciation, and readings from the *Eddas* and sagas of Icelanders, Norwegian kings, and legendary heroes.

**153. Modern Icelandic.** Prerequisite: course 152 or equivalent. Grammar, readings, and conversation.

**199. Special Studies in Old Norse (2 or 4 units).** Requisite: consent of instructor. Independent studies course for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite.

## Graduate Courses

**221. Advanced Old Norse Prose.** Prerequisite: course 152 or equivalent. Readings of major saga texts. Also, secondary sources which bear on specific issues in Old Norse literature and medieval Scandinavian history.

**222. Advanced Old Norse Poetry.** Prerequisite: course 152 or equivalent. Readings of mythological and heroic poems from *Poetic Edda*. Secondary sources used where appropriate.

**C241. Viking Civilization and Literature.** Lecture, three hours. History, society, and culture of early Scandinavians. All texts in English, including readings in Old Norse sagas and *Eddas*. Concurrently scheduled with course C140. Graduate students do additional readings and write more extensive research papers.

**245A. Germanic and Scandinavian Mythology.** Seminar, three hours. Study of Northern myth and religion through close reading of Eddic texts and secondary sources.

**C268. The Saga.** Seminar, three hours. The sagas are the largest extant medieval prose literature. Texts in English, with selections from the different types of Icelandic sagas. Consideration of the history and society that produced these narratives. Concurrently scheduled with course C139. Graduate students do additional readings and write more extensive research papers.

**C272. Old Norse Literature and Society.** Seminar, three hours. Critical issues in medieval Scandinavian studies. May be repeated for credit. Concurrently scheduled with course C145. Graduate students do additional readings and write more extensive research papers.

**596. Directed Individual Study or Research.** To be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor—see department for I.D. number). May be repeated once; however, only one course in the 500 series may be applied toward M.A. graduate course requirement. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations.** To be arranged with faculty member who directs the study (see department for I.D. number). S/U grading.

## Yiddish

### Upper Division Courses

**101A. Elementary Yiddish.** Introduction to grammar; instruction in listening, speaking, reading, and writing skills.

**101B. Elementary Yiddish.** Prerequisite: course 101A or equivalent.

**101C. Elementary Yiddish.** Prerequisite: course 101B or equivalent.

**102A-102B. Accelerated Elementary Yiddish (6 units each).** Lecture, five hours; laboratory, one hour. Covers material in courses 101A, 101B, 101C in two terms rather than three. P/NP or letter grading.

**104. Advanced Yiddish.** Lecture, three hours. Prerequisite: course 101C or equivalent. Grammatical exercises, reading and linguistic analysis of texts, conversation.

**121A. 20th-Century Yiddish Poetry in English Translation.** Prerequisite: upper division standing or consent of instructor. Readings in 20th-century Yiddish poetry and drama.

**121B. 20th-Century Yiddish Prose and Drama in English Translation.** Prerequisite: upper division standing or consent of instructor. Readings in 20th-century Yiddish prose.

**121C. Special Topics in Yiddish Literature in English Translation.** Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of a wide range of 19th- and 20th-century literature.

**131A. Modern Yiddish Poetry.** Prerequisite: course 104 or consent of instructor. Readings in modern Yiddish poetry.

**131B. Modern Yiddish Prose and Drama.** Prerequisite: course 104 or consent of instructor. Readings in modern Yiddish prose and drama.

**131C. Special Topics in Yiddish Literature.** Prerequisite: course 131A or 131B. Varying topics of importance and relevance to Yiddish literary study. Reading and analysis of a wide range of 19th- and 20th-century literature.

**199. Special Studies in Yiddish (2 to 4 units).** Requisite: consent of instructor. Independent studies course for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite.

## Graduate Courses

**596. Directed Individual Study or Research in Yiddish.** To be arranged with faculty member who directs the study or research (course section to be identified by two-letter code using initials of sponsoring instructor — see department for I.D. number). May be repeated once. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations.** To be arranged with faculty member who directs the study (see department for I.D. number). S/U grading.

# GERONTOLOGY

*College of Letters and Science*

UCLA  
8619 Franz Hall  
Box 951563  
Los Angeles, CA 90095-1563  
(310) 825-1926

Larry L. Butcher, Ph.D., *Director*

### Professors

Emily K. Abel, Ph.D. (*Health Services*)  
Larry L. Butcher, Ph.D. (*Psychology*)  
Steven G. Clarke, Ph.D. (*Chemistry and Biochemistry*)  
Rita B. Effros, Ph.D., in *Residence (Pathology and Laboratory Medicine)*  
Robert M. Emerson, Ph.D. (*Sociology*)  
James E. Lubben, D.S.W. (*Social Welfare*)  
Donald G. MacKay, Ph.D. (*Psychology*)  
Melvin Pollner, Ph.D. (*Sociology*)  
Arnold B. Scheibel, M.D. (*Neurobiology, Psychiatry and Biobehavioral Sciences*)  
Fernando M. Torres-Gil, Ph.D. (*Social Welfare*)  
F. Eugene Yates, M.D. (*Medicine*)

### Professors Emeriti

James Birren, Ph.D. (*Medicine*)  
David H. Solomon, M.D. (*Medicine*)

### Associate Professor

Steven P. Wallace, Ph.D. (*Community Health Sciences*)

### Assistant Professors

Raynard S. Kington, M.D. (*Medicine*)  
Kathleen McGarry, Ph.D. (*Economics*)

### Lecturers

Melanie Gironde, Ph.D. (*Social Welfare*)  
Judith Richlin-Klonsky, Ph.D. (*Sociology*)

### Adjunct Assistant Professors

JoAnn Damron-Rodriguez, Ph.D. (*Social Welfare*)  
Valentine Villa, Ph.D. (*Social Welfare*)

## Scope and Objectives

The explosive expansion of the older population in this country and the world — the “Age Revolution” — insures that issues regarding aging will dominate our environmental, economic, social, political, psychological, and medical concerns and endeavors well into the twenty-first century. The undergraduate minor in gerontology (1) introduces students to the field, (2) prepares them for advanced academic work, (3) lays the groundwork for careers involving a burgeoning aging population, (4) contributes to increased public awareness of issues regarding aging, and (5) helps students plan more effectively for their own futures as they and their families age.

## Undergraduate Study

### Gerontology Minor

To enter the gerontology minor, students must have an overall grade-point average of 2.0 or better.

*Required Upper Division Courses:* Gerontology M140 and six courses from M104C, M104D, M104E, M119O, M150, Molecular, Cell, and Developmental Biology C149, Women’s Studies 185H.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Gerontology

### Upper Division Courses

**M104C. Diversity in Aging: Roles of Gender and Ethnicity.** (Same as Social Welfare M104C.) Exploration of complexity of variables related to diversity of the aging population and variability in aging process. Examination of gender and ethnicity within context of both physical and social aging, in a multidisciplinary perspective utilizing faculty from a variety of fields to address issues of diversity.

**M104D. Public Policy and Aging.** (Same as Social Welfare M104D.) Examination of theoretical models and concepts of the policy process, with application to aging policy. Analysis of decision-making processes that affect aging policy. Description of history of contemporary aging policy. Exploration of current policy issues affecting the elderly. P/NP or letter grading.

**M104E. Social Aspects of Aging.** (Same as Social Welfare M104E.) Topics include theories of aging, economic factors, changing roles, social relationships, and special populations. Weekly seminars organized around a key aspect of social gerontology. P/NP or letter grading.

**M119O. Psychology of Aging.** (Same as Psychology M119O.) Requisite: Psychology 115. Designed for juniors/seniors. Aging refers to developmental changes occurring at end stages of life. Some alterations that occur represent improvement, others are detrimental. Examination of impact of aging process on mental phenomena and exploration of ways in which positive changes can be maximally utilized and impact of detrimental alterations minimized. P/NP or letter grading.

**M140. Introduction to Study of Aging.** (Same as Psychology M140 and Social Welfare M140.) Lecture, three hours. Designed for juniors/seniors. Perspectives on major features of human aging — biological, social, psychological, and humanistic. Introduction to information on the range of influences on aging to prepare students for subsequent specialization. P/NP or letter grading.

**M150. Sociology of Aging.** (Same as Sociology M150.) Lecture, three hours; discussion, one hour. Study of sociological processes shaping definition, experience, and response to aging in contemporary society. Topics include race, class, and gender in aging over life course; interpersonal relations and social worlds of the aged; caregiving relations and institutions; professions concerned with the aged and aging.

# HEALTH SERVICES

*School of Public Health*

UCLA  
31-269 Center for the Health Sciences  
Box 951772  
Los Angeles, CA 90095-1772

Thomas H. Rice, Ph.D., *Chair*  
Stuart O. Schweitzer, Ph.D., *Vice Chair*

### Professors

Emily K. Abel, Ph.D.  
Ronald M. Andersen, Ph.D. (*Fred W. and Pamela K. Wasserman Professor of Health Services*)  
Robert H. Brook, M.D., Sc.D.  
E. Richard Brown, Ph.D.  
William Comanor, Ph.D.  
Jonathan E. Fielding, M.D., M.P.H.  
Patricia A. Ganz, M.D.  
Charles E. Lewis, M.D., Sc.D.  
Marvin Marcus, D.D.S.  
Thomas H. Rice, Ph.D.  
Stuart O. Schweitzer, Ph.D.  
Paul R. Torrens, M.D., M.P.H.

### Professors Emeriti

Lester Breslow, M.D., M.P.H.  
Carl E. Hopkins, Ph.D., M.P.H.  
Milton I. Roemer, M.D., M.P.H.  
William Shonick, Ph.D.

### Associate Professors

Roshan Bastani, Ph.D., in *Residence*  
Gerald F. Kominski, Ph.D.  
Robert O. Valdez, Ph.D.

### Assistant Professors

William E. Cunningham, M.D., M.P.H.  
Mark S. Litwin, M.D., M.P.H.  
Jeff Luck, Ph.D., M.B.A., in *Residence*

### Lecturers

Bruce W. Bennett, Ph.D.  
Cliff Cheng, Ph.D.  
Geraldine Dallek, M.P.H.  
William Gurtner, M.P.H.  
Joe Hafey, M.P.A.  
Diana W. Hilberman, M.S.P.H.  
Hwai-Tai Lam, Ph.D.  
Joyce Mann, Ph.D.  
Virginia More, Ph.D.

### Adjunct and Visiting Professors

Ellen Alkon, M.D., M.P.H., *Adjunct*  
Michael Bobrow, A.I.A., *Adjunct*  
Molly J. Coye, M.D., M.P.H., *Visiting*  
Caswell A. Evans, Jr., D.D.S., M.P.H., *Adjunct*  
Arlene Fink, Ph.D., *Adjunct*  
Jacqueline B. Kosecoff, Ph.D., *Adjunct*

Ruth J. Roemer, J.D., *Adjunct, Emerita, Researcher*

**Adjunct Associate Professor**

Raymond D. Goodman, M.D., M.P.H.

**Associate Field Program Supervisor**

Diana W. Hilberman, M.S.P.H.

## Scope and Objectives

The field of health services examines the organization and financing of various activities to prevent and treat disease. This includes programs in both the public and private sectors at all levels — local, state, and federal.

Faculty members come from such diverse fields as economics, management, law, statistics, operations research, planning, medicine, history, sociology, and political science. These diverse backgrounds are harmonized by their devotion to the analysis of problems in the financing and delivery of health services, with focus on populations rather than individual patients.

The Department of Health Services offers both practice-oriented and research-oriented graduate programs. The primary professional degree, the Master of Public Health (M.P.H.), includes training in various aspects of health administration such as policy formulation, health planning, organization, and management. For more advanced professional work, the Dr.P.H. degree offers education in the full scope of public health services and prepares candidates for leadership in community health work at all jurisdictional levels. For information on the M.P.H. and Dr.P.H., see Public Health Schoolwide Programs.

For those interested in careers in research and teaching, the department offers M.S. and Ph.D. degrees in Health Services. These programs maintain close ties with related activities in the Schools of Dentistry and Medicine, including the Robert Wood Johnson Clinical Scholars Program, the Program in Prevention, and the Cancer Control Division. The RAND/UCLA Center for Health Policy Study and the RAND/UCLA Center for Health Care Financing Research afford opportunities for joint activities with the RAND Health Sciences Program. Graduates of the academic degree programs pursue careers in universities, as well as in public and private agencies involved in health services research and health policy analysis.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

See the Master of Public Health (M.P.H.) Admission section under Public Health Schoolwide Programs. Admission requirements for the Master of Science in Health Services are the same as for the M.P.H.

### Areas of Study

Consult the graduate adviser.

### Course Requirements

Students must complete at least one year of graduate residence at the University of California and 17 full courses, at least five of which must be graduate courses in the 200 or 500 series. Only one 596 course (four units) and one 598 course (four units) may be applied toward the total course requirement; only four units of either course may be applied toward the minimum graduate course requirement. Health Services 597 may not be applied toward the degree requirements.

Mandatory core courses include Biostatistics 100A, 100B, and Epidemiology 100. Each core course may be waived if a similar course has been taken elsewhere and the student can pass the waiver examination.

Required department core courses include Health Services 200A-200B-200C, 237A-237B, 237C, and 422. Students are strongly encouraged to take the following courses or equivalents: Biostatistics 200A, 200B, and Epidemiology 201A-201B. Elective courses should be selected from the 200 or 500 series in consultation with an adviser.

Only courses in which a grade of C – or better is received may be applied toward the requirements for a master's degree. Students must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

### Comprehensive Examination Plan

If the comprehensive examination/report plan is approved, a guidance committee of three faculty members is appointed. The comprehensive examination consists of an extensive written research report in the major area of study. It must be approved by the guidance committee which also must certify successful completion of all degree requirements.

### Thesis Plan

If the thesis option is approved, a thesis committee is established. The committee approves the thesis prospectus before the student files for advancement to candidacy. The thesis must be acceptable to the thesis committee.

## Doctoral Degree

### Admission

In addition to the University minimum requirements, the department requires (1) satisfactory performance on the Graduate Record Examination (GRE); (2) at least a 3.0 junior/senior

grade-point average, at least a 3.5 GPA in graduate studies or demonstrated superiority in graduate work, and at least a B in each of the mandatory core courses; (3) a positive recommendation by the Health Services Department; (4) approval by the doctoral admissions committee and the department chair; (5) completion of the M.S. in Health Services or an appropriately related field is preferred. Screening examinations may be required by the department.

### Major Fields or Subdisciplines

Consult the graduate adviser.

### Course Requirements

In addition to the requirements for an M.S. in Health Services, major field course requirements include Health Services 249H and Biostatistics 200A-200B, as well as Epidemiology 201A-201B. A cognate is required with at least 12 units (three courses) from a department that grants a Ph.D. degree. Cognate courses must be at the graduate level and should be core theory and research courses for the discipline chosen. Acceptable cognate areas would be from one of the following disciplinary areas: economics, epidemiology, history, management, political science, psychology, and sociology.

### Written and Oral Qualifying Examinations

Before advancement to candidacy, students must pass a written examination in the major field, complete the requirements in a minor field, and pass an oral qualifying examination on the major and minor fields. Normally no more than one reexamination is allowed. When the student is ready to take the University Oral Qualifying Examination, a doctoral committee is nominated.

The doctoral committee consists of at least four faculty members who hold professorial appointments. Two of the faculty must be tenured. Three of the four must hold appointments in Health Services; one must be an outside member who holds no appointment in Public Health; one of the four must be from the minor field.

The doctoral committee administers the oral qualifying examination after the student has successfully completed the written examination.

After passing the University Oral Qualifying Examination, the student may be advanced to candidacy and commence work on a dissertation in the principal field of study. The doctoral committee guides the student's progress toward completion of the dissertation.

## Health Services

### Lower Division Course

**88. Lower Division Seminar: Special Topics in Health Services.** Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in health services approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

### Upper Division Courses

**100. Health Services Organization.** Lecture, four hours; discussion, one hour. Prerequisite: four units of social sciences. Structure and function of American health care system; issues and forces shaping its future.

**M110. Ethnic, Cultural, and Gender Issues in America's Health Care Systems.** (Formerly numbered 110.) (Same as Asian American Studies M110.) Lecture, three hours. Designed for juniors/seniors. Introduction to study of gender, ethnicity, and cultural diversity related to health status and health care delivery in the U.S.

**131. Structure and Function of Health Care Facilities.** Lecture, two hours; discussion, two hours. Prerequisites or corequisites: course 100, consent of instructor. Introduction to structure, organization, and function of health care facilities.

**132. Financial and Managerial Accounting for Health Services Organizations.** Prerequisites: course 100 or equivalent, consent of instructor. Introduction to financial and managerial accounting and its application to the health services industry.

**133. Introduction to Health Economics.** Prerequisite: consent of instructor. Presentation of tools of economic analysis. Topics include introductory concepts of microeconomics, theory of demand for health insurance and health care, substitution of health personnel, hospital cost functions, and costs and benefits of health programs.

**134. Introduction to Comprehensive Health Planning.** Lecture, four hours; fieldwork, four hours. Prerequisite: one upper division microeconomics, statistics, calculus, or political science course. Concepts underlying health planning, state of the art, and some relevant literature.

**136. Introduction to Health Services Research.** Prerequisites: Biostatistics 100A or equivalent, consent of instructor. Review of the field of health services research. Uses of quantitative methods and applications of conceptual/theoretical constructs (as well as methodologies) from social and behavioral sciences and epidemiology to studies of workings of health services.

**150. Contemporary Health Issues.** Designed for juniors/seniors. Exploration of nation's health challenges, epidemiologic basis of public's health, organization and financing of health services in the U.S. and elsewhere, and current strategies for advancing people's health.

**199. Special Studies (2 to 4 units).** Prerequisites: senior standing, consent of instructor and department chair (based on written proposal outlining course of study). Individual undergraduate guided studies under direct faculty supervision. Study to be structured by instructor and student at time of initial enrollment. Only four units may be taken each term.

### Graduate Courses

**200A-200B-200C. Health Systems Organization and Financing.** Lecture, four hours; discussion, two hours. In-depth analysis of health services systems in the U.S., using relevant theories, concepts, and models. **200A-200B.** Prerequisite: health services major. **200C.** Prerequisites: courses 200A-200B, and health services major or consent of instructor.

**M204A-M204B-M204C. Seminars: Pharmaceutical Economics and Policy (1 unit, 1 unit, 2 units).** (Same as Economics M204L-M204M-M204N.) Seminar, three hours every other week for three terms. Prerequisites: course 236 or equivalent, Economics 201A-201B-201C or equivalent, or consent of instructor, graduate standing in public health or economics. Various topics in economics of pharmaceutical industry, including rates of innovation, drug regulation, and economic impact of pharmaceuticals. In Progress grading.

**214. Measurements of Effectiveness and Outcomes of Health Care.** Lecture, three hours. Prerequisites: courses 200A-200B-200C, 422, and Biostatistics 100A or equivalent, or consent of instructor. Historical perspective for development of health status measures and their utilization in assessment of outcomes and effectiveness in medical care. Review of current methods in context of current research and practice.

**220. Seminar: Cost Containment.** Seminar, three hours. Through lectures and discussion of journal articles, analysis of success and failure of alternative methods of controlling U.S. health care costs. Examination of how other countries have controlled their costs.

**231. History of Public Health.** Discussion, three hours. Prerequisite: doctoral standing or consent of instructor. Emphasis on topics which illuminate current issues in public health policy. Discussion of historical perspectives on health care providers, health care institutions, health care reform movements, public health activities, childbirth, and AIDS.

**232. Governmental Health Services and Trends.** Prerequisites: course 100, two additional upper division social or behavioral sciences courses, consent of instructor. Systematic analysis of interface between organized programs of personal health services and governmental agencies at all jurisdictional levels. Study of changing relationships between traditional public health and newer medical care and quality control functions.

**M233. Health Policy Analysis.** (Formerly numbered 233.) (Same as Community Health Sciences M252.) Lecture, three hours. Prerequisite: course 100 or equivalent. Conceptual and procedural tools for analysis of health policy, emphasizing role of analysis during various phases of the life cycle of public policy.

**234. Health Services Organization and Management Theory.** Prerequisites: courses 100 or equivalent, 131, two upper division social sciences courses or equivalent, consent of instructor. Application of contemporary organization and management theory to systems that provide personal health care services. Environmental characteristics, missions/goals, structure and processes of health services organizations.

**235. Law, Social Change, and Health Service Policy.** Prerequisites: course 100, two upper division political science or sociology courses or equivalent, consent of instructor. Legal issues affecting policy formulation for environmental, preventive, and curative health service programs.

**236. Microeconomic Theory of the Health Sector.** Lecture, four hours; discussion, two hours. Prerequisites or corequisites: Biostatistics 100A or equivalent and intermediate microeconomics. Microeconomic aspects of the health care system, including health manpower substitution, choice of efficient modes of treatment, market efficiency, and competition.

**237A-237B. Special Topics in Health Services Research Methodology.** Lecture, one hour; discussion, three hours. Prerequisites: Biostatistics 100A, 100B, consent of instructor. In-depth consideration of problems in application of statistical and other quantitative methods in health services research. Critique of adequacy of study designs, appropriateness of analyses, and degree to which conclusions are supported by data.

**237C. Issues in Health Services Methodologies.** Prerequisites: courses 237A-237B, doctoral student standing. Intended to assist students in understanding the research process and its application in study of health services in the U.S. Introduction to issues related to reporting, disseminating, and documenting research findings.

**238. Politics of Health Care.** Prerequisite: course 100 or equivalent. Concepts and procedures for political analysis; national, state, and local politics in health care; examination of selected case studies.

**239. Aging and Long-Term Care.** Prerequisites: courses 100, 238, Community Health Sciences 270, or equivalent, consent of instructor. Long-term care of the chronically ill elderly examined from perspective of political and sociodemographic trends, including populations at risk, policy options, and alternative forms of care such as nursing homes, home care, and care by informal support systems.

**240. Health Care Issues in International Perspective.** Prerequisites: two health administration courses, two upper division social sciences courses, or equivalent, consent of instructor. Analysis of crucial issues in health care; manpower policy, economic support, health facilities, patterns of health service delivery, regulation, planning, and other aspects of health care systems probed in settings of European welfare states, developing nations, and socialist countries.

**M241. Women, Health, and Aging: Policy Issues (2 or 4 units).** (Same as Social Welfare M290D.) Lecture, three hours; discussion, one hour. Prerequisites: two upper division social sciences courses, two upper division biological sciences courses, or equivalent, consent of instructor. Social and economic context of older women's aging, major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to their health needs.

**M242. Determinants of Health.** (Same as Community Health Sciences M232.) Lecture, three hours; discussion, one hour. Designed for graduate students. Critical analysis of models for what determines health and evidence for social, economic, environmental, genetic, health system, and other factors that influence health of populations and defined subgroups.

**244. Seminar: Health Services and Policy Evaluation.** Prerequisites: Biostatistics 100A, 100B, basic courses in program evaluation and health services organization, or equivalent, doctoral standing, consent of instructor. Seminar applying alternative evaluation research theories and methods to health service organizations and systems. Topics include linking evaluation criteria to policy decisions, theories, and previous research; political and organizational context of evaluation; utilization of findings; and meta-evaluation. S/U or letter grading.

**245. Society's Response to Aging.** Prerequisites: two health services courses, two upper division social sciences courses, or equivalent, consent of instructor. Examination of central issues of health care delivery to the elderly in the U.S. Topics include demographic trends, economic characteristics, health status, demand for care, health care financing, long-term care, and continuum of care for the aged.

**246. Seminar: Special Populations — Health Service Policy Issues.** Prerequisites: courses 200A-200B-200C, 232, 238, or equivalent, consent of instructor. Limited to doctoral students or M.S. and M.P.H. students with advanced degrees. Doctoral-level seminar which focuses on health services for selected priority population groups, integrating scientific, organizational, economic, ethical, and political evidence as a basis for public policy. Different populations may be selected for attention each year.

**247. Research Topics in Health Economics.** Prerequisites: courses 100, 236, 446 or equivalent, consent of instructor. Seminar in economic analysis of current health services issues. Critical examination of studies pertaining to health manpower, health care costs and controls, diffusion of technology, and cost-benefit analysis of health programs.

**248. Small Area Planning for Resources for Personal Health Service.** Lecture, three hours; laboratory, two hours. Prerequisites: courses 100, 134, or equivalent, consent of instructor. General planning theory and health planning theory, methods, and experience with planning for personal health care resources for small geographic areas. Determining needs and estimating required utilization levels and health care resources. Survey of elements of different disciplines used in areawide health planning. Laboratory projects and exercises designed to implement studies of health planning theory and methods.

**249A-249Z. Special Topics in Health Services (2 to 4 units each).** Prerequisites: consent of instructor, additional prerequisites for each offering as announced in advance by department. Advanced seminars covering current issues and special topics in health policy, health financing, and organization and administration of health services. Sections offered on regular basis, with topics announced in preceding term. May be repeated for credit with topic change:

**249D. Principles of Organization Leadership: Applications in Public Health and Welfare.** Lecture, three hours; discussion, three hours. Designed for graduate students. Examination of principles and models of organization leadership, including presentation by current leaders in the fields of health and welfare. Theories and empirical investigations of leadership qualities.

**M249E. Health Policy Seminar.** (Formerly numbered 249E.) (Same as Policy Studies M269.) Requisites: courses 200A-200B-200C, 236, Biostatistics 100A, 100B. Public policy concerning payment for medical care services and characteristics of the market for those services: demand for care, fee-for-service and prepaid payment systems, regulation of price and capital investment, private sector efforts to control health care costs.

**249F. Quality Assessment and Assurance.** Prerequisites: course 100, Biostatistics 100A, Epidemiology 100, one additional health services or epidemiology course, or equivalent, consent of instructor. Fundamental issues in quality assessment, quality assurance, and measurement of health status.

**249G. Medical Technology — Development, Diffusion, Assessment, and Health Services.** Prerequisites: courses 200A-200B-200C, 238, or equivalent, one upper division policy analysis course. Doctoral-level seminar focusing on public policies that pertain to advancement of medical science and development of new technologies and promotion and regulation of their use.

**249H. Current Research Issues.** Discussion, two hours. Prerequisite: doctoral student standing. Review of articles in health services journals nominated as the best published during 1990. Analysis of articles to determine contribution to theory, methods, and/or implications for management or policy in health services organizations or health services as a field. S/U or letter grading.

**249I. Research Methodology.** Lecture, one hour; discussion, three hours. Prerequisites: courses 237A-237B, doctoral student standing. Theory-driven model building and specification, operationalization, data definition and documentation, data screening and transformation techniques, use of indexes and scales, and data reduction methods. Some hands-on measurement and analysis work. Research project with term-paper analysis required. Course builds on concepts and research methods learned in courses 237A-237B, 237C.

**M249J. Mental Health Services.** (Formerly numbered 249J.) (Same as Psychiatry M251.) Lecture, three hours. Requisites: courses 200A-200B-200C. Designed for doctoral students. Survey of contemporary American delivery of health services to emotionally and mentally ill and retarded. Analysis of characteristics of such services, with historical background of their evolution and projections of their future prospects.

**249K. Health Care Practice Guidelines, Variations in Care, and Patient Outcomes.** Lecture, three hours. Prerequisites: courses 200A-200B-200C, 422, Biostatistics 100A, 100B, graduate student standing. Participation of students in critical review and discussion of selected papers dealing with course topics, including small and large area variations in care, and development and implementation of clinical guidelines. Emphasis on implications for health policy. S/U or letter grading.

**249L. Ethical Issues in Public Health.** Requisites: courses 200A-200B-200C. Case conferences, based on real-life experience, focus on ethical issues in health services organization and management, including ethical issues related to conflict of interest, quality of care, health insurance selection, choice of drugs, reproductive rights, AIDS, and resource allocation.

**250. Evolution of Health Professions in the 20th Century.** Lecture, two hours; discussion, two hours. During the 20th century there have been dramatic changes in composition of "helping" professions. Review of forces responsible for these changes and description of processes by which lay persons are educated/socialized into major subgroups of health professions. Review of major social forces external to health care system that affect its composition.

**M287. Politics of Health Policy.** (Same as Community Health Sciences M287.) Lecture, three hours; discussion, one hour. Prerequisites: courses 200A-200B or Community Health Sciences 210. Examination of politics of health policy process, including effects of political structure and institutions; economic and social factors; interest groups, classes, and social movements; media and public opinion; and other factors.

**400. Field Studies in Health Services (2 or 4 units).** Prerequisite: consent of instructor. Field observation and studies in selected community organizations for health promotion or medical care. Students must file field placement and program training documentation on form available from Student Affairs Office. May not be applied toward M.S. minimum course requirement; four units may be applied toward 44-unit minimum total required for M.P.H. degree.

**M411. Issues in Cancer Prevention and Control.** (Same as Community Health Sciences M411.) Designed for juniors, seniors, and graduate students. Introduction to causes and characteristics of the cancer epidemic, cancer control goals for the nation, and interventions designed to encourage smoking cessation/prevention, cancer screening, and other dietary, psychosocial, and lifestyle changes.

**422. Practices of Evaluation in Health Services: Theory and Methodology.** Lecture, three hours. Prerequisites: courses 200A-200B-200C or equivalent or consent of instructor. Introduction to health services evaluation. Examination and performance of specific evaluation procedures. Conducting of health services investigations, reporting results and methodologies.

**425. Law and Epidemiology.** Prerequisite: course 235 or Epidemiology 100 or consent of instructor. Examination, generally, of relationship between law and epidemiology, including use of epidemiology to regulate exposure to risk.

**431. Managerial Processes in Health Service Organizations.** Lecture, one hour; laboratory, three hours. Prerequisites: course 234, consent of instructor. Managerial skills and behaviors applied to components of organizations at several levels: individual, interpersonal, group, intergroup, system, and interorganization. Unique features of health service organizations are stressed as applications are presented.

**432. Integrative Seminar: Health Services Management.** Prerequisite: course 431. Residents and preceptors are responsible for presenting cases of actual administrative problems for solution by teams of students and faculty.

**433. Health Service Organization Policy and Strategy.** Lecture, three hours; discussion, one hour. Prerequisites: courses 131, 234, 400 (at least six units), or equivalent, consent of instructor. Conceptual, analytical, and technical aspects of policy and strategy formulation in health service organizations. Special attention to structure and dynamics of competitive markets, corporate-level strategic planning and marketing, managerial ethics and values, organizational creativity/innovation.

**434. Employer/Employee Health Management.** Lecture, two hours; discussion, two hours. Prerequisites: course 100, a combination of three graduate courses in health planning, hospital finance, health policy, health insurance, occupational health, health services research, and health information systems, or equivalent, consent of instructor. Preview and analysis of how employer and employee groups provide, sponsor, and manage health-related services for others.

**435. Management Science for Health Planning and Administration.** Lecture, three hours; laboratory, two hours. Prerequisites: Biostatistics 100A and either Biostatistics 403 or Management 404, or equivalent, consent of instructor. Introduction to use of quantitative analyses to support managerial and operational decisions in health services organizations. Topics include mathematical models for structuring decisions, resource allocation, inventory control, task sequencing, scheduling, and forecasting. Use of microcomputers.

**436. Financial Management of Health Service Organizations.** Prerequisites: courses 131, 132, 234, or equivalent, consent of instructor. Application of financial management and accounting principles to health care facilities, including unique financial characteristics of health care facilities, third-party reimbursement, cost finding and rate setting, operational and capital budgeting, auditing, and risk management.

**437. Legal Environment of Health Services Management (2 units).** Lecture, four hours. Requisite: course 131. General survey of legal aspects of health services management, including governance, agency, informed consent, medical malpractice, contracts, negligence, and case law related to health facility operations.

**438. Issues and Problems of Local Health Administration.** Lecture, three hours. Prerequisites: course 100 or equivalent, Epidemiology 100, one additional health services course or equivalent, consent of instructor. Overview of administrative issues currently faced by local health departments, including providing public health programs during fiscal constraint, quality improvement, interagency relationships and partnerships, and political and public interactions.

**439. Dental Care Administration.** Lecture, three to four hours. Prerequisites or corequisites: Biostatistics 100A, Epidemiology 100, or equivalent. In-depth examination of several specific dental care policy issues: manpower, relationship of treatment to disease, national health program strategies, and evaluation mechanisms.

**440A. Health Information Systems: Organization and Management.** Lecture, two hours; laboratory, three hours. Prerequisites: courses 200A-200B-200C or equivalent, consent of instructor. Principles of and systems related to organization and management of a health facility's health information system.

**440B. Health Information Systems: Organization and Management.** Lecture, two hours; laboratory, three hours. Prerequisites: course 440A or equivalent, consent of instructor. Health and administrative research using clinical records. Principles of planning for routine and special studies. Individual investigation in methods of obtaining and processing data to meet needs of programs in institution and agency. Introduction to principles of medical auditing; analysis of medical and health services.

**441. Ambulatory Care in the U.S. Seminar**, three hours. Prerequisites: courses 132, 200A-200B-200C, and Management 403, or equivalent, or consent of instructor. Introduction to organization and management concepts, problems, and issues in ambulatory health services, including financial management and information systems requirements.

**442. Managed Health Care: Quality and Cost.** Lecture, three hours. Prerequisite: consent of instructor. Overview of issues related to growth, management, and planning of managed health care systems. Review of role of HMOs and PPOs, as well as discussion of managed care as a solution.

**443A. Biological and Social Bases of Prevention.** Lecture, two hours; discussion, two hours. Prerequisites: courses 100 or 200A-200B-200C, Biostatistics 100A, Epidemiology 100, graduate standing, consent of instructor. Development, current status, and potential of preventive medicine in public health practice, focusing on risk indicator approach (exercise, alcohol, stress, etc.), with consideration of program settings, delivery problems, and issues.

**443D. Advanced Hospital Financial Management Simulation.** Lecture, one hour; discussion, one hour; laboratory, two hours. Prerequisites: courses 100, 132, 436, consent of instructor. Practical aspects of hospital management decisions in a changing environment examined through computer simulation, with particular attention to economic projections, demand patterns, investment programs, and health care regulations.

**443E. Advanced Hospital Financial Management Seminar.** Prerequisites: courses 100, 131, 132, 436, or equivalent, consent of instructor. Hospital financial management, including reimbursement management, capital financing, and capital investment analysis, discussed and analyzed with respect to students' individual residency sites.

**444. Applied Methodology in Health Planning.** Lecture, three hours; fieldwork, four hours. Prerequisites: courses 200A-200B-200C, or equivalent, consent of instructor. Demonstration of methodology of health planning by involving students in formulation of actual health plan for existing agency in Los Angeles area.

**445. Strategic Planning and Marketing in Health Care.** Lecture, three hours; discussion, one hour. Prerequisites: courses 200A-200B-200C, Biostatistics 100A, 100B, or equivalent, consent of instructor. Survey course covering theory and applications of strategic planning and marketing concepts as they apply to health care organizations. Lectures and discussion of case studies for which students must prepare in advance, fieldwork, and microcomputer exercises.

**446. Financing Health Care.** Prerequisites: course 100, Economics 1, 2, or equivalent, consent of instructor. Patterns of health care financing by consumers, providers, third-party intermediaries; trends in health service use; expenditures, national health insurance, and international comparisons of health financing.

**447. State Health Policy Issues.** Seminar, three hours. Prerequisite: course 238. Focus on health policy development and implementation at state government level, with emphasis on financing, direct provision, and regulation of health care services, facilities, equipment technology, and manpower. Exploration of intergovernmental relationships.

**447D. Management of Health Maintenance Organizations.** Lecture, three hours. Prerequisites: courses 100, 134, or equivalent, consent of instructor. Alternative approaches to fee-for-service for paying, providing, or arranging for delivery of health care services, and relating these approaches to national health policy.

**447E. Health Insurance Principles and Programs.** Prerequisites: courses 100, 232, one additional health services course, or equivalent, consent of instructor. Examination of social, actuarial, and commercial assumptions underlying private health insurance. Comparison with government-sponsored health insurance. Analysis of diversity of voluntary medical care insurance plans under different sponsorships and with varied scopes of coverage and benefits and their implications for public and private medical care developments.

**M448. Health Policy Issues for Dental Professionals (2 units).** (Same as Dentistry M422.) Prerequisites: course 100 or equivalent, Biostatistics 100A or equivalent, Epidemiology 100, consent of instructor. Current public health policy issues in dental health, including cost, financing, role of government, and quality assurance. S/U grading.

**M448D. Case Studies in Dental Practice (2 units).** (Same as Dentistry M433A.) Provides students with practice methodology for evaluation of dental care settings. Didactic and field experience, providing foundation for evaluation of programs. S/U grading.

**M449A-M449B. Child Health, Programs, and Policies.** (Same as Community Health Sciences M436A-M436B.) Requisite: course 100. Course M449A is requisite to M449B. Examination of history of child health policy trends and determinants of health, structure, and function of health service system; needs, programs, and policies affecting especially at-risk populations.

**450. Financial Theory of Health Services Organizations.** Requisites: courses 200A-200B-200C. Study of health care financial management, including variables of cost of funds, availability of physicians to provide the necessary patients, efficiency of operations, and legal constraints.

**495. Teacher Preparation in Health Services (2 units).** Prerequisites: 18 units of cognate courses in area of specialization, consent of department chair. May not be applied toward master's degree minimum total course requirement. May be repeated for credit. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward master's degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

**596. Directed Individual Study or Research (2 to 8 units).** Prerequisites: graduate standing, consent of instructor. Individual guided studies under direct faculty supervision. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement. May be repeated for credit.

**597. Preparation for Master's Comprehensive or Doctoral Qualifying Examinations (2 to 8 units).** Prerequisites: graduate standing, consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

**598. Master's Thesis Research (2 to 8 units).** Prerequisite: consent of instructor. Only four units may be applied toward M.P.H. and M.S. minimum total course requirement; may not be applied toward minimum graduate course requirement. May be repeated for credit. S/U grading.

**599. Doctoral Dissertation Research (2 to 8 units).** Prerequisite: consent of instructor. May not be applied toward any degree course requirements. May be repeated for credit. S/U grading.

Albert Hoxie, M.A., *Emeritus*  
 Larry Lauerhass, Ph.D., *Emeritus*

### Adjunct Professors

Russell Jacoby, Ph.D.  
 Robert C. Ritchie, Ph.D.

### Adjunct Associate Professors

S. Scott Bartsch, Ph.D.  
 Darryl Holter, Ph.D.  
 Yuji Ichioka, Ph.D.

## Scope and Objectives

History is the study of the past of our own society and how it emerged out of the traditions that produced it. At the same time, self-knowledge for students of history comes not only from self-discovery, but from a comparison of their own tradition and experience with those of others. It is only by studying the history of other civilizations and cultures that we can hope to gain perspective on our own.

The course offerings in history at UCLA are designed to bring about an understanding of the forces that have shaped the many cultures of this country and the world. UCLA has one of the largest, most distinguished, and most diverse history faculties in the country. Its main emphasis is on the many aspects of social history, but intellectual, cultural, and political history are also strongly represented.

Of all undergraduate majors, history is probably the most flexible and far-reaching. Leading to a Bachelor of Arts degree, it is excellent preparation for a wide variety of careers — law, teaching, business, the communications media, public services, and medicine.

The department offers graduate programs leading to the M.A. and Ph.D. and accepts qualified applicants for either or both degrees.

There is also a joint master's program with the Graduate School of Education and Information Studies. Traditionally, the M.A. and Ph.D. in History have led to careers in high school, college, and university teaching. Increasingly, they are also being put to use in government service, international business, museum and archival work, and journalism.

## Undergraduate Study

### Bachelor of Arts Degree

The History Department's undergraduate program consists of 16 courses in history (six lower division — the Preparation for the Major, including the premajor requirements; 10 upper division — the Major).

### Preparation for the Premajor and Major

*Required for the Premajor:* Three courses, including two in Western civilization (History 1A, 1B, 1C) or two in world history (courses 20, 21, 22), and 99.

After completing the three courses with a minimum grade-point average of 2.0, students should petition to enter the major at the undergraduate counselor's office in 6248 Bunche Hall. Transfer credit for the premajor courses is subject to department approval. Transfer students should consult the undergraduate counselor before enrolling in any courses for the major.

*Required for the Major:* Three additional lower division history courses.

### The Major

*Required:* At least 10 upper division history courses, including (1) two courses in U.S. history, (2) two courses in non-Western history from the same area (i.e., Latin America, Asia, Near East, Africa), (3) two courses in European history or in history of science, and (4) History 197.

The requirements for U.S., non-Western, and European history may be fulfilled with either upper or lower division courses, but majors are required to take a minimum of 10 upper division history courses.

There is no language requirement for the major; however, students wishing to enter the honors program or planning to do graduate work in history are urged to pursue language study early in their undergraduate careers.

### Advanced Placement Credit in History

The College of Letters and Science allows eight quarter units toward the B.A. for each Advanced Placement Test in History. The History Department applies this credit to the Preparation for the Major as follows: AP European History fulfills History 1C; AP American History with a score of 4 or 5 allows eight units of History 13A-13B-13C credit on the history preparation. The excess units may be applied only toward the degree.

## Honors Program

The honors program is designed for history majors who are interested in carrying out a year-long independent research project that culminates in an honors thesis. A 3.5 departmental grade-point average is normally required for admission, but students with a lower GPA may apply to the honors committee for admission. Application should be made at the beginning of the junior year.

The proposal, research, analysis, and writing of the paper take place over three terms through History 199HA, 199HB, and 199HC. Course 199HA is taken in Spring Quarter of the junior year, followed by courses 199HB and 199HC in Fall and Winter Quarters of the senior year. Contact the undergraduate adviser for more information.

## Instructional Credential in History

For information on the single subject instructional credential in history, consult the Graduate School of Education and Information Studies, 1009 Moore Hall (310-825-8328).

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degrees

### Admission

For admission to the Master of Arts program in History, applicants should normally have completed the undergraduate major or its equivalent, have received a Bachelor of Arts degree or its equivalent from an accredited college or university, and have maintained at least a B+ average in upper division work. For the European field, demonstrated proficiency in at least one foreign language (usually French or German) is expected. Prospective students are strongly urged to have proficiency already in two foreign languages. Three letters of recommendation and the scores of the General Test of the Graduate Record Examination (GRE) must be submitted to the department. For applicants who do not meet the grade-point average requirements, admission is granted in exceptional cases where the letters of recommendation, GRE scores, or other factors indicate unusual promise. Applicants may also be admitted with subject deficiencies but such deficiencies must be removed by completing courses in addition to the requirements for an advanced degree program. Applicants who have had a year or more of graduate study at other institutions should have attained a grade-point average of 3.5 or better (on a 4.0 scale) if they wish to work toward the Ph.D. degree. Admission to the department depends on the

number of openings in the field in which the applicant expects to specialize. Applications must be submitted before December 1; notification is made on or before May 1. Students are expected to begin graduate work in the Fall Quarter; deferred admissions are not granted.

The department has no separate application form; it uses the *Application for Graduate Admission* form distributed by the Graduate Admissions Office. In addition, all applicants must submit the UCLA Department of History Applicant Profile Sheet. All materials, including three letters of recommendation, submitted to the history department must be in one envelope. Departmental information may be obtained by writing to the department.

There is no screening examination. Nonhistory majors may be required to take specified courses depending on background and field of specialization. Students are expected to work in the field for which they are admitted. A change of fields after admission requires approval of the relevant admissions committee.

The *Guide to Graduate Study in History* which explains in detail the requirements and procedures of the history graduate program is distributed to all new graduate students at the orientation meeting which takes place during registration week. The guide lists all faculty, their major publications, and descriptions of courses offered during the year. Information on the program and the faculty is on the World Wide Web.

#### **M.A. History/M.L.I.S.**

The history/library and information science master's degree is a concurrent degree program with the Department of History and the Department of Library and Information Science (Graduate School of Education and Information Studies). Applicants wishing to receive the Master of Arts (M.A.) in History and the Master of Library and Information Science (M.L.I.S.) in three years may apply for this program. Applications for admission are reviewed by committees in the Department of History and the Department of Library and Information Science. Further information may be obtained by writing to the Department of History or the Department of Library and Information Science, Graduate School of Education and Information Studies.

#### **Areas of Study**

The comprehensive examination covers one of the following fields: (1) ancient (includes ancient Near East); (2) medieval (includes Byzantine and medieval Jewish history); (3) Europe, 1450 to present (also includes British history, Jewish and Russian history); (4) Africa; (5) Near East (includes Armenia); (6) India and Southeast Asia; (7) China; (8) Japan; (9) Latin America; (10) U.S.; (11) history of science; (12) special fields (students in the history of religions or history of Christianity are normally examined in one of the above fields, but with the approval of the faculty in these fields may petition the graduate guidance and curriculum

committee for an M.A. examination in their field of specialization).

#### **Course Requirements**

The department requires a minimum (and preferably a maximum) of nine upper division and graduate courses in history, at least six of which must be graduate courses. No course in the 300 series may be counted toward this requirement, and only one in the 500 series may be applied. For students in U.S. history, a minimum of seven of the nine courses must be at the 200 level, including at least two two-quarter seminars and History 245. Students in European history must include History 225 and two two-quarter seminars. Africanists must take History 275.

Only one 500-series course may be included toward both the total course requirement and the minimum six graduate (200 series) course requirement. This could be either four units of course 596 or four units of 597.

#### **Comprehensive Examination Plan**

The department follows the comprehensive examination plan. Individual fields specify the fulfillment of the examination requirement by (1) a three-hour written examination designed to assess the candidate's ability to synthesize a broad field of knowledge or (2) the submission of three essays written for at least two different professors as part of the candidate's program of study. At least two of these papers must have been submitted for graduate courses in the 200 series. The U.S. field requires a comprehensive examination in the form of a two two-quarter research papers to be submitted at the end of six quarters of full-time study. (This requirement does not apply to students entering the program with an M.A. in U.S. history.) The European field requires a comprehensive examination in the form of two completed two-term research seminars, together with two completed research papers with the grade of B or better within the period of six quarters of graduate study, and a satisfactory pass in the doctoral written qualifying exam administered during the sixth quarter. The African field requires a three-hour comprehensive examination which is given in May of each year.

The medieval M.A. examination is given in May of each year. First-year graduate students are encouraged to take it at that time, and second-year graduate students must take it. Students who already hold an M.A. degree from another institution (or have comparable academic experience) are expected to take this examination in May of their first year at UCLA. The amount of preparation needed varies according to the student's background. Normally, the best preparation for the examination is to audit, or preferably to take for credit, several of the lecture courses on Western medieval history offered within the department. The questions are broad and general in character, reflecting the extensive familiarities gained through survey courses far more than the intensive knowledge acquired through seminars. The purpose of this examination is diagnostic: to ascertain

that while studying languages and mastering research skills, the student is also making progress in learning the larger outlines of medieval history.

Students in medieval history working with Professor Krekić may satisfy the M.A. examination requirement by the other departmental examination option, namely, the submission of three papers as described in the general regulations.

In order to file for a master's degree, all students must file an Advancement to Candidacy form within the first two weeks of the quarter in which they expect to receive their degree. The comprehensive requirement is graded pass to continue, pass subject to reevaluation, terminal pass, or fail. In cases where the M.A. is awarded with pass subject to reevaluation, the field M.A. committee conducts a special reevaluation of the candidate's progress after no more than three additional quarters of study.

#### **Thesis Plan**

None.

#### **Doctoral Degree**

##### **Admission**

The admission requirements for the Ph.D. program are the same as those for the M.A., but applicants for the doctorate are urged to seek an interview or to correspond with a member of the History faculty in the field in which they intend to work. Applicants may be admitted with subject deficiencies, but such deficiencies must be removed by completing courses in addition to the requirements for an advanced degree.

While no examination is required for admission to the Ph.D. program, the following evaluation procedures determine whether a student may continue to the Ph.D. degree.

For students entering the graduate program with a B.A. degree, an evaluation comparable to the M.A. comprehensive examination must occur within the period of six quarters.

For students entering with a master's degree from another department, evaluation must be completed by the end of three quarters of study in the History Department in order to determine whether or not they are permitted to continue toward the Ph.D. This evaluation is conducted in the same manner as described under the M.A. program.

Students must present to the graduate guidance and curriculum committee a field approval form signed by the faculty member who has agreed to support their work for the Ph.D. according to the following schedule: by the end of the seventh quarter or earlier for those entering with only a B.A. and by the end of the third quarter or earlier for those entering with an M.A. from another department. Students who do not meet the time limits for proceeding to the Ph.D. are subject to dismissal.

The *Guide to Graduate Study in History* which explains the requirements and procedures of

the history graduate program in detail is available in September to all new graduate students who have filed a Statement of Intent to Register. The guide lists all faculty with their major publications and descriptions of courses offered during the year.

For academic counseling, students choose a faculty sponsor who chairs the doctoral committee and guides them in their Ph.D. program. A faculty adviser is assigned to all entering graduate students for the first quarter only.

There is a graduate guidance and curriculum committee consisting of five faculty members and one graduate student, appointed by the chair of the department, which reviews and makes recommendations regarding all doctoral programs and any petitions requesting variations from the program as described in this catalog. The vice chair for graduate affairs is an *ex officio* member of this committee and channels all petitions and programs for review to the committee. The student's chair is normally consulted about petitions and variances.

An annual review of all graduate students is made each Spring Quarter by the graduate guidance and curriculum committee. Letters are written to those students with program or grade-point deficiencies or other academic problems.

Students are encouraged to consult the graduate adviser, a full-time staff member, about requirements and procedures for progress toward the Ph.D. degree.

### Major Fields or Subdisciplines

Ancient Greece; ancient Rome; medieval constitutional and legal; medieval social and economic; medieval ecclesiastical and religious; medieval intellectual and cultural (specialists in medieval history may offer no more than two of these fields in medieval history); Byzantine; Russia since 800; East Central and Southeast Europe since 1450; England prior to 1485; Britain since 1450; the British Empire; ancient Near East; the Near East, 500 to 1500; the Near East since 1500; Armenian; survey of African history; topics in African history (preferably on a regional basis); history of science since 1450; Europe, Renaissance/Reformation; Europe, Renaissance to the French Revolution; Germany since 1450; France since 1450; Italy since 1450; Spain and Portugal since 1450; Europe since 1740; European socioeconomic history; European intellectual and cultural history; psychohistory; China 900 to 1800; China since 1800; early modern Japan; modern Japan; South Asia; Southeast Asia; Latin America, 1492 to 1830; Latin America since 1759; history of religions; Jewish history; history of Christianity; comparative history; U.S.: (1) mastery of the general field of U.S. history sufficient to teach a college-level survey course and (2) a specialized field chosen from the following: Afro-American, American diplomatic, American West, American Indian, Asian Americans, California, history of the South, Civil War and Reconstruction, Colonial, cul-

tural, economic, immigration, intellectual, Jeffersonian and Jacksonian American (1800 to 1850), labor, Mexican-American, social, the new nation (1763 to 1800), 20th century, urban, women's history. Both the general and a specialized field must be offered by specialists in United States history and only two fields in United States history are permitted. Either field 1 or 2 or both may be chosen as minor fields for the Ph.D.

The history of Christianity may be offered as a major or minor field for the doctorate in history. Students may offer this field with emphasis on a particular aspect such as the early church, protestantism, or orthodox Christianity, although by definition they are required to be familiar with the historical New Testament. Where possible, the field is defined as chronologically and geographically coterminous with an existing departmental field. Emphasis in either American Christianity or medieval Latin Christianity counts as an American or medieval field.

To offer a field in the history of Christianity, the student must prepare a written statement defining in detail the parameters of the field and must submit the statement to the graduate guidance and curriculum committee for approval. Before submission the statement must be endorsed by and bear the signatures of the examining faculty member and the chair of the student's Ph.D. committee.

Comparative history Ph.D. students may choose comparative history as one of their four fields. This means choosing one topic across three existing Ph.D. fields. The topic should be chosen with the help of the student's Ph.D. advisers; among possible topics are labor history, women's history, history of religions, economic history, and many others. The geographical/temporal fields covered may correspond to some or all of the student's other three Ph.D. fields. The comparative field is more intensive and involves genuine comparisons. It is highly recommended (and comparative chairs may require) that those majoring in a Western field choose one non-Western field and vice versa. Two or three professors may, if needed, supervise a comparative program, and may help examine the candidate either on the orals or by written examination.

Candidates in the history of science program must select three of the above fields and either the history of medicine or an allied field. They must also demonstrate a detailed knowledge of the substance and historical development of a particular science or a type of engineering or technology as a subfield common to the historical fields.

### Course Requirements

Candidates for the Ph.D. must meet the special requirements for admission to the doctoral program listed above and the general requirements set forth under the Graduate Division. Additionally, the following requirements must be fulfilled: (1) a command of good English, spoken and written; (2) the ability to read at

least two foreign languages (except in the U.S. field where only one foreign language is required); (3) an acquaintance with general history; and (4) completion of at least one continuing two- or three-quarter seminar which must include completion of a substantial research paper.

All students must write a dissertation prospectus (written for credit as History 596 or 597) which is expected to contain (1) a full statement of the dissertation topic; (2) a historiographical discussion of the literature bearing on the topic; (3) a statement of the methodology to be employed; and (4) a survey of the sources sufficient to demonstrate the viability of the topic. The prospectus must be submitted in writing to and be approved by the dissertation adviser prior to the oral part of the qualifying examinations. After approval, copies are given to each member of the examining committee.

The following coursework is required in specific fields: (1) U.S. history — History 245 (History 246A-246B-246C are strongly recommended for all first-year students); (2) European history — History 225; (3) African history — History 275 (unless exempted by petition); (4) medieval history — Latin 130 or 131, Latin 243, and History 219A-219B (may substitute a graded History 596 in paleography for 219A-219B with permission of faculty).

Faculty serving on doctoral committees may require such courses as they deem necessary for preparation for qualifying examinations. Courses taken to fulfill M.A. degree requirements may also be used to satisfy Ph.D. requirements.

### Written and Oral Qualifying Examinations

In the written and oral qualifying examinations students are expected to show not only a mastery of their special subject, but also an extensive knowledge covering the wider field of historical knowledge and an ability to correlate historical data and to explain their significance. These examinations are designed to test not merely factual knowledge, but also power of historical analysis and synthesis, critical ability, and capacity for reflective thinking. Knowledge of the history of any area includes a solid understanding of its historiography and bibliography, its geography, and its political, cultural, economic, and other historical aspects.

In the oral examination, students are examined in four fields, one of which may be an approved field in anthropology, economics, geography, language and literature, philosophy, political science, or other allied subjects. This allied field must be comparable in size and scope to the history fields listed above. Students should select the fields in consultation with their adviser and must receive the department's approval of all four fields no less than six months before the written qualifying examination is taken. In the case of the European field, students must choose their four fields by the quar-

ter after they have successfully passed the doctoral written qualifying examination (i.e., normally by the seventh quarter of residency). To obtain this approval, students should supply the graduate guidance and curriculum committee with the name of the faculty member who has agreed to serve as the sponsor of the doctoral work and with the details of the proposed program. A full-time graduate student must begin the written qualifying examinations no later than the end of the ninth quarter of graduate work.

The written qualifying examination includes the major field only except in the European field which requires a written examination in three fields. In the case of the U.S. and European history, each field administers a written qualifying examination as outlined below. The oral examination covers all four fields (except for the African field) and is normally held after the written examination. In most fields, the oral examination will be held shortly after the written examination or, at the discretion of the doctoral committee, as late as six months after the written examination. For the U. S. and European fields, see below. Both the written and oral examinations are to be considered by the committee as a whole in arriving at a judgment of the student's performance except in the European field. The written qualifying examination is normally prepared and administered by the chair of the committee and read by the entire committee before the oral qualifying examination, except for the U. S. and European fields (see below). All students in the European field take the doctoral written qualifying examination during the sixth quarter in residence.

In the U.S. field students must take the doctoral written qualifying examination after 12 months in residence. Prior to taking the written qualifying examination, students must have secured the agreement of a qualified member of the department in the U.S. field to serve as chair of the doctoral committee. The written examination (not to exceed eight hours, except in the case of the European field) is administered once a year at the beginning of the Fall Quarter. Those failing the examination may retake it on petition the following Spring Quarter. The examination may be retaken only once. The examination committee consists of three faculty members who in the previous year taught History 246A-246B-246C. If any of these faculty members are unavailable, preference is given, in replacing such members, to faculty members who have taught History 246A-246B-246C in recent years. The written examination is intended to test a comprehensive broad understanding of American history both before and after the independence of the U.S. All facets of history (political, social, diplomatic, etc.) are included. An ability to synthesize factual information, sometimes across long chronological periods, is consequently essential. Knowledge of the scholarly literature and of the principal historiographical controversies arising out of it are tested along with the student's interpretive capabilities. Passing of the examination

implies that the student is qualified, in the judgment of the U.S. field, to teach courses in U.S. history at the college level. Questions related to the planning of such courses may appear on the examination.

All students in the European field take the doctoral written qualifying examination *during the sixth quarter in residence*. The European written examination is administered once a year late in the Spring Quarter. Those failing the examination may retake it on petition in the following Spring Quarter. *The examination may be retaken only once*. The entire European faculty in residence during the Spring Quarter administers the examination. The examination is divided into the following sections: Europe, Renaissance and Reformation; Europe, Reformation to French Revolution; Europe since 1740; European Social and Economic History since 1450; European Intellectual and Cultural History since 1450; Russia since 800; Jewish History; East Central and Southeast Europe since 1450; Germany since 1450; Italy since 1450; Spain and Portugal since 1450 (not currently offered), European History of Science since 1450. Students choose three sections in which they are examined. The entire examination lasts one and one-half days. Students entering with a B.A. who fail the doctoral examination will be allowed to complete the M.A. program as outlined. Prior to taking the written qualifying examination, a student must have secured the agreement of a qualified member of the department in the European field to serve as chair of the doctoral committee. The examination is intended to test a comprehensive, broad understanding of European history, both of the modern and early modern periods. Different facets of history (political, social, intellectual, etc.) are included. An ability to synthesize factual information, sometimes across long chronological periods is, consequently, essential. Knowledge of the scholarly literature and of the principal historiographical controversies arising out of it is tested, along with interpretive capabilities. Questions relating to the planning of college-level history courses may appear on the examination. Before taking the written examination, the student must have passed at least one language examination.

At the oral qualifying examination, the student must submit four fields selected to enhance the scope and quality of the dissertation. During the period subsequent to the written examination, a student may select a comparative field, or a field outside Europe or the department. The oral examination concerns the dissertation prospectus and the substantive elements of the four fields as they relate to the prospectus. The oral examination normally takes place at the end of nine quarters of residence but must be taken by the end of the twelfth quarter. The second language examination must be passed before taking the oral examination. Should a student fail the oral examination, he or she must retake it at a time set by the committee within six months. Any variance from time limits must be approved by the European field be-

fore going to the graduate guidance and curriculum committee for final approval.

The four fields of the University Oral Qualifying Examination must be related to the dissertation and are selected to enhance the scope and quality of the dissertation. The oral examination concerns the dissertation prospectus and the substantive elements of the four fields as they relate to the prospectus. The written examination, if failed, must be retaken at the next administration of the examination if the student wishes to continue; if the student fails the oral examination, it must be retaken at a time specified by the doctoral committee, but not to exceed six months. Any variance from these time limits must be approved by the U.S. field before going to the graduate guidance and curriculum committee for final approval. After passing the oral qualifying examination, students are advanced to candidacy and may begin work on their dissertations.

## History

### Lower Division Courses

**1A-1B-1C. Introduction to Western Civilization.** Lecture, two hours; discussion, two hours. Broad, historical study of major elements in Western heritage from the world of the Greeks to that of the 20th century, designed to further beginning students' general education, introduce them to ideas, attitudes, and institutions basic to Western civilization, and acquaint them, through reading and critical discussion, with representative contemporary documents and writings of enduring interest. **1A.** Ancient Civilizations from Prehistory to ca. A.D. 843; **1B.** Circa A.D. 843 to ca. 1715; **1C.** Circa 1715 to the Present.

**1AH-1BH-1CH. Introduction to Western Civilization (Honors).** Lecture, two hours; discussion, two hours. Honors sequence parallel to courses 1A-1B-1C.

**2A. Power, Ethics, and Technological Change.** (Formerly numbered 98.) Lecture, three hours; discussion, two hours. Examination of historical and theoretical relationships between ethical behavior, corporate power, and technological change. Topics include engineering practice and business profits, gender and engineering cultures, product liability and consumer safety, and engineering and computer ethics. Historical case studies include Three Mile Island, Chernobyl, the DC-10, and Challenger Disaster. P/NP or letter grading.

**2B. Social Knowledge and Social Power.** Lecture, three hours; discussion, two hours. Historical introduction to social thought and the social sciences since the 18th century. Consideration of the great social thinkers, including Smith, Mill, Comte, Marx, and Freud. Examination of practical and political uses of social science by addressing such topics as psychology and mental testing, anthropology and race, cost-benefit analysis, measurement and creation of norms, definition of sex and gender, and cultural construction of expertise and objectivity. P/NP or letter grading.

**3A-3B-3C. Introduction to History of Science.** Lecture, three hours; discussion, two hours. History majors may not apply these courses on science general education requirements:

**3A. Scientific Revolution.** Survey of the beginnings of physical sciences involving transformation from Aristotelian to Newtonian cosmology, mechanization of the natural world, rise of experimental science, and origin of scientific societies.

**3B. Physical Sciences since the Enlightenment.** Broad survey of development of ideas in classical and modern physical science since Newton. Theories of matter, but more specifically chemistry, thermodynamics, electromagnetic theory of light, energy conservation, relativity, and quantum mechanics.

**3C. Biological Sciences, 1800 to 1955.** Survey of development of biological sciences from the period of Bichat and Müller to discovery of the double helix.

**3CH. Introduction to History of Science (Honors).** Honors course parallel to course 3C. P/NP or letter grading.

**3D. Themes in History of Medicine.** Lecture, three hours. Not open to freshmen. Limited to 30 students. Examination, through illustrated lectures and focused discussion of primary sources, of five important themes in development of modern medicine: nature of diagnosis, emergence of surgery, epidemics, conception and treatment of insanity, and use of medical technology.

**4. Introduction to History of Religions.** Lecture, three hours; discussion, two hours. Discussion of various systems, ideas, and fashions of thought that have dominated Western approaches to religions of the world since antiquity. Survey of development from classical Greek and early Christian theories to modern history with its discoveries of the religions of India, China, ancient Near East, etc., and the problem of the encounter of various religions in the 19th and 20th centuries.

**5A-5B. Survey of British History.** Lecture, three hours; discussion, two hours. Designed for students wanting general orientation to British history and those in English literature and prelaw. Survey of history of England and (after the union between England and Scotland) Great Britain. **5A.** Middle Ages to the Glorious Revolution in 1688; **5B.** 1688 to the 20th Century.

**5AH. Survey of British History (Honors).** Lecture, three hours; discussion, two hours; outside study, 10 hours. Honors course parallel to course 5A. P/NP or letter grading.

**8A. Culture, Ethnicity, and Gender in Early Latin America.** Lecture, three hours; discussion, two hours. General introduction to Latin American history from conquest to independence, with emphasis on role of ethnicity and gender in the emerging society and culture.

**8B. Political Economy of Latin American Underdevelopment, 1750 to 1930.** Lecture, three hours. Interaction of precapitalist and modern modes of social organization in Latin American history, particularly during the "long" 19th century, by focusing on relationship between economic change, social and cultural structures, and politics in the region. P/NP or letter grading.

**8BH. Political Economy of Latin American Underdevelopment, 1750 to 1930 (Honors).** Lecture, three hours; discussion, three hours. Honors course parallel to course 8B. P/NP or letter grading.

**8C. Latin American Social History.** Lecture, three hours; discussion, two hours. Historical and contemporary perspective of role of ordinary people in Latin American society. Each lecture/film session centers on a major Latin American movie illustrative of a theme in social history.

**8CH. Latin American Social History (Honors).** Lecture, three hours; discussion, two hours. Honors course parallel to course 8C.

**9A-9D. Introduction to Asian Civilizations.** Lecture, three hours; discussion, two hours:

**9A.** History of India. Introductory survey for beginning students of major cultural, social, and political ideas, traditions, and institutions of Indic civilization.

**9C.** History of Japan. Survey of Japanese history from earliest recorded time to the present, with emphasis on development of Japan as a cultural daughter of China. Attention to manner in which Chinese culture was Japanized and aspects of Japanese civilization which became unique. Creation of the modern state in the last century and impact of Western civilization on Japanese culture.

**9CH.** History of Japan (Honors). Honors course parallel to course 9C.

**9D.** History of the Near and Middle East. Introduction to history of the Muslim world from advent of Islam to the present day.

**10A-10B. Introduction to Civilizations of Africa.** Lecture, three hours; discussion, two hours. Intended for students with general interest in Africa, but also strongly recommended for those intending to take upper division courses in African history. Exploration of African cultures on a thematic basis within a wider framework of political change over time.

**10BH. Introduction to Civilizations of Africa (Honors).** Lecture, three hours; discussion, two hours. Honors course parallel to course 10B.

**11A-11B. History of China.** Lecture, three hours; discussion, two hours. **11A.** To 1000. Survey of early history of China—genesis of characteristic Chinese institutions and modes of thought from antiquity to 1000. Focus on social, political, intellectual, and economic aspects of early and middle empires. **11B.** 1000 to 1950. Survey of later history of China—evolution of characteristic Chinese institutions and modes of thought from 1000 to 1950. Focus on social, political, intellectual, and economic aspects of late empires and rise of modern China in the contemporary era.

**11AH-11BH. History of China (Honors).** Lecture, three hours; discussion, two hours. Honors sequence parallel to courses 11A-11B.

**13A-13B-13C. History of the U.S. and Its Colonial Origins.** Lecture, two hours; discussion, two hours. Strongly recommended for history majors planning to take more advanced courses in U.S. history. Cultural heritages, political institutions, economic developments, and social interactions which created contemporary society. P/NP or letter grading. **13A.** Colonial Origins and First Nation Building Acts; **13B.** 19th Century; **13C.** 20th Century.

**20. World History: Government and Society in Ancient Eurasia.** Lecture, three hours; discussion, two hours. Examination of earliest civilizations of Asia, North Africa, and Europe—Mesopotamia, Egypt, Israel, India, China, Greece, and Rome—from development of settled agricultural communities until about A.D. 500, with focus on rise of cities, organization of society, nature of kingship, writing and growth of bureaucracy, varieties of religious expression, and linkage between culture and society. P/NP or letter grading.

**21. World History, 1200 to 1800.** Lecture, three hours; discussion, two hours; outside study, seven hours. Exploration of early modern world through "eyewitness" accounts, with focus on both humanistic and social science aspects of historical change, specifically addressing social, political, economic, and cultural spheres of activity important in world affairs before American and French Revolutions. P/NP or letter grading.

**22. Contemporary World History, 1870 to the Present.** Lecture, three hours; discussion, two hours. Broad thematic survey of world history since the mid-19th century. Examination, through lecture and discussion, of global implications of imperialism, total war, nationalism, cultural change, decolonization, changes in women's rights and roles, and eclipse of world communism. Designed to introduce students to historical study, help them understand issues and dilemmas facing the world today, and prepare them for more in-depth work in history of specific regions or countries of the world. P/NP or letter grading.

**M70. Survey of Medieval Greek Culture.** (Same as Classics M70.) Lecture, three to four hours. Classical roots and medieval manifestation of Byzantine civilization: political theory, Roman law, pagan critique of Christianity, literature, theology, and contribution to the Renaissance (including discovery of America).

**88A-88U. Lower Division Seminars (5 units each).** Seminar, three hours. Limited to 15 freshmen/sophomores. Open to nonhistory majors. Readings, discussions, papers. Sign-ups and descriptions of offerings each term are available in undergraduate counselor's office (6248 Bunche Hall). Ten units may be taken for credit. **88A.** Ancient Greece; **88B.** Ancient Rome; **88C.** Medieval; **88D.** Early Modern Europe; **88E.** Modern Europe; **88F.** Russia/Eastern Europe; **88G.** Britain; **88H.** U.S.; **88I.** Latin America; **88J.** Near East; **88K.** India; **88L.** China; **88M.** Japan; **88N.** Africa; **88O.** Science/Technology; **88P.** History of Religions; **88Q.** Theory of History; **88R.** Jewish History; **88S.** Armenia and the Caucasus; **88T.** Southeast Asia; **88U.** Psychohistory.

**97H. Three Trials.** Discussion, three hours. Limited to 20 students. Intensive study of three trials, each of which led to the execution of the accused: Socrates, Jesus of Nazareth, and Joan of Arc. View of each trial as a conflict between legitimate but irreconcilable interests and world views. For each, class constitutes itself as a court (prosecution, defense, jury) and reviews the verdict of original trial.

**99. Introduction to Historical Practice.** (Formerly numbered 101.) Seminar, three hours. Discussion classes of no more than 15 students. Introduction to study of history, with emphasis on historical theory and research methods. P/NP or letter grading.

## Upper Division Courses

Requisite for all upper division courses is upper division standing or consent of instructor, unless otherwise stated. Certain graduate courses (200 series) are open to students with upper division standing and consent of instructor.

Upper division lecture courses in the History Department are usually scheduled for three hours. Periodically, additional one-hour discussion sections are offered with the lectures. Consult the quarterly *Schedule of Classes* to determine the offerings for each term.

**100A. History and Historians.** Study of historiography, including intellectual processes by which history is written, results of these processes, and sources and development of history. Attention also to representative historians.

**100B. History and Contemporary Theory.** Survey of main sources and trends of contemporary theory, from Saussure's linguistics to recent feminist theories, in texts that inform much of the most recent historiographical directions and debate.

**102. Explorations in Psychoanalysis and History.** Art of psychological and historical interpretation; assessment of recent writings in the field of psychohistory.

**M103A-M103B. Historical Archaeology.** (Formerly numbered M103.) (Same as Anthropology M115A-M115B.) Lecture, three hours. P/NP or letter grading.

**M103A.** World Perspective. Historical archaeology requires appreciation of historical sources, archaeology, and material culture. Thematic emphasis, with exploration of breadth of the discipline both in the Old World and the Americas. **M103B.** American Perspective. Emphasis on historical archaeology in North America, particularly to some practical applications.

**M104A-M104B. Ancient Egyptian Civilization.** (Same as Ancient Near East M104A-M104B.) Lecture, three hours. Course M104A is not prerequisite to M104B. Political and cultural institutions of ancient Egypt and ideas on which they were based. **M104A.** Chronological discussion of Prehistory, the Old and Middle Kingdom. **M104B.** The New Kingdom and the Late period until 332 B.C.

**M105. History of Ancient Mesopotamia and Syria.** (Same as Ancient Near East M105.) Lecture, three hours. Political and cultural development of the "Fertile Crescent," including Palestine, from the Neolithic to the Achaemenid period.

**106A-106B-106C. Survey of the Middle East from 500 to the Present.** Background and circumstances of rise of Islam, creation of the Islamic Empire, and its development. Rise of Dynastic Successor States and the Modern Nation States. Social, intellectual, political, and economic development. **106A.** 500 to 1300; **106B.** 1300 to 1700; **106C.** 1700 to the Present.

**107A-107B. Islamic Civilization.** **107A.** Premodern Islam. Origins of Islamic civilization, Muhammad and the Qur'an; development of Islamic doctrine, ritual, piety and law, sectarian Islam, and mysticism. **107B.** Islam in the Modern World. Reform movements, legal issues, sociopolitical trends, movements of opposition.

**108A-108B. History of the Arabs.** Course 108A is prerequisite to 108B. Political, social, intellectual, and economic history of the Arabs from the 18th century to the present.

**109A-109B. History of North Africa from the Moslem Conquest.** **109A.** To 1578; **109B.** 1578 to the Present.

**109C. History of Islamic Iberia.** Survey of political, social, economic, religious, artistic, and literary history of an Islamic culture in Western Europe, with special attention to ethnic and religious pluralism in premodern society and transmission of science and philosophy to Christian Europe. P/NP or letter grading.

**110A-110B. Iranian History.** Political, social, and cultural history of Persia. **110A.** Islamic Iran to 1800; **110B.** Iran from 1800 to the Present.

**111A-111B. History of the Turks.** Survey of society, government, and political history of the Turks from earliest times to the present. P/NP or letter grading.

**111A.** Origins to 1808. Turkish origins, early Central Asian and Middle Eastern states. Rise and fall of the Ottoman Empire. **111B.** 1808 to the Present. Modernization of the Ottoman Empire, 1808-1923. The Turkish Republic. The Turks in the world.

**111C. History of Jews in the Ottoman Empire and the Turkish Republic, 1300 to 1923.** Preliminary introduction to the Jews in Byzantium and the Islamic world before the Ottoman conquest, followed by discussion of Jewish communities and Judaism in Southwestern Europe, Anatolia, and the Middle East while they were under Ottoman rule (1300 to 1923) and in the Turkish Republic since 1923. P/NP or letter grading.

**112A-112B-112C. Armenian History.** **112A.** Armenia in Ancient and Medieval Times, 2nd Millennium B.C. to A.D. 11th Century; **112B.** Armenia from the Cilician Kingdom through the Periods of Foreign Domination and National Stirrings, 11th to 19th Centuries; **112C.** Armenia in Modern and Contemporary Times, 19th and 20th Centuries. The Armenian question and genocide, national republic, Soviet Armenia, and the dispersion.

**C112D. Introduction to Armenian Oral History.** Lecture/discussion, three hours. Uses and techniques of Armenian oral history; preinterview, interview, and postinterview procedures; methods of compilation and evaluation. Field assignments and interviews. May be concurrently scheduled with course C212.

**113. The Caucasus under Russian and Soviet Rule.** Survey of political, economic, social, and cultural history of the Caucasus region since 1801. Georgian, Armenian, and Azerbaijani response to Russian and Soviet rule; the nationality question and the Soviet national republics.

**114. Topics in Middle Eastern History.** Examination of major issues in history of Middle East. P/NP or letter grading.

**115A-115B-115C. History of Ancient Mediterranean World.** **115A.** Survey of history of the ancient East from earliest times to foundation of the Persian Empire. **115B.** History and institutions of the Greeks from their arrival to the death of Alexander. **115C.** History and institutions of Rome from founding of the city to the death of Constantine.

**116A-116B. History of Ancient Greece.** **116A.** Rise of the Greek City-State. Emphasis on archaic period and early classical age through the Persian Wars. **116B.** Classical Period. Clash between Athens and Sparta, consequent rise of Macedonia, and aftermath of Alexander the Great.

**117A-117B-117C. History of Rome.** (Formerly numbered 117A-117B.) P/NP or letter grading. **117A.** To Death of Caesar. Emphasis on development of imperialism and on constitutional and social struggles of the late republic. **117B.** From Death of Caesar to the Time of Constantine. The early empire treated in more detail, supplemented by survey of social and economic changes in the 3rd century. **117C.** Transformation of the Classical World. Political, cultural, and religious history of the Mediterranean in late antiquity, from crisis of Roman Empire in the 3rd century to barbarian and Arab invasions and beginning of medieval states and societies in the 7th century.

**118. Topics in Ancient History.** Introduction to topics in Greek and Roman history, including Roman law, ancient Greek and Roman slavery, world of Caesar Augustus, Greek democracy, and Alexander the Great. May be repeated for credit. P/NP or letter grading.

**119. The Christian Church, 100 to 1517.** Constitutional, political, and economic history of the Church: Christianization of Roman Empire and Germanic kingdoms; governance and institutions of the Church; relations between Church and monarchy; the high tide of papalism; crises of authority on eve of the Reformation. P/NP or letter grading.

**120. The Christian Religion, 100 to 1350.** Religious experience of Christians — conversion, doctrine, belief, heresy, spirituality, worship, liturgy, and art. Religious life of lay Christians, as well as that of the Church's institutional, intellectual, and spiritual leaders.

**121A-121B. Medieval Europe.** Basic introduction to Western Europe from Latin antiquity to the age of discovery, with emphasis on medieval use of Greco-Roman antiquity, history of the manuscript book, and growth of literacy. **121A.** 400 to 1000; **121B.** 1000 to 1500.

**121C. Medieval Civilization: Mediterranean Heartlands.** Survey of Western Mediterranean Europe, social/economic/cultural within a political framework, including its relation with other cultures.

**121D. Medieval People: The 13th Century.** Movements and creative contributions to Western culture in this central century of the Middle Ages, as seen in its representative men and works.

**M122. Power and Imagination in Byzantium.** (Same as Classics M170.) Lecture, three hours. Prerequisites: courses M70 or 123A-123B. Study of relations of authority and the intelligentsia in the highly centralized Byzantine Empire. Topics include criticism of the emperor, iconoclasm, intellectual freedom, attempts at reform.

**123A-123B. Byzantine History.** Political, socioeconomic, religious, and cultural continuity in the millennial history of Byzantium. Reforms of Diocletian. Byzantium's relations with Latin Europe, Slavs, Sasanids, Arabs, and Turks.

**124A-124B. East-Central Europe.** **124A.** The Long 19th Century, 1780 to 1914. Analysis of characteristics of peripheral 19th-century capitalism, effort to modernize and catch up, and factors and consequences of its partial failure in the economy, politics, and culture. **124B.** The Short 20th Century, 1918 to 1990. Analysis and interpretation of stormy history of crisis zone of Europe where wars, revolts and revolutions, different types of extremisms led to a historical detour: 70 years of departure from Western values and at last an effort to turn back to them.

**124C. East-Central Europe in Transition, 1988 to 1993.** State-socialism and Soviet domination collapsed in East-Central Europe in 1989. Analysis of cause and consequence of the collapse, as well as the road of transformation in seven (now 12) countries of the region; international circumstances and domestic political, social, and economic processes. Ideology of transition versus reality of democratization, marketization, and privatization; free choice versus determinant factors. Scenarios for the future. P/NP or letter grading.

**125A-125F. History of Modern Europe.** P/NP or letter grading:

**125A.** Renaissance and Reformation, 1450 to 1660. Reorganization of power, new forms of representation, and discourses about rule and obedience in Europe from the mid-15th through 16th century; popular culture; peasant society; refashioning of religion and power; localization.

**125B.** Baroque Culture and Absolutist Politics, 1600 to 1715. Changing nature of state and social domination; redeployment of military violence; strategies of population discipline; absolutism and baroque culture; new forms of bureaucratic intervention; representation of the family, sexuality, and the body; witch persecutions.

**125C.** Old Regime and Revolutionary Era, 1715 to 1815. Enlightened absolutism and reform, challenge of new political and economic ideas, crisis of the Old Regime, impact of French Revolution and Napoleonic empire.

**125D.** Bourgeois Century, 1815 to 1914. Restoration politics, Industrial Revolution, uprisings of 1848, unification of Germany and Italy, imperialism, rise of socialism, population growth, changes in social structure, origins of World War I.

**125E.** Era of Total War, 1914 to 1945. World War I, interwar period, and World War II. Social, cultural, political, and economic aspects, with focus on strain between model of parliamentary democracy and dynamics of mass politics (e.g., Bolshevik Revolution, Italian Fascism, national socialism, and Spanish Civil War).

**125F.** World War II and Its Aftermath, 1939 to the Present. World War II, origins and persistence of the Cold War, reconstruction in the West, de-Stalinization, decolonization, crisis of the welfare state, background to and course of the 1989 revolutions, current political configuration.

**126A-126F. Cultural and Intellectual History of Modern Europe.** (Formerly numbered 126A-126E.) Climates of taste and climates of opinion. Educational, moral, and religious attitudes; art, thought, and manners of the time in historical context. P/NP or letter grading. **126A.** 15th Century. Renaissance cultural and intellectual history of Europe. Central themes include comparative history of ideas, theory and practice of art and architecture, civic and religious humanism, religious experience, and new cultural genres of history and philological scholarship. **126B.** 16th Century. (Formerly numbered 126A.) **126C.** 17th Century. (Formerly numbered 126B.) **126D.** 18th Century. (Formerly numbered 126C.) **126E.** 19th Century. (Formerly numbered 126D.) **126F.** 20th Century. (Formerly numbered 126E.)

**127A-127B-127C. War and Diplomacy in Europe.** (Formerly numbered 127A-127B.) P/NP or letter grading. **127A.** 1650 to 1815. Survey of military and diplomatic history, seen in relation to social and economic developments and growth of the state. **127B.** 1815 to 1945. Balance of power; growth of the nation state; imperial and colonial rivalries; the two World Wars. **127C.** The Cold War. Relations of the West, Soviet Union, and the world from 1945 to 1991. Origins, development, and end of power-political, military, and ideological confrontations between the superpowers and their allies and clients in Europe, Asia, and Latin America.

**128A-128B-128C. History of France.** **128A.** France, 1500 to 1715. Social history of 16th- and 17th-century France, including growth of monarchy, wars of religion, peasant uprisings, popular culture, Catholic resurgence, Louis XIV and achievements in arts and literature. **128B.** France, 1715 to 1871. "Ancien Régime" and the time of revolutions. Critical discourse leading to the French Revolution, collapse of the state, Napoleonic era, reconstruction of society through the monarchies and revolutions of the 19th century. **128C.** The Making of Modern France, 1871 to the Present. From oligarchy to democratic bureaucracy in two wars and three republics.

**129A. Baroque and Enlightenment Germany.** (Formerly numbered 129A-129B.) Development of state institutions, culture, and society in Central Europe from end of Thirty Years' War to end of Napoleonic Wars. Consideration of absolutism as a political system, and baroque and Enlightenment cultures as new discourses on power and hierarchy. P/NP or letter grading.

**129B. Nationalism and Modernization in 19th-Century Germany.** (Formerly numbered 129C.) Problems of class society and state formation, emancipation, assimilation, growth of national consciousness, emergence of a "bourgeois public sphere," dynamics of gender in civil society and political life, post-Napoleonic tensions between reform and reaction, 1848, and national unification. P/NP or letter grading.

**129C. 20th-Century Germany.** (Formerly numbered 129D.) Transitions that Germany has faced during this century: two world wars, shift from monarchy to republic to national socialism to a "divided nation," and finally "reunification." Consideration of political, social, economic, and cultural spheres. P/NP or letter grading.

**130A-130B-130C. Europe in the Age of Revolution, 1750 to 1850:**

**130A.** End of the Old Regime. Economic development from ca. 1750. The agrarian revolution. The Enlightenment: social criticism and political economy. Intellectual origins of the French Revolution. New sensibility: rococo, neoclassicism, proto-Romanticism. First signs of discontent: Geneva, Corsica, Poland. American war of independence and its effect on the European state-system; its intellectual effects.

**130B.** Crisis of the Old Regime and the Revolution. The revolution in France, 1787 to 1799. Spread of revolution to other parts of Europe and varying responses. Impact of war on revolutionary France after 1792 and spread of the revolution by military force. Jacobinism in France and outside. Parallel movements abroad (e.g., Ireland, Haiti, Poland). Satellite regimes set up in Europe.

**130C.** Napoleonic Europe and the Restoration. Napoleon's ascendancy in France from 1799: internal effects. Restructuring of Europe under Napoleon and nationalist reactions. Industrial and political change in Britain: Anglo-French world rivalry to 1815. The restoration: what could be restored and what could not. Rising national consciousness against Metternich's system. Continuing revolutionary tradition: 1821, 1830, 1848. Romanticism at its apogee. Conclusion: how world of 1850 differed from that of 1750.

**131A-131D. History of Russia.** P/NP or letter grading:

**131A.** From the Origins to the Rise of Muscovy. Kievan Russia and its culture, Appanage principalities and towns; the Mongol invasion; unification of the Russian state by Muscovy, Autocracy and its Servitors; serfdom.

**131B.** Imperial Russia from Peter the Great to Nicholas II. Westernization of state and society; centralization at home and expansion abroad; peasant problem; beginnings of industrialization; movements of political and social protest; non-Russian peoples; political reforms and social changes; Revolution of 1905; Russia in World War I; fall of the old regime.

**131C.** Revolutionary Russia and the Soviet Union. The Revolutions of 1917, Civil War, consolidation of the Bolshevik Regime; succession crisis and ascendancy of Stalin, collectivization and industrialization; foreign policy and World War II; death of Stalin, de-Stalinization, developments since; stagnation or stability?

**131D.** Culture and Society in Imperial Russia. Recommended (but not prerequisite): course 131B or Russian 99A or 119. Thematic examination of culture and society in Russia during era of state-sponsored Westernization (1689 to 1917). Topics include nobility, peasantry, and village life from serfdom to postemancipation era, urban society, working-class life and thought, women, clergy, religion, popular culture, accommodation, and resistance.

**132A-132B. History of Italy.** **132A.** 1559 to 1848. Counter-Reformation and absolutism, Enlightenment reforms, revolutionary era, and first phase of the Risorgimento. **132B.** 1848 to the Present. Political, economic, social, diplomatic, and ideological developments.

**133A-133B. Social History of Spain and Portugal.** **133A.** Age of Silver in Spain and Portugal, 1479 to 1789. Development of popular history in the Iberian Peninsula. Emphasis on peasants and urban history, gold routes, slave trade, history of women, and development of different types of collective violence. **133B.** Rebellion and Revolution in Modern Spain and Portugal, 1789 to the Present. Spain's position in Europe and its potentialities for social change discussed through investigations of urban history, agrarian social structure, history of women, problems of slow industrial development, imperialism, anarchism, and labor history.

**134A. Southeastern Europe, 500 to 1500.** Political, economic, and cultural survey of the independent Balkan states in the Middle Ages.

**134B. Southeastern Europe, 1500 to 1918.** The Balkans under Ottoman rule, movements of national liberation, and formation of nation states.

**135A-135B. Marxist Theory and History.** Course 135A is generally prerequisite to 135B. Introduction to Marxist philosophy and method; conception of historical stages; competing Marxist analyses of transition from feudalism to capitalist economy via reading *Capital*; theory of politics and state in relationship to historical interpretation of 19th-century European revolutions; capitalist crises.

**136. Topics in European History.** (Formerly numbered 136A-136Z.) Integrated introduction to important aspects of European history, with emphasis on a specific topic within a broad framework. May be repeated for credit. P/NP or letter grading.

**136J. History of Prostitution in Europe.** Use of prostitution as an instrument to explore the position of women in European history from ancient Greece to the present. Examination of changes in government policy, shifts in organization of the sex trade, differing representations of prostitutes in art and literature, and role of venereal disease in shaping attitudes toward mercenary sex. P/NP or letter grading.

**137A-137B-137C. History of Women in Europe.** **137A.** Prehistory to 1348. History of women in ancient Greece, Rome, and the Middle Ages. Topics include women in Greek mythology and life, Roman Empire, Christianity, convents, courtly love. **137B.** 1348 to 1814. History of women from the Renaissance to the end of the French Revolution. Topics include women of Renaissance Italy, women in the Protestant and Catholic Reformations, witchcraft, and the Enlightenment and French Revolution. **137C.** 1814 to the Present. Topics include Victorian women; purity movements; suffrage; role of women in World War I, Russian Revolution, and the Nazi State; "second" feminism.

**138A-138B. Topics in Medieval English History.** Topics include the village community and economy, family and landholding, Church and society, war, politics, and feudal relations.

**139. Renaissance England.** Culture and society. Emphasis on literary culture (Elizabethans, Jacobean, Carolines), with readings and lectures on different aspects of political and economic life as required for serious understanding of the culture.

**141A-141B-141C. History of Britain.** Analysis of British economy, society, and polity, focusing on dynamics of both stability and change. P/NP or letter grading. **141A.** Tudor-Stuart Times, 1485 to 1715. Political, socioeconomic, religious, and cultural history of Britain under the Tudors and Stuarts. Topics include Reformation, transformation of the economy, establishment of overseas colonies, 17th-century political upheavals and their impact on political and socioeconomic structures. **141B.** Making of Modern Britain, 1715 to 1867. Social, economic, political, and cultural history of Britain from Hanoverian revolution in politics to advent of mass democracy in mid-Victorian era. Themes include social change under pressure of industrialization, emergence of first British Empire, loss of America, shifts in religious and social position. **141C.** Modern Britain since 1832.

**142A-142B. British Empire since 1783.** Political and economic development of the British Empire, including evolution of colonial nationalism, development of the commonwealth idea, and changes in British colonial policy.

**143. History of Canada.** Survey of growth of Canada into a modern state from its beginnings under the French and British colonial empires.

**144. History of Australasia.** History of Australia and New Zealand from the European settlement, with emphasis on interrelationships between settlers and aborigines; comparisons and contrasts between the Australian and New Zealand experience.

**145A. Colonial America, 1600 to 1763.** Examination of the molding of an American society in English North America from 1600 to 1763. Emphasis on interaction of three converging cultures: Western European, West African, and American Indian.

**145B. Revolutionary America, 1760 to 1800.** Inquiry into origins and consequences of the American Revolution, nature of the revolutionary process, creation of a constitutional national government, and development of a capitalist economy. P/NP or letter grading.

**146A-146B. U.S., 1800 to 1850.** **146A.** Jeffersonian America. Jeffersonian Republican ascendancy and Era of Good Feelings, 1800 to 1828; disintegration of Federalist opposition; testing of American nationality in the second war with Britain; beginnings of transportation and industrial revolutions; restructuring of politics in an increasingly egalitarian age. **146B.** Jacksonian America and Beyond. "Jacksonian Revolution" and its aftermath, 1829 to 1850; problem of national power versus state sovereignty; problems of rapid social change through industrialization and urbanization; reform impulse; antislavery movements; territorial expansion as focus for sectional rivalry.

**147A. U.S., Civil War and Reconstruction.** Rise of sectionalism, antislavery crusade; formation of the Confederate States; war years; political and social reconstruction.

**147B. U.S., 1875 to 1900.** American political, social, and institutional history in a period of great change. Emphasis on the altering concepts of role of government and responses to that alteration.

**147C. American South, 1877 to the Present.** Analysis of political, economic, social, intellectual, and cultural history of the South from cotton belt to Sunbelt. Topics include origins of segregation, sharecropping, Southern politics, Southern culture, and civil rights movement.

**148A-148B. U.S., 20th Century.** Political, economic, intellectual, and cultural aspects of American democracy. **148A.** 1900 to 1928; **148B.** 1929 to 1945.

**148C. U.S. since 1945.** History of political, social, and diplomatic developments that have shaped the U.S. since 1945.

**149A-149B. American Economic History. 149A.** 1790 to 1910. Roles of economic forces, institutions, individuals, and groups in promoting or impeding effective change in the American economy, 1790 to 1910. During this period the technical skeleton of the modern industrial structure was formed. Why and how American economy evolved into a dual economy, characterized by a center of firms large in size and influence and a periphery of smaller firms. **149B.** 1910 to the Present. Dynamics of change in the dual economy, focusing in greater detail on interrelationships between macro and micro developments in the economy and on the growing interdependency between the U.S. and world economy, 1910 to the present.

**150A-150B. Intellectual History of the U.S.** Principal ideas about humanity and God, nature and society, which have been at work in American history. Sources of these ideas, their connections with one another, their relationship to American life, and their expression in great documents of American thought.

**150C. History of Religion in the U.S.** Consideration of the religious dimension of people's experience in the U.S. Examination of a number of religious traditions which have been important in this country, with emphasis on relating developments in religion to other aspects of American culture.

**151A-151B. Constitutional History of the U.S. 151A.** Origins and Development of Constitutionalism in the U.S. Particular emphasis on framing of the Federal Constitution in 1787 and its subsequent interpretation. Judicial review, significance of the Marshall Court, and effects of slavery and the Civil War on the Constitution. **151B.** Constitutionalism since the Civil War. Particular emphasis on development of the Supreme Court, due process revolution, the Court and political questions, and the fact of judicial supremacy within self-prescribed limits.

**152A-152B. American Diplomatic History. 152A.** Establishment of an independent foreign policy, territorial expansion of the U.S., and emergence of a world power. **152B.** Role of the U.S. in the 20th-Century World.

**152BH. American Diplomatic History (Honors).** Lecture, three hours; discussion, one hour. Role of the U.S. in the 20th-century world.

**M153. The U.S. and the Philippines.** (Same as Asian American Studies M153.) Lecture, three hours. Recommended (but not prerequisite): courses 190A-190B, 190C. Examination of complex interrelationships between U.S. colonialism, Philippine nationalism, history or Filipino Americans, and Philippine diaspora in the 20th century.

**154A-154B. U.S. Urban History. 154A.** U.S. Cities: Overview. Demographic, geographic, political, economic, and social development of U.S. cities in relation to broad trends in U.S. history as well as to their own more special histories. Emphasis on mastery of facts and chronology, and awareness of major theoretical issues and fundamental concepts in urban history. **154B.** Topics in U.S. Urban History. Prerequisite: course 154A. Exploration of one aspect of U.S. urban history in depth without having to attend to basic chronology or geography. Topics include crime and police, urban economics, and urban government. Students do primary research papers based on local materials in addition to written examinations.

**154C-154D. History of American Architecture and Urban Planning, 1600 to the Present.** Aspects of American cultural history as explored through architecture, urban planning, and allied arts, with emphasis on development of an architectural consciousness in America, ways in which the built environment has affected its users and observers, and extent to which it has reflected their values and ways of living. **154C.** 1600 to 1890; **154D.** 1890 to the Present.

**155A-155B. American Working Class Movements.** Major episodes in social, trade union, and cultural history of the American working class from Colonial times to the present, emphasizing both organized and unorganized labor, history of the Knights of Labor, A.F. of L. and C.I.O., and development of labor politics.

**156A-156B. American Social History, 1750 to 1960.** Historical analysis of American society and culture, with emphasis on the family, religious values, Afro-American life, women's work, urbanization and industrialization, immigration and nativism, and movements for social reform. **156A.** 1750 to 1860; **156B.** 1860 to 1960.

**156C-156D-156E. Social History of American Women.** Survey of major demographic, economic, social, and intellectual factors shaping the lives of women in families, at work, and in larger social collectivities. Emphasis on class, regional, racial, and ethnic comparisons. **156C.** Colonial and Early National, 1600 to 1820; **156D.** Victorian and Industrial, 1800 to 1920; **156E.** 20th Century, 1900 to 1975.

**156F-156G. History of the American Family.** Perspective on the contemporary American family through study of its development over the course of four centuries. Topics include Western European origins, sex roles, child-rearing, sexuality, work patterns. Emphasis on class, racial, ethnic, and regional variations. **156F.** 1600 to 1870; **156G.** 1870 to 1990.

**156H. Medicine and Society in 19th-Century America.** Therapeutics, theories of disease, and medical science scrutinized with the understanding that these are never value-neutral, but are shaped by social structures of which they are products. Why have doctors become so powerful and over whom did they wield power in the 19th century?

**157A-157B. North American Indian History.** History of Native Americans from contact to the present, with emphasis on historical dimensions of culture change, Indian political processes, and continuity of Native American cultures. Focus on selected Indian peoples in each period. P/NP or letter grading. **157A.** Precontact to 1830; **157B.** 1830 to the Present.

**M158A. Comparative Slavery Systems.** (Same as Afro-American Studies M158A.) Examination of the slavery experience in various New World slave societies, with emphasis on outlining similarities and differences among the legal status, treatment, and slave cultures of North American, Caribbean, and Latin American slave societies.

**M158B-M158C. Introduction to Afro-American History.** (Same as Afro-American Studies M158B-M158C.) Survey of the Afro-American experience, with emphasis on the three great transitions of Afro-American life: transition from Africa to New World slavery, transition from slavery to freedom, and transition from rural to urban milieu.

**158D. Afro-American Urban History.** Examination of Afro-American urban life prior to 1945, with emphasis on transformation from slavery to freedom and shift from Southern to Northern areas. Forces which both propelled Afro-Americans to the cities and which also inhibited their adjustment to them.

**M158E. African American Nationalism in First Half of the 20th Century.** (Formerly numbered 158E.) (Same as Afro-American Studies M158E.) Critical examination of the African American search in first half of the 20th century for national/group cohesion through collectively built institutions, associations, organized protest movements, and ideological self-definition. P/NP or letter grading.

**M159A. History of the Chicano Peoples.** (Same as Chicana and Chicano Studies M159A.) Survey lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent (Indio-Mestizo-Mulato) north of the Rio through the 17th, 18th, and 19th centuries, with special focus on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical forces affecting the community. Social structure, economy, labor, culture, political organization, conflict, and international relations. Emphasis on social forces, class analysis, social, economic, and labor conflict, ideas, domination, and resistance. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and field research, and submission of a paper.

**M159B. History of the Chicano Peoples.** (Same as Chicana and Chicano Studies M159B.) Survey lecture course on historical development of the Mexican (Chicano) community and people of Mexican descent in the U.S. through the 20th century, with special focus on labor and politics. Provides integrated understanding of change over time in the Mexican community by inquiry into major formative historical and policy issues affecting the community. Within a framework of domination and resistance, discussion deals with social structure, economy, labor, culture, political organization, conflict, and ideology. Developments related to historical events of significance occurring both in the U.S. and Mexico. Lectures, special presentations, reading assignments, written examinations, library and/or field research, and submission of a paper.

**160A-160B. U.S. and Comparative Immigration History.** (Formerly numbered 160.) Use of overlapping diaspora model which integrates North Atlantic (Europe), South Atlantic (Afro-Caribbean), Pacific (China/Japan/Hawaii), and Latin (Mexico to Brazil) worlds to provide chronological and analytic survey of American and comparative immigration from 1750 to the present. Special focus on Southern California in course 160B. P/NP or letter grading.

**161. Asians in American History.** Study of the politically troubling question of entry into the U.S. of immigrants ineligible for citizenship and their citizen children in American history.

**162. American West.** Study of the West as frontier and as region, in transit from the Atlantic seaboard to the Pacific, from the 17th century to the present.

**163. History of California.** Economic, social, intellectual, and political development of California from earliest times to the present. P/NP or letter grading.

**164. History of Los Angeles.** Social, economic, cultural, and political development of Los Angeles and its environs from time of its founding to the present. Emphasis on the diverse peoples of the area, changing physical environment, various interpretations of the city, and Los Angeles' place among American urban centers.

**165A. Early Latin America.** Advanced survey of Latin American history from conquest to independence, with emphasis on society, culture, and ethnic aspects.

**165C. Indians of Colonial Mexico.** Survey of social and cultural history of the Indians of Mexico, especially central Mexico, from time of the European conquest until Mexican independence, emphasizing an internal view of Indian groups and patterns on basis of records produced by the Indians themselves.

**166. Latin America in the 19th Century.** Intensive analysis of economic, social, and political problems of Latin American nations from their independence to around 1910.

**167A-167D. Latin America in the 20th Century.** Experiments in national development analyzed to relate the timing of social changes to economic, political, cultural, and geographic context. Successive country case studies each focus on world pressures and interplay of overlapping themes: struggle between centralized and decentralized government agencies (emphasized in course 167A), role of personalist leaders (emphasized in course 167B), definition of the national polity (emphasized in course 167C), and "rightist" and "leftist" models of development (emphasized in course 167D). Mexico is treated in course 171. Within each course, countries are studied according to the chronological contribution to the theme emphasized. **167A.** Haiti, Uruguay, Costa Rica, Cuba, Chile; **167B.** Bolivia, Dominican Republic, Argentina, Paraguay, Venezuela; **167C.** Panama, Colombia, Ecuador, Honduras, El Salvador; **167D.** Brazil, Guatemala, Peru, Nicaragua.

**168. History of Latin American International Relations.** Emphasis on developing interests of Latin American nations in their relationship with one another and with other areas of the world, beginning with 19th-century independence.

**169. Latin American Eliteloire.** Prerequisite: course 167A, 167B, 167C, or 171. Eliteloire (defined as oral or noninstitutionalized knowledge involving leaders' conceptual and perceptual life history views) in contrast to folklore (followers' traditional or popular views). Eliteloire genres include oral history, literature, and cinema.

**170A. Latin American Cultural History.** Intellectual, artistic, and folk expressions of the Latin American spirit and character examined in readings and lectures, with emphasis on unique contribution of Latin Americans to develop self-interpretation. Music, films, and slides supplement discussions.

**170B. Classic Travel Accounts of Latin America since 1735.** Recommended for prospective researchers before they select their region of study. Introduction to "enlightened traveler" accounts as they reveal cultural change from wide-ranging spatial and temporal vantage points. Comparison of published works to photographic series to analyze the great variety of geographic regions, peoples, customs, occupations, dress, food, architecture, and transportation in the 20 countries of the area.

**170C. Issues in Latin America History.** Examination of major issues in history of Latin America. P/NP or letter grading.

**171. Mexican Revolution since 1910.** Examination of concept of "permanent crisis" to describe and explain the structure of "permanent revolution" under "one-party democracy." Analysis of unresolved colonial and 19th-century problems and crises that have influenced modern-day Mexico, if in modified form.

**172. History of Argentina.** History of economic, political, social, and cultural developments that have shaped Argentina from colonial time to the present. Emphasis on 19th-century development of an agro-export economy and 20th-century formation of a mass society.

**173. Modern Brazil.** Selected topics in political, economic, social, and cultural development of Brazil, with emphasis on modernization and the struggle for change, 1850 to the present. Discussions, films, slides, and guest speakers supplement and complement lectures.

**174. Brazilian Intellectual History.** General intellectual development of Brazil, with emphasis on those introspective movements in which Brazilians attempted to interpret themselves, their nation, and their civilization.

**M175A-175Z. Topics in African History.** (Formerly numbered 175A-175Z.) Prerequisite: one prior course in African history at UCLA or consent of instructor. Examination of specific topics which have a continental application rather than proceeding on a strictly chronological or regional basis:

**M175A. Prehistoric Africa**—Technological and Cultural Traditions. (Formerly numbered 175A.) (Same as Anthropology M119.) Survey of nondocumentary sources of early African history, with emphasis on archaeological evidence from origins of humanity until A.D. 1600. P/NP or letter grading.

**175B. Africa and the Slave Trade.** Social, economic, political, and cultural impact of the slave trade on African society, with emphasis on Atlantic trade without neglecting those of ancient Mediterranean, Islamic, and Indian Ocean worlds. Abolition and the African diaspora.

**175C. Africa in the Age of Imperialism.** Topics include penetration of precapitalist social formations by capital, emergence of classes, nature of the colonial and postcolonial state, and struggle for national liberation in a global context.

**175E. Africa from 1945 to the Present.** History of Africa south of the Sahara from end of World War II to the present. Last phases of colonial rule in Africa, African nationalism, Pan-Africanism, liberation movements, and achievement of independence. Political, social, and economic change in the colonies and in the independent states of Africa. Neocolonialism, experiments in national development, apartheid in South Africa, ideological conflict in contemporary Africa, and Africa in world affairs since 1957.

**176A-176B. History of West Africa.** **176A.** West Africa from Earliest Times to 1800; **176B.** West Africa since 1800.

**176C. Social and Economic History of West Africa since 1600.** Analysis of main currents of West African social, cultural, and economic history since the fall of the Songhai Empire, with emphasis on the family, religious values, education, urbanization, migrations, arts, slavery, and the slave trade. Roles of economic forces and institutions in promoting or inhibiting economic change in West Africa; ethnic diversity and sociopolitical integration; colonial economic systems and efforts at economic planning and development since the 1950s.

**177. Ethiopia and the Horn of Africa.** Survey of history of Ethiopia, Somalia, and Sudan.

**178A-178B. History of Eastern Africa.** **178A.** Cultural diversity of Eastern African societies, growth of more complex political systems, and impact of international trade to the later 19th century. **178B.** Economic, social, and political history of Eastern Africa since imposition of colonial rule, with emphasis on underdevelopment and protest.

**179A-179B. History of Southern Africa.** Attention to social and economic as well as political aspects. P/NP or letter grading. **179A.** From the Origins to 1870. Origins of the South African peoples and their interactions to 1870. **179B.** Since 1870. Interactions between inhabitants of southern Africa since 1870.

**182A-182B. Thought and Society in China.** **182A.** To 1000. Recommended (but not prerequisite): course 11A or equivalent. Elite and popular expressions of Chinese cultural life examined in readings and lectures. Focus on diversities of thought in the classical legacy and their evolution under the impact of Buddhism to 1000. Emphasis on intersections between intellectual life and social, political, and economic conditions. **182B.** Since 1000. Recommended (but not prerequisite): course 11B or equivalent. Elite and popular expressions of Chinese cultural life from 1000 to the 20th century. Emphasis on social, political, and economic conditions within which Chinese orthodox and heterodox values evolved and changed. Evaluation of iconoclasm of Chinese intellectual life in the 20th century in light of earlier currents of thought.

**183A. Culture and Power in Late Imperial China.** (Not the same as course 183A prior to Fall Quarter 1994.) Recommended (but not prerequisite): courses 11A, 11B, or equivalent. Analysis of relations of power and cultural expressions of dominance and resistance in late imperial China (1000 to 1700), with emphasis on interplay of economic forces, ideas, and social and political institutions. Examination of institutions of state, family, school, and city; idioms of folk religion, death, and the afterlife; political, legal, and medical discourses of body, personhood, and social identity; love, sexuality, and private life. P/NP or letter grading.

**183B. Society and Economy in China since 1500.** Recommended (but not prerequisite): course 11B or equivalent. Social-economic change and involution of the late imperial period in comparative perspective; Western impact and Chinese development and underdevelopment; change and continuity in revolutionary China.

**183C. History of Women in China, A.D. 1000 to the Present.** Topics include women and the family, women in Confucian ideology, women in literati culture, feminist movement, and women and the communist revolution. P/NP or letter grading.

**184. 20th-Century China.** Recommended (but not prerequisite): course 11B or equivalent. Political events and intellectual developments seen in context of social-economic trends; human agency, structural change, and historical conjunctures in the 20th century.

**185. Japanese Popular Culture.** Topics in 18th-, 19th-, and 20th-century Japanese history, including legacy of premodern satire in postmodern comic books, American culture in 1930s' Japanese visual culture, gender in photography, and relationship of monster movies to postwar politics.

**186. Shinto, Buddhism, and Japanese Folk Religion.** Social dimension of various "Ways," great and little: Shinto's connection with cultural nationalism, Buddhism's medieval "Reformation" and Zen's relation to the warrior culture, folk religious aspects such as shamanism, ancestor worship, and millenarianism.

**187A-187B-187C. Japanese History.** Political, economic, and cultural development of Japan from prehistory to the present. P/NP or letter grading. **187A.** Ancient, Prehistory to 1600; **187B.** Early Modern, 1600 to 1868; **187C.** Modern, 1868 to the Present.

**188A. Early History of India.** Introduction to civilization and institutions of India. Survey of history and culture of the South Asian subcontinent from earliest times to founding of the Mughal Empire.

**188B-188C. History of British India I, II.** **188B.** Examination of expansion of British rule, theories and practice of governance, constitution of India as an "oriental despotism," epistemological projects of the state, and other modes by which the British achieved the conquest of knowledge. **188C.** Political economy of imperialism and Britain's "civilizing mission." Encounter, especially in terms of race and gender, between the colonized and colonizers and to questions of resistance and nationalism.

**189A. Cultural and Political History of Contemporary South Asia.** Problem of modernity; partition of India and emergence of Pakistan; political, social, ecological, and women's movements; struggle for rights and conflicts of identity among Muslims, Hindus, and Sikhs; terrorism in Sri Lanka and Punjab; public culture, popular cinema, and street life. P/NP or letter grading.

**189B. Indian Identity in the U.S. and the Diaspora.** (Not the same as course 189B prior to Fall Quarter 1996.) What is "Indian" about Indians abroad; overseas Indian communities; race, gender, class, and ethnicity in creation of Indian identities; transformations of Hinduism and Sikhism; Hindi film, Indian festivals, and popular culture; diasporic cultural forms; bhangra rap, multicultural films. P/NP or letter grading.

**189C. Special Topics in Contemporary Indian History.** Treatment of major issues in history of contemporary India. P/NP or letter grading.

**190A-190B. History of Southeast Asia.** **190A.** Early History of Southeast Asia. Political and cultural history of the peoples of Southeast Asia from earliest times to about 1815. **190B.** Southeast Asia since 1815. History of modern Southeast Asia, with emphasis on expansion of European influence in political and economic spheres, growth of nationalism, and process of decolonization.

**190C. Philippine History.** Social, cultural, and political history of Philippine societies from the Spanish conquest through independence. Emphasis on questions of identity under colonialism, understanding the Revolutions of 1896 and 1898, and politics of Philippine nationalist discourse. Readings include introduction to major issues in Philippine historiography and literature. P/NP or letter grading.

**M191A-M191B. Survey of Jewish History.** (Same as Jewish Studies M191A-M191B.) Survey of social, political, and religious developments. **M191A.** From Biblical Times to End of the Middle Ages; **M191B.** From End of the Middle Ages to the Present.

**M191C-M191D. Focal Themes in Jewish History.** (Same as Jewish Studies M191C-M191D.) Treatment in depth of one major theme in Jewish history (such as history of Messianic Movements, structure of the Jewish communities) through the ages.

**191E-191F. The Third Reich and the Jews.** **191E.** History of modern anti-Semitic ideologies and movements. Rise of national socialism in Germany. Development and execution of Nazi anti-Jewish policy to outbreak of World War II. **191F.** Second World War. Implementation of Nazi plans for extermination of Jews in Nazi-dominated Europe. Life in Nazi-imposed ghettos. Forms of Jewish resistance. Fate of Jewish populations in the occupied territories.

**191G. European Jewry from 1881 to the Present.** Survey of major social, economic, and political factors that shaped the lives of Europe's Jews from outbreak of the First World War to the present. Emphasis on the diverse Jewish communities of interwar Europe, fate of Jews under the Nazis, and character of the postwar Jewish community. P/NP or letter grading.

**M192A-M192B. Jewish Intellectual History.** (Same as Jewish Studies M192A-M192B.) **M192A.** Medieval Period. Examination of three intellectual worldviews that competed for hegemony in the medieval Jewish world — rabbinic Judaism, medieval rationalism as embodied in philosophy, and cabala; **M192B.** Modern Period. Exploration of some of the most important currents and figures in Jewish intellectual history from the 18th century to the present.

**193A. History of Religions: Myth.** Nature and function of myth in history of religion and culture. Examples selected from nonliterate as well as from other Asian and European traditions.

**193B. Religions of South and Southeast Asia.** Prerequisite: course 4 or 193A. Topics vary from year to year and include religion of the Veda; Brahmanism; (later) Hinduism. Consult *Schedule of Classes* for specifics. May be taken independently for credit.

**193C. Religions of South and Southeast Asia.** Prerequisite: course 4 or 193A. Topics vary from year to year and include Buddhism in India; religions of Java and Bali; nonliterate traditions of India and Southeast Asia. Consult *Schedule of Classes* for specifics. May be taken independently for credit.

**193D. Religions of the Ancient Near East.** Main polytheistic systems of the ancient Near East, with emphasis on Mesopotamia and Syria and with reference to the religion of ancient Israel: varying concepts of divinity, hierarchies of gods, prayer and cult, magics, wisdom, and moral conduct.

**193E. Special Topics in History of Religions.** Topics announced in *Schedule of Classes* and include ancient Germanic cults; Renaissance mysticism; mystics of the low countries; goddesses; religion in a secular age.

**194A. History of Early Christians.** Christian movement from its origins to ca. 160 C.E., stressing its continuity/discontinuity with Judaism, various responses to Jesus of Nazareth, writings produced during this period, movement's encounters with its religious, social, and political world, and methods of research.

**194B. Religious Environment of Early Christians.** Rich variety in religious practice and thought in the Mediterranean world of the 1st century C.E. as in context of the developing Christian movement. Topics include the Pharisees, Qumran, Philo, Stoics, Epicureans, traditional Greek and Roman religions, "mysteries," astrology, magic, gnosticism, and emperor-worship.

**194C. Jesus of Nazareth in Historical Research.** Recommended (but not prerequisite): course 194A. Stimulated by significant post-Enlightenment historical evaluations, students are led into firsthand knowledge (in translation) of various multilayered sources for reconstruction of the life, teaching, and initial impact of Jesus of Nazareth in his social, economic, political, and religious contexts.

**195A-195B-195C. History of Science.** Prerequisite: course 3A or consent of instructor. **195A.** Medieval and Renaissance Science. Continuity and discontinuity in scientific traditions from the 12th to the 17th century; interrelationships between theology, scientific thought, and social conditions. Theories of force, motion, and space; some attention to occult sciences. **195B.** Perspectives on Early Modern Physical Science. Detailed view of selected topics in development of physical sciences from 1650 to 1800. Typical subjects include chemistry, social and political aspects of scientific change, and science in the Enlightenment. **195C.** Perspectives on Modern Physical Science. Selected aspects of 19th- and 20th-century physical science, typically including science and industrialization, thermodynamics, electromagnetism, relativity, quantum mechanics, and the atom bomb.

**M195F-M195G. History of Biological Sciences.** (Same as Neurobiology/Medical History M108A-M108B.) Lecture, three hours. **M195F.** Biological Sciences from Ancient Times to the Early 19th Century; **M195G.** Biological Sciences from the Early 19th Century to the Mid-20th Century.

**197A-197Z. Undergraduate Seminars.** Seminar, three hours. Limited to 15 students meeting with a faculty member. Organized on a topics basis with readings, discussions, papers. Signups and descriptions of offerings each term are available in undergraduate counselor's office (6248 Bunche Hall). May be repeated once for credit. When concurrently scheduled with courses 201A-201U or M203A-M203B, undergraduates must obtain consent of instructor to enroll.

**199. Special Studies in History.** Intensive directed research program. Eight units may be applied toward major requirements.

**199HA. Directed Study for Honors.** Discussion, three hours. Limited to history honors program majors. Must be taken in Spring Quarter of junior year. Seminar on historical research and writing; student meetings with honors adviser to define research and preparation for the project. Extensive reading and research in field of proposed honors thesis.

**199HB. Directed Study for Honors.** Prerequisite: course 199HA. Must be taken in Fall Quarter of senior year. Independent study and research on honors project under supervision of honors adviser, with presentation of research report and thesis outline to thesis adviser and second reader at end of quarter. Both must approve continuation of honors thesis project. In Progress grading (credit to be given only on completion of course 199HC). Only students approved for course 199HC receive credit for this course.

**199HC. Directed Study for Honors.** Discussion, three hours. Prerequisite: course 199HB. Must be taken in Winter Quarter of senior year. Preparation of final version of honors thesis and presentation of portions of work-in-progress to other students engaged in honors projects. Completed thesis must be submitted to thesis committee by last day of class in Winter Quarter.

**199I. Independent Studies for Internships.** Prerequisite: maintenance of 3.0 grade-point average in the major. Independent studies course to be supervised jointly by Field Studies Office and faculty adviser. Further supervision to be provided by business for which student is doing internship. May not be used to satisfy requirement for course 197 or 199. Normally, only four units of internship with History Department are allowed. P/NP grading.

## Graduate Courses

Admission to all graduate courses is subject to consent of instructor and to appropriate language qualifications. For multiterm courses, credit and grades are given only on completion of the full seminar sequence, with In Progress grading until the last term unless otherwise noted. Topics courses and seminars may be repeated.

**200A-200U. Advanced Historiography.** Seminar, three hours. May be repeated for credit. **200A.** Ancient Greece; **200B.** Ancient Rome; **200C.** Medieval; **200D.** Europe. (Formerly numbered 200D-200G.); **200H.** U.S.; **200I.** Latin America; **200J.** Near East; **200K.** India; **200L.** China; **200M.** Japan; **200N.** Africa; **200O.** Science/Technology; **200P.** History of Religions; **200Q.** Theory of History; **200R.** Jewish History; **200S.** Armenia and the Caucasus; **200T.** Southeast Asia; **200U.** Psychohistory.

**M200V. Advanced Historiography: Afro-American.** (Same as Afro-American Studies M200A.) Seminar, three hours. May be repeated for credit.

**M200W. Advanced Historiography: American Indian Peoples.** (Same as American Indian Studies M200A.) Seminar, three hours. Designed to familiarize students with major genres of literature related to American Indian history. Subjects include theories of Indian origins, historical demography, Euro-American attitudes toward Indian peoples, studies of U.S. Indian policy, and tribal histories. Standard theoretical approaches, including cultural ecology and dependency theory.

**200X. Advanced Historiography: Oral History.** Seminar, three hours. Introduction to practice, method, and theory of oral history.

**200Y. Advanced Historiography: Application of Economics to History.** Discussion, three hours.

**200Z. Advanced Historiography: Chicano.** Discussion, three hours. Graduate survey of leading literature in Chicano history, with emphasis on new methodological and theoretical approaches in the field.

**201A-201U. Topics in History.** Seminar, three hours. Topic titles are same as for courses 200A-200U. Graduate courses involving reading, lecturing, and discussion of selected topics. Does not fulfill seminar requirements for Ph.D. degree. May be repeated for credit. When concurrently scheduled with course 197, undergraduates must obtain consent of instructor to enroll.

**202A-202B. Seminars: Comparative Modern Economic History.** Discussion, three hours. Prerequisite: graduate standing. Study of problems of modern economics in the 19th and 20th centuries, including such topics as industrialization, growth, demography, development, and economic change. In Progress grading.

**M203A-M203B. Social Theory and Comparative History.** (Same as Political Science M291A-M291B and Sociology M296A-M296B.) Colloquium, three and one-half hours every other week. Introduction to historically rooted social theory and theoretically sensitive history, following the program of the Center for Social Theory and Comparative History. Each course may be taken independently for credit.

**M203C. Theories in Cultural History.** (Same as Sociology M296C.) Discussion, three hours. Introduction to social, linguistic, semiotic, or other new interpretive theories and practices developed in other fields and applied to historical material.

**204A-204B. Seminars: Near and Middle Eastern History.** Seminar, three hours. Methodology, socioeconomic and political change in the Arab world.

**205A-205B. Seminars: Medieval Middle Eastern History.** Seminar, three hours.

**206A-206B. Seminars: Social History of the Middle East.** Seminar, three hours. Interrelationship of city, tribe, and village in the Middle East; role of such definable social groups as women, religious classes, middle classes, landlords, tribesmen, and peasants; social change.

**M207. Seminar: Ancient Mesopotamia.** (Same as Ancient Near East M250.) Seminar, three hours. Selected topics on political, social, and intellectual history of ancient Mesopotamia. May be repeated for credit.

**209A-209B. Seminars: Ottoman and Modern Turkish History.** Seminar, three hours.

**211A-211B. Seminars: Armenian History.** Seminar, three hours.

**C212. Methods in Armenian Oral History.** Seminar, three hours. Prerequisite: proficiency in Armenian language. Lectures and laboratory in methods of taking, processing, and utilizing depositions and other oral sources for Armenian history, including project assignment in the field. May be concurrently scheduled with course C112D.

**214. Problems in World History, 800 to 1800.** Seminar, three hours. Training course for graduate students to develop a field of world history and to prepare department teaching assistants to teach sections for the general education sequence in world history by helping them to grasp diverse cultures and daily workings of world societies to date.

**215A-215B. Seminars: Ancient History.** Seminar, three hours.

**216A-216B. Seminars: Byzantine History.** Seminar, three hours.

**217. Sources and Handbooks of Medieval History.** Seminar, three hours. Prerequisite: reading knowledge of German or French. Introduction to types of medieval source materials and the handbooks needed to use them.

**218. Medieval Latin Literary History.** Seminar, three hours. Recommended (but not prerequisite): reading knowledge of Latin and German or French. Examination of aspects of medieval history through study of paleography, medieval libraries, and transmission of ancient medieval authors.

**219A-219B. Paleography I, II.** Seminar, three hours. Prerequisite: reading knowledge of Latin and German or French. **219A.** History of the manuscript book from antiquity through the Carolingian renaissance, with emphasis on dating and localization as well as on proficiency in reading. **219B.** History of the manuscript book from the Carolingian renaissance through the invention of printing, with emphasis on dating and localization as well as on proficiency in reading.

**220A-220B. Seminars: Church and Monarchy in the Middle Ages.** Seminar, three hours. Textual studies and interpretative problems in constitutional, legal, and intellectual history of the Latin church and of Western European monarchies, with special attention to the German monarchy, from the 11th to 14th century.

**221A-221B. Seminars: Medieval History.** Seminar, three hours.

**222A-222B. Seminars: Medieval Intellectual History and History of Science.** Seminar, three hours. Selected problems from medieval and early modern philosophy, science, political theory, theology.

**225. Colloquium for Entering Graduate Students in Modern European History.** Seminar, three hours. Normally limited to and required of all modern European history graduate students. Introduction to topics, methods, and historiography of modern European history.

**226A-226B. Seminars: Italian Renaissance.** Seminar, three hours.

**227A-227B. Seminars: Reformation.** Seminar, three hours.

**229A-229B. Seminars: Early Modern European History.** Seminar, three hours.

**M230A-M230B. Seminars: Modern European History.** (Formerly numbered 230A-230B.) (Same as Art History M241A-M241B.) Seminar, three hours. In Progress and S/U or letter grading.

**231A-231B. Seminars: Modern European Intellectual and Cultural History.** Seminar, three hours.

**232A-232B. Seminars: French History of the 19th and 20th Centuries.** Seminar, three hours.

**233A-233B. Seminars: Russian/Soviet History.** Seminar, three hours.

**234A-234B. Seminars: Modern History of Spain, Portugal, and Italy.** Seminar, three hours.

**235A-235B. Economic History of Europe, 1780 to 1939.** Lecture, three hours. Analysis of internationalization of European world economy, emergence of Western core and its relation with European peripheries. Comparative analysis on different regions, stressing main characteristics of postwar European economy.

