**161. Topics in Aesthetic Theory.** Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Philosophical theories about nature and importance of art and art criticism, aesthetic experience, and aesthetic values. May be repeated for credit with consent of instructor.

**166. Philosophy of Law.** Prerequisite: one philosophy course or consent of instructor. Examination, through study of recent philosophical writings, of such topics as nature of law, relationship of law and morals, legal reasoning, punishment, and obligation to obey the law.

### Group IV: Metaphysics and Epistemology

**170. Philosophy of Mind.** Lecture, three hours; discussion, one hour. Prerequisites: two relevant philosophy courses or consent of instructor. Analysis of various problems concerning nature of mind and mental phenomena, such as relation between mind and body, and our knowledge of other minds. May be repeated once for credit with consent of instructor.

**172. Philosophy of Language and Communication.** Prerequisites: two relevant philosophy or linguistics courses or consent of instructor. Theories of meaning and communication; how words refer to things; limits of meaningfulness; analysis of speech acts; relation of everyday language to scientific discoveries.

**M173. Metaphor and Literal Speech.** (Same as Teaching English as a Second Language M189.) Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: Linguistics 1 or equivalent or consent of instructor. Use of interdisciplinary perspective to examine systematicity of form and function peculiar to human language that underlies dichotomy between (1) neutral or literal capacity of language and (2) metaphoric capacity. P/NP or letter grading.

**175. Topics in Philosophy of Religion.** Lecture, three hours; discussion, one hour. Prerequisite: course 21 or 22 or consent of instructor. Intensive investigation of one or two topics or works in philosophy of religion, such as attributes of God, arguments for or against existence of God, or relation between religion and ethics. Topics announced each term. May be repeated for credit with consent of instructor.

**176. Metaphysics of Modality.** Prerequisites: courses 31, 32. Highly recommended: course 136. Second course in two-term sequence (also see course 136). Metaphysical foundations of modal logic and philosophical basis of model theory of modal logic. What are "possible worlds"? What is the "accessibility" relation? Is modal logic a logic or a theory? Is its focus logical or metaphysical necessity? Are the two notions really distinct? How metaphysically involved is (quantified) modal logic? What is its connection to doctrines of (1) "Haecceitism" and (2) "Aristotelian Essentialism"? P/NP or letter grading.

**177A. Existentialism.** Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Analysis of methods, problems, and views of some of the following: Kierkegaard, Nietzsche, Heidegger, Jaspers, Sartre, Marcel, and Camus. Possible topics include metaphysical foundations, nature of mind, freedom, problem of self, other people, ethics, existential psychoanalysis.

**177B. Historical Studies in Existentialism.** Prerequisite: one philosophy course or consent of instructor. Study of central philosophical texts of one of the following: Nietzsche, Heidegger, Jaspers, Buber, Sartre, or Camus. Emphasis on explication and interpretation of the texts. May be repeated for credit with consent of instructor.

**178. Phenomenology.** Lecture, three hours; discussion, one hour. Prerequisites: two philosophy courses or consent of instructor. Introduction to phenomenological method of approaching philosophical problems via works of some of the following: Brentano, Husserl, Heidegger, Scheler, Sartre, Merleau-Ponty, Ricoeur. Topics include ontology, epistemology, and particularly philosophy of mind.

**179. Oriental Philosophy: Buddhism.** Examination of central concepts and arguments in Buddhist philosophy, with emphasis on school of Mahayana Buddhism. Appropriate parallels to social concepts in the Western tradition.

**182. Elements of Metaphysics.** Lecture, three hours; discussion, one hour. Prerequisite: course 21 or consent of instructor. Study of basic metaphysical questions; nature of physical world, of minds, and of universals; and answers provided by alternative systems (e.g., phenomenalism, materialism, dualism).

**183. Theory of Knowledge.** Prerequisite: course 21 or consent of instructor. Analysis of concept of empirical knowledge. May be repeated for credit with consent of instructor.

**184. Topics in Metaphysics.** Prerequisite: course 21 or consent of instructor. Intensive investigation of one or two topics or works in metaphysics, such as personal identity, nature of dispositions, possibility and necessity, universals and particulars, causality. Topics announced each term. May be repeated for credit with consent of instructor.

**186. Topics in Theory of Knowledge.** Prerequisite: course 182 or 183 or consent of instructor. Intensive investigation of one or two selected topics or works in theory of knowledge, such as a priori knowledge, problem of induction, memory, knowledge as justified true belief. Topics announced each term. May be repeated for credit with consent of instructor.

**187. Philosophy of Action.** Prerequisites: two philosophy courses or consent of instructor. Study of various concepts employed in understanding human action. Topics may include rational choice, desire, intention, weakness of will, and self-deception.

**188. Philosophy of Perception.** Prerequisites: two philosophy courses or consent of instructor. Critical study of main philosophical theories of perception and arguments used to establish them.

**189. Major Philosophers of the 20th Century.** Prerequisites: two philosophy courses or consent of instructor. Study of writings of one or more major modern philosophers (e.g., Russell, Moore, Wittgenstein, Carnap, Quine). May be repeated for credit with consent of instructor.

## Special Studies

**M192. Philosophical Analysis of Issues in Feminist Theory.** (Same as Women's Studies M110D.) Lecture, three hours. Prerequisite for women's studies majors: Women's Studies 10; for other students: one philosophy course or consent of instructor. Examination in depth of different theoretical positions on gender and women as they have been applied to study of philosophy. Emphasis on theoretical contributions made by the new scholarship on women in philosophy. Critical study of concepts and principles which arise in discussion of women's rights and liberation. Philosophical approach to feminist theories. May be repeated for credit with consent of instructor.

**193. Christian Ethical Thought.** Lecture, three hours; discussion, one hour. Reading of selected classic and contemporary authors in the Christian ethical tradition, with philosophical analysis and assessment of their views on morality and religious life.

**195. 19th- and 20th-Century Religious Thought.** Lecture, three hours; discussion, one hour. Philosophical approach to Western religious thought of last 200 years, through study of selected works by such authors as Kant, Schleiermacher, Kierkegaard, Buber, Camus, and Tillich.

**196. Undergraduate Seminar: Philosophy.** Seminar, one hour; discussion, three hours. Prerequisite: consent of instructor. Variable topics; consult *Schedule of Classes* or "Department Announcements" for topic to be offered in a specific term. May be repeated for credit with consent of instructor.

**199. Special Studies (2 to 8 units).** Prerequisite: consent of instructor. Eight units may be applied toward degree requirements, but course cannot be substituted for a course in one of the four groups on basis of similarity of subject matter.

## Graduate Courses

**200A-200B-200C. Seminar for First-Year Graduate Students.** Limited to and required of all first-year graduate students in philosophy. Selected topics in metaphysics and epistemology, history of philosophy, and ethics.

### Group I. History of Philosophy

**201. Plato.** Prerequisite: consent of instructor. Study of later dialogues.

**202. Aristotle.** Prerequisite: consent of instructor. Analysis of major problems in Aristotle's philosophy based on reading, exposition, and critical discussion of relevant texts in English translation.

**203. Seminar: History of Ancient Philosophy.** Prerequisite: consent of instructor. Selected problems and philosophers. May be repeated for credit with consent of instructor.

**206. Topics in Medieval Philosophy.** Prerequisite: consent of instructor. Study of philosophy and theology of one or several medieval philosophers such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham or study of a single area such as logic or theory of knowledge in several medieval philosophers. Topics announced each term. May be repeated for credit with consent of instructor.

**207. Seminar: History of Medieval and Renaissance Philosophy.** Prerequisite: consent of instructor. Selected problems and philosophers. May be repeated for credit with consent of instructor.

**C208. Hobbes.** Lecture, three hours; discussion, one hour. Prerequisite: one philosophy course or consent of instructor. Hobbes' political philosophy, especially the *Leviathan*, with attention to its relevance to contemporary political philosophy. May be concurrently scheduled with course C108.

**C209. Descartes.** Prerequisite: consent of instructor. Study of works of Descartes, with discussion of issues such as problem of skepticism, foundations of knowledge, existence of God, relation between mind and body, and connection between science and metaphysics. May be concurrently scheduled with course C109.

**C210. Spinoza.** Prerequisite: consent of instructor. Selected topics in philosophy of Spinoza. May be concurrently scheduled with course C110, in which case there is a two-hour biweekly discussion meeting, plus additional readings and longer term paper for graduate students.

**C211. Leibniz.** Prerequisite: consent of instructor. Selected topics in philosophy of Leibniz. May be concurrently scheduled with course C111, in which case there is a two-hour biweekly discussion meeting, plus additional readings and longer term paper for graduate students.

**C212. Locke and Berkeley.** Prerequisite: one philosophy course or consent of instructor. Study of philosophies of Locke and Berkeley, with emphasis in some cases on one or the other. Limited to 30 students when concurrently scheduled with course C112. S/U or letter grading.

**C214. Hume.** Prerequisite: consent of instructor. Selected topics in philosophy of Hume. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C114.

**215. Kant.** Prerequisite: consent of instructor. Intensive study of selected writings of Immanuel Kant.

**216. 19th-Century Philosophy.** Prerequisite: consent of instructor. Topics in 19th-century philosophy. May be repeated for credit with consent of instructor.

**C219. Topics in Modern Philosophy.** Prerequisite: consent of instructor. Selected topics in one or more philosophies of the early modern period, or study in a single area such as theory of knowledge or metaphysics in several of the philosophies. May be repeated for credit with consent of instructor. Concurrently scheduled with course C119.

**220. Seminar: Topics in History of Philosophy.** Seminar, three hours. Prerequisite: consent of instructor. Selected problems and philosophers which may be from different periods. May be repeated for credit with consent of instructor.

### Group II. Logic, Semantics, and Philosophy of Science

**221A. Topics in Set Theory.** Prerequisite: Mathematics M112A or consent of instructor. Sets, relations, functions, partial and total orderings; well-orderings. Ordinal and cardinal arithmetic, finiteness and infinity, continuum hypothesis, inaccessible numbers. Formalization of set theory: Zermelo/Fraenkel; von Neumann/Gödel theory. May be repeated for credit with consent of instructor.

**221B. History of Set Theory.** Prerequisite: consent of instructor. Development of concept of set and axiomatic set theory by examining selected writings of Frege, Cantor, Russell, Zermelo, Gödel, and several others. Origins and significance of certain key ideas, such as set theory as logic, axiomatic set theory as a reaction to the paradoxes, formal first-order axiomatic set theory as opposed to informal axiomatics, type theory and rank hierarchy, ramification and predicativity, proper classes and sets as small classes, and particular Zermelo/Fraenkel axiomatic theory. Emphasis on actual expressed ideas and views of various influential authors.

**222A-222B-222C. Gödel Theory.** **222A.** Prerequisites: several courses in logic, preferably including course 135B. First in series of three courses leading to Gödel incompleteness theorem and Tarski definition of truth. **222B.** Prerequisite: course 222A. Second-order arithmetic. Second in series of three courses leading to Gödel incompleteness theorem and Tarski definition of truth. **222C.** Prerequisite: course 222B. Gödel numbering and Gödel theory. Final course in Gödel theory series.

**224. Philosophy of Physics.** Prerequisite: consent of instructor. Selected philosophical topics related to physical theory, depending on interests and background of participants, including space and time; observation in quantum mechanics; foundations of statistical mechanics. May be repeated for credit with consent of instructor.

**225. Probability and Inductive Logic.** Prerequisites: course M134, or Mathematics M112A and 112B, or consent of instructor. Topics may include interpretations of probability, Bayesian and non-Bayesian confirmation theory, paradoxes of confirmation, coherence, and conditioning.

**226. Topics in Mathematical Logic.** Prerequisite: consent of instructor. Content varies from term to term. May be repeated for credit with consent of instructor.

**227. Philosophy of Social Science.** Prerequisite: consent of instructor. Examination of philosophical problems concerning concepts and methods used in social sciences. Topics may include relation between social processes and individual psychology, logic of explanation in social sciences, determinism and spontaneity in history, interpretation of cultures radically different from one's own. Students with primary interest and advanced preparation in a social science are encouraged to enroll. May be repeated for credit with consent of instructor.

**230. Seminar: Logic.** Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

**231. Seminar: Intensional Logic.** Prerequisite: consent of instructor. Topics may include logic of sense and denotation, modal logic, logic of demonstratives, epistemic logic, intensional logic of *Principia Mathematica*, possible worlds semantics. May be repeated for credit with consent of instructor.

**232. Philosophy of Science.** Prerequisite: consent of instructor. Selected topics in philosophy of science. May be repeated for credit with consent of instructor.

**233. Seminar: Philosophy of Physics.** Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

### Group III. Ethics and Value Theory

**241. Topics in Political Philosophy.** Prerequisites: course 150 or 156 or 157A or 157B or any two philosophy courses or consent of instructor. Examination of one or more topics in political philosophy (e.g., justice, democracy, human rights, political obligation, alienation). May be repeated for credit with consent of instructor.

**245. Seminar: History of Ethics.** Prerequisite: consent of instructor. Selected topics. May be repeated for credit with consent of instructor.

**246. Seminar: Ethical Theory.** Prerequisite: consent of instructor. Selected topics. Content varies from term to term. May be repeated for credit with consent of instructor.

**247. Seminar: Political Theory.** Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

**248. Problems in Moral Philosophy.** Prerequisite: consent of instructor. Intensive study of some leading current problems in moral philosophy. May be repeated for credit with consent of instructor.

**255. Seminar: Aesthetic Theory.** Prerequisite: consent of instructor. Selected topics. May be repeated for credit with consent of instructor.

**M256. Topics in Legal Philosophy.** (Same as Law M217.) Lecture, three hours. Prerequisite: consent of instructor. Examination of topics such as concept of law, nature of justice, problems of punishments, legal reasoning, and obligation to obey the law. May be repeated for credit with consent of instructor.

**M257. Seminar: Philosophy of Law.** (Same as Law M524.) Seminar, three hours. Prerequisite: consent of instructor. Selected topics in philosophy of law. May be repeated for credit with consent of instructor.

### Group IV. Metaphysics and Epistemology

**271. Seminar: Topics in Metaphysics and Epistemology.** Discussion, three hours. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

**275. Human Action.** Prerequisites: two upper division philosophy courses or consent of instructor. Examination of theories, concepts, and problems concerning human actions. Topics may include analysis of intentional actions; determinism and freedom; nature of explanations of intentional actions. May be repeated for credit with consent of instructor.

**280. 20th-Century Continental Philosophy.** Prerequisite: consent of instructor. Selected topics in 20th-century continental European philosophy. May be repeated for credit with consent of instructor.

**281. Seminar: Philosophy of Mind.** Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

**282. Seminar: Metaphysics.** Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

**283. Seminar: Theory of Knowledge.** Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

**284. Seminar: Philosophy of Perception.** Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

**285. Philosophy of Psychoanalysis.** Prerequisite: consent of instructor. Examination of topics such as nature and validity of psychoanalytic explanations and interpretations, psychoanalysis and language, meta-psychological concepts such as the unconscious, the ego, id, superego, defense mechanisms, and psychoanalytic conception of human nature.

**286. Philosophy of Psychology.** Relevance of computer simulation to accounts of thinking and meaning; relations between semantical theory and learning theory; psychological aspects of theory of syntax; behaviorism, functionalism, and alternatives; physiology and psychology.

**287. Seminar: Philosophy of Language.** Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

**288. Seminar: Wittgenstein.** Seminar, three hours. Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

**289. Seminar: Philosophy of Religion.** Prerequisite: consent of instructor. May be repeated for credit with consent of instructor.

**290. Workshop: Philosophy of Language.** Seminar, two hours. Prerequisite: consent of instructor. Ongoing discussion of current issues in philosophy of language based on contemporary texts and current research. Presentations of ideas by attending faculty and graduate students with open discussion. May be repeated for credit with consent of instructor.

**299. Seminar: Philosophical Research.** Seminar, three hours. Prerequisite: advancement to candidacy or consent of instructor. Presentation of ongoing research by graduate students or faculty members. Participants make presentations, analyze and discuss presentations of others, and read and discuss philosophical texts related to presentations. May be repeated for credit with consent of instructor. S/U grading.

### Special Studies

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching College Philosophy (2 to 4 units).** Prerequisite: consent of instructor. Seminars, workshops, and apprentice teaching. Selected topics, including evaluation scales, various teaching strategies and their effects, and other topics in college teaching. May be repeated for credit. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Studies (2 to 8 units).** (Formerly numbered 596A-596B.) Properly qualified graduate students who wish to pursue a problem through reading or advanced study may do so if their proposed project is acceptable to a staff member. May be repeated for credit. S/U or letter grading.

**597. Directed Studies for Graduate Examinations (2 to 8 units).** Preparation for M.A. comprehensive examination or Ph.D. oral qualifying examinations. S/U grading.

**599. Research for Ph.D. Dissertation (2 to 8 units).** Prerequisite: advancement to Ph.D. candidacy. May be repeated for credit. S/U grading.

## PHYSICS AND ASTRONOMY

*College of Letters and Science*

UCLA  
3-174 Knudsen Hall  
Box 951547  
Los Angeles, CA 90095-1547  
(310) 825-3224  
<http://www.physics.ucla.edu/>

Ferdinand V. Coroniti, Ph.D., *Chair*  
Charles D. Buchanan, Ph.D., *Academic Affairs Vice Chair*  
William E. Slater, Ph.D., *Resources Vice Chair*  
Edward L. Wright, Ph.D., *Astronomy Vice Chair*

### Professors

Ernest S. Abers, Ph.D.  
Katsushi Arisaka, Ph.D.  
Maha Ashour-Abdalla, Ph.D.  
Eric E. Becklin, Ph.D.  
Robijn F. Bruinsma, Ph.D.  
Charles D. Buchanan, Ph.D.  
Sudip Chakravarty, Ph.D.  
David B. Cline, Ph.D.  
Ferdinand V. Coroniti, Ph.D.  
Robert D. Cousins, Ph.D.  
John M. Dawson, Ph.D.  
Eric D'Hoker, Ph.D.  
Sergio Ferrara, Ph.D.  
Christian Fronsdal, Ph.D.  
Walter N. Gekelman, Ph.D.  
Graciela Gelmini, Ph.D.  
George Grüner, Ph.D.  
Károly Holczer, Ph.D.  
Michael A. Jura, Ph.D.  
Charles F. Kennel, Ph.D.  
Steven Kivelson, Ph.D.  
Leon Knopoff, Ph.D.  
Matthew Malkan, Ph.D.  
Ian McLean, Ph.D.  
George J. Morales, Ph.D.  
Mark Morris, Ph.D.  
Bernard M.K. Nefkens, Ph.D.  
William I. Newman, Ph.D.  
Richard E. Norton, Ph.D.  
C. Kumar N. Patel, Ph.D.  
Roberto Peccei, Ph.D.  
Rene Pellat, Ph.D.  
Claudio Pellegrini, Ph.D.  
Seth J. Putterman, Ph.D.  
Joseph Rudnick, Ph.D.  
Peter E. Schlein, Ph.D.  
William E. Slater, Ph.D.  
Reiner L. Stenzel, Ph.D.  
E.T. Tomboulis, Ph.D.  
Jean L. Turner, Ph.D.  
Roger K. Ulrich, Ph.D.  
Charles A. Whitten, Jr., Ph.D.  
Gary A. Williams, Ph.D.  
Alfred Y. Wong, Ph.D.  
Chun Wa Wong, Ph.D.  
Edward L. Wright, Ph.D.  
Benjamin Zuckerman, Ph.D.

### Professors Emeriti

Shlomo Alexander, Ph.D.  
Lawrence H. Aller, Ph.D.  
Hans E. Bommel, Ph.D.  
Rubin Braunstein, Ph.D.  
Nina Byers, Ph.D.  
Marvin Chester, Ph.D.  
W. Gilbert Clark, Ph.D.  
John M. Cornwall, Ph.D.  
Robert J. Finkelstein, Ph.D.  
Burton D. Fried, Ph.D.  
Roy P. Haddock, Ph.D.  
George J. Igo, Ph.D.  
Kenneth R. MacKenzie, Ph.D.

Steven A. Moszkowski, Ph.D.  
 Mirek Plavec, Ph.D.  
 Daniel M. Popper, Ph.D.  
 J. Reginald Richardson, Ph.D.  
 Isadore Rudnick, Ph.D.  
 Robert A. Satten, Ph.D.  
 David S. Saxon, Ph.D. (*University President Emeritus*)  
 Donald H. Stork, Ph.D.  
 Eugene Y. Wong, Ph.D.  
 Byron T. Wright, Ph.D.

#### Associate Professors

Zvi Bern, Ph.D.  
 Stuart Brown, Ph.D.  
 Steven Cowley, Ph.D.  
 Jay Hauser, Ph.D.  
 Hong-Wen Jiang, Ph.D.  
 James Rosenzweig, Ph.D.

#### Assistant Professors

Douglas Durian, Ph.D.  
 Andrea Ghez, Ph.D.  
 Huan Huang, Ph.D.  
 David Saltzberg, Ph.D.

#### Lecturer S.O.E.

Arthur Huffman, Ph.D.

#### Lecturer

William Layton, M.Ed. (*M.A.T. Program*)

#### Adjunct Professors

Muzaffer Atac, Ph.D.  
 Viktor Decyk, Ph.D.  
 Phillip Pritchett, Ph.D.

## Scope and Objectives

Since the time of the ancient Greeks, a natural affinity has existed between astronomy and physics, and the intellectual development of the two disciplines has often proceeded synergistically. Newton's discovery of the laws of mechanics and universal gravitation not only explained motion on Earth, but brought the heavens and Earth into a single quantitative framework in which both are governed by the same laws. The revolutionary discoveries of twentieth-century physics — quantum mechanics and nuclear physics — were rapidly adopted by astronomers to interpret the spectroscopic observations of the stars and to construct accurate models of stellar structure. Einstein's general theory of relativity predicted the expansion of the universe and that most awesome compaction of matter — the black hole.

Today astronomers study the accretion of matter onto supermassive black holes in quasars and search the most distant regions of the universe to learn about the exotic physical conditions which existed when the universe's expansion was only fractions of a second old. By measuring the gravitational interactions on distance scales from galaxies to the vast superclusters of galaxies, astronomers have concluded that most of the universe's matter is dark or nonluminous; physicists have speculated that this dark matter may consist of yet-undiscovered exotic particles which are predicted by the most advanced theories of elementary particle physics.

By recently consolidating the former Department of Physics and the Department of Astronomy into the new joint Department of Physics and Astronomy, faculty members and students

at UCLA are able to study the universe in the holistic manner which is demanded by the breadth of these two disciplines.

## Undergraduate Study

The Department of Physics and Astronomy offers a choice of three undergraduate majors: the B.S. degree program in Astrophysics, the B.S. degree program in Physics, and the B.A. degree program in General Physics. Courses taken to fulfill any of the requirements for either major must be taken for a letter grade.

## Bachelor of Science in Astrophysics

### Preparation for the Major

*Required:* Astronomy 81, 82, Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL, 8E, Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Program in Computing 3 or 10A. *Recommended:* Astronomy 3H, Chemistry and Biochemistry 11A. Systematic study of astrophysics should begin with Astronomy 81 and 82, taken in the second year.

### The Major

*Required:* Astronomy 115, 117, 127, 140, 180; Physics 105A, 105B, 110A, 110B, 115A, 115B, 131. *Recommended:* Physics 108, 112, 123, 124, 132.

### Honors Program

Senior majors in astrophysics with a 3.4 grade-point average in all astronomy, mathematics, and physics courses are eligible for the honors program in astrophysics. In addition to completing all courses required for the major, students must complete two terms of Astronomy 199. To receive honors and highest honors at graduation, their grade-point average must remain at 3.4 or better, and their work in course 199 must reflect original research and be accepted by the departmental honors committee.

## Bachelor of Science in Physics

The physics major should be taken if students intend to continue toward the Ph.D. in Physics.

### Preparation for the Major

*Required:* Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL, 8E; Chemistry and Biochemistry 11A, 11B/11BL; Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on the major is available from the Undergraduate Office, 3-160 Knudsen Hall.

### The Major

*Required:* Physics 105A, 105B, 110A, 110B, 112, 115A, 115B, 131. The remainder of the course of study consists of a plan, to be worked out by students in consultation with their designated departmental adviser, that details which courses they take to complete the degree. There are four overall requirements: (1) the plan must be worked out five terms before students expect to graduate; (2) the plan must include at least two courses from the

Physics 180 series; (3) there must be at least five upper division courses in the plan; (4) there must be written rationale for the plan. Except for the Physics 180 laboratories, the courses need not be in the Physics and Astronomy Department. However, it is expected that the courses fit into a coherent structure. It is important that the structure and rationale are thought out carefully, as the plan must be endorsed by the designated adviser and be approved by the departmental academic affairs committee. Preapproved plans of study are available from the undergraduate advisers. A C average is required in all courses taken to satisfy the major requirements.

Students preparing for graduate school should take additional courses in physics and mathematics. Physics M122, 123, 124, 126, 132, and 140 are recommended.

Junior **transfer students** should preferably have completed (1) a two-year calculus/analytic geometry sequence or equivalent and (2) the calculus-based physics course at their previous college, but in no case should less than three semesters or four quarters of the mathematics and one year of the physics sequence be completed before transferring to UCLA. Each mathematics and physics course must be passed with a grade of C or better.

## Honors Programs

The department offers three honors programs leading to graduation with honors or highest honors in physics. Students are eligible after completing the preparation for the major and four upper division physics courses with an overall grade-point average of 3.0 and a 3.5 GPA in upper division physics and mathematics courses. Contact the Undergraduate Office for a complete description of the programs and an application.

## Bachelor of Arts in General Physics

The general physics major is intended to provide the necessary flexibility for fields in which a strong background of knowledge in physics would be helpful. If students intend to continue work toward the Ph.D. in Physics, they are advised to work for the B.S. in Physics as described earlier.

### Preparation for the Major

*Required:* Physics 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL, 8E; Chemistry and Biochemistry 11A, 11B/11BL; Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on the major is available from the Undergraduate Office.

### The Major

*Required:* Physics 105A, 110A, 110B, 112, 115A, 131, one course from the 180 series, two upper division physics electives (excluding 185 and 199), and five upper division courses in no more than two other UCLA departments. A C average in the upper division physics courses is required.

## Instructional Credentials

Students may earn credentials for teaching physical sciences and other subjects in California elementary and secondary schools. Completion of the instructional credential program in the Teacher Education Laboratory is required. Consult the Graduate School of Education and Information Studies, 1009 Moore Hall, (310) 825-8328, for information.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Astronomy

### Master's Degrees

The department offers the Master of Science degree, the Master of Arts in Teaching, and the Ph.D. degree in Astronomy; however, the department is not admitting students to the Master of Arts in Teaching program at this time.

### Master of Science

#### Admission

The basic requirement for admission to the Master of Science program in Astronomy is a bachelor's degree in physics or astronomy. Applicants in closely related fields (such as mathematics or chemistry) may be admitted at the discretion of the department. Applicants should submit at least three letters of recommendation and scores from the Graduate Record Examination (GRE) General Test and Subject Test in Physics.

Entering students or those who have not been admitted to candidacy for the Ph.D. should consult with the chair of graduate admissions at the beginning of the Fall Quarter to determine a program for the year.

#### Areas of Study

Contact the department.

#### Course Requirements

Eleven courses are required for the master's degree, of which at least 10 must be at the graduate level in physics and astronomy. At least one of the courses must consist of a quarter of work on the second-year research project. Courses taken in the 300 or 500 series may not apply toward the total course requirements or the graduate course requirement.

#### Comprehensive Examination Plan

The comprehensive examination consists of satisfactory completion of the second-year research project, culminating in a written report of the methods used and results obtained, and the oral portion of the comprehensive examination at the master's level. The oral portion is described in more detail under the description

of the written and oral qualifying examinations for the doctorate.

#### Thesis Plan

None.

## Master of Arts in Teaching

### Admission

The department is not admitting students to the program at this time.

### Areas of Study

It is not required to designate an area of specialization for the M.A.T. degree

### Course Requirements

Nine courses are required for the academic portion of the M.A.T. program. They must include at least five graduate courses in astronomy (excluding Astronomy 200), mathematics, or physics, or 100- or 200-series courses in education required for the instructional credential. The B segments of the graduate multiple-term courses (Astronomy 204B, 208B, 217B, 219B, 227B, 230B) count as 1.5 courses each for the purpose of receiving degree credit. Although it does not count for degree credit, Physics 370 is also required. Courses taken in the 300 or 500 series may not be applied toward the total course requirement or the graduate course requirement.

In order to obtain a secondary credential with the M.A.T. in Astronomy, additional courses in education, including supervised teaching, should be taken.

### Comprehensive Examination Plan

The comprehensive examination plan is the same as for the M.S. degree.

### Thesis Plan

None.

## Doctoral Degree

### Admission

The basic requirement for admission to the Ph.D. program in Astronomy is a bachelor's degree in physics or astronomy. Students in closely related fields (such as mathematics or chemistry) may be admitted at the discretion of the department. Applicants should submit at least three letters of recommendation and scores from the Graduate Record Examination (GRE) General Test and Subject Test in Physics.

Entering students or those who have not been admitted to candidacy for the Ph.D. should consult with the chair of graduate admissions at the beginning of the Fall Quarter to determine a program for the year.

### Major Fields or Subdisciplines

Consult the department.

### Course Requirements

The required courses for the Ph.D. degree are Astronomy 270 through 276, Physics 210A, 210B, 221A. During the Fall and Winter Quarters of the second year, students must enroll in

Astronomy 277A-277B. In addition, Astronomy 278 must be taken at least once per year for the first two years. Students must take the nine core courses in astronomy and physics offered during the first five quarters of residence and achieve a grade-point average of at least B, averaged over all astronomy and physics graduate courses taken during this time. Exceptions or substitutions can be made by petition only and must be arranged in advance or, for students transferring from another institution, during or before the first quarter of residence.

*Research Project.* Students must satisfactorily complete the two-quarter second-year research project, culminating in a written report of the methods and the results of the research performed. Before undertaking the second-year research project, students must identify a faculty adviser who is willing to oversee their work on the project.

### Written and Oral Qualifying Examinations

Inasmuch as the primary goal of the graduate program in astronomy is to train students to do research at the Ph.D. level, the purpose of the master's comprehensive/doctoral qualifying examination is (1) to assess students' general knowledge of astronomy and physics at the graduate level and (2) to assess students' capacity to perform fundamental research, and thus to become successful research scientists. The structure of the comprehensive examination is designed accordingly.

The master's comprehensive/doctoral qualifying examination and the requirements leading up to it are administered by a graduate evaluation committee, appointed by the vice chair, and consisting of three members. The graduate evaluation committee evaluates all second-year students every Spring Quarter.

All second-year students are assessed by the graduate evaluation committee for their performance on the qualifying examination on the basis of the following:

(1) A collective assessment of the written report on the second-year research project, which constitutes the written qualifying examination.

(2) Performance on the oral portion of the comprehensive examination, administered by the comprehensive examination committee at the beginning of the Spring Quarter of the student's second year. During this oral portion of the comprehensive examination, students present the results of their second-year research project and are expected to be able to respond to questions and to solve basic problems from all core areas of astrophysics in which they have had the opportunity to take the course following the normal schedule of classes.

The graduate evaluation committee notifies students of their assessment of their performance on the examination by June 30. The examination is based primarily on the combination of the oral examination plus the written re-

port on the second-year research project. In addition, the committee reviews the instructors' written narratives and the file of the student's final examinations in all graduate courses taken in order to place the student's performance on the oral examination into a maximally broad context. The potential outcomes of the assessment are

(1) Pass — with immediate eligibility to proceed to the University Oral Qualifying Examination.

(2) No pass — with the possibility of reassessment in the following year on the basis of a specific written list of requirements supplied by the graduate evaluation committee. (This option is meant to be used sparingly for students with a single, identifiable and presumably correctable weakness, but who are otherwise above the passing threshold.) The no-pass option can only be used once for any particular student.

(3) Terminal master's pass — allowing the student only to finish any outstanding course requirements for the master's degree, if any.

(4) Fail — resulting in immediate termination of the student's affiliation with the department.

After the scope of the Ph.D. dissertation research has been clearly defined and in consultation with the student's dissertation adviser, a doctoral committee is nominated, approved by the department chair, and finally appointed by the dean of the Graduate Division. This committee, generally consisting of three members from the Physics and Astronomy Department and one member from another department, conducts the University Oral Qualifying Examination. The main purpose of this examination is to discuss and evaluate the student's proposed dissertation problem, but at the discretion of the committee, questions may be asked with regard to other material in the student's field of specialization and related matters. The committee members guide, read, approve, and certify the dissertation. At least two members from the Physics and Astronomy Department and at least one outside member must serve as certifying members for the dissertation. At the end of this examination, the committee decides whether a final oral examination is required. The oral qualifying examination is taken no later than the tenth quarter in residence.

## Physics

### Master's Degrees

The department offers the Master of Science, the Master of Arts in Teaching, and the Ph.D. degrees in Physics.

### Master of Science

#### Admission

Applicants to the Master of Science program in Physics must have an excellent undergraduate record in addition to meeting the University minimum requirements. Applicants are required to submit three letters of recommenda-

tion and scores from the Graduate Record Examination (GRE) Subject Test in Physics. International applicants applying for financial support (fellowships, teaching and research assistantships) should have a letter of recommendation (included as one of the three required letters of recommendation) which comments on their verbal ability in English. The Test of English as a Foreign Language (TOEFL) is a University entrance requirement.

#### Areas of Study

It is not required to designate an area of specialization for a terminal master's degree.

#### Course Requirements

The University requires a total of nine courses for the M.S. degree. To satisfy the minimum requirement of six graduate courses in physics specified by the department, it is recommended that five of the minimum requirement of six be the five fundamental core courses: Physics 210A, 210B, 215A, 221A, 221B, since the comprehensive examination is based on the content of these courses. Students must also take, and pass with a letter grade of B or better, one of the following breadth courses: Physics 220, 221C, 231A. The remaining three courses of the minimum nine courses required for the M.S. degree may be satisfied through upper division or graduate courses in physics or a related field, which are acceptable to the Physics and Astronomy Department for credit toward the M.S. degree, with the restriction that no more than two may be chosen from Physics 596 and/or seminar courses. Physics 597 and 598 may not be applied.

#### Comprehensive Examination Plan

A passing grade on the written comprehensive examination is required. If students fail to pass the examination at the master's level, they may take it a second time the next quarter it is given. For more detailed information, see Written and Oral Qualifying Examinations in the following Doctoral Degree section.

#### Thesis Plan

Although the department operates under the comprehensive examination plan rather than the thesis plan, arrangements can usually be made for students to write a master's thesis, provided they have a particularly interesting subject and provided a professor is willing to undertake the guidance of their project. In this case, students must petition the committee of graduate advisers for permission to pursue the thesis plan. If the petition is approved, the comprehensive examination is waived.

### Master of Arts in Teaching

#### Admission

For information about the Master of Arts in Teaching (M.A.T.) program, direct inquiries to the Director of the Master of Arts in Teaching Program, Department of Physics and Astronomy, 3-164 Knudsen Hall, UCLA, Los Angeles, CA 90024-1547.

### Areas of Study

It is not required to designate an area of specialization for the M.A.T. degree.

### Course Requirements

This degree leads to qualification for instructional credentials at the secondary school or junior college level. The University requires a total of 12.5 courses for the M.A.T. degree. The program consists of at least five graduate physics courses, four of which are chosen from Physics 210A, 210B, 215A, 221A, 221B, and five professional (300 series) courses.

Courses required are (1) the five graduate physics courses and (2) the courses necessary for completion of the preliminary State of California Single Subject Instructional Credential, K-12 (Education 100A-100B, 112, 312, 315A-315B, 330B, 330C, Community Health Sciences 187, and Physics 370, which is a special physics teaching laboratory).

Courses in the 500 series are not applicable toward the M.A.T. degree. Students are required to see the adviser at the beginning of each quarter through the completion of the degree.

### Comprehensive Examination Plan

A passing grade on the written comprehensive examination is required. Students who fail to qualify at the master's level of achievement may repeat the examination a second time.

### Thesis Plan

None.

## Doctoral Degree

### Admission

Applicants must have an excellent undergraduate record in addition to meeting the University minimum requirements. Applicants are required to submit three letters of recommendation and scores from the Graduate Record Examination (GRE) Subject Test in Physics. International applicants applying for financial support (fellowships, teaching and research assistantships) should have a letter of recommendation (included as one of the three required letters of recommendation) which comments on their verbal ability in English. The Test of English as a Foreign Language (TOEFL) is a University entrance requirement.

### Major Fields or Subdisciplines

Doctoral degrees are based on original work, generally in one of the following fields of specialization: accelerator physics; elementary particles; intermediate energy and nuclear physics; low-temperature/acoustics; plasma and astrophysics; condensed matter, including solid-state; and spectroscopy.

Arrangements can also be made for a Ph.D. in Physics while doing research in interdisciplinary fields such as biophysics, astrophysics, and geophysics. The details of each program should be established in consultation with the graduate affairs officer.