**M236A. Proseminar: Political Psychology.** (Same as Political Science M261A and Psychology M228A.) Discussion, three hours. Introduction to political psychology: psychobiography, personality and politics, mass attitudes, group conflict, political communication, and elite decision making.

**236B-236C. Seminars: Psychohistory.** Seminar, three hours. Exploration of individual and group psychological processes and their uses in historical research.

**239A-239B. Seminars: English History — Middle Ages.** Seminar, three hours.

**240A-240B. Seminars: English History — Modern History.** Seminar, three hours.

**241A-241B. Seminars: German History.** Seminar, three to four hours. Prerequisite: graduate standing. In Progress grading.

**242. Colloquium: European History (2 units).** Designed for graduate students. Forum for critical discussion of work of students and invited scholars. Presentation of student dissertation prospectuses during their third or fourth year in residence. S/U grading for students presenting papers.

**244A-244B. Seminars: British Empire History.** Seminar, three hours.

**245. Colloquium: U.S. History.** Seminar, three hours. Normally limited to and required of all entering graduate students in U.S. history. Critical introduction to historical method, with emphasis on new methodological and conceptual approaches, use of source materials, and current state of U.S. historiography.

**246A-246B-246C. Introduction to U.S. History.** Seminar, three hours. Graduate survey of significant literature dealing with U.S. history from the Colonial period to the present. Each course may be taken independently for credit. **246A.** Colonial Period; **246B.** 1790 to 1900; **246C.** 20th Century.

**247A-247B. Seminars: Early American History.** Seminar, three hours.

**249A-249B. Seminars: Jacksonian America.** Seminar, three hours.

**250A-250B. Seminars: U.S. History of the Middle 19th Century.** Seminar, three hours.

**252A-252B. Seminars: Recent U.S. History to 1930.** Seminar, three hours.

**253A-253B. Seminars: Recent U.S. History since 1930.** Seminar, three hours.

**254A-254B. Seminars: U.S. Social and/or Intellectual History.** Seminar, three hours.

**255A-255B. Seminars: History of Business and Government in the American Economy.** Seminar, three hours.

**256A-256B. Seminars: American Diplomatic History.** Seminar, three hours.

**257A-257B. Seminars: U.S. Urban History.** Seminar, three hours.

**258A-258B. Seminars: Working Class History.** Seminar, three hours.

**259A-259B. Seminars: Social History of Women in the U.S.** Seminar, three hours.

**260A-260B. Seminars: Native American History.** Seminar, three hours.

**M260C. Native American Revitalization Movements.** (Same as Anthropology M238.) Lecture, two hours; discussion, one hour. Examination of revitalization movements among native peoples of North America (north of Mexico). Specific revitalization includes Handsome Lake, 1870 and 1890 Ghost Dances, and Peyote Religion.

**M260D. Native American Historical Demography.** (Same as Anthropology M287Q.) Lecture, two hours; discussion, one hour. Examination of population history of Native Americans north of Mexico prior to and following contacts with Europeans, Africans, and others, circa 1492. Emphasis on number of American Indians and other Native Americans, their decline following European contact, and their recent resurgence.

**261A-261B. Seminars: Afro-American History.** Seminar, three hours. Social and political history of the Afro-American, including emphasis on development and structure of race relations in America; racial concepts and dilemmas, black and white.

**262A-262B. Seminars: Chicano History.** Seminar, three hours.

**263A-263B. Seminars: History of the American West.** Seminar, three hours.

**M264. History of American Education.** (Same as Education M201C.) History of educational thought and of social forces impinging on American education from the 1880s to the present. Analysis of relation between these ideas and forces, and aims and practices of American education today.

**M265. Latin American Research Resources.** (Same as Latin American Studies M200 and Library and Information Science M225.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research results.

**266A-266B. Seminars: Colonial Latin American History.** Seminar, three hours.

**267A-267B. Seminars: Latin American History, 19th and 20th Centuries.** Seminar, three hours.

**M268A-M268B. Seminars: Recent Latin American History.** (Same as Latin American Studies M268A-M268B.) Seminar, three hours. Prerequisite: consent of instructor. Reading knowledge of Spanish and Portuguese normally required. Seminar devoted to selected topics of an interdisciplinary nature. In Progress grading.

**275. Introduction to Professional Study of African History.** Seminar, three hours. Required of all entering graduate students in African history. Strongly recommended for students with a history concentration in African Area Studies M.A. program. Source identification, research methodologies, historiographical traditions, historical interpretation, and approaches to teaching.

**276. African Archaeology: Field Techniques (2 to 8 units).** Seminar, three hours. Prerequisites: any introductory course in archaeology and preferably an African history course. Field course on an African excavation to provide basic skills—reconnaissance, surveying, excavation techniques, conservation, and scientific sampling required by an archaeologist in Africa, together with introduction to ethnographic survey and oral data collection.

**277. African Archaeology: Data Analysis (2 to 8 units).** Seminar, three hours. Prerequisite or corequisite: course 276. Field course to equip students to handle finds from excavations. Analysis, description, illustration, and interpretation of actual archaeological and/or ethnographic collection.

**278A-278B. Seminars: African History.** Seminar, three hours.

**M281. China — Seminar: Classical Historiography and Readings in Classical Studies.** (Same as Chinese M201.) Discussion, three hours. Prerequisite: two years of classical Chinese or working knowledge of classical Chinese. Readings in historiography and selected genres of historical documents.

**282A-282B. Seminars: Chinese History.** Seminar, three hours.

**285A-285B. Seminars: Japanese History.** Seminar, three hours.

**288A-288B. Seminars: South Asia.** Seminar, three hours.

**289A-289B. Seminars: Southeast Asia.** Seminar, three hours.

**291A-291B. Seminars: Jewish History.** Seminar, three hours. Studies in intellectual and social history of Jewish people from ancient times to the modern period.

**293A-293B. Seminars: History of Religions.** Seminar, three hours.

**295. Theories of Scientific Change.** Seminar, three hours. Historical and philosophical perspectives on science, focusing on rationality of scientific change and logic and psychology of scientific discovery. Readings and seminar-style discussions of such authors as Popper, Kuhn, Toulmin, Lakatos, Holton, Buchdahl, Feyereabend, and others.

**297A-297B. Seminars: History of Science.** Seminar, three hours.

**M298. Interdisciplinary Studies in the 17th and 18th Centuries.** (Same as English M298.) Topics vary according to participating faculty.

**M299. Interdisciplinary American Studies (6 units).** (Same as English M299.) Discussion, four hours. Readings, discussion, and papers on a common theme, team-taught by faculty from different departments. Topics vary according to participating faculty. May be repeated for credit with consent of instructors.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**490. Writing Workshop for Graduate Students (2 units).** Prerequisite: consent of instructor. Writing workshop on students' papers-in-progress. Analysis and group discussion of rhetorical and stylistic principles, illustrated in students' own and in professional historians' work, help students improve their own writing. May be repeated once. S/U grading.

**495. Teaching History.** Prerequisite: graduate standing. Required of all new teaching assistants. Lectures, readings, discussions, and practice teaching sessions within the structure of a seminar. Students receive unit credit toward full-time equivalence but not toward the nine-course requirement for M.A. degree. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Studies (1 to 8 units).** Prerequisites: graduate standing, consent of instructor. Individual directed reading arranged with professor. M.A. candidates may take this course only once. Number of times Ph.D. candidates may take this course is subject to consent of graduate studies committee. S/U or letter grading.

**597. Directed Studies for Graduate Examinations (1 to 8 units).** Preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. S/U grading.

**599. Ph.D. Research and Writing (1 to 8 units).** Prerequisite: advancement to Ph.D. candidacy.

tween art history and the history of society, politics, and culture.

## Undergraduate Study

### Bachelor of Arts Degree

Lower division history and art history courses may be applied toward the general education requirements; a course taken to satisfy the American History and Institutions requirement may be applied toward the history section of the interdepartmental major.

No course for the major may be taken on a P/NP grading basis.

Students wanting to confer with a counselor regarding program planning and major requirements should contact the history/art history counselor at (310) 825-3480.

### Preparation for the Major

*Required:* History 1A-1B-1C; two courses from Art History 50, 51, 54, 57; one course from Art History 55A, 55B, 56A, 56B.

### The Major

*Required:* History 99, 100A, or 100B; 197 or 199; and courses as indicated in the following groups:

Group A: Two non-Western history courses from History M104A, M104B, M105, 106A, 106B, 106C, 107A, 107B, 108A, 108B, 109A, 109B, 110A, 110B, 111A, 111B, 111C, 112A through C112D, 115A, M122, 123A, 123B, 157A, 157B, 165A, 165C, 166, 167A through 167D, 168, 169, 170A, 170B, 171, 172, 173, 174, M175A, 175B, 175C, 175E, 176A, 176B, 176C, 177, 178A, 178B, 179A, 179B, 182A, 182B, 183A, 183B, 184, 185, 186, 187A, 187B, 187C, 188A, 188B, 188C, 190A, 190B, 193C, 193D.

Group B: Two U.S. history courses from History 145A, 145B, 146A, 146B, 147A, 147B, 147C, 148A, 148B, 148C, 149A, 149B, 150A, 150B, 150C, 151A, 151B, 152A, 152B, M153, 154A through 154D, 155A, 155B, 156A through 156H, 157A, 157B, M158A through M158E, M159A, M159B, 160A, 160B, 161, 162, 163, 164.

Group C: Two European history courses from History 116A, 116B, 117A, 117B, 121A through 121D, 125A through 125F, 126A through 126F, 127A, 127B, 128A, 128B, 128C, 129A, 129B, 129C, 130A, 130B, 130C, 131A through 131D, 132A, 132B, 133A, 133B, 134A, 134B, 135A, 135B, 136, 137A, 137B, 137C, 138A, 138B, 139, 141A, 141B, 141C, 142A, 142B, 143, 144.

Group D: Three Western art history courses from Art History 101A, 101B, M102A through M102K, 106A through 106D, 108A, 108B, 109A through 109D, 110A through 110F, C112A, C112B, C112C.

Group E: Three non-Western art history courses from Art History 104A, 104B, C104C, 110G, 114A, 114C through 114F, C115A

through C115F, C117A, C117B, C117C, 118A, 118C, 118D, C119A, C119B.

Group F: Two art history elective courses selected from the above lists. Students may also take Art History 127, 197, 199 to meet this requirement.

## Honors Program

The honors program is designed for history/art history majors who are interested in carrying out an independent research project that culminates in an honors thesis of approximately 30 pages. The program gives qualified students the opportunity to work closely with individual professors on an in-depth supervised research and writing project.

All junior and senior history/art history majors who have completed a minimum of four upper division art history courses with a grade-point average of 3.5 or better and an overall GPA of 3.0 or better are eligible to apply. Consult the art history undergraduate counselor one term prior to beginning the honors program.

To qualify for graduation with honors, students must (1) complete all requirements for the major, (2) have a cumulative grade-point average of 3.5 or better in upper division courses in the major and an overall GPA of 3.0 or better, and (3) complete Art History 195A-195B with a grade of A – or better.

To qualify for graduation with highest honors, students must (1) complete all requirements for the major, (2) have a cumulative GPA of 3.85 or better in upper division courses in the major and an overall GPA of 3.65 or better, and (3) complete Art History 195A-195B with a grade of A.

## HISTORY/ART HISTORY

*Interdepartmental Program  
College of Letters and Science*

## HONORS COLLEGIUM

*College of Letters and Science*

UCLA  
A311 Murphy Hall  
Box 951414  
Los Angeles, CA 90095-1414

(310) 825-1553  
<http://www.college.ucla.edu/up/>

## Scope and Objectives

The Honors Collegium is an unusual educational alternative designed primarily for students in their freshman and sophomore years. Entering freshmen and continuing students who have satisfied the Subject A/English 2 requirement may enroll in specially devised Honors Collegium courses with an interdisciplinary emphasis. The collegium offers small classes and individual attention. It encourages animated discussion among students, as well as between students and professors. And it seeks to promote scholarly exchange across the major disciplines in the University.

## Undergraduate Study

Each Honors Collegium course is staffed by a director who is distinguished in teaching and scholarship, by a variable number of guest lecturers, and by additional specialists in their fields. Many courses satisfy general education requirements and serve as preparation for numerous majors in the College of Letters and Science. Counselors are available in the Honors Programs Office, A311 Murphy Hall, to advise and help students plan an integrated academic program.

Courses in the Honors Collegium are mainly interdisciplinary seminars, and the curriculum varies each year. Refer to the *Schedule of Classes* for current course listings. An Honors Collegium brochure, which gives detailed course descriptions, is available from the program office.

Katherine C. King, Ph.D., *Chair*

### Professors

Emily Apter, Ph.D. (*French, Comparative Literature*)  
Kathleen L. Komar, Ph.D. (*German, Comparative Literature*)  
Efrain Kristal, Ph.D. (*Spanish and Portuguese, Comparative Literature*)  
Ross P. Shideler, Ph.D. (*Scandinavian, Comparative Literature*)  
Samuel Weber, Ph.D. (*English, Comparative Literature*)

### Professors Emeriti

Arnold J. Band, Ph.D. (*Hebrew, Comparative Literature*)  
Pier-Maria Pasinetti, Ph.D. (*Italian, Comparative Literature*)

### Associate Professors

Ali Behdad, Ph.D. (*English, Comparative Literature*)  
Katherine C. King, Ph.D. (*Classics, Comparative Literature*)  
Lucia Re, Ph.D. (*Italian, Comparative Literature*)  
C.P. Haun Saussy, Ph.D. (*Chinese, Comparative Literature*)

### Assistant Professor

Shu-mei Shih, Ph.D. (*Chinese, Comparative Literature*)

## Scope and Objectives

The following courses are made up of selected masterpieces of world literature and satisfy the humanities general education requirement in the College of Letters and Science. See Comparative Literature earlier in this section of the

catalog for the upper division and graduate course offerings.

## Humanities

### Lower Division Courses

**1A. World Literature: Antiquity to Early Middle Ages.** Lecture, three hours; discussion, one hour. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2A. Study of major texts in world literature, with emphasis on Western civilization. Texts include major works and authors such as *Iliad* or *Odyssey*, Greek tragedies, portions of the Bible, Virgil, Petronius, St. Augustine, and others such as *Gilgamesh* or *Tristan and Iseult*.

**1B. World Literature: Late Middle Ages to the 17th Century.** Lecture, three hours; discussion, one hour. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2B. Study of major texts in world literature, with emphasis on Western civilization. Texts include works and authors such as Chaucer's *Canterbury Tales*, Dante's *Divine Comedy*, Boccaccio's *Decameron*, Cervantes' *Don Quixote*, Shakespeare, Calderón, Molière, and Racine.

**1C. World Literature: Age of Enlightenment to the 20th Century.** Lecture, three hours; discussion, one hour. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 2C. Study of major texts in world literature, with emphasis on Western civilization. Authors include Swift, Voltaire, Diderot, Rousseau, Goethe, Flaubert, Ibsen, Strindberg, Dostoevsky, Kafka, Joyce, Woolf, and Stevens.

**1D. Great Books from the World at Large.** Lecture, three hours; discussion, one hour. Preparation: satisfaction of Subject A requirement. Study of major literary texts usually overlooked in courses that focus only on the canon of Western literature. Texts from at least three of the following areas read in any given term: African, Caribbean, East Asian, Latin American, and Middle Eastern literature. P/NP or letter grading.

**2A. Survey of Literature: Antiquity to Early Middle Ages (5 units).** Lecture, two hours; discussion, two hours; outside study, 11 hours. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1A. Study of selected texts from antiquity to the Middle Ages, with emphasis on literary analysis and expository writing. Texts include works and authors such as *Iliad*, *Gilgamesh*, Greek tragedies, *Aeneid*, Petronius, St. Augustine, or *Tristan and Iseult*. P/NP or letter grading.

**2B. Survey of Literature: Late Middle Ages to the 17th Century (5 units).** Lecture, two hours; discussion, two hours; outside study, 11 hours. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1B. Study of selected texts from the Middle Ages to the 17th century, with emphasis on literary analysis and expository writing. Texts may include works and authors such as Chaucer, Dante's *Divine Comedy*, Cervantes' *Don Quixote*, Shakespeare, Calderón, Molière, and Racine. P/NP or letter grading.

**2C. Survey of Literature: Age of Enlightenment to the 20th Century (5 units).** Lecture, two hours; discussion, two hours; outside study, 11 hours. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1C. Study of selected texts from the Age of Enlightenment to the 20th century, with emphasis on literary analysis and expository writing. Texts may include works by authors such as Swift, Voltaire, Diderot, Rousseau, Goethe, Flaubert, Ibsen, Strindberg, Dostoevsky, Kafka, and James Joyce or Wallace Stevens. P/NP or letter grading.

**2D. Survey of Literature: Great Books from the World at Large.** Lecture, two hours; discussion, two hours; outside study, 11 hours. Preparation: satisfaction of Subject A requirement. Not open for credit to students with credit for course 1D. Study of major literary texts usually overlooked in courses that focus only on the canon of Western literature, with emphasis on literary analysis and expository writing. Texts from at least three of the following areas read in any given term: African, Caribbean, East Asian, Latin American, and Middle Eastern literature. P/NP or letter grading.

## INDO-EUROPEAN STUDIES

Raimo A. Anttila, Ph.D. (*Linguistics*)  
Jesse L. Byock, Ph.D. (*Germanic Languages*)  
Vyacheslav Vs. Ivanov, Ph.D. (*Slavic Languages and Literatures*)

### Professors Emeriti

Henrik Birnbaum, Ph.D. (*Slavic Languages and Literatures*)  
Bengt T.M. Löfstedt, Ph.D. (*Classics*)  
Jaak Puhvel, Ph.D. (*Classics, Indo-European Studies*)  
Hartmut E.F. Scharfe, Ph.D. (*East Asian Languages and Cultures*)  
Hanns-Peter Schmidt, Ph.D. (*Near Eastern Languages and Cultures*)  
Terence H. Wilbur, Ph.D. (*Germanic Languages*)

### Associate Professor

Brent H. Vine, Ph.D. (*Classics*)

### Assistant Professor

Christopher M. Stevens, Ph.D. (*Germanic Languages*)

## Scope and Objectives

The prime aim of the interdisciplinary Indo-European Studies Program is the integral study of Indo-European culture, based on comparative linguistics, archaeology, social structure, and religion. The Ph.D. in Indo-European Studies is offered with three alternative major emphases: Indo-European linguistics, Indo-Iranian or other specialized language area studies, and European and related archaeology.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Doctoral Degree

### Admission

In order to be admitted to graduate status, applicants must have a B.A. degree with a major in an Indo-European language field (e.g., German, Slavic, Celtic, Romance languages, Latin, Greek), linguistics (with concentration in historical and comparative linguistics), anthropology, or archaeology. Letters of recommendation (at least two, preferably three or four) are required; Graduate Record Examination (GRE) scores are not required. Potential applicants may request a brochure by writing to the Indo-European Studies Program.

Admission to the program itself constitutes admission to the doctoral program; there is no master's degree offered. Should deficiencies exist in prerequisites to specific work at the graduate level, applicants may be granted provisional admission and directed to remove those deficiencies in the initial period of enrollment.

### Major Fields or Subdisciplines

The Ph.D. in Indo-European Studies is offered with three alternative major emphases: (1) Indo-European linguistics; (2) Indo-Iranian or other specialized language area studies; (3) European and related archaeology.

### Course Requirements

The course requirements vary among the three major fields of specialization. General requirements for all students regardless of specialization include knowledge of Vedic Sanskrit and Homeric Greek, basic competence in Indo-European linguistics (including the introductory courses Indo-European Studies M150 and 210), mythology (e.g., Classics 168), and archaeology (including Indo-European Studies 131, 132). Additional requirements by field are as follows:

*Linguistics.* An advanced seminar in comparative grammar, a minimum of four ancient Indo-European languages from different sub-branches, and additional units in courses offered by the Linguistics Department (e.g., phonetics, structural linguistics) and related departments. These additional units should be chosen in consultation with the adviser.

*Indo-Iranian or Other Specialized Language Area.* An advanced seminar in comparative grammar, a minimum of two ancient Indo-European languages from different sub-branches, and additional units in the area of specialization, to be chosen in consultation with the adviser.

*European and Related Archaeology.* A minimum of one ancient Indo-European language, an advanced seminar in European archaeology, a course in analytical methods in archaeology, and additional units in archaeology, anthropology, and related fields, to be chosen in consultation with your adviser.

## Written and Oral Qualifying Examinations

When the required course work is completed and prior to advancement to candidacy, a series of written examinations covering the major and minor fields are administered. These consist of translation and analysis of set texts from the ancient Indo-European languages and diagnostic examinations in the other fields. Following successful completion of the written examinations, the University Oral Qualifying Examination, based on the written examinations and the dissertation prospectus, is administered by the doctoral committee. It is intended to probe the student's grasp of the entire field. Should the student fail either the written or oral examinations, the interdepartmental degree committee may allow reexamination.

## Indo-European Studies

### Upper Division Courses

**131. European Archaeology: Proto-Civilizations of Europe.** Survey of European cultures from beginning of the food-producing economy in the 7th millennium B.C. to beginning of the Bronze Age in the 3rd millennium B.C.

**132. European Archaeology: Bronze Age.** Prerequisite: course 131 or consent of instructor. Survey of European cultures from around 3000 B.C. to the period of destruction of the Mycenaean culture about 1200 B.C. Aegean area and rest of Europe.

**M150. Introduction to Indo-European Linguistics.** (Same as Linguistics M150.) Prerequisites: one year of college-level study (course 3 or better, eight units minimum) of either Greek or Latin and either German or Russian. Survey of Indo-European languages from ancient to modern times; their relationships and chief characteristics.

**199. Special Studies (2 to 8 units).**

### Graduate Courses

**210. Indo-European Linguistics: Advanced Course.** Prerequisite: course M150 or equivalent. Comparative study of phonology, morphology, syntax, and lexicon. Problems in analysis and reconstruction.

**250A-250B. European Archaeology.** Prerequisite: consent of instructor. Studies in ancient European archaeological materials and their relationship to the Near East, Western Siberia, and Central Asia. May be repeated for credit. In Progress grading.

**280A-280B. Seminars: Indo-European Linguistics.** Prerequisite: course 210. Selected topics in Indo-European comparative grammar for advanced graduate students. In Progress grading.

**596. Directed Individual Studies (2 to 8 units).**

**597. Preparation for Ph.D. Qualifying Examinations (2 to 8 units).**

**599. Research for Ph.D. Dissertation (2 to 8 units).**

### Scope and Objectives

The Integrated Manufacturing Engineering (IME) Program is an interdepartmental program based in the Mechanical and Aerospace Engineering Department. The main purpose is to educate future manufacturing engineers.

The curriculum is centered around an integrated approach to product development, while clean environment, agility, and cost-effectiveness are emphasized. Instruction is computer-

aided, and teaching/learning laboratories are used to provide students with hands-on experience in advanced manufacturing technologies such as rapid prototyping, robotics, automated material handling, new manufacturing processes, and production planning and scheduling. Team teaching is employed to offer a balanced understanding of principles and methods required.

### Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

### Master's Degree

#### Admission

The Master of Engineering in Integrated Manufacturing Engineering is an interdepartmental program among the Departments of Electrical Engineering, Materials Science and Engineering, and Mechanical and Aerospace Engineering.

In addition to meeting the requirements of the Graduate Division, applicants to the Master of Engineering program in Integrated Manufacturing are required to take the General Test of the Graduate Record Examination (GRE). Applicants may be admitted to the program through any one of the three departments listed above.

More information may be obtained by contacting the program coordinator at 38-137 Engineering IV, (310) 206-1840.

#### Areas of Study

Consult the department.

#### Course Requirements

A total of 12 courses are required, including six 400-level core courses (Electrical Engineering 475C, Materials Science and Engineering 474A, 475A, Mechanical and Aerospace Engineering 474B, 474C, 475B), three electives (to be chosen in consultation with the student's faculty adviser), and three seminar courses (three quarters of Mechanical and Aerospace Engineering 476, the Integrated Manufacturing seminar series), which total 39 units.

#### Comprehensive Examination Plan

*Group Project.* Each student must participate in a group project through enrollment in Mechanical and Aerospace Engineering 478 for a total of 11 units. The group size is approximately three students.

#### Thesis Plan

None.

### Scope and Objectives

The undergraduate international development studies major aims to provide a liberal education in relation to the critical issues, experiences, and problems common to developing countries from a global or theme-oriented perspective. It is designed for students who are interested in careers related to international

development in academia, public or private agencies, or nonprofit organizations.

## Undergraduate Study

### Bachelor of Arts Degree

#### Preparation for the Major

No specific courses are required as preparation for the major, but students should have some beginning experience in the social sciences at the college level and be in good academic standing.

#### The Major

*Required:* Fifty-six units of upper division courses (including International Development Studies 100A-M100B and Economics 110 or 111), taken for a letter grade, and the foreign language requirement. (For the quantitative methods requirement, some lower division courses are accepted in place of upper division courses.) Courses applied toward the major may be selected from the list in item 5 below. Substitutions may be made only with consent of the faculty adviser.

The major consists of six parts (courses marked with an asterisk have requisites):

(1) International Development Studies 100A-M100B.

(2) Economics \*110 or \*111.

(3) Four core courses (two should be from the same discipline) from Anthropology \*130, \*150, Economics \*112, \*191, Geography 121, \*M128, 133, Political Science 115, \*167A, \*168, Sociology 101, 184.

(4) One course in quantitative methods from Anthropology \*180, 186, Biostatistics 100A, Economics 40, Geography 40, \*171, Political Science 6, Sociology 18, 104, \*112, \*113, Statistics 50.

(5) Twenty-four units of elective courses, including at least 16 units to be divided equally between two of the world's developing areas (e.g., Africa, Central and Eastern Europe/Central Asia, East Asia, Latin America, the Near East, South and Southeast Asia), selected from Anthropology \*151, 152, 153, M154P, M154Q, \*161, \*165, 167, 171, 173Q, 174P, 175R, 175T, 177, \*180, 186, Community Health Sciences 132, Economics \*103A through \*103Z, \*120, \*130, \*150, \*151, \*171, \*180, \*191, \*192, Education \*M108, \*C203, 204B, 204C, 204D, 204F, \*228, 234, 238, \*252B, 253B, 253C, Film and Television 106C, 112, Geography \*122, \*124, \*M128, 135, 142, \*148, \*151, 181, 182A, 182B, 186, 187, 188, 189, History 106A, 106B, 106C, 107A, 107B, 109A, 109B, 110A, 110B, 111A, 111B, 112A through C112D, 113, 134A, 134B, 165A, 165C, 166, 167A through 167D, 168, \*169, 170A, 171, 173, 174, \*M175A through \*175Z, 176A, 176B, 176C, 177, 178A, 178B, 179A, 179B, \*182A, \*182B, \*183A, \*183B, \*184, 188A, 188B, 188C, 190A, 190B, 197E, Latin American Studies 197, \*199, Political Science \*124, 130, \*131, 151A, 151B, 151C, 154A, 154B, 156A, 156B, 156C, 157, 159A,

159B, \*167A, \*168, \*C197A through \*C197D, Sociology \*105, 116, 156, 157, 160, 186, 187, 188, 190, Urban Planning M232A, 232B, \*235A, \*235B, M236A, 246, 266, \*M267A, \*267B, 269. Consult the program counselor regarding other possible electives that may be applied toward the major.

(6) Twenty-four quarter units in one modern foreign language or the equivalent in transfer units. Students may also take a proficiency examination administered and evaluated by members of the program faculty (or by outside faculty for languages not familiar to program faculty).

### Honors Program

Majors who have completed International Development Studies 100A-M100B and who have a 3.5 grade-point average in all courses offered for the major are eligible to formally apply for the honors program. In addition to completing all courses required for the major, students must take courses 195A-195B-195C, in which they research, write, and present an honors thesis. To receive honors at graduation, students must have at least a 3.5 GPA in courses applied toward the major (including 195A-195B-195C) and an overall GPA of 3.0.

Highest honors are awarded to students who complete the major (including courses 195A-195B-195C) with a 3.75 GPA and who produce an exceptional thesis.

## International Development Studies

### Upper Division Courses

**100A-M100B. Introduction to Development Studies.** (Formerly numbered Development Studies 100A-M100B.) Seminar, three hours. Two-term seminar for undergraduates designed to examine concepts and issues arising from economic, social, and political change in the Third World. **100A.** Economic Development and Culture Change. (Formerly numbered M100A.) Requisites: Anthropology 9, some beginning experience in social sciences at college level. **M100B.** Political Economy of Development. (Same as Political Science M197G and Sociology M180.) Analysis of determinants of underdevelopment, with focus on impact of colonialism, foreign investment, and trade, and on political economy.

**195A-195B-195C. Directed Studies for Honors.** (Formerly numbered Development Studies 195A-195B-195C.) Prerequisites: courses 100A-M100B, 3.5 GPA in courses offered for the major, formal application to honors program, consent of instructor. **195A.** Research, discussion, and planning of honors thesis. **195B-195C.** Research, preliminary drafting, and final writing of honors thesis. In Progress grading for course 195B (credit to be given only on completion of course 195C).

## INTERNATIONAL RELATIONS

*College of Letters and Science*

UCLA  
4256 Bunche Hall  
Box 951472  
Los Angeles, CA 90095-1472  
(310) 825-3862  
<http://www.sscnet.ucla.edu/polisci/>

### Scope and Objectives

The undergraduate specialization in international relations can only be taken jointly with a major in political science, and all requirements for the political science major must be met by or in addition to meeting the requirements of this program. Students completing the program receive a degree with a major in political science and specialization in international relations. The program is designed to serve the needs of (1) students desiring a general education focused on international affairs and (2) students preparing for graduate work in international affairs, whether in a social science or area study.

The program is also beneficial for (1) students planning careers (in business, law, journalism, or library service) with an international emphasis and (2) those preparing to teach social sciences in the secondary schools. These students should structure their programs primarily to meet the preparation requirements of the professional school or instructional credential of their choice.

Courses in management and administration, and in oral and written communications, ordinarily increase the career options of students in this program.

### Undergraduate Study

#### International Relations Specialization

##### Preparation for the Specialization

*Required:* Political Science 20, 50, and two courses from 10, 30, 40; Anthropology 9 or 60; Economics 1 and 2, 5, or 100; Geography 3 or 5; History 1A-1B-1C or any three courses from 5A, 5B, 8A, 8B, 8C, 9A, 9C, 9D, 10A, 10B, 11A, 11B; Sociology 1 or 31.

##### Upper Division Requirements

The political science major should be completed as follows: any four upper division political science courses in each of Fields II and IV and two additional courses both in Field I or III.

Other required social sciences courses include one course from Anthropology 161, M162P, 165, 167, 171, 173Q, 174P, 174Q, 175R, 175T, 175U, 177, Sociology 182, 183, 186, 187, 188, 189, 190; two courses from Economics 110, 111, 112, 180, 181A, 181B, 182, 190, 191, 192; one course from Geography 110, 121, 125, M128, 133, 140, 181, 182A, 182B, 183,

184, 185, 186, 187, 188, 189, 190; two courses from History 116A, 116B, 117A, 127A, 127B, 142A, 142B, 148C, 152A, 152B, 168.

Completion of the sixth quarter course (or equivalent as prescribed by the language department), with a grade of C or better, of any modern foreign language is also required. French 6, German 6, Spanish 25, and Russian 6 are most frequently offered in fulfillment of this requirement, but also refer to the offerings listed under African Languages, East Asian Languages and Cultures, Germanic Languages, Italian, Near Eastern Languages and Cultures, and Portuguese. Arabic, Chinese, French, German, Japanese, Russian, and Spanish are the languages of widest career utility in international affairs.

All courses must be taken for a letter grade.

### Area Focus

Students are advised but not required to concentrate their political science, geography, history, and language courses so as to achieve broad familiarity with one area, such as Africa, East Asia, Europe, Latin America, the Middle East, South Asia, or Southeast Asia.

For further information, contact the political science undergraduate counselor in the program office.

## Scope and Objectives

The undergraduate major in this discipline is called Near Eastern studies. For details, see the program by that name later in this section.

The designation of the interdepartmental degree program in Islamic studies is meant to convey the broadest cultural concern with peoples and places influenced by Islam, rather than a narrow approach to Islam as religion alone. Islam as a culture-forming force in history may be studied and understood through the literate sources of Islamic civilization and/or through systematic observation and examination of behavioral patterns and social relations of Muslim peoples. The commonality of an "idealized" and a "functional" or "practical" Islam does not preclude a multiple number of valid and varied approaches to Islamic studies. The program, with its core emphasis on the major languages of the Islamic Middle East, is intended to provide an internal view of the dynamics of Islamic culture.

The interdepartmental program for the Master of Arts and Ph.D. degrees in Islamic Studies is designed primarily for students desiring to prepare for an academic career. It may, however, be found useful for students seeking a general education and desiring a special emphasis in this particular area or for those who plan to live and work in this area, whose career will be aided by a knowledge of the people, languages, and institutions. (Such a career might be centered on teaching, research, business, engineering, journalism, librarianship, or government service.) Subject to the limitations of the program, the special course of studies is formulated for candidates according to their experience and requirements.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

In addition to the general University requirements, a Bachelor of Arts degree in Near Eastern Studies or in a related field with an emphasis on the Near East is required. The application deadline is March 1. Applicants are

normally expected to have completed the equivalent of Arabic 102A-102B-102C, Iranian 102A-102B-102C, or Turkic Languages 101A-101B-101C at the time of application. In addition, applicants should have completed the equivalent of two years of Near Eastern history (classical and modern); some coursework in Islamic culture and institutions may be applied toward the history requirement. Should there be any deficiencies in these prerequisites, the requirements must be satisfied by taking the appropriate courses without credit toward the advanced degree.

The Graduate Record Examination (GRE) is required of graduates of American universities and recommended for overseas applicants. No screening examination is necessary.

A score of 560 on the Test of English as a Foreign Language (TOEFL) is required of all applicants whose native language is not English and who have not attended English-speaking universities.

No special application form is required in addition to the UCLA *Application for Graduate Admission*.

### M.A. Islamic Studies/M.P.H.

The School of Public Health and the Islamic Studies Program have a concurrent degree program whereby students can work for the Master of Arts in Islamic Studies and the Master of Public Health. Applicants interested in this concurrent program should write to the Islamic Studies Program and the Student Affairs Office, UCLA School of Public Health.

### Areas of Study

Anthropology, Arabic, economics, geography, history, Islamic art history and architecture, music, Persian, political science, sociology, and Turkish.

### Course Requirements

A minimum of nine courses is required, five of which must be at the graduate level. Students must take no fewer than four courses on the appropriate level in one Near Eastern language of their choice. Additionally, students must take no fewer than five relevant upper division and graduate-level courses selected from two of the major fields and subdisciplines listed above. The omission of history as one of the fields is approved only in exceptional cases. Eight units of 500-series courses may be applied toward the minimum graduate course requirement and toward the total course requirement, provided the courses are not in the same discipline.

### Comprehensive Examination Plan

Four written examinations in the following areas must be passed: (1) any Near Eastern language; (2) the literature of the chosen language; (3) the history of the Near East; and (4) one of the other nonlanguage major fields or subdisciplines listed above. The examinations are constructed by the instructor responsible for each discipline. Reexamination in exceptional cases is determined by the Interdepart-

mental Degree Committee. The examiner or examiners are appointed by the chair of the interdepartmental degree program.

### Thesis Plan

None.

## Doctoral Degree

### Admission

Students intending to work for the Ph.D. in Islamic Studies are normally expected first to fulfill all requirements for the M.A. degree. Students entering the program with an M.A. from another university should have attained a level of preparation in languages, history, and social sciences equivalent to that required for the M.A. at UCLA. In addition, students are expected to show proficiency in a second Near Eastern language, one of which must be Arabic. Students who have not done so should make up any deficiencies by taking the appropriate courses without credit toward the degree.

The Graduate Record Examination (GRE) is required of graduates of American universities and recommended for overseas applications.

No special application form is required in addition to the *UCLA Application for Graduate Admission*.

### Major Fields or Subdisciplines

Anthropology, Arabic, art history, economics, geography, history, music, Persian, political science, Turkish.

### Course Requirements

For students entering directly into the Ph.D. program, course requirements are the same for the M.A. Beyond this, advanced courses in two Near Eastern languages, in Near Eastern history, and in one of the social sciences, on specific advisement of the interdepartmental degree program, are taken.

### Written and Oral Qualifying Examinations

Written qualifying examinations in four fields are required: two Near Eastern languages and literatures as approved by the advisory committee, the whole range of Near Eastern history, and one of the other nonlanguage major fields or subdisciplines listed above. Reexamination in any field is at the discretion of the doctoral committee in consultation with the chair of the program.

Research proposals, dossiers, research papers, and propositions are not permitted as alternatives to the written qualifying examinations.

## Course List

### Anthropology

- 130. Study of Culture
- 150. Study of Social Systems
- M154P. Gender Systems: North American
- M154Q. Gender Systems: Global
- 156. Comparative Religion
- 161. Development Anthropology

- 167. Urban Anthropology
- 215. Field Training in Archaeology
- 230P. Ethnology
- 230Q. Theories of Culture
- 232Q. Myth and Ritual
- 273. Cultures of the Middle East

### Arabic (Near Eastern Languages)

- 102A-102B-102C. Intermediate Literary Arabic
- 111A-111B-111C. Elementary Spoken Egyptian Arabic
- 112A-112B-112C. Advanced Spoken Egyptian Arabic
- 113A-113B-113C. Elementary Spoken Levantine Arabic
- 114A-114B-114C. Spoken Moroccan Arabic
- 120. Islamic Texts
- 130. Classical Arabic Texts
- 132. Philosophical and Kalam Texts
- 141. Modern Arabic Literature
- 150. Introduction to Arabic Literature and Culture
- 199. Special Studies in Arabic
- 220. Seminar: Islamic Texts
- 230. Medieval Literary Texts
- 240. Seminar: Arab Historians and Geographers
- 250. Seminar: Arabic Literature
- 596. Directed Individual Study
- 597. Examination Preparation
- 599. Ph.D. Dissertation Research and Preparation

### Archaeology

- 259. Fieldwork in Archaeology
- 596. Individual Studies for Graduate Students
- 597. Preparation for Ph.D. Qualifying Examinations

### Armenian (Near Eastern Languages)

- 130A-130B. Elementary Classical Armenian
- 131A-131B. Intermediate Classical Armenian
- 132A-132B. Advanced Classical Armenian
- 210. History of the Armenian Language
- 220. Armenian Literature of the Golden Age (A.D. 5th Century)

### Art History

- 104A. Western Islamic Art
- 104B. Eastern Islamic Art
- C104C. Problems in Islamic Art
- 105E. Byzantine Art
- 213. Advanced Studies in Islamic Art
- C214. Problems in Islamic Art

### Berber (Near Eastern Languages)

- 101A-101B-101C. Elementary Berber
- 102A-102B-102C. Advanced Berber
- 130. The Berbers
- 199. Special Studies in Berber Languages

### Classics

- M170. Power and Imagination in Byzantium

### Ethnomusicology

- 147. Survey of Classical Music in India
- 240. Music of Arabic-Speaking Near East
- 241. Music of Iran and Other Non-Arabic-Speaking Communities
- 248A-248B. Classical Music of India

### French

- 121A. Contemporary Francophone Literature: French-African Literature
- 221A. French-African Literature: Introduction to Study of French-African Literatures
- 221C. French-African Literature: French-African Literature of Berbero-Sudanese and Arabo-Islamic Africa
- 257A-257B. Studies in French-African Literature

### Geography

- 187. Middle East
- 188. Northern Africa

- 287. Middle East
- 288. Northern Africa

### Greek (Classics)

- 231A-231B-231C. Seminars: Later Greek and Byzantine Literature

### Hebrew (Near Eastern Languages)

- 230. Seminar: Medieval Hebrew Literature
- 231. Texts in Judeo-Arabic

### History

- 106A-106B-106C. Survey of the Middle East from 500 to the Present
- 107A-107B. Islamic Civilization
- 108A-108B. History of the Arabs
- 109A-109B. History of North Africa from the Moslem Conquest
- 110A-110B. Iranian History
- 111A-111B. History of the Turks
- 114. Topics in Middle Eastern History
- 123A-123B. Byzantine History
- 188B-188C. History of British India I, II
- 190A-190B. History of Southeast Asia
- 204A-204B. Seminars: Near and Middle Eastern History
- 205A-205B. Seminars: Medieval Middle Eastern History
- 206A-206B. Seminars: Social History of the Middle East
- 209A-209B. Seminars: Ottoman and Modern Turkish History
- 216A-216B. Seminars: Byzantine History
- 596. Directed Studies
- 597. Directed Studies for Graduate Examinations
- 599. Ph.D. Research and Writing

### Iranian (Near Eastern Languages)

- 102A-102B-102C. Intermediate Persian
- 103A-103B-103C. Advanced Persian
- 140. Contemporary Persian Belles Lettres
- 141. Contemporary Persian Analytical Prose
- 150A-150B. Survey of Persian Literature in English
- 169. Civilization of Pre-Islamic Iran
- 170. Religion in Ancient Iran
- 190A-190B. Introduction to Modern Iranian Studies
- 199. Special Studies in Iranian
- 220A-220B. Classical Persian Texts
- 221. Rumi, Mystic Poet of Islam
- 250. Seminar: Classical Persian Literature
- 251. Seminar: Contemporary Persian Literature
- 596. Directed Individual Study
- 597. Examination Preparation
- 599. Ph.D. Dissertation Research and Preparation

### Islamic (Near Eastern Languages)

- 110. Introduction to Islam
- 596. Directed Individual Study
- 597. Examination Preparation
- 599. Ph.D. Dissertation Research and Preparation

### Linguistics

- 220. Linguistic Areas
- 225. Linguistic Structures

### Near Eastern Languages

- 200. Bibliography and Method of Near Eastern Languages and Literatures
- 210. Survey of Afro-Asiatic Languages
- M241. Folklore and Mythology of the Near East
- 290. Seminar: Paleography
- 596. Directed Individual Study
- 597. Examination Preparation
- 599. Ph.D. Dissertation Research and Preparation

### Philosophy

- 104. Topics in Islamic Philosophy

**Political Science**

132A-132B. International Relations of the Middle East

157. Government and Politics in the Middle East  
C245. Middle Eastern Politics

**Semitics (Near Eastern Languages)**

215B. Syriac

**Sociology**

134. Culture and Personality

187. Population and Society in the Middle East

**Turkic Languages (Near Eastern Languages)**

101A-101B-101C. Elementary Turkish

102A-102B-102C. Advanced Turkish

111A-111B-111C. Elementary Uzbek

112A-112B-112C. Advanced Uzbek

114A-114B-114C. Bashkir

160. Turkish Tradition

180. Modern Turkic Languages and Peoples

199. Special Studies in Turkic Languages

210A-210B-210C. Introduction to Ottoman

211. Ottoman Diplomats

220A-220B-220C. Classical Uzbek (Chagatay)

230A-230B-230C. Historical and Comparative Survey of Turkic Languages

235A-235B. Middle Turkic

240A-240B-240C. Advanced Ottoman

250A-250B-250C. Islamic Texts in Chagatay

280A-280B. Seminars: Modern Turkish Literature

290A-290B. Seminars: Classical Turkic Literature

596. Directed Individual Study

597. Examination Preparation

599. Ph.D. Dissertation Research and Preparation

## Scope and Objectives

Italian art and letters provide an invaluable key to understanding many facets of European civilization. Examined in its own right or studied comparatively, Italian culture offers unmatched rewards. The UCLA faculty views transmitting the Italian language as inseparable from transmission of the culture, so students consider in depth virtually all aspects of Italian civilization. After their linguistic initiation, ideally including a year abroad, students may pursue advanced studies in the department exclusively and through a wide range of interdisciplinary programs.

Bachelor of Arts degrees are offered in Italian and in Italian and Special Fields. Graduate study leads to the Master of Arts degree in Italian (with specializations in literature and language) and to the Ph.D. (literature specialization). In addition, the department participates extensively in the interdepartmental graduate programs in Romance Linguistics and Literature, Comparative Literature, and Folklore and Mythology.

## Undergraduate Study

### Bachelor of Arts in Italian

The program of studies leading to the Bachelor of Arts in Italian consists of two distinct phases: preparation in the language and study of the literature and culture. While literature courses constitute the bulk of the program, good knowledge of the language is prerequisite to all upper division literature courses credited toward the major in Italian. The use of Italian is stressed at all levels of study. Detailed information on programs and specific degree requirements is available from the department.

### Preparation for the Major

*Required:* Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B.

### The Major

*Required:* Twelve upper division Italian courses, including one course from 102A, 102B, 102C; one course from 113 through 116B; one course from 118 through 122; 190; and eight courses (at least 32 units) from 103A through 197 selected in consultation with the undergraduate adviser. One course from another humanities or social sciences department, selected in consultation with the undergraduate adviser, is also required. Recommended courses include Art History 106A, 106B, 106C, Comparative Literature C161, C167, History 125A, 125E, 125F, 132A, 132B, Humanities 1A through 1D.

Majors who select courses taught in English must do additional work from the original Italian texts in consultation with the course instructor, who will meet with them on a regular basis.

### Study in Italy

Students are encouraged to spend up to one year in Italy either to (1) study with an education abroad program or (2) study in an Italian university. They are also urged to take advantage of

summer language workshops and study programs, either at American campuses or in Italy. The Department of Italian offers an intensive, eight-week summer Italian studies program. For information on *Casa Italiana*, contact the department or the Summer Sessions Office, 1147 Murphy Hall.

## Honors Program

Majors with an overall grade-point average of 3.25 and a 3.5 GPA or better in Italian are eligible to participate in the honors program. Requisites: Italian 102A-102B-102C.

Candidates select three upper division literature courses in which additional readings are required. In the last term of the senior year, they are required to write a thesis on a subject related to one of the three above-mentioned courses. The average for the three courses should not fall below A-. Applications should be made during the last term of the junior year.

## Bachelor of Arts in Italian and Special Fields

Students with particular interests or professional goals may select this major, with coursework divided between Italian and a collateral field. Study programs fulfilling requirements for the major have been developed with the departments and programs listed below.

Majors who select courses taught in English must do additional work from the original Italian texts in consultation with the course instructor, who will meet with them on a regular basis.

### Anthropology Field

#### Preparation for the Major

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; Anthropology 8 or 9, and one elective from 33, 34, 60, 60P.

#### The Major

Italian 102A or 102B or 102C, 195, and five courses from 103A through 197 selected in consultation with the undergraduate adviser; five courses from Anthropology 110, 111, 112, M115A, M115B, C115R, 118A, 118B, 130, 132, 133Q, 135A, 135B, 135C, 135S, 135T, 138, 139, 139L, M140, 141, 143, 150 through M154Q, 161, 182, 183 selected in consultation with the undergraduate adviser.

### Art History Field

#### Preparation for the Major

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; Art History 50 or 51, 54, 57.

#### The Major

Italian 102A or 102B or 102C, 195, and five courses from 103A through 197 selected in consultation with the undergraduate adviser; six courses from Art History M102F, M102G, M102H, 105A through 105D, 105F, 106A through 106D, 109A, 109C, 110A, 110B,

110D, 110F, 127 selected in consultation with the undergraduate adviser.

### Classics Field

#### Preparation for the Major

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; Classics 10 or 20, 40 or 41, and Greek 1, 2, 3 and/or Latin 1, 2, 3, or equivalent.

#### The Major

Italian 102A or 102B or 102C, 195, and four courses from 103A through 197 selected in consultation with the undergraduate adviser; Greek 100 or Latin 100, one course from Classics 141 through 197 (except 195), and one course from Greek 101A through 133 or Latin 101 through 133 (graduate seminars may be substituted for upper division author courses) selected in consultation with the undergraduate adviser.

### Design Field

#### Preparation for the Major

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; Design 21, 22, 23, 32B, and one course from 32C, 35A, 35B.

#### The Major

Italian 102A or 102B or 102C, 195, and four courses from 103A through 197 selected in consultation with the undergraduate adviser; three courses from Design 101 through 197 selected in consultation with the undergraduate adviser.

### English Field

#### Preparation for the Major

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; English 3, 4, 10A, 10B, 10C.

#### The Major

Italian 102A or 102B or 102C, 195, and four courses from 103A through 197 selected in consultation with the undergraduate adviser; four courses from English 100, 101 through 119, 121, 140A through M197A selected in consultation with the undergraduate adviser.

### Film and Television Field

#### Preparation for the Major

Italian 1, 2, 3, 4, 5, 25, 46.

#### The Major

Italian 102A or 102B or 102C, 195, and six courses from 103A through 197 selected in consultation with the undergraduate adviser; six courses from Film and Television 106A, 106B, 106C, 107, 108, 110A, 110C, 112 through 116, 127, 193A selected in consultation with the undergraduate adviser.

### French Field

#### Preparation for the Major

Italian 1, 2, 3, 4, 5, 25, French 1, 2, 3, 4, 5, 6, 12 or 14.

### The Major

Italian 102A or 102B or 102C, 195, and three courses from 103A through 197 selected in consultation with the undergraduate adviser; one course from French 114A, 114B, 114C, and three courses from 115A through 142 selected in consultation with the undergraduate adviser.

### History Field

#### Preparation for the Major

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; one course from History 1A, 1B, 1C, 88B through 88E, 88Q, 88U.

#### The Major

Italian 102A or 102B or 102C, 195, and five courses from 103A through 197 selected in consultation with the undergraduate adviser; six courses from History 100A through 102, 119 through 121D, 125A through 127B, 132A, 132B, 135A through 137C selected in consultation with the undergraduate adviser.

### Linguistics Field

#### Preparation for the Major

Italian 1, 2, 3, 4, 5, 25, Linguistics 20, and six terms of a second Romance language or Latin or equivalent.

#### The Major

Italian 102A or 102B or 102C, 190 or 222A, 195, 222B, and one course from 103A through 197 selected in consultation with the undergraduate adviser; Linguistics 103, 110, 120A, 120B, and one course from M146, M150, 165A, 165B, 170 selected in consultation with the undergraduate adviser.

### Musicology Field

#### Preparation for the Major

Italian 1, 2, 3, 4, 5, 25, Musicology 1A-1B or 2A-2B, 26A-26B-26C. *Recommended:* Music 20A, 20B, 20C.

#### The Major

Italian 102A or 102B or 102C, 195, and four courses from 103A through 197 selected in consultation with the undergraduate adviser; five courses from Musicology 126A through C127F, 135A, 135B, 135C, 156 selected in consultation with the undergraduate adviser.

### Philosophy Field

#### Preparation for the Major

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; one course from Philosophy 1 through 31.

#### The Major

Italian 102A or 102B or 102C, 195, and five courses from 103A through 197 selected in consultation with the undergraduate adviser; Philosophy 100A, 100B, 100C, and three courses from M101A through 189 selected in consultation with the undergraduate adviser.

### Political Science Field

#### Preparation for the Major

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; Political Science 10, 20.

#### The Major

Italian 102A or 102B or 102C, 195, and four courses from 113 through 122, M158, 190 selected in consultation with the undergraduate adviser; six courses from Political Science 111A through 113, 115 through 119Z, 137A, 137B, 139A through 139Z, 153A, 155, 167A selected in consultation with the undergraduate adviser.

### Portuguese Field

#### Preparation for the Major

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; Portuguese 1, 2, 3, 25, M42 or M44 or 46.

#### The Major

Italian 102A or 102B or 102C, 195, and four courses from 113 through 122, M158, 190 selected in consultation with the undergraduate adviser; three courses from Portuguese 120A through 197 selected in consultation with the undergraduate adviser.

### Spanish Field

#### Preparation for the Major

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; Spanish 1, 2, 3, 4, 5, 25 (or equivalent as determined by placement test), M42 or M44.

#### The Major

Italian 102A or 102B or 102C, 195, and three courses from 103A through 197 selected in consultation with the undergraduate adviser; one course from Spanish 120A, 120B and three courses from 122 through M161 selected in consultation with the undergraduate adviser.

### Theater Field

#### Preparation for the Major

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B.

#### The Major

Italian 102A or 102B or 102C, 195, and five courses from 103A through 197 (122 is recommended) selected in consultation with the undergraduate adviser; one course from Theater 101A, 101B, 101C and five courses from 105, 111A, 111B, 111C, Classics 143, English 142A, 142B, 142C, 168 selected in consultation with the undergraduate adviser.

### Women's Studies Field

#### Preparation for the Major

Italian 1, 2, 3, 4, 5, 25, and one course from 42A, 42B, 46, 50A, 50B; Women's Studies 10.

#### The Major

Italian 102A or 102B or 102C, 195, and five courses from 103A through 197 (M158 is recommended) selected in consultation with the

undergraduate adviser; Women's Studies 110A or 110B, and five additional upper division courses from any of the women's studies course lists selected in consultation with the undergraduate adviser.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

Three letters of recommendation should be sent to the Graduate Adviser, Department of Italian.

Files of prospective graduate students meeting the University minimum requirements are screened by the departmental committee on admissions. Admission on a provisional basis may be recommended in case of deficiencies in preparation.

### Areas of Study

The Master of Arts degree is available with specializations in Italian literature and Italian language.

### Course Requirements

*Italian Literature Specialization.* (1) For the comprehensive examination plan, 12 courses are required, including Italian 205A, 205B, and 222A. The other nine courses must be distributed in three main literary periods: Middle Ages, Renaissance, modern (at least two courses in each period). Three of these may be upper division undergraduate courses if approved by the graduate adviser. Related courses in other departments, such as History 205A-205B and Art History 230, are strongly recommended. (2) For the thesis plan, 12 courses are required, including Italian 205A, 205B, and 222A. At least nine courses must be in the 200 series.

*Italian Language Specialization.* Prerequisites: a general grasp of linguistics equivalent to Linguistics 20 and 110, and a broad familiarity with Italian literary and cultural history. (1) For the comprehensive examination plan, 12 courses are required, including Italian 222A-222B-222C and Linguistics 202 or equivalent. At least nine courses must be in the 200 series. (2) For the thesis plan, 12 courses are required, including Italian 222A-222B-222C and Linguistics 202 or equivalent. At least nine courses must be in the 200 series.

No 500-series courses may be applied toward the M.A. course requirements.

### Comprehensive Examination Plan

In general, the department favors the comprehensive examination plan, which consists of a minimum five-hour written examination to be

given before the final examination period in the Fall and Spring Quarters. Alternatively, a student may petition to substitute a master's thesis in lieu of the examination, although this option is not encouraged. The examination tests the student's general competency and does not have major and minor fields of emphasis. After the written examination, an oral examination must be taken. In case of failure, the student may be reexamined once, subject to approval by the examination committee and the chair of the department.

### Thesis Plan

This plan is recommended for research-oriented students of exceptional merit. Students who have completed the first year of graduate work with at least a 3.7 grade-point average may be nominated by one of the faculty members of the department for application to the thesis plan. If the nomination is accepted by the faculty, a three-member thesis committee is submitted to the Graduate Division for appointment.

At this point the student must have completed Italian 205A, 205B and at least two other graduate courses in Italian. On acceptance, the guidance committee helps the student choose six more graduate courses in preparation for the thesis.

The thesis must be at least 50 pages long and follow the rules and style of the UCLA Ph.D. dissertation regulations. It must be submitted in the sixth quarter of graduate work. After completion of the thesis, an oral examination must be passed testing knowledge in the field of the thesis and general competence in Italian literature.

## Doctoral Degree

### Admission

Three letters of recommendation from professionals in the field of Italian studies should be sent to the Graduate Adviser, Department of Italian.

Prerequisite for entering the department's doctoral program is an M.A. in Italian Literature from UCLA or its equivalent from another university in the U.S. Students who have a master's degree in Italian Literature or its equivalent from another institution are required to pass Part I of the Ph.D. qualifying examinations by the end of the third quarter in residence. Students should expect to take Part II of the examinations after approximately six quarters.

Students holding the M.A. from UCLA normally take Part II of the qualifying examinations at the end of the sixth quarter in residence.

### Major Fields or Subdisciplines

Two centuries of Italian literature in the medieval, Renaissance and baroque, or modern areas comprise the major fields, while two centuries of Italian literature from any of the areas mentioned above make up the minor fields.

A major in a literary genre or a minor outside the department may be chosen, provided that it relates to the student's major field of specialization. This field must have the approval of the entire department.

### Course Requirements

In addition to those required for the master's degree, at least 10 other quarter courses, of which no more than two 596 courses may apply, are required. Students also must take such courses as their guidance committee prescribes for the qualifying examinations (such as courses 596 or 597). All courses from Italian 201 on, except for 205A and 205B, may be applied toward the Ph.D. degree.

### Written and Oral Qualifying Examinations

The comprehensive examination for the M.A. in Italian at UCLA corresponds to Part I of the Ph.D. qualifying examinations.

The department also requires both written and oral qualifying examinations (Part II), which must be taken during the same academic year, although not necessarily during the same quarter. Normally taken six quarters after the M.A. degree, the written examination consists of two parts: an eight-hour examination in the student's major field and a six-hour examination in the minor field. Additionally, a two-hour University Oral Qualifying Examination is required. A summary of requirements entitled *Regulations for the Ph.D. Examination* is available in the department. In case of failure, the student may be reexamined on unanimous approval of the guidance committee, after at least one academic quarter of additional residence.

## Italian

### Lower Division Courses

Enrollment in the Italian open language laboratory is required of all students in Italian 1, 1A, 2, 2A, and 3.

**1. Elementary Italian — Beginning.** Lecture, five hours; live laboratory, one hour.

**1A. Elementary Italian — Accelerated (8 units).** Lecture, 10 hours; laboratory, two hours. Designed for those students having capacity and desire to learn the language at a much faster pace than normal. Encompasses material ordinarily intended for courses 1 and 2.

**1G. Special Reading Course.** Readings, three hours. Open to graduate students in other fields. Preparation for Graduate Division foreign language reading requirement. S/U grading.

**2. Elementary Italian — Continued.** Lecture, five hours; live laboratory, one hour. Enforced requisite: course 1.

**2A. Elementary Italian — Accelerated (Continued) (8 units).** Lecture, 10 hours; laboratory, two hours. Enforced requisite: course 1A or 2. Designed for those students having capacity and desire to learn the language at a much faster pace than normal. Encompasses material ordinarily intended for courses 3 and 4.

**2G. Special Reading Course.** Readings, three hours. Open to graduate students in other fields. Preparation for Graduate Division foreign language reading requirement.

**3. Elementary Italian — Continued.** Lecture, five hours; live laboratory, one hour. Enforced requisite: course 2.

**3A. Intermediate Italian — Accelerated (8 units).** Lecture, six hours; laboratory, two hours. Enforced requisite: course 2A or 3. Designed for those students having capacity and desire to learn the language at a much faster pace than normal. Encompasses material ordinarily intended for courses 4 and 5.

**4. Intermediate Italian.** Lecture, five hours; laboratory, one hour. Enforced requisite: course 3.

**5. Intermediate Italian.** Lecture, five hours; laboratory, one hour. Enforced requisite: course 4.

**7. Elementary Italian Conversation.** Lecture, five hours (first six-week summer session). Encompasses conversational material included in course 1, with emphasis on traveler's vocabulary.

**8A-8B-8C. Italian Conversation (3 units each).** Discussion, three hours; outside study, six hours. Intended for students who have taken three to six terms of language instruction and have developed considerable skill in Italian. Designed to further improve students' spoken proficiency through constant exposure and practice of the language. Each course may be repeated once for credit.

**25. Advanced Italian.** Lecture, five hours. Enforced requisite: course 5. Advanced grammar and composition course with readings from select literary works.

**42A-42B. Italy through the Ages, in English.** Lecture, three hours; discussion, one hour; outside study, eight hours. P/NP or letter grading. **42A.** Holy Roman Empire to Sack of Rome. Survey of Italy's unique contribution to Western civilization in history, literature, painting, and politics from time of Charlemagne to High Renaissance. **42B.** Late Renaissance to Post-modern Period. Baroque sculpture and architecture, Galileo, Enlightenment, unification of Italy, Fascism, Communism, terrorism, neorealistic cinema, and "moral revolution" of the 1980s and 1990s.

**46. Italian Cinema and Culture.** Lecture, two hours; discussion, one hour; film screenings, two to three hours. Survey of development of Italian cinema and culture from the 1900s to the present through analysis of principal aesthetic, literary, artistic, and philosophical movements in Italy as reflected in works of the nation's filmmakers and writers.

**50A-50B. Masterpieces of Italian Literature in English.** Lecture, three hours; outside study, nine hours. P/NP or letter grading. **50A.** Middle Ages and Renaissance. Philosophical, religious, and sociopolitical issues examined in authors such as St. Francis, Guinizelli, Cavalcanti, Dante, Boccaccio, Petrarca, Poliziano, Lorenzo de' Medici, Machiavelli, Castiglione, and Ariosto. **50B.** Baroque Period to the Present. Close reading of major works selected from such writers as Tasso, Bruno, Campanella, Vico, Parini, Alfieri, Foscolo, Leopardi, Manzoni, Verga, and Pirandello.

## Upper Division Courses

Sixteen quarter units in Italian or equivalent are required for admission to any upper division course. Upper division courses for the majors are conducted in Italian.

**100. Composition and Style.** (Formerly numbered 130.) Lecture, three hours; outside study, nine hours. Requisite: course 25. Development of writing techniques and proficiency in composition and style, with emphasis on editing for grammar and style. P/NP or letter grading.

**102A-102B-102C. Italian Cultural Experience, in English.** Lecture, three hours; outside study, nine hours. Study of cultural development of Italy. P/NP or letter grading. **102A.** Roots of Western civilization; social and artistic achievements of communal society; Marco Polo, Dante, Boccaccio, Giotto, rise of Italian merchant class. **102B.** Renaissance discovery of human genius; crucial period between Machiavelli and Galileo, leading Italy and Europe to scientific revolution. **102C.** Birth of Italian nation from wars of independence to foundation of modern republic, delineated through narrative and cinema in historical context.

**103A-103B-103C. Introduction to Italian Literature and Literary Analysis.** (Formerly numbered 200A-200B-200C.) Lecture, three hours; outside study, nine hours. Requisite: course 100. Italian literature from 1150 to the present, with emphasis on methods of interpreting literary form and meaning in poetry, drama, epic, and novel. P/NP or letter grading:

**103A.** Knights, Saints, and Lovers. Beginning with generation dominated by St. Francis, love poets of court of Frederick II to three classic writers of Italian literature: Dante, Petrarch, and Boccaccio. Renaissance rediscovery of human individuality, dignity, and creativity in works of Pico della Mirandola and Castiglione.

**103B.** Power and Beauty. Classics of High Renaissance in theater, epic, and lyric poetry, followed by surprising developments of baroque period, Counter-Reformation, and Enlightenment. Artists and writers include Leonardo da Vinci, Michelangelo, Machiavelli, Ariosto, Tasso, Bruno, and Vico.

**103C.** Romanticism, Politics, and Disillusionment. Great poetry and dialogues of Giacomo Leopardi; patriotic literature accompanying rise of modern Italian state; futurism, surrealism, neorealism, and post-modernism. Authors may include Foscolo, Manzoni, Verga, Pirandello, Calvino, and Dario Fo.

**110. Dante, in English.** (Formerly numbered 110A-110B.) Lecture, three hours; outside study, nine hours. Close study of one of world's greatest literary geniuses, particularly of his masterpiece, *Divine Comedy*, the archetypal medieval journey through the afterworld. P/NP or letter grading.

**113. Dante's *La Divina Commedia*.** (Formerly numbered 113A-113B.) Lecture, three hours; outside study, nine hours. Requisite: course 100. Study of medieval philosophy, religion, and politics in *La Divina Commedia*, greatest literary achievement of the age. P/NP or letter grading.

**114A-114B. Middle Ages.** Lecture, three hours; outside study, nine hours. Requisite: course 100. P/NP or letter grading. **114A.** Tradition of Love from Sacred to Profane. Study of major love poets of all time (Dante, *Dolce Stil Novo* poets, and Petrarca) caught between courtly and religious codes. **114B.** Medieval Humor, Moralism, and Society. Novelty of Boccaccio's witty and comic masterpiece, *Decameron*, analyzed within context of moral and social codes of culture of the time.

**116A-116B. Italian Renaissance.** Lecture, three hours; outside study, nine hours. Requisite: course 100. P/NP or letter grading. **116A.** Renewal of Art and Thought. Study of the *Quattrocento* and its representatives in the arts and humanistic thought (i.e., Mantegna, Botticelli, Pico, Valla, and Ficino). **116B.** Power and Imagination in the Renaissance. Study of artistic world of Leonardo, Raffaello, Michelangelo, Titian, and literary masterpieces of Machiavelli, Castiglione, Ariosto, Tasso, in world molded by powerful political forces, such as the Roman Papacy and Medici, Gonzaga, and D'Este courts.

**118. Age of Enlightenment.** Lecture, three hours; outside study, nine hours. Requisite: course 100. Study of philosophical and political prose, satirical poetry, and drama, unveiling birth of modern spirit through writings of Vico, Metastasio, Parini, and Alfieri. P/NP or letter grading.

**119. Italian *Ottocento*.** Lecture, three hours; outside study, nine hours. Study of the *Ottocento*, the rich period of Italian history and culture from Romanticism to decadentism when philosophical and political issues affected not only the mind but also the heart. Emergence of unique brand of individualism through poetry and prose writings of Foscolo, Leopardi, Manzoni, Nievo, and Verga. P/NP or letter grading.

**120. Literature in the 20th Century.** Lecture, three hours; outside study, nine hours. Requisite: course 100. Analysis of novel, poetry, and drama of the 20th century in connection with modern thought and culture. Authors may include D'Annunzio, Pirandello, Montale, Pasolini, and Calvino. P/NP or letter grading.

**121. Literature and Film.** Lecture, three hours; discussion, one hour; outside study, eight hours. Comparative study of specific literary works and their translation into film and of different techniques in the two forms of expression. Texts include literary works, screenplays, and works on literary and film theory. P/NP or letter grading.

**122. Italian Theater.** Lecture, three hours; discussion, one hour; outside study, eight hours. Study of dramatic works from the Renaissance to the present and their theatrical presentation. P/NP or letter grading.

**131. Reading and Reciting.** Lecture, three hours. Prerequisite: consent of instructor based on sufficient knowledge of Italian. Emphasis on diction, interpretation, and performance of one-act plays as vehicles for perfection of pronunciation, comprehension, and fluency. May be repeated twice for credit.

**M140. Italian Novella from Boccaccio to Basile.** (Same as Folklore M140.) Lecture, three hours; outside study, nine hours. Analysis of development of the Italian novella in its structure, historical context, and folk material. Special emphasis on how the Italian novella influenced other European literatures. P/NP or letter grading.

**150. Modern Fiction in Translation.** Lecture, three hours; outside study, nine hours. Select issues in 20th-century thought traced in writers of international fame, with focus on concerns and styles of several prose works such as Umberto Eco's *The Name of the Rose*, Pasolini's *The Ragazzi*, Pirandello's *The Late Mattia Pascal*, and Calvino's *The Cosmicomics*. P/NP or letter grading.

**M158. Women in Italian Culture.** (Same as Women's Studies M158.) Lecture, three hours; discussion, one hour; outside study, eight hours. Examination of role of women in Italian society through history, politics, literature, film, and art. Italian majors required to read texts in Italian. P/NP or letter grading.

**190. History of the Italian Language.** Lecture, three hours. Main forces which have shaped literary or standard Italian and specific ways in which the language has evolved. Tracing of its changing relations with other European languages and survey of effects wrought by historical events, changes in taste, and altered social functions.

**195. Special Fields Research.** Limited to senior Italian and special fields majors. Unscheduled tutorial in which paper (20 to 25 pages) is to be written in either Italian or English which requires students to unify and synthesize their experience of combining two disciplines of study. Paper graded by ad hoc committee of faculty from department, with the chair in charge. P/NP or letter grading.

**197. Variable Topics in Italian Studies.** Discussion, three hours; outside study, nine hours. Seminar focusing on themes and issues outside the uniquely Italian literature topics covered in regular departmental undergraduate courses.

**199. Special Studies (2 to 4 units).** Prerequisite: consent of instructor. Course of independent studies for advanced undergraduates who wish to pursue a special research project under direction and close supervision of a faculty member.

## Graduate Courses

**201. Bibliography and Methods of Research.** Lecture, three hours.

**205A-205B. Studies in Criticism.** (Formerly numbered 205A-205B-205C.) Lecture, three hours; outside study, 18 hours. History, theory, and practice of criticism. S/U or letter grading. **205A.** Presentation, discussion, and application of basic currents of criticism from stylistics to structuralism. **205B.** Presentation, discussion, and application of contemporary approaches from structuralism to deconstruction, new historicism, and feminist criticism.

**210. Studies in Early Italian Literature.** (Formerly numbered 210A-210B-210C.) Lecture, three hours; outside study, 18 hours. Topics include origins of Italian language and study of early texts, *Scuola Siciliana* and early poetry of Central and Northern Italy, and *Dolce Stil Novo*. S/U or letter grading.

**214A-214F. Studies in Medieval Literature.** (Formerly numbered 214A-214G.) Lecture, three hours; outside study, 18 hours. S/U or letter grading:

**214A.** *La Divina Commedia*.

**214B.** Dante's Other Works.

**214C.** Petrarca's *Canzoniere*.

**214D.** Boccaccio's *Decameron*.

**214E.** Boccaccio's Other Works.

**214F.** Variable Topics. Variable-content seminar on themes and issues of medieval literature, with coverage of authors such as St. Francis of Assisi or Jacopone de Todi.

**215A-215B. Studies in 15th-Century Literature.** (Formerly numbered 215A-215B-215C.) Lecture, three hours; outside study, 18 hours. S/U or letter grading. **215A.** Variable Topics. Variable-content seminar on themes and issues of 15th-century literature, with coverage of authors such as Pulci or Poliziano. **215B.** Age of Lorenzo de' Medici and Poliziano.

**216A-216E. Studies in the Renaissance.** Lecture, three hours; outside study, 18 hours. S/U or letter grading:

**216A.** Machiavelli and Renaissance Political Thought.

**216B.** Ariosto and Renaissance Epic.

**216C.** Tasso.

**216D.** Renaissance Theater.

**216E.** Variable Topics. Variable-content seminar on themes and issues of Renaissance literature, with coverage of authors such as Vasari, Leonardo, or Benvenuto.

**217. Studies in 17th-Century Literature.** (Formerly numbered 217A-217B-217C.) Lecture, three hours; outside study, 18 hours. Topics include Galileo and birth of scientific prose, Giordano Bruno, Gian Battista Marino, and baroque poetry. S/U or letter grading.

**218A-218D. Studies in 18th-Century Literature.** (Formerly numbered 218A-218E.) Lecture, three hours; outside study, 18 hours. S/U or letter grading:

**218A.** Vico.

**218B.** Alfieri.

**218C.** Goldoni.

**218D.** Variable Topics. Variable-content seminar on themes and issues of 18th-century literature, with coverage of authors such as Vico or Ludovico.

**219A-219D. Studies in 19th-Century Literature.** (Formerly numbered 219A-219F.) Lecture, three hours; outside study, 18 hours. S/U or letter grading:

**219A.** Foscolo.

**219B.** Leopardi.

**219C.** Manzoni.

**219D.** Variable Topics. Variable-content seminar on themes and issues of 19th-century literature, with coverage of authors such as Carducci, Tommaseo, or Nievo.

**220. Studies in Turn-of-the-Century Literature.** (Formerly numbered 220A-220B-220C.) Lecture, three hours; outside study, 18 hours. Topics include Verga and *Verismo*, poetry, prose, and theater of D'Annunzio, and poetry of Carducci and Pascoli. S/U or letter grading.

**221A-221E. Studies in 20th-Century Literature.** Lecture, three hours; outside study, 18 hours. S/U or letter grading:

**221A.** Variable Topics. Variable-content seminar on themes and issues of 20th-century literature, with coverage of authors such as D'Annunzio, Verga, Marinetti, and Pirandello.

**221B.** Contemporary Poetry. Analysis of legacy of two major figures in Italian poetry from World War II — Ungaretti and Montale. Thorough examination of movements and individual poets active in the 1960s and 1970s.

**221C.** 20th-Century Narrative to World War II. Assessment of turn-of-the-century narrative pattern (Gabriele D'Annunzio) and analysis of radical innovations brought about by such towering figures as Pirandello, Svevo, Bernari, Marinetti, etc.

**221D.** 20th-Century Narrative since World War II. In-depth exploration of some major works that have made contemporary Italian literature famous throughout the world, with special emphasis on study of formalistic modes adopted by the neo-avant-garde.

**221E.** Pirandello and Contemporary Theater. Thorough reading of theatrical texts, accompanied by analysis of how the plays have been realized on stage by important directors such as Strehler, Ronconi, and the playwrights/actors themselves. Emphasis on ritualistic implications of the theatrical performance.

**222A-222B-222C. Studies in History of Italian Language.** (Formerly numbered 259A-259B-259C.) Lecture, three hours; outside study, 18 hours. Prerequisite: graduate standing. S/U or letter grading:

**222A.** History of the Italian Language. Historical survey of development of the language from medieval times to unification of the country (1861). *Questione della lingua*, general acceptance of Florentine speech, and its evolution into the national language.

**222B.** Structure of Modern Italian. Various tendencies in modern and contemporary Italian. Foreign influences in today's Italian language. Relationship between national language and the various dialects.

**222C.** Italian Dialectology. Historical differentiation of Italian dialects considered in its areal dimension. Specific geolinguistic problems and solutions illustrating growth of the discipline up to its present merging with sociolinguistics as Italian dialects become more vertically defined.

**M230A-M230B. Folk Tradition in Italian Literature.** (Same as Folklore M230A-M230B.) Lecture, two hours.

**250A-250D. Seminars: Dante.** Seminar, three hours.

**251. Seminar: Petrarch.** Seminar, three hours.

**252. Seminar: Boccaccio.** Seminar, three hours.

**253A-253B-253C. Seminars: Chivalric Poetry in Italy.** Seminar, three hours. Relationship between the genre and its French medieval sources, with study of its evolution in Italy through Pulci, Boiardo, Ariosto, and Tasso.

**254. Seminar: Machiavelli.** Seminar, three hours.

**255A-255B. Seminars: Baroque.** Seminar, three hours.

**256A-256B. Seminars: 18th Century.** Seminar, three hours.

**257A-257B. Seminars: Romanticism.** Seminar, three hours.

**258A-258B. Seminars: Contemporary Italian Literature.** Seminar, three hours.

**M260A. Alternative Perspectives in Italian Culture: Studies of Folk Tradition in Italian Literature.** (Same as Folklore M261.) Lecture, three hours; outside study, 18 hours. Open to undergraduates with consent of instructor. The conspicuous diversity animating Italian society articulated through class, gender, and ethnolinguistic groups to be studied across a range of texts, some selected from the literary canon, but others purely oral (tales, songs, proverbs, cures and curses, secular and ritual drama).

**260B. Women in Italian Culture.** Lecture, three hours; outside study, 18 hours. Prerequisite: graduate standing. Conditions of women within Italian society, with concentration on specific works produced by women and/or representing women's conditions in either medieval/Renaissance or contemporary time. S/U or letter grading.

**260C. Studies in Italian Cinema.** Lecture, three hours; outside study, 18 hours. Prerequisite: graduate standing. Italian cinema compared with other European countries' and Hollywood's cinema, with focus on its development from its origins through Fascist times to neorealism, its legacy, different genres, and contemporary scene. S/U or letter grading.

**298. Variable Topics in Italian Studies.** Lecture, three hours; discussion, one hour. Prerequisite: graduate standing or consent of instructor. Seminar focusing on themes and issues outside the uniquely Italian literature topics covered in regular departmental graduate courses.

**370. Problems and Methods in Teaching Italian.** Lecture, two hours.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495A-495D. Teaching Italian at College Level (2 to 4 units each).** Prerequisite: consent of instructor.

**495A.** Techniques in Teaching Italian Literature;

**495B.** Techniques in Teaching Italian Culture; **495C.**

Techniques in Teaching Italian Conversation; **495D.**

Techniques in Teaching Italian Film.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Studies (2 to 12 units).** May be repeated twice for credit. S/U grading.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 12 units).** S/U grading.

**599. Ph.D. Research and Writing (2 to 12 units).** May be repeated. S/U grading.

# LABOR AND WORKPLACE STUDIES

*Interdepartmental Program  
College of Letters and Science*

UCLA  
1001 Gayley Avenue  
Box 951656  
Los Angeles, CA 90095-1656  
(310) 794-0385

Daniel J.B. Mitchell, Ph.D., *Chair*

## Professors

Samuel A. Culbert, Ph.D. (*Management*)  
Janet Currie, Ph.D. (*Economics*)  
Miriam A. Golden, Ph.D. (*Political Science*)  
Nancy M. Henley, Ph.D. (*Psychology*)  
Sanford M. Jacoby, Ph.D. (*Management*)  
Archie Kleingartner, Ph.D. (*Management*)  
David Lewin, Ph.D. (*Management*)  
John H.M. Laslett, D.Phil. (*History*)  
Christine A. Littleton, J.D. (*Law*)  
Ruth M. Milkman, Ph.D. (*Sociology*)  
Daniel J.B. Mitchell, Ph.D. (*Management*)  
Karen J. Orren, Ph.D. (*Political Science*)  
Karen B. Sacks, Ph.D. (*Anthropology*)  
Kenneth L. Sokoloff, Ph.D. (*Economics*)  
Roger Waldinger, Ph.D. (*Sociology*)  
Maurice Zeitlin, Ph.D. (*Sociology*)

## Assistant Professors

Christopher Erickson, Ph.D. (*Management*)  
Kathleen McGarry, Ph.D. (*Economics*)

## Scope and Objectives

The labor and workplace studies undergraduate specialization is intended to coordinate and enrich offerings on the workplace's connections to the social, political, and economic forces that surround it. Students become acquainted with institutions of the labor market such as public policies, employment practices, and unions. Faculty members from various disciplines are actively engaged in research on some aspect of employee relations, employee organizations, or workplace concerns in the U.S. or other countries. Administration of the program is coordinated through the Institute of Industrial Relations.

## Undergraduate Study

### Labor and Workplace Studies Specialization

The labor and workplace studies specialization must be taken in conjunction with a major in the social sciences or in psychology. Students with other majors may be admitted by petition.

### Upper Division Requirements

*Required:* Management 150; Political Science 142C or History 155B; three other courses selected from Chicana and Chicano Studies 120, Economics 103C, 150, 151, 152, 181B, 183, Geography 155, History 155A, 155B, Political Science 142C, 169, Psychology M137E, Sociology M163, 171, 173, Women's Studies

M163, 170. All students take a one-term specialization seminar designed for the exchange of disciplinary perspectives and directed research toward the end of the program.

Courses in the specialization may also be applied toward the requirements of the major where appropriate.

For further information, contact the Institute of Industrial Relations (310-794-0385) or Professor Daniel J.B. Mitchell (310-825-2505).

## LATIN AMERICAN STUDIES

*Interdepartmental Program  
College of Letters and Science*

UCLA  
10347 Bunche Hall  
Box 951447  
Los Angeles, CA 90095-1447  
(310) 206-6571

Allen W. Johnson, Ph.D., *Administrative Head  
and Cochair*  
James W. Wilkie, Ph.D., *Cochair*

A. John Skirius, Ph.D. (*Spanish*)  
Edward E. Telles, Ph.D. (*Sociology*)  
Concepción Valadez, Ph.D. (*Education*)  
Jane L. Valentine, Ph.D. (*Environmental Health  
Sciences*)  
Carlos Vegh, Ph.D. (*Economics*)  
Edit Villarreal, Ph.D. (*Theater*)

## Assistant Professors

Alfredo J. Artiles, Ph.D. (*Education*)

Raul Hinojosa-Ojeda, Ph.D. (*Urban Planning*)  
 Richard Lesure, Ph.D. (*Anthropology*)  
 William Summerhill, Ph.D. (*History*)  
 C. Fabian Wagmister, M.F.A. (*Film and Television*)

#### Lecturers

José M. Cruz-Salvadores, M.A. (*Spanish*)  
 Berta Graciano, Ph.D. (*Spanish*)  
 Larry Lauerhass, Ph.D., *Emeritus* (*History*)  
 Linda Rodríguez, Ph.D. (*History*)  
 Susan Schaffer, Ph.D. (*Spanish*)

#### Adjunct Associate Professor

Ichak Adizes, Ph.D. (*Management*)

## Scope and Objectives

UCLA has been in the forefront of U.S. universities with significant teaching and research interests in Latin American studies for more than 50 years. More than 100 faculty members from 22 departments and professional schools regularly offer a broad range of courses with an emphasis on Latin America. These course offerings in the humanities, social sciences, fine arts, and professional fields provide students a unique opportunity to focus on Latin America, a region of growing importance.

The Latin American Studies Program, coordinated through UCLA's Latin American Center, offers the Bachelor of Arts and Master of Arts degrees. In the undergraduate major students develop a program combining language and methodological training with interdisciplinary studies in one of three areas: arts and humanities, social sciences, or ecology and environment. At the graduate level, students pursue more specialized coursework and interests, culminating in an interdisciplinary research study. Cooperative degree programs with the UCLA Schools of Education and Information Studies, Management, Public Health, and Public Policy and Social Research provide the opportunity to combine the M.A. in Latin American Studies with a master's degree in a professional field.

## Undergraduate Study

### Bachelor of Arts Degree

Undergraduate studies of the Latin American region are designed to serve the needs of students (1) desiring a general education focused on the Latin American cultural region, (2) planning to enter business, government, or international agency service, (3) preparing to teach social sciences or language, and (4) preparing for advanced academic study of Latin America.

Students must complete all preparation courses with a C (2.0) in each course; the courses are applicable toward the Letters and Science lower division general education requirements.

#### Foreign Language Requirement

Language requirements are uniform for all students in the major regardless of core area. Proficiency in two languages equivalent to (1) Spanish 25 and Portuguese 3 or (2) Portuguese 25 and Spanish 5 is required. In lieu of Portuguese 1, 2, and 3, students may take Portuguese

102A-102B which are designed for those with a background in Spanish. An indigenous language of Latin America (i.e., Quechua) may be substituted for the minor language.

#### Course Limitations

Students may not take more than eight units of Latin American Studies 199 for letter-grade credit nor more than eight units in any single term. No course taken on a Passed/Not Passed basis may be applied toward the B.A. degree requirements. In order to register in a 199 course, students must have advanced junior standing and an overall GPA of 3.0, or senior standing.

#### Double Majors

Through judicious use of electives, students may find it possible to obtain the B.A. degree with two majors (e.g., Latin American studies and history). Interested students who have achieved junior standing should consult the undergraduate advisers of both departments involved, initiating the appropriate petition with the undergraduate adviser in Latin American Studies.

#### Study in Latin America

Students are encouraged to spend up to one year in Latin America either (1) to study with an education abroad program, (2) to study in Latin American universities, (3) to conduct research, or (4) to complete an internship in an international or development agency. Full credit is granted according to the individual programs arranged in consultation with the undergraduate adviser. For information on studying in Mexico, Costa Rica, Chile, or Brazil, contact the Education Abroad Program, 28 Haines Hall, (310) 825-4995.

### Core Areas for the Major

Students select one of three core areas as the focus of their major: arts and humanities, social sciences, or ecology and environment. Requirements for each core area are listed below.

#### Core I: Arts and Humanities

##### Preparation

Two courses from History 8A, 8B, 8C; Latin American Studies 99 (or 197 with department consent); Spanish and Portuguese M44; Art History 55A or 55B or Ethnomusicology 91K and World Arts and Cultures 73B.

##### Core Area

Ten upper division courses from the approved list of Latin American courses distributed as follows:

(1) *Core Concentration*: Five courses as listed below in either the literature and folklore field or the linguistics field selected from Portuguese or Spanish, or in the fine arts field selected from art history or ethnomusicology. Only one course from the electives list may be applied toward the core concentration.

(2) *Theory and Methods*: One course from theory and methods.

(3) *Internal Breadth*: Four additional courses from the arts and humanities core area but outside the core concentration. No more than two of these may be electives.

#### External Breadth

From the approved list, six upper division courses outside the arts and humanities core area distributed as follows: at least two courses in social sciences (e.g., history) and two courses in ecology and environment (e.g., geography). The two additional courses required may be from either social sciences or ecology and environment. No more than three external breadth courses may be electives.

#### Approved Undergraduate Courses

Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval are indicated with asterisks. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

#### (1) Literature and Folklore

##### Folklore and Mythology

M149. Folk Literature of the Hispanic World

##### History

169. Latin American Elitology

##### Portuguese (Spanish and Portuguese)

130A-130B. Brazilian Literature and Identity: Introduction

C131. Colonial Brazilian Literature and Culture

C132. 19th-Century Brazilian Literature and Culture

C133. Machado de Assis

C134. Brazilian Modernism

**Core II: Social Sciences****Preparation**

Two courses from History 8A, 8B, 8C; Latin American Studies 99 (or 197 with department consent); Economics 1 and 2, or 100; Economics 40 or Sociology 18 or Statistics 50.

**Core Area**

Ten upper division courses from the approved list of Latin American courses distributed as follows:

(1) *Core Concentration*: Five courses as listed below in one of the five fields (anthropology and sociology or economics or geography or history or political science). Only one course from the electives list may be applied toward the core concentration.

(2) *Theory and Methods*: One course from theory and methods.

(3) *Internal Breadth*: Four additional courses from the social sciences core area but outside the core concentration. No more than two of these may be electives.

**External Breadth**

From the approved list, six upper division courses outside the social sciences core area distributed as follows: at least two courses in arts and humanities (e.g., fine arts) and two courses in ecology and environment (e.g., geography). The two additional courses required may be from either arts and humanities or ecology and environment. No more than three external breadth courses may be electives.

**Approved Undergraduate Courses**

Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval are indicated with asterisks. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

**(1) Anthropology and Sociology****Anthropology**

- 114P. Ancient Civilizations of Western Middle America (Nahuatl Sphere)

- 114Q. Ancient Civilizations of Eastern Middle America (Maya Sphere)

- 114R. Ancient Civilizations of Andean South America
- M172T. Ethnohistory of Hispanic Cultures in the U.S. Southwest

- 173Q. Latin American Communities

- 174P. Ethnography of South American Indians

- \*174Q. Ethnology of South American Indians

**Sociology**

- 186. Latin American Societies

**Theory and Methods****Anthropology**

- \*115P. Archaeological Field Training
- \*C115R. Strategy of Archaeology
- \*M116Q. Dating Techniques in Environmental Sciences and Archaeology
- \*118A, 118B. Museum Studies
- \*M136Q. Laboratory for Naturalistic Observations: Developing Skills and Techniques
- \*138. Methods and Techniques of Ethnohistory
- \*139. Field Methods in Cultural Anthropology
- \*180. Quantitative Methods in Anthropology
- \*186. Models and Modeling in Anthropology
- \*199. Special Studies in Anthropology

**Sociology**

- \*101. Development of Sociological Theory
- \*104. Introduction to Sociological Research Methods
- \*112. Introduction to Mathematical Sociology
- \*199. Special Studies

**(2) Economics****Economics**

- \*110. Economic Problems of Underdeveloped Countries
- \*111. Theories of Economic Growth and Development
- \*112. Policies for Economic Development
- \*190. International Economics
- \*191. International Trade Theory
- \*192. International Finance

**Theory and Methods****Economics**

- \*103A-103Z. Upper Division Research Seminars: Applications of Economic Theory
- \*M135. Economic Models of Public Choice
- \*M136. Economic Models of Political Conflict and Conflict Resolution
- \*199. Special Studies in Economics

**Management**

- \*197. Special Topics in Management

**(3) History****History**

- 165A. Early Latin America
- 165C. Indians of Colonial Mexico
- 166. Latin America in the 19th Century
- 167A-167D. Latin America in the 20th Century
- 168. History of Latin American International Relations
- 169. Latin American Elitology
- 170A. Latin American Cultural History
- 170B. Classic Travel Accounts of Latin America since 1735
- 170C. Issues in Latin American History
- 171. Mexican Revolution since 1910
- 172. History of Argentina
- 173. Modern Brazil
- 174. Brazilian Intellectual History

- \*M168. Health in Culture and Society

**Economics**

- \*120. Introduction to Urban and Regional Economics
- \*121. Urban Economic Analysis
- \*180. Comparative Systems: Transformation of Socialist Economies
- 193. Research in International Area Studies Seminar

**Geography**

- \*108. World Vegetation
- \*129. Seminar: Environmental Studies
- \*140. Political Geography

**History**

- M159A, M159B. History of the Chicano Peoples

**Latin American Studies**

- 197. Interdisciplinary Topics in Latin American Studies

- 199. Special Studies in Latin American Studies

**Political Science**

- \*124. International Political Economy
- M144A. Ethnic Politics: Chicano/Latino Politics
- \*167A. Ideology and Development in World Politics
- \*167B. Comparative Development and Administration
- \*M197G. Introduction to Development Studies: Political Economy of Development

**Sociology**

- \*116. Social Demography
- \*157. Social Stratification
- \*182. Political Sociology
- 184. Social Change

**Core III: Ecology and Environment**

**Preparation**

Two courses from History 8A, 8B, 8C; Latin American Studies 99; Geography 5; Statistics 50.

**Core Area**

Ten upper division courses from the approved list of Latin American courses distributed as follows:

(1) *Core Concentration*: Five courses as listed below in geography. Only one course from the electives list may be applied toward the core concentration.

(2) *Theory and Methods*: One course from theory and methods.

(3) *Internal Breadth*: Four additional courses from the ecology and environment core area to be selected from theory and methods core courses or electives.

**External Breadth**

From the approved list, six upper division courses outside the ecology and environment core area distributed as follows: at least two courses in arts and humanities (e.g., fine arts) and two courses in social sciences (e.g., history). The two additional courses required may be from either arts and humanities or social sciences. No more than three external breadth courses may be electives.

**Approved Undergraduate Courses**

Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval are indicated with asterisks. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

**Community Health Sciences**

- 132. Health, Disease, and Health Services in Latin America

**Geography**

- 121. Conservation of Resources: Underdeveloped World
- \*M128. Global Environment and Development: Problems and Issues
- \*142. Population Geography
- 181. Mexico, Central America, Caribbean
- 182A. Spanish South America
- 182B. Brazil
- \*199. Special Studies

**Theory and Methods**

**Anthropology**

- \*180. Quantitative Methods in Anthropology
- \*186. Models and Modeling in Anthropology

**Geography**

- \*171. Quantitative Analysis

**Electives**

**Anthropology**

- \*132. Technology and Environment
- \*153. Evolution of Human Societies
- \*167. Urban Anthropology
- M168. Health in Culture and Society

**Community Health Sciences**

- \*130. Nutrition and Health

**Economics**

- \*120. Introduction to Urban and Regional Economics

**Geography**

- \*108. World Vegetation
- \*129. Seminar: Environmental Studies
- \*140. Political Geography

**Latin American Studies**

- 197. Interdisciplinary Topics in Latin American Studies
- 199. Special Studies in Latin American Studies

**Sociology**

- \*116. Social Demography

**Graduate Study**

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

**Master's Degree**

**Admission**

In addition to University minimum requirements, the B.A. degree in Latin American Studies constitutes the normal basis for admission to the Master of Arts program. Applicants with a degree in another field can be admitted but must complete certain undergraduate prerequisites subsequent to admission. Applicants with Latin American field experience or special methodological studies are given special consideration. All applicants should meet minimum requirements in at least one language of Latin America. The following items are required:

(1) Three academic letters of recommendation, unless the applicant has been away from school for some time, in which case one of the letters may be from an employer.

(2) A minimum of a 3.0 or B average in the junior/senior years of college.

(3) A statement of purpose discussing the applicant's background in Latin American studies, proposed program of study, and future career plans.

(4) A minimum score of 1,000 on the General Test (combined verbal and quantitative sections) of the Graduate Record Examination (GRE).

(5) Optional: A résumé or curriculum vitae describing both academic and Latin American experience.

Students are admitted each quarter. Application deadlines are November 1 for Winter Quarter, December 31 for Spring Quarter, and December 15 (to be considered for financial assistance) or May 1 for Fall Quarter.

Several options are available to combine the M.A. in Latin American Studies with a professional degree. After acceptance by both the Latin American Studies Program and the respective professional school, students may pursue both degrees simultaneously.

#### Articulated Degree Programs

Articulated degree programs are currently available with the (1) Department of Education — Graduate School of Education and Information Studies (Master of Education in Curriculum); (2) Department of Library and Information Science — Graduate School of Education and Information Studies (Master of Library and Information Science); (3) School of Public Health (Master of Public Health).

#### Concurrent Degree Programs

Concurrent degree programs are available with the (1) Department of Urban Planning — School of Public Policy and Social Research (Master of Arts in Urban Planning); (2) Anderson Graduate School of Management (Master of Business Administration).

Fellowship applications for the academic year are due on January 8 prior to the Fall Quarter for which application is made. Prospective students may write to the department for departmental brochures.

#### Areas of Study

Students are expected to develop and integrate two or three fields in Latin American studies, to be selected from the following: anthropology, art, economics, education, engineering, folklore, geography, history, law, library science, linguistics, management, music, political science, Portuguese, public health, sociology, Spanish, theater arts, and urban planning. At least one of the chosen fields must be a social science.

#### Course Requirements

Latin American Studies 205 is a core course required of all M.A. students, to be taken during the first Fall Quarter in residence.

All courses must be selected from the department-approved list of courses. Other courses must be petitioned in advance. Courses numbered in the 300- and 400-level series are not applicable toward the M.A. degree. Graduate courses may be repeated unless they are of the lecture type.

No more than eight units of 500-series courses may be applied toward the total course requirement for the M.A. degree; no more than four units may be applied toward the minimum five graduate courses required for the M.A. degree.

#### Comprehensive Examination Plan

A minimum of nine courses is required, to be distributed among three fields or disciplines on a 3-3-2 basis or among two fields on a 4-4 basis. Of the nine courses, five must be at the graduate level, with at least one in each of the three fields.

The examination requirement is fulfilled by the submission of three research papers written for at least two of the three fields included as part of the student's program of study. At least two of these papers must have been submitted for graduate courses in the 200 series. The papers are evaluated by a three-member faculty committee representing the degree candidate's three fields or both fields if the candidate is doing only two fields. Two positive votes among the three-member faculty examination committee constitutes a pass on the results. The committee evaluates the papers in the following terms: honor pass (a unanimous vote), pass, pass subject to revision of one or more of the research papers, or fail (majority vote). If two of the three members of the committee so request, an oral examination based on the papers may be required. When papers are passed subject to revision, one member of the committee is assigned the responsibility of working with the student on the revision, and determining when the paper has been satisfactorily revised. No reexaminations are permitted. The degree is awarded on recommendation of the faculty committee. Copies of the papers are filed in the Academic Programs Office of the Latin American Center.

#### Thesis Plan

A minimum of 10 courses is required, to be distributed on a 4-3-2 basis among three fields. Three graduate-level courses are required in the first field, with one each in the two minor fields.

Although students are generally expected to follow the M.A. comprehensive examination plan, in special cases they may be allowed to follow the M.A. thesis plan. The student must develop a carefully prepared proposal to be approved by the academic coordinator in consultation with the student's faculty committee chair. To be approved, the proposal must provide sound justification for the thesis plan, including provisions for funding any field research.

Once the thesis plan option has been approved, the student chooses a three-member faculty thesis committee consisting of one professor from each of three disciplines, one of whom has already agreed to serve as chair. The thesis committee works closely with the student in the development, writing, and revision of the thesis and is responsible for reading, evaluating, and approving the drafts and final version of the thesis, ensuring thereby that it meets the University standards of scholarship. Once the final version is approved, the thesis committee recommends the award of the M.A. degree. By the end of the quarter before graduation, the student must file for ad-

vancement to candidacy with the Graduate Division.

## Latin American Studies

### Lower Division Course

**99. Introduction to Latin American Problems.** Limited to 15 students. Interdisciplinary seminar for lower division students. May be repeated for credit with topic change.

### Upper Division Courses

**197. Interdisciplinary Topics in Latin American Studies.** Advanced interdisciplinary course for upper division students. May be repeated for credit with topic change.

**199. Special Studies in Latin American Studies (4 or 8 units).** Prerequisite: upper division standing. Intensive directed research program in which students conduct interdisciplinary research or complete internship with an international agency or program dealing with Latin America. Faculty sponsorship and written reports required.

### Graduate Courses

**M200. Latin American Research Resources.** (Same as History M265 and Library and Information Science M225.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research results.

**205. Latin Americanist Scholarship.** Lecture, three hours. Prerequisite: consent of instructor. Panoramic introduction to methods and issues in various disciplines that study Latin America, with guest lecturers from various fields. (Latin American Studies core course.)

**M250A. Indians of South America.** (Same as Anthropology M272.) Lecture, three hours. Prerequisite: consent of instructor. Survey of literature and research topics related to Indian cultures of South America. May be repeated for credit.

**250B. Interdisciplinary Seminar: Latin American Studies.** Seminar, three hours. Prerequisite: consent of instructor. Problem-oriented seminar on critical areas stressed in University's cooperative programs in Latin America.

**250C. Interdisciplinary Topics in Latin American Studies.** Prerequisite: consent of instructor. Reading knowledge of Spanish or Portuguese normally required. Seminar devoted to selected topics of an interdisciplinary nature.

**M268A-M268B. Seminars: Recent Latin American History.** (Same as History M268A-M268B.) Seminar, three hours. Prerequisite: consent of instructor. Reading knowledge of Spanish and Portuguese normally required. Seminar devoted to selected topics of an interdisciplinary nature. In Progress grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study or Research (2 to 8 units).** May be repeated, but only four units may be applied toward the minimum graduate course requirement. S/U or letter grading.

**597. Preparation for M.A. Comprehensive Examination.** Ordinarily taken only during term in which student is being examined. S/U grading.

**598. Research for and Preparation of M.A. Thesis.** Only four units may be applied toward the minimum graduate course requirement. S/U grading.

## Course List

### Approved Graduate Courses

Special courses which may be applied toward the M.A. degree requirements with advanced departmental approval are indicated with asterisks. These courses do not have any exclusive focus on Latin America but provide an opportunity for students to relate a particular perspective or phenomenon to Latin America.

Refer to the Latin American studies undergraduate section for the lists of approved undergraduate courses.

### Fine Arts

#### Art History

- \*201. Topics in Historiography of Art History
- C218A. Pre-Columbian Art of Mexico
- C218B. Pre-Columbian Art of the Maya
- C218C. Pre-Columbian Art of the Andes
- 219B. Pre-Columbian Art
- 220. Oceanic, Pre-Columbian, African, and Native North American Art
- C254. Latin American Art in the 20th Century
- 596. Directed Individual Study or Research

#### Ethnomusicology

- 201A. Proseminar: Ethnomusicology
- 208. Seminar: Latin American Music
- \*290. Seminar: Ethnomusicology
- 596. Directed Individual Studies

#### Film and Television

- \*298A-298B. Special Studies in Film and Television

#### Theater

- \*210. Topics in World Theater and Drama

#### World Arts and Cultures

- \*280A-280B. Advanced Studies in Dance Ethnology

### Languages

#### Indigenous Languages of the Americas (Linguistics)

- \*18A-18B-18C. Elementary Quechua

#### Portuguese (Spanish and Portuguese)

- \*1. Elementary Portuguese
- 2. Elementary Portuguese
- 3. Intermediate Portuguese
- 25. Advanced Portuguese
- 102A-102B. Intensive Portuguese
- \*105. Advanced Composition and Style

#### Spanish (Spanish and Portuguese)

- \*1. Elementary Spanish
- \*1G. Reading Course for Graduate Students
- 2. Elementary Spanish
- 2G. Reading Course for Graduate Students
- 3. Elementary Spanish
- 4. Intermediate Spanish
- 5. Intermediate Spanish
- 25. Advanced Spanish and Composition
- \*105. Spanish Composition

### Linguistics

#### Anthropology

- 204. Core Seminar: Linguistic Anthropology

#### Linguistics

- \*210A. Field Methods I
- \*210B. Field Methods II
- \*220. Linguistic Areas
- \*225. Linguistic Structures
- M246C. Topics in Linguistic Anthropology

#### Portuguese (Spanish and Portuguese)

- \*202. Synchronic Morphology and Phonology
- \*204A-204B. Generative Grammar
- \*M205A-M205B. Development of Portuguese and Spanish Languages
- Spanish (Spanish and Portuguese)
- \*202A. Phonology
- \*202B. Morphology
- \*204A-204B. Generative Syntax and Semantics
- \*M205A-M205B. Development of Portuguese and Spanish Languages
- \*209. Dialectology
- \*256A-256B. Studies in Spanish Linguistics
- \*257. Studies in Dialectology

### Literature

#### Portuguese (Spanish and Portuguese)

- C231. Colonial Brazilian Literature and Culture
- C232. 19th-Century Brazilian Literature and Culture
- C233. Machado de Assis
- C234. Brazilian Modernism
- C235. 20th-Century Brazilian Literature
- M249. Folk Literature of the Spanish and Portuguese Worlds
- 254. Studies in Early Brazilian Literature
- 255. Studies in Modern Brazilian Literature

#### Spanish (Spanish and Portuguese)

- 237. Literature of the Spanish Conquest
- 238. Baroque, Enlightenment, and Neoclassicism in Colonial Literature
- 239. Romanticism and Realism in Spanish-American Literature
- 240. Major Currents in Modern Spanish-American Literature
- 241A-241B. Contemporary Spanish-American Short Story
- 243A-243B. Contemporary Spanish-American Poetry
- 244A-244B. Contemporary Spanish-American Novel
- 245. Contemporary Spanish-American Essay
- 246. Contemporary Spanish-American Drama
- M249. Folk Literature of the Spanish and Portuguese Worlds
- 277A-277B. Studies in Colonial Spanish-American Literature
- 278A-278B. Studies in 19th-Century Spanish-American Literature
- 280A-280B. Studies in Contemporary Spanish-American Literature
- \*M286A-M286B. Studies in Hispanic Folk Literature
- 290. Special Topics: Latin American Literature

### Professional

#### Community Health Sciences

- 200. Global Health Problems
- 210. Community Health Sciences
- M216. Qualitative Research Methodology
- \*231. Maternal and Child Nutrition
- \*M240. Culture and Human Reproduction
- 282. Communication in Health Promotion and Education

#### Education

- \*C203. Educational Anthropology
- \*204B. Introduction to Comparative Education
- \*204C. Education and National Development
- 204D. Minority Education in Cross-Cultural Perspective
- 204E. International Efforts in Education
- 204F. Nonformal Education in Comparative Perspective
- \*C207. Politics of Education
- \*238. Cross-National Analysis of Higher Education
- \*252B. Seminar: Education and Social Change

- \*253A. Seminar: Current Problems in Comparative Education
- 253D. Seminar: Latin American Education
- \*253F. Seminar: Education in Revolutionary Societies
- \*253H. Seminar: The Chicano/Hispanic and Education
- 262F. Seminar: Research Topics in Bilingual/Multicultural Education
- \*596. Directed Independent Study
- \*597. Preparation for Master's Comprehensive Examinations or Doctoral Qualifying Examinations
- \*598. Thesis Research

#### Engineering

- \*596. Directed Individual or Tutorial Studies (selected from any of the engineering departments)
- \*597A. Preparation for M.S. Comprehensive Examination (selected from any of the engineering departments)

#### Epidemiology

- 220. Principles of Infectious Disease Epidemiology
- 227. AIDS: A Major Public Health Challenge
- 280. Parasitic Diseases and Global Health
- 290. Seminar: Epidemiology — Infectious and Tropical Disease
- \*291. Seminar: Epidemiology — Methodology
- 418. Rapid Epidemiologic Surveys in Developing Countries

#### Health Services

- \*240. Health Care Issues in International Perspective

#### Law

- \*270. International Law
- \*271. International Business Transactions
- \*290A. International Environmental Law

#### Library and Information Science

- \*207. International Issues and Comparative Research in Library and Information Science
- \*223. Literature of the Social Sciences
- \*224. Literature of the Humanities and Fine Arts
- M225. Latin American Research Resources
- \*596. Directed Individual Study or Research

#### Management

- \*205A. International Business Economics
- \*205B. Comparative Market Structure and Competition
- \*205C. Business Forecasting for Foreign Economies
- 209. Selected Topics in Business Economics
- \*234A. International Financial Markets
- \*234B. Financial Management of Multinational Corporations
- \*261B. Global Marketing Management
- \*M293B. Morality of Capitalism
- \*296A. International Business Management
- \*297A. Comparative and International Management
- \*297C. International Business Law
- \*297D. International Business Negotiations
- \*298B. Special Topics in International and Comparative Management
- \*298C. Special Topics in Sociotechnical Systems
- \*298D. Special Topics in Management

#### Public Health

- \*596. Directed Individual Study or Research (selected from any of the public health departments)

#### Urban Planning

Stephen Bainbridge, M.S., J.D.  
 Elliot Dorff, M.H.L., Ph.D.  
 Frances M. Kamm, Ph.D.

## Scope and Objectives

The School of Law, one of two academic units at UCLA which operate on a semester (rather than quarter) system, offers a three-year curriculum leading to the J.D. degree. The school is accredited by the California Committee of Bar Examiners, is a member of the Association of American Law Schools, and is on the approved list of the American Bar Association. Graduates of the school are qualified to apply for admission to practice in any state in the U.S.

The school is designed to produce lawyers who are well-prepared for the various private and public roles which are assigned to members of the legal profession. Students do not undertake a specific major but have the opportunity to enroll in a wide variety of courses dealing with various legal fields

## Professional Study

### Juris Doctor Degree

#### Admission

Students beginning their professional work are admitted only for the Fall Semester. They must have received a bachelor's degree from a university or college of approved standing before beginning work in the school and are required to take the Law School Admission Test (LSAT).

The school seeks to admit students of outstanding intellectual ability who bring a wide range of backgrounds, experiences, and perspectives to the classroom and the legal profession. The faculty has concluded that the quality of the education of students is affected in significant ways by the presence of vital diverse viewpoints; students of all backgrounds select UCLA in significant part because of the school's outstanding achievement in creating a highly diverse educational environment.

In evaluating applicants the school places substantial weight on traditional measures of academic ability, namely grades and LSAT scores, and recognizes that other factors and attributes contribute greatly to people's ability to succeed as law students and lawyers. When assessing academic promise and achievement, an applicant's entire file is considered, including letters of recommendation, whether economic, physical, or other challenges have been overcome, scholarly achievements such as graduate study, awards, or publications, and the rigor of the undergraduate educational program.

In addition, the school considers attributes that may contribute to assembling a diverse class, placing special emphasis on socioeconomic disadvantage. Also evaluated are work experience and career achievement, community or public service, career goals (with particular attention to the likelihood of applicants representing underrepresented communities), evidence of and potential for leadership, language ability, unusual life experiences, and any other factors (except those deemed inadmissible by The Regents or by other applicable law) that

indicate applicants may significantly diversify the student body or make a distinctive contribution to the school or the legal profession.

UCLA has as one of its central purposes the training of attorneys who attain high levels of professional excellence and integrity and who exercise civic responsibility in myriad ways over long careers.

Detailed information about the academic programs offered by the School of Law, course titles and descriptions, fees, and the semester-system calendar by which it operates are available in the *Announcement of the UCLA School of Law* or from the School of Law website given at the beginning of this listing.

For information on the proficiency in English requirements for international graduate students, refer to Graduate Admission in the Graduate Study section of this catalog.

### Residence and Unit Requirements

Candidates for the degree of Juris Doctor must pursue resident law school study for six semesters and successfully complete 87 units. The residence requirements may be satisfied as follows: (1) six semesters in regular session in this school or (2) two semesters in regular session (or equivalent) in a school which is accredited by the American Bar Association, coupled with four semesters in regular session (or equivalent) in this school.

Every first-year student is required to take the full schedule of required courses; second- and third-year students are required to take a minimum of 12 hours and may not take more than 16 hours each semester. The second- and third-year curriculum is elective, except for a required course in professional responsibility. In addition to the courses in the regular law school curriculum, students may take two courses for credit in other disciplines within the University. Graduate students may enroll in upper division law courses on a limited basis. Law courses are not open to non-UCLA students. Auditing of courses is not permitted.

#### Attendance and Grades

The right to take examinations and the privilege of continuing as a student in the school are conditioned on regular classroom attendance. Information on the grading system, which is based on a letter-grade scale of A+ to F, may be obtained from the Office of the Assistant Dean for Students. Standards for satisfactory performance and for graduation are prescribed by the faculty and are published separately. They may also be obtained from the above office.

### Curriculum

The school offers courses of instruction within the school and supervised educational experiences outside it in an effort to enable its students to think intelligently and to prepare them for careers of practice and public service. To this end the school employs several instructional techniques in a variety of subject areas.

In the first year of their legal education students are exposed to an intensive study of legal reasoning in a series of fields which have historically dominated legal thought. In conjunction with these courses students also receive training in the use of legal bibliography and in effective legal writing and oral advocacy.

In the second and third years students have an opportunity to engage in a number of different fields of law and law-related study. All of the courses in the second- and third-year curriculum are elective with the exception of the legal profession requirement, which is a requisite for graduation.

## Concurrent Degree Programs

The School of Law offers three concurrent degree programs which allow students to fulfill the requirements of the J.D. and another graduate degree simultaneously. Students may also design a tailored program from other disciplines in UCLA's curriculum or from another high-quality institution, but must arrange this in consultation with this school and the other program selected.

#### M.B.A./J.D.

The School of Law and the John E. Anderson Graduate School of Management offer a concurrent program which enables students to prepare for careers where law and management overlap and where understanding of both fields is desired. Examples of such areas include public service, international trade, industrial relations, corporate law, and specialized areas of management consulting. The program makes it possible to earn the J.D. and M.B.A. in four academic years. Students interested in such a program should apply to both schools simultaneously.

#### M.A. Urban Planning/J.D.

The School of Law and the Department of Urban Planning in the School of Public Policy and Social Research offer a concurrent plan of study providing an integrated curriculum for students planning to specialize in the legal aspects of urban problems. Education in planning offers an overview of theories and methods that permit identification and treatment of urban problems; education in law offers insight into the institutional causes and possibilities for treatment of these problems. Students pursue studies in both areas and receive both the J.D. and M.A. degrees at the end of four years.

Students interested in the program must apply and be admitted to the School of Law, the School of Public Policy and Social Research, and the Graduate Division.

#### Education Program/J.D.

The School of Law and the Department of Education offer a concurrent plan which allows students to design a program of study leading to the J.D. and any advanced degree in education (M.Ed., M.A., Ed.D., or Ph.D.). If the program meets the degree requirements in both areas, students are awarded both degrees on

its completion. This program currently is not accepting applicants.

#### **M.A. American Indian Studies/J.D.**

The School of Law and the American Indian Studies Program offer a concurrent plan of study over four years leading to both a J.D. and an M.A. This integrated program is designed to produce law graduates with a rich understanding of tribal cultures that expands their knowledge, facilitates their practice in the field of Indian law, and enhances their service to Indian nations. Legal study includes relevant tribal, U.S., and international law. Courses in American Indian studies address the diverse histories, world views, values, languages, and practices of North American tribes.

Students interested in the program must apply and be admitted to the School of Law, the American Indian Studies Program, and the Graduate Division.

#### **Master of Laws Degree**

The school offers a graduate law program leading to the Master of Laws (LL.M.) degree to outstanding international students interested in pursuing graduate studies. Law school graduates with outstanding records who may be interested in this program should contact Professor Joel Handler, LL.M. Program, School of Law, 1242 Law, UCLA, Los Angeles, CA 90024-1476, for further information.

### **Law**

#### **Lower Division Course**

**88. Lower Division Seminar: Special Topics in Law.** Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in law approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

## **LESBIAN, GAY, AND BISEXUAL STUDIES**

#### **Associate Professor**

Arthur L. Little, Jr., Ph.D. (*English*)

#### **Assistant Professor**

Alicia Gaspar de Alba, Ph.D. (*Chávez Center*)

### **Scope and Objectives**

Although lesbian, gay, and bisexual studies has only recently found a place in university curricula, the field actually represents the intersection of two traditions that have existed for thousands of years. The better known is the learned tradition, which, at least since the end of the ancient world, has been overwhelmingly hostile. Medieval theology condemned the sodomite, nineteenth-century medicine pathologized the invert, and until very recently psychiatry felt called on to "cure" the homosexual. For at least as long, however, women and men attracted to others of their own sex have kept alive another affirmative tradition, a knowledge of their past that sustained them, often in the face of overwhelming official hostility. The guests at Plato's *Symposium* looked back to Achilles and Patroclus; women-loving-women of the nineteenth century remembered Sappho; an inmate of a New York prison interviewed in the early 1920s was able to recite a long list of famous lesbians and gay men.

After the birth of the modern gay liberation movement in 1969, this underground knowledge came out of the closet and found a public voice sufficiently strong to mount a sustained challenge to the official teachings concerning minority sexualities. This challenge led to a dramatic increase in research on same-sex desire, most of it the work of scholars without academic affiliations. Inspired by these accomplishments, students and faculty at colleges and universities eventually mustered the courage to address similar topics, thereby transforming — partly by assimilation, partly by contestation — the previously hostile learned tradition. This originally rather disparate work gradually coalesced into lesbian, gay, and bisexual studies, which, over the last decade, has developed into an academic discipline of remarkable breadth and vitality. The field embraces work in genetics and cultural studies, literature and anthropology, the health sciences, history, and the visual arts. It ranges from archival research to the elaboration of queer theory, from the analysis of constitutional law to questions of public health, from the study of identical twins to the study of popular culture.

Although the initial focus in lesbian, gay, and bisexual studies is usually on minority sexualities, it is impossible to study minority sexualities in any meaningful way without raising questions about sexuality in general. And questions about sexuality cannot be responsibly answered without considering gender, class, race, ethnicity, history, political economy, and the construction of scientific knowledge. Thus lesbian, gay, and bisexual studies, which may at first seem to concern the private practices of a small number of people, inevitably leads to the much larger study of sexuality and culture. It represents an important vantage

point from which to investigate the social construction of gender and sexual identity, social control of behavior, changing definitions of the family, and the place of sexual expression in the public and private spheres. Because of the kinds of questions asked, lesbian, gay, and bisexual studies is the site of some of the most exciting work being done today on the relation of culture and sexuality.

First offered in Fall Quarter 1997, UCLA's minor in lesbian, gay, and bisexual studies provides the opportunity to study sexuality from a variety of interdisciplinary perspectives. Interdisciplinarity is assured by requiring students to take at least one course each in the life sciences, social sciences, and humanities. In addition, seniors in the minor are expected to do an internship in a community organization, thereby acquiring a kind of knowledge not usually available in the classroom. After completing the minor, students should be familiar with the theoretical tools that different disciplines employ to study sexuality. They should be acquainted with some of the many different ways sexuality has been organized in the past and is organized in different cultures in the present and should have an enhanced understanding and appreciation both of the sexual diversity of the world in which they live and of the complex ways in which sexuality intersects with other categories of identity and practice.

### **Undergraduate Study**

#### **Lesbian, Gay, and Bisexual Studies Minor**

To enter the lesbian, gay, and bisexual studies minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Course:* Lesbian, Gay, and Bisexual Studies M14.

*Required Upper Division Courses:* Lesbian, Gay, and Bisexual Studies 196 and six additional courses, including at least one each in the humanities, life sciences, and social sciences, to be selected from the approved list of courses available in the program office each term. Students may petition to apply a related course not on the list toward the six-course requirement if they can show that lesbian, gay, and bisexual issues represent a significant part of the course content. Students are strongly urged to keep in close contact with advisers in the program office who can help them plan their course of study.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Lesbian, Gay, and Bisexual Studies

### Lower Division Course

**M14. Introduction to Lesbian, Gay, and Bisexual Studies.** (Same as Women's Studies M14.) Lecture, three hours; discussion, one hour. Introduction to study of lesbians and gay men as social groups; examination of sexual orientation as a category for investigation; interdisciplinary approaches to theories and research on commonalities and diversity of gay, lesbian, and bisexual experience, including race/ethnicity. P/NP or letter grading.

### Upper Division Courses

**M101. Gay and Lesbian Literature.** (Same as English M101.) Preparation: satisfaction of Subject A requirement. Late-19th- and 20th-century fiction, drama, and poetry written on gay and lesbian themes. Special emphases (on different genres and on gay male or lesbian literature) vary with individual instructors.

**M115. Topics in Study of Sexual and Gender Orientation.** (Same as Women's Studies M115.) Lecture/discussion, three hours. Requisite: course M14 or Women's Studies 10. Studies in arts, humanities, social sciences, and/or life sciences on aspects of sexual orientation, gender identity, and lesbian, gay, and/or bisexual issues; variable topics may include cultural representations, historical and political change, life and health experiences, and queer or transgender theories; multiethnic and cross-cultural emphases. May be repeated for credit.

**M116. Sexuality and the City: Queer Los Angeles.** (Same as Women's Studies M116.) Lecture, three hours. Requisite: course M14. Investigation of history, culture, and political economy of lesbian, gay, and bisexual Los Angeles.

**M133. Chicana Lesbian Literature.** (Same as Chicana and Chicano Studies M133 and Women's Studies M133.) Lecture, three hours. Exploration of intersection of radical First and Third World feminist politics, lesbian sexuality and its relationship to Chicana identity, representation of lesbianism in Chicana literature, meaning of *familia* in Chicana lesbian lives, and impact of Chicana lesbian theory on Chicana/Chicano studies.

**M134. Cultural Construction of Gender and Sexuality: Homosexualities.** (Same as Anthropology M134.) Comparative analysis of role of environment, history, and culture in structuring of patterns of same-sex erotic behavior in Asia, Africa, Middle East, Pacific, Caribbean, and aboriginal America. P/NP or letter grading.

**196. Senior Internship Seminar in Lesbian, Gay, and Bisexual Studies.** Seminar, three hours. Requisites: course M14, completion of four additional courses toward the minor. Limited to seniors. Internship in a lesbian, gay, or bisexual community organization coupled with a weekly seminar. Consideration of theoretical and political issues involved in such work and relation of those issues to ideas explored in minor courses already taken.

**197. Selected Topics in Lesbian, Gay, and Bisexual Studies.** Study of selected topics in lesbian, gay, and bisexual studies. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit with consent of instructor.

**199. Special Studies in Lesbian, Gay, and Bisexual Studies (2 to 4 units).** Requisites: course M14, two additional courses toward the minor, consent of instructor and program director. Directed program of independent study or research on a specific topic within lesbian, gay, and bisexual studies.

### Scope and Objectives

The Department of Library and Information Science has one of the top-ranked programs of its kind in the country and has developed an international reputation in the areas of information policy, information-seeking behavior, user interface development, and cataloging. Whether students choose to pursue a master's degree or a Ph.D., they graduate with a broad understanding of both theory and practice.

Applicants may write to the Department of Library and Information Science, 1009 Moore Hall, UCLA, Los Angeles, CA 90024-1521, for the department's announcement and application materials.

### Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

### Master's Degrees

#### Admission

Students are admitted to the Master of Library and Information Science (M.L.I.S.) program in

Fall Quarter only. In addition to Graduate Division requirements and application procedures, the school requires

- (1) A statement of purpose.
- (2) An official report of a score on the Graduate Record Examination (GRE) taken within the past five years. Applicants to the M.L.I.S. degree program who hold graduate degrees from accredited institutions in the U.S. may request a waiver of the GRE. Waivers are considered only after the committee on M.L.I.S. and certificate admissions has reviewed applicants' official transcripts. An official report of a score on the Test of Written English (TWE) and the Test of English as a Foreign Language (TOEFL) are required for students whose native language is not English.
- (3) Three letters of recommendation.
- (4) Satisfaction of the following entrance requirements: (a) a college-level course in statistics (three semester units or four quarter units) within the last five years with a minimum grade of C. The course must have covered descriptive and inferential statistics. In exceptional circumstances it is possible to meet this requirement by passing a competency examination in statistics administered by the department; (b) a college-level course in computer programming (three semester units or four quarter units) within the last five years with a minimum grade of C. Most standard languages such as BASIC, C, COBOL, FORTRAN, or PASCAL are acceptable, as is a college-level course in the use of data management systems such as INMAGIC, dBASE, or PARADOX. At least one third of the course grade should be based on programming assignments. In exceptional circumstances it is possible to meet this requirement by passing a competency examination in computer programming administered by the department.

Entrance requirements should be completed before beginning the M.L.I.S. program. However, one requirement may be satisfied in the Fall Quarter of the student's first year.

While work experience is not a requirement for admission, consideration is given to such experience in reviewing the total application.

The admissions committee may request a report of an interview by the chair of the department or by a person designated by the chair as qualified to conduct an interview. Interviews are rarely conducted, and only for the purpose of clarifying a candidate's academic background and career objectives.

### Cooperative Degree Programs

To participate in a cooperative program, the student must make application to and be admitted by both the department and the other UCLA school or department. Fulfilling the combined set of program requirements normally takes three years.

### M.L.I.S./M.A. History

The M.L.I.S./M.A. History is a concurrent degree program of the Department of Library and Information Science and the Department of History. The student can obtain two degrees: the M.L.I.S. and the M.A. in History. The best sequence of coursework should be discussed with the advisers from both this department and the History Department.

### M.L.I.S./M.A. Latin American Studies

The M.L.I.S./M.A. Latin American Studies is an articulated degree program of the Department of Library and Information Science and the Latin American Studies Program. The student can obtain two degrees: the M.L.I.S. and the M.A. in Latin American Studies.

### M.L.I.S./M.B.A.

The M.L.I.S./M.B.A. is a concurrent degree program jointly sponsored by the Department of Library and Information Science and the Anderson Graduate School of Management. This specialization is designed to provide an integrated set of courses for students who seek careers which draw on general and specialized skills in the two professional fields.

### Areas of Study

Consult the department.

### Course Requirements

Full-time students are normally required to enroll in three courses per quarter in order to complete the program in six quarters. Part-time enrollment may be permitted.

Eighteen courses (72 units) are required for graduation from the M.L.I.S. program. Students take 20 units of core courses, four units of coursework in research methods, and 48 units of electives. Coursework must provide evidence both of basic professional competencies and of knowledge in a field of specialized competence.

*Basic Professional Competence.* The requirement is met by completing five core courses (Library and Information Science 200, 201, 203, 220, 441) and at least one graduate-level research methodology course (such as Library and Information Science 205, 240, 241, 260, 261, or 290). Only in unusual cases does librarianship coursework taken elsewhere satisfy the basic competency requirements.

*Specialized Competence.* Completion of a course of study is required as evidence of knowledge of a field of specialization in information policy and management, information access, information systems, or information organization. The field of specialization and the specialized course program must be approved by a faculty adviser. The specialized competence requirement is ordinarily met by the completion of 12 additional courses, which may include internships. Relevant coursework in other departments or schools is encouraged. Students may petition to have prior coursework applied to their specializations.

During the second year, the student may apply for an internship of one to three quarters either on campus or off campus at an approved library or information center. The internship is a regularly scheduled course and may be applied toward the 18 required courses.

No more than eight units of course 596 may be applied toward the total course requirement for students under the comprehensive examination plan; only four units may be applied toward the minimum graduate course requirements. In order to enroll in any S/U graded course, including 500-series courses, the student must be in good academic standing.

Students who choose the thesis option are allowed to apply 12 units of 500 series course work toward the requirements for the degree.

### Comprehensive Examination Plan

The comprehensive examination consists of two components: a basic component and a specialization component.

*Basic Component.* A formal written examination covering basic professional competencies is required. The purpose of the comprehensive examination is to demonstrate understanding of library and information science as a totality. The examination does not cover the basic professional competencies individually but deals with the field in a unified form. The student may sit for the written examination after completion of three quarters of academic residency provided that (1) all outstanding entrance requirements are satisfied, (2) the student has completed the five core courses and the required research methods course at the end of the quarter in which the examination is taken, (3) nine courses toward the degree (not including entrance requirements) have been completed by the end of the quarter in which the examination is taken, and (4) the student is in good academic standing.

*Specialization Component.* A major paper produced in an elective course, normally in the student's area of specialization, is required. A grade of B or better must be earned in this course. The same course may not be used to satisfy both the paper and the research methods requirement.

### Thesis Plan

Students under the thesis plan must submit a thesis reporting on results of their original investigation of a problem. While the problem may be one of only limited scope, the thesis must show a significant style, organization, and depth of understanding of the subject.

Students indicate their interest in this plan by the end of Spring Quarter of the first year. If the thesis option (Plan I) is approved, a thesis committee of at least three faculty members is established. Most students complete 12 units of related coursework under the direction of the committee. The committee approves the subject and plan of the thesis, provides guidance in research, and approves the completed manuscript. Approval must be unanimous

among committee members. After acceptance of the thesis, there is an oral examination on the thesis.

There is no written examination under the thesis plan.

## Post-M.L.I.S. Certificate of Specialization

### Admission

The Post-M.L.I.S. Certificate of Specialization is designed for holders of the M.L.S. or M.L.I.S. degree who either (1) want to redirect their careers and need the structure of a nine-course program and specialization paper to accomplish that, (2) want to update knowledge and skills across the discipline and require the structure of a nine-course program and specialization paper to accomplish those goals, or (3) recently graduated from a less comprehensive M.L.I.S. or M.L.S. degree program than that offered by UCLA and did not have the opportunity to specialize.

Applicants should hold a master's degree from a program accredited by the American Library Association. The committee may offer admission to (1) applicants holding the master's degree in library and information science from foreign countries when the degree has been evaluated by the Graduate Division as a bona fide master's degree and (2) applicants who attended unaccredited programs if documentation supports admission but for the lack of a degree from an accredited program.

Meeting the specified requirements for a field of specialization does not automatically assure admission to the program. Part-time enrollment is encouraged to provide flexibility for the working information professional. Opportunities for relevant coursework outside the department and internships, both on and off campus, are available.

### Areas of Study

The program meets the need for specialized training in various areas of information policy, information access, information systems, libraries and other information institutions, and information organization, as well as research competence. Further specialization within these fields is possible.

### Course Requirements

The course program may begin in any quarter of the academic year. If a student is admitted to a preliminary quarter to complete prerequisite courses, that quarter is not counted in the minimum residence requirements.

A minimum of nine courses (100, 200, 400, and 500 series) must be completed in the Department of Library and Information Science and other departments of the University. A research paper, bibliographical study, or literature survey appropriate for publication in a professional or scholarly journal or as a separate paper must be completed by the final quarter of study, usually in connection with enrollment

in course 596. The specialization paper or project is required even if the student has an advanced academic degree in which a thesis or dissertation was required, and the paper or project must be approved by the faculty adviser.

### Comprehensive Examination Plan

Consult the department.

### Thesis Plan

None.

## Doctoral Degree

### Admission

Students are admitted in Fall Quarter only. They may enter with the M.L.S. or M.L.I.S. degree, other advanced degree, or directly out of the B.A. degree. If the prior graduate degree does not include coursework equivalent to the core identified for the M.L.I.S. program, the applicant must complete the core after admission.

In addition to Graduate Division requirements and application procedures, the department requires satisfaction of the following entrance requirements:

- (1) A statistics requirement, satisfied by completing a college-level course with a minimum grade of C.
- (2) A computer programming requirement, met either by completing a college-level course with a minimum grade of C or by passing a proficiency examination administered by the department (most standard languages such as BASIC, C, COBOL, FORTRAN, or PASCAL are acceptable, as is a college-level course in the use of data management systems such as dBASE, INMAGIC, or PARADOX).
- (3) A statement of purpose which identifies the applicant's proposed area of specialization, accompanied by appropriate evidence of qualifications for pursuing a doctoral program.
- (4) Graduate Record Examination (GRE) scores taken within the last five years. There is no minimum score for the GRE, but high scores are regarded favorably. Admitted students typically score over 1,100.
- (5) In cases where the Test of English as a Foreign Language (TOEFL) and the Test of Written English (TWE) are required, the department expects a minimum score of 550 on the TOEFL and 4.0 on the TWE. Only in exceptional cases are applicants recommended for provisional admission who do not meet the minimum scores; in such cases, strong evidence of competency is English (such as a high verbal GRE score) must be provided.
- (6) Evidence of research and writing such as published work, master's thesis, or two research papers written in English.
- (7) Three letters of recommendation.
- (8) Favorable consideration may be given to applicants who have made distinguished con-

tributions to the profession while working as a practicing professional, for instance in publications and/or work with professional societies.

(9) A personal interview is required. The committee seeks evidence of an appreciation of research and knowledge of potential research topics. The committee is particularly interested in the applicant's commitment to a career in library and information science education and research, signs of originality and inquisitiveness, and good communication skills.

### Major Fields or Subdisciplines

Students are expected to specialize in a subfield in one of three major areas: information storage and retrieval systems; information seeking and use; policies and issues in library and information science.

The department strictly limits the specific subfields which are accepted for doctoral work.

### Course Requirements

A minimum of 18 to 21 courses, depending on the student's previous experience and coursework, is required in the Ph.D. program.

*Core Courses.* The six required core courses are Library and Information Science 200, 201, 203, 220, 441, and a basic course in research methods (e.g., Library and Information Science 290 or Education 210A). Courses taken in a previously completed American Library Association-accredited M.L.S. or M.L.I.S. program may be applied to this requirement, up to the entire six.

*Specialization Courses.* Three to six specialization courses are required. At least one course relevant to each of the three broad doctoral examination areas must be completed. The number of courses required is determined after examination of the student's transcripts.

*Methods Courses.* Three methods courses are required. A minimum of two first tier and one second tier research methods courses offered by the Department of Education is required. If Library and Information Science 290 is taken to satisfy the core, it cannot count toward the fulfillment of this first tier requirement.

*Doctoral Seminars.* Three doctoral seminars are required. Having completed the core, students are required to take a doctoral seminar in each area of the written qualifying examination (Library and Information Science 273, 274, 275).

*Advanced Doctoral Courses.* Additional advanced courses are taken related to the student's dissertation interests. These may include advanced methodology courses, independent studies, or cognate courses in other fields.

### Written and Oral Qualifying Examinations

The student is required to pass written qualifying examinations in each of the three areas of study listed above, including coverage of the historical as well as technical aspects in at

least one of the areas. These are scheduled during one week in a quarter. If the student fails one of the sections of the three-part examination, it may be repeated. If the student fails two sections, the entire examination must be repeated.

After passing the written examinations, the student is required to pass the University Oral Qualifying Examination, which is based on the dissertation proposal.

The student is encouraged to start work on the proposal while taking courses in preparation for the written qualifying examinations. The proposal should, in most cases, be completed within one year after passing the written examinations.

The oral examination covers the significance of the chosen topic of research, the methodology and feasibility of the research, and the depth of the student's knowledge in the specific field of the dissertation research.

Having passed the oral qualifying examination, the student may proceed to carry out the research and writing of the dissertation.

## Library and Information Science

### Upper Division Courses

Course 110 may not be applied toward the M.L.I.S. degree; courses in the 111 series may be applied toward the M.L.I.S. degree with approval of faculty advisers.

**100. Perspectives on Literacy.** Lecture, two hours; discussion, two hours. Prerequisite: sophomore standing. Open to M.L.I.S. students and to graduate students from other schools/departments. Interdisciplinary introduction to literacy as a historical, social, and political issue. Topics include culture and literacy, historical development of literate societies, social definitions of illiteracy, literacy campaigns, literacy as a national and local policy issue.

**110. Information Resources and Libraries.** Prerequisite: sophomore standing or consent of instructor. Not open for credit to M.L.I.S. students. Introduction to bibliographic and information resources and relevant research methodology, covering both general and specialized materials. Designed to facilitate knowledgeable use of libraries and efficient retrieval of information. Some sections focus on specific subject areas (such as science and technology).

**111A-M111E. Ethnic Groups and Their Bibliographies.** Introduction to bibliographical and research tools and methods for students with interests in ethnic groups. **111A.** American Indian History and Culture; **111B.** African American History and Culture; **111C.** Latino History and Culture; **111D.** Asian American History and Culture; **M111E.** Jewish History and Culture. (Same as Jewish Studies M111E.) Sections on other ethnic groups may be added. Offered in collaboration with the several centers for ethnic studies. May not be repeated for credit.

**182. Records and Information Resources Management.** Lecture, three hours. Introduction to records and information resources management in corporate, government, and other organizational settings, including analysis of organizational information flow, classification and filing systems, records retention scheduling, records protection and security, reprographics and image management technology, and litigation support.

### Graduate Courses

Upper division undergraduate students must obtain consent of the instructor to enroll in 200-series courses and consent of the chair to enroll in 400-series courses.

Graduate students from other schools or departments who wish to take courses in the Department of Library and Information Science must obtain consent of the instructor prior to enrolling.

The following courses are offered infrequently: 230, 241, 246, 284, 287, 466, 486.

**200. Information in Society.** Lecture, two hours; discussion, two hours. Examination of processes by which information and knowledge are created, integrated, disseminated, organized, used, and preserved. Topics include history of communication technologies, evolution of literacy, development of information professions, and social issues related to information access. S/U grading.

**201. Information Structures.** Lecture, three hours; discussion, one hour. Required core course. Introduction to various systems and tools used to organize materials and provide access to them, with emphasis on generic concepts of organization, classification, hierarchy, arrangement, and display of records. Provides background for further studies in cataloging, reference, information retrieval, and database management.

**M202. Folklore Archiving.** (Same as Folklore M202.) Lecture, two hours; laboratory, two hours. Exploration and analysis of alternative data indexing, storage, and retrieval systems and procedures for folklore archival collections, supplemented by firsthand experience in creating and managing databases, utilizing both manual and computerized techniques.

**203. Design of Library and Information Services.** Lecture, two hours; discussion, two hours. Principles and methods for planning and designing user-driven library and information services. Principles and methods for assessing information needs of designated populations and for designing services that meet those needs.

**205. Historical Methodology of Library and Information Science.** Prerequisite: course 200. Introduction to historical research as it relates to library and information science. Identification of key primary and secondary source material for writing history in the field. Critical analysis of selected histories of various areas in the profession. Problem-oriented approach.

**207. International Issues and Comparative Research in Library and Information Science.** History and development of international organizations and programs in library and information science. Identification of key issues in international exchange of information. Introduction to comparative method as procedure for study and research.

**208. Development of Cultural Information Sources Using Digital Multimedia.** Lecture, two hours; laboratory, two hours. Overview of technologies, techniques, and principles underlying development and packaging of cultural information resources into digital multimedia such as digital libraries, World Wide Web home pages, and CD-ROMs, as well as user, policy, presentation, motivation, and evaluation considerations.

**210. Seminar: Descriptive and Bibliographical Cataloging.** Prerequisites: courses 410, 411, or equivalent. Specialized studies in selected areas of descriptive and bibliographical cataloging (e.g., purposes, principles, instructional development, potentialities of automation). May be repeated once.

**211. Seminar: Subject Control of Library Materials.** Prerequisites: courses 410, 411, or equivalent. Study of selected problems in design and use of verbal subject headings and classification systems. Manual and mechanized systems. May be repeated once.

**220. Information Access.** Prerequisites: courses 200, 201. Provides fundamental knowledge and skills enabling information professionals to link users with information. Overview of structure of literature in different fields; information-seeking behavior of user groups; communication with users; development of search strategies using print and electronic sources.

**221. Bibliography of Science and Engineering.** Prerequisite: course 220. Patterns of communication and flow of information among scientists and engineers. Scientific and technical literature, with emphasis on on-line sources, special types of publications, research material, reference and bibliographical aids to the natural sciences and engineering.

**222. Bibliography of the Health and Life Sciences.** Prerequisite: course 220. Literature of the medical and life sciences. Information needs of health professionals. Emphasis on on-line sources, special types of publications, reference and bibliographic aids to the health sciences.

**223. Literature of the Social Sciences.** Prerequisite: course 220. Seminar on literature of the social sciences, including review of classics in the various fields, monumental source collections, periodicals, bibliographies, catalogs, indexes, abstracts, bibliographic and nonbibliographic databases, etc. Trends in scholarly and popular writing. Interdisciplinary nature of the literature.

**224. Literature of the Humanities and Fine Arts.** Prerequisite: course 220. Seminar on literature of the humanities and fine arts, including review of classics in the various fields, comparisons of editions, periodicals, bibliographical apparatus, and reviewing media. Trends in scholarly and popular writing.

**M225. Latin American Research Resources.** (Same as History M265 and Latin American Studies M200.) Seminar, three hours. General and specialized materials in fields concerned with Latin American studies. Library research techniques provide experience and competency required for future bibliographic and research sophistication as basis for enhanced research results.

**226. General Reference Work.** Prerequisite: course 220. General reference materials (not specific to subject access), with advanced work in reference process and in cognitive and behavioral aspects of inquirers and expert reference librarians.

**M229B. Africana Bibliography and Research Methods.** (Same as African Area Studies M229B.) Problems and techniques of research methodologies related to Africana studies. Emphasis on relevant basic and specialized reference materials, using full range of available information resources, including library collections of books, serials, and computerized databases.

**M229C. Introduction to Slavic Bibliography (2 units).** (Same as Slavic M229.) Prerequisite: consent of instructor. Introduction to Slavic and East European bibliography for the humanities and social sciences. Emphasis to be determined by requirements and background of enrolled students. Topics include relevant library terminology and concepts; survey of languages and transliteration systems; acquisition of Slavic and East European library materials; Slavic and East European scholarship in the West; relevant reference sources, archival resources, and research methods; survey of on-line databases; compilation of bibliographies. S/U grading.

**230. History of Publishing and the Book Trade.** Prerequisite: course 200. Publishing and book trade history, with particular reference to libraries and book collecting, changing aspects of book production and distribution within the setting of cultural history.

**240. Principles of Information Systems Analysis and Design.** Theories and principles of special systems development, including determination of requirements, technical design and evaluation, and internal organization.

**241. Measurement and Evaluation of Information Systems and Services.** Prerequisite: one research methods course. Recommended: one library automation course. Information systems and services from points of view of their cost and effectiveness in meeting desired objectives. Review of principles of costing. Study of literature in which measures have been developed to evaluate effectiveness of document collections, reference and information retrieval services, document delivery systems, networking, and technical services, including circulation, acquisitions, and document description.

**242. Information Retrieval Systems.** Prerequisites: courses 201, 220. Survey of methods of file organization, retrieval techniques, and search strategies in control of information in computerized form.

**243. Human/Computer Interaction.** Prerequisites: one programming course and one inferential statistics course. Survey of social, behavioral, design, and evaluation issues in human/computer interaction, with readings from several disciplines. Extensive use of technology demonstrations and class discussions. Recommended for students in any discipline involved in design or implementation of information technologies.

**245. Database Management Systems.** Theories, principles, and practicalities of database systems, including data models, retrieval mechanisms, evaluation methods, and storage, efficiency, and security considerations.

**246. Social Aspects of Information-Oriented Society.** Analysis of social evolution of information-oriented societies. Historical factors and current trends explored through discussion of selected international and domestic issues. Implications for information policy.

**247. User-Centered Design of Information Retrieval Systems.** Lecture, two hours; discussion, two hours. Prerequisites: courses 201 and 220, or consent of instructor. Design implications of interaction between users and the features of automated information systems and interfaces that are specific to the information-seeking process. Emphasis on search strategy and subject access through use of thesauri and other vocabularies.

**249. Seminar: Special Topics in Information Science.** Prerequisites: courses 200, 201, and at least one from 242, 243, 247, 280, or 405, or consent of instructor. Content varies from term to term to allow emphasis on specialized topics such as vocabulary control, file design, indexing, classification, text processing, measurement of relevance, evaluation of information systems, and social and policy issues related to information technology and services.

**253. Contemporary Children's Literature.** Reading interests and correlative types of literature surveyed with reference to growth and development of children. Emphasis on role of the librarian in responding to needs and abilities of children through individualized reading guidance.

**260. Historical Bibliography.** Prerequisites: courses 200 and 402, or consent of instructor. History of letterpress formats (books, broadsides, magazines, newspapers, some music, etc.) as well as materials and methods of production, distribution, and readership in their social, political, and economic context. Emphasis varies but is usually on developments prior to 1800. Attention to historiography of the field, including antiquarian, Anglo-American, and *histoire du livre* approaches.

**261. Analytical Bibliography.** The book as a physical object and its relationship to transmission of the text. History and methods of analytical bibliography, with particular emphasis on handpress books.

**271. Seminar: Intellectual Freedom and Information Policy Issues.** Investigation of concept of intellectual freedom, information policy issues, civil liberties and civil rights, censorship, and other restraints on access to information.

**272. Research Seminar: Library and Information Science.** Prerequisite: doctoral standing or consent of instructor. Emphasis on recent contributions to theory, research, and methodology. May be repeated for credit. S/U grading.

**273. Doctoral Seminar: Information Storage and Retrieval Systems.** Prerequisite: doctoral standing or consent of instructor. Intellectual principles for organization of information, including principles for design of systems for acquiring, organizing, and retrieving information. Also includes system-specific user studies to extent that design of information systems is predicated on their evaluation and use.

**274. Doctoral Seminar: Policies and Issues in Library and Information Science.** Prerequisite: doctoral standing or consent of instructor. Examination of social, political, and economic influences in development of library and information science and management of information organizations and resources.

**275. Doctoral Seminar: Information Seeking and Use.** Prerequisite: doctoral standing or consent of instructor. Examination of behavioral and cognitive aspects of inquirer's information needs and uses, including inquirer's characteristics, information problems, psychological needs, and uses of information and information technologies, and aspects of question negotiation.

**280. Information-Seeking Behavior.** Study of factors and influences, both individual and social, associated with human beings needing, using, and acting on information. Topics include information theory, human information processing, information flow among social and occupational groups, and research on information needs and uses.

**281. Information Resources for Business.** Prerequisite: course 220 or consent of instructor. Introduction to information needs of the business world. Business guides, encyclopedias, directories, yearbooks, indexes, loose-leaf services, government publications, databases, and other sources of business literature.

**282. Management of Digital Records.** Lecture, three hours. Introduction to long-term management of digital administrative, information, communications, imaging, or research systems and records. Topics include electronic recordkeeping, enterprise and risk management, systems analysis and design, metadata development, data preservation, and technological standards and policy development.

**283. Legal Research and Bibliography.** (Formerly numbered 228.) Introduction to source materials of the law, with emphasis on primary authority, but covering as well secondary authority, and indexes and finding aids used to gain access to legal information.

**284. Seminar: Legal Informatics.** (Formerly numbered 487C.) Information problems of legal profession, including history of legal information systems, relationship between cognitive authority and legal authority, bibliometrics of law, value-added processes for legal information, and techniques and impact of new legal research technology.

**285. Scholarly Communication and Bibliometrics.** (Formerly numbered 487A.) Prerequisite: one inferential statistics course. Survey of current theory, method, and empirical studies at intersection of scholarly communication and bibliometrics, seeking to understand flow of ideas through published record, whether in print, electronic form, or other media.

**286. Seminar: Information Access.** Prerequisites: course 220, one from 221, 223, 224, 226, 281, 283, 425, 473. Discussion of policies and issues related to basic and advanced reference materials, reference process, and psychological aspects of inquirers and expert reference librarians.

**287. Seminar: Special Issues in Library and Information Science (2 to 4 units).** (Formerly numbered 487D.) Identification, analysis, and discussion of critical intellectual, social, and technological issues facing the profession. Topics may include (but not limited to) expert systems, literacy, electronic networks, youth at risk, information literacy, historical bibliography, preservation of electronic media, etc. May be repeated with topic change.

**289. Information Services in Culturally Diverse Communities.** Issues in provision of information services in a multiethnic and multilingual society. Understanding role of information institutions in promoting cultural diversity and preserving ethnic heritage.

**290. Research Methodology.** Prerequisite: consent of instructor. Role of research in bibliography, librarianship, and information science. Identification and design of research problems. Historical, statistical, analytical, and descriptive techniques.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**402. Fundamentals of Bibliography.** Prerequisite: course 200. Organization, control, and elements of bibliographical apparatus, new techniques and tools, theory, methods, and trends in bibliographical research in relationship to librarianship. Development and fundamentals of several branches of bibliography: enumerative (or systematic), physical (analytical or critical, descriptive).

**405. Automation of Library Processes.** Overview of major components of library automation: circulation control, acquisitions and serials, public access information systems, and data conversion. Relationships among various automation entities, including internal library automation, networks and vendors (such as bibliographic utilities, regional networks, and on-line services), and automation of parent organizations (universities, municipalities, corporations, and government agencies). Developments in standards for information processing and new information technologies.

**410. Descriptive Cataloging.** Entry and description of library materials. Constitution, structure, and form of the library catalog. Cataloging services, tools, and procedures. Cataloging rules and their application.

**411. Introduction to Subject Access: Alphabetic-Subject and Systematic Indexing.** Lecture/discussion. Prerequisite: course 410. Overview of major alphabetic-subject and systematic indexing languages and their use in manual and on-line environments, including theory and application of Library of Congress subject headings and of Dewey decimal and Library of Congress classifications.

**412. Cataloging and Classification of Nonbook Materials.** Prerequisites: courses 410, 411. Problems in cataloging and classification of selected non-book materials (e.g., films, maps, pictorial works, sound recordings) as separate collections and integrated collections.

**414. Indexing and Thesaurus Construction.** (Formerly numbered 413, 414.) Principles of design and methods of construction of thesauri. Evaluation and overview of thesauri used in manual and on-line environments. Basic professional techniques for indexing a variety of types of materials and for preparing informative and indicative abstracts.

**425. Computer-Based Information Resources (On-Line Searching).** Prerequisite: course 220 or consent of instructor. Emphasis on use of reference and resource databases and different vendor systems. File structure and hardware requirements. Analyses of information needs and investigation of databases addressing those needs.

**426. User Education/Bibliographic Instruction: Theory and Technique.** History, theory, methods, and materials of user education/bibliographic instruction in libraries and other information retrieval environments. Examination of a variety of user education/bibliographic instruction theories and methodologies, including overview of planning and administration. Identification of problems in user education/bibliographic instruction. Applications of methods of teaching use of libraries and information resources.

**429. Printing for Bibliographers.** Prerequisites: course 260 or 261, consent of instructor. Printing processes as related to bibliography and librarianship. Discussions, demonstrations, and experiments in design, composition, and presswork, with special emphasis on the 19th-century handpress. S/U grading.

**430. Collection Development and Acquisition of Library Materials.** Background of publishing and the book trade (new and antiquarian) pertinent to collection development in public, school, academic, and special libraries. Theory and practice of collection development and management. Organization and administration of acquisitions departments.

**441. Management Theory and Practice for Information Professionals.** Lecture, two hours; discussion, two hours. Principles and practice of management in all types of organizations where information professionals work.

**442. Library Personnel Administration.** Basic principles of personnel management. Survey of current personnel practices in libraries; how basic principles apply or need to be modified to fit the library setting.

**446. Library Services and Literature for Youth.** Overview of literature and programs which are of interest to young adults (seventh grade and above). Discussion of special problems in working with young people and psychology of the teenager.

**461. College, University, and Research Libraries.** Organization, administration, collections, facilities, finances, and problems of college and university libraries and their relationships within institutions of which they are a part. Functions of research libraries and work of their staffs in serving scholars.

**463. Public Libraries.** Government, organization, and administration of municipal, county, and regional public libraries; developments in changing patterns of public library service.

**465. Library Services and Programs for Children.** Lecture, two hours; discussion, two hours. Theory and practice of service to children in public libraries. Overview of professional library service to children aged 14 and under; provides opportunities for students to gain experience in particular skills needed to provide that service.

**466. Storytelling.** Lecture, two hours; demonstration, two hours. Theory and practice of telling stories to children and adults in public and school libraries. S/U grading.

**470. Special Libraries and Information Centers.** Organization, administration, collections, facilities, finances, and problems of special libraries and of special collections within general libraries. Methods of handling nonbook materials. Current trends in documentation and mechanization.

**471. Health and Life Sciences Libraries.** Prerequisite or corequisite: course 441. Organization, administration, services, and problems of health and life sciences libraries; relationships with institutions of which they are a part and with the community.

**473. Government Information.** Introduction to nature and scope of government information promulgated by the federal government, as well as by state, municipal, international, and foreign governments. Problem-oriented approach.

**485. American Archives and Manuscripts.** Prerequisite: consent of instructor. Identification, description, subject analysis, and organization of records contained in archives and manuscript collections. Administration. User requirements. Problems of acquisition, legal title, literary property, preservation, accessibility, and use.

**486. Issues and Problems in Preservation of Library Materials.** Introduction to fields of library conservation and preservation, with emphasis on preservation administration.

**488. Seminar: Advanced Issues in Archival Science.** Seminar, three hours. Requisite: course 485. In-depth examination of theoretical issues and contemporary problems facing the archival profession. Topics revolve each term and include development and role of archival appraisal, management of audiovisual materials, and management of medical, scientific, and technological documentation.

**491. Interpersonal Communication Issues in Library Systems.** Examination of interpersonal communication patterns in library management and staff relations, in resource sharing, and in providing information services. Emphasis on relationships within an organizational environment and on effective communication styles in decision making, managing conflict, and implementing change. S/U grading.

**497. Fieldwork in Libraries or Information Organizations (4 or 8 units).** Supervised field experience in approved library or information organization. Concentration must be on managerial or other professional problems of the site. Students spend full time in the field for most of the period. S/U grading.

**498. Internship.** Prerequisite: consent of internship coordinator. Supervised professional training in a library or information center approved by internship coordinator. Minimum of 120 hours per term. May be repeated twice. S/U grading.

**596. Directed Individual Study or Research (2 to 8 units).** Prerequisite: consent of instructor. Directed special studies in fields of bibliography, librarianship, and information science. Variable conference time depending on nature of study or complexity of research. S/U grading.

**597. Directed Studies for Ph.D. Qualifying Examinations (2 to 12 units).** S/U grading.

**598. M.L.I.S. Thesis Research and Writing (2 to 8 units).** Hours to be arranged. Designed for graduate library and information science students. Supervised independent research for candidates in M.L.I.S. thesis option. S/U grading.

**599. Ph.D. Research and Writing (2 to 12 units).** S/U grading.

## LIFE SCIENCES

*College of Letters and Science*

UCLA  
2103 Life Sciences  
Box 951606  
Los Angeles, CA 90095-1606

(310) 825-6614  
<http://www.lifesci.ucla.edu/lscore>

### Scope and Objectives

Students who wish to study life sciences have a choice of six majors, all of which lead to a Bachelor of Science degree: biology, microbiology and molecular genetics, molecular, cell, and developmental biology, neuroscience, physiological science, and psychobiology. This choice reflects the diversity of undergraduate instruction in life sciences at UCLA. Despite this diversity, all of these majors require a common core of introductory courses which forms the foundation for any study of life sciences and which is required for more advanced courses in each major. The common core includes courses in chemistry, physics, and mathematics, as well as introductory courses in evolution and biodiversity, cellular and organismal biology, molecular biology, and genetics. During the first two years, students may also gain experience in a research laboratory through the Student Research Program. For more information on each major, see the individual departmental listings in this section of the catalog. For additional information on the

life sciences core curriculum, see the website at <http://www.lifesci.ucla.edu/lscore>.

Students considering one of the life sciences majors are encouraged to declare a major as early as possible, even in their first year. In this way, they are identified by the life sciences advising offices and receive important curricular and other information. Because the core curriculum prepares them for any of the six majors, they have the flexibility to switch to another life sciences major at any time during their progression through the core curriculum. Note: The biology and psychobiology majors may require some courses in addition to the life sciences core curriculum as part of the preparation. Consult the course requirements for both majors.

### Life Sciences Core Curriculum

*Required:* Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 10A, 10B/10BL, 10C, and 10D/10DL, or 11A, 11B/11BL, 11CL, 132A, and 132B/132BL, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

All core curriculum courses must be passed with a grade of C – or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer students with 80 or more units must complete the following courses prior to admission to UCLA: one year of general biology for majors preferably equivalent to Life Sciences 1 and 2; one year of general chemistry with laboratory; one year of calculus; and either one year of calculus-based physics or one year of organic chemistry.

## Life Sciences

### Lower Division Courses

**1. Evolution, Ecology, and Biodiversity.** Lecture, three hours; demonstration, two hours; outside study, seven hours. Not open for credit to students with credit for former Biology 5 or 6. Introduction to principles and mechanisms of evolution by natural selection; population, behavioral, and community ecology; and biodiversity, including major taxa and their evolutionary, ecological, and physiological relationships.

**2. Cells, Tissues, and Organs.** Lecture, three hours; discussion, 90 minutes; outside study, seven and one-half hours. Introduction to basic principles of cell structure, organization of cells into tissues and organs, and principles of organ systems, providing cellular framework for courses 3, 4, and Chemistry 153A.

**3. Introduction to Molecular Biology.** Lecture, three hours; discussion, 90 minutes; outside study, seven and one-half hours. Enforced requisites: course 2, and Chemistry 10C, or 11B and 132A (132A may be taken concurrently). Not open for credit to students with credit for former Biology 9 or 100A. Introduction to basic principles of biochemistry and molecular biology.

**3H. Introduction to Molecular Biology (Honors).** Lecture, two and one-half hours; discussion, 90 minutes; movie section, two and one-half hours. Enforced requisites: course 2, and Chemistry 10C, or 11B and 132A (132A may be taken concurrently). Honors course parallel to course 3, but at a more advanced level.

**4. Genetics.** Lecture, three hours; discussion, 90 minutes; outside study, seven and one-half hours. Enforced requisite: course 3. Not open for credit to students with credit for former Biology 108. Principles of Mendelian inheritance and chromosomal basis of heredity in prokaryotes and eukaryotes, recombination, biochemical genetics, mutation, DNA, genetic code, gene regulation, genes in populations.

## LINGUISTICS

*College of Letters and Science*

UCLA  
3125 Campbell Hall  
Box 951543  
Los Angeles, CA 90095-1543

(310) 825-0634  
fax: (310) 206-5743  
e-mail: linguist@humnet.ucla.edu  
<http://www.humnet.ucla.edu/humnet/linguistics/general/linguist.htm>

Timothy A. Stowell, Ph.D., *Chair*

### Professors

Raimo A. Anttila, Ph.D. (*Indo-European and General Linguistics*)  
Susan R. Curtiss, Ph.D.  
Bruce P. Hayes, Ph.D.  
Thomas J. Hinnebusch, Ph.D. (*Linguistics, African Languages*)  
Nina M. Hyams, Ph.D.  
Patricia A. Keating, Ph.D.  
Edward L. Keenan, Ph.D.  
Hilda J. Koopman, Ph.D. (*Linguistics, African Languages*)  
Pamela L. Munro, Ph.D.  
Russell G. Schuh, Ph.D. (*Linguistics, African Languages*)  
Dominique L. Sportiche, Ph.D. (*French, General Linguistics*)  
Edward P. Stabler, Ph.D.  
Donca Steriade, Ph.D.  
Robert P. Stockwell, Ph.D.  
Anna Szabolcsi, Ph.D.

### Professors Emeriti

George D. Bedell, Ph.D.  
William O. Bright, Ph.D.  
Victoria A. Fromkin, Ph.D.  
Mazisi R. Kunene, Ph.D.  
Peter N. Ladefoged, Ph.D.  
Paul M. Schachter, Ph.D.

### Associate Professors

Anoop Mahajan, Ph.D.  
Timothy A. Stowell, Ph.D.

### Assistant Professors

Sun-Ah Jun, Ph.D.  
Carson T. Schütze, Ph.D.

### Adjunct Professor

Ian Maddieson, Ph.D.

## Scope and Objectives

The goal of linguistics is the enrichment of knowledge about the nature, grammar, and history of human language. Linguistics is a theoretical discipline, akin to philosophy, anthropology,

and cognitive psychology. It is important for prospective students to understand that studying linguistics is not a matter of learning to speak many languages. Linguistics courses draw examples from the grammars of a wide variety of languages, and the more languages linguists know about in depth (as distinct from possessing fluency in the use of them), the more likely they are to discover universal properties. It is also possible to pursue these universal aspects of human language through the intensive in-depth study of a single language. This accounts for the high proportion of examples from English and familiar European languages found in linguistics courses and research publications.

The core areas of linguistic theory are phonology (with its roots in phonetics), morphology, syntax, and semantics. A grammar is a system of rules which characterize the phonology, morphology, syntax, and semantics of a natural language. The properties of grammars are the central focus of linguistic theory.

Because language is central to all humanistic disciplines, as well as to several social science areas, it is studied from many points of view. Linguistics itself cannot be said to recognize a single optimal approach to the subject. Hence, the courses provide a variety of approaches which reflect the diversity of the field.

The Linguistics Department has consistently been ranked among the very best linguistics departments in the country. It offers programs leading to the Bachelor of Arts, Master of Arts, and Ph.D. degrees.

## Undergraduate Study

The majors described below are of three types: (1) a major which concentrates entirely on general linguistics, (2) several majors which combine the basic courses of the general program with a language concentration or other related fields, and (3) a major which concentrates entirely on an African language area. The combined majors in conjunction with instructional certification programs are especially appropriate for students who have nonuniversity teaching careers as goals, and the African major is for students with specific African interests.

A 2.0 grade-point average in linguistics courses is required for all Linguistics Department majors.

## Bachelor of Arts in Linguistics

The B.A. degree program is designed for students with an exceptional interest in and aptitude for the study of languages and linguistics. It enables the undergraduate to gain substantial familiarity with several languages and types of linguistic structure and to become conversant with the historical study of language and formal theories of linguistics.

### Preparation for the Major

*Required:* Linguistics 20; two of the following: Philosophy 31, Psychology 10, one cultural an-

thropology course; completion of the equivalent of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages.

Students who complete an advanced language course are considered to have completed the equivalent of whatever courses are prerequisite to that one (e.g., if students complete French 100, they have automatically satisfied the requirement of the sixth term of work in one language). Students are required to complete at least the equivalent of the third term in a language other than those in the Romance, Slavic, or Germanic families. This requirement may be satisfied either as part of or in addition to the language requirement described in the preceding paragraph.

### The Major

*Required:* A minimum of 13 upper division or graduate courses, including Linguistics 103, 110, 120A, 120B, and two courses from 125, 165A, 165B (students may substitute courses 200A and 200B for 165A and 165B respectively if they receive grades of A in 120A and 120B respectively and have consent of instructor). Both courses 165A and 165B, or 200A and 200B, are recommended for students planning linguistics graduate work. The remaining seven courses are electives, three of which must be linguistics courses. The other four may be in linguistics or in certain other fields as listed below. Electives have generally been selected from the following list (courses not on the list may be used as electives only in consultation with an adviser): Linguistics 104, 114, M115, 125, 127, C130, C135, 140, M146, M150, 160, 165A (or 200A for qualified students), 165B (or 200B for qualified students), 170, 175, M176A, C180, C185A, C185B, 195, 196A, 196B, 199 (if four units), African Languages M190, Anthropology 143, English 121, 122, Philosophy 127A, 127B, 172, Psychology 122, 123, or upper division courses in a foreign language beyond the sixth term. Not all of these elective courses are necessarily given every year; consult an adviser regarding electives to be offered in a given year.

Linguistics 195 or 196A/196B are recommended for students planning to pursue graduate work in linguistics, since they provide an opportunity to engage in independent research and to write a paper which can be submitted to graduate admissions committees. To enroll in the courses, students must consult with the department's senior essay and honors counselor.

## Bachelor of Arts in Linguistics and Anthropology

### Preparation for the Major

*Required:* Linguistics 20, completion of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages (at least three terms must be in a lan-

guage other than those in the Romance, Slavic, and Germanic families). Anthropology 33 is strongly recommended, when offered.

### The Major

*Required:* Thirteen upper division courses as follows: Linguistics 103, 110, 120A, 120B or 127, 125, 170, one other upper division linguistics course (recommended: 114), Anthropology M140, 144 or M145, one course from Anthropology 141, 142A, 143, or Sociology CM124A, and three upper division electives from Anthropology 141, 142A, 143, 144, M145, the 130 series (one course only), the 170 series (one course only), Sociology CM124A, CM124B. Linguistics 165A and 165B (or 200A and 200B with grades of A in 120A and 120B respectively and consent of instructor) are recommended for students planning to pursue graduate work in linguistics.

## Bachelor of Arts in Linguistics and Computer Science

### Preparation for the Major

*Required:* Linguistics 20, Mathematics 31A, 31B, Philosophy 31, Program in Computing 10A, 10B, 10C, 30, completion of the sixth term in one foreign language or the third term in each of two foreign languages. Admission to the major is contingent on passing the following courses with grades of C or better and a grade-point average of 3.3 or better: Linguistics 20, Philosophy 31, Program in Computing 10A, 10B, 10C. Mathematics 31A and 31B must also be passed with grades of C or better. Mathematics 61 is recommended.

### The Major

*Required:* Twelve upper division courses as follows: Linguistics 103, 120A, 120B, 125, 165A or 165B, C180, C185A, Computer Science 131, 132, 161 or 163, 181, and one upper division elective in linguistics or computer science. Linguistics 104 and C185B are strongly recommended.

## Bachelor of Arts in Linguistics and East Asian Languages and Cultures

### Preparation for the Major

*Required:* Completion of the sixth term in either Chinese or Japanese; Linguistics 20, Philosophy 31; one cultural anthropology course; either Chinese 50 or Japanese 50, as appropriate; completion of the sixth term in one other foreign language or the third term in each of two other foreign languages.

### The Major

*Required:* Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), one upper division elective in linguistics; for the classical Japanese track: Japanese 100A-100B, CM122, 140A-140B-140C, C149;

for the modern Japanese track: Japanese 100A-100B-100C, 120, CM122, 130B; for the classical Chinese track: Chinese 110A-110B-110C, four courses from 140A, 140B, 140C, 165, 170, 195; for the modern Chinese track: Chinese 100A-100B-100C, 101A, 101B, 130A, 130B.

## Bachelor of Arts in Linguistics and English

### Preparation for the Major

*Required:* Linguistics 20, English 3, 10A, 10B, 10C, Philosophy 31, completion of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages.

### The Major

*Required:* Fourteen upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two upper division electives in linguistics, English 121, 122, 140A, and four electives from 141A, 141B, 142A, 142B, 143, the 150 series (one course only), the 160 series (one course only), the 170 series (one course only).

## Bachelor of Arts in Linguistics and French

### Preparation for the Major

*Required:* Linguistics 20, French 1, 2, 3, 4, 5, 6, 12, 15, completion of the sixth term in one other foreign language or the third term in each of two other foreign languages.

### The Major

*Required:* Fifteen upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two upper division electives in linguistics, French 100, 101, 102, 103, 105, 107, and two elective upper division French literature courses.

## Bachelor of Arts in Linguistics and Italian

### Preparation for the Major

*Required:* Linguistics 20, Italian 1, 2, 3, 4, 5, 25, Latin 1, 2, 3, completion of the third term in one other foreign language or the sixth term in Latin, Philosophy 31, one cultural anthropology course.

### The Major

*Required:* Twelve upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two upper division electives in linguistics, Italian 102A, 190, and three upper division electives in Italian.

## Bachelor of Arts in Linguistics and Philosophy

### Preparation for the Major

*Required:* Linguistics 20, Philosophy 31, 32, and two courses from 1, 6, 7, 21; completion of the sixth term in each of two foreign languages or the sixth term in one foreign language and the third term in each of two other foreign languages.

### The Major

*Required:* Thirteen upper division courses as follows: Linguistics 103, 120A, 120B, 165B (or 200B with a grade of A in 120B and consent of instructor), three upper division electives in linguistics; six upper division courses in philosophy, including at least five from Philosophy 124 through 135B, 170, 172, 184, 186, 187, 188, of which at least two must be from 127A, 127B, 172.

## Bachelor of Arts in Linguistics and Psychology

### Preparation for the Major

*Required:* Linguistics 20, Psychology 10, 41, 42, completion of the sixth term in one foreign language and the third term in a second foreign language. Program in Computing 10A is strongly recommended.

### The Major

*Required:* Twelve upper division courses as follows: Linguistics 103, 120A, 120B, 130, two upper division electives in linguistics, Psychology 110, 120, 121, 123, 130, and an elective to be selected from 112A, 112B, 112C, 115, 116, 124B, 135. Linguistics 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor) and Psychology 115 are strongly recommended.

## Bachelor of Arts in Linguistics and Scandinavian Languages

### Preparation for the Major

*Required:* Linguistics 20, Scandinavian 1, 2, 3, 4, and 5, or 11, 12, 13, 14, and 15, or 21, 22, 23, 24, and 25, completion of the sixth term in one other foreign language or the third term in each of two other foreign languages.

### The Major

*Required:* Thirteen upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two upper division electives in linguistics, two courses from Scandinavian 105, 110, 115 (or one of these courses twice), 199 (in a topic related to Scandinavian linguistics, under the direction of a Scandinavian or Linguistics faculty member), and three upper division electives in Scandinavian.

## Bachelor of Arts in Linguistics and Spanish

### Preparation for the Major

*Required:* Linguistics 20, Spanish 1, 2, 3, 4, 5, 25, M42, M44, completion of the sixth term in one other foreign language or the third term in each of two other foreign languages.

### The Major

*Required:* Fourteen upper division courses as follows: Linguistics 103, 110, 120A, 120B, 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor), two additional upper division courses in linguistics (preferably C130 and 170), Spanish 100A-100B, 115 or M118A, 119A, 119B, and two additional upper division Spanish courses.

## Bachelor of Arts in African Languages

### Preparation for the Major

*Required:* Linguistics 20, nine courses from African Languages 1A through 42C and 199 (six in one language and three in another).

### The Major

*Required:* A minimum of 13 upper division courses, including three courses in an African language; African Languages M190, Linguistics 103; two courses from Film and Television 106C, Folklore M155, French 121A, Theater 102E, or one or more special four-unit African Languages 199 tutorials focusing on literature in an African language; three courses from English 114, Ethnomusicology 136A, 136B, Geography 189, History 125A, 125B, 125C, 126A, 126B, 127A, 127B, 128A, 128B, Linguistics 110, 120A, 120B or 127, 140, M146, 170, Political Science 151A, 151B, 151C. Linguistics 165A or 165B (or 200A or 200B with a grade of A in 120A or 120B respectively and consent of instructor) and completion of the sixth term in one of the following non-African languages are strongly recommended: Afrikaans, Arabic, Dutch, French, German, Portuguese.

## Honors Program

Honors in linguistics are awarded at graduation to those students who have a grade-point average of 3.6 or better in their junior and senior years and who have received a grade of A in Linguistics 195 or 196A/196B. Qualified students may be proposed by any member of the faculty to the faculty as a whole for the award of highest honors on the basis of a piece of research in linguistics completed at UCLA.

## Computing Specialization

Students in any of the linguistics majors (except linguistics and computer science) may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major and (2) completing Pro-

gram in Computing 10A, 10B, 10C, 60, Linguistics C180, C185A. Students graduate with a bachelor's degree in their major and a specialization in computing.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

Students are normally admitted to begin residence in the Fall Quarter only (exceptions may be made by the chair). The deadline for submission of applications for the Fall Quarter is December 31 of the previous year.

Applicants are asked to submit a statement of purpose, which should include their background for graduate study in linguistics and immediate and long-range goals in the field. Three scholars under whom the applicants have studied should submit letters to the department about the applicants's qualifications. Scores on the verbal, quantitative, and analytical sections of the Graduate Record Examination (GRE) must be submitted. There is no minimum score requirement. A copy of some research paper or other piece of writing in linguistics or a closely related field should also be submitted.

While not required for admission, Linguistics 103, 110, 120A, 120B, 165A, 165B are prerequisite to graduate courses in the corresponding areas. At the time of admission, the applicant is notified which, if any, of the above courses must be taken or audited. However, any question of whether courses taken elsewhere are equivalent to the above courses must be discussed with the adviser.

Prospective students may request an information brochure from the administrative assistant in the department.

### Areas of Study

Consult the department.

### Course Requirements

The Master of Arts degree requires the completion, with a B average or better, of nine graduate courses in linguistics. All students are required to take Linguistics 200A, 200B, 201, 202, and 206. The remaining four courses must be chosen from Linguistics 203 through 218. All first-year graduate students must take courses 411A-411B, and all second-year students must take course 444.

The following undergraduate courses or the equivalent are prerequisite to graduate courses in the corresponding areas: Linguistics 103, 110, 120A, 120B, 165A, 165B. Course 103, or an examination in practical

phonetics, must be passed with a grade of B or better as a prerequisite to Linguistics 210A, a required course for the Ph.D. that may be taken at the pre-M.A. level. A proficiency examination in elementary logic, which may be waived on the basis of appropriate coursework, is prerequisite to course 206.

No more than two courses (with grades of B or better) from institutions outside the University of California may be applied toward the M.A.

## Comprehensive Examination Plan

After completing the required courses and the foreign language examination, the student must pass a comprehensive examination administered by a committee of the faculty. The committee, consisting of four members, is appointed by the chair. This is normally an oral examination, general in scope, and results in a terminal M.A. degree.

## Thesis Plan

After completing the required courses and the foreign language examination, if this plan is selected, the student submits a thesis based on original research to a thesis committee for approval. If the student proceeds to the Ph.D., this plan must be adopted.

For students wishing to be considered for advancement into the doctoral program, a copy of the thesis, complete and clearly legible, but not necessarily in final typed form, must be in the hands of the committee at least two weeks before the last day of classes in the quarter.

Requirements for receiving an M.A. include the filing of a Petition for Advancement to Candidacy form early in the quarter during which the student expects to take the degree. The thesis must be typed according to regulations set by the University. Information on these regulations and procedures is available from the Graduate Division.

## Doctoral Degree

### Admission

General admission requirements are the same as those listed for the M.A. If earlier graduate work was done at UCLA, admission into the Ph.D. program is considered on the basis of the following: (1) completion of all requirements for the M.A. and (2) the faculty's evaluation of the quality of the M.A. thesis and of overall work and promise.

If the applicant has already received an M.A. in Linguistics from another department or institution, all the requirements expected of an M.A. candidate, including the coursework, must be fulfilled unless work elsewhere is equivalent and satisfies the course requirements. Then there are two possible procedures: (1) a master's thesis written at another institution or department may be submitted or (2) if a thesis was not written elsewhere, a paper equal in depth and scope to a thesis may be submitted. In either case an evaluation committee is appointed. This committee makes a recommen-

dation to the entire faculty, which then accesses the applicant's qualifications for admission into the Ph.D. program

## Major Fields or Subdisciplines

Students may specialize in syntax, semantics, phonology, phonetics, language change, typology, neurolinguistics, psycholinguistics, computational linguistics, and many language areas, notably African languages and American Indian languages. Other specializations may be possible, depending on the availability of faculty expertise.

## Course Requirements

Candidates for the Ph.D. are required to have taken 36 units of graduate coursework beyond the M.A. requirements. These units must include Linguistics 210A, 210B, and eight units in an area distinct from that of the student's major area of concentration. The 36 units may not include courses 275 (colloquium), any 300- or 400-level course, 597, or 599. Of the 36 units, no more than 12 units may be in course 596A. A maximum of four two-unit seminars may be included in the 36 units. At some time, some of the results of the student's research must be presented at a meeting of the Linguistics Department Colloquium. This is a requirement for the degree.

## Written and Oral Qualifying Examinations

In order to be advanced to candidacy, the student is required to prepare two substantive research papers in different areas or fields of linguistics. These papers are to be submitted to and approved by the guidance committee. A written prospectus of the dissertation must be submitted to the guidance committee, with a copy to the department file, one month prior to the oral examination. At this time, provided the language requirement has been met, an official doctoral committee must be established.

The University Oral Qualifying Examination is administered by the doctoral committee, based primarily on the topic of the dissertation research. The examination includes all the background necessary to pursue research on the specific topic. Reexamination is possible on recommendation of the committee. The student is expected to take the examination and be advanced to candidacy no later than six quarters after being admitted to the doctoral program.

# Linguistics

## Lower Division Courses

**1. Introduction to Study of Language.** Summary, for general undergraduates, of what is known about human language; unique nature of human language, its structure, its universality, and its diversity; language in its social and cultural setting; language in relation to other aspects of human inquiry and knowledge.

**2. Language in the U.S.** Lecture, four hours; discussion, one hour. Survey of languages of the U.S. (American Indian languages, oldest immigrant languages, ethnic and regional varieties of English, and newest arrival languages) and social and political aspects of American language use.

**10. Structure of English Words.** Lecture, three to four hours. Introduction to structure of English words of classical origin, including most common base forms and rules by which alternate forms are derived. Students may expect to achieve substantial enrichment of their vocabulary while learning about etymology, semantic change, and abstract rules of English word formation.

**20. Introduction to Linguistics.** Lecture, four hours; discussion, one hour. Introduction to theory and methods of linguistics: universal properties of human language; phonetic, phonological, morphological, syntactic, and semantic structures and analysis; nature and form of grammar.

**88. Lower Division Seminar.** Seminar, three hours. Limited to freshmen. Variable topics; consult *Schedule of Classes*, College of Letters and Science, or department for topics to be offered in a specific term. May be repeated for credit.

**99. Special Studies in Linguistics (2 to 4 units).** Supervised research or training. May be repeated for credit. P/NP or letter grading.

## Upper Division Courses

**103. Introduction to General Phonetics.** Lecture, three hours; laboratory, two hours. Prerequisite: one prior linguistics course or course 20 concurrently. Phonetics of a variety of languages and phonetic phenomena that occur in languages of the world. Extensive practice in perception and production of such phenomena.

**104. Experimental Phonetics.** Lecture, four hours; discussion, one hour. Prerequisite: course 103. Survey of principal techniques of experimental phonetics. Use of laboratory equipment for recording and measuring phonetic phenomena.

**110. Introduction to Historical Linguistics.** Prerequisites: courses 20, 103, 120A. Methods and theories appropriate to historical study of language, such as comparative method and method of internal reconstruction. Sound change, grammatical change, semantic change.

**114. American Indian Linguistics.** Strongly recommended (but not prerequisite): course 20. Survey of genetic, areal, and typological classifications of American Indian languages; writing systems for American Indian languages; American Indian languages in social and historical context. One or more languages may be investigated in detail.

**M115. Survey of African Languages.** (Same as African Languages M190.) Prerequisite: course 20. Introduction to languages of Africa, their distribution and classification, and their phonological and grammatical structures; elementary practice in several languages.

**120A. Phonology I.** Prerequisites: courses 20, 103. Introduction to phonological theory and analysis. Rules, representations, underlying forms, derivations. Justification of phonological analyses. Emphasis on practical skills with problem sets.

**120B. Syntax I.** Prerequisite: course 20. Course 120A is not prerequisite to 120B. Descriptive analysis of morphological and syntactic structures in natural languages; emphasis on insight into nature of such structures rather than linguistics formalization.

**125. Semantics.** Lecture, four hours; discussion, one hour. Prerequisite: course 120B. Survey of most important theoretical and descriptive claims about the nature of meaning.

**127. Syntactic Typology and Universals.** Prerequisite: course 20. Study of essential similarities and differences among languages in grammatical devices they use to signal the following kinds of concepts: relations between nouns and verbs (case and word order), negation, comparison, existence/location/possession, causation, interrogation, reflexivization, relativization, attribution (adjectives), time (tense and aspect), and backgrounding (subordination). Data from a range of languages presented and analyzed.

**C130. Language Development.** (Formerly numbered 130.) Lecture, four hours; discussion, one hour. Prerequisites: courses 20, 120A, and 120B, or consent of instructor. Survey of research and theoretical perspectives in language development in children. Discussion and examination of child language data from English and other languages. Emphasis on universals of language development. Topics include infant speech perception and production, development of phonology, morphology, syntax, and word meaning. Concurrently scheduled with course C233.

**132. Introduction to Psycholinguistics.** Prerequisites: courses 20, 120A, 120B. Central issues in language comprehension and production, with emphasis on how theories in linguistics inform processing models. Topics include word understanding (with emphasis on spoken language), parsing, anaphora and inferencing, speech error models of sentence production, and computation of syntactic structure during production.

**C135. Neurolinguistics.** Lecture, four hours; discussion, one hour. Requisites: courses 1 or 20, and C130. Examination of relationship between brain, language, and linguistic theory, with evidence presented from atypical language development and language disorders in the mature brain. Topics include methodologies to investigate normal and atypical hemispheric specialization for language and children and adults with acquired and/or congenital language disorders. Concurrently scheduled with course C235.

**140. Linguistics in Relation to Language Teaching.** Prerequisites: courses 120A, 120B. Aspects of linguistics in relation to teaching of language, with particular focus on special problems entailed in teaching non-European languages.

**M146. Language in Culture.** (Same as Anthropology M140.) Prerequisite: upper division standing or consent of instructor. Study of language as an aspect of culture; relation of habitual thought and behavior to language; and language and the classification of experience. Holistic approach to study of language, with emphasis on relationship of linguistic anthropology to fields of biological, cultural, and social anthropology, as well as archaeology.

**M150. Introduction to Indo-European Linguistics.** (Same as Indo-European Studies M150.) Prerequisites: one year of college-level study (course 3 or better, eight units minimum) of either Greek or Latin and either German or Russian. Survey of Indo-European languages from ancient to modern times; their relationships and chief characteristics.

**160. Field Methods (6 units).** Discussion, four hours; individual or group sessions, one to two hours. Prerequisites: courses 103, 120A, 120B. Analysis of a language unknown to members of class from data elicited from a native speaker of the language.

**165A. Phonology II.** Prerequisite: course 120A (undergraduates with grade of A in course 120A may replace course 165A with 200A, with consent of instructor). Further study in phonological theory and analysis: autosegmental theory, syllable structure, metrical theory, interface of phonology and grammar.

**165B. Syntax II.** Prerequisite: course 120B. Recommended for students who plan to do graduate work in linguistics. Form of grammars, word formation, formal and substantive universals in syntax, relation between syntax and semantics.

**170. Language and Society: Introduction to Sociolinguistics.** Prerequisite: course 20 or consent of instructor. Study of patterned covariation of language and society; social dialects and social styles in language; problems of multilingual societies.

**175. Linguistic Change in English.** Prerequisites: courses 110, 120A, 120B. Principles of linguistic change as exemplified through detailed study of history of English pronunciation, lexicon, and syntax.

**M176A. Structure of Japanese I.** (Same as Japanese CM122.) Lecture, three hours. Prerequisites: Japanese 120 or equivalent or consent of instructor, two years of Japanese. Discussion of many seemingly idiosyncratic characteristics of Japanese syntax and semantics in light of word-order typology and universal grammar, often in form of a contrastive analysis of Japanese and English.

**M176B. Structure of Japanese II.** (Same as Japanese CM123.) Lecture, three hours. Prerequisite: two or more years of Japanese language study or consent of instructor. Survey of Japanese language at three different levels of organization: (1) word level — word class, verbal morphology and semantics; (2) clause/sentence level — tense, aspect, modality; (3) discourse level — point of view, ellipsis, topicalization.

**M177. Structure of Korean.** (Same as Korean CM120.) Lecture, three hours. Prerequisites: two years of Korean, or one year of Korean and some knowledge of linguistics. Discussion of major syntactic, semantic, and pragmatic characteristics of Korean in light of linguistic universals, with brief introduction to formation, typological features, and phonological structure of Korean.

**M178. Contrastive Analysis of Japanese and Korean.** (Same as Japanese CM127 and Korean CM127.) Lecture, three hours. Prerequisites: two years of Japanese or Korean, one introductory linguistics course. Critical reading and discussion of selected current research papers in syntax, pragmatics, discourse, and sociolinguistics from perspective of contrastive study of Japanese and Korean. May be repeated for credit with consent of instructor.

**C180. Mathematical Linguistics I.** Prerequisites: courses 120A, 120B, 165B/200B (may be taken concurrently). Prior mathematics knowledge not assumed. Introduction to selected topics in set theory, logic and formal systems, modern algebra, and automata theory, with elementary applications to linguistics. Topics vary each term. Concurrently scheduled with course C208.

**C185A. Natural Language Processing I.** Prerequisites: courses 120B, C180, Program in Computing 10B. Recommended: course 165B or 200B, Program in Computing 60. Survey of recent work on natural language processing, including basic syntactic parsing strategies, with brief glimpses of semantic representation, reasoning, and response generation. Concurrently scheduled with course C209A.

**C185B. Natural Language Processing II.** Prerequisite: course C185A/C209A or consent of instructor. Extensions of basic language processing techniques to natural language processing. Recent models of syntactic, semantic, and discourse analysis, with particular attention to their linguistic sophistication and psychological plausibility. Concurrently scheduled with course C209B.

**195. Senior Essay.** Prerequisite: consent of instructor. Limited to senior linguistics majors. Extended piece of writing is undertaken on a linguistic topic selected by the student to be completed under supervision of a faculty member. Consult professor in charge to enroll.

**196A. Honors Essay.** Prerequisites: 3.5 GPA, course 165A/200A or 165B/200B (may be taken concurrently). Recommended (but not required): completion of both courses 165A and 165B (or 200A and 200B) before or during term in which course 196A is taken. Draft of extended piece of writing on a linguistic topic selected by the student is prepared under supervision of a faculty member. Consult professor in charge to enroll. In Progress grading (credit to be given only on completion of course 196B).

**196B. Honors Essay (2 units).** Prerequisite: course 196A. Piece of writing drafted in course 196A is presented in a seminar, revised, and put into final form under supervision of a faculty member. Consult professor in charge to enroll.

**197. Special Topics in Linguistics.** Prerequisite: course 1 or 20 or consent of instructor. Variable topics selected from any undergraduate linguistics course area in which students desire greater in-depth knowledge. May be repeated for credit with topic change.

**199. Special Studies in Linguistics (2 to 4 units).** Prerequisites: courses 120A, 120B, consent of instructor. May be repeated for credit.

## Graduate Courses

**200A. Phonological Theory I.** Prerequisite: graduate standing in linguistics or grade of A in course 120A or equivalent course in phonology. Courses 200A and 201 form two-course survey of current research in phonological theory. Interaction of phonology with morphology and syntax, syllable structure, stress.

**200B. Syntactic Theory I.** Prerequisite: graduate standing in linguistics or grade of A in course 120B or equivalent course in syntax. In-depth introduction to selected topics in theory of constituent structure and syntax of predicates, arguments, and grammatical relations. Topics include levels of representation, X-bar theory, case theory, thematic roles, the lexicon, grammatical function-changing rules, head-complement relations.

**201. Phonological Theory II.** Prerequisite: course 200A. Continuation of course 200A. Second course in two-course survey of current research in phonological theory. Topics include autosegmentalism (tone, tiers, segment structure), feature theory, underspecification, prosodic morphology.

**202. Language Change.** Prerequisites: courses 110, 200A, 200B. Survey of current theories and research problems in language change.

**203. Phonetic Theory.** Prerequisite: course 120A. Preliminaries to speech analysis. Functional anatomy of vocal organs; fundamental principles of acoustics and of acoustic theory of speech production; issues in perception of speech; nature and design of feature systems for phonetic and phonological analysis.

**204. Experimental Phonetics.** Prerequisite: course 103 or equivalent. Use of laboratory equipment to investigate articulatory, acoustic, and perceptual properties of speech. Topics include experimental design and statistics; theoretical basis of acoustic structure of speech sounds; computer-based speech processing, analysis, and modeling; perceptual and acoustic evaluation of synthetic speech.

**205. Morphological Theory.** Prerequisites: courses 200A, 200B. Survey of current theories and research problems in morphology. Nature of morphological structure; derivational and inflectional morphology; relation of morphology to phonology, syntax, and the lexicon.

**206. Syntactic Theory II.** Prerequisite: course 200B or consent of instructor. In-depth introduction to selected topics in theory of movement processes and topics selected from following areas: WH-movement and related rules, subadjacency and other constraints on movement; ECP and related conditions on distribution of empty categories; resumptive pronoun constructions; parametric variation in movement constructions; LF WH-movement; filters; reconstruction; parasitic gaps; barriers theory; control theory; null subject parameter.

**207. Formal Semantics.** Prerequisite: course C180/C208 or equivalent. Survey of current approaches to model-theoretic semantics and its relation to current linguistic theory. Approaches include generalized categorial grammars, Montague grammar, Boolean-based systems, generalized quantifier theory, logical form.

**C208. Mathematical Linguistics I.** Prerequisites: courses 120A, 120B, 165B/200B (may be taken concurrently). Prior mathematics knowledge not assumed. Introduction to selected topics in set theory, logic and formal systems, modern algebra, and automata theory, with elementary applications to linguistics. Topics vary each term. Concurrently scheduled with course C180. Graduate students expected to complete additional problem sets.

**C209A. Natural Language Processing I.** Prerequisites: courses 120B, C180, Program in Computing 10B. Recommended: course 165B or 200B, Program in Computing 60. Survey of recent work on natural language processing, including basic syntactic parsing strategies, with brief glimpses of semantic representation, reasoning, and response generation. Concurrently scheduled with course C185A.

**C209B. Natural Language Processing II.** Prerequisite: course C185A/C209A or consent of instructor. Extensions of basic language processing techniques to natural language processing. Recent models of syntactic, semantic, and discourse analysis, with particular attention to their linguistic sophistication and psychological plausibility. Concurrently scheduled with course C185B.

**210A. Field Methods I (6 units).** Prerequisites: courses 200A, 200B, grade of B or better in course 103 or in examination on practical phonetics. Analysis of a language unknown to members of class from data elicited from a native speaker of the language. Term papers to be relatively full descriptive sketches of the language. May be repeated for credit with topic change.

**210B. Field Methods II (6 units).** Prerequisite: course 210A in preceding term. Because different languages are investigated in different years, course 210B can only be taken as direct continuation of 210A in same year. When there are multiple sections, continuation must be in same section. May be repeated for credit with topic change.

**212. Learnability Theory.** Prerequisite: course C180/C208 or consent of instructor. Survey of some of most significant results on capabilities of learners, given precise assumptions about their memory, time, and computational power, and precise assumptions about information provided by the environment.

**213A. Grammatical Development.** (Formerly numbered 213.) Prerequisites: courses 200A, 200B. Recommended: course C130/C233. Survey of theoretical perspectives and contemporary empirical research in development of syntax and other components of grammar, with particular emphasis on acquisition theory, linguistic theory, and issues of learnability.

**213B. Brain Bases for Language.** Prerequisites: courses 200A, 200B. Recommended: course C135/C235. Survey of theoretical perspectives and contemporary empirical research in neurological and cognitive bases for language, language development, and language breakdown.

**214. Survey of Current Syntactic Theories.** Prerequisite: course 206. Survey of several current syntactic theories, compared with one another and with theory discussed in course 206, from point of view of theories' relative descriptive and explanatory power.

**215. Syntactic Typology.** Prerequisite: course 200B. Current results in word-order universals; genetic classification of the world's languages; cross-language properties of specific construction types, including relative clauses, passives, positive and negative conference systems, agreement systems, deixis systems, and types of sentence complements.

**216. Syntactic Theory III.** Prerequisite: course 206 or consent of instructor. Selected topics on syntactic theories of anaphora and quantification from the following areas: typology of binding categories (pronouns, anaphors, etc.); theory of locality conditions in binding theory; parametric variation in binding; quantifier movement; existential quantification and unselective binding; strong and weak crossover; superiority; scope interactions; complex quantifier structures.

**218. Mathematical Linguistics II.** Prerequisite: course C180/C208 or consent of instructor. Applications of automata and formal language theory to natural language: Chomsky hierarchy; whether natural languages are finite state, context free, context sensitive; categorial grammar, indexed grammar, ID/LP grammar, tree adjoining grammar, feature systems, languages as models of first-order theories.

**220. Linguistic Areas.** Prerequisites: courses 120A, and 120B or 127. Recommended: courses 165A/200A, 165B/200B. Analysis and classification of languages spoken in a particular area (e.g., Africa, the Balkans, South Asia, Southeast Asia, Australia, Aboriginal North America, Aboriginal South America, Far East, etc.). May be repeated for credit with topic change.

**225. Linguistic Structures.** Prerequisites: courses 120A, and 120B or 127. Recommended: courses 165A/200A, 165B/200B. Phonological and grammatical structure of a selected language and its genetic relationships to others of its family. May be repeated for credit with topic change.

**230. History of Linguistics.** Prerequisites: courses 200A, 200B. Aspects of history of linguistics. Different course offerings may deal with different areas of linguistics (e.g., phonology, syntax) or with different historical periods. May be repeated for credit with topic change.

**C233. Language Development.** Lecture, four hours; discussion, one hour. Prerequisites: courses 20, 120A, and 120B, or consent of instructor. Survey of research and theoretical perspectives in language development in children. Discussion and examination of child language data from English and other languages. Emphasis on universals of language development. Topics include infant speech perception and production, development of phonology, morphology, syntax, and word meaning. Concurrently scheduled with course C130. Graduate students expected to apply more sophisticated knowledge and produce research paper of greater depth.

**C235. Neurolinguistics.** Requisites: courses 1 or 20, and C130. Examination of relationship between brain, language, and linguistic theory, with evidence presented from atypical language development and language disorders in the mature brain. Topics include methodologies to investigate normal and atypical hemispheric specialization for language and children and adults with acquired and/or congenital language disorders. Concurrently scheduled with course C135. Graduate students expected to read more advanced neurolinguistic literature and produce research papers of greater depth.

**M246C. Topics in Linguistic Anthropology.** (Same as Anthropology M241.) Prerequisite: consent of instructor. Problems in relations of language, culture, and society. May be repeated for credit.

Proseminars numbered 251 through 254 may be taken for either two or four units. If a proseminar is taken for four units, a paper is required. Proseminars and seminars numbered 251 and above may be repeated for credit, having been approved by the Graduate Council as nonrepetitive in content.

**251. Topics in Phonetics and Phonology I: Proseminar (2 or 4 units).** Lecture, four hours. Prerequisite: course 200A. Course 201, 203, or 204 may be required. Specialized topics in phonetics and phonology. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. Meets with course 256A. May be repeated for credit. S/U (two-unit course) or letter (four-unit course) grading.

**252. Topics in Syntax and Semantics I: Proseminar (2 or 4 units).** Lecture, four hours. Prerequisite: course 200B. Course 206, 207, 214, 215, or 216 may be required. Specialized topics in syntax and semantics. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. Meets with course 257A. May be repeated for credit. S/U (two-unit course) or letter (four-unit course) grading.

**253. Topics in Language Variation I: Proseminar (2 or 4 units).** Prerequisite: course 110. Course 202 may be required. Specialized topics in language variation. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. Meets with course 258A. May be repeated for credit. S/U (two-unit course) or letter (four-unit course) grading.

**254. Topics in Linguistics I: Proseminar (2 or 4 units).** Lecture, four hours. Prerequisites: courses 200A, 200B, consent of instructor. Course 201, 202, 203, 204, 205, 206, 207, C208, C209A, C209B, 212, 213A, 214, 215, 216, or 218 may be required. Individual proseminars on topics such as child language, sociolinguistics, neurolinguistics, computational linguistics, psycholinguistics, etc. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. Meets with course 259A. May be repeated for credit. S/U (two-unit course) or letter (four-unit course) grading.

**256A. Topics in Phonetics and Phonology II: Proseminar.** Prerequisite: course 200A. Course 201, 203, or 204 may be required. Specialized topics in phonetics and phonology. May be repeated for credit. Meets with course 251. In Progress grading (credit to be given only on completion of course 256B).

**256B. Topics in Phonetics and Phonology II: Proseminar (2 units).** Prerequisite: course 256A. Specialized topics in phonetics and phonology. May be repeated for credit.

**257A. Topics in Syntax and Semantics II: Proseminar.** Prerequisite: course 200B. Course 206, 207, 214, 215, or 216 may be required. Specialized topics in syntax and semantics. May be repeated for credit. Meets with course 252. In Progress grading (credit to be given only on completion of course 257B).

**257B. Topics in Syntax and Semantics II: Proseminar (2 units).** Prerequisite: course 257A. Specialized topics in syntax and semantics. May be repeated for credit.

**258A. Topics in Language Variation II: Proseminar.** Prerequisite: course 110. Course 202 may be required. Specialized topics in language variation. May be repeated for credit. Meets with course 253. In Progress grading (credit to be given only on completion of course 258B).

**258B. Topics in Language Variation II: Proseminar (2 units).** Prerequisite: course 258A. Specialized topics in language variation. May be repeated for credit.

**259A. Topics in Linguistics II: Proseminar.** Prerequisites: courses 200A, 200B, consent of instructor. Course 201, 202, 203, 204, 205, 206, 207, C208, C209A, C209B, 212, 213A, 214, 215, 216, or 218 may be required. Individual proseminars on topics such as child language, sociolinguistics, neurolinguistics, computational linguistics, psycholinguistics, etc. May be repeated for credit. Meets with course 254. In Progress grading (credit to be given only on completion of course 259B).

**259B. Topics in Linguistics II: Proseminar (2 units).** Prerequisite: course 259A. Individual proseminars on topics such as child language, sociolinguistics, history of linguistic theory, neurolinguistics, languages of the world, psycholinguistics, etc. May be repeated for credit.

Seminars numbered 260A through 264C may be taken for either two or four units. If a seminar is taken for four units, an oral presentation is required. Seminars may be taken for two units credit only by students who have been formally admitted to the doctoral program. All others must enroll for four units.

**260A-260B-260C. Seminars: Phonetics (2 or 4 units each).** Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

**261A-261B-261C. Seminars: Phonology (2 or 4 units each).** Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

**262A-262B-262C. Seminars: Syntax and Semantics (2 or 4 units each).** Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

**263A-263B-263C. Seminars: Language Variation (2 or 4 units each).** Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

**264A-264B-264C. Seminars: Special Topics in Linguistic Theory (2 or 4 units each).** Discussion, three hours. Prerequisite: consent of instructor. Each course may be taken independently for credit. Special topics may include child language, neurolinguistics, psycholinguistics, sociolinguistics, etc. May not be applied toward M.A. or Ph.D. degree requirements when taken for two units. May be repeated for credit. S/U grading.

**275. Linguistics Colloquium.** Prerequisite: completion of M.A. requirements. Varied linguistic topics, generally presentations of new research by students, faculty, and visiting scholars. S/U grading.

**276. Linguistics Colloquium (No credit).** Prerequisite: graduate standing. Same as course 275, but taken without credit by students not presenting a colloquium. S/U grading.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**403. Practical Phonetics Training (1 unit).** Extensive practice in production, perception, and transcription of sounds from a wide range of languages. Concurrently scheduled with practical sections of course 103. S/U grading.

**411A-411B. Research Orientation (2 units each).** Prerequisite: graduate standing. Sequence of lectures by department faculty to acquaint new graduate students with research directions and resources of department and elsewhere on campus. May not be applied toward M.A. or Ph.D. degree requirements. S/U grading.

**422. Practicum: Phonetic Data Analysis (2 units).** Prerequisite: graduate standing. Workshop in examination of phonetic data, such as sound spectrograms, oscillographic records, and computer output. May not be applied toward M.A. or Ph.D. degree requirements. S/U grading.

**444. M.A. Thesis Preparation Seminar.** Student presentations, two hours. Student presentations of proposed topics for M.A. theses, with discussion and criticism by other students and faculty. May not be applied toward M.A. or Ph.D. degree requirements. S/U grading.

**495. College Teaching of Linguistics (2 units).** Prerequisite: graduate standing. Required of all new teaching assistants. Seminars, workshops, and apprentice teaching. Selected topics, including curriculum development, various teaching strategies and their effects, teaching evaluation, and other topics on college teaching. Students receive unit credit toward full-time equivalence but not toward any degree requirements. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596A. Directed Studies (1 to 8 units).** Prerequisite: completion of all undergraduate deficiency courses. Directed individual study or research. May be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

**596B. Directed Linguistic Analysis (1 to 8 units).** Prerequisite: completion of M.A. degree requirements. Intensive work with native speakers by students individually. May be repeated for credit. S/U grading.

**597. Preparation for M.A. Comprehensive and Ph.D. Qualifying Examinations (1 to 8 units).** Prerequisite: at least six graduate courses in linguistics. May be taken *only* in terms in which students expect to take comprehensive or qualifying examinations. May not be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

**598. Research for M.A. Thesis (1 to 8 units).** Prerequisite: consent of guidance committee chair. Research and preparation of M.A. thesis. May not be applied toward M.A. course requirements. May be repeated for a maximum of eight units. S/U grading.

**599. Research for Ph.D. Dissertation (1 to 16 units).** Prerequisite: advancement to Ph.D. candidacy. May not be applied toward Ph.D. course requirements. May be repeated for credit. S/U grading.

## African Languages

### Lower Division Courses

**1A-1B-1C. Elementary Swahili.** Lecture, five hours. Course 1A is enforced requisite to 1B, which is enforced requisite to 1C. Major language of East Africa, particularly Tanzania.

**2A-2B-2C. Intermediate Swahili.** Enforced requisite: course 1C. Course 2A is enforced requisite to 2B, which is enforced requisite to 2C.

**7A-7B-7C. Elementary Zulu.** Lecture, five hours. Course 7A is enforced requisite to 7B, which is enforced requisite to 7C. Most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group.

**8A-8B-8C. Intermediate Zulu.** Enforced requisite: course 7C. Course 8A is enforced requisite to 8B, which is enforced requisite to 8C.

**11A-11B-11C. Elementary Yoruba.** Lecture, five hours. Course 11A is enforced requisite to 11B, which is enforced requisite to 11C. Major language of Western Nigeria.

**12A-12B-12C. Intermediate Yoruba.** Enforced requisite: course 11C. Course 12A is enforced requisite to 12B, which is enforced requisite to 12C.

**15. Intensive Elementary Swahili (12 units).** Lecture, 20 hours (eight weeks). Intensive instruction (equivalent to courses 1A-1B-1C) in Swahili, major language of East Africa, particularly Tanzania.

**16. Intensive Intermediate Swahili (12 units).** Lecture, 20 hours (eight weeks). Requisite: course 1C or 15. Intensive instruction (equivalent to courses 2A-2B-2C) in Swahili, major language of East Africa, particularly Tanzania.

**17. Intensive Elementary Zulu (12 units).** Lecture, 20 hours (eight weeks). Intensive instruction (equivalent to courses 7A-7B-7C) in Zulu, most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group.

**18. Intensive Intermediate Zulu (12 units).** Lecture, 20 hours (eight weeks). Requisite: course 7C or 17. Intensive instruction (equivalent to courses 8A-8B-8C) in Zulu, most widely spoken of the Nguni languages of South Africa, mutually intelligible with other members of this group.

**25. Intensive Elementary Yoruba (12 units).** Lecture, 20 hours (eight weeks). Intensive instruction (equivalent to courses 11A-11B-11C) in Yoruba, major language of Western Nigeria.

**26. Intensive Intermediate Yoruba (12 units).** Lecture, 20 hours (eight weeks). Requisite: course 11C or 25. Intensive instruction (equivalent to courses 12A-12B-12C) in Yoruba, major language of Western Nigeria.

**31A-31B-31C. Elementary Bambara.** Lecture, five hours. Course 31A is enforced requisite to 31B, which is enforced requisite to 31C. Major language of Mali, also widely spoken in adjacent parts of West Africa; includes Maninka (Malinke), Dyula, and other mutually intelligible dialects.

**32A-32B-32C. Intermediate Bambara.** Enforced requisite: course 31C. Course 32A is enforced requisite to 32B, which is enforced requisite to 32C.

**35. Intensive Elementary Bambara (12 units).** Lecture, 20 hours (eight weeks). Intensive instruction (equivalent to courses 31A-31B-31C) in Bambara, major language of Mali and contiguous areas.

**36. Intensive Intermediate Bambara (12 units).** Lecture, 20 hours (eight weeks). Requisite: course 31C or 35. Intensive instruction (equivalent to courses 32A-32B-32C) in Bambara, major language of Mali and contiguous areas.

**41A-41B-41C. Elementary Hausa.** Lecture, five hours. Course 41A is enforced requisite to 41B, which is enforced requisite to 41C. Major language of Northern Nigeria and adjacent areas.

**42A-42B-42C. Intermediate Hausa.** Enforced requisite: course 41C. Course 42A is enforced requisite to 42B, which is enforced requisite to 42C.

**45. Intensive Elementary Hausa (12 units).** Lecture, 20 hours (eight weeks). Intensive instruction (equivalent to courses 41A-41B-41C) in Hausa, major language of Northern Nigeria and adjacent areas.

**46. Intensive Intermediate Hausa (12 units).** Lecture, 20 hours (eight weeks). Requisite: course 41C or 45. Intensive instruction (equivalent to courses 42A-42B-42C) in Hausa, major language of Northern Nigeria and adjacent areas.

**51A-51B-51C. Elementary Amharic.** Lecture, five hours (15 hours for intensive course). Course 51A is enforced requisite to 51B, which is enforced requisite to 51C. Major language of Ethiopia. P/NP (undergraduates), S/U (graduates), or letter grading.

**52A-52B-52C. Intermediate Amharic.** Lecture, five hours (15 hours for intensive course). Enforced requisite: course 51C. Course 52A is enforced requisite to 52B, which is enforced requisite to 52C. P/NP (undergraduates), S/U (graduates), or letter grading.

**55. Intensive Elementary Tigrinya (12 units).** Lecture, 20 hours. Intensive instruction in Tigrinya, major language of Eritrea and Tigray, province of Ethiopia.

**61A-61B-61C. Elementary Wolof.** Lecture, five hours. Course 61A is enforced requisite to 61B, which is enforced requisite to 61C. Major language of Senegambia.

**62A-62B-62C. Intermediate Wolof.** Enforced requisite: course 61C. Course 62A is enforced requisite to 62B, which is enforced requisite to 62C. P/NP or letter grading.

**75. Intensive Elementary Chichewa (12 units).** Lecture, 20 hours. Intensive instruction in Chichewa (ChiNyanja), major language of Malawi and adjacent areas of Zimbabwe, Mozambique, Zambia, and Tanzania.

**85. Intensive Elementary Setswana (12 units).** Lecture, 20 hours. Intensive instruction in Setswana, primary language of Botswana and adjacent areas of South Africa.

**97. Elementary and Intermediate Studies in African Languages (1 to 6 units).** Instruction at elementary or intermediate level, based on needs of students, in any language for which appropriate facilities are available. Those taught in past included Akan, Efik, Ewe, Fula, Igbo, Lingala, Luganda, and Xhosa.

### Upper Division Courses

**103A-103B-103C. Advanced Swahili.** Prerequisite: course 2C. Course 103A is prerequisite to 103B, which is prerequisite to 103C. Readings in Swahili literature and the contemporary press. Discussions mainly in Swahili.

**109A-109B-109C. Advanced Zulu.** Lecture, five hours; outside study, seven hours. Prerequisite: course 8C. Course 109A is prerequisite to 109B, which is prerequisite to 109C. Readings in Zulu literature and the contemporary press. Discussions mainly in Zulu.

**123A-123B-123C. Advanced Yoruba.** Prerequisite: course 12C. Course 123A is prerequisite to 123B, which is prerequisite to 123C. Readings in Yoruba literature and the contemporary press. Discussions mainly in Yoruba.

**133A-133B-133C. Advanced Bambara.** Prerequisite: course 32C. Course 133A is prerequisite to 133B, which is prerequisite to 133C. Readings in Bambara literature and the contemporary press. Discussions mainly in Bambara.

**143A-143B-143C. Advanced Hausa.** Prerequisite: course 42C. Course 143A is prerequisite to 143B, which is prerequisite to 143C. Readings in Hausa literature and the contemporary press. Discussions mainly in Hausa.

**153A-153B-153C. Advanced Amharic.** Lecture, five hours (15 hours for intensive course). Prerequisite: course 52C. Course 153A is prerequisite to 153B, which is prerequisite to 153C. Readings in Amharic literature and the contemporary press. Discussions mainly in Amharic. P/NP (undergraduates), S/U (graduates), or letter grading.

**M190. Survey of African Languages.** (Same as Linguistics M115.) Prerequisite: Linguistics 20. Introduction to languages of Africa, their distribution and classification, and their phonological and grammatical structures; elementary practice in several languages.

**199. Special Studies in African Languages (1 to 6 units).** Prerequisite: consent of instructor. Instruction at advanced level or supervised research, based on needs of individual students, in any language or group of languages for which appropriate facilities are available.

### Graduate Courses

**202A-202B-202C. Comparative Bantu.** Prerequisites: Linguistics 110, 165A, 165B. Recommended: three quarter courses in one Bantu language selected from 1A through 8C, 199. Investigation of relationships among the Bantu languages; extent and external relationships of Bantu.

**596. Directed Studies (1 to 8 units).** Directed individual study or research. Four units may be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

## Indigenous Languages of the Americas

### Lower Division Courses

**18A-18B-18C. Elementary Quechua.** Lecture, five hours. Course 18A is enforced requisite to 18B, which is enforced requisite to 18C. Language of the Incas and its present-day dialects, as spoken in Andean South America.

### Upper Division Courses

**119A-119B-119C. Advanced Quechua.** Prerequisite: course 18C. Course 119A is prerequisite to 119B, which is prerequisite to 119C. Readings in Quechua. Dialectal and stylistic variation. Discussions mainly in Quechua.

### Graduate Course

**596. Directed Studies in Quechua (1 to 8 units).** Prerequisites: courses 119A-119B-119C or consent of instructor. Directed individual study or research in Quechua. Four units may be applied toward M.A. course requirements. May be repeated for credit. S/U grading.

## Related Courses

### Anthropology

143. Field Methods in Linguistic Anthropology

### Armenian (Near Eastern Languages)

210. History of the Armenian Language

### English

121. History of the English Language

122. Introduction to Structure of Present-Day English

210. History of the English Language  
 218. Celtic Linguistics  
 240. Studies in History of the English Language  
 241. Studies in Structure of the English Language

**Folklore and Mythology**

217. Folk Speech

**French**

- 210A. Phonology and Morphology from Vulgar Latin to French Classicism  
 210B. Syntax and Semantics from Vulgar Latin to French Classicism

**German (Germanic Languages)**

129. Language and Linguistics  
 217. History of the German Language  
 230. Survey of Germanic Philology  
 C238. Linguistic Theory and Grammatical Description  
 251. Seminar: Syntax and Phonology of German  
 252. Seminar: Historical and Comparative Germanic Linguistics

**Hebrew (Near Eastern Languages)**

- 190A-190B. Survey of Hebrew Grammar  
 210. History of the Hebrew Language

**Indo-European Studies**

210. Indo-European Linguistics: Advanced Course  
 280A-280B. Seminars: Indo-European Linguistics

**Italian**

- 222A. History of the Italian Language  
 222B. Structure of Modern Italian  
 222C. Italian Dialectology

**Japanese (East Asian Languages)**

- CM122. Structure of Japanese I  
 225A-225B. Seminars: Linguistic Analysis of Japanese Narratives

**Latin (Classics)**

240. History of the Latin Language

**Philosophy**

- 127A, 127B. Philosophy of Language  
 172. Philosophy of Language and Communication  
 287. Seminar: Philosophy of Language

**Portuguese (Spanish and Portuguese)**

- 100A. Phonology and Morphology  
 100B. Syntax

## MANAGEMENT

### *John E. Anderson Graduate School of Management*

UCLA  
 110 Westwood Plaza, Suite F407  
 Box 951481  
 Los Angeles, CA 90095-1481  
 (310) 825- 6121  
<http://www.anderson.ucla.edu/>

William P. Pierskalla, Ph.D., *Dean*  
 David Lewin, Ph.D., *Associate Dean*  
 Steven A. Lippman, Ph.D., *Associate Dean*  
 William G. Ouchi, D.Litt., Ph.D., *Associate Dean*  
 Jason L. Frand, Ph.D., *Assistant Dean*  
 John W. Mamer, Ph.D., *Associate Dean and Chair*  
 John J. McDonough, D.B.A., *Vice Chair*

**Professors**

Robert B. Andrews, Ph.D. (*Operations and Technology Management*)  
 Michael J. Brennan, Ph.D. (*Finance; Goldyne and Irwin Hearsh Professor of Money and Banking*)  
 John W. Buckley, Ph.D. (*Ernst and Young Professor of Accounting*)

Lee G. Cooper, Ph.D. (*Marketing*)  
 Bradford Cornell, Ph.D. (*Finance*)  
 Samuel A. Culbert, Ph.D. (*Human Resources/Organizational Behavior*)  
 Michael R. Darby, Ph.D. (*Business Economics; Warren C. Cordner Professor of Money and Financial Markets*)  
 José de la Torre, D.B.A. (*Strategy and Organization*)  
 Sebastian Edwards, Ph.D. (*Business Economics; Henry Ford II Professor of International Management*)  
 Donald Erlenkotter, Ph.D. (*Decision Sciences, Operations and Technology Management*)  
 Eric G. Flamholtz, Ph.D. (*Accounting, Human Resources/Organizational Behavior*)  
 Arthur M. Geoffrion, Ph.D. (*Decision Sciences*)  
 Glenn W. Graves, Ph.D. (*Decision Sciences*)  
 Martin Greenberger, Ph.D. (*IBM Professor of Computers and Information Systems*)  
 Mark S. Grinblatt, Ph.D. (*Finance*)  
 Dominique M. Hanssens, Ph.D. (*Marketing*)  
 Patricia J. Hughes, Ph.D. (*Accounting*)  
 Sanford M. Jacoby, Ph.D. (*Human Resources/Organizational Behavior*)  
 Uday S. Karmarkar, Ph.D. (*Operations and Technology Management; Times Mirror Professor of Management Strategy and Policy*)  
 Larry J. Kimbell, Ph.D. (*Business Economics*)  
 Archie Kleingartner, Ph.D. (*Human Resources/Organizational Behavior*)  
 Edward E. Leamer, Ph.D. (*Business Economics; Chauncey J. Medberry Professor of Management*)  
 David Lewin, Ph.D. (*Human Resources/Organizational Behavior*)  
 Bennet P. Lientz, Ph.D. (*Information Systems*)  
 Steven A. Lippman, Ph.D. (*Decision Sciences*)  
 Francis A. Longstaff, Ph.D. (*Finance*)  
 James B. MacQueen, Ph.D. (*Decision Sciences*)  
 John W. Mamer, Ph.D. (*Decision Sciences*)  
 John J. McDonough, D.B.A. (*Human Resources/Organizational Behavior, Accounting*)  
 Bill McKelvey, Ph.D. (*Strategy and Organization*)  
 Bruce L. Miller, Ph.D. (*Accounting*)  
 Daniel J.B. Mitchell, Ph.D. (*Human Resources/Organizational Behavior*)  
 Donald G. Morrison, Ph.D. (*Marketing; William E. Leonhard Professor of Management*)  
 William G. Ouchi, D.Litt., Ph.D. (*Strategy and Organization*)  
 William P. Pierskalla, Ph.D. (*John E. Anderson Professor of Management*)  
 Anthony P. Raia, Ph.D. (*Human Resources/Organizational Behavior*)  
 Richard W. Roll, Ph.D. (*Finance; Allstate Professor of Insurance and Finance*)  
 Richard P. Rumelt, D.B.A. (*Strategy and Organization; Harry and Elsa Kunin Professor of Business and Society*)  
 Rakesh K. Sarin, Ph.D. (*Operations and Technology Management; Paine Professor of Management*)  
 Hans Schöllhammer, D.B.A. (*Strategy and Organization*)  
 Eduardo S. Schwartz, Ph.D. (*Finance; California Professor of Real Estate and Land Economics*)  
 Carol A. Scott, Ph.D. (*Marketing*)  
 E. Burton Swanson, Ph.D. (*Information Systems*)  
 Christopher S. Tang, Ph.D. (*Decision Sciences, Operations and Technology Management*)  
 J. Fred Weston, Ph.D. (*Business Economics, Finance; Warren C. Cordner Professor Emeritus of Money and Financial Markets*)  
 Harold M. Williams, J.D.

**Professors Emeriti**

William F. Brown, Ph.D.  
 Elwood S. Buffa, Ph.D.  
 Joseph D. Carrabino, Ph.D., P.E.  
 Fred E. Case, D.B.A.  
 Louis E. Davis, M.S.  
 David K. Eiteman, Ph.D.  
 Walter A. Fogel, Ph.D.  
 Alfred E. Hofflander, Ph.D.  
 James R. Jackson, Ph.D.  
 Raymond J. Jessen, Ph.D.  
 Harold H. Kassarian, Ph.D.  
 Paul Kircher, Ph.D., C.P.A.

J. Clayburn La Force, Ph.D., *Dean Emeritus*  
 Robert Hal Mason, Ph.D.  
 Fred Massarik, Ph.D.  
 Frederic Meyers, Ph.D.  
 Frank G. Mittelbach, M.A.  
 Rosser T. Nelson, Ph.D.  
 Alfred Nicols, Ph.D.  
 Frank E. Norton, Ph.D.  
 John P. Shelton, Ph.D.  
 Harry Simons, M.A., C.P.A.  
 R. Clay Sprowls, Ph.D.  
 George A. Steiner, Ph.D., Litt.D.  
 Robert Tannenbaum, Ph.D.  
 Robert M. Williams, Ph.D.  
 James Q. Wilson, Ph.D. (*James A. Collins Professor Emeritus of Management*)

#### Associate Professors

Reza H. Ahmadi, Ph.D. (*Operations and Technology Management*)  
 Theodore A. Andersen, Ph.D. (*Finance*)  
 Sushil Bikhchandani, Ph.D. (*Decision Sciences*)  
 Randolph E. Bucklin, Ph.D. (*Marketing*)  
 Bhagwan Chowdhry, Ph.D. (*Finance*)  
 Connie J.G. Gersick, Ph.D. (*Human Resources/Organizational Behavior*)  
 Robert L. Geske, Ph.D. (*Finance*)  
 Richard A. Goodman, D.B.A. (*Strategy and Organization*)  
 Barbara S. Lawrence, Ph.D. (*Human Resources/Organizational Behavior, Strategy and Organization*)  
 Marvin B. Lieberman, Ph.D. (*Strategy and Organization*)  
 Alfred E. Osborne, Jr., Ph.D. (*Business Economics*)  
 Avanihar Subrahmanyam, Ph.D. (*Finance*)  
 Ivo I. Welch, Ph.D. (*Finance*)

#### Assistant Professors

Jennifer L. Aaker (*Marketing*)  
 David Aboody, Ph.D. (*Accounting*)  
 David R. Bell, Ph.D. (*Marketing*)  
 Shlomo Benartzi, Ph.D. (*Accounting*)  
 Antonio E. Bernardo, Ph.D. (*Finance*)  
 Margaret C. Campbell, Ph.D. (*Marketing*)  
 Charles J. Corbett, Ph.D. (*Operations and Technology Management*)  
 Eric D. Darr, Ph.D. (*Strategy and Organization*)  
 Christopher Erickson, Ph.D. (*Human Resources/Organizational Behavior*)  
 Gavan J. Fitzsimons (*Marketing*)  
 Stephen C. Hansen, Ph.D. (*Accounting*)  
 Deborah D. Heisley, Ph.D. (*Marketing*)  
 Teck Hua Ho, Ph.D. (*Operations and Technology Management*)  
 Olivier Ledoit, Ph.D. (*Finance*)  
 Elaine Mosakowski, Ph.D. (*Strategy and Organization*)  
 David M. Porter, Jr., *Acting* (*Human Resources/Organizational Behavior*)  
 Mariko Sakakibara, Ph.D. (*Strategy and Organization*)  
 Pedro Santa-Clara, Ph.D. (*Finance*)  
 Atanu R. Sinha, Ph.D. (*Marketing*)  
 Karen A. Stephenson, Ph.D. (*Human Resources/Organizational Behavior*)  
 Michael G. Williams, Ph.D. (*Accounting*)

#### Lecturers

Gordon L. Klein, J.D.  
 Andrea C. McAleenan, Ph.D.  
 Eric Mokover, M.B.A.  
 Linda F. Newton, M.B.A.  
 David S. Ravetch, M.A.  
 Richard B. Stern, Ph.D.

#### Adjunct Professors

William M. Cockrum, M.B.A. (*Finance*)  
 George T. Geis, Ph.D. (*Decision Services, Information Systems*)  
 Sanford C. Sigoloff, B.S. (*Strategy and Organization*)  
 Victor C. Tabbush, Ph.D. (*Business Economics*)  
 George S. Yip, D.B.A. (*Strategy and Organization*)  
 S. William Yost, Ph.D. (*Operations and Technology Management*)

#### Adjunct Associate Professor

Janis S. Forman, Ph.D. (*Communications Program*)

#### Adjunct Assistant Professors

Robert F. Foster, M.B.A. (*Operations and Technology Management, Field Studies*)  
 Jason L. Frand, Ph.D. (*Information Systems*)  
 Leonard Weil, B.A. (*Finance*)

## Scope and Objectives

The John E. Anderson Graduate School of Management at UCLA offers a variety of programs leading to graduate degrees at the master's and doctoral levels. These include both an academic (M.S.) and professional (M.B.A.) master's, as well as a 21-month Executive M.B.A. Program designed for working managers who are moving from specialized areas into general management and a three-year Fully Employed M.B.A. Program for emerging managers. A Ph.D. in Management is also offered, as are a certificate Executive Program and research conferences and seminars for experienced managers.

The school offers an undergraduate minor in accounting and several undergraduate courses in management. Enrollment in these courses, although open to all University students who have completed the requisites, is limited. The school limits the number of courses taken by undergraduate students to 11.

## Undergraduate Study

### Accounting Minor

Admission is competitive and based on a 3.0 grade-point average in the lower division preparation courses. Repetition of more than one preparation course or of any preparation course more than once results in automatic denial of admission to the minor. Transfer credit for any of the courses is subject to department approval and is considered only for requisite coursework. Decisions on admission to the minor are made by the Anderson School. The requisite grade-point average and completion of the preparation courses do not guarantee admission to the program.

*Required Lower Division Courses:* Economics 1, 2, 40 (or Statistics 50 as a substitute for course 40); Management 1A-1B; Mathematics 3A, 3B (higher-level courses and/or Advanced Placement Test credit may be substituted).

*Required Upper Division Courses:* Management 120A, 120B, 122, 127A, and three courses from 108, 123, 124, 127B, 128.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degrees

The John E. Anderson Graduate School of Management offers the Master of Science (M.S.) degree and the Master of Business Administration (M.B.A.) degree, as well as cooperative M.B.A. degree with other programs. In addition, the school offers the Executive M.B.A. Program and the M.B.A. for the Fully Employed (FEMBA).

## Master of Business Administration Degree

### Admission

Although no specific undergraduate major is required for entrance, applicants should complete elementary algebra and differential calculus before entering the M.B.A. program. Applicants are required to take the Graduate Management Admission Test (GMAT). Any questions about the GMAT should be addressed to Educational Testing Service, Box 966-R, Princeton, NJ 08541, (609) 921-9000.

International applicants who do not hold degrees from universities or colleges where English is the primary language are required to take the Test of English as a Foreign Language (TOEFL). Inquiries can be addressed to (609) 771-7100.

The M.B.A. program application, which includes the application for admission to graduate status, is required. Admission is for the Fall Quarter only. Completed applications, with full documentation, must be filed directly with the Anderson School Office of Admissions by April 4. Early application is strongly advised.

Consideration is given to the academic record, score on the GMAT and, for applicants whose native language is not English, score on the TOEFL; potential for management as evidenced by work experience and community, extracurricular, or other experience; and several written essays and letters of recommendation. Preference is given to those who have had full-time management-related work experience since completing the bachelor's degree. Those few applicants admitted directly from a baccalaureate program may choose to work for up to three years before entering graduate school. No other admission deferrals are granted.

Applications and information about the M.B.A. program are available from the M.B.A. Program Admissions Office, The Anderson School, B201 Gold Hall, Box 951481, Los Angeles, CA 90095-1481.

## Cooperative Degrees

### M.B.A./J.D.

The School of Law and the Anderson School offer a concurrent degree program which enables students to prepare for a career where law and management overlap and where understanding of both fields is necessary. Examples of such areas would include public ser-

vice, international trade, industrial relations, corporate law, and specialized areas of management consulting. The program makes it possible to earn the J.D. and M.B.A. in four academic years. Application should be made to both schools simultaneously.

#### **M.B.A./M.S. Computer Science**

The Anderson School and the Department of Computer Science in the School of Engineering and Applied Science offer a concurrent degree program which enables students to complete requirements for the M.S. in Computer Science and the M.B.A. in three academic years. Application materials should be requested separately from both schools.

#### **M.B.A./M.L.I.S.**

Jointly sponsored by the Department of Library and Information Science (Graduate School of Education and Information Studies) and the Anderson School, this three-year concurrent degree program is designed to provide an integrated set of courses for students who seek careers that draw on general and specialized skills in the two professional fields. Application materials should be requested separately from both schools.

#### **M.B.A./M.P.H.**

The Anderson School and the School of Public Health offer a three-year concurrent degree program designed for students who desire a management career in health care and related fields and who wish in-depth professional preparation for such a career. The program reflects the combined interest of employers, faculty, and students who recognize the increasing challenges facing managers in the health care industry and the need for individuals who are skilled in dealing with these challenges. Application materials should be requested separately from both schools.

#### **M.B.A./M.A. Latin American Studies**

The Anderson School and the Latin American Studies Program jointly sponsor a three-year concurrent degree program designed for individuals preparing for careers in international management with a special focus on the Latin American region. Establishment of the program was predicated on the belief that individuals employed in the area of international business and management are better equipped to meet the challenges of their employment with complementary preparation in language and regional studies. Application materials should be requested separately from both schools.

#### **M.B.A./M.A. Urban Planning**

The Anderson School and the Department of Urban Planning (School of Public Policy and Social Research) offer a three-year concurrent degree program designed for students who seek careers which draw on general and specialized skills in urban planning and management. By providing knowledge of the workings of both the private and public sectors, the pro-

gram enables individuals who have acquired these skills to move easily between careers in private industry and public service. Application materials should be requested separately from both schools.

#### **M.B.A./M.S.N.**

The Anderson School and the School of Nursing offer a three-year concurrent degree program designed for students who seek careers in hospital and nursing administration. By providing knowledge of both management and clinical care issues, the program prepares individuals for management positions in an increasingly complex environment. Application materials should be requested separately from both schools.

#### **Areas of Study**

Accounting; business economics; decision sciences; entertainment management; entrepreneurial studies; finance; human resources and organizational behavior; information systems; international business and comparative management; marketing; operations and technology management; strategy and organization; public/not-for-profit management; real estate.

#### **Course Requirements**

The three required elements of the M.B.A. program are the management core, the advanced electives, and the management field study. The management core courses teach the fundamental techniques and disciplines which underlie the practice of management. Advanced electives provide specialized knowledge and skills for one or more fields (typically two) of management work. The management field study allows an opportunity to apply knowledge gained in the program to strategic issues in real organizations.

*Management Core.* The management core consists of eight courses on subjects basic to the practice of management. These courses include one course on the management of human resources in organizations (Management 409) and seven courses in technical and functional fields (Management 402, 403, 405, 408, 410, 411, and 420).

*Management Field Study.* The two-term management field study project (courses 444A-444B) consists of teams of three to five students who serve as management consultants to business firms or other organizations. Conclusions are summarized in a report which serves in lieu of a comprehensive examination for members of the team. The field study is judged by standards applicable to professional management consulting.

*Advanced Electives.* These courses are chosen by students to focus on one or more fields of specialization within the broad realm of management. Eleven of these electives must be selected from management curriculum area or interdisciplinary studies courses. Management 404, 406, 407, and 412, formerly part of the management core, may be taken as ad-

vanced electives. Three electives may be selected from any University department, subject only to general University regulations. These free electives normally must be taken while enrolled in the program. They may support or complement the remainder of the program of study. A maximum of two four-unit Management 596 courses (independent studies) and one four-unit Management 454 course (internship) may be applied toward the 96-unit requirement. These courses count as free electives.

#### **Comprehensive Examination Plan**

Consult the department.

#### **Thesis Plan**

None.

### **Executive M.B.A. Program**

#### **Admission**

Designed for mid-career managers with strong records of achievement, the Executive M.B.A. Program enables executives to study advanced management in a high quality educational environment while continuing to work full time in their professional roles. The program is limited to 60 participants with superior academic records and a minimum of eight to 10 years of work experience with five years at the management level.

#### **Areas of Study**

The emphasis is on general management training; increased competence in management specialties; management of international businesses; organizational and interpersonal skills; and sophisticated understanding of the integration of businesses and their environments.

#### **Course Requirements**

A total of 66 units of coursework toward the degree must be completed in residence in the Executive M.B.A. program at UCLA. Completion of the intensive 24-month course of study leads to a regular M.B.A. degree. First year required courses for Fall: Management 461, 463, 473, and 474; Winter: Management 462, 464, and 468; Spring: Management 465, 467, 472 and 478. In the second year, the following courses are required: Fall: Management 466A, and 477; Winter: Management 466B, 470A, 470B, 476, or 478; Spring: Management 469, 470C, 470D, and 475. Four units of 596 course work is applicable toward the degree course requirements.

Classes are held at the Anderson School on alternating weekends, all day Friday and Saturday, with three five-day, off-campus residential sessions at the beginning of the first year and at the middle and end of the second year. The final residential session is the culmination of an international field study and is held abroad. Further information and application materials may be obtained by writing to the Assistant Dean, Executive M.B.A. Program, UCLA,

A101F Collins Center, Box 951481, Los Angeles, CA 90095-1481.

### Comprehensive Examination Plan

Consult the department.

### Thesis Plan

None.

## Fully Employed M.B.A. Program

### Admission

The M.B.A. for the Fully Employed (FEMBA) is designed for emerging managers with strong records of academic and professional achievement who wish to pursue an M.B.A. degree without leaving full-time employment. The program is limited to 125 participants with superior academic records and a minimum of four to six years of work and/or managerial experience. For further information and application, write to the Assistant Dean, Fully Employed M.B.A. Program, UCLA, A307 Collins Center, Box 951481, Los Angeles, CA 90095-1481.

### Areas of Study

Consult the department.

### Course Requirements

Students in the FEMBA program choose one of two possible formats, with classes meeting either one afternoon per week (from 1:30 to 5 p.m.) and Saturday mornings (from 8:30 a.m. to noon) or all day Saturday (8:30 a.m. to noon and 1:30 to 5 p.m.). A regular M.B.A. degree is awarded on completion of 84 units which are typically completed in three years. These required units are a combination of specified core courses and advanced electives in finance, marketing, or general management.

### Comprehensive Examination Plan

Consult the department.

### Thesis Plan

None.

## Master of Science

### Admission

All applicants are required to take the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE). International applicants who do not hold a degree from an English-speaking university are required to take the Test of English as a Foreign Language (TOEFL). Three letters of recommendation must be submitted with the completed application. Program information and application materials may be obtained from the M.S./Ph.D. Programs Office, UCLA, C524 Entrepreneurs Hall, Box 951481, Los Angeles, CA 90095-1481.

Applications are accepted for Fall Quarter admission only; the deadline for submission of applications and complete documentation is January 10.

### Areas of Study

Decision sciences.

### Course Requirements

A student entering the M.S. program is assumed to have taken calculus through differentiation and integration of several variables, two courses in probability and statistics, two quarters of computer programming, and a managerial core of courses in financial accounting, managerial economics, and managerial finance (Management 403, 405, 408). These courses can be waived on the basis of previous coursework.

The specialization consists of the following five-course methodological core: Management 203A, 210A, 210B, 210C, 216A. The specialization also includes three elective courses that typically are supportive of the thesis, along with four units of Management 598. The elective courses may be methodological in nature or may relate to management science aspects of a functional field such as operations management, information systems, or finance. Courses from other departments may also be selected.

### Comprehensive Examination Plan

None.

### Thesis Plan

The thesis must be finished within one year after all required coursework is completed. A student lacking a strong prerequisite background nominates a thesis committee by the fifth quarter of study and presents a proposal for committee approval at the beginning of the sixth quarter.

## Doctoral Degree

### Admission

Information regarding admission is the same as that listed under the M.S. degree.

### Major Fields or Subdisciplines

Accounting; business economics; decision sciences; finance; human resources and organization behavior; information systems; international business and comparative management studies; marketing; operations and technology management; policy and organization.

### Course Requirements

*Research Preparation Requirement.* The research preparation requirement consists of two parts: (1) a course requirement and (2) a research paper. Students are required to take five research courses which are not part of the major field area classes taught in the Anderson School. These courses must be completed before taking the oral qualifying examination and may not be waived by prior graduate work. The research paper must be submitted to and accepted by the research paper committee no later than the Spring Quarter of the third year of study.

*Breadth Requirement.* The breadth requirement consists of eight courses which are clearly outside the major field area. Students should use these courses to become more knowledgeable about the basic elements of several other management disciplines and functional areas or to define a minor field of research and teaching proficiency. Three of these courses may be waived by prior coursework from a previously earned master's degree. They must be completed before taking the oral qualifying examination.

There is no formal major field course requirement. In consultation with a major field adviser, a course of study is designed which prepares the student to pass the major field examination.

### Written and Oral Qualifying Examinations

Proficiency in the major field area is determined by a written examination, supplemented in some areas by an oral examination. The major field examination must be passed by the end of the Spring Quarter of the third year of study.

Students are required to present the substance of their dissertation proposal in a formal seminar to which all Ph.D. students and faculty are invited.

When all the preliminary requirements have been fulfilled (coursework, research paper, major field examination, seminar), the University Oral Qualifying Examination can be held; if passed, the student is advanced to candidacy. The oral qualifying examination must be passed within four and one-half years of the date of entrance into the program.

## Management

### Lower Division Courses

**1A-1B. Elementary Accounting.** Lecture, three hours. Not open to freshmen. P/NP or letter grading. **1A.** Introduction to accounting theory and practice. Recording, analyzing, and summarizing procedures used in preparing financial statements, asset side of balance sheet, current liabilities, payroll accounting. **1B.** Requirement: course 1A. Partnership and corporation accounting, statement of cash flows, financial statement analysis, cost and managerial accounting.

**88. Lower Division Seminar: Special Topics in Management.** Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in management approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

## Upper Division Courses

**107. Business Communications.** Process and discipline of effective spoken presentations. Examination and application of classical and contemporary thinking on substance, structure, and delivery of messages. Elements of graphic presentation of data and presentation technology. Students design and deliver informative and persuasive presentations on key management issues. Critique of all efforts; certain efforts to be videotaped for review. P/NP or letter grading.

**108. Business Law.** Lecture, three hours. Not open to freshmen. Essentials of contracts, agency, partnerships, corporations, and other select areas of law in a business environment. P/NP or letter grading.

**120A. Intermediate Financial Accounting I.** Prerequisite: course 1B. Intermediate-level course in theory and practice of financial accounting. Underlying concepts of asset valuation and income measurement. Measurement and reporting of current and long-term assets, including cash and marketable securities, inventories, plant assets and depreciation, and intangibles.

**120B. Intermediate Financial Accounting II.** Prerequisite: course 120A. Intermediate-level course in theory and practice of financial accounting. Underlying concepts of liability recognition and expense, including leases, bonds, and pensions. Shareholder's equity, including earnings per share. Accounting for changing prices.

**122. Cost Accounting.** Prerequisites: course 1B, Economics 40, or equivalent. Nature, objectives, and procedures of cost accounting and control; job costing and process costing; accounting for manufacturing overhead; cost budgeting; cost reports; joint-product costing; distribution cost; standard costs; differential cost analysis; profit-volume relationships and break-even analysis.

**123. Auditing.** Lecture, three hours. Requisite: course 120B. Comprehensive study of procedures used in verification of financial statements and related information, including ethical, legal, and other professional issues. Auditing of a complete set of financial statements. P/NP or letter grading.

**124. Advanced Accounting.** Lecture, three hours. Requisite: course 120B. Specialized accounting topics in business combinations, consolidated financial statements, branch accounting, leveraged buyouts, Securities and Exchange Commission, foreign currency transactions, translation of foreign financial statements, partnership ownership changes and liquidations, governmental accounting, and bankruptcy. P/NP or letter grading.

**125. Special Applications in Accounting.** Requisite: course 120B. Recommended: course 122. Designed for seniors. Use of "Strategic Management," a computer program that simulates experience on a senior management team. Under real and sometimes adverse economic conditions, teams must make strategic and tactical decisions, evaluate performance results, and compete for key resources, market share, and business opportunities. Emphasis on theories of return on equity, product life cycles, product line margin analysis, issuing debt versus equity, and other topics that allow students to apply accounting principles learned in previous courses. P/NP or letter grading.

**127A. Tax Principles and Policy.** (Formerly numbered 127.) Requisite: course 1B. Study of fundamental income tax problems encountered by individuals and other entities in analyzing business, investment, employment, and personal decisions. Special emphasis on role of tax rules in capital transactions and decision making. P/NP or letter grading.

**127B. Corporate and Partnership Taxation.** Lecture, three hours. Requisite: course 1B. Recommended: course 127A. Study of tax issues arising in formation, operation, and termination of corporations and partnerships. Special emphasis on closely held enterprises, including S corporations. P/NP or letter grading.

**128. Special Topics in Accounting.** Selected topics in public accounting, including mergers and acquisitions, public-company status and the going-public process, role of the partner, serving an entrepreneurial client, and fund accounting. Discussion of a case study of current interest in the accounting profession. Business plan preparation. P/NP or letter grading.

**130A. Basic Managerial Finance.** Lecture, three hours. Prerequisites: course 120A or 120B, Economics 40 or equivalent. Study of financial decision making by business firms, with emphasis on applications of economic and accounting principles in financial analysis, planning, and control. Extensive use of problems and cases to illustrate varied analytical techniques employed in decision making. P/NP or letter grading.

**130B. Advanced Managerial Finance.** Lecture, three hours. Prerequisite: course 130A. Analysis of capital budgeting and working capital management. Review of long-term financing through security markets and lease contracts. Management of financial risk using options, futures, and forward contracts. Study of merger and acquisition processes and reorganization under bankruptcy laws. P/NP or letter grading.

**133. Investment Principles and Policies.** Lecture, three hours. Prerequisite: course 130A. Principles underlying investment analysis and policy; salient characteristics of governmental and corporate securities; policies of investment companies and investing institutions; relation of investment policy to money markets and business fluctuations; security price-making forces; construction of personal investment programs.

**140. Elements of Production and Operations Research.** Prerequisites: Mathematics 3A, 3B, 3C, 31E, Economics 40, or equivalent. Principles and decision analysis related to effective utilization of factors of production in manufacturing and nonmanufacturing activities. Analytical models and methods for allocation, transportation, inventories, replacement, scheduling, and facilities design.

**150. Elements of Industrial Relations.** Principles and methods of effectively utilizing human resources in organizations. Relationship between social, economic, and other environmental factors and current problems in industrial relations.

**175. Elements of Real Estate and Urban Land Economics.** Examination of business decision making as related to logical forces shaping cities and influencing real estate market functions and land uses. Emphasis on decision making as it relates to appraising, building, financing, managing, marketing, and using urban property.

**182. Leadership Principles and Practice.** Knowledge and skills leading to effectiveness in interpersonal relations. Understanding oneself as a leader and others as individuals and as members of working groups. Understanding of group process, including group leadership. Lectures and "sensitivity training" laboratory.

**190. Management Theory and Policy.** Lecture, three hours. Prerequisite: course 130A. Study of basic concepts and theory of management. Emphasis on operational analysis of manager's role in all types of organizations. Management issues in areas of planning, organizing, staffing, directing, and controlling. P/NP or letter grading.

**197. Special Topics in Management.** Topics of special interest to undergraduate students. Specific subjects may vary each term depending on particular interest of instructors or students. May be repeated for credit.

**199. Special Studies in Management (2 to 8 units).** Discussion: three hours. Requisite: consent of instructor. Designed for juniors/seniors. Undergraduate individual investigation of selected research topic to be arranged with a faculty member. P/NP or letter grading.

## Graduate Courses

Graduate courses are ordinarily open to students admitted in graduate standing. As a condition for enrollment, students must submit to the instructor in charge of the course evidence of satisfactory preparation for the work proposed.

**200. Advanced Microeconomics.** Seminar, three hours. Prerequisite: course 405 or consent of instructor. Economist's approach to organization and competitive interaction. Topics include game theory, threat credibility, incentive contracts, information advantages, and entry deterrence.

**201A. Business Forecasting.** Seminar, three hours. Prerequisites: courses 402, 406. Role of business forecasting in managerial planning. Principles and methods of forecasting. Evaluation of reliability of existing forecasting techniques. Coverage of both short- and long-term forecasting of industry, regional, and national business trends.

**201B. Econometrics and Business Forecasting.** Lecture, three hours. Prerequisite: consent of instructor. Development of standard topics in applied econometric modeling. Emphasis on assumptions underlying classical normal linear regression model, special problems in application, and interpretation of results. Practical applications extensively developed in student projects.

**202A. Regulation.** Lecture, three hours. Prerequisite: course 405 or consent of instructor. Reasons for government intervention in theory and practice. Effect of regulation on business. How regulation and deregulation occur. Areas include public utilities, banking, pollution, and the political process.

**202B. Analytics of Competitive Strategy.** Discussion, three hours. Prerequisites: courses 402 and 405, or consent of instructor. Development and analysis of strategies to maximize value in competitive and cooperative situations. Problems include competitive bidding, tacit collusion, and strategies in repeated settings.

**202C. Empirical Studies in Industrial Organization.** Prerequisite: course 202B. Investigation of factors influencing size of industries, their size distribution, and conditions of entry and exit. Implications of such industry characteristics, derived for decisions having to do with firm output, prices, advertising, and research/development.

**203A. Economics of Decision.** Prerequisites: rudiments of economic theory, calculus, probability, and statistics. Basics of single-person decision theory from a normative viewpoint. Expected utility theory with objective and subjective probability. Departures from expected utility behavior. Introduction to multi-person decision theory.

**203B. Economics of Information.** Discussion, three hours. Prerequisites: rudiments of economic theory of the firm, calculus, probability, and statistics; course 203A or consent of instructor. Optimal decision and information rules. Amount, cost, and value of information. Risk aversion, stochastic dominance, and their impact on economic decisions in a stochastic environment.

**205A. International Business Economics.** Prerequisites: courses 405 and 406, or consent of instructor. International business environment, international economic institutions, national and regional trade policies and developments, trends in foreign markets, and international monetary problems, studied for their influence on organization and operation of the international corporation.

**205B. Comparative Market Structure and Competition.** Prerequisite: course 205A or consent of instructor. Comparative study of public policies toward competition, market structures, and competitive practices in key industries in selected countries.

**205C. Business Forecasting for Foreign Economies.** Prerequisite: course 201A or consent of instructor. Forecasting changes in business activity, population, industrial structure, productivity, Gross Domestic Product and its components for selected countries. S/U or letter grading.

**207. Resource Administration of Nonmarket Activities.** Seminar, three hours. Prerequisite: course 405 or consent of instructor. Examination of behavior of managers in profit vs. not-for-profit sectors to determine critical variables that explain observed differences in behavior. Use of methodology of microeconomics, particularly utility maximization.

**208. Public Services and Private Functions.** Prerequisites: courses 405 and 406, or consent of instructor. Sources and uses of federal, state, and local revenues and their impact on public and private resource allocation. Examination of proper roles of government and private sector in financing and provision of public goods and services.

**209. Selected Topics in Business Economics.** Prerequisite: consent of instructor. Special topics in business economics. Current developments in theory or practice in business economics. May be repeated for credit.

**210A. Mathematical Programming.** Discussion, three hours. Prerequisite: linear algebra. Comprehensive development of theory and computational methods of linear programming, with applications to a variety of areas.

**210B. Applied Stochastic Processes.** Discussion, three hours. Prerequisite: Mathematics M150A or Electrical Engineering 131A. Fundamentals of stochastic processes, including Poisson processes, renewal theory, and Markov chains. Sequential stochastic (usually Markovian) decision processes in discrete and continuous time. Emphasis on problem formulation and characterization and computations of optimal policies, often via dynamic programming; applications to inventory, queueing, maintenance, reliability, and replacement problems.

**210C. Network Flows and Integer Programming.** Prerequisite: linear programming. Theory and techniques of discrete and network-related mathematical programming models in management science. Applications to various allocation, coordination, operating, and planning problems. Emphasis on fundamentals, efficient computational methods, and keys to successful practical applications.

**211A. Nonlinear Mathematical Programming.** Prerequisites: course 210A, Mathematics 32A, or equivalent. Theory, methods, and application of optimization of nonlinear systems. Review of classical optimization methods; optimality and duality theory for convex programs; main computational approaches to convex programming; survey of current computer codes and computational experience.

**211B. Large-Scale Mathematical Programming.** Prerequisite: course 210A or equivalent. Theory and computational methods for optimizing large-scale linear and nonlinear programs. Exploitation of special structures with combinatorial, dynamic, multidivisional, and stochastic aspects to obtain practical solution procedures in spite of large numbers of variables and/or constraints.

**212A. Decision Sciences Models I.** Requisites: course 407, Mathematics 31B. Broad survey of deterministic models of decision sciences, including solution methods and applications management. Solution methods include linear programming, network optimization, integer programming, nonlinear programming, and dynamic programming. Application areas include corporate planning, finance, marketing, production and operations management, distribution, and project management. S/U or letter grading.

**212B. Decision Sciences Models II.** Requisites: course 212A, Mathematics 32A. Broad survey of nonlinear, time-staged, and probabilistic models for managerial decision making. Application areas include finance, marketing, facilities design, production, and energy systems. S/U or letter grading.

**212C. Decision Sciences Models III.** Requisites: courses 212A, 212B. In-depth reviews of actual decision sciences applications. Emphasis on professional skills needed for successful practical applications. S/U or letter grading.

**213A. Intermediate Probability and Statistics.** Prerequisite: course 402 or equivalent. Introduction to probability theory and hypothesis testing as applied to management. SAS programs used in this course and its sequels.

**213B. Statistical Methods in Management.** Prerequisite: course 213A or consent of instructor. Introduction to parameter and interval estimation, simple and multiple linear regression and correlation, fixed, random, and mixed effects analysis of variance models and nonparametric statistics, all as they apply to management studies.

**213C. Introduction to Multivariate Analysis.** Prerequisite: course 213B or consent of instructor. Introduction to use of multivariate models in management research to organize and represent information; interpretation of coefficients from multivariate exploratory models (e.g., principal axes and factor analysis models); survey of multivariate statistical procedures (e.g., multiple discriminant analysis, multivariate analysis of variance, canonical correlation, and confirmatory factor models).