## Course Requirements

By the end of the first year of graduate study students are expected to acquire a mastery of the core graduate physics material represented by Physics 210A and 210B (electromagnetic theory), 215A (statistical physics), and 221A and 221B (quantum mechanics). Detailed syllabi for these courses are available in the graduate counselor's office. Since the material in these core courses represents the body of knowledge tested on the written comprehensive examination, usually all or most of these five courses are the student's main course load in the first year of graduate study.

No later than the fourth quarter of residence, students are expected, in consultation with their adviser, to have begun taking a series of courses, seminars, and tutorials to prepare them for original research in a given area of specialization. Information produced by various area committees on preferred course sequences and programs is available to students and to their advisers. No later than the sixth quarter of residence, students are expected to begin taking a sequence of Physics 596 (Directed Individual Studies) courses with a faculty member in their chosen field of specialization. The purpose of these 596 courses is to prepare the student for original Ph.D. dissertation research and to enable the student to obtain a Ph.D. research sponsor. It is the responsibility of the faculty member with whom the 596 courses are taken to provide the student with a frank, on-going evaluation of progress toward these goals. By the second quarter of this 596 sequence, students are expected to make a substantive oral presentation describing the results of a problem in the 596 program before an audience which includes the faculty member(s) with whom they are taking 596 and three other faculty members. It is the responsibility of the faculty member to specify the content of the presentation. The function of the three additional faculty members is to serve as a departmental resource in the event that difficulties arise during the presentation. This presentation is intended both to allow the faculty member to assess the student's ability to carry out research and to provide a forum to discuss the student's research goals.

No later than the end of the eighth quarter of residence, students are expected to make a formal arrangement with a faculty member who agrees to serve as the Ph.D. research sponsor. This agreement, which includes a general statement on the direction of the Ph.D. dissertation research, is communicated to the graduate affairs officer. If by the end of the eighth quarter of residence the student has not obtained a Ph.D. research sponsor, this situation is referred by the graduate affairs officer to the Committee of Graduate Advisers. The committee then makes a decision on whether the student should continue in the graduate program based on discussions with the student, the student's 596 advisers, and other concerned parties.

All students must fulfill a breadth requirement by passing one of the following with a B or better: Physics 220, 221C, or 231A. In addition, students who have not taken Physics 132 or its equivalent in undergraduate status must do so at the beginning of the graduate program. These core and breadth requirements should be completed by the fifth quarter in residence.

## Written and Oral Qualifying Examinations

A written comprehensive examination is required of all graduate students. This examination is administered by a departmental comprehensive examination committee and is graded as follows: (1) pass at the Ph.D. level of achievement; (2) pass at the master's level of achievement; (3) fail.

This written comprehensive examination consists of two three-hour sections given on consecutive days, and its scope is defined by the graduate physics material in the five core courses (Physics 210A, 210B, 215A, 221A, and 221B).

This written comprehensive examination is offered twice a year, in the week before the beginning of classes in the Fall Quarter and in the period between the Winter and Spring Quarters.

Students entering the graduate program in the Fall Quarter are expected to take the written comprehensive examination before their fourth quarter of residence.

Students who fail this examination at the desired level and want to repeat it must take it the next time it is offered.

After the scope of the Ph.D. dissertation research has been clearly defined and in consultation with the student's dissertation adviser, a doctoral committee is nominated, approved by the department chair, and finally appointed by the dean of the Graduate Division. This committee, generally consisting of three members from the Physics and Astronomy Department and one member from another department, conducts the University Oral Qualifying Examination. The main purpose of this examination is to discuss and evaluate the student's proposed dissertation problem, but at the discretion of the committee, questions may be asked in regard to other material in the student's field of specialization and related matters. The committee members guide, read, approve, and certify the dissertation. At least two members from the Physics and Astronomy Department and at least one outside member must serve as certifying members for the dissertation. At the end of this examination, the committee decides whether a final oral examination is required. The oral qualifying examination is taken no later than the tenth quarter in residence.

## Astronomy

### Lower Division Courses

The department offers general courses to all University students, including those who are not science oriented.

The Astronomy 2A-2B two-term sequence covers the material in courses 3, 4, and 6. Students may take one sequence or the other, but not both.

Astronomy 3 is the fundamental one-term course for students who do not major in physical sciences and should be taken in the first or second year. Students who had an astronomical introductory course in high school should take either courses 2A-2B, or 3H.

Astronomy 4, 5, and 6 develop the topics covered in course 3 to somewhat greater depths. They use more mathematics but are still aimed at nonscience majors. Course 4 details the stars and stellar systems; course 5 concentrates on the problem of life in the universe; course 6 discusses endpoints of stellar evolution and the structure and evolution of the universe. These three courses may be taken in any order by students with a grade of C or better in course 3, or whose astronomical knowledge is on a similar level.

Students who have had at least two courses in high school algebra and one course in trigonometry are advised to take, instead of Astronomy 3, the parallel honors course, Astronomy 3H. Declared or potential majors in astrophysics or in physical sciences should take course 3H if they need an elementary introductory course in astronomy.

Astronomy 81 and 82 are general survey courses recommended for science majors in their second year. They systematically introduce astrophysics and require a good background in physics and mathematics (at least two terms of the Physics 8 series and two terms of the Mathematics 31/32 series).

Students of junior and senior standing in physics or related sciences are invited to select any of these courses: 115, 117, 127, 140, 180.

**2A-2B. Introduction to the Physical Universe.** Lecture, three hours; discussion, one hour. Thorough introductory survey of astronomy for students not planning to major in physical sciences. Same topics as course 3 but in greater depth, with emphasis on physical reasoning. **2A.** Planets and Stars; **2B.** Galaxies and Cosmology. Enforced prerequisite: course 2A (C or better).

**3. Astronomy: Nature of the Universe.** Lecture, three hours; discussion, one hour. Not open to students with credit for or currently enrolled in course 3H or 81 or 82. No special mathematical preparation required beyond that necessary for admission to the University in freshman standing. Course for general University students, normally not intending to major in physical sciences, on development of ideas in astronomy and what has been learned of the nature of the universe, including recent discoveries and developments.

**3H. Introductory Astronomy and Astrophysics.**

Lecture, three hours; discussion, one hour. Not open to students with credit for or currently enrolled in course 3. Introduction to astronomy and astrophysics for freshmen who are seriously interested in science. Requires ability to understand mathematical and physical concepts, but high school algebra and trigonometry classes provide sufficient qualification. Particularly recommended for declared or potential majors in astrophysics or in physical and mathematical sciences.

**4. Universe of Stars and Stellar Systems.** Lecture, three hours; discussion, one hour. Enforced requisite: course 3 or 3H. Essentially nonmathematical course for general University students with previous introduction to astronomy; sequel to course 3, dealing in greater detail with stars and stellar systems. Various observed types of stars in relation to their internal structure and evolutionary state. Interacting binary stars, pulsating stars, explosive stars (novae and supernovae). Mass loss from stars, stellar wind. Galactic and planetary nebulae and their relation to stars. Interstellar medium. Initial stages of stellar evolution (protostars, T Tauri stars) and final stages (degenerate and collapsed stars). Stellar systems from clusters to galaxies.

**5. Life in the Universe.** Preparation: prior introduction to astronomy. Life on Earth and prospects for life elsewhere in the context of the evolution of the universe from the simple to complex. Course material primarily from astronomy and biology but includes some chemistry, geology, and physics. Selected topics treated in some depth, but with little or no formal mathematics.

**6. Cosmology: Our Changing Concepts of the Universe.** Lecture, three hours; discussion, one hour. Enforced requisite: course 3 or 3H. Exposition of our ideas about the structure and evolution of the universe and its contents. Special and general relativity; black holes, neutron stars, and other endpoints of stellar evolution. Expanding universe, cosmic microwave background radiation, dark matter. Big Bang and inflation.

**81. Astrophysics I: Stars and Nebulae.** Lecture, three hours; laboratory, one hour. Enforced requisites: Mathematics 31A, 31B, Physics 8A. Open to qualified sophomore and upper division students. Survey of our knowledge about stars: their distances, masses, luminosities, temperatures, and interrelations between these parameters. Methods and importance for astrophysics. Variable stars. Planetary and gaseous nebulae.

**82. Astrophysics II: Stellar Evolution, Galaxies, and Cosmology.** Lecture, three hours; discussion, one hour. Enforced requisites: Mathematics 31A, 31B, Physics 8A. Recommended: course 81, Physics 8B, 8C. Open to qualified sophomore and upper division students. Basic principles of stellar structure and evolution. Red giants, white dwarfs, novae, supernovae, neutron stars, and black holes. Pulsars and galactic X-ray sources. Milky Way galaxy and the interstellar medium. Extragalactic astronomy, galaxy clustering, active galactic nuclei, and quasars. Introduction to cosmology: Hubble law, thermal history of the Big Bang, and earliest moments of the universe.

**88A-88Z. Lower Division Seminars (2 units each).** Discussion, two hours; outside study, four hours. Limited to freshmen. Variable topics; consult *Schedule of Classes* for topics to be offered in a specific term. P/NP or letter grading.

**88A. Cosmic Evolution.** Varied astronomical and physical processes of evolution; discussion of how, over billions of years, basic mechanisms of cosmic evolution have transformed universe from fiery origin at Big Bang into abode for intelligent life.

**Upper Division Courses**

**115. Statistical Mechanics and Its Application to Astrophysics.** Lecture, three hours. Prerequisites: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Physics 8A, 8B, 8C, 8D. Particle distributions, partition functions, black body radiation, Saha equation, degeneracy. Applications to stellar atmospheres, stellar interiors, and the interstellar medium.

**117. Radiation and Fluids in Astrophysics.** Lecture, three hours. Prerequisites: course 115 or equivalent and junior standing in astrophysics or physics, or consent of instructor. Emission and absorption of radiation by matter, spectroscopy, spectral lines, and radiative transfer. Hydrodynamics and shock waves. Applications to stars, to interstellar and intergalactic media, and to the early universe.

**127. Stellar Atmospheres, Interiors, and Evolution.** Lecture, three hours. Prerequisite: senior standing in astrophysics or physics or consent of instructor. Recommended: courses 115, 117. Physical conditions in stellar interiors. Energy production in stars. Stellar evolution from star formation through normally observed stages to white dwarfs, neutron stars, and black holes. Novae, supernovae, other variable stars, chromospheres and coronae of sun and stars. Evolution of binary stars. Analysis of stellar atmospheres.

**140. Stellar Systems and Cosmology.** Lecture, three hours. Prerequisite: senior standing in astrophysics or physics or consent of instructor. Properties of star clusters and galaxies, with particular emphasis on Milky Way galaxy. Clusters and superclusters of galaxies. Extragalactic distance scale. Quasars and active galaxies. Topics in cosmology, including expansion of the universe, microwave background, galaxy formation from primordial fluctuations, and observational constraints on the Big Bang.

**180. Astrophysics Laboratory.** Lecture, two hours; laboratory, four hours. Prerequisites: junior or senior standing in astrophysics, physics, or a related field, consent of instructor. Lectures cover statistical methods in astrophysics, one- and two-dimensional random processes, and numerical methods. Laboratory experiments involve radio astronomy, interferometry, narrowband solar imaging, and visual photometry. Emphasis on use of computers for automatic collection of data and for processing two-dimensional astronomical images.

**199. Special Studies (2 or 4 units).** Prerequisites: senior standing in astrophysics or physics (with an outstanding record), consent of instructor. Special studies with an individual faculty member.

**Graduate Courses**

**219C. Stellar Systems (10 units).** Statistical astronomy. Distance determination. Stellar motions and populations. Stellar dynamics. Structure of the galaxy. Galaxies and clusters of galaxies. Distribution of matter in space. Cosmology.

**270. Fundamentals I: Fluids and Dynamics.** Lecture, three hours. Dynamics of gaseous flows and collisionless, self-gravitating systems. Basic equations of fluid dynamics, with application to shocks, winds, and accretion. The Jeans, Kelvin/Helmholtz, and Rayleigh/Taylor instabilities. Basic equations of stellar dynamics and application to relaxation processes, including virialization, core collapse, and dynamical friction.

**271. Fundamentals II: Radiation.** Lecture, three hours. Radiative transitions in molecules, atoms, and nuclei. Sources of continuous and line radiation. Transition probabilities for spontaneous and stimulated emission and for absorption. Source function and equation of radiative transfer, with applications. Curve of growth and abundance determinations. Scattering processes, polarized light, masers.

**272. Stellar Structure and Evolution.** (Formerly numbered 227A-227B-227C.) Lecture, three hours. Structure and evolution of stars, stellar energy sources and problems of nucleosynthesis, theory of variable stars, structure of the sun from helioseismology and neutrinos. Supernova processes. Binary systems.

**273. Stellar Photospheres.** (Formerly numbered 217A-217B-217C.) Lecture, three hours. Physics of stellar photospheres. Radiative transfer under stellar atmosphere conditions. Continuous and line spectra of stars. Chemical abundances in stars. Stellar winds and stars with extended atmospheres.

**274. Galaxies.** (Formerly numbered 219A.) Lecture, three hours. Galaxy properties: kinematics, mass, morphology, stellar populations; stellar orbits and spiral structure; galaxy formation; galaxy clusters, collisions, and mergers; observations and theory of quasars and active galactic nuclei.

**275. Cosmology.** (Formerly numbered 219B.) Lecture, three hours. Prerequisite: course 274. Thermal and physical history of the universe. Interaction of matter and cosmic microwave background radiation. Study of inhomogeneities in the universe from inflationary epoch to the current large-scale structure.

**276. Instrumentation and Observational Techniques.** Lecture, three hours. Telescopes, optical principles, cameras, and spectrographs. Optical detectors; photomultiplier tubes, CCDs. Infrared detectors and arrays. Radio detectors. X-ray and gamma-ray detectors. Interferometry and aperture synthesis. Data analysis techniques. Statistical methods.

**277A-277B. Astronomy Research Project (6 units each).** Prerequisite: second-year graduate standing in astronomy. Two-term research project planned in conjunction with a faculty adviser on any suitable research topic in astronomy or astrophysics, culminating in a written report at end of second term. S/U (course 277A) or letter (course 277B) grading.

**278. Special Topics in Astronomy (2 or 4 units).** Informal course with lecture/seminar format, focusing on one of a set of specific topics in astronomy. S/U (two-unit course) or letter (four-unit course) grading.

**279. Seminar: Current Astronomical Research (2 units).** (Formerly numbered 250.) Astronomy and astrophysics colloquium with lectures on current research by local and visiting researchers. S/U grading.

**M285. Origin and Evolution of Solar System.** (Same as Earth and Space Sciences M285.) Dynamical problems of solar system; chemical evidences from geochemistry, meteorites, and solar atmosphere; nucleosynthesis; solar origin, evolution, and termination; solar nebula, hydromagnetic processes, formation of planets and satellite systems. Content varies from year to year. May be repeated for credit. S/U grading.

**296. Research Topics in Astronomy (2 units).** (Formerly numbered 296A-296Z.) Advanced study and analysis of current topics in astronomy. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

**M297. Research Tutorial: Astroparticle Physics (2 or 4 units).** (Same as Physics M297.) Lecture, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of current interest in astroparticle physics. May be repeated for credit. S/U grading.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

The following courses may be repeated at the discretion of the department:

**596A. Directed Individual Studies (4 to 10 units).**

**596L. Advanced Study and Research at Lick Observatory (4 to 12 units).** Intended for graduate students who require observational experience, as well as those working on observational problems for their thesis.

**599. Ph.D. Research and Writing (10 to 12 units).**

# Physics

## Lower Division Courses

Students who wish to use physics to satisfy part of the general education requirements in the physical sciences and who have no mathematics background beyond the high school mathematics required for admission to UCLA may take either Physics 10 or 3A if only one course is to be taken, or 3A and 3B as a two-course sequence.

Physics 1Q is intended for entering freshman physics majors and other interested students. Although it is not a required course or a part of or requisite to any general physics sequence of courses, its purpose is to indicate the nature of current research problems in physics on a level intended to be attractive to entering students with a good high school science and mathematics background.

Physics 3A, 3B, 3C form a one-year sequence of courses in general physics (with laboratory). In this sequence only algebra and trigonometry are used in providing a mathematical description of physical phenomena; calculus is not used.

Physics 6A, 6B, 6C form a one-year sequence of courses in basic physics for students in the biological and health sciences. However, unlike Physics 3A, 3B, 3C, calculus is used throughout, and successful completion of basic calculus courses is a requisite for admission to this sequence.

Physics 8A, 8B, 8C, 8D, 8E form a sequence of courses in general physics for majors in physics.

The department takes into account prior preparation in physics. If students feel their background would permit acceleration, they may be exempted from one or more of courses 8A through 8E by taking the final examination with a class at the end of any term. These serve as placement examinations. A satisfactory score on one or both parts of the College Board Advanced Placement Physics C Test may also serve as a placement examination, but placement is not automatic. Students should discuss such possibilities with their departmental adviser.

Physics 10 is a one-term, nonlaboratory course which surveys the whole field of physics. Any two or more courses from Physics 3A, 6A, 8A, and 10 are limited to six units credit.

**1Q. Contemporary Physics (2 units).** Review of current problems in physics, with emphasis on those being studied at UCLA. Significance of the problems and their historical context. P/NP grading.

**3A. General Physics: Mechanics of Solids and Fluids.** Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Preparation: three years of high school mathematics including trigonometry or two years of high school mathematics and one-term college course in mathematics with trigonometry included in the group of courses or equivalent courses. Not open for credit to students with credit for course 8A or equivalent. Fundamentals of classical mechanics: Newton laws; conservation of momentum, angular momentum, energy; Kepler laws; dynamics of systems of particles; fluid mechanics.

**3B. General Physics: Heat, Sound, Electricity and Magnetism.** Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: course 3A. Temperature, heat, and laws of thermodynamics. Introduction to wave motion, resonance. Sound and acoustics. Electric and magnetic fields. Electric power. Elements of DC and AC circuits.

**3C. General Physics: Light, Relativity, and Modern Physics.** Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: course 3B. Light, optical instruments. Introduction to relativity. Electron and atom. Matter waves. Nuclear and particle physics.

**6A. Physics for Life Sciences Majors: Mechanics.** Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisites: Mathematics 3A, 3B, 3C (may be taken concurrently).

**6B. Physics for Life Sciences Majors: Electricity and Magnetism.** Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: course 6A.

**6C. Physics for Life Sciences Majors: Light and Modern Physics.** Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: course 6B.

**8A. Physics for Scientists and Engineers: Mechanics.** Lecture/demonstration, four hours; discussion, one hour. Enforced requisites: course 8AL (corequisite), Mathematics 31A, 31B (corequisite). Recommended: high school physics and chemistry. Motion, Newton laws, work, energy, linear and angular momentum, rotation, equilibrium, gravitation.

**8AH. Physics for Scientists and Engineers: Mechanics (Honors).** Lecture, four hours; discussion, one hour. Enforced requisite: Mathematics 31A. Introduction to classical mechanics for engineering and physical sciences students.

**8AL. Physics Laboratory for Scientists and Engineers: Mechanics (1 unit).** Laboratory, two hours. Enforced corequisite: course 8A. Experiments performed on falling bodies, acceleration on an air track, conservation of energy, and rotational kinematics. State-of-the-art computer data acquisition and analysis, with introduction to error analysis.

**8B. Physics for Scientists and Engineers: Waves, Sound, Heat.** Lecture/demonstration, three hours; discussion, one hour. Enforced requisites: courses 8A, 8BL (corequisite), Mathematics 31B, 32A (corequisite). Harmonic oscillators, standing and traveling waves, fluid dynamics, sound, kinetic theory of gases, laws of thermodynamics.

**8BH. Physics for Scientists and Engineers (Honors).** Lecture/demonstration, three hours; discussion, one hour. Enforced requisites: course 8A (A or better), Mathematics 31B, 32A (corequisite). Same material as course 8B but in greater depth.

**8BL. Physics Laboratory for Scientists and Engineers: Waves, Sound, Heat (1 unit).** Laboratory, two hours. Enforced corequisite: course 8B. Experiments performed on harmonic oscillations, standing waves, acoustics, and thermodynamics. Development of error and analysis, including distributions and least-squares fitting procedures.

**8C. Physics for Scientists and Engineers: Electricity and Magnetism.** Lecture/demonstration, four hours; discussion, one hour. Enforced requisites: courses 8B, 8CL (corequisite), Mathematics 32A, 32B (corequisite). Electrostatics: electric field and potential, capacitors and dielectrics. Currents, DC circuits, transients in RC circuits. Magnetism: magnetic fields and forces, Ampere law, Faraday law, magnetic properties of matter. Maxwell equations in integral form. Inductance and transients in RL circuits.

**8CH. Physics for Scientists and Engineers (Honors).** Lecture/demonstration, four hours; discussion, one hour. Enforced requisites: course 8BH (or 8B, A or better), Mathematics 32A, 32B (corequisite). Same material as course 8C but in greater depth.

**8CL. Physics Laboratory for Scientists and Engineers: Electricity and Magnetism (1 unit).** Laboratory, two hours. Enforced corequisite: course 8C. Experiments performed on effects of electric and magnetic fields, resistance, capacitance, time-varying circuits. Use of equipment such as voltmeters, oscilloscopes.

**8D. Physics for Scientists and Engineers: Electromagnetic Waves, Light, and Relativity.** Lecture/demonstration, three hours; discussion, one hour. Enforced requisites: courses 8C, 8DL (corequisite), Mathematics 32B, 33A (corequisite). AC circuits, resonance. Maxwell equations in differential form. Electromagnetic waves. Light: reflection, refraction, interference, diffraction, polarization. Special theory of relativity.

**8DH. Physics for Scientists and Engineers (Honors).** Lecture/demonstration, three hours; discussion, one hour. Enforced requisites: course 8CH (or 8C, A or better), Mathematics 32B, 33A (corequisite). Same material as course 8D but in greater depth.

**8DL. Physics Laboratory for Scientists and Engineers: Electromagnetic Waves, Light, and Relativity (1 unit).** Laboratory, two hours. Enforced corequisite: course 8D. Experiments performed on reflection, refraction, polarization, diffraction, and interference with light and microwaves. Equipment includes laser, traveling microscope.

**8E. Physics for Scientists and Engineers: Modern Physics.** Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisites: course 8D, Mathematics 33A, 33B (corequisite). Wave-particle duality, quantum theory, Schrödinger equation, hydrogen atom, exclusion principle.

**10. Physics.** Lecture/demonstration, three hours; quiz/discussion, one hour. Not open for credit to students with credit for course 3A or 6A or 8A or equivalent course in mechanics. Special mathematical preparation beyond that necessary for admission to University in freshman standing not required. Topics include planetary motion, Newton laws, gravitation, electricity and magnetism, wave motion, light, sound, and heat, relativity, quantum mechanics, atoms, and subatomic particles. As time permits, development of physical ideas placed in cultural and historical perspective.

**88. Lower Division Seminar: Current Topics in Physics (2 units).** Limited to freshmen/sophomores. Intensive exploration of a particular theme or topic based on current research. Consult *Schedule of Classes* for topics to be offered in a specific term. P/NP or letter grading.

**M88. Limits of Biological Design through Physical Principles.** (Same as Molecular, Cell, and Developmental Biology M88H.) Seminar, three hours. Enforced requisites: courses 6A, 6B, and 6C, or 8A, 8B, 8C, and 8D, Chemistry 10A and 10B, or 11A and 11B, Life Sciences 1, 3, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A. Specific examples of diverse biological design such as scaling of metabolic activity, bone and muscle mass, cell size, cell membranes and pumps, heart and blood circulation, swim bladders, insect vision, magnetic bacteria, etc., studied quantitatively using elementary mathematics and physical principles.

## Upper Division Courses

Requisites for all upper division courses (except Physics 105A, 116): Physics 8A through 8E, Mathematics 31A, 31B, 32A, 32B, 33A, and 33B, or consent of instructor. It is recommended that students take the 180 laboratories in their senior year.

**105A. Analytic Mechanics.** Lecture, three hours; discussion, one hour. Prerequisite: Mathematics 32A. Corequisite: Mathematics 32B. Newtonian mechanics and conservation laws, gravitational potentials, calculus of variations, Lagrangian and Hamiltonian mechanics, central force motion, linear and nonlinear oscillations.

**105B. Analytic Mechanics.** Prerequisite: course 105A. Relativity with four vectors, noninertial reference frames, dynamics of rigid bodies, coupled oscillators, normal modes of oscillation, vibrating strings, and wave propagation.

**108. Optical Physics.** Prerequisite: course 110B. Interaction of light with matter; dispersion theory, oscillator strength, line widths, molecular scattering. Coherence theory, Kirchhoff formulation of diffraction theory, crystal optics, optical rotation, electro and magneto optical effects. Additional topics of fundamental or current interest.

**110A. Electricity and Magnetism.** Lecture, three hours. Prerequisite: course 131. Electrostatics and magnetostatics.

**110B. Electricity and Magnetism.** Prerequisite: course 110A. Faraday law and Maxwell equations. Propagation of electromagnetic radiation. Multipole radiation and radiation from an accelerated charge. Special theory of relativity.

**112. Thermodynamics.** Lecture, three hours; discussion, one hour. Prerequisite: course 115A or consent of instructor. Fundamentals of thermodynamics, including first, second, and third laws. Statistical mechanical point of view and its relation to thermodynamics. Some simple applications.

**114. Mechanics of Wave Motion and Sound.** Lecture, three hours. Prerequisites: courses 105A and 105B, or consent of instructor. Vibrating systems and wave propagation in gases, liquids, and solids, including elements of hydrodynamics and elasticity. Applications in ultrasonics, low-temperature physics, solid-state physics, architectural acoustics.

**115A. Elementary Quantum Mechanics.** Lecture, three hours; discussion, one hour. Prerequisites: courses 8E, 105B (may be taken concurrently), 131. Classical background, basic ideas, formulation of quantum mechanics, one-dimensional problems, and methods of quantum mechanics.

**115B. Elementary Quantum Mechanics.** Lecture, three hours; discussion, one hour. Prerequisite: course 115A. Three-dimensional problems, angular momentum, Pauli exclusion principle, variational and perturbative methods of quantum mechanics.

**116. Electronics.** Lecture, three hours; laboratory, three hours. Alternating current circuits, transmission line circuits, transistor and IC circuits to generate, modify, and detect electrical signals, introduction to digital circuits, analysis of noise and methods to reduce its influence in electrical measurements.

**117. Electronics for Physics Measurement.** Lecture, two hours; laboratory, four hours. Prerequisites: courses 8A, 8B, 8C, and 8D, or consent of instructor. Hands-on experimental course to develop understanding of design principles in modern electronics for physics measurements. Broad introduction to analog and digital electronics from practical viewpoint, followed by examination of typical circuits for scientific instrumentation and study of methods of computer data acquisition and signal processing. P/NP or letter grading.

**M122. Introduction to Plasma Electronics.** (Same as Electrical Engineering M185.) Lecture, three hours; outside study, nine hours. Requisite: course 110A or Electrical Engineering 101. Senior-level introductory course on electrodynamics of ionized gases and applications to materials processing, generation of coherent radiation and particle beams, and renewable energy sources.

**123. Atomic Structure.** Prerequisite: course 115B. Theory of atomic structure. Interaction of radiation with matter.

**124. Nuclear Physics.** Lecture, three hours; discussion, one hour. Prerequisite: course 115B. Nuclear properties, nuclear forces, nuclear structure, nuclear decays, and nuclear reactions.

**126. Elementary Particle Physics.** Lecture, three hours; discussion, one hour. Prerequisite: course 115B. Introduction to physics of elementary particles. The four basic interactions: strong, electromagnetic, weak, and gravitational. Properties of baryons, mesons, quarks, and leptons; conservation laws, symmetries and broken symmetries; the Standard Model; experimental techniques; new physics at the new accelerators.

**131. Mathematical Methods of Physics.** Lecture, three hours; discussion, one hour. Vectors and fields in space, linear transformations, matrices, and operators; Fourier series and integrals.

**132. Mathematical Methods of Physics.** Lecture, three hours; discussion, one hour. Prerequisite: course 131. Functions of a complex variable, including Riemann surfaces, analytic functions, Cauchy theorem and formula, Taylor and Laurent series, calculus of residues, and Laplace transforms.

**140. Introduction to Solid-State Physics.** Prerequisite: course 115B or equivalent. Introduction to basic theoretical concepts of solid-state physics with applications. Crystal symmetry; cohesive energy; diffraction of electron, neutron, and electromagnetic waves in a lattice; reciprocal lattice; phonons and their interactions; free electron theory of metals; energy bands.

**150. Physics of Charged-Particle and Laser Beams.** Lecture, three hours; discussion, one hour. Prerequisites: courses 110A, 110B, 115A, 115B. Physics of charged-particle and laser beams presented as a unified subject. Basic physics of charged-particle beams, covering relativistic particle motion in electromagnetic fields, transverse focusing, acceleration mechanisms, linear and circular accelerators, and advanced topics. Some fundamentals of laser physics, including gain and broadening mechanisms, linear light optics, laser resonators, and advanced topics and applications. P/NP or letter grading.

**160. Numerical Analysis Techniques and Particle Simulations.** Lecture, three hours; computer terminals, six hours. Prerequisites: courses 105A, 105B, 110A, 110B, minimum knowledge of computer programming (FORTRAN). Introduction to the field of computer modeling of physical systems using particle models; numerical models and methods, methods of diagnosing results, experience with running interesting physical problems.

**180A. Nuclear Physics Laboratory.**

**180B. Physical Optics and Spectroscopy Laboratory.**

**180C. Solid-State Laboratory.**

**180D. Acoustics Laboratory.**

**180E. Plasma Physics Laboratory.**

**180F. Elementary Particle Laboratory.**

**185. Foundations of Physics.** Prerequisite: senior standing in physics or consent of instructor. Historical development and philosophical sources of classical and modern physics.

**199. Special Studies in Physics (2 to 4 units).** May be repeated, but no more than 12 units may be applied toward Physics B.S. degree requirements.

## Graduate Courses

**201Q. Modern Physics Research Areas (2 units).** Review of modern physics research areas, with emphasis on those actively pursued at UCLA. S/U grading.

**210A. Electromagnetic Theory.** Boundary value problems in electrostatics and magnetostatics. Multipole expansions; dielectrics and macroscopic media. Maxwell equations and conservation laws. Wave guides and resonators; simple radiating systems.

**210B. Electromagnetic Theory.** Electromagnetic potentials and Hertz vectors. Cylindrical waves. Spherical waves. Debye potentials. Multipole radiation. Classical relativistic electrodynamics. Radiation from moving charges.

**213A. Advanced Atomic Structure.** Group representation theory. Angular momentum and coupling schemes. Interaction of radiation with matter.

**213B. Advanced Atomic Structure.** N-j symbols, continuous groups, fractional parentage coefficients, n electron systems.

**213C. Molecular Structure.** Application of group theory to vibrational and electronic states of molecules. Molecular orbital theory. Raman effect. Angular momentum and coupling in molecules.

**214A. Advanced Acoustics.** Propagation of waves in elastic and fluid media. Reflection, refraction, diffraction, and scattering of waves in fluids. Attenuation mechanisms in fluids.

**214B. Advanced Acoustics.** Propagation in nonhomogeneous fluids and in moving fluids. Radiation pressure, acoustic streaming, and attenuation in large amplitude sound fields. Propagation of sound in liquid helium. Mechanisms resulting in attenuation for elastic waves in solids.

**215A. Statistical Physics.** Thermodynamics and statistical mechanics with applications.

**215B. Nonequilibrium Statistical Mechanics.** Probability theory, Markov processes, equations of change, BBGKY hierarchy and its consequences, Boltzmann equation, Chapman/Enskog method, transport coefficients, fluctuation/dissipation theorems, density matrix, H-theorems.

**215C. Quantum Statistical Mechanics and the Many Body Problem.** Classical methods for interacting systems; quantum field theory techniques in statistical mechanics; Green's function approach; Coulomb gas; imperfect Bose gas; electron/phonon interaction; superconductivity; phase transitions; theory of Fermi liquid.

**220. Classical Mechanics.** Lecture, three hours. Hamilton/Jacobi theory, action-angle variables, classical perturbation theory, and selected topics such as introduction to physics of continuous media and fluids, nonlinear phenomena.

**221A-221B-221C. Quantum Mechanics.** Lecture, three hours. **221A.** Fundamentals of quantum mechanics, operators and state vectors, equations of motion. **221B.** Prerequisite: course 221A. Rotations and other symmetry operations, perturbation theory. **221C.** Formal theory of collision processes, quantum theory of radiation, introduction to relativistic quantum mechanics.

**222A-222B-222C. Plasma Physics.** Properties of a Coulomb gas with and without a magnetic field: equilibrium, oscillations, instabilities, fluctuations, collective phenomena, transport properties, and radiation. Description via single-particle orbit theory, magnetohydrodynamics, and kinetic equations of various types.

**223. Advanced Classical Mechanics.** Prerequisite: course 220. Topics such as nonlinear mechanics, ergodic theory, mechanics of continuous media.

**224. Introduction to the Strong Interaction.** Evidence concerning the strong interaction, particularly as exemplified in nucleon/nucleon and pion/nucleon systems. Isospin, scattering matrix, density matrix and polarization, properties of pions, one pion exchange potential, phase shift analysis.

**225A-225B. Advanced Nuclear Physics.** Prerequisites: courses 221A-221B. Normally preceded by course 224. Advanced course in structure of complex nuclei, nuclear models, scattering and reactions.

**226A-226B-226C. Elementary Particle Physics (6 units each).** Lecture, four hours. Prerequisites: courses 221A-221B-221C or equivalent and 230A-230B (may be taken concurrently). Modern theories of elementary particle physics beginning with symmetry principles and conserved quantities, classic V-A theory of weak interactions, gauge field theories (Abelian and non-Abelian), spontaneous symmetry breaking,  $SU(2) \times U(1)$  electroweak interactions of leptons, quarks,  $W$ s,  $Z^0$  and  $\gamma$ , quark theory of hadrons and quantum chromodynamics.

**226D. Beyond the Standard Model.** Lecture, three hours. Prerequisites: courses 226A-226B-226C, 230A-230B-230C. Discussion of possible extensions of the current standard model of electroweak and strong interactions, including axions, technicolor, grand unified theories, supersymmetry, supergravity, and superstrings. S/U grading.

**230A-230B-230C. Relativistic Quantum Theory (6 units each).** Lecture, four hours. Prerequisites: courses 221A-221B-221C or equivalent or consent of instructor. Modern quantum field theory, including quantum electrodynamics and quantum chromodynamics, renormalization group methods, path-integral quantization, spontaneous symmetry breakdown, monopoles and other solitons.

**231A. Methods of Mathematical Physics.** Not open for credit to students with credit for Mathematics 266A. Linear operators, review of functions of a complex variable, integral transforms, partial differential equations.

**231B. Methods of Mathematical Physics.** Not open for credit to students with credit for Mathematics 266B. Ordinary differential equations, partial differential equations, and integral equations. Calculus of variations.

**231C. Methods of Mathematical Physics.** Not open for credit to students with credit for Mathematics 266C. Perturbation theory. Singular integral equations. Numerical methods.

**232A-232B. Relativity.** Special and general theories, with applications to elementary particles and astrophysics.

**232C. Special Topics in General Relativity.**

**233. Introduction to High-Energy Astrophysics.** Introductory lectures on modern high-energy astrophysics. High-energy radiation processes. Neutron stars. Pulsars. X-ray sources. Black holes. Supermassive rotators and quasars.

**235. Group Theory and Quantum Mechanics.** Prerequisite: course 221A. Group representation theory and applications to quantum mechanics of atoms, molecules, and solids.

**241A. Solid-State Physics.** Prerequisites: courses 140, 215A, 221A. Symmetry, free electrons, electrons in a periodic potential, experimental measurement of band structure and Fermi surface parameters, cohesive energy, lattice vibrations, thermal properties.

**241B. Solid-State Physics.** Prerequisite: course 241A. Transport theory with applications, electron/electron interactions.

**241C. Solid-State Physics.** Prerequisite: course 241B. Semiconductors, magnetism, phase transitions, superconductivity.

**242A-242B. Advanced Solid-State Theory.** Prerequisites: courses 241A, 241B, and 241C (may be taken concurrently). Many body methods in solid-state physics.

**243A-243K. Special Topics in Solid-State Physics.**

**243A.** Disordered Systems; **243B.** Magnetic Resonance; **243C.** Phase Transitions; **243D.** Magnetism; **243E.** Superconductivity; **243F.** Macromolecules; **243G.** Semiconductors; **243H.** Optical Interactions; **243I.** Nonlinear Optics; **243J.** Hopping Transport; **243K.** Low-Temperature Physics.

**250. Introduction to Acceleration of Charged Particles.** Lecture, three hours. Prerequisites: courses 210A, 210B, 215A. Principles of charged-particle acceleration, including principles of synchrotrons and storage rings, beam parameter determination, statistical behavior of beams and beam cooling techniques, synchrotron light sources, colliding beam storage rings, medical accelerators, and free electron lasers.