**214B. Behavioral Science Models.** Prerequisite: consent of instructor. Formulation, analysis, and interpretation of mathematical models in behavioral sciences. Emphasis on stochastic process models for aspects of individual and group behavior such as learning, problem solving, classification, communication, bargaining, and social exchange systems.

**215D. Time-Series Analysis.** Prerequisite: course 213B or consent of instructor. Univariate Box/Jenkins analysis, transfer functions, and intervention analysis. Relationship between econometric and time-series models, Granger causality, multiple time-series analysis. Numerous computer applications in modeling and forecasting.

**216A. Simulation of Operational Systems.** Discussion, three hours. Prerequisite: background in FORTRAN, PL/1, PL/C, or other batch computing language available on campus and in basic statistics (course 402 or equivalent) and modeling (course 407 or equivalent). Computer simulation methodology, including design, validation, operating procedures, and analysis of results of simulation experiments. Applications of simulation to management problems.

**217A. Decision Analysis.** Lecture, three hours. Prerequisite: course 402 or equivalent. Framework provided for structuring and analyzing decision making under uncertainty. Topics include decision trees, value of information, subjective probability, attitude toward risk, sensitivity analysis, and multicriteria decision making. Applications to a number of business problems, including new product development, litigation, treasure hunting, and bidding. S/U or letter grading.

**217B. Game Theory.** Prerequisite: course 213A or equivalent. Nature of models for rational behavior in presence of conflicts of interests, zero-sum and non-zero-sum games, two-person and many-person games, state of the art, philosophical and computational limitations, relations with individual and group decision making.

**218A. Selected Topics in Decision Sciences (1 to 4 units).** Newly developing topics and viewpoints. Topics have included reliability and optimal maintenance theory, large-scale distribution/inventory systems, and Markovian decision processes under uncertainty. May be repeated for credit. S/U or letter grading.

**218C. Selected Topics in Business Statistics (1 to 4 units).** Prerequisite: consent of instructor. Special topics in statistical methods. Current developments in statistical theory and practice. Analysis of recent literature. Topics and instructors announced in advance. May be repeated for credit.

**218X-218Y-218Z. Current Issues in Decision Sciences (1 to 4 units each).** Lecture, one hour; discussion, three hours. Current issues and research on a variety of topics in general area of decision sciences. May be repeated for credit. In Progress and S/U grading.

**220A. Intermediate Financial Accounting I.** Prerequisite: course 403 or consent of instructor. Concepts and principles of financial accounting. Intended to enhance students' understanding of published corporate financial statements. Emphasis on assets and revenue recognition.

**220B. Intermediate Financial Accounting II.** Prerequisite: course 220A or consent of instructor. Concepts and principles of financial accounting. Intended to enhance students' understanding of published corporate financial statements. Emphasis on liabilities and owners' equity.

**220C. Advanced Financial Accounting.** Prerequisites: courses 220A and 220B, or consent of instructor. Continuation of courses 220A and 220B, with emphasis on a range of topics, including accounting for partnerships, mergers, combinations, and parent/subsidiary relationships. Review of litigation procedures, including reorganizations, receiverships, and bankruptcy.

**222. Cost Accounting.** Prerequisite: course 403. Nature, objectives, and procedure of cost accounting and control; job costing and process costing; joint product costing, standard costs; theories of cost allocation and absorption; uses of cost accounting data for management decision making.

**223. Auditing.** Prerequisite: course 403. Theory and practice underlying auditors' examination and reporting on financial statements, including professional ethics, internal control, and selection and application of auditing procedures, with emphasis on generally accepted auditing standards.

**226. International Accounting.** Prerequisite: course 403. Comparative analysis of accounting concepts and practices in other countries; study of contrasts between various systems; problems of accounting for international corporations, including transfers of funds and income measurement; accounting influences on economic development.

**227A. Taxation Principles and Policy.** Discussion, three hours. Prerequisite: course 403. Study of fundamental income tax problems encountered in business, investment, employment, and personal decisions. Special emphasis on structuring real estate and securities transactions. Current trends in law and policy.

**227B. Taxation and Business Planning.** Discussion, three hours. Prerequisite: course 403. Study of tax issues arising in formation, operation, and termination of a corporation. Specific emphasis on structuring shareholders' transactions involving dividends, redemptions, liquidations, acquisitions, and capital structure.

**228. Evaluating Financial Statement Information.** Lecture, three hours. Prerequisites: courses 220A or 220B, 230, 402. Issues of accounting information evaluation, with special emphasis on uses of financial statements by decision makers external to the firm (e.g., investors, creditors). Topics include load decisions, bankruptcy prediction, and interpreting earnings.

**229A. Special Topics in Accounting.** Lecture, three hours. Prerequisite: doctoral standing or consent of instructor. Examination in depth of problems or issues of current concern in accounting, such as application of information economics and principal-agent model to accounting.

**229B. Empirical Research in Accounting.** Lecture, three hours. Prerequisites: training in econometrics and doctoral standing, or consent of instructor. Introduction to empirical accounting literature, focusing on role that accounting information plays in formation of capital market prices.

**229X-229Y-229Z. Accounting Workshops (1 unit, 1 unit, 2 units).** Discussion, two hours. Prerequisite: doctoral standing. Designed to develop ability to critically evaluate research in fields relevant to study of accounting. Papers presented in colloquium format by leading scholars in accounting. Active participation and intellectual interchange encouraged through discussion of papers during colloquium. May be repeated for credit. S/U grading.

**230. Theory of Finance.** Lecture, three hours. Prerequisite: course 408. Primary focus on valuation of corporate liabilities and other securities under uncertainty. Capital asset pricing model presented rigorously and compared with more recent theories of asset pricing such as arbitrage pricing theory and option pricing model, using empirical evidence. Secondary focus on analysis of problems in corporate finance such as optimal financing of the corporation and the market for corporate control. S/U or letter grading.

**231A. Profit Sector Financial Policy.** Prerequisite: course 230. Identifying and solving financial problems through use of cases. Application of financial theory and financial techniques to business problems, using written reports and classroom discussion.

**231B. Nonprofit Sector Financial Policy.** Discussion, three hours. Prerequisite: course 408. Identifying and solving financial problems for all types of nonprofit organizations, with attention to funds accounting, budgeting and control, investment decision making when market valuation cannot be used as a criterion, and sources of funds for nonprofit organizations. Use of cases.

**231C. Working Capital Management.** Lecture, three hours. Prerequisite: course 230. More detailed advanced coverage of short-range problems of financial management. Coverage of current assets, current liabilities, and their interrelationships.

**231D. Takeovers, Restructuring, and Corporate Governance.** Lecture, three hours. Prerequisite: course 230. Process by which corporate control transactions take place; role of market for corporate control in leading to economic restructuring and shifts in resource allocation by corporations. Empirical evidence on economic and capital market reactions to control transactions and to defensive measures by management. Focus on interaction of strategic planning, firm value maximization, and investment decisions in life cycle of growth of the firm. S/U or letter grading.

**231E. Managing Finance and Financing the Emerging Enterprise.** Prerequisites: courses 230, 403, 408, second-year standing. Emphasis on financial, control, and investment issues confronting rapidly growing companies in entrepreneurial settings. Consideration and selection of financing vehicles which may be appropriate to securing organizations' money requirements.

**232A. Security Analysis and Investment Management.** Lecture, three hours. Prerequisite: course 230. Topics include security valuation, application of portfolio theory to investment decisions, performance evaluation, and basics of fixed income portfolio management strategies. S/U or letter grading.

**232B. Fixed-Income Markets.** Lecture, three hours. Prerequisites: courses 230, 233A, demonstrable training in statistics. Introduction to fixed-income markets: institutional arrangements in primary and secondary markets; description and analysis of various types of fixed-income instruments; valuation; fixed-income portfolio management; use of derivative instruments and dynamic investment strategies; asset securitization. S/U or letter grading.

**232D. Option Markets.** Prerequisite: course 230. Organization and role of organized derivative markets, including listed and OTC options and futures: arbitrage and hedging relationships, valuation of derivative trading strategies, and innovations in derivative markets. Students learn fundamentals of hedging and spreading by playing an option trading game and writing a term paper analyzing their strategies. S/U or letter grading.

**233A. Money and Capital Markets.** Prerequisite: course 230. Application of interest theory and flow funds analysis to price determination process in markets for bonds, mortgages, stocks, and other financial instruments. Study of funds flow from credit markets. Analysis of costs of capital in individual industries.

**233B. Financial Institutions.** Lecture, three hours. Prerequisite: course 230. Theory and practice of financial institutions and stock exchanges. Main topics include deposit insurance and regulation, international banking, market microstructure, and investment banking. S/U or letter grading.

**233C. Speculative Markets.** Prerequisite: course 230. Study of theory and evidence of capital market efficiency, including stock market, bond market, commodity futures markets, options market, money markets, and foreign exchange markets.

**234A. International Financial Markets.** Lecture, three hours. Prerequisites: courses 205A, 230. Conceptual understanding of foreign exchange market, Eurocurrency market, international bond market, and equity markets in various countries. Emphasis on underlying economic principles, although where relevant, institutional features helpful in understanding structure and operations of the markets to be dealt with in detail. S/U or letter grading.

**234B. Financial Management of Multinational Corporations.** Lecture, three hours. Prerequisite: course 230. Financial management of multinational firms from perspective of a financial vice president or other financial officer within the company. Topics include measuring foreign exchange risk, managing that risk with both contractual and operating strategies, foreign investment decisions, capital budgeting and cost of capital in an international perspective, political risk, working capital management, and performance evaluation and control.

**235A. Problems in Insurance Management.** Discussion, three hours. Prerequisite: consent of instructor. Advanced consideration of problems of insurance management. Actuarial, underwriting, investment, marketing, and regulatory problems related to insurance activities.

**238. Special Topics in Finance.** Prerequisites: course 230, consent of instructor. Selected topics in finance theory, empirical studies, and financial policy. May be repeated for credit with instructor change. S/U or letter grading.

**239A. Theory of Exchanges under Uncertainty.** Prerequisites: course 230, consent of instructor. Foundations of theory of exchange developed as introduction to theoretical literature on pricing of capital assets. Primarily intended for Ph.D. students, but well-prepared master's students may find course useful in their career preparation.

**239B. Theory of Investment under Uncertainty.** Prerequisites: courses 230 and 239A, or consent of instructor. Foundations of theory of firm capitalization and investment decisions, with special attention to questions of exchange and allocative efficiency. Primarily intended for Ph.D. students, but well-prepared master's students may find course useful in their career preparation.

**239C. Empirical Research in Finance.** Discussion, three hours. Prerequisites: course 230, training in econometrics, consent of instructor. In-depth study of empirical research in the field of finance, statistical methodologies applied to test market efficiency, and asset pricing theory. Primarily intended for Ph.D. students, but well-prepared master's students may find course useful in their career preparation. S/U or letter grading.

**239D. Ph.D. Seminar: Corporate Finance.** Prerequisites: course 230, courses in 239 series. Intended for Ph.D. students. Advanced topics in corporate finance theory and empirical research. May be repeated for credit with instructor change. S/U or letter grading.

**239X-239Y-239Z. Finance Workshops (1 unit, 1 unit, 2 units).** Discussion, 90 minutes. Prerequisite: doctoral standing. Designed to develop ability to critically evaluate finance research. Papers presented in colloquium format by leading scholars in finance. Active participation and intellectual interchange encouraged through discussion of papers in sessions prior to workshop, as well as during colloquium. May be repeated for credit. S/U grading.

**240A. The Operating Manager.** Definition and analysis of problems of production planning, inventory management, quality control, system design, and implementation from operating manager's perspective, primarily through case studies. Course is integrative in nature, rather than one of developing new methodologies and techniques.

**240B. Operations Planning, Scheduling, and Control.** Prerequisite: course 407 or consent of instructor. Forecasting, inventory planning, aggregate planning, job-shop scheduling models, and automated manufacturing systems, with emphasis on managerial relevance and usefulness of models in solving or providing insights into real-world problems.

**240C. Design of Operational Systems.** Prerequisite: course 407. Issues, concepts, objectives, and criteria in determination of capabilities, characteristics, and configurations of manufacturing and service systems. Examination of analytic and synthesizing methodologies for selection of capacity, location, technology, processes, material movement and storage systems, facilities, work group structures, and jobs.

**240D. Operations Strategy and Policy.** Discussion, three hours. Definition and scope of operations strategy and its relation to corporate strategy, importance of productivity and its amplification in global competition, positioning the system to match market requirements, capacity decisions, product and process technology, work force and job design, strategic implications of operating decisions, suppliers and vertical integration. Case analyses involving strategic issues in manufacturing and nonmanufacturing situations.

**240E. Managing Entrepreneurial Operations.** Lecture, three hours. Prerequisite: second-year standing or consent of instructor. Exploration of operating issues involved in managing entrepreneurial enterprises. Integrative course, building on methodologies, principles, and concepts provided in prerequisite functional and strategic core courses. Use of extensive readings and case studies to develop skills and philosophical basis for applying managerial concepts to entrepreneurial operations.

**240F. Supply Chain Management.** Lecture, three hours. Requisite: course 410. Business environment today is characterized by globalized operations, intense competition, rapid turnover in technology, and short product life cycles. Consequently, firms can no longer afford to operate in isolation. In many industries competition has moved from the firm level to the supply chain level. Provides understanding of strategic, tactical, and operational issues in supply chain management. S/U or letter grading.

**241A. Managing Technology for Competitive Advantage.** Advanced technologies such as robotics, computer-integrated manufacturing, computer-aided design and manufacturing (CAD/CAM), and flexible manufacturing systems. Effects of technological innovation on operations managers at both strategic and operational levels. Course is integrative in nature.

**241B. Project Management.** Prerequisite: course 407 or equivalent. Management of development projects. Decision-making environment, economic analysis, network analysis, scheduling, and control of development projects. Sequential and aggregate development decisions.

**242A. Models for Operations Planning, Scheduling, and Control.** Prerequisite: doctoral standing or consent of instructor. Survey of research studies and recent literature in operations planning, scheduling, and control. Emphasis throughout on formal models and their applications. Aggregate planning, work force scheduling, inventory management, and detailed operations scheduling and control.

**242B. Models for Operations Systems Design.** Prerequisite: doctoral standing. Survey of research literature on models for design of manufacturing and service systems, including long-range forecasting, operational economics, capacity, location, facilities, processes/technology, work, and work structures.

**243A. Planning for Facilities Systems.** Prerequisite: course 212A or equivalent. Planning of location, expansion, and replacement for interdependent systems of facilities. Examination of spatial and dynamic economic considerations. Applications in selected industries and public systems.

**243B. Inventory Theory.** Prerequisite: course 210B or consent of instructor. General discussion of inventory models, with emphasis on characterizing the form of optimal policies and efficient computational methods. Consideration of deterministic, stochastic, discrete-time, and continuous-time models.

**243C. Scheduling Models for Intermittent Systems.** Prerequisite: course 407. Scheduling models and results for single machine, flow shop, job shop, and resource-constrained project networks. Approaches include classical models, recent heuristic approaches, current research in coordinated interaction of computer models, and man/machine interaction.

**243X-243Y-243Z. Operations and Technology Management Seminars (1 unit, 1 unit, 2 units).** Discussion, 90 minutes to three hours. Prerequisite: doctoral standing. Required of all students in operations and technology management concentration during first two years of their Ph.D. work. Student and faculty presentations of ongoing research. May be repeated for credit.

**244X-244Y-244Z. Research in Operations and Technology Management (1 unit, 1 unit, 2 units).** Prerequisite: doctoral standing. Normally taken in first and second years of doctoral study. Survey of research literature in operations and technology management. Seminar reports dealing with special topics. May be repeated for credit with topic change.

**245. Special Topics in Operations and Technology Management.** Lecture, three hours. Studies of advanced subjects of current interest in operational management. Emphasis on recent developments and application of specialized knowledge to operational problems. Topics vary each term. May be repeated for credit with topic change.

**246A. Strategy/Policy Analysis and Formulation in Public and Private Nonprofit Sectors.** Prerequisite: completion of management analysis requirement for M.B.A. program. Application of several techniques for strategy/policy analysis and formulation. Specific topics include forecasting/scenario writing, multiple objective decision making, cost analysis, risk/benefit analysis, and social experimentation. Limitations of methodologies examined and concepts illustrated through current applications and case studies.

**246B. Budgeting and Resource Allocations in Public Sector.** Prerequisites: courses 403 and 408, or consent of instructor. Resource allocation objectives/techniques used in federal, state, and local government. Budget analyzed as a planning device, vehicle for allocational decision making, financial control mechanism, crucial for political choice. Provides some insight into staff functions performed by those responsible for resource allocation.

**246C. Management in Public and Private Nonprofit Sectors.** Prerequisite: graduate standing. Examination of roles and management systems of the three sectors of U.S. society; unique aspects and managerial issues of public and private nonprofit organizations and of their political, social, and technical environments. Financial, marketing, and operational considerations and evaluation, control, and ethical issues of service delivery systems.

**247A. Environment of the Art World.** Prerequisite: consent of instructor. Consideration and analysis of political, social, economic, and environmental forces in American society as they affect existence and development of arts institutions in the U.S. Exploration of present policies and trends and potential future developments.

**247B. Role of Management in Artistic Decision Making.** Prerequisite: consent of instructor. Descriptive study of criteria for decision making in artistic institutions, including role of the institution in society, economic environment of the arts, and artistic value systems of arts organizations.

**247C. Legal Environment of Arts Management.** Prerequisite: consent of instructor. Exploration of way in which law and the arts relate, role of the lawyer vis-à-vis artist and arts manager, policy underpinnings of the law and effect on the arts, and unsolved problems and issues in areas of interaction.

**248A. Strategic Management in the Entertainment Industry.** Discussion, three hours. Prerequisites: courses 403, 405, 406, 408, and 420, or consent of instructor. Examination of financial and strategic aspects of transactions and company management in the entertainment industry. Cases and topics include organizational behavior and decision making in creative companies; trends in industry structure and competitive economics; accounting issues; institutional and private investment in motion pictures; theatrical distribution, international and ancillary markets (pay TV, videocassettes, syndication).

**249A. Special Topics in Public and Private Nonprofit Management.** Prerequisite: consent of instructor. Studies of advanced subjects of current interest in public/not-for-profit management. Emphasis on recent developments and application of specialized knowledge to public/not-for-profit problems. Topics vary each term. May be repeated for credit with topic change.

**249B. Special Topics in Arts Management.** Prerequisite: consent of instructor. Examination of current issues in management of artistic organizations. Relevant combinations of lectures, discussions, case studies, and team research projects.

**M250A. Labor Relations: Process and Law.** (Formerly numbered 250A.) (Same as Policy Studies M232.) Lecture, three hours. Designed for graduate students. Consideration, at advanced level, of collective bargaining process, labor/management agreement, administration of the contract, law of labor/management relations, union structure and goals, and influence of external labor markets on labor relations. S/U or letter grading.

**250B. Human Resource Management: Process and Law.** Requisite: course M250A. Systematic exposure to theoretical and empirical literature concerning administrative and legal aspects of human resource management. Topics include processes of managing human resources and impact of governmental policies on employer/employee relations.

**250C. Behavioral Foundations of Human Resource Management.** Prerequisite: course 250B or consent of instructor. Topics include development and training; human resource accounting; behavioral foundations of participating management; motivation, productivity, and satisfaction; designing reward systems; and evaluation of organization effectiveness. Emphasis on understanding, predicting, and influencing human behavior in organizations.

**251. Managing Human Resources.** Management of people in organizations, intended for managers as well as personnel specialists. Organized at three related but distinct levels of analysis: (1) day-to-day utilization of people as organizational resources to achieve optimal productivity, satisfaction, retention, and development; (2) personnel management function or system that performs specialized human resource functions; and (3) issues facing top management which involve management of human resources, including strategic planning for human resources, union/management relations, and design of corporate culture.

**252. Systems of Employee/Management Participation.** Prerequisite: consent of instructor. Designed to provide understanding of systems of employee/management participation around the world (apart from traditional collective bargaining systems). Specific concepts such as worker participation in decision making, industrial democracy, joint consultation, workers' councils, profit sharing.

**253. Employee Discipline, Discharge, and Grievance/Appeal Settlement.** Prerequisite: graduate standing. Analysis of conflict in the employment relationship; theoretical and empirical findings. Principles and philosophies that underlie resolution of labor/management impasses, with emphasis on grievance procedures, arbitration, mediation, and fact-finding.

**M255. Comparative Industrial Relations.** (Formerly numbered 255.) (Same as Policy Studies M231.) Lecture, three hours. Requisite: course 409 or elementary knowledge of labor economics. At national and international levels, historical and contemporary analytical comparison of industrial relations systems within their political, social, and economic environments. Institutions, philosophies, and ideologies of labor, management, and government, and interaction of their power relationships; substance and manner of determination of "web of rules" governing rights and obligations of the parties; and resolution of conflicts. S/U or letter grading.

**256. Seminar: Human Resource Management and Industrial Relations.** Discussion, three hours. Requisites: courses M250A, 250B, 250C. Capstone seminar for students interested in human resource management and industrial relations. Visiting lecturers emphasize recent developments in the field; students prepare seminar papers.

**257. Human Resource Management in Creative and Nonprofit Sectors.** Prerequisite: graduate standing. Analysis of human resource management theory and practices in industries where primary product is creative or intellectual (e.g., arts, entertainment, education, high technology, and journalism). Consideration of incorporation of work design, employee influences, systems, and business strategies in human resource management. Interpersonal and group process for managing human behavior. S/U or letter grading.

**258. Selected Topics in Industrial Relations (1 to 4 units).** Prerequisite: doctoral standing or consent of instructor. Examination in depth of problems or issues of current concern in industrial relations. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

**259A. Individuals and Groups in Human Systems.** Lecture, three hours. Prerequisite: graduate standing. Doctoral-level survey of research literature dealing with interpersonal dynamics, groups, and aspects of culture in work organizations, with emphasis on theory and research. Current research in psychology, anthropology, and small group studies. Variety of methods represented, including clinical and cross-cultural approaches. S/U or letter grading.

**259B. Advanced Studies in Human Resource Management.** Lecture, three hours. Prerequisite: graduate standing. Doctoral-level survey of research literature assessing how organizations utilize human resources to enhance individual, group, and organizational effectiveness. Current theory and research in psychology, anthropology, organization behavior, and economics, including topics such as careers, participation, negotiations, and technology/work systems. S/U or letter grading.

**M259C. Labor Markets and Public Policy.** (Formerly numbered 259C.) (Same as Policy Studies M230.) Lecture, three hours. Graduate-level survey of research literature on environmental institutions that impinge on work organizations — chiefly labor markets, labor unions, and public policy. Current research in economics, industrial relations, political science, and sociology, with emphasis on international and comparative dimensions of topics covered. S/U or letter grading.

**260A. Advanced Marketing Management.** Prerequisite: course 411 or consent of instructor. Decision-oriented course concerned with solution of product, price, promotion, and distribution channel problems. Extensive use of case studies.

**260B. Marketing Strategy and Planning.** Lecture, three hours. Prerequisite: course 411 or consent of instructor. Development of a framework for strategic marketing planning based on customer behavior, market segmentation, product positioning, product life cycle, market responsiveness, and competitive reaction. Within this framework, development of key elements in annual marketing process.

**261A. Management in the Distribution Channel.** Lecture, three hours. Prerequisite: course 411 or consent of instructor. Examination of decisions in the distribution channel. Issues of power in the distribution channel and trade-offs between alternative channel systems.

**261B. Global Marketing Management.** Lecture, three hours. Prerequisite: course 411 or consent of instructor. Analysis of opportunities, distinctive characteristics, and emerging trends in foreign markets, including exploration of alternative methods and strategies for entering foreign markets; organizational planning and control; impact of social, cultural, economic, and political differences; and problems of adapting American marketing concepts and methods.

**262. Price Policies.** Lecture, three hours. Prerequisites: courses 405, 411. Consideration of environment of pricing decision — costs, customer, channels, competition, and regulation. Analysis of when and how to apply specific pricing strategies, including two-part tariffs, quantity discounts, product differentiation, bundling, and auctions.

**263A. Consumer Behavior.** Prerequisite: course 411 or consent of instructor. Study of nature and determinants of consumer behavior. Emphasis on influence of sociopsychological factors such as personality, small groups, demographic variables, social class, and culture on formation of consumers' attitudes, consumption, and purchasing behavior.

**264A. Marketing Research: Design and Evaluation.** Lecture, three hours. Prerequisite: course 411 or consent of instructor. Intended for prospective users of research results rather than for specialists in research. Marketing research is an aid to management decision making. Development of problem-analysis skills, providing knowledge of concepts and methods of marketing research, with increased sensitivity to limitations of marketing data.

**264B. Advanced Marketing Research.** Discussion, three hours. Prerequisite: course 264A or consent of instructor. Advanced topics in marketing research, with emphasis on quantitative tools to aid marketing decision making. Topics include demand and market share forecasting, conjoint analysis, market segmentation and cluster analysis, brand positioning and competitive market structures, and assessing market response to price, advertising, promotion, distribution, and sales force.

**265A. Marketing and the Law.** Lecture, three hours. Prerequisite: course 411 or consent of instructor. Detailed study of legislative enactments (federal, state, or local) which influence operation of institutions engaged in marketing activities, together with analysis of judicial decisions which have interpreted these laws.

**265B. Social Issues in Marketing.** Lecture, three hours. Prerequisite: course 411 or consent of instructor. Environmental impact of marketing in society; study of theories, methods, and relationships for evaluating transaction behavior in a scientific and humanistic context; macroanalytic perspectives in marketing.

**266A. Product Management.** Lecture, three hours. Prerequisite: course 411. Investigation of process of developing new products and management of mature brands in existing markets. Regarding new product development, focus on concept screening, designing new products, and test marketing. Tactical management of marketing mix with currently available data emphasized in managing mature brands.

**266B. Advertising and Marketing Communications.** Lecture, three hours. Prerequisite: course 411. Detailed review of use of communication tools in marketing. Critical review of advertising and promotional policies from developmental and executional perspectives. Discussion of other forms of marketing communications, with goal of helping students develop integrated communication strategies.

**268. Selected Topics in Marketing.** Lecture, three hours. Prerequisite: course 411 or consent of instructor. Study of selected areas of marketing knowledge and thought. Specific subjects vary each term depending on particular interests of instructor and students. Individual projects and reports. May be repeated for credit.

**269A. Theory in Marketing.** Prerequisite: consent of instructor. Serves as mechanism to introduce students to development of marketing thought. Issues pertaining to general topic of theory development and testing. Prepares students for conducting theoretically grounded research in marketing.

**269B. Research in Marketing Management.** Discussion, three hours. Prerequisite: consent of instructor. Intended for Ph.D. students. Study of research issues associated with marketing management decisions. Recent research in areas of strategic marketing, market segmentation, new product development and introduction, pricing strategies, channel policy, promotion decisions, and sales force management examined critically. Review of both quantitative and behavioral approaches to studying these issues.

**269C. Quantitative Research in Marketing.** Prerequisite: consent of instructor. Intended for Ph.D. students in management and related fields. Students are assumed to have good background in marketing principles and to be familiar with probability, statistics, mathematical programming, and econometrics. Review of a range of quantitative models as applied in marketing research.

**269D. Behavioral Research in Marketing.** Intended for Ph.D. students who will be conducting research in consumer behavior or related areas. Empirical research in consumer behavior surveyed and critically evaluated from theoretical as well as practical perspectives.

**269E. Special Research Topics in Marketing.** Prerequisite: doctoral standing. Advanced selected topics in marketing, with emphasis on thorough examination of one or two topics in current research and theory. May be repeated for credit.

**269X-269Y-269Z. Workshops: Marketing (1 unit, 1 unit, 2 units).** Prerequisite: doctoral standing. Required of all students during first two years of their Ph.D. work. Series consists of a number of leading scholars in marketing and related disciplines who make presentations to marketing faculty and Ph.D. students. Active participation and intellectual interchange, which helps students gain a richer perspective on the field of marketing. In Progress grading.

**270A. Information Systems Applications.** Lecture, three hours. Requisite: course 404. Fundamental concepts and uses of information systems in organizations. Systems for intraorganizational and interorganizational transaction, coordination, and control. Information technology for reengineering of business processes. Analysis and evaluation of systems and their impacts. S/U or letter grading.

**270B. Decision Support Systems.** Lecture, three hours. Requisite: course 404. Systems for support of individual and group decision making and collaborative work. Expert and other knowledge-based systems and their applications. Fundamentals of human/computer interaction. S/U or letter grading.

**270C. Application Frontiers in Information Systems.** Lecture, three hours. Requisite: course 404. Exploration of new state-of-the-art applications in information systems, such as in electronic commerce. Assessment of industrial opportunities and impacts. Topics vary from term to term. May be repeated for credit. S/U or letter grading.

**271A. Information Systems Technology.** Lecture, three hours. Requisite: course 404. Computing and communication platform specification, configuration, sizing, and selection for business applications — from hand-helds to workstations to mainframes. Open and proprietary architectures. Client/server. Comparative performance and cost analyses. Industry trends. S/U or letter grading.

**271B. Networks for Information Systems.** Lecture, three hours. Requisite: course 404. Telecommunications technology. Design, implementation, and management of local and wide area networks for the firm. Security; protocols and standards; commercial value-added and public-access networks; Internet. Industry trends. S/U or letter grading.

**271C. Emergent Technologies in Information Systems.** Discussion, three hours. Requisite: course 404. Special topics in new and emergent technologies such as multimedia, digital imaging, object-oriented software, heterogeneous databases, and parallel processing. Assessment of industrial opportunities and impacts. Topics vary from term to term. May be repeated for credit. S/U or letter grading.

**272A. Information Systems Development.** Discussion, three hours. Methods and tools for information systems design, development, implementation, and maintenance. User requirements analysis. Design and specification of application software and databases. Classic and alternative approaches, such as rapid prototyping. System integration. Automated support. S/U or letter grading.

**273A. Information Systems Management.** Discussion, three hours. Requisite: course 404. Managing information systems function within the enterprise. Role of chief information officer. Centralized and decentralized organizational designs. Outsourcing and other vendor relationships. Costing and pricing of services. Strategic planning. Management of information systems professionals. S/U or letter grading.

**274A. Special Topics in Information Systems.** Discussion, three hours. Intended primarily for doctoral students. Examination in depth of problems or issues of current concern in information systems theory and practice. Topics vary from term to term. May be repeated for credit. S/U or letter grading.

**274B. Workshop: Information Systems Research.** Discussion, three hours. Designed for doctoral students. New developments in information systems theory, practice, and empirical research. In-depth consideration of research designs and methods. Presentation of student work-in-progress. May be repeated for credit. S/U or letter grading.

**274X-274Y-274Z. Current Research in Information Systems (1 unit, 1 unit, 2 units).** Discussion, two hours. Designed for doctoral students. Year-long sequence associated with Information Systems Colloquium Series. Regularly scheduled presentations of current research and state-of-the-art developments in information systems field. Study and discussion of research presented. May be repeated for credit. S/U grading.

**278A. Urban Real Estate Financing and Investing.** Discussion, three hours. Prerequisite: consent of instructor. Investor-oriented course in which real estate and business trends are evaluated to determine alternative real estate investment opportunities. Use of current financial, economic, and investment theories and techniques to real estate investment opportunities in case studies and short case problems to illustrate development of investment strategies.

**278B. Sources, Uses, and Flows of Real Estate Capital.** Discussion, three hours. Analysis of money, capital, and mortgage markets to determine potential availability and costs of mortgage money from alternative sources. Evaluation of various sources of funds to determine factors influencing decisions to make mortgage loans. Examination of all types of lending instruments, particularly mortgage instruments, and mortgage-based securities for their impacts on real estate investment decisions.

**279A. Special Studies in Urban Land Economics.** Limited to master's or Ph.D. candidates working on thesis- or dissertation-related research. May be repeated for credit.

**279B. Selected Topics in Urban Land Economics.** Discussion, laboratory, and fieldwork. Prerequisite: second-year graduate standing or consent of instructor. Designed for students who wish to pursue a particular topic in housing, real estate, or urban land economics in depth on individual or cooperative basis. All work is computer-based; however, students are provided introduction to use of computers (preferably PCs) in various kinds of real estate analysis. May be repeated for credit.

**280A. Studies, Research Philosophies, and Methodology in Human Systems.** Discussion, three hours. Prerequisite: doctoral standing or consent of instructor. Survey of seminal studies of human systems, including individual, group, and intergroup behavior, and organization behavior. Consideration of objectivist and subjectivist philosophies of science and their implications for related methodologies, including experimentation, field studies, case approaches, and a range of analytic and descriptive procedures in data collection. Emphasis on existing literature, philosophy of science, and concepts. May be repeated for credit. S/U or letter grading.

**280B. Personal and Professional Development.** (Formerly numbered 280C.) Discussion, three hours. Prerequisite: doctoral standing or consent of instructor. Provides setting where students may explore their own professional values and approaches in process of testing and learning values and standards in applied behavioral sciences and human systems development. S/U or letter grading.

**280C. Research Design in Human Systems Studies.** (Formerly numbered 280D.) Discussion, three hours. Prerequisite: doctoral standing or consent of instructor. Process of designing studies of human systems, including choice of research topics. Actively involves students in preparation of research proposals for research papers and doctoral dissertations. May be repeated for credit. S/U or letter grading.

**281A. Sociotechnical Systems.** Prerequisite: graduate standing. Introduction to systems concepts and view of work organizations as interacting social and technical systems open to forces from the surrounding environment. Focus on developing sociotechnical systems analytic approach and understanding advantages of this approach for designing and managing organizations.

**281B. People in Organizations.** Prerequisite: graduate standing. Introduction to different philosophical perspectives for understanding human behavior. Theories and concepts important for understanding human behavior in organizations, as well as managerial implications of individual, group, and social behavior. Special attention to knowledge about satisfaction, motivation, and productivity in organizations.

**282. Task Group Processes.** Lecture, three hours. Prerequisite: course 281A or 281B or consent of instructor. Structures, processes, and interrelations of work groups in sociotechnical systems. Emphasis on understanding how group activities interrelate with physical/technical environment. Imparts practical knowledge of task group functioning through class exercises and field observations. Consideration of team concepts and project group design. S/U or letter grading.

**284A. Organization Design.** Lecture, three hours. Prerequisite: course 281A or 281B or consent of instructor. Survey of organizational design theories and methods, including bureaucratic, participative, and cognitive models. Development of specific methods ranging from microdesign of jobs to macrodesign of total organizational systems. Special emphasis on socio-technical and differentiation/integration models. S/U or letter grading.

**284B. Organization Development.** Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Analysis of effects of organizational and managerial practices on individual self-fulfillment and systems effectiveness. Theories of organization change and action/research methods in organization development. Theory merged with practice through seminar discussions of field observations. S/U or letter grading.

**285A. Leadership, Motivation, and Power.** Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Theoretical and practical approaches to influencing and motivating people. Relative effectiveness of various leadership styles, different motivation theories, and power tactics from managerial point of view. Use of experience-based learning methods to aid diagnosis and understanding of one's own influence styles. S/U or letter grading.

**285B. Managerial Interpersonal Communication.** Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Interpersonal and personality factors affecting managerial communications. Styles and modes of communication in one-to-one, group, and large-systems settings. Opportunities offered to deepen understanding of one's own communication styles and skills, considering verbal, nonverbal perceptual, and cross-cultural aspects. S/U or letter grading.

**287. Groups and Their Facilitation.** Discussion, three hours. Prerequisite: consent of instructor. Development of cognitive and experiential understanding of dynamics of small group training and its facilitation, including "sensitivity"/basic groups, group counseling, self-help groups, small groups, and committees in managerial decision making. Analysis of relevant theory, research findings, and case studies. S/U or letter grading.

**288A. Selected Topics in Behavioral Science.** (Formerly numbered 288B.) Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Theories of human behavior fundamental to study of individual, group, organizational, and cultural behavior. Exploration in depth of selected theoretic positions, extending and consolidating behavioral science knowledge and application. May be repeated for credit. S/U or letter grading.

**288B. Current Issues in Sociotechnical Systems and Organization Design.** (Formerly numbered 288C.) Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Current topics in analysis and design of organizations as sociotechnical systems engaged with various technologies and environments, emphasizing design approaches emanating primarily from Europe, the Orient, and the U.S. In-depth comparisons of selected job and organizational design cases. May be repeated for credit. S/U or letter grading.

**288C. Selected Topics in Human Systems Studies and Organizational Behavior.** (Formerly numbered 288F.) Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Psychological and social psychological aspects of human behavior and performance in organizations. Theoretical models, empirical findings, and applications of such topics as attitudes and values, cognitive and perceptual processes, behavioral conflict, and individual change processes. May be repeated for credit. S/U or letter grading.

**288D. Current Issues in Human Systems Change and Development through Consulting.** Discussion, three hours. Prerequisite: consent of instructor. Current topics in philosophy, art, and technology of improving organizations and increasing managerial effectiveness through consulting interventions. In-depth treatment of consultant entry and exit, diagnosing, process consultation, consciousness raising, team building, and values. Relevant to development of effective M.B.A. field-study teams. S/U or letter grading.

**288E. Behavioral and Organizational Sciences Colloquium (Proseminar).** (Formerly numbered 288X-288Y-288Z.) Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Series of presentations by scholars and practitioners in behavioral and organizational sciences, with focus on integrative themes or major issues in the field, designed to provide dialogue among students and faculty on significant topics, controversies, and leading-edge ideas. May be offered in one or successive terms and may be repeated for credit. S/U or letter grading.

**290. Organization Theory.** Prerequisite: course 423 or consent of instructor. Analysis of theory and practice of managerial function of organizing through study of the literature, case analyses, and seminar discussion. Individual projects and reports.

**291. Planning and Control.** Prerequisite: course 423 or consent of instructor. Analysis of theory and practice of managerial function of planning and control. Implementation of objectives through policy formulation, decision making, and control. Individual projects and reports.

**292A. Research and Development Policy.** Examination of research and development as a process and as an element of a goal-oriented organization. Factors affecting invention and innovation; transfer of technology; organizational and behavioral considerations; coupling of science, technology, and organizational goals; assessing of forecasting technological futures.

**292B. Models of Organization Behavior.** Prerequisite: consent of instructor. Theoretical frameworks for developing explanatory and predictive models of complex organizations. Exercises in constructing formal models, usually in mathematical or stochastic form and, where appropriate, using materials from field studies to develop empirical tests. These models may be used to discover implications for systems changes recommended in sociotechnical field study.

**292C. Comprehensive Planning in Public Sector.** Prerequisite: consent of instructor. Evolving modes of planning under complexity, with particular emphasis on public sector. Development of policy through standard setting, bargaining, and regulating governing relationships; reality and value judgments; social and technical dimensions of alternatives; and social and technological forecasting.

**293A. Political Environment of American Business.** Lecture, three hours. Prerequisite: consent of instructor. Evaluation of certain criticisms made by business of the American political system. Designed to provide clearer understanding of principal features of American politics, especially as they influence business enterprise.

**M293B. Morality of Capitalism.** (Same as Political Science M211.) Lecture, three hours. Prerequisite: consent of instructor. Examination of major philosophical writings that defend or criticize capitalism on basis of principles of right conduct and just social arrangements (i.e., on moral grounds).

**293C. Ethical Considerations in Business.** Lecture, three hours. Prerequisite: consent of instructor. Examination of a range of ethical considerations in business decisions involving the individual, corporation, society, and international business. Analysis of cases for classroom presentation and discussion.

**294A. Strategy Formulation and Implementation.** Prerequisite: consent of instructor. Case course dealing with strategy decisions and their implementation, executive action, and administrative behavior involved in managing total enterprises. Students are confronted with complex company situations to develop ideas essential to overall managerial direction.

**294B. Environmental Impacts on Management.** Prerequisite: consent of instructor. Examination of ways in which business, government, labor, and consumer organizational managers might respond to external environmental problems. Methods studied for developing and evaluating alternative managerial solutions which permit organizations to assist in improving current and future environmental quality.

**295A. Entrepreneurship and Venture Initiation.** Prerequisite: consent of instructor. Exploration in entrepreneurship particularly concerned with formation and operation of new business ventures. Significant and crucial aspects of exploring new business opportunities and starting a business.

**295B. Small Business Management.** Prerequisite: consent of instructor. Exploration of crucial aspects in managing small business enterprises. Emphasis on identification and analysis of characteristic operating problems of small firms and application of appropriate methods or techniques for their solution.

**295C. Corporate Entrepreneurship.** Prerequisite: consent of instructor. Inquiry into nature of entrepreneurship and effective implementation of entrepreneurial strategies in large industrial enterprises. Emphasis primarily on managerial effects aimed at identification, development, and exploitation of technical and organizational innovations, management of new product or process developments, and effective new venture management in a corporate context.

**296A. International Business Management.** Discussion, three hours. Identification, analysis, and resolution of managerial issues of policy and action within context of a multinational corporation, with emphasis on problems of adaptation to different sociological, cultural, legal, political, and economic environmental characteristics on planning, structuring of organizational relationships, and coordination and control in multinational firms. S/U or letter grading.

**296B. International Comparative Management Research.** Prerequisite: doctoral standing or consent of instructor. In-depth study of theory and research pertaining to international business and comparative management. Emphasis on recent research developments and methodological issues. Imparts knowledge on design and conduct of international comparative management research.

**297A. Comparative and International Management.** Comparative study of practice of management in selected foreign countries, as affected by their social environments and development of management theory. S/U or letter grading.

**297B. International Business Policy.** Prerequisites: course 205A, consent of instructor. Analysis of key managerial problems encountered in a multinational corporation. Concepts and theories acquired in other courses in international business and comparative management, applied to a series of complex cases and simulations of international business operation.

**297C. International Business Law.** Prerequisites: courses 205A, 296A. Legal environments in which international business operates; overseas business relationships and organizations; antitrust, taxation, transfer of capital, and technology regulations; patent, trademark, and copyright safeguards; arbitration of international business disputes; expropriation of foreign investments; international business and government relations.

**297D. International Business Negotiations.** Prerequisite: course 296A. Exploration of international business negotiations of multinational enterprises with governmental agencies and foreign-based firms on a wide range of issues, such as establishment/dissolution of joint ventures, extent of foreign ownership/management control, terms/conditions for technology transfer, investment incentives.

**297E. Business and Economics in Emerging Markets.** Lecture, three hours. Requisite: course 205A or 405. Analysis of changing economic, political, demographic, and sociocultural conditions in developing countries as they affect the business environment. Process of economic growth, market-oriented reforms, and creation of domestic capital markets. Inflation and stabilization programs, identification of business risks and opportunities, as well as tools needed to manage firms under these conditions. S/U or letter grading.

**298A. Special Topics in Management Theory.** Prerequisite: doctoral standing or consent of instructor. Examination in depth of problems or issues of current concern in management theory. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

**298B. Special Topics in International and Comparative Management.** Prerequisite: doctoral standing or consent of instructor. Examination in depth of problems or issues of current concern in international and comparative management. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

**298C. Special Topics in Sociotechnical Systems.** Prerequisite: doctoral standing or consent of instructor. Examination in depth of problems or issues of current concern in sociotechnical systems. Emphasis on recent contributions to theory, research, and methodology. Of special interest to advanced Ph.D. candidates, academic staff, or distinguished visiting faculty. May be repeated for credit.

**298D. Special Topics in Management (1 to 4 units).** Lecture, three hours. Prerequisite: graduate standing. In-depth examination of problems or issues of current concern in management, with numerous topics offered each year. May be repeated for credit. S/U or letter grading.

**298X-298Y-298Z. Management Strategy and Policy Workshops (1 unit, 1 unit, 2 units).** Discussion, three hours. Prerequisite: doctoral standing. Designed to develop ability to critically evaluate research in fields relevant to study of management strategy and policy. Papers presented in colloquium format by leading scholars in management strategy and policy. Active participation and intellectual interchange encouraged through discussion of papers in sessions prior to workshop, as well as during colloquium. May be repeated for credit. S/U grading.

**299M. Ph.D. Seminar: Research Methodology.** Discussion, three hours. Prerequisite: doctoral standing. Methodological issues in management research. Emphasis on identification of research opportunities and formulation and evaluation of a research proposal. Alternative goals, settings, and designs. Hypothesis development and testing. Measurement. Implementation considerations.

**299R. Research Methods in Management.** Prerequisite: doctoral standing. Provides feedback and evaluation of papers prepared for research requirement. Quarterly meetings to discuss expectations of research committee and Doctoral Office. Students must enroll the term in which they are submitting their research paper. May be repeated for credit. S/U grading.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

The following courses are acceptable toward the M.B.A., M.S., and Ph.D. degrees within the limitations and conditions prescribed by the curricula of the John E. Anderson Graduate School of Management.

**400. Mathematics for Management.** Prerequisite: graduate standing. Fundamental mathematics for business, including topics from matrix algebra, probability, and calculus, with applications to model building and decision making in business firms. S/U grading.

**402. Data Analysis, Statistics, and Decision Making.** Prerequisite: graduate standing. In-depth introduction to probability, decision theory, and statistical inference, with emphasis on solution to actual business problems.

**403. Financial Accounting.** Lecture, three hours. Prerequisite: graduate standing. Introduction to fundamental financial accounting methods and procedures, with emphasis on financial statements. Provides basis for firm understanding of "the language of business" — accounting.

**404. Information Systems.** Lecture, three hours. Designed for graduate students. Introduction to information systems in organizations from perspective of general manager. Managerial and strategic uses of information systems, information technology that underlies these systems, and ways such systems are developed and managed. S/U or letter grading.

**405. Managerial Economics.** Lecture, four hours; discussion, one hour (optional). Prerequisite: graduate standing. Analysis of consumer, producer, and market behavior. Market structure, pricing, and resource allocation. Applications to managerial strategy and public policy, with emphasis on competition, market power, and externalities.

**406. Global Economy.** Prerequisites: courses 402, 403, 405. Provides analytical framework required for understanding the way changing macroeconomic conditions in world economy affect economic growth, inflation, interest rates behavior, exchange rate determination, global competitiveness, unemployment, and the trade account. Provides skills to enable students to assess critically how developments in world economy affect particular industry environments.

**407. Managerial Model Building.** Lecture, three hours. Prerequisites: courses 402, 403, 405. Survey of uses of formal modeling approaches in managerial decision making. Emphasis on model types and formulations, and use of solutions obtained from computer routines. Application areas include finance, marketing, production, and public systems.

**408. Managerial Finance.** Lecture, three hours. Prerequisites: courses 402, 403, 405. Analysis of main decision areas of managerial financial management, aimed at principles generally applicable to all types of organizations. Emphasis on financial planning and control, sources of funds, developing objectives and standards which lead to effective allocation and use of organization's resources.

**409. Managing Human Resources in Organizations.** Lecture, three hours. Introduction to human resource management function and management of human behavior in organizations. Emphasis on relationships among individuals, groups, and organizational units as they influence the managerial process and development of prospective general managers.

**410. Operations and Technology Management.** Lecture, three hours. Prerequisites: courses 402, 403, 405, 408, 411. Principles and decision analysis related to effective utilization of factors of production in manufacturing and nonmanufacturing activities for both intermittent and continuous systems. Production organizations, analytical models and methods, facilities design, and design of control systems for production operations.

**411. Elements of Marketing.** Prerequisites: courses 402, 403, 405. Principles of market-driven managerial decision making: consumer, competitor, and company analysis, market segmentation, definition of target markets, and product positioning. Management of marketing function: product and pricing decisions, channels of distribution, marketing communications. S/U or letter grading.

**412. Management of Organizations.** Lecture, three hours. Prerequisite: completion of first-year core program. Integrative approach to theory and practice of management in complex organizations, emphasizing managerial roles in designing organizational structures, creating/maintaining planning, control, information, incentive systems, different patterns of human interaction such structures and systems tend to produce.

**413A. Personal Computing for Managers.** Lecture, three hours. Designed for graduate students. Personal computing in support of strategic analysis, decision making, and management communication. Use of personal productivity tools and network resources. Accessing publicly available information. Emphasis on hands-on exercises. S/U or letter grading.

**413B. Advanced Topics in Managerial Computing.** Lecture, three hours. Designed for graduate students. New information technology for personal computing by managers. In-depth study of a specific new technology. Extensive hands-on assignments. S/U or letter grading.

**420. Business Strategy.** Requisites: courses 402, 403, 405, 408, 411. Evaluation and formulation of organization's overall policies and strategies. Economic, heuristic, and social process approaches to policy formulation, environmental analysis, and organizational appraisal. Senior management's role in managing the policy process. S/U or letter grading.

**421A. Management Communications I (1 unit).** Lecture, 30 minutes; laboratory, one hour. Strategies and techniques for more effective individually written managerial communications such as memos, reports, decision recommendations, etc. Emphasis on analytically based persuasive writing. S/U grading.

**421B. Management Communications II (1 unit).** Lecture, 30 minutes; laboratory, one hour. Strategies and techniques for more effective preparation of group writing assignments in managerial contexts where multiple audiences are important. Issues include achieving a single voice, establishing appropriate tone, incorporation of multiple points of view, etc. S/U grading.

**422. Analysis and Communications.** Discussion, three hours. Prerequisite: graduate standing. Study and practice of oral and written management communications, including audience analysis, persuasion, revising and editing, presentation of technical information, and uses of computer technology. Organized around writing and speaking exercises. Personal attention to students' written communications and oral presentations.

**423. Advanced Management Theory.** Advanced study of management theory in formally organized enterprise through significant readings; discussion of advanced approaches and techniques developed from applying theory; use of theory to integrate methods and findings of quantitative and behavioral sciences; lectures on sophisticated application of management theory in practice.

**444A-444B. Management Field Study.** Must be taken in two consecutive terms in second year (or its equivalent for part-time students). Supervised study of an organization, including establishment of client/consultant relationships, identification of problems or strategic questions, design of study, collection and analysis of data, development and reporting of implementable recommendations. S/U or letter grading.

**450. Fieldwork in Behavioral Science Management Development (4 or 8 units).** Prerequisites: course 287, consent of instructor. Supervised practical fieldwork in all phases of laboratory education for management development, such as sensitivity training laboratories, creativity and personal growth laboratories, simulated managerial behavior laboratories, etc.

**451. Fieldwork in Organizational Development (2 to 12 units).** Prerequisite: course 284B or 450 or consent of instructor. Supervised practical fieldwork in organizational development consultation in interpersonal, group, intergroup, total organization, and interorganizational settings.

**452. Fieldwork in Technical Assistance for Minority Business Enterprise (1 to 4 units).** Prerequisite: completion of first year of master's program or consent of instructor. Supervised field experience in business consulting and other forms of technical assistance for business firms and management in ethnic communities; seminars and other shared learning experiences in transmitting business administration technology to the urban ghetto.

**453. Fieldwork in Arts Management (4 to 12 units).** Prerequisite: consent of instructor. Supervised field experience and practical work in all phases of an arts organization (pictorial, performing, or community), concentrating on its managerial problems and its relationship to the community and society in general.

**454. Fieldwork in Organizations.** Prerequisites: completion of two terms of M.B.A. program, consent of supervising faculty and director of M.B.A. program. Supervised, nonpaid practical experience or fieldwork in an organization as an intern or fellow. Execution of predetermined assignment(s) pursuant to a defined program of study which may include formal classwork. May not be repeated for credit.

**457. Fieldwork in Investment Management.** Discussion, three hours. Prerequisite: consent of instructor. Use of academic theories learned in a practical experience by managing a portfolio started with donated funds. Mirrors situations experienced by typical money management firms and includes investment strategy, asset allocation, security analysis, and organizational issues. S/U or letter grading.

The following individual study or research courses (501 through 599) may be used, within limitations and conditions prescribed by the school, to satisfy minimum higher degree requirements.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA AGSM graduate adviser and assistant dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Research in Management (1 to 8 units).** (Formerly numbered 596N.) Requisite: consent of master's program director or Ph.D. program director by special petition. Directed individual study or research. May be repeated. S/U or letter grading.

**597. Preparation for Qualifying Examinations (4 or 12 units).** Prerequisite: consent of master's program director or Ph.D. program director by special petition. Preparation for master's comprehensive examination or Ph.D. qualifying examinations.

**598. Thesis Research in Management (4 or 12 units).** Prerequisite: consent of master's program director by special petition. Research for and preparation of master's thesis. May be repeated. S/U grading.

**599. Ph.D. Dissertation Research in Management (4 or 12 units).** Prerequisite: consent of Ph.D. program director by special petition. Research for and preparation of Ph.D. dissertation.

## Executive M.B.A. Program

Admission to the Executive M.B.A. Program is requisite for enrollment in the following courses:

**461. Managerial Problem Solving (2 units).** Focus on individual problem-solving and decision-making skills. Alternative conceptual frameworks presented for augmenting individual's diagnostic and decision-making skills. Use of readings, cases, decision simulations, and discussions to explore areas of charting job and career progress, working with others, and shaping the work culture.

**462. Economic Analysis for Managers.** Policy-oriented problems in antitrust, tax securities, and environmental regulation. Concepts of microeconomic theory illustrated. Topics include traditional antitrust regulations, new trends in antitrust, private versus government antitrust, securities regulation, environmental regulations, and a business firm's optimal response to regulation.

**463. Data Analysis and Management Decisions under Uncertainty.** Survey of statistical model building, with emphasis on managerial interpretation of statistical summary of data. Classical statistics covered through multiple regression to support courses in finance and marketing that follow. Fundamental approaches to decision making under uncertainty.

**464. Managerial Accounting.** Familiarizes the manager with functions of accounting by focusing on use of external financial reports for evaluating corporate performance and use of accounting information for internal planning and control.

**465. Quantitative Methods for Managers.** Survey of modeling approaches to managerial planning and decisions. Emphasis on ability to recognize situations where models can be used advantageously, to work effectively with model building specialists, and to make good use of models once they have been developed.

**466A-466B. Financial Policy for Managers (4 units, 2 units).** Modern financial management deals with decision making under uncertainty for corporate financial management, for portfolio investment decisions, for financial institutions, and for international financial management. Focus on learning sound theoretical tools and applying them in casework.

**467. Management Issues in Information Systems (2 units).** Growing role of information systems in the corporation and how they change ways of doing business. Examples from airlines, health, computer, communications, distribution, and publishing industries. Strategic, organizational, and societal implications.

**468. Economic Forecasting (2 units).** Macroeconomic theory and its application to business forecasting. Major economic indicators and their historical description of the U.S. economy; theoretical tools that business economists use to analyze impacts of monetary and fiscal policy; macroeconomic techniques applicable to business decisions.

**469. Management of Human Resources.** Introduction to major areas of human resource management — personnel management, labor economics, labor law, and labor relations — accomplished by examining some major concepts, theories, and research related to each of these topic areas, as well as some practical problems for managers posed by each.

**470A. Introduction to Action Research and Policy Analysis (2 units).** Provides methods of organizational and strategic analysis to determine relationship of the organization with its environment.

**470B. Strategic Overview (2 units).** Preparation of a strategic overview of a selected international company entailing collection and analysis of primary and secondary data, including (but not limited to) interviews of corporate executives, corporate financial and marketing data, industry reports, and customer and competitor interviews and/or surveys.

**470C. Action Research Project (2 units).** Further research and analysis of one of the strategic issues facing the selected company and identified in the strategic overview (course 470B).

**470D. Seminar: Policy Analysis (2 units).** Site visit to selected company, presentation of final reports, and evaluation of student efforts by corporate personnel.

**472. Marketing Strategy and Policy.** Strategic marketing decisions, including development of marketing objectives and strategies and implementation of these strategies through pricing, channel, promotion, and new product decisions.

**473A. Managerial and Organizational Processes (2 units).** (Formerly numbered 473.) Lecture, four hours every other week for 13 weeks. Macroanalytic issues, including intergroup relations, design and functioning of organizations, and relationships of organizations to their environment. S/U or letter grading.

**473B. Customer Information Strategy (2 units).** Lecture, four hours every other week for 13 weeks. Development of a customer orientation as a necessity for success in the highly competitive global marketplace, including principles of customer orientation, information as a strategic asset, customer equity, market forecasting, measuring effects of marketing investments, and customer response-based strategy. S/U or letter grading.

**474. Operations and Technology Management: Systems, Strategies, and Policies.** Lecture, three hours. Analysis of strategic and operating policies and decisions for systems that produce goods and services. Examination of role of comprehensive planning, inventories, scheduling of resources, distribution systems, and system location. Comprehensive operating problems.

**475. International Managerial Policies and Strategies.** Study of economic and business decisions in an international context, with emphasis on formulation and implementation of management strategies in multinational enterprises. Application of concepts of international economic analysis and exploration of international corporate strategies.

**476. Competitive Strategy and Business Policy.** Study of general management task of forging a corporate competitive strategy. Emphasis on economics of business rivalry within a variety of industrial settings and implications of changing environments on business strategy.

**477. The Manager and Business/Society Relationships.** While organizations may, to some extent, choose their immediate environments, there are broad environmental factors and trends that affect most, if not all, organizations. Examination of emerging trends in key areas of government regulation, labor relations, international trade, basic economic structure, and social responsibility.

**478. Selected Topics in Management (2 to 4 units).** Seminar, 90 minutes to three hours. Examination of selected problems and issues in an area of current concern in management. S/U or letter grading.

## MATERIALS SCIENCE AND ENGINEERING

*School of Engineering and Applied  
Science*

UCLA  
6532 Boelter Hall  
Box 951595  
Los Angeles, CA 90095-1595  
(310) 825-5534  
<http://www.seas.ucla.edu/ms/>

Kanji Ono, Ph.D., *Chair*  
Mark S. Goorsky, Ph.D., *Vice Chair*  
Jenn-Ming Yang, Ph.D., *Vice Chair*

### Professors

Alan J. Ardell, Ph.D.  
Bruce S. Dunn, Ph.D.  
John D. Mackenzie, Ph.D. (*Nippon Sheet Glass  
Company Professor of Materials Science*), *Associate  
Dean*

Kanji Ono, Ph.D.  
King-Ning Tu, Ph.D.  
Jenn-Ming Yang, Ph.D.

### Professors Emeriti

Rointan F. Bunshah, D.Sc.  
David L. Douglass, Ph.D.  
William Klement, Jr., Ph.D.  
John H. Lyman, Ph.D.  
Aly H. Shabaik, Ph.D.  
George H. Sines, Ph.D.  
Christian N.J. Wagner, Dr.rer.nat.  
Alfred S. Yue, Ph.D.

### Associate Professor

Mark S. Goorsky, Ph.D.

### Assistant Professor

Yang Yang, Ph.D.

### Adjunct Professor

John J. Gilman, Ph.D.

### Adjunct Associate Professor

Marek A. Przystupa, Ph.D.

## Scope and Objectives

At the heart of materials science is an understanding of the microstructure of solids. "Microstructure" is used broadly in reference to solids viewed at the subatomic (electronic) and atomic levels, and the nature of the defects at these levels. The microstructure of solids at various levels profoundly influences the mechanical, electronic, chemical, and biological properties of solids. The phenomenological and mechanistic relationships between microstructure and the macroscopic properties of solids are, in essence, what materials science is all about.

Materials engineering builds on the foundation of materials science and is concerned with the design, fabrication, and optimal selection of engineering materials. Such materials must

fulfill simultaneously dimensional, property, quality control, and economic requirements.

The department also has a program in electronic materials which provides a broad-based background in materials science, with opportunity to specialize in the study of those materials used for electronic and optoelectronic applications. The program incorporates several courses in electrical engineering in addition to those in the materials science curriculum.

The undergraduate program leads to the Bachelor of Science degree in Materials Engineering. Students are introduced to the basic principles of metallurgy and ceramic and polymer science as part of the department's materials engineering major. A joint major field, chemistry/materials science, is offered to students enrolled in the Department of Chemistry and Biochemistry (College of Letters and Science).

The graduate program allows for specialization in one of the following fields: ceramics and ceramic processing, electronic and optical materials, and structural materials.

## Undergraduate Study

### Bachelor of Science in Materials Engineering

The ABET-accredited materials engineering program is designed for students who wish to pursue a professional career in the materials field and desire a broad understanding of the relationship between microstructure and properties of materials. Metals, ceramics, and polymers, as well as the design, fabrication, and testing of metallic and other materials such as oxides, glasses, and fiber-reinforced composites, are included in the course contents.

### The Major

Course requirements are as follows (180 minimum units required):

(1) Six core courses: Chemical Engineering M105A (or Mechanical and Aerospace Engineering M105A), Civil and Environmental Engineering 108, Electrical Engineering 100, Materials Science and Engineering 14, Mechanical and Aerospace Engineering 102, 105D.

(2) Materials Science and Engineering 88, 110, 110L, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L; Mechanical and Aerospace Engineering 191A or 192A.

(3) Three elective courses from Chemical Engineering C114, Civil and Environmental Engineering 130, 130F, 135A, Electrical Engineering 121A, 123A, 123B, 124, Materials Science and Engineering 111, 121, 122, 123 (two units), 143A, 151, 161, 162, Mechanical and Aerospace Engineering 156A, 166C.

(4) Four courses, including at least two upper division, from Electrical Engineering 131A or Mathematics M170A or Mechanical and Aerospace Engineering 193 or Statistics M152A, Materials Science and Engineering 197, Physics 8D, 8E. By petition, other courses from en-

gineering, intermediate or advanced foreign language, mathematics, physical or life sciences, and scientific or technical writing may be substituted.

(5) Chemistry and Biochemistry 20A, 20B, 20L; Civil and Environmental Engineering 15A and 15B or Electrical Engineering 5C or Mechanical and Aerospace Engineering 20; Materials Science and Engineering 90L or two courses from Physics 8AL, 8BL, 8CL; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A, 8B, 8C.

(6) SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details.

### Electronic Materials Option

Course requirements are as follows (192 minimum units required):

(1) Six core courses: Chemical Engineering M105A (or Mechanical and Aerospace Engineering M105A), Electrical Engineering 10, 101, Materials Science and Engineering 14, Mechanical and Aerospace Engineering 102, and Civil and Environmental Engineering 108 or Mechanical and Aerospace Engineering 105D.

(2) Materials Science and Engineering 88, 110, 110L, 121, 122, 130, 131, 131L, 190; Electrical Engineering 121A, 121B, 122AL, 123A, 123B, and two courses from Materials Science and Engineering 132, 150, 160; Mechanical and Aerospace Engineering 191A or 192A.

(3) Four elective courses from Materials Science and Engineering 111, 143A, 162, Electrical Engineering 110, 124, 131A, 172; two laboratory courses from Materials Science and Engineering 161L, 191L, 199, Electrical Engineering 172L.

(4) Chemistry and Biochemistry 20A, 20B, 20L; Electrical Engineering 5C; Materials Science and Engineering 90L or two courses from Physics 8AL, 8BL, 8CL, 8DL; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; four courses from Physics 8A, 8B, 8C, 8D, 8E.

(5) SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

In addition to meeting the requirements of the Graduate Division, applicants to the Master of Science program in Materials Science and Engineering are required to take the General Test of the Graduate Record Examination (GRE). A bachelor's degree in materials science, metallurgy, or ceramics is required. Students having a bachelor's degree in chemistry, physics, or other engineering disciplines are admitted if an introductory materials course has been taken or remedial work comparable to an introductory course is performed.

Students not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework which cannot be applied toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies.

For requirements for the Graduate Certificate of Specialization, consult *Program Requirements for UCLA Graduate Degrees*.

Application forms, including a departmental supplement to the application, may be obtained by writing to 6532 Boelter Hall, Box 951595, Los Angeles, CA 90095-1595 or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601.

### Areas of Study

There are three main areas in the M.S. program: ceramics and ceramic processing; electronic and optical materials; and structural materials. Students may specialize in any one of the three areas, although most students are more interested in a broader education and select a variety of courses. Basically, students select courses which serve their interests best in regard to thesis research and job prospects.

### Course Requirements

*Thesis Plan.* Nine courses are required, of which six must be graduate courses. These courses are to be selected from the following lists, although suitable substitutions can be made from other engineering disciplines or from chemistry and physics with the approval of the departmental graduate adviser. Two of the six graduate courses may be Materials Science and Engineering 598 (thesis research). The remaining three courses in the total course requirement may be upper division courses.

*Comprehensive Examination Plan.* Nine courses, six of which must be graduate courses, selected from the following lists with the same provisions listed under the thesis plan. Three of the nine courses may be upper division courses.

Electronic and optical materials: Materials Science and Engineering 111, 121, 122, 143A,

151, 161, 162, 200, 201, 221, 222, 223, 244, 298.

Ceramics and ceramic processing: Materials Science and Engineering 111, 121, 122, 143A, 151, 161, 162, 200, 201, 244, 246A, 246D, 298.

Structural materials: Materials Science and Engineering 111, 121, 122, 143A, 151, 161, 162, 200, 201, 243A, 243C, 244, 250A, 250B, 298.

As long as a majority of the courses taken are offered by the department, substitutions may be made with the consent of the departmental graduate adviser.

*Undergraduate Courses.* No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199; Civil Engineering 106A, 108, 199; Computer Science 152A, 152B, 171L, 199; Electrical Engineering 100, 101, 102, 103, 199; Materials Science and Engineering 110, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L, 199; Mechanical and Aerospace Engineering 102, 103, M105A, 105D, 199.

### Comprehensive Examination Plan

Consult the graduate adviser for details. If the comprehensive examination is failed, the student may be reexamined once with the consent of the graduate adviser.

### Thesis Plan

None.

## Doctoral Degree

### Admission

In addition to meeting the requirements of the Graduate Division, applicants to the Ph.D. program in Materials Science and Engineering are required to take the General Test of the Graduate Record Examination (GRE).

Applicants to the Ph.D. program normally should have completed the requirements for the master's degree with at least a 3.25 grade-point average and have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having the M.S. degree.

Students not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework which cannot be applied toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies.

Application forms, including a departmental supplement to the application, may be obtained by writing to 6532 Boelter Hall, Box 951595, Los Angeles, CA 90095-1595 or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and

Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601.

### Major Fields or Subdisciplines

Ceramics and ceramic processing; electronic and optical materials; structural materials.

### Course Requirements

There is no formal course requirement for the Ph.D. degree, and one may substitute coursework by examinations. Normally, however, the student takes courses to acquire the knowledge needed for the written and oral preliminary examinations. The basic program of study for the Ph.D. degree in Materials Science and Engineering is built around one major field and one minor field. The major field has a scope corresponding to a body of knowledge contained in nine courses, at least six of which are graduate courses, plus the current literature in the area of specialization. The major fields named above are described in a Ph.D. major field syllabus, each of which can be obtained in the department office. The minor field normally embraces a body of knowledge equivalent to three courses, at least two of which are graduate courses. Grades of B – or better, with a grade-point average of at least 3.33 in all courses included in the minor field, are required. If the student fails to satisfy the minor field requirements through coursework, a minor field examination may be taken (once only). The minor field is chosen to support the major field and is usually a subset of the major field.

For information on completing the Engineer degree, see Engineering Schoolwide Programs.

### Written and Oral Qualifying Examinations

After mastering of the body of knowledge defined in the three fields, the student takes a written preliminary examination in the major field. When this examination is passed and all coursework is completed, the student proceeds to take an oral preliminary examination which encompasses the major and minor fields. Both preliminary examinations should be completed within the first two years of full-time enrollment in the Ph.D. program. Students may not take an examination more than twice.

After passing both preliminary examinations, the student is ready to take the University Oral Qualifying Examination. The nature and content of the examination are at the discretion of the doctoral committee but ordinarily include a broad inquiry into the student's preparation for research. The doctoral committee also reviews the prospectus of the dissertation at the oral qualifying examination.

*Note: Doctoral Committees.* A doctoral committee consists of a minimum of four members. Three members, including the chair, are "inside" members and must hold appointments at UCLA in the student's major department in the School of Engineering and Applied Science. The "outside" member must be a UCLA faculty

member outside the student's major department.

## Materials Science and Engineering

### Lower Division Courses

**14. Science of Engineering Materials.** Lecture, three hours; demonstration, one hour; recitation, one hour. Prerequisites: Chemistry 11A, 11B/11BL, Physics 8A, 8B. Physics 8C may be taken concurrently. General introduction to different types of materials used in engineering designs: metals, ceramics, plastics, and composites, relationship between structure (crystals and microstructure) and properties of technological materials. Illustration of their fundamental differences and their applications in engineering.

**88. Freshman Seminar: New Materials (2 units).** Seminar, two hours; outside study, four hours. Preparation: high school chemistry and physics. Not open to students with credit for course 14. Introduction to basic concepts of materials science and new materials vital to advanced technology. Microstructural analysis and various material properties discussed in conjunction with such applications as biomedical sensors, pollution control, and microelectronics.

**90L. Physical Measurement in Materials Engineering (2 units).** Laboratory, four hours; outside study, two hours. Prerequisite: course 14. Various physical measurement methods used in materials science and engineering. Mechanical, thermal, electrical, magnetic, and optical techniques.

### Upper Division Courses

**110. Introduction to Materials Characterization A (Crystal Structure and X-Ray Diffraction of Material).** Lecture, three hours; laboratory, two hours. Prerequisite: course 14. Modern methods of materials characterization; fundamentals of crystallography, properties of X rays, X-ray diffraction; powder method, Laue method; determination of crystal structures; phase diagram determination; X-ray stress measurements; X-ray spectroscopy; design of materials characterization procedures.

**110L. Introduction to Materials Characterization A Laboratory (2 units).** Laboratory, two hours; outside study, four hours. Prerequisite: course 14. Experimental techniques and analysis of materials through X-ray scattering techniques; powder method, lane method, crystal structure determination, and special projects.

**111. Introduction to Materials Characterization B (Electron Microscopy).** Lecture, three hours; laboratory, two hours. Prerequisites: courses 14, 110. Characterization of microstructure and microchemistry of materials; transmission electron microscopy; reciprocal lattice, electron diffraction, stereographic projection, direct observation of defects in crystals, replicas; scanning electron microscopy: emissive and reflective modes; chemical analysis; electron optics of both instruments.

**120. Physics of Materials.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 14, 110. Introduction to electrical, optical, and magnetic properties of solids. Free electron model, introduction to band theory and Schrödinger wave equation. Crystal bonding and lattice vibrations. Mechanisms and characterization of electrical conductivity, optical absorption, magnetic behavior, and dielectrical properties.

**121. Materials Science of Semiconductors.** Prerequisite: course 120. Structure and properties of elemental and compound semiconductors. Electrical and optical properties, defect chemistry, and doping. Electronic materials analysis and characterization, including electrical, optical, and ion-beam techniques. Heterostructures, band-gap engineering, development of new materials for optoelectronic applications.

**122. Principles of Electronic Materials Processing.** Prerequisite: course 14 or equivalent. Description of basic semiconductor materials for device processing; preparation and characterization of silicon, III-V compounds, and films. Discussion of principles of CVD, MOCVD, LPE, and MBE; metals and dielectrics.

**123. Electronic Packaging and Interconnection (2 units).** Lecture, two hours; outside study, six hours. Various electronic packaging methods and interconnection technologies. Design, fabrication, and testing of complex microelectronic components, interconnections, and assemblies.

**130. Phase Relations in Solids.** Requisites: course 14, Chemical Engineering M105A or Mechanical and Aerospace Engineering M105A. Summary of thermodynamic laws, equilibrium criteria, solution thermodynamics, mass-action law, binary and ternary phase diagrams, glass transitions.

**131. Diffusion and Diffusion-Controlled Reactions.** Prerequisite: course 130. Diffusion in metals and ionic solids, nucleation and growth theory; precipitation from solid solution, eutectoid decomposition, design of heat treatment processes of alloys, growth of intermediate phases, gas-solid reactions, design of oxidation-resistant alloys, recrystallization, and grain growth.

**131L. Diffusion and Diffusion-Controlled Reactions Laboratory (2 units).** Corequisite: course 131. Design of heat-treating cycles and performing experiments to study interdiffusion, growth of intermediate phases, recrystallization, and grain growth in metals. Analysis of data. Comparison of results with theory.

**132. Structure and Properties of Metallic Alloys.** Prerequisite: course 131. Physical metallurgy of steels, lightweight alloys (Al and Ti), and superalloys. Strengthening mechanisms, microstructural control methods for strength and toughness improvement. Grain boundary segregation.

**143A. Mechanical Behavior of Materials.** Prerequisite: course 14 or equivalent. Recommended: Civil Engineering 108. Plastic flow of metals under simple and combined loading, strain rate and temperature effects, dislocations, fracture, microstructural effects, mechanical and thermal treatment of steel for engineering applications.

**150. Introduction to Polymers.** Lecture, three hours; laboratory, two hours. Prerequisite: consent of instructor. Polymerization mechanisms, molecular weight and distribution, chemical structure and bonding, structure crystallinity, and morphology and their effects on physical properties. Glassy polymers, springy polymers, elastomers, adhesives. Fiber forming polymers, polymer processing technology, plastication.

**151. Structure and Properties of Composite Materials.** Prerequisites: course 14, at least two courses from 132, 143A, 150, 160. Relationship between structure and mechanical properties of composite materials with fiber and particulate reinforcement. Properties of fiber, matrix, and interfaces. Selection of macrostructures and material systems.

**160. Introduction to Ceramics and Glasses.** Lecture, four hours; outside study, eight hours. Requisites: courses 14, 130. Introduction to ceramics and glasses being used as important materials of engineering, processing techniques, and unique properties. Examples of design and control of properties for certain specific applications in engineering.

**161. Processing of Ceramics and Glasses.** Lecture, four hours; discussion, one hour. Prerequisite: course 160. Study of processes used in fabrication of ceramics and glasses for structural applications, optics, and electronics. Processing operations, including modern techniques of powder synthesis, greenware forming, sintering, glass melting. Microstructure properties relations in ceramics. Fracture analysis and design with ceramics.

**161L. Laboratory in Ceramics (2 units).** Laboratory, four hours. Prerequisite: course 160 or equivalent. Recommended corequisite: course 161. Processing of common ceramics and glasses. Attainment of specific properties through process control for engineering applications. Quantitative characterization and selection of raw materials. Slip casting and extrusion of clay bodies. Sintering of powders. Glass melting and fabrication. Determination of chemical and physical properties.

**162. Electronic Ceramics.** Prerequisites: course 14, Electrical Engineering 100, or equivalent. Utilization of ceramics in microelectronics; thick film and thin film resistors, capacitors, and substrates; design and processing of electronic ceramics and packaging; magnetic ceramics; ferroelectric ceramics and electro-optic devices; optical wave guide applications and designs.

**190. Materials Selection and Engineering Design.** Prerequisites: courses 132, 150, 160. Explicit guidance among the myriad materials available for design in engineering. Properties and applications of steels, nonferrous alloys, polymeric, ceramic, and composite materials, coatings. Materials selection, treatment, and serviceability emphasized as part of successful design. Design projects.

**191L. Computer Methods and Instrumentation in Materials Science (2 units).** Prerequisites: upper division standing in materials science and engineering, knowledge of BASIC or C or assembly language. Interface and control techniques, real-time data acquisition and processing, computer-aided testing.

**197. Seminar: Technical Writing for Materials Engineers (2 units).** Seminar, two hours; outside study, four hours. Corequisite: course 132 or 190 or 598 or 599 or consent of instructor. Types of technical documents and basic document patterns. Document planning, paragraph and sentence structures. Illustration and references. Reports, theses, and proposals. Oral presentation.

**199. Special Studies (2 to 8 units).** Prerequisites: senior standing, consent of instructor. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit.

### Graduate Courses

**200. Principles of Materials Science I.** (Formerly numbered 240B.) Lecture, four hours; outside study, eight hours. Prerequisite: course 120 or equivalent. Lattice dynamics and thermal properties of solids, classical and quantized free electron theory, electrons in a periodic potential, transport in semiconductors, dielectric and magnetic properties of solids.

**201. Principles of Materials Science II.** (Formerly numbered 247A.) Lecture, three hours; outside study, nine hours. Prerequisite: course 131. Kinetics of diffusional transformations in solids. Precipitation in solids. Nucleation theory. Theory of precipitate growth. Ostwald ripening. Spinodal decomposition. Cellular reactions.

**221. Science of Electronic Materials.** Lecture, four hours; outside study, eight hours. Prerequisite: course 120 or equivalent. Study of major physical and chemical principles affecting properties and performance of semiconductor materials. Topics include bonding, carrier statistics, band-gap engineering, optical and transport properties, novel materials systems, and characterization.

**222. Growth and Processing of Electronic Materials.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 120, 130, 131, or equivalent. Thermodynamics and kinetics that affect semiconductor growth and device processing. Particular emphasis on fundamentals of growth (bulk and epitaxial), heteroepitaxy, implantation, oxidation.

**223. Materials Science of Thin Films.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 120, 131, or equivalent. Fabrication, structure, and property correlations of thin films used in microelectronics for data and information processing. Topics include film deposition, interfacial properties, stress and strain, electromigration, phase changes and kinetics, reliability.

**224. Deposition Technologies and Their Applications.** (Formerly numbered 248B.) Lecture, three hours; outside study, nine hours. Designed for graduate engineering students. Deposition methods used in high-technology applications. Theory and experimental details of physical vapor deposition (PVD), chemical vapor deposition (CVD), plasma-assisted vapor deposition processes, plasma spray, electrodeposition. Applications in semiconductor, chemical, optical, mechanical, and metallurgical industries.

**243A. Fracture of Structural Materials.** Requisite: Mechanical and Aerospace Engineering 156B. Engineering and scientific aspects of crack nucleation, slow crack growth, and unstable fracture. Fracture mechanics, dislocation models, fatigue, fracture in reactive environments, alloy development, fracture-safe design.

**243C. Dislocations and Strengthening Mechanisms in Solids.** Requisite: course 143A or Mechanical and Aerospace Engineering 156B. Elastic and plastic behavior of crystals, geometry, mechanics, and interaction of dislocations, mechanisms of yielding, work hardening, and other strengthening.

**244. Electron Microscopy.** Prerequisite: course 111 or equivalent. Essential features of electron microscopy, geometry of electron diffraction, kinematical and dynamical theories of electron diffraction, including anomalous absorption, applications of theory to defects in crystals. Moiré fringes, direct lattice resolutions, Lorentz microscopy, laboratory applications of contrast theory.

**245C. Diffraction Methods in Science of Materials.** Prerequisite: course 110 or equivalent. Theory of diffraction of waves (X rays, electrons, and neutrons) in crystalline and noncrystalline materials. Long- and short-range order in crystals, structural effects of plastic deformation, solid-state transformations, arrangements of atoms in liquids and amorphous solids.

**246A. Mechanical Properties of Nonmetallic Crystalline Solids.** Prerequisite: course 160. Material and environmental factors affecting mechanical properties of nonmetallic crystalline solids, including atomic bonding and structure, atomic-scale defects, microstructural features, residual stresses, temperature, stress state, strain rate, size, and surface conditions. Methods for evaluating mechanical properties.

**246B. Structure and Properties of Glass.** Prerequisite: course 160. Structure of amorphous solids and glasses. Conditions of glass formation and theories of glass structure. Mechanical, electrical, and optical properties of glass and relationship to structure.

**246D. Electronic and Optical Properties of Ceramics.** Prerequisite: course 160. Principles governing electronic properties of ceramic single crystals and glasses and effects of processing and microstructure on these properties. Electronic conduction, ferroelectricity, and photochromism. Magnetic ceramics. Infrared, visible, and ultraviolet transmission. Unique application of ceramics.

**250A. Analysis and Design of Composite Materials.** Requisites: course 151 and one course from 143A, Electrical Engineering 175, Mechanical and Aerospace Engineering 156A, or 156B. Mechanics of laminated composites, textile structural composites, strength and failure theory, fracture, fatigue and damage tolerance, environmental effects, microcomputer software for composite analysis and design.

**250B. Advanced Composite Materials.** Prerequisites: course 151, B.S. in Materials Science and Engineering or equivalent. Fabrication methods, structure and properties of advanced composite materials. Fibers; resin-, metal-, and ceramic-matrix composites. Physical, mechanical, and nondestructive characterization techniques.

**296. Seminar: Advanced Topics in Materials Science and Engineering (2 units).** (Formerly numbered 249AA-249ZZ.) Seminar, two hours; outside study, four hours. Advanced study and analysis of current topics in materials science and engineering. Discussion of current research and literature in research specialty of faculty members teaching course. May be repeated for credit. S/U grading.

**298. Seminar: Engineering (2 to 4 units).** Prerequisites: graduate standing in materials science and engineering, consent of instructor. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**474A. Advanced Transportation Systems.** Lecture, four hours; outside study, eight hours. Prerequisite: consent of instructor. Survey of aerospace and advanced ground transportation systems, materials, structures, propulsion systems, control systems, communication systems, and infrastructure support.

**475A. Manufacturing Processes.** Lecture, four hours; outside study, eight hours. Prerequisite: consent of instructor. Manufacturing properties of materials, thermomechanical processes, chemical and physical processes, material removal processes, packaging, fastening, joining and assembly, tooling and fixtures.

**596. Directed Individual or Tutorial Studies (2 to 8 units).** Prerequisites: graduate standing in materials science and engineering, consent of instructor. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

**597A. Preparation for M.S. Comprehensive Examination (2 to 12 units).** Prerequisites: graduate standing in materials science and engineering, consent of instructor. Reading and preparation for M.S. comprehensive examination. S/U grading.

**597B. Preparation for Ph.D. Preliminary Examinations (2 to 16 units).** Prerequisites: graduate standing in materials science and engineering, consent of instructor. S/U grading.

**597C. Preparation for Ph.D. Oral Qualifying Examination (2 to 16 units).** Prerequisites: graduate standing in materials science and engineering, consent of instructor. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

**598. Research for and Preparation of M.S. Thesis (2 to 12 units).** Prerequisites: graduate standing in materials science and engineering, consent of instructor. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units).** Prerequisites: graduate standing in materials science and engineering, consent of instructor. Usually taken after student has been advanced to candidacy. S/U grading.

## Scope and Objectives

Gauss has called mathematics the "Queen of the Sciences." It has provided powerful intellectual tools that have made possible tremendous advances in modern science and technology. The Department of Mathematics provides courses of study that introduce students

to the fundamentals of mathematics and allow them to master the most important parts of the subject, both pure and applied. It leads doctoral students to the frontiers of mathematical research, where they can begin to push back those frontiers.

## Undergraduate Study

### Admission

Students entering UCLA directly from high school who declare one of the five mathematics majors offered by the department at the time they apply for admission are automatically admitted to that major.

UCLA students who wish to enter one of the mathematics majors must have a minimum grade of C – in each preparation for the major course completed and a combined grade-point average of at least 2.0 in those courses. Grades in any completed major courses must also average at least 2.0. Students with 60 or more units of credit must have completed at least 12 units of calculus to enter any of the mathematics majors.

**Transfer students** must have a minimum grade of C in the equivalent of each preparation for the major course completed. Those transferring with 60 or more quarter units of credit must have completed at least 12 quarter units of calculus to enter any of the mathematics majors.

### Preliminary Examination in Mathematics

If students wish to enroll in Mathematics 1, 3A, or 31A, they must pass the Mathematics Diagnostic Test.

This examination may be taken at any one of several times, including all sessions of the summer Orientation Program. It is also given several times during the academic year. For specific dates and test locations, refer to the *Schedule of Classes* or the departmental website at <http://www.math.ucla.edu/undergrad/diagnostic.htm>, or contact the Mathematics Student Services Office, 6356 Math Sciences.

### Advanced Placement in Calculus

Students who have taken the Advanced Placement (AP) Calculus AB Test and obtained a score of 4 or 5 receive four units of credit and Mathematics 31A equivalency; those with a score of 3 receive four units of calculus and analytic geometry credit. They may petition for 31A equivalency, or they may take course 31A at UCLA, although they must still satisfy the course requisites (Mathematics Diagnostic Test). Students who take the BC Test and obtain a score of 4 or 5 receive eight units of credit and Mathematics 31A, 31B equivalency; those with a score of 3 receive eight units of calculus and analytic geometry credit. They may petition for 31A, 31B equivalency, or they may take courses 31A, 31B at UCLA, although they must still satisfy the course requisites (Mathematics Diagnostic Test). Students receiving a score of 3 on the AB or BC examination should consult the undergraduate mathe-

matics counselor prior to enrolling in a calculus course at UCLA.

### Credit Limitations

Credit is given for at most one course in each of the following groups: (1) 3A, 31A; (2) 3B, 31B, 31E; (3) 3C, 32A; (4) 110A, 117; (5) M170A, Statistics M152A, 154A.

Mathematics 2, 38A, 38B, and Statistics 50 are not open for credit to students with credit for any course from Mathematics 110A through 199.

Mathematics 132 is not open for credit to students with credit for Physics 132.

Mathematics 151A-151B are not open for credit to students with credit for Electrical Engineering 103.

Mathematics M170A and Statistics M152A are not open for credit to students with credit for Electrical Engineering 131A.

Students may not take a mathematics course for credit if they have credit for a more advanced course which has the first course as a requisite. This applies in particular to the repetition of courses (e.g., if they wish to repeat Mathematics 31B, they must do so before completing course 32A).

Students may not receive credit for both a course and the honors version of that course (e.g., they may not receive credit for both Mathematics 32A and 32AH).

### Undergraduate Majors

The Mathematics Department offers five majors: the mathematics, applied mathematics, mathematics of computation, mathematics/applied science, and general mathematics. The department also participates with the Economics Department in the Mathematics/Economics Interdepartmental Program, which offers a mathematics/economics major.

The mathematics major is designed for students whose basic interest is mathematics; the applied mathematics major for those interested in the classical relationship between mathematics, the physical sciences, and engineering; the mathematics of computation major for individuals interested in the mathematical theory and the applications of computing; the mathematics/applied science major for those with substantial interest in the applications of mathematics to a particular outside field of interest; and the general mathematics major for students planning to teach mathematics at the high school level. As part of the mathematics/applied science major, the department offers programs for students interested in the fields of actuarial science, medical and life sciences, and operations research.

Courses taken to fulfill any of the requirements for any of the mathematics majors must be taken for a letter grade.

Students planning to pursue graduate study in mathematics are strongly encouraged to take a three-term sequence of graduate-level courses during their senior year.

## Bachelor of Science in Mathematics

### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Physics 8A, and two additional courses from Chemistry and Biochemistry 20A, 20B, Economics 11, Philosophy 31, 32, Physics 6B, 6C, 8B, 8C, 8D, 8E. Each course must be passed with a minimum grade of C–, and students must have a minimum overall GPA of 2.0 for the courses.

### The Major

*Required:* Mathematics 110A-110B, 115A, 131A-131B, 132, one course from 120A, 121, 123, and at least five additional courses from 106 through 199 and Statistics M152A through 154B. The 12 courses must be passed with a minimum overall GPA of 2.0.

## Bachelor of Science in Applied Mathematics

### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Physics 8A, 8C, and one additional course from Chemistry and Biochemistry 20A, 20B, Physics 8B, 8D, 8E. Each course must be passed with a minimum grade of C–, and students must have a minimum overall GPA of 2.0 for the courses.

### The Major

*Required:* Mathematics 115A, 131A, either 131B or 132, 142; two two-term sequences from two of the following categories: *numerical analysis* — courses 151A-151B, *probability and statistics* — courses M170A and 170B or Statistics M152A and 152B or 154A-154B, *differential equations* — courses 135A-135B; four additional courses from 110A through 199 and Statistics M152A through 154B (appropriate courses from other departments may be substituted for some of the additional courses provided departmental consent is given before such courses are taken). The 12 courses must be passed with a minimum overall GPA of 2.0.

## Bachelor of Science in Mathematics of Computation

### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Program in Computing 10A, 10B, 10C or 30, Physics 8A, 8C, and one additional course from Chemistry and Biochemistry 20A, 20B, Physics 8B, 8D, 8E. Each course must be passed with a minimum grade of C–, and students must have a minimum overall GPA of 2.0 for the courses.

### The Major

*Required:* Eleven Mathematics Department courses, including Mathematics 115A, 131A, 131B or 132, 151A-151B, and six additional

courses from 110A through 199 and Statistics M152A through 154B; three upper division computer science courses (12 units). The 14 courses must be passed with a minimum overall GPA of 2.0.

## Bachelor of Science in Mathematics/Applied Science

The major is designed for students with a substantial interest in mathematics and its applications to a particular field. It is an individual major in that students, in consultation with a faculty adviser, design their own program. They may also select one of the established programs: actuarial plan, medical and life sciences plan, or operations research plan. In the past, mathematics/applied science majors have combined the study of mathematics with fields such as biochemistry, biology, chemistry, economics, geography, and physics.

Students interested in designing an individual program should meet with the undergraduate adviser, 6356 Math Sciences, during their sophomore year. A proposed program is drawn up, then forwarded to the mathematics/applied science curriculum committee for approval. All programs must include the following preparation for the major and major courses.

### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A. Each course must be passed with a minimum grade of C–, and students must have a minimum overall GPA of 2.0 for the courses. Additional preparation, varying with the individual program, may be required.

### The Major

*Required:* Fourteen courses, seven in the Mathematics Department selected from Mathematics 110A through 199 and Statistics M152A through 154B and seven upper division courses in a related field selected from one or two other departments. The seven Mathematics Department courses must be passed with an overall GPA of 2.0, as must the seven courses outside mathematics.

At least five of the courses from the related discipline must be taken after the program has been approved. Students will not be admitted to the major if they have 135 or more units by the end of the term in which they plan to enter the program.

### Actuarial Plan

#### Preparation for the Major

Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Economics 1 and 2 (or 100), 11. Economics 100 may not be applied as one of the upper division courses for the major.

#### The Major

Seven Mathematics Department courses, including Mathematics 115A, 151A, 164, M170A and 170B or Statistics M152A and 152B or

154A-154B, and two courses from 113, 151B, 171, Statistics 152C, M153A; six outside courses, including Economics 101, 102, 147A, 160, and two additional courses from Economics 145 through 199, English 131A through 131D, Management 130A, 130B, 190.

### Medical and Life Sciences Plan

#### Preparation for the Major

Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 10A, Chemistry and Biochemistry 20A, 20B, 20L, 30, 30L, Life Sciences 1, 2, 3, 4, Physics 8A, 8C.

#### The Major

Seven Mathematics Department courses, including Mathematics 115A, 135A, 151A, M170A, 170B, and two additional courses from 110A through 199 and Statistics 152B through 154B; six outside courses, including Physiological Science 111A-111B-111C or M180A-M180B-M180C, and three additional courses from Biomathematics 110, Computer Science M196B, Physiological Science 100, and C135 or Neuroscience 103 (appropriate courses from other departments may be substituted for some of the additional courses provided departmental consent is given before such courses are taken).

### Operations Research Plan

#### Preparation for the Major

Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Economics 1 and 2 (or 100), 11, Management 1A, Program in Computing 10A.

#### The Major

Seven Mathematics Department courses, including Mathematics 115A, 131A, 151A-151B, M170A or Statistics M152A or 154A, Statistics 152B or 154B, and one course from Mathematics 110A, 113, 117, 164, 167, 170B, 171, Statistics 152C; six outside courses, including Economics 101, Management 140, and four additional courses from Management 212A, 212B, 213A, 213B, 213C, 240B.

## Bachelor of Science in General Mathematics

The major is designed primarily for students planning to teach mathematics at the high school level. It provides exposure to a broad range of mathematical topics, especially those appropriate for the prospective teacher. Students planning to pursue graduate studies in mathematics or related fields are encouraged to enter the mathematics, applied mathematics, or mathematics of computation major.

### Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, 61, Program in Computing 10A, and three courses from the Physics 6 or 8 sequence, Chemistry and Biochemistry 20A, 20B, or Program in Computing 10B, 10C, 30, 60. Each course must be passed with a minimum grade of C–, and students must have a minimum overall GPA of 2.0 for the courses.

## The Major

*Required:* Mathematics 110A or 117, 115A, 123, M170A or Statistics M152A or 154A, one course from 131A through 136, one course from 142 through 167, and six additional courses from 106 through 199, 370A, 370B, and Statistics 152B through 154B.

## Honors

### Honors Courses

The department offers a lower division honors sequence in calculus and upper division honors sequences in algebra and analysis. The sequences are intended for students (not necessarily mathematics majors) who desire a broad, comprehensive introduction to these topics.

### Honors Program

Students majoring in mathematics, applied mathematics, and mathematics of computation who wish to graduate with departmental honors should apply for admission to the honors program in the Student Services Office. They may apply any time after completing four courses from the calculus sequence or from upper division mathematics courses with an overall GPA of 3.6 or better. The program entails taking a specified sequence of courses as part of the major requirements, completing an approved seminar offered by the Mathematics Department or submitting an original research project, and earning an overall GPA of at least 3.6 in approved upper division and graduate mathematics courses.

Students completing the program are awarded honors at graduation; if they demonstrate exceptional achievement (i.e., at least a 3.8 GPA in upper division mathematics courses taken for the major), they are awarded highest honors. Consult the department for further information.

## Computing Specialization

Majors in mathematics, applied mathematics, mathematics/applied science, or general mathematics may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Mathematics 61 or 113, Program in Computing 10A, 10B, and two courses from 10C, 15, 30, 60, with a minimum grade of C – in each course and a combined GPA of at least 2.0, and (3) completing at least two courses from Mathematics 149 through 159. Students must petition for admission to this program and are advised to do so after they complete Program in Computing 10B (petitions should be filed in the Student Services Office). Students graduate with a bachelor's degree in their major and a specialization in computing.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office

and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degrees

The department of Mathematics offers the Master of Arts in Mathematics and the Master of Arts in Teaching.

### Master of Arts

#### Admission

Prospective graduate students in mathematics need not have an undergraduate mathematics major but must have completed at least 12 quarter courses (or eight semester courses) in substantial upper division mathematics, particularly advanced calculus, algebra, differential equations, and differential or projective geometry. For admission to a master's degree program, applicants must have earned in these upper division mathematics courses a cumulative grade-point average of at least 3.2.

Applicants must take the Graduate Record Examination (GRE) General Test and the Subject Test in Mathematics and must submit at least three letters of recommendation from mathematicians who know their recent work.

#### Areas of Study

The Master of Arts degree in mathematics may be earned under the comprehensive examination plan in the basic (pure mathematics) program, in an interdisciplinary program in applied mathematics, or in statistics.

#### Course Requirements

Eleven courses are required for the M.A. degree, of which at least eight must be graduate courses, while the remaining three may be approved upper division courses. With consent of the graduate vice chair, students in the applied mathematics and statistics programs may take up to five of the required 11 courses in other departments, provided that these courses are in professional or scientific fields closely related to research in applied mathematics or statistics, respectively. All courses must be passed with the grade of B – or better.

Students may enroll in Mathematics 596 any number of times and may apply up to two 596 courses toward the 11-course requirement for the M.A., provided a B – or better is received in these courses (not the grade of S).

#### Comprehensive Examination Plan

Students must pass two written qualifying examinations at the M.A. level within seven quarters of full-time study. By option, the following examinations are required.

**Pure Option:** One examination in algebra and one examination in either real analysis or complex analysis.

**Applied Option:** One examination in real analysis or complex analysis and one examination in numerical analysis or applied differential equations.

**Statistics Option:** Two examinations out of probability, theoretical statistics, or applied statistics.

These examinations are offered during the Fall Quarter and toward the end of the Spring Quarter and are three-hour tests. Students may retake them any number of times until the examinations have been passed.

#### Thesis Plan

None.

## Master of Arts in Teaching

### Admission

The Master of Arts in Teaching (M.A.T.) program serves the needs of present and prospective mathematics teachers in high school and junior college. Consult the department for admission requirements.

### Areas of Study

Consult the department.

### Course Requirements

Eleven courses are required as follows:

**Core Courses.** Students must take Mathematics 201A-201B-201C and 202A-202B. Normally students also take one quarter of Mathematics 596 while fulfilling the essay requirement described below.

**Credential Requirements.** Students planning to teach in secondary schools who do not already have valid credentials for such teaching should enroll in the single subject instructional credential program in the Department of Education (Graduate School of Education and Information Studies). Of the courses required by this program, students receive M.A.T. credit only for the following courses: Education 100A-100B, 112, 312, 330A, and 330B. Actual receipt of the credential is not a degree requirement. Interested students should check with the Department of Education for a full and up-to-date description of credential requirements and should submit a Department of Education application for admission to the credential program.

**Additional Courses.** Besides the six core courses described above, a seventh upper division or graduate course in mathematics is required. Particularly recommended are Mathematics 106, 110B, 110C, 111A, 111B, 111C, 131B, 135A, and Statistics 152B. Candidates on the junior college track normally take five 100- or 200-level courses in mathematics in addition to the six core courses. However, with prior approval of the graduate vice chair, one course of a predominantly mathematical nature taken in another department may be presented for degree credit.

Students may not receive degree credit for Mathematics 104, 370A, or 370B. In addition, students may not receive degree credit for more than two quarters of Mathematics 596 or for more than two quarters of any 300-series courses.

**Essay Requirement.** A master's essay on some subject in mathematics related to the student's prospective teaching is required. This is written by the student, under the direction of a faculty member, while enrolled in Mathematics 596.

### Comprehensive Examination Plan

In the M.A.T. program, one examination in mathematical subject matter is taken, as is one in content and philosophy of secondary school mathematics. Ordinarily, these are administered in conjunction with Mathematics 201A-201B-201C and 202A-202B. Reexamination after failure is allowed.

### Thesis Plan

None.

## Doctoral Degree

### Admission

Prospective graduate students in mathematics need not have an undergraduate mathematics major but must have completed at least 12 quarter courses (or eight semester courses) in substantial upper division mathematics, particularly advanced calculus, algebra, differential equations, and differential or projective geometry. For direct admission to the doctoral program, a grade-point average of at least 3.5 must be presented. Applicants who have already obtained a master's degree must have maintained an average of better than 3.5 in graduate study.

Applicants must take the Graduate Record Examination (GRE) General Test and Subject Test in Mathematics and must submit at least three letters of recommendation from mathematicians who know their recent work.

### Major Fields or Subdisciplines

The Ph.D. degree in Mathematics may be earned under the pure, applied, or statistics option. Many possible choices of fields exist within these programs, and students are urged to read the booklet, *Graduate Studies in Mathematics at UCLA*, where the specialties of the faculty and the active research areas in the department are described in some detail.

### Course Requirements

Under the pure mathematics and statistics options, students must pass (with a grade of A or B) at least 12 courses from Mathematics 205A through 285L, but excluding the basic courses 210A-210B, 245A-245B, and 246A-246B. At most, three of these courses may be in the 285 series. Each student must actively participate (and lecture 90 minutes, normally two lectures) in at least two advanced seminars. Credit for one of the seminars must be obtained within three registered quarters after passing the written qualifying examinations, the other within five quarters after passing the written qualifying examinations.

Under the applied mathematics option, students must pass (with a grade of A or B) at least 18 approved graduate courses, including at least 12 courses from Mathematics 205A

through 285L. At most, three of these may be in the 285 series.

### Written and Oral Qualifying Examinations

Students must pass four written qualifying examinations, at least two of which must be passed at the Ph.D. level. One examination (any level) must be passed within three quarters of full-time study. Three examinations must be passed within six quarters of full-time study. Students in the applied option have the opportunity to substitute an outside examination (at the M.A. level) for one of the regular departmental examinations. By option, the following examinations are required.

**Pure Option:** One examination in algebra and one examination in real analysis. Either one or both of these required examinations may be passed at the M.A. level, subject to the above restriction on the number of M.A. passes.

**Applied Option:** One examination in real analysis and one examination in either numerical analysis or applied differential equations.

**Statistics Option:** One examination in real analysis and probability at the M.A. level and one examination in theoretical and applied statistics at the Ph.D. level.

Students should consult an adviser in the area in which they plan to do research for advice on which qualifying examinations should be taken to work in that area.

After passing the four written qualifying examinations, the student may set up the doctoral committee which administers the University Oral Qualifying Examination for advancement to candidacy.

## Mathematics

### Lower Division Courses

**1. Precalculus.** Lecture, three hours; discussion, one hour. Preparation: three years of high school mathematics. Requisite: successful completion of Mathematics Diagnostic Test. Function concept. Linear and polynomial functions and their graphs, applications to optimization. Inverse, exponential, and logarithmic functions. Trigonometric functions. P/NP or letter grading.

**2. Finite Mathematics.** Lecture, three hours; discussion, one hour. Preparation: three years of high school mathematics. Finite mathematics consisting of matrices, Gauss/Jordan method, combinatorics, probability, Bayes theorem, and Markov chains. P/NP or letter grading.

**3A. Calculus for Life Sciences Students.** Lecture, three hours; discussion, one hour. Preparation: three and one-half years of high school mathematics (including trigonometry). Requisite: successful completion of Mathematics Diagnostic Test or course 1 (C – or better). Not open for credit to students with credit in another calculus sequence. Techniques and applications of differential calculus. Introduction to the integral. P/NP or letter grading.

**3B. Calculus for Life Sciences Students.** Lecture, three hours; discussion, one hour. Requisite: course 3A (C – or better). Techniques and applications of integral calculus, logarithmic and exponential functions, introduction to differential equations. P/NP or letter grading.

**3C. Calculus for Life Sciences Students.** Lecture, three hours; discussion, one hour. Requisite: course 3B (C – or better). Functions of several variables, vectors, partial differentiation, and vector-valued functions. P/NP or letter grading.

**31A. Calculus and Analytic Geometry.** Lecture, three hours; discussion, one hour. Preparation: at least three and one-half years of high school mathematics (including some coordinate geometry and trigonometry). Requisite: successful completion of Mathematics Diagnostic Test or course 1 (C – or better). Differential calculus and applications; introduction to integration.

**31B. Calculus and Analytic Geometry.** Lecture, three hours; discussion, one hour. Requisite: course 31A (C – or better). Transcendental functions; methods and applications of integration.

**31BH. Calculus and Analytic Geometry (Honors).** Lecture, three hours; discussion, one hour. Honors course parallel to course 31B.

**31E. Calculus for Economics Students.** Lecture, three hours; discussion, one hour. Requisite: course 31A (C – or better). Not open for credit to students with credit for course 3B, 3C, or 31B. Calculus with applications to economics. Partial differentiation, differentials, implicit functions, exponential and logarithmic functions, extrema, optimization, constrained extrema, first-order linear differential equations with constant coefficients. P/NP or letter grading.

**32A. Calculus of Several Variables.** Lecture, three hours; discussion, one hour. Requisite: course 31B (C – or better). Introduction to differential calculus of several variables.

**32AH-32BH. Calculus of Several Variables (Honors).** Lecture, three hours; discussion, one hour. Requisite: course 31B (B or better). Honors sequence parallel to courses 32A, 32B.

**32AL. Calculus Computer Laboratory (1 unit).** Corequisite: course 32A. Prior knowledge of computers not required. Application of mathematical software to calculus of curves and surfaces. P/NP or letter grading.

**32B. Calculus of Several Variables.** Lecture, three hours; discussion, one hour. Requisite: course 32A (C – or better). Introduction to integral calculus of several variables, vector field theory, line and surface integrals. P/NP or letter grading.

**32BL. Calculus Computer Laboratory (1 unit).** Requisite: course 32AL. Corequisite: course 32B. Application of mathematical software to calculus of curves and surfaces. P/NP or letter grading.

**33A. Matrices and Differential Equations.** Lecture, three hours; discussion, one hour. Requisite: course 32A (C – or better). Introduction to matrix theory, differential equations, and systems of differential equations.

**33AH-33BH. Matrices, Differential Equations, and Infinite Series (Honors).** Lecture, three hours; discussion, one hour. Honors sequence parallel to courses 33A, 33B. P/NP or letter grading.

**33B. Infinite Series.** Lecture, three hours; discussion, one hour. Requisite: course 33A (C – or better). Infinite sequences and series; applications.

**38A-38B. Fundamentals of Mathematics for Elementary Teachers.** Not open to freshmen or for credit to students with credit for any course from Mathematics 110A through 199. May not be applied toward Letters and Science general education requirements. Courses 38A, 38B, and 104 form one-year sequence for prospective elementary teachers in Diversified Liberal Arts Program. P/NP or letter grading. **38A.** Lecture, three hours; discussion, one hour. Counting numbers and other subsystems of real numbers; sets; operations, relations, algorithms; applications and problem solving. Emphasis on understanding arithmetic procedures. **38B.** Lecture, three hours; discussion, one hour; laboratory, one hour. Requisite: course 38A. Continuation of course 38A. Elementary number theory; probability and statistics; the micro-computer and simple instructional programs; measurement and approximation; coordinate geometry. Other topics appropriate for elementary classroom.

**61. Introduction to Discrete Structures.** Lecture, three hours; discussion, one hour. Requisites: courses 31A, 31B, Program in Computing 10A or 3. Not open for credit to students with credit for course 113. Discrete structures commonly used in computer science and mathematics, including sets and relations, permutations and combinations, graphs and trees, induction, Boolean algebras.

## Upper Division Courses

Mathematics 113, 115A, 117, 131A, 132, 142, 151A, 164, 167, and Statistics 154A-154B are offered each term. The remaining upper division courses are usually offered once or twice each year. The tentative class schedule for the forthcoming academic year is posted in the Student Services Office in February.

## General and Teacher Training

**104. Fundamental Concepts of Geometry.** Lecture, three hours; discussion, one hour. Requisites: courses 38A, 38B. Designed for prospective elementary teachers. Informal geometry and topology, motion geometry, measurement of geometric figures, LOGO computer language, models and constructions appropriate for elementary classrooms.

**106. History of Mathematics.** Requisite: course 3A or 31A. Roots of modern mathematics in ancient Babylonia and Greece, development of algebra through Middle Ages to Fermat and Abel, invention of analytic geometry and calculus, selected topics in modern mathematics. P/NP or letter grading.

## Algebra, Number Theory, and Logic

**110A-110B. Algebra.** Lecture, three hours; discussion, one hour. Requisite: course 115A. **110A.** Not open for credit to students with credit for course 117. Ring of integers, integral domains, fields, polynomial domains, unique factorization. **110B.** Groups, structure of finite groups.

**110AH-110BH. Algebra (Honors).** (Formerly numbered 110AH-110BH-110CH.) Lecture, three hours; discussion, one hour. Honors sequence parallel to courses 110A-110B.

**110C. Algebra.** Lecture, three hours; discussion, one hour. Requisites: courses 110A-110B. Field extensions, Galois theory, applications to geometric constructions, and solvability by radicals.

**111. Theory of Numbers.** (Formerly numbered 111A-111B-111C.) Lecture, three hours; discussion, one hour. Requisites: courses 110A or 117, 115A. Divisibility, congruences, Diophantine analysis, selected topics in theory of primes, algebraic number theory, Diophantine equations.

**M112. Introduction to Set Theory.** (Formerly numbered M112A.) (Same as Philosophy M134.) Lecture, three hours; discussion, one hour. Requisite: course 31B or Philosophy 32. Axiomatic set theory as framework for mathematical concepts; relations and functions, numbers, cardinality, axiom of choice, transfinite numbers. P/NP or letter grading.

**113. Combinatorics.** Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B. Permutations and combinations, counting principles, recurrence relations and generating functions, combinatorial designs, graphs and trees, with applications including games of complete information. Combinatorial existence theorems, Ramsey theorem.

**114A-114B. Logic and Computability.** (Formerly numbered 114A-114B-114C.) Lecture, three hours; discussion, one hour. Requisite: course 115A. Propositional and predicate logic; syntax and semantics; formal deductions; completeness and compactness; Herbrand expansions. Effectively computable, Turing computable, and recursive functions; thesis of Church. Universal functions; unsolvability results. Recursive and recursively enumerable sets; recursive enumerability of valid sentences. Formal number theory; definability of recursive functions; incompleteness and undecidability; theorems of Gödel, Tarski, Church. P/NP or letter grading.

**115A-115B. Linear Algebra.** Lecture, three hours; discussion, one hour. P/NP or letter grading. **115A.** Prerequisite: course 33A. Abstract vector spaces, linear transformations, and matrices; determinants; inner product spaces; eigenvector theory. **115B.** Prerequisite: course 115A. Linear transformations, conjugate spaces, duality; theory of a single linear transformation, Jordan normal form; bilinear forms, quadratic forms; Euclidean and unitary spaces, symmetric skew and orthogonal linear transformations, polar decomposition.

**115AH. Linear Algebra (Honors).** Lecture, three hours; discussion, one hour. Honors course parallel to course 115A.

**117. Algebra for Applications.** Lecture, three hours; discussion, one hour. Prerequisite: course 115A. Not open for credit to students with credit for course 110A. Integers, congruences; fields, applications of finite fields; polynomials; permutations, introduction to groups.

## Geometry and Topology

**120A-120B. Differential Geometry.** Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B, 115A, 131A. Curves in 3-space, Frenet formulas, surfaces in 3-space, normal curvature. Gaussian curvature. Congruence of curves and surfaces. Intrinsic geometry of surfaces, isometries, geodesics, Gauss/Bonnet theorem.

**121. Introduction to Topology.** Requisite: course 131A. Metric and topological spaces, completeness, compactness, connectedness, functions, continuity, homeomorphisms, topological properties.

**123. Foundations of Geometry.** Lecture, three hours; discussion, one hour. Requisite: course 115A. Axioms and models, Euclidean geometry, Hilbert axioms, neutral (absolute) geometry, hyperbolic geometry, Poincaré model, independence of parallel postulate.

## Analysis

**131A-131B. Analysis.** Lecture, three hours; discussion, one hour. **131A.** Requisite: course 33B. Rigorous introduction to foundations of real analysis; real numbers, point set topology in Euclidean space, functions, continuity. **131B.** Requisites: courses 33B, 115A, 131A. Derivatives, Riemann integral, sequences and series of functions, power series, Fourier series.

**131AH-131BH. Analysis (Honors).** Lecture, three hours; discussion, one hour. Honors sequence parallel to courses 131A-131B.

**131C. Topics in Analysis.** Lecture, three hours; discussion, one hour. Requisites: courses 131A-131B. Advanced topics in analysis, such as Lebesgue integral, integration on manifolds, harmonic analysis. Content varies from year to year. May be repeated for credit by petition.

**132. Complex Analysis for Applications.** Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B. Introduction to basic formulas and calculation procedures of complex analysis of one variable relevant to applications. Topics include Cauchy/Riemann equations, Cauchy integral formula, power series expansion, contour integrals, residue calculus.

**135A-135B. Ordinary Differential Equations.** Lecture, three hours; discussion, one hour. Prerequisites: courses 33A, 33B, 115A. Systems of differential equations; linear systems with constant coefficients, analytic coefficients, periodic coefficients, and linear systems with regular singular points; existence and uniqueness results; linear boundary and eigenvalue problems; two-dimensional autonomous systems, phase-plane analysis; stability and asymptotic behavior of solutions.

**136. Partial Differential Equations.** Lecture, three hours; discussion, one hour. Requisites: courses 33A, 33B. Linear partial differential equations, boundary and initial value problems; wave equation, heat equation, and Laplace equation; separation of variables, eigenfunction expansions; selected topics, as method of characteristics for nonlinear equations.

## Applied Mathematics

**142. Mathematical Modeling.** Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Introduction to fundamental principles and spirit of applied mathematics. Emphasis on manner in which mathematical models are constructed for physical problems. Illustrations from many fields of endeavor, such as physical sciences, biology, economics, and traffic dynamics.

**143. Analytic Mechanics.** Lecture, three hours; discussion, one hour. Prerequisites: courses 32B, 33B. Foundations of Newtonian mechanics, kinematics and dynamics of a rigid body, variational principles and Lagrange equations; calculus of variations, variable mass; related topics in applied mathematics.

**146. Methods of Applied Mathematics.** Lecture, three hours; discussion, one hour. Prerequisite: course 33B. Integral equations, Green's function, and calculus of variations. Selected applications from control theory, optics, dynamical systems, and other engineering problems.

**149. Mathematics of Computer Graphics.** Lecture, three hours; discussion, one hour. Prerequisites: course 115A, and Program in Computing 10A or equivalent knowledge of programming in either PASCAL or C language. Study of homogeneous coordinates, projective transformations, interpolating and approximating curves, representation of surfaces, and other mathematical topics useful for computer graphics.

**151A-151B. Applied Numerical Methods.** (Formerly numbered 141A-141B.) Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B, 115A, Program in Computing 3 or 10A. Introduction to numerical methods with emphasis on algorithms, analysis of algorithms, and computer implementation issues. **151A.** Solution of nonlinear equations. Numerical differentiation, integration, and interpolation. Direct methods for solving linear systems. **151B.** Numerical solution of differential equations. Approximation theory, iterative solutions of linear equations, solution of nonlinear systems, two-point boundary value problems, optimization.

**153. Numerical Methods for Partial Differential Equations.** (Formerly numbered 148A.) Lecture, three hours; discussion, one hour. Requisites: courses 151A-151B. Introduction to first- and second-order linear partial differential equations. Finite difference and finite element solution of elliptic, hyperbolic, and parabolic equations. Method of lines and Rayleigh/Ritz procedures. Concepts of stability and accuracy.

**157. Software Techniques for Scientific Computation.** Lecture, three hours; discussion, one hour. Requisites: course 151A, Program in Computing 10C. Software structures, concepts, and conventions that support object-oriented programming. Identification of class structure, problem partitioning, and abstraction. Design and implementation of computer applications requiring scientific computation, visualization, and GUI components. Interlanguage interfacing. P/NP or letter grading.

**164. Linear Programming.** (Formerly numbered 144.) Lecture, three hours; discussion, one hour. Requisite: course 115A. Not open for credit to students with credit for Electrical Engineering 136. Principles of linear programming, duality theorem, simplex methods; applications to industrial and business problems. Additional topics such as sensitivity analysis, integer programming, distribution and transportation algorithms, and applications to game theory.

**167. Game Theory.** (Formerly numbered 147.) Lecture, three hours; discussion, one hour. Requisite: course 115A. Games in extensive form, strategic equilibrium, matrix games and minimax theorem, cooperative and noncooperative solutions of bimatrix games and Lemke/Howson algorithm. Possible additional topics include combinatorial games, stochastic games, coalitional games and the core, marriage problem, and cost allocation. P/NP or letter grading.

## Probability

**M170A. Probability Theory.** (Formerly numbered M150A.) (Same as Statistics M152A.) Lecture, three hours; discussion, one hour. Requisites: courses 32B, 33B. Not open to students with credit for Statistics M152A, 154A, or Electrical Engineering 131A. Probability distributions, random variables and vectors, expectation. P/NP or letter grading.

**170B. Probability Theory.** (Formerly numbered 150B.) Lecture, three hours; discussion, one hour. Requisite: course M170A or Statistics M152A. Convergence in distribution, normal approximation, laws of large numbers, Poisson processes, random walks.

**171. Stochastic Processes.** (Formerly numbered 151.) Lecture, three hours; discussion, one hour. Requisite: course M170A or Statistics M152A. Discrete Markov chains, continuous-time Markov chains, renewal theory.

**172A-172B. Actuarial Mathematics.** Lecture, three hours; discussion, one hour. **172A.** Prerequisite: course 70. Survival distributions and life tables, life insurance, life annuities, net premiums, net premium reserves. **172B.** Prerequisites: course 172A, Statistics 154A-154B. Multiple life functions, multiple decrement models, valuation theory for pension plans, insurance models, nonforfeiture benefits and dividends.

## Special Studies

**190. Honors Mathematics Seminar.** Seminar, three hours. Participating seminar on advanced topics in mathematics. Content varies from year to year. May be repeated for credit by petition.

**199. Special Studies in Mathematics (1 to 4 units).** At discretion of chair and subject to availability of staff, individuals or groups may study topics suitable for undergraduate course credit but not specifically offered as separate courses. May be repeated for credit, but no more than one 199 course may be applied toward upper division courses required for a major offered by Mathematics Department.

## Graduate Courses

### Teacher Preparation

**201A-201B-201C. Topics in Algebra and Analysis.** Prerequisite: bachelor's degree in mathematics or equivalent. Designed for students in mathematics/education program. Important ideas of algebra, geometry, and calculus leading effectively from elementary to modern mathematics. Approaches to number system, point sets, geometric interpretations of algebra and analysis, integration, differentiation, series and analytic functions. May not be applied toward M.A. degree requirements.

**202A-202B. Mathematical Models and Applications.** Prerequisite: bachelor's degree in mathematics or equivalent. Designed for students in mathematics/education program. Development of mathematical theories describing various empirical situations. Basic characterizing postulates; development of a logical structure of theorems. Modern topics such as operations research, linear programming, game theory, learning models, models in social and life sciences. May not be applied toward M.A. degree requirements.

## Number Theory

**205A-205B-205C. Number Theory.** Prerequisites: courses 210A and 246A, or consent of instructor. Topics from analytic algebraic and geometric number theory, including distribution of primes and factorization in algebraic number fields. Selected topics from additive number theory, Diophantine approximation, partitions, class-field theory, lattice point problems, valuation theory, etc.

**206A-206B. Combinatorial Theory.** Prerequisite: consent of instructor. Generating functions. Probabilistic methods. Polya theorem. Enumerative graph theory. Partition theory. Number theoretical applications. Structure of graphs, matching theory, duality theorems. Packings, pavings, coverings, statistical designs, difference sets, triple systems, finite planes. Configurations, polyhedra. Ramsey theory, finite and transfinite, and applications.

## Algebra

**210A-210B-210C. Algebra.** Requisites: courses 110A-110B, 110C. Students with credit for courses 110B and/or 110C cannot receive M.A. degree credit for courses 210B and/or 210C. Group theory, including theorems of Sylow and Jordan/Holder/Schreier; rings and ideals, factorization theory in integral domains, modules over principal ideal rings, Galois theory of fields, multilinear algebra, structure of algebras.

**211. Structure of Rings.** Prerequisite: course 210A or consent of instructor. Radical, irreducible modules and primitive rings, rings and algebras with minimum condition.

**212. Homological Algebra.** Prerequisite: course 210A or consent of instructor. Modules over a ring, homomorphisms and tensor products of modules, functors and derived functors, homological dimension of rings and modules.

**213A-213B. Theory of Groups.** Prerequisite: course 210A or consent of instructor. Topics include representation theory, transfer theory, infinite Abelian groups, free products and presentations of groups, solvable and nilpotent groups, classical groups, algebraic groups.

**214A-214B. Introduction to Algebraic Geometry.** Prerequisite: course 210A or consent of instructor. Basic definitions and first properties of algebraic varieties in affine and projective space: irreducibility, dimension, singular and smooth points. More advanced topics, such as sheaves and their cohomology, or introduction to theory of Riemann surfaces, as time permits.

**215A-215B. Commutative Algebra.** Prerequisite: course 210A or consent of instructor. Topics from commutative ring theory, including techniques of localization, prime ideal structure in commutative Noetherian rings, principal ideal theorem, Dedekind rings, modules, projective modules, Serre conjecture, regular local rings.

**216. Further Topics in Algebraic Geometry.** Prerequisites: courses 214A-214B or consent of instructor. Closer examination of areas of current research in algebraic geometry. Variable content may include algebraic surfaces, Abelian varieties, invariant theory, Hodge theory, or geometry over finite fields. May be repeated for credit by petition.

## Logic and Foundations

**220A-220B-220C. Mathematical Logic and Set Theory.** Lecture, three hours. Requisite: course M112. Model theory: compactness theorem; Lowenheim/Skolem theorems; definability; ultraproducts; preservation theorems; interpolation theorems. Recursion function theory: thesis of Church; recursively enumerable sets; hierarchies; degrees. Formal proofs: completeness and incompleteness theorems; decidable and undecidable theories; quantifier elimination. Set theory: Zermelo/Fraenkel and von Neumann/Gödel axioms; cardinal and ordinal numbers; continuum hypothesis; constructible sets; independence results and forcing. S/U or letter grading.

**222A-222B. Lattice Theory and Algebraic Systems.** Lecture, three hours. Prerequisite: course 210A or consent of instructor. Partially ordered sets, lattices, distributivity, modularity; completeness, interaction with combinatorics, topology, and logic; algebraic systems, congruence lattices, subdirect decomposition, congruence laws, equational bases, applications to lattices.

**223A. Model Theory.** Prerequisites: courses 220A-220B-220C. Topics include ultraproducts, preservation theorems, interpolation theorems, saturated models, omitting types, categoricity, two cardinal theorems, enriched languages, soft model theory, and applied model theory.

**223B. Set Theory.** Prerequisites: courses 220A-220B-220C. Topics include constructibility theory, Cohen extensions, large cardinals, and combinatorial set theory.

**223C. Recursion Theory.** Prerequisites: courses 220A-220B-220C. Topics include degrees of unsolvability, recursively enumerable sets, undecidable theories, inductive definitions, admissible sets and ordinals, and recursion in higher types.

**223D. Descriptive Set Theory.** Prerequisites: courses 220A-220B-220C. Classical descriptive set theory: Borel and projective sets. Effective descriptive set theory. Consequences of strong set-theoretic hypotheses.

## Geometry and Topology

**225A. Differentiable Manifolds.** Lecture, three hours. Prerequisites: courses 121 and 131A-131B, or consent of instructor. Smooth manifolds and maps, basic examples and properties, orientability, tangent and cotangent spaces, embeddings and immersions, Sard theorem and transversality, vector fields and integral curves, Lie brackets and Frobenius theorem, Lie derivative, tensors, differential forms and exterior derivative, Stokes theorem on manifolds.

**225B. Introduction to Algebraic Topology.** Lecture, three hours. Prerequisite: course 225A or consent of instructor. Elementary concepts of homotopy theory; covering spaces and fundamental group. Singular homology theory, axioms of homology, Mayer/Vietoris sequence, calculation of homology of standard spaces, applications, Betti numbers and Euler characteristic, cell complexes and cellular homology.

**225C. Further Topics in Geometry and Topology.** Lecture, three hours. Prerequisites: courses 225A and 225B, or consent of instructor. Topics may include cohomology (singular, cellular, de Rham), duality theorems, de Rham theorem, degree theory, cup products, higher homotopy groups, transversality theory, Morse theory, Riemannian metric.

**226A-226B-226C. Differential Geometry.** Lecture, three hours. Prerequisite: course 225A or consent of instructor. Manifold theory; connections, curvature, torsion, and parallelism. Riemannian manifolds; completeness, submanifolds, constant curvature. Geodesics; conjugate points, variational methods, Myers theorem, nonpositive curvature. Further topics such as pinched manifolds, integral geometry, Kahler manifolds, symmetric spaces.

**227A-227B. Algebraic Topology.** Lecture, three hours. Prerequisite: course 225B or consent of instructor. CW complexes, fiber bundles, homotopy theory, cohomology theory, spectral sequences.

**229A-229B-229C. Lie Groups and Lie Algebras.** Prerequisite: knowledge of basic theory of topological groups and differentiable manifolds. Lie groups, Lie algebras, subgroups, subalgebras. Exponential map. Universal enveloping algebra. Campbell/Hausdorff formula. Nilpotent and solvable Lie algebras. Cohomology of Lie algebras. Theorems of Weyl, Levi-Mal'cev. Semisimple Lie algebras. Classification of simple Lie algebras. Representations. Compact groups. Weyl character formula.

**233. Partial Differential Equations on Manifolds.** Lecture, three hours. Prerequisites: courses 226A and 251A, or consent of instructor. Topics may include Laplacian operator on a Riemannian manifold, eigenvalues, Atiyah/Singer index theorem, isoperimetric inequalities, elliptic estimates, harmonic functions, function theory on manifolds, Green's function, heat equation, minimal hypersurfaces, prescribed curvature equations, harmonic maps, Yang/Mills equation, Monge/Ampere equations.

**234. Topics in Differential Geometry.** Lecture, three hours. Prerequisites: courses 226A-226B or consent of instructor. Complex and Kahler geometry, Hodge theory, homogeneous manifolds and symmetric spaces, finiteness and convergence theorems for Riemannian manifolds, almost flat manifolds, closed geodesics, manifolds of positive scalar curvature, manifolds of constant curvature. Topics vary from year to year. May be repeated for credit by petition.

**235. Topics in Manifold Theory.** Lecture, three hours. Prerequisites: courses 225A and 225B, or consent of instructor. Emphasis on low-dimensional manifolds. Structure and classification of manifolds, automorphisms of manifolds, submanifolds (e.g., knots and links). Topics vary from year to year. May be repeated for credit by petition.

**236. Topics in Geometric Topology.** Lecture, three hours. Prerequisites: courses 225A and 225B, or consent of instructor. Decomposition spaces, surgery theory, group actions, dimension theory, infinite dimensional topology. Topics vary from year to year. May be repeated for credit by petition.

**237. Topics in Algebraic Topology.** Lecture, three hours. Prerequisites: courses 227A-227B or consent of instructor. Fixed-point theory, fiber spaces and classifying spaces, characteristic classes, generalized homology and cohomology theories. Topics vary from year to year. May be repeated for credit by petition.

**238A-238B. Dynamical Systems.** Lecture, three hours. Recommended preparation: first-year analysis courses. Topics include qualitative theory of differential equations, bifurcation theory, and Hamiltonian systems; differential dynamics, including hyperbolic theory and quasiperiodic dynamics; ergodic theory; low-dimensional dynamics. S/U or letter grading.

## Analysis and Differential Equations

**240. Methods of Set Theory.** Lecture, three hours. Prerequisites: courses 110A-110B, 121 or equivalent, 131A-131B. Naive, axiomatic set theory, axiom of choice and its equivalents, well-orderings, transfinite induction, ordinal and cardinal arithmetic. Applications to algebra: Hamel bases, Stone representation theorem. Applications to analysis and topology: Cantor/Bendixson theorem, counterexamples in measure theory, Borel and analytic sets, Choquet theorem.

**245A-245B-245C. Real Analysis.** Lecture, three hours. Prerequisites: courses 121, 131A-131B. Students with credit for former course 134 cannot receive M.A. degree credit for course 245A. Basic measure theory. Measure theory on locally compact spaces. Fubini theorem. Elementary aspects of Banach and Hilbert spaces and linear operators. Function spaces. Radon/Nikodym theorem. Fourier transform and Plancherel on  $\mathbb{R}^n$  and  $\mathbb{T}^n$ .

**246A-246B-246C. Complex Analysis.** Prerequisites: courses 131A-131B. Students with credit for course 132 cannot receive M.A. degree credit for course 246A. Cauchy/Riemann equations. Cauchy theorem. Cauchy integral formula and residue calculus. Power series. Normal families. Harmonic functions. Linear fractional transformations. Conformal mappings. Analytic continuation. Examples of Riemann surfaces. Infinite products. Partial fractions. Classical transcendental functions. Elliptic functions.

**247A-247B. Classical Fourier Analysis.** Lecture, three hours. Prerequisites: courses 245A-245B, 246A. Distribution on  $\mathbb{R}^n$  and  $\mathbb{T}^n$ . Principal values; other examples. Distributions with submanifolds as supports. Kernel theorem. Convolution; examples of singular integrals. Tempered distributions and Fourier transform theory on  $\mathbb{R}^n$ . Distributions with compact or one-sided supports and their complex Fourier transforms.

**250A. Ordinary Differential Equations.** Prerequisite: course 246A or consent of instructor. Basic theory of ordinary differential equations. Existence and uniqueness of solutions. Continuity with respect to initial conditions and parameters. Linear systems and nth order equations. Analytic systems with isolated singularities. Self-adjoint boundary value problems on finite intervals.

**250B. Nonlinear Ordinary Differential Equations.** Prerequisite: course 250A. Asymptotic behavior of nonlinear systems. Stability. Existence of periodic solutions. Perturbation theory of two-dimensional real autonomous systems. Poincaré/Bendixson theory.

**250C. Advanced Topics in Ordinary Differential Equations.** Prerequisites: courses 250A, 250B. Selected topics, such as spectral theory or ordinary differential operators, nonlinear boundary value problems, celestial mechanics, approximation of solutions, and Volterra equations.

**251A. Introductory Partial Differential Equations.** Prerequisite: consent of instructor. Classical theory of heat, wave, and potential equations; fundamental solutions, characteristics and Huygens principle, properties of harmonic functions. Classification of second-order differential operators. Maximum principles, energy methods, uniqueness theorems. Additional topics as time permits.

**251B-251C. Topics in Partial Differential Equations.** Prerequisite: consent of instructor. In-depth introduction to topics of current interest in partial differential equations or their applications.

**252A-252B. Topics in Complex Analysis.** (Formerly numbered 252A-252B-252C.) Lecture, three hours. Prerequisites: courses 245A-245B-245C, 246A-246B-246C. Potential theory, subharmonic functions, harmonic measure; Hardy spaces; entire functions; univalent functions; Riemann surfaces; extremal length, variational methods, quasi-conformal mappings. Topics vary from year to year. S/U or letter grading.

**253A-253B. Several Complex Variables.** Prerequisites: courses 245A-245B-245C and 246A-246B-246C, or consent of instructor. Introduction to analytic functions of several complex variables. The  $\bar{\partial}$  problem, Cousin problems, domains of holomorphy, complex manifolds.

**254A-254B. Topics in Real Analysis.** Prerequisites: courses 245A-245B-245C, 246A-246B-246C. Selected topics in analysis and its applications to geometry and differential equations. Topics may vary from year to year. May be repeated for credit by petition.

## Functional Analysis

**255A. Functional Analysis.** Prerequisites: courses 245A-245B or 265A-265B, and 246A, or consent of instructor. Banach spaces, basic principles. Weak topologies. Compact operators. Fredholm operators. Special spaces including Hilbert spaces and  $C(X)$ .

**255B-255C. Topics in Functional Analysis.** Prerequisite: course 255A. Topics include Banach algebras, operators on Banach spaces and Hilbert space, semigroups of operators, linear topological vector spaces, and other related areas.

**256A-256B. Topological Groups and Their Representations.** (Formerly numbered 256A-256B-256C.) Lecture, three hours. Requisite: course 255A. Topological groups and their basic properties. Haar measure. Compact groups and their representations. Duality and Fourier analysis on locally compact abelian groups. Induced representations, Frobenius reciprocity. Representations of special groups (Lorentz, Galilean, etc.). Projective representations. Representations of totally disconnected groups. S/U or letter grading.

**259A-259B. Operator Algebras in Hilbert Space.** Prerequisites: courses 255A, 255B-255C. Selected topics from theories of  $C^*$  and von Neumann algebras. Applications.

## Applied Mathematics

**260. Introduction to Applied Mathematics.** Prerequisite: course 142 or consent of instructor. Construction, analysis, and interpretation of mathematical models of problems which arise outside of mathematics.

**M261. Game Theory.** (Formerly numbered 261.) (Same as Economics M214B and Political Science M208A.) Lecture, three hours. Prerequisite: graduate standing in mathematics or consent of instructor. Bargaining theory, the core, the value, other solution concepts. Applications to oligopoly, general exchange and production economies, and allocation of joint costs. S/U or letter grading.

**264. Applied Complex Analysis.** Prerequisite: course 246A or consent of instructor. Topics include contour integration conformal mapping, differential equations in complex plane, special functions, asymptotic series, Fourier and Laplace transforms, singular integral equations.

**265A-265B. Real Analysis for Applications.** Prerequisites: courses 131A-131B or consent of instructor. Not open for credit to students with credit for courses 245A-245B-245C. Lebesgue measure and integration on real line, absolutely continuous functions, functions of bounded variation,  $L^2$ - and  $L^p$ -spaces. Fourier series. General measure and integrations, Fubini and Radon/Nikodym theorems, representation of functionals, Fourier integrals.

**266A. Applied Ordinary Differential Equations.** Lecture, three hours. Requisites: courses 131A-131B, 132, and 135A-135B or 146. Spectral theory of regular boundary value problems and examples of singular Sturm/Liouville problems, related integral equations, phase/plane analysis of nonlinear equations. S/U or letter grading.

**266B-266C. Applied Partial Differential Equations.** Prerequisite: course 266A or consent of instructor. Classification of equations, classical potential theory, Dirichlet and Neumann problems. Green's functions, spectral theory of Laplace equation in bounded domains, first-order equations, wave equations, Cauchy problem, energy conservation, heat equation, fundamental solution, equations of fluid mechanics and magnetohydrodynamics.

**266D-266E. Applied Differential Equations.** Prerequisites: courses 266A, 266B-266C. Advanced topics in linear and nonlinear partial differential equations, with emphasis on energy estimates, numerical methods, and applications to fluid mechanics. Additional topics include dispersive waves, systems with multiple time scales, and applications to fluid mechanics.

**268A. Applied Functional Analysis.** Lecture, three hours. Prerequisites: courses 115A-115B, 131A-131B, and 132, or consent of instructor. Topics may include Hilbert spaces, distributions, Fourier transforms,  $L^2$ -space, the Laplacian, linear operators, spectrum and resolvent, self-adjoint and unitary operators, problems of evolution in Banach spaces, well-posed initial value problems, semigroups, applications to applied problems.

**268B-268C. Topics in Applied Functional Analysis.** Prerequisite: course 255A. Topics include spectral theory with applications to ordinary differential operators, eigenvalue problems for differential equations, generalized functions, and partial differential equations.

**269A-269B-269C. Advanced Numerical Analysis.** Lecture, three hours. Prerequisites: courses 115A, 135A, 151A-151B. Numerical solution for systems of ordinary differential equations; initial and boundary value problems. Numerical solution for elliptic, parabolic, and hyperbolic partial differential equations. Topics in computational linear algebra. S/U or letter grading.

**270A-270F. Mathematical Aspects of Scientific Computing.** Lecture, three hours. Prerequisites: courses 115A, 151A-151B, Program in Computing 10A. S/U or letter grading:

**270A.** Techniques of Scientific Computing. Mathematical modeling for computer applications, scientific programming languages, software development, graphics, implementation of numerical algorithms on different architectures, case studies.

**270B-270C.** Computational Linear Algebra. Direct, fast, and iterative algorithms, overdetermined systems; singular value decomposition, regularization, sparse systems, algebraic eigenvalue problem.

**270D-270E.** Computational Fluid Dynamics. Basic equations, finite difference, finite element, pseudo-spectral, and vortex methods; stability, accuracy, shock capturing, and boundary approximations.

**270F.** Parallel Numerical Algorithms. Prerequisites: courses 270B-270C. Recommended: courses 270A, 270D-270E. Design, analysis, and implementation of numerical algorithms on modern vector and parallel computers. Discussion of classical numerical algorithms and novel parallel algorithms. Emphasis on applications to PDEs.

**271A. Tensor Analysis.** Prerequisite: course 131A or consent of instructor. Algebra and calculus of tensors on  $n$ -dimensional manifolds. Curvilinear coordinates and coordinate-free methods. Covariant differentiation. Green/Stokes theorem for differential forms. Applications to topics such as continuum and particle mechanics.

**271B. Analytical Mechanics.** Prerequisites: course 271A, prior knowledge of mechanics. Newtonian and Lagrangian equations. Hamilton principle. Principle of least action. Holonomic and nonholonomic systems. Hamilton canonical equations, contact transformations, applications.

**271C. Introduction to Relativity.** Prerequisites: course 271A, prior knowledge of mechanics. Restricted theory of relativity. Extensions to general theory. Relativistic theory of gravitation.

**271D. Wave Mechanics.** General concepts of mechanical systems (states, space-time, "logics," etc.). Classical and quantum examples. Correspondence principle. Spinors.

**272A. Foundations of Continuum Mechanics.** Lecture, three hours. Prerequisite: consent of instructor. Kinematic preliminaries, conservation laws for mass, momentum and energy, entropy production, constitutive laws. Linear elasticity, inviscid fluid, viscous fluid. Basic theorems of fluid mechanics. Simple solutions. Low Reynolds number flow, Stokes drag. High Reynolds number flow, boundary layers. Two-dimensional potential flow, simple aerofoil. Compressible flow, shocks.

**272B. Mathematical Aspects of Fluid Mechanics.** Lecture, three hours. Prerequisite: course 272A or consent of instructor. Review of basic theory of moving continua, fluid equations, integral theorems. Simple solutions, flow created by slowly moving bodies, flows where viscosity is negligible, vortices, boundary layers and their separation, water waves, ship waves, compressional waves, shock waves, turbulence theory (overview).

**272C. Magnetohydrodynamics.** Lecture, three hours. Prerequisites: course 272A, consent of instructor. Basic electromagnetism. Steady flows, Hartmann layers. Alfvén theorem and waves. Compressible media. Magnetostatic equilibria and stability.

**272D. Rotating Fluids and Geophysical Fluid Dynamics.** Lecture, three hours. Prerequisite: consent of instructor. Effects of Coriolis forces on fluid behavior. Inviscid flows, Taylor/Proudman theorem. Taylor columns, motions of bodies, inertial waves in spheres and spherical shells, Rossby waves. Ekman layers, spin-up. Shallow-water theory, wind-driven ocean circulation. Effects of stratification, Benard convection. Baroclinic instability, Eady model. S/U or letter grading.

**273. Optimization, Calculus of Variations, and Control Theory.** Prerequisite: consent of instructor. Application of abstract mathematical theory to optimization problems of calculus of variations and control theory. Abstract nonlinear programming and applications to control systems described by ordinary differential equations, partial differential equations, and functional differential equations. Dynamic programming.

**274A. Asymptotic Methods.** Lecture, three hours. Prerequisite: course 132. Fundamental mathematics of asymptotic analysis, asymptotic expansions of Fourier integrals, method of stationary phase. Watson lemma, method of steepest descent, uniform asymptotic expansions, elementary perturbation problems. S/U or letter grading.

**274B-274C. Perturbation Methods.** Lecture, three hours. Prerequisite: course 266A or equivalent. Boundary layer theory, matched asymptotic expansions, WKB theory. Problems with several time scales: Poincaré method, averaging techniques, multiple-scale analysis. Application to eigenvalue problems, nonlinear oscillations, wave propagation, and bifurcation problems. Examples from various fields of science and engineering.

## Probability and Statistics

**275A-275B. Probability Theory.** Prerequisite: course 245A or 265A. Connection between probability theory and real analysis. Weak and strong laws of large numbers, central limit theorem, conditioning, ergodic theory, martingale theory.

**275C. Stochastic Processes.** Lecture, three hours. Prerequisite: course 275B or consent of instructor. Brownian motion, continuous-time martingales, Markov processes, potential theory. S/U or letter grading.

**275D. Stochastic Calculus.** Lecture, three hours. Prerequisite: course 275C or consent of instructor. Stochastic integration, stochastic differential equations, Ito formula and its applications. S/U or letter grading.

**275E. Stochastic Particle Systems.** Lecture, three hours. Prerequisite: course 275C or consent of instructor. Interacting particle systems, including contact process, stochastic Ising model, and exclusion processes; percolation theory. S/U or letter grading.

**276A-276B. Statistical Theory.** Lecture, three hours. Prerequisite: Statistics 152C or consent of instructor. **276A.** Sufficiency, exponential families, least squares, maximum likelihood estimation, Fisher information, Cramér/Rao inequality, confidence intervals. **276B.** Asymptotic properties of tests and estimates, consistency and efficiency, likelihood ratio tests, chi-squared tests.

**276C. Statistical Decision Theory.** Prerequisite: course 276A. Invariant estimates and tests; best unbiased and locally best tests; multiple decision problems; application to general linear model; other topics.

**277. Data Analysis.** Lecture, three hours. Prerequisites: course 276A and Statistics M153A, or consent of instructor. Outline of principles of applied statistics, followed by survey of specific data analyses from physical, life, and social sciences. Methods include regression, analysis of variance and covariance, survival analysis, categorical data analysis, and simple time-series analysis. Illustration of transformations, plotting, model selection and evaluation, and estimation and decision procedures.

**278A. Multivariate Analysis.** Lecture, three hours. Prerequisite: course 276B or consent of instructor. Distributions in several dimensions, partial and multiple correlation. Normal distribution theory, Wishart distribution, Hotelling  $T^2$ . Principal components, canonical correlation, discriminant analysis. Introduction to linear structural relations and factor analysis.

**278B. Nonparametric and Robust Statistics.** Lecture, three hours. Prerequisite: course 276B or consent of instructor. Development of nonparametric and robust procedures for hypothesis testing, estimation in one- and two-sample problems, linear and nonlinear regression, multiple classification, density estimation.

**278C. Decision Theory.** Lecture, three hours. Prerequisites: courses 131A and 276B, or consent of instructor. Bayes, admissible, and minimax decision rules. Invariant tests and estimates, best unbiased tests, locally best tests. Application to general linear model.

**278D. Sequential Analysis.** Lecture, three hours. Prerequisites: courses 131A and 276B, or consent of instructor. Bayes sequential decision problems, stopping rule problems, optimality of sequential probability ratio test, Wald identity, asymptotic theory, and other topics.

**M279A-M279B. Linear Statistical Models.** (Same as Biostatistics M250A-M250B.) Lecture, three hours; discussion, one hour. Preparation: one upper division three-term theoretical statistics course. Topics include linear algebra applied to linear statistical models, distribution of quadratic forms, Gauss/Markov theorem, fixed and random component models, balanced and unbalanced designs. S/U or letter grading.

**M280. Statistical Computing.** (Same as Biomathematics M280 and Biostatistics M280.) Lecture, three hours. Prerequisites: course 115A, Statistics 152C, or equivalent. Introduction to theory and design of statistical programs: computing methods for linear and nonlinear regression, dealing with constraints, robust estimation, and general maximum likelihood methods.

## Special Studies

**285A-285N. Seminars.** (Formerly numbered 285A-285L.) Lecture, three hours. Prerequisite: consent of instructor. No more than two 285 courses may be applied toward M.A. degree requirements except by prior consent of graduate vice chair. Topics in various branches of mathematics and their applications by means of lectures and informal conferences with staff members. S/U or letter grading:

**285A.** History and Development of Mathematics.

**285B.** Number Theory.

**285C.** Algebra.

**285D.** Logic.

**285E.** Geometry.

**285F.** Topology.

**285G.** Analysis.

**285H.** Differential Equations.

**285I.** Functional Analysis.

**285J.** Applied Mathematics.

**285K.** Probability.

**285L.** Statistics.

**285N.** Dynamical Systems

**290. Seminar: Current Literature.** Intended for Ph.D. candidates. Readings and presentations of papers in mathematical literature under supervision of a staff member.

**296A-296N. Participating Seminars (1 to 4 units each).** (Formerly numbered 296A-296M.) Seminars and discussion by staff and students. S/U grading:

**296A.** History and Development of Mathematics.

**296B.** Number Theory.

**296C.** Algebra.

**296D.** Logic.

**296E.** Geometry.

**296F.** Topology.

**296G.** Analysis.

**296H.** Differential Equations.

**296I.** Functional Analysis.

**296J.** Applied Mathematics.

**296K.** Probability.

**296L.** Statistics.

**296M.** Mathematics.

**296N.** Dynamical Systems.

**370A-370B. Teaching of Mathematics.** (Formerly numbered 370.) Lecture, three hours; discussion, one hour. Prerequisites: course 33B, upper division standing. Course 370A is prerequisite to 370B. Topics in geometry, algebra, number theory, discrete mathematics, and functions presented from a problem-solving and student participation point of view, with emphasis on historical context and appropriate role of proof. S/U or letter grading.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching College Mathematics (2 units).** Discussion, one hour; two-day intensive training at beginning of Fall Quarter. Required of all new teaching assistants and new doctoral students. Special course for teaching assistants designed to deal with problems and techniques of teaching college mathematics. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA department chair and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study or Research (2 to 8 units).** Supervised individual reading and study on project approved by a faculty member, which may be preparation for M.A. examination. May be repeated for credit, but only two 596 courses (eight units) may be applied toward M.A. degree unless departmental consent is obtained.

**599. Research in Mathematics (2 to 12 units).** Prerequisite: advancement to doctoral candidacy. Study and research for Ph.D. dissertation. May be repeated for credit.

## Program in Computing

Program in Computing 1 is designed for students who wish a broad, general introduction to the topic of computers and computation. It is strongly recommended for those who wish to take course 3 or 10A, but who have no prior experience in computing.

Students who would like one course in programming should take either course 3 (uses FORTRAN) or 10A (uses C++), depending on the advice of their major department.

The sequence (courses 10A, 10B, 10C, 15, 30, 60) provides an extensive education in basic computer science. It is intended for Letters and Science majors who are completing a specialization in computing and for those planning to take upper division coursework in computer science. These students should take all or part of the sequence, depending on the advice of their major department.

## Lower Division Courses

**1. Introduction to Computers and Computing.** Lecture, three hours; laboratory, one hour; computer assignments, five hours. Fundamentals of computers and computing; editors, spreadsheets, file manager; machine organization and computer hardware; Internet; software applications. P/NP or letter grading.

**3. Introductory FORTRAN Programming (5 units).** Lecture, three hours; discussion, two hours; laboratory, eight hours. Students with credit for course 10A receive only two units of credit for this course. Basic principles of programming, using FORTRAN as example language. Terminal course intended for physical sciences and engineering majors who need to use the extensive library of existing FORTRAN programs. Students who wish to take more advanced program in computing courses should take course 10A rather than this course.

**10A. Introduction to Programming (5 units).** Lecture, three hours; discussion, two hours; laboratory, eight hours. Recommended prerequisite for students with no prior computing experience: course 1. Students with credit for course 3 receive only two units of credit for this course. No prior programming experience assumed. Basic principles of programming, using C++; algorithmic, procedural problem solving; program design and development; basic data types, control structures and functions; functional arrays and pointers; introduction to classes for programmer-defined data types. P/NP or letter grading.

**10B. Intermediate Programming (5 units).** Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced prerequisite: course 10A. Abstract data types and their implementation using the C++ class mechanism; dynamic data structures, including linked lists, stacks, queues, trees, and hash tables; applications; object-oriented programming and software reuse; recursion; algorithms for sorting and searching.

**10C. Advanced Programming (5 units).** Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced prerequisite: course 10B. More advanced algorithms and data structuring techniques; additional emphasis on algorithmic efficiency; advanced features of C++, such as inheritance and virtual functions; graph algorithms.

**15. Introduction to LISP and Symbolic Computation (5 units).** Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced prerequisite: course 10A. Introduction to symbolic computation using LISP programming language. Basics: list structures, recursion, function abstraction. Advanced topics: knowledge representation, higher-order functions, problem-solving algorithms and heuristics. P/NP or letter grading.

**20. Programming for Internet in Java Language (5 units).** Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced prerequisite: course 10B. Introduction to Java computer language. Class and interface hierarchies; graphics components and graphical user interfaces; streams; multithreading; event and exception handling. Issues in class design and design of interactive Web pages. P/NP or letter grading.

**30. Machine Organization and Assembly Language Programming (5 units).** Lecture, three hours; discussion, two hours; laboratory, eight hours. Enforced prerequisite: course 10B. Description of machine organization and operation. Representation of information, instruction sets and formats, addressing modes, memory organization and management, I/O processing and interrupts.

**60. Data Structures and Algorithms.** Lecture, three hours; discussion, one hour; laboratory, five hours. Enforced prerequisites: course 10B, Mathematics 31A, 31B, 61. Review of basic data structures: arrays, stacks, queues, lists, trees. Advanced data structures: priority queues, heaps, balanced trees. Sorting, searching techniques. Corresponding algorithms.

**97. Special Topics in Programming.** Lecture, three hours; discussion, one hour. Enforced prerequisite: course 10A. Variable topics in programming not covered in regular program in computing courses. May be repeated for credit with topic change. P/NP or letter grading.

## Upper Division Courses

**110. Introduction to Concurrent Computation (5 units).** Lecture, three hours; discussion, two hours; laboratory, eight hours. Prerequisite: course 10C or equivalent familiarity with programming in C or C++ language. Introduction to programming of concurrent (parallel) computers. Shared and distributed memory parallel architectures; currently available concurrent machines; parallel algorithms and development of concurrent programs; estimation of algorithmic performance; selected advanced topics.

**197. Advanced Topics in Programming.** Lecture, three hours; discussion, two hours. Prerequisite: consent of instructor. Variable topics in programming and the mathematics of programming not covered in regular program in computing courses. May be repeated for credit with topic change. P/NP or letter grading.

## Graduate Courses

**285C-285L. Seminars.** Considered equivalent to Mathematics 285A-285L for purposes of degree requirements. Topics in various computational fields by means of lectures and informal conferences with staff members. S/U or letter grading:

**285C.** Computational Algebra.

**285D.** Logic and Theory of Computation.

**285J.** Scientific Computation.

**285K.** Randomness and Computation.

**285L.** Computational Statistics.

**296. Participating Seminar: Logic and Theory of Computation (1 to 4 units).** Seminar and discussion by staff and students. S/U grading.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

## Statistics

### Lower Division Course

**50. Elementary Statistics.** Lecture, three hours; discussion, one hour. Preparation: three years of high school mathematics. Descriptive statistics, elementary probability, random variables, binomial and normal distributions. Large and small sample inference concerning means.

### Upper Division Courses

Students planning to pursue advanced degrees in statistics should enroll in the M152A, 152B-152C sequence. The 154A-154B sequence is less comprehensive than the 152 series. In particular, probability topics do not receive the same level of coverage. Courses 154A-154B are offered each term. The remaining upper division courses are usually offered once or twice each year. The tentative class schedule for the forthcoming academic year is posted in the Student Services Office in February.

**M152A. Probability Theory.** (Same as Mathematics M170A.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 32B, 33B. Not open to students with credit for course 154A, Mathematics M170A, or Electrical Engineering 131A. Probability distributions, random variables and vectors, expectation. P/NP or letter grading.

**152B-152C. Statistics.** Lecture, three hours; discussion, one hour. Not open to students with credit for courses 154A-154B. P/NP or letter grading. **152B.** Prerequisite: course M152A. Survey sampling, estimation, testing, data summary, one- and two-sample problems. **152C.** Prerequisite: course 152B. Analysis of variance, categorical data, linear regression, decision theory and Bayesian inference.

**M153A-M153B. Introduction to Computational Statistics.** (Same as Biomathematics M153A-M153B and Biostatistics M153A-M153B.) Lecture, three hours; discussion, one hour. Prerequisites: course 152B, Mathematics 115A. Linear and nonlinear regression analysis using package programs. Emphasis on relation between statistical theory, numerical results, and analysis of data. **M153A.** BMDP, SAS, and SPSS regression programs; general linear model theory; linear regression analysis; transforming and weighting; regression diagnostics; model building. **M153B.** Analysis of variance and covariance; nonlinear regression programs, analysis, and applications; maximum likelihood analysis; robust regression.

**154A-154B. Statistics.** Lecture, three hours; discussion, one hour. Not open to students with credit for courses M152A and 152B. P/NP or letter grading. **154A.** Requisites: Mathematics 32B, 33B. Not open to students with credit for course M152A, Mathematics M170A, or Electrical Engineering 131A. Probability, distributions, expectation, estimation, central limit theorem, confidence intervals, testing. **154B.** Requisite: course 154A. One- and two-sample problems, goodness of fit and contingency tables, correlation and regression, analysis of variance, nonparametrics.

## MATHEMATICS/ ECONOMICS

*Interdepartmental Program  
College of Letters and Science*

UCLA  
6363 Math Sciences  
Box 951555  
Los Angeles, CA 90095-1555  
(310) 825-4701  
<http://www.math.ucla.edu/undergrad/mathecon.htm>

Robert F. Brown, Ph.D., *Chair*

### Professors

Kirby A. Baker, Ph.D. (*Mathematics*)  
Robert F. Brown, Ph.D. (*Mathematics*)  
Bryan C. Ellickson, Ph.D. (*Economics*)  
Jonathan D. Rogawski, Ph.D. (*Mathematics*)  
William R. Zame, Ph.D. (*Economics*)

## Scope and Objectives

In recent years economics has become increasingly dependent on mathematical methods, and the mathematical tools it employs have become more sophisticated. Mathematically competent economists, with bachelor's degrees and with advanced degrees, are needed in industry and government. Graduate programs in economics and finance programs in graduate schools of management require

strong undergraduate preparation in mathematics for admission.

The B.S. degree program is designed to give students a solid foundation in both mathematics and economics, stressing those areas of mathematics and statistics that are most relevant to economics and the parts of economics that emphasize the use of mathematics and statistics.

## Undergraduate Study Bachelor of Science Degree Preparation for the Major

*Required:* Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Economics 1, 2, 11, Program in Computing 10A. Each course must be passed with a minimum grade of C-, and students must have a minimum overall grade-point average of 2.0 for the courses.

### The Major

*Required:* Seven Mathematics Department courses, including Mathematics 110A or 117, 115A, 131A, 164, M170A or Statistics M152A or 154A, Statistics 152B or 154B, and one additional course from 110A through 199 and Statistics M153A, M153B; six economics courses, including Economics 101, 102, and four additional upper division courses, with at least three from 105AH, 105BH, and 141 through 148. The seven Mathematics Department courses must be passed with an overall GPA of 2.0, as must the six courses from the Economics Department.

## Honors Program

Students who wish to graduate with departmental honors should apply for admission to the honors program in the Mathematics Department Student Services Office. They may apply any time after completing the preparation for the major courses with an overall GPA of 3.5 or better.

To qualify for honors at graduation, students must (1) complete Mathematics 110B or 131B, (2) prepare a senior thesis acceptable to the departmental honors committee, (3) present the thesis in Economics 195H, and (4) complete the major requirements with at least a 3.5 GPA in the mathematics and economics courses. Highest honors are awarded at the discretion of the departmental honors committee based on grade-point average and quality of the senior thesis.

## Computing Specialization

Students may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the major, (2) completing Mathematics 61 or 113, Program in Computing 10A, 10B, and two courses from 10C, 15, 30, 60, with a minimum grade of C- in each course and a combined GPA of at least 2.0, and (3) completing at least two courses from Mathematics 149 through 159. Students must petition for admission to this program and are ad-

vised to do so after they complete Program in Computing 10B (petitions should be filed in the Mathematics Department Student Services Office). Students graduate with a bachelor's degree in mathematics/economics and a specialization in computing.

Rudolph X. Meyer, Ph.D.

#### Adjunct Associate Professor

Sukumar Chakravarthy, Ph.D.

## Scope and Objectives

The Mechanical and Aerospace Engineering Department encompasses professional disciplines that are often divided into separate departments at other engineering schools. Curricula in aerospace engineering and mechanical engineering are offered on both the undergraduate and graduate levels. The Gorman Report ranked UCLA's mechanical engineering program tenth in the nation for undergraduate programs. The aerospace program is the only accredited aerospace program in the University of California system.

Because of the scope of the department, faculty research and teaching cover a wide range of technical disciplines. Research in thermal engineering emphasizes basic heat and mass transfer processes as well as thermal hydraulics. Topics in the area of design, dynamics, and control include robotics, mechanism design, control and guidance of aircraft and spacecraft, helicopter dynamics and aeromechanics, and dynamics and control of large space structures. Studies in structural mechanics range from fracture mechanics and wave propagation, structural dynamics and aeroelasticity of helicopters and jet engine blades, computational transonic aeroelasticity to structural optimization and synthesis, and mechanics of composite structures. In the area of fluid mechanics and acoustics, investigations are under way on combustion, flow instabilities, turbulence and thermal convection, aeroacoustics, and unsteady aerodynamics of turbomachines, helicopter rotors, and fixed-wing aircraft. Other areas of research include applied plasma physics, surface modification by plasma, fusion reactor design, experimental tokamak confinement physics; light water reactor safety; reliability and risk assessment methodology; societal risk management; and nuclear materials. The department also has research activity in computer-aided design and manufacturing.

At the undergraduate level, the department offers accredited programs leading to Bachelor of Science degrees in Aerospace Engineering and in Mechanical Engineering. The former includes opportunity to emphasize propulsion, aerodynamics, preliminary design, dynamics and control, or structures and space technology, while the latter includes opportunity to emphasize mechanical systems — design and control; power systems and thermal design;

manufacturing processes; or fluids engineering.

At the graduate level, the department offers programs leading to M.S. and Ph.D. degrees in Mechanical Engineering and in Aerospace Engineering. An M.S. in Manufacturing Engineering is also offered.

## Undergraduate Study

### Bachelor of Science in Aerospace Engineering

The ABET-accredited aerospace engineering program is concerned with the design and construction of various types of fixed-wing and rotary-wing (helicopters) aircraft used for air transportation and national defense. It is also concerned with the design and construction of spacecraft, the exploration and utilization of space, and related technological fields.

Aerospace engineering is characterized by a very high level of technology. The aerospace engineer is likely to operate at the forefront of scientific discoveries, often stimulating these discoveries and providing the inspiration for the creation of new scientific concepts. Meeting these demands requires the imaginative use of many disciplines, including fluid mechanics and aerodynamics, structural mechanics, materials and aeroelasticity, dynamics, control and guidance, propulsion, and energy conversion.

#### The Major

Course requirements are as follows (190 minimum units required):

(1) Ten department core courses: Civil and Environmental Engineering 108, Electrical Engineering 100, Materials Science and Engineering 14, Mechanical and Aerospace Engineering 20, 102, 103, M105A, 105D, 157, 192A.

(2) Twelve aerospace engineering core courses: Electrical Engineering 102; Mechanical and Aerospace Engineering 150A, 150B, 150P, 154A, 154B, 154S, 157A, 161A or 169A, 166A, 171A; one mathematics elective from Mechanical and Aerospace Engineering 191A, 192B, 192C, 192D, Electrical Engineering 103, 131A.

(3) Sixteen technical elective units (which should contain enough design units to satisfy the overall program requirement of at least 24 design units) selected from Mechanical and Aerospace Engineering 131A/131AL, 132A, 133A/133AL (thermodynamics, heat, and mass transfer); 153A (acoustics); 155, 163A, 164, 169A (unless taken as part of the core), Civil and Environmental Engineering 137L, Electrical Engineering 142 (dynamics and control); Mechanical and Aerospace Engineering 161A (unless taken as part of the core), 161B, 161C, 161D (space technology); 156B, 166C, 168, 193, Civil and Environmental Engineering 130F (structural and solid mechanics); Mechanical and Aerospace Engineering 162A,

162C, M192F (design and mechanisms); Materials Science and Engineering 143A.

(4) Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL.

(5) SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details.

### Bachelor of Science in Mechanical Engineering

The ABET-accredited mechanical engineering program is designed to provide a basic knowledge in thermodynamics, fluid mechanics, heat transfer, solid mechanics, mechanical design, dynamics, control, mechanical systems, manufacturing, and materials. The program includes fundamental subjects important to all mechanical engineers, with an option in mechanical systems — design and control; power systems and thermal design; manufacturing processes and fluids engineering.

#### The Major

Course requirements are as follows (192 minimum units required):

(1) Ten department core courses: Civil and Environmental Engineering 108, Electrical Engineering 100 (also 110L — see item 2 below), Materials Science and Engineering 14, Mechanical and Aerospace Engineering 20, 102, 103, M105A, 105D, 157, 192A.

(2) Ten mechanical engineering core courses: Electrical Engineering 110L (may be taken concurrently with 100), Mechanical and Aerospace Engineering 131A, 133A, 156A, 162A, 162B, 162M, 169A, 171A, 193.

(3) Twenty technical elective units, of which at least four should be laboratory units, to be selected from one of the subject areas listed below; no more than eight units may be taken from any one of subgroups a, b, c:

#### Fluids Engineering

(a) Mechanical and Aerospace Engineering 157A.

(b) Electrical Engineering 103, Mechanical and Aerospace Engineering 150A, 150B, 153A, 192B, 192C.

(c) Mechanical and Aerospace Engineering 136, 150P, 161A, 161B.

#### Manufacturing Processes

(a) Materials Science and Engineering 161L, Mechanical and Aerospace Engineering 163C, 172, 194, 195.

(b) Materials Science and Engineering 143A, Mechanical and Aerospace Engineering 163A, 164.

(c) Civil and Environmental Engineering 175, Mechanical and Aerospace Engineering 155, 174, 194.

**Mechanical Systems — Design and Control**

(a) Civil and Environmental Engineering 130F, 137L, Mechanical and Aerospace Engineering 162C, 163C, 172, 194.

(b) Electrical Engineering 103, 131A, 131B, Mathematics 115A, 115B, 131A, 131B, Mechanical and Aerospace Engineering 155, 156B, 164, 174, 191A.

(c) Materials Science and Engineering 143A, Mechanical and Aerospace Engineering 163A, 168.

**Power Systems and Thermal Design**

(a) Mechanical and Aerospace Engineering 131AL, 133AL.

(b) Electrical Engineering 103, Mechanical and Aerospace Engineering 132A, 135, 150A, 192B, 192C.

(c) Mechanical and Aerospace Engineering 134, 136, 150P, 161B, 174.

(4) Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Mechanical and Aerospace Engineering 94; Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL.

(5) SEAS general education (GE) course requirements. See Curricular Requirements in the College and Schools section of this catalog for details.

(6) Four free technical elective units selected from upper division courses offered by the department; students are strongly encouraged to consult their adviser.

**Graduate Study**

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

**Aerospace Engineering****Mechanical Engineering****Master's Degrees****Admission**

In addition to meeting the requirements of the Graduate Division, applicants to the Master of Science program in Aerospace Engineering and to the Master of Science program in Mechanical Engineering are required to take the General Test of the Graduate Record Examination (GRE). Applicants who expect to hold F1 or J1 visas are also required to take the GRE Subject Test in Engineering, Mathematics, or a related area.

Applicants not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework which cannot be applied toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies.

For requirements for the Graduate Certificate of Specialization, consult *Program Requirements for UCLA Graduate Degrees*.

Admission forms, including a departmental supplement to the application, may be obtained by writing to 48-121 Engineering IV, Box 951597, Los Angeles, CA 90095-1597 or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601.

**Areas of Study**

Applied dynamics systems control; dynamics; fluid mechanics; heat and mass transfer; structural and solid mechanics; and microelectromechanical systems (mechanical engineering only).

**Course Requirements**

At least nine courses are required, of which at least five must be graduate courses. In the thesis plan, seven of the nine must be formal courses, including at least four from the 200 series. The remaining two may be 598 courses involving work on the thesis. In the comprehensive examination plan, no units of 500-series courses may be applied toward the minimum course requirement. The courses should be chosen so that the breadth requirements and the requirements at the graduate level are met. The breadth requirements are only applicable to students who do not have a B.S. degree from an ABET-accredited aerospace or mechanical engineering program.

*Undergraduate Courses.* No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199; Civil Engineering 106A, 108, 199; Computer Science 152A, 152B, 171L, 199; Electrical Engineering 100, 101, 102, 103, 199; Materials Science and Engineering 110, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L, 199; Mechanical and Aerospace Engineering 102, 103, M105A, 105D, 199.

**Aerospace Engineering**

*Breadth Requirements.* Students are required to take at least three courses from the following four categories: (1) Mechanical and Aerospace Engineering 154A or 154B or 154S; (2) 150B or 150P; (3) 166A or 169A or 155; (4) 161A or 171A.

*Graduate-Level Requirement.* Students are required to take at least one course from the following: Mechanical and Aerospace Engineering 250D, 253B, 254A, 254B, 255B, 256F, 263B, 269D, or 271B. The remaining courses can be taken to gain depth in one or more of the several specialty areas covering the existing major fields in the department.

**Mechanical Engineering**

*Breadth Requirements.* Students are required to take at least three courses from the following four categories: (1) Mechanical and Aerospace

Engineering 162A or 169A or 171A; (2) 150A or 150B; (3) 131A or 133A; (4) 156A or 156B.

*Graduate-Level Requirement.* Students are required to take at least one course from the following: Mechanical and Aerospace Engineering 231A, 231B, 231C, 250A, 255A, 256A, M256B, M269A, or 271A. The remaining courses can be taken to gain depth in one or more of the several specialty areas covering the existing major fields in the department.

**Comprehensive Examination Plan**

The comprehensive examination, which is offered every quarter, is required to be in written form. The comprehensive examining committee may conduct an oral examination after review of the written examination. The student may, in consultation with the adviser and the major field chair, choose to take the first part of the Ph.D. preliminary written examination as the comprehensive examination. In case of failure, the student may be reexamined once with the consent of the graduate adviser.

**Thesis Plan**

The thesis must describe some original piece of research that has been done under the supervision of the thesis committee. Students would normally start to plan the thesis at least one year before the award of the M.S. degree is expected. There is no examination under the thesis plan.

**Doctoral Degrees****Admission**

In addition to meeting the requirements of the Graduate Division, applicants to the Ph.D. program in Aerospace Engineering and to the Ph.D. program in Mechanical Engineering are required to take the General Test of the Graduate Record Examination (GRE). Applicants who expect to hold F1 or J1 visas are also required to take the GRE Subject Test in Engineering, Mathematics, or a related area.

Applicants to the Ph.D. program normally should have completed the requirements for the master's degree with at least a 3.25 grade-point average and have demonstrated creative ability. Normally the M.S. degree is required for admission to the Ph.D. program. Exceptional students, however, can be admitted to the Ph.D. program without having the M.S. degree.

Applicants not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework which cannot be applied toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies.

Admission forms, including a departmental supplement to the application, may be obtained by writing to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601.

## Major Fields or Subdisciplines

Applied dynamics systems control; dynamics; fluid mechanics; heat and mass transfer; structural and solid mechanics; manufacturing and design (mechanical engineering only); and microelectromechanical systems (mechanical engineering only).

## Course Requirements

There is no formal course requirement for the Ph.D. degree. Normally, however, the student takes courses to acquire the knowledge needed for the written and oral preliminary examinations. The basic program of study for the Ph.D. degree is built around major and minor fields. The syllabus for each major field can be obtained from the department. Each minor field embraces a body of knowledge equivalent to three courses, at least two of which are graduate courses. Grades of B – or better, with a grade-point average of at least 3.33 in all courses included in the minor field, are required. If the student fails to satisfy the minor field requirements through coursework, a minor field examination may be taken (once only). The minor fields are usually chosen to support the major field and are usually subsets of other major fields.

For information on completing the Engineer degree, see Engineering Schoolwide Programs.

## Written and Oral Qualifying Examinations

After mastering the body of knowledge defined in the major field, the student takes a written preliminary examination covering this knowledge. This examination should be completed within the first two years of full-time enrollment in the Ph.D. program. Students may not take an examination more than twice. After passing the preliminary examination, the student may take the University Oral Qualifying Examination. The nature and content of the qualifying examination are at the discretion of the doctoral committee but include a review of the prospectus of the dissertation. The examination may include a broad inquiry into the student's preparation for research.

*Note: Doctoral Committees.* A doctoral committee consists of a minimum of four members. Three members, including the chair, are "inside" members and must hold appointments at UCLA in the student's major department in the School of Engineering and Applied Science. The "outside" member must be a UCLA faculty member outside the student's major department.

## Manufacturing Engineering

### Master's Degree

#### Admission

In addition to meeting the requirements of the Graduate Division, applicants to the Master of Science program in Manufacturing Engineering are required to take the General Test of the Graduate Record Examination (GRE). Appli-

cants who expect to hold F1 or J1 visas are also required to take the GRE Subject Test in Engineering, Mathematics, or a related area.

Applicants not having adequate preparation may be admitted provisionally and may be required to undertake certain remedial coursework which would not be applicable toward the degree. On arrival at UCLA, an adviser helps the student plan a program which can remedy any such deficiencies.

For requirements for the Graduate Certificate of Specialization, consult *Program Requirements for UCLA Graduate Degrees*.

Admission forms, including a departmental supplement to the application, may be obtained by writing to 48-121 Engineering IV, Box 951597, Los Angeles, CA 90095-1597 or to the Office of the Associate Dean for Academic and Student Affairs, School of Engineering and Applied Science, UCLA, 6426 Boelter Hall, Box 951601, Los Angeles, CA 90095-1601.

## Areas of Study

Consult the department.

## Course Requirements

At least nine courses are required, of which at least five must be graduate courses. In the thesis plan, seven of the nine must be formal courses, including at least four from the 200 series. The remaining two may be 598 courses involving work on the thesis. In the comprehensive examination plan, no units of 500-series courses may be applied toward the minimum course requirement. Choices may be made from the following major areas:

*Undergraduate Courses.* No lower division courses may be applied toward graduate degrees. In addition, the following upper division courses are not applicable toward graduate degrees: Chemical Engineering M105A, 199; Civil Engineering 106A, 108, 199; Computer Science 152A, 152B, 171L, 199; Electrical Engineering 100, 101, 102, 103, 199; Materials Science and Engineering 110, 120, 130, 131, 131L, 132, 150, 160, 161L, 190, 191L, 199; Mechanical and Aerospace Engineering 102, 103, M105A, 105D, 199.

*Upper Division Courses.* Students are required to take at least three courses from the following: Mechanical and Aerospace Engineering 163A, 163C, 168, 174, 192D, 193, 194, 195; Materials Science and Engineering 147B.

*Graduate Courses.* Students are required to take at least three courses from the following: Mechanical and Aerospace Engineering 263A, 263C, 263D, 280, 293, 294, 295A, 296A, 296B, 297.

*Additional Courses.* The remaining courses may be taken from other major fields of study in the department or from the following: Mathematics 120A, 120B; Computer Science 241A, 241B; Architecture and Urban Design 226B, M227B, 227D; Management 240A, 240B, 240C, 240D, 241A, 241B, 242A, 242B, 243A, 243B, 243C.

## Comprehensive Examination Plan

The comprehensive examination, which is offered every quarter, is required to be in written form. The comprehensive examining committee may conduct an oral examination after review of the written examination. In case of failure, students may be reexamined once with the consent of the graduate adviser.

## Thesis Plan

The thesis must describe some original piece of research that has been done under the supervision of the thesis committee. Students would normally start to plan the thesis at least one year before the award of the M.S. degree is expected. There is no examination under the thesis plan.

## Mechanical and Aerospace Engineering

### Lower Division Courses

**20. FORTRAN Programming with Numerical Methods Applications.** Lecture, three hours; laboratory, two hours; outside study, seven hours. Prerequisites: Mathematics 31A, 31B. Introduction to programming with FORTRAN. Applications to numerical methods used in engineering.

**94. Introduction to Computer-Aided Design and Drafting.** Lecture, two hours; laboratory, four hours. Fundamentals of computer graphics and two- and three-dimensional modeling on computer-aided design and drafting systems. Students use one or more on-line computer systems to design and display various objects.

### Upper Division Courses

**102. Mechanics of Particles and Rigid Bodies.** Lecture, three hours; recitation, two hours. Prerequisites: Mathematics 33A, Physics 8A. Newtonian mechanics (statics and dynamics) of particles and rigid bodies. Fundamental concepts of mechanics. Statics, kinematics, and kinetics of particles and rigid bodies. Impulse/momentum and work/energy relationships. Applications.

**103. Elementary Fluid Mechanics.** Lecture, three hours; recitation, two hours. Prerequisites: Mathematics 32B, 33A, Physics 8B. Introductory course dealing with application of principles of mechanics to flow of compressible and incompressible fluids.

**M105A. Introduction to Engineering Thermodynamics.** (Same as Chemical Engineering M105A.) Lecture, four hours; recitation, one hour. Prerequisites: Mathematics 32B, Physics 8B. Phenomenological thermodynamics. Concepts of equilibrium, temperature, and reversibility. First law and concept of energy; second law and concept of entropy. Equations of state and thermodynamic properties. Engineering applications of these principles in analysis and design of closed and open systems.

**105D. Transport Phenomena.** Lecture, four hours; recitation, one hour; outside study, seven hours. Prerequisites: course 103, Mathematics 32B, 33A, Physics 8B. Transport phenomena; heat conduction, mass species diffusion, convective heat and mass transfer, and radiation. Engineering applications in thermal and environmental control.

**131A. Intermediate Heat Transfer.** Lecture, four hours; other, eight hours. Prerequisites: courses 20, 105D, 192A. Steady conduction: two-sided, two-ended, tapered, and circular fins; buried cylinders, thick fins. Transient conduction: slabs, cylinders, products. Convection: transpiration, laminar pipe flow, film condensation, boundary layers, dimensional analysis, working correlation, surface radiation. Two-stream heat exchangers. Elements of thermal design.

**131AL. Thermodynamics and Heat Transfer Laboratory.** Laboratory, eight hours; outside study, four hours. Requisites: courses 131A, 157. Experimental study of physical phenomenon and engineering systems using modern data acquisition and processing techniques. Experiments include studies of heat transfer phenomena and testing of a cooling tower, heat exchanger, and internal combustion engine. Students take and analyze data and discuss physical phenomena.

**132A. Mass Transfer.** Lecture, four hours; recitation, one hour; outside study, 10 hours. Requisite: course 131A. Principles of mass transfer by diffusion. Mass transfer by convection in laminar and turbulent flows. Simultaneous heat and mass transfer. Applications including combustion of solids and volatile fuels, evaporation and condensation, ablation and transpiration cooling, gas absorption and catalysis.

**133A. Engineering Thermodynamics.** Lecture, four hours; outside study, eight hours. Requisites: courses 103, M105A, 105D. Applications of thermodynamic principles to engineering processes. Energy conversion systems. Rankine cycle and other cycles, refrigeration, psychrometry, reactive and nonreactive fluid flow systems.

**133AL. Power Conversion Thermodynamics Laboratory.** Laboratory, eight hours; outside study, four hours. Requisites: courses 133A, 157. Experimental study of power conversion and heat transfer systems using state-of-the-art plant process instrumentation and equipment. Experiments include studies of thermodynamic operating characteristics of an actual Brayton cycle, Rankine cycle, compressive refrigeration unit, and absorption refrigeration unit.

**134. Design and Operation of Thermal Hydraulic Power Systems.** Lecture, three hours; laboratory, three hours; outside study, six hours. Requisites: courses 133A, 133AL. Thermal hydraulic design, maintenance and operation of power systems, gas turbines, steam turbines, centrifugal refrigeration units, absorption refrigeration units, compressors, valves and piping systems, and instrumentation and control systems.

**135. Fundamentals of Nuclear Power.** Prerequisite: junior standing. Introduction to nuclear engineering; nuclear physics, neutron cross sections, nuclear fission and fusion; elementary analysis and design of reactors. Criticality, one-group neutron diffusion theory, heat removal, and heterogeneous effects.

**136. Thermal Hydraulic Design of Nuclear and Other Power Systems.** Lecture, four hours; recitation, two hours; outside study, six hours. Prerequisite: senior standing. Thermal hydraulic design of nuclear and other power systems, power generation and heat removal, power cycle, thermal hydraulic component design, overall plant design, steady state and transient operation.

**137. Introduction to Fusion Engineering and Reactor Design.** Prerequisite: course 135 or consent of instructor. Fusion reactions, fuel cycle, and operating conditions. Magnetic and inertial confinement, including tokamaks, magnetic mirrors, laser fusion, and selected others. Concepts for and subsystems of fusion reactors. Design of reactors and key subsystems. Application of fusion reactors for electricity, fissionable fuel, and/or chemical fuel production.

**150A. Intermediate Fluid Mechanics.** Lecture, four hours; outside study, eight hours. Requisites: courses 20, 103, 192A. Basic equations governing fluid motion. Fundamental solutions of Navier/Stokes equations. Lubrication theory. Elementary potential flow theory. Boundary layers. Turbulent flow in pipes and boundary layers. Compressible flow: normal shocks, channel flow with friction or heat addition.

**150B. Aerodynamics.** Prerequisites: courses 103, 150A, or equivalent. Advanced aspects of potential flow theory. Incompressible flow around thin airfoils ( $C_l$ ,  $C_m$ ) and wings (lift, induced drag). Gas dynamics: oblique shocks, Prandtl/Meyer expansion. Linearized subsonic and supersonic flow around thin airfoils and wings. Wave drag. Transonic flow.

**150P. Jet Propulsion Systems.** Lecture, four hours; recitation, two hours; outside study, six hours. Prerequisites: courses M105A, 150A, or equivalent. Thermodynamic properties of gases, aircraft jet engine cycle analysis and component performance, component matching, advanced aircraft engine topics.

**153A. Engineering Acoustics.** Prerequisite: upper division standing in engineering or consent of instructor. Fundamental course in acoustics; propagation of sound; sources of sound. Design of field measurements. Estimation of jet and blade noise with design aspects.

**154A. Preliminary Design of Aircraft.** Prerequisite: course 154S. Classical preliminary design of an aircraft, including weight estimation, performance and stability, and control consideration. Term assignment consists of preliminary design of a low-speed aircraft.

**154B. Design of Aerospace Structures.** Prerequisites: courses 154A, 166A. Design of aircraft, helicopter, spacecraft, and related structures. External loads, internal stresses. Applied theory of thin-walled structures. Material selection, design using composite materials. Design for fatigue prevention and structural optimization. Field trips to aerospace companies.

**154S. Flight Mechanics, Stability, and Control of Aircraft.** Prerequisites: courses 150A, 150B. Aircraft performance, flight mechanics, stability, and control; some basic ingredients needed for design of an aircraft. Effects of airplane flexibility on stability derivatives.

**155. Intermediate Dynamics.** Lecture, four hours; outside study, eight hours. Requisite: course 102. Axioms of Newtonian mechanics, generalized coordinates, Lagrange equation, variational principles; central force motion; kinematics and dynamics of a rigid body. Euler equations, motion of rotating bodies, oscillatory motion, normal coordinates, orthogonality relations.

**156A. Strength of Materials.** Lecture, four hours; recitation, one hour; outside study, seven hours. Requisites: course 192A, Civil Engineering 108. Concepts of stress, strain, and material behavior. Stresses in loaded beams with symmetric and asymmetric cross sections. Torsion of cylinders and thin-walled structures, shear flow. Stresses in pressure vessels, press-fit and shrink-fit problems, rotating shafts. Curved beams. Contact stresses. Strength and failure, plastic deformation, fatigue, elastic instability.

**156B. Introduction to Elasticity.** Lecture, four hours; outside study, eight hours. Requisites: courses 156A, 192A. Kinematics of deformation, strain displacement relations. Balance laws, stress tensor, principal stresses, equilibrium equations. Conservation of energy, strain energy function. Generalized Hook's law, thermoplasticity and viscoelasticity. Stress calculation in cylinders and spheres. Plane elasticity, Airy's stress function. Stress concentration problems at holes, corners, and crack tips.

**157. Basic Mechanical Engineering Laboratory.** Laboratory, eight hours; outside study, four hours. Requisites: courses 103, M105A, 105D, Civil Engineering 108, Electrical Engineering 100. Methods of measurement of basic quantities and performance of basic experiments in heat transfer, fluid mechanics, structures, and thermodynamics. Primary sensors, transducers, recording equipment, signal processing, and data analysis.

**157A. Fluid Mechanics and Aerodynamics Laboratory.** Laboratory, eight hours. Requisites: courses 150A, 150B, 157. Experimental illustration of important physical phenomena in area of fluid mechanics/aerodynamics, as well as hands-on experience with design of experimental programs and use of modern experimental tools and techniques in the field.

**161A. Introduction to Astronautics.** Lecture, four hours; outside study, eight hours. Requisite: course 102. Recommended: course 192A. Space environment of Earth, trajectories and orbits, step rockets and staging, two-body problem, orbital transfer and rendezvous, problem of three bodies, elementary perturbation theory, influence of Earth's oblateness.

**161B. Introduction to Space Technology.** Lecture, four hours; outside study, eight hours. Recommended (but not requisite): courses 102, 105D, 150P, 161A. Propulsion requirements for typical space missions, thermochemistry of propellants, internal ballistics, regenerative cooling, liquid propellant feed systems, POGO instability. Electric propulsion. Multistage rockets, separation dynamics. Satellite structures and materials, loads and vibrations. Thermal control of spacecraft.

**161C. Spacecraft Design.** Lecture, four hours; outside study, eight hours. Requisite: course 161B. Coverage of preliminary design, by students, of a small spacecraft carrying a lightweight scientific payload with modest requirements for electric power, lifetime, and attitude stability. Students work in groups of three or four, with each student responsible primarily for a subsystem and for integration with the whole.

**161D. Space Technology Hardware Design.** Lecture, two hours; laboratory, three hours; outside study, seven hours. Recommended requisite or corequisite: course 161B. Design, by students, of hardware with applications to space technology. Designs are then built by SEAS professional machine shop and tested by the students. New project carried out each year.

**162A. Introduction to Mechanisms and Mechanical Systems.** Lecture, four hours; outside study, eight hours. Requisites: courses 20, 102. Analysis and synthesis of mechanisms and mechanical systems. Kinematics, dynamics, and mechanical advantages of machinery. Displacement velocity and acceleration analyses of linkages. Fundamental law of gearing and various gear trains. Computer-aided mechanism design and analysis.

**162B. Mechanical Product Design.** Lecture, two hours; laboratory, four hours; outside study, six hours. Requisites: courses 94, 156A, 162A, 193, Electrical Engineering 110L. Lecture and laboratory (design) course involving modern design theory and methodology for development of mechanical products. Economics, marketing, manufacturability, quality, and patentability. Design considerations taught and applied to hands-on design project.

**162C. Electromechanical System Design Laboratory.** Lecture, one hour; laboratory, eight hours; outside study, three hours. Requisite: course 162B. Laboratory and design course consisting of design, development, construction, and testing of complex mechanical and electromechanical systems. The assembled machine is instrumented and monitored for operational characteristics.

**162M. Senior Mechanical Engineering Design.** Lecture, one hour; laboratory, six hours; outside study, five hours. Requisites: courses 131A, 133A, 162B, 169A, 171A. Must be taken in last two academic terms of students' programs. Analytical design course of a large engineering system culminating in its computer simulation. Design factors include efficiency, economy, safety, reliability, and social impact. Final report of engineering specifications and drawings to be presented by design teams.

**163A. Introduction to Computer-Controlled Machines.** Prerequisite: course 171A (may be taken concurrently). Modeling of computer-controlled machines, including electrical and electronic elements, mechanical elements, actuators, sensors, and overall electromechanical systems. Motion and command generation, servo-controller design, and computer/machine interfacing.

**163C. Robotics and Motion Control Laboratory.** Laboratory, eight hours; outside study, four hours. Prerequisite: course 171A or consent of instructor. Hands-on experience with robotic devices and articulated machines, with emphasis on motion planning and control. Design and implementation of servo control of DC motors, gear trains, multi-axis coordination, programming of industrial robots. Final project required.

**164. Digital Control of Physical Systems.** Prerequisite: course 171A or Electrical Engineering 141. Analysis and design of digital control systems. Discrete-time transfer functions for physical systems. Design using classical methods: performance specifications, frequency response, root locus; compensation. Design using state-space methods: control laws, estimators. Practical considerations: roundoff, sample rate selection, computer implementation.

**166A. Analysis of Flight Structures.** Prerequisite: Civil Engineering 108. Introduction to two-dimensional elasticity, stress-strain laws, yield and fatigue; bending of beams; torsion of beams; warping; torsion of thin-walled cross sections: shear flow, shear-lag; combined bending torsion of thin-walled, stiffened structures used in aerospace vehicles; elements of plate theory; buckling of columns.

**166C. Design of Composite Structures.** Prerequisite: course 156A or 166A. History of composites, stress-strain relations for composite materials, bending and extension of symmetric laminates, failure analysis, design examples and design studies, buckling of composite components, nonsymmetric laminates, micromechanics of composites.

**168. Introduction to Finite Element Technology.** Lecture, four hours; laboratory, four hours; outside study, four hours. Requisites: course 20, Civil Engineering 108, Mathematics 33A. Recommended: courses 94 or 194, 166A. Introduction to finite element method (FEM) and its matrix formulation of computer implementation of FEM concepts; practical use of FEM codes. Preprocessing and postprocessing techniques; graphics display capabilities; geometric and analysis modeling; interactive engineering systems; links with computer-aided design. Recent trends in FEM technology; design optimization. Term projects using FEM computer codes.

**169A. Introduction to Mechanical Vibrations.** Lecture, four hours; outside study, eight hours. Requisites: courses 102, 192A, Civil Engineering 108. Recommended: Electrical Engineering 102. Fundamentals of vibration theory and applications. Free, forced, and transient vibration of one and two degrees of freedom systems, including damping. Normal modes, coupling, and normal coordinates. Vibration isolation devices, vibrations of continuous systems.

**171A. Introduction to Feedback and Control Systems: Dynamic Systems Control I.** Prerequisite: course 191A or 192A or Electrical Engineering 102 or equivalent. Introduction to feedback principles, control systems design, and system stability. Modeling of physical systems in engineering and other fields; transform methods; controller design using Nyquist, Bode, and root locus methods; compensation; computer-aided analysis and design.

**171C. Dynamic Systems Control II.** Recommended (but not prerequisite): course 171A or Electrical Engineering 141. State-space models of continuous-time and discrete-time dynamic systems. Linear algebra of systems; vector spaces; geometric concepts; transformations and matrices; canonical forms. Stability. Controllability and observability. State representation of nonlinear systems; linearization. Emphasis on modeling concepts, applications, and computer-aided problem solving.

**172. Control System Design Laboratory.** Laboratory, eight hours; outside study, four hours. Requisite: course 171A. Application of frequency domain design techniques for control of mechanical systems. Successful controller design requires students to formulate performance measures for control problem, experimentally identify mechanical system, and develop uncertainty descriptions for design models.

**174. Probability and Its Applications to Risk, Reliability, and Quality Control.** Lecture, four hours; outside study, eight hours. Introduction to probability theory; random variables, distributions, functions of random variables, models of failure of components, reliability, redundancy, complex systems, stress-strength models, fault tree analysis, statistical quality control by variables and by attributes, acceptance sampling.

**180. Introduction to Micromachining.** Lecture, four hours; outside study, eight hours. Physical phenomena in microscale. Photolithography and etching. Basics of silicon processing. Fundamentals of bulk micromachining and examples. Thin film formation. Surface micromachining and examples. Microplating, including LIGA. Nonlithographic micromachining.

**191A. Complex Analysis and Integral Transforms.** Lecture, four hours; outside study, eight hours. Prerequisite: course 192A. Complex variables, analytic functions, conformal mapping, contour integrals, singularities, residues, Cauchy integrals; Laplace transform: properties, convolution, inversion; Fourier transform: properties, convolution, FFT, applications in dynamics, vibrations, structures, and heat conduction.

**192A. Mathematics of Engineering.** Prerequisites: Mathematics 33A, 33B. Methods of solving ordinary differential equations in engineering. Review of matrix algebra. Solutions of systems of first- and second-order ordinary differential equations. Introduction to Laplace transforms and their application to ordinary differential equations. Introduction to boundary value problems.

**192B. Mathematics of Engineering.** Prerequisite: course 192A or equivalent. Analytical methods for solving partial differential equations arising in engineering. Separation of variables, eigenvalue problems, Sturm/Liouville theory. Development and use of special functions. Representation by means of orthonormal functions; Galerkin method. Use of Green's function and transform methods.

**192C. Numerical Methods for Engineering Applications.** Lecture, four hours; outside study, eight hours. Requisites: courses 20, 192A. Recommended: Electrical Engineering 103. Basic topics from numerical analysis having wide application in solution of practical engineering problems, computer arithmetic, and errors. Solution of linear and nonlinear systems. Algebraic eigenvalue problem. Least-square methods, numerical quadrature, and finite difference approximations. Numerical solution of initial and boundary value problems for ordinary and partial differential equations.

**192D. Introduction to Random Processes.** Lecture, four hours; outside study, eight hours. Recommended (but not prerequisite): course 174 or equivalent. Elements of probability, time, series, probability density function (PDF), averages, characteristics function; joint PDF, correlation function, and energy density function; Gaussian distributions, white noise process; random walk, least-square linear smoothing.

**M192F. Numerical Optimization Methods for Engineering Design.** (Same as Civil Engineering M140.) Lecture, four hours; outside study, eight hours. Requisites: course 20 or Civil Engineering 15A and 15B, Mathematics 32A, 33A. Recommended: Mathematics 115A. Systematic presentation of numerical optimization methods for engineering design: one-dimensional minimization, unconstrained minimization, linearly constrained minimization, general nonlinear problems, approximation concepts, duality. Optimization problem statements. Advantages and limitations of numerical optimization. Applications.

**193. Introduction to Manufacturing Processes.** (Formerly numbered Materials Science 147B.) Lecture, four hours; outside study, eight hours. Requisite: Materials Science 14. Mechanical behavior of materials. Manufacturing properties of metals. Surfaces of materials. Metal cutting, deformation processes, and casting. Joining and fastening. Nonconventional material-removal processes. Polymers, ceramics, and composites.

**194. Introduction to CAD/CAM Systems: Design and Implementation.** Laboratory, eight hours; outside study, four hours. Requisites: courses 20, 94. Hands-on experience with CAD/CAM systems design and implementation, with special emphasis on theory of parametric curves and surfaces and their computer interactive graphics implementation.

**195. Computer Numerical Control and Applications.** Laboratory, eight hours; outside study, four hours. Prerequisite: upper division standing. Fundamentals of numerical control (NC) technology. Programming of computer numerical control (CNC) machines in NC codes and APT language and with CAD/CAM systems. NC postprocessors and distributed numerical control. Operation of CNC lathe and milling machines. Programming and machining of complex engineering parts.

**199. Special Studies (2 to 8 units).** Prerequisites: senior standing, consent of instructor. Individual investigation of selected topic to be arranged with a faculty member. Enrollment request forms available in department office. Occasional field trips may be arranged. May be repeated for credit.

## Graduate Courses

**231A. Convective Heat Transfer Theory.** Lecture, four hours; outside study, eight hours. Requisites: courses 131A, 192B. Recommended: course 250A. Conservation equations for flow of real fluids. Analysis of heat transfer in laminar and turbulent, incompressible and compressible flows. Internal and external flows; free convection. Variable wall temperature; effects of variable fluid properties. Analogies among convective transfer processes.

**231B. Radiation Heat Transfer.** Prerequisite: course 131A. Radiant intensity and flux. Radiation properties of walls, gases, and particulates. Heat transfer by combined conduction, convection, and radiation in nonabsorbing and absorbing media. Applications to industrial, aerospace, energy conversion, and environmental problems.

**231C. Boiling and Condensation.** Prerequisites: courses 131A, 150A, or equivalent. Phenomenological theories of boiling. Hydrodynamic instability of liquid-vapor interfaces and their application to predict maximum and minimum heat fluxes. Forced flow boiling and boiling crisis in pipes. Pool and forced flow boiling of liquid metals. Film and dropwise condensation.

**231D. Application of Numerical Methods to Transport Phenomena.** Prerequisite: course 132A or consent of instructor. Numerical techniques for solving selected problems in heat and mass transfer. Applications include free convection, boundary layer flow, two-phase flow, separated flow, flow in porous media. Effects of concentration and temperature gradients, chemical reactions, radiation, electric and magnetic fields.

**231E. Two-Phase Flow Heat Transfer.** Prerequisites: courses 131A, 150A. Generalized constitutive equations for various two-phase flow regimes. Interfacial heat and mass transfer. Equilibrium and nonequilibrium flow models. Two-phase flow instability. One-dimensional wave propagation. Two-phase heat transfer applications: convective boiling, pressure drop, critical and oscillatory flows.

**231F. Advanced Heat Transfer.** Prerequisite: course 231A. Advanced topics in heat transfer from current literature. Linear and nonlinear theories of thermal and hydrodynamic instability; variational methods in transport phenomena; phenomenological theories of turbulent heat and mass transport.

**232B. Advanced Mass Transfer.** Prerequisites: courses 131A, 132A. Formulation of general convective heat and mass transfer problem, including equilibrium and nonequilibrium chemistry. Similar and nonsimilar solutions for laminar flows; solution procedures for turbulent flows. Multicomponent diffusion. Application to hypersonic boundary layer, ablation and transpiration, cooling combustion.

**235A. Nuclear Reactor Theory.** Prerequisites: courses 135, 192A. Underlying physics and mathematics of nuclear reactor (fission) core design. Diffusion theory, reactor kinetics, slowing down and thermalization, multigroup methods, introduction to transport theory.

**236A. Nuclear Materials Engineering.** Prerequisites: course 135 and Materials Science 143A, or consent of instructor. Materials requirements for nuclear technologies; radiation effects on mechanical properties, void swelling and creep, fuel and solid breeder swelling and restructuring, gas release, computer codes for swelling and gas release, structural analysis of fission and fusion materials including radiation effects.

**M237B. Fusion Plasma Physics and Analysis.** (Same as Electrical Engineering M287.) Requisite: Electrical Engineering M185. Fundamentals of plasmas at thermonuclear burning conditions. Fokker/Planck equation and applications to heating by neutral beams, RF, and fusion reaction products. Bremsstrahlung, synchrotron, and atomic radiation processes. Plasma surface interactions. Fluid description of burning plasma. Dynamics, stability, and control. Applications in tokamaks, tandem mirrors, and alternate concepts.

**237C. Fusion Reactor Technology and Design.** Prerequisites: courses 135, 137. Magnetic fusion reactor concepts and technological components, solid and liquid breeder blankets, neutronics, fuel cycles, in-vessel components, radiation shielding, magnets, system design and optimization.

**239B. Seminar: Current Topics in Transport Phenomena (2 to 4 units).** (Formerly numbered 239BA-239BZ.) Seminar, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Lectures, discussions, student presentations, and projects in areas of current interest in transport phenomena. May be repeated for credit. S/U grading.

**239D. Seminar: Current Topics in Nuclear Engineering (2 to 4 units).** (Formerly numbered 239DA-239DZ.) Seminar, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Lectures, discussions, student presentations, and projects in areas of current interest in nuclear engineering. May be repeated for credit. S/U grading.

**239F. Special Topics in Transport Phenomena (2 to 4 units).** (Formerly numbered 239FA-239FZ.) Lecture, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Advanced and current study of one or more aspects of heat and mass transfer, such as turbulence, stability and transition, buoyancy effects, variational methods, and measurement techniques. May be repeated for credit with topic change. S/U grading.

**239G. Special Topics in Nuclear Engineering (2 to 4 units).** (Formerly numbered 239GA-239GZ.) Lecture, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Advanced study in areas of current interest in nuclear engineering, such as reactor safety, risk-benefit trade-offs, nuclear materials, and reactor design. May be repeated for credit with topic change. S/U grading.

**239H. Special Topics in Fusion Physics, Engineering, and Technology (2 to 4 units).** (Formerly numbered 239HA-239GH.) Lecture, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Advanced treatment of subjects selected from research areas in fusion science and engineering, such as instabilities in burning plasmas, alternate fusion confinement concepts, inertial confinement fusion, fission-fusion hybrid systems, and fusion reactor safety. May be repeated for credit with topic change. S/U grading.

**250A. Foundations of Fluid Dynamics.** Lecture, four hours; outside study, eight hours. Prerequisite: course 150A or consent of instructor. Development and application of fundamental principles of fluid mechanics at graduate level, with emphasis on incompressible flow. Flow kinematics, basic equations, constitutive relations, exact solutions on the Navier/Stokes equations, vorticity dynamics, decomposition of flow fields, potential flow.

**250B. Viscous and Turbulent Flows.** Prerequisite: course 150A or consent of instructor. Fundamental principles of fluid dynamics applied to study of fluid resistance. States of fluid motion discussed in order of advancing Reynolds number; wakes, boundary layers, instability, transition, and turbulent shear flows.

**250C. Compressible Flows.** Prerequisites: courses 150A, 150B, or equivalent. Effects of compressibility in viscous and inviscid flows. Steady and unsteady inviscid subsonic and supersonic flows; method of characteristics; small disturbance theories (linearized and hypersonic); shock dynamics.

**250D. Computational Aerodynamics.** Lecture, eight hours. Prerequisites: courses 150A, 150B or equivalent, 192C. Introduction to useful methods for computation of aerodynamic flow fields. Coverage of potential, Euler, and Navier/Stokes equations for subsonic to hypersonic speeds.

**250E. Spectral Methods in Fluid Dynamics.** Lecture, four hours; outside study, eight hours. Requisites: courses 192A, 192B, 192C, 250A, 250B. Introduction to basic concepts and techniques of various spectral methods applied to solving partial differential equations. Particular emphasis on techniques of solving unsteady three-dimensional Navier/Stokes equations. Topics include spectral representation of functions, discrete Fourier transforms, etc.

**251A. Stratified and Rotating Fluids.** Prerequisite: course 150A or equivalent or consent of instructor. Fundamentals of fluid flows with density variations or rotation, illustrated by examples with environmental, geophysical, or technical importance. Linear and finite amplitude wave motion. Flow past bodies; blocking phenomena. Viscous effects. Instabilities. Turbulent shear flows, wakes, plumes, and gravity currents.

**252A. Stability of Fluid Motion.** Prerequisite: course 150A or equivalent or consent of instructor. Mechanisms by which laminar flows can become unstable and lead to turbulence of secondary motions. Linear stability theory; thermal, centrifugal, and shear instabilities; boundary layer instability. Nonlinear aspects: sufficient criteria for stability, subcritical instabilities, supercritical states, transition to turbulence.

**252B. Statistical Theory of Turbulence.** Prerequisite: course 150A or consent of instructor. Development of statistical methods of wide utility in engineering applied to turbulent flows. Topics include stochastic processes, kinematics of turbulence, energy decay. Kolmogorov similarity, analytical theories, and origins of Reynolds stress.

**252C. Fluid Mechanics of Combustion Systems.** Prerequisites: courses 150A, 150B. Recommended: course 250C. Review of fluid mechanics and chemical thermodynamics applied to reactive systems, laminar diffusion flames, premixed laminar flames, stability, ignition, turbulent combustion, supersonic combustion.

**252D. Combustion Rate Processes.** Lecture, four hours; outside study, eight hours. Requisite: course 252C. Basic concepts in chemical kinetics: molecular collisions, distribution functions and averaging, semiempirical and ab initio potential surfaces, trajectory calculations, statistical reaction rate theories. Practical examples of large-scale chain mechanisms from combustion chemistry of several elements, etc.

**253A. Advanced Engineering Acoustics.** Advanced studies in engineering acoustics, including three-dimensional wave propagation; propagation in bounded media; Ray acoustics; attenuation mechanisms in fluids.

**253B. Fundamentals of Aeroacoustics.** Prerequisite: course 150A or consent of instructor. Detailed discussion of plane waves, point sources. Nonlinearity, layered and moving media, multiple reflections. Inhomogeneous wave equation. Monopole, dipole, quadrupole source fields from scattering inhomogeneities and turbulence; Lighthill theory; moving sources. Similarity methods. Selected detailed applications.

**254A. Special Topics in Aerodynamics.** Prerequisites: courses 150A, 150B, 192A, 192B, and 192C, or equivalent, or consent of instructor. Special topics of current interest in advanced aerodynamics. Examples include transonic flow, hypersonic flow, sonic booms, and unsteady aerodynamics.

**254B. Helicopter Dynamics and Aeromechanics.** Lecture, four hours; outside study, eight hours. Requisites: courses 150A, 166A, 169A. Recommended: course 150B. Overview of helicopter dynamics and aeromechanics. Topics include rotor configurations and control systems, rotor aerodynamics and performance, blade flapping dynamics, helicopter rotor aeroelasticity, coupled rotor/fuselage dynamics, and control of aeromechanical problems.

**255A. Advanced Dynamics.** Prerequisites: courses 155 and 169A, or consent of instructor. Variational principles and Lagrange equations. Kinematics and dynamics of rigid bodies; precession and nutation of spinning bodies.

**255B. Mathematical Methods in Dynamics.** Prerequisite: course 255A. Concepts of stability; state-space interpretation; stability determination by simulation, linearization, and Liapunov direct method; the Hamiltonian as a Liapunov function; nonautonomous systems; averaging and perturbation methods of nonlinear analysis; parametric excitation and nonlinear resonance. Application to mechanical systems.

**256A. Mechanics of Deformable Solids.** Prerequisites: courses 156B and 166A, or consent of instructor. Kinematics of deformation, strain, tensors, invariance, compatibility; conservation laws; stress tensors; equations of motion; boundary conditions; constitutive equations: general theory, linearization, anisotropy; reciprocity linear isotropic elastic problems, plane and generalized plane problems; dynamic problems.

**M256B. Elasticity.** (Same as Civil Engineering M230.) Lecture, four hours; outside study, eight hours. Requisite: course 256A. Equations of linear elasticity; uniqueness of solution; Betti/Rayleigh reciprocity; Saint-Venant's principle; simple problems involving spheres and cylinders; special techniques for plane problems. Airy's stress function, complex variable method, transform method; three-dimensional problems, torsion, entire space and half-space problems; boundary integral equations.

**M256C. Plasticity.** (Formerly numbered 256C.) (Same as Civil Engineering M239.) Lecture, four hours; outside study, eight hours. Requisites: courses 256A, M256B. Classical rate-independent plasticity theory, yield functions, flow rules and thermodynamics. Classical rate-dependent viscoplasticity, Perzyna and Duvant/Lions types of viscoplasticity. Thermo-plasticity and creep. Return mapping algorithms for plasticity and viscoplasticity. Finite element implementations.

**256F. Analytical Fracture Mechanics.** Prerequisites: course 156A, 156B, or 166A, and Materials Science 243A. Review of modern fracture mechanics, elementary stress analyses; analytical and numerical methods for calculation of crack tip stress intensity factors; engineering applications in stiffened structures, pressure vessels, plates, and shells.

**M257A. Elastodynamics.** (Same as Earth and Space Sciences M224A.) Lecture, four hours; outside study, eight hours. Requisites: courses 256A, M256B. Equations of linear elasticity, Cauchy equation of motion, constitutive relations, boundary and initial conditions, principle of energy. Sources and waves in unbounded isotropic, anisotropic, and dissipative solids. Half-space problems. Guided waves in layered media. Applications to dynamic fracture, nondestructive evaluation (NDE), and mechanics of earthquakes.

**258. Experimental Techniques in Fluid Mechanics and Thermal Science.** Prerequisite: consent of instructor. Survey of wind tunnels and other facilities for research in fluid mechanics, aerodynamics, and heat transfer; analysis of their critical design features. Modern sensors, instruments, and measurement techniques. Signal processing and storage by analog and digital methods.

**259A. Seminar: Advanced Topics in Fluid Mechanics.** Prerequisite: consent of instructor. Advanced study of topics in fluid mechanics, with intensive student participation involving assignments in research problems leading to term paper or oral presentation (possible help from guest lecturers).

**259B. Seminar: Advanced Topics in Solid Mechanics.** Prerequisite: consent of instructor. Advanced study in various fields of solid mechanics on topics which may vary from term to term. Topics include dynamics, elasticity, plasticity, and stability of solids.

**260. Current Topics in Mechanical Engineering (2 to 4 units).** (Formerly numbered 260AA-260ZZ.) Lecture, two to four hours; outside study, four to eight hours. Designed for graduate mechanical and aerospace engineering students. Lectures, discussions, and student presentations and projects in areas of current interest in mechanical engineering. May be repeated for credit. S/U or letter grading.

**261A. Energy and Variational Principles in Structural Mechanics.** Prerequisite: course 156A or 156B or 166A. Theory of linear elasticity. Calculus of variations. Principles of minimum potential energy and complementary energy. Stationary variational principles. Energy theorems. Matrix methods of structural analysis, with application to truss and frame problems. Variational principles as basis of finite element methods.

**261B. Finite Element Method with Applications.** Lecture, four hours; outside study, eight hours. Requisites: courses 168, 261A. Review of finite element method (FEM), matrix formulation, and computer implementation. Energy principles, concepts of shape functions, and interpolation. Displacement-based elements, isoparametric formulation, and coordinate transformation. Preprocessing and postprocessing techniques, geometric and analysis modeling.

**262. Mechanics of Intelligent Material Systems.** Lecture, four hours; outside study, eight hours. Prerequisite: course 156B or equivalent. Recommended: course 166C. Constitutive relations for electro-magneto-mechanical materials. Fiber-optic sensor technology. Micro/macro analysis, including classical lamination theory, shear lag theory, concentric cylinder analysis, hexagonal models, and homogenization techniques as they apply to active materials. Active systems design, inch-worm, and bimorph.

**263A. Electromechanics of Computer-Controlled Machines.** Lecture, four hours; other, eight hours. Prerequisite: course 171A. Recommended: courses 163A, 163B, 163C. Mechanics and control problems of computer-controlled electromechanical systems, with special emphasis on analysis of energy flow between mechanical, electrical, and control components when applied to electromagnetic and piezoelectric actuators and control systems with mechanical flexibilities.

**263B. Spacecraft Dynamics.** Lecture, four hours; outside study, eight hours. Requisite: course 255A. Recommended: course 255B. Modeling, dynamics, and stability of spacecraft; spinning and dual-spin spacecraft dynamics; spinup through resonance, spinning rocket dynamics; environmental torques in space, modeling and model reduction of flexible space structures.

**263C. Mechanics and Trajectory Planning of Industrial Robots.** Lecture, four hours; other, eight hours. Prerequisite: course 163A or consent of instructor. Theory and implementation of industrial robots. Design considerations. Kinematic structure modeling, trajectory planning, and system dynamics. Differential motion and static forces. Individual student study projects.

**263D. Advanced Robotics.** Lecture, four hours; outside study, eight hours. Recommended (but not prerequisite): courses 155, 163C, 171A, 263C. Motion planning and control of articulated dynamic systems: nonlinear joint control, experiments in joint control and multi-axes coordination, multibody dynamics, trajectory planning, motion optimization, dynamic performance and manipulator design, kinematic redundancies, motion planning of manipulators in space, obstacle avoidance.

**M267A. Optimum Structural Design.** (Same as Civil Engineering M240.) Requisite: course 261A or Civil Engineering 235A. Synthesis of structural systems; analysis and design as optimization problems; techniques for synthesis and optimization; application to aerospace and civil structures.

**268B. Failure of Structural Systems.** Lecture, four hours; other, eight hours. Prerequisite: Civil Engineering 135B. Exploration of a current area of research in depth.

**M269A. Dynamics of Structures.** (Same as Civil Engineering M237A.) Requisite: course 169A. Principles of dynamics. Determination of normal modes and frequencies by differential and integral equation solutions. Transient and steady state response. Emphasis on derivation and solution of governing equations using matrix formulation.

**269B. Advanced Dynamics of Structures.** Prerequisite: course M269A. Analysis of linear and nonlinear response of structures to dynamic loadings. Stresses and deflections in structures. Structural damping and self-induced vibrations.

**269D. Aeroelastic Effects in Structures.** Prerequisite: course M269A. Presentation of field of aeroelasticity from unified viewpoint applicable to flight structures, suspension bridges, buildings, and other structures. Derivation of aeroelastic operators and unsteady airloads from governing variational principles. Flow induced instability and response of structural systems.

**270A. Linear Systems.** Lecture, four hours; outside study, eight hours. Prerequisite: course 171A or consent of instructor. State-space representation of continuous-time and discrete-time control systems, linear algebra concepts such as eigenvalues and eigenvectors, singular values, Cayley/Hamilton theorem, Jordan form; stability of linear systems; controllability and observability; control and observer canonical forms; stabilization and pole-placement by feedback; realization theory.

**270B. Linear Optimal Control.** (Formerly numbered 271A.) Lecture, four hours; outside study, eight hours. Prerequisite: course 270A or Electrical Engineering 240A or equivalent. Existence and uniqueness of solutions to linear quadratic (LQ) optimal control problems for continuous-time and discrete-time systems, finite-time and infinite-time problems; Hamiltonian systems and optimal control; algebraic and differential Riccati equations; implications of controllability, stabilizability, observability, and detectability solutions.

**270C. Optimal Control Theory.** (Formerly numbered 271B.) Lecture, four hours; outside study, eight hours. Prerequisite: course 270B or equivalent. Necessary and sufficient conditions for weak and strong local optimality. Variational methods, Pontryagin maximum principle, and dynamic programming.

**271A. Stochastic Processes in Dynamical Systems.** Lecture, four hours; outside study, eight hours. Prerequisites: courses 171A and 174, or consent of instructor. Probability space, random variables, stochastic processes, Brownian motion, Markov processes, stochastic integrals and differential equations, power spectral density, and Kolmogorov equations.

**271B. Stochastic Estimation.** Lecture, four hours; outside study, eight hours. Prerequisite: course 271A. Linear and nonlinear estimation theory, orthogonal projection lemma, Bayesian filtering theory, conditional mean and risk estimators.

**271C. Stochastic Optimal Control.** Lecture, four hours; outside study, eight hours. Prerequisite: course 271B. Stochastic dynamic programming, certainty equivalence principle, separation theorem, information statistics; linear-quadratic-Gaussian problem, linear-exponential-Gaussian problem. Relationship between stochastic control and robust control.

**271D. Seminar: Special Topics in Dynamic Systems Control.** Prerequisite: consent of instructor. Seminar on current research topics in dynamic systems modeling, control, and applications. Topics selected from process control, differential games, nonlinear estimation, adaptive filtering, industrial and aerospace applications, etc.

**274. Methods of Probabilistic Safety Assessment.** Lecture, four hours; outside study, eight hours. Prerequisite: course 174 or consent of instructor. Methods for evaluation of risk from large technological systems; advanced statistical methods for data analysis; models of dependent failures; elicitation and use of expert opinions; human reliability models; propagation of uncertainties in physical models; applications to nuclear power plants, waste repositories, and space systems.

**280. Microelectromechanical Systems (MEMS).** Lecture, four hours; outside study, eight hours. Requisite: Materials Science 14. Introduction to microscopical world and MEMS; basics of integrated circuit (IC) manufacturing; bulk micromachining; directional etching and etch-stops; surface micromachining: deposition, selective wet etching, and dry etching; mechanical behavior of thin film-based structures; applied micromachining: polymer film, electroplating, and nonlithography machining; transducing fundamentals.

**280L. Microelectromechanical Systems (MEMS) Laboratory.** Lecture, one hour; laboratory, six hours; outside study, five hours. Requisite: course 180. Hands-on micromachining. Mask layout, clean room procedure, lithography, oxidation, LPCVD coatings, evaporation, wet etchings (both isotropic and anisotropic), dry etchings, process monitoring. Students fabricate simple micromechanical devices by both surface and bulk micromachining and test and characterize them.

**281. Microsciences.** Lecture, four hours; outside study, eight hours. Requisites: courses 131A, 150A. Basic science issues in micro domain. Topics include micro fluid science, microscale heat transfer, mechanical behavior of microstructures, as well as dynamics and control of micro devices.

**283. Experimental Mechanics for Microelectromechanical Systems (MEMS).** Lecture, four hours; outside study, eight hours. Methods, techniques, and philosophies being used to characterize microelectromechanical systems for engineering applications. Material characterization, mechanical/material properties, mechanical characterization. Topics include fundamentals of crystallography, anisotropic material properties, and mechanical behavior (e.g., strength/fracture/fatigue) as they relate to microscale. Considerable emphasis on emerging experimental approaches to assess design-relevant mechanical properties.

**284. Sensors, Actuators, and Signal Processing.** Lecture, four hours; outside study, eight hours. Principles and performance of micro transducers. Applications of using unique properties of micro transducers for distributed and real-time control of engineering problems. Associated signal processing requirements for these applications.

**287. Advanced Microelectromechanical Systems (MEMS).** Lecture, four hours; outside study, eight hours. Requisite: course 280 or Electrical Engineering 250A. Silicon micromachining, nonsilicon micromachining, nonlithographic processes. Mechanical issues of MEMS structures. Driving mechanisms for microactuators, including electrostatic, electromagnetic, thermal, and fluidic actuation. Applications to mechanical and aerospace areas. Studies of MEMS products and state-of-the-art research.

**M291A. Analytical Methods of Engineering I.** (Same as Electrical Engineering M208A.) Requisites: Mathematics 131A, 132. Application of abstract mathematical methods to engineering problems. Review of elements of measure and integration,  $L_2$  theory — linear spaces and operators. Eigenvalue problems. Introduction to spectral theory — elementary distribution theory. Applications to problems in engineering.

**M291B. Analytical Methods of Engineering II.** (Same as Electrical Engineering M208B.) Requisite: course M291A or Electrical Engineering M208A. Application of modern mathematical methods to engineering problems. Review of spectral theory. Green's functions and eigenvalue problems for second-order ordinary differential equations and their adjoints. Discrete and continuous spectra for ordinary and partial differential equations. Initial and boundary value problems.

**291C. Integral Equations in Engineering.** Prerequisite: Mathematics 250B. Introduction to generalized function theory and Green's functions. Conversion of partial equations to integral equations and classification of integral equations. Solution to integral equations with degenerate kernels; discussions of successive approximations and Fredholm and Hilbert/Schmidt theory.

**293. Quality Engineering in Design and Manufacturing.** Lecture, four hours; outside study, eight hours. Prerequisite: course 174 or consent of instructor. Quality engineering concepts and approaches. Taguchi methods of robust technology development and off-line control. Quality loss function, signal-to-noise ratio, and orthogonal arrays. Parametric design of products and production processes. Tolerance design. On-line quality control systems. Decision making in quality engineering.

**294. Advanced CAD/CAM Systems.** Lecture, four hours; outside study, eight hours. Prerequisite: course 194 or consent of instructor. CAD/CAM systems design, with special emphasis on computational geometry, path to trajectory conversion, command generation, controller and interpolator design, and current research topics in CAD/CAM systems.

**295. Computer-Aided Manufacturing.** (Formerly numbered 295A, 295B.) Lecture, four hours; outside study, eight hours. Requisites: course 94, one course from 163A, 163C, 195. Concepts, methods, and elements of computer-aided manufacturing. Planning and control of manufacturing systems. Group technology and computer-aided process planning. Design and modeling of flexible manufacturing systems. Computer-aided manufacturing.

**296A. Damage and Failure of Materials in Mechanical Design.** Lecture, four hours; outside study, eight hours. Requisites: course 156A, Materials Science 143A. Role of failure prevention in mechanical design and case studies. Mechanics and physics of material imperfections: voids, dislocations, cracks, and inclusions. Statistical and deterministic design methods. Plastic, fatigue, and creep damage.

**296B. Thermochemical Processing of Materials.** Lecture, four hours; outside study, eight hours. Requisites: courses 132A, 193. Thermodynamics, heat and mass transfer, principles of material processing: phase equilibria and transitions, transport mechanisms of heat and mass, moving interfaces and heat sources, natural convection, nucleation and growth of microstructure, etc. Applications with chemical vapor deposition, infiltration, etc.

**297. Composites Manufacturing.** Lecture, four hours; outside study, eight hours. Prerequisites: course 166C and Materials Science 151, or consent of instructor. Matrix materials, fibers, fiber preforms, elements of processing, autoclave/compression molding, filament winding, pultrusion, resin transfer molding, automation, material removal and assembly, metal and ceramic matrix composites, quality assurance.

**298. Seminar: Engineering (2 to 4 units).** Designed for graduate mechanical and aerospace engineering students. Seminars may be organized in advanced technical fields. If appropriate, field trips may be arranged. May be repeated with topic change.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**474B. Concurrent Engineering.** Lecture, four hours; outside study, eight hours. Requisite: Materials Science 474A. Product design, CAD/CAM, engineering analysis integration, project management.

**474C. Total Quality Engineering.** Lecture, four hours; outside study, eight hours. Requisite: course 474B. Total quality management, statistics, probability, off-line quality control, on-line quality control, quality inspection.

**475B. Automation.** Lecture, four hours; outside study, eight hours. Requisite: Materials Science 475A. Automatic control of single devices and processes for manufacturing automation. Integrated automation design. Introduction to control, digital control, and rule-based systems. Sensors and actuators used in manufacturing processes. Robotics and multi-axis machine tools. Integration of computer-controlled systems and control hardware.

**476. Integrated Manufacturing Engineering (IME) Seminar Series (1 unit).** Prerequisite: consent of instructor. Lectures by engineers in executive positions to provide management perspectives in manufacturing enterprises. Current manufacturing techniques and integrated product development efforts by industry experts. S/U grading.

**478. Integrated Manufacturing Engineering (IME) Group Project Studies (1 to 12 units).** Lecture, one hour; group projects, one to 12 hours. Teams of students perform detailed analyses to address problems presented and implement manufacturing solutions within industrial settings. S/U grading.

**497A-497B. Field Project in Manufacturing Engineering.** Lecture, two hours. Prerequisite: consent of instructor. Teams of students perform detailed system analysis and plan design of manufacturing engineering systems at various manufacturing plants. In Progress grading.

**596. Directed Individual or Tutorial Studies (2 to 8 units).** Designed for graduate mechanical and aerospace engineering students. Petition forms to request enrollment may be obtained from assistant dean, Graduate Studies. Supervised investigation of advanced technical problems. S/U grading.

**597A. Preparation for M.S. Comprehensive Examination (2 to 12 units).** Designed for graduate mechanical and aerospace engineering students. Reading and preparation for M.S. comprehensive examination. S/U grading.

**597B. Preparation for Ph.D. Preliminary Examinations (2 to 16 units).** Designed for graduate mechanical and aerospace engineering students. S/U grading.

**597C. Preparation for Ph.D. Oral Qualifying Examination (2 to 16 units).** Designed for graduate mechanical and aerospace engineering students. Preparation for oral qualifying examination, including preliminary research on dissertation. S/U grading.

**598. Research for and Preparation of M.S. Thesis (2 to 12 units).** Designed for graduate mechanical and aerospace engineering students. Supervised independent research for M.S. candidates, including thesis prospectus. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation (2 to 16 units).** Designed for graduate mechanical and aerospace engineering students. Usually taken after student has been advanced to candidacy. S/U grading.

## MEDICINE

### School of Medicine

UCLA  
37-120 Center for the Health Sciences  
Box 951736  
Los Angeles, CA 90095-1736  
(310) 825-6275  
<http://www.mednet.ucla.edu/som/deptlist.htm>

#### Chairs

Alan M. Fogelman, M.D. (*William S. Adams, M.D., Professor of Medicine*), Executive Chair  
Robert K. Oye, M.D., Executive Vice Chair, Clinical Services

Dennis J. Slamon, M.D., Executive Vice Chair, Research

Mary C. Territo, M.D., Executive Vice Chair, Academic Affairs

Jan H. Tillisch, M.D., Executive Vice Chair, Education

## Scope and Objectives

The principal goal of the Department of Medicine is to educate students in the expert diagnosis and compassionate management of human illness. Building on the biochemical, physiological, and behavioral foundations of the preclinical experience, students are taught *information acquisition* through history taking, physical examination, and laboratory evaluation; *information synthesis* through achieving a differential diagnosis and evaluative plan; and *medical decision making* for continued evaluation and therapy. Students are encouraged and guided in developing a caring physician/patient relationship.

Instruction in the department is provided in the second, third, and fourth years of medical school, with the third and fourth years constituting a continuum of clinical experience. Students become integrated into a ward team and have significant ambulatory care experiences. They apply and extend their clinical skills, medical knowledge, and judgment in the care of patients assigned to them under the immediate supervision of house officers and attending staff.

The department offers a broad range of advanced clinical clerkships in general and subspecialty ambulatory and hospital-based internal medicine at all the major affiliated centers.

For further details on the Department of Medicine and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## Medicine

### Upper Division Courses

**M190A. Health Outreach Issues and Interventions for At-Risk Populations: Prefield Course.** (Same as Psychiatry M192A.) Lecture, two hours; discussion, two hours; possible field observations. Preparation: application and interview. First in series of courses to explore prevention of disease in at-risk populations, clinical services for disadvantaged, medical and psychological issues of homelessness, and effects of low socioeconomic status on parenting. Lectures from expert faculty and practitioners in the field, with visits to shelters and facilities where homeless are provided with health care. P/NP or letter grading.

**M190B. Field Studies Seminar: Health Outreach Issues and Interventions (2 or 4 units).** (Same as Psychiatry M192B.) Discussion, two hours; fieldwork, three to four hours (two-unit course) or six to eight hours (four-unit course). Requisite: course M190A. Dynamics of multidisciplinary approaches to preventive health education for at-risk populations by student delivery of needed services to homeless families, under supervision of professional staff. P/NP or letter grading.

**199. Special Studies (2 to 8 units).** Prerequisite: consent of instructor. Individual projects carried out under direction of a faculty member. Special studies in medicine with appropriate objectives, readings, laboratory work, or other assignments designed for proper training of students. P/NP or letter grading.

## MICROBIOLOGY AND IMMUNOLOGY

*School of Medicine*

UCLA  
43-239 Center for the Health Sciences

Jack G. Stevens, D.V.M., Ph.D., *Interim Chair*  
Benjamin Bonavida, Ph.D., *Vice Chair*  
Patricia J. Johnson, Ph.D., *Graduate Adviser*

### Professors

Benjamin Bonavida, Ph.D. (*Immunology*)  
Irvin S.Y. Chen, Ph.D. (*Virology*)  
Asim Dasgupta, Ph.D. (*Virology*)  
John L. Fahey, M.D. (*Immunology*)  
Sydney M. Finegold, M.D., in *Residence* (*Bacteriology*)  
Marcus A. Horwitz, M.D. (*Bacteriology*)  
Michael Lovett, M.D., Ph.D. (*Bacteriology*)  
Robert L. Modlin, M.D. (*Immunology*)  
Debi P. Nayak, B.V.Sc., Ph.D. (*Virology*)  
Larry Simpson, Ph.D. (*Parasitology*)  
Ronald H. Stevens, Ph.D. (*Immunology*)  
Jerrold A. Turner, M.D., D.T.M.H. (*Parasitology*)  
Randolph Wall, Ph.D. (*Immunology*)  
Owen N. Witte, M.D. (*Immunology*; *President's Professor of Developmental Immunology*)

### Professors Emeriti

Ruth A. Boak, M.D., Ph.D.  
Dexter H. Howard, Ph.D.  
James N. Miller, Ph.D.  
Margret I. Sellers, Ph.D.  
Jack G. Stevens, D.V.M., Ph.D. (*M. Philip Davis Professor Emeritus of Microbiology and Immunology*)  
Henry E. Weimer, Ph.D.  
Felix O. Wettstein, Ph.D. (*Virology*)  
Stephen Zamenhof, Ph.D.

### Associate Professors

David A. Campbell, Ph.D. (*Parasitology*)  
Lawrence T. Feldman, Ph.D. (*Virology*)  
Patricia J. Johnson, Ph.D. (*Parasitology*)  
Mitchell Kronenberg, Ph.D. (*Immunology*)  
Otoniel Martinez-Maza, Ph.D. (*Immunology*)  
Jeffery F. Miller, Ph.D. (*Bacteriology*)  
Stephen T. Smale, Ph.D. (*Immunology*)

### Assistant Professors

David Chang, M.D., Ph.D. (*Immunology*)  
Andrew H. Kaplan, M.D. (*Virology*)  
M. Carrie Miceli, Ph.D. (*Immunology*)  
Kohaosuke Mitani, Ph.D. (*Virology*)  
Olaf Schneewind, M.D., Ph.D. (*Bacteriology*)

### Adjunct Professor

Lawrence M. Souza, Ph.D. (*Biotechnology*)

## Scope and Objectives

The desire to explain natural phenomena, including disease, is the basis for most students' interest in biological sciences. The Microbiology and Immunology Department in the UCLA School of Medicine is disease oriented. The

emphasis is on pathogenesis of infection, malignancy, and immunological response of the host to these changes of immunological dysfunction. All tools available from molecular biology to morphological methods are applied to these problems.

Microbiology and immunology are interwoven disciplines. Microbiology has played a central role in all aspects of biological sciences, including morphogenesis, genetics, developmental biology, physiology, biochemistry, and cell biology. An understanding of microbiology is thus fundamental to biological research. Immunology, once a branch of microbiology, is now a major biological discipline and a basic component of disease-oriented microbiology.

The graduate program in microbiology and immunology is closely associated with advanced (postdoctoral) training in research, clinical and public health diagnostic work, and industrial applications. Careers in microbiology and immunology include industrial appointments and clinical laboratory supervision in both government agencies and private enterprises, and academic positions.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

The department does not accept students whose sole objective is a master's degree.

### Areas of Study

See below under Doctoral Degree.

### Course Requirements

The department does not have specific requirements for the master's degree, as it rarely confers the degree. However, nine courses, at least five of which must be graduate-level courses, and the successful completion of both the written and oral qualifying examinations are necessary to be considered for a terminal master's degree by the graduate affairs committee. Eight units of 500-series courses may be applied toward the total course requirement of which four units may be applied to the graduate-level course requirement.

### Comprehensive Examination Plan

Students must pass both the doctoral written and oral qualifying examinations.

### Thesis Plan

None.

## Doctoral Degree

### Admission

In addition to the University minimum requirements, the following are required:

- (1) A bachelor's degree with a major in either the biological or physical sciences.
- (2) At least a B+ in chemistry, physics, and mathematics; at least a B average in biology (upper division and prior graduate study).
- (3) Three letters of recommendation.
- (4) Graduate Record Examination (GRE) General Test and Subject Test in either Biology or Biological Chemistry.
- (5) Statement of purpose.
- (6) An interview with members of the departmental graduate studies committee when indicated.

For departmental brochures and/or application forms, write to Students Affairs Office, Microbiology and Immunology, UCLA Box 951747, Los Angeles, CA 90024-1747, (310) 206-5148.

New Ph.D. students may also be admitted through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 172 MBI, UCLA, Los Angeles, CA 90095-1570, (310) 206-6051.

### Major Fields or Subdisciplines

The student is expected to be competent in both microbiology and immunology. However, thesis work must be done in one of the following divisions: immunology, medical microbiology, or virology.

### Course Requirements

- (1) Microbiology and Immunology M229 and Biological Chemistry CM253 (to be completed during the first year of study).
- (2) Course 596 is required. Students are required to complete at least two laboratory rotations during the first year of study.
- (3) Two of the following three courses are also required: Microbiology and Immunology 208, M227, M261.
- (4) Additional course requirements are determined by a student's chosen major field and preceptor.

### Written and Oral Qualifying Examinations

*Written Qualifying Examination.* The departmental written examination is to be taken at the end of the first year of study and no later than the Winter Quarter of the second year. The examination is in the form of a "mini" grant proposal and focuses on one or a few specific questions asked by the student's current research project. The examination is graded on a pass/fail/revise and resubmit basis. Students who do not pass the exam on the first attempt must pass it within three months of the original submission date.

*Oral Qualifying Examination.* The University Oral Qualifying Examination is to be taken

within three years (nine quarters) of entrance into the program. Advancement to candidacy is awarded on successful completion of this examination. If inadequacies are encountered, students may be required to repeat the examination. The examination consists of three parts.

**Research Proposal.** Students must prepare a written research proposal and present the proposal orally to their dissertation committee. The topic of the proposal must be in an area different from that of the thesis project. The topic should be within the fields of interest in the department (i.e., immunology, bacteriology, virology, molecular biology, mycology, and parasitology). The proposal must utilize an approach different from that employed in the student's own research. That is, students should not apply their own methodology to another system. The proposal should follow a standard grant format but not necessarily a National Institutes of Health (NIH) grant format. This is decided between the student and the student's preceptor.

**Student Research.** Students should be able to discuss their own research plans and results to date.

**General Scientific Background.** Students are also examined on general knowledge of microbiology and immunology.

Once students have completed the dissertation, they are required to present an overview of their dissertation work in an open seminar at which their committee is present.

## Microbiology and Immunology

### Upper Division Courses

**CM133. Principles, Practices, and Policies in Biotechnology (2 units).** (Same as Biological Chemistry CM133, Biomedical Physics CM133, Chemical Engineering CM133, Chemistry CM133, Microbiology CM133, and Molecular, Cell, and Developmental Biology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in their career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM233.

**M185A. Immunology (5 units).** (Same as Microbiology M185A and Molecular, Cell, and Developmental Biology M185A.) Lecture, three hours; discussion, 90 minutes; outside study, 11.5 hours. Prerequisites: Life Sciences 3, 4. Recommended prerequisites or corequisites: Chemistry 153A, 153L, Molecular, Cell, and Developmental Biology 100 or C139 or M140. Not open for credit to students with credit for course M261 or Molecular, Cell, and Developmental Biology C180. Introduction to experimental immunobiology and immunochemistry; cellular and molecular aspects of humoral and cellular immune reactions.

**199. Directed Individual Research Studies in Microbiology and Immunology (2 to 8 units).** Prerequisites: senior standing, consent of instructor (based on written research proposal). Individual research projects carried out under direction of a professor.

### Graduate Courses

Undergraduates may enroll in some graduate courses with consent of instructor.

**201. Microbiology and Immunology (8 units).** Lecture/laboratory. Limited to medical students. Study of infectious agents of human disease, with emphasis on host/parasite relationships and immunologic phenomena in immunity and disease, including identification of bacteria, fungi, animal parasites, and viruses, and principles of prevention, treatment, and laboratory diagnosis.

**202A. Fundamentals of Immunology (2 units).** Prerequisite: consent of instructor. Introduction to experimental immunobiology and immunochemistry; cellular and molecular aspects of humoral and cell-mediated immune functions.

**202B. Medical Bacteriology (2 units).** Prerequisite: consent of instructor. Characteristics of bacteria rickettsiae and chlamydiae associated with diseases of humans; host/parasite interactions and immunity; identification and laboratory diagnosis; principles of prevention and treatment; introduction to microbial genetics as it pertains to pathogenicity.

**202C. Medical Virology (2 units).** Prerequisite: consent of instructor. Biological properties of animal viruses; replication; methods of detection; interactions with host cells and multicellular hosts, introduction to tumor viruses.

**202D. Medical Mycology and Parasitology (2 units).** Prerequisite: consent of instructor. Morphology, physiology, and pathogenicity of fungi which cause human and animal diseases. Study of morphology, biology, host/parasite relationship, public health problems, and control of protozoa, helminths, and arthropods parasitic in and on humans and animals.

**M208. Molecular Biology of Animal Viruses.** (Formerly numbered 208.) (Same as Molecular, Cell, and Developmental Biology CM279.) Lecture, three hours. Preparation: courses in general biochemistry and general microbiology, including virology. Recommended for advanced undergraduate students with a major in public health, biology, or microbiology and for graduate students with interest in any field of biology or chemistry. Overview of animal viruses, including viral structure, virus cell interaction, virus replication, and viral oncogenesis. Special emphasis on understanding the molecular mechanism involved in control and regulation of replication, transcription, and translation of viral genome and its complex interaction with host.

**M215. Interdepartmental Course: Tropical Medicine (2 units).** (Same as Medicine M215, Pathology M215, and Pediatrics M215.) Lecture, two and one-half hours. Prerequisites: basic courses in microbiology and parasitology of infectious diseases in School of Medicine or Public Health. Study of current knowledge about diseases prevalent in tropical areas of the world. Major emphasis on infectious diseases, with coverage of problems in nutrition and exotic noninfectious diseases. Syllabus supplements topics covered in classroom. S/U grading.

**M223. Membrane Research Seminar (2 units).** (Same as Microbiology M223.) Prerequisite: consent of instructor. Critical discussions of current literature in membrane research, with emphasis on relationship between structure and function in lipid bilayers. May be repeated for credit.

**M226A-M226B. Principles of Microbial Pathogenesis.** (Same as Microbiology M226A-M226B and Molecular, Cell, and Developmental Biology M226A-M226B.) Lecture, one hour; discussion, three hours. Prerequisites: courses 202A, 202B, 202C, 202D. Lecture/discussion format designed to analyze basic pathogenesis of infections. Emphasis on molecular and cellular approaches to understand host-microbial interaction. **M226A.** Bacterial and Mycotic Infections; **M226B.** Parasitic and Viral Infections.

**M227. Molecular Genetics of Bacteria and Phage.** (Same as Chemistry M227, Microbiology M227, and Molecular, Cell, and Developmental Biology CM207.) Lecture, three hours; discussion, one hour. Prerequisite: Biological Chemistry CM253 or Chemistry CM253. Molecular and cellular biology of bacteria and bacteriophages.

**M229. Cellular Biology of Host/Pathogen Interactions (6 units).** (Same as Microbiology M229 and Molecular, Cell, and Developmental Biology M229A-M226B.) Lecture, four hours; discussion, 90 minutes. Prerequisite: Biological Chemistry CM253. Molecular and cellular biology of pathogens, eukaryotic host cells, and interaction between pathogens and hosts.

**CM233. Principles, Practices, and Policies in Biotechnology (2 units).** (Formerly numbered M233.) (Same as Biological Chemistry CM233, Biomedical Physics CM233, Chemical Engineering CM233, Chemistry CM233, Microbiology CM233, and Molecular, Cell, and Developmental Biology CM233.) Lecture, three hours. Designed for graduate students. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in their career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM133. S/U or letter grading.

**M234. Ethics and Accountability in Biomedical Research (2 units).** (Same as Microbiology M234.) Designed for graduate students. Responsibilities and ethical conduct of investigators in research, data management, mentorship, grant applications, and publications. Responsibilities to peers, sponsoring institutions, and society. Conflicts of interest, disclosure, animal subject welfare, human subject protection, and areas in which investigational goals and certain societal values may conflict. S/U grading.

**M241. Use of the Computer in Biology (2 units).** (Same as Molecular, Cell, and Developmental Biology M201.) Lecture, two hours; laboratory, one hour. Introduction to use of IBM PC microcomputer and VAX minicomputer in biological research. S/U grading.

**M246. Computer Analysis of Genetic Organization.** (Same as Microbiology M246 and Molecular, Cell, and Developmental Biology M246.) Lecture, two hours; laboratory, six hours. Prerequisite: Life Sciences 4 or Microbiology C159. Lectures and laboratory instruction in contemporary procedures for analysis of nucleic acid and protein sequence data with the computer. No prior computer experience necessary; students gain both general and specialized facility with IBM PC and Digital VAX computers.

**250. Cell and Molecular Biology.** Lectures and student seminar presentations. Review of selected current topics in molecular and cellular biology. Topics include recent experimental results on organization, expression, and regulation of genes in eukaryotic cells. S/U or letter grading.

**M252. Seminar: Microbial Pathogenesis (2 units).** (Same as Microbiology M252.) Prerequisite: consent of instructor. Limited to 10 students. Student presentations and critical discussion of current literature on various aspects of microbial pathogenesis. May be repeated for credit. S/U or letter grading.

**M256. Seminar: Viral Oncology (2 units).** (Same as Pathology M256.) Advanced research seminar designed to consider current developments in the field. Selection of current subjects and publications dealing with tumor viruses, oncogenesis, development, and cellular regulation.

**M260. Immunology Forum (2 units).** (Same as Microbiology M260.) Prerequisite: course M185A. Broad range of current topics in immunology presented and discussed at advanced frontier level. Continuing UCLA-wide, general graduate-level seminar involving faculty, postdoctoral immunologists, and graduate students from diverse departments. S/U grading.

**M261. Molecular and Cellular Immunology (6 units).** (Same as Microbiology M261 and Molecular, Cell, and Developmental Biology CM261.) Lecture, four and one-half hours; discussion, 90 minutes. Requisite: Biological Chemistry CM253. Comprehensive course for graduate students and selected undergraduates covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented with discussion section focusing on reading and analysis of primary research articles. Oral presentation required. S/U or letter grading.

**M262A. Seminar: Current Topics in Immunobiology of Cancer (2 units).** (Same as Microbiology M262A.) Review of recent literature in immunology, biology, and biochemistry of cancer, with emphasis on fundamental studies involving cell-mediated immunity, humoral response, tumor specific antigens, and new techniques. Discussion of reports on scientific meetings. May be repeated for credit. S/U or letter grading.

**M262B. Immunology of AIDS (2 units).** (Same as Epidemiology M214 and Microbiology M262B.) Lecture, one hour; discussion, one hour. Requisites: courses 202A, 202B, 202C, 202D, M258B. Lecture and student discussion of assigned publications. Topics include specific anti-HIV immune responses, activation of immune system by HIV, and basic mechanisms that underlie HIV-induced immunodeficiency. S/U or letter grading.

**M262D. Selected Topics in Immunology (2 units).** (Same as Microbiology M262D.) Prerequisite: consent of instructor. Student participation in discussions related to various topics in immunology. May be repeated for credit. S/U or letter grading.

**M263. Molecular and Cellular Immunology Seminar (2 units).** (Same as Microbiology M263.) Prerequisite: consent of instructor. Critical discussions of current literature in T and B cell immunology, with emphasis on molecular mechanisms.

**270. Immunology in Disease (2 units).** Lecture, one hour; discussion, one hour. Prerequisite: basic immunology. Introduction to role of immune processes in disease for students with prior knowledge of basic immunology. Topics include immunodeficiency, immediate hypersensitivity reactions, autoimmune disease, and immune complex-mediated diseases, together with transplantation immunology, tumor immunology (re role of immunity in infection). Students prepare a 20- to 30-minute presentation on a selected topic.

**271. Immunology Overview (2 units).** Lecture, two hours; discussion, one hour. Designed for graduate students. Identification of major components of immune system, their modes of active maturation and regulation, cytokine signaling systems, principal effector mechanisms, and immune contributions to autoimmunity and hypersensitivity.

**274. Interactions of Immune System and Nervous System (2 units).** Lecture, one hour; discussion, one hour. Prerequisites: graduate or postdoctoral standing in immunology, behavioral sciences, or neurosciences, consent of instructor. Limited to 10 students. Study of existing knowledge of interrelationships between central and peripheral nervous system and immune system. Review of research on central nervous system effects on immune function and vice versa, as well as human and animal studies linking stress to immune changes.

**M275. Biology of HIV.** (Same as Epidemiology M228.) Lecture, three hours. Prerequisites: Biostatistics 100A and Epidemiology 100 or equivalent, two biology courses, consent of instructor. Overview of virologic and immunologic aspects of HIV disease for epidemiology or other health disciplines. Brief discussion of clinical manifestations and biosafety in the laboratory.

**M285. Intermediate Immunology.** (Formerly numbered M285B.) (Same as Microbiology CM285 and Molecular, Cell, and Developmental Biology CM285.) Lecture, three hours; discussion, one hour. Requisites: course M185A, Molecular, Cell, and Developmental Biology C180. Recommended corequisite: Chemistry 153B. In-depth exploration of topics introduced in course M185A.

**M293. Major Concepts in Oncology.** (Same as Oral Biology M293 and Pathology M293.) Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Designed for graduate students contemplating research in oncology. Topics include cancer pathophysiology, genetics, membranes, macromolecular synthesis and control, cell cycle, growth control; physical, chemical, and viral oncogenesis, epidemiology of cancer; tumor immunology; principles of cancer surgery, radiation therapy, and chemotherapy. S/U or letter grading.

**M294. Molecular Basis of Cancer.** (Same as Pathology M294.) Lecture, three hours. Requisites: course M229, Biological Chemistry CM253, CM267, Neurobiology M209A. Fundamental biological, genetic, and molecular process involved in genesis and growth of cancer cells and diagnosis, characterization, and treatment of cancer.

**596. Directed Individual Study or Research (2 to 8 units).** Laboratory, to be arranged. Prerequisite: consent of graduate adviser. S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations (2 to 6 units).**

**599. Research for and Preparation of Ph.D. Dissertation (2 to 12 units).** Research on an original problem in the field of microbiology and immunology to be selected by graduate student with advice of adviser. Fields of study may be in bacteriology, immunology, mycology, parasitology, virology, tumor biology, or cell biology.

## MICROBIOLOGY AND MOLECULAR GENETICS

*College of Letters and Science*

Ralph Robinson, Ph.D.  
Imke Schroder, Ph.D.

## Scope and Objectives

Microbiology at UCLA is a diverse science that includes bacteriology, virology, genetics, molecular biology, and the study of single cells. The science has its roots in the fundamental human needs of health, nutrition, and environmental control, and it provides opportunities for study in the basic biological fields of genetics and cellular and molecular biology.

Undergraduate students majoring in microbiology and molecular genetics prepare for careers in biomedical research, medicine or dentistry, biotechnology and genetic engineering, industrial microbiology, and agricultural or environmental sciences, among others. The courses presented by the department lead to a Bachelor of Science degree and depend heavily on preparation in the biological sciences, chemistry, physics, and mathematics. They provide preparation for careers in microbiology or for further advanced study leading to the doctorate.

The graduate program emphasizes the areas of molecular genetics, cell biology, immunology, cell and virus structure and morphogenesis, animal virology, general bacteriology and physiology, host/parasite relationships, medical microbiology, microbial genetics, and recombinant DNA research. Students are prepared for creative research careers in all of these fields. The objective of the department is to provide breadth in microbiology at the undergraduate level and depth and training in independent study and research for graduate students.

Note: Several upper division and graduate courses in this department are multiple-listed with those in the Microbiology and Immunology Department in the UCLA School of Medicine. Students interested in a doctoral program with a fundamentally disease-oriented approach to microbiology should see the Microbiology and Immunology Department description.

## Undergraduate Study

### Bachelor of Science Degree Preparation for the Major

#### Life Sciences Core Curriculum

*Required* (effective Fall Quarter 1997): Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 10A, 10B/10BL, 10C, and 10D/10DL, or 11A, 11B/11BL, 11CL, 132A, and 132B/132BL, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

All core curriculum courses must be passed with a grade of C – or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

#### Transfer Students

In order to be admitted as microbiology and molecular genetics majors, transfer students with 80 or more units must complete the following courses prior to admission to UCLA: one year of general biology for majors equivalent to Life Sciences 1, 2, and 3; one year of general chemistry with laboratory; one year of calculus; and either one year of calculus-based physics or one year of organic chemistry.

Students intending to major in microbiology and molecular genetics may seek counseling and petition to enter the major in the Student Affairs Office, 1602B Molecular Sciences.

#### The Major

*Required:* Microbiology and Molecular Genetics 101, 101L, 102, 102L, C106, C159, M185A; Chemistry and Biochemistry 153A, 153C, 153L; four additional upper division courses from the departmental list or from related departments selected with approval of the faculty adviser. All major courses must be taken for a letter grade, with a minimum overall 2.0 GPA in the major. A maximum of four units of Microbiology and Molecular Genetics 199, taken for a letter grade, may be applied toward the major. Credit for 199 courses from other departments may not be applied.

### Honors Program

Overall grade-point averages of 3.2 and 3.5 in the preparation for the major and major respectively are required to apply for departmental honors. In addition students must have junior standing and the sponsorship of a faculty adviser from the Department of Microbiology and Molecular Genetics. The core of the program consists of three terms (minimum) of Microbiology and Molecular Genetics 199H research, culminating in a thesis. If the thesis is accepted by the honors committee, students are awarded the bachelor's degree with departmental honors. The department also offers an

honors seminar course each Spring Quarter for the elective program. For further information, contact the Student Affairs Office, 1602B Molecular Sciences.

### Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

### Master's Degree

#### Admission

Applicants for the Master of Arts program in Microbiology and Molecular Genetics must obtain faculty sponsorship before submitting an application and, in addition to the other application materials (see Ph.D. application procedures), must submit a five-page research proposal describing the thesis problem. Information and the proposal format are available from the graduate adviser's office.

The department accepts relatively few students whose objective is a master's degree and does not encourage application.

#### Areas of Study

Consult department.

#### Course Requirements

A total of nine courses is required for the M.A. degree. A total of five courses must be at the graduate level. Required courses are specified on an individual basis by the initial advisory committee (three faculty members) which generally becomes the thesis committee.

There is no limit to the number of times Microbiology and Molecular Genetics 598 may be repeated. It is graded S/U only and can be taken for two to 12 units per quarter. A maximum of two courses (eight units) in the 500 series may apply to the nine-course (36 units) M.A. degree, with only one course (four units) applying toward the five-course (20 units) graduate course requirement.

#### Comprehensive Examination Plan

None.

#### Thesis Plan

The thesis committee is established shortly after admission to the program. A committee member outside the department is not required but highly recommended. The department offers only a thesis plan for the master's degree.

### Doctoral Degree

#### Admission

Admission to the Ph.D. program in Microbiology and Molecular Genetics is through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 172 MBI, UCLA, Los Angeles, CA 90024-1570, (310) 206-6051.

Under special circumstances, new Ph.D. students may be admitted directly. The following criteria apply for new Ph.D. students admitted directly to the program

Applicants must have completed an undergraduate major in microbiology or a related field with superior scholastic achievement and should have preparation in calculus, physics, biology, genetics, physical, organic and biochemistry, and microbiology. In certain cases, on recommendation of the graduate adviser and the departmental admissions committee, background deficiencies may be remedied concurrently with graduate studies. The Graduate Record Examination (GRE) General Test is required for admission, and the Subject Test in Biochemistry, Cell and Molecular Biology, Chemistry, or Biology is recommended. Three letters of recommendation from individuals who can provide direct knowledge of both the applicant's academic record and potential for superior achievement in independent research are required. The GRE scores and letters should be submitted directly to the department. The department generally accepts students in Fall Quarter only. Under exceptional circumstances the Graduate Admissions Committee may agree to admit a student in Winter or Spring Quarter. Completion of a master's degree is not normally required.

#### Major Fields and Subdisciplines

The graduate program emphasizes the areas of molecular genetics, cell biology, immunology, cell and virus structure and morphogenesis, animal virology, general bacteriology and physiology, host/parasite relationships, medical microbiology, microbial genetics, and recombinant DNA research. Students are prepared for creative research in all of these fields. The objective of the department is to provide depth and training in independent study and research for graduate students.

#### Course Requirements

*Formal Lecture/Laboratory Courses.* (1) Biochemistry: Chemistry and Biochemistry CM253 (six units; offered only in Fall Quarter; to be completed during the first year); (2) Cell Biology: Chemistry and Biochemistry M267 or Neurobiology M209A or Microbiology and Molecular Genetics M229.

A total of eight additional units of 200-level coursework to be selected from at least two of the following four subject areas is required. These courses may be selected to remedy background deficiencies or to deepen knowledge of a particular subject area. Acceptable courses include the following:

- (1) General microbiology: Microbiology and Molecular Genetics C211, C212.
- (2) Host/parasite interactions and virology: Microbiology and Molecular Genetics C204C, C206, Microbiology and Immunology 208, 210.
- (3) Immunology: Microbiology and Molecular Genetics M185A or CM285B, or M261.

(4) Genetics and regulation: courses from current listings maintained in the department office.

Other courses may be accepted with written consent of the departmental graduate adviser and the student's advisory committee.

Students are expected to complete a course in physical chemistry (Chemistry and Biochemistry 156). This requirement can be waived on the basis of work done before entering UCLA.

**Student-Participation Seminar Courses.** Each quarter, seminar courses in which students read and report on current scientific research literature are organized. Students must enroll in five such courses (10 units) during their first five years of residence.

**Laboratories.** During the first 12 months of residence, students rotate for one quarter each through three laboratories. Students normally enroll in Microbiology and Molecular Genetics 596 for a minimum of four units of credit for each rotation.

**First-Year Proposal:** By August 15 of the first year of study students must submit an original research proposal of approximately six double-spaced pages. Students should choose a current paper in an area of interest in which the next experiment is fairly obvious, possibly even suggested in the discussion. The experiment should be designed with appropriate controls and succinctly presented along with the interpretation of possible results. The proposal should be well focussed on one or a very few specific questions. It is unacceptable to submit a duplicate or revised version of a previous class assignment (e.g., course M253). Suggestions and evaluations are returned to the student and used by the faculty to evaluate continuation into the second year.

## Written and Oral Qualifying Examinations

The oral examination must be taken within 24 months of entry into graduate school and must be passed, if reexamination is required, no later than 27 months from the date of entry. These periods may be extended with the written consent of the departmental graduate adviser and the student's mentor.

The examination is administered by the doctoral committee which normally serves as the dissertation committee as well. As a major part of the examination, the student prepares and defends a written research proposal. Before presentation to the doctoral committee, the student is encouraged to present the proposal before a student seminar group.

The University Oral Qualifying Examination covers both the student's proposal and general scientific background. It is not restricted to the topics of the proposal. The committee may arrange alternate ways to assess the student's preparation and qualifications.

# Microbiology and Molecular Genetics

## Lower Division Courses

**6. Introduction to Microbiology.** Lecture, three hours. Not open for credit to students with credit for course 101, Life Sciences 2, former Biology 5, or equivalent. Designed for nontechnical students; introduction to biology of microorganisms (bacteria, viruses, protozoa, algae, fungi), their significance as model systems for understanding fundamental cellular processes, and their role in human affairs.

**7. Developments in Biotechnology.** Lecture, three hours; demonstration, one hour; outside study, eight hours. Recommended (but not requisite): course 6 or Biology 2 or Life Sciences 2. Not open for credit to students with credit for course 101 or Life Sciences 3. Survey of recent developments in biotechnology, with emphasis on use of single-celled organisms. Review of basic principles of microbiology as they apply to biotechnology and examination of wide variety of topics, including alternate energy sources, pollution, cleanup, genetic fingerprinting, genetic engineering, and agricultural and food microbiology. P/NP or letter grading.

**10. Applied Medical Microbiology (5 units).** Lecture, three hours; laboratory, five hours; outside study, eight hours. Enforced requisite: Life Sciences 2. Designed for students interested in medical microbiology and those going into allied health professions. Not open for credit to students with credit for course 101; does not substitute for course 101 in the major. Introduction to biology of bacteria and their role in diseases of humans.

## Upper Division Courses

**101. Fundamentals of Bacteriology.** Lecture, three hours; discussion, one hour. Prerequisites: Chemistry 153A, Life Sciences 3 or equivalent. Recommended: Life Sciences 4 or equivalent. Recommended corequisite: course 101L. Historical foundations of the science; introduction to bacterial structure, physiology, biochemistry, genetics, and ecology.

**101L. Bacteriology Laboratory (3 units).** Discussion, one hour; laboratory, six hours. Prerequisites: Chemistry 153A, Life Sciences 3. Recommended: Life Sciences 4. Recommended corequisite: course 101 (or 101 with a grade of C or better if previously taken). General laboratory techniques and theory in microbiology and molecular genetics, including isolation and identification of bacterial species from nature, transformation of *Escherichia coli*, Ames test, analysis of auxotrophic mutants.

**102. Introductory Virology.** Lecture, three hours. Prerequisites: Life Sciences 1, 2, 3, 4, with grades of C or better. Recommended: Chemistry 153A. Recommended corequisite: course 102L. Biological properties of bacterial and animal viruses, replication, methods of detection, interactions with host cells and multicellular hosts.

**102L. Virology Laboratory (2 units).** Laboratory, four hours. Prerequisites: Life Sciences 1, 2, 3, 4, with grades of C or better. Recommended corequisite: course 102. General laboratory techniques and theory in virology, including complementation, recombination, transduction, experiments in animal virology using tissue culture.

**C106. Molecular and Genetic Basis of Bacterial Infections.** Lecture, three hours; discussion, one hour. Prerequisites: course 101, Life Sciences 4. Biochemical and genetic properties of bacteria which afford potential for pathogenicity. Epidemiology and transmission of disease; chemotherapy and drug resistance. Regulation of virulence factors. Concurrently scheduled with course C206.

**C111. Biology of Prokaryotic Cell.** Lecture, three hours; discussion, one hour. Prerequisites: course 101 and Chemistry 153C, or consent of instructor. Review of current knowledge of structural organization of prokaryotic cells. Emphasis on isolation methods, chemical composition, structure and assembly of subcellular components, including membranes, walls, flagella, ribosomes, and viruses. Concurrently scheduled with course C211.

**C112. Molecular Biology of Bacterial Growth.** Lecture, three hours; discussion, one hour. Prerequisites: course 101, Chemistry 153A, 153L, Life Sciences 4. Analysis of growth, development, and physiological adaptations of bacteria, with emphasis on their molecular and genetic basis. Analysis of complex regulatory mechanisms that underlie cell cycle and other multi-component cellular systems from perspective of contemporary research techniques. Concurrently scheduled with course C212.

**CM133. Principles, Practices, and Policies in Biotechnology (2 units).** (Same as Biological Chemistry CM133, Biomedical Physics CM133, Chemical Engineering CM133, Chemistry CM133, Microbiology and Immunology CM133, and Molecular, Cell, and Developmental Biology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in their career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM233.

**CM156. Human Genetics.** (Same as Molecular, Cell, and Developmental Biology CM156.) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Strongly recommended: Molecular, Cell, and Developmental Biology 100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM256.

**C159. Advanced Molecular Genetics (5 units).** (Formerly numbered C119.) Lecture, three hours; discussion, two hours. Prerequisites: Chemistry 153A and Life Sciences 4, or consent of instructor. Integrated conceptual analysis of classical and modern molecular genetics of microbes, with coverage of key papers from elucidation of genetics code to the present. Essential elements of experimental design, analysis of results, and scientific logic. Concurrently scheduled with course C259.

**CM165. Bioprocess Technology.** (Same as Chemical Engineering CM165.) Lecture, two hours; laboratory, eight hours; outside study, two hours. Prerequisites: course 101, Chemical Engineering C115, and Chemistry 156, or consent of instructor. Current bioprocess technologies involving microorganisms, especially extremophiles and animal cells, as vehicles for macromolecular and biomaterial production. Applications to processes including mineral leaching, remediation, and bioconversion. Emphasis on exploiting properties of diverse microorganisms. Exercises may vary yearly. Concurrently scheduled with course CM265.

**M185A. Immunology (5 units).** (Same as Microbiology and Immunology M185A and Molecular, Cell, and Developmental Biology M185A.) Lecture, three hours; discussion, 90 minutes; outside study, 11.5 hours. Requisites: Life Sciences 3, 4. Recommended requisites or corequisites: Chemistry 153A, 153L, Molecular, Cell, and Developmental Biology 100 or C139 or M140. Not open for credit to students with credit for course M261 or Molecular, Cell, and Developmental Biology C180. Introduction to experimental immunobiology and immunochemistry; cellular and molecular aspects of humoral and cellular immune reactions.

**CM185B. Intermediate Immunology.** (Same as Molecular, Cell, and Developmental Biology CM185B.) Lecture, three hours; discussion, one hour. Requisites: course M185A, Molecular, Cell, and Developmental Biology C180. Recommended corequisite: Chemistry 153B. In-depth exploration of topics introduced in course M185A. Concurrently scheduled with course CM285.

**195. Proseminar (2 units).** Prerequisites: senior standing, consent of instructor. Discussion by small groups of students and instructor on current research literature. Topics vary each year. May be taken only once for credit in the major but may be repeated for University credit.

**199. Special Studies in Microbiology and Molecular Genetics (2 to 8 units).** Prerequisites: Chemistry 153A, 153L, and junior or senior standing with minimum 3.0 GPA in the premajor and major, or consent of departmental adviser. Individual research project under direct supervision of departmental faculty member. Copy of report describing the research must be filed with Student Affairs Office by end of term. First four units must be taken P/NP; 12 additional units, four of which may be applied toward the major, may be taken for a letter grade.

**199H. Honors Thesis (4 or 8 units).** Prerequisite: honors program standing. Directed individual research for departmental honors; students must have a faculty sponsor. Three sequential 199H terms required. Progress report must be submitted to faculty sponsor at end of each of the first two terms, with honors thesis submitted at end of final term. Maximum of four units may be applied toward the major, with balance applied toward B.S. degree requirements.

## Graduate Courses

**C206. Molecular and Genetic Basis of Bacterial Infections.** Lecture, three hours; discussion, one hour. Prerequisites: course 101, Life Sciences 4. Biochemical and genetic properties of bacteria which afford potential for pathogenicity. Epidemiology and transmission of disease; chemotherapy and drug resistance. Regulation of virulence factors. Concurrently scheduled with course C106.

**C211. Biology of Prokaryotic Cell.** Lecture, three hours; discussion, one hour. Prerequisites: course 101 and Chemistry 153C, or consent of instructor. Review of current knowledge of structural organization of prokaryotic cells. Emphasis on isolation methods, chemical composition, structure and assembly of subcellular components, including membranes, walls, flagella, ribosomes, and viruses. Concurrently scheduled with course C111. Term paper on research topic selected by each graduate student required.

**C212. Molecular Biology of Bacterial Growth.** Lecture, three hours; discussion, one hour. Prerequisites: course 101, Chemistry 153A, 153L, Life Sciences 4. Analysis of growth, development, and physiological adaptations of bacteria, with emphasis on their molecular and genetic basis. Analysis of complex regulatory mechanisms that underlie cell cycle and other multicomponent cellular systems from perspective of contemporary research techniques. Concurrently scheduled with course C112.

**213. Seminar: Unicellular Development (2 units).** Seminar, 30 minutes; discussion, 90 minutes. Prerequisites: course 101 or equivalent, graduate standing or consent of instructor. Background on each of developmental systems in bacillus, myxobacteria, dictyostellium, and streptococcus. Student analysis and discussion of recent publications in each of these areas. S/U or letter grading.

**M223. Membrane Research Seminar (2 units).** (Same as Microbiology and Immunology M223.) Prerequisite: consent of instructor. Critical discussions of current literature in membrane research, with emphasis on relationship between structure and function in lipid bilayers. May be repeated for credit.

**M226A-M226B. Principles of Microbial Pathogenesis.** (Same as Microbiology and Immunology M226A-M226B and Molecular, Cell, and Developmental Biology M226A-M226B.) Lecture, one hour; discussion, three hours. Requisites: Microbiology and Immunology 202A, 202B, 202C, 202D. Lecture/discussion format designed to analyze basic pathogenesis of infections. Emphasis on molecular and cellular approaches to understand host-microbial interaction. **M226A.** Bacterial and Mycotic Infections; **M226B.** Parasitic and Viral Infections.

**M227. Molecular Genetics of Bacteria and Phage.** (Same as Chemistry M227, Microbiology and Immunology M227, and Molecular, Cell, and Developmental Biology CM207.) Lecture, three hours; discussion, one hour. Requisite: Biological Chemistry CM253 or Chemistry CM253. Molecular and cellular biology of bacteria and bacteriophages.

**M229. Cellular Biology of Host/Pathogen Interactions (6 units).** (Same as Microbiology and Immunology M229 and Molecular, Cell, and Developmental Biology M229.) Lecture, four hours; discussion, 90 minutes. Requisite: Biological Chemistry CM253. Molecular and cellular biology of pathogens, eukaryotic host cells, and interaction between pathogens and host.

**CM233. Principles, Practices, and Policies in Biotechnology (2 units).** (Formerly numbered M233.) (Same as Biological Chemistry CM233, Biomedical Physics CM233, Chemical Engineering CM233, Chemistry CM233, Microbiology and Immunology CM233, and Molecular, Cell, and Developmental Biology CM233.) Lecture, three hours. Designed for graduate students. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in their career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM133. S/U or letter grading.

**M234. Ethics and Accountability in Biomedical Research (2 units).** (Same as Microbiology and Immunology M234.) Designed for graduate students. Responsibilities and ethical conduct of investigators in research, data management, mentorship, grant applications, and publications. Responsibilities to peers, sponsoring institutions, and society. Conflicts of interest, disclosure, animal subject welfare, human subject protection, and areas in which investigational goals and certain societal values may conflict. S/U grading.

**242. Seminar: Microbial Molecular Genetics (2 units).** Prerequisite: consent of instructor. Student and instructor presentations and critical discussion of newly emerging concepts in prokaryotic and/or eukaryotic molecular genetics. Emphasis on nature of the gene and control of gene expression. May be repeated for credit. S/U or letter grading.

**M246. Computer Analysis of Genetic Organization.** (Same as Microbiology and Immunology M246 and Molecular, Cell, and Developmental Biology M246.) Lecture, two hours; laboratory, six hours. Requisite: course C159 or Life Sciences 4. Lectures and laboratory instruction in contemporary procedures for analysis of nucleic acid and protein sequence data with the computer. No prior computer experience necessary; students gain both general and specialized facility with IBM PC and Digital VAX computers.

**M248. Molecular Genetics (6 units).** (Same as Biological Chemistry CM248 and Molecular, Cell, and Developmental Biology CM248.) Lecture, five hours. Requisite: Biological Chemistry CM153G or Chemistry CM153G. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics.

**250. Seminar: Microbial Metabolism (2 units).** Prerequisite: consent of instructor. Discussion and student presentations of recent work in areas of genetic regulation and physiology of bacterial metabolism.

**251. Seminar: Regulation and Differentiation (2 units).** S/U grading.

**M252. Seminar: Microbial Pathogenesis (2 units).** (Same as Microbiology and Immunology M252.) Prerequisite: consent of instructor. Limited to 10 students. Student presentations and critical discussion of current literature on various aspects of microbial pathogenesis. May be repeated for credit. S/U or letter grading.

**254. Pre-mRNA Processing in Cellular Metabolism and Differentiation (2 units).** Seminar, three hours. Prerequisite: graduate standing or consent of instructor. Reading and discussion of papers dealing with mRNA metabolism and posttranscriptional control of gene expression. From detailed RNA chemistry and autocatalytic reactions to more recently described and less understood systems, topics include RNA catalysis, general splicing and spliceosome assembly, splicing regulation, polyadenylation and three prime end formation, mRNA stability, mRNA transport, RNA editing and modification, and RNA localization. S/U or letter grading.

**255. Seminar: Microbial Cell Biology (2 units).** Prerequisite: consent of instructor. Student presentations and critical discussion of current literature on various aspects of prokaryotic and eukaryotic cell biology and morphogenesis. May be repeated for credit.

**CM256. Human Genetics.** (Same as Molecular, Cell, and Developmental Biology CM256.) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Strongly recommended: Molecular, Cell, and Developmental Biology 100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM156. Independent research project required of graduate students.

**C259. Advanced Molecular Genetics (5 units).** (Formerly numbered C219.) Lecture, three hours; discussion, two hours. Prerequisites: Chemistry 153A and Life Sciences 4, or consent of instructor. Integrated conceptual analysis of classical and modern molecular genetics of microbes, with coverage of key papers from elucidation of genetics code to the present. Essential elements of experimental design, analysis of results, and scientific logic. Concurrently scheduled with course C159.

**M260. Immunology Forum (2 units).** (Same as Microbiology and Immunology M260.) Prerequisite: course M185A. Broad range of current topics in immunology presented and discussed at advanced frontier level. Continuing UCLA-wide, general graduate-level seminar involving faculty, postdoctoral immunologists, and graduate students from diverse departments. S/U grading.

**M261. Molecular and Cellular Immunology (6 units).** (Same as Microbiology and Immunology M261 and Molecular, Cell, and Developmental Biology CM261.) Lecture, four and one-half hours; discussion, 90 minutes. Requisite: Biological Chemistry CM253. Comprehensive course for graduate students and selected undergraduates covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented with discussion section focusing on reading and analysis of primary research articles. Oral presentation required. S/U or letter grading.

**M262A. Seminar: Current Topics in Immunobiology of Cancer (2 units).** (Same as Microbiology and Immunology M262A.) Review of recent literature in immunology, biology, and biochemistry of cancer, with emphasis on fundamental studies involving cell-mediated immunity, humoral response, tumor specific antigens, and new techniques. Discussion of reports on scientific meetings. May be repeated for credit. S/U or letter grading.

**M262B. Immunology of AIDS (2 units).** (Same as Epidemiology M214 and Microbiology and Immunology M262B.) Lecture, one hour; discussion, one hour. Requisites: course M258B, Microbiology and Immunology 202A, 202B, 202C, 202D. Lecture and student discussion of assigned publications. Topics include specific anti-HIV immune responses, activation of immune system by HIV, and basic mechanisms that underlie HIV-induced immunodeficiency. S/U or letter grading.

**M262D. Selected Topics in Immunology (2 units).** (Same as Microbiology and Immunology M262D.) Prerequisite: consent of instructor. Student participation in discussions related to various topics in immunology. May be repeated for credit. S/U or letter grading.

**M263. Molecular and Cellular Immunology Seminar (2 units).** (Same as Microbiology and Immunology M263.) Prerequisite: consent of instructor. Critical discussions of current literature in T and B cell immunology, with emphasis on molecular mechanisms.

**M264A-M264B-M264C. Molecular Basis of Atherosclerosis: Selected Topics (2 units each).** (Same as Biological Chemistry M264A-M264B-M264C and Chemistry M264A-M264B-M264C.) Biochemistry, morphology, and physiology of atherosclerosis. Emphasis on chemistry of lipoproteins and role of plasma lipoproteins in regulation of tissue lipid metabolism and development of atherosclerosis. Each course may be taken independently for credit.

**CM265. Bioprocess Technology.** (Same as Chemical Engineering CM265.) Lecture, two hours; laboratory, eight hours; outside study two hours. Prerequisites: course 101, Chemical Engineering C115, and Chemistry 156, or consent of instructor. Current bioprocess technologies involving microorganisms, especially extremophiles and animal cells, as vehicles for macromolecular and biomaterial production. Applications to processes including mineral leaching, remediation, and biotransformation. Emphasis on exploiting properties of diverse microorganisms. Exercises may vary yearly. Concurrently scheduled with course CM165.

**270. Seminar: Molecular Virology (2 units).** Prerequisites: graduate standing, consent of instructor. Discussion and student presentations of recent work in molecular virology, including viral gene expression and function. S/U grading.

**280. Seminar: Molecular and Cellular Endocrinology (2 units).** Prerequisites: graduate standing, consent of instructor. Discussion and student presentations of recent work in molecular and cellular endocrinology. S/U grading.

**CM285. Intermediate Immunology.** (Formerly numbered CM285B.) (Same as Microbiology and Immunology M285 and Molecular, Cell, and Developmental Biology CM285.) Lecture, three hours; discussion, one hour. Requisites: course M185A, Molecular, Cell, and Developmental Biology C180. Recommended corequisite: Chemistry 153B. In-depth exploration of topics introduced in course M185A. Concurrently scheduled with course CM185B.

**290. Seminar: Molecular Genetics (2 units).** Seminar, one hour; discussion, one hour. Prerequisites: graduate standing, consent of instructor. Discussion and student presentations of recent work in molecular and genetic analysis of cellular gene regulation. S/U grading.

**296A-296Z. Seminars: Research Topics in Microbiology and Molecular Genetics (1 to 4 units each).** Discussion, three hours. Prerequisite: consent of instructor. Advanced study and analysis of current topics in microbiology and molecular genetics. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading:

**296A.** Eukaryotic Transcription Control.

**296B.** Regulation of Pre-mRNA Splicing.

**296D.** *Escherichia coli* Physiological Research.

**296E.** Archaeobacterial Research.

**296F.** Molecular Biology of Microbial Diversity.

**296G.** Structure and Function of Membrane Transport Proteins.

**296H.** Genetics of Common Diseases.

**296J.** Microbial Pathogenesis.

**296K.** Advanced Topics in Immunology.

**296L.** Molecular Biology of Bacterial Growth.

**296M.** Immune Regulation and Autoimmune Disease.

**296N.** RNA and Protein Structure and Function.

**296O.** Cell Growth and Signal Transduction.

**296P.** Bacterial Toxins and Human Cytokines.

**296Q.** Mechanisms of Hematopoietic Development.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Preparation for Teaching Microbiology in Higher Education (2 units).** Lecture/discussion/laboratory. Prerequisites: graduate standing, consent of instructor. Study of problems and methodologies in teaching microbiology, including workshops, seminars, apprentice teaching, and peer observation. S/U or letter grading.

**596. Directed Individual Research (2 to 12 units).**

**598. Research for M.A. Thesis (2 to 12 units).**

**599. Research for Ph.D. Dissertation (2 to 12 units).**

## MOLECULAR AND MEDICAL PHARMACOLOGY

### Professors

Jorge R. Barrio, Ph.D.  
Gautam Chaudhuri, M.D., Ph.D.  
Arthur K. Cho, Ph.D., *Emeritus*  
Bernard K-K. Fung, Ph.D.

Harvey R. Herschman, Ph.D. (*Crump Professor of Medical Engineering*)

Edward J. Hoffman, Ph.D.

Sung-Cheng (Henry) Huang, D.Sc.

Louis J. Ignarro, Ph.D.

Donald J. Jenden, M.D., Ph.D., *Emeritus*

Barbara Levey, M.D.

Jamshid Maddahi, M.D.

John C. Mazzotta, M.D., Ph.D.

Richard W. Olsen, Ph.D.

Michael E. Phelps, Ph.D. (*Jennifer Jones Simon*

*Professor of Radiation Oncology*)

Nagichettiar Satyamurthy, Ph.D.

Heinrich R. Schelbert, M.D., Ph.D.

### Associate Professors

Don H. Catlin, M.D.

Magnus Dahlbom, Ph.D.

Jon M. Fukuto, Ph.D.

Cameron B. Gundersen, Ph.D.

David A. Hovda, Ph.D.

Sherrel G. Howard, Ph.D.

### Assistant Professors

Simon R. Cherry, Ph.D.

Samson Chow, Ph.D.

Johannes Czernin, M.D.

Sanjiv Gambhir, M.D., Ph.D.

Carl Hoh, M.D.

Daniel L. Kaufman, Ph.D.

Harley I. Kornblum, M.D., Ph.D.

William Melega, Ph.D.

Phoebe L. Stewart, Ph.D.

Tatsushi Toyokuni, Ph.D.

Joy A. Umbach, Ph.D.

Hong Wu, Ph.D.

## Scope and Objectives

The Department of Molecular and Medical Pharmacology has basic and clinical components in which students have opportunities to develop intellectually and experimentally in basic biological sciences placed in the context of human disease. The department conducts teaching and research programs that begin with molecular interactions and extend to studies of diseases and their treatment in humans. Starting with the biochemistry of drugs, departmental investigators study gene expression and its regulation, signal transduction processes, cell-to-cell communication, and integrated organ functions using techniques of structural chemistry and biology, molecular and cell biology, and cellular and organ imaging. Organic synthesis, genetic engineering, and imaging techniques such as confocal fluorescent and cryoelectron microscopy, autoradiography, and positron emission tomography (PET) are extensively employed. The imaging techniques are available in the Crump Institute for Biological Imaging and the UCLA-DOE Laboratory of Structural Biology and Molecular Medicine, which are closely affiliated with the department. The goal of the education program is to provide faculty members and students the opportunity to examine the molecular and clinical basis of disease and the mechanisms of drugs in their treatment, as well as to visualize the changes in the disease state with procedures that monitor the molecular basis of cellular and organ function.

The graduate program seeks to prepare students for these interdisciplinary activities with a basic foundation in genetics, molecular and cellular biology, and pharmacology during their

first year in residence. The second year is spent in the laboratory and in elective courses selected to reflect each student's interest, background, and requirements for the research undertaken. Numerous opportunities for interaction with other departments, institutes, and programs are provided through interdisciplinary coursework and many collaborative research activities.

Although the department offers only graduate degrees, upper division undergraduate courses are offered with enrollment restrictions as indicated in the course descriptions.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

Note: There is no degree program in pharmacy at UCLA.

## Master's Degree

### Admission

The Master of Science (M.S.) degree in Pharmacology is offered only under special circumstances: for example, to candidates who already have a doctoral degree in another field and wish to obtain additional training in pharmacology or to those doctoral students who are already in the program and who for some reason cannot continue for the Ph.D. To obtain the M.S. degree, the student must formally request approval by the graduate training committee. If approved, a guidance committee, proposed by the student and approved by the graduate training committee, reviews the thesis. None of the research conducted for the M.S. thesis may be applied to a Ph.D. degree later.

### Areas of Study

Consult the department.

### Course Requirements

The M.S. degree requires satisfactory completion of the required courses as listed under doctoral course requirements below, excluding three quarters of Molecular and Medical Pharmacology 200.

### Comprehensive Examination Plan

None.

### Thesis Plan

The M.S. degree requires satisfactory completion of a thesis.

## Doctoral Degree

### Admission

In addition to meeting University requirements for graduate admission, applicants must have received a bachelor's degree in a biological or physical science or in the premedical curricu-

lum. Prerequisite courses include basic biology, basic chemistry, organic chemistry, and biochemistry, including laboratory. Quantitative analysis and physical chemistry are recommended.

In suitable cases, students who have course deficiencies may be admitted to graduate status, but any deficiencies have to be removed within a specified time. Graduate Record Examination (GRE) scores and three letters of recommendation are required.

Applicants may write to the department for a departmental brochure and/or application form.

Students may also enter the program through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 172 MBI, UCLA, Los Angeles, CA 90024-1570, (310) 206-6051.

The Department of Molecular and Medical Pharmacology offers two M.D./Ph.D. programs concurrently with the UCLA School of Medicine. One is the Medical Scientist Training Program (MSTP) in which candidates are medical students that have been accepted into MSTP by the medical school in order to qualify. The second is the Speciality Training and Advanced Research (STAR) Program in which candidates are post-M.D. housestaff (interns, residents, or fellows) who have been accepted into the STAR Program by its selection committee in order to qualify.

### Major Fields or Subdisciplines

Cardiovascular pharmacology; chemical pharmacology; medical pharmacology; immunopharmacology; neuroendocrine pharmacology; neuropharmacology; psychopharmacology; nuclear medicine (positron emission tomography); pharmacokinetics.

### Course Requirements

*Required:* Molecular and Medical Pharmacology 200 (three quarters), 211A-211B, 212A-212B, 234A-234B, 237A-237B, 241, 251 (must be taken every quarter); and two electives chosen from Molecular and Medical Pharmacology M255, Biological Chemistry CM253, CM267 or Neurobiology M209A, Physiology 201A-201B/M203A-M203B, or a course in biostatistics.

These requirements are waived for students who have passed equivalent courses with grades of B or better within the past 36 months. Students are required to maintain a grade-point average of 3.0 in all coursework and to achieve grades of B or better in all molecular and medical pharmacology courses. One grade of less than B in a required molecular and medical pharmacology course results in probationary status; the course must be repeated with a grade of B or better; two grades of less than B result in recommendation to the graduate dean for dismissal. A single grade below B in any of the other required courses results in probationary status as well. Any student with two grades less than B in any of the non-molecular and medical pharmacology

courses is considered by the graduate training committee for dismissal. A total of three grades below B in any of the required courses results in recommendation to the graduate dean for dismissal.

All required coursework should be completed by the end of the sixth quarter.

The department provides a system of laboratory rotations (Molecular and Medical Pharmacology 200) in order to familiarize students with a variety of pharmacological research areas and techniques. During the first year in the department, students participate in projects of the laboratories of their choosing. Students also become familiar with the literature relevant to the various research projects and thus establish a basis for the selection of their own research areas.

Students must submit a report on their activities at the end of each quarter of Molecular and Medical Pharmacology 200 to research advisers. The report should include the nature of the project, how the student participated, the results obtained, and a critical evaluation of the project. A copy of this report and an evaluation form by the research adviser is submitted to the graduate training committee. A report on the student and the final grade is also submitted to the committee by the research adviser.

For students entering through UCLA ACCESS, required courses include Molecular and Medical Pharmacology 237A, 241, 251 (each term after entering a pharmacology laboratory for dissertation research), Biological Chemistry CM253, and CM267 or Neurobiology M209A. Recommended electives include Molecular and Medical Pharmacology 211A, 211B, 212A, 212B, 234A, 234B, 237B, M255, Physiology 201A-201B/M203A-M203B, and one biostatistics course. Students may use course 200 or courses in other departments for the three required laboratory research rotations.

Examinations are given in all courses except seminars and research. These are in the form of written examinations, oral examinations, term papers, and/or laboratory practicals.

### Written and Oral Qualifying Examinations

After completing all required courses, students take a departmental comprehensive examination consisting of a written part and an oral part. The examination panel then recommends continuation toward the Ph.D. degree, further remedial study, or termination. This examination tests for a rational, analytical approach to problem solving and for ability to integrate material learned in different courses. Students are required to know basic principles of pharmacology and the status of topics of current interest in pharmacology.

After passing the departmental comprehensive examination, the student must take the University Oral Qualifying Examination within 24 months. This examination is administered by the doctoral guidance committee. The examination concentrates on the background litera-

ture, experimental methods, and implications of the field of interest and dissertation project.

If any one of the above required examinations is failed, the student may be reexamined at a later date determined by the guidance committee.

## Molecular and Medical Pharmacology

### Upper Division Courses

**110A-110B. Drugs: Mechanisms, Uses, and Misuse.** (Formerly numbered 110.) Lecture, four hours (seven weeks); discussion, four hours (three weeks). Requisites: Chemistry 15, Life Sciences 2, 3. Course 110A is requisite to 110B. Introduction to pharmacology for undergraduate students, emphasizing principles underlying mechanism of action of drugs, their development, control, rational use, and misuse.

**M115. Introduction to Pharmacology and Therapeutics (2 units).** (Same as Nursing M115.) Prerequisite for non-nursing students: consent of instructor. Systematic review of major drug groups used therapeutically, the most commonly used members in each group, differences among them, and their mechanisms of action.

**199. Special Studies (2 to 8 units).** Prerequisite: consent of instructor and department chair. Special studies in pharmacology, including either reading assignments or laboratory work or both, designed for proper training of students.

### Graduate Courses

**200. Introduction to Laboratory Research (2 to 4 units).** Individual projects in laboratory research for beginning graduate students. At end of each term students submit to their supervisor a report covering research performed. Pharmacology graduate students must take this course three times during their first two years in residence. S/U or letter grading.

**203. Medical Pharmacology (2 units).** Lecture, zero to two hours; discussion, zero to two hours. Requisites: courses 211A-211B. Series of lectures and case presentations designed to illustrate principles of pharmacology in a clinical context, and solution of practical therapeutics by reference to pharmacokinetics, mechanisms of action, and disposition of drugs.

**211A-211B. Principles of Pharmacology (4 units, 2 units).** Lecture, three to eight hours; discussion, zero to nine hours. Prerequisites: mammalian physiology, biochemistry. Systematic consideration of principles governing interaction between drugs and biological systems and of principal groups of drugs used in therapeutics. Particular attention on modes of action, pharmacokinetics, and disposition to provide a scientific basis for their rational use in medicine.

**212A-212B. Graduate Commentary: Medical Pharmacology (2 units each).** Preparation: mammalian physiology, biochemistry. Supplementation of topics covered in course 203. Primarily for graduate students.

**M221. Cellular and Molecular Neurochemistry.** (Same as Biological Chemistry M221, Neurobiology M221, Neuroscience M240, and Psychiatry M221.) Lecture, three hours; discussion, one hour. Prerequisite: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling. S/U or letter grading.

**234A-234B-234C. Experimental Methods in Pharmacology (2 units each).** Prerequisite: consent of instructor. Survey of experimental methods and instrumentation used in analysis, identification, and study of mechanisms of action of pharmacologically active compounds.

**237A-237B-237C. Research Frontiers in Cellular and Molecular Pharmacology.** Prerequisites: course 241, consent of instructor. Detailed examination of mechanisms of drug action at organismal, tissue, cellular, and molecular levels, emphasizing receptors, receptor/effector coupling, neurotransmitters, autonomic and central nervous system pharmacology.

**241. Introduction to Chemical Pharmacology (6 units).** Preparation: organic and biological chemistry. Designed for molecular and medical pharmacology majors. Introduction to general principles of pharmacology. Role of chemical properties of drugs in their distribution, metabolism, excretion, and modes of action.

**M248. Introduction to Biological Imaging.** (Same as Biomedical Physics M248.) Lecture, three hours; laboratory, one hour. Exploration of role of biological imaging in modern biology and medicine, including imaging physics, instrumentation, image processing, and applications of imaging for a range of modalities. Practical experience provided through a series of imaging laboratories.

**251. Seminar: Pharmacology (2 units).** Seminars presented by students, faculty, and guest lecturers on a variety of topics. S/U grading.

**M255. Biological Catalysis.** (Same as Biological Chemistry M255, Chemistry CM255, and Molecular, Cell, and Developmental Biology CM252.) Requisites: Chemistry 110A, 153A, 153B, Life Sciences 3, Molecular, Cell, and Developmental Biology 100 or C139 or M140. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level.

**M257. Introduction to Toxicology.** (Same as Pathology M257.) Prerequisite: course 241 or consent of instructor. Biochemical and systemic toxicology, basic mechanisms of toxicology, and interaction of toxic agents with specific organ systems.

**M258. Pathologic Changes in Toxicology.** (Same as Pathology M258.) Designed to give students experience in learning normal histology of tissues which are major targets of toxin and the range of pathologic changes that occur in these tissues (liver, bladder, lung, kidney, nervous system, and vascular system).

**291. Special Topics in Pharmacology (2 to 4 units).** Examination in depth of topics of current importance in pharmacology. Emphasis on recent contributions of special interest to advanced Ph.D. candidates and faculty.

**298. Seminar: Current Topics in Molecular and Medical Pharmacology (2 units).** Limited to pharmacology majors, ACCESS program students, and interdepartmental Molecular Biology Ph.D. program students. Students conduct or participate in discussions on assigned topics. S/U or letter grading.

**596. Directed Individual Research in Pharmacology (4 to 12 units).**

**599. Research for and Preparation of Ph.D. Dissertation (4 to 12 units).**

## Scope and Objectives

The Ph.D. in Molecular Biology is offered under the supervision of an interdepartmental committee. The Molecular Biology Institute serves this committee and the various departments concerned in support of faculty research and teaching associated with the Ph.D. program. Staff members are from participating departments and from the Molecular Biology Institute. Areas for study include cell biology; developmental biology and neurobiology; DNA replication, repair, and recombination; gene regulation; immunobiology; microbiology/virology; molecular evolution and paleobiology; oncogenes and signal transduction; plant molecular biology; protein structure and function; and structural biology.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Doctoral Degree

### Admission

Students are admitted to the program through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 172 MBI, UCLA, Los Angeles, CA 90024-1570, (310) 206-6150. In addition, under special circumstances, the program may admit students directly to the first year according to the following criteria. Recommended undergraduate training for the Ph.D. program includes a major in a biological or physical science. Coursework should include one year each of calculus, general chemistry, organic chemistry, physics, and biology. In addition, the student should have completed intermediate level courses in physical chemistry, organic chemistry, biochemistry, and genetics. Undergraduate requirements may be modified for qualified candidates with interests in certain areas. Students entering the program with course deficiencies are expected to rectify these early in the graduate program.

Only superior students are admitted, and in addition to the application, transcripts, and statement of purpose, three letters of recommenda-

tion are required along with Graduate Record Examination (GRE) scores.

## Major Fields or Subdisciplines

Consult department.

## Course Requirements

The usual program is two regular courses per quarter or the equivalent of 12 quarter units of upper division or graduate work. Five quarters of Molecular Biology M298 are required, as well as one quarter each of Biological Chemistry CM248, CM253, and CM267 or their equivalent. One quarter of M234, Ethics in Biomedical Research, must be completed by the end of the third year.

## Written and Oral Qualifying Examinations

Examinations are given in Molecular Biology M298, and four must be passed. The first proposal should be submitted by the third week of the first Summer Quarter. The University Oral Qualifying Examination on original research proposed by the candidate independently of the Ph.D. adviser and on a topic distinct and separate from thesis research is held usually during the second year in the program. A "mid-stream seminar" must be presented at the end of the third year of study.

## Molecular Biology

### Graduate Courses

**297. Seminar: Molecular and Cellular Life Sciences (2 units).** In-depth surveys of recent developments in specific fields of life sciences research. By reading and presenting primary research articles, students learn to critically evaluate research papers and organize and present a seminar on a specific research topic. S/U or letter grading.

**298. Seminar: Current Topics in Molecular Biology (2 units).** (Formerly numbered M298.) Requisite: consent of instructor(s) and graduate adviser of interdepartmental Molecular Biology Ph.D. Program. Students conduct and participate in discussions on assigned topics. May be repeated for credit. S/U or letter grading.

### Related Courses

The following courses offered by the departments listed are particularly appropriate to the research areas mentioned above. With the approval of the guidance committee or research supervisor, other related courses may be included in the program.

#### Biological Chemistry

M221. Cellular and Molecular Neurochemistry  
 CM248. Molecular Genetics  
 CM253. Macromolecular Structure  
 M255. Biological Catalysis  
 M263. Metabolism and Its Regulation  
 M264A-M264B-M264C. Molecular Basis of Atherosclerosis: Selected Topics  
 M266A-M266B-M266C. Seminars: Molecular Embryology  
 CM267. Macromolecular Metabolism and Subcellular Organization

#### Chemistry and Biochemistry

M230B. Structural Molecular Biology  
 M230D. Structural Molecular Biology Laboratory

CM253. Macromolecular Structure  
 M263. Metabolism and Its Regulation  
 M264A-M264B-M264C. Molecular Basis of Atherosclerosis  
 M267. Macromolecular Metabolism and Subcellular Organization

#### Microbiology and Immunology

250. Cell and Molecular Biology  
 M256. Seminar: Viral Oncology  
 M260. Immunology Forum  
 M262A. Seminar: Current Topics in Immunobiology of Cancer  
 M262B. Immunology of AIDS  
 M263. Molecular and Cellular Immunology Seminar

#### Microbiology and Molecular Genetics

242. Seminar: Microbial Molecular Genetics  
 M248. Molecular Genetics  
 250. Seminar: Microbial Metabolism  
 251. Seminar: Regulation and Differentiation  
 M260. Immunology Forum  
 M263. Molecular and Cellular Immunology Seminar  
 290. Seminar: Molecular Genetics

#### Molecular, Cell, and Developmental Biology

228. Prokaryotic and Eukaryotic Gene Systems  
 M230B. Structural Molecular Biology  
 M230D. Structural Molecular Biology Laboratory  
 M234. Genetic Control of Development  
 CM248. Molecular Genetics  
 257A. Gene Manipulation: Genetic Engineering

Paul H. O'Lague, Ph.D.

#### Assistant Professors

Renato J. Aguilera, Ph.D.  
 Chentao Lin, Ph.D.  
 Xin Liu, Ph.D.  
 Karam Singh, Ph.D.  
 Hong Wu, Ph.D.

#### Lecturers

Roger Bohman, Ph.D.  
 Lianna Johnson, Ph.D.

## Scope and Objectives

The revolution in modern biology that began with the elucidation of the structure of DNA by Watson and Crick in the 1950s has had a profound effect not only on biological research, but on the way biology is taught as a subject. The field of biology spawned by this discovery, generally called molecular biology, has provided an entirely new framework within which to approach questions in cell and developmental biology. The specializations, both technical and conceptual, demanded by this field have led to the growth of molecular biology and its related disciplines into an essentially separate branch of scientific inquiry.

Students who complete the requirements for the Bachelor of Science degree in Molecular, Cell, and Developmental Biology are exceptionally well prepared to pursue careers in cellular and subcellular biological research, biomedical research, or medicine or allied health fields. The degree combines essential background studies in mathematics, chemistry, and physics with a general introduction to all of the biological subjects, as well as in-depth exposure to key topics in molecular, cell, and developmental biology. The M.A. and Ph.D. degrees provide opportunities for advanced concentrated study and require independent and innovative research that ultimately results in publishable theses and dissertation materials.

## Undergraduate Study

### Bachelor of Science Degree

The Bachelor of Science degree in Molecular, Cell, and Developmental Biology (MCDB) is designed especially for students who intend to go on to postgraduate work in biology or medicine and for students aiming for entry-level positions in biotechnology-related fields. Students are exposed to basic biological and molecular concepts underlying recent technical advances in molecular, cell, and developmental biology of animals and plants. Areas of emphasis include cell biology, immunology, molecular biology, plant biology, developmental biology, and neurobiology, among others.

### Preparation for the Major

#### Life Sciences Core Curriculum

*Required* (effective Fall Quarter 1997): Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 10A, 10B/10BL, 10C, and 10D/10DL, or 11A, 11B/11BL, 11CL, 132A, and 132B/132BL, or 20A, 20B, 20L, 30, 30L, and 130A/130AL;

Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

All core curriculum courses must be passed with a grade of C – or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

#### Transfer Students

In order to be admitted as molecular, cell, and developmental biology majors, transfer students who have 80 or more units must have completed one year of general biology for majors, preferably equivalent to Life Sciences 1, 2, and 3; one year of general chemistry with laboratory; one year of calculus; and either one year of calculus-based physics or one year of organic chemistry.

#### The Major

*Required:* Chemistry and Biochemistry 153A, 153L; Molecular, Cell, and Developmental Biology 100 or C139 or M140, 104, 138 or C141, and 144; a minimum of three core courses from Molecular, Cell, and Developmental Biology CM156, 157, CM160, CM169, M170, 171, C174A through C174F, M175A, 176, CM178, C180 or M185A, CM185B; 12 elective units selected from the following: any molecular, cell, and developmental biology course listed above not used to satisfy the core requirement, Biology 110, 121, 146, 162, 166, Chemistry and Biochemistry 153C, Microbiology and Molecular Genetics 101, 102, C159, Molecular, Cell, and Developmental Biology 142, C150, C172, M175B, M175C, 176, C177, 189; four units of upper division laboratory experience selected from Biology M158, 162, 166, Molecular, Cell, and Developmental Biology 155, 190A through 190D, 199.

#### Additional Requirements

(1) A maximum of eight units of Molecular, Cell, and Developmental Biology 190 or 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied except by petition.

(2) Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. MCDB majors must earn a C – or better in each preparation for the major course, and at least a 2.0 (C) overall average in all courses applied toward the major.

## Graduate Study

## Master's Degree

### Admission

The department does not accept students whose sole objective is the master's degree.

### Areas of Study

See under Doctoral Degree.

### Course Requirements

The program consists of at least nine courses in graduate standing, of which at least five must be graduate-level (200 series) courses. The remainder may be courses in the 100, 200, or 500 series. No more than two 596 courses (eight units) may be applied toward the nine courses required for the degree; only one 596 course (four units) may be applied toward the minimum graduate course requirement. Courses graded S/U may not be applied toward the minimum requirement unless these courses are not offered for a grade.

Specific course requirements are established for each student by the guidance committee.

### Comprehensive Examination Plan

The departmental written qualifying examination, or its equivalent as determined by the graduate adviser, serves as the comprehensive examination for the M.A. degree.

### Thesis Plan

A thesis reporting the results of an original investigation, written to conform to the requirements of the Graduate Division, is presented to and approved by the master's thesis committee of three faculty members. Before beginning work on the thesis, students must obtain approval of the subject and general plan from the faculty members concerned and from the thesis committee.

## Doctoral Degree

### Admission

The Department of Molecular, Cell, and Developmental Biology does not admit students directly into its Ph.D. program. Students interested in molecular, cell, and developmental biology programs and faculty are recruited and admitted through UCLA ACCESS, in which all departmental faculty participate.

The department expects graduate students to have or to acquire a background comparable to the requirements for the bachelor's degree in biology at UCLA. A background in chemistry, physics, and mathematics is essential. Deficiencies in these or other subjects must be made up at the earliest opportunity, preferably during the first year of the ACCESS program.

Applications and additional information may be obtained from the UCLA ACCESS Office, 172 MBI, UCLA, Los Angeles, CA 90024-1570.

### Major Fields or Subdisciplines

Fields of emphasis reflect the research foci of the faculty. These include cell biology, molecu-

lar biology, genetics and developmental biology, in both plants and animals; and immunology and neurobiology in animals.

### Course Requirements

In addition to any remedial coursework specified by the graduate adviser, all Ph.D. students are required to take (and pass with a grade of B or better) a minimum of four graduate-level courses approved by the department. This is a minimum requirement. Students may elect, in consultation with their thesis adviser, to take additional graduate courses or seminars in a particular area of specialization. Consult the department for course requirements.

*Computer Literacy Course and Certification.* All students who cannot demonstrate competency with computers must take a five-week, two-unit computer literacy course. Students must meet with the instructor during the week before classes begin in the fall of their second year to determine whether they must take all, part, or none of the course. The instructor must sign a statement for each beginning student certifying that the student has basic computer skills.

All molecular, cell, and developmental biology graduate students are required to take the teaching assistant training course (Biology 495), and are expected to teach a minimum of three quarters during their graduate careers. Students indicate to the Graduate Office which quarter they are available to be a teaching assistant. If they fail to volunteer, and fall behind in the normal schedule of a teaching assistant, the graduate adviser may assign them to a course arbitrarily.

### Written and Oral Qualifying Examinations

*Written Qualifying Examination.* The written qualifying examination must be passed before taking the doctoral oral examination. The written qualifying examination requirement is satisfied through written papers generated in connection with selected courses, including seminar courses. Such papers are separate from the formal course requirements for these courses, and do not form part of the course grade. It is the responsibility of the student to arrange with the instructor at the beginning of a course to submit such a paper at the end of the course. (The department's version of the written qualifying examination is used by most Ph.D. programs in the molecular life sciences, and the graduate courses taken by molecular life sciences students all offer the written qualifying examination paper option.) These papers are in the form of a mini research proposal and are graded as pass, rewrite, or fail. If a rewrite is required, specific criticism is supplied by those grading the paper. A minimum of three such papers, with a grade of pass, is required; a minimum of two of these must be written in connection with courses or seminars taught by Molecular, Cell, and Developmental Biology faculty. A copy of each paper, with graders' comments, becomes part of the student's file.

*Oral Qualifying Examination.* The doctoral Oral Qualifying Examination, ordinarily taken by the end of the second year in residence, is composed of two sections: presentation of an independent research proposal, and testing of general knowledge of advanced biology. The examinations are administered by the doctoral committee and conform to the standard requirements of the Graduate Division. Detailed instructions and suggestions are given in the *Graduate Student Handbook* (Appendix 1).

## Molecular, Cell, and Developmental Biology

### Lower Division Courses

**30. Biology of Cancer.** Introduction to molecular, cellular, and clinical aspects of cancer and consideration of sociological and psychological impacts of cancer on the individual and society. P/NP or letter grading.

**40. AIDS and Other Sexually Transmitted Diseases.** Introduction to interdisciplinary debate surrounding the personal and societal response to AIDS and other sexually transmitted diseases. P/NP or letter grading.

**70. Genetic Engineering and Society.** Lecture, three hours; discussion, two hours. Designed for nonmajors. Not open to students with credit for Life Sciences 3 or 4 or former Biology 9 or 108. Basic principles of genetic engineering. Overview of genetic engineering techniques and relationship of genetic engineering to medicine, agriculture, and society. Emphasis on specific genetic engineering applications to generate discussion on its use in society.

**80. The Green World: Plant Biology for Now and the Future.** Lecture, three hours; laboratory, two hours. Designed for nonmajors. Basic principles of plant biology and introduction to techniques for manipulating plants for improved agriculture, sources of renewable "clean" energy, reclamation of deforested and nutritionally depleted soils, and "biological factories" to produce biodegradable plastics, antibodies, and other commodities. Underexploited agriculture crops also featured. P/NP or letter grading.

**88C. Lower Division Seminar: Frontiers of Molecular Biology — Historical Perspective.** Seminar, three hours. Limited to freshmen who have not completed Life Sciences 3 or former Biology 9; designed for nonmajors. Study of biology at molecular level has unlocked secrets of the gene, started the biotechnology revolution, and promises a new scientific age that uses gene therapy to cure human disease, produce superplants that grow in the desert, and uncover the mysteries of the mind. Exploration of origins and history of molecular biology by analyzing papers written by Mendel, Watson, Crick, and others who played a major role in changing society with their discoveries of new biological principles. P/NP or letter grading.

**88D. Lower Division Seminar: Genetics and Society.** Discussion, three hours. Some ways genetics affects us now and what changes are possible for our children. Examination of biological basis of inheritance in order to understand scientific methods and science teaching.

**88E. Lower Division Seminar: Genetics and Society — Current Status and Future Applications.** Seminar, three hours; outside study, nine hours. Recent advances in genetics have opened up new possibilities in fields of forensics, medicine, agriculture, and industry, with corresponding legal, social, and economic ramifications. Examination of scientific/genetic basis underlying genetic engineering, genetic screening, gene therapy, eugenics, DNA fingerprinting, cloning, etc., and discussion of current and future applications. P/NP or letter grading.

**88F. Lower Division Seminar: Science and Scientists — Expectations and Realities (2 units).** Examination of change from when science was done by individuals as an avocation without societal goals to contemporary science which is done by professionals and is driven by societal needs and pressures. P/NP or letter grading.

**M88H. Lower Division Seminar: Limits of Biological Design through Physical Principles.** (Same as Physics M88.) Seminar, three hours. Enforced requisites: Chemistry 10A and 10B, or 11A and 11B, Life Sciences 1, 3, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A, Physics 6A, 6B, and 6C, or 8A, 8B, 8C, and 8D. Specific examples of diverse biological design such as scaling of metabolic activity, bone and muscle mass, cell size, cell membranes and pumps, heart and blood circulation, swim bladders, insect vision, magnetic bacteria, etc., studied quantitatively using elementary mathematics and physical principles.

## Upper Division Courses

**100. Introduction to Cell Biology.** (Formerly numbered Biology 100B.) Lecture, three hours; discussion, one hour. Requisites: Chemistry 10A, 10B, and 10BL or 11 series (may be taken concurrently), Life Sciences 3, 4. Not open for credit to students with credit for course C139 or M140. Analysis of cell organization, structure, and function at molecular level. Cell membranes and organelles, membrane transport, cellular signaling, cytoskeleton and cell movement, intracellular trafficking, cell energetics.

**104. Cell and Molecular Biology Laboratory (6 units).** Lecture, 90 minutes; discussion, one hour; laboratory, eight hours; outside study, seven and one-half hours. Requisites: Life Sciences 3, 4. Introduction to methods in molecular biology. Topics include purification, manipulation and analysis of DNA, RNA, and protein. Emphasis on computer sequence analysis and use of current literature.

**CM133. Principles, Practices, and Policies in Biotechnology (2 units).** (Same as Biological Chemistry CM133, Biomedical Physics CM133, Chemical Engineering CM133, Chemistry CM133, Microbiology CM133, and Microbiology and Immunology CM133.) Lecture, three hours. Designed for juniors/seniors. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in their career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM233.

**138. Developmental Biology.** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Strongly recommended: course 100 or C139 or M140. Cellular and molecular basis of animal embryology.

**C139. Molecular Cell Biology (6 units).** Requisites: Chemistry 153A, Life Sciences 3. Not open for credit to students with credit for course 100 or M140. Introduction to cell biology for graduate students in basic medical sciences and selected undergraduates. Topics include membrane structure, assembly, and function; biogenesis of organelles, intercellular and intracellular signaling, immunity and gene structure, function and replication. Concurrently scheduled with course CM220.

**M140. Cell Biology: Cell Cycle (5 units).** (Same as Biological Chemistry M140.) Lecture, three hours; discussion, one hour. Requisites: Chemistry 10A, 10B, and 10BL or 11 series (may be taken concurrently), Life Sciences 3, 4. Not open for credit to students with credit for course 100 or C139. Satisfies premedical requirements. Eukaryotic cellular structures and biogenesis at a molecular level. Biochemical and genetic analysis of cell cycle, signal transduction, and their involvement in development and cancer. Protein sorting and transport across cell membranes. Cytoskeletal components and cell-adhesion.

**C141. Molecular Basis of Plant Differentiation and Development.** (Formerly numbered Biology C141.) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 1, 3, 4. In-depth study of basic processes of growth differentiation and development in plants and molecular mechanisms underlying these processes. Discussion of a variety of plant systems, with focus on developing critical understanding of current experimental basis of research in this field. Concurrently scheduled with course C239.

**142. Seminar: Topics in Developmental Biology (2 units).** Requisite: course 138. Undergraduate seminar on topics in developmental biology. Reading and group discussions on current research. P/NP or letter grading.

**144. Molecular Biology.** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Not open for credit to students with credit for Chemistry 153B or former Biology 100A. Structure of genes and chromosomes; prokaryotic and eukaryotic replication and transcription; repair and recombination; RNA processing.

**C149. Biology of Aging.** Lecture, three hours; discussion, one hour. Preparation: completion of life sciences core curriculum. Overview of expanding field of aging biology — major theories (and myths) of aging; analysis of aging at level of organs, tissues, individual cells, proteins, and genes; experimental models of aging; diseases of aging; methods of retarding aging process. Concurrently scheduled with course CM249.

**C150. Plant Chemical and Molecular Communication.** (Formerly numbered 150.) Lecture, three hours; discussion, one hour. Preparation: completion of life sciences core curriculum. Introductory course in chemical ecology and how natural compounds affect gene expression. Emphasis on role of natural compounds in plant/microbe, plant/plant, and plant/herbivore. Interactions; synopsis of principles of plant defense mechanisms and responses to microbial infections. Concurrently scheduled with course C250.

**155. Molecular Genetic Methods.** Lecture, two hours; discussion, one hour; laboratory, six hours; outside study, three hours. Requisite: course 104. Intended for and limited to molecular, cell, and developmental biology majors for priority pass and first pass. Gene mapping and detection and analysis of gene variants by means of inheritance patterns.

**CM156. Human Genetics.** (Same as Microbiology CM156.) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Strongly recommended: course 100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM256.

**157. Gene Manipulation: Genetic Engineering.** Lecture, three hours; discussion, two hours. Requisites: course 138, Life Sciences 3, 4. Strongly recommended: course 100 or C139 or M140. Survey of methods and applications of recombinant DNA research as applied to both basic scientific research and the biotechnology industry.

**CM160. Biological Catalysis.** (Same as Chemistry CM155.) Requisites: course 100 or C139 or M140, Chemistry 110A, 153A, 153B, Life Sciences 3. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level. Concurrently scheduled with course CM252.

**CM169. Macromolecular Metabolism and Subcellular Organization (6 units).** (Same as Biological Chemistry CM169.) Lecture, five hours. Requisites: Chemistry 153A, 153B, 153C. Recommended: Chemistry CM153G. Cell cycle; DNA replication and repair; structure and properties of cellular organelles; regulation of cell division; cell transformation; normal and aberrant expression of oncogenes; molecular aspects of development. Concurrently scheduled with course CM223.

**M170. Biochemistry and Molecular Biology of Photosynthetic Apparatus.** (Same as Chemistry CM170.) Lecture, three hours; discussion, two hours; outside study, seven hours. Requisites: Chemistry 153A and 153B, or Life Sciences 3, and Chemistry 153L. Recommended: Chemistry 153C, 154, Life Sciences 4. Light harvesting, photochemistry, electron transfer, carbon fixation, carbohydrate metabolism, pigment synthesis in chloroplasts and bacteria. Assembly of photosynthetic membranes and regulation of genes encoding those components. Emphasis on understanding of experimental approaches. P/NP or letter grading.

**171. Principles of Neurobiology.** Lecture, three hours; discussion, one hour. Requisites: Biology 166, Life Sciences 3. Strongly recommended: course 100 or C139 or M140. Introduction to basic principles of neurobiology, including description of structure of neurons and nervous systems; ionic mechanisms responsible for generating membrane potentials, action potentials, and synaptic potentials; properties of synaptic transmission, information transduction and coding in sensory pathways, and neural control of movement; development of and trophic interactions between cells of nervous system.

**C172. Molecular Genetics of Bacteria and Phage.** Lecture, three hours; discussion, one hour. Molecular and cellular biology of bacteria and bacteriophages. Concurrently scheduled with course CM207.

**C174A-C174F. Advanced Topics in Cell and Molecular Biology (2 units each).** (Formerly numbered Biology C174A-C174F.) Recent developments in fields of molecular, cell, and developmental biology. Concurrently scheduled with courses C222A-C222F. P/NP or letter grading:

**C174A. Molecular Evolution.** Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Current developments in the field of molecular evolution. Constructing evolutionary trees at molecular level; formal testing of evolutionary hypotheses using sequencing data.

**C174B. Molecular Biology of Cell Nucleus.** Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Animal cell nucleus regulation of cell metabolism. Structure/function relationships, nuclear-cytoplasmic exchange, DNA replication and gene expression.

**C174C. Eukaryotic DNA Replication and Cell Cycle Control.** Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Enzymatic mechanisms of DNA replication, protein kinases and cell cycle control, regulation of genes encoding DNA replication proteins.

**C174D. Molecular Biology of Extracellular Matrix.** Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Recommended: course 138. Synthesis of key extracellular matrix proteins and their assembly into supramolecular structures. Interactions of matrix proteins with cells and their influence on tissue formation.

**C174F. Molecular Parasitology.** Examination of recent advances in molecular biology of parasites and host/parasite relationship. Specific topics include parasite development, antigenic variation in trypanosomes, RNA editing, prospects for parasitic vaccines.

**M175A-M175B-M175C. Neuroscience: From Molecules to Mind (5 units each).** (Same as Neuroscience M101A-M101B-M101C, Physiological Science M180A-M180B-M180C, and Psychology M117A-M117B-M117C.) Lecture, four hours; discussion, one hour. P/NP or letter grading.

**M175A.** Cellular and Systems Neuroscience. Requisites: Chemistry 132A, Life Sciences 2, Physics 6B or 8C. Not open for credit to students with credit for Physiological Science 111A. Students with credit for Molecular, Cell, and Developmental Biology 171 must enroll on a P/NP basis; those enrolling concurrently in course 171 and M175A do not receive credit for M175A. Cellular neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement.

**M175B.** Molecular and Developmental Neuroscience. Requisites: course 171 (or Physiological Science 111A or Psychology 115) or M175A (or Neuroscience M101A or Physiological Science M180A or Psychology M117A), Life Sciences 3, 4. Molecular biology of channels and receptors: focus on voltage dependent channels and neurotransmitter receptors. Molecular biology of supramolecular mechanisms: synaptic transmission, axonal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in developmental neurobiology.

**M175C.** Behavioral and Cognitive Neuroscience. Requisite: course 171 (or Physiological Science 111A or Psychology 115) or M175B (or Neuroscience M101B or Physiological Science M180B or Psychology M117B). Neural mechanisms underlying motivation, learning, and cognition.

**176. Advanced Topics in Animal Virus/Host Interaction.** Lecture, four hours; discussion, one hour; outside study, seven hours. Requisites: Life Sciences 3, 4. Not open for credit to students with credit for Chemistry 153B or Microbiology 102. Recent developments in fields of interaction of hosts with animal viruses. Emphasis on molecular and cellular approaches to understand host/virus interaction at level of entry, replication, assembly, and morphogenesis, as well as host defense and viral pathogenesis. P/NP or letter grading.

**C177. Molecular Biology of Animal Viruses.** Lecture, three hours. Requisites: Chemistry 153B, Life Sciences 3. Recommended for advanced undergraduate students with a major in public health, biology, or microbiology and for graduate students with interest in any field of biology or chemistry. Overview of animal viruses, including viral structure, virus cell interaction, virus replication, and viral oncogenesis. Special emphasis on understanding the molecular mechanism involved in control and regulation of replication, transcription, and translation of viral genome and its complex interaction with host. Concurrently scheduled with course CM279.

**CM178. Molecular Genetics (6 units).** (Same as Biological Chemistry CM178.) Lecture, five hours. Requisites: course 100 or C139 or M140, Chemistry 153A, 153B, Life Sciences 3, 4. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics. Concurrently scheduled with course CM248.

**C180. Molecular and Cellular Immunology (6 units).** Lecture, four and one-half hours; discussion, 90 minutes. Requisites: course 100 or C139 or M140, Chemistry 153A, Life Sciences 3. Not open for credit to students with credit for course M185A. Comprehensive course for graduate students and selected undergraduates covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented with discussion section focusing on reading and analysis of primary research articles. Concurrently scheduled with course CM261.

**M185A. Immunology (5 units).** (Same as Microbiology M185A and Microbiology and Immunology M185A.) Lecture, three hours; discussion, 90 minutes; outside study, 11.5 hours. Requisites: Life Sciences 3, 4. Recommended requisites or corequisites: course 100 or C139 or M140, Chemistry 153A, 153L. Not open for credit to students with credit for course C180/CM261. Introduction to experimental immunobiology and immunochemistry; cellular and molecular aspects of humoral and cellular immune reactions.

**CM185B. Intermediate Immunology.** (Same as Microbiology CM185B.) Lecture, three hours; discussion, one hour. Requisites: courses C180, M185A. Recommended corequisite: Chemistry 153B. In-depth exploration of topics introduced in course M185A. Concurrently scheduled with course CM285.

**189. Seminar: Social Implications of Current Biological Research (2 units).** Seminar, two hours; outside study, four hours. Discussions about how current research in biology, particularly in areas of molecular, cell, and developmental biology, affects social issues and policy. May be repeated once for credit; however, only two units of this course or Biology 188 may be applied toward either the biology or molecular, cell, and developmental biology major.

**190A-190D. Honors Research in Molecular, Cell, and Developmental Biology (2 to 4 units each).** Requisites: senior standing, consent of undergraduate adviser. Individual research designed to broaden and deepen students' knowledge of some phase of molecular, cell, and developmental biology. Must be taken with Molecular, Cell, and Developmental Biology Department faculty for at least two terms and for a total of at least eight units. In Progress grading (credit to be given only on completion of course 190B). Students may elect to enroll in additional research through courses 190C-190D (letter grading). A report on progress must be presented to undergraduate adviser each term a 190 course is taken. Eight units may be applied toward molecular, cell, and developmental biology major.

**M191. Biological Bases of Psychiatric Disorders.** (Same as Neuroscience M130, Physiological Science M181, Psychiatry M191, and Psychology M117J.) Requisite: course 171 or Neuroscience M101A or Physiological Science 111A or Psychology 115. Underlying brain systems involved in psychiatric syndromes and neurological disorders, including schizophrenia, depression, bipolar disorders, obsessive/compulsive disorder, eating disorders. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments.

**193. Teaching Practicum in Molecular, Cell, and Developmental Biology.** Requisites: junior or senior molecular, cell, and developmental biology major, consent of department. Training and supervised practicum for advanced undergraduates in teaching cell and molecular biology. Students serve as junior teaching assistants and assist in preparation of materials and development of innovative programs. Consult Undergraduate Office for further information. May not be applied toward course requirements for biology or molecular, cell, and developmental biology majors. May be repeated once for credit. P/NP or letter grading.

**199. Special Studies (2 to 16 units).** Requisite: consent of instructor and undergraduate adviser based on written proposal outlining the study or research to be undertaken. Studies to involve laboratory or field-related research, not literature surveys or library research. Proposal should be worked out in consultation with instructor and submitted for approval to undergraduate adviser before the day instruction begins in that term. At end of term a report describing progress of the study or research and signed by the student and instructor must be presented to undergraduate adviser. Students who wish to take more than eight units of course 199 in any one term must obtain authorization from department chair and appropriate dean.

## Graduate Courses

**M201. Use of the Computer in Biology (2 units).** (Formerly numbered 201.) (Same as Microbiology and Immunology M241.) Lecture, two hours; laboratory, one hour. Introduction to use of IBM PC micro-computer and VAX minicomputer in biological research. S/U grading.

**CM207. Molecular Genetics of Bacteria and Phage.** (Same as Chemistry M227, Microbiology M227, and Microbiology and Immunology M227.) Lecture, three hours; discussion, one hour. Requisite: Biological Chemistry CM253 or Chemistry CM253. Molecular and cellular biology of bacteria and bacteriophages. Concurrently scheduled with course C172.

**CM220. Molecular Cell Biology (6 units).** (Same as Neurobiology M209A and Physiology M209A.) Not open for credit to students with credit for course 100 or M140. Introduction to cell biology for graduate students in basic medical sciences and selected undergraduates. Topics include membrane structure, assembly, and function; biogenesis of organelles, intercellular and intracellular signaling, immunity and gene structure, function and replication. Concurrently scheduled with course C139.

**C222A-C222F. Advanced Topics in Cell and Molecular Biology (2 units each).** Recent developments in fields of molecular, cell, and developmental biology. Concurrently scheduled with courses C174A-C174F. S/U or letter grading.

**C222A.** Molecular Evolution. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Current developments in the field of molecular evolution. Constructing evolutionary trees at molecular level; formal testing of evolutionary hypotheses using sequencing data. Original research proposal required.

**C222B.** Molecular Biology of Cell Nucleus. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Animal cell nucleus regulation of cell metabolism. Structure/function relationships, nuclear-cytoplasmic exchange, DNA replication and gene expression. Original research proposal required.

**C222C.** Eukaryotic DNA Replication and Cell Cycle Control. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Enzymatic mechanisms of DNA replication, protein kinases and cell cycle control, regulation of genes encoding DNA replication proteins. Original research proposal required.

**C222D.** Molecular Biology of Extracellular Matrix. Requisites: courses 100 or C139 or M140, 144, Life Sciences 4. Recommended: course 138. Synthesis of key extracellular matrix proteins and their assembly into supramolecular structures. Interactions of matrix proteins with cells and their influence on tissue formation. Original research proposal required.

**C222F.** Molecular Parasitology. Examination of recent advances in molecular biology of parasites and host/parasite relationship. Specific topics include parasite development, antigenic variation in trypanosomes, RNA editing, prospects for parasitic vaccines. Original research proposal required.

**CM223. Macromolecular Metabolism and Subcellular Organization (6 units).** (Same as Biological Chemistry CM267 and Chemistry M267.) Lecture, five hours. Requisites: Chemistry 153A, 153B, 153C. Recommended: Chemistry CM153G. Cell cycle; DNA replication and repair; structure and properties of cellular organelles; regulation of cell division; cell transformation; normal and aberrant expression of oncogenes; molecular aspects of development. Concurrently scheduled with course CM169.

**M226A-M226B. Principles of Microbial Pathogenesis.** (Same as Microbiology M226A-M226B and Microbiology and Immunology M226A-M226B.) Lecture, one hour; discussion, three hours. Requisites: Microbiology and Immunology 202A, 202B, 202C, and 202D. Lecture/discussion format designed to analyze basic pathogenesis of infections. Emphasis on molecular and cellular approaches to understand host-microbial interaction. **M226A.** Bacterial and Mycotic Infections; **M226B.** Parasitic and Viral Infections.

**228. Prokaryotic and Eukaryotic Gene Systems (2 units).** Presentations concerning current experimental approaches in study of DNA replication, organization, transcription, and translation.

**M229. Cellular Biology of Host/Pathogen Interactions (6 units).** (Same as Microbiology M229 and Microbiology and Immunology M229.) Lecture, four hours; discussion, 90 minutes. Requisite: Biological Chemistry CM253. Molecular and cellular biology of pathogens, eukaryotic host cells, and interaction between pathogens and hosts.

**M230B. Structural Molecular Biology.** (Same as Chemistry M230B.) Lecture, three hours; discussion, one hour. Requisites: Mathematics 3C, Physics 6C. Selected topics from principles of biological structure; structures of globular proteins and RNAs; structures of fibrous proteins, nucleic acids, and polysaccharides; harmonic analysis and Fourier transforms; principles of electron, neutron, and X-ray diffraction; optical and computer filtering; three-dimensional reconstruction. S/U or letter grading.

**M230D. Structural Molecular Biology Laboratory (2 units).** (Same as Chemistry M230D.) Laboratory, 10 hours. Corequisite: course M230B. Methods in structural molecular biology, including experiments utilizing single crystal X-ray diffraction, low angle X-ray diffraction, electron diffraction, optical diffraction, optical filtering, three-dimensional reconstruction from electron micrographs, and model building. S/U or letter grading.

**CM233. Principles, Practices, and Policies in Biotechnology (2 units).** (Formerly numbered M233.) (Same as Biological Chemistry CM233, Biomedical Physics CM233, Chemical Engineering CM233, Chemistry CM233, Microbiology CM233, and Microbiology and Immunology CM233.) Lecture, three hours. Designed for graduate students. Life and physical sciences majors and students in the School of Law and Anderson Graduate School of Management may find course useful in their career preparation. Presentation of technologies, regulatory practices, and policies required for product development and review of current opportunities for new technology development. Topics include fermentation processes, pilot and large-scale bioprocess technologies, scaleup strategies, industrial recombinant DNA processes, hybridomas, protein engineering, peptide mimetics and rational drug design, medical and microscopic imaging, and intellectual property issues. Concurrently scheduled with course CM133. S/U or letter grading.

**M234. Genetic Control of Development.** (Formerly numbered Biology 234.) (Same as Biological Chemistry M234.) Topics at forefront of molecular developmental biology, including problems in oogenesis and early embryogenesis, pattern formation, axis determination, nervous system development, cellular morphogenesis, and cell-cell and cell-matrix interactions. S/U or letter grading.

**M237. Introduction to Cellular Physiology and Biophysics (6 units).** (Same as Physiological Science M212 and Physiology M212.) Lecture, five hours. Requisite: Physiological Science 111A or Physiology M209A. Development of fundamental physiological and biophysical concepts associated with all membranes, membrane channels and transporters, membrane potential, membrane excitability, electrical signal transmission and transduction, and muscle contraction and their application to study of basic cellular processes. Emphasis in laboratory on development of skills using computer programming languages, spreadsheets, and graphics for modeling and analysis of cellular processes.

**CM239. Molecular Basis of Plant Differentiation and Development.** Lecture, three hours; discussion, one hour. Requisites: Life Sciences 1, 3, 4. In-depth study of basic processes of growth differentiation and development in plants and molecular mechanisms underlying these processes. Discussion of a variety of plant systems, with focus on developing critical understanding of current experimental basis of research in this field. Concurrently scheduled with course C141. Preparation and presentation of term paper, in addition to other coursework, required of graduate students.

**242. Topics in Neurobiology.** Lecture, three hours. Requisite: course 171. Selected current problems in neurobiology discussed in depth, with emphasis on analysis of original papers. May be repeated for credit.

**M246. Computer Analysis of Genetic Organization.** (Same as Microbiology M246 and Microbiology and Immunology M246.) Lecture, two hours; laboratory, six hours. Requisite: Life Sciences 4 or Microbiology C159. Lectures and laboratory instruction in contemporary procedures for analysis of nucleic acid and protein sequence data with the computer. No prior computer experience necessary; students gain both general and specialized facility with IBM PC and Digital VAX computers.

**CM248. Molecular Genetics (6 units).** (Formerly numbered Biology CM248.) (Same as Biological Chemistry CM248 and Microbiology M248.) Lecture, five hours. Requisite: Biological Chemistry CM153G or Chemistry CM153G. Basic concepts in modern genetics, with examples from both eukaryotic and prokaryotic systems. Emphasis on use of genetic techniques for addressing fundamental questions in cellular biochemistry. Topics include mutagenesis, repair, recombination, transposition, genetic regulation, developmental genetics, neurogenetics, and immunogenetics. Concurrently scheduled with course CM178.

**CM249. Biology of Aging.** (Same as Pathology M262.) Lecture, three hours; discussion, one hour. Designed for graduate students. Overview of expanding field of aging biology — major theories (and myths) of aging; analysis of aging at level of organs, tissues, individual cells, proteins, and genes; experimental models of aging; diseases of aging; methods of retarding aging process. Concurrently scheduled with course C149.

**C250. Plant Chemical and Molecular Communication.** Lecture, three hours; discussion, one hour. Designed for graduate students. Introductory course in chemical ecology and how natural compounds affect gene expression. Emphasis on role of natural compounds in plant/microbe, plant/plant, and plant/herbivore. Interactions; synopsis of principles of plant defense mechanisms and responses to microbial infections. Concurrently scheduled with course C150.

**CM252. Biological Catalysis.** (Same as Biological Chemistry M255, Chemistry CM255, and Pharmacology M255.) Requisites: course 100 or C139 or M140, Chemistry 110A, 153A, 153B, Life Sciences 3. Reaction mechanisms in molecular biology; experimental approaches for study of enzymes, including kinetics, isotopic labeling, stereochemistry, chemical modification, and spectroscopy; design of pharmacologically active agents and artificial enzymes. Drug metabolism and interactions addressed on a mechanistic level. Concurrently scheduled with course CM160. Graduate students required to write research paper and present oral report on it.

**254. Seminar: Plant Morphogenesis (2 units).**

**255. RNA Editing.** Lecture, two hours; discussion, one hour. Knowledge of molecular biology and molecular genetics required. Discussion of diverse set of novel RNA modification phenomena known as RNA editing. Topics include U insertion/deletion type of editing in trypanosome mitochondria, C to U substitution editing in apo B mRNA and plant mitochondria, C insertion editing in Physarum mitochondria, etc. Discussion of mechanism, function, and evolution of these phenomena.

**CM256. Human Genetics.** (Same as Microbiology CM256.) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Strongly recommended: course 100 or C139 or M140. Application of genetic principles in human populations, with emphasis on cytogenetics, biochemical genetics, population genetics, and family studies. Lectures and readings in the literature, with focus on current questions in the fields of medical and human genetics and methodologies appropriate to answer such questions. Concurrently scheduled with course CM156. Independent research project required of graduate students.

**257A. Gene Manipulation: Genetic Engineering.** (Formerly numbered Biology 257A.) Lecture, three hours; discussion, two hours. Requisite: course 138. Survey of methods and applications of recombinant DNA research as applied to both basic scientific research and the biotechnology industry.

**257B. Gene Manipulation: Advanced Course (2 units).** Lecture, 90 minutes; discussion, one hour. Requisite: course 157 or 257A. Additional topics in methods and applications of recombinant DNA research as applied to both basic scientific research and the biotechnology industry. S/U or letter grading.

**CM261. Molecular and Cellular Immunology (6 units).** (Formerly numbered Biology CM261.) (Same as Microbiology M261 and Microbiology and Immunology M261.) Lecture, four and one-half hours; discussion, 90 minutes. Requisite: Biological Chemistry CM253. Comprehensive course for graduate students and selected undergraduates covering fundamentals and recent advances in molecular and cellular immunology. Lectures supplemented with discussion section focusing on reading and analysis of primary research articles. Concurrently scheduled with course C180. Oral presentation required of graduate students. S/U or letter grading.

**M266A-M266B-M266C. Seminars: Molecular Embryology (2 units each).** (Same as Biological Chemistry M266A-M266B-M266C.) Advanced course in developmental genetics and biochemistry, with emphasis on early development. Intended mostly for students actively working or highly interested in embryology. S/U grading.

**276. Seminar: Molecular Genetics (2 units).** Topics vary each term.

**277. Seminar: Genetics (2 units).**

**278. Seminar: Molecular Genetics of Development (2 units).** Designed for graduate students. Topics vary from year to year, with focus on establishment of position and pattern during embryogenesis by interaction of signal transduction systems and transcription factors. S/U or letter grading.

**CM279. Molecular Biology of Animal Viruses.** (Same as Microbiology and Immunology M208.) Lecture, three hours. Preparation: courses in general biochemistry and general microbiology, including virology. Recommended for advanced undergraduate students with a major in public health, biology, or microbiology and for graduate students with interest in any field of biology or chemistry. Overview of animal viruses, including viral structure, virus cell interaction, virus replication, and viral oncogenesis. Special emphasis on understanding the molecular mechanism involved in control and regulation of replication, transcription, and translation of viral genome and its complex interaction with host. Concurrently scheduled with course C177.

**281. Seminar: Molecular Biology (2 units).**

**283. Seminar: Topics in Cell Biology (2 units).** Discussion of various topics on biology of eukaryotic cells. Topics vary from year to year and include bioenergetics, motility, organelle DNA, membrane structure and function, oncogenic transformation, nuclear organization and function.

**284. Seminar: Structural Macromolecules (2 units).** Seminar, one hour; discussion, three hours. Presentation and discussion of current topics in extracellular active structural macromolecules — their synthesis, structure, and roles in cell and developmental biology.

**CM285. Intermediate Immunology.** (Formerly numbered Biology CM285.) (Same as Microbiology CM285 and Microbiology and Immunology M285.) Lecture, three hours; discussion, one hour. Requirements: courses C180, M185A. Recommended corequisite: Chemistry 153B. In-depth exploration of topics introduced in course M185A. Concurrently scheduled with course CM185B.

**286. Seminar: Plant Development (2 units).** Seminar, one hour; discussion, two hours. Preparation: one plant physiology course and at least one advanced undergraduate or graduate plant development or biochemistry course. Seminar on specific topics in plant development. Content varies each term. S/U grading.

**289. Current Topics in Plant Molecular Biology (2 units).** (Formerly numbered Biology 289.) Discussion, one hour. Recent research developments in the field of plant molecular biology. Opportunities for graduate students to discuss individual research work. S/U grading.

**292. Seminar: Molecular Evolution (2 units).** Discussion, three hours. Detailed analysis of current understanding of evolution of molecular sequences and structures.

**296. Advanced Topics in Molecular, Cellular, and Developmental Biology (2 units).** (Formerly numbered Biology 296A.) Discussion, three hours. Advanced study and analysis of current topics in cell, molecular, and developmental biology. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

**297. Advances in Molecular Analysis of Plant Development and Plant/Microbe Interactions (2 units).** Recent advances in plant molecular biology, with emphasis on control of gene expression both during plant development and in plant/microbe interactions. S/U grading.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**596. Directed Individual (or Tutorial) Studies (2 to 12 units).** S/U grading.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examination (2 to 12 units).** May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

**598. M.A. Thesis Research and Writing (2 to 12 units).** S/U grading.

**599. Ph.D. Dissertation Research and Writing (2 to 12 units).** S/U grading.

## Scope and Objectives

Students interested in a concentration in music history and literature should consider the major in musicology offered through the College of Letters and Science; those interested in a concentration in world music should consider the major in ethnomusicology offered through the School of the Arts and Architecture.

The four-year Bachelor of Arts curriculum in Music is a classically oriented, balanced program of practical, theoretical, and historical studies, with related performance and academic studies in non-Western music. The major, designed for students who want to combine fine musicianship with academic excellence, is based on a core curriculum of theory, history, analysis, and individual and group performance. Given in the context of a liberal education, this provides a foundation for an academic or professional career and affords valuable cultural background.

At the graduate level, specialized studies leading to the degrees of Master of Arts and Doctor of Philosophy are offered in composition; specialized studies leading to the degrees of Master of Music and Doctor of Musical Arts are offered in all classical solo instruments, voice, and conducting.

## Undergraduate Study

### Bachelor of Arts Degree

#### Admission

All applicants for admission and change of major are required to pass an audition in their principal performing medium.

#### Preparation for the Major

*Required:* Music 20A, 20B, 20C; 12 units from 60A through 65; two years (12 units) of performance organizations (courses C90A through 90N) for a letter grade; and Musicology 26A-26B-26C. Students taking string, woodwind, brass, or percussion lessons must select from Music C90E, 90F, C90G, 90M (Fall Quarter only), or 90N; students taking vocal lessons must select from C90A, 90D, 90J, 90K, or 90L; students taking keyboard or guitar lessons may choose from C90A through 90N. Students must participate in a minimum of two different organizations over the course of their stay at UCLA. In addition, they are required to take one college year — or at least one course at level three — of French, German, Italian, or Spanish, which may be used to fulfill the school language requirement.

#### The Major

*Required:* A minimum of 48 units in upper division, including Music 120A, 120B, 120C, Musicology 126A-126B-126C, and six courses selected from one of the specializations listed below.

*Composition:* Music 106A, 106B, 123A-123B-123C, and at least one course from 101, 109A, 109B, 109C, 116, 117, 118A, 118B, 121, C122, additional terms of 123A-123B-123C, 156, C176, 199, Ethnomusicology 117, 128, 130, 136A, 136B, 146, 156A, 156B, 157, 158A, 158B, 158C, 160A, 160B, 170, 181. In addition, students must have an original work completed and ready for rehearsal and performance on campus during their senior year.

*Music Education:* Music 100A-100B-100C, 116, 117, eight units from 115A through 115E. Students are encouraged to take additional coursework from 112A, 112B, 118A, 118B, 199, Ethnomusicology 170, 172B, 174 as their schedules allow. They are required to enroll in the type of performance organizations (courses C90A through 90N; 90M may be used in Fall Quarter only) that they plan to teach. In addition, if they intend to teach instrumental music, they are encouraged to select three terms of choral organizations (courses C90A, 90B, 90C, 90J, or 90K); if they intend to teach general music, they are encouraged to elect three terms of

ethnomusicology performance organizations (Ethnomusicology 91A-91Z).

**Performance:** Twelve units in performance instruction courses 160A through 165 (including junior and senior recital requirements), four units of chamber ensembles (Music C175), four units of elective courses from 101, 106B, 112A, 112B, 116, 117, 118A, 118B, 151A, 151B, 199, Musicology C127A through C127F, 130, 133, 134, 135A, 135B, 135C, 139, Ethnomusicology M108A, 108B, 120A, 120B, 121, 170, and one upper division elective course in music. During each term in which students take private lessons, they must participate in a performance organization for a letter grade. Students taking string, woodwind, brass, or percussion lessons must select from Music C90E, 90F, C90G, 90M (Fall Quarter only), or 90N; students taking vocal lessons must select from C90A, 90D, 90J, 90K, or 90L; students taking keyboard or guitar lessons may choose from C90A through 90N.

**Theory:** Music 120C and six courses selected in consultation with a faculty adviser.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degrees

### Admission

Applicants for the Master of Arts or the Master of Music must have completed a Bachelor of Arts degree, or its equivalent, in Music. Other fields of study are accepted if applicants have the musical training and musicianship necessary to pursue graduate work. Transcripts must show at least 52 quarter units of work outside music, including one college year (or its high school equivalent) of French, German, Italian, or Spanish and an average grade of at least B in the basic areas that normally constitute the undergraduate core curriculum in music (harmony, counterpoint, music history, analysis, and musicianship).

Applicants for the M.A. in music are required to (1) take a departmental assessment examination; (2) submit a letter describing background of study and stating reasons for wishing to pursue graduate studies in music; (3) submit three letters of recommendation from former instructors and/or professionals with whom applicants have worked; and (4) submit written examples of work. For composition, musical scores of at least three compositions must be submitted.

No application can be considered until the examination has been taken and all of the above materials have been received.

Applicants applying for the M.M. are required to (1) submit a statement of purpose which also

includes a description of their background of study and (2) submit three letters of recommendation from former instructors and/or professionals with whom the applicants have worked and perform an audition. A repertoire list, summary of recent performances, and sample recital programs are also required.

No new applicants are being accepted into the Master of Fine Arts degree. Those currently active in the program will be allowed to finish within a reasonable amount of time.

### Admission Timetable

Note: Applicants for fellowships must take the early examination; all monies are awarded at that time.

December 30 — Application for admission/fellowship is due.

January 30 — Supplementary application materials are due.

End of January — Assessment examination/audition is administered.

March 1 — Late applications are accepted until March 1 for the M.A. and Ph.D. only.

By March 15 — Notice of acceptance or denial is sent.

April 1 — Supplementary application materials are due for late applications.

Early April — Assessment examination is administered.

By May 15 — Notice of acceptance or denial is sent.

Failure to meet any deadline may result in a delay in action or no action on an application for admission, as well as that for a fellowship or assistantship.

**Assessment Examination.** The assessment examination for the M.A. is administered at Schoenberg Hall on the UCLA campus twice a year. Students who are applying from outside the Southern California area and find it impossible to take the examination on campus can make arrangements with the Student Services Office to take the examination in absentia before the dates listed above. Information is included in the applicant's packet.

The assessment examination is approximately five hours long and covers music theory, history and analysis, and musicianship skills.

The dossier and assessment examination are reviewed, along with those of other applicants, by each area to assess the applicant's potential as a graduate student in that field at UCLA.

### Areas of Study

The Music Department offers the degrees of Master of Arts in the field of composition and Master of Music in all classical solo instruments, voice, and conducting. Degrees in historical musicology, ethnomusicology, and systematic musicology are offered through other departments. As noted above, the Master of Fine Arts degree in performance practices is being phased out.

## Course Requirements

### Master of Arts

Students are required to complete a minimum of nine courses, five of which must be at the 200 level. Only four units of Music 596A, 596C, or 596D and four units of Music 597 or 598 may be applied toward the total course requirement. No more than four units of all types of 500-series courses may be applied toward the minimum graduate course requirement. Upper division courses that may be applied toward the minimum of nine courses include Music 109A, 109B, 109C, 112A, 112B, 116, 117, 118A, 118B, 151A, 151B, 156, C175 (four units only), Ethnomusicology 106A, 106B, 106C, 113, M126, 128, 130, 136A, 136B, 146, 147, 156A, 156B, 157, 158A, 158B, 158C, 160A, 160B, 170, 173, 176, M180, 181. Course 598 serves to guide the preparation of the thesis and should normally be taken during the last quarters of residence.

Required courses are Music 251A, 266A-266B; one course from Music 251B through 251D; Music 252A, 252B, 252C in sequence, with the option of substituting 596A for 252C; and two electives with the recommendation of the graduate adviser. In addition to the thesis, students are expected to produce other works involving both instrumental and vocal music for both solo and ensemble forces. Furthermore, students are responsible for the campus presentation of one original work during each year of residency.

### Master of Music

Students are required to complete a minimum of 68 units, 16 of which must be at the 200 level, 42 units at the 400 level, and six units at the 500 level. Sixty-four of these units are specified below. The remaining elective must be from 200-, 400-, or 500-series courses. Music 595A serves to guide the preparation of the master's recital and should normally be taken during the last quarter of residence. The department provides a maximum of six quarters of enrolled private instruction in performance. If students do not complete the degree within that period and wish to continue instruction, they must do so at their own expense on a noncredit basis.

The course requirements are as follows:

**Instrumental/Vocal Performance.** A core of Music 202, 203, 204; one course from Music 261A through 261F; five quarters of 400-level performance instruction; three quarters of 400-level performance organizations; two quarters of 400-level chamber ensembles; one quarter of Music 401; one quarter of Music 595A; and one additional course (selected with advisement) from Music 261A through 261F, C267, 270E, 270F, 271, 596D, courses in pedagogy, Musicology 250A, 250B, 269, and Ethnomusicology 271, 273, 275, 279.

**Conducting.** A core of Music 202, 203, 204; one course from Music 261A through 261F; five quarters of 400-level conducting instruction; three quarters of 400-level performance organizations; two quarters of 400-level chamber en-

sembles; one quarter of Music 401; one quarter of Music 595A; and one additional course (selected with advisement) from Music 261A through 261F, C267, 270E, 270F, 271, 596D, courses in pedagogy, Musicology 250A, 250B, 269, and Ethnomusicology 271, 273, 275, 279.

#### **Master of Fine Arts**

Students are required to complete a minimum of 18 courses, including at least six at the 200 level and six or more in the 400 series. Only four units of Music 596A, 596C, or 596D and eight units of Music 598 may be applied toward the total course requirement. No more than four units of all types of 500-series courses may be applied toward the minimum graduate course requirement. The minimum residence requirement for the M.F.A. is two years. The degree is normally completed in three years.

Course requirements are as follows: Musicology 200A; two quarters of Music 261A through 261F; six quarters of 400-level performance instruction; two quarters (eight units) of Music 598; and seven electives. If students are in the conducting specialty, they declare either a choral or instrumental specialization. Six quarters of Music 475 are required in the area of specialization and at least two in the other area. (On a two-year program, the ratio would be four to one.) Recommended electives include Music C175 (four units only), Ethnomusicology 170, 176, 596A, 596C, 596D, and additional courses from the 200 and 400 series. Course 598 serves to guide the preparation of the final project and should normally be taken during the last two terms of residence.

*Performance Requirements.* Each year students must complete a solo recital on campus (preferably a noon concert) with a faculty committee in attendance to evaluate the performance. Except for the first-year recital, students are to write the program notes for the annual performance project. These must be submitted with the program to the graduate adviser in performance practices at least one month before the concert date. If students are in the conducting specialty, they present a program, or a substantial portion thereof, approved by the conducting faculty, either on or off campus.

### **Comprehensive Examination Plan**

#### **Master of Arts**

None.

#### **Master of Music**

After the student has completed the core seminars and three quarters of performance/conducting instruction, and after verification from the graduate adviser that these requirements have been met, a master's committee for the final year is formed. The committee consists of the student's master teacher and two other Music Department faculty in related areas of instruction. Two of the three committee members must be full-time Senate faculty. The committee oversees the preparation of the recital, the accompanying program notes, and the new music forum, and adjudicates the recital itself.

*Qualifying Examinations.* Written (about three hours) and oral (about two hours) qualifying examinations are administered by the master's committee. The examination covers the material in the core courses as well as a general knowledge of music history, with an equally strong emphasis on historical and contemporary styles. The examinations are administered each year at the end of Fall and Spring Quarters. Students may take the examinations twice if necessary; a second failure results in a recommendation for dismissal.

*Master's Recital.* Students present a final master's recital with accompanying program notes. During the final year of residence and after completion of the major coursework, students perform for their committee and present the program notes for their approval. The committee decides whether the student qualifies for advancement to candidacy and the presentation of the master's recital. No recital takes place until the notes have been approved by the committee. An audio tape of the recital is archived in the Music Library.

#### **Master of Fine Arts**

*Final Project.* A final project is to be completed during the last year of residence. A solo recital and appropriate scholarly paper are required in all areas. In addition, a major operatic performance is required in the area of opera. Students in conducting present an on-campus program, or a substantial portion thereof, with one of the department's performance organizations. The scholarly paper should be equivalent to a graduate seminar paper (15 to 25 pages in length) and should be concerned with performance problems which can be elucidated through research and analysis. Students decide the topic for the final project in consultation with their committee chair, who is responsible for supervising the work. Pieces drawn from or related to the study are to be included in the final recital. Both the paper and the recital are evaluated by the committee.

A completed draft of the scholarly paper must be submitted to the committee members by the first day of classes of the quarter in which the final recital has been scheduled. If this requirement is not met, the recital is postponed until the next regular academic quarter in which this requirement can be met.

Students must provide concise, well-written program notes and include a brief biography. These should be submitted to the graduate adviser in performance practices for approval at least one month prior to the final recital. Publicity information for the final recital must be submitted to the graduate adviser at the beginning of the previous quarter.

The final version of the scholarly paper, with the accompanying recital program, must be submitted in the format of a thesis. (Students should contact the theses and dissertations adviser, 390 Powell Library, for information and the Schoenberg Hall Student Services Office for information specific to the M.F.A. program.) The final paper, signed by all M.F.A. committee

members, must be submitted in duplicate (two thesis-quality photocopies or the original and one photocopy) to the Student Services Office by the last day of classes in the quarter in which the student is to graduate.

The language requirement and a majority of the coursework must be completed before submitting the final project proposal and request for an M.F.A. committee. The proposal, which is to include the complete recital program and an abstract of the scholarly paper, should be submitted at the beginning of the Fall Quarter of the last year of residence. It is approved by the graduate committee for performance.

### **Thesis Plan**

#### **Master of Arts**

The thesis is a work proposed by the student and approved by the composition and theory faculty. The thesis topic and composition of the committee are approved by the faculty before nomination to the Graduate Division.

#### **Master of Music**

None.

#### **Master of Fine Arts**

None.

### **Doctoral Degrees**

#### **Admission**

Applicants to the Doctor or Philosophy (Ph.D.) program must have completed a Master of Arts degree in Music (or the equivalent degree). The degree normally will have been taken in the same field of concentration as the proposed doctorate. If applicants wish to obtain a doctorate in a field other than that of the M.A., additional coursework, as prescribed by the area, must be completed. Applicants are required to (1) take a departmental assessment examination; (2) submit a letter describing background of study and stating reasons for wishing to pursue graduate studies in music; (3) submit three letters of recommendation from former instructors and/or professionals with whom the applicant has worked; and (4) submit written examples of work. For composition, musical scores of at least three compositions are required. Applicants should submit their M.A. thesis or composition, if possible.

Applicants to the Doctor of Musical Arts (D.M.A.) program are required to (1) submit a statement of purpose which also includes a description of their background of study; (2) submit three letters of recommendation from former instructors and/or professionals with whom the applicants have worked (for the D.M.A. the Music Department is especially interested to hear from persons who can speak to the applicant's academic potential); and (3) perform an audition. A repertoire list, summary of recent performances, and sample recital programs are also required.

No application can be considered until the assessment examination or audition has been

taken and all of the required materials have been received.

#### Admission Timetable

Note: Applicants for fellowships must take the early examination; all monies are awarded at that time.

December 30 — Application for admission/fellowship is due.

January 30 — Supplementary application materials are due.

End of January — Examination/audition is administered.

March 1 — Late applications are accepted until March 1 for the M.A. and Ph.D. only.

By March 15 — Notice of acceptance or denial is sent.

April 1 — Supplementary application materials are due.

Early April — Examination is administered.

By May 15 — Notice of acceptance or denial is sent.

Failure to meet any deadline may result in a delay in action or no action on an application for admission, as well as that for a fellowship or assistantship.

**Assessment Examination.** The assessment examination for the Ph.D. is administered at Schoenberg Hall on the UCLA campus twice a year. Students who are applying from outside the Southern California area and find it impossible to take the examination on campus can make arrangements with the Student Services Office to take the examination in absentia before the dates listed above. Information is included in the applicant's packet.

The assessment examination is approximately five hours long and covers music theory, history and analysis, and musicianship skills.

The dossier and assessment examination are reviewed, along with those of other applicants, by area to assess the applicant's potential as a graduate student in that field at UCLA.

**Placement Examination.** The placement examination, which is administered during the week before classes start in Fall Quarter, is required of all new D.M.A. students and covers theory, musicianship skills, and music history. Those who do not pass any portion are required to do remedial work, which must be completed by the end of the first year.

#### Major Fields or Subdisciplines

The Music Department offers the degrees of Doctor of Philosophy in the field of composition; Doctor of Philosophy in the field of composition with a cognate in ethnomusicology; and Doctor of Musical Arts in all classical solo instruments, voice, and conducting. Degrees in historical musicology, ethnomusicology, and systematic musicology are offered through other departments.

### Course Requirements

#### Doctor of Philosophy

Students may petition to their area on the advice of their graduate adviser for exemption from specific requirements on the basis of equivalent work done at the M.A. level. If students are in the program in composition with the cognate in ethnomusicology and have had no prior coursework in ethnomusicology, they are required to take Ethnomusicology 20A-20B-20C. They are also encouraged to participate in the ethnomusicology performance organizations (Ethnomusicology 91A through 91Z).

Students may complete the residence requirement by electing courses recommended by the graduate adviser from the 200- or 100-level courses listed under the course requirements for the M.A. degree.

Required courses for the Ph.D. are Musicology 200A; Music 251A, 266A-266B; one course from 251B through 251D; and six quarters of Music 252A, 252B, 252C in sequence, with the option of substituting Music 596A for 252C. Students who have received the M.A. in composition from UCLA normally take a minimum of three quarters of Music 252 in the Ph.D. program.

Students who have received the M.A. in composition elsewhere normally take two full cycles of Music 252A, 252B, 252C in sequence, with the option of substituting Music 596A for either or both 252Cs. In addition to the dissertation, students are expected to produce other works involving both instrumental and vocal music for both solo and ensemble forces. Furthermore, students are responsible for the campus presentation of one original work during each year of residency.

**Cognate in Ethnomusicology.** Students may substitute Ethnomusicology C201A for Musicology 200A and Ethnomusicology 282 or 283 for Music 251B through 251D. Students are required to take two courses from Ethnomusicology 207, M211, 237, 240, 241, 248A, 248B, 250A, 250B.

#### Doctor of Musical Arts

Students are required to complete a minimum of 102 units, 28 of which must be at the 200 level, 60 units at the 400 level, and 10 units at the 500 level. Ninety-eight of these units are specified below. The elective must be from 200-, 400-, or 500-series courses. Course 599 serves to guide the preparation of the doctoral paper and should normally be taken during the final year of residence. Students who received the M.M. at UCLA are expected to complete at least 32 additional units beyond the M.M. requirements, subject to the specific requirements of their area of specialization. The department provides a maximum of nine quarters of enrolled private instruction in performance. Students who were admitted to the program with a master's degree from another institution may petition for up to a year of private lessons (18 units) and 12 units of academic courses to be applied to D.M.A. requirements.

The requirements for the D.M.A. are given below.

**Instrumental/Vocal Performance.** A core of Music 202, 203, 204; three courses from Music 261A through 261F, 271; eight quarters of 400-level performance instruction; three quarters of 400-level chamber ensembles; one quarter of Music 401; one quarter of Music 595B; one quarter of Music 599; the appropriate course from Music 469, 471, 473, 474; one additional course from Music 261A through 261F, C267, 270E, 270F, 271, 596D, courses in pedagogy, Musicology 250A, 250B, 269, and Ethnomusicology 271, 273, 275, 279.

**Conducting.** A core of Music 202, 203, 204; three courses from Music 261A through 261F, 271; eight quarters of 400-level conducting instruction; three quarters of 400-level chamber ensembles; one quarter of Music 401; one quarter of Music 595B; one quarter of Music 599; one course from Music 469, 471, 473, 474, 476, 477; one additional course from Music 261A through 261F, C267, 270E, 270F, 271, 596D, courses in pedagogy, Musicology 250A, 250B, 269, and Ethnomusicology 271, 273, 275, 279.

### Written and Oral Qualifying Examinations

#### Doctor of Philosophy

When the student and the committee feel the student is ready to take the qualifying examinations, the student should submit a schedule to the Student Services Office and the committee members listing the order in which the examinations are to be taken. The Student Services Office staff acts as proctor for the tests. Normally the six written examinations are spread over a two-week period but should be completed within three weeks. Repeat examinations may be scheduled in consultation with the guidance committee and after a stipulated period of time. On successful completion of the written examinations, a departmental oral qualifying examination is scheduled.

The written examinations consist of the following:

- (1) Composition of a short homophonic and short polyphonic piece (within a 24-hour period, optionally either on or off campus).
- (2) General history of music (three hours).
- (3) Analysis of form and style (three hours).
- (4) Two or more from the following (four hours total): acoustics, aesthetics, psychology of music, ethnomusicology, or music theory from the medieval period to the present with an optional emphasis on theoretical writings before or after 1700.
- (5) Twentieth-century music (three hours).

Students with a cognate in ethnomusicology may substitute an ethnomusicology area for item 2, and in lieu of items 3 and 4 may choose any three of the following (two hours each): acoustics, aesthetics, music theory, form and

analysis, general history of music, or organology.

On completion of the written and oral qualifying examinations and the second language, the student may submit the dissertation topic and request for a doctoral committee, for approval. The dissertation topic and the composition of the doctoral committee are approved by the faculty before nomination to the Graduate Division.

For students with a cognate in ethnomusicology, the composition (item 1) should reflect the ethnomusicological area interests of the student and draw from a variety of traditional, classical, Western, and/or non-Western sources; a public reading of this composition is required. The monograph should deal with a cross-cultural 20th-century work.

#### Doctor of Musical Arts

Two preliminary recitals are required. The student's first-year lecture-recital is adjudicated by a committee of three Music Department faculty including the student's teacher. At least two of the three committee members must be full-time Senate faculty members. On successful completion of this recital, a member of the composition faculty joins with the student's teacher to guide the new music forum project.

Two sets of qualifying examinations are required. The first covers material in the three-quarter core sequence of Music 202, 203, 204, one of the performance practice seminars, and the appropriate pedagogy course. This examination must be passed before approval can be granted for the second-year recital. The second examination is the defense of the final recital repertoire and thesis topic with the doctoral committee (University Oral Qualifying Examination).

After passing the first examination, students may propose their second-year entrepreneurial recital. This recital is an individual project in public performance outside the UCLA campus. All scheduling, publicity, program notes, and ticketing must be arranged by the student without assistance from the supervising instructor. After that recital has been passed and the foreign language requirement has been met, the student may submit the request for a doctoral committee.

A minimum of three months before the final doctoral recital (which is a full professional recital of approximately 90 minutes duration), students take the second examination, the University Oral Qualifying Examination. This consists of the student's performance of a major portion of the works on the program (including the new music forum premiere work) and includes a defense of the recital repertoire, the dissertation topic, and its relationship to the final recital.

## Music

### Lower Division Courses

**1A-1B. Fundamentals of Music.** Lecture, three hours; discussion, two hours. Designed for nonmusic majors.

**1A.** Introduction to elements of music: pitch and rhythm symbols, meter and time signatures, notation, scales, intervals, and chord structure. **1B.** Prerequisite: course 1A. Diatonic harmony; four-part writing, including inversions, sevenths, secondary dominants, and modulation; organization of melody and accompaniment; simple analysis; sight-singing and ear training.

**3A-3B. Preparatory Theory for Music Majors (2 units each).** Lecture, two hours; discussion, one hour. Limited to music majors. Course 3A is not open for credit to students with credit for course 1A; course 3B is not open for credit to students with credit for course 1B. Course for music majors in music fundamentals, including musicianship, theory, and terminology.

**4A-4B-4C. Basic Musicianship (2 units each).** Laboratory, three hours. Class instruction in elementary ear training and keyboard skills.

**8G. Graduate Piano Sight-Reading (2 units).** Limited to graduate students. Designed to help entering graduate students remedy entrance deficiencies, to be cleared by examination. May be repeated. S/U grading.

**10. Computer-Assisted Sight-Singing Laboratory (2 units).** Lecture, two hours; laboratory, one hour. Prerequisite: course 1A. Individualized, self-instructional approach for development of sight-singing skills through use of a music computer, keyboard instrument, and linear program learning.

**12A-12B. Counterpoint (2 units each).** Lecture, four hours. **12A.** Preparation: music theory placement examinations. 16th-century modal counterpoint in two parts, including writing of motets. **12B.** Prerequisites: courses 20A, 20B, 20C. 18th-century tonal counterpoint in two parts, including writing of inventions.

**15. Art of Listening.** Lecture, three hours; laboratory, one hour. Acquisition of listening skills through direct interaction with live performance, performers, and composers. Relationship of listening to theoretical, analytical, historical, and cultural frameworks. Music as aesthetic experience and cultural practice.

**20A. Music Theory I.** Lecture, two hours; discussion, six hours. Preparation: passing score on departmental examination. Theory: species counterpoint through fifth species; description of triads and inversions. Musicianship: interval recognition; fixed-do solfège of diatonic melodies; one-part dictation of diatonic melodies; two-part dictation of small-compass, note-against-note melodies; simple rhythmic dictation; use of treble, alto, and bass clefs.

**20B. Music Theory II.** Lecture, four hours; discussion, four hours. Prerequisite: course 20A (C or better). Theory: diatonic harmony through secondary dominants and diminished sevenths; modulations to dominant and relative keys; writing of four-part chorales; style composition in baroque dance forms; introduction to figured bass notation. Musicianship: harmonic dictation, including secondary dominants and diminished sevenths, but not modulations; more advanced two-part dictation; chromatic one-part dictation; more advanced sight-singing; keyboard (three-part open score in homophonic textures, introduction to tenor clef).

**20C. Music Theory III.** Lecture, four hours; discussion, four hours. Prerequisite: course 20B (C or better). Theory: chromatic harmony including development of tonality, 1800 to 1850; appropriate analysis and style composition. Musicianship: advanced sight-singing; two-part contrapuntal dictation; keyboard harmony (harmonic sequences in major and minor keys); reading in open score of four homophonic parts in four clefs.

**23. Composition Workshop (2 units).** Prerequisites: courses 20A, 20B, 20C. Introductory composition course which provides compositional experiences at a basic level. May be repeated once for credit.

**60A-65. Undergraduate Instruction in Performance (2 units each).** Limited to music majors (all lower division majors, and upper division majors not in performance specialization). Individual instruction of one hour per week. Students must perform in a practicum once during academic year. Grades are assigned by applied instructor in Fall and Winter Quarters and by jury examination in Spring Quarter. May be repeated for credit. **60A.** Violin; **60B.** Viola; **60C.** Cello; **60D.** String Bass; **60E.** Harp; **60F.** Classical Guitar; **60G.** Viola da gamba; **60K.** Lute; **61A.** Flute; **61B.** Oboe; **61C.** Clarinet; **61D.** Bassoon; **61E.** Saxophone; **62A.** Trumpet; **62B.** French Horn; **62C.** Trombone; **62D.** Tuba; **63.** Percussion. **64A.** Piano; **64B.** Organ; **64C.** Harpsichord; **65.** Voice.

**C90A. UCLA Chorale (2 units).** (Formerly numbered 90A.) Activity, four hours. Preparation: audition. Select mixed ensemble of 50 to 60 voices performing choral music appropriate for a concert choral ensemble, with emphasis on music after 1700. May be repeated for credit without limitation. May be concurrently scheduled with course C480. P/NP or letter grading.

**90B. Collegiate Chorus (2 units).** Nonaudition mixed chorus of 50 to 150 voices performing medium- and concert-length choral works from baroque to the present. Collegiate Chorus performs only as part of "Choral Union," a large chorus made up of all of the choral ensembles. May be repeated for credit without limitation. P/NP or letter grading.

**90C. Chamber Singers (2 units).** Activity, three hours. Preparation: audition. Select mixed ensemble of 16 to 20 voices performing chamber choral music of all periods, with emphasis on Renaissance and baroque music. May be repeated for credit without limitation. P/NP or letter grading.

**90D. Opera Workshop (2 units).** Activity, six hours. Preparation: audition. Rehearsal and performance of scenes and complete operas, as well as repertoire, stage movement, and foreign language diction coaching. May be repeated for credit without limitation. P/NP or letter grading.

**C90E. Symphony Orchestra (2 units).** (Formerly numbered 90E.) Activity, four hours. Preparation: audition. Group performance of symphonic literature, as well as orchestral accompaniment for operatic and major choral works. May be repeated for credit without limitation. May be concurrently scheduled with course C481. P/NP or letter grading.

**90F. Symphonic Band (2 units).** Preparation: audition. Group performance of instrumental music scored for band. May be repeated for credit without limitation. P/NP or letter grading.

**C90G. Wind Ensemble (2 units).** (Formerly numbered 90G.) Activity, four hours. Preparation: audition. Group performance of concert literature for wind ensemble. May be repeated for credit without limitation. May be concurrently scheduled with course C482. P/NP or letter grading.

**90H. Collegium Musicum (2 units).** Activity, three hours. Preparation: audition. Group performance of vocal and instrumental music of medieval, Renaissance, and baroque eras on period instruments. May be repeated for credit without limitation. P/NP or letter grading.

**90J. Men's Glee Club (2 units).** Activity, three hours. Preparation: audition. Select male chorus of 40 to 45 voices performing male choral music of all periods, with emphasis on popular and folk arrangements. May be repeated for credit without limitation. P/NP or letter grading.

**90K. Women's Chorus (2 units).** Activity, three hours. Preparation: audition. Select female chorus of 45 to 55 voices performing treble choral music of all periods, with emphasis on music after 1750. May be repeated for credit without limitation. P/NP or letter grading.

**90L. Musical Comedy Workshop (2 units).** Activity, six hours. Preparation: audition. Rehearsal and performance of scenes and complete musical theater productions, including repertoire and stage movement coaching. May be repeated for credit without limitation. P/NP or letter grading.

**90M. Marching and Varsity Bands (2 units).** Activity, four hours. Preparation: audition. Group performance of special band arrangements for football and basketball games as well as special events. May be repeated for credit without limitation. P/NP or letter grading.

**90N. Jazz Ensemble (2 units).** Activity, three hours. Preparation: audition. Group performance of jazz and popular music in ensembles of 20 to 30 instruments. May be repeated for credit without limitation. P/NP or letter grading.

## Upper Division Courses

**100A-100B-100C. Music in American Education.** Lecture, four hours; laboratory, one hour. Prerequisites: courses 20A, 20B, 20C, 116, 120A, 120B, 120C, Musicology 26A-26B-26C. Critical study and analysis of philosophy, history, organization, curriculum, and literature of music programs for elementary and secondary schools in American education. Each course may be taken independently for credit. **100A.** General Music; **100B.** Choral Music; **100C.** Instrumental Music.

**101. Advanced Keyboard Harmony and Score Reading.** Prerequisite: course 120B or consent of instructor. Intensive individual work in keyboard harmony and reading of chamber and orchestral scores. May be repeated once for credit.

**102. Instrumentation.** Lecture, three hours. Prerequisite: course 120B with a grade of C (2.0) or better. Not open for credit to students with credit for course 106A. Intended for music majors in specializations other than composition. Ranges and characteristics of instruments, exercises in scoring.

**105. Introduction to Composition.** Lecture, three hours. Prerequisites: courses 20A, 20B, 20C, 120A, 120B, 120C. Intended for music majors in specializations other than composition. Nature of compositional process, with selected exercises in specific techniques and styles.

**106A. Orchestration I.** Discussion, three hours. Prerequisites: courses 20A, 20B, 20C. May be taken concurrently with courses 120A, 120B, 120C. Ranges and characteristics of instruments, with exercises in scoring.

**106B. Orchestration II.** Discussion, three hours. Prerequisite: course 106A. Scoring and analysis for ensembles and full orchestra.

**109A-109B-109C. Composition for Motion Pictures and Television (2 units each).** Prerequisites: courses 20A, 20B, 20C, 120A, 120B, and 120C, or consent of instructor. Course 109A is prerequisite to 109B, which is prerequisite to 109C. Composition of music for dramatic and documentary film in cinema and television. Techniques used in recording and editing.

**112A-112B. Practical Scoring.** Lecture, two hours; laboratory, two hours. Prerequisites: courses 20A, 20B, 20C, 120A, 120B, 120C, and Musicology 26A-26B-26C, or consent of instructor. Emphasis on practical problems in scoring for small and large ensembles at various educational levels. **112A.** Band Scoring; **112B.** Choral Scoring.

**113A-113B. Music Literature for Children.** Lecture, three hours; laboratory, one hour. Prerequisites: course 1A and Musicology 2A, or consent of instructor. Course 113A is not prerequisite to 113B. Designed for nonmusic majors, particularly elementary education students. Study of music literature applicable to elementary school programs. **113A.** Emphasis on listening analysis, movement, and improvisation. **113B.** Emphasis on class performance — music reading, singing, and folk instruments.

**115A-115E. Study of Instrumental and Vocal Techniques (1 unit each).** Laboratory, three hours. Prerequisite or corequisite: course 20A. Applied studies in basic performance techniques and tutorial materials. Each of courses 115A-115D may be repeated once for credit. **115A.** Strings; **115B.** Woodwinds; **115C.** Brass; **115D.** Percussion; **115E.** Voice.

**116. Introduction to Conducting (2 units).** Lecture, three hours. Prerequisites: courses 20A, 20B, 20C, 120A. Fundamentals of conducting, including basic skills, techniques, analysis, and repertoire.

**117. Study and Conducting of Instrumental and Choral Literature (2 units).** Lecture, three hours. Prerequisite: course 116 or consent of instructor. Study and practice of conducting both instrumental and choral repertoire. In addition to further development of conducting gestures, focus on score study techniques, rehearsal techniques, style, and interpretation as applied to choral and instrumental repertoire.

**118A-118B. Advanced Study and Conducting of Choral and Instrumental Literature (2 units each).** Lecture, one hour; laboratory, two hours. Prerequisites: courses 116 and 117, or consent of instructor. Detailed investigation of musical styles, performance practices, and rehearsal techniques. Each course may be repeated once for credit. **118A.** Choral; **118B.** Instrumental.

**119. Creative Process: Developing Imagination and Craft.** Lecture, three hours. Prerequisites: courses 106A and 106B, or consent of instructor. In-depth philosophical and technical discussions as to nature of creativity, as well as compositional exercises intended to develop technique and imagination and to enrich musical vocabulary of students.

**120A. Music Theory IV.** Lecture, four hours; discussion, four hours. Prerequisites: course 20C with a grade of C (2.0) or better, passing score on departmental first-year examination. Theory: baroque counterpoint including chorale prelude; two-part invention; exposition and first modulation of a three-part invention; canonic principles; analysis of inventions, canons, and fugues. Musicianship: sight-singing of extended chromatic melodies; advanced harmonic dictation (diatonic and chromatic); keyboard harmonization of modulating melodies; elementary score reading.

**120B. Music Theory V.** Lecture, four hours; discussion, four hours. Prerequisites: course 120A with a grade of C (2.0) or better, consent of instructor. Theory: advanced chromatic harmony including development of harmony from 1850; analytical projects; style composition. Musicianship: advanced score reading; advanced harmonic dictation; preparation for departmental examination.

**120C. Music Theory VI.** Lecture, four hours; discussion, two hours; listening, two hours. Prerequisites: course 120B with a grade of C (2.0) or better, consent of instructor. 20th-century harmonic language, including nonfunctional harmony, polytonality, free atonality, serialism, and minimalism.

**121. Special Topics in 20th-Century Music.** Lecture, three hours. Prerequisites: courses 20A, 20B, 20C, 120A, 120B, and 120C, or consent of instructor. In-depth study of certain aspects of 20th-century music ranging from individual composers and schools to ideological or stylistic concerns. May be repeated once for credit.

**C122. Speculative Music Theory.** Discussion, three hours. Prerequisites: courses 20A, 20B, 20C, 120A, 120B, and 120C, or consent of instructor. Techniques of tonal coherence studied through analysis and compositional exercises in styles of given periods. May be repeated once for credit. May be concurrently scheduled with course C222.

**123A-123B-123C. Composition.** Lecture, three hours. Prerequisites: courses 20A, 20B, 20C, 120A, 120B, 120C. Course 123A is prerequisite to 123B, which is prerequisite to 123C. Designed for students specializing in composition. Vocal and instrumental composition in the smaller forms, including style composition and 20th-century techniques. Each course may be repeated once for credit, but first year must be taken in sequence.

**M127. Jazz Keyboard Harmony (1 unit).** (Same as Ethnomusicology M127.) Laboratory, two hours. Study of jazz harmony through use of piano keyboard. Development of basic keyboard skills in order to manipulate essential chord voicings and harmonic passages in jazz music. Instruction in basic jazz theory.

**M129A-M129B-M129C. Jazz Theory and Improvisation (2 units each).** (Same as Ethnomusicology M129A-M129B-M129C.) Lecture, four hours. Elements of jazz theory and improvisation. **M129A.** Basic jazz harmonic constructions, as well as melodic, rhythmic, and harmonic concepts, and how to apply those elements to personal efforts in improvisations. **M129B.** Requisite: course M129A with a grade of C or better. Medium-level jazz harmonic constructions. **M129C.** Requisite: course M129B with a grade of C or better. Advanced-level jazz harmonic constructions.

**136A-136B-136C. Historical Survey of Music Theater.** Lecture, four hours; discussion, one hour. Historical survey of major works from music theater, tracing development of the art form from its European beginning to the American music theater of today. P/NP or letter grading. **136A.** Music Theater, Early Forms to 1900; **136B.** Music Theater, 1900 to 1945; **136C.** Music Theater, 1945 to 1975.

**150. Introduction to Music Criticism.** Lecture, three hours. Prerequisite: music major or consent of instructor. Readings and discussion of music criticism past and current, and exercise in the writing of criticism of live concert events and recordings. Designed to aid students (performers, critics, or listeners) in verbalizing the experience of listening to music.

**151A-151B. History of Musical Performance Practices.** Prerequisites: courses 20A, 20B, 20C, 120A, 120B, Musicology 26A-26B-26C. General survey of musical interpretation and re-creation from viewpoint of stylistic authenticity. **151A.** Medieval through Baroque; **151B.** Classic through 20th Century.

**155. Audio Technology for Musicians.** Lecture, two hours; laboratory, three hours. Prerequisites: courses 20A, 20B, 20C, consent of instructor. Theory and practice of sound engineering in relation to concert and studio recording techniques.

**156. Electronic Music: Theory and Techniques.** Lecture, three hours; laboratory, three hours. Prerequisites: courses 123A-123B-123C. Designed for students specializing in composition. Applicable acoustical and electronic theory, history of technological and compositional development of classical electronic music. Analysis, manipulation of analog and digital synthesizers and ancillary equipment, invention and realization of materials.

**158. New Orleans Jazz.** Lecture, three hours; discussion, two hours. Major black and Creole figures in origin and development of jazz in New Orleans from turn of the 20th century through the 1960s, with emphasis on polycultural roots, local municipal traditions, and stylistic analysis.

**160A-165. Undergraduate Instruction in Performance for the Performance Specialist (2 units each).** Limited to upper division music majors who have been accepted by audition into performance specialization. Individual instruction of one hour per week. Students must perform in a noon concert once during their junior year and must present a full recital in their senior year. Grades are assigned by applied instructor in Fall and Winter Quarters and by jury examination in Spring Quarter. May be repeated for credit. **160A.** Violin; **160B.** Viola; **160C.** Cello; **160D.** String Bass; **160E.** Harp; **160F.** Classical Guitar; **160G.** Viola da gamba; **160K.** Lute; **161A.** Flute; **161B.** Oboe; **161C.** Clarinet; **161D.** Bassoon; **161E.** Saxophone; **162A.** Trumpet; **162B.** French Horn; **162C.** Trombone; **162D.** Tuba; **163.** Percussion; **164A.** Piano; **164B.** Organ; **164C.** Harpsichord; **165.** Voice.