**260. Seminar: Problems in Plasma Physics.**

**261. Seminar: Special Problems in Theoretical Physics.**

**262. Seminar: Physics of the Solid State.**

**264. Seminar: Advanced Physical Acoustics.**

**266. Seminar: Propagation of Waves in Fluids.**

**268. Seminar: Spectroscopy.**

**269A. Seminar: Nuclear Physics (2 to 4 units).**

**269B. Seminar: Elementary Particle Physics (2 to 4 units).**

**269C. Seminar: Accelerator Physics (2 to 4 units).** Physics principles governing design and performance analysis of particle accelerators, using existing accelerators as examples and emphasizing interplay among design goals, component performance, and operational experience. S/U grading.

**280E. Advanced Plasma Laboratory.** Lecture, two hours; laboratory, four hours. Prerequisites: courses M122, 180E. Laboratory experiments on behavior of plasmas in magnetic fields. Study of basic physics of particle motions, distribution functions, and fluid dynamics. Plasma waves and nonlinear phenomena. Advanced probe, microwave and plasma diagnostics.

**290. Research Tutorial: Plasma Physics (2 or 4 units).** Three terms required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff and students directed toward problems of current research interest in plasma physics group, both experimental and theoretical. May be repeated for credit. S/U grading.

**291. Research Tutorial: Elementary Particle Theory (2 or 4 units).** Prerequisites: courses 226A, 230A-230B. Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

**292. Research Tutorial: Spectroscopy, Low-Temperature, and Solid-State Physics (2 or 4 units).** Required of each graduate student doing research in these fields, ordinarily during second or third year. Seminar and discussion by staff and students on problems of current research interest in spectroscopy, low-temperature, and solid-state physics. May be repeated for credit. S/U grading.

**293. Research Tutorial: Current Topics in Physics (2 units).** Lecture, one hour. Seminar and discussion by staff and students on current topics in physics, both experimental and theoretical (topics not limited to one field of physics). Strongly recommended for graduate students in physics. May be repeated for credit. S/U grading.

**294. Research Tutorial: Accelerator Physics (2 or 4 units).** Lecture, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of current interest in accelerator physics. May be repeated for credit. S/U grading.

**295. Research Tutorial: Solid Earth Physics (2 or 4 units).** Required (or course 292 if appropriate) of each graduate student doing research in this field, ordinarily in second or third year. Seminar and discussion on solid earth physics. May be repeated for credit. S/U grading.

**296. Research Topics in Physics (2 units).** (Formerly numbered 296A-296Z.) Advanced study and analysis of current topics in physics. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

**M297. Research Tutorial: Astroparticle Physics (2 or 4 units).** (Same as Astronomy M297.) Lecture, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of current interest in astroparticle physics. May be repeated for credit. S/U grading.

**298. Research Tutorial: Experimental Elementary Particle Physics (2 or 4 units).** Limited to six students. Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff and students on current problems in experimental elementary particle physics. May be repeated for credit. S/U grading.

**299. Research Tutorial: Nuclear Physics (2 or 4 units).** Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion on nuclear physics by staff and students, in both experiment and theory. May be repeated for credit. S/U grading.

**370. Teaching Physics.** Prerequisite: consent of instructor. Study of physics laboratory experiments and demonstrations available today for secondary school and community college physics courses. Part of Master of Arts in Teaching (M.A.T.) program but open to other interested students.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching College Physics (2 units).** Lecture/discussion (five or more one-hour meetings during term, plus intensive training week at beginning of Fall Quarter). Required of all new teaching assistants. Special course for teaching assistants designed to deal with problems and techniques of teaching college physics. Ideas and techniques learned are applied and evaluated in the sections of each teaching assistant. May be repeated for credit. S/U grading.

**596. Directed Individual Studies (2 to 12 units).** May be repeated for credit. S/U grading.

**597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations.** May be repeated twice for credit. S/U grading.

**598. Master's Thesis Research and Writing.** May be repeated twice for credit.

**599. Ph.D. Research and Writing (8 or 12 units).** May be repeated for a maximum of 18 units. S/U grading.

## Scope and Objectives

The cornerstone of the physiological science curriculum is vertebrate physiology, with emphases on integrative functions. The research and educational programs focus on integrative physiology at several levels of organization from molecules to living organisms, microscopic structures to macroscopic organization, and cellular properties to organ functions. Students receive comprehensive instruction in all areas of physiological science, while elective courses reflect faculty research expertise, including cardiopulmonary function and adaptation, musculoskeletal physiology, cell biology, biomechanics, neural control of movement and homeostasis including neuroendocrinology, and neural integration and sensory transduction. Many physiological science majors enter graduate programs in biomedical sciences and professions in other health-related fields.

## Undergraduate Study

### Bachelor of Science Degree

#### Preparation for the Major

##### Life Sciences Core Curriculum

*Required* (effective Fall Quarter 1997): Life Sciences 1, 2, 3, 4; Chemistry and Biochemis-

try 10A, 10B/10BL, 10C, and 10D/10DL, or 11A, 11B/11BL, 11CL, 132A, and 132B/132BL, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, 8D/8DL.

All core curriculum courses must be passed with a grade of C – or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

#### Transfer Students

In order to be admitted as physiological science majors, transfer students with 80 or more units must complete the following courses prior to admission to UCLA: Life Sciences 1, 2, 3, or equivalent, one year of general chemistry with laboratory, and at least two of the following: (1) one year of calculus, (2) one year of calculus-based physics, or (3) two organic chemistry courses with laboratory.

Transfer credit for UCLA Extension coursework and for any departmental courses is subject to prior approval by the department; consult the undergraduate counselor before enrolling in any courses for the major.

#### The Major

*Required:* Physiological Science 27, 111A (or M180A-M180B), 111B-111C, 111L, Chemistry and Biochemistry 153A, 153L.

A total of four upper division physiological science electives (16 units) is required. Four units of course 190 or 199 may be applied toward the elective requirement. Courses 193, 195, 196A-196B, and graduate courses at the 300, 400, or 500 level may not be applied toward this requirement. One graduate course at the 200 level may be applied toward the elective requirement by petition.

All required and elective courses must be taken for a letter grade, and a C average must be maintained in all upper division courses taken for the major.

## Honors Program

The honors program provides exceptional students with the opportunity for individual research culminating in an honors thesis. Requirements for admission include a 3.0 overall grade-point average and a 3.2 GPA in the life sciences core curriculum. After completion of all requirements and with the recommendation of the faculty adviser, the undergraduate affairs committee confers departmental honors at graduation.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office

and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

Applicants for graduate study in the Master of Science program are expected to have completed an undergraduate degree in biological or physical sciences. In general, at the time of admission students should have completed a year of coursework in each of the following: calculus, physics, biology, inorganic chemistry, and organic biochemistry. A grade-point average of at least 3.0 (B) in all upper division undergraduate coursework is required. A departmental faculty committee considers applicants on the following bases: (1) prior scholastic performance, (2) three letters of recommendation, and (3) applicant's statement of purpose, which should include (a) relevant background or preparation; (b) field of emphasis, specific study interests, and type of research sought; (c) expectations, goals, degree objective; (d) one or more departmental faculty members whose research area parallels the study interest. The Graduate Record Examination (GRE) is required as part of the admission file.

A brochure of faculty names and research interests is available from the department. Applicants are encouraged to communicate directly with the faculty, and personal interviews are encouraged.

### Areas of Study

Consult the department.

### Course Requirements

The M.S. degree requires nine courses, including a second-level statistics or research design course.

A minimum of six of the nine courses must be graduate-level (200) courses, toward which two 596 courses may be applied. Coursework is selected by the student and the student's advisory committee, with approval by the graduate affairs committee. All coursework must be completed by the end of the second year.

Courses 597 and 598 may not be applied toward any of the course requirements for the degree. There is no limit on the number of times a master's student may enroll in course 597 or 598.

### Comprehensive Examination Plan

If this plan is elected, the student must achieve a passing mark on a comprehensive examination. Breadth of knowledge is demonstrated by passing a written comprehensive examination administered at the end of the Fall and Spring Quarters. Preparation for the examination varies with background; students follow a curriculum during the master's program that is designed to prepare them for the examination. Coursework, including formal courses and tutorials, is selected from the offerings in Physiological Science or other departments. The examination consists of three sections in the context of general physiological problems: (1)

molecular biology or neurochemistry; (2) cell biology or cellular neurophysiology; and (3) systems physiology or systems neuroscience. The examination is scored (1) passed at the master's level of achievement; (2) passed at the Ph.D. level of achievement, which permits the student to continue into the Ph.D. program; or (3) failed at the master's level of achievement, and therefore also at the Ph.D. level of achievement. Students failing the examination at either the master's or Ph.D. levels of achievement are required to retake the examination at the next offering. Students wishing to continue into the Ph.D. program who fail the examination at the Ph.D. level on the second attempt will be awarded a terminal Master of Science degree.

### Thesis Plan

If the thesis plan is elected, the student must report the results of an original research investigation. Under the guidance of the thesis committee, the student must propose a problem area or outline of study, conduct original research in a specific area, and report the results. With committee approval, the student may submit either a thesis manuscript or a manuscript suitable for publication.

## Doctoral Degree

### Admission

Doctoral students are expected to have completed the same admission requirements as outlined for the M.S. degree. In addition to the above, students may also be admitted to the program through UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 172 MBI, UCLA, Los Angeles, CA 90024-1570, (310) 206-6051.

### Major Fields or Subdisciplines

Consult the department.

### Course Requirements

Nine courses, at minimum, are specified for the doctoral degree. Two 596 courses may be applied toward the degree requirements.

Courses are selected by the student and the student's advisory committee and approved by the graduate affairs committee.

### Written and Oral Qualifying Examinations

Breadth of knowledge is demonstrated by passing a written preliminary examination administered at the end of Fall Quarter of the second year. Preparation for the examination varies with background, and students follow a curriculum during the first year of study that is designed to prepare them for the examination. Coursework, including formal courses and tutorials, is selected from the offerings in Physiological Science or other departmental curricula. The examination consists of three sections in the context of general physiological problems: (1) molecular biology or neurochemistry, (2) cell biology or cellular neurophysiology, (3) systems physiology or systems neuroscience. The examination is scored passed at the Ph.D.

level of achievement, passed at the master's level of achievement (students are required to pass a second examination at the Ph.D. level within the following six months), or failed (students are required to leave the program). Alternatively, students receiving a master's level of achievement score may leave the doctoral program and complete the M.S. degree.

After successfully passing the departmental written qualifying examination, and before advancement to candidacy, a University Oral Qualifying Examination is conducted by the doctoral committee. This examination must be passed by the end of the third year of study. Students present a written research proposal of their intended dissertation project to their advisory committee and one member of the graduate affairs committee at least two weeks prior to the examination. Students are expected to have formulated a research plan, have demonstrated appropriate research capability, and be knowledgeable of relevant research literature. Students may petition the graduate affairs committee for extension of this deadline. If a student does not pass, the examination may be rescheduled once at the discretion of the doctoral committee.

## Physiological Science

### Lower Division Courses

**3. Introduction to Human Physiology.** Lecture, three hours. Not open to physiological science majors. Courses 3 and 5 may be taken independently, concurrently, or in either sequence. Presentation of integrative approach to basic anatomy and physiology of major organs and organ systems. P/NP or letter grading.

**5. Issues in Human Physiology: Diet and Exercise.** Lecture, three hours. Not open to physiological science majors. Basic introduction to principles of human biology, with special emphasis on roles that exercise and nutrition play in health, and prevention and management of such illnesses as hypertension, diabetes, and heart disease. P/NP or letter grading.

**6. The Human Machine: Physiological Processes.** Not open to physiological science majors. General introduction to human musculoskeletal, cardiovascular, and respiratory systems and their function, with special emphasis on mechanical and physiological aspects of homeostasis and environmental interaction. Application of physical principles in selected areas of biomechanics, hemodynamics, ergonomics, orthopedics, and robotics. P/NP or letter grading.

**13. Introduction to Human Anatomy (6 units).** Lecture, four hours; laboratory, four hours. Not open to physiological science majors. Structural survey of human body, including skeletomuscular, nervous, circulatory, respiratory, digestive, and genitourinary systems. Laboratory includes examination of human cadaver specimens.

**27. Systems Anatomy (5 units).** Lecture, four hours; laboratory, three hours; outside study, 10 to 15 hours. Enforced requisite: Life Sciences 2. Introduction to systems anatomy focused primarily on human anatomy, with some emphasis on comparable anatomy systems in other vertebrates. Lecture and laboratory materials devoted to introduction of skeletomuscular, cardiorespiratory, reproductive, and renal systems, as well as neuroanatomy.

**90. Introduction to Physiological Science (2 units).** Lecture, one hour; discussion, one hour. Limited to freshmen/sophomores. Introduction to current topics in physiological science by a team of departmental faculty members. P/NP grading.

## Upper Division Courses

**C100. Experimental Statistics.** (Formerly numbered 100.) Lecture, four hours; outside study, eight hours. Introduction to statistics with focus on computer simulation instead of formulas. Bootstrap and Monte Carlo methods used to analyze physiological data. Concurrently scheduled with course CM200. P/NP or letter grading.

**111A-111B-111C. Foundations in Physiological Science (6 units each).** Lecture, four hours; laboratory, two hours. **111A.** Prerequisites: course 27, Chemistry 132A, Life Sciences 1, 2, 3, 4, Physics 6B. Introduction to principles of neurophysiology: cellular and systems neuroscience, including factors controlling membrane excitability, neuronal circuits, sensorimotor regulation, special senses, cortical functions, and neuronal plasticity. **111B.** Prerequisites: course 111A or M180A, Chemistry 132B. Principles of muscular, cardiovascular, and pulmonary physiology. **111C.** Prerequisites: course 111A or M180A, Chemistry 153A. Principles of gastrointestinal, renal, endocrine, and reproductive physiology.

**111L. Physiological Science Laboratory (2 units).** Laboratory, four hours; outside study, two hours. Prerequisites: courses 111A-111B-111C (111C may be taken concurrently). Required of physiological science majors. Designed to illustrate physiological principles studied in courses 111A-111B-111C.

**C125. Comparative Endocrinology: Molecular to Behavioral.** (Formerly numbered 198.) Lecture, two hours; discussion, two hours. Prerequisite: course 111C. Important concepts in endocrinology, with focus on current research involving invertebrate and vertebrate animal models in areas of reproduction, neuroendocrine control of behavior, metabolism, and insect metamorphosis. Concurrently scheduled with course CM225.

**126. Biological Clocks.** (Formerly numbered 198.) Lecture, three hours; discussion, one hour. Requisite: course 111A or M180A. Most organisms, including humans, exhibit daily rhythms in physiology and behavior. In many cases these rhythms are generated from within the organisms and are called circadian rhythms. Exploration of molecular, cellular, and system-level organization of these timing systems.

**133. Exercise Physiology (5 units).** Lecture, three hours; laboratory, two hours; outside study, 10 hours. Prerequisite: course 111C. Physiological responses and adaptations to acute and chronic exercise.

**C135. Dynamical Systems Modeling of Physiological Processes (5 units).** Lecture, four hours; laboratory, two hours. Examination of art of making and evaluating dynamical models of physiological systems and of dynamical principles inherent in physiological systems. Concurrently scheduled with course C235.

**136. Exercise and Cardiovascular Function (5 units).** Lecture, four hours; outside study, 11 hours. Prerequisite: course 111B. Consideration of acute and chronic effects of exercise in diagnosis, prevention, and treatment of cardiovascular disorders.

**C137. Growth and Adaptation in Cardiovascular System.** Prerequisite: course 111B. Regulation of normal and pathological cellular growth in cardiac and vascular tissue. Modification of gene expression in response to diverse physiological stimuli. Emphasis on molecular and cell biology approaches. Concurrently scheduled with course C237.

**138. Neuromuscular Physiology and Adaptation.** Prerequisites: course 111B, Chemistry 153A. Cellular responses to acute and chronic exercise and environmental states of neuromuscular system.

**142. Sensorimotor Physiology (5 units).** Lecture, three hours; laboratory, two hours; outside study, 10 hours. Prerequisite: course 111A or M180A. Neurophysiological principles governing control of limb movements, including regulation by spinal cord circuits, cerebellum, basal ganglia, and sensorimotor cortices.

**C143. Neuromotor Control of Posture and Movement (5 units).** Lecture, four hours; outside study, 11 hours. Prerequisite: course 142. Examination of theories for neuromotor control of posture, walking, and voluntary arm movements. Concurrently scheduled with course C243.

**C144. Neural Control of Physiological Systems (5 units).** Lecture, four hours; outside study, 11 hours. Prerequisite: course 111B or M180B. Role of central nervous system in control of respiration, circulation, sexual function, and bladder control. Material for each section to be developed by combination of lecture and open discussion. Concurrently scheduled with course C244.

**C145. Neural Mechanisms Controlling Movement (5 units).** Lecture, four hours; outside study, 11 hours. Prerequisite: course 111A or M180A. Examination of central nervous system organization required for production of complex movements such as locomotion, mastication, and swallowing. Concurrently scheduled with course C245.

**147. Neurobiology of Learning and Memory (5 units).** Lecture, four hours; research demonstration, one hour; outside study, 10 hours. Prerequisite: course 111A or M180A. Changes in central nervous system that accompany learning, with emphasis on cellular mechanisms.

**148. Advanced Neurophysiology (5 units).** Lecture, four hours; outside study, 11 hours. Requisite: course 111A or M180A. Advanced treatment of selected topics in cellular neurophysiology.

**150. Musculoskeletal Mechanics (5 units).** Lecture, three hours; outside study, 12 hours. Prerequisite: course 111B. Introduction to biomechanical analysis of human musculoskeletal system. Examination of cinematographic, force platform, and digital computer techniques to characterize and evaluate kinematic and kinetic components of movement. Topics include biostatistics, biodynamics, and modeling.

**151. Limb Dynamics (5 units).** Lecture, three hours; laboratory, two hours; outside study, 10 hours. Prerequisite: course 150. Biomechanical analysis of human movement, with special emphasis on control of limb movements.

**C152. Musculoskeletal Anatomy, Physiology, and Biomechanics (5 units).** Lecture, three hours; outside study, 12 hours. Prerequisite: course 111A. Anatomical, physiological, and mechanical characteristics of cartilaginous, fibrous, and bony tissues examined in normal and abnormal stress situations. Connective tissue growth processes, normal physiology, and repair mechanisms analyzed in conjunction with musculoskeletal injuries and effects of exercise. Concurrently scheduled with course C252.

**153. Dissection Anatomy.** Lecture, two hours; laboratory, three hours. Prerequisites: course 111B, departmental application. Study and dissection of upper and lower extremities of human cadavers; dissection of thorax and abdomen limited to musculature and neurovascular supply.

**155. Development and Structure of Musculoskeletal System.** Requisite: course 111B. Development, histology, cell biology, and biochemistry of musculoskeletal soft tissues. Integration of knowledge of muscle and connective tissue structure and function on each of these levels to understand organization and physiological behavior of the intact system.

**M158. Cell Biology (6 units).** (Same as Biology M158.) Lecture, three hours; laboratory, six hours. Requisites: Chemistry 10A and 10B/10BL, or 11A, 11B/11BL, and 11CL, or 20A, 20B, 20L, 30, and 30L, Life Sciences 1, 3, 4. Cell biology of eukaryotic cells, with emphasis on correlation of structure and function at molecular, organellar, and cellular levels.

**M173. Anatomy and Physiology of Sense Organs.** (Same as Biology M173.) Lecture, three hours; discussion, one hour. Requisites: courses 111A (or Molecular, Cell, and Developmental Biology 171) or M180A-M180B (or Molecular, Cell, and Developmental Biology M175A-M175B). Structure and function of sense organs. Adoption of quantitative and comparative approach to provide insight into evolution of sense organs in both invertebrates and vertebrates.

**M180A-M180B-M180C. Neuroscience: From Molecules to Mind (5 units each).** (Same as Molecular, Cell, and Developmental Biology M175A-M175B-M175C, Neuroscience M101A-M101B-M101C, and Psychology M117A-M117B-M117C.) Lecture, four hours; discussion, one hour. P/NP or letter grading:

**M180A.** Cellular and Systems Neuroscience. Requisites: Chemistry 132A, Life Sciences 2, Physics 6B or 8C. Not open for credit to students with credit for Physiological Science 111A. Students with credit for Molecular, Cell, and Developmental Biology 171 must enroll on a P/NP basis; those enrolling concurrently in course M180A and Molecular, Cell, and Developmental Biology 171 do not receive credit for M180A. Cellular neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement.

**M180B.** Molecular and Developmental Neuroscience. Requisites: course 111A (or Molecular, Cell, and Developmental Biology 171 or Psychology 115) or M180A (or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A or Psychology M117A), Life Sciences 3, 4. Molecular biology of channels and receptors: focus on voltage dependent channels and neurotransmitter receptors. Molecular biology of supramolecular mechanisms: synaptic transmission, axonal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in developmental neurobiology.

**M180C.** Behavioral and Cognitive Neuroscience. Requisite: course 111A (or Molecular, Cell, and Developmental Biology 171 or Psychology 115) or M180B (or Molecular, Cell, and Developmental Biology M175B or Neuroscience M101B or Psychology M117B). Neural mechanisms underlying motivation, learning, and cognition.

**M181. Biological Bases of Psychiatric Disorders.** (Same as Molecular, Cell, and Developmental Biology M191, Neuroscience M130, Psychiatry M191, and Psychology M117J.) Requisite: course 111A or Molecular, Cell, and Developmental Biology 171 or Neuroscience M101A or Psychology 115. Underlying brain systems involved in psychiatric syndromes and neurological disorders, including schizophrenia, depression, bipolar disorders, obsessive/compulsive disorder, eating disorders. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments.

**190A. Honors Thesis.** (Formerly numbered 199HA.) Requisites: courses 111A-111B. Intended for physiological science honors program students. Directed independent research for departmental honors with a faculty member, involving definition of research topic and extensive reading and research in the field of proposed honors thesis. In Progress grading (credit to be given only on completion of course 190B).

**190B. Honors Thesis.** (Formerly numbered 199HB.) Requisite: course 190A. Continued reading and research that culminate in final honors thesis. Only four units of course 190/199 may be applied toward elective requirements for the major.

**190C. Advanced Studies for Honors Thesis.** (Formerly numbered 199HC.) Requisite: course 190B. Additional course to provide further research opportunities for departmental honors students.

**191A-191Z. Proseminars: Physiological Science.** Prerequisite: upper division standing. Limited to 15 students. Advanced study of special topics. May be repeated for credit with topic change.

**192. Intracellular Calcium Regulation (2 units).** Requisites: courses 111A-111B-111C. Review of current literature covering broad issues of intracellular calcium metabolism, regulation, and transport.

**193. Field Studies in Physiological Science.** Lecture, one hour; fieldwork, six to eight hours. Prerequisites: senior standing, departmental application. Supervised field studies in specific careers related to physiological science. May not be repeated for credit and may not be applied toward elective requirements for the major. P/NP grading.

**195. Research in Physiological Science (2 units).** Lecture, one hour; discussion, one hour. Corequisite: course 199 or 199H or participant in Student Research Program. Instruction in principles of scientific method, writing, and ethics; critique of current journal articles and research projects. Students present individual research proposal with background literature. P/NP grading.

**196A-196B. Laboratory Practicum in Physiological Science (2 units each).** Laboratory, four hours; outside study, eight hours. Prerequisites or corequisites: course 153, departmental application. Supervised practicum and training for advanced students who serve as undergraduate assistants in basic anatomy course in preparation of laboratory materials and innovative projects. May be repeated for credit but may not be applied toward elective requirements for the major.

**197A-197Z. Variable Topics in Physiological Science.** Prerequisite: upper division standing. Variable topics courses which cover specific subjects of special interest. May be repeated for credit with topic change.

**199. Special Studies in Physiological Science (2 or 4 units).** Prerequisites: physiological science major with advanced junior standing and 3.0 GPA in the major, or senior standing, courses 111A-111B, consent of instructor and undergraduate affairs chair. Directed independent research with a faculty member. Course application must be submitted to undergraduate affairs chair during first week of classes. Only four units of course 199/199H may be applied toward elective requirements for the major.

## Graduate Courses

**CM200. Experimental Statistics.** (Same as Biostatistics M220.) Lecture, four hours; outside study, eight hours. Introduction to statistics with focus on computer simulation instead of formulas. Bootstrap and Monte Carlo methods used to analyze physiological data. Concurrently scheduled with course C100. S/U or letter grading.

**M202. Cellular Neurophysiology.** (Same as Neuroscience M202.) Lecture, three hours; discussion, one hour. Requisites: course 111A or M180A or Physics 6B, Biology 166 or Molecular, Cell, and Developmental Biology 171. Advanced course in cellular physiology of neurons. Action and membrane potentials, channels and channel blockers, gates, ion pumps and neuronal homeostasis, synaptic receptors, drug-receptor interactions, transmitter release, modulation by second messengers, and sensory transduction.

**M205. Behavioral and Systems Neuroscience.** (Same as Neuroscience M205 and Psychology M205Z.) Lecture, three hours. Prerequisites: Neuroscience M201, M202, M203, and M204, or consent of instructor. Introduction to fundamentals of behavioral and systems neuroscience, with emphasis on role of behavioral analysis in understanding the functioning of nervous system and identifying anatomical circuits, cell physiological processes, and molecular mechanisms that mediate behaviorally defined functions.

**206. Metabolism of Organ Systems Affected by Exercise.** Prerequisite: Chemistry 132B/132BL. Key regulatory mechanisms of metabolism involved in exercise response and adaptation.

**M210. Molecular and Cellular Mechanisms of Neural Integration (5 units).** (Same as Neuroscience M230 and Physiology M210.) Lecture, four hours; discussion, one hour; outside study, 10 hours. Prerequisite: Neuroscience M202 or Physiology M209A. Introduction to mechanisms of synaptic processing. Selected problems of current interest, including regulation and modulation of transmitter release, molecular biology and physiology of receptors, cellular basis of integration in sensory perception and learning, neural nets and oscillators, and molecular events in development and sexual differentiation.

**211. Exercise Cardiovascular Physiology.** Prerequisite: consent of instructor. Attention to cardiovascular adaptations to acute exercise as well as adaptations associated with regular exercise training.

**M212. Introduction to Cellular Physiology and Biophysics (6 units).** (Same as Molecular, Cell, and Developmental Biology M237 and Physiology M212.) Lecture, five hours. Prerequisite: course 111A or Physiology M209A. Development of fundamental physiological and biophysical concepts associated with all membranes, membrane channels and transporters, membrane potential, membrane excitability, electrical signal transmission and transduction, and muscle contraction and their application to study of basic cellular processes. Emphasis in laboratory on development of skills using computer programming languages, spreadsheets, and graphics for modeling and analysis of cellular processes.

**M213. Principles of Integrative Physiology (6 units).** (Same as Physiology M213.) Lecture, four hours; discussion, two hours. Prerequisite: graduate standing; for upper division undergraduates: consent of instructor. Basic principles of biological integration, including regulation, homeostasis, feedback, and natural selection, to be illustrated by applying them to a molecules-through-whole animal view of four sets of problems: information processing, development, and plasticity in central nervous system; endocrine regulation of reproduction; feedback regulation of blood pressure and control of eye movements; and matching of enzyme, transporter, and bone capacities to natural loads.

**CM225. Comparative Endocrinology: Molecular to Behavioral.** (Formerly numbered M225.) (Same as Physiology M225.) Lecture, two hours; discussion, two hours. Prerequisite: graduate standing. Important concepts in endocrinology, with focus on current research involving invertebrate and vertebrate animal models in areas of reproduction, neuroendocrine control of behavior, metabolism, and insect metamorphosis. Concurrently scheduled with course C125.

**M227. Cellular, Molecular, and Functional Aspects of Reproductive System.** (Same as Neurobiology M227.) Lecture, three hours; discussion, one hour. Didactic presentations and discussion of developmental, anatomical/histological, physiological, cellular, and molecular aspects of reproductive system and functional integration of neuroendocrine-reproductive axis.

**C235. Dynamical Systems Modeling of Physiological Processes (5 units).** Lecture, four hours; laboratory, two hours. Examination of art of making and evaluating dynamical models of physiological systems and of dynamical principles inherent in physiological systems. Concurrently scheduled with course C135.

**C237. Growth and Adaptation in Cardiovascular System.** Prerequisite: course 111B. Regulation of normal and pathological cellular growth in cardiac and vascular tissue. Modification of gene expression in response to diverse physiological stimuli. Emphasis on molecular and cell biology approaches. Concurrently scheduled with course C137.

**M240. Neural Systems for Motor Control.** (Same as Neuroscience M262.) Prerequisite: course C143 or consent of instructor. Advanced topics on neural mechanisms related to control of posture, locomotion, and highly skilled arm and hand movements. Emphasis on role of movement-dependent feedback at spinal segments and within sensorimotor areas of cerebral cortex, with respect to modification of motor output.

**C243. Neuromotor Control of Posture and Movement (5 units).** Lecture, four hours; outside study, 11 hours. Prerequisite: course 142. Examination of theories for neuromotor control of posture, walking, and voluntary arm movements. Concurrently scheduled with course C143.

**C244. Neural Control of Physiological Systems (5 units).** Lecture, four hours; outside study, 11 hours. Prerequisite: course 111B or M180B. Role of central nervous system in control of respiration, circulation, sexual function, and bladder control. Material for each section to be developed by combination of lecture and open discussion. Concurrently scheduled with course C144.

**C245. Neural Mechanisms Controlling Movement (5 units).** Lecture, four hours; outside study, 11 hours. Prerequisite: course 111A or M180A. Examination of central nervous system organization required for production of complex movements such as locomotion, mastication, and swallowing. Concurrently scheduled with course C145.

**M247. Neural Control of Cardiopulmonary Function.** (Same as Neuroscience M247.) Lecture, two hours; discussion, two hours. Prerequisites: courses 111A, 111B or 133 or 142 or M180A, M180B or equivalent. Cardiorespiratory homeostasis is accomplished via central nervous system (CNS) control of respiratory and circulatory pumping systems. Focus on CNS mechanism underlying (1) generation of respiratory rhythm, sympathetic and parasympathetic tone, (2) determination of patterns of motor outflow, and (3) responses to changes in behavioral state or afferent signals. Emphasis on critical reading of literature.

**250A. Muscle Dynamics.** Prerequisite: course 151. Integrated study of electrical and dynamic parameters of muscle-action, including topics in length-tension and force-velocity interrelationships; critical analysis of electromyographic and digital computer techniques.

**250B. Musculoskeletal Mechanics.** Prerequisites: course 151, Mathematics 3A, 3B. Mechanical parameters of moving human musculoskeletal system, including use of cinematographic, force platform, and digital computer techniques. Topics include biostatistics, biodynamics, and empirical data modeling.

**C252. Musculoskeletal Anatomy, Physiology, and Biomechanics (5 units).** Lecture, three hours; outside study, 12 hours. Prerequisite: course 111A. Anatomical, physiological, and mechanical characteristics of cartilaginous, fibrous, and bony tissues examined in normal and abnormal stress situations. Connective tissue growth processes, normal physiology, and repair mechanisms analyzed in conjunction with musculoskeletal injuries and effects of exercise. Concurrently scheduled with course C152.

**M255. Seminar: Neural and Behavioral Endocrinology (2 units).** (Formerly numbered M255A-M255D.) (Same as Neurobiology M255 and Psychology M294.) Seminar, one hour; discussion, one hour. Topics include hormonal biochemistry and pharmacology. Hypothalamic/hypophyseal interactions, both hormonal and neural. Structure and function of the hypothalamus. Hormonal control of reproductive and other behaviors. Sexual differentiation of brain and behavior. Stress: hormonal, behavioral, and neural aspects. Aging of reproductive behaviors and function.

**M260. Neuromuscular Factors in Movement Regulation.** (Same as Neuroscience M260.) Prerequisite: course 138 or consent of instructor. Interaction of neural and muscular factors in regulation of muscle fiber properties and importance of these properties in neural strategies of movement regulation. S/U or letter grading.

**M263. Neuronal Mechanisms Controlling Rhythmic Movements.** (Same as Neuroscience M263.) Prerequisite: course C145 or consent of instructor. Advanced topics on brainstem mechanisms responsible for controlling cyclic and stereotypic movements such as mastication and locomotion. Emphasis on cellular neurophysiology and interaction between neuronal networks. Introduction to primary literature and techniques used in these areas. Students expected to critically evaluate data and conclusions drawn.

**M272. Neuroimaging and Brain Mapping.** (Same as Neuroscience M272 and Psychology M213.) Lecture, three hours; outside study, nine hours. Prerequisites: course M202, Neuroscience M201. Recommended: mathematics and computer background. Theory, methods, applications, assumptions, and limitations of neuroimaging. Techniques, biological questions, and results. Brain structure, brain function, and their relationship discussed with regard to imaging.

**M290. Seminar: Comparative Physiology (2 units).** (Same as Biology M290.) Seminar, two and one-half hours. Prerequisite: consent of instructor. Discussion of specific topics in comparative physiology of animals. Topics vary from year to year, with emphasis on systems physiology, neuroethology, or behavioral physiology. S/U or letter grading.

**291A-291B-291C. Seminars: Cardiovascular Function and Adaptation (2 to 4 units each).** Prerequisite: consent of instructor. Selected topics on cardiovascular function and adaptation. Students required to present two-hour seminar.

**292. Evolution and Development of Auditory System (2 or 4 units).** Seminar, two hours. Discussion of specific topics related to evolution, embryology, morphogenesis, cytodifferentiation, and onset of function of auditory system, with special attention to centrifugal pathways. Emphasis on primary literature sources as well as current methodological approaches. Two-hour seminar presentation required for two units; seminar paper and two-hour seminar presentation required for four units. S/U or letter grading.

**293A-293B-293C. Seminars: Musculoskeletal Function and Adaptation (2 to 4 units each).** Prerequisites: courses 138 and M260, or consent of instructor. Selected topics on muscular determinants of movement, metabolic aspects of exercise, and mechanics of connective tissue. Students required to present two-hour seminar.

**M294A-M294B-M294C. Seminars: Neural Control of Movement (2 to 4 units each).** (Same as Neuroscience M265A-M265B-M265C.) Prerequisite: course M240 or M247 or M263. Selected topics on neural determinants of movement behavior. Students required to present two-hour seminar.

**M295A-M295B-M295C. Seminars: Cellular Neuroscience (2 to 4 units each).** (Same as Neuroscience M266A-M266B-M266C.) Prerequisite: course M202 or consent of instructor. Selected topics in sensory transduction, cellular integration, synaptic processing, central nervous system function, and learning. Students required to present two-hour seminar.

**296. Research Seminar: Physiological Science (2 units).** Review of literature, discussion of original research, and analysis of current topics in physiological science. May not be applied toward M.S. or Ph.D. course requirements. May be repeated for credit. S/U grading.

**297A-297B-297C. Seminars: Muscle Cell Biology (2 to 4 units each).** Prerequisite: consent of instructor. Selected topics in muscle cell biology. Students required to present two-hour seminar.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. In-Service Practicum for Teaching Assistants in Physiological Science (2 units).** Prerequisite: consent of instructor. Required of all teaching assistants. Supervised practicum in teaching laboratory courses in physiological science; material preparation and use of teaching aids. May not be applied toward degree requirements. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Individual Studies for Graduate Students (2 to 8 units).** To enroll for letter grade, petition signed by faculty sponsor, graduate adviser, and graduate affairs committee chair must be submitted prior to end of second week of class. Eight units may be applied toward degree requirements for M.S. or Ph.D. degree, provided that students enroll in two different four-unit 596 courses in different laboratories under supervision of different mentors. Term paper required for letter grading. S/U or letter grading.

**597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 16 units).** To be arranged with faculty member serving as student's comprehensive examination chair or doctoral committee chair. May not be applied toward M.S. or Ph.D. course requirements. May be repeated as necessary. S/U grading.

**598. Research for and Preparation of M.S. Thesis (2 to 16 units).** To be arranged with faculty member serving as student's thesis committee chair. May not be applied toward M.S. course requirements. May be repeated as necessary. S/U grading.

**599. Research for and/or Preparation of Ph.D. Dissertation (2 to 16 units).** May not be applied toward Ph.D. course requirements. May be repeated as necessary. S/U grading.