**C167. Selected Topics in Keyboard Literature.** Lecture, three hours. Corequisite: course 164A or 164B or 164C or consent of instructor. In-depth study of selected topics in keyboard literature, concentrating on problems of performance through analysis, historical and comparative studies, and actual performances by participants. May be concurrently scheduled with course C267.

**174A-174B-174C. The Language of Song (2 units each).** Prerequisite: music major. Sounds of the language as applied to singing, including use of International Phonetic Alphabet, translation of art song texts, and application to student's current vocal repertoire. Background in the language is encouraged. **174A.** German; **174B.** French; **174C.** Italian.

**C175. Chamber Ensembles (2 units).** (Formerly numbered 175.) Prerequisite: audition. Students must be at advanced level of their instrument to participate. Applied study of performance practices of literature appropriate to the ensemble. Students may enroll in two sections per term; total of 12 units may be applied toward degree requirements. May be concurrently scheduled with course C485. P/NP or letter grading.

**C176. Electronic Music Composition.** Lecture, three hours; studio, three hours. Prerequisites: course 156, advanced experience and accomplishment in serious composition (art music), consent of instructor. Limited enrollment. Analog and digital realizations of original compositional materials culminating in a composition at least five minutes in duration. May be concurrently scheduled with course C226.

**M177. Jazz Combo (2 units).** (Same as Ethnomusicology M177.) Small group performance of various styles in ensembles of three to 10 musicians. May be repeated for a maximum of 12 units.

**C185. Historical and Philosophical Foundations of Music Education.** Lecture, three hours. Prerequisite: completion of undergraduate music education specialization or consent of instructor. Development of music education in the U.S. according to established schools of thought. May be concurrently scheduled with course C225.

**M186. Senior Recital or Research Paper (2 units).** (Same as Ethnomusicology M186.) Preparation and performance of one-hour senior recital of jazz repertoire or preparation of a senior paper (topic and length to be approved by assigned adviser). P/NP grading.

**199. Special Studies in Music (2 or 4 units).** Hours to be arranged. Prerequisites: senior standing, 3.0 GPA, consent of instructor and department chair. Individual studies in music resulting in research project. May be repeated for a maximum of eight units.

## Graduate Courses

**202. Analysis for Performers.** Lecture, three hours. Prerequisite: graduate standing. Survey of analytical techniques and approaches required for professional performers, including phrase structure, harmonic rhythm and prolongation, small and large forms, theories of musical coherence, and understanding of styles.

**203. Musical Terminology.** Lecture, three hours. Prerequisite: graduate standing in music. Survey of musical terminology designed to clarify the performance and interpretation of vocal and instrumental music in the European tradition. Coverage of terms in Italian, French, and German.

**204. Music Bibliography for Performers.** Lecture, three hours. Prerequisite: graduate standing in music performance. Survey of general bibliographic techniques in music, with emphasis on materials for the performing musician.

**C222. Speculative Music Theory.** Discussion, three hours. Prerequisite: graduate standing in music. Techniques of tonal coherence studied through analysis and compositional exercises in styles of given periods. May be repeated once for credit. May be concurrently scheduled with course C122.

**C225. Historical and Philosophical Foundations of Music Education.** Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Development of music education in the U.S. according to established schools of thought. May be concurrently scheduled with course C185. Additional assignments, as well as evidence of greater depth of study, required of graduate students.

**C226. Electronic Music Composition.** Lecture, three hours; studio, three hours. Prerequisites: course 156, graduate standing, advanced experience and accomplishment in serious composition (art music), consent of instructor. Limited enrollment. Analog and digital realizations of original compositional materials culminating in a composition of major proportions at least seven minutes in duration. May be concurrently scheduled with course C176.

**251A-251D. Seminars: Special Topics in Composition and Theory.** Seminar, three hours. Intensive exploration of specialized aspects of composition. May be repeated for credit. **251A.** Orchestration; **251B.** Specific Media; **251C.** Specific Styles; **251D.** Compositional Analysis.

**252A-252B-252C. Seminars: Composition (6 units each).** Seminar, three hours. Prerequisites: courses 106B, 123C. Course 252A is prerequisite to 252B, which is prerequisite to 252C. Courses may be taken out of sequence only with consent of instructor. May be repeated for credit.

**261A-261F. Problems in Performance Practices.** Seminar, three hours. Prerequisites: courses 151A-151B or consent of instructor. Investigation of primary source readings in performance practices as related to the period; analytical reports and practical applications in class demonstrations. May be repeated for credit. **261A.** Medieval; **261B.** Renaissance; **261C.** Baroque; **261D.** Classical; **261E.** Romantic; **261F.** Contemporary.

**266A-266B. Seminars: Music of the 20th Century.** Seminar, three hours. Prerequisite: graduate standing in music or consent of instructor. Discussion and analysis of major works of the 20th century, with emphasis on study of groups of works written at the same time in history. **266A.** 1900 to 1949; **266B.** 1950 to the Present.

**C267. Selected Topics in Keyboard Literature.** Lecture, three hours. Corequisite: course 464A or 464B or 464C or consent of instructor. In-depth study of selected topics in keyboard literature, concentrating on problems of performance through analysis, historical and comparative studies, and actual performances by participants. May be concurrently scheduled with course C167.

**270A-270G. Seminars: Music Education (6 units each).** Seminar, three hours. Prerequisite: consent of instructor. May be repeated for credit. **270A.** History; **270B.** Non-Western Musics; **270C.** Curriculum Innovations; **270D.** Tests and Measurements; **270E.** Choral Literature; **270F.** Instrumental Literature; **270G.** General Topics.

**271. Music and Electronic Technology.** Lecture, four hours; media laboratory, one hour. Prerequisite: graduate standing in music performance. Survey of music and its place in emerging digital world of the arts, including training in arranging and multimedia production.

**370. Music in General Education (2 units).** Prerequisite: graduate standing in Graduate School of Education and Information Studies teacher training program (all music students must take course 370 concurrently with Education 100A, 100B, 112, 312, 315A, 315B, and supervised teaching). Critical discussions related to supervised teaching in progress. May be repeated twice for credit.

**371. The Marching Band in Secondary Education (2 units).** Prerequisite: consent of instructor. Study of contemporary marching band as a component of the music curriculum in secondary education, including current approaches, practices, and problems associated with the marching band, as well as historical perspective. S/U or letter grading.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**401. New Music Forum (2 units).** Tutorial/laboratory. Prerequisite: one year of graduate study in music at UCLA. Interactive course in preparation and performance of a premiere work especially composed for a graduate performer or performers by a graduate composer at UCLA.

**460A-465. Graduate Instruction in Performance (6 units each).** Limited to M.F.A. students. Individual instruction of one hour per week, with performance laboratory at discretion of instructor. Intensive study and preparation of musical literature in area of specialization. May be repeated for credit. **460A.** Violin; **460B.** Viola; **460C.** Cello; **460D.** String Bass; **460E.** Harp; **460F.** Classical Guitar; **460G.** Viola da gamba; **460K.** Lute; **461A.** Flute; **461B.** Oboe; **461C.** Clarinet; **461D.** Bassoon; **461E.** Saxophone; **462A.** Trumpet; **462B.** French Horn; **462C.** Trombone; **462D.** Tuba; **463.** Percussion; **464A.** Piano; **464B.** Organ; **464C.** Harpsichord; **465.** Voice.

**469. Piano Pedagogy.** Lecture, three hours; discussion, one hour. Prerequisites: graduate standing in music, advanced proficiency on piano. Study of teaching techniques for individual and group instruction, including discussions of how to teach physical skills, musicianship, and interpretation, plus study of ideas and teachings of noted pedagogues of the past and present. Further emphasis on practical teaching experience in class.

**470. Opera Studio for Graduate Students.** Laboratory, six hours. Prerequisites: graduate standing, consent of instructor. Performance techniques and repertoire for graduate students in opera.

**471. Vocal Pedagogy.** Lecture, three hours; discussion, one hour. Prerequisites: graduate standing in music, advanced proficiency in voice. Study of teaching techniques for voice, including thorough investigation of the vocal mechanism and its use, plus study of noted teachers of the past and present. Further emphasis on practical teaching experience in class.

**472. Master Class in Opera (6 units).** Laboratory, three hours. Limited to M.F.A. students. Intensive study and preparation of opera literature. May be repeated for credit.

**473. String Pedagogy.** Lecture, three hours; discussion, one hour. Prerequisites: graduate standing in music, advanced proficiency on a string instrument. Study of teaching techniques for string instruments, with main emphasis on instruments represented in class, including how to teach physical and musical aspects of playing. Study of various methods and theories of teaching, with emphasis on practical teaching experience in class.

**474. Woodwind Pedagogy.** Lecture, three hours; discussion, one hour. Prerequisites: graduate standing in music, advanced proficiency on a woodwind instrument. Study of teaching techniques for woodwind instruments, with main emphasis on instruments represented in class, including development of tone quality, facility, and musicianship. Study of important teachers of the past and present, with emphasis on practical teaching experience in class.

**475. Master Class in Conducting (6 units).** Laboratory, three hours. Limited to M.F.A. students. Intensive study and preparation of musical literature in specialized field of conducting. May be repeated for credit.

**476. Brass Pedagogy.** Lecture, three hours; discussion, one hour. Prerequisites: graduate standing in music, advanced proficiency on a brass instrument. Study of teaching techniques for brass instruments, with main emphasis on instruments represented in class, including teaching of physical and musical aspects of playing. Study of successful brass performers and teachers, with emphasis on practical teaching experience in class.

**477. Percussion Pedagogy.** Lecture, three hours; discussion, one hour. Prerequisites: graduate standing in music, advanced proficiency in percussion. Study of various methods of teaching the vast array of standard percussion instruments, including both classical and "popular" techniques. Study of successful percussion performers/teachers, with emphasis on practical teaching experience in class.

**C480. UCLA Chorale (2 units).** Activity, four hours. Prerequisites: audition, enrollment in M.M. or D.M.A. program. Select mixed ensemble of 50 to 60 voices performing choral music appropriate for a concert choral ensemble, with emphasis on music after 1700. May be repeated for credit without limitation. May be concurrently scheduled with course C90A.

**C481. Symphony Orchestra (2 units).** Activity, four hours. Prerequisite: audition. Group performance of symphonic literature, as well as orchestral accompaniment for operatic and major choral works. May be repeated for credit without limitation. May be concurrently scheduled with course C90E. S/U or letter grading.

**C482. Wind Ensemble (2 units).** Activity, four hours. Prerequisites: audition, enrollment in M.M. or D.M.A. program. Group performance of concert literature for wind ensemble. May be repeated for credit without limitation. May be concurrently scheduled with course C90G.

**C485. Chamber Ensembles (2 units).** Prerequisite: audition. Students must be at advanced level of their instrument to participate. Applied study of performance practices of literature appropriate to the ensemble. Students may enroll in two sections per term; total of 12 units may be applied toward degree requirements. May be concurrently scheduled with course C175. S/U or letter grading.

**495. Introductory Practicum for Teaching Apprentices in Music (2 units).** Eight weekly two-hour sessions, plus intensive training session during Fall Quarter registration week. Prerequisite: appointment as teaching apprentice in Music Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching music at college level. May not be applied toward degree requirements. S/U grading.

**595A. Preparation of Master's Recital (6 units).** Tutorial, three hours. Prerequisite: graduate standing in master's program in performance. Intensive study and preparation of final master's recital, normally taken in lieu of 400-level lessons during final recital term. S/U grading.

**595B. Preparation of Final Doctoral Recital (6 units).** Tutorial, three hours. Prerequisite: advancement to candidacy for D.M.A. degree. Intensive study and preparation of final doctoral recital, normally taken in lieu of 400-level lessons during final recital term. S/U grading.

**596A. Directed Individual Studies in Orchestration and Composition (2, 4, or 6 units).** Only four units may be applied toward M.A. or M.F.A. degree requirements. May be repeated for credit.

**596C. Directed Individual Studies in Music Education (2, 4, or 6 units).** Only four units may be applied toward M.A. or M.F.A. course requirements.

**596D. Directed Individual Studies in Performance Practices (2 to 12 units).** Prerequisite: graduate standing. Only four units may be applied toward M.A. or M.F.A. degree requirements. May be repeated for credit.

**597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations (2 or 4 units).** S/U grading.

**598. Guidance of M.A. Thesis or M.F.A. Final Project (4, 8, or 12 units).** M.A. candidates may apply four units toward degree requirements; M.F.A. candidates may apply eight units toward degree requirements. May be repeated for credit. S/U grading.

**599. Guidance of Ph.D. Dissertation (4, 8, or 12 units).** May be repeated for credit. S/U grading.

## Scope and Objectives

The Department of Musicology provides students with a broad understanding of the history and literature of the music of Europe and the Americas and of its place in the development of Western culture. Courses cover virtually every period, style, and genre as well as particular areas of popular music and jazz which have influenced or been influenced by Western art music. Musicology appeals to undergraduate students with musical backgrounds whose interests and principal career goals lie in areas other than professional performance. The graduate program provides students with a strong foundation that enables them to pursue careers in teaching and research.

The undergraduate program prepares students for graduate programs in music and related fields and provides them with sufficient background to teach in secondary schools after obtaining the necessary credentials in education. With its focused requirement of study in an area outside music, the program also offers training within the broader context of the humanities.

Depending on their particular interests and career goals, students may select courses in the arts, literature, history and society, philosophy, and religion; these may be concentrated within such fields as Afro-American, American Indian, Asian American, Chicana and Chicano, and women's studies. If students wish to participate in performance at UCLA, they are encouraged to do so.

The graduate program offers courses leading to the M.A. and Ph.D. degrees. It is designed to equip students to pursue careers not only in teaching but also in other areas that require bibliographical skills and training in research methodologies. The department provides teaching and research assistantships each year for all qualified students.

## Undergraduate Study

### Bachelor of Arts Degree

#### Admission

All applicants for admission and change of major must demonstrate proficiency in vocal or instrumental performance at the intermediate level. This requirement may be satisfied by completing a required requisite course with a grade of B or better or by passing an individual audition with a departmental faculty committee. Junior transfer students are required to pass an audition with the departmental faculty admissions committee before they can be admitted to the program.

#### Preparation for the Major

*Required:* Musicology 1A-1B, 26A-26B-26C, 28A-28B-28C, Music 4A, 20A, 20B, 20C, and six units (three terms) of performance organizations selected from Ethnomusicology 91D, 91F, 91H, 91K, 91P or Music C90A, 90B, C90E, 90F, C90G.

#### The Major

*Required:* Musicology 126A-126B-126C, four courses from C127A through C127F, 130, 156, 188A through 188F; two courses (each in a different geographical or cultural area) from Ethnomusicology 106A, 106B, 106C, M108A, 108B, M110A, M110B, 136A, 136B, 146, 147, 156A, 156B, 157, 160A, 160B; four courses in one area of concentration (arts, literature, history and society, or philosophy and religion) within which students may focus on a more specialized field such as Afro-American, American Indian, Asian American, Chicana and Chicano, and women's studies. A list of approved courses is available in the department office.

## Music History Minor

The music history minor provides undergraduates with an overview of music history, starting with required courses that offer beginning students a general historical survey from antiquity through the 20th century. Upper division courses have been selected to provide study of more specific areas of interest, with various

electives that offer a variety of perspectives on music history.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition at the Student Services Office, 1845 Schoenberg Hall Annex. The ability to read music, although helpful, is not required for admission. For further information, contact Alfred Bradley at (310) 825-4768.

*Required Lower Division Courses:* Musicology 1A and two courses from 2A, 2B, 5, 7, 13.

*Required Upper Division Courses:* Five courses, including (1) one from Musicology C127A, C127B, C127C, (2) one from C127D, C127E, C127F, and (3) three from 130 through 189. A recommended course plan for item 3 is one course from 130, 131, 136, 139, 150, 156, 189, one course from 133, 134, 188A through 188F, and one course from 135A, 135B, 135C.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

Applicants for the Master of Arts in Musicology must have completed a Bachelor of Arts degree, or its equivalent, in Music or Music History. Other fields of study are accepted if applicants have the musical training and musicianship necessary to pursue graduate work. Transcripts must show at least 52 quarter units of work outside music, including one college year (or its high school equivalent) of French, German, Italian, or Spanish and an average grade of at least B in the basic areas that normally constitute the undergraduate core curriculum in music (harmony, counterpoint, music history, analysis, and musicianship).

Applicants for the M.A. are required to (1) take a departmental assessment examination (details are automatically sent after the application has been received); (2) submit a letter describing their background of study and stating reasons for wishing to pursue graduate studies in musicology; (3) submit three letters of recommendation from former instructors and/or professionals with whom the applicant has worked; and (4) submit written examples of their work such as a paper on an appropriate subject. No application can be considered until the examination has been taken and all of the above materials have been received.

### Admission Timetable

December 30 — Application for admission/fellowship is due.

January 30 — Supplementary application materials are due.

End of January — Assessment examination is administered. Note: Applicants for fellowships must take the early examination; all monies are awarded at that time.

March 1 — Late applications are accepted until March 1; however, due to mail transit time, late foreign applications from outside the U.S. cannot be accepted.

By March 15 — Notice of acceptance or denial is sent.

April 1 — Supplementary application materials are due.

Early April — Assessment examination is administered.

May 15 — Notice of acceptance or denial is sent.

Failure to meet any deadline may result in a delay in action on an application for admission, as well as that for a fellowship or assistantship.

*Assessment Examination.* The assessment examination is administered at Schoenberg Hall on the UCLA campus twice a year at the end of January and early April. Those applying from outside the Southern California area who find it impossible to take the examination on campus can make arrangements with the Student Services Office to take the examination in absentia before the dates listed above. Further information is sent after the application has been received.

The assessment examination is approximately two and one-half hours in length and consists of three parts: (1) harmonic and formal analysis, (2) an essay on each of two historical subjects, one before and one after 1750, and (3) keyboard harmony, score reading, sight singing, piano sight reading, and performance. Part 3 is taken on entrance, during the week before classes start in Fall Quarter. Students with weakness in any of Part 3 must enroll in the musicology practicum during their first year of study.

The assessment examination and dossier are reviewed, along with those of other applicants, by the musicology faculty to assess each applicant's potential as a graduate student in that field at UCLA.

### Areas of Study

The Musicology Department offers the degree of Master of Arts in the field of historical musicology. Degrees in composition, performance, and Ethnomusicology are offered through other departments.

### Course Requirements

Students are required to complete a minimum of nine courses at the 200 level.

The requirements are Musicology 200A, 200B, 200C; three seminars chosen from 260A through 260F, and 262; and a choice of three electives (up to two outside the department). The musicology electives include Musicology 201A through 201F, 210, 211, 250A-250B, and other 200-level courses.

### Comprehensive Examination

Students take the comprehensive examination after completing their course requirements, which is normally by the end of their fifth quarter. All other degree requirements, including language proficiencies, must be satisfied before this examination can be taken. The examination is scheduled by the faculty during the Spring Quarter; all second-year students take it together. However, transfer students entering with a master's degree are expected to take this examination at the end of their first year, before proceeding on to their Ph.D. coursework. In anticipation of the examination, students are asked to designate three fields in which they are to be examined. Two of these fields must be historical: one before 1700 (medieval, Renaissance, or 17th century) and one after 1700 (18th century, 19th century, or 20th century). The third field may be a genre, methodology, or other topic that is recognized as a scholarly specialization among musicologists: e.g., Latin American music, opera, popular music, feminist musicology, ethnomusicology, criticism, African-American music. These examinations are designed to test factual knowledge, power of historical analysis and synthesis, and capacity for critical and reflective thinking.

The faculty, after taking into account the fields designated by the student and the suggestions of the student and the adviser, approve the appointment of three of its members to serve as the examining committee. Two weeks before the examination, students submit three samples of their best written work which demonstrate their research, writing, thinking and analytical skills (typically three seminar papers) prepared for at least two musicology faculty members. The samples do not need to match up with the designated areas of examination. The committee's review of these papers constitutes the first stage of the examination. The second stage is the written examination which is taken together by the cohort of students but is designed differently for each. The members of the examining committee (in consultation with each other to avoid duplication) formulate three essay topics related to the designated fields. Each student receives these topics at the time of the examination and is given up to four hours to address them. The comprehensive examination is concluded by a two-hour oral examination covering the three designated fields and the written work that has been submitted. On the basis of the student's overall performance, the committee awards a grade of High Pass (pass to continue in the Ph.D. program), Pass (terminal pass), Fail, or Pass Subject to Reevaluation. In this last instance, the student is permitted to repeat the deficient portions of

the examination in the following Winter Quarter, after additional coursework or study is completed. More than one such attempt may be granted at the discretion of the faculty.

### Thesis Plan

None.

## Doctoral Degree

### Admission

Applicants for the Ph.D. program in Musicology must have completed a Master of Arts degree (or the equivalent) in Music. The degree normally is in musicology or music history. Otherwise additional coursework, as prescribed by the department, must be completed.

Applicants for the Ph.D. are required to (1) take a departmental assessment examination (details are sent after the application has been received); (2) submit a letter describing their background of study and stating reasons for wishing to pursue graduate studies in musicology; (3) submit three letters of recommendation from former instructors and/or professionals with whom the applicant has worked; and (4) submit written examples of work such as a paper on an appropriate subject. Applicants applying to the Ph.D. program should submit their M.A. thesis, if possible. No application can be considered until the examination has been taken and all of the above materials have been received.

### Major Fields or Subdisciplines

The Musicology Department offers the degree of Doctor of Philosophy in the field of historical musicology. Degrees in composition, performance, and ethnomusicology and systematic musicology are offered through other departments.

### Course Requirements

Students are required to take a minimum of six courses beyond the M.A., including three seminars from Musicology 260A through 260F and 262, and three electives in areas they wish to pursue. Students whose M.A. is not from UCLA may be required, in consultation with the graduate adviser, to take other relevant and necessary courses beyond the six specified.

### Written and Oral Qualifying Examinations

Soon after completion of the doctoral coursework, normally at the end of the third year, students take the *Special Field Examination*, which includes both written and oral components. By this time, the student must have decided upon an area of specialization and secured the agreement of a qualified faculty member to serve as the dissertation adviser. Taking into account the field designated and the suggestions of the student and the adviser, the faculty approves the appointment of three of its members to serve as the examining committee. Three months before the examination, the student submits to the committee members a

reading and repertoire list related to the area of specialization. Typically, this consists of a bibliography in the general area of the dissertation research and a list of relevant musical works, together totaling no more than 50 items. The members of the examining committee (in consultation with one another to avoid duplication) each formulate one or more questions relating to the topic, repertoire, and methods thus staked out by the student. The student is allowed one week to address these topics in writing, using any desired research materials. After the completed written examination has been distributed to the examiners, a two-hour oral examination is scheduled. At this time, the committee may discuss the results of the written examination with the student and ask further questions related to the area of the dissertation research. If a majority of the committee determines that the written and oral examinations have been passed, the student begins preparation for the second stage, the University Oral Qualifying Examination. If the committee determines that the written and oral examinations have not been passed, the student may retake the Special Field Examination after six months of further preparation. More than one such attempt may be granted at the discretion of the faculty.

The *University Oral Qualifying Examination* is a defense of the dissertation prospectus. All other requirements, including language proficiencies, must be satisfied before this examination can be scheduled. At least two weeks before the examination, the student must submit the prospectus to the members of the examination committee, who may be but need not be the same as those on the first committee. The prospectus must be a substantially researched overview of the proposed dissertation that demonstrates that the student is fully prepared to undertake the dissertation project. Students are encouraged to consult with the members of their committee before the examination, which concentrates on the feasibility and significance of the project and the student's preparation for it. If the defense is unsatisfactory, the candidate may repeat the examination once, at the discretion of the faculty. After passing this examination, the student is advanced to candidacy and begins to write the dissertation. Candidates are encouraged to enroll in or audit seminars in their field whenever they are offered. If enrolled, candidates may satisfy all course requirements through work connected with the dissertation.

## Musicology

### Lower Division Courses

**2A-2B. Introduction to the Literature of Music.** Lecture, four hours; laboratory, one hour. Limited to undergraduate students. Course 2A is not requisite to 2B. Designed for nonmusic majors. **2A.** Technical and formal principles of music literature through the mid-18th century. **2B.** Music literature from the mid-18th century to the present.

**5. History of Rock and Roll.** Analysis of forms, practices, and meanings of rock and roll music, broadly conceived, from its origin to the present. Emphasis on how this music has reflected and influenced changes in sexual, racial, and class identities and attitudes.

**6GA-6GB. Musicianship for Musicology Graduate Students (2 units each).** Seminar/laboratory, three hours. Designed to help entering graduate students remedy entrance deficiencies. S/U grading.

**7. Film and Music.** History of music and cinema, particularly ways music is used to produce meanings in conjunction with the visual image. P/NP or letter grading.

**13. 20th-Century Music of the Western World.** Survey of main trends in 20th-century music, with emphasis on representative works from avant-garde, mainstream, and popular traditions.

**26A-26B-26C. History and Analysis of Music I.** Lecture, four hours; laboratory, one hour. Enforced requisite: Music 20C. Course 26A is enforced requisite to 26B, which is enforced requisite to 26C. History and literature of music from beginning of the Christian era to 1750, with emphasis on analysis of representative works of each style period. Materials selected illustrate history of style and changing techniques of composition.

**28A-28B-28C. Early Music Laboratory (2 units each).** Laboratory, three hours. Enforced corequisite: course 26A or 26B or 26C. Practical laboratory in which students perform music of various periods, as correlated with courses 26A-26B-26C.

### Upper Division Courses

**101. Introduction to Musicology.** (Formerly numbered 1A.) Requisites: courses 26A-26B-26C. Introduction to principles, problems, and methods of music history and criticism through examination of selected issues.

**126A-126B-126C. History and Analysis of Music II.** Lecture, four hours; laboratory, one hour. Prerequisites: courses 26A-26B-26C, Music 20A, 20B, and 20C, or consent of instructor. Course 126A is prerequisite to 126B, which is prerequisite to 126C. History and literature of music from 1750 to the present, with emphasis on analysis of representative works of each style period. Materials selected illustrate history of style and changing techniques of composition.

**C127A-C127F. Selected Topics in History of Music.** Discussion, three hours. Prerequisites to all courses: courses 1A-1B, 26A-26B-26C, Music 20A, 20B, 20C; in addition, 126A is prerequisite to C127D, 126B is prerequisite to C127E, and 126C is prerequisite to C127F. Designed as proseminars for undergraduates in preparation for graduate work. Special aspects of music of each period studied in depth. May be concurrently scheduled with courses C227A-C227F. **C127A.** Middle Ages; **C127B.** Renaissance; **C127C.** Baroque; **C127D.** Classic; **C127E.** Romantic; **C127F.** 20th Century.

**130. Music of the U.S.** Prerequisite: consent of instructor. Survey of art music in the U.S. from Colonial times to the present.

**131. American Popular Song.** Survey of American popular song from the 18th century to the present, with emphasis on relationship of popular song to important currents in American life and culture.

**133. Bach.** Lecture, two hours; laboratory, two hours. Prerequisite: undergraduate standing. Life and works of Johann Sebastian Bach.

**134. Beethoven.** Lecture, two hours; laboratory, two hours. Prerequisite: undergraduate standing. Life and works of Ludwig van Beethoven.

**135A-135B-135C. History of Opera.** Lecture, four hours; laboratory, one hour. Prerequisite: undergraduate standing. **135A.** Opera of Baroque and Classical Periods; **135B.** Opera of Romantic Period; **135C.** Opera of the 20th Century.

**136. Music and Gender.** Analysis of gender ideologies in several musical cultures; representations of gender, the body, and sexuality by both male and female musicians; contributions of women to Western art and popular musics; methods in feminist and gay/lesbian theory and criticism.

**139. History and Literature of Church Music.** Prerequisite: consent of instructor. Study of forms and liturgies of Western church music.

**150. History of Jazz.** Designed for musicology, music, ethnomusicology majors, and other students with some background in musical performance and theory. History and analysis of variety of jazz styles, from late 19th-century forerunners to the present, with emphasis on social meanings of musical practices.

**156. Studies in Musical Genres.** Prerequisite: consent of instructor. Survey of musical genres, with emphasis on analysis of structural organization.

**188A-188F. The Master Composer.** Lecture, three hours; laboratory, one hour. Prerequisite: consent of instructor. Survey of works of an outstanding composer in Western art music, considered within context of his age. **188A.** Middle Ages; **188B.** Renaissance; **188C.** Baroque; **188D.** Classic; **188E.** Romantic; **188F.** 20th Century.

**189. The Symphony.** Lecture, three hours; laboratory, one hour. Prerequisite: undergraduate standing. Survey of symphonic literature from Haydn through the 20th century.

**199. Special Studies in Musicology (2 or 4 units).** Prerequisites: senior standing, 3.0 GPA, consent of instructor and department chair. Individual studies in musicology resulting in a research project. May be repeated for a maximum of eight units.

## Graduate Courses

**200A. Research Methods and Bibliography (6 units).** Lecture, three hours. Prerequisite: graduate standing in musicology. Survey of general bibliographic material in music.

**200B. Historiography (6 units).** Seminar, three hours. Prerequisite: graduate standing in musicology, ethnomusicology, or music, or consent of instructor. Critical examination of principles and procedures which inform historical study of music, with emphasis on impact of recent cultural theory.

**200C. Contemporary Music Criticism (6 units).** Seminar, three hours. Prerequisite: graduate standing in musicology, ethnomusicology, or music, or consent of instructor. Introduction to recent developments in the field of musicology, focusing on problems of how music operates as a cultural practice and how musical meanings can most effectively be analyzed and written about.

**201A-201F. Current Research Problems in Historical Musicology (6 units each).** Discussion, three hours. Prerequisite: graduate standing in musicology. Investigation at graduate level of central questions and problems in history of Western music designed to give beginning graduate students a unified background for remainder of their studies and to employ their developing skills in research and bibliography. **201A.** Medieval; **201B.** Renaissance; **201C.** Baroque; **201D.** Classic; **201E.** Romantic; **201F.** 20th Century.

**202. Selected Topics in History of Western Music (4 or 6 units).** Lecture, three hours. Prerequisite: course 200A or consent of instructor. Designed for graduate students in areas other than musicology who are preparing for qualifying examinations. Systematic review of major stylistic trends in history of Western music from medieval times to the present through formal analysis and readings in contemporary and modern theoretical writings. May be repeated for a maximum of 12 units.

**210. Medieval Notation (6 units).** Lecture, three hours. Prerequisite: consent of instructor. Vocal and instrumental notation; paleography of the period.

**211. Renaissance Notation (6 units).** Lecture, three hours. Prerequisite: consent of instructor. Vocal and instrumental notation; paleography of the period.

**C227A-C227F. Selected Topics in History of Music.** Discussion, three hours. Prerequisite: graduate standing. Special aspects of music of each period studied in depth. Each course may be repeated once for credit. May be concurrently scheduled with courses C127A-C127F. Additional assignments, as well as evidence of greater depth of study, required of graduate students. **C227A.** Middle Ages; **C227B.** Renaissance; **C227C.** Baroque; **C227D.** Classic; **C227E.** Romantic; **C227F.** 20th Century.

**250A-250B. Seminars: History of Music Theory (6 units each).** Seminar, three hours. Prerequisite: course 200A. Course 250A is not prerequisite to 250B. **250A.** Investigation of principal theoretical writings concerning music from antiquity through Zarlino. **250B.** Investigation of principal theoretical writings concerning music from Rameau to the present.

**256. Seminar: Musical Form (6 units).** Seminar, three hours. Prerequisites: courses 126A-126B-126C. Analysis of structural organizations in music. Specific topics vary from year to year.

**257. Seminar: Music of the U.S. and Canada.** Discussion, three hours. Prerequisite: course 130. Examination of principal figures and trends in North American music since the 18th century. Topics vary from year to year.

**260A-260F. Seminars: Historical Musicology (6 units each).** Seminar, three hours. Prerequisites: courses 200A, 201A-201B-201C, and 210 or 211 (either may be taken concurrently). Specific topics vary from year to year. May be repeated for credit. **260A.** Medieval; **260B.** Renaissance; **260C.** Baroque; **260D.** Classic; **260E.** Romantic; **260F.** 20th Century.

**261A-261F. Problems in Performance Practices.** Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Investigation of primary source readings in performance practices as related to the period; analytical reports and practical applications in class demonstrations. May be repeated for credit.

**262. Contemporary Popular Music Studies.** Seminar, three hours. Prerequisite: graduate standing or consent of instructor. Critical exploration of methodologies of interdisciplinary field of popular music studies. Analysis of how music, lyrics, and visual images produce meanings within contexts shaped by mass mediation, capitalism, and political realities of gender, class, and race.

**269. Seminar: History of European Instruments.** Discussion, three hours. Investigation of origins and development of principal families of instruments used in European music since the Middle Ages. Topics vary from year to year.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Introductory Practicum for Teaching Apprentices in Musicology (2 units).** Eight weekly two-hour sessions, plus intensive training session during Fall Quarter registration week. Prerequisite: appointment as teaching apprentice in Music or Musicology Department. Required of all new teaching apprentices. Special course dealing with problems and practices of teaching music at college level. May not be applied toward degree requirements. S/U grading.

**596. Directed Individual Studies in Musicology (2, 4, or 6 units).** Prerequisites: graduate standing, consent of instructor. S/U grading.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 or 4 units).** Prerequisites: graduate standing, completion of all M.A. or Ph.D. course and language requirements. S/U grading.

**598. Guidance of M.A. Thesis (4, 8, or 12 units).** Prerequisites: graduate standing, completion of all M.A. degree requirements (except thesis). S/U grading.

**599. Guidance of Ph.D. Dissertation (4, 8, or 12 units).** Prerequisites: graduate standing, advancement to Ph.D. candidacy. May be repeated for credit. S/U grading.

Ralph Jaekel, Ph.D. (*Turkic*)  
Thomas Ritter, Dr.phil. (*Egyptology*)

## Scope and Objectives

The mission of the department is the discovery, interpretation, dissemination, and preservation of human values created over a period of five or more thousand years in an area which was the cradle of all civilization.

The department offers instruction in the major modern and ancient languages of the Near East: Akkadian, ancient Egyptian, Arabic, Armenian, Berber, Coptic, Hebrew, Persian, and Turkic. To meet increasing demands for a knowledge of this area and its past and present, it treats each language in a wide perspective — as a means of communication, as a vehicle of a

cultural heritage, as a research tool for the area, and as an object of research itself.

Undergraduate majors may be taken in ancient Near Eastern civilizations, Arabic, Hebrew, Iranian studies, and Jewish studies. Master's and Ph.D. programs are offered in ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, and Turkic.

Courses in the department prepare students for careers in government, foreign trade, teaching abroad, journalism abroad, archaeology, and further academic work involving the area.

## Undergraduate Study

The department offers the Bachelor of Arts degree in five fields: (1) Ancient Near Eastern Civilizations, (2) Arabic, (3) Hebrew, (4) Iranian Studies, and (5) Jewish Studies. In each of these fields students must meet the prerequisites and take the courses prescribed. Their adviser assists in selecting a plan of study developed around their interests.

Students may combine their major with one in another department (double major) to enhance their educational opportunities. Due to the number of additional courses required, they are advised to consider this option early in their academic career and in consultation with program advisers in both majors.

## Bachelor of Arts in Ancient Near Eastern Civilizations

There are four options for a major in ancient Near Eastern civilizations: (1) Mesopotamia, (2) Egypt, (3) Syria/Palestine, and (4) biblical studies.

### Preparation for the Major

Requisites for options 1 and 2 are German 1 and 2; requisites for options 3 and 4 are Greek 1, 2, Hebrew 1A-1B-1C, 102A-102B-102C. Majors in all four fields are expected to continue their study of German or Greek beyond the requisite levels.

### The Major

Majors in all four options are required to take 14 courses selected in consultation with the program adviser.

Majors selecting options 1, 2, and 3 are required to take four language courses as follows: *option 1* — Semitics 140A-140B, 141, 142; *option 2* — Ancient Near East 120A-120B-120C, 121A; *option 3* — Semitics 130 and three terms of Hebrew 120. The remaining 10 courses for all three options are to be selected from the following: three literature courses from Ancient Near East 150A, 150B, 150C, Jewish Studies M150A; three courses in history and religion from Ancient Near East M104A, M104B, M105, 130, 170, History M191A, 193D, M203A, Iranian 169, 170; three courses in archaeology and art from Ancient Near East 160A, 160B, 161A, 161B, 161C, 162, Art History 101A, 101B; one course in research methodology (such as Anthropology C115R, M116Q, or Linguistics 120A, 120B,

or English 140A) taken preferably in another department with the consent of the adviser.

Majors selecting option 4 are required to take 14 courses as follows: three terms of Hebrew 120; Ancient Near East 150C, 162, 170; English 108B or History 194A; Greek 130; Jewish Studies M150A; History M191A; Semitics 130. The remaining three courses may be selected from Ancient Near East M104A, M104B, M105, 130, 150A, 150B, 160A, 160B, Art History 101A, 101B, 105A, Classics 168, Greek 131, History 193D, 194B, Iranian 169, 170, Latin 120.

## Bachelor of Arts in Arabic

Students majoring in Arabic may combine the major with the interdepartmental specialization in business and administration to enhance their career opportunities. Due to the number of additional courses required, they are advised to consider this option early in their academic career.

### Preparation for the Major

*Required:* Arabic 1A-1B-1C, 102A-102B-102C, 150.

### The Major

*Required:* Fifteen courses, including Arabic 103A-103B-103C and History 107A or Islamics 110; five courses from Arabic 120, 130, 132, 141; three courses from Arabic 111A, 111B, 111C, 112A, 112B, 112C, 114A, 114B, 114C; three courses from Art History 104A, Geography 187, History 106A, 106B, 106C, 107B, 108A, 108B, Political Science 132A, 132B, 157.

## Bachelor of Arts in Hebrew

### Preparation for the Major

*Required:* Hebrew 1A-1B-1C, 102A-102B-102C, Jewish Studies M150A-150B, or equivalent.

### The Major

*Required:* Sixteen courses, including Hebrew 103A-103B-103C; three terms of Hebrew 120 and/or 125; two courses from Hebrew 130, 135; two courses from Hebrew 140, 160; Hebrew 190A-190B; two additional courses in Hebrew or Aramaic to be approved by the adviser; two courses from History M191A, M191B, M192A, M192B.

## Bachelor of Arts in Iranian Studies

Students majoring in Iranian studies may combine the major with specialization in other fields to enhance their career opportunities. Due to the number of additional courses required, they are advised to consider this option early in their academic career.

### Preparation for the Major

*Required:* Iranian 1A-1B-1C or equivalent, 150A-150B.

## The Major

*Required:* Sixteen courses, including Iranian 102A-102B-102C, 103A-103B-103C, 140, 141, 142, 180A-180B; five courses from Ancient Near East 163A, 163B, Arabic 1A, 1B, 1C, Art History 104A, 104B, C104C, Ethnomusicology 20B, History 106A, 106B, 106C, 110B, Iranian 120, 169, 170, 190A, 190B, Political Science 157.

## Bachelor of Arts in Jewish Studies

### Preparation for the Major

*Required:* Hebrew 1A-1B-1C, History M191A-M191B, or equivalent.

### The Major

*Required:* Sixteen courses, including Hebrew 102A-102B-102C, 103A-103B-103C, 120 or 125, Jewish Studies M150A-150B, 151A-151B, 199, and four other upper division courses. At least two of the four must be courses in the areas of Hebrew, Jewish history, or Yiddish. The remaining two may be selected either from those areas or from courses with Jewish content given in other departments and approved by the adviser.

## Near Eastern Languages and Cultures Minor

The Near Eastern languages and cultures minor is designed for students who wish to augment their major program in the College of Letters and Science with a group of related courses from various linguistic, literary, archaeological, and historical disciplines of the Near East, from ancient Egypt, Mesopotamia, and biblical studies to the modern Arabic, Armenian, Iranian, Jewish, and Turkish world.

To enter the minor, students must have an overall grade-point average of 2.0 or better, have completed a total of seven upper division courses in the department, and file a petition in 255 Kinsey Hall, (310) 825-4165.

*Required Upper Division Courses:* Seven courses selected in consultation with an academic adviser from any of the courses offered by the department; 199 courses may not be applied.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

In addition to the regular University requirements, a bachelor's degree or its equivalent in the language area chosen for the degree, the Graduate Record Examination (GRE) General Test, and three letters of recommendation are required of applicants to the Master of Arts program. As a rule, students are not admitted with a grade-point average of less than 3.25 or a GRE score of less than 1,600. The GRE must be taken within 24 months prior to the date of the application.

### Areas of Study

Major fields of specialization are ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, Turkic.

Students may concentrate on either language or literature in their selected field but are required to do work in both. In the field of ancient Near Eastern civilizations, the department also offers an archaeology emphasis.

### Course Requirements

A minimum of nine upper division and graduate courses is required, of which at least six must be at the graduate level. Students are required to take one quarter of Near Eastern Languages 200.

In general, students choosing either the language, literature, or archaeology option are required to study two Near Eastern languages, one of which is considered the major language. Students in Semitics or in Old Iranian study three languages.

In ancient Near Eastern civilizations, students may choose as their major language any of the following: ancient Egyptian (including Coptic), Akkadian, Aramaic (including Syriac), Hebrew (with Ugaritic and Phoenician), or Old Persian. For the second language, any of the above or Hittite or Sumerian may be chosen.

Students in Hebrew choose Hebrew and another Semitic language. In Turkic, either two Turkic languages or Turkish and a second culturally related language may be chosen. In Arabic, Armenian and Iranian (modern), a major language and a second culturally related language are chosen.

Students in Semitics are required to study three Near Eastern languages, at least two of which should be Semitic (the third may be Hittite or Sumerian). In Old Iranian, Persian, Sanskrit, and Old and Middle Iranian are studied.

Twelve units of course 596 may be applied toward the total course requirement; eight units may be applied toward the minimum graduate course requirement.

### Comprehensive Examination Plan

In general, students are required to take written final comprehensive examinations in their major and minor languages, as well as the history and literature of their major field. Further details can

be found in the departmental Guide to Graduate Studies, available in the department.

### Thesis Plan

None.

## Doctoral Degree

### Admission

In addition to the regular University requirements, an M.A. or equivalent in the applicant's field, the Graduate Record Examination (GRE) General Test, and three letters of recommendation are required. As a rule, students are not admitted with a grade-point average of less than 3.25 or a GRE scores of less than 1,600. The GRE must be taken within 24 months prior to the date of the application.

The M.A. program need not have been completed at UCLA.

### Major Fields or Subdisciplines

Major fields of specialization are ancient Near Eastern civilizations, Arabic, Armenian, Hebrew, Iranian, Semitics, Turkic.

Students may concentrate on either language or literature in their selected field but are required to do work in both. In the field of ancient Near Eastern civilizations, the department also offers an archaeology emphasis.

### Course Requirements

Students who choose a language emphasis for the Ph.D. are required to add a third Near Eastern language to the two that are required for the M.A.

Students are required to achieve high competence in two of their languages and to familiarize themselves with the cultural backgrounds of each of the languages chosen. For language options, see the M.A. requirements section. Students are also expected to take the equivalent of one year of general linguistics. Those studying Semitics or Old Iranian study three languages.

If the literature option is chosen, the student is required to achieve high competence in two Near Eastern languages and their literatures. For language options, see the M.A. requirements section. Students are required to familiarize themselves, through appropriate coursework, with the history of the cultural area, and the methods of literary research and the history of literary criticism.

If the archaeology emphasis in the ancient Near Eastern civilizations specialization is chosen, students are required to achieve high competence in two ancient Near Eastern languages and must be well-versed both in the history of the cultural area and in archaeological methodologies. For language options, see the M.A. requirements section

Further details about the choice of languages and examination requirements may be found in the departmental *Guide to Graduate Study*, available in the department.

## Written and Oral Qualifying Examinations

Qualifying examinations must be passed before the formation of a doctoral committee.

Candidates in languages are examined in three Near Eastern languages and the literary and historical background of at least two of them. Candidates in literature are examined in the literatures written in two languages within the cultural area of concentration and the historical and cultural background of these languages, with emphasis on one of them. Candidates in ancient Near Eastern civilizations are examined in two ancient languages and in the history and archaeology of the major areas of the ancient Near East.

## Ancient Near East

(Akkadian, Aramaic, Phoenician, and Ugaritic are listed under Semitics.)

## Lower Division Course

**10. Jerusalem: The Holy City.** Lecture, three hours. Survey of history of Jerusalem over 3,000 years as a symbolic focus for three faiths: Judaism, Christianity, and Islam.

## Upper Division Courses

**M104A-M104B. Ancient Egyptian Civilization.** (Same as History M104A-M104B.) Lecture, three hours. Course M104A is not prerequisite to M104B. Political and cultural institutions of ancient Egypt and ideas on which they were based. **M104A.** Chronological discussion of Prehistory, the Old and Middle Kingdom. **M104B.** The New Kingdom and the Late period until 332 B.C.

**M105. History of Ancient Mesopotamia and Syria.** (Same as History M105.) Lecture, three hours. Political and cultural development of the "Fertile Crescent," including Palestine, from the Neolithic to the Achaemenid period.

**120A-120B-120C. Elementary Ancient Egyptian.** Lecture, three hours; laboratory, two hours. Prerequisite: consent of instructor. Grammar and texts.

**121A-121B-121C. Intermediate Ancient Egyptian.** Lecture, three hours. Prerequisites: courses 120A-120B-120C. Readings in ancient Egyptian literature.

**123A-123B. Coptic.** Lecture, three hours. Prerequisite: consent of instructor. Introduction to Coptic grammar and reading of Coptic texts.

**124. Middle Egyptian Technical Literature.** Prerequisite: course 121C. Reading of Middle Egyptian technical literature in hieroglyphic transcription. Medical, veterinary, mathematical, and astronomical texts included.

**130. Ancient Egyptian Religion.** Lecture, three hours. Introductory survey of various ancient Egyptian religious beliefs and practices, their origin, and development. Discussions of religiopolitical institutions such as divine kingship and pious foundations.

**140A-140B-140C. Elementary Sumerian.** (Formerly numbered 140A-140B.) Lecture, three hours; outside study, nine hours. Prerequisites: Semitics 140A-140B. Elementary grammar and reading of royal inscriptions, letters, and administrative texts from the Ur III period.

**145. Sumerian Literary Texts.** Lecture, three hours. Prerequisites: courses 140A-140B or consent of instructor. Reading and interpretation of selected Sumerian literary texts.

**150A-150B-150C. Survey of Ancient Near Eastern Literatures in English.** Lecture, three hours. Each course may be taken independently for credit. **150A.** Mesopotamia; **150B.** Egypt; **150C.** Syria and Palestine.

**160A-160B. Introduction to Near Eastern Archaeology.** Lecture, three hours. Terminology, geography, principles, strategy of research, bibliography, and general survey of Near Eastern archaeology.

**161A-161B-161C. Archaeology of Mesopotamia.** Prerequisite: consent of instructor. Survey of main archaeological periods in Mesopotamia, with special emphasis on late prehistoric and early historical periods and with reference to neighboring cultural areas. Each course may be taken independently for credit.

**162. Archaeology and Religion of the Holy Land.** Lecture, three hours. Survey of archaeology of Palestine from the Bronze Age to destruction of Jerusalem in A.D. 70, with emphasis on religious development of ancient Israel.

**163A-163B. Archaeology of Iran.** Lecture, three hours. Designed to introduce students to Iranian archaeology from prehistoric through Achaemenid times. **163A.** Prehistoric and protohistoric phases of Iranian archaeology. **163B.** Archaeology of Elam, Iron Age, and Achaemenid Empire.

**164A-164B-164C. Archaeology of Historic Periods in Mesopotamia.** Prerequisites: courses M105 and 161A-161B-161C, or consent of instructor. Survey of main archaeological periods in Mesopotamia, with special emphasis on historic periods and with reference to neighboring cultural areas. Each course may be taken independently for credit.

**165. Archaeology of Pharaonic Egypt.** Lecture, three hours. Prerequisites: courses M104A-M104B. Selected topics on archaeology of Pharaonic Egypt, with emphasis on material culture as source for political, social, and economic history of ancient Egypt.

**170. Introduction to Biblical Studies.** Lecture, two hours. Knowledge of original languages not required. The Bible (Old and New Testaments) as a book. Canon, text, and versions. Linguistic, literary, historical, and religious approaches to Bible study. Survey of history of interpretation from antiquity to the present.

**M194. The Hero in the Bible and the Ancient Near East.** (Same as Folklore M185.) Lecture, three hours. Investigation of concepts of the hero/heroine in literatures of ancient Mesopotamia, Canaan, and Israel. Texts include epics of Gilgamesh and Aghat, Hebrew Bible, and New Testament. All texts read in translation.

**199. Special Studies in the Ancient Near East (2 to 8 units).** Prerequisite: consent of instructor.

## Graduate Courses

**210. Late Egyptian.** Lecture, three hours. Prerequisites: courses 121A-121B-121C, consent of instructor. Late Egyptian grammar and reading of both hieroglyphic and hieratic texts. May be repeated for credit.

**211A-211B. Egyptian Texts of the Greco-Roman Period.** Lecture, three hours. Prerequisite: course 121C. Introduction to grammar and orthography of hieroglyphic texts from Greco-Roman temples. Text readings and translation of various textual types.

**220. Seminar: Ancient Egypt.** Seminar, three hours. Prerequisite: consent of instructor. May be repeated for credit.

**221A-221B. Demotic.** Prerequisite: course 121C. Introduction to Demotic grammar and orthography. Reading of texts from various genres.

**240A-240B-240C. Seminars: Sumerian Language and Literature.** Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various Sumerian periods and literary genres; selected problems in linguistic or stylistic analysis and literary history.

**M250. Seminar: Ancient Mesopotamia.** (Same as History M207.) Seminar, three hours. Selected topics on political, social, and intellectual history of ancient Mesopotamia. May be repeated for credit.

**250X. Seminar: Ancient Mesopotamia (1 unit).** Prerequisite: consent of instructor. Selected topics on political, social, and intellectual history of ancient Mesopotamia. Course for students who participate regularly in class meetings but without the homework required in course M250. May be repeated for credit. S/U grading.

**260. Seminar: Ancient Near Eastern Archaeology.** Seminar, two hours. Prerequisite: consent of instructor. May be repeated for credit.

**261. Practical Field Archaeology (2 to 8 units).** Fieldwork, two hours. Prerequisite: consent of instructor. Participation in archaeological excavations or other archaeological research in the Near East under staff supervision. May be repeated.

**262. Seminar: Object Archaeology.** Discussion, two hours; laboratory, one hour. Prerequisite: consent of instructor. Selected topics in analysis and interpretation of Near Eastern archaeological finds in museum collections. Students work with objects in Heermanek Collection of Los Angeles County Museum of Art.

**263. Seminar: Egyptian Monuments.** Prerequisite: consent of instructor. Selected monuments and sites in area of Luxor (Ancient Thebes). Architecture and decoration of temples and tombs; structure and occupation of settlements. May be repeated.

**M265. Depositional History and Stratigraphic Analysis.** (Same as Archaeology M265.) Lecture, two hours. Theoretical understanding of depositional processes ("laws") which lead to site formation and of stratigraphic procedures to be used in recovery of embedded cultural materials. Study of issues covered in the literature, with specific test cases from actual excavations and site reports. Coverage of theoretical implications of such disciplines as surveying and pedology with the help of specialists. S/U or letter grading.

**272. Semitic Background of the New Testament.** Lecture, two hours. Prerequisites: Hebrew 102A-102B-102C, Semitics 130, Greek 1, and 2, or consent of instructor. Study of Semitic elements in the Greek New Testament: traditions transmitted in Aramaic, relations to the Old Testament and to post-Biblical literature, and Palestinian Judaism.

**596. Directed Individual Study (2 to 8 units).** May be repeated for credit.

**597. Examination Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

**599. Ph.D. Dissertation Research and Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

## Related Courses

### Art History

101A. Egyptian Art and Archaeology

### History

M104A-M104B. Ancient Egyptian Civilization

M105. History of Ancient Mesopotamia and Syria

193D. Religions of the Ancient Near East

## Arabic

### Lower Division Courses

**1A-1B-1C. Elementary Literary Arabic.** Lecture, six hours. Basic grammar and syntax.

### Upper Division Courses

**102A-102B-102C. Intermediate Literary Arabic.** Lecture, four hours; discussion, one hour. Prerequisites: courses 1A-1B-1C or consent of instructor. Grammar and syntax; readings of excerpts from literary texts; composition.

**103A-103B-103C. Advanced Arabic.** Prerequisites: courses 102A-102B-102C or consent of instructor. Review of grammar, composition, conversation, and readings from classical and modern literary texts.

**111A-111B-111C. Elementary Spoken Egyptian Arabic.** Lecture, three hours. Prerequisites: courses 1A-1B-1C or consent of instructor. Basic grammar and syntax of Egyptian colloquial Arabic.

**112A-112B-112C. Advanced Spoken Egyptian Arabic.** Lecture, three hours. Prerequisites: courses 111A-111B-111C or consent of instructor. Grammar and syntax; excerpts from literary texts using colloquial Arabic.

**113A-113B-113C. Elementary Spoken Levantine Arabic.** Lecture, three hours. Prerequisites: courses 1A-1B-1C or consent of instructor. General introduction to spoken Arabic of Syria, Lebanon, and Palestine. Grammar and syntax, with emphasis on language of everyday conversation.

**114A-114B-114C. Spoken Moroccan Arabic.** Lecture, three hours; laboratory, one hour. Introduction to spoken Arabic dialect of Morocco. Phonology, morphology, and syntax. Emphasis on developing oral skills.

**120. Islamic Texts.** Prerequisite: course 103C or consent of instructor. Readings from Qur'an, Tafsir, Hadith, Fiqh. May be repeated for credit.

**130. Classical Arabic Texts.** Prerequisite: course 103C or consent of instructor. Readings from medieval literary texts, with grammatical and syntactical analysis. May be repeated for credit.

**132. Philosophical and Kalam Texts.** Lecture, three hours. Prerequisite: course 120 or consent of instructor. Readings in medieval and Kalam texts. May be repeated for credit.

**141. Modern Arabic Literature.** Prerequisite: course 103C or consent of instructor. Conducted in Arabic. Readings in selected texts representing important trends in Arabic literature of the 19th and 20th centuries. May be repeated for credit.

**150. Introduction to Arabic Literature and Culture.** (Formerly numbered 150A-150B.) Lecture, three hours. Readings in English; knowledge of Arabic not required. Culture of Arabic-speaking peoples through their literature. Texts range from pre-Islamic poetry to contemporary novels, along with works in history and anthropology, to place these writings in their social context. P/NP or letter grading.

**151. Survey of Modern Arabic Literature in English.** Lecture, three hours. Readings of selected texts covering basic literary trends from middle of the last century to the present.

**180. Linguistic Analysis of Arabic.** Prerequisite: course 102C or consent of instructor. Linguistic description of Arabic in both its modern standard and dialect forms. Introduction to linguistic analysis of Arabic phonology, morphology, and syntax and to linguists' approaches to specific problems posed by Arabic grammar and dialectology.

**199. Special Studies in Arabic (2 to 8 units).** Prerequisite: consent of instructor.

## Graduate Courses

**220. Seminar: Islamic Texts.** Seminar, three hours. Prerequisite: consent of instructor. Doctrines and hermeneutics of various schools of thought in Islam, with selected readings from major works. May be repeated for a maximum of 24 units.

**230. Medieval Literary Texts.** Lecture, two hours. Prerequisite: consent of instructor. Readings in Arabic prose and poetry, survey of prosody. May be repeated for a maximum of 24 units.

**240. Seminar: Arab Historians and Geographers.** Seminar, three hours. Prerequisite: consent of instructor. Selected readings from works of major historians, geographers, and travelers. May be repeated for a maximum of 24 units.

**250. Seminar: Arabic Literature.** Seminar, two hours. Prerequisite: consent of instructor. Selected topics from Arabic literature. Readings of texts from manuscript. May be repeated for a maximum of 24 units.

**251. Seminar: Modern Arabic Literature.** Seminar, three hours. Prerequisite: course 141 or consent of instructor. Studies of specific problems and trends in Arabic prose and/or poetry in the 20th century. May be repeated for credit.

**596. Directed Individual Study (2 to 8 units).** May be repeated for credit.

**597. Examination Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

**599. Ph.D. Dissertation Research and Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

## Hebrew

### Lower Division Courses

**1A-1B-1C. Elementary Hebrew.** Lecture, three hours; laboratory, two hours. Structural principles of grammar. Students who have prior knowledge of reading and some vocabulary are advised to take courses 10A-10B-10C. Students with credit for course 10A cannot receive credit for 1A; those with credit for course 10B cannot receive credit for 1B and/or 1C.

**10A-10B-10C. Accelerated Elementary Hebrew.** Lecture, five hours. Open to students who wish to cover equivalent of two years of college Hebrew in one academic year. Designed for students who have previously studied rudiments of Hebrew. Students with credit for course 1A cannot receive credit for 10A; those with credit for course 1B and/or 1C cannot receive credit for 10B.

**20A-20B. Introduction to Biblical Hebrew.** Lecture, three hours. **20A.** Phonology, morphology, and structure of biblical Hebrew. **20B.** Enforced requisite: course 20A. Continuation of course 20A. Readings of biblical prose texts.

### Upper Division Courses

**102A-102B-102C. Intermediate Hebrew.** Lecture, five hours. Prerequisites: courses 1A-1B-1C or equivalent. Amplification of grammar; reading of texts from modern literature.

**103A-103B-103C. Advanced Hebrew.** Lecture, three hours. Prerequisites: courses 102A-102B-102C or equivalent. Introduction to modern Hebrew literary texts.

**120. Biblical Texts.** (Formerly numbered 120A-120B.) Lecture, three hours. Requisites: courses 102A-102B-102C. Translation and analysis of biblical texts, with attention to aspects of grammar, style, and interpretation.

**125. Hebrew Bible with Medieval Commentaries.** Lecture, three hours. Prerequisite: course 103C. Hebrew Bible with the commentaries of Rashi, Ibn Ezra, and/or Nahmanides. May be repeated for a maximum of 16 units.

**130. Rabbinic Texts.** Lecture, three hours. Prerequisites: courses 103A-103B-103C or consent of instructor. Readings in Mishnah, Talmud, and/or Midrash. May be repeated for credit.

**135. Medieval Hebrew Texts.** Lecture, three hours. Prerequisites: courses 103A-103B-103C or consent of instructor. Readings in medieval Hebrew prose and poetry. May be repeated for a maximum of 16 units.

**140. Modern Hebrew Poetry and Prose.** Lecture, three hours. Prerequisites: courses 103A-103B-103C, consent of instructor. Study of major Hebrew writers of past one hundred years: prose — Mendele, Ahad Ha'am, Agnon, Yizhar; poetry — Bialik, Tchernichovsky, Greenberg, Shlonsky, Alterman, Amihai. May be repeated for credit.

**160. Hebrew Essay.** Lecture, three hours. Prerequisites: courses 103A-103B-103C or consent of instructor. Hebrew essay from its rise in Europe in the late 18th century to contemporary Israeli essay. Study of literary, political, philosophical, and scholarly essay. May be repeated for credit.

**170. Dead Sea Scrolls and Biblical Studies.** Lecture, three hours; outside study, nine hours. Prerequisites: courses 102A-102B-102C, 120, or equivalent. Introduction to history of the Dead Sea Sect, their literature, and its impact on biblical studies, with focus on interpretation in the Qumran texts.

**190A-190B. Survey of Hebrew Grammar.** Lecture, three hours. Prerequisites: courses 102A-102B-102C or consent of instructor. Descriptive and comparative study of Hebrew grammar: phonology and morphology. Topics include development of Hebrew language from biblical times to the present day, its relation to Arabic and other Semitic languages, methods of language expansion in Israeli Hebrew, traditional pronunciation of Hebrew by various Jewish communities, Hebrew contribution to other Jewish languages (Yiddish, Ladino, Judeo-Arabic).

**199. Special Studies in Hebrew (2 to 8 units).** Prerequisite: consent of instructor.

### Graduate Courses

**210. History of the Hebrew Language.** Prerequisites: courses 103A-103B-103C or consent of instructor. Development of Hebrew language in its various stages: biblical, Mishnaic, medieval, modern, and Israeli; differences in vocabulary, morphology, syntax, and influence of other languages; problems of language expansion in Israeli Hebrew.

**220. Studies in Hebrew Biblical Literature.** Lecture, three hours. Critical study of Hebrew text in relation to major versions; philological, comparative, literary, and historical study of various biblical books. May be repeated for credit.

**230. Seminar: Medieval Hebrew Literature.** Seminar, three hours. May be repeated for credit.

**231. Texts in Judeo-Arabic.** Prerequisite: reading knowledge of Hebrew and Arabic. Reading of philosophical texts in Judeo-Arabic.

**241. Studies in Modern Hebrew Prose Fiction.** Studies in specific problems and trends in Hebrew prose fiction of the last two centuries. May be repeated for credit.

**242. Studies in Modern Hebrew Poetry.** Studies in specific problems and trends in Hebrew poetry of the last two centuries.

**596. Directed Individual Study (2 to 8 units).** May be repeated for credit.

**597. Examination Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

**599. Ph.D. Dissertation Research and Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

## Iranian

### Lower Division Courses

**1A-1B-1C. Elementary Persian.** Lecture, four hours; laboratory, two hours. Course 1A is enforced requisite to 1B, which is enforced requisite to 1C. Not open to students with prior knowledge of Persian.

**10A-10B-10C. Persian Conversation (2 units each).** Lecture, three hours. Systematic and structured Persian conversation.

**20A-20B-20C. Accelerated Elementary Persian (6 units each).** Lecture, four hours; discussion two hours; laboratory, 30 minutes per day. Preparation: some knowledge of spoken Persian. Course 20A is enforced requisite to 20B, which is enforced requisite to 20C. Intensive and thorough study of fundamental structure of Persian grammar; reading from a wide range of classical and modern poetry and prose compositions. P/NP or letter grading.

### Upper Division Courses

**102A-102B-102C. Intermediate Persian.** Lecture, three hours; laboratory, three hours. Requisite: course 1C or 20C. Course 102A is requisite to 102B, which is requisite to 102C.

**103A-103B-103C. Advanced Persian.** Lecture, three hours. Requisite: course 102C. Students who successfully complete courses 20A-20B-20C with grades of A may be permitted to enroll. Each course may be taken independently for credit. **103A.** Introduction to Classical Persian Poetry; **103B.** Introduction to Classical Persian Prose; **103C.** Introduction to Contemporary Persian Poetry and Prose.

**111A-111B-111C. Elementary Kurdish.** Lecture, three hours; laboratory, two hours. Prerequisite: consent of instructor. A proficiency-based course in basic grammar of literary Kurdish (Sorani). Graded readings, translation, composition (level one), conversation (levels one and two).

**120. Comparative Study of Six Major Persian Poets.** Lecture, two hours; discussion, one hour. Prerequisite: knowledge of Persian (lectures in Persian, readings in English and Persian). Comparative study of six major Persian poets from the 10th to 14th century who shaped the sense of Persian identity and delineated chief distinguishing characteristics of Persian thought and culture. P/NP or letter grading.

**140. Contemporary Persian Belles Lettres.** Lecture, three hours. Requisite: course 103A. Study of major Persian poets and prose writers of the 20th century: prose — Jamalzadeh, Hedayat, Chubuk, Al Ahmad, Sa'edi, Golestan; poetry — Nima, Shamlu, Farrokhsad, Akhavan. May be repeated for credit with consent of instructor.

**141. Contemporary Persian Analytical Prose.** Lecture, three hours. Prerequisites: courses 102A-102B-102C or equivalent, consent of instructor. Study of selected modern Persian analytical and expository prose texts, with emphasis on social sciences, literary criticism, and history.

**142. Persian Popular Ethics.** Prerequisites: courses 102A-102B-102C or consent of instructor. Study of major Persian works on popular ethics which have helped shape normative social, cultural, and political values in Iranian civilization. P/NP or letter grading.

**150A-150B. Survey of Persian Literature in English.** Lecture, three hours. Knowledge of Persian not required. Each course may be taken independently for credit.

**169. Civilization of Pre-Islamic Iran.** Survey of Iranian culture from the beginning through Sasanian period.

**170. Religion in Ancient Iran.** History of religion in Iran from the beginning to the Mohammedan conquest; Indo-Iranian background, Zoroastrianism, Manichaeism, Mazdakism.

**180A-180B. Iranian Civilization.** Lecture, three hours; discussion, one hour. Cultural and social history of the Iranian world, with emphasis on legacy of Persian language and literature. Letter (majors) or P/NP or letter (nonmajors) grading.

**190A-190B. Introduction to Modern Iranian Studies.** Lecture, three hours. Prerequisites: courses 1A-1B-1C or equivalent. Survey of Iranian languages. Comparative and historical grammar.

**199. Special Studies in Iranian (2 to 8 units).** Prerequisite: consent of instructor.

### Graduate Courses

**220A-220B. Classical Persian Texts.** Lecture, three hours. Prerequisites: courses 103A-103B-103C or consent of instructor. Study of selected classical Persian texts. Each course may be taken independently for credit.

**221. Rumi, Mystic Poet of Islam.** Seminar, three hours. Prerequisites: course 220A or 220B or equivalent, consent of instructor. Study of life and works of Rumi in context of interaction of Sufism and poetic creativity. May be repeated twice for credit.

**M222A-M222B. Vedic.** (Same as Indic M222A-M222B.) Lecture, three hours. Prerequisite: knowledge of Sanskrit equivalent to Indic 110C. Characteristics of Vedic dialect and readings in Rig-Vedic hymns. Only course M222B may be repeated for credit.

**230A-230B. Old Iranian.** Prerequisite: consent of instructor. Studies in grammars and texts of Old Persian and Avestan. Comparative considerations. Only course 230B may be repeated for credit.

**231A-231B. Middle Iranian.** Prerequisite: consent of instructor. Studies in grammars and texts of such Middle Iranian languages as best serve students' needs (e.g., Pahlavi, Sogdian, Sakan). Only course 231B may be repeated for credit.

**250. Seminar: Classical Persian Literature.** Seminar, three hours. Prerequisites: courses 103A-103B-103C and 199, or consent of instructor. May be repeated twice for credit.

**251. Seminar: Contemporary Persian Literature.** Seminar, three hours. Prerequisites: course 140 or equivalent, consent of instructor. Studies in specific problems and trends in Persian poetry and prose in the 20th century. May be repeated twice for credit.

**596. Directed Individual Study (2 to 8 units).** May be repeated for credit.

**597. Examination Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

**599. Ph.D. Dissertation Research and Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

Topics include emergence of rabbinic Judaism; its original literary forms; rabbinic worldview; forms of medieval rabbinic literature; modern Jewish religious movements and their attitude to rabbinic Judaism.

**151A-151B. Modern Jewish Literature in English.** Lecture, three hours. Each course may be taken independently for credit. **151A.** Diaspora Literature. Study of literary responses of Jews to modernity, its challenges and threats. Readings in texts originally written in English or translated from Hebrew, Yiddish, German, Russian, French, and Italian. Analysis of formal aspects of each work. **151B.** Israeli Literature. Study of translations from Hebrew literature written in Israel and reflecting cardinal facets of Israeli life: social issues, security problems, identity of the state, role of individual. Analysis of formal aspects of each work.

**155. Literature of the Cabala.** Lecture, three hours. Cabalistic literature in the broad sense (i.e., Jewish esoteric literature from the rabbinic to modern period). Topics include precabalistic esoteric texts, the early cabala, the Zohar, Lurianic cabala, nature of mysticism, the question of whether there was a Jewish mysticism.

**175. Modern Hebrew Novel as a Film.** Reading of literary works written by modern Hebrew writers which have been translated into English and then made into movies. Lectures, readings, and discussion of novels and movies and guest speakers from movie industry and UCLA.

**M187. The Holocaust in Literature.** (Same as Comparative Literature M165.) Lecture, three hours. Requirement: History 191E, 191F, or 191G. Investigation of how the Holocaust informs a variety of literary and cinema works and raises a wide range of aesthetic and moral questions. P/NP or letter grading.

**190. Undergraduate Seminar: Jewish Studies.** Examination of a single topic in depth with object of encouraging and guiding students' research in area of Jewish studies. Literary, cultural, and historical subjects included.

**M191A-M191B. Survey of Jewish History.** (Same as History M191A-M191B.) Survey of social, political, and religious developments. **M191A.** From Biblical Times to End of the Middle Ages; **M191B.** From End of the Middle Ages to the Present.

**M191C-M191D. Focal Themes in Jewish History.** (Same as History M191C-M191D.) Treatment in depth of one major theme in Jewish history (such as history of Messianic Movements, structure of the Jewish communities) through the ages.

**M192A-M192B. Jewish Intellectual History.** (Same as History M192A-M192B.) **M192A.** Medieval Period. Examination of three intellectual worldviews that competed for hegemony in the medieval Jewish world — rabbinic Judaism, medieval rationalism as embodied in philosophy, and cabala; **M192B.** Modern Period. Exploration of some of most important currents and figures in Jewish intellectual history from the 18th century to the present.

**197A-197Z. Variable Topics in Jewish Studies.** Lecture or seminar, three hours. Variable topics; consult *Schedule of Classes* for topics to be offered in a specific term. P/NP or letter grading. **197A.** 20th-Century Jewish Thought. May not be repeated for credit. **197B.** Jewish Feminist Theology.

**199. Special Studies in Jewish Studies (2 to 8 units).** Limited to Jewish studies majors.

## Near Eastern Languages

### Lower Division Courses

**50A-50B-50C. Introduction to Near Eastern Languages and Cultures.** Lecture, three hours. Three-term sequence designed both as an introduction for undergraduates and as a requisite to various majors within department. Art and archaeology, languages and literatures, cultural history. Each course may be taken independently for credit. **50A.** Ancient Near East; **50B.** Medieval Near East; **50C.** Modern Near East.

### Graduate Courses

**200. Bibliography and Method of Near Eastern Languages and Literatures.** Lecture, two hours. Prerequisite: consent of instructor. Required for M.A. degree. Introduction to bibliographical resources and training in methods of research in various areas of specialization offered by department. May be repeated for credit.

**210. Survey of Afro-Asiatic Languages.** Lecture, three hours. Prerequisite: consent of instructor. Survey of structures of a number of representative languages from various major branches of Hamito-Semitic (Afro-Asiatic) language family.

**M241. Folklore and Mythology of the Near East.** (Same as Folklore M241.) Prerequisite: Folklore 101 or equivalent.

**290. Seminar: Paleography.** Seminar, three hours. Provides students with ability to cope with varieties of manuscripts.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study (2 to 8 units).** May be repeated for credit.

**597. Examination Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

**599. Ph.D. Dissertation Research and Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

## Semitics

### Upper Division Courses

**110. Neo-Aramaic.** Lecture, three hours. Grammar and reading of selected texts (folktales, homilies, songs) in modern Aramaic dialects of the Jews and Christians of Kurdistan.

**115. Syriac.** Lecture, two hours. Morphology and syntax of Syriac language, introductory reading.

**130. Biblical Aramaic.** Lecture, three hours. Prerequisites: Hebrew 102A-102B-102C or consent of instructor. Grammar of biblical Aramaic and reading of texts.

**140A-140B. Elementary Akkadian.** Lecture, three hours. Elementary grammar and reading of texts in standard Babylonian.

**141. Advanced Akkadian.** Lecture, three hours. Prerequisite: consent of instructor. Old Babylonian syntax; reading of basic Old Babylonian texts.

**142. Akkadian Literary Texts.** Lecture, three hours. Prerequisite: consent of instructor. Selected readings from Akkadian myths and epics, with introduction to historical tradition of the works and their literary structure.

**199. Special Studies in Semitics (2 to 8 units).** Prerequisite: consent of instructor.

### Graduate Courses

**210. Ancient Aramaic.** Lecture, two hours. Prerequisite: course 130 or consent of instructor. Reading of surviving inscriptions and papyri. May be repeated for credit.

**215B. Syriac.** Lecture, two hours. Morphology and syntax of Syriac language; readings in Syriac translation of the Bible and Syriac literature. May be repeated for credit.

**220A-220B. Ugaritic.** Lecture, two hours. Prerequisites: Hebrew 102A-102B-102C or consent of instructor. Study of Ugaritic language and literature. Only course 220B may be repeated for credit.

**225. Phoenician.** Lecture, two hours. Prerequisites: Hebrew 102A-102B-102C or consent of instructor. Study of Phoenician language and inscriptions. May be repeated for credit.

**230. Seminar: Northwest Semitic Languages and Literatures.** Seminar, two hours. Prerequisite: consent of instructor. May be repeated for credit.

**240. Seminar: Akkadian Language.** Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various dialects of Akkadian; selected problems in linguistic analysis of Akkadian dialects. May be repeated for credit.

**240X. Seminar: Akkadian Language (1 unit).** Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various dialects of Akkadian; selected problems in linguistic analysis of Akkadian dialects. Course for students who participate regularly in class meetings but without the homework required in course 240. May be repeated for credit. S/U grading.

**241. Seminar: Akkadian Literature.** Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. May be repeated for credit.

**241X. Seminar: Akkadian Literature (1 unit).** Seminar, two hours. Prerequisite: consent of instructor. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. Course for students who participate regularly in class meetings but without the homework required in course 241. May be repeated for credit. S/U grading.

**280A-280B-280C. Seminars: Comparative Semitics.** Seminar, two hours.

**596. Directed Individual Study (2 to 8 units).** May be repeated for credit.

**597. Examination Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

**599. Ph.D. Dissertation Research and Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

## Turkic Languages

### Upper Division Courses

**101A-101B-101C. Elementary Turkish.** Lecture, five hours. Grammar, reading, conversation, and elementary composition drills.

**102A-102B-102C. Advanced Turkish.** Lecture, five hours. Prerequisites: courses 101A-101B-101C or equivalent. Continuing study of grammar, conversation, and composition. Readings in modern literature and social science texts.

**111A-111B-111C. Elementary Uzbek.** Lecture, three hours; laboratory, two hours. Prerequisite: consent of instructor. Elementary grammar, reading, and composition exercises; elementary conversation.

**112A-112B-112C. Advanced Uzbek.** Lecture, three hours; laboratory, two hours. Prerequisite: consent of instructor. Descriptive Uzbek grammar, reading, and analysis of Uzbek literary and folkloric texts. High-style composition and conversation.

**114A-114B-114C. Bashkir.** Lecture, three hours. Prerequisite: course 102A or consent of instructor. Grammar, reading of literary and folkloric texts.

**115A-115B-115C. Elementary Azeri.** Prerequisite: consent of instructor. Knowledge of Russian, Turkish, and Iranian helpful. Grammatical competence at elementary level; knowledge of basic facts of Azeri grammar; reading competence with help of dictionary; ability to write simple compositions; basic conversational skill.

**116A-116B-116C. Advanced Azeri.** Prerequisite: placement test. Proficiency-based course in descriptive Azeri grammar. Reading and analysis of Azeri literary and folkloric texts in new writing system. High-style composition and conversation.

**120A-120B-120C. Descriptive Grammar of Modern Literary Uzbek.** Lecture, three hours; discussion, one hour; laboratory, one hour. Requisites: courses 102A-102B-102C or 111A-111B-111C or 180. Systematic and comprehensive grammatical survey of modern literary Uzbek, official language of the newly independent Republic of Uzbekistan. Phonemics, morphology, syntax, paremiology, and lexicology analyzed on today's native material.

**160. Turkish Tradition.** Lecture/discussion. Preparation: entrance examination. Survey of cultural history of the Turks, as seen primarily through their literature, from their early history to the present.

**165. Islamic Literary Heritage of Central Asia.** Lecture, two hours; discussion, one hour. Systematic survey of Islamic documents produced in Turkish and Persian in Central Asia, with reading of primary sources in English translation. Study of special characteristics of Central Asian Islam.

**170. Turco-Mongolian Nomadic Empires.** Lecture, three hours. Prerequisite: consent of instructor. Required of students in Turkic program. Survey of history of Turkic and Mongolian dominions from the 3rd century B.C. to A.D. 19th century (Hsiung-nu, Hsien-pi, Juan-Juan, T'u-Chueh, Uyghur, Khitan, Karakhanid, Seljuq, Kara-Khitay, Khorazmian, Jengiz-Khanite).

**180. Modern Turkic Languages and Peoples.** Lecture, three hours. Prerequisite: consent of instructor. Required of students in Turkic program and recommended for students in Soviet studies. Ethnic and linguistic survey of the Turkic peoples.

**199. Special Studies in Turkic Languages (2 to 8 units).** Prerequisite: consent of instructor.

## Graduate Courses

**210A-210B-210C. Introduction to Ottoman.** Lecture, three hours. Prerequisite: consent of instructor. Introduction to literary language of Ottoman Empire from its foundation in the 14th century to its overthrow in the 20th century. For students of history, literature, and religion of the Balkans, Near East, and Central Asia. Topics include Arabic script as applied to Ottoman; Arabic and Persian elements in grammar and vocabulary. Readings of historical and literary texts.

**211. Ottoman Diplomats.** Lecture, three hours. Prerequisites: courses 210A-210B-210C or equivalent. Organization and contents of Ottoman archives; reading and discussion of documents and registers. Introduction to use of Ottoman archive materials as a source for historical research.

**220A-220B-220C. Classical Uzbek (Chagatay).** Lecture, three hours. Prerequisites: courses 101A-101B-101C or 111A-111B-111C or Iranian 102A-102B-102C or Arabic 102A-102B-102C or Hebrew 102A-102B-102C or consent of instructor. Language of classical Central Asian Turkic literature. Descriptive and historical grammar, text analysis, translation, and composition drills.

**225A-225B-225C. Old Turkic: Turk and Uygur.** Lecture, three hours. Prerequisites: course 180, consent of instructor. Textual and linguistic analysis of Turk and Old Uygur documents: inscriptions, Manichean and Buddhist literary works.

**230A-230B-230C. Historical and Comparative Survey of Turkic Languages.** Lecture, three hours. Prerequisite: course 180. Extinct and living Turkic languages. History of Turkic: developments in phonemic, grammatical, and lexical systems from the 8th to 20th century. Structural analysis of Turkic languages on comparative basis.

**235A-235B. Middle Turkic: Karakhanid, Khorazmian, Mamluk-Kipchak, and Old Anatolian.** Lecture, three hours. Prerequisites: course 180, consent of instructor. Survey of Middle Turkic documents. Textual and linguistic analysis of Middle Turkic texts from various literary genres.

**240A-240B-240C. Advanced Ottoman.** Lecture, three hours. Prerequisites: courses 210A-210B-210C or equivalent or consent of instructor. Emphasis on different genres of Ottoman writing (belles lettres as well as various types of state documents) in elaborate high style of classical Ottoman period (15th to 19th century). Selections are read in manuscript to prepare students to read works in form in which they are likely to encounter them in their research.

**250A-250B-250C. Islamic Texts in Chagatay.** Lecture, three hours. Prerequisites: courses 220A-220B-220C or consent of instructor. Philological and linguistic survey of basic Islamic source material written in Chagatay literary language. Reading and discussion of Chagatay texts on Islamic topics.

**280A-280B. Seminars: Modern Turkish Literature.** Seminar, two hours. Prerequisites: course 102B or equivalent, consent of instructor. Specific issues and trends in development of Turkish literature from middle of 19th century to the present.

**290A-290B. Seminars: Classical Turkic Literature — Ottoman, Chagatay, and Azeri.** Seminar, two hours. Prerequisites: courses 210A-210B-210C and/or 220A-220B-220C, consent of instructor. Survey of Islamic literatures of the Turks in classical period. Readings of Ottoman, Chagatay, and Azeri texts from various literary genres. Discussion of stylistic, prosodic, and linguistic characteristics.

**596. Directed Individual Study (2 to 8 units).** May be repeated for credit.

**597. Examination Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

**599. Ph.D. Dissertation Research and Preparation (2 to 8 units).** Prerequisite: consent of department or instructor. S/U grading.

## Scope and Objectives

The graduate major in this discipline is called Islamic studies. For details, see the program by that name earlier in this section.

The undergraduate major is designed primarily for (1) students seeking a general education and desiring a special emphasis in this geographic area from the ancient to the modern period, (2) those who plan to live and work in the Near East whose careers can be aided by a knowledge of its peoples, languages, and institutions, and (3) students preparing for academic study in the various disciplines pertaining to the Near East.

## Undergraduate Study

### Bachelor of Arts Degree

#### Preparation for the Major

*Required:* The first-year course in Arabic, Armenian, Hebrew, Persian, or Turkish. Students must also obtain reading proficiency in French, German, Italian, Russian, or Spanish as demonstrated by completing six quarter courses or the equivalent in the language of their choice. Students may substitute for the European language requirement Program in Computing 1 and one course from Economics 40, Political Science 6, Psychology 41, Sociology 18, or Statistics 50, plus one course from Geography 171, Political Science 102, Psychology 142, or Sociology 112. Also required are History 9D and four courses from History 1A, 1B, 1C, Anthropology 8, 9, Art History 104A, Economics 1, 2, Geography 3, Political Science 20, 50, Sociology 1.

#### The Major

*Required:* Sixteen courses as follows: (1) completion of the advanced level or equivalent in the same language taken in lower division; (2) History 106A-106B-106C and three additional courses in the history of the Near East, two of which are related to the major language; (3) four courses (two of which must be in the same discipline) from Ancient Near East M104A, M104B, Anthropology 110, Art History M102A, M102B, 104B, C104C, 105E, Economics 110, 111, 112, 190, Ethnomusicology 20B, 130, Geography 187, 188, Political Science 132A, 132B, 157, Sociology 187. This program may be modified in exceptional cases with consent of the adviser.

For further information, contact Irene A. Bierman at the program address.

## NEUROBIOLOGY

### School of Medicine

UCLA

Jack L. Feldman, Ph.D., *Chair*  
Nicholas C. Brecha, Ph.D., *Vice Chair*

#### Professors

George W. Bernard, D.D.S., Ph.D.  
Dean Bok, Ph.D. (*Dolly Green Professor of Ophthalmology*)  
Nicholas C. Brecha, Ph.D., *in Residence*  
Nathaniel A. Buchwald, Ph.D., *in Residence*  
Carmine D. Clemente, Ph.D.  
Edwin L. Cooper, Ph.D.  
Jean S. de Vellis, Ph.D., *in Residence*  
Ellen R. Dirksen, Ph.D.  
Jerome Engel, M.D., Ph.D.  
Jack L. Feldman, Ph.D.  
Robin S. Fisher, Ph.D., *in Residence*  
Roger A. Gorski, Ph.D.

Ronald M. Harper, Ph.D.  
Lawrence Kruger, Ph.D.  
John K. Lu, Ph.D.  
Paul E Micevych, Ph.D.  
Arnold B. Scheibel, M.D.  
John D. Schlag, M.D.  
M.B. Sterman, Ph.D., *in Residence*  
Anna N. Taylor, Ph.D., *in Residence*  
Jaime R. Villablanca, M.D., *in Residence*  
Charles D. Woody, M.D., *in Residence*  
Guido A. Zampighi, D.D.S., Ph.D.

#### Professors Emeriti

Emilio E. Decima, M.D.  
Earl Eldred, M.D.  
Daniel C. Pease, Ph.D.  
Charles H. Sawyer, Ph.D.  
José P. Segundo, M.D.  
Bernard Towers, M.D.  
Richard W. Young, Ph.D.  
Emery G. Zimmermann, M.D., Ph.D.

#### Associate Professors

Anthony M. Adinolfi, Ph.D.  
John H. Campbell, Ph.D.  
Carolyn R. Houser, Ph.D., *in Residence*

#### Assistant Professors

Ellen Carpenter, Ph.D., *in Residence*  
Susana Cohen-Cory, Ph.D., *in Residence*  
Sheila Nirenberg, Ph.D.  
Erik S. Schweitzer, M.D., Ph.D.  
Xianjie Yang, Ph.D., *in Residence*

#### Adjunct Professors

Margaret N. Shouse, Ph.D.  
Catia Sternini, Ph.D.

#### Adjunct and Clinical Associate Professors

Earle E. Crandall, M.D., Ph.D., F.A.C.S., *Clinical*  
M. Cristina Kenney, M.D., Ph.D., *Adjunct*  
Carlos A.E. Lemmi, Ph.D., *Adjunct*  
Anselmo R. Pineda, M.D., *Clinical*

#### Adjunct Assistant Professor

Robert B. Trelease, Ph.D.

### Scope and Objectives

The Department of Neurobiology offers advanced training leading to the Ph.D. degree. The great majority of students graduating with a doctoral degree in anatomy and cell biology can look forward to an academic career in medical and dental schools or research institutes and, in accord with this, the department strives to produce graduates soundly qualified both for teaching at this level and for the conduct of productive research in neurobiology and cell biology. Program information is available through the departmental website.

### Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

### Master's Degree

#### Admission

The Department of Neurobiology offers the Ph.D. degree in Anatomy and Cell Biology, and students may obtain the Master of Science de-

gree; however, the department normally does not admit candidates for the M.S. degree only.

### Areas of Study

The major fields in which graduate research may be undertaken include (1) microscopic anatomy and cell biology, (2) molecular biology, and (3) neuroscience.

### Course Requirements

A minimum of 36 units of coursework is required, 20 of which must be in graduate-level courses. Eight units of Neurobiology 597 or 598 may be applied toward the total requirement, but only four units may be applied toward the minimum graduate course requirement. All M.S. candidates must take two courses selected from Neurobiology 104, M202, M203A, M203B, M209A, and M209B; one departmental seminar; other courses essential to the student's program; courses in the minor field (for those under the comprehensive plan). If Neurobiology 104 is selected, Neurobiology 254 must be taken concurrently, making a nine-unit requirement.

### Comprehensive Examination Plan

Under the written comprehensive examination plan, students must demonstrate a grasp of the general principles of the required coursework, as well as an understanding of some related field relevant to their objectives.

### Thesis Plan

For the thesis plan, a committee of an adviser and two departmental members approves the thesis proposal after all coursework is completed. All members participate in criticism and approval of the eventual thesis, but there is no oral defense.

### Doctoral Degree

#### Admission

Applicants must have a bachelor's degree in a physical or biological science or in a premedical curriculum. Introductory courses in zoology, general and organic chemistry, biochemistry, and college physics are required. Courses in comparative anatomy, embryology, cell biology, genetics, molecular biology, and statistics are highly recommended.

Doctoral applicant admission is through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 172 MBI, UCLA, Los Angeles, CA 90024-1570, (310) 206-6051.

### Major Fields or Subdisciplines

The major fields in which graduate research may be undertaken include (1) microscopic anatomy and cell biology, (2) molecular biology, and (3) neuroscience.

### Course Requirements

(1) Students are required to take for credit the following courses or course combinations: Neurobiology M202, M209A (or Biological Chemistry CM267 or Microbiology and Immunology

M229), 209B, Biological Chemistry CM253, and an elective that is sanctioned by UCLA ACCESS.

(2) Participation in at least three seminar courses, one of which should be in the Department of Neurobiology.

(3) Completion of such elective courses as are essential for research interest.

(4) Rotation through three research laboratories in the first year, one term each, with course 596 credit (four units).

Since the Department of Neurobiology graduate degree program is a full participant in UCLA ACCESS, the student is referred to that program for further course requirements.

## Written and Oral Qualifying Examinations

The written qualifying examination is intended to evaluate students' knowledge of the research field and ability to formulate a practicable and significant research program.

The student submits by the end of the Spring Quarter of the second year a research proposal in the format of an individual National Institutes of Health (NIH) grant application. The research proposal reflects, as closely as possible in each individual's case, the plan for the dissertation research. A student whose research goals are well focused and formulated may also assemble a doctoral committee at this time, and that committee reviews and grades the proposal. If the student has not settled on a research focus at this point, the written research proposal encompasses as closely as possible a topic within the student's area of research interest. In this instance, an appropriate faculty committee is assembled to review and grade the proposal on a pass/fail basis. In either case, a research proposal that meets with approval of the appropriate committee constitutes the written qualifying examination.

Bona fide written dissertation proposals which satisfy the requirements for the written qualifying examination can be followed closely by the University Oral Qualifying Examination, which consists of an oral defense of the proposal accompanied by a 30- to 60-minute presentation with appropriately prepared visual aids. Research proposals that are less focused on the dissertation research, but which satisfy the requirements of the written qualifying examination, can be followed by a University Oral Qualifying Examination after plans for the dissertation research are formulated. The University Oral Qualifying Examination is heard and graded on a pass/fail basis by the student's doctoral committee. The examination is scheduled by the student and major professor at a time that allows all of the members of the committee to attend. There is no specified time allotment for the examination. However, it is anticipated that one-half day should be adequate in the majority of cases. In the event that the committee reaches the conclusion that a failing grade is necessary, either because the re-

search plan is faulty or the student is inadequately prepared to defend the plan, one additional opportunity is given to modify the proposal and pass the examination. The first University Oral Qualifying Examination should be taken no later than two and one-half years into the program and any reexamination no later than three years.

The Department of Neurobiology may decline to admit any student to the qualifying examination if, in its judgment, the student is inadequately prepared, is not sufficiently interested in those fields of research in which the department can offer sufficient guidance, or is for other reasons not adaptable to the program.

## Neurobiology

### Lower Division Course

**88. Lower Division Seminar: Special Topics in Neurobiology.** Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in neurobiology approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

### Upper Division Courses

**104. Histology and Cell Biology (6 units).** (Formerly numbered Anatomy 104.) Lecture, four hours; laboratory, six hours. Prerequisite: dental student standing or consent of course chair. Required of freshman dental students. Lectures, demonstrations, and laboratories dealing with structural organization of cells, tissues, and organs at microscopic level. Nervous system included.

**106. Functional Neuroanatomy.** (Formerly numbered Anatomy 106.) Lecture/laboratory, three two-hour sessions. Prerequisite: dental student standing or consent of instructor. Lectures, demonstrations, and laboratories dealing with structure and functional organization of nervous system.

**199. Individual Special Studies (2 to 8 units).** (Formerly numbered Anatomy 199.) Prerequisite: consent of instructor. Studies in anatomy and related subject areas appropriate for training of particular students, which may include reading assignments or laboratory work leading to a final oral or written report. S/U or letter grading.

### Graduate Courses

**201. Microscopic Anatomy and Cell Biology (7 units).** (Formerly numbered Anatomy 201.) Lecture/laboratory, two to three three-hour sessions (16-week semester). Prerequisite: medical student standing or consent of instructor. Microscopic study of structure and function of tissues and cells, with special reference to the human body.

**M202. Neuroanatomy: Structure and Function of Nervous System.** (Formerly numbered Anatomy M202.) (Same as Neuroscience M201.) Lecture, three hours; laboratory, three hours. Requisite: Biology 166 or Molecular, Cell, and Developmental Biology 171. Anatomy of central and peripheral nervous system at the cellular histological and regional systems level. Emphasis on contemporary experimental approaches to morphological study of nervous system in discussions of circuitry and neurochemical anatomy of major brain regions. Consideration of representative vertebrate and invertebrate nervous systems.

**M203A-M203B. Basic Neurology.** (Formerly numbered Anatomy M203A-M203B.) (Same as Physiology M203A-M203B.) Prerequisites: medical student standing or enrollment in qualified graduate program, consent of instructor. Runs throughout School of Medicine's second semester. Lectures, conferences, demonstrations, and laboratory procedures necessary to understand functions of nervous system. To receive credit, both courses must be taken together in same academic year. In Progress grading.

**M204. Cellular and Molecular Developmental Neurobiology.** (Formerly numbered Anatomy M204.) (Same as Neuroscience M204, Physiology M204, and Psychiatry M204.) Lecture, three hours; discussion, one hour. Prerequisites: Neuroscience M201, M202, and M203, or Biological Chemistry 201A-201B, or consent of instructor. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging.

**M209A. Molecular Cell Biology (6 units).** (Formerly numbered Anatomy M209A.) (Same as Molecular, Cell, and Developmental Biology CM220 and Physiology M209A.) Not open for credit to students with credit for Molecular, Cell, and Developmental Biology 100 or M140. Introduction to cell biology for graduate students in basic medical sciences and selected undergraduates. Topics include membrane structure, assembly, and function; biogenesis of organelles, intercellular and intracellular signaling, immunity and gene structure, function and replication.

**M209B. Cell and Tissue Neurobiology.** (Formerly numbered 209B.) (Same as Neuroscience M244.) Lecture, three hours; laboratory, three hours. Designed for graduate students. Introductory course for students planning to conduct cell biology or neurobiology research, with focus on cell biology and tissue organization of central and peripheral nervous system. Emphasis on normal structure of neurons, glia, and meninges.

**211. Cellular Basis of Learned Behavior (2 units).** (Formerly numbered Anatomy 211.) Lecture/discussion, one two-hour session; laboratory, to be arranged. Prerequisites: microscopic anatomy, mammalian physiology. Anatomy and physiology of cerebral processes in alerting, learning, focusing attention, and memory.

**M221. Cellular and Molecular Neurochemistry.** (Formerly numbered Anatomy M221.) (Same as Biological Chemistry M221, Neuroscience M240, Pharmacology M221, and Psychiatry M221.) Lecture, three hours; discussion, one hour. Prerequisite: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling. S/U or letter grading.

**M227. Cellular, Molecular, and Functional Aspects of Reproductive System.** (Formerly numbered 227.) (Same as Physiological Science M227.) Lecture, three hours; discussion, one hour. Didactic presentations and discussion of developmental, anatomical/histological, physiological, cellular, and molecular aspects of reproductive system and functional integration of neuroendocrine-reproductive axis.

**M229. Oral Embryology and Histology.** (Formerly numbered Anatomy M229.) (Same as Oral Biology M203.) Lectures and laboratory instruction in development and histological structure of facial region and oral and peri-oral organs and tissues.

**M234. Seminar: Developmental Neuroendocrine-immunology (2 units).** (Formerly numbered Anatomy 234.) (Same as Oral Biology M234.) Prerequisite: graduate standing or consent of instructor. Psychological and physiological processes intertwine, and one important aspect of psychoneuroimmunological research is characterization of mechanisms that underlie these interactions. Examination of current literature on neuroimmune interaction from a developmental perspective. S/U or letter grading.

**M235. Neuroactive Peptides: Molecular Biology to Function (2 units).** (Formerly numbered Anatomy M235.) (Same as Medicine M235 and Neuroscience M246.) Prerequisite: consent of instructor. Presentation of current knowledge of gut and brain peptides by surveying their chemistry, anatomy, and physiology. Experimental approaches used to study biologically active peptides. Review of current information about each of the major gut and brain peptides. S/U or letter grading.

**251. Problems in Developmental and Comparative Immunology (2 units).** (Formerly numbered Anatomy 251.) Prerequisite: consent of instructor. Review of current literature emphasizing early development and evolution of immune competence.

**252. Evolution as a Complex Process (2 units).** Designed for graduate students. Study and examination of biological evolution as a fundamental complex process. S/U or letter grading.

**254. Structure and Function of Cells and Tissues (2 units).** (Formerly numbered Anatomy 254.) Lecture, one hour; discussion, one hour. Prerequisites or corequisites: course 104, consent of instructor. Current topics on structural and functional aspects of microscopic anatomy; term paper required. May be repeated for credit. S/U grading.

**M255. Seminar: Neural and Behavioral Endocrinology (2 units).** (Formerly numbered Anatomy M255A-M255D.) (Same as Physiological Science M255 and Psychology M294.) Seminar, one hour; discussion, one hour. Topics include hormonal biochemistry and pharmacology. Hypothalamic/hypophysal interactions, both hormonal and neural. Structure and function of the hypothalamus. Hormonal control of reproductive and other behaviors. Sexual differentiation of brain and behavior. Stress: hormonal, behavioral, and neural aspects. Aging of reproductive behaviors and function.

**258. Seminar: Neuroscience (2 units).** (Formerly numbered Anatomy 258.) Prerequisite: basic neurology. Topics of current interest or ongoing research projects; examination of both content and method of presentation. May be repeated for credit.

**259. Current Topics in Neurobiology (2 units).** Review and discussion of current research literature in varying areas of neurobiology. S/U grading.

**M261. Neuronal Circuit Analysis (2 units).** (Formerly numbered Anatomy M261.) (Same as Neuroscience M261.) Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Seminar with strong emphasis on specific reading assignments. Integrated view of neuronal circuit analysis at advanced level; layout and performance of a variety of networks serving cognitive or motor functions.

**265. Evolution of Cancer (2 units).** (Formerly numbered Anatomy 265.) Prerequisite: consent of instructor. Review of current literature emphasizing appearance of tumors and neoplasms in representative invertebrates, fishes, amphibians, and reptiles. Theories of cancer development from the evolutionary viewpoint.

**M270A-M270B-M270C. Cell, Molecular, and Integrative Biology Seminars (2 units each).** (Formerly numbered Anatomy M270A-M270B-M270C.) (Same as Physiology M270A-M270B-M270C.) Seminar, one hour; discussion, one hour. Prerequisite: graduate standing or consent of instructor(s). Presentation of weekly seminars and discussion on current topics in cell and molecular biology by faculty members from Neurobiology, Physiology, and other UCLA departments, in addition to invited lecturers. S/U grading.

**290. Tutorials in Anatomy (2 units).** (Formerly numbered Anatomy 290.) Tutorial, one hour. Prerequisite: consent of instructor. Individual study with a faculty member leading to submission of a scientific document (usually a review article) on a topic of mutual interest to instructor and student. S/U grading.

**390A-390B. Peer Review System (2 units each).** (Formerly numbered Anatomy 390A-390B.) Prerequisite: advancement to candidacy in integrative or systems biology or consent of instructor. Introduction to peer review system for evaluation of research proposals. After consideration of grant review process, each student prepares abbreviated grant application which is evaluated in a mock peer review session moderated by the faculty. In Progress and S/U grading.

**495A-495F. Preparation for Teaching in Anatomical Sciences (2 to 4 units each).** (Formerly numbered Anatomy 495A-495F.) Prerequisites: graduate standing, consent of vice chair and instructor. Observation and practice of methods of teaching in anatomy, including preparation of material, participation in laboratory instruction, and presentation of review sessions, all with peer and faculty criticism. Gross anatomy, microscopic anatomy, and neuroanatomy subject fields included. Maximum of three 495 courses may be taken; none may be repeated. May not be applied toward degree requirements. S/U grading.

**501. Cooperative Program (2 to 8 units).** (Formerly numbered Anatomy 501.) Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study or Research (2 to 12 units).** (Formerly numbered Anatomy 596.)

**597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 12 units).** (Formerly numbered Anatomy 597.)

**598. Thesis Research for M.S. Candidates (2 to 12 units).** (Formerly numbered Anatomy 598.)

**599. Dissertation Research for Ph.D. Candidates (2 to 12 units).** (Formerly numbered Anatomy 599.)

## Medical History Division

### Professor

Ynez V. O'Neill, Ph.D., *in Residence*

### Associate Professor

Robert G. Frank, Jr., Ph.D., *Division Chief*

## Upper Division Courses

**107A-107B. Historical Development of Medical Sciences.** (Formerly numbered Anatomy/Medical History 107A-107B.) Lecture, three hours. Major contributions of medicine and medical personalities from earliest times. **107A.** Contributions of medicine and medical personalities from earliest times through 1650. **107B.** Subject in the period from 1650 through the 19th century. Illustrated lectures, class discussion, and required readings from selected texts.

**M108A-M108B. History of Biological Sciences.** (Formerly numbered Anatomy/Medical History M108A-M108B.) (Same as History M195F-M195G.) Lecture, three hours. **M108A.** Biological Sciences from Ancient Times to the Early 19th Century; **M108B.** Biological Sciences from the Early 19th Century to the Mid-20th Century.

**120. Health Care in Los Angeles: Introduction to Cultural Medical Traditions.** (Formerly numbered Anatomy/Medical History 120.) Lecture, one hour; discussion, three hours. Exploration of health beliefs, traditions, and practices of major ethnic groups in Los Angeles area. Scholarly perspective on uses of alternative medicine to prepare students interested in health care to assist patients in clinical settings. P/NP or letter grading.

**135. Popular Beliefs and Medicine.** (Formerly numbered Anatomy/Medical History 135.) Lecture, three hours. Investigation of some basic health beliefs and traditions that can potentially conflict with biomedicine and exploration of educational resources necessary to prepare health care students for the clinical situation. P/NP or letter grading.

## Graduate Courses

**240A-240B. History of Medical Sciences (2 units each).** (Formerly numbered Anatomy/Medical History 240A-240B.) Lecture, one hour. Survey of development of scientific and medical thought from ancient times to the present.

**246. Survey of History of Neuroscience: Its Impact on Psychology and Medicine (2 to 4 units).** (Formerly numbered Anatomy/Medical History 246.) Lecture, one hour; discussion, two hours. Development of experimental neuroscience from ancient concepts of nervous system through medieval, Renaissance, and Enlightenment eras to mid-20th century. Emphasis on landmarks in history of human brain and behavior demonstrating multidisciplinary approaches to contemporary social contexts.

**250. History of Medical Psychology (2 units).** (Formerly numbered Anatomy/Medical History 250.) Lecture, one hour. Examination of themes underlying modern mental health theories. Beginning with review of contemporary thinking, lectures focus on various factors shaping present concepts of mental disorders and provide a framework for understanding current issues.

**596. Directed Individual Studies in Medical History (2 to 12 units).** (Formerly numbered Anatomy/Medical History 596.) Investigation of subjects in medical history selected by students with advice and direction of instructor. Individual reports and conferences.

## NEUROLOGY

*School of Medicine*

### UCLA

C-128 Reed Neurological Research Center  
Box 951769  
Los Angeles, CA 90095-1769

(310) 206-6584

<http://neurology.medsch.ucla.edu/>

### Chairs

Robert C. Collins, M.D. (*Frances Stark Professor of Neurology*), *Chair*  
Mark A. Goldberg, M.D., Ph.D., *Vice Chair, Harbor-UCLA*  
John Keesey, M.D., *Vice Chair*  
Claude G. Wasterlain, M.D., *Vice Chair, Sepulveda VA*

## Scope and Objectives

Neurology is the medical science dealing with the normal and diseased nervous system. Neurological disorders are often associated with significant disability, morbidity, and mortality. Their higher incidence in association with greater longevity of the population, increased awareness, improved diagnostic methods, and other factors place neurological disorders among the major medical problems today. The Department of Neurology and the Reed Neurological Research Center provide means for a coordinated basic science and clinical research approach to neurological disorders, patient care, and neurological education.

The department instructs medical students throughout the four years. Emphasis in the first year is on basic aspects of neuroanatomy, chemistry, and physiology; in the second year, neurological history taking and neurological examination of afflicted patients are stressed. The third year consists of a clerkship, and the fourth year provides electives in neurology, including an advanced clinical clerkship.

For further details on the Department of Neurology and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## Neurology

### Upper Division Course

**199. Special Studies (2 to 8 units).** Discussion, one to two hours; laboratory, four to six hours. Prerequisite: consent of instructor. Individual projects carried out under direction of a faculty member. Special studies in neurology, with appropriate objectives, readings, laboratory work, or other assignments designed for proper training of students.

### Adjunct and Visiting Associate Professors

James R. Boulter, Ph.D., *Visiting (Psychiatry and Biobehavioral Sciences)*  
Charles L. Wilson, Ph.D., *Adjunct (Neurology)*

## Scope and Objectives

Neuroscience seeks to understand the brain in health and in disease. Topics of fundamental interest include perception, cognition, learning, memory, motor control, and regulation of body function. The undergraduate interdepartmental program seeks to explore the principles and concepts of this broad range of nervous system function at many levels of analysis, including molecular, cellular, synaptic, network, computational, and behavioral.

## Undergraduate Study

### Bachelor of Science Degree

#### Preparation for the Major

##### Life Sciences Core Curriculum

*Required* (effective Fall Quarter 1997): Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 10A, 10B/10BL, 10C, and 10D/10DL, or 11A, 11B/11BL, 11CL, 132A, and 132B/132BL, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

All core curriculum courses must be passed with a grade of C – or better and must be completed with an overall grade-point average of 2.5 or better. Students are encouraged to fulfill the preparation requirements prior to enrollment in courses for the major. Transfer students are counseled on an individual basis.

In fulfilling the college general education requirements, students are encouraged to select courses that complement the major; Psychology 10 is recommended as a social sciences elective. They are also encouraged to take a statistics course (e.g., Psychology 41, Statistics 50, or approved lower or upper division equivalent).

#### Transfer Students

In order to be admitted as neuroscience majors, transfer students with 80 or more units should complete the following courses prior to admission to UCLA: one year of general biology with laboratory; one year of general chemistry with laboratory; one year of calculus; and either one year of calculus-based physics or one year of organic chemistry.

#### The Major

The following courses are required for the neuroscience major. Consult respective departmental or program listings for course descriptions:

Group 1: Neuroscience M101A-M101B-M101C, Chemistry and Biochemistry 153A, 153L.

Group 2: Three four-unit area electives as follows:

Area 2A: One *behavioral and cognitive neuroscience* course from Biology 129, 132, Neuroscience M119L, 197A, Psychology 110, 112A, 118, 119A, 119B, 119D, 119E, 119G, M119J, 119M, 120, 124A, 186A, 186B.

Area 2B: One *systems and integrative neuroscience* course from Biology 166, 167, M173, Computer Science M196B, Neuroscience M102, M119N, M130, M132, M174, 197B, Physiological Science 111B, C125, 138, 142, C143, C144, C145, Psychology 119F.

Area 2C: One *molecular, cell, and developmental neuroscience* course from Biology 153, M158, Chemistry and Biochemistry 132C, 153C, Molecular, Cell, and Developmental Biology 100 or C139, 138, CM156, C174A through C174F (two units each), M185A, CM185B,

Neuroscience 151, 197C, Physiological Science 147.

Group 3: One research-related course from the following: Neuroscience 101L (one term) or 199 (two terms in the same laboratory: one term applies toward Group 3 and one toward Group 4) or 199HA and 199HB (both terms in the same laboratory: one term applies toward Group 3 and one toward Group 4).

Group 4: Three additional elective courses from the Group 2 or 3 list or Neuroscience 191.

Molecular, Cell, and Developmental Biology 171 or Psychology 115 cannot be substituted for Neuroscience M101A; however, Physiological Science 111A can be substituted.

No more than eight courses may be from any one department. A maximum of eight units of Neuroscience 191, 199, or 199H (in any combination) may be applied toward the major. All required and elective courses must be taken for a letter grade, and a C average must be maintained in all upper division courses taken for the major.

## Honors Program

The honors program provides exceptional neuroscience majors with the opportunity to do research culminating in an honors thesis. Requirements for admission include completion of at least 40 units toward the preparation for the major with a 3.2 grade-point average and an overall GPA of 3.2 at UCLA. Applications and program requirements are available in the Neuroscience Undergraduate Office, 73-364 Brain Research Institute. Completed applications should be submitted at least two weeks prior to the term in which students plan to begin the honors program. After completion of all requirements and with the recommendation of the faculty sponsor and a second reader of the thesis, the chair confers honors at graduation.

## Neuroscience

See the Neuroscience interdepartmental graduate program for the graduate course offerings.

### Lower Division Courses

**88A-88Z. Lower Division Seminars.** Seminar, three hours. Limited to freshmen/sophomores. Seminars on current topics in neuroscience.

### Upper Division Courses

**M101A-M101B-M101C. Neuroscience: From Molecules to Mind (5 units each).** (Same as Molecular, Cell, and Developmental Biology M175A-M175B-M175C, Physiological Science M180A-M180B-M180C, and Psychology M117A-M117B-M117C.) Lecture, four hours; discussion, one hour. P/NP or letter grading:

**M101A. Cellular and Systems Neuroscience.** Requisites: Chemistry 132A, Life Sciences 2, Physics 6B or 8C. Not open for credit to students with credit for Physiological Science 111A. Students with credit for Molecular, Cell, and Developmental Biology 171 must enroll on a P/NP basis; those enrolling concurrently in course M101A and Molecular, Cell, and Developmental Biology 171 do not receive credit for M101A. Cellular neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement.

**M101B. Molecular and Developmental Neuroscience.** Requisites: course M101A (or Molecular, Cell, and Developmental Biology M175A or Physiological Science M180A or Psychology M117A) or Molecular, Cell, and Developmental Biology 171 or Physiological Science 111A or Psychology 115, Life Sciences 3, 4. Molecular biology of channels and receptors: focus on voltage dependent channels and neurotransmitter receptors. Molecular biology of supramolecular mechanisms: synaptic transmission, axonal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in developmental neurobiology.

**M101C. Behavioral and Cognitive Neuroscience.** Requisite: course M101B (or Molecular, Cell, and Developmental Biology M175B or Physiological Science M180B or Psychology M117B) or Molecular, Cell, and Developmental Biology 171 or Physiological Science 111A or Psychology 115. Neural mechanisms underlying motivation, learning, and cognition.

**101L. Neuroscience Laboratory.** Lecture, one hour; laboratory, three hours. Requisites: courses M101A-M101B (M101B may be taken concurrently). Not open for credit to students with credit for Psychology 116. Introduction to laboratory methods in neuroscience. Laboratory exercises range from molecular and cell biological to behavioral. Hands-on experience with important methodology and experimental approaches in neuroscience.

**M102. Introduction to Functional Anatomy of Central Nervous System.** (Formerly numbered M132.) (Same as Psychology M117K.) Lecture, two hours; laboratory, two hours. Requisite: Life Sciences 2. Not open to freshmen. Overview of human nervous system; relation of behavior to higher cognitive function. Development of primate and human brain during past few million years; evolutionary aspects of neuroanatomical structures and effects of behavior and cultural attitudes of modern man. P/NP or letter grading.

**103. Neuroscience for Physicists, Mathematicians, and Engineers.** Lecture, three hours. Introduction to the brain and neural function; mathematical models and computer simulations of neural networks. Biophysics of neurons, engineering approaches to neural control systems.

**M119L. Human Neuropsychology.** (Same as Psychology M119L.) Lecture, three hours. Requisites: courses M101A and M101C (or Psychology 115), Psychology 120. Designed for juniors/seniors. Survey of experimental and clinical human neuropsychology; neural basis of higher cognitive functions. P/NP or letter grading.

**M119N. The Visual System.** (Same as Psychology M119N.) Lecture, three hours. Requisite: course M101A or Molecular, Cell, and Developmental Biology 171 or Physiological Science 111A or Psychology 115. The ability to image and analyze the visual world is a truly remarkable feat. Coverage of anatomy and physiology of visual processing from the retina to visual cortex through lectures, extensive reading, and discussions.

**M130. Biological Bases of Psychiatric Disorders.** (Same as Molecular, Cell, and Developmental Biology M191, Physiological Science M181, Psychiatry M191, and Psychology M117J.) Requisite: course M101A or Molecular, Cell, and Developmental Biology 171 or Physiological Science 111A or Psychology 115. Underlying brain systems involved in psychiatric syndromes and neurological disorders, including schizophrenia, depression, bipolar disorders, obsessive/compulsive disorder, eating disorders. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments.

**151. Transgenic Models and Gene Transfer Technology in Understanding and Treatment of Neuropsychiatric Disease.** (Formerly numbered 197.) Lecture, three hours. Requisite: course M101B. Genetic defects in neuropsychiatric disease; how genome is experimentally manipulated to understand more about role of genes in normal development of brain and in disease. Required student participation in discussions.

**M174. Biomedical Systems/Biocybernetics Research Laboratory.** (Same as Computer Science CM196L.) Lecture, one hour; laboratory, three hours; outside study, eight hours. Requisite: Computer Science M196B. Special laboratory techniques and experience in biocybernetics research. Laboratory instruments, their use, design, and/or modification for research in life sciences. Special research hardware, firmware, software. Use of simulation in experimental laboratory. Laboratory automation and safety. Comprehensive experiment design. Radioactive isotopes and kinetic studies. Experimental animals, controls.

**191. Proseminar: Neuroscience.** (Formerly numbered 191A-191Z.) Seminar, three hours. Requisites: courses M101A-M101B-M101C. Advanced studies on current research issues in neuroscience; term paper and oral report required.

**194. Independent Study of Neuroscience Literature (2 units).** Library research, six hours minimum. Requisite: course M101A. Directed independent library research with a faculty member. Written proposal must be submitted prior to start of course, with a paper required at end of term. May not be applied toward elective requirements for the major and may not be taken concurrently with course 199, 199HA, or 199HB. P/NP grading.

**196H. Honors in Neuroscience.** Lecture, one hour; discussion, two hours. Preparation: one statistics course (Psychology 41, Statistics 50, etc.), neuroscience honors program standing. Instruction in principles of scientific method, ethics, and written and oral communication; critique of current journal articles and research projects. Presentation of individual research. May not be applied toward elective requirements for the major. Must be taken during Winter Quarter of academic year that student enrolls in courses 199HA/199HB.

**197A-197B-197C. Special Topics in Neuroscience.** (Formerly numbered 197A-197Z.) Lecture, three hours. Requisites: courses M101A-M101B-M101C. Topics on one or more aspects of neuroscience. May be applied toward group 2 in only one area (2A, 2B, 2C), depending on topic. Consult *Schedule of Classes* for applicability.

**199. Independent Research in Neuroscience.** Laboratory, 12 hours minimum. Requisites: course M101A, senior standing or junior standing with grades of B (3.0) or better. Directed independent research with a faculty member. Maximum of eight units of courses 199, 199HA, 199HB may be applied toward the major.

**199HA. Honors Thesis in Neuroscience.** Laboratory, 12 hours minimum. Requisites: course M101A, neuroscience honors program standing. Directed independent research involving extensive reading and research in the field of proposed honors thesis. For departmental honors, students must also take course 196H. Maximum of eight units of courses 199, 199HA, 199HB may be applied toward the major. In Progress grading (credit to be given only on completion of course 199HB).

**199HB. Honors Thesis in Neuroscience.** Laboratory, 12 hours minimum. Requisite: course 199HA. Continued reading and research that culminate in honors thesis. For departmental honors, students must also take course 196H. Maximum of eight units of courses 199, 199HA, 199HB may be applied toward the major.

## Course List

### Biology

- 129. Animal Behavior
- 132. Field Behavioral Ecology
- 153. Cellular Physiology: Functional Histology
- M158. Cell Biology
- 166. Animal Physiology
- 167. Regulatory Physiology
- M173. Anatomy and Physiology of Sense Organs

### Chemistry and Biochemistry

- 132C. Organic Chemistry
- 153C. Biochemistry: Biosynthetic and Energy Metabolism and Its Regulation

### Computer Science

- M196B. Modeling and Simulation of Biological Systems

### Molecular, Cell, and Developmental Biology

- 100. Introduction to Cell Biology
- 138. Developmental Biology
- C139. Molecular Cell Biology
- CM156. Human Genetics
- C174A-C174F. Advanced Topics in Cell and Molecular Biology
- M185A. Immunology
- CM185B. Intermediate Immunology

### Physiological Science

- 111B. Foundations in Physiological Science
- C125. Comparative Endocrinology: Molecular to Behavioral
- 138. Neuromuscular Physiology and Adaptation
- 142. Sensorimotor Physiology
- C143. Neuromotor Control of Posture and Movement
- C144. Neural Control of Physiological Systems
- C145. Neural Mechanisms Controlling Movement
- 147. Neurobiology of Learning and Memory

### Psychology

- 110. Fundamentals of Learning
- 112A. Basic Processes of Motivated Behavior
- 118. Comparative Psychobiology
- 119A. Neuropsychopharmacology
- 119B. Human Neurophysiology
- 119D. Behavioral Pharmacology
- 119E. Stress and Bodily Disease
- 119F. Neuron Circuitry and Behavior
- 119G. Psychobiology of Pain and Pain Inhibition
- M119J. Ethology: Physiology of Behavior and Learning in Animals
- 119M. Physiological Psychology of Learning
- 120. Cognitive Psychology
- 124A. Sensation and Perception
- 186A. Cognitive Science Laboratory: Introduction to Theory and Simulation
- 186B. Cognitive Science Laboratory: Neural Networks

Stanley J. Schein, M.D., Ph.D. (*Psychology*)  
Dwayne D. Simmons, Ph.D. (*Physiological Science*)  
Joseph B. Watson, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)

### Assistant Professors

Ellen M. Carpenter, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
Susana Cohen-Cory, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
Itzhak Fried, M.D., Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences, Surgery*)  
David L. Glanzman, Ph.D. (*Physiological Science*)  
Timothy G. Hales, Ph.D., in Residence (*Anesthesiology*)  
Barbara Knowlton, Ph.D. (*Psychology*)  
Harley I. Kornblum, M.D., Ph.D. (*Molecular and Medical Pharmacology*)  
Nigel Maidment, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
Valeriy I. Nenov, Ph.D. (*Neurosurgery*)  
Sheila Nirenberg, Ph.D. (*Neurobiology*)  
Thomas J. O'Dell, Ph.D., in Residence (*Physiology*)  
Helen E. Raybould, Ph.D. (*Medicine, Physiology*)  
Barney A. Schlinger, Ph.D. (*Physiological Science*)  
Erik S. Schweitzer, M.D., Ph.D. (*Neurobiology*)  
James A. Waschek, Ph.D., in Residence (*Psychiatry and Biobehavioral Sciences*)  
Nancy L. Wayne, Ph.D. (*Physiology*)  
Geraldine A. Weinmaster, Ph.D. (*Biological Chemistry*)

### Adjunct Professors

Dennis J. McGinty, Ph.D. (*Psychology*)  
Catia Sternini, Ph.D. (*Neurobiology*)

### Adjunct and Visiting Associate Professors

James R. Boulter, Ph.D., *Visiting* (*Psychiatry and Biobehavioral Sciences*)  
Charles L. Wilson, Ph.D., *Adjunct* (*Neurology*)

## Scope and Objectives

The goal of the interdepartmental graduate Neuroscience Program is to educate students for careers in neuroscience research and teaching. Students completing this program should be able to address both traditional and novel problems in neuroscience, armed with contemporary concepts and techniques. The program recognizes that neuroscience studies the structure and organization of nervous systems; intercellular and intracellular communication, including the cellular and molecular basis of neurotransmitter production and reception; development, including the molecular and cellular basis of trophic interactions; behavior; cognition; and the neurobiological and molecular bases of neurological and neuropsychiatric disorders.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

None.

## Doctoral Degree

### Admission

Successful applicants must satisfy the University minimum requirements. In addition, Graduate Record Examination (GRE) or Medical College Admission Test (MCAT) scores are required. Recommended preparation includes mathematics through calculus and at least one year each of general chemistry, organic chemistry, physics, and basic biology. Three letters of recommendation are required.

### Major Fields or Subdisciplines

Molecular, cellular, systems, behavioral, clinical neuroscience.

### Course Requirements

Each first-year student takes a five-course sequence (Neuroscience M201, M202, M203, M204, M205) and participates in at least two laboratory rotations. Each student also attends a "Meet the Professors" presentation series and enrolls in a three-quarter seminar series, Neuroscience 210A-210B-210C.

Each second-year student takes at least one quarter of biomathematics (either Biomathematics 170A, 170B, or Psychology 250A), as well as three courses from a menu of advanced neuroscience courses. In the second or third year, each student takes an additional three quarters of the seminar series Neuroscience 211A-211B-211C.

## Written and Oral Qualifying Examinations

A written qualifying examination is required following completion of the core requirements, generally by the end of the second year. The objective of this examination is to test basic knowledge and ability to relate knowledge in different neuroscience areas, to locate and interpret literature, and to apply research problems.

After passing the written qualifying examination, each student, in consultation with the adviser, chooses the doctoral committee to administer the University Oral Qualifying Examination.

## Neuroscience

### Graduate Courses

**M201. Neuroanatomy: Structure and Function of Nervous System.** (Same as Neurobiology M202.) Lecture, three hours; laboratory, three hours. Requirement: Biology 166 or Molecular, Cell, and Developmental Biology 171. Anatomy of central and peripheral nervous system at the cellular histological and regional systems level. Emphasis on contemporary experimental approaches to morphological study of nervous system in discussions of circuitry and neurochemical anatomy of major brain regions. Consideration of representative vertebrate and invertebrate nervous systems.

**M202. Cellular Neurophysiology.** (Same as Physiological Science M202.) Lecture, three hours; discussion, one hour. Requisites: Biology 166 or Molecular, Cell, and Developmental Biology 171, Physiological Science 111A or M180A or Physics 6B. Advanced course in cellular physiology of neurons. Action and membrane potentials, channels and channel blockers, gates, ion pumps and neuronal homeostasis, synaptic receptors, drug-receptor interactions, transmitter release, modulation by second messengers, and sensory transduction.

**M203. Molecular Neurobiology.** (Same as Psychiatry M203.) Lecture, three hours; discussion, one hour. Prerequisites: Biological Chemistry 201A-201B or equivalent, basic biochemistry, consent of instructor. Introduction to neurochemistry for neuroscience students. Topics include protein structure and function, lipid structure and metabolism, nucleic acids/molecular biology.