## PHYSIOLOGY

*School of Medicine*

UCLA  
53-237 Center for the Health Sciences

Ernest M. Wright, D.Sc., *Chair*  
Kenneth D. Philipson, Ph.D., *Executive Vice Chair*  
John McD. Tormey, M.D., *Vice Chair for Instruction*

### Professors

Francisco J. Bezanilla, Ph.D.  
Mariel Birnbaumer, Ph.D.  
Michael H. Chase, Ph.D., *in Residence*  
Jared M. Diamond, Ph.D.  
Alan D. Grinnell, Ph.D.  
Earl Homsher, Ph.D.  
H. Ronald Kaback, M.D.  
Michael S. Letinsky, Ph.D.  
Emeran A. Mayer, M.D.  
Istvan Mody, Ph.D. (*Tony Coelho Professor of Neurology*)  
Kenneth D. Philipson, Ph.D.  
Eduardo H. Rubinstein, M.D., Ph.D.  
George Sachs, M.D., D.Sc. (*Leon J. Tiber, M.D., and David S. Alpert, M.D., Professor of Medicine*)  
Oscar U. Scremin, M.D., *in Residence*  
Enrico Stefani, M.D., Ph.D.  
John McD. Tormey, M.D.  
Julio L. Vergara, Ph.D.  
James N. Weiss, M.D. (*Chizuko Kawata Professor of Cardiology*)  
Ernest M. Wright, D.Sc.

### Professors Emeriti

Allan J. Brady, Ph.D.  
Jennifer S. Buchwald, Ph.D.  
Sergio Ciani, Ph.D.  
George Eisenman, M.D.  
Joy S. Frank, Ph.D.  
Glenn A. Langer, M.D. (*Castera Professor Emeritus of Cardiology*)  
Donald B. Lindsley, Ph.D.  
Gordon Ross, M.D.

Ralph R. Sonnenschein, M.D.  
Bernice M. Wenzel, Ph.D.  
Brian J. Whipp, Ph.D.

### Associate Professors

Christopher B. Cooper, M.D.  
Linda Demer, M.D., Ph.D.  
Sally J. Krasne, Ph.D.  
Diane M. Papazian, Ph.D.

### Assistant Professors

Jonathan Monck, Ph.D.  
Thomas J. O'Dell, Ph.D.  
Helen E. Raybould, Ph.D.  
Bernard Ribalet, Ph.D.  
Robert Ross, M.D.  
Nancy L. Wayne, Ph.D.  
Hong Zhu, Ph.D., *in Residence*

### Adjunct Professors

Arthur Peskoff, Ph.D.  
Kenneth P. Roos, Ph.D.

## Scope and Objectives

Physiology is the science of the functional activities of the human body. This covers a wide range, including observations on humans and experiments on animals and model systems in order to understand principles. Physiology is the science most directly relevant to human medicine in all its specialties and to understanding all environmental factors affecting human life. It is also a pure science of great challenge because of the complexity of its problems and its extensive interaction with mathematical, physical, biochemical, and engineering sciences, as well as with other branches of biology.

Within the prescribed curriculum, students may specialize in cellular and molecular physiology, theoretical and mathematical physiology, neurobiology, communication and information, organ systems and integrative phenomena, and behavioral physiology.

In a recent survey conducted by the Conference Board of the Associated Research Councils, UCLA's Physiology Department was judged fifth best in the nation in terms of the quality of its faculty. In addition to the Ph.D. program, the department offers postdoctoral training in research and welcomes students interested in articulated M.D./Ph.D. programs.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

A master's degree program is not a general objective of the department. However, the Master of Science degree may be awarded by comprehensive examination or thesis in special cases.

## Areas of Study

See below under Doctoral Degree.

## Course Requirements

Nine courses, of which at least five must be graduate courses, are required for the master's degree. A maximum of eight units of 500 series courses may be applied to the total course requirements; only four units may be applied to the graduate course requirement.

## Comprehensive Examination Plan

Consult department.

## Thesis Plan

Consult the department.

## Doctoral Degree

### Admission

All candidates for admission to graduate status in the Department of Physiology are expected to pursue the Ph.D. degree; the department does not admit candidates for the M.S. degree. In special cases, a terminal master's degree may be awarded on completion of suitable coursework and the completion of a comprehensive examination or submission of an acceptable thesis. Ph.D. students must conform to the general admission requirements established by the Graduate Division and have received a bachelor's degree in a biological or physical science or in the premedical curriculum. In general, at the time of admission, completed coursework should include courses in mathematics through calculus and differential equations, college physics, chemistry (including organic chemistry and biochemistry), and biology (courses in cell biology and molecular biology are highly recommended). In general, candidates seeking admission to the Physiology Department should apply through the ACCESS program.

In certain cases, at the discretion of the department, if an applicant lacks preparation in one of the above-mentioned courses but has a strong background in areas pertinent to physiology, the student may be admitted to graduate status provided that deficiencies are made up. (It is recommended that the deficiencies be corrected prior to matriculation.)

Applicants must submit (1) transcripts of grades for all college-level work; (2) the results of the Graduate Record Examination (GRE), including the Subject Test in Biology or in the applicant's undergraduate major; MCAT scores are accepted in lieu of the GRE; (3) at least three letters of recommendation from professors stressing potential for successful completion of graduate studies and creative independent research; and (4) an essay describing academic background, work experience, motivation for research, and career goals. Selected applicants are asked to have an interview with members of the graduate program committee (composed of faculty and a graduate student representative) or a designated interviewer. The graduate program committee then, in a written evaluation, advises the de-

partmental committee on instruction of its recommended admits. Final decisions of admittance to the graduate program reside with the committee on instruction which examines the recommendations for academic excellence, promise in scientific career goals consistent with the scientific expertise of the faculty, and the existence of financial support for the admit during the first and subsequent years of training.

An application packet and ACCESS brochure are available from UCLA ACCESS to Programs in Molecular and Cellular Life Sciences, 172 MBI, UCLA, Los Angeles, CA 90024-1570, (310) 206-6150. Additional information can be obtained from the Graduate Student Office, Department of Physiology, UCLA School of Medicine, Box 951751, Los Angeles, CA 90095-1751. Applicants should submit applications by December 15.

### Major Fields or Subdisciplines

The major fields in which graduate students may pursue research include (1) cellular physiology and biophysics; (2) molecular physiology; and (3) integrative physiology. The subdisciplines of these areas include cellular and molecular electrophysiology; membrane transport; cellular signal transduction; channel and transporter structure and function; muscle physiology; fundamental neurophysiology; neuromuscular physiology; and cardiovascular, gastrointestinal, respiratory, and reproductive physiology.

### Course Requirements

The following courses are required during the first two years: Biological Chemistry CM253; Physiology M204 or Neuroscience M205 or Physiology M210; Physiology M209A (Biological Chemistry CM267 or Microbiology and Immunology M229) may be substituted with permission of the graduate adviser), M212, M213. In addition, during the first two years, a total of 12 units must be completed in techniques or special topics courses (e.g., Physiology 220 through 298) or comparable courses in cell biology, neuroscience, molecular biology, chemistry, or biology) as governed by research interest. The specific courses are determined in consultation with the mentor and the Instruction Committee.

Three laboratory rotations must be taken during the first year. Two quarters of teaching assistantships are required during the second year of the program. The remaining time is to be devoted to developing and pursuing dissertation research (Physiology 597 and 599).

### Written and Oral Qualifying Examinations

The written examination is taken during the summer following the completion of the second year. The purpose of the examination is to assess ability to read and critically evaluate research papers in the chosen division of physiology (e.g., molecular, cellular, or integrative physiology). About three to four weeks prior to the examination, students are given three

reading lists (generated by professors selected by the graduate program committee), each containing five to 10 articles (including review articles and short reports such as those found in *Science* and *Nature*) on three different topics. During the written examination, students are asked one or more essay questions in the area of two of the reading lists. For the third area, students are given an actual short article that is missing its discussion section; students are asked to write a discussion for that paper. The examination is closed book and is taken on two consecutive half days. The examination is number coded and read by selected faculty. A pass/fail grade is assigned by the graduate program committee.

The University Oral Qualifying Examination is designed to establish that students can independently identify significant research questions, put them in context of existing knowledge in physiology, design appropriate and realistic protocols for testing hypotheses, and assure that the dissertation project is both appropriate and feasible. The examination takes place by the end of the Fall Quarter of the third year (end of seventh quarter) and is based on a written proposal circulated to members of the doctoral committee at least seven days prior to the examination. This proposal should pose an original research question outside the immediate area of dissertation research, should provide enough background (with references) to put the question in context of previous work, and should propose the experimental design that would be used to test the hypotheses in the proposal. The proposal must have the form of a mini-research grant application of about 20 pages, double spaced. Students must have independently generated the hypotheses to be tested and the experimental design for the testing of the hypotheses. Although students may consult faculty members or other students for information as to the execution of certain protocols, such as for references, the creative and critical aspects of the proposal must be the students' own work. The examination is an oral presentation of this proposal with concurrent questioning by the committee. The written proposal contains a brief two- to four-page summary of the proposed dissertation which is also discussed at the oral examination with the goal of clarifying its suitability as a Ph.D. project.

**Midstream Oral Presentation.** In addition to the oral qualifying examination, there is a midstream oral presentation (to occur eight to 12 months after the oral qualifying examination) in which progress on the research project is reviewed by the thesis committee. The purpose of this presentation is to inform the committee of research progress, to gain approval of significant changes in research direction that may have occurred, and to provide any additional help or guidance from the committee to assure that the dissertation is completed in an appropriate and timely fashion. The presentation is mandatory but is not an examination. The dissertation research adviser is expected to write a summary of any comments made by the doc-

toral committee at this time for inclusion in the student's folder.

**Grades and Reexamination.** Both the written and University Oral Qualifying Examinations are graded pass or fail. In the event that the committee for either examination concludes that a failing grade is necessary, the examining committee may decide to grant one additional opportunity to pass the examination at a time to be determined by the committee. The interval between the first and second examination, however, should not exceed two months, except in special circumstances. The same faculty committee administers and grades the second examination.

## Physiology

### Lower Division Course

**88. Lower Division Seminar: Special Topics in Physiology.** Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in physiology approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

### Upper Division Courses

**100. Elements of Human Physiology (6 units).** Prerequisite: dental student standing or consent of instructor. Primarily for first-year dental students. Major organic body functions. With special supplementation, a suitable introduction to the field for graduate students for whom the 201A-201B course sequence is too extensive.

**199. Special Studies (1 to 8 units).** Prerequisite: consent of instructor. Special studies in physiology, including either reading assignments or laboratory work or both, designed for proper training of students.

### Graduate Courses

**201A-201B. Organ System Physiology (6 units each).** Lecture, six hours; laboratory, three and one-half hours. Prerequisite: medical student standing or enrollment in qualified graduate program, consent of instructor. Recommended corequisites: courses M203A-M203B. Runs throughout School of Medicine's second semester. Lectures, laboratories, and conferences. Properties of biological membranes. Contractility of muscle. Epithelial transport. Cardiovascular, renal, respiratory, and gastrointestinal systems. Fluid and electrolyte balance. To receive credit, both courses must be taken together in same academic year. In Progress grading.

**M203A-M203B. Basic Neurology.** (Same as Neurobiology M203A-M203B.) Prerequisites: medical student standing or enrollment in qualified graduate program, consent of instructor. Runs throughout School of Medicine's second semester. Lectures, conferences, demonstrations, and laboratory procedures necessary to understand functions of nervous system. To receive credit, both courses must be taken together in same academic year. In Progress grading.

**M204. Cellular and Molecular Developmental Neurobiology.** (Same as Neurobiology M204, Neuroscience M204, and Psychiatry M204.) Lecture, three hours; discussion, one hour. Prerequisites: Neuroscience M201, M202, and M203, or Biological Chemistry 201A-201B, or consent of instructor. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging.

**M209A. Molecular Cell Biology (6 units).** (Same as Molecular, Cell, and Developmental Biology CM220 and Neurobiology M209A.) Not open for credit to students with credit for Molecular, Cell, and Developmental Biology 100 or M140. Introduction to cell biology for graduate students in basic medical sciences and selected undergraduates. Topics include membrane structure, assembly, and function; biogenesis of organelles, intercellular and intracellular signaling, immunity and gene structure, function and replication.

**M210. Molecular and Cellular Mechanisms of Neural Integration (5 units).** (Same as Neuroscience M230 and Physiological Science M210.) Lecture, four hours; discussion, one hour; outside study, 10 hours. Prerequisite: course M209A or Neuroscience M202. Introduction to mechanisms of synaptic processing. Selected problems of current interest, including regulation and modulation of transmitter release, molecular biology and physiology of receptors, cellular basis of integration in sensory perception and learning, neural nets and oscillators, and molecular events in development and sexual differentiation.

**M212. Introduction to Cellular Physiology and Biophysics (6 units).** (Same as Molecular, Cell, and Developmental Biology M237 and Physiological Science M212.) Lecture, five hours. Requisite: course M209A or Physiological Science 111A. Development of fundamental physiological and biophysical concepts associated with all membranes, membrane channels and transporters, membrane potential, membrane excitability, electrical signal transmission and transduction, and muscle contraction and their application to study of basic cellular processes. Emphasis in laboratory on development of skills using computer programming languages, spreadsheets, and graphics for modeling and analysis of cellular processes.

**M213. Principles of Integrative Physiology (6 units).** (Same as Physiological Science M213.) Lecture, four hours; discussion, two hours. Prerequisite: graduate standing; for upper division undergraduates: consent of instructor. Basic principles of biological integration, including regulation, homeostasis, feedback, and natural selection, to be illustrated by applying them to a molecules-through-whole animal view of four sets of problems: information processing, development, and plasticity in central nervous system; endocrine regulation of reproduction; feedback regulation of blood pressure and control of eye movements; and matching of enzyme, transporter, and bone capacities to natural loads.

**220. Methods in Cell Physiology (6 units).** Prerequisite: consent of instructor. Linear circuit analysis, including admittance, transfer admittance, transfer function, and filters using transform methods. Application of these concepts to electronic analog circuits in lectures and laboratory, with emphasis on operational amplifiers. Applications to electrophysiology include microelectrode amplifiers, voltage clamp and patch clamp techniques, with circuit analysis and noise considerations. Digital electronics cover logic gates, sequential circuits, and A/D and D/A conversion, with introduction to sampling theory.

**221. Cell Physiology: Excitability (6 units).** Prerequisite: course 220 or consent of instructor. In-depth coverage of general properties of excitable cells, linear cable properties, nonlinear conductance changes, and generation and propagation of the nerve impulse. Voltage gating and gating currents, as well as relationship between macroscopic conductance and single channel properties discussed in analytical detail using original publications.

**222. Cell Physiology: Cellular Interaction.** Prerequisite: consent of instructor. Simple and complex cellular interactions in nervous system. Study of synaptic transmission to higher-level cell-cell interactions, culminating in examination of mechanisms of central nervous system functions.

**M223. Membrane Molecular Biology.** (Same as Biological Chemistry M223.) Lecture, two hours; discussion, two hours. Prerequisite: Biological Chemistry CM253 or consent of instructor. Advanced course in molecular aspects of membrane physiology and biochemistry covering lipids and physical chemistry of biological membranes; membrane biogenesis and targeting of proteins to membranes; pumps, carriers, and channels; receptors and transmembrane signaling. S/U or letter grading.

**224. Transport Systems in Cell Membranes.** Prerequisite: consent of instructor. Properties of pumps and carriers in cell membranes and ion (Na, K, H, and Ca) transport across plasma membranes of single cells and epithelia.

**M225. Comparative Endocrinology: Molecular to Behavioral.** (Same as Physiological Science CM225.) Lecture, two hours; discussion, two hours. Prerequisite: graduate standing. Important concepts in endocrinology, with focus on current research involving invertebrate and vertebrate animal models in areas of reproduction, neuroendocrine control of behavior, metabolism, and insect metamorphosis.

**227. Biochemistry and Mechanics of Muscle (2 to 6 units).** Prerequisite: consent of instructor. Detailed study of biochemistry, energetics, and contractile mechanisms in muscle.

**M270A-M270B-M270C. Cell, Molecular, and Integrative Biology Seminars (2 units each).** (Same as Neurobiology M270A-M270B-M270C.) Seminar, one hour; discussion, one hour. Prerequisite: graduate standing or consent of instructor(s). Presentation of weekly seminars and discussion on current topics in cell and molecular biology by faculty members from Neurobiology, Physiology, and other UCLA departments, in addition to invited lecturers. S/U grading.

**298. Current Topics in Physiology (2 to 4 units).** (Formerly numbered 250A-250B-250C.) Designed for graduate students. Students read primary literature in a specified area and conduct or participate in discussions on these papers. S/U or letter grading.

**596. Directed Individual Study or Research (2 to 12 units).** Prerequisite: consent of instructor.

**597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 12 units).** Prerequisite: consent of instructor.

**598. Thesis Research for M.S. Candidates (2 to 12 units).** Prerequisite: consent of instructor.

**599. Dissertation Research for Ph.D. Candidates (2 to 12 units).** Prerequisite: consent of instructor.

#### Adjunct Professor

Xandra Kayden, Ph.D.

## Scope and Objectives

The Department of Policy Studies is an interdisciplinary unit composed of faculty members from around the campus, as well as faculty unique to the department. Its goal is to foster an understanding of the theory and practice of public policy in the many fields in which it applies. Examples include social insurance and welfare programs, unemployment and training, drug policy and crime, economic development, environmental quality, education, and health care. The department plays a major role in two schoolwide programs: the Master of Public Policy (M.P.P.) degree and the undergraduate minor in public policy.

The M.P.P. degree program is designed to train professionals in both public- and private-sector policy analysis and implementation and provides coursework in such areas as microeconomics, statistics, and political processes. The undergraduate minor familiarizes students with key issues in public policy. Both programs have a heavy applied orientation. For further information on both programs, see Public Policy and Social Research Schoolwide Programs later in this section of the catalog.

## POLICY STUDIES

Rosina M. Becerra, Ph.D.  
Trudy Cameron, Ph.D.  
Albert Carnesale, Ph.D.  
Robert Dallek, Ph.D.

## Policy Studies

### Lower Division Courses

**10A. Introduction to Public Policy.** Lecture, three hours; outside study, nine hours. Overview of principal topics of contemporary policy analysis, developing their applications with examples from instructor's own research, visitors, small student projects, or field trips.

**10B. Applied Policy Analysis.** Lecture, three hours; outside study, nine hours. Enforced requisite: course 10A. Applications of public policy analysis to actual policy interventions and issues along various dimensions: local, national, international, and historical. Guest speakers from regulatory agencies or interest groups affected by such agencies may be included.

## Upper Division Courses

**101. Drug Abuse Control Policy.** Lecture, three hours; outside study, nine hours. Introduction to and development of main ideas and themes that enter into analysis and execution of policies directed at control of substance abuse and its side effects; illustration and instantiation of main techniques and concepts of policy and management analysis.

**102. Rational Self-Interest: Concepts and Paradoxes.** Lecture, three hours; outside study, nine hours. Development of some central concepts of rational-choice model and examination of theories and evidence about systematic ways in which actual behavior deviates from that model. Exploration of various reasons groups of rationally self-seeking individuals might fail to act as rationally self-seeking groups and discussion of policy implications of individual and collective departures from rational action.

**103. Ethics, Morality, and Public Life: Contemporary Controversies.** Lecture, four hours; outside study, eight hours. Study of ethical and moral questions that arise in public life. Goal is not to imbue students with a given body of factual knowledge or to develop new quantitative or social science methodologies to analyze such questions, but to enhance their critical thinking skills.

**104. Culture and Political Structure of Los Angeles.** Lecture, three hours; outside study, nine hours. Exploration of two pieces of the puzzle in modern urban life: the different communities that live here (and in most other major cities) and political structure that binds us all together. Who are the communities living here? How do they organize themselves and develop leaders? How does integration into mainstream take place? What is "mainstream" today? How does political structure help or impede the notion of a united city?

**120. Race, Inequality, and Public Policy.** Lecture, three hours. Background in economics, sociology, or urban studies preferred but not required. Survey course to examine major debates and current controversies concerning public policy responses to social problems in urban America.

**141. Employment and Labor Policy: Survey.** Lecture, three hours; outside study, nine hours. Requisite: course 10A. Introduction to current public policy issues in employment, labor relations, and labor markets. Historical context for current employment and labor policies in the U.S. Pro and con philosophical analysis of reasons for government regulation. Analysis of current data on labor unions, the workplace, and labor-market trends. Workforce diversity, education and training, social welfare policy, and global issues (immigration, trade, and global economy as it affects the workforce). Future trends and issues on policy horizon.

**142. Labor Markets and Public Policy.** Lecture, three hours; outside study, nine hours. Preparation: one microeconomics course. Requisite: course 10A. Survey of major topics in economic analysis of labor markets and public policies toward the labor market. Topics include labor force trends and measurement, compensation determination, productivity, internal labor markets, human capital, union wage effects, unemployment, and minority and female labor-market experience.

**144. Comparative Industrial Relations.** Lecture, three hours; outside study, nine hours. Requisite: course 10A. At national and international levels, historical and contemporary analytical comparison of political, social, and economic contexts influencing human resource systems of selected developed countries. In addition to discussing possible frameworks for analyzing human resource systems, examination of institutions and ideologies of labor, management, and government, and interaction of their power relationships; substance and manner of determination of "web of rules" governing rights and obligations of the parties; and resolution of conflicts.

**145. Labor Policies in the U.S.: Historical Perspective.** Lecture, three hours; outside study, nine hours. Requisite: course 10A. Insight into evolution of labor policies in the U.S. from 19th century to the present. Exploration of important policy areas such as child labor, labor standards, protective legislation for women workers, industrial relations, civil rights, occupational safety and health, and international labor standards in (1) historical context (economic, political, and social factors that shaped the debate), (2) motivation and action of major players (business, labor, government), and (3) changing patterns of government involvement in public policy.

**148. Business and Public Policy.** Lecture, three hours; outside study, nine hours. Requisite: course 10A. Introduction to key issues arising at interface between business and government policy. Discussion of why government focuses so intensively on regulating economic outcomes, nature of business/government relationship, business political activity, and major government policies. Topics include economic regulation (industrial policy, antitrust, technology policy); social regulation of business (energy, environment, risk, liability, corporate governance); and corporate social responsibility, business ethics, and green business. Discussion of topics in their historical and political context, with comparison between economic regulation in the U.S. and other countries.

**197. Research Seminar: Policy Studies.** Seminar, three hours; outside study, nine hours. Requisites: courses 10A, 10B. Required of students in policy studies minor. Production of research paper that examines in depth a particular policy issue in its social context, including political pressures involved and problems of implementation. Emphasis on skills of data acquisition and analysis, conceptualization, and written analysis and presentation.

**199. Special Studies in Policy Studies (2 or 4 units).** Preparation: 3.0 grade-point average. Limited to juniors/seniors. Intensive directed research in policy studies. P/NP or letter grading.

## Graduate Courses

**201. Principles of Microeconomic Theory.** Lecture, three hours; outside study, nine hours. Economic analysis of public policy, with review of economic principles. Basic microeconomic theory and policy applications. Consumer theory and demand, producer theory and supply, equilibrium of product and factor markets, market structures, and externalities and public goods.

**202. American Political Institutions and Processes.** Lecture, three hours; outside study, nine hours. Designed to provide background necessary to develop strategies for dealing effectively with political environment of policy and administration. Discussion of U.S. constitutional system and American bureaucracy in its political setting. Examination of political aspects of policy analysis and program evaluation, with attention to market-like solutions to policy problems and budgeting.

**203. Statistical Methods for Public Policy.** Lecture, three hours; outside study, nine hours. First course in two-term sequence. Review of basic statistical principles. Topics include descriptive statistics for sample data, notions of probability, concept of expectations, useful discrete and continuous univariate distributions, bivariate distributions, marginal and conditional probability, covariance and correlations, statistical independence, random sampling, estimators, unbiasedness and efficiency, statistical inference, ANOVA, etc.

**204. Economic Analysis of Public Policy.** Lecture, three hours; outside study, nine hours. Requisite: course 201 or equivalent prior coursework in economics. Experience in using microeconomic theory to analyze and make decisions in public sector. Emphasis on specific policy cases using economic tools. Introduction to public finance institutions. Topics include valuing public benefits and costs, investment theory and decision criteria, trends in public revenue and expenditure, methods of infrastructure finance, political economics of public service distribution among and within cities.

**205. Bureaucracy and Public Management.** Lecture, three hours; outside study, nine hours. Problems posed by behaviors within and by bureaucracies. Conceptual tools for comprehending organization environment in which policy analysts work; tools for understanding role of manager with such organizations. Practical suggestions for policy analyst attempting to navigate waters of bureaucracy. Theoretical analysis integrated with case studies.

**206. Policy Formulation and Implementation.** Lecture, three hours; outside study, nine hours. Analysis of how policy is formed, adopted, and implemented. How policies are formulated, by whom, how political agendas are set, how to specify relationships between politicians, bureaucrats, lobbyists, and media experts. Impact of public opinion, role of bargaining and negotiation; how to evaluate policies after they have been adopted and implemented. Use of case studies.

**207. Political Economy.** Lecture, three hours; outside study, nine hours. Examination of political, legal, and social institutions to show where the U.S. fits in among varieties of modern capitalism and business/government relations. Analysis of domestic policy options nations are pursuing in response to economic globalization, such as protectionism, mercantilism, and deregulation. Introduction to international coalitions being formed, including NAFTA and nongovernmental organizations, to address global environmental crisis, etc.

**208. Policy Research and Analysis.** Lecture, three hours; outside study, nine hours. Requisite: course 203. Second course in two-term sequence. Quantitative studies of public policy covering survey research, decision theory, methods of statistical modeling for estimation, forecasting, and policy evaluation techniques for public policy.

**209. Management in the 21st Century.** Lecture, three hours; outside study, nine hours. Organizational and managerial challenges and opportunities posed by an increasingly diverse workforce and expanding role of technology in organizational life. Conceptual framework for understanding these trends and some practical approaches. Growing racial and gender diversity. Nature of technological-organizational-political relationships and governance based on vast technological knowledge.

**M210. Foundations of Social Welfare Policy.** (Same as Social Welfare M221A.) Lecture, three hours. Nature, roles, and history of welfare institutions in different societies; applicable social system theory of different components of the welfare system; theory and research about welfare policies and organizational forms. S/U or letter grading.

**M211. Public Policy for the Elderly and Their Families.** (Same as Social Welfare M290P.) Lecture, three hours. Examination of theoretical models and concepts of policy process and application to aging policy. Analysis of decision-making processes that affect social policies. Description of historical development of contemporary policy. Exploration of current proposals and issues. S/U or letter grading.

**M212. Child Welfare Policy.** (Same as Social Welfare M290J.) Lecture, three hours. Development of social policy as it affects families and children from different cultural backgrounds and as it is given form in public child welfare system. Examination of development of an infrastructure to support needs of children and families. S/U or letter grading.

**M213. Mental Health Policy.** (Same as Social Welfare M290K.) Lecture, three hours. Examination of evolution of social policy and services for the mentally ill, with emphasis on political, economic, ideological, and sociological factors that affect views of the mentally ill and services they are provided. S/U or letter grading.

**M214. Poverty, the Poor, and Welfare Reform.** (Same as Social Welfare M290L.) Lecture, three hours. Major policy and research issues concerning poverty and social welfare policy directed toward the poor in the U.S. S/U or letter grading.

**M215. Health Policy.** (Same as Social Welfare M290M.) Lecture, three hours. Introduction to contemporary issues in health care financing and delivery, providing historical perspective on emergence of these issues. Examination of major public programs and their relationship to issues of access and cost. S/U or letter grading.

**M216. Public Policy for Children and Youth.** (Same as Social Welfare M290N.) Lecture, three hours. Policy issues that affect children and adolescents in relation to their interaction with schools and the community, with emphasis on impact of policy across federal, state, and local levels. S/U or letter grading.

**M220. Transportation and Land Use.** (Same as Urban Planning M286.) Lecture, three hours. Historical evolution of urban form and transportation systems, intrametropolitan location theory, recent trends in urban form, spatial mismatch hypothesis, jobs/housing balance, transportation in the strong central city and polycentric city, neotraditional town planning debate, rail transit and urban form.

**M222. Transportation Economics, Finance, and Policy.** (Same as Urban Planning M289.) Lecture, three hours. Overview of transportation finance and economics; concepts of efficiency and equity in transportation finance; historical evolution of highway and transit finance; current issues in highway finance; private participation in road finance, toll roads, road costs and cost allocation, truck charges, congestion pricing; current issues in transit finance; transit fare and subsidy policies, contracting and privatization of transit services.

**M223. Transportation and Environmental Issues.** (Same as Urban Planning M290.) Lecture, three hours. Regulatory structure linking transportation, air quality, and energy issues, chemistry of air pollution, overview of transportation-related approaches to air quality enhancement; new car tailpipe standards; vehicle inspection and maintenance issues; transportation demand management and transportation control measures; alternative fuels and electric vehicles; corporate average fuel economy and global warming issues; growth of automobile worldwide fleet; the automobile in the sustainability debate.

**M230. Labor Markets and Public Policy.** (Same as Management M259C.) Lecture, three hours. Graduate-level survey of research literature on environmental institutions that impinge on work organizations — chiefly labor markets, labor unions, and public policy. Current research in economics, industrial relations, political science, and sociology, with emphasis on international and comparative dimensions of topics covered. S/U or letter grading.

**M231. Comparative Industrial Relations.** (Same as Management M255.) Lecture, three hours. Requisite: Management 409 or elementary knowledge of labor economics. At national and international levels, historical and contemporary analytical comparison of industrial relations systems within their political, social, and economic environments. Institutions, philosophies, and ideologies of labor, management, and government, and interaction of their power relationships; substance and manner of determination of “web of rules” governing rights and obligations of the parties; and resolution of conflicts. S/U or letter grading.

**M232. Labor Relations: Process and Law.** (Same as Management M250A.) Lecture, three hours. Designed for graduate students. Consideration, at advanced level, of collective bargaining process, labor/management agreement, administration of the contract, law of labor/management relations, union structure and goals, and influence of external labor markets on labor relations. S/U or letter grading.

**M240. Urban and Regional Economic Development I.** (Same as Urban Planning M236A.) Lecture, three hours. Introduction to industrial change and effect on urban and regional development theory and policy. Major topics include role of industrialization in economic development, explanations of regional industrial growth and decline, rise and fall of Fordism and its regional patterns, new forms of industrialization with particular emphasis on flexible production, and debates regarding political economy of industrialization.

**M241. Introduction to Regional Planning: Evolution of Regional Planning Doctrines.** (Same as Urban Planning M232A.) Lecture, three hours. Critical and historical survey of evolution of regional planning theory and practice, with particular emphasis on relations between regional planning and developments within Western social and political philosophy. Major concepts include regions and regionalism, territorial community, and social production of space.

**M242. Regional Development, Urbanization, and Industrial Policy.** (Same as Urban Planning M234.) Lecture, three hours. Survey of theories of regional development, with special reference to “new economic geography” and its relevance for formulation of local economic development policies.

**M269. Health Policy Seminar.** (Same as Health Services M249E.) Requisites: Biostatistics 100A, 100B, Health Services 200A-200B-200C, 236. Public policy concerning payment for medical care services and characteristics of the market for those services; demand for care, fee-for-service and prepaid payment systems, regulation of price and capital investment, private sector efforts to control health care costs.

**290. Special Topics in Public Policy.** Discussion, two to three hours. Advanced seminar on emerging issues in public policy. May be repeated for credit. S/U grading.

**298A-298B. Seminars: Applied Policy Analysis.** Seminar, three hours; outside study, nine hours. Preparation: completion of M.P.P. core curriculum, two policy cluster courses, and field placement (unless waived). Two-term seminar in which students prepare major public policy projects and papers which are case studies of policy evaluation and implementation and are equivalent to professional master's theses. Papers build on prior core courses, fieldwork experience, and policy cluster courses. In Progress and S/U grading.

## POLITICAL SCIENCE

Mohan N. Penubarti, Ph.D.  
Michael F. Thies, Ph.D.  
Daniel S. Treisman, Ph.D.  
Brian Walker, Ph.D.

## Scope and Objectives

The undergraduate program in political science aims to provide understanding of basic political processes and institutions as these operate in different national and cultural contexts. It also covers the interaction between national states, the changing character of the relations between citizens and governments, and the values and criteria by which the quality of political life is judged. The program may be individually focused to serve the needs of the liberal arts major, the student seeking preparation for graduate work in political science, public administration, law, and other professional fields, and the student preparing for specialized roles in political and public organizations.

The graduate program leads to the Ph.D. degree in Political Science (a master's degree may be earned in the process of completing Ph.D. requirements). It is designed to give students a strong foundation in the discipline

while enabling them to acquire additional skills for advancing their professional careers.

## Undergraduate Study

### Bachelor of Arts Degree

#### Prepolitical Science Major

All students intending to major in political science must enroll as prepolitical science majors. After completion of preparation for the major courses, they need to petition to enter the major in the Undergraduate Office, 4256 Bunche Hall.

#### Preparation for the Major

*Required:* Four lower division courses from Political Science 10, 20, 30, 40, 50. These lower division courses are requisites to upper division courses and 10, 20, 40, and 50 are required in those fields designated as the concentration or distribution field. Students must also take Political Science 6 or one of the following statistics courses: Anthropology 80, Economics 40, Geography 40, Psychology 41, Social Sciences 40, Sociology 18, Statistics 50.

Students must complete all premajor courses with a 2.0 grade-point average by the time they attain 135 units. Admission to the major is granted only after successful completion of all lower division requirements.

#### The Major

*Required:* Ten upper division courses (40 units) selected from Political Science 102 through 199 taken for a letter grade. Students are also required to complete four upper division courses (16 units) in one or two of the following social sciences: anthropology, communication studies (only Communication Studies 160), economics, geography, history, management (only Management 150, 190), psychology (except Psychology 115, 116), sociology. These courses must be taken for a letter grade. Students are required to maintain a 2.0 overall grade-point average in all upper division political science courses.

Upper division political science courses are organized into four fields: (I) political theory, (II) international relations, (III) American politics, and (IV) comparative politics.

In fulfilling the requirement of 10 upper division political science courses, students must satisfy the following:

- (1) A **concentration** in one field by completing the lower division course and at least four upper division courses in that field.
- (2) A **distribution** of the lower division course and two upper division courses in each of two other fields (four upper division courses).
- (3) Two additional elective courses in political science to comprise the total of 10.

#### Field Concentration Requirements

The lower division course is requisite to upper division courses in those fields designated as the concentration field and the two distribution

fields for majors. Specific requirements for the field concentration are as follows:

- (I) *Political Theory:* Political Science 10 and any four courses in Field I.
- (II) *International Relations:* Course 20 and any four upper division courses in Field II.
- (III) *American Politics:* Course 40 and any four courses in Field III.
- (IV) *Comparative Politics:* Courses 50, 168, and any three additional courses in Field IV. Courses 115 and 118 may also be applied toward concentration in this field.

Courses 119, 139, 149, and 169 may be applied no more than twice toward the field concentration requirement. No more than three of these courses may be applied toward the major.

Courses 195A-195B-195C and 199 may not be applied toward either the concentration or distribution requirement.

Political science majors should be aware that the upper division course requirements in the major (56 units) do not meet the upper division requirement of 60 units (effective Fall Quarter 1997) for graduation. Additional upper division units must be taken to reach to 60-unit total.

#### Undergraduate Seminars

Each term the department offers a series of seminars (Political Science C197A-C197D) in each field. The requisites are two upper division courses in the field in which the seminar is offered, a 3.25 average at the upper division level in political science, or discretion of the instructor. These courses may be applied toward either the concentration or distribution requirement, and students who qualify are encouraged to take them.

#### Honors Program

The department honors program is open to seniors and to students who (1) have completed five upper division political science courses (two of which are in one field), (2) have a 3.5 grade-point average in upper division political science courses, and (3) are eligible for College of Letters and Science honors. Students should have substantial experience in writing research papers and take at least one seminar course in the Political Science C197 series before they enter the honors program or course 195A.

Students wishing to qualify for graduation with departmental honors must complete the following: (1) courses 195A-195B-195C, in which a senior thesis is written; (2) eight upper division courses (excluding courses 119, 139, 149, and 169) distributed as follows: four courses in one field and four additional courses, two in each of two other fields; (3) four upper division courses in one or two of the social sciences other than political science.

#### Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements,

see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

The department admits only those students whose degree objective is the Ph.D. degree. A Master of Arts degree may be earned as part of the process of completing requirements for the Ph.D.

### Areas of Study

Consult the department.

### Course Requirements

Students receive the M.A. degree on the successful completion of 12 of the 16 required courses with an average grade of 3.0 or more and a grade of qualified or qualified with distinction on one paper.

### Comprehensive Examination Plan

Consult the department.

### Thesis Plan

Consult the department.

## Doctoral Degree

### Admission

In addition to University minimum requirements, the department requires three letters of recommendation, scores of the General Test of the Graduate Record Examination (GRE), and a sample of applicants' analytical writing skills (e.g., senior or M.A. thesis, term paper). Applicants are selected on the basis of perceived promise. Applicants may write for departmental brochures to the Graduate Studies Office. The department does not have an application form in addition to the UCLA *Application for Graduate Admission*. The deadline for receipt of all application materials is December 15 of the year preceding the Fall Quarter in which students plan to register.

### Major Fields or Subdisciplines

Five fields of study are offered to graduate students in the department: political theory; international relations; American politics; comparative politics; and formal theory and quantitative methods.

### Course Requirements

Students must take Political Science 200A and 200AL (statistics), four courses in each of two major fields, one course in each of two minor fields, and four additional graded courses, including no more than two independent study courses. Fields decide which courses meet major and minor field requirements.

Of these 16 required courses, students must take at least seven during their first year of graduate study and 12 by the end of their second year.

With the approval of the graduate adviser and the dean of the Graduate Division, graduate

courses in political science taken elsewhere may be applied toward departmental course requirements. The maximum number of such courses is six if students come to UCLA with a master's degree in political science and choose to forego another master's degree from UCLA. In all other cases, the maximum is four for courses taken at another UC campus and two for courses taken outside the UC system.

## Written and Oral Qualifying Examinations

**Research Paper Requirement.** Students must submit two research papers, one by the beginning of the seventh term of graduate study and one by the beginning of the ninth term of graduate study. These papers may also have been used to meet course requirements. Each paper is assigned to two or more faculty graders by the Graduate Studies Committee. Papers can be graded qualified, not qualified, or qualified with distinction. If a paper is graded not qualified, students may submit a revised version or another paper, once only. Resubmitted first papers are due two weeks before the end of the ninth quarter. Resubmitted second papers are due two weeks before the end of the tenth quarter. For the Ph.D., students must receive at least a qualified grade on both papers.

Papers are evaluated for knowledge of subject, originality of ideas, and craftsmanship of research. They are also evaluated for conciseness: good papers may vary in length but are not expected to exceed 30 pages. They need not be publishable, but in their structure and format and in their coverage of topics and tasks are expected to resemble papers published in peer-reviewed journals of their fields. The committee evaluating the papers assumes that students have not devoted all their research time to two papers but have selected for submission, or for revision and submission, the best two from a portfolio of several seminar papers.

By the tenth quarter of graduate study, students must present a research design for their dissertation in a seminar or colloquium. It need not be the version students submit for the University Oral Qualifying Examination.

Students may take that examination after they have completed their course and paper requirements and written a dissertation proposal accepted by their research adviser. But students must take it no later than their twelfth quarter of graduate study, and the examination committee must have the proposal at least two weeks before the examination.

The examination committee judges the feasibility and worth of the project and the student's ability to undertake it. The committee also may recommend changes in the research design.

# Political Science

## Lower Division Courses

**6. Introduction to Quantitative Research.** Lecture, three hours; discussion, one hour. Introduction to collection and analysis of political data, with emphasis on application of statistical reasoning to study of relationships among political variables. Use of computer as an aid in analyzing data from various fields of political science, among them comparative politics, international relations, American politics, and public administration.

**10. Introduction to Political Theory.** Lecture, three hours; discussion, one hour. Exposition and analysis of selected political theorists and concepts from Plato to the present.

**20. World Politics.** Lecture, three hours; discussion, one hour. Required of all students concentrating in Field II. Introduction to problems of world politics.

**30. Introduction to Political Economy.** Lecture, three hours; discussion, one hour. Introduction to political economy, especially application of economic reasoning to political and social phenomena. P/NP or letter grading.

**40. Introduction to American Politics.** Lecture, three hours; discussion, one hour; outside study, eight hours. Basic institutions and processes of democratic politics. Treatment of themes such as constitutionalism, representation, participation, and leadership coupled with particular emphasis on the American case. P/NP or letter grading.

**50. Introduction to Comparative Politics.** Lecture, three hours; discussion, one hour. Comparative study of constitutional principles, governmental institutions, and political processes in selected countries. P/NP or letter grading.

**88A-88D. Lower Division Seminars.** (Formerly numbered 88A-88F.) Seminar, three hours. Limited to freshmen/sophomores. Opportunity to enhance writing, verbal, and reasoning skills. General introduction to a subfield of a major area, or intensive exploration of a particular theme or topic. Variable topics; consult *Schedule of Classes* for topics to be offered in a specific term. May not be repeated for credit except by students who receive a grade of C-, D, or F. P/NP or letter grading. **88A.** Political Theory; **88B.** International Relations; **88C.** Politics; **88D.** Comparative Politics.

## Upper Division Courses

Requisite for all upper division courses: upper division standing or consent of instructor.

**102. Statistical Analysis of Political Data.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 6. Introduction to statistical inference. Topics include measures of central tendency, elementary probability theory, common probability distributions, least-squares and maximum likelihood estimation, confidence intervals and statistical tests, comparison of means, analysis of variance, and multiple regression and correlation. Statistical techniques and topics illustrated with applications to a variety of political data.

**104A-104B. Introduction to Survey Research.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 6. Courses in fundamentals of survey research as a method. **104A.** Sampling theory and methods, writing of questions, questionnaire construction, and interviewing. Attitudes, attitude measurement, and attitude change. Participation in formulation of research problem. **104B.** Prerequisite: course 104A. Conducting a survey. Development of survey questionnaire, designing a sample, collecting interviews, maintaining quality control, and coding interviews for machine tabulation. Performance of computer-aided analysis of some part of data and submission of written report of that research.

**M105. Economic Models of Public Choice.** (Same as Economics M135.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: Economics 11, any lower division political science course, and junior/senior standing, or consent of instructor. Analysis of methods and consequences of arriving at collective decisions through political mechanisms. Topics include free-rider problem, voting and majority choice, demand revelation, and political bargaining.

**M106. Economic Models of Political Conflict and Conflict Resolution.** (Same as Economics M136.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: Economics 11, any lower division political science course, and junior/senior standing, or consent of instructor. Biological, cultural, and organizational sources of political conflict. Role of threats, promises, commitments. Models of the onset and termination of conflict. Conduct of war: strategy and tactics.

## Field I: Political Theory

**111A-111B-111C. History of Political Thought.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Exposition and critical analysis of major political philosophers and schools. **111A.** Ancient and Medieval Political Theory from Plato to Machiavelli; **111B.** Early Modern Political Theory from Hobbes to Bentham; **111C.** Late Modern and Contemporary Political Theory from Hegel to the Present.

**112A. Democratic Theory.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Critical analysis of selected major authors, issues, and arguments in contemporary democratic theory.

**113. Problems in 20th-Century Political Theory.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Study and interpretation of theorists who have focused their analyses on social and political problems of the 20th century.

**114A-114B. American Political Thought.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. **114A.** Exposition and critical analysis of American political thinkers from the Puritan period to 1865. **114B.** Prerequisite: course 114A or consent of instructor. Exposition and critical analysis of American political thinkers from 1865 to the present.

**115. Theories of Political Change.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Critical examination of theories of political change, relation of political change to changes in economic and social systems, and relevance of such theories for experience of both Western and non-Western societies. May be applied toward either Field I or IV.

**116. Marxism.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Critical analysis of origins, nature, and development of Marxist political theory.

**117. Jurisprudence.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Development of law and legal systems; consideration of fundamental legal concepts; contributions and influence of modern schools of legal philosophy in relation to law and government. May be applied toward either Field I or III.

**118. Political Violence.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Examination of one or several different uses of violence in the revolutionary process: demonstrations, mass uprisings, coup d'etat, assassination, and terrorism. May be applied toward either Field II or IV.

**119A-119Z. Special Studies in Political Theory.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: course 10, one additional course in Field I, consent of instructor. Intensive examination of one or more special problems appropriate to political theory. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, and 169 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major.

## Field II: International Relations

**120. Foreign Relations of the U.S.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Survey of factors and forces entering into formation and implementation of American foreign policy, with special emphasis on contemporary problems.

**121. Studies in Formulation of American Foreign Policy.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Study of formation of American foreign policy with respect to individual cases. Consult *Schedule of Classes* for topics to be offered in a specific term.

**122. World Order.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Study of problems of the international system seen as a community capable of cooperation and development.

**123A-123B. International Law.** (Formerly numbered 175A-175B.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 40. Study of nature and place of international law in conduct of international relations. May be offered in consecutive terms or simultaneously. If offered consecutively, course 123A is prerequisite to 123B, and students may take 123A alone for four units credit. If offered simultaneously, student must take both courses for eight units. Maximum of four units may be applied toward Field II.

**124. International Political Economy.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Study of political aspects of international economic issues.

**125. Arms Control and International Security.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Arms control in context of international security in the nuclear age. Nuclear arms race; relationship between deterrence doctrines and nuclear war; roles of technology and ideology; nuclear proliferation; outer space.

**126. Peace and War.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Theory and research on causes of war and conditions of peace.

**127A-127B. Atlantic Area in World Politics.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. **127A.** Western Europe. External relations of United Kingdom, West Germany, France, Italy, and other European members of NATO, in regard to European security in context of the Atlantic Alliance. **127B.** U.S. and Europe. Prerequisite: course 127A or consent of instructor. Relations between the U.S. and Western European members of the Atlantic Alliance, in context of U.S./Soviet relations.

**128A. U.S./Soviet Relations.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Survey of relations between the U.S. and former Soviet Union from Revolutions of 1917 to collapse of the U.S.S.R. in 1991.

**128B. International Relations of Post-Communist Russia.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: courses 20 and 128A, or consent of instructor. Survey of foreign policy of post-Communist Russia, with special emphasis on Russia's relations with NATO, the former communist states of East Central Europe, China, and the Commonwealth of Independent States.

**129. Comparative Foreign Economic Policy.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Examination of foreign trade, monetary, and investment policies of the U.S., Japan, France, and Federal Republic of Germany since 1945.

**130. Politics of Latin American Economic Development.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Interaction of international and domestic factors in political and economic evolution of Latin America.

**131. Latin American International Relations.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Major problems of Latin American international relations and organization in recent decades.

**132A-132B. International Relations of the Middle East.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours.

**132A.** Prerequisite: course 20. Contemporary regional issues and conflicts, with particular attention to inter-Arab politics, Arab-Israeli problem, and Persian Gulf area. **132B.** Role of the great powers in the Middle East, with emphasis on American, Soviet, and West European policies since 1945.

**133. International Relations of Sub-Saharan Africa.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Contemporary regional issues and conflicts; foreign policies of African states; role of external powers.

**134. Foreign Policy Decision Making and Tools of Statecraft.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 120 or consent of instructor. Contrasts purposive and process models of individual and group decision making. Impact of strategic interaction and situational factors on foreign policy decision making. Implications for policy choice of tools of statecraft (i.e., threats/promises, military/economic/diplomacy). P/NP or letter grading.

**135. International Relations of China.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Relations of China with its neighbors and the other powers, with emphasis on contemporary interests and policies of China vis-à-vis the U.S. and Soviet Union.

**136. International Relations of Japan.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Foreign policies of Japan and interests and policies of other countries, particularly the U.S., as they relate to Japan.

**137A-137B. International Relations Theory.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. **137A.** Examination of various theoretical approaches to international relations. P/NP or letter grading. **137B.** Alternative approaches to analysis of international politics and their application to historical and contemporary cases.

**139A-139Z. Special Studies in International Relations.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: two courses in Field II, or course 20 and one course in Field II, and consent of instructor. Intensive examination of one or more special problems appropriate to international relations. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, and 169 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major:

**M139A.** Political and Economic Issues in the Proliferation of Nuclear Weapons. (Same as Economics M103A.) Interdisciplinary approach to the problem of nuclear proliferation. Economic aspects of acquisition of nuclear weapons and economic aspects of nuclear energy treating technological, bargaining, and stability issues.

## Field III: American Politics

**140A-140B-140C. National Institutions.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 40. **140A.** Congress. (Formerly numbered 143.) Study of those factors which affect character of the legislative process and capacity of representative institutions to govern in contemporary society. **140B.** The Presidency. (Formerly numbered 144.) Study of nature and problems of presidential leadership, emphasizing impact of the bureaucracy, congress, public opinion, interest groups, and party system on the presidency and national policy-making. **140C.** Supreme Court. (Formerly numbered 70.) Introduction to American constitutional development and role of Supreme Court as interpreter of the U.S. Constitution. Reading of Supreme Court cases as well as various historical and current commentaries.

**M141A-M141D. Electoral Politics.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours:

**M141A.** Political Psychology. (Formerly numbered M140.) (Same as Psychology M138.) Prerequisite: course 40. Examination of political behavior, political socialization, personality and politics, racial conflict, and psychological analysis of public opinion on these issues.

**141B.** Public Opinion and Voting Behavior. (Formerly numbered 141.) Prerequisite: course 40. Study of character and formation of political attitudes and public opinion. Role of public opinion in elections, relationship of political attitudes to the vote decision, and influence of public opinion on public policy formulation.

**141C.** Political Behavior Analysis. (Formerly numbered 146.) Prerequisites: courses 6, 40, 141B. Advanced course in use of quantitative methods in study of political behavior, especially in relation to voting patterns, political participation, and techniques of political action. Students conduct computer-aided analyses of issues and problems treated in course 141B and similar courses.

**M141D.** Mass Media and Elections. (Formerly numbered M148.) (Same as Communication Studies M161.) Prerequisite: course 40. Assessment of manner in which Americans' political beliefs, choices, and actions are influenced by mass media presentations, particularly during election campaigns. Topics include processes of political attitude formation and change, different types of media "effects," and role of the media in the American political process.

**142A-142B-142C. Political Parties and Interest Groups.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 40. **142A.** Political Parties. (Formerly numbered 145.) Organization and activities of political parties in the U.S. Attention to historical development of the parties, nature of party change, campaign functions and electoral role of the parties, membership problems and party activists, political finance, and policy formulation practices. **142B.** Politics of Interest Groups. (Formerly numbered 142.) Systematic investigation of role of political interest groups in governmental process, with attention to internal organization, leadership, and politics of such groups to goals and functions of various types of groups and to strategy and tactics of influence. **142C.** Government and Labor. (Formerly numbered 174.) Labor force and nature of trade union; regulation of labor relations; programs to encourage full employment and to mitigate unemployment; protective labor legislation.

**143A-143B. Subnational Government.** (Formerly numbered 183A-183B.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 40. **143A.** American State Government. Examination of governments of states of federal union as major sources of public policy in the U.S., with government of California as principal topic. **143B.** Government of American Cities. Intensive analysis of contemporary urban governance in the U.S. Emphasis on such student participatory activities as fieldwork, research, and gaming of urban politics and policy problems.

**M144A-M144B. Ethnic Politics.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: course 40, and one 140-level course or one upper division course on race or ethnicity from history, psychology, or sociology, or consent of instructor:

**M144A.** Chicano/Latino Politics. (Formerly numbered M147A.) (Same as Chicana and Chicano Studies M147A.) Introduction to political economy of racial domination in the U.S., concentrating on study of Mexican origin communities. Emphasis on identifying and explaining the historically changing relationship between class, race, and power by studying the interaction between state policies and practices, class and racial stratification systems, and cultural codes and modes of ideological discourse in each historical period.

**M144B.** African American Politics. (Formerly numbered M147B.) (Same as Afro-American Studies M144.) Course M144A is not prerequisite to M144B. Emphasis on dynamics of minority group politics in the U.S., touching on conditions facing racial and ethnic groups, with black Americans being the primary case for analysis. Three primary objectives: (1) to provide descriptive information about social, political, and economic conditions of the black community, (2) to analyze important political issues facing black Americans, (3) to sharpen students' analytical skills.

**145A-145D. Public Law and Judicial Process.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 40:

**145A.** Anglo-American Legal System. (Formerly numbered 170.) Evolution of English common law courts and their legal system, with emphasis on development of basic concepts of law which were received from that system in the U.S. and remain relevant today.

**145B.** Constitutional Law — Separation of Powers. (Formerly numbered 172A.) Constitutional questions concerning separation of powers, federalism, and relationship between government and property.

**145C.** Constitutional Law — Civil Liberties. (Formerly numbered 172B.) Protection of civil and political rights and liberties under the constitution.

**145D.** Judicial Oversight of the Bureaucracy. (Formerly numbered 185.) Legal controls of administrative action. Substantive and procedural limits on administrative discretion imposed by legislation, executive and judicial agencies, and sources of legal powers of administrative bodies within these limits. P/NP or letter grading.

**146A-146F. Organization Theory, Public Policy, and Administration.** (Formerly numbered 146A-146E.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours:

**146A.** Public Administration and Policy. (Formerly numbered 80.) Requisite: course 40. Introduction to processes of policy formation and implementation. Exploration of emergence and performance of government bureaucracies and their role in American political process. P/NP or letter grading.

**146B.** Bureaucracy and Public Management. (Formerly numbered 184.) Requisite: course 40. Preparation: familiarity with American government. Nature of bureaucracy in modern government, with emphasis on the U.S.; explanation of why government agencies behave as they do. Focus on real and imagined problems with bureaucratic rule; evaluation of commonly proposed solutions for these problems. Examples from schools, armies, welfare bureaus, regulatory agencies, and intelligence services, among others. P/NP or letter grading.

**146C.** Governing the Bureaucracy in the U.S. (Formerly numbered 186.) Requisite: course 40. Designed for juniors/seniors. Relationship between elected officials and administrators in the U.S., especially efforts of elected and appointed officials to monitor and control behavior of those in "permanent government" (career bureaucrats).

**146D.** Theories of Organization and Decision Making. (Formerly numbered 180.) Requisite: course 40. Examination of theoretical frameworks for studying public and private bureaucracies, with emphasis on ideologies, values, behavioral patterns, and concepts of organization. P/NP or letter grading.

**146E.** National Policy Development and Implementation. (Formerly numbered 182A-182D.) Requisite: course 40. Investigation of complex process of policy development and implementation in the U.S., including roles of federal, state, and local agencies as well as private organizations. Subsections offered on particular policy areas, with topics announced in preceding term.

**146F.** Politics, Ethics, and Business. Requisite: course 40. Examination of political issues, interests, and institutions that impose constraints on and provide opportunities for business. Ethical issues that arise in external environment of business and its internal operations. Examples of topics include government regulation, product liability, affirmative action, lobbying Congress, exporting hazardous waste to developing countries.

**149. Special Topics in American Government and Politics.** (Formerly numbered 149A-149Z.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: course 40 and two courses in Field III, or consent of instructor. Intensive examination of one or more special problems appropriate to American politics. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, and 169 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major.

Also see course 117

## Field IV: Comparative Politics

**151A-151B-151C. African Politics.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours:

**151A.** Government and Politics of Africa. (Formerly numbered 166A, 166C.) Comparative study of government and politics in contemporary Africa, with special attention to state/society relations, interaction of politics and economic development, political institutions, and conflict and resolution.

**151B.** Political Economy of Africa. (Formerly numbered 166B.) Examination of interactions of economic and political factors in African development, with special attention to political basis of inappropriate economic policy during early post-independence period and change toward a more appropriate economic strategy in recent times.

**151C.** Special Topics in African Politics. (Formerly numbered 166D.) Consult *Schedule of Classes* for topics to be offered in a specific term.

**152A-152B-152C. Government and Politics of West European Countries.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Constitutional and political structure and development of one or more states in Europe, especially Britain, France, or Germany, with particular attention to contemporary problems. P/NP or letter grading. **152A.** Britain. (Formerly numbered 152.); **152B.** France; **152C.** Germany. (Formerly numbered 154.).

**153A-153B. Comparative Government and Politics of Western Europe.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours:

**153A.** West European Government and Politics. (Formerly numbered 153.) Comparison of constitutional and political structure of West European states, with particular attention to contemporary problems.

**153B.** Game-Theoretic Approach to West European Politics. (Formerly numbered 153A.) Course 153A is not prerequisite to 153B. Uses of elementary game theory to investigate post-World War II Western European politics. Social and political forces, and political institutions. Particular emphasis on study of three West European countries — United Kingdom, France, and Federal Republic of Germany. Consideration of current developments and comparisons with the U.S.

**154A-154B. Government and Politics in Latin America.** (Formerly numbered 163A-163B.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Comparative study of governmental and political development, organization, and practices. **154A.** States of Middle America; **154B.** States of South America.

**155. Advanced Pluralist Democracies.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Main features and basic problems of economically advanced democracies, analyzed in comparative framework, topic by topic. Emphasis on cross-Atlantic comparisons, not only political but also sociological.

**156A-156D. Government and Politics of Post-Communist States.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. P/NP or letter grading:

**156A.** Russia. Intensive study of institutions and political development in Russia, with special attention to legacy of the Soviet Union.

**156B.** Eastern Europe. (Formerly numbered 157.) Survey of institutions and political processes in selected post-Communist states of Eastern Europe.

**156C.** Post-Soviet States. (Formerly numbered 156B.) Survey of institutions and political processes in selected former Soviet republics other than Russia.

**156D.** Political Economy of Post-Communist Reform. Focused study of interaction between transitions to democracy and to the market in selected post-Communist countries, with emphasis on development of general theories of political and economic reform.

**157. Government and Politics in the Middle East.** (Formerly numbered 164.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Comparative study of government in the Arab States, Turkey, Israel, and Iran. P/NP or letter grading.

**159A-159B. Government and Politics of China.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours:

**159A.** Chinese Revolution and Age of Mao Zedong. (Formerly numbered 159.) Survey of modern Chinese politics from decline of Manchu dynasty and rise of revolutionary nationalism to death of Mao Zedong, with emphasis on socioeconomic foundations and political dynamics of revolution in modern China.

**159B.** China in Age of Reform. Survey of China's political and ideological transformation in post-Mao era. Assessment of impact of changing socioeconomic conditions on revolutionary policies and programs of Chinese Communist Party. Exploration of etiology of 1989 Tiananmen crisis and consequences for China of collapse of Communism in East Europe and the Soviet Union.

**160. Government and Politics of Japan.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 50. Structure and operation of contemporary Japanese political system, with special attention to domestic political forces and problems.

**167A. Ideology and Development in World Politics.** (Formerly numbered 167.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 50. Comparative study of major modes of political and economic development in the world today. Relations between industrial and nonindustrial societies in light of current debate about imperialism.

**167B. Comparative Development and Administration.** (Formerly numbered 181.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 50. Analysis of bureaucratic structures and function in the U.S., other industrialized, and less developed countries, primarily at national level. Special attention to methods of comparative analysis and utility of various methods. P/NP or letter grading.

**168. Comparative Political Analysis.** Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisites: two courses in Field IV, or course 50 and one course in Field IV. Required of all students concentrating in Field IV. Major approaches to study of comparative politics. Concepts and methodology of comparative analysis.

**169. Special Studies in Comparative Politics.** (Formerly numbered 169A-169Z.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Preparation: two courses in Field IV. Intensive examination of one or more special problems appropriate to comparative politics. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, and 169 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major.

Also see course 115

## Special Studies

**195A-195B-195C. Honors Seminars and Thesis.** Prerequisites: one course in C197 series, 3.5 GPA in upper division political science courses, eligibility for Letters and Science honors. Course 195A is prerequisite to 195B, which is prerequisite to 195C. One-year honors seminar and thesis-writing sequence. Students entering course 195A are expected to have some experience in writing research papers and to have in mind a research topic suitable for treatment at length and in depth:

**195A.** Students define their research topic, select a suitable research method, determine appropriate sources of information, prepare research proposal, find a thesis director, begin their research, and submit progress reports or preliminary drafts. Class sessions emphasize critical and constructive discussions of students' topics, methods, and problems in research, as well as general consideration of political science research topics and methods of current or continuing interest. Students also meet privately with instructor to discuss research progress.

**195B-195C.** Writing of honors thesis under direction of a faculty member. Thesis is read by appropriate field committee and graded high honors, honors, or no honors. In Progress grading.

**C197A-C197D. Seminars for Majors.** (Formerly numbered C197A-C197F.) Seminar, three hours. Prerequisites: political science major, upper division standing, 3.25 GPA in upper division political science courses, two upper division courses in field in which seminar is offered. Consult *Schedule of Classes* for topics to be offered in a specific term. May be applied toward distribution or concentration requirement. May be concurrently scheduled with various graduate courses.

**M197G. Introduction to Development Studies: Political Economy of Development.** (Same as International Development Studies M100B and Sociology M180.) Seminar, three hours. Analysis of determinants of underdevelopment, with focus on impact of colonialism, foreign investment, and trade, and on political economy.

**197W. CAPP Washington Research Seminar (8 units).** Seminar, three hours; laboratory, 24 hours. Prerequisite: admission to CAPP Program. Seminar for undergraduates in Center for American Politics and Public Policy's program in Washington, DC. Focus on development and execution of original empirical research based on experiences from Washington, DC-based field placements. Study of variety of qualitative methods (observation, interviewing, etc.), with comparison to quantitative analysis. Examination of features of solid and significant research; intensive writing.

**199. Readings in Political Science (2 to 4 units).** Prerequisites: upper division standing, 3.0 overall GPA, consent of instructor and department chair. Individual studies. May not be applied toward concentration or distribution requirement. May be repeated for a maximum of 16 units.

## Graduate Courses

### Formal Theory and Quantitative Methods

**200A. Statistical Methods I.** Lecture, three hours. Corequisite: course 200AL. Introduction to statistical analysis of political data. Methods of data analysis, estimation, and inference.

**200AL. Statistical Methods Laboratory I.** Laboratory, three hours. Corequisite: course 200A.

**200B. Statistical Methods II.** Lecture, three hours. Prerequisites: courses 200A/200AL. Recommended: knowledge of elementary calculus. Applications of multiple regression in political science.

**200C. Statistical Methods III.** Lecture, three hours. Prerequisites: courses 200A/200AL, 200B, knowledge of elementary calculus. Statistical modeling of political processes. Topics include simultaneous equations models, discrete choice models, time-series models.

**M200E. Advanced Regression Analysis.** (Same as Psychology M256.) Seminar, three hours. Prerequisite: consent of instructor. Diagnostics, robust regression, cross validation, resampling, outliers, missing data, geometry of regression, validity of assumptions, categorical dependent variables, transformation of variables. Access to Macintosh computer very helpful.

**201A. Introduction to Formal Political Analysis.** Seminar, three hours. Survey of formal political theory to enhance literacy and provide analytical tools without presupposing mathematical background. Model building, collective goods, unanimity and the social contract, voting rules, paradoxes and impossibility theorems, stability, individual liberty and decentralization, strategic manipulation representation, vote trading.

**201B. Theory of Collective Choice.** Seminar, three hours. Recommended (but not prerequisite) for political science students: course 201A. Open to any student of politics, economics, philosophy, or mathematics with ability for deductive reasoning. Introduction to abstract, deductive study of voting systems and other collective-choice processes. Axiomatic method applied to politics and political economy, concept of rationality, and agenda control, choice-set or solution concepts.

**202. Mathematics for Political Science.** Lecture, three hours. Prerequisite: working knowledge of high school algebra. Survey of mathematical methods useful in political science. Topics include differential and integral calculus, differential equations, optimization, and linear algebra.

**203A. Economic Theory and Methods for Political Science I.** Discussion, three hours. Prerequisite: knowledge of elementary calculus. Introduction to techniques of economic analysis and survey of major topics in formal political economy. Investigation of models of regulation, trade protection, collective bargaining, and economic growth as time permits.

**203B. Economic Theory and Methods for Political Science II.** Discussion, three hours. Prerequisite: course 203A. Continuing survey of microeconomic techniques used in formal political science, with focus on market failures and on modeling individual choice in nonmarket situations. Specific topics include externalities, public goods and allocation mechanisms, collective action, spatial models, structure-induced equilibrium, and information asymmetries.

**204. Game Theory in Politics.** Seminar, three hours. Survey of game theory, with emphasis on utilizing mathematical models to understand political and economic phenomena. Applications concern political participation, public goods, legislatures, industrial regulation, bureaucracies, interest groups, and party competition. Designed to help students become informed consumers of game-theoretical literature in political science.

**M208A. Game Theory.** (Same as Economics M214B and Mathematics M261.) Lecture, three hours. Prerequisite: graduate standing in mathematics or consent of instructor. Bargaining theory, the core, the value, other solution concepts. Applications to oligopoly, general exchange and production economies, and allocation of joint costs. S/U or letter grading.

**M208B. Topics in Applied Game Theory.** (Same as Economics M215.) Lecture, three hours. Prerequisites: calculus or introductory probability, and graduate standing in economics or consent of instructor. Survey and applications of major solution concepts to models of bargaining, oligopoly, cost allocation, and voting power. S/U or letter grading.

**M208D. Multivariate Analysis with Latent Variables.** (Same as Psychology M257.) Lecture, three hours. Prerequisite: consent of instructor. Introduction to models and methods for analysis of data hypothesized to be generated by unmeasured latent variables, including latent variable analogues of traditional methods in multivariate analysis. Causal modeling: theory testing via analysis of moment structures. Measurement models such as confirmatory, higher-order, and structured-means factor analytic models. Structural equation models, including path and simultaneous equation models. Parameter estimation, hypothesis testing, and other statistical issues. Computer implementation. Applications.

**M208E. Bayesian Econometrics.** (Same as Economics M232A.) Lecture, three hours. Prerequisites: Economics 231A, 231B. Subjective probability, introduction to decision theory, Bayesian analysis of regression, sensitivity analysis, simplification of models, criticism. S/U or letter grading.

**209. Special Topics in Formal Theory and Quantitative Methods.** Seminar, three hours.

### Political Theory

**210A-210B. Introduction to Political Theory.** Lecture, three hours. Exploration of major texts and issues in political theory. **210A.** Classical and Medieval Formulations from Plato through Aquinas; **210B.** Early Modern Period from Machiavelli through the Enlightenment.

**M211. Morality of Capitalism.** (Same as Management M293B.) Lecture, three hours. Prerequisite: consent of instructor. Examination of major philosophical writings that defend or criticize capitalism on basis of principles of right conduct and just social arrangements (i.e., on moral grounds).

**212. Seminar: Political Theory.** Discussion, three hours.

**213. The Bible as Political Theory.** Seminar, three hours. Examination of the Bible as a political document. Particular attention to concepts which have played an essential part in Western political thought (i.e., covenant, charisma, history, law, states of nature, human nature, and the state).

**C217. Selected Texts in Political Theory.** Discussion, three hours. Critical examination of major texts in political theory, with particular attention to their philosophic system, their relations to contemporary political and intellectual currents, and importance of the system for present-day political analysis. May be concurrently scheduled with course C197A.

**C218. Selected Topics in Political Theory.** Discussion, three hours. Critical examination of a major problem in political theory. May be concurrently scheduled with course C197A.

**219. Workshop: Political Theory.** Discussion, three hours.

## International Relations

**220. International Relations Theory.** Discussion, three hours. Approaches to and central problems of international relations theory.

**C221. Advanced International Relations Theory.** Discussion, three hours. Introduction to contemporary problems in international relations theory. May be concurrently scheduled with course C197B.

**222. Seminar: Strategic Interaction.** Seminar, three hours. A strategic move influences the other person's choice by affecting his expectations of how we will behave. Discussion of theories of deterrence, coercive diplomacy, crisis management, war termination, and negotiation. Use of various theoretical approaches to explaining strategic interaction, including psychology, bargaining theory, and game theory.

**C223. Politics and Strategies of Modern War.** Seminar, three hours. Analysis of various national security problems in both their military/technical and political dimensions. May be concurrently scheduled with course C197B.

**225. American Foreign Policy.** Discussion, three hours. Discussion of approaches used to explain foreign policy-making at individual, small group, bureaucratic, and domestic politics levels. Application to selected cases in American foreign policy.

**C226. The Making of American Foreign Policy.** Seminar, three hours. Intensive analysis of policy formulation process and substance of selected contemporary problems in foreign policy. Political and institutional factors affecting foreign policies; analysis of policy options. May be concurrently scheduled with course C197B.

**C227. Foreign Policy Process.** Discussion, three hours. Prerequisites: courses 120 and 220, or consent of instructor. Political science and policy science approaches to national foreign policy process, with primary focus on formulation and implementation of American foreign policy. May be concurrently scheduled with course C197B.

**230. Contending Perspectives on International Political Economy.** Discussion, three hours. Survey of various theoretical approaches to international political economy.

**231. International Political Economy I.** Seminar, three hours. Interaction between international trade and investment and domestic political economics of both industrialized and industrializing societies.

**232. International Political Economy II.** Seminar, three hours. Designed to develop Ph.D. students' skills in setting up and solving simple institutional design, political economy macro, signaling, and participation models, as well as two-level game models of domestic politics and international conflict and cooperation, with emphasis on applications in international political economy and comparative politics.

**233A-233B-233C. Political Economy Workshops (0 units, 0 units, 12 units).** Discussion, two hours. Open only to graduate students who have successfully completed major field examinations. Workshop for students writing or preparing to write dissertations. Reading and discussion of research in progress presented by UCLA faculty, visiting scholars, and advanced graduate students. Research paper of publishable length and quality required. In Progress grading.

**234A-234B-234C. Workshops: National Security, Foreign Policy, and International Relations (0 units, 0 units, 12 units).** Discussion, two hours. Course 234A is prerequisite to 234B, which is prerequisite to 234C. Courses must be taken in sequence. Open to graduate students who have successfully completed major examinations and intended for students preparing for or working on dissertations. Reading and discussion of research in progress presented by UCLA faculty, visiting scholars, and advanced graduate students. Major research paper required. In Progress grading.

**C239. Selected Topics in International Relations.** Discussion, three hours. May be concurrently scheduled with course C197B.

## Comparative Politics

**240. Comparative Politics.** (Formerly numbered 240A-240B.) Discussion, three hours. Approaches to study of comparative politics and problems of comparative political analysis.

**C241. African Politics.** Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

**C242. Chinese and East Asian Politics.** Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

**C243. Japanese and Western Pacific Politics.** Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

**C244. Latin American Politics.** Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

**C245. Middle Eastern Politics.** Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

**C246A. Western European Politics.** (Formerly numbered C250A.) Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

**246B. Political Development of Modern Europe.** (Formerly numbered 250B.) Seminar, three hours; discussion, one hour (optional). Principal phases of political development from high feudalism to the present, together with theories of causation.

**C247. Politics of the Soviet Union and Post-Soviet Region.** Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

**247A. Evolution of Soviet and Russian Politics.** Seminar, three hours; discussion, one hour (optional). Discussion seminar surveying political evolution of Soviet Union and its transformation.

**C247B. Domestic Context of Russian Foreign Policy.** Seminar, three hours; discussion, one hour (optional). Examination of domestic social, political, bureaucratic, and organizational sources of Russian foreign and strategic policy. May be concurrently scheduled with course C197B.

**C248. South Asian Politics.** Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

**251. Political Economy of Structural Adjustment.** Discussion, three hours. Some familiarity with economics helpful. Principal arguments for structural adjustment (trade and economic liberalization) and consideration of political issues that arise from this process.

**252. Parties and Party Systems.** (Formerly numbered 252A.) Seminar, three hours; discussion, one hour (optional). Theories and practices of political parties, party systems, and elections in comparative perspective.

**253. Political Change in Communist Systems.** Discussion, three hours. Examination of political context and consequences of structural reform in Communist systems; theories of post-Leninist political pluralization and convergence.

**254A-254B. Institutions and Comparative Politics.** Seminar, three hours; discussion, one hour (optional):

**254A. Comparative Institutional Analysis.** Use of advances of rational choice theory and new institutionalism to compare and analyze major institutional structures, including presidentialism vs. parliamentarism, unicameralism vs. bicameralism, two-party vs. multiparty systems, cadre vs. mass parties, and plurality vs. proportional electoral systems.

**254B. Political Institutions, Delegation, and Policy-Making.** Analysis of political foundations of policy-making. Characterization of democratic institutions as a series of delegations, from voters to elected officials, within parties and legislatures, and from elected politicians to unelected bureaucrats. Examination of implications of different institutional designs for how those delegations are made and controlled.

**255. Seminar: Political Change.** Seminar, three hours. Interdisciplinary seminar directed toward comparative analysis of political development and modernization.

**256. External Sources of Domestic Politics.** Discussion, three hours. Theoretical and historical studies of impact of war and trade on domestic cleavages, policy, and institutions.

**257. Labor and Working-Class Politics.** Discussion, three hours. Questions and topics on comparative labor and working-class politics.

**258. Seminar: Political Violence.** Seminar, three hours. Empirical theory and research on causes, processes, and outcomes of violent social conflict, including mass political protest, riot, revolt, terrorism, and revolution.

**259. Selected Topics in Comparative Politics.** Discussion, three hours. Critical examination of a major problem in comparative politics.

## American Politics

**260A. Survey Course in American Politics: Political Parties and the Electoral Process.** Discussion, three hours.

**260B. Survey Course in American Politics: American Political Institutions.** Discussion, three hours.

**M261A. Proseminar: Political Psychology.** (Same as History M236A and Psychology M228A.) Discussion, three hours. Introduction to political psychology: psychobiography, personality and politics, mass attitudes, group conflict, political communication, and elite decision making.

**C261B. Mass Attitudes and Political Behavior.** Discussion, three hours. Prerequisite: course 141B or 260A or consent of instructor. Analysis of development and change of political attitudes in mass publics and their relationship to voting, protest, and violence. May be concurrently scheduled with course C197C.