**M204. Cellular and Molecular Developmental Neurobiology.** (Same as Neurobiology M204, Physiology M204, and Psychiatry M204.) Lecture, three hours; discussion, one hour. Prerequisites: courses M201, M202, and M203, or Biological Chemistry 201A-201B, or consent of instructor. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging.

**M205. Behavioral and Systems Neuroscience.** (Same as Physiological Science M205 and Psychology M205Z.) Lecture, three hours. Prerequisites: courses M201, M202, M203, and M204, or consent of instructor. Introduction to fundamentals of behavioral and systems neuroscience, with emphasis on role of behavioral analysis in understanding the functioning of nervous system and identifying anatomical circuits, cell physiological processes, and molecular mechanisms that mediate behaviorally defined functions.

**210A-210B-210C. Introduction to Current Literature in Neuroscience (2 units each).** Critical discussion of current research literature related to topics of the five core courses in neuroscience graduate curriculum. S/U grading. **210A.** Corequisites: courses M201, M202, M203. **210B.** Corequisite: course M204. **210C.** Corequisite: course M205.

**211A-211B-211C. Evaluation of Research Literature in Neuroscience (2 units each).** Prerequisites: courses M201, M202, M203, M204, and M205, or consent of instructor. Advanced critical analysis of current research in neuroscience. S/U grading.

**215. Seminar: Neuroscience (2 units).** Topics of current importance presented for discussion. S/U grading.

**M230. Molecular and Cellular Mechanisms of Neural Integration (5 units).** (Same as Physiological Science M210 and Physiology M210.) Lecture, four hours; discussion, one hour; outside study, 10 hours. Prerequisite: course M202 or Physiology M209A. Introduction to mechanisms of synaptic processing. Selected problems of current interest, including regulation and modulation of transmitter release, molecular biology and physiology of receptors, cellular basis of integration in sensory perception and learning, neural nets and oscillators, and molecular events in development and sexual differentiation.

**M233. Mechanisms and Relief of Pain (2 units).** (Same as Oral Biology M204.) Advanced treatment of neuroanatomical, neurophysiological, and biochemical bases of pain perception. Topics include classical pain theories, pain receptors and pathways, endogenous mechanisms of pain modulation, and pharmacological basis for treatment of pain disorders.

**M240. Cellular and Molecular Neurochemistry.** (Same as Biological Chemistry M221, Neurobiology M221, Pharmacology M221, and Psychiatry M221.) Lecture, three hours; discussion, one hour. Prerequisite: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling. S/U or letter grading.

**M244. Cell and Tissue Neurobiology.** (Same as Neurobiology M209B.) Lecture, three hours; laboratory, three hours. Designed for graduate students. Introductory course for students planning to conduct cell biology or neurobiology research, with focus on cell biology and tissue organization of central and peripheral nervous system. Emphasis on normal structure of neurons, glia, and meninges.

**M246. Neuroactive Peptides: Molecular Biology to Function (2 units).** (Same as Medicine M235 and Neurobiology M235.) Prerequisite: consent of instructor. Presentation of current knowledge of gut and brain peptides by surveying their chemistry, anatomy, and physiology. Experimental approaches used to study biologically active peptides. Review of current information about each of the major gut and brain peptides. S/U or letter grading.

**M247. Neural Control of Cardiopulmonary Function.** (Same as Physiological Science M247.) Lecture, two hours; discussion, two hours. Prerequisites: Physiological Science 111A, 111B or 133 or 142 or M180A, M180B or equivalent. Cardiopulmonary homeostasis is accomplished via central nervous system (CNS) control of respiratory and circulatory pumping systems. Focus on CNS mechanisms underlying (1) generation of respiratory rhythm, sympathetic and parasympathetic tone, (2) determination of patterns of motor outflow, and (3) responses to changes in behavioral state or afferent signals. Emphasis on critical reading of literature.

**254. Interdisciplinary Research Seminar (2 units).** Lectures and discussions on many different disciplinary approaches to knowledge of brain function in order to broaden experience of students studying in fields other than that of lecturer; new information in depth from students in fields closely related to subject discussed. S/U grading.

**M255. Functional Organization of Behavior (2 units).** (Same as Psychiatry M255.) Prerequisite: consent of instructor. Changes in neuronal properties supporting changes in learned behavior. Different types of learning. Role of neurotransmitters and second messengers in changing ion channels of neurons to support associative learning versus long-term potentiation of neurotransmission. S/U or letter grading.

**257. Structure and Function of Limbic System (2 units).** Prerequisite: consent of instructor. Current knowledge of mammalian limbic system presented by surveying studies of its developmental anatomy, intrinsic synaptic organization, synaptic chemistry, afferent and efferent circuits, and dysfunctions in memory and cognition association with limbic system function. S/U or letter grading.

**M258. Functional Neuropsychology.** (Same as Psychiatry M258.) Lecture, three hours. Preparation: basic neuroscience background. Designed for graduate students. Introduction to architecture and connections of primate brain, effects of focal lesions on cognition, physiological signs of synaptic activation underlying cognition (including ERPs, unit-activity, and metabolic measures), and functional neural models for cognition. S/U or letter grading.

**M259. Neurobiology of Sleep (3 units).** (Same as Psychiatry M249 and Psychology M296.) Lecture, one hour; discussion, two hours. Critical review of primary research publications concerning neural basis of sleep. Discussion of neural and biochemical control of REM and NREM sleep after reviewing sleep behavior and phenomenology, including developmental and comparative aspects. Presentation of relevant clinical phenomena. S/U or letter grading.

**M260. Neuromuscular Factors in Movement Regulation.** (Same as Physiological Science M260.) Prerequisite: Physiological Science 138 or consent of instructor. Interaction of neural and muscular factors in regulation of muscle fiber properties and importance of these properties in neural strategies of movement regulation. S/U or letter grading.

**M261. Neuronal Circuit Analysis (2 units).** (Same as Neurobiology M261.) Lecture, two hours; discussion, one hour. Prerequisite: consent of instructor. Seminar with strong emphasis on specific reading assignments. Integrated view of neuronal circuit analysis at advanced level; layout and performance of a variety of networks serving cognitive or motor functions.

**M262. Neural Systems for Motor Control.** (Same as Physiological Science M240.) Prerequisite: Physiological Science C143 or consent of instructor. Advanced topics on neural mechanisms related to control of posture, locomotion, and highly skilled arm and hand movements. Emphasis on role of movement-dependent feedback at spinal segments and within sensorimotor areas of cerebral cortex, with respect to modification of motor output.

**M263. Neuronal Mechanisms Controlling Rhythmic Movements.** (Same as Physiological Science M263.) Prerequisite: Physiological Science C145 or consent of instructor. Advanced topics on brainstem mechanisms responsible for controlling cyclic and stereotypic movements such as mastication and locomotion. Emphasis on cellular neurophysiology and interaction between neuronal networks. Introduction to primary literature and techniques used in these areas. Students expected to critically evaluate data and conclusions drawn.

**M265A-M265B-M265C. Seminars: Neural Control of Movement (2 to 4 units each).** (Same as Physiological Science M294A-M294B-M294C.) Prerequisite: course M247 or M262 or M263 or consent of instructor. Selected topics on neural determinants of movement behavior. Students required to present two-hour seminar.

**M266A-M266B-M266C. Seminars: Cellular Neuroscience (2 to 4 units each).** (Same as Physiological Science M295A-M295B-M295C.) Prerequisite: course M202 or consent of instructor. Selected topics in sensory transduction, cellular integration, synaptic processing, central nervous system function, and learning. Students required to present two-hour seminar.

**271. Neurobiology of Disease (2 units).** Analysis of clinical neurological and psychiatric disorders from perspective of basic neuroscience.

**M272. Neuroimaging and Brain Mapping.** (Same as Physiological Science M272 and Psychology M213.) Lecture, three hours; outside study, nine hours. Prerequisites: courses M201, M202. Recommended: mathematics and computer background. Theory, methods, applications, assumptions, and limitations of neuroimaging. Techniques, biological questions, and results. Brain structure, brain function, and their relationship discussed with regard to imaging.

**M273. Neural Basis of Memory.** (Same as Psychiatry M270.) Lecture, two hours; discussion, one hour. Anatomical, physiological, and neurological data integrated into models for how behavioral phenomena of memory arise. Discussion of invertebrate memory, cortical conditioning, hippocampus and declarative memory, and frontal lobes and primary memory.

**274. Computational Neuroscience.** Lecture, 90 minutes; discussion, 90 minutes. Prerequisites: courses M201, M202. Systematic introduction to computational neuroscience and hands-on experience in neural simulations. Computational models at synaptic, neuronal, and network levels. Sensory, motor, memory, and attentional systems and some higher cognitive functions, including language and consciousness. S/U or letter grading.

**275. Advanced Techniques in Neurobiology (2 units).** Lecture, one hour; laboratory, one hour. Prerequisites: basic biology and chemistry. Designed to provide introduction and, when possible, practical demonstration of a number of techniques used in neurochemical research, with emphasis on techniques used for identification, measurement, and visualization of compounds thought to be important as mediators of intercellular communication in central nervous system. S/U or letter grading.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Methods in Neuroscience Public Education (2 units).** Seminar, one hour; fieldwork, six hours. Designed for upper division undergraduates and graduate students. Training and supervised practicum for students in teaching, presentation techniques, and public outreach of neuroscience principles. Hands-on experience through fieldwork in approved community setting. Students assist in preparation of educational materials and development of innovative programs. S/U grading.

**596. Directed Individual Study or Research (2 to 12 units).** Prerequisite: consent of instructor.

**597. Preparation for Ph.D. Qualifying Examinations (2 to 12 units).** Prerequisite: consent of instructor.

**599. Dissertation Research for Ph.D. Candidates (4 to 12 units).** Designed for students requiring special instruction or time to work on dissertation.

Frances M. Wiley, R.N., M.N.

## Scope and Objectives

The UCLA School of Nursing gives direction to interested potential applicants through monthly open counseling sessions. Students interested in the academic programs offered are urged to attend a counseling session or request a copy of the *Announcement of the UCLA School of Nursing* by writing to the Student Affairs Office, School of Nursing, UCLA, Box 951702, Los Angeles, CA 90095-1702 (310-825-7181, Tuesday through Thursday).

## History and Accreditation

In 1949 The Regents of the University authorized the School of Nursing as one of the professional schools of the UCLA Center for the Health Sciences. This action paved the way for

## NURSING

*School of Nursing*

UCLA  
2-200 Factor Building  
Box 951702  
Los Angeles, CA 90095-1702  
(310) 825-7181  
<http://www.nursing.ucla.edu/>

Marie J. Cowan, R.N., Ph.D., F.A.A.N., *Dean*

the development of an undergraduate basic program in nursing leading to the Bachelor of Science degree and made possible the establishment of a graduate program leading to the Master of Science degree. In 1966 the Master of Nursing (M.N.) degree was established as an alternate option to the M.S. degree. The Master of Science degree program was discontinued in 1971. The Regents approved the Doctor of Nursing Science (D.N.Sc.) degree program in 1986, and in Fall Quarter 1987 the first doctoral students were admitted. In 1996 the Office of the President and The Regents approved the change in the master's degree designation from M.N. to Master of Science in Nursing (M.S.N.); the change in doctoral degree designation from D.N.Sc. to Ph.D. in Nursing was approved in 1995.

The baccalaureate program has been continuously approved by the California Board of Registered Nursing since 1949. The School of Nursing became an agency member of the Department of Baccalaureate and Higher Degree Programs of the National League for Nursing in 1952. The Accrediting Service of the National League for Nursing has granted full accreditation to the programs since 1954.

## Undergraduate Study

### Bachelor of Science Degree

*Note: Admission to the undergraduate program is suspended for the 1997-98 academic year.*

The baccalaureate program leading to the Bachelor of Science degree provides for a close interweaving of general and professional education. The physical, social, and emotional health aspects of nursing are emphasized throughout the curriculum. Clinical nursing experience under the guidance of faculty members is provided in hospitals, outpatient clinics, homes, and community health centers.

Credit by examination is available to qualified students on review of previous education.

### Admission

The School of Nursing strives to attain a culturally and ethnically diverse student population. Admission, beginning in the junior year, is based on scholarship, diverse life experiences, and disadvantage. Students must have completed a minimum of 84 quarter units, with grades of C or better in requisite courses and an overall grade-point average of 2.8 or better. Three letters of recommendation are also required. Diverse life experiences, including previous employment, volunteer work, and community service which reflect leadership, responsibility, multicultural involvement, multilingual abilities, and other unusual skills and knowledge are evaluated. Consideration is also given to social and economic disadvantage such as educational background, heavy work schedule during school, housing conditions, family responsibilities, and mastery of physical disabilities. Completed applications

should reflect clearly identified career goals and documentation of potential in nursing.

Applications for acceptance to the baccalaureate program must be filed no later than November 30 for the next Fall Quarter. The School of Nursing admits students each Fall Quarter. In addition to the regular *UC Application for Undergraduate Admission and Scholarships* which must be returned in the self-addressed envelope included in the packet, an application must be filed with the school by November 30. This application is available directly from the Student Affairs Office, School of Nursing, UCLA, Box 951702, Los Angeles, CA 90095-1702.

Students can find a discussion of the pre-nursing curriculum and prehealth advising in Preparing for a Professional School in the College of Letters and Science section of this catalog.

### Degree Requirements

The Bachelor of Science degree is granted on fulfillment of the following requirements:

(1) Students must complete 44 required courses (191 quarter units; unit value of courses ranges from two to eight units) of college work and satisfy the general University requirements.

(2) Of the required 44 courses, at least 20 courses must be in general education, including the courses listed under the Pre-nursing Curriculum in the College of Letters and Science section.

(3) Students must complete at least 24 courses (107 quarter units) of upper division coursework toward the degree, including Nursing 101, 104A, 104B, 105, 109, M115, 120A through 120E, 120G, 184, 190C, 190F, 192, 193, 195, four electives, Biostatistics 100A, Epidemiology 100.

(4) Students must maintain an overall grade-point average of C (2.0) or better in all courses taken in the School of Nursing.

(5) Students must complete all required nursing courses in the school and receive grades of C or better in the following courses: Nursing 101, 105, 109, M115, 120A through 120E, 120G, 190C, 190F.

(6) Students must be enrolled in the School of Nursing during their final three terms in residence; the last nine courses must be completed while so enrolled.

### Study Lists

Students may not enroll in more than four courses per term unless a petition is approved in advance by the associate dean.

## Honors

### Dean's Honors

Dean's Honors are awarded annually to undergraduate students completing the academic year with distinction. To be eligible students must achieve an overall grade-point average of

3.75 on a minimum of 36 graded units of work completed during the academic year.

### Honors at Graduation

Honors are awarded at graduation to students with a superior overall grade-point average. The levels of honors and the requirements for each level are: *summa cum laude*, an overall average of 3.821; *magna cum laude*, 3.719; *cum laude*, 3.549. To be eligible students must have completed at least 98 University of California units for a letter grade. See the quarterly *Schedule of Classes* for the most current calculations of Latin honors.

### School of Nursing Faculty Award

The Faculty Award for excellence in nursing, established in 1965, is awarded to a student graduating from the bachelor's and the master's program with the highest grade-point average in all nursing courses. See the quarterly *Schedule of Classes* for the most current calculations of Latin honors.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

The following is required of applicants to the Master of Science in Nursing program:

(1) Either graduation from a recognized college or university having a National League for Nursing-accredited baccalaureate nursing program satisfactory to the School of Nursing and to the Graduate Division, or graduation with a baccalaureate degree in nursing from an international institution with a nursing program satisfactory to the School of Nursing and to the Graduate Division. If admitted under the latter, applicants may be required to enroll in certain undergraduate nursing courses which generally may not be applied toward requirements for advanced degrees.

(2) Status as a licensed registered nurse. Prior to entry into any clinical practicum, evidence of current licensure as a registered nurse in the State of California is mandatory.

(3) An upper division statistics course or a lower division statistics course with content equivalent to Biostatistics 100A must be completed before entering the school.

(4) An upper division nursing research course, taken at a National League for Nursing-accredited institution and equivalent to Nursing 193, must be completed before entering the school.

(5) An upper division physical assessment course, taken at a National League for Nursing-accredited institution and equivalent to Nursing 192, must be completed before entering the

school (not required of students selecting the nursing administration specialty).

(6) Professional and/or academic competence in nursing attested through three letters of recommendation.

(7) A satisfactory scholarship record.

(8) Since written and verbal communication skills are basic to the practice of nursing, it is essential that applicants read, write, and speak English well. International applicants from a country in which English is not the first language and medium of instruction, whether a licensed registered nurse in the U.S. or not, are required to pass the Test of English as a Foreign Language (TOEFL) with a score of 550 or higher.

(9) All international applicants who are not licensed registered nurses in the U.S. prior to consideration for admission, are required to pass the Commission on Graduates of Foreign Nursing Schools (CGFNS) examination.

Prospective students interested in the Master of Science in Nursing program must file two applications: (1) *Application for Graduate Admission* and (2) *Application for Admission to the School of Nursing*. Both applications may be obtained from the Student Affairs Office. The application deadline for priority consideration is December 15; February 1 is the final deadline.

#### **M.B.A./M.S.N. Concurrent Degree Program**

The School of Nursing and the John E. Anderson Graduate School of Management offer a concurrent degree program designed for students interested in employment in all sectors of the health care delivery system, including hospitals, corporate health care headquarters, home health care agencies, and long-term care facilities, as well as policy-making bodies and consulting firms. Applicants must request application materials from both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the School of Nursing Student Affairs Office.

#### **Areas of Study**

The School of Nursing offers graduate studies in the following areas:

- (1) Acute care.
- (2) Administration: nursing administration.
- (3) Chronic care: gerontology/chronic care, oncology.
- (4) Primary care: family, nurse-midwifery, occupational health, pediatric.

Students in the acute, family, gerontology/chronic care, and oncology nurse practitioner specialties may choose the neuropsychiatric subspecialty. All students may choose to add preparation in consultation, education, or management to their clinical requirement.

#### **Course Requirements**

A minimum of three core courses (eight to nine units) and additional coursework in the 100, 200, and 400 series are required for each area

of clinical specialization. A total of four units of 500-series courses may be applied toward the total course requirement for the degree.

A minimum grade-point average of 3.0 is required. Grades of B are required in graduate clinical nursing courses in order to advance to the next clinical course in a series. A minimum of three quarters of full-time enrollment (eight units per quarter) is required for academic residence.

#### **Core Requirements**

*Core Courses.* Nursing 204, 220, and 264 (students in nurse-midwifery take Nursing 236). Additional core courses for all options except nursing administration: Nursing 200A, 200B, 225, 230 (Nursing 200A, 200B, and 230 are not required for nurse-midwifery).

*Clinical Specialty Theory Courses.* Nursing 210F, 211F, 213, 214F, 215F, 216F, 217F, 219A, 219B, 232F, 233F, 234, 235, 241F, 242F. Course requirements vary for each specialty area; not all courses are required in each specialty.

*Advanced Practice Theory Courses.* Nursing 218A, 218B, 218C, 237A, 237B, 237C, 237E, 238A, 238B, 238C, 239A, 239B, 239C.

*Clinical Practicum/Residency Courses.* Nursing 418A through 418D, 437A through 437F, 438A through 438D, 439A through 439D.

#### **Specialty Requirements**

Additional course requirements vary according to specialty area selected:

*Acute Care Specialty.* The goal of the acute care specialty is to prepare nurses to assume an advanced practice role as a clinical nurse specialist or a nurse practitioner in acute care nursing. At least two years of prior experience in acute care nursing are highly recommended. Graduates are expected to function as acute care clinicians, educators, consultants, or researchers and to become leaders in a variety of inpatient and outpatient health care settings. Required courses include Nursing 200A, 200B, 204, 216F, 217F, 220, 230, 239A, 239B, 239C, 264, 439A, 439B, 439C, and four units of theory elective. Additional required courses for the acute care nurse practitioner include Nursing 225, 439D.

*Family Specialty.* The family specialty prepares family nurse practitioners to provide primary health care for individuals throughout the life span. The focus is on collaborative, interdisciplinary practice to assure comprehensive quality health care and health maintenance in outpatient, work site, home health, nursing home, and hospital settings. Emphasis is on the assessment, treatment, and evaluation of the client's responses to actual or potential health problems which may be chronic or acute and include primary prevention and health promotion. Required courses include Nursing 200A, 200B, 204, 210F, 211F, 220, 225, 230, 239A, 239B, 239C, 264, 439A, 439B, 439C, 439D, and four units of theory elective. An elective ex-

perience in the clinical nurse specialist role is also available.

*Gerontology/Chronic Care Specialty.* The gerontology/chronic care specialty prepares advanced practice nurses to meet the increased demands for leadership in health care for older persons, particularly those challenged by chronic illness. Emphasis is on the comprehensive assessment, treatment, and evaluation of the client and family. Advanced knowledge and skills in pathophysiology and psychosocial concepts guide theory-based practice, with the goal of optimizing functional status. Interdisciplinary collaboration and care management are emphasized. Required courses include Nursing 200A, 200B, 204, 220, 225, 230, 232F, 233F, 239A, 239B, 239C, 264, 439A, 439B, 439C, 439D, and four units of theory elective. An elective experience in the clinical nurse specialist role is also available.

*Neuropsychiatric Subspecialty.* The neuropsychiatric subspecialty prepares nurses to assume an advanced practice role as a nurse practitioner in community and inpatient settings. The focus is on the primary care of adults with chronic cognitive, addictive, and affective dysfunctions. Students select both a specialty (acute care, family, gerontology/chronic care or oncology nurse practitioner) and the neuropsychiatric nurse practitioner subspecialty. Graduates are expected to function as clinicians, educators, case managers or researchers and to become leaders in a variety of health care settings. Required courses include those listed under the acute, family, gerontology/chronic care or oncology nurse practitioner specialties and Nursing 241F, 242F.

*Nurse-Midwifery Specialty.* The nurse-midwifery specialty prepares certified nurse-midwives to provide care to women, newborns, and their families. The focus is on independent and collaborative practice to assure comprehensive quality health care and health maintenance throughout the childbearing, interconceptional, perimenopausal, and newborn periods. Care is provided in outpatient, home, and inpatient settings. Emphasis is on the assessment, diagnosis, treatment, and evaluation of the client's responses to actual or potential health problems and includes primary prevention. Required courses include Nursing 204, 220, 225, 234, 235, 236, 237A, 237B, 237C, 237E, 437A, 437B, 437C, 437D, 437E, 437F.

*Nursing Administration Specialty.* The nursing administration specialty focuses on organizational theory, health services and financial management, and the practice of nursing administration within acute, ambulatory care, and/or community-based settings. Students gain the basic knowledge and skills required of nursing administrators in a volatile health care environment. Nursing content develops the knowledge of advanced management practice needed to plan and evaluate nursing services. Health services and financial management content pro-

vides a framework for organizing, directing, and coordinating health care resources.

The program requires both theory and management practicums, including a 10-week administrative residency. Stipends for the residency program may be provided by the institutions in which the residency is completed. Individualized plans for practicums are available. Coursework includes courses taken in the School of Nursing, School of Public Health, and the John E. Anderson Graduate School of Management. Required courses include Nursing 204, 218A, 218B, 218C, 219A, 219B, 220, 264, 418A, 418B, 418C, 418D, and a minimum of 16 units of theory electives including a course in organizational theory and human resource management.

**Occupational Health Specialty.** The occupational health specialty integrates principles of occupational health assessment and care with primary ambulatory care of the adult. Practitioners evaluate the individual as seen within the work setting as well as within the family group. Primary focus and emphasis are on health status assessment, health promotion, illness/accident prevention, hazard control, screening, surveillance, and rehabilitation of adult workers. Requirements are met through a combination of courses and experiences specific to the delivery of occupational health care services. Required courses include Nursing 200A, 200B, 204, 210F, 211F, 213, 220, 225, 230, 239A, 239B, 239C, 264, 439A, 439B, 439C, 439D, Environmental Health Sciences 250, 251, and Epidemiology 100 or equivalent. An elective experience in the clinical nurse specialist role is also available.

**Oncology Specialty.** The oncology nursing specialty is designed to train advanced practice nurses to provide leadership in the field of oncology nursing. This option includes a focus on nursing care of critically and chronically ill people with cancer and their families in a variety of settings and across the health-illness continuum (prevention, diagnosis, treatment, rehabilitation, palliative care). The student is given intensive individualized preparation in either the role of nurse practitioner or clinical nurse specialist. Required courses include Nursing 200A, 200B, 204, 214F, 215F, 220, 230, 239A, 239B, 239C, 264, 439A, 439B, 439C, and four units of theory elective. Additional courses for the oncology nurse practitioner include Nursing 225, 439D.

**Pediatric Specialty.** This specialty prepares pediatric nurse practitioners to assume leadership roles in the health care of children. Emphasis is on the assessment, diagnosis, treatment, and evaluation of children's actual or potential health problems. Content stresses care for acute and chronic illnesses as well as primary prevention. Required courses include Nursing 200A, 200B, 204, 212, 220, 223, 225, 230, 238A, 238B, 238C, 264, 438A, 438B, 438C, 438D, and four units of theory elective. An elective experience in the clinical nurse specialist role is also available.

## Comprehensive Examination Plan

The comprehensive examination is given in written form during the Spring Quarter. Students are eligible to take the examination once they are advanced to candidacy and may repeat the examination twice. Retakes *only* are offered during Summer and Winter quarters. Students must complete all requirements for the degree within one calendar year after advancement to candidacy.

## Thesis Plan

None.

## Doctoral Degree

### Admission

Priority for admission to the Doctor of Philosophy (Ph.D.) program is given to graduates of accredited master's degree programs in nursing. Those admitted to doctoral study with a bachelor's degree in nursing and a master's degree in a non-nursing field are required to make up clinical specialty deficiencies by taking clinical courses in one of the current master's advanced practice programs. Such courses may be taken concurrently with doctoral courses. Individuals admitted with a bachelor's degree in nursing are required to complete a program of master's courses in nursing at UCLA as a prerequisite to entry into doctoral courses.

Applicants to the Doctor of Philosophy degree must provide evidence of the following:

- (1) A master's degree in nursing; a Bachelor of Science degree in Nursing and a master's degree in a non-nursing field; or a Bachelor of Science degree in Nursing. Degrees must be from a National League for Nursing-accredited program satisfactory to the School of Nursing and the Graduate Division. Students who are accepted with deficiencies are required to complete appropriate master's courses.
- (2) A scholarship record satisfactory to the Graduate Division and to the School of Nursing is required, with a minimum grade-point average of 3.5.
- (3) A combined verbal, quantitative, and analytic score of 1,500 on the Graduate Record Examination (GRE) within the past five years. Exceptions to this score may be considered when there is compelling evidence in other areas.
- (4) An upper division statistics course with content equivalent to Biostatistics 100A, 100D, or Biomathematics 170A.
- (5) A graduate-level nursing research course with content equivalent to Nursing 205.
- (6) A four-unit graduate-level nursing theory development course.
- (7) A minimum score of 550 on the Test of English as a Foreign Language (TOEFL) is required of applicants from countries in which English is not the primary language and medium of instruction (scores must be submitted prior to consideration for admission).

(8) A passing score on the nursing and English portions of the Commission on Graduates of Foreign Nursing Schools (CGFNS) examination, which must be submitted by international applicants who are not licensed as a registered nurse in the U.S., prior to consideration for admission.

(9) Status as a licensed registered nurse; evidence of current licensure as a registered nurse in the State of California is mandatory.

(10) Four letters of reference affirming the applicant's potential for scholarly, investigative, and creative endeavors in nursing.

(11) Examples of scholarly papers and/or creative works.

(12) A statement of educational objectives, specific focus of research, and program and career goals.

(13) Curriculum vitae.

Prospective students interested in the Doctor of Philosophy program must file two applications: (1) *Application for Graduate Admission* and (2) *Application for Admission to the School of Nursing*. Both applications may be obtained from the UCLA School of Nursing. Applications are accepted for Fall Quarter admission only. The application deadline for priority consideration is December 15; February 1 is the final deadline.

## Major Fields or Subdisciplines

In the doctoral program, students focus their study in one of two areas: biobehavioral research or health systems research.

Students who choose biobehavioral research focus on studies that describe, explain, and predict biologic and behavioral factors which relate to health promotion and disease prevention. Students who choose health systems research focus on studies that examine the function, structure, process, and outcome of a range of multidisciplinary health delivery systems such as hospitals, nursing homes, and community-based organizations. Both research areas incorporate human diversity and the influence of the psychosocial and physical environments.

## Course Requirements

**Core Requirements.** The following courses are required of all students in the Doctor of Philosophy program.

- (1) Nursing science: Nursing 202, 206A-206B.
- (2) Nursing research: Nursing 207, 208, 299A, 299B-299C, 299D.
- (3) One statistics sequence: Biostatistics 251, or Psychology 252A and 253, or Sociology 210A-210B, or equivalent, subject to approval of the faculty adviser and doctoral program committee chair.

**Cognate Requirements.** Twenty-four units of courses in the major area of study (biobehavioral, health systems). A minimum of four units and a maximum of 12 units are taken in nurs-

ing. The remainder are taken in support discipline areas.

## Written and Oral Qualifying Examinations

**Written Qualifying Examination.** The written qualifying examination must be taken after completion of the basic core courses. The examination evaluates three areas of knowledge: (1) the basic concepts of nursing science; (2) nursing research methods and analysis; and (3) the basic concepts of the student's focused area of study. Normally no more than one reexamination is permitted.

**Oral Qualifying Examination.** The University Oral Qualifying Examination, taken after completing the course requirements and successfully passing the written qualifying examination, evaluates students' dissertation proposals. The initial step is selection of a doctoral committee. Students are responsible for obtaining the consent of four or more faculty members to serve on the committee as certifying members. Qualifications of members must be consistent with students' area of research and special interests and also with the requirements for doctoral committees as stated in the Graduate Study section of the current *UCLA General Catalog*. Additional members, including those from an institution or clinical agency representing the student's clinical and research interests, may be appointed as noncertifying members by petition if the doctoral program committee and the student agree that additional experts are needed. The graduate adviser of the doctoral program committee must give approval of members consenting to serve on the doctoral committee before the committee is submitted for the approval of the dean of the Graduate Division.

## Nursing

### Upper Division Courses

**101. Introduction to Art and Science of Nursing (8 units).** Lecture, four hours; laboratory, 12 hours; autotutorial laboratory, variable. Introduction to nursing theory and practice. Content includes the following modules: nursing process, pharmacology, interpersonal and technical skills. Methodology includes laboratory, lectures, autotutorial laboratory, and clinical application.

**104A. Behavior of Man in Health and Illness (2 units).** Prerequisite: consent of instructor. Limited to nursing students. Examination of health/illness continuum from framework of social and biological sciences. Content includes role theory, developmental theory, transcultural communication theory, and other theories relevant to nursing practice.

**104B. Behavior of Man in Health and Illness.** Lecture, two hours; discussion, two hours. Prerequisite: course 104A. Examination of health/illness continuum from framework of illness as a stressor and possible responses to such stress. Content includes anxiety, pain, cognitive disturbances, loss, and other responses relevant to nursing practice.

**105. Human Physiology.** Lecture, four hours; discussion, one hour. Prerequisite: nursing student standing or consent of instructor. Required of third-year nursing students. Lecture and discussion, with emphasis on a correlative approach to anatomy and physiology of human body.

**109. Communication in Health Care (3 units).** Lecture, two hours; laboratory, three hours. Prerequisite for non-nursing students: consent of instructor. Study of basic communication and group process theory and its application to practice. Laboratory experience, with emphasis on development of each individual's ability to communicate effectively in a dyad and in a small group.

**M115. Introduction to Pharmacology and Therapeutics (2 units).** (Same as Pharmacology M115.) Prerequisite for non-nursing students: consent of instructor. Systematic review of major drug groups used therapeutically, the most commonly used members in each group, differences among them, and their mechanisms of action.

**120A. Child and Family Nursing (5 units).** Lecture, two hours (10 weeks); laboratory, 18 hours (five weeks). Prerequisites: courses 101, 105, 109, 120C-120D, 120G. Clinical application of nursing theory in community situations: acute care, convalescent, and ambulatory. Theoretical content includes pathophysiology, pharmacology, and treatment modalities. Application of theoretical concepts of growth and development related to nursing care of the child and its family.

**120B. Maternity Nursing (5 units).** Lecture, two hours (10 weeks); laboratory, 18 hours (five weeks). Prerequisites: courses 101, 105, 109, 120C-120D, 120G. Clinical application of nursing theory in community situations: acute care, convalescent, and ambulatory. Theoretical content includes pathophysiology, pharmacology, and treatment modalities. Application of theoretical concepts of reproduction to nursing care of the family.

**120C-120D. Medical-Surgical Nursing of Adults and Older Adults (6 units each).** Lecture, three hours (10 weeks); laboratory, 18 hours (five weeks). Prerequisites: courses 101, 105, 109. Clinical application of nursing theory in community situations: acute care, convalescent, and ambulatory. Theoretical content includes pathophysiology, pharmacology, and treatment modalities. Application of theoretical content, including aging process, related to medical-surgical nursing care of the adult/older adult patient.

**120E. Psychiatric/Mental Health Nursing (5 units).** Lecture, two hours (10 weeks); laboratory, 18 hours (five weeks). Prerequisites: courses 101, 105, 109, 120C-120D. Corequisite: course 120G. Clinical application of nursing theory in community situations: acute care, convalescent, and ambulatory. Theoretical content includes pathophysiology, pharmacology, and treatment modalities. Application of mental health content related to nursing care of individuals, groups, or communities.

**120G. Medical-Surgical Nursing of Adults and Older Adults (5 units).** Lecture, two hours (10 weeks); laboratory, 18 hours (five weeks). Prerequisites: courses 101, 105, 109. Clinical application of nursing theory in community situations: acute care, convalescent, and ambulatory. Theoretical content includes pathophysiology, pharmacology, and treatment modalities. Application of theoretical content, including aging process, related to medical-surgical nursing care of the adult/older adult patient.

**M158. Health in Culture and Society.** (Same as Anthropology M168.) Prerequisite: upper division standing. Examination of theories and methods of medical anthropology in relation to cross-cultural health systems, role networks, attitude and belief systems of the participants. Emphasis on interaction networks in health care systems.

**184. Evolution and Dynamics of the Nursing Profession (3 units).** Study of evolution of nursing, focusing on historical, ethical, moral, legal, and institutional ramifications of nursing practice. In addition, rights, obligations, and societal and institutional expectations of the professional nurse.

**189. Human Sexuality.** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Lectures, discussions, and case presentations considering human sexuality, its joys and pleasures, pitfalls and problems. Interdisciplinary approach encompassing anatomic, physiologic, psychologic, and social aspects of heterosexual and homosexual relationships, including development of gender identity, intercourse, pregnancy, abortion, contraception, and venereal disease.

**190A. Advanced Child and Family Nursing (7 units).** Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120E, 120G. Clinical concentration in nursing care of the child and its family. Theoretical content integrates concepts related to management of pediatric client care in acute and ambulatory settings. Application of theoretical concepts of growth and development of the child and family.

**190B. Advanced Maternity Nursing (7 units).** Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120E, 120G. Clinical concentration in nursing care of the childbearing family. Theoretical content further refines theories, concepts, and nursing practice related to the childbearing family. Application of theoretical concepts of reproduction to nursing care of the family.

**190C. Critical Care Nursing across Life Span (7 units).** Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120E, 120G. Clinical concentration related to nursing in the critical care setting. Theoretical content includes pathophysiology, pharmacology, advanced nursing skills, and treatment modalities in selected clinical situations. Application of theoretical content related to nursing care of the acutely ill medical and surgical pediatric or adult patient in emergent and critical phases of illness.

**190D. Perioperative Nursing (7 units).** Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120E, 120G. Clinical concentration related to nursing in the operating room setting. Theoretical content further refines theories, concepts, and practice of perioperative nursing. Application of theoretical content related to nursing care of the patient undergoing surgical intervention.

**190E. Advanced Psychiatric/Mental Health Nursing (7 units).** Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120E, 120G. Clinical concentration in area of mental health nursing. Theoretical concepts and application related to mental health of the adult, geriatric, child, or adolescent client. Experiences include those in inpatient psychiatric nursing, outpatient day treatment programs, individual and child therapy, hospice programs, and crisis intervention units.

**190F. Community Health Nursing (7 units).** Lecture, two hours; laboratory, 15 hours. Prerequisites: courses 101, 104A, 104B, 120A through 120E, 120G. Clinical concentration in community health nursing settings: home health, public health, occupational health, and schools. Theoretical content focuses on the community as a context for understanding the relationship between health status of individuals and groups with the psychophysical environment.

**192. Physical Assessment.** Lecture, three hours; laboratory, three hours. Prerequisites: courses 101, 105, 109. Designed to provide in-depth review and synthesis of physical assessment skills and knowledge covering the life span. Individual study, use of audiovisual aids, physical assessment skills practice in laboratory, and the required text are mandatory.

**193. Introduction to Research.** Introduction to planning a research project based on a simple question. Rules for definition of terms, alternative methods of writing purposes, selecting a sample, choosing a data collection instrument, planning for data analysis, protection of human rights, reading research reports, and writing a research proposal.

**195. Nursing Management (3 units).** Lecture, two hours; field study, three hours. Corequisite: one course in 190 series. Management theory applied to nursing practice. Acquisition of basic knowledge of management concepts and skills as practiced in a health care setting.

**196. Issues in Providing Health Care to Culturally Diverse Populations.** Lecture, three hours; discussion, one hour. Prerequisite for non-nursing students: consent of instructor. Theoretical and experiential course designed to provide a base for understanding issues of providing health care to culturally diverse populations, with emphasis on strategies to facilitate intercultural/intracultural communication and intergroup/intragroup dynamics in health care settings.

**199. Special Studies in Nursing (2 to 16 units).** Prerequisites: senior standing and/or consent of instructor. Individual study of a problem in the field of nursing. May be repeated for credit, but only four units may be applied toward degree requirements. P/NP or letter grading.

## Graduate Courses

**200A-200B. Biobehavioral Foundations of Health Assessment (4 units, 2 units).** (Formerly numbered 200.) Theories of health behaviors in relation to assessment of epidemiological, psychological, and developmental disorders across life span. Analysis of preventive health, disease screening, risk evaluation, and health promotion theories and interventions. In Progress grading. **200A.** Lecture, three hours. Requisite: course 192 or approved physical assessment course. **200B.** Requisite: course 200A.

**201. Health-Related Quality of Life (2 units).** Theoretical foundations of health-related quality of life as an outcome of disease, treatment, and style of care. Analysis of meaning, dimensions, predictors, measures, ethical dilemmas, cultural diversity issues, and biobehavioral foundations of health-related quality of life.

**202. Philosophical Foundations of Science of Nursing.** Prerequisite: doctoral standing or consent of instructor. Designed to explore major schools of thought in contemporary Western philosophy of science, with emphasis on ways in which these schools may and do influence nursing science and practice.

**203. History of Nursing Thought (2 units).** (Not the same as course 203 prior to Winter Quarter 1995.) Analysis and evaluation of contextual forces which influenced development of discipline of nursing. Examination of nursing's historical influence on sociopolitical environment.

**204. Research Design and Critique.** (Not the same as course 204 prior to Winter Quarter 1995.) Lecture, 90 minutes; discussion, 90 minutes. Prerequisite: one statistics course. Research process and critique of research, with emphasis on quantitative research designs. Consideration of strengths and weaknesses of selected survey, quasi-experimental and true experimental designs, theoretical frameworks, identification and control of variables, measurement instruments, sampling methods, data analysis, and interpretation of results.

**205. Advanced Research Methods.** (Not the same as course 205A prior to Fall Quarter 1994.) Prerequisites: courses 193, 204, or equivalent, one statistics course. Research process and development of research proposals, including quantitative and qualitative approach to designs. Students encouraged to develop research proposal for clinical or basic research problem related to nursing care or variables affecting such care.

**206A-206B. Nursing Theory Development.** Lecture/seminar, three hours. Requisites: course 202 or philosophy of science course (may be taken concurrently), four units of nursing theory. Focus on major issues involved in development of nursing knowledge, including content and methods of developing nursing theory. In Progress grading.

**207. Research in Nursing: Measurement of Clinical Variables.** Lecture, two hours; discussion, two hours. Requisites: courses 204, 205. Analysis of methods of measurement of physiological and psychosocial variables relevant to clinical nursing research, with emphasis on purposes, underlying assumptions, strengths, and limitations of measurement techniques. Analysis of techniques to develop reliability, validity, sensitivity of measurement instruments.

**208. Research in Nursing: Measurement of Outcomes.** Discussion, three hours; field application, six to eight hours. Prerequisites: courses 206A, 207. Measurement theories, including topics related to scaling and tool development as they apply to outcomes. Emphasis on opportunity to develop knowledge and skills through course content and individualized direct involvement in a clinical research project.

**209. Human Diversity in Health and Illness (2 units).** (Not the same as course 209A prior to Winter Quarter 1995.) Human diversity in response to illness that nurses diagnose and treat, centering on culture and human belief systems associated with diverse orientations related to ethnicity and gender. Provides conceptual base that nurses can use in clinical practice, research, teaching, and administration.

**210. Theoretical Foundations of Family Nursing (2 units).** (Not the same as course 210 prior to Fall Quarter 1994.) Theoretical and research-based content in family health and individual development throughout life span, emphasized in relationship to specific health maintenance and health problem issues of ambulatory populations.

**210F. Theoretical Foundations of Family Nursing.** Lecture, three hours; selected field experiences. Theoretical and research-based content in family health and individual development throughout life span, emphasized in relationship to specific health maintenance and health problem issues of ambulatory populations.

**211. Theoretical Foundations of Family Nursing (2 units).** (Not the same as course 211 prior to Fall Quarter 1994.) Prerequisite: course 210. Continuation of course 210.

**211F. Theoretical Foundations of Family Nursing.** Lecture, three hours; selected field experiences. Requisite: course 210F. Continuation of course 210F.

**212. Health-Related Family Theory (2 units).** (Not the same as course 212 prior to Winter Quarter 1995.) Overview of conceptual frameworks related to contemporary family structure and functioning, with particular emphasis on health. Identification of limitations of current theory and applicability of current knowledge to various problems encountered in care of families.

**213. Theoretical Foundations of Occupational Health Nursing.** Lecture, three hours; field study, three hours (six weeks). Current environmental and system theories and concepts in occupational health, presented within a nursing framework. Analysis of elements of worksite health programs and discussion of nursing's leadership role in ensuring a safe and healthful workplace.

**214. Human Responses to Cancer (2 units).** (Not the same as course 214 prior to Fall Quarter 1994.) Cancer-related research and theory from variety of disciplines, including nursing, analyzed and evaluated for application to clinical practice, with emphasis on nursing assessment and intervention of responses to cancer and cancer treatment.

**214F. Human Responses to Cancer.** Lecture, three hours; selected field experiences. Cancer-related research and theory from variety of disciplines, including nursing, analyzed and evaluated for application to clinical practice, with emphasis on nursing assessment and intervention of responses to cancer and cancer treatment.

**215. Human Responses to Cancer (2 units).** (Not the same as course 215 prior to Fall Quarter 1994.) Application of cancer-related theory/research to clinical practice, with emphasis on assessment and intervention of nursing care problems in response to cancer and cancer treatment. Focus on issues affecting nursing care in prevention/screening, diagnosis, treatment, symptom management, rehabilitation, and quality of life related to responses to major cancers.

**215F. Human Responses to Cancer.** Lecture, three hours; selected field experiences. Requisite: course 214F. Application of cancer-related theory/research to clinical practice, with emphasis on assessment and intervention of nursing care problems in response to cancer and cancer treatment. Focus on issues affecting nursing care in prevention/screening, diagnosis, treatment, symptom management, rehabilitation, and quality of life related to responses to major cancers.

**216. Human Responses to Critical Illness (2 units).** (Not the same as course 216 prior to Winter Quarter 1995.) Biobehavioral theories and research of critical illness. Nursing aspects of selected dysfunctions and implications for critical care advanced practice nurses.

**216F. Human Responses to Critical Illness.** Lecture, three hours; discussion, one hour. Biobehavioral theories and research of critical illness. Nursing aspects of selected dysfunctions and implications for critical care advanced practice nurses.

**217. Human Responses to Critical Illness (2 units).** (Not the same as course 217 prior to Fall Quarter 1994.) Prerequisite: course 216. Builds on pathophysiologic concepts and nursing management of critically ill adults presented in course 216. Emphasis on synthesis of research, theory, and experiential knowledge and skills to provide advanced preparation for critical care advanced practice nurses.

**217F. Human Responses to Critical Illness.** Lecture, three hours; discussion, one hour. Requisite: course 216F. Builds on pathophysiologic concepts and nursing management of critically ill adults presented in course 216F. Emphasis on synthesis of research, theory, and experiential knowledge and skills to provide advanced preparation for critical care advanced practice nurses.

**218A. Nursing Administration Theory.** Prerequisite: one organizational theory course. Application of organizational, communication, leadership, and management theories in health care systems, including content related to organizational structure, health care delivery models, and research design and methodologies.

**218B. Nursing Administration Theory.** Prerequisites: course 218A, one human resource management course, one finance course. Focus on synthesizing organizational and management theories in relation to health economics and finance, quality of care, resource management, informatics, law, policy, and ethics.

**218C. Nursing Administration Theory.** Prerequisite: course 218B or consent of instructor. Theories related to organizational development and change, political action, marketing, and public relations and the media, including ethics of decision making and local, national, and international markets.

**219A. Essentials of Accounting and Budgeting in Health Care Organizations.** (Not the same as course 219 prior to Winter Quarter 1995.) Prerequisite: graduate standing in nursing administration program or consent of instructor. Highly desirable: functional competency in use of an electronic spreadsheet (e.g., LOTUS or EXCEL). Theories of management, organization, and administration presented in relation to techniques of accounting, budgeting, finance, and health care economics. Focus on definition of terms and concepts, followed by practical applications within a variety of health care settings.

**219B. Operations Planning and Control for Nursing Administrators.** Prerequisites: course 219A or consent of instructor, functional competency in use of integrated spreadsheet/database/graphics software (e.g., LOTUS or EXCEL). Exposure to concepts, issues, and analytic techniques of C-B-A/C-E-A, CQI monitoring, decision making, forecasting, productivity determinations, and program planning and evaluation for nurse administrators. Emphasis on practical application of methods and techniques within health care arena.

**220. Theories of Instruction and Learning in Nursing (2 units).** (Not the same as course 220A prior to Fall Quarter 1995.) Theories of learning, curriculum and program development, and principles and techniques of evaluation. Consideration of needs of diverse populations in relation to educational activities. Description of educational opportunities for advanced practitioner in clinical nursing, staff development/continuing education, and academia.

**222. Immunosuppression and Patient Care (2 units).** Research related to immunosuppression, its causes, clinical manifestations, and modifiers. Special emphasis on physiologic and pathophysiologic mechanisms of immunosuppression as a basis for information used in patient education and clinical decisions, and supportive treatments and modifiers.

**223. Childhood Development: Research and Application to Nursing (2 units).** (Not the same as course 223 prior to Fall Quarter 1994.) Critique and evaluation of current research and theory in child development and their application to care of children. Provides scientific basis for understanding human growth and development, anticipating problems, and managing barriers to growth and development throughout childhood.

**224. Health-Related Problems of Vulnerable Populations (2 units).** Health-related research and models focusing on health promotion and health intervention, and health ethics and policy regarding vulnerable populations. Emphasis on vulnerable or at-risk social groups in the U.S.

**225. Pharmacology for Advanced Practice Nurses.** (Not the same as course 225 prior to Fall Quarter 1994.) Knowledge of and skills in pharmacology necessary for advanced practice nurses who have clients/patients with stable acute or chronic conditions.

**229. Biologic/Psychologic Interface in Health and Illness (2 units).** Interaction of physiologic, behavioral, and psychosocial factors in illness, and theory and research underlying these factors, including differential influence of gender, ethnicity, and culture.

**230. Human Physiology.** Requisite: course 105 or equivalent taken within past five years. Intended for graduate nursing students. Operative mechanisms and control of major portions of human organ systems (i.e., normal human physiology with application to pathophysiology). Builds on basic concepts of cell- and system-oriented physiology; presentation of emerging and topical issues affecting advanced practice and clinical management.

**231. Special Topics in Cellular Physiology (2 units).** Prerequisites: graduate standing in nursing, course 230. Functional organization and genetic control of human cell.

**232. Human Responses to Aging and Chronic Illness (2 units).** (Not the same as course 232 prior to Winter Quarter 1995.) Lecture, three hours. Pathophysiological concepts and nursing management of chronically ill older adults. Nursing aspects of selected dysfunctions and implications for advanced practice nurses.

**232F. Human Responses to Aging and Chronic Illness.** Lecture, three hours; field experiences. Pathophysiological concepts and nursing management of chronically ill older adults. Nursing aspects of selected dysfunctions and implications for advanced practice nurses.

**233. Human Responses to Aging and Chronic Illness (2 units).** (Not the same as course 233 prior to Fall Quarter 1994.) Requisite: course 232. Biopsychosocial concepts and nursing management of healthy, disabled, and chronically ill older adults, addressing pathophysiological aspects of common health problems. Implications for advanced practice in gerontology/chronic care nursing.

**233F. Human Responses to Aging and Chronic Illness.** Lecture, three hours; field experiences. Requisite: course 232F. Biopsychosocial concepts and nursing management of healthy, disabled, and chronically ill older adults, addressing pathophysiological aspects of common health problems. Implications for advanced practice in gerontology/chronic care nursing.

**234. Theoretical Foundations of Health Assessment of Women (3 units).** Lecture, two hours; laboratory, three hours. Prerequisite: course 192 or equivalent or consent of instructor. Theoretical basis for health assessment and changes in women during life cycle, with focus on physiologic, psychosocial, and behavioral factors underlying these changes and on theoretical components of nurse-midwifery management process.

**235. Reproductive Endocrinology (3 units).** Lecture, two hours; seminar, one hour. Current theory and research related to systematic evaluation of normal physiology discussed in reference to physiologic dynamic model. Highlights physiology and pathophysiology of menstrual cycle, puberty, menopause, parturition, postpartum, lactation, and placenta.

**236. Professional and Legal Issues in Nurse-Midwifery (2 units).** Prerequisite: graduate standing in advanced practice in nurse-midwifery option of master's program or consent of instructor. Current theory and research of advanced nursing roles, with emphasis on role of certified nurse/midwife. Organizational, administrative, legal, and ethical issues as required by certifying agencies.

**237A. Primary Care of Women: Antepartum Management (3 units).** Prerequisite: course 234. Presentation of current theory and relevant research on assessment and management of women during pregnancy, with emphasis on systematic evaluation of current nursing conceptual models in independent and collaborative care of these families. Review of management of normal pregnancy and health and social complications.

**237B. Primary Care of Women: Postpartum and Newborn Management (2 units).** Prerequisite: course 234. Presentation of current theory and relevant research on assessment and management of women during postpartum period and infants during first month of life. Emphasis on systematic evaluation of current nursing conceptual models in independent and collaborative care of these women and their newborns.

**237C. Primary Care of Women: Intrapartum Management.** Prerequisite: course 234. Critical analysis of theory, research, and knowledge related to primary and independent/collaborative care of intrapartum families. Management of spontaneous and assisted labors, births, and pain reduction, promotion of normal processes and management of complications.

**237E. Primary Care of Women: Family Planning and Gynecology Management.** Prerequisite: course 234 or consent of instructor. Presentation of critical analysis and application of family planning and gynecological theory, knowledge, and research. Emphasis on assessment and primary care strategies with reference to social, legal, and ethical issues in nurse-midwifery management.

**238A. Theoretical Foundations of Nursing of Children: Assessment and Health Guidance.** Requisite: course 200B. Theory and research emphasize interaction among developmental level, family characteristics, and environmental milieu as it affects child well-being. Advanced science base for assessment and anticipatory guidance for children and families to promote child wellness and diagnose common childhood illnesses.

**238B. Theoretical Foundations of Nursing of Children: Common Illnesses and Problems.** Prerequisite: course 238A. Theory and research emphasize physiological and psychological basis for common childhood illnesses and problems; evaluation of alternative therapies in research literature also emphasized. Advanced science base for assessment, diagnosis, and management of common childhood illnesses and problems.

**238C. Theoretical Foundations of Nursing of Children: Complex Health Problems.** Prerequisite: course 238B. Advanced science base for assessment, diagnosis, and ambulatory management of complex chronic and acute childhood illnesses. Theory and research emphasize physiological basis for complex disease entities; evaluation of alternative therapies in research literature also emphasized.

**239A. Biobehavioral Foundations of Acuity and Chronicity in Illness.** Requisites: courses 200A-200B. Organ systems approach to health maintenance and to acuity and chronicity in syndromes related to respiratory, cardiovascular, gynecological, and genitourinary organ systems. First of three-course sequence in diagnosis and management of commonly occurring medical and nursing health care problems managed by nurse practitioners in variety of clinical settings.

**239B. Biobehavioral Foundations of Acuity and Chronicity in Illness.** Requisite: course 239A. Organ systems approach to health maintenance and to acuity and chronicity in syndromes related to ocular, neurologic, endocrine, gastrointestinal, immunologic, hematologic, and dermatologic organ systems. Second of three-course sequence in diagnosis and management of commonly occurring medical and nursing health care problems managed by nurse practitioners in variety of clinical settings.

**239C. Biobehavioral Foundations of Acuity and Chronicity in Illness.** Prerequisite: course 239B. Review, analysis, and synthesis of current theory and research related to symptom meaning, presentation, and management. Special emphasis on acute and chronic problems across life span. Focus on advanced practice nursing assessment and intervention in common illness-associated symptoms.

**241. Biobehavioral Foundations of Neuropsychiatric Assessment (2 units).** Lecture, three hours. Biologic and behavioral theories and research from variety of disciplines, including nursing, for application to neuropsychiatric assessment. Exploration of research underlying assessment and diagnosis of cognitive, addictive, and affective dysfunctions, with emphasis on developing a nursing model.

**241F. Biobehavioral Foundations of Neuropsychiatric Assessment.** Lecture, three hours; field experiences. Requisites or corequisites: courses 200A-200B. Biologic and behavioral theories and research from variety of disciplines, including nursing, for application to neuropsychiatric assessment. Exploration of research underlying assessment and diagnosis of cognitive, addictive, and affective dysfunctions, with emphasis on developing a nursing model.

**242. Biobehavioral Foundations of Neuropsychiatric Nursing Care (2 units).** Lecture, three hours. Biologic and behavioral research from variety of disciplines, including nursing, for application to treatment of neuropsychiatric dysfunction. Exploration of research underlying treatment interaction in cognitive, addictive, and affective dysfunctions, with emphasis on developing a nursing model.

**242F. Biobehavioral Foundations of Neuropsychiatric Nursing Care.** Lecture, three hours; field experiences. Requisite: course 241F. Biologic and behavioral research from variety of disciplines, including nursing, for application to treatment of neuropsychiatric dysfunction. Exploration of research underlying treatment interaction in cognitive, addictive, and affective dysfunctions, with emphasis on developing a nursing model.

**264. Professional Issues in Nursing (3 units).** (Not the same as course 264 prior to Fall Quarter 1994.) Prerequisite: course 418A or 438A or 439A. Concepts of collegial practice, interprofessional and intraprofessional relationships, legal issues, and socioeconomic aspects of health care delivery.

**M273. Advanced Seminar: Medical Anthropology.** (Same as Anthropology M263Q, Community Health Sciences M244, and Psychiatry M273.) Seminar, three hours. Prerequisite: consent of instructor. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works.

**M290A-M290B-M290C. Child Abuse and Neglect (2 units, 2 units, 1 unit).** (Same as Community Health Sciences M245A-M245B-M245C, Dentistry M300.5A-M300.5B-M300.5C, Education M217G-M217H-M217I, Law M281A-M281B, Medicine M290A-M290B, and Social Welfare M290E-M290F-M290G.) Course M290A is prerequisite to M290B, which is prerequisite to M290C. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies. S/U or letter grading.

**299A. Nursing Research Seminar.** Seminar, three hours. Prerequisites: courses 206A-206B, 207, 208, one cognate area course. Seminar to assist students who are beginning careers in scientific research to understand issues of misconduct and scientific integrity. Highlights faculty expertise in research, culminating in communication and dissemination of their research. S/U grading.

**299B-299C. Nursing Research Seminars (1 to 4 units each).** Seminar, one hour; discussion, one to four hours. Prerequisites: courses 206A-206B, 207, 208, statistics sequence in cognate area. Seminars to assist students throughout execution of their dissertations, beginning with selection of a researchable problem and culminating in communication and dissemination of their research. S/U grading.

**299D. Nursing Research Seminar (1 to 4 units).** Seminar, one hour; discussion, one to four hours. Prerequisites: courses 206A-206B, 207, 208, 220 or equivalent, statistics sequence in cognate area. Seminar to assist students to prepare for careers in academic settings, with focus on teaching. S/U grading.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**M410A. Nursing Care of Children with Developmental Disabilities.** (Same as Psychiatry M472A.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisite: consent of instructor. Study of disability conditions of childhood and their effects on the child and family. Content based on normative developmental models with consideration for sociocultural diversity. Emphasis on prevention, systematic assessment, and planning of care for the individual and family. Introduction to implementation of intervention strategies. Series of three courses integrates didactic material and clinical experience.

**M410B. Nursing Care of Children with Developmental Disabilities.** (Same as Psychiatry M472B.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisites: course M410A and/or consent of instructor. Study of philosophical and conceptual models affecting care delivery for persons with developmental disabilities. Emphasis on intervention strategies necessary for primary, secondary, and tertiary prevention.

**M410C. Nursing Care of Children with Developmental Disabilities.** (Same as Psychiatry M472C.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisites: course M410B and/or consent of instructor. Exploration and participation in assessment, planning, and delivery of health care to children with developmental disabilities in a variety of settings. Emphasis on expanded role of the nurse.

**418A. Nursing Administration Practicum (2 units).** Practicum, six hours. Corequisite: course 218A. Analysis, evaluation, and application of organizational theory within leadership and management roles in organizations involved with health care. Provides a practice setting to apply theory, particularly content of course 218A, under supervision of a skilled preceptor.

**418B. Nursing Administration Practicum (2 units).** Practicum, six hours. Corequisite: course 218B. Synthesis and application of previous learning and organizational theories in development of organizational strategies in relation to health economics and finance, quality patient care, resource management, informatics, law, policy, and ethics. Provides a practice setting to apply theory, particularly content of course 218B, under supervision of a skilled preceptor.

**418C. Nursing Administration Practicum (2 units).** Practicum, six hours. Corequisite: course 218C. Participation in and evaluation of processes of project management, organizational development and change, political influence outside the organization, maximizing diverse relationships and relationships with physicians, administrators, and boards, marketing, dealing with the media, and ethics of administration decision making. Provides a practice setting to apply theory, particularly content of course 218C, under supervision of a skilled preceptor.

**418D. Nursing Administration Residency (10 units).** Seminar, two hours; practicum, 32 hours. Prerequisite: course 418C. Students assume leadership role in planning, managing, and evaluating an administrative project, and demonstrate expertise in application and evaluation of organizational theories in multiple roles. Students also plan for future continuous personal and professional growth.

**437A. Primary Care of Women: Antepartum Clinical Management.** Clinical, 11 hours; clinical conference, one hour. Corequisite: course 237A. Application of theory, knowledge, and research of primary care of women during antepartum period, with emphasis on counseling and screening for prevention and early detection of common risk conditions that may complicate prenatal period.

**437B. Primary Care of Women: Postpartum and Newborn Clinical Management (3 units).** Clinical, eight hours; clinical conference, one hour. Corequisite: course 237B. Application of knowledge to management of postpartum women and newborns, with emphasis on interventions to assist with breastfeeding and counseling about interconceptional family planning and prevention of complications in newborn's transition to extrauterine life.

**437C. Primary Care of Women: Intrapartum Clinical Management.** Clinical, 12 hours. Corequisite: course 237C. Intrapartum management for clients through screening, assessment, diagnosis, and care that promotes health and prevents complications. Supervised experience in episiotomies and emergency situations provided.

**437D. Primary Care of Women: Intrapartum Clinical Management.** Clinical, 11 hours; clinical conference, one hour. Prerequisite: course 437C. Synthesizing previous work, students continue to learn assessment and management of intrapartum family. Special emphasis on utilization and interpretation of ultrasonography in low-risk labor and delivery and refinement of delivery skills.

**437E. Primary Care of Women: Family Planning and Gynecology Clinical Management.** Clinical, 11 hours; clinical conference, one hour. Corequisite: course 237E. Primary care for gynecology, family planning, sexually transmitted diseases, and premenopausal and perimenopausal women/families. Principles of prevention, assessment, diagnosis, treatment, and counseling applied in clinical experiences, case studies, and skills laboratories.

**437F. Primary Care of Women: Nurse-Midwifery Integration (8 units).** Clinical, 24 hours (10 weeks) or 40 hours (six weeks). Prerequisite: course 437E. Students assume management responsibility for full scope of nurse-midwifery practice, providing continuity and comprehensive obstetric care to the child-bearing woman, care to the newborn, family planning, and gynecologic care to the well woman. Students expected to implement one of the functional aspects of clinical nurse specialist role (i.e., educator, practitioner, researcher, or consultant).

**438A. Advanced Practice Nursing in Care of Children: Wellness Care (2 units).** Clinical practicum, six hours. Prerequisite: course 238A. Development of expanded skills in comprehensive assessment and provision of anticipatory guidance for children and families to promote child wellness. Application of theory and research in provision of wellness care throughout childhood years.

**438B. Advanced Practice Nursing in Care of Children: Management of Common Illnesses.** Clinical practicum, 12 hours. Prerequisite: course 238B. Development of expanded skills in comprehensive assessment and management of common childhood illnesses and problems; students continue to gain skills in promoting child wellness. Application of theory and research in care of common illnesses throughout childhood years.

**438C. Advanced Practice Nursing in Care of Children: Management of Complex Health Problems.** Clinical practicum, 12 hours. Prerequisite: course 238C. Development of expanded skills in assessment and ambulatory management of complex acute and chronic childhood illnesses. Application of theory and research in provision of care for complex acute and chronic illnesses throughout childhood years.

**438D. Pediatric Primary Care: Residency (9 units).** Clinical practicum, 27 hours. Prerequisites: courses 238C, 438C. Students assume primary responsibility for planning, managing, and evaluating care of children. Research, theory, and clinical knowledge analyzed, integrated, and applied to care of children and families with actual or potential health problems.

**439A. Advanced Practice Nursing: Clinical Practicum (2 units).** Clinical practicum, six hours. Corequisite: course 239A. Advanced practice nursing in critical care, family, gerontology/chronic care, occupational health, and oncology. Nursing management and evaluation of health problems in selected populations. Developmental needs of clients in relation to family, social, and cultural structures.

**439B. Advanced Practice Nursing: Clinical Practicum.** Clinical practicum, 12 hours. Corequisite: course 239B. Continuation of course 439A for advanced practice nurses, with emphasis on nursing management of acute and chronic health problems in selected populations. Developmental needs of clients in relation to family, social, and cultural structures.

**439C. Advanced Practice Nursing: Clinical Practicum.** Clinical practicum, 12 hours. Corequisite: course 239C. Third clinical practicum course for advanced practice nurses, with focus on nursing assessment and intervention in common illness-associated symptoms. Special emphasis on acute and chronic problems across life span, including review and analysis of current theory and research.

**439D. Advanced Practice Nursing: Residency (9 units).** Clinical practicum, 27 hours. Requisites: courses 239C, 439C. Residency in advanced practice role where students assume primary responsibility for planning, managing, and evaluating care of clients in specialty setting. Emphasis on application and integration of theory, research, and clinical knowledge in advanced practice role.

**441. Neuropsychiatric Subspecialty Clinical Seminar (1 unit).** Clinical seminar, one hour; self-study, two hours. Requisites: courses 241F, 242F. For advanced practice nurses in any adult nurse practitioner specialty. Neuropsychiatric assessment, treatment, and case presentations in selected populations with addictive, affective, and cognitive dysfunctions in relation to family, social, and cultural structures. S/U grading.

**442. Neuropsychiatric Subspecialty Clinical Seminar (1 unit).** Clinical seminar, one hour; self-study, two hours. Requisite: course 441. For advanced practice nurses in any adult nurse practitioner specialty. Continuation of course 441. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA assistant dean and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward M.S.N. degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

**596. Directed Individual Study or Research (4 to 8 units).** Prerequisite: consent of instructor. Opportunity for individual graduate students in nursing to pursue special studies or research interests. May be repeated for credit, but only four units may be applied toward graduate degree requirements. S/U grading.

**597. Individual Study for Comprehensive Examination (4 to 8 units).** May be repeated once for credit, but only four units may be applied toward M.S.N. degree requirements. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation (2 to 8 units).** Individualized faculty supervision of doctoral dissertation research by student's chair. May be repeated for credit, but only eight units may be applied toward doctoral degree requirements. S/U grading.

## OBSTETRICS AND GYNECOLOGY

*School of Medicine*

UCLA  
27-117A Center for the Health Sciences  
Box 951740  
Los Angeles, CA 90095-1740  
(310) 794-1884  
<http://www.mednet.ucla.edu/som/deptlist.htm>

### Chairs

Alan H. DeCherney, M.D., *Executive Chair*  
Teichiro Fukushima, M.D., *Acting Vice Chair, King/Drew*  
Howard L. Judd, M.D., *Vice Chair, Olive View-UCLA*  
Lawrence Platt, M.D., *Vice Chair, Cedars-Sinai*  
Michael G. Ross, M.D., *Vice Chair, Harbor-UCLA*

### Scope and Objectives

The medical student program in obstetrics and gynecology is designed to provide firm background in the essentials of women's health. Through a combination of didactic instruction

and supervised clinical experience, students acquire the relevant clinical skills of history taking and physical examination and learn reproductive physiology from infancy to the postmenopausal period; antepartum, intrapartum, and postpartum obstetric care; and recognition and management of various gynecologic disorders. Third-year students work in ambulatory clinics and on inpatient services during a six-week core clerkship. Greater depth of experience is provided by elective clerkships during the fourth year which emphasize subspecialties such as maternal/fetal medicine, reproductive endocrinology, gynecologic oncology, and family planning.

For further details on the Department of Obstetrics and Gynecology and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## OPHTHALMOLOGY

*School of Medicine*

UCLA  
2-142 Stein Eye Institute  
Box 957000  
Los Angeles CA 90095-7000  
(310) 825-5053  
<http://www.mednet.ucla.edu/som/jseil>

### Chairs

Bartly J. Mondino, M.D. (*Wasserman Professor of Ophthalmology*), *Chair*  
Sherwin J. Isenberg, M.D. (*Grace and Walter Lantz Endowed Professor*), *Vice Chair, Harbor-UCLA*  
Arthur L. Rosenbaum, M.D., *Vice Chair*

### Scope and Objectives

Ophthalmology is the medical science that encompasses knowledge concerning the eyes and the visual system. Derived from many basic and clinical fields, this knowledge must be synthesized by the physician and applied to the prevention, diagnosis, medical management, and surgical therapy of ocular disease.

In response to the steadily increasing incidence and growing importance of ocular disorders, the Department of Ophthalmology and the Jules Stein Eye Institute (including the Doris Stein Eye Research Center) are closely coordinated to form a comprehensive center for research in the sciences related to vision, for the care of patients with disease of the eyes and related structures, and for education in the broad field of ophthalmology.

The Department of Ophthalmology provides instruction to medical students during the second, third, and fourth years. Through lectures, demonstrations, discussions, and the opportunity to observe patients and review data on cases with a variety of ocular conditions, students gain knowledge and experience in ophthalmology.

For further details on the Department of Ophthalmology and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## ORAL BIOLOGY

*School of Dentistry*

UCLA  
63-050 Dentistry  
Box 951668  
Los Angeles, CA 90095-1668  
(310) 825-1955  
[http://www.dent.ucla.edu/sod/depts/oral\\_bio/](http://www.dent.ucla.edu/sod/depts/oral_bio/)

George W. Bernard, D.D.S., Ph.D., *Chair*

### Professors

George W. Bernard, D.D.S., Ph.D.  
Douglas Junge, Ph.D.  
No-Hee Park, D.M.D., Ph.D.  
Lawrence E. Wolinsky, D.D.S., Ph.D.  
John A. Yagiela, D.D.S., Ph.D.

### Professors Emeriti

Colin K. Franker, Ph.D.  
Louis J. Goldberg, D.D.S., Ph.D.

### Associate Professors

Francesco Chiappelli, Ph.D., *Acting*  
Robert Chiu, Ph.D.  
Jacob Fleischmann, M.D.  
Kenneth T. Miyasaki, D.D.S., M.S., Ph.D.

### Assistant Professors

George Huang, Ph.D.  
Susan A. Kinder, D.M.D., M.D.S., Ph.D.  
Wenyuan Shi, Ph.D.  
Igor Spigelman, Ph.D.

### Adjunct Professor

Bernard G. Sarnat, M.D., M.S., D.D.S.

### Adjunct Associate Professors

Carol A. Bibb, Ph.D., D.D.S.  
Christine L. Quinn, D.D.S., M.S.

### Adjunct Assistant Professor

Diana Messadi, D.D.S., Ph.D.

### Scope and Objectives

Oral biology is that area of knowledge which deals with the development, structure, and function of the oral tissues and their interrelationships with other organ systems in normal and disease states. It is a multidisciplinary field that includes cell biology, morphology, molecular biology, biochemistry, neuroscience, immunology, microbiology, and virology. The objective of the graduate program is to provide students with a sound foundation in these areas in order to pursue an academic or research career.

### Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

In addition to meeting the general admission requirements set by the Graduate Division, applicants to the Master of Science program must have received a B.S., D.D.S., or D.M.D. degree, or the equivalent, with strong background in basic sciences, including two years of chemistry (inorganic, organic, and biological chemistry), one year of biology, and one year of physics.

Applicants must submit three letters of recommendation, at least two of which should be from science faculty familiar with their scholarly abilities, and a statement of purpose describing the applicant's background, work experience, research interests, and career goals.

Applicants may apply for a combined D.D.S./M.S. or advanced certificate training/M.S. by making simultaneous application for graduate study in Oral Biology and for admission to the School of Dentistry and to the certificate programs. A separate application must be submitted to Graduate Admissions. Applicants must be accepted by both of the concerned units in order to participate in a combined program.

### Areas of Study

Bacterial and fungal pathogenesis, biochemistry, calcified tissue metabolism and developmental biology, immunology, neuroscience, pharmacology and therapeutics, and virology.

### Course Requirements

A total of 36 units is required to satisfy the degree requirements. Eight core courses (Oral Biology 201A-201B-201C, 202, 206, 260, 275, and Biomathematics 170A) are required. These should be taken during the first year of graduate study.

Additional elective courses (a minimum of five units), either at the upper division or graduate level, essential to the research area must be taken.

Eight units of courses 596 and 598 may be applied toward the total requirement, but only four units may be applied toward the minimum graduate course requirement.

### Comprehensive Examination Plan

None.

### Thesis Plan

The thesis is intended to demonstrate the student's ability to design and carry out a research project, and analyze and present the resulting data. Results are expected to be of publishable scientific quality. The subject of the thesis must be approved by the graduate adviser and research mentor. At the end of the first year of study, the student should prepare and send a proposal of the research project to the graduate adviser.

## Doctoral Degree

### Admission

In addition to meeting the general admission requirements set by the Graduate Division, applicants must have received a B.S., D.D.S., or D.M.D. degree, or the equivalent, with strong background in basic sciences, including two years of chemistry (inorganic, organic, and biological chemistry), one year of biology, and one year of physics.

Applicants must submit three letters of recommendation, at least two of which should be from science faculty familiar with their scholarly abilities, and a statement of purpose describing the applicant's background, work experience, research interests, and career goals.

Applicants may apply for a combined D.D.S./Ph.D. or advanced residency training/Ph.D. by making simultaneous application for graduate study in Oral Biology and for admission to the School of Dentistry and to the residency programs. A separate application must be submitted to Graduate Admissions. Applicants must be accepted by both of the concerned units in order to participate in a combined program.

### Major Fields or Subdisciplines

Bacterial and fungal pathogenesis, biochemistry, calcified tissue metabolism and developmental biology, immunology, neuroscience, pharmacology and therapeutics, and virology.

### Course Requirements

In the first two years Oral Biology 201A-201B-201C, 206, 275 and Biomathematics 170A are required. Two laboratory rotations (Oral Biology 596) and the seminar (Oral Biology 260) are also required.

In the second year, students are expected to choose an area of emphasis and continue to take additional required and elective courses (a minimum of four to five courses). A menu of the second-year curriculum in each area of emphasis is available in the program office.

### Written and Oral Qualifying Examinations

By the beginning of the second year of study, the student is responsible, with the advice and consent of the graduate adviser, for organizing the guidance committee. Faculty members constituting the guidance committee include the student's research mentor and two others from the student's areas of emphasis. The guidance committee is responsible for approving the course of the student's doctoral study and conducting a review of the student's progress. The members of the guidance committee plus one more faculty member serve on the doctoral committee: three members must be from the section of Oral Biology in Dentistry and one member must be from a department outside the School of Dentistry.

After the completion of the core course requirements, a broad essay-type examination in the major areas of oral biology and cell biology is given by the graduate training committee.

Based on the result of the written qualifying examination as well as performances in coursework, recommendations are made to the student to (1) continue with the Ph.D. program requirements, (2) schedule a retake of the written qualifying examination, (3) be directed to the M.S. program, or (4) be terminated. Permission to retake the examination is granted by the graduate training committee no more than two times.

After satisfactory completion of the written qualifying examination, it is expected that the University Oral Qualifying Examination be completed, preferably by the end of the summer of the second year.

The examination consists of a proposal that outlines the dissertation research, providing a review of the literature, a statement of the aims of the research, and a description of the planned research activities. Discussion of the written proposal followed by a question and answer period on general topics related to oral biology is performed.

The guidance committee's decision to advance the student to candidacy, to allow for repeating the examination, or to disqualify from the program is based on the quality of the written proposal, the adequacy of the oral presentation, the overall record at UCLA as reflected in coursework, and the research ability as judged by an abstract of the research submitted with the proposal and the research mentor's written assessment.

## Oral Biology

### Graduate Courses

**201A-201B-201C. Advanced Oral Biology (3 units, 2 units, 3 units):**

**201A.** Ontogenesis. Evolutionary perspective of cellular development from simple molecules that were formed during the first billion years of the Earth to development of cells, tissues, and organs of invertebrates and vertebrates. Development of vertebrate feeding apparatus from a comparative anatomical and physiological point of view, followed by embryogenesis of orofacial and dental structures of humans.

**201B.** Homeostasis in Oral Systems. Normal regulatory functions of various oral systems. Topics include mechanisms of salivary secretion and nonspecific salivary protective mechanisms; integrative action of oral sensory systems such as touch, pain, and taste; normal control of movements in jaw and face.

**201C.** Pathobiology. Molecular basis for pathogenic processes in tissues of the oral cavity. Topics include microbially mediated demineralization of hard tissues, soft tissue infections, carcinogenesis, colonization of mucosal substrates by opportunists, etc.

**202. Principles and Methods of Research.** Discussion, two hours. Prerequisite: consent of instructor. Examination and discussion of various approaches to research methodology, from formation of hypotheses to experimental testing and analysis and interpretation of data. Library work to be studied from standpoint of obtaining background information and writing a paper. Hypotheses based on class members' interests to be critiqued and elaborated into research proposals. Research faculty to speak informally on their individual approaches to scientific investigation.

**M203. Oral Embryology and Histology.** (Same as Neurobiology M229.) Lectures and laboratory instruction in development and histological structure of facial region and oral and peri-oral organs and tissues.

**M204. Mechanisms and Relief of Pain (2 units).** (Formerly numbered 204.) (Same as Neuroscience M233.) Advanced treatment of neuroanatomical, neurophysiological, and biochemical bases of pain perception. Topics include classical pain theories, pain receptors and pathways, endogenous mechanisms of pain modulation, and pharmacological basis for treatment of pain disorders.

**206. Current Topics in Oral Immunology (1 unit).** Preparation: basic immunology. Discussion and analysis of current research dealing with immunological issues related to oral health, including HIV, opportunistic oral infections, periodontal pathology, oral immunopathology, caries immunology, endodontic immunology, etc.

**211. Biology of the Temporomandibular Joint (2 units).** Anatomy, histology, physiology, and biomechanics of the temporomandibular joint (TMJ) and related musculature. Pain mechanisms, sensorimotor integration, and motor mechanisms in TMJ function, and current methods of TMJ imaging.

**226A-226B. Craniofacial Growth and Development (2 units each).** Prerequisite: strong background in histology and embryology. Students acquire, from scientific literature discussed in lecture/seminar format, advanced knowledge of relevant aspects of human biology as they apply to classic and current concepts of principles governing growth and development of craniofacial region. Students required to present seminars on assigned topics which aid their understanding and analysis of course content that has application to their specific and professional fields. In Progress grading.

**227. Dental Embryology and Histology (2 units).** Description and interpretation of important stages in development of the orofacial apparatus and histological features of its component tissues. Critique of scientific literature relevant to course content and analysis of current state of knowledge about selected features of the orofacial apparatus which are of significance to clinical dental specialists.

**228. Dental Pharmacology and Therapeutics (2 units).** Lecture, three hours. Survey of pharmacology, with particular emphasis on how drugs interact with dentistry. General principles of drug action and drug effects on autonomic and central nervous systems.

**M234. Seminar: Developmental Neuroendocrine-immunology (2 units).** (Same as Neurobiology M234.) Prerequisite: graduate standing or consent of instructor. Psychological and physiological processes intertwine, and one important aspect of psychoneuroimmunological research is characterization of mechanisms that underlie these interactions. Examination of current literature on neuroimmune interaction from a developmental perspective. S/U or letter grading.

**260. Oral Biology Seminar (2 units).** Seminar, one hour; outside research, one hour. Research seminar to discuss faculty and student research of oral biology and related disciplines. Discussion of basic sciences related to oral biology, involving participants in important areas of investigation. S/U grading.

**273. Research in Clinical Immunology and Lymphology (2 units).** Lecture, one hour; discussion, one hour. Forum for discussion of cutting-edge topics in immunology and lymphology from clinical perspective. Emphasis on immune surveillance and lymphatic drainage of oral pathologies associated with AIDS and other diseases.

**275. Molecular and Cell Biology for Oral Biology Graduate Students (3 units).** Lecture, two hours; literature review, one hour. Advanced course on prokaryotic and eukaryotic molecular and cell biology, with emphasis on applications in dental research.

**M293. Major Concepts in Oncology.** (Same as Microbiology and Immunology M293 and Pathology M293.) Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Designed for graduate students contemplating research in oncology. Topics include cancer pathophysiology, genetics, membranes, macromolecular synthesis and control, cell cycle, growth control; physical, chemical, and viral oncogenesis, epidemiology of cancer; tumor immunology; principles of cancer surgery, radiation therapy, and chemotherapy. S/U or letter grading.

**596. Directed Individual Study or Research (2 to 8 units).** S/U grading.

**597. Preparation for Ph.D. Qualifying Examinations (4 to 8 units).** S/U grading.

**598. Thesis Research and Preparation (2 to 8 units).** S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation (4 to 8 units).** S/U grading.

## ORGANIZATIONAL STUDIES

*Interdepartmental Program  
College of Letters and Science*

UCLA  
4256 Bunche Hall  
Box 951472  
Los Angeles, CA 90095-1472

(310) 825-3862  
<http://www.sscnet.ucla.edu/polisci/>

Eric H. Monkkonen, Ph.D., *Chair*

### Professors

Bryan C. Ellickson, Ph.D. (*Economics*)  
Oscar Grusky, Ph.D. (*Sociology*)  
Eric H. Monkkonen, Ph.D. (*History*)

## Scope and Objectives

Organizations are multifaceted and can usefully be explored from more than one disciplinary perspective. The undergraduate specialization in organizational studies brings together students and faculty from the Departments of Economics, Geography, History, Political Science, Psychology, and Sociology who share an interest in modern organizations. The program gives students a solid grounding in the organizational perspectives and methods of at least two departments. The specialization must be taken in conjunction with a major in the social sciences.

## Undergraduate Study

### Organizational Studies Specialization

Students may elect to combine the organizational studies specialization with a departmental major and may petition to have the area of specialization recognized with the bachelor's degree.

The option of completing an individual major in organizational studies is also open to qualified students. For more information on individual

majors, see the College of Letters and Science section of this catalog.

Students with a departmental major should seek advising in their major department. Those interested in the individual major should consult a Letters and Science counselor.

Courses within the specialization must be taken for a letter grade. The specialization must be taken in conjunction with a major in the division of social sciences.

### Preparation for the Specialization

*Required:* At least five of the following courses appropriate to the courses to be taken in the specialization: Economics 1, 2; Geography 4; Psychology 10; Sociology 1, or 18 and 104 or equivalent.

### Upper Division Requirements

*Required:* Nine upper division courses, including (1) at least three courses outside the major department selected from Management 190, Political Science 146D, Sociology 168, 173; (2) a minimum of three courses selected from one of the following suites within the major department: Economics 147A, 147B, 170, 171; Geography 148, M149; Political Science 141C, 142A, 142B, 146E; Psychology 135; Sociology 132, 135, 156, 182; (3) a minimum of three courses selected from one of the suites in item 2 in a department outside the major department; (4) internship experience in a governmental or service organization.

Professor Eric H. Monkkonen (9252 Bunche Hall, 310-825-3376) is the program adviser. For further information, contact the political science undergraduate counselor in the program office.

## ORTHOPAEDIC SURGERY

*School of Medicine*

UCLA  
76-134 Center for the Health Sciences  
Box 956902  
Los Angeles, CA 90095-6902

(310) 825-2744  
<http://www.mednet.ucla.edu/som/deptlist.htm>

### Chair

Gerald A.M. Fineerman, M.D., *Interim Chair*

## Scope and Objectives

The medical student program in orthopaedic surgery is designed to provide experience in understanding the diagnosis and management of disorders of the musculoskeletal system. Through a combination of didactic instruction and supervised clinical experience, students acquire the clinical skills of history taking and physical examination of the musculoskeletal system. Diagnosis and orthopaedic

management of bone and soft tissue trauma, skeletal development defects, tumor, spinal disorders, hand and foot disorders, and arthritis are primary objectives. Third-year students work in ambulatory clinics and on inpatient services during their core surgical clerkship. Fourth-year electives provide the opportunity for in-depth experience on rotations at the UCLA Medical Center and affiliated institutions and emphasize subspecialties such as joint replacement, sports medicine, orthopaedic oncology, metabolic bone disorders, hand and foot surgery, spinal surgery, and pediatric orthopaedics.

For further details on the Department of Orthopaedic Surgery and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## Orthopaedic Surgery

### Upper Division Course

**102. Gross Anatomy of the Human Body (8 units).** (Formerly numbered Anatomy 102.) Lecture, three hours; laboratory, nine hours. Prerequisites: dental or graduate student standing, consent of instructor. Systemic and topographical human anatomy, with dissection of human cadaver. Emphasis on head and neck. P/NP grading.

### Graduate Courses

**205A-205B. Gross and Developmental Anatomy for Medical Students (5 units each).** (Formerly numbered Anatomy 205A-205B.) Lecture/laboratory, three four-hour sessions (16 weeks beginning in August). Prerequisites: medical student standing, consent of instructor for nonanatomy majors. Gross anatomy, embryology, and radiological anatomy of the human body as taught by lectures, demonstrations, and dissections. **205A.** Limbs, Thorax, and Abdomen (first eight weeks); **205B.** Pelvis, Head, and Neck.

**207. Gross and Developmental Anatomy for Graduate Students (12 units).** (Formerly numbered Anatomy 207.) Lecture/laboratory, three four-hour sessions (16-week semester). Prerequisite: consent of instructor. Gross anatomy, embryology, and radiological anatomy of the human body as taught by lectures, demonstrations, and dissections. Trunk and extremities; head and neck.

## PATHOLOGY AND LABORATORY MEDICINE

<http://www.pathnet.medsch.ucla.edu/>

Jonathan Braun, M.D., Ph.D., *Chair*  
David D. Porter, M.D., *Vice Chair*

### Professors

Sanford H. Barsky, M.D.

Judith A. Berliner, Ph.D., *in Residence*  
Jonathan Braun, M.D., Ph.D.  
Alistair J. Cochran, M.D., *in Residence*  
Kenneth Dorshkind, Ph.D.  
Rita B. Effros, Ph.D., *in Residence*  
Michael Fishbein, M.D.  
Tomas Ganz, M.D.  
Richard A. Gatti, M.D., *in Residence*  
Oliver Hankinson, Ph.D., *in Residence*  
Peter J. Howanitz, M.D.  
Klaus J. Lewin, M.D.  
Faramarz Naeim, M.D., *in Residence*  
Roberta K. Nieberg, M.D.  
Donald E. Paglia, M.D.  
Lawrence D. Petz, M.D., *in Residence*  
David D. Porter, M.D.  
Denis O. Rodgers, Ph.D., *in Residence*  
Jonathan Said, M.D.  
George S. Smith, M.D.  
Harry V. Vinters, M.D.

### Professors Emeriti

Marcel A. Baluda, Ph.D.  
Walter F. Coulson, M.D.  
Robert Y. Foos, M.D.  
Harrison Latta, M.D.  
Sidney C. Madden, M.D.  
Julien L. Van Lancker, M.D.  
M. Anthony Verity, M.D.  
Roy L. Walford, M.D.

### Associate Professors

Linda G. Baum, M.D., Ph.D.  
Sunita M. Bhuta, M.D.  
David A. Bruckner, Sc.D.  
Thomas A. Drake, M.D., *in Residence*  
Ben J. Glasgow, M.D.  
Wayne W. Grody, M.D., Ph.D., *in Residence*  
Sharon L. Hirschowitz, M.D.  
Nir Kossovsky, M.D.  
James McBride, Ph.D.  
Elizabeth A. Wagar, M.D.

### Assistant Professors

Xin Liu, M.D., Ph.D.  
Scott D. Nelson, M.D.  
Julia L. Phillipson, M.D.  
Kathleen Sakamoto, Ph.D.  
Jeffery L. Twiss, M.D.  
Cynthia Welsh, M.D.

## Scope and Objectives

Pathology is, by definition, the science of disease. Its main purpose is to unravel disease mechanisms. Without it, progress in prevention, diagnosis, and therapy are left to chance. Yet, among medical disciplines, it is one of the youngest because scientific concepts of disease, based on direct observation of diseased organs, developed only in the last 150 years.

Once normal molecules, cells, and organs have been damaged, the result of the injury manifests itself by distortions of behavior at the molecular, cellular, and organ levels. The study of these injuries and reactions to injuries constitutes a body of knowledge well worth mastering for its own sake. Students, however, must also learn to use the existing tools or develop the new tools needed to dissect the events that follow injury. Although education in methodology is not, in principle, different in pathology from that in all other biomedical sciences, it is very different in scope.

A combined education in breadth and depth is indispensable; it is this education, as it is applied to injuries and reaction to injuries, that is

the goal of the Ph.D. program in Experimental Pathology.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

Students are only accepted into the program for the purpose of obtaining a Ph.D. in Experimental Pathology. However, the department also awards a Master of Science degree in Experimental Pathology in cases where a student was unable to finish the full Ph.D. program but whose completed work is adequate to the standards and minimum requirements set for a master's degree.

### Areas of Study

Consult the department.

### Course Requirements

Students must complete the core courses and the six elective units required of all experimental pathology graduate students. The minimum number of units required is 36, and the minimum number of graduate units required is 35. The maximum number of units permitted in the 500 series is eight units, and the maximum number of 500-series units that may be applied toward the graduate course requirement is four units.

Students must take the written qualifying examination. An M.S. student must answer at least two thirds of the questions on this examination and pass with a minimum grade of B. Students have the same amount of time as Ph.D. students to complete the examination.

Students must execute an original scholarly research project. This project must be approved by a committee of three faculty. Students then must write up the project as a thesis which requires approval of the same committee. The student and the faculty adviser must select two other faculty members for the committee. Members of the committee must be in the department.

### Comprehensive Examination Plan

Consult the department.

### Thesis Plan

Consult the department.

## Doctoral Degree

### Admission

Admission to the program is through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences. Information may be obtained from UCLA ACCESS, 172 MBI, UCLA, Los Angeles, CA 90024-1570, (310) 206-6051.

## Major Fields or Subdisciplines

Consult the graduate adviser.

## Course Requirements

### First Year

Fall Quarter: Biological Chemistry CM253, one seminar course, one laboratory rotation.

Winter Quarter: Neurobiology M209A or Biological Chemistry CM267, one seminar course, one laboratory rotation.

Spring Quarter: Choice of elective (for students obtaining degrees in experimental pathology, this is normally four units of basic mechanisms of disease), one seminar course, one laboratory rotation.

### Second Year

Fall Quarter: Pathology and Laboratory Medicine 250A. (Students who have not taken basic mechanisms take a taped course and the seminar.)

Winter Quarter: Six units from Pathology and Laboratory Medicine 234A, 234B, 234C, 234D; Pathology and Laboratory Medicine 250B.

Spring Quarter: Pathology and Laboratory Medicine 250C.

## Written and Oral Qualifying Examinations

The written examination must be completed by the end of the second year, after the core course requirements are completed.

The examination consists of the submission of a written grant proposal related to the general areas of the student's dissertation, yet different from the dissertation. The format of the proposal is based on the first award application from the Public Health Service Grant application, with minor modifications. The proposal must be submitted by the middle of September of the student's second year. Students must take the University Oral Qualifying Examination by the end of September of that year.

# Pathology and Laboratory Medicine

## Upper Division Course

**199. Special Studies (2 to 6 units).** Supervised laboratory research, 10 hours minimum. Prerequisite: consent of instructor. Students select instructor among eligible research faculty and carry out independent laboratory research project under instructor supervision. P/NP or letter grading.

## Graduate Courses

**200A. Dental Pathology (3 units).** Lecture, 90 minutes; laboratory, three hours. Prerequisite: consent of instructor. Fundamental causes of disease processes, using as examples selected lesions or diseases of major organ systems.

**M215. Interdepartmental Course: Tropical Medicine (2 units).** (Same as Medicine M215, Microbiology and Immunology M215, and Pediatrics M215.) Lecture, two and one-half hours. Prerequisites: basic courses in microbiology and parasitology of infectious diseases in School of Medicine or Public Health. Study of current knowledge about diseases prevalent in tropical areas of the world. Major emphasis on infectious diseases, with coverage of problems in nutrition and exotic noninfectious diseases. Syllabus supplements topics covered in classroom. S/U grading.

**231A. Pathological Anatomy and Physiology (6 units).** Lecture, two hours; discussion, six hours; laboratory, four hours; other, six hours. Prerequisites: graduate standing, completion of curriculum satisfying basic requirements for study of human pathology. Lectures, demonstrations, and individual study of a student loan collection of microscopic slide preparations and of specimens from recent autopsies. Kodachrome photomicrographs and projection of microslides. Concentration in area of general pathology.

**231B-231C. Pathophysiology of Disease (6 units each).** Prerequisites: course 200A, graduate standing, completion of curriculum satisfying basic requirements for study of human pathology. Lectures, demonstrations, and individual study of a student loan collection of microscopic slide preparations and of specimens from recent autopsies. Kodachrome photomicrographs and projection of microslides. Concentration in area of general pathology. In Progress grading.

**232. Topics in Vertebrate Neurobiology (2 units).** Introduction to cell biology of vertebrate central nervous system, with special reference to its development, structure, and potential disease processes.

**233. General Pathology Seminar (3 units).** Seminar, two hours; discussion, one hour. Corequisite: course 231A. Designed to provide students with in-depth understanding of topics in course 231A. Reading and discussion of current publications pertaining to general pathology, with emphasis on cell injury/cell death and inflammation/fibrosis.

**234A-234F. Molecular and Cellular Foundations of Disease (2 units each).** Lecture, 90 minutes; discussion, 90 minutes. Prerequisites: graduate standing, background in biochemistry, molecular biology, and genetics. Investigation of the disease process. Two topics (four weeks each) offered per term; topics include genetic and metabolic disorders, infectious diseases, oncology, immunology, and nutritional diseases.

**M237. Molecular and Cellular Foundations of Disease.** (Same as Biological Chemistry M237.) Lecture, two hours; discussion, two hours. Prerequisites: one course each in molecular biology, cell biology, and biological chemistry. Discussion of key issues in disease mechanisms, with emphasis on experiments leading to understanding of these mechanisms. Identification of important questions still remaining unanswered. S/U or letter grading.

**245. Environmental Pathology.** Prerequisites: graduate standing, consent of instructor. Designed to explore interrelationships of man with his total environment. Presentation of series of special topics to discuss effect on man of changes in compositions of air, water, soil, and other materials. S/U grading.

**250A-250B-250C. Pathology Graduate Student Seminars (2 units each).** Limited to and required of all students in experimental pathology. Review and discussion of current literature and research in special topics of experimental pathology.

**254. Seminar: Experimental Neuropathology (1 unit).** Prerequisite: consent of instructor. Weekly seminar series presented by experts working at forefront of research on diseases of nervous system. New experimental approaches and laboratory model systems for studying diseases such as Alzheimer's and Huntington's diseases, epilepsy, neuroblastoma, and multiple sclerosis. S/U grading.

**255. Mapping the Human Genome (3 units).** Lecture, 90 minutes; discussion, 90 minutes. Prerequisite: consent of instructor. Basic molecular genetic and cytogenetic techniques of gene mapping. Selected regions of human genomic map scrutinized in detail, particularly gene families and clusters of genes that have remained linked from mouse to human. Discussion of localizations of disease genes. S/U or letter grading.

**M256. Seminar: Viral Oncology (2 units).** (Same as Microbiology and Immunology M256.) Advanced research seminar designed to consider current developments in the field. Selection of current subjects and publications dealing with tumor viruses, oncogenesis, development, and cellular regulation.

**M257. Introduction to Toxicology.** (Same as Pharmacology M257.) Prerequisite: Pharmacology 241 or consent of instructor. Biochemical and systemic toxicology, basic mechanisms of toxicology, and interaction of toxic agents with specific organ systems.

**M258. Pathologic Changes in Toxicology.** (Same as Pharmacology M258.) Designed to give students experience in learning normal histology of tissues which are major targets of toxin and the range of pathologic changes that occur in these tissues (liver, bladder, lung, kidney, nervous system, and vascular system).

**M262. Biology of Aging.** (Formerly numbered 262.) (Same as Molecular, Cell, and Developmental Biology CM249.) Lecture, three hours; discussion, one hour. Designed for graduate students. Overview of expanding field of aging biology — major theories (and myths) of aging; analysis of aging at level of organs, tissues, individual cells, proteins, and genes; experimental models of aging; diseases of aging; methods of retarding aging process.

**M293. Major Concepts in Oncology.** (Same as Microbiology and Immunology M293 and Oral Biology M293.) Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Designed for graduate students contemplating research in oncology. Topics include cancer pathophysiology, genetics, membranes, macromolecular synthesis and control, cell cycle, growth control; physical, chemical, and viral oncogenesis, epidemiology of cancer; tumor immunology; principles of cancer surgery, radiation therapy, and chemotherapy. S/U or letter grading.

**M294. Molecular Basis of Cancer.** (Same as Microbiology and Immunology M294.) Lecture, three hours. Requisites: Biological Chemistry CM253, CM267, Microbiology and Immunology M229, Neurobiology M209A. Fundamental biological, genetic, and molecular process involved in genesis and growth of cancer cells and diagnosis, characterization, and treatment of cancer.

**298A-298B-298C. Current Research in Disease Mechanisms (2 units each).** Seminar, 90 minutes. Preparation: one course each in molecular biology, cell biology, and biological chemistry. Designed for graduate experimental pathology students. Current research in disease mechanisms, with strong emphasis on experimental approach in pathology. Topics include genetic and metabolic disorders, thyroid disease, immunology, atherosclerosis, infectious diseases, and Alzheimer's disease.

**596. Directed Individual Study or Research (4 to 12 units).** Individual research with members of the staff or of other departments, the latter for purpose of supplementing programs available in department. S/U grading.

**597. Preparation for Qualifying Examinations (2 to 8 units).** Prerequisite: one year of pathology coursework. Individual study for qualifying examinations. S/U grading.

**599. Preparation of Ph.D. Dissertation (2 to 8 units).** Prerequisite: completion of qualifying examinations and majority of Ph.D. research. Writing and completion of dissertation. S/U grading.

## PEDIATRICS

School of Medicine

UCLA  
12-335 Davies Children's Center  
Box 951752  
Los Angeles, CA 90095-1752

(310) 825-4128

### Chairs

Edward R.B. McCabe, M.D., Ph.D., *Executive Chair*  
Stephen A. Feig, M.D., *Executive Vice Chair*  
Robert B. Ettenger, M.D., *Vice Chair, Clinical Affairs,*  
*UCLA Medical Center*  
E. Richard Stiehm, M.D., *Vice Chair, Academic Affairs,*  
*UCLA Medical Center*  
Frederick James, M.D., *Chair, King/Drew*  
Rosemary D. Leake, M.D., *Chair, Harbor-UCLA*  
Mohammed Malekzadeh, M.D., *Interim Chair, Olive*  
*View-UCLA*  
David L. Rimoin, M.D., Ph.D., *Chair, Cedars-Sinai*

### Scope and Objectives

The Department of Pediatrics encompasses four teaching hospitals: UCLA, Harbor-UCLA, King/Drew, and Cedars-Sinai Medical Centers. The clinical program and teaching activities of the UCLA Medical Center are integrated with the Olive View-UCLA Medical Center. In the fundamentals of clinical medicine course, medical students receive detailed instruction in the techniques of the clinical examination of pediatric patients.

The required six-week clinical clerkship in pediatrics can be taken at any of the four medical centers. In-depth electives in the Department of Pediatrics are listed in the *School of Medicine Handbook of Clinical Courses*, as are the advanced clinical clerkships.

For further details on the Department of Pediatrics and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## Pediatrics

### Lower Division Course

**88. Lower Division Seminar: Special Topics in Pediatrics.** Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in pediatrics approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

### Adjunct Professor

Richard Popkin, Ph.D.

### Adjunct Assistant Professor

David C. Wilson, Ph.D.

### Scope and Objectives

In a recent survey conducted by the Conference Board of the Associated Research Councils, UCLA's Philosophy Department was judged among the six best in the nation in terms of the quality of its faculty. It offers programs leading to the Bachelor of Arts and Ph.D. degrees.

"Philosopher," translated from the Greek, literally means "lover of wisdom." The term has come to mean someone who seeks knowledge, enlightenment, and truth. The undergraduate program in philosophy is not directed at career objectives (although it is traditionally good preparation for law, theology, and graduate work in philosophy). Philosophy is taught to undergraduates primarily as a contribution to their liberal education. All of the lower and most of the upper division course offerings should be of interest and useful to students who are reflective about their beliefs or who wish to become so. It also provides the occasion to ponder the foundations of almost any other subject to which they are exposed —

whether history, religion, government, law, or science.

The principal goal of the graduate program is to produce philosophers of high quality, thinkers informed by the great historical traditions of Western philosophers who can apply the methods of philosophical analysis to a broad range of current philosophical problems. Since all its graduate students hope to teach at the college or university level, the department is also committed to training clear, able, and stimulating teachers.

## Undergraduate Study

### Bachelor of Arts Degree

#### Preparation for the Major

*Required:* Four lower division courses, including Philosophy 7 or 21, 22, 31, and one other philosophy course.

#### The Major

*Required:* Thirteen upper division (100 series) or graduate (200 series) philosophy courses (52 units), including Philosophy 100A, 100B, 100C. Seven of the 13 courses must be distributed among the groups into which the undergraduate and graduate courses are divided, in the following manner: two courses in each of three of the groups and one course in the remaining group.

Courses listed under Special Studies may be applied toward the major but not toward a group requirement. A maximum of eight units of course 199 may be applied toward the major but not toward a group requirement. Courses 100A, 100B, 100C may not be applied toward any group requirement. No course used to satisfy the major or preparation requirements may be taken on a P/NP basis.

Students intending to do graduate work in philosophy should consult both the graduate and undergraduate advisers.

## Honors Program

On recommendation of the department faculty, honors in philosophy are awarded at graduation to a major whose grade-point average in upper division philosophy courses is 3.3 and who has completed two graduate courses in the 200 series (eight units) in philosophy with an average GPA of 3.5.

## Philosophy Minor

To enter the philosophy minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Courses:* Philosophy 7 or 21, and 22 or 31.

*Required Upper Division Courses:* Five courses, including at least one from each of three of the four groups into which the undergraduate and graduate courses are divided (Philosophy 100A, 100B, 100C apply toward Group I); one additional upper or lower division philosophy course.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

It is the policy of the department to admit only those who plan to earn the Ph.D. degree. For admission requirements, see Doctoral Degree below.

### Areas of Study

Consult the department.

### Course Requirements

For the Master of Arts, students must complete with grades of B or better at least nine upper division or graduate courses (36 units), excluding Philosophy 199, of which five courses (20 units) must be in the philosophy series numbered between 200A and 290. The total course requirement must include Philosophy 200A-200B-200C and one designated course in logic. Consult the *Manual for Graduate Students in Philosophy* for the list of designated courses.

Courses in the 500 series may not be applied toward the course requirements for the M.A. in Philosophy.

### Comprehensive Examination Plan

Students seeking the M.A. must pass the master's comprehensive examination, which consists of three different examinations. One is scheduled after each of the three first-year seminars. Consult the *Manual for Graduate Students in Philosophy* for further information about this examination. In case of failure, the examination may be repeated.

The examination is passed or failed as a whole, which does not necessarily require passing of all three parts.

### Thesis Plan

None.

## Doctoral Degree

### Admission

Admission to UCLA as a graduate student in philosophy requires approval both by the Graduate Division and by the Department of Philosophy. The University application should be sent directly to Graduate Admissions/Student and Academic Affairs. The departmental application, three letters of recommendation (on the official forms), official scores on the Graduate Record Examination (GRE) General Test (the

Subject Test in Philosophy is not required), official scores from the Test of English as a Foreign Language (TOEFL) for applicants whose first language is other than English, and two official transcripts from each institution attended should be sent to the graduate counselor in the Philosophy Department. Departmental information and application can be obtained by writing to the department.

### Major Fields or Subdisciplines

Consult the department.

### Course Requirements

A Ph.D. candidate must complete, with a grade of B or better, the three first-year seminars, plus 11 additional upper division and graduate courses in philosophy (not including individual studies courses), distributed as follows:

*Logic.* Two upper division or graduate courses in logic, one of which must be completed by the end of the first year, unless a preparatory course is necessary: Philosophy 135A plus one other designated course in either the Philosophy or Mathematics Department. Consult the *Manual for Graduate Students in Philosophy* for the list of designated courses.

*History of Philosophy.* One graduate course in history of philosophy, plus enough graduate or undergraduate courses (taken here or elsewhere) to make up an equivalent of Philosophy 100A, 100B, 100C. Specifically, each student must have studied (or now study) Plato, Aristotle, some important medieval philosopher, Descartes, some British empiricist, and Kant.

*Ethics and Value Theory.* One graduate-level course.

*Metaphysics and Epistemology.* One graduate-level course.

*Special Area Requirement.* Two designated graduate courses in one of two areas: metaphysics and epistemology or ethics. Consult the *Manual for Graduate Students in Philosophy* for further details.

*Electives.* As many courses as needed to fulfill the requirement of 11 additional upper division or graduate philosophy courses.

Group classification of a course is generally given by its catalog listing, but final classification of a course is determined by the instructor on the basis of its content and the departmental guidelines. Normally no substitutions for these courses are allowed, but students who have done graduate coursework elsewhere as graduate students may be permitted to substitute previous graduate coursework in exceptional cases.

### Written and Oral Qualifying Examinations

The department does not require any written examination to be passed by students as a condition of advancement to candidacy. It does, however, require each student to take all three parts of the master's comprehensive examination by the end of the student's first year (according to the description and schedule

given above) to give the department evidence of proficiencies and deficiencies.

For advancement to candidacy, students must pass a preliminary oral qualifying examination as described below.

In the second and third years, students must satisfy two special area requirements: one in metaphysics and epistemology and one in ethics. Students must take two specially designated graduate courses in one of the two areas and write a paper prepared in accordance with a specific format called a "proposition" in the other area.

The special course requirement in either metaphysics and epistemology or in ethics should be completed in the second year, and the proposition requirement covering the remaining area should be completed in the third year. Consult the *Manual for Graduate Students in Philosophy* for further details.

In the third year, students begin a new series of individual studies courses (Philosophy 596) in consultation with the dissertation supervisor to develop a well-defined dissertation project. A doctoral committee is chosen and the University Oral Qualifying Examination is scheduled. The primary purpose of this examination is to determine whether the student is able to complete the dissertation successfully. The scope of the examination varies according to the definiteness of the dissertation topic and the extent of the student's preliminary investigations. In case of failure, the doctoral committee makes a recommendation for or against allowing a second oral examination.

## Philosophy

### Lower Division Courses

**1. Beginnings of Western Philosophy.** Lecture, three hours; discussion, one hour. Origins of Greek cosmology and philosophy, beginnings of systematic thought and scientific investigation concerning such questions as origin and nature of the material world, concept of laws of nature, possibility and extent of knowledge. Concentration on pre-Socratic philosophers, particularly Anaximander, Heraclitus, the Pythagoreans, Parmenides, Empedocles, and Greek atomists, during first two thirds of course and on Socrates and some earlier works of Plato in last few weeks.

**2. Introduction to Philosophy of Religion.** Lecture, three hours; discussion, one hour. Introductory study of such topics as nature and grounds of religious belief, relation between religion and ethics, nature and existence of God, problem of evil, and what can be learned from religious experience.

**4. Philosophical Analysis of Contemporary Moral Issues.** Lecture, three hours; discussion, one hour. Critical study of principles and arguments advanced in discussion of current moral issues. Possible topics include revolutionary violence, rules of warfare, sexual morality, right of privacy, punishment, nuclear warfare and deterrence, abortion and mercy killing, experimentation with human subjects, rights of women.

**5A. Philosophy in Literature.** Lecture, three hours; discussion, one hour. Philosophical inquiry into such themes as freedom, responsibility, guilt, love, self-knowledge and self-deception, death, and meaning of life through examination of great literary works in the Western tradition.

**6. Introduction to Political Philosophy.** Lecture, three hours; discussion, one hour. Study of some classical or contemporary works in political philosophy. Questions that may be discussed include What is justice? Why obey the law? Which form of government is best? How much personal freedom should be allowed in society? P/NP or letter grading.

**7. Introduction to Philosophy of Mind.** Lecture, three hours; discussion, one hour. Introductory study of philosophical issues about nature of the mind and its relation to the body, including materialism, functionalism, behaviorism, determinism and free will, nature of psychological knowledge.

**8. Introduction to Philosophy of Science.** Study of selected problems concerning the character and reliability of scientific understanding, such as nature of scientific theory and explanation, reality of theoretical entities, inductive confirmation of hypotheses, and occurrence of scientific revolutions. Discussion at nontechnical level of episodes from history of science.

**9. Principles of Critical Reasoning.** Nature of arguments: how to analyze them and assess soundness of the reasoning they represent. Common fallacies that often occur in arguments discussed in light of what counts as a good deductive or inductive inference. Other topics include use of language in argumentation to arouse emotions as contrasted with conveying thoughts, logic of scientific experiments and hypothesis-testing in general, and some general ideas about probability and its application in making normative decisions (e.g., betting).

**21. Skepticism and Rationality.** Lecture, three hours; discussion, one hour. Can we know anything with certainty? How can we justify any of our beliefs? Introduction to study of these and related questions through works of some great philosophers of modern period, such as Descartes, Leibniz, Berkeley, or Hume.

**22. Introduction to Ethical Theory.** Lecture, three hours; discussion, one hour. Recommended or required for many upper division courses in Group III. Systematic introduction to ethical theory, including discussion of egoism, utilitarianism, justice, responsibility, meaning of ethical terms, relativism, etc.

**31. Logic, First Course.** Lecture, three hours; discussion, one hour. Recommended for students who plan to pursue more advanced studies in logic. Elements of symbolic logic, sentential and quantificational; forms of reasoning and structure of language.

**32. Logic, Second Course.** Lecture, three hours; discussion, one hour. Enforced requisite: course 31 (preferably in preceding term). Symbolic logic: extension of systematic development of course 31. Quantifiers, identity, definite descriptions.

**97. Freshman Seminar.** Variable topics; consult *Schedule of Classes* or "Department Announcements" for topics to be offered in a specific term. May be repeated for credit with consent of instructor.

## Upper Division Courses

**100A. History of Greek Philosophy.** Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Survey of origins of Greek metaphysics from pre-Socratics through Plato and Aristotle.

**100B. Medieval and Early Modern Philosophy.** Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Strongly recommended: course 100A. Survey of development and transformation of Greek metaphysics and epistemology within context of philosophical theology, and transition from medieval to early modern period. Special emphasis on Augustine, Anselm, Aquinas, and Descartes.

**100C. History of Modern Philosophy, 1650 to 1800.** Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course. Strongly recommended: course 100B. Courses 100A, 100B, and 100C should be taken in immediately successive terms if possible. Survey of development of metaphysics and theory of knowledge from 1650 to 1800, including Locke and/or Berkeley, Malebranche and/or Leibniz, and culminating in Hume and Kant. Topics may include views of these (and perhaps other) philosophers of the period on mind and body, causality, existence of God, skepticism, empiricism, limits of human knowledge, and philosophical foundations of modern science.

## Group I: History of Philosophy

**M101A. Plato — Earlier Dialogues.** (Formerly numbered 101A.) (Same as Classics M146A.) Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: one philosophy course or consent of instructor. Study of selected topics in early and middle dialogues of Plato.

**M101B. Plato — Later Dialogues.** (Formerly numbered 101B.) (Same as Classics M146B.) Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: course M101A. Study of selected topics in middle and later dialogues of Plato.

**M102. Aristotle.** (Formerly numbered 102.) (Same as Classics M147.) Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: one philosophy course or consent of instructor. Study of selected works of Aristotle.

**M103A. Ancient Greek and Roman Philosophy.** (Same as Classics M145A.) Lecture, three hours; outside study, nine hours. Study of some major Greek and Roman philosophical texts, including those of pre-Socratics, Plato, Aristotle, and Hellenistic philosophers, with emphasis on historical and cultural setting of the texts, their literary form, interrelations, and contribution to discussion of basic philosophical issues.

**M103B. Later Ancient Greek Philosophy.** (Same as Classics M145B.) Lecture, three hours; outside study, nine hours. Prerequisite: one course from 1, 100A, M101B, M102, or M103A, or consent of instructor. Study of some major texts in Greek philosophy of the Hellenistic and Roman periods. Readings vary and include works by Stoics, skeptics, philosophers of science, Neoplatonists, etc. P/NP or letter grading.

**104. Topics in Islamic Philosophy.** Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Development of Muslim philosophy in its great age (from Kindo to Averroes, 850 to 1200), considered in connection with Muslim theology and mysticism.

**105. Medieval Philosophy from Augustine to Maimonides.** Prerequisite: one philosophy course or consent of instructor. Development of early medieval philosophy within framework of Judeo-Christian theology and its assimilation and criticism of Greek philosophical heritage. Focus on problem of universals, existence and nature of God, problem of evil, and doctrines of the Trinity and atonement. Selected writings from Augustine through Maimonides read in English translation.

**106. Later Medieval Philosophy.** Prerequisite: one philosophy course or consent of instructor. Metaphysics, theory of knowledge, and theology of Aquinas, Duns Scotus, and Ockham, with less full discussion of other authors from the 13th through early 15th century. Selected texts read in English translation.

**107. Topics in Medieval Philosophy.** Prerequisite: one philosophy course. Recommended: course 105 or 106. Study of philosophy and theology of one medieval philosopher such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham, or study of a single area such as logic or theory of knowledge in several medieval philosophers. Topic announced each term. May be repeated for credit with consent of instructor.

**C108. Hobbes.** Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Hobbes' political philosophy, especially the *Leviathan*, with attention to its relevance to contemporary political philosophy. May be concurrently scheduled with course C208.

**C109. Descartes.** Prerequisites: course 21 or two philosophy courses or consent of instructor. Study of works of Descartes, with discussion of issues such as problem of skepticism, foundations of knowledge, existence of God, relation between mind and body, and connection between science and metaphysics. May be concurrently scheduled with course C209.

**C110. Spinoza.** Lecture, three hours; discussion, one hour. Prerequisite: course 21 or consent of instructor. Study of philosophy of Spinoza. May be concurrently scheduled with course C210, in which case there is weekly discussion meeting, plus fewer readings and shorter papers for undergraduates. Limited to 30 students when concurrently scheduled.

**C111. Leibniz.** Lecture, three hours; discussion, one hour. Prerequisite: course 21 or consent of instructor. Study of philosophy of Leibniz. May be concurrently scheduled with course C211, in which case there is weekly discussion meeting, plus fewer readings and shorter papers for undergraduates. Limited to 30 students when concurrently scheduled.

**C112. Locke and Berkeley.** Prerequisite: one philosophy course or consent of instructor. Study of philosophies of Locke and Berkeley, with emphasis in some cases on one or the other. Limited to 30 students when concurrently scheduled with course C212. P/NP or letter grading.

**C114. Hume.** Prerequisite: one philosophy course or consent of instructor. Selected topics from metaphysical, epistemological, and ethical writings of Hume. Limited to 40 students when concurrently scheduled with course C214.

**115. Kant.** Lecture, three hours; discussion, one hour. Prerequisite: course 21 or 22 or consent of instructor. Study of Kant's views on related topics in theory of knowledge, ethics, and politics. May be repeated for credit with consent of instructor.

**116. 19th-Century Philosophy.** Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Selected topics in 19th-century thought.

**117. Late 19th- and Early 20th-Century Philosophy.** Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Selected topics in work of one or more of following philosophers: Bolzano, Frege, Husserl, Meinong, G. Moore, early Russell, and Wittgenstein. May be repeated for credit with consent of instructor.

**118. Kierkegaard.** Prerequisite: one philosophy course or consent of instructor. Philosophical study of some major works of Kierkegaard, with emphasis on interpretation of the texts.

**C119. Topics in Modern Philosophy.** Prerequisite: one philosophy course or consent of instructor. Selected topics in one or more philosophies of the early modern period, or study in a single area such as theory of knowledge or metaphysics in several of the philosophies. May be repeated for credit with consent of instructor. Concurrently scheduled with course C219.

## Group II: Logic, Semantics, and Philosophy of Science

**124. Philosophy of Science: Historical.** (Formerly numbered 126A.) Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Historical introduction to philosophy of science. Several general topics discussed in context of actual episodes in development of natural sciences. May be repeated for credit with consent of instructor.

**125. Philosophy of Science: Contemporary.** (Formerly numbered 126B.) Lecture, three hours; discussion, one hour. Prerequisite: course 31 or 124 or consent of instructor. Introduction to contemporary philosophy of science, focusing on problems of central importance. May be repeated for credit with consent of instructor.

**126. Philosophy of Science: Social Sciences.** (Formerly numbered 126C.) Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or consent of instructor. Discussion of topics in philosophy of social sciences (e.g., methods of social sciences in relation to physical sciences, value-bias in social inquiry, concept formation, theory construction, explanation and prediction, nature of social laws).

**127A. Philosophy of Language.** Prerequisite: course 31 or consent of instructor. Syntax, semantics, pragmatics. Semantical concept of truth, sense and denotation, synonymy and analyticity, modalities and tenses, indirect discourse, indexical terms, semantical paradoxes. May be repeated for credit with consent of instructor.

**127B. Philosophy of Language.** Prerequisite: course 31 or consent of instructor. Course 127A is not prerequisite to 127B. Selected topics similar to those considered in course 127A, but at more advanced and technical level. May be repeated for credit with consent of instructor.

**128A. Philosophy of Mathematics.** Prerequisites: courses 31, 32, and preferably one additional logic course. Philosophy of mathematics; logicism of Frege and Russell, arithmetic reduced to logic; ramified type theory and impredicative definition (Russell, Poincaré, early Weyl).

**128B. Philosophy of Mathematics.** Prerequisite: course 128A or consent of instructor. Intuitionism of Brouwer, Heyting, and later Weyl; proof theory of Hilbert.

**129. Philosophy of Psychology.** Lecture, three hours; discussion, one hour. Prerequisites: one four-unit psychology course, one philosophy course. Selected philosophical issues arising from psychological theories. Relevance of computer simulation to accounts of thinking and meaning; relations between semantical theory and learning theory; psychological aspects of theory of syntax; behaviorism, functionalism, and alternatives; physiology and psychology.

**130. Philosophy of Space and Time.** Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or one philosophy course and one physics course, or consent of instructor. Selected philosophical problems concerning nature of space and time. Philosophical implications of space-time theories, such as those of Newton and Einstein. Topics may include nature of geometry, conventionalism, absolutist versus relationist views of space and time, philosophical impact of relativity theory.

**131. Science and Metaphysics.** Prerequisites: two philosophy courses or consent of instructor. Recommended: some background in basic calculus and physics. Intensive study of one or two metaphysical topics on which results of modern science have been thought to bear. Topics may include nature of causation, reality and direction of time, time-travel, backwards causation, realism, determinism, absolute view of space, etc. May be repeated for credit with consent of instructor.

**132. Philosophy of Biology.** Prerequisite: one philosophy course or consent of instructor. Intensive study of one or two current topics in philosophy of biology, which may include structure of evolutionary theory, fitness, taxonomy, reductionism, concept of a biological species, and biological explanation. P/NP or letter grading.

**133. Topics in Logic and Semantics.** Prerequisite: course 32. Possible topics include formal theories, definitions, alternative theories of descriptions, many-valued logics, deviant logics.

**M134. Introduction to Set Theory.** (Same as Mathematics M112.) Lecture, three hours; discussion, one hour. Requisite: course 32 or Mathematics 31B. Axiomatic set theory as framework for mathematical concepts; relations and functions, numbers, cardinality, axiom of choice, transfinite numbers. P/NP or letter grading.

**135A. Metatheory of Sentential Logic.** Lecture, three hours; discussion, one hour. Prerequisite: course 32 or equivalent. Introduction to metatheory of classical sentential logic. Emphasis on fundamental metalogical ideas, including proof by induction, rigorous definition of syntactic and semantic concepts, and proof of completeness. Discussion of philosophical significance of these ideas.

**135B. Metatheory of Predicate Logic.** Lecture, three hours; discussion, one hour. Prerequisite: course 135A or equivalent. Classical first-order logic, its scope, and limits. Gödel completeness theorem as main positive result. Some consideration to classical negative results on truth, decidability, and completeness, and relationship between first- and second-order logic.

**136. Modal Logic.** Prerequisite: course 135A. First course in two-term sequence (also see course 176). Topics include various normal modal systems, derivability within the systems, Kripke-style semantics and generalizations, Lemmon/Scott completeness, incompleteness in tense and modal logic, quantificational extensions.

### Group III: Ethics and Value Theory

**150. Society and Morals.** Lecture, three hours; discussion, one hour. Prerequisite: course 22 or consent of instructor. Critical study of principles and arguments advanced in discussion of current moral and social issues. Topics similar to those in course 4, but familiarity with some basic philosophical concepts and methods presupposed. May be repeated for credit with consent of instructor.

**151A-151B-151C. History of Ethics.** Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or consent of instructor. Course 151A is not prerequisite to 151B, which is not prerequisite to 151C. **151A.** Selected Classics in Ancient Ethical Theories: Plato, Aristotle; **151B.** Selected Classics in Modern Ethical Theories: Hume, Kant, Mill, etc.; **151C.** Selected Classics of Medieval Ethics.

**153A. Topics in Ethical Theory: Normative Ethics.** Prerequisite: course 22 or consent of instructor. Study of selected topics in normative ethical theory. Topics may include human rights, virtues and vices, principles of culpability and praiseworthiness (criteria of right action). May be repeated for credit with consent of instructor.

**153B. Topics in Ethical Theory: Metaethics.** Prerequisite: course 22 or consent of instructor. Study of selected problems in metaethics. Topics may include analysis of moral language, justification of moral beliefs, moral realism, skepticism, free will, moral motivation, etc. May be repeated for credit with consent of instructor.

**154. Topics in Value Theory: Rationality and Action.** Prerequisite: course 6 or 7 or 22 or consent of instructor. Selected topics concerning normative issues in practical rationality or philosophy of action. Topics may include moral and practical dilemmas, nature of reasons for action, rationality of morality and prudence, weakness of will, freedom of the will, and decision theory. May be repeated for credit with consent of instructor.

**155. Medical Ethics.** Examination of philosophical issues raised by problems of medical ethics, such as abortion, euthanasia, and medical experimentation.

**156. Topics in Political Philosophy.** Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisites: two philosophy courses or consent of instructor. Recommended: course 6 or 22. Analysis of some basic concepts in political theory. May be repeated for credit with consent of instructor.

**157A-157B. History of Political Philosophy.** Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or consent of instructor. May be repeated with consent of instructor. **157A.** Reading and discussion of classic works in earlier political theory, especially those by Hobbes, Locke, Hume, and Rousseau. **157B.** Reading and discussion of classic works in later political theory, especially those by Kant, Hegel, and Marx.