**261C. Political Communication.** Discussion, three hours. Broad survey of research bearing on role of mass media in the American political process. Topics include theories of persuasion, evolution of "media effects" research, reporting and advertising as determinants of election outcomes, adversarial versus deferential journalism, and analyses of media bias.

**M261D. Seminar: Political Psychology.** (Same as Psychology M228B.) Discussion, three hours. Prerequisite: course M261A or Psychology 220A or consent of instructor. Examination of political behavior, political socialization, racial conflict, mass political movements, and public opinion.

**M261E. Critical Problems in Political Psychology.** (Same as Psychology M228C.) Discussion, three hours.

**C262. Political Parties.** Discussion, three hours. Critical examination of literature on party systems and organization. Special attention to political functions, electoral campaigns, and party cadres. May be concurrently scheduled with course C197C.

**C264. Politics and Society.** Discussion, three hours. Application of selected classical and contemporary sociological theories to politics. May be concurrently scheduled with course C197C.

**265. Politics and Economy.** Discussion, three hours. Analysis of theoretical and practical relationships between economic organization and governmental institutions. Development and political implications of the market system, banking and finance, corporate enterprise, and organized labor.

**266. Group Theories of Politics.** Discussion, three hours. Critical appraisal of "group theory" approaches to study of political decision making, with special attention to empirical research problems and findings.

**268. Seminar: Political and Electoral Problems.** Seminar, three hours. Prerequisites: two graduate courses in politics.

**269. Seminar: Political Behavior.** Seminar, three hours.

**C270. Legislative Behavior.** Discussion, three hours. Analysis of major approaches to study of representative institutions, with special emphasis on assumptions, concepts, methods, and theoretical implications associated with each approach. May be concurrently scheduled with course C197C.

**C271. Executive Politics and the Presidency.** Discussion, three hours. Analysis of executive organization and leadership, with emphasis on the American Presidency. Special attention to theories of organization and personality and relationship between the executive and other institutions and groups. May be concurrently scheduled with course C197C.

**272. Political Environment of the Federal Executive.** Discussion, three hours. Examination of political environment of the federal executive in the U.S. Special attention to executive/legislative relations.

**273. American Political Development.** Discussion, three hours. National political institutions in historical perspective, theories of state building, state societal relations, political culture.

**275. Seminar: American Political Institutions.** Seminar, three hours.

**C279. Seminar: Public Law.** Discussion, three hours. May be concurrently scheduled with course C197C.

**C280. Organization Theory Approaches to Organizational Analysis.** Discussion, three hours. Analysis of several major conceptual alternatives for study of organizations, with emphasis on public administrative organizations. Topics include structural/functional and systemic approaches to organization, rational-choice models, and social psychological analyses. Each alternative critically evaluated for its strengths and weaknesses as guide to understanding organizational analysis. May be concurrently scheduled with course C197C.

**C281. Public Policy Studies.** Discussion, three hours. Systematic analysis of nature and scope of public policy and its programmatic implications. Special emphasis on government organizations and process, as well as types of government intervention and stages of the policy process. Substantive focus primarily on American public policy and analysis. May be concurrently scheduled with course C197C.

**C283. Seminar: Public Organization and Policy.** Seminar, three hours. May be concurrently scheduled with course C197C.

**284. Seminar: Bureaucracy and Organization.** Discussion, three hours. Prerequisite: consent of instructor. Exploration of topics in analysis of public and private bureaucracies and organizational theory. Topics include empirical theories of bureaucratic behavior; bureaucratic growth; bureaucratic behavior and political culture; organizational structures and strategies; and function of the executive.

### Special Studies

With consent, credit may be applied toward any field.

**290. Modern Political Economy.** Discussion, three hours. Discussion of implications for understanding politics of the thinking of politicians, bureaucrats, producers, consumers, and nations as utility maximizers. Topics include microfoundations for macromodels, forms of political participation, the state, government regulation, growth of government, bureaucracy elections, public policy, inflation.

**M291A-M291B. Social Theory and Comparative History.** (Same as History M203A-M203B and Sociology M296A-M296B.) Colloquium, three and one-half hours every other week. Introduction to historically rooted social theory and theoretically sensitive history, following the program of the Center for Social Theory and Comparative History. Each course may be taken independently for credit.

**292A-292B. Introduction to Political Inquiry.** Seminar, three hours; discussion, one hour (optional). **292A.** Problems of Scientific Inquiry and Normative Discourse; **292B.** Research Design. Requirement: course 292A. Major conceptual frameworks and approaches to political science.

**293. Terrorism.** Discussion, three hours. Analysis of the concept, relationship of terrorism to other forms of violence, history of the phenomena, various forms, and costs.

**294. Religion, Revolution, and Violence.** Discussion, three hours. Critical examination of various accounts of religion as a revolutionary and conservative force. Special attention to millenarianism and revolution and to the revealed religions, Christianity, Judaism, and Islam.

**295. Comparative Fundamentalism.** Discussion, three hours. Study of political meaning of the fundamentalist phenomena in various religions, especially Christianity, Judaism, and Islam.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching Political Science.** Workshop in teaching techniques, including evaluation of each student's own performance as a teaching assistant. Normally to be taken by all new teaching assistants in first term of their assistantships. May be taken only in term in which students are teaching assistants. May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study or Research (2 to 4 units).** May be applied only three times toward minimum course requirement in first two years. May be repeated.

**597. Preparation for Ph.D. Qualifying Examinations (2 to 12 units).** May be repeated. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation (2 to 12 units).** May be repeated. S/U grading.

### Professors of Clinical Psychiatry

John R. Elpers, M.D.  
 Marvin Karno, M.D.  
 Andrew T. Russell, M.D.  
 William C. Wirshing, M.D.

### Associate Professors of Clinical Psychiatry

Vivien K. Burt, M.D., Ph.D.  
 Charles S. Grob, M.D.  
 James E. Spar, M.D.

### Lecturers

Veronica D. Abney, M.S.W.  
 James C. Allen, M.A.  
 Linda A. Andron, M.S.W.  
 Barbara A. Bass, M.S.W.  
 Joan Blum, M.A., M.F.C.C.  
 Laurel Brodsley, R.N., Ph.D., M.P.H.  
 Angela Farrell, M.S.W.  
 David J. Fisher, Ph.D.  
 Marcy Gitlin, L.C.S.W.  
 Laurie Goodman, M.P.H.  
 Joan Gordon, L.C.S.W.  
 Susan Henderson, L.C.S.W.  
 Joan E. Johnson, M.S.W.  
 Judy Kann, L.C.S.W.  
 David T.A. Kaplan, M.S.W.  
 Ronnie Kaye, M.A., M.F.C.C.  
 Barbara Korne, M.S.W., L.C.S.W.  
 David Myler, Jr., M.Div.  
 Janice Roper, R.N., Ph.D.  
 Naomi Siegel, L.C.S.W.  
 Richard Thor, L.C.S.W.  
 Ruth Wathe, L.C.S.W.

### Adjunct, Visiting, and Clinical Professors

Jambur V. Ananth, M.D., *Adjunct*  
 Christiane A.M. Baltaxe, Ph.D., *Adjunct*  
 Cyril Barnert, M.D., *Clinical*  
 Lewis R. Baxter, M.D., *Adjunct*  
 Stephen Berman, M.S.W., A.C.S.W., *Clinical*  
 Annette M. Brodsky, Ph.D., *Adjunct*  
 Warren S. Brown, Ph.D., *Adjunct*  
 Jeri Doane, Ph.D., *Clinical*  
 Calvin J. Frederick, Ph.D., *Adjunct*  
 Michael Gitlin, M.D., *Clinical*  
 Irene T. Goldenberg, Ed.D., *Adjunct*  
 Christoph M. Heinicke, Ph.D., *Adjunct*  
 Behnaz Jalali, M.D., *Clinical*  
 Boyd Krout, M.D., *Visiting*  
 Walter Ling, M.D., *Clinical*  
 James F. McGinnis, Ph.D., *Adjunct*  
 James G. Miller, M.D., Ph.D., *Adjunct*  
 Armando Morales, D.S.W., *Adjunct*  
 Bruce Naliboff, Ph.D., *Clinical*  
 Mary J. O'Connor, Ph.D., *Adjunct*  
 Michel Philippart, M.D., *Adjunct*

H. Rebecca Rausch, Ph.D., *Adjunct*  
 Kiki V. Roe, Ph.D., *Adjunct*  
 Iraj Siassi, M.D., *Adjunct*  
 Robert Weinstock, M.D., *Clinical*  
 Jeffery N. Wilkins, M.D., *Adjunct*  
 Boghos I. Yerevanian, M.D., *Clinical*

### Adjunct, Visiting, and Clinical Associate Professors

James R. Boulter, Ph.D., *Visiting*  
 Leslie A. Brothers, M.D., *Clinical*  
 Alexander Bystritsky, M.D., Ph.D., *Clinical*  
 V. Charles Charuvastra, M.D., *Adjunct*  
 Freda K. Cheung, Ph.D., *Clinical*

## Scope and Objectives

The Department of Psychiatry and Biobehavioral Sciences offers interdisciplinary courses related to the mental health professions of the biobehavioral sciences in addition to its programs for psychiatry interns and residents and for medical students (courses for medical students are listed in the *Announcement of the UCLA School of Medicine* and the *School of Medicine Handbook of Clinical Courses*).

Enrollment in department courses is limited to registered UCLA students, students registered in programs officially affiliated with UCLA, and students enrolled concurrently through UCLA Extension. Students who meet these requirements, but who are not affiliated with a departmental training program, must also meet required course requisites determined by specific educational programs. Additional information is available from the department office.

## Developmental Disabilities Immersion Program

The Developmental Disabilities Immersion Program (DDIP) is cosponsored by the Department of Psychology, the Department of Psychiatry and Biobehavioral Sciences, and the Office of Instructional Development — Field Studies Development. Each year a group of 30 students is selected for the program which runs during Winter/Spring Quarters. Students participate in courses, fieldwork, and research at selected University and community facilities serving persons with developmental disabilities. Required courses include Psychology/Psychiatry M180A, M180B, M181A-M181B. Students also take other courses related to developmental disabilities. Many of the courses fulfill psychology undergraduate major requirements. Student individualized research projects are also part of the immersion experience. Students interested in the program should contact the Office of Instructional Development — Field Studies Development (80 Powell Library) or the Psychology Undergraduate Advising Office (1531 Franz Hall).

## Clinical Psychology Internship

The department offers a 12-month Clinical Psychology Internship, which is a Graduate Division certificate program. Students enrolled in clinical psychology programs at APA-approved universities are eligible to apply. Applications are accepted through December 1. The primary goals of the internship are to provide a year of intensive exposure to a wide variety of clinical and human services experiences and to maximize the personal growth of each professional. Students interested in this certificate program should contact the Psychology

Internship Training Office, 68-251 NPI&H (310-825-0122).

Information on clinical practicums which are offered in conjunction with other educational institutions and UCLA departments may be obtained from the department office.

## Psychiatry and Biobehavioral Sciences

### Lower Division Course

**88. Lower Division Seminar: Special Topics in Psychiatry and Biobehavioral Sciences.** Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in psychiatry and biobehavioral sciences approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

### Upper Division Courses

**M112. Laboratory for Naturalistic Observations: Developing Skills and Techniques.** (Same as Anthropology M136Q.) Prerequisite: consent of instructor. Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Group and individual projects. Discussion of some of the uses of observations and their implications for research in social sciences.

**M180A. Contemporary Problems in Mental Retardation.** (Same as Psychology M180A.) Prerequisites: Psychology 10, 41, and 127 or 130. Corequisites: courses M181A-M181B. Limited to Immersion Program students. Presentation of concepts, issues, and research techniques in the area of mental retardation. Biological, psychological, and community questions concerning causes and treatment of developmental disabilities, as well as systems for care and training of retarded individuals. Lectures, directed reading, and discussion.

**M180B. Contemporary Issues in Mental Retardation.** (Same as Psychology M180B.) Prerequisite: course M180A. Limited to Immersion Program students. Psychoeducational issues in mental retardation relating literature to ongoing field experiences through lectures, discussions, media, and six student papers.

**M181A-M181B. Research in Contemporary Problems in Mental Retardation.** (Same as Psychology M181A-M181B.) Corequisites: courses M180A, M180B. Research experience. In Progress grading.

**185. Social Psychology of Urban Student Education (6 units).** Lecture, 90 minutes; discussion, 90 minutes; fieldwork, six to eight hours. Designed for juniors/seniors. Students interested in study of urban youth and their education acquire comprehensive and first-hand knowledge of factors affecting these students' achievement. Field study component requires students to intern with youth in schools and after-school programs. P/NP or letter grading.

**M190. Ethology: Physiology of Behavior and Learning in Animals.** (Same as Psychology M119J.) Prerequisites: Psychology 115, junior standing. Basic course for undergraduate students which integrates systematic overview of common forms of behavioral plasticity and standard training procedures in laboratory animals (in behavioral, neurophysiological, and pharmacological studies) with broad biological, evolutionary perspective.

**M191. Biological Bases of Psychiatric Disorders.** (Formerly numbered 191.) (Same as Molecular, Cell, and Developmental Biology M191, Neuroscience M130, Physiological Science M181, and Psychology M117J.) Requisite: Molecular, Cell, and Developmental Biology 171 or Neuroscience M101A or Physiological Science 111A or Psychology 115. Underlying brain systems involved in psychiatric syndromes and neurological disorders, including schizophrenia, depression, bipolar disorders, obsessive/compulsive disorder, eating disorders. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments.

**M192A. Health Outreach Issues and Interventions for At-Risk Populations: Prefield Course.** (Same as Medicine M190A.) Lecture, two hours; discussion, two hours; possible field observations. Preparation: application and interview. First in series of courses to explore prevention of disease in at-risk populations, clinical services for disadvantaged, medical and psychological issues of homelessness, and effects of low socioeconomic status on parenting. Lectures from expert faculty and practitioners in the field, with visits to shelters and facilities where homeless are provided with health care. P/NP or letter grading.

**M192B. Field Studies Seminar: Health Outreach Issues and Interventions (2 or 4 units).** (Same as Medicine M190B.) Discussion, two hours; fieldwork, three to four hours (two-unit course) or six to eight hours (four-unit course). Requisite: course M192A. Dynamics of multidisciplinary approaches to preventive health education for at-risk populations by student delivery of needed services to homeless families, under supervision of professional staff. P/NP or letter grading.

**199. Special Studies in Psychiatry (2 to 4 units).** Prerequisite: consent of instructor and department chair, based on written proposal outlining course of study (to be structured by instructor and student at time of initial enrollment). Additional information and course proposal forms are available in Office of Education, C8-202 NPI&H.

**199HA-199HB-199HC. Special Studies in Psychiatry.** Research, 12 hours. Prerequisites: honors student standing, consent of instructor and department based on written proposal outlining course of study (to be structured by instructor and student at time of initial enrollment). In Progress grading.

## Graduate Courses

**M203. Molecular Neurobiology.** (Same as Neuroscience M203.) Lecture, three hours; discussion, one hour. Prerequisites: Biological Chemistry 201A-201B or equivalent, basic biochemistry, consent of instructor. Introduction to neurochemistry for neuroscience students. Topics include protein structure and function, lipid structure and metabolism, nucleic acids/molecular biology.

**M204. Cellular and Molecular Developmental Neurobiology.** (Same as Neurobiology M204, Neuroscience M204, and Physiology M204.) Lecture, three hours; discussion, one hour. Prerequisites: Neuroscience M201, M202, and M203, or Biological Chemistry 201A-201B, or consent of instructor. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging.

**207A-207B-207C. Hypnosis Seminars (2 units each).** Prerequisite: psychology intern, psychiatry resident, member of (or trainee in) one of the licensed mental health professions, or consent of instructor. Experiential seminar intended to prepare mental health professionals for clinical applications, involving didactics, demonstration, practice, and feedback. Following training in inductions and development of classic hypnotic phenomena (e.g., age regression, hypnoanesthesia), focus on psychotherapeutic applications, including direct symptom removal, behavioral methods, and hypnoanalysis. Emphasis on developing skill for application in clinical practice. S/U grading.

**208A-208B-208C. Clinical Neuropsychology (2 units each).** Lecture, 90 minutes. Prerequisites: graduate or postgraduate standing, consent of instructor. Introduction and review of neuropsychological concepts, including functional neuroanatomical systems of the brain, analytic and synthetic activities of the brain, effects of generalized and focal brain impairment on behavior, and introduction to use of neuropsychological test instruments.

**M210. Seminar: Psychocultural Studies.** (Same as Anthropology M234.) Seminar, three hours. Devoted to present state of research in psychocultural studies. Survey of work in child development and socialization, personality, psychobiology, transcultural psychiatry, deviance, learning, perception, cognition, and psychocultural perspectives on change.

**M213. The Individual in Culture.** (Formerly numbered M213A-M213B.) (Same as Anthropology M235.) Seminar, three hours. Prerequisite: graduate standing.

**M214. Cross-Cultural Studies of Socialization and Children.** (Same as Anthropology M236P.) Seminar, three hours. Selected topics in cross-cultural study of socialization and child training. Methods, ethnographic data, and theoretical orientations. Emphasis on current research.

**M215. Culture, Adaptation, and Intervention.** (Same as Anthropology M235S.) Prerequisite: graduate standing. Role of ecological, social, and cultural influences on family adaptation, child competence, and interventions, including theory, empirical research, and applied/policy topics. Review and critique of current research in this field.

**M221. Cellular and Molecular Neurochemistry.** (Same as Biological Chemistry M221, Neurobiology M221, Neuroscience M240, and Pharmacology M221.) Lecture, three hours; discussion, one hour. Prerequisite: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling. S/U or letter grading.

**M222. Transcultural Psychiatry.** (Same as Anthropology M234P.) Lecture, three hours. Prerequisite: consent of instructor. Consideration of psychiatric topics in cross-cultural perspective, such as studies of drug use, deviance, suicide, homicide, behavioral disorders, "culture specific" syndromes, non-Western psychiatries, and questions of "sick" societies. May be repeated for credit.

**223A-223B-223C. MMPI Seminars and Case Conferences (2 units each).** Prerequisite: psychology intern, psychiatry resident, or consent of instructor. Seminar and case conference on interpretation of Minnesota Multiphasic Personality Inventory (MMPI) — theory, principles, and research into personality types.

**226A-226B. Childhood Psychopathology Research Seminars (2 units each).** Seminar, 90 minutes. Current research in causes and behavioral manifestations of childhood psychopathology. Discussion on diagnosis and etiology of childhood disturbances.

**M231. Hispanic Mental Health Issues and Treatment (2 units).** (Formerly numbered 231.) (Same as Social Welfare M203E.) Mental health issues and needs of Hispanics through seminars and videotapes dealing with historical comparison of psychiatry in Mexico and the U.S., analysis of various theoretical perspectives regarding biopsychosocial behavior; distinguishing psychodynamic from cultural factors in treatment of Spanish-speaking patients; treatment of Hispanic families, couples, undocumented persons, and criminal justice system clientele.

**M232. Causal Inference.** ( Same as Biostatistics M235.) Lecture, three hours; discussion, one hour. Requisite: Biostatistics 200A. Selection bias, confounding, ecological paradox, contributions of Fisher and Neyman. Rubin model for causal inference, propensity scores. Analysis of clinical trials with noncompliance. Addressing confounding in longitudinal studies. Path analysis, structural equation, and graphical models. Decision making when causality is disputed.

**M234. Affective Disorders (2 or 4 units).** (Same as Psychology M280.) Seminar, two hours. General topics related to primary affective disorders (depression, manic depressive illness), including diagnosis, pharmacology, epidemiology, psychology, phenomenology, biology, and treatment. Students enrolled for four units are assigned a more intensive reading list and required to make a presentation or prepare a research paper.

**M235. Laboratory for Naturalistic Observations: Developing Skills and Techniques.** (Same as Anthropology M236Q, Education M222A, and Psychology M295.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some uses of observations and their implications for research in social sciences. Students expected to integrate observational work into their current research interests.

**236A-236B-236C. Psychology Interns Seminars (1 unit each).** Seminar, 90 minutes. Current topics in clinical psychology. Group-selected topics for discussion pertaining to psychopathology, diagnostic evaluation, and modalities of treatment. S/U grading.

**237. Seminar: Behavioral Neuroimmunology (1 unit).** Seminar, one hour per month; discussion, 30 minutes per month. Series of lectures presented the second Wednesday of each month throughout academic year by invited speakers. S/U grading.

**M238. Survey Research Techniques in Psychocultural Studies.** (Formerly numbered 238.) (Same as Psychology M238.) Seminar, three hours. Designed for graduate students. Techniques for conceptualizing, conducting, and analyzing survey data; instruction in qualitative strategies for enhancing survey research on psychocultural problems.

**M240. Assessment and Treatment of African American Families.** (Same as Afro-American Studies M240.) Seminar, three hours. Designed for graduate students. Course aids mental health professionals and trainees in evaluation and treatment of African American families in terms of their cultural milieu, historical background, and economic status. Didactic presentations by instructor and invited guests form basis for supervised evaluation and case management with an African American child and family.

**242. Parent and Child Psychotherapy Seminar (1 unit).** Prerequisites: current experience in psychoanalytically oriented child psychotherapy, consent of instructor. Seminar meets throughout year. During Summer Quarter emphasis on initial clinical and research evaluation as well as early treatment of the child and family. During Fall, Winter, and Spring Quarters instructors use videotaped sessions and notes from their own clinical work to discuss such topics as diagnostic criteria, family system treatment formulations stressing work with parents and children, and such theoretical and technical issues as transference, resistance, overdetermined nature of symptoms, and termination. Student presentations encouraged in order to amplify clinical and theoretical issues and to become familiar with ongoing cases which are part of a systematic outcome study.

**243A-243B-243C. Mental Retardation and Chronic Medical Illness Interdisciplinary Core Curriculum (1 unit each).** Lecture, 90 minutes. Prerequisite: consent of instructor. Survey series on major topic areas of mental retardation and chronic medical illness, covering epidemiology, nosology, assessment, health care delivery systems, basic genetics, nutrition, direct care, and special deficits. Presented in interdisciplinary framework as generic information independent of discipline. S/U grading.

**M246. Psychological Aspects of Mental Retardation.** (Same as Psychology M246.) Lecture, 90 minutes. Discussion of psychological aspects of mental retardation, including classification, description, etiology, theory, prevention, treatment, assessment, modern and future developments, and input from other disciplines (ethics, law, religion, welfare systems).

**M249. Neurobiology of Sleep (3 units).** (Same as Neuroscience M259 and Psychology M296.) Lecture, one hour; discussion, two hours. Critical review of primary research publications concerning neural basis of sleep. Discussion of neural and biochemical control of REM and NREM sleep after reviewing sleep behavior and phenomenology, including developmental and comparative aspects. Presentation of relevant clinical phenomena. S/U or letter grading.

**M251. Mental Health Services.** (Same as Health Services M249J.) Lecture, three hours. Requisites: courses 200A-200B-200C. Designed for doctoral students. Survey of contemporary American delivery of health services to emotionally and mentally ill and retarded. Analysis of characteristics of such services, with historical background of their evolution and projections of their future prospects.

**253. Seminar: Child Development (1 unit).** Prerequisite: consent of instructor. Theories of development, systems of child development, and chronological aspects of child development. Presentation of assigned readings by students plays major role in each session.

**M254. Supporting Families of Children with Special Needs (2 units).** (Formerly numbered 254.) (Same as Social Welfare M203D.) Techniques and issues in counseling families through evaluation, feedback, and treatment. Social and psychological stresses on family unit, professional's reactions, community resources, and issues of genetic counseling, placement, and developmental crises. S/U grading.

**M255. Functional Organization of Behavior (2 units).** (Same as Neuroscience M255.) Prerequisite: consent of instructor. Changes in neuronal properties supporting changes in learned behavior. Different types of learning. Role of neurotransmitters and second messengers in changing ion channels of neurons to support associative learning versus long-term potentiation of neurotransmission. S/U or letter grading.

**256. Basic Clinical Child Psychopathology (1 unit).** Prerequisite: consent of instructor. Weekly seminar covering basic clinical aspects of child psychopathology. Readings provided for basis of discussion on topics including interviewing of parents and children, diagnosis, and related syndromes. S/U grading.

**257A-257B-257C. Communication Disorders Associated with Developmental Disabilities and Psychiatric Disorders (3 units each).** Laboratory, 90 minutes; didactic, 90 minutes. Didactic and practical training in communication and its dysfunction as these relate to language disabilities seen in interdisciplinary medical setting. Provides background for graduate and postdoctoral students who plan to engage in clinical work and/or clinical research in which language disturbances of childhood and adulthood are relevant.

**M258. Functional Neuropsychology.** (Same as Neuroscience M258.) Lecture, three hours. Preparation: basic neuroscience background. Designed for graduate students. Introduction to architecture and connections of primate brain, effects of focal lesions on cognition, physiological signs of synaptic activation underlying cognition (including ERPs, unit-activity, and metabolic measures), and functional neural models for cognition. S/U or letter grading.

**259. Legal and Ethical Issues with Vulnerable Populations (3 units).** Lecture, 90 minutes; laboratory, three and one-half hours. Discussion of current laws dealing with vulnerable populations (e.g., children, developmentally disabled people, elderly people); philosophies, ethics, ethical codes, issues, and how to resolve them. Use of videotapes and discussion of cases.

**260. The Chronically Medically Ill Child and Family.** Lecture, three hours; seminar, one hour. Examination from a biopsychological perspective of ramifications of chronic illness affecting lifestyle and development of the child and family, including examination of relevant theoretical models and research. Clinical application to assessment and intervention strategies.

**261. Advanced Seminar: Child and Adolescent Psychopharmacology (1 unit).** Use of problem-based teaching methods and critical reviews of medical literature as basis for rational pharmacotherapy in children and adolescents. Major focus on development of a clinical decision-making process, given the limited scientific evidence supporting pharmacological practice in the field. S/U grading.

**262A-262B-262C. Clinical Fieldwork in Developmental Disabilities and Chronic Illness (1 to 4 units each).** Prerequisites or corequisites: courses 243A-243B-243C, consent of instructor. Placement and supervision of clinical and consultation activities of interdisciplinary trainees in various community agencies, hospitals, or other related settings serving developmentally disabled or chronically medically ill children, youth, or adults. Supervision done jointly by community personnel on site, in collaboration with interdisciplinary faculty. S/U grading.

**264. Biofeedback, Relaxation, and Stress Management in Behavioral Medicine.** Seminar, three hours. Introduction to concepts and techniques of biofeedback, relaxation, stress management, and their applications, with emphasis on somatic disorders; hypertension and cardiovascular disorders, headache and other pain problems, gastrointestinal disorders, neuromuscular conditions, and cancer. Consideration of research and clinical issues.

**M266. Advanced Magnetic Resonance Imaging (2 units).** (Same as Biomedical Physics M266.) Starting with basic principles, presentation of physical basis of magnetic resonance imaging (MRI), with emphasis on developing advanced applications in biomedical imaging, including both structural and functional studies. Instruction more intuitive than mathematical.

**M270. Neural Basis of Memory.** (Same as Neuroscience M273.) Lecture, two hours; discussion, one hour. Anatomical, physiological, and neurological data integrated into models for how behavioral phenomena of memory arise. Discussion of invertebrate memory, cortical conditioning, hippocampus and declarative memory, and frontal lobes and primary memory.

**M272. Psychological Anthropology.** (Same as Anthropology M234Q.) Lecture, three hours. Prerequisite: consent of instructor. Various psychological issues in anthropology, both theoretical and methodological. Areas of interest include such things as culture and theory, culture and personality, and culture psychiatry. Discussion of questions relating to symbolic and unconsciousness process as they relate to culture. Topics vary from term to term. May be repeated for credit.

**M273. Advanced Seminar: Medical Anthropology.** (Same as Anthropology M263Q, Community Health Sciences M244, and Nursing M273.) Seminar, three hours. Prerequisite: consent of instructor. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works.

**275A-275B. Sociobiology Seminar (2 units each).** Prerequisite: consent of instructor. Review of sociological theory as it applies to adult bonding behavior: kin-selection theory, reciprocal altruism theory, mate selection theory, and bond strategy theory. Bonds viewed primarily from biological rather than psychological perspective. In Progress grading.

**276. Neurocognitive Plasticity in Adults (3 units).** Critical examination at multiple levels of brain function changes with aging — from structural changes at cellular, neurochemical, neuroanatomical, and neurophysiological levels on one hand to functional changes in sensory, motor, mnemonic, and intellectual abilities at other. Evaluation of behavioral, pharmacological, and transplantation techniques to enhance or restore function.

**M277. Cognitive Behavior Therapy with Children: Treatment and Systems of Care (2 or 4 units).** (Same as Psychology M285.) Seminar, 90 minutes. Prerequisites: graduate standing, consent of instructor. Cognitive/behavioral approaches to prevention and treatment of mental health problems in children. Examination of service delivery systems for treating troubled youth and discussion of issues with respect to current systems of care. Major problems include conduct disorders, attention deficit disorder, depression, anxiety, and learning disabilities.

**M279A. Seminar: Human Behavioral Ecology.** (Same as Anthropology M229A and Education M281A.) Seminar, one hour; discussion, three hours. Prerequisite: consent of instructor. Examination of predictive models from animal behavioral ecology used to study human diet and subsistence; settlement patterns and territoriality; sharing and helping; reproduction and mortality. Comparison with other economic and ecological approaches in anthropology.

**M279B. Seminar: Reproduction, Families, and Parenting.** (Same as Anthropology M229B and Education M281B.) Prerequisite: consent of instructor. Guided forum for graduate students to discuss and broaden their studies of human reproduction and child rearing from varied viewpoints. Representation and debate of theories, questions, and methods from social and biological sciences.

**M279C. Seminar: Selected Topics in Human Ethology.** (Same as Anthropology M229C and Education M281C.) Seminar, one hour; discussion, three hours. Prerequisite: consent of instructor. Consideration of appropriateness and contributions of using animal behavior methodology in study of human behavior. Analysis: describing and recording behavior; causation; development, especially longitudinal studies; adaptation; evolutionary origins.

**M280. Politics of Reproduction.** (Same as Anthropology M269P.) Seminar, three hours. Examination of various ways that power, as it is structured and enacted in everyday activities, shapes human reproductive behavior. Case materials from diverse cultures illuminate how competing interests within households, communities, states, and institutions influence reproductive arrangements in society.

**281. Behavioral Therapy in an Educational Setting.** Lecture, one hour; laboratory, six to 10 hours. Prerequisite: consent of instructor. Supervised experience in classroom working with exceptional children. Theoretical background furnished through one-hour weekly lecture.

**M282. Anthropology of Human Body.** (Same as Anthropology M234T.) Seminar, three hours. Exploration of how sociocultural and political dynamics shape perceptions of and understandings about the human body, and how, reciprocally, those perceptions and understandings influence social processes. Includes materials from both non-Western and Western societies.

**M285. Functional Neuroimaging: Techniques and Applications (3 units).** (Same as Biomedical Physics M285.) Seminar, two hours. In-depth examination of activation imaging, including PET and MRI methods, data acquisition and analysis, experimental design, and results obtained thus far in human systems. Strong focus on understanding technologies, how to design activation imaging paradigms, and how to interpret results. Laboratory visits and design and implementation of a functional MRI experiment. S/U grading.

**M286A-M286B-M286C. Statistics in Psychiatric and Biobehavioral Research (2 units each).** ( Same as Biostatistics M206A-M206B-M206C.) Seminar, 90 minutes. Requisite: Biostatistics 100B. Designed for graduate students. Examples from psychiatric literature used to illustrate statistical ideas and analysis strategies. Topics include experimental designs, sample size calculations, parametric versus nonparametric tests, regression, ANOVA, factor analysis, defining composite variables, causal inference. Computer used to illustrate basic data analysis. S/U or letter grading.

**M289. Intervention to Reduce HIV and Its Consequences.** (Same as Community Health Sciences M299.) Lecture, three hours. Examination of interventions to reduce HIV/AIDS transmission. Review of theory and research supporting efficacy of HIV interventions for a variety of high-risk populations.

**295A-295B-295C. Advanced Seminars: Substantive Issues in Substance Abuse I, II, III (2 units each).** Prerequisite: consent of instructor. S/U grading:

**295A.** Neurobiology and psychopharmacology of drug abuse, as well as epidemiology and prevention. Discussion of pros and cons of various treatment modalities for drug dependence.

**295B.** Drug use patterns and treatment issues in specific populations such as women, adolescents, the homeless, the multiply diagnosed, as well as different ethnic populations. Exploration of relationship between drug abuse, sexuality, and HIV/AIDS.

**295C.** Theoretical perspectives on drug use and abuse as well as policy and ethical aspects of drug abuse research. Research design and analysis issues pertinent to drug abuse research.

**298. Current Topics in Biobehavioral Sciences (1 to 4 units).** Prerequisite: consent of instructor. Current issues in biobehavioral sciences offered on selective basis depending on instructor interest and topical relevancy of problems. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit.

**402. Journal Club (1 unit).** Seminar, two hours; outside study, two hours. Prerequisite: consent of instructor. Presentation of participants' current research. Critical review of recent articles on drug abuse. Training sessions included in areas in which fellows believe they have a recognized need. S/U grading.

**403. Individual Case Supervision (1 to 4 units).** Prerequisite: consent of instructor and department chair (based on written proposal to be structured by instructor and student prior to enrollment; additional information and proposal forms available in Office of Education, C8-202 NPI&H). One-to-one supervision of individual therapy cases, including analyses of patient data, supervision of ongoing treatment, informal didactic sessions on personality theory, and applications to patient management.

**414. Emergency Treatment Attending Rounds (1 unit).** Prerequisites: assignment to Emergency Treatment Unit, consent of instructor. Cases seen in emergency room during preceding night, reviewed by a consultant and emergency treatment staff. Exploration of assessment techniques, methods of intervention, and alternate modes of treatment.

**416. Treatment Planning Meetings (1 unit).** Prerequisite: consent of instructor. Treatment and management problems posed by inpatient psychiatry. Discussion of clinical psychopathology, treatment plans, and interdisciplinary skills. Emphasis on formulating accurate diagnostic assessments and planning effective treatment programs utilizing therapeutic methods of the milieu (somatic therapies, behavioral techniques, family therapy, group process, individual and dyadic treatment, etc.).

**M424. Functional Magnetic Resonance Imaging Journal Club (1 unit).** ( Formerly numbered 424.) (Same as Biomedical Physics M424.) Discussion, 90 minutes. Directed reading and discussion of current topics and developments in functional magnetic resonance imaging. S/U grading.

**425. Teaching Case Conference (1 unit).** Prerequisite: consent of instructor. Review of diagnosis and treatment of full spectrum of disorders, with expert off-unit consultants.

**429. Child Outpatient Team (1 unit).** Prerequisite: consent of instructor. Weekly team meetings to coordinate clinical activities of trainees in Child Outpatient Department. Discussion of literature and theories related to selected cases. S/U grading.

**449. Parent Training Intervention Workshop (2 units).** Lecture, 90 minutes; discussion, one hour. Prerequisite: consent of instructor. Advanced clinical trainees learn behavioral techniques of assessment and treatment of parent/child problems. Lectures, case presentations, and workshops on various skills necessary.

**462. School Intervention by Child Psychiatrists.** Seminar, two hours. Prerequisite: consent of instructor. Knowledge of children in schools through (1) field experience, (2) a didactic program, (3) group supervision. Each trainee selects a local elementary or junior high school as site of field experience in consultation. Supervision focuses on assessing needs of the school and initiating the consultation. Seminars consider theories of consultation, systems theory as applied to schools, organization of school systems, professional roles represented in the school (e.g., teachers, counselors, principals, etc.), and their special problems. In Progress grading.

**471. Grand Rounds (No credit).** Prerequisite: second-year resident in Child Service, child psychiatry fellow, or consent of instructor. Each month one second-year child psychiatry fellow presents a major clinical problem. Senior faculty discussants preside. The presenting trainees expected to cover pertinent literature and to assemble critical elements of information on case or problem at hand. Most sessions eligible for Continuing Medical Education credit.

**M472A. Nursing Care of Children with Developmental Disabilities.** (Same as Nursing M410A.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisite: consent of instructor. Study of disability conditions of childhood and their effects on the child and family. Content based on normative developmental models with consideration for sociocultural diversity. Emphasis on prevention, systematic assessment, and planning of care for the individual and family. Introduction to implementation of intervention strategies. Series of three courses integrates didactic material and clinical experience.

**M472B. Nursing Care of Children with Developmental Disabilities.** (Same as Nursing M410B.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisites: course M472A and/or consent of instructor. Study of philosophical and conceptual models affecting care delivery for persons with developmental disabilities. Emphasis on intervention strategies necessary for primary, secondary, and tertiary prevention.

**M472C. Nursing Care of Children with Developmental Disabilities.** (Same as Nursing M410C.) Lecture, one hour; discussion, one to two hours; laboratory, 10 hours minimum. Prerequisites: course M472B and/or consent of instructor. Exploration and participation in assessment, planning, and delivery of health care to children with developmental disabilities in a variety of settings. Emphasis on expanded role of the nurse.

**478. Clinical Genetics Rounds (No credit).** Prerequisites: medical graduate, consent of instructor. Weekly clinical rounds on patients seen in the wards during preceding week. House staff and others involved in clinical work may attend. Usually in-depth discussion of medical and genetic aspects of one or more disorders presented.

**479. Genetics Clinic Presentation (No credit).** Prerequisite: consent of instructor. Weekly clinical teaching session on patients seen in preceding genetics clinic. In-depth discussion on genetics of each disorder.

**480. Analysis of Human Chromosome Studies (1 unit).** Prerequisite: consent of instructor. Chromosome karyotypes prepared in cytogenetics laboratory during preceding week presented and discussed with reference to clinical findings. Teaching includes interpretation of abnormal karyotypes and technical aspects of routine and special chromosome stains.

**481. Chromatography Review (No credit).** Prerequisites: premedical course or biochemistry, consent of instructor. Weekly session with presentation of amino acid chromatography carried out during preceding week. Interpretation of abnormal chromatograms together with technical aspects of tests used.

**482. Cognitive Behavior Therapy Practicum: Child Anxiety and Depressive Disorders (3 units).** Seminar, two hours. Training in cognitive/behavioral assessment and treatment of children and adolescents with anxiety and depressive disorders. Didactic and experiential training, including direct patient care, clinical supervision, and participation in weekly team meetings.

**485. Medical Genetics Seminar (No credit).** Prerequisites: introductory course, consent of instructor. Weekly lecture series intended for those interested in genetics or in specific topic to be presented. Speakers are invited for their expertise or research in some special area related to genetics and may be from UCLA or elsewhere. Discussion and questions from audience encouraged.

**596P. Individual Studies in Psychiatry (2 to 12 units).** Prerequisite: consent of instructor and department chair, based on written proposal outlining course of study (to be structured by instructor and student at time of initial enrollment). Additional information and course proposal forms available in Office of Education, C8-202 NPI&H. Directed individual research and study in psychiatry at graduate level.

## PSYCHOLOGY

*College of Letters and Science*

UCLA

### Assistant Professors

Bernard W. Balleine, Ph.D.  
Stephen A. Engel, Ph.D.  
Curtis D. Hardin, Ph.D.  
John Hummel, Ph.D.  
Barbara Knowlton, Ph.D.  
Cindy Yee-Bradbury, Ph.D.

### Adjunct Professors

Joseph Bogen, Ph.D.  
Dennis J. McGinty, Ph.D.  
Jill Waterman, Ph.D.

**Adjunct Associate Professors**

Jacqueline D. Goodchilds, Ph.D.  
Lynn A. Olzak, Ph.D.  
Nancy Woolf, Ph.D.

**Adjunct Assistant Professors**

William McCarthy, Ph.D.  
Dahlia Zaidel, Ph.D.

**Scope and Objectives**

Psychology is a subject of considerable interest to most people — we all tend to practice some form of intuitive psychology in an attempt to understand ourselves and the people and groups with whom we interact. The curriculum offered by the UCLA Department of Psychology presents psychology as a scientific discipline that employs systematic methods of inquiry to study and explain human and animal behavior — both normal and abnormal — in terms of a variety of underlying variables, including neural, physiological, and cognitive processes; developmental factors and individual differences; and social and interpersonal influences and contexts. According to recent surveys, the UCLA Psychology Department is ranked as one of the top departments of its kind in the country.

The structure of the undergraduate curriculum has been designed to reflect the extensive breadth of psychology — in terms of both the range of behavioral phenomena studied and the variety of methods and theoretical approaches employed — while allowing students to pursue in greater depth those areas in which they become most interested. Beyond basic core courses, students can take many specialized courses in areas such as psychobiology, animal behavior, learning and memory, motivation, perception, cognition, measurement, personality, and clinical, social, developmental, community, and health psychology. The curriculum also provides excellent opportunities for research experience — either in the form of laboratory courses or by participation with faculty and graduate students in a wide variety of research projects.

A choice of three undergraduate majors is offered: a B.A. degree in Psychology and B.S. degrees in Cognitive Science and in Psychobiology. While the majors overlap in certain fundamental and basic knowledge bases, they differ considerably in their focus (i.e., the extent to which certain areas of psychology and related disciplines are studied) and in terms of the different student interests and needs they satisfy. For nonmajors, the department offers many courses that can give them new and valuable insights into the understanding of human behavior, including their own.

At the graduate level, the department offers training leading to the Ph.D. degree with emphases in areas such as behavioral neuroscience, clinical, cognitive, developmental, learning and behavior, measurement, and social psychology. The program is designed to prepare future psychologists for careers as scientific in-

vestigators, college and university teachers, and professional psychologists.

**Undergraduate Study****Bachelor of Arts in Psychology**

The psychology major is the most general of the three majors and offers both broad and in-depth coverage of the fundamental and traditional areas of psychology. It provides students with a strong foundation for postgraduate education in psychology and can serve as excellent background to prepare them for further training in such fields as law, education, government and public policy, business, and many of the health-related professions. Its basic liberal-arts orientation also provides excellent foundation for immediate postbaccalaureate careers in many areas, particularly ones in which an understanding of human behavior and its diversity of expression would be an asset.

The requirements described below represent the minimum requirements in satisfaction of the preparation and the major. Additional courses in psychology, statistics, and related sciences, as well as other types of research and fieldwork experiences, are highly recommended if students plan to pursue graduate work in psychology and related fields. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for this major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.

**Preparation for the Major**

Students need to file a petition in the Undergraduate Advising Office to declare the prepsychology major. They are then identified as prepsychology majors until they (1) satisfy the preparation for the major requirements and (2) file a petition to declare the psychology major. The following required courses must be taken for a letter grade (a C – or better in each course and a 2.3 overall grade-point average in the preparation courses) before students reach 110 total units (transfer students must complete all remaining preparation courses by the end of the first year of enrollment): Anthropology 7 or 10 or 12 or 15; Biology 2 or Life Sciences 1 or Physiological Science 3; Chemistry and Biochemistry 2 or 10A or 11A (if students have completed one year of high school chemistry with a C or better, this requirement is waived); Mathematics 2 or two terms of calculus; Physics 10 or 3A or 6A or 8A/8AL; one course from Philosophy 1, 4, 6, 7, 8, 9, 21, 22; Psychology 10, 42; Psychology 41 (recommended) or Statistics 50. Psychology 41 and 42 should be taken early in the career; these courses are open only to students who have declared the prepsychology major one term before the term in which they plan to enroll. Students cannot take Psychology 42 until they

have passed one of the statistics courses with a grade of C – or better.

Repetition of more than two preparation courses in which a grade of D or F was received or of any preparation course more than once results in automatic denial of admission to the major.

Students planning to transfer with 90 or more units should have completed the following courses prior to admission to UCLA: introductory psychology, physical anthropology, finite mathematics (or seven and one-half quarter units of calculus), statistics, biology with laboratory, introductory physics with laboratory, introductory chemistry (or one year of high school chemistry with a C or better), and introductory philosophy.

**The Major**

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office.

*Required:* (1) Core courses: Psychology 110, 115 (or M117A and M117C), 120, 130 or one course from 133A through 133L, 135; (2) one laboratory/fieldwork course from 111, 113, 116, 121, 131, 136A, 136B, 136C, 171A, 174, 186A, 186B; (3) four additional upper division elective courses (16 units) in psychology.

Students who complete Psychology M117A-M117B-M117C receive equivalent credit for course 115 and two upper division psychology electives.

All upper division courses must be taken for a letter grade. For all entering freshmen and transfer students, a C – or better is required in each core course and in at least one laboratory/fieldwork course. Students must have a 2.0 grade-point average in all upper division courses selected to satisfy major requirements.

**Bachelor of Science in Cognitive Science**

The cognitive science major focuses on the study of intelligent systems, both real and artificial. While including a strong foundation in the traditional areas of psychology, the major is interdisciplinary in nature and emphasizes subject matter within cognitive psychology, computer science, mathematics, and related disciplines.

The requirements described below include sufficient preparation if students plan to pursue graduate work in cognitive science or related fields; however, they may want to include additional advanced courses in psychology and fields related to cognitive science (e.g., computer science, linguistics, mathematics, philosophy, and statistics) as well as other types of research and fieldwork experiences. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for this major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.

## Preparation for the Major

Students need to file a petition in the Undergraduate Advising Office to declare the precognitive science major. They are then identified as precognitive science majors until they (1) satisfy the preparation for the major requirements and (2) file a petition to declare the cognitive science major. Questions about the major should be directed to the Undergraduate Advising Office, 1531 Franz Hall.

The following required courses must be taken for a letter grade (a C or better in each course and a 2.5 overall grade-point average in the preparation courses): Biology 2 or Life Sciences 1 or Physiological Science 3; Chemistry and Biochemistry 2 or 10A or 11A (if students have completed one year of high school chemistry with a C or better, this requirement is waived); Mathematics 31A, 31B; Philosophy 7, 8, or 9; Physics 10 or 3A or 6A or 8A/8AL; Program in Computing 10A, 10B, 15; Psychology 10, 42, 85; Psychology 41 (recommended) or Statistics 50. Psychology 41 and 42 should be taken early in the career; these courses are open only to students who have declared the precognitive science major one term before the term in which they plan to enroll. Students cannot take Psychology 42 until they have passed one of the statistics courses with a grade of C – or better.

Repetition of more than two preparation courses in which a grade of D or F was received or of any preparation course more than once results in automatic denial of admission to the major.

Students planning to transfer with 90 or more units should have completed the following courses prior to admission to UCLA: two courses in calculus/analytical geometry, introductory psychology, statistics, biology with laboratory, introductory physics with laboratory, one philosophy course (critical reasoning, philosophy of science, or philosophy of the mind), introductory chemistry (or one year of high school chemistry with a C or better), and one course in computer programming in C++.

## The Major

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office.

*Required:* (1) Psychology 115 (or M117A and M117C), 120, and one course from 124A through 124F; (2) one course from 186A or 186B and one course from 121, 186A, 186B, or Computer Science 161; (3) three upper division elective courses (12 units) from Psychology 110, 112A through M119N, 123, 124A through 124F (if taken for the major, may not be applied as an elective), 130, 133B, 135, 142, 150, 151, 187A, 189, 190B or 190C (if content is approved by the Undergraduate Advising Office and courses have not been applied toward the Psychology 188A/188B requirement), 197 (content must be approved by the Undergraduate Advising Office before elective credit may be granted), Communication Studies 156,

Computer Science 111 through M196B, Ethnomusicology 172A, Linguistics 103 through C185B, Mathematics 110A through 171, Philosophy 124 through 136, Statistics M152A through M153B; (4) two terms of Psychology 188A or 188B (may be fulfilled by taking any two courses from 188A, 188B, or 190C, provided content is approved by the Undergraduate Advising Office).

Students who complete Psychology M117A-M117B-M117C receive equivalent credit for course 115 and two upper division cognitive science electives.

Students must have a 2.0 grade-point average in all upper division courses selected to satisfy major requirements. With the exception of Psychology 188A and 188B, each course must be taken for a letter grade.

## Bachelor of Science in Psychobiology

The psychobiology major is designed for students who plan to go on to postgraduate work in physiological psychology, neuroscience, behavioral aspects of biology, or the health sciences. Psychobiology involves the study of brain-behavior relations and laboratory training in standard brain research techniques.

The requirements described below include sufficient preparation if students plan to pursue graduate work in any of the above fields; however, they may want to include additional advanced courses in psychology and related sciences as well as other types of research and fieldwork experiences. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for this major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.

## Preparation for the Major

Students need to file a petition in the Undergraduate Advising Office to declare the prepsychobiology major. They are then identified as prepsychobiology major until they (1) satisfy the preparation for the major requirements and (2) file a petition to declare the psychobiology major.

### Life Sciences Core Curriculum

*Required* (effective Fall Quarter 1997): Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 10A, 10B/10BL, 10C, and 10D/10DL, or 11A, 11B/11BL, 11CL, 132A, and 132B/132BL, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 6A, 6B, and 6C, or 8A/8AL, 8B/8BL, 8C/8CL, and 8D/8DL.

Also required are Psychology 10, 42; Psychology 41 (recommended) or Statistics 50. Psychology 41 and 42 should be taken early in the career; these courses are open only to students who have declared the prepsychobiology major one term before the term in which they plan to enroll. Students cannot take Psychol-

ogy 42 until they have passed one of the statistics courses with a grade of C – or better.

All core curriculum courses must be passed with a grade of C – or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

### Transfer Students

In order to be admitted as psychobiology majors, transfer students with 90 or more units should have completed the following courses prior to admission to UCLA: one year of general biology with laboratory; one year of general chemistry with laboratory for majors; one year of calculus; and one year of calculus-based physics, one year of organic chemistry, introductory psychology, and statistics.

## The Major

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office.

*Required:* (1) Biology 129 or Psychology 118 or Anthropology 128A and 128B, and Psychology 110, 115 (or M117A and M117C), 116, 120; (2) one course from Psychology 127, 130, 133A through 133L, 135; (3) 16 units of graded elective courses from the following list: Biology 107, 112, 113A, 114 (no more than one from this group), Psychology M117A, M117B, M117C, M117J, M117K, 119A through M119N, 190C (only if content is approved by the Undergraduate Advising Office), 197 (content must be approved by the Undergraduate Advising Office before elective credit may be granted), Biology 102, C104, 105, 106, 110, 111, C115, 117, C119, 120, 121, 122, 124 (only four units may be applied toward the major), 131 (only four units may be applied toward the major), 135, 146, 153, M158, 164, 166, 167, 168, 179, Chemistry and Biochemistry 153A, 153L, Molecular and Medical Pharmacology 110A, 110B, Molecular, Cell, and Developmental Biology 104, 138, C139, C149, CM156, 157, 171, M185A, Physiological Science 142, C144, 147, M173.

Students who complete Psychology M117A-M117B-M117C receive equivalent credit for course 115 and 10 units of upper division psychobiology electives.

Students must have a 2.0 grade-point average in all upper division courses selected to satisfy major requirements, and each must be taken for a letter grade.

## Fieldwork and Research Opportunities

Many research and fieldwork opportunities are open to students who wish to expand their knowledge and broaden their background in the field of psychology. These experiences can be enriching and help bring undergraduates closer to understanding research and its appli-

cations in the everyday world. At least one of the following courses is recommended for students planning postgraduate study: Psychology 188A, 188B, 192, 193, 194A, 194B, 199, or the Student Research Program (SRP) through the College of Letters and Science. Information about these courses and programs is available from the Undergraduate Advising Office, 1531 Franz Hall.

## Honors

### Honors Courses

Each year the department offers a selection of honors courses, designated with an H suffix. The courses provide close contact with faculty members, emphasize readings in the original literature, student reports, and small group discussions, and may include field or research experience. All such courses offer credit toward the departmental honors program. Enrollment priority in honors courses is given to students in the departmental honors program. Consult the College of Letters and Science for information on requirements for College Honors.

### Honors Program

Psychology, cognitive science, and psychobiology majors intending to continue study at the graduate level are encouraged to apply for the departmental honors program. Students work for one year with a faculty sponsor on a research project that is the basis of a formal honors thesis. During that year they also participate in a weekly seminar (Psychology 190A-190B-190C) in which thesis projects are presented and discussed and other topics of interest are explored with invited faculty members and other guests. In addition, they must take at least two psychology honors courses selected from a list provided by the department, with a grade of B or better in each. Satisfactory completion of the program and the other requirements for the major leads to awarding of the degree with honors or highest honors. Consult the Undergraduate Advising Office early in the educational planning for further information and application forms.

## Student Award for Research Training (START)

The Student Award for Research Training (START) represents a vital effort to identify and mentor underrepresented minority and/or low-income students. The purpose of START is to encourage such students to participate in research and pursue graduate studies leading to careers in academia. The recruitment and application process for START takes place each Fall Quarter. Most students selected to participate are awarded stipends for Winter and Spring Quarters, during which time they do research under the mentorship of a psychology faculty member. In addition, they are required to attend a weekly seminar in which presenters, including faculty members, address topics such as graduate school, careers in academia, and research in psychology. START provides students with the opportunity to work closely

with faculty research sponsors, graduate students, and departmental counselors.

## Developmental Disabilities Immersion Program and Concentration

The Developmental Disabilities Immersion Program (DDIP) is cosponsored by the Department of Psychology, the Department of Psychiatry and Biobehavioral Sciences, and the Office of Instructional Development — Field Studies Development. Each year a group of 30 students is selected for the **program** which runs during Winter/Spring Quarters. Students participate in courses, fieldwork, and research at selected University and community facilities serving persons with developmental disabilities.

Required courses include Psychology/Psychiatry M180A, M180B, M181A-M181B. Students also take other courses related to developmental disabilities. Many of the courses fulfill psychology undergraduate major requirements (consult the Undergraduate Advising Office for details). Student individualized research projects are also part of the immersion experience.

To earn a **concentration**, majors in psychology, cognitive science, and psychobiology must be accepted into the Developmental Disabilities Immersion Program. Information and applications are available from Field Studies Development, 80 Powell Library. The following courses are required for the concentration: Psychology 127 (may also be applied as one of the three upper division electives required for the psychology major), 130 or one course from 133A through 133I (also satisfies a core requirement for the psychology major), M180A, M180B, M181A-M181B, 193 (two terms). With the exception of course 193, each course must be taken for a letter grade. Students in the department who complete the requirements receive a departmental certificate of completion at graduation; they must notify the department during the term they plan to graduate to receive the certificate. The concentration does not appear on the diploma or transcript.

If a psychology major earns the DDIP concentration, upper division elective credit for Psychology M180A, M180B, M181A-M181B does not apply toward the major.

For more information, contact the Undergraduate Advising Office (1531 Franz Hall) or Field Studies Development (80 Powell Library).

## Computing Specialization

Majors in psychology, psychobiology, and cognitive science may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, and at least one course from 10C, 15 (recommended), 30, 60, and (3) completing Psychology 85 and at least two courses from 121, M142, 150, 151, 186A, 186B (one 199 course may be substituted for one of these

courses provided project has been approved by vice chair). A grade of C or better is required in each course. Students graduate with a bachelor's degree in their major and a specialization in computing. Students planning to enter this specialization should consult the Undergraduate Advising Office.

## Applied Developmental Psychology Minor

The applied developmental psychology minor is designed to (1) provide a coherent academic program with focus on issues central to improving the well-being of children and their families, (2) teach undergraduates how to apply theories, research methods, and research findings to practical concerns, and (3) prepare students to join or receive further training in various child-related professions.

The minor is open to all enrolled UCLA students (including cognitive science, psychobiology, and psychology majors) who have an overall grade-point average of 2.0 or better and have been accepted into an approved applied developmental psychology internship program. For further information about applying to the internship program, contact the director of the Infant Development Program, 1611 Franz Hall, (310) 825-2896. For questions about additional course requirements for the minor, contact a counselor in the Undergraduate Advising Office, 1531 Franz Hall, (310) 825-2730.

*Required Lower Division Course:* Psychology 10.

*Required Upper Division Courses:* Psychology 133X and 133Y (to be taken concurrently with the two-term internship described below) and four additional courses, of which at least three must be upper division, from Education 91A through 91D, 112, 125A, 125B, Linguistics C130, C135, Psychology 130, 131, 132, 133A through 133I, M176, 197 (content must be approved by the Undergraduate Advising Office), 199 (content must be approved by the Undergraduate Advising Office), Sociology 136, 174. One of the four additional courses must include either Psychology 130, one course in the 133 series, or 197 (content must be approved by the Undergraduate Advising Office).

*Internship Requirement:* Students work as interns for two academic terms at an approved daycare center/school and enroll concurrently in Psychology 133X and 133Y. The internship provides hands-on experience working with young children as teacher's aids and opportunities for observing children. By completing an additional one-term internship, students may meet requirements to be fully qualified daycare center teachers under Title 22, California Department of Social Services; for more information, contact the director of the Infant Development Program at (310) 825-2896.

All minor courses, except for the internship courses, must be taken for a letter grade, with an overall grade-point average of 2.0 or better. No more than two courses may be applied to-

ward both the students' majors and this minor. Successful completion of the minor is indicated on the transcript and diploma.

## Cognitive Science Minor

The cognitive science minor is designed to introduce students to cognitive science topics as addressed in a number of different disciplines, such as biology, computer science, engineering, linguistics, mathematics, philosophy, and psychology, while allowing them to pursue a more in-depth study of cognitive science topics within specific areas of their own choice.

The minor consists of two parts. In the first part students complete background courses and satisfy a computer programming experience requirement. In the second part they select a primary cluster from four clusters of upper division courses that have been organized to reflect different aspects of cognitive science. Students take three courses within their primary cluster and two additional courses from the remaining clusters (secondary clusters).

The minor is open to all enrolled UCLA students, other than cognitive science majors, who have an overall grade-point average of 2.0 or better. Students must make an appointment with a counselor in the Undergraduate Advising Office, 1531 Franz Hall, (310) 825-2730, to enter the minor and receive counseling on how to select a primary cluster.

*Required Lower Division Courses:* Psychology 85 and one course from 15, 42, Computer Science 2, Linguistics 1, 20.

The computer programming experience requirement is satisfied by petition based on coursework (e.g., completion of Program in Computing 10A) or other relevant programming experience.

*Required Upper Division Courses:* Students must select (with approval of the Undergraduate Advising Office) and complete one of the following four primary clusters: (1) *biological basis of cognition cluster* — three courses from Linguistics C135, Psychology 115, 116, M117C (or Molecular, Cell, and Developmental Biology M175C or Neuroscience M101C or Physiological Science M180C), M117K, 119B, 119F, M119L, M119N; (2) *computation and modeling cluster* — three courses from Biomathematics 108, Computer Science 161, 163, Psychology 150, 151, 186A, 186B (at least one course must be from Computer Science 161, Psychology 186A, 186B); (3) *human cognition cluster* — Psychology 121 and two courses from 112C, 120, 124A through 124F, 133B, 133BH, 133C, 133E; (4) *mind and language cluster* — three courses from Linguistics 120A, 120B, 125, C130, 132, C135, C185A, Philosophy 124, 125, 126, 127A, 127B, 129, 170, 172, Psychology 122, 123, 124A.

Students must also fulfill a secondary cluster requirement of two additional courses from one or more of the clusters not selected as the primary cluster.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. No more than two courses may be applied toward both the students' majors and this minor. Successful completion of the minor is indicated on the transcript and diploma.

## Infant Development Program

The Infant Development Program is designed as a teaching and research facility for the department and is set up to accommodate both cross-sectional and longitudinal investigation of infants, toddlers, and their parents. In addition, the program provides an opportunity for students in developmental psychology and other areas to acquire firsthand experience working with infants and toddlers through a two- or three-term sequence of Psychology 133X, 133Y, and 193. The program is located in Franz Hall and provides child care for about 15 infants ranging in age from three months to three years.

## Clinic for the Behavioral Treatment of Children

The Clinic for the Behavioral Treatment of Children carries out diagnosis, treatment, and research on children with severe psychological problems, such as children with autism and those with severe developmental disorders. The treatment philosophy is largely behavioral/educational, with emphasis on language acquisition, peer and school integration, and parent training. Students are taught behavioral treatment procedures and work in an apprenticeship relation to senior staff. Prior research has focused on variables controlling self-destructive behavior, perceptual deficits, language acquisition, and emotional/social attachments. The clinic serves as a teaching and research environment for both graduate and undergraduate students.

## Psychology Clinic

The Psychology Clinic in the Department of Psychology is a major training center for clinical psychology students in the Ph.D. program. It provides a broad range of psychological services to clients, including assessment and individual, couples, family, and group therapy. Clients cover the entire age range and represent diverse populations in the community.

Student therapists receive very close supervision and are encouraged to relate their case material to academic learning and current research. Students and faculty members are also involved in a variety of clinical research projects.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

The Department of Psychology does not admit candidates for the Master of Arts degree only, although students may be awarded the M.A. en route to the Ph.D.

### Areas of Study

Consult the department.

### Course Requirements

Requirements for the M.A. are nine graduate courses (36 units), including Psychology 250A, 250B, 251A-251B (research project must be completed), and at least three of the four required core courses (refer to the section on doctoral course requirements for further details). One 596 course (four units) may be applied as an elective. Courses in the 400 series may not be applied. All undergraduate deficiencies must be cleared before the M.A. is awarded.

### Comprehensive Examination Plan

Consult the department.

### Thesis Plan

None.

## Doctoral Degree

### Admission

A departmental brochure describing the graduate program in psychology is available at the department.

Admission to the Ph.D. program normally requires an undergraduate degree in psychology. However, students from other areas (particularly the mathematical, physical, biological, and social sciences) may be admitted. Admission is for Fall Quarter only and on a full-time basis only. Applicants should mail the following documents directly to the Psychology Department by December 15 for clinical area applicants and January 2 for applicants to other areas to be considered for admission the following Fall Quarter.

- (1) The University's *Application for Graduate Admission*, available in 3453 Franz Hall.
- (2) Three letters of recommendation.
- (3) One official transcript from each college attended.
- (4) Scores from the Graduate Record Examination (GRE) General Test and the Subject Test in Psychology (taken within the last three years).
- (5) The Test of English as a Foreign Language (TOEFL), required of all international applicants whose native language is not English.

Interviews (in person or by phone) are required for clinical area finalists.

Students entering the graduate program must demonstrate adequate breadth of preparation in psychology and related disciplines. Students

are expected to have had courses equivalent to the following: (1) Psychology 41; (2) two courses selected from Psychology 110, 115, and 120; and (3) two courses selected from Psychology 127, 130, 135. In addition, it is recommended that students have the following college-level coursework: one course in biology or zoology, one course in mathematics (such as calculus), and two courses in the physical sciences (physics and/or chemistry). A course in anthropology, philosophy, or sociology may be substituted for one of the physical sciences courses.

These recommended courses may be waived by the student's adviser. Students who have completed any of the undergraduate majors offered by the UCLA Department of Psychology have satisfied the undergraduate preparation requirements. Students who have not had training in the areas cited above may either take the missing courses or have their area evaluate their preparation, and in consultation with the student, plan a program of study that provides the appropriate breadth.

The individual program may include undergraduate coursework, graduate coursework, readings followed by an examination, or some combination of these. Emphasis is on breadth and preparation, both within and outside the Department of Psychology. The plan should include a firm date of completion and requires approval of the graduate affairs committee. Continuation in the Ph.D. program is contingent on satisfactorily clearing undergraduate deficiencies by the end of the fourth quarter in residence.

### Major Fields or Subdisciplines

The graduate program in psychology leads to the Ph.D. degree. Students are required to obtain a thorough background in research methodology and psychological theory. Major specialized training is available in the following areas of psychology: behavioral neuroscience, clinical, cognitive, cognitive neuroscience, developmental, learning and behavior, measurement and psychometrics, or social psychology. Students admitted in either the behavioral neuroscience or cognitive areas may take the program in cognitive neuroscience. The course requirements serve as a combined major and minor. Students who select this option remain in their area of admission for administrative purposes. With the exception of clinical, students may minor in any of the areas listed above, as well as in health psychology or political psychology. Students may petition for individualized minors or a minor in experimental psychopathology. Training is also available in community psychology.

### Course Requirements

#### General Core Requirements

All students, regardless of area, must fulfill the requirements listed below. A course may not be used to fulfill requirements in more than one major or minor area unless no other course op-

tions are designated. The core program includes four courses, plus Psychology 250A, 250B, 251A-251B (and 251C, if an additional quarter is needed to complete the course). Courses 250A and 250B must be completed in the first two quarters; 251A-251B-251C must be completed by the end of the fourth quarter. The additional four core courses must be completed within the first six quarters in residence. If the core courses have not been completed by the end of the fifth quarter, the balance of courses must be completed during the sixth quarter, even if the preferred courses are not offered at that time.

By the end of the second year, students must complete at least one individual research course (596) and at least three second-year graduate courses, including one quantitative course chosen from Psychology 252A, 252B, 253, 254A, 254B, 255, M256, M257, 258, 259, 287.

During the third year, students must enroll in a minimum of three graduate-level courses, plus one quarter of course 596. At least one quarter of 596 or 599 should be taken during the fourth year and each remaining year in the graduate program.

#### Major Area Course Requirements

Each area requires certain courses of students majoring in that area. Requirements are as follows:

*Behavioral Neuroscience.* Neuroscience M201 and either option 1 — Neuroscience M202 and M204 or option 2 — Psychology M117A. Students interested in molecular biology take option 1 and minor in neuroscience. In addition, all majors take eight units from the Psychology 205 series, three quarters of Psychology 212, and two approved behavioral neuroscience seminars.

*Clinical.* Psychology 270A-270B-270C, 271A-271B-271C, 277A, and two clinical courses from Psychology 272A through 298. A minimum of one of these courses must be numbered above 272A. Note that the 298 courses must be approved by the clinical area.

*Cognitive.* Psychology 260A-260B plus four courses, including at least two from Psychology 259, 261 through 266, and at least one from Psychology 268A through 268E or 269.

*Cognitive Neuroscience.* The following course requirements satisfy both major and minor area requirements: Neuroscience 201, Psychology M117A or Neuroscience M202, Psychology 212, Psychology 260A, 260B, eight units of Psychology 205, Psychology 207A, 207B, or 207C. Four additional courses in the cognitive area, which must include at least one core course and one seminar.

*Developmental.* Psychology 240A-240B; two courses from Psychology 242A through 242F, 243B, 244, 299.

*Learning and Behavior.* Psychology 200A, 200B, plus two courses from 204B through 204E, 210, 290, 293.

*Measurement and Psychometrics.* Five courses from Psychology 249, 252A, 252B, 253, 254A, 254B, 255, M256, M257, 258.

*Social.* Psychology 220A, 220B, 220C, and three social seminars taught by three different faculty members. In addition, Psychology 226A is required in the first year, and 226B-226C are required in the first, second, and third years of the program.

#### Minor Area Course Requirements

Students must select one minor area. Courses taken to satisfy a student's minor area requirements cannot be chosen from among those that could satisfy that student's major area requirements. The minor is normally satisfied by taking three to four specified courses as indicated below. Other options are also available; see departmental bulletins for further details. The following is standardized departmental coursework for minors.

*Behavioral Neuroscience.* Four units from the Psychology 205 series, plus two of the following: four additional units from Psychology 205A through M205Z, 207A, 207B, 207C, or 291. In addition, students may select Neuroscience M201 and M205.

*Cognitive.* Three of the following courses, two of which must be numbered from 259 through 266: Psychology 259, 261, 262, 263, 265, 266, 268A through 268E, 269.

*Developmental.* Psychology 240A or 240B, plus two of the following: Psychology 242A through 242F, 243A, 243B, 244, M246, 299.

*Experimental Psychopathology.* Four courses approved by the clinical area.

*Learning and Behavior.* (1) Comparative option — Psychology 210, plus two of the following: Biology 120, C219, 274, Psychology 204E, Anthropology 128A, 128B; (2) Learning option — Psychology 200A, 200B, plus one of the following: Psychology 204B, 204C, 204D, 204E, 293.

*Measurement and Psychometrics.* Three of the following: Psychology 249, 252A, 252B, 253, 254A, 254B, 255, M256, M257, 258.

*Political Psychology.* See departmental bulletin for details.

*Social.* Psychology 220A and 220B, or 220A and 220C, plus one of the following: Psychology 221, 222A, 222B, 223, 225, 227, M228A, M228B, 231, M239.

#### Practicum and Internship Requirements for Clinical Students

(1) At least 400 hours of approved supervised apprenticeship practicum (Psychology 401) are required, of which 150 hours must involve direct clinical service and 75 hours must be formal schedule supervision. These hours are

usually completed during the second through fourth years.

(2) The equivalent of one-year's full-time supervised internship (Psychology 451) in an acceptable setting approved by the faculty, is required. This is usually taken in the fourth or fifth year. Contact the department for further information on internship requirements.

In cases in which a graduate student has

- (1) completed all academic requirements
- (2) passed the final oral examination
- (3) received doctoral committee approval to file the dissertation
- (4) provided evidence of satisfactory completion of at least nine months of an internship approved by the faculty
- (5) obtained approval from the clinical area chair

the student may, under these circumstances, file the dissertation and be awarded the Ph.D. degree with the clear understanding that the remaining months of internship that are required by the American Psychological Association will be completed as outlined in the internship contract. Documentation of subsequent internship completion is provided by the Director of Clinical Training.

## Written and Oral Qualifying Examination

The qualifying examination generally consists of three separate sections. The first is an examination administered by the major area, which examines in breadth the student's knowledge of the major field. The second section is an individualized examination which examines in depth the student's knowledge of the area of specialization within the major field. The third section is the University Oral Qualifying Examination. All Ph.D. requirements listed above must be completed before the oral qualifying examination can be taken.

Contact the department for the specific examination requirements of the various areas of specialization.

# Psychology

## Lower Division Courses

**10. Introductory Psychology.** General introduction including topics in cognitive, experimental, personality, developmental, social, and clinical psychology; six hours of psychological research.

**15. Introductory Psychobiology.** Lecture, three hours. Designed for nonmajors. Survey of genetic, evolutionary, physiological, pharmacological, and experiential factors affecting behavior. Using comparative approach where appropriate, emphasis on relevance of biological mechanisms to understanding of humans and their interaction with their environment.

**41. Psychological Statistics.** Lecture, five hours. Requisites: course 10, and Mathematics 2 or two terms of calculus. Designed for premajors. Basic statistical procedures and their application to research and practice in various areas of psychology. P/NP or letter grading.

**42. Research Methods in Psychology (6 units).** Lecture, two hours; laboratory, four hours. Enforced requisites: courses 10 and (41 or Statistics 50, C – or better). Introduction to research methods and critical analysis in psychology. Lecture and laboratory topics include experimental and nonexperimental research methods, statistical design and analysis as applied to a broad range of basic and applied research issues.

**85. Introduction to Cognitive Science.** Lecture, three hours. Exploration of computer metaphor of mind as an information-processing system, focusing especially on perception, knowledge representation, and thought based on research in cognitive psychology, neuropsychology, and artificial intelligence. Many examples from visual information processing.

**88A-88Z. Lower Division Seminars.** Seminar, three hours. Enforced requisite: course 10. Limited to freshmen/sophomores. Intensive analysis in seminar situations of selected topics of current psychological interest. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit.

**88A. Stress, Adaptation, and Coping.** Limited to freshmen. Physiological and psychological processes related to stresses and strains of daily living and potential relation of these processes to disease states. Examination of multifaceted nature of coping with stressors and exploration of strategies for stress management. P/NP or letter grading.

**97. Variable Topics in Psychology.** Lecture, three hours. Enforced requisite: course 10. Study of selected topics in psychology at introductory level; lecture format designed for freshmen/sophomores. P/NP or letter grading.

## Upper Division Courses

**M107. Asian American Personality and Mental Health.** (Same as Asian American Studies M117.) Lecture, three hours. Prerequisite: course 10. Foundations of personality development and mental health among Asian Americans. Topics include culture, family patterns, achievements, stressors, resources, and immigrant and minority group status. P/NP or letter grading.

**110. Fundamentals of Learning.** Lecture, three hours; discussion, one hour. Prerequisites: courses 10, 41, junior standing. Experimental findings on animal and human conditioning; retention and transfer of training; relation of learning and motivation. Intended to provide empirical basis for theory and research in this area.

**111. Learning Laboratory.** Lecture, two hours; laboratory, three hours. Requisites: courses 41, 42, 110. Designed for departmental majors. Laboratory experience with techniques in study of learning, especially with animals.

**112A. Basic Processes of Motivated Behavior.** Lecture, 90 minutes; discussion, 90 minutes. Prerequisites: courses 10, 41, 110, junior standing. Examination of some basic processes underlying motivated behavior, stressing environmental determinants of behaviors such as feeding, drinking, and reproduction-related behavior. Discussion of physiological mechanisms that contribute to such behaviors. Consideration of topics such as reinforcement, acquired motivation, and drug addiction. Evaluation of evidence obtained in laboratory studies conducted with animals.

**112B. Psychobiology of Fear and Anxiety.** Lecture, three hours; outside study, nine hours. Prerequisites: courses 10, 41, 110, junior standing. Recommended: course 115. Presentation of biological and behavioral approaches to fear and anxiety, taken from laboratory and applied research. In addition to overview of major principles from each approach, emphasis on areas in which significant research advances have recently occurred. Examination of concordance and discordance between results from laboratory and applied research.

**112C. Principles of Skill Acquisition.** Lecture, three hours. Prerequisites: course 110 or 120 (recommended), and psychology major standing or consent of instructor. Investigation into principles of human skill learning, with focus on general principles of skill learning derived from laboratory settings. These principles have relevance to various industrial or occupational settings, musical performances, vehicle control, sport, and other activities in which complex perceptual-motor skills must be acquired with practice. Major topics include laboratory measurement procedures, effective structure of practice settings, feedback and knowledge of results, learning of automaticity, individual differences, and evaluation of various theories of skill learning.

**113. Behavior and Alcohol Laboratory.** Discussion, two hours; laboratory, four hours. Prerequisites: courses 10, 41, 42. Students conduct an experiment studying effects of alcohol on learning and complex processes using paid volunteers. Examination of set and setting and role of individual differences in relation to current theories of alcohol use and abuse.

**113H. Behavior and Alcohol Laboratory (Honors).** Discussion, two hours; laboratory, four hours. Prerequisites: courses 10, 41, 42. Honors course parallel to course 113.

**114. Alcoholism.** Prerequisite: upper division standing. Theories and research on impact, causes, characteristics, and treatment of alcoholism considered from a biobehavioral point of view.

**115. Principles of Behavioral Neuroscience.** Lecture, three hours; discussion, one hour. Requisites for majors: course 41, Biology 2; for nonmajors: Life Sciences 1, 2, 3. Designed for juniors/seniors. Nervous system anatomy, physiology, pharmacology, and their relationship to behavior. P/NP or letter grading.

**116. Behavioral Neuroscience Laboratory.** Lecture, one hour; laboratory, three hours. Prerequisites: courses 41, 42, 115 (may be taken concurrently), psychobiology or psychology major standing. Laboratory experience with various topics in behavioral neuroscience.

**M117A-M117B-M117C. Neuroscience: From Molecules to Mind (5 units each).** (Same as Molecular, Cell, and Developmental Biology M175A-M175B-M175C, Neuroscience M101A-M101B-M101C, and Physiological Science M180A-M180B-M180C.) Lecture, four hours; discussion, one hour. P/NP or letter grading:

**M117A. Cellular and Systems Neuroscience.** Requisites: Chemistry 132A, Life Sciences 2, Physics 6B or 8C. Not open for credit to students with credit for Physiological Science 111A. Students with credit for Molecular, Cell, and Developmental Biology 171 must enroll on a P/NP basis; those enrolling concurrently in course M117A and Molecular, Cell, and Developmental Biology 171 do not receive credit for M117A. Cellular neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement.

**M117B. Molecular and Developmental Neuroscience.** Requisites: course 115 (or Molecular, Cell, and Developmental Biology 171 or Physiological Science 111A) or M117A (or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A or Physiological Science M180A), Life Sciences 3, 4. Molecular biology of channels and receptors: focus on voltage dependent channels and neurotransmitter receptors. Molecular biology of supramolecular mechanisms: synaptic transmission, axonal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in developmental neurobiology.

**M117C. Behavioral and Cognitive Neuroscience.** Requisite: course 115 (or Molecular, Cell, and Developmental Biology 171 or Physiological Science 111A) or M117B (or Molecular, Cell, and Developmental Biology M175B or Neuroscience M101B or Physiological Science M180B). Neural mechanisms underlying motivation, learning, and cognition.

**M117J. Biological Bases of Psychiatric Disorders.** (Same as Molecular, Cell, and Developmental Biology M191, Neuroscience M130, Physiological Science M181, and Psychiatry M191.) Requisite: course 115 or Molecular, Cell, and Developmental Biology 171 or Neuroscience M101A or Physiological Science 111A. Underlying brain systems involved in psychiatric syndromes and neurological disorders, including schizophrenia, depression, bipolar disorders, obsessive/compulsive disorder, eating disorders. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments.

**M117K. Introduction to Functional Anatomy of Central Nervous System.** (Same as Neuroscience M102.) Lecture, two hours; laboratory, two hours. Requisite: Life Sciences 2. Not open to freshmen. Overview of human nervous system; relation of behavior to higher cognitive function. Development of primate and human brain during past few million years; evolutionary aspects of neuroanatomical structures and effects of behavior and cultural attitudes of modern man. P/NP or letter grading.

**118. Comparative Psychobiology.** Prerequisites: course 115, junior major standing. Survey of determinants of species-specific behavior, including genetic influences and learning.

**119A. Neuropsychopharmacology.** Lecture, three hours. Prerequisites: course 115, junior standing. Analysis of basic pharmacologic principles to include interaction of drugs with neurochemically significant substances in the brain.

**119AH. Neuropsychopharmacology (Honors).** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 119A.

**119B. Human Neurophysiology.** Lecture, three hours. Prerequisites: course 115, junior standing. Exploration of biological basis of human cognitive processing, with emphasis on function of cerebral cortex.

**119D. Behavioral Pharmacology.** Prerequisites: course 115, junior standing. Experimental and theoretical treatment of drug-behavior relationships. Particular emphasis on behavior and pharmacological mechanisms of drug action and interaction with neuronal function.

**119DH. Behavioral Pharmacology (Honors).** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Experimental and theoretical treatment of drug-behavior relationships; pharmacological approaches to mood, aggression, learning, motivation; experimental studies of addiction.

**119E. Stress and Bodily Disease.** Lecture, three hours. Prerequisites: course 115, junior standing. Psychobiological processes as they pertain to development of stress responses and disease states. Consideration of stress-related topics, including behavioral and pharmacological variables in stress and stress management.

**119F. Neuron Circuitry and Behavior.** Requisites: course 115, Molecular, Cell, and Developmental Biology 171. Designed for juniors/seniors. Presentation of current data and theory concerning how neuron circuits produce behavior. Mechanisms of perception, response selection, motor pattern generation, learning, and motivation, with emphasis on operation of these processes in well-defined neural circuits.

**119G. Psychobiology of Pain and Pain Inhibition.** Lecture, three hours. Prerequisites: course 115 and senior standing, or consent of instructor. Lectures and discussions on neural mechanisms of pain and problem of chronic pain disease.

**119I. Psychophysiology of Motivation.** Lecture, three hours. Prerequisites: course 115, junior standing. Basic psychophysiology, including brain and endocrine mechanisms, involved in control of motivation. Discussion of homeostatic drives such as hunger and thirst and nonhomeostatic drives such as reproduction behavior.

**M119J. Ethology: Physiology of Behavior and Learning in Animals.** (Same as Psychiatry M190.) Prerequisites: course 115, junior standing. Basic course for undergraduate students which integrates systematic overview of common forms of behavioral plasticity and standard training procedures in laboratory animals (in behavioral, neurophysiological, and pharmacological studies) with broad biological, evolutionary perspective.

**M119L. Human Neuropsychology.** (Formerly numbered 119L.) (Same as Neuroscience M119L.) Lecture, three hours. Requisites: courses 115 (or M117A and M117C), 120. Designed for juniors/seniors. Survey of experimental and clinical human neuropsychology; neural basis of higher cognitive functions. P/NP or letter grading.

**119M. Physiological Psychology of Learning.** Lecture, 90 minutes; discussion, 90 minutes. Prerequisites: course 115 and junior standing, or consent of instructor. Introduction to classical and current literature on mechanisms of learning, considering both cell-biological mechanisms and brain circuitry.

**M119N. The Visual System.** (Formerly numbered 119N.) (Same as Neuroscience M119N.) Lecture, three hours. Requisite: course 115 or Molecular, Cell, and Developmental Biology 171 or Neuroscience M101A or Physiological Science 111A. The ability to image and analyze the visual world is a truly remarkable feat. Coverage of anatomy and physiology of visual processing from the retina to visual cortex through lectures, extensive reading, and discussions.

**M119O. Psychology of Aging.** (Same as Gerontology M119O.) Requisite: course 115. Designed for juniors/seniors. Aging refers to developmental changes occurring at end stages of life. Some alterations that occur represent improvement, others are detrimental. Examination of impact of aging process on mental phenomena and exploration of ways in which positive changes can be maximally utilized and impact of detrimental alterations minimized. P/NP or letter grading.

**120. Cognitive Psychology.** Lecture, three hours; discussion, one hour. Prerequisites: courses 10, 41, junior standing. Survey of cognitive psychology: how people acquire, represent, transform, and use verbal and nonverbal information. Perception, attention, imagery, memory, representation of knowledge, language, action, decision making, thinking.

**121. Laboratory in Cognitive Psychology.** Prerequisites: courses 10, 41, 42, 120 (may be taken concurrently), psychology or cognitive science major standing. Laboratory experience with methods and phenomena from research on human perception, memory, and cognition.

**122. Language and Communication.** Lecture, three hours. Prerequisite: course 10. Introduction to psychology of language and communication; verbal and nonverbal channels; interlinguistic and intralinguistic variation; animal communication; biological bases of language; production and comprehension of speech and writing; relation to perception, memory, and thought; conversational interaction; language development.

**123. Psycholinguistics.** Prerequisite: junior standing. Current theory and research in psycholinguistics: survey of language acquisition, language perception, and language production; language physiology and pathology; problems of representation, sequencing, and timing in language and other cognitive skills; errors in speech production and perception.

**124A. Sensation and Perception.** Lecture, three hours. Prerequisites: courses 10, 41, 120, junior standing. Contemporary research and theory about visual and auditory perception. Topics include physiological mechanisms, psychophysical studies and models, and computational approaches.

**124AH. Sensation and Perception (Honors).** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 124A.

**124B. Visual Information Processing.** Lecture, two hours; discussion, one hour. Prerequisites: courses 10, 41, and 120, or consent of instructor. Exploration of issues in visual information, such as storage and representation of visual information in memory, pattern recognition, nature and role of attention in visual processing, word and picture recognition, object perception, and imagery. Possible consideration of developmental aspects.

**124C. Human Memory.** Lecture, two hours; discussion, one hour. Prerequisites: course 120, junior standing. Analysis of recent research on basic processes and structural components that comprise the human memory system. Discussion topics include practical implications of such research for instruction, marketing, and witness testimony.

**124D. Principles of Human Performance.** Prerequisite: psychology major standing or consent of instructor. Investigation into laboratory-based methods and principles of human performance. Major topics include research methods for human performance, central control of movements, anticipation and timing, automaticity, sensory involvement in action such as vision and kinesthesia, role of reflexes, speed-accuracy trade-offs, and individual differences and abilities. Principles discussed should have relevance for numerous real-world situations in which complex perceptual-motor skills are required, such as in industrial or occupational settings, musical performances, vehicle control, and sport.

**124E. Language and Cognition.** Lecture, three hours; outside study, nine hours. Prerequisites: courses 10, 120, and junior standing, or consent of instructor. Recent theories of language and cognition; nature of categories, feedback, and error detection in language and cognition; modularity; ambiguity; knowledge acquisition; processes and representations underlying perception, production, attention, and awareness in language and cognition.

**124F. Thinking.** Lecture, three hours. Prerequisite: course 120. Analysis of experimental studies of human categorization, reasonings, decision making, problem solving, creativity, and related topics.

**124FH. Thinking (Honors).** Lecture, three hours. Honors course parallel to course 124F. P/NP or letter grading.

**127. Abnormal Psychology.** Lecture, three hours. Prerequisite: course 10. Study of dynamics and prevention of abnormal behavior, including neuroses, psychoses, character disorders, psychosomatic reactions, and other abnormal personality patterns.

**127H. Abnormal Psychology (Honors).** Lecture, three hours. Prerequisite: consent of instructor. Overview of characteristics of major forms of psychopathology, theories and research on causes of disorder, types of treatment, social and legal issues in mental illness.

**129A. Personality Measurement.** Lecture, three hours. Prerequisites: courses 10, 41. Rationale, methods, and content of studies dealing with problems of describing persons in terms of a limited set of dimensions. Detailed consideration of research literature dealing with a few representative personality dimensions.

**129B. Introduction to Psychoanalysis.** Lecture, three hours. Prerequisites: courses 10, 41. Development of Freud's ideas from 1895 to 1926, with emphasis on how his theory evolved from a drive-based reinforcement model to the structural theory in which unconscious fantasy plays a crucial role. Coverage of developments beyond Freud, especially work of the British school under leadership of Klein, Winnicott, and Bim.

**129C. Culture and Mental Health.** Lecture, two hours; discussion, one hour; outside study, nine hours. Prerequisites: courses 10, 41. Introduction to study of culture and human behavior in general, and culture and mental health in particular. Emphasis on cultural groups that comprise major U.S. ethnic groups (i.e., African Americans, Latinos/Chicanos, Asian Americans, and American Indians).

**129D. Personality.** Lecture, three hours. Prerequisite: course 10. Not open to students with credit for former course 125 prior to Fall Quarter 1993. Survey of major topics in field of personality, including personality theory, personality assessment, and physiological, behavioral, and cultural role of perception, learning, and motivation in personality.

**129E. Human Sexuality.** Lecture, three hours. Prerequisite: senior psychology major standing. Overview of psychology of human sexuality. Psychological research, assessment, and therapy described in a format which highlights their significance for understanding human sexual functioning. Psychological mechanisms underlying expression of human sexuality.

**129F. Clinical Psychology of Childhood and Adolescence.** Lecture, two hours; discussion, one hour. Prerequisite: course 127. Survey of child and adolescent psychopathology and psychotherapy from a developmental perspective. Coverage includes such conditions as anxiety disorders, depression, conduct and attention problems, eating disorders, and autism, with information on prevalence, causes, common treatments and their effects. P/NP or letter grading.

**130. Developmental Psychology.** Lecture, three hours; discussion, one hour. Prerequisites: courses 10, 41, junior standing. Elaboration of developmental aspects of physical, mental, social, and emotional growth from birth to adolescence.

**131. Research in Developmental Psychology.** Discussion, one hour; laboratory, three hours; outside study, eight hours. Prerequisites: courses 10, 41, 42, and 130 or one course from 133A through 133I. Designed for psychology and cognitive science majors. Forms of scientific writing; ethics of research, especially with minors; special advantages and problems of asking developmental research questions; relevant methodologies for experimental and observational work; data analyses and data presentation options.

**132. Learning Disabilities in Perspective.** Lecture, three hours. Prerequisite: upper division standing. Exploration of different orientations to persons with learning problems, emphasizing assessment and intervention approaches and psychological impact of such approaches. Topics include interaction of learner and environment, sociopolitical nature of classroom, psychological impact of schooling, grades, and evaluations, process vs. goal focus in learning.

**133A. Adolescent Development.** Lecture, three hours. Prerequisites: courses 10, 41. Examination of cognitive, social, physical, and physiological development of the adolescent. P/NP or letter grading.

**133B. Cognitive Development.** Lecture, three hours. Prerequisites: courses 10, 41. Major theories, approaches, and issues in study of cognitive development. Readings include original research on important topics such as development of perception, language, thinking, and problem solving, and acquisition of concepts and domain-specific language.

**133BH. Seminar: Cognitive Development (Honors).** Seminar, three hours. Prerequisite: consent of instructor. Honors course parallel to course 133B.

**133C. Language Development.** Lecture, three hours. Prerequisites: courses 10, 41. Application of principles of cognitive development, learning, and perception to study of language development. Topics include first and second language acquisition (sounds, meanings, grammatical structures), learning mechanisms, communication skills, and relation between language and thought in children. P/NP or letter grading.

**133D. Social and Personality Development.** Lecture, three hours. Prerequisites: courses 10, 41. Theory and research on social and personality development during childhood. Topics include parent/child attachment, temperament, self-control, aggression, sex-typing, self-concept, moral reasoning and behavior, social status and social skills, and peer group relations. P/NP or letter grading.

**133E. Perceptual Development.** Lecture, three hours. Prerequisites: courses 10, 41. Topics include origins and development of human perceptual abilities, origins of knowledge about functionally important aspects of the environment, ecological and computational issues in perception, research and theory about initial perceptual capacities, and some sensory foundations. P/NP or letter grading.

**133F. Psychology and Education.** (Formerly numbered 134.) Lecture, three hours. Prerequisites: courses 10, 41. Application of principles of cognitive development, learning, and perception to educational problems. Topics include general instructional issues, psychology of reading and mathematics, exceptional children, early childhood education, and education of the disadvantaged. P/NP or letter grading.

**133G. Culture and Human Development.** Lecture, three hours. Prerequisites: courses 10, 41. Role of culture in human development through psychology, anthropology, and autobiography. Students relate material from lectures and readings, through empirical research projects, to diverse cultural backgrounds in class, at UCLA, and in the broader community. P/NP or letter grading.

**133I. Applied Developmental Psychology.** Lecture, three hours. Prerequisites: courses 10, 41. Application of developmental psychology to issues pertaining to improving well-being of children and their families. Topics include quality of child care, patterns and ranges of normal child behaviors, developmental disabilities, safety, legal, and public policy issues, child-rearing practices. P/NP or letter grading.

**133X. Applied Developmental Psychology.** Lecture, 90 minutes; discussion, 90 minutes. Prerequisite: course 10. Intended for applied developmental psychology minors. Issues on improving well-being of children and their families, relating research literature to ongoing fieldwork experiences through lectures and discussion, conducting and writing up assessment and observation of children, and designing daycare curricula. P/NP grading.

**133Y. Advanced Applied Developmental Psychology.** Lecture, 90 minutes; discussion, 90 minutes. Prerequisites: courses 10, 133X. Intended for applied developmental psychology minors. Advanced issues on improving well-being of children and their families, relating research literature to ongoing fieldwork experiences through lectures and discussion, conducting and writing up assessment and observation of children, and designing daycare curricula. P/NP grading.

**135. Social Psychology.** Lecture, three hours; discussion, one hour. Prerequisites: courses 10, 41, junior standing. Interrelationships between the individual and his social environment. Social influences on motivation, perception, and behavior. Development and change of attitudes and opinions. Psychological analysis of small groups, social stratification, and mass phenomena.

**136A. Social Psychology Laboratory.** Lecture, one hour; laboratory, four hours. Prerequisites: courses 41, 42, 135 (may be taken concurrently), psychology major standing. Introduction to research designs and methods used to test social psychological hypothesis, including experiments, observation, content analysis, and/or questionnaires.

**136B. Nonexperimental Methods in Social Psychology.** Lecture, two hours; laboratory, two hours. Prerequisites: courses 41, 42. Designed for psychology majors. Research experience with nonexperimental methods for study of social attitudes or behavior, including fieldwork with survey research, naturalistic observation, or questionnaires.

**136C. Survey Methods in Psychology.** Lecture, two hours; laboratory, three hours. Prerequisites: courses 41 (or Statistics 50), 42, psychology major standing. Survey research in psychology, with particular emphasis on surveys of social and political attitudes. Actual experience in systematic survey research such as that done by media polling agencies, market research companies, and academic survey research centers. Topics include survey design, sampling, interviewing techniques, response rates, questionnaire design, data coding, and analysis. Training in telephone interviewing techniques in laboratories.

**137A. Sport Psychology.** Lecture, three hours. Prerequisite: junior psychology major standing. Introduction to field of sport psychology. Coverage of research and applied aspects of a range of topics, including youth sport participants as well as world-class performers.

**137AH. Sport Psychology (Honors).** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 137A.

**137B. Attitude Formation and Change.** Lecture, three hours. Prerequisites: courses 10, 41, 135. Structure and functions of attitudes, their measurement, how they develop, and methods for changing them.

**137C. Close Relationships.** Lecture, three hours. Prerequisites: courses 10, 41, 135. Examination of research and theory about friendship, dating, and marriage, with emphasis on how these relationships are affected by gender and changing sex roles.

**137D. Introduction to Health Psychology.** Prerequisite: course 10. Areas of health, illness, treatment, and delivery of treatment that can be elucidated by understanding of psychological concepts and research, psychological perspective on these problems, and how psychological perspective might be enlarged and extended in the medical area.

**M137E. Work Behavior of Women and Men.** (Same as Women's Studies M137E.) Prerequisite: course 10 or Women's Studies 10 or senior standing. Examination of work behavior of women and men. Topics include antecedents of career choice, job findings, leadership, performance evaluation, discrimination and evaluation bias, job satisfaction, and interdependence of work and family roles.

**137I. Interpersonal Influence and Social Power.** Lecture, three hours. Prerequisite: course 135. Theory and research focusing on how people influence one another and resist such influence, and on the bases of social power. Motivations and effects of influence for the powerholder and target of influence. Applications to such problems and issues as power and leadership in organizations, interpersonal influence and health, power relationships in the family, interpersonal influence in everyday life, social power of political figures.

**M137J. Psychology of Language and Gender.** (Same as Communication Studies M124 and Women's Studies M137J.) Lecture, three hours. Prerequisites: course 10 or equivalent, junior standing. Examination of current topics at intersection of gender and language. Topics include sex differentiation in language cross-culturally; sex bias in lexicon and usage; sex differences in lexicon, syntax, phonology, and nonverbal behavior; development of sex-differentiated language in children; "women's" and "men's" language in various racial/ethnic/class/sexual preference groups; and conversational interaction.

**M138. Electoral Politics: Political Psychology.** (Same as Political Science M141A.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 10. Examination of political behavior, political socialization, personality and politics, racial conflict, and psychological analysis of public opinion on these issues.

**M140. Introduction to Study of Aging.** (Same as Gerontology M140 and Social Welfare M140.) Lecture, three hours. Designed for juniors/seniors. Perspectives on major features of human aging — biological, social, psychological, and humanistic. Introduction to information on the range of influences on aging to prepare students for subsequent specialization. P/NP or letter grading.

**142. Advanced Statistical Methods in Psychology.** (Formerly numbered M142.) Lecture, two hours; discussion, 90 minutes. Prerequisite: course 41. Survey of statistical techniques commonly used in psychology, education, and behavioral and social sciences: correlational techniques, analysis variance, and multiple regression.

**144. Psychological Tests and Evaluation.** Prerequisite: course 41. Further study of principles of measurement, stressing basic concepts. Application to problems of test construction, administration, and interpretation.

**150. Mathematical Models in Psychology.** Lecture, two hours; discussion, two hours. Prerequisites: Mathematics 3C or 31B, Computer Science 10C or 10F, or consent of instructor. Review of theoretical models and experimental evidence for these models in various areas of psychology. Topics include mathematical computer models of learning, perception, cognition, and personality.

**151. Computer Applications in Psychology.** Lecture, two hours; discussion, two hours. Prerequisites: Computer Science 10C or 10F, consent of instructor. Topics include hardware and software computer problems in design, control, and analysis of experiments; programming problems arising in evaluation of models of psychological processes of various content areas such as learning, perception, social, personality, and clinical.

**M163. Death, Suicide, and Trauma.** (Same as Sociology M138.) Lecture, three hours. Prerequisite: junior standing. Definition and taxonomy of death; new permissiveness and taboos related to death; romanticization of death; role of the individual in his own demise; modes of death; development of ideas of death through life span; ways in which ideas of death influence conduct of lives; impact of dying on social structure surrounding the individual; preventive, interventional, and postventive practices in relation to death and suicide; developmental perspective on witnessing traumatic death, including posttraumatic and grief reactions; partial death; megadeath; lethality; psychological autopsy; death of institutions and cultures. P/NP grading recommended (letter grading required if course to be applied toward psychology or sociology major).

**M165. Psychology of Gender.** (Same as Women's Studies M165.) Lecture, three hours. Consideration of psychological literature relevant to understanding contemporary sex differences. Topics include sex-role development and role conflict, physiological and personality differences between men and women, sex differences in intellectual abilities and achievement, and impact of gender on social interaction.

**168. Environmental Psychology.** Lecture, three hours. Prerequisites: courses 10, 41. Research-oriented course which surveys theoretical and methodological issues which comprise the area of environmental psychology. Discussion of basic dimensions of emotional response to physical and social environments, measurement of information of rate of situations, and personality variables that are relevant to environmental theory. Residential, therapeutic, work, and recreational environments within a unified framework.

**170A. Behavior Modification.** Lecture, three hours. Prerequisite: upper division standing or consent of instructor. Applied behavior theory; study of application of principles derived from learning theory, as in classical and instrumental (operant) conditioning, to treatment of developmentally disabled, autistic, and schizophrenic children, adult schizophrenics, affective disorders, anxiety states, drug abuse, marital discord, etc. Lectures, discussions, and demonstrations.

**170B. Fieldwork in Behavior Modification.** Discussion, two hours; fieldwork, six hours. Prerequisites: course 110 with a grade of A or 170A, consent of instructor. Fieldwork in applied behavior theory, especially to problems of retarded and autistic children.

**170C. Advanced Fieldwork in Behavior Modification for Nonpsychology Majors.** Lecture, two hours; fieldwork, six hours. Prerequisites: course 170B, consent of instructor. Not open to students with credit for course 171A. Does not fulfill laboratory requirement for majors. Advanced fieldwork in applied behavior theory, especially related to problems of retarded and autistic children. Review of current research in the field. May not be applied as an elective toward any Psychology Department major.

**171A. Advanced Fieldwork in Behavior Modification for Psychology Majors.** Discussion, two hours; fieldwork, six hours; to be arranged, 20 hours. Prerequisites: course 170B, psychology major standing, consent of instructor. Advanced fieldwork in applied behavior theory, especially related to problems of retarded and autistic children. Students design and carry out individualized experimental study to evaluate behavioral interventions with developmentally disabled clients.

**171B. Practicum: Design and Implementation of Behavioral Interventions.** Discussion, two hours; fieldwork, six hours; to be arranged, 20 hours. Prerequisites: course 171A, consent of instructor. Design and implementation of behavioral interventions with developmentally disabled children. Topics include goal selection, ethical considerations, behavioral contracting, client right and human use procedures, home and community management, parent and staff training, working with schools, clinical issues.

**M172. The Afro-American Woman in the U.S.** (Same as Afro-American Studies M172 and Women's Studies M172.) Limited to juniors/seniors. Impact of social, psychological, political, and economic forces which impact on interpersonal relationships of Afro-American women as members of a large society and as members of their biological and ethnic group.

**173. Advanced Abnormal Psychology.** Lecture, three hours. Prerequisites: courses 10, 41, 127. Examination of research and theory concerning origins, course, and outcomes of disordered behavior. Focus on continuity and change in patterns of behavior, assessment methods, and research approaches. Concentration on one of following: childhood disorders, anxiety and stress, the schizophrenias, or mood disorders.

**174. Interpersonal Process Analysis.** Lecture, two hours; laboratory, three hours. Prerequisites: courses 41, 42, 127, psychology major standing. Introduction to conceptual tools for analyzing interpersonal structures and functions in goal-oriented human interaction such as psychotherapy, persuasion, courtship, etc. Small group exercises integrated with lecture and discussion (additional laboratory work to be arranged).

**175. Community Psychology.** Prerequisites: junior or senior psychology major standing, consent of instructor. Application of psychological principles to understanding and solution of community problems. Topics include community development, community mental health problems, drugs, racism, and rehabilitation of prisoners.

**175H. Community Psychology (Honors).** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 175.

**M176. Communication and Conflict in Couples and Families.** (Same as Communication Studies M116.) Lecture, 90 minutes; discussion, 90 minutes. Prerequisites: courses 10, 41, and 127, or consent of instructor. Examination of (1) dysfunctional communication and conflict in couples and families and (2) relationship of these processes to individual psychopathology, marital discord, and family disruption (e.g., separation and divorce).

**177. Counseling Relationships.** Prerequisites: courses 10, 41, 127, junior or senior standing, and consent of instructor, or junior or senior psychology major standing. Conceptual and empirical foundations of psychological counseling; comparison of alternative models of counseling processes. Emphasis on counseling approaches in community mental health areas such as drug abuse, suicide prevention, and crisis intervention.

**178. Human Motivation.** Lecture, three hours. Prerequisite: upper division standing. Examination of theories of human motivation, experimental findings supporting the theories, and history of study of motivation. Topics include sociobiology, conflict, aspiration level, achievement strivings, and causal attributions.

**178H. Human Motivation (Honors).** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Honors course parallel to course 178.

**179A. Health Behavior and Health Status of Ethnic Groups: Behavioral Perspective.** Lecture, three hours. Prerequisites: course 10, junior or senior standing. Survey course of psychological aspects of health behavior and health status in major ethnic groups in the U.S. Emphasis on major diseases outlined by the U.S. Public Health Service (USPHS).

**179B. Biomedical and Psychosocial Aspects of AIDS/HIV.** Lecture, three hours. Prerequisites: course 137D or 179A or Health Services 100, junior or senior standing. Basics of epidemiology of the disease, routes of transmission, clinical characteristics of AIDS, neurological and psychological aspects of coping with HIV infection and AIDS. Presentation of biologic, behavioral, and therapeutic interventions.

**M180A. Contemporary Problems in Mental Retardation.** (Same as Psychiatry M180A.) Prerequisites: courses 10, 41, and 127 or 130. Corequisites: courses M181A-M181B. Limited to Immersion Program students. Presentation of concepts, issues, and research techniques in the area of mental retardation. Biological, psychological, and community questions concerning causes and treatment of developmental disabilities, as well as systems for care and training of retarded individuals. Lectures, directed reading, and discussion.

**M180B. Contemporary Issues in Mental Retardation.** (Same as Psychiatry M180B.) Prerequisite: course M180A. Limited to Immersion Program students. Psychoeducational issues in mental retardation relating literature to ongoing field experiences through lectures, discussions, media, and six student papers.

**M181A-M181B. Research in Contemporary Problems in Mental Retardation.** (Same as Psychiatry M181A-M181B.) Corequisites: courses M180A, M180B. Research experience. In Progress grading.

**186A. Cognitive Science Laboratory: Introduction to Theory and Simulation.** Lecture, two and one-half hours; discussion, 30 minutes; laboratory, three hours. Prerequisites: course 85, Program in Computing 15, and junior departmental major standing or consent of instructor. Models in several psychological domains (e.g., visual perception, categorization, reasoning, and problem solving). Types of models include semantic networks, search, production systems, connectionist networks, and mathematical models. Lectures and discussions interwoven with computer simulations written in common LISP.

**186B. Cognitive Science Laboratory: Neural Networks.** Lecture, two and one-half hours; discussion, 30 minutes; laboratory, three hours. Prerequisites: course 85, Program in Computing 10A, 10B (or PASCAL), and junior departmental major standing or consent of instructor. Recommended: knowledge of calculus. Lectures and laboratory work in neural network modeling of perception and cognition. Specific topics include essential neurophysiology, basic architectures, learning, and programming techniques. Principles illustrated and discussed in context of models of specific perceptual and cognitive processes. Simulations written in PASCAL.

**187A. Psychology and Law.** (Formerly numbered 187.) Lecture, two hours; discussion, two hours. Prerequisite: junior standing. Study of new topics on legal psychology, including suspect identification, witness reports, and police procedures. Outside speakers utilized in presentation of these materials. Students participate in presentations and/or discussions.

**187AH. Psychology and Law (Honors).** (Formerly numbered 187H.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Honors course parallel to course 187A.

**187B. Advanced Psychology and Law.** Lecture, three hours; discussion, one hour. Prerequisites: course 187A, junior standing. Study of additional topics on legal psychology, including gang violence, theories of crime, corrections, repeat offenders, community policing, and interrogation. Outside speakers utilized in presentation of these materials. P/NP or letter grading.

**188A. Research in Cognitive Science.** Seminar, two hours; laboratory, six hours. Preparation: cognitive science major standing, department consent. Practical applications of cognitive science through research. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. May be repeated once for credit. P/NP grading.

**188B. Fieldwork in Cognitive Science.** (Formerly numbered 188.) Seminar, two hours; fieldwork, six hours. Preparation: cognitive science major standing, department consent. Practical applications of cognitive science through fieldwork. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. May be repeated once for credit. P/NP grading.

**189. Ergonomics and Human Factors.** Lecture, three hours; outside study, nine hours. Prerequisites: courses 10, 120, junior standing. Examination of human capabilities and limitations in design of human/machine systems such as vehicles, workspaces, and computer software for goals of safety and efficiency. Topics include sources of error, information processing, manual control, training, and personnel selection.

**189H. Ergonomics and Human Factors (Honors).** Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: consent of instructor. Honors course parallel to course 189. P/NP or letter grading.

**190A-190B-190C. Honors Course.** Seminar, two hours. Prerequisite: psychology honors program standing. Opportunity for development and analysis of creative ideas through individual research projects with a faculty sponsor and discussion of student and faculty research presentations. Information and applications may be obtained from Undergraduate Advising Office, 1531 Franz Hall. If approved in advance by Undergraduate Office, course 190C may be applied toward elective course requirement for any Psychology Department major.

**192. Practicum in Teaching Psychology.** Prerequisites: junior or senior psychology, cognitive science, or psychobiology major standing, consent of department. Training and supervised practicum for advanced undergraduates in teaching psychology. Students serve as junior teaching assistants and assist in preparation of materials and development of innovative programs. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. P/NP grading.

**193. Fieldwork in Psychology.** Seminar, two hours; fieldwork (approved community setting), six hours. Prerequisites: sophomore prepsychology, precognitive science, prepsychobiology, psychology, cognitive science, or psychobiology major standing, consent of department. Fieldwork in applications of psychology. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. P/NP grading.

**194A. Research in Psychology.** (Formerly numbered 194.) Seminar, one hour; internship (approved research setting), seven hours. Requisites: sophomore prepsychology, precognitive science, prepsychobiology, psychology, cognitive science, or psychobiology major standing, consent of department. Practical applications of psychology through research. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. P/NP grading.

**194B-194C. Ongoing Research in Psychology.** (Formerly numbered 194B.) Seminar, one hour; internship (approved research setting), seven hours. Requisites: sophomore prepsychology, precognitive science, prepsychobiology, psychology, cognitive science, or psychobiology major standing, consent of department. Minimum of two terms required. Practical applications of psychology through research. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. In Progress and P/NP grading.

**197. Current Issues in Psychology.** Lecture, three hours. Prerequisite: junior or senior major standing (some sections may require consent of instructor). Study of selected current topics of psychological interest. Consult *Schedule of Classes* for topics and instructors. Only one graded 197 course may be applied as an elective toward psychology major. If content is approved in advance by Undergraduate Advising Office, psychobiology and cognitive science majors can petition to use course to satisfy an elective requirement. May be repeated for credit with consent of department.

**199. Directed Individual Research and Studies.** Prerequisites: junior or senior psychology, psychobiology, or cognitive science major standing (juniors must have at least 3.0 GPA in the major), consent of instructor and vice chair for Undergraduate Affairs (based on written proposal outlining course of study). Consult Undergraduate Advising Office, 1531 Franz Hall, for further information and approval forms. Only one four-unit 199 course may be taken per term and only one for a letter grade (additional 199 courses may be taken on a P/NP basis). If approved in advance by Undergraduate Office, four units of course 199 may be applied toward elective course requirement for psychology major and toward Psychology 188 requirement for cognitive science major.

## Graduate Courses

**200A. Animal Learning and Behavior.** Basic principles and characteristics of learning and behavior, including Pavlovian conditioning, instrumental learning, and species-specific behavior.

**200B. Human Learning and Behavior.** Lecture, three hours. Topics include human learning and conditioning and application of learning principles in etiology and treatment of a variety of socially significant problems.

**201. Current Issues in Learning and Behavior (1 unit).** Discussion, 90 minutes. Prerequisite: graduate standing. Required of learning and behavior students a minimum of four times (entire first year and winter of second year). Presentation of papers of current interest in learning, behavior, or applied behavioral analyses by experts in the field. Evaluation of their significance and methodology in detail. May be repeated for credit. S/U grading.

**204B. Theories of Learning.** Discussion, three hours. Prerequisite: course 200A or equivalent. Critical discussion and in-depth analysis of current major theoretical approaches to associative learning, with emphasis on recent experimental analyses of conditioning phenomena.

**204C. Applied Learning.** Lecture, three hours. Prerequisites: graduate standing in psychology, consent of instructor. Lectures and discussion on current research in application of learning principles to clinical and social problems such as alcohol and drug abuse, aggression, fear management, mental retardation, behavioral medicine, autism/schizophrenia, etc.

**204D. Fear and Anxiety.** Lecture, three hours. Prerequisite: graduate training. Presentation of theoretical and empirical advances, from biological and behavioral perspectives, in the area of fear and anxiety. Integration of animal and human research.

**204E. Primitive Motivational Processes.** Lecture, three hours. Prerequisite: graduate standing. Analysis, using a behavioral systems approach, of basic motivated behavior such as feeding, drinking, foraging, and reproduction. Same approach also applied to phenomena such as acquired motivation, reinforcement, and drug addiction. Historical survey of behavioral analyses of motivation and goal-directed behavior.

**204F. Animal Cognition and Cellular Basis of Learning.** Discussion, three hours. Prerequisite: graduate standing. Discussion of experimental literature on spatial and temporal learning, learning of relative rates of reward (the matching law), and classical conditioning, all treated from a computational/representational, perspective, with emphasis on implications for cellular bases of learning and memory. S/U or letter grading.

**205A. Behavioral Neuroendocrinology (2 units).** Lecture, three hours. Prerequisite: graduate standing. Mechanisms of hormone action on the brain that influence behavior, including permanent actions in development and transient actions in adulthood. Using a comparative approach, topics include sexual differentiation, long-term effects of stress, seasonal and other changes in adulthood, and aging.

**205B. Human Neurophysiology (2 units).** Lecture, three hours. Prerequisite: graduate standing. Examination of higher cognitive processes in terms of neural mechanisms that underlie them. Topics include cortical modularity and organization, coordinated sensory representation, language, regional functional specialization, attention, and regulation of cortical function by extracortical systems.

**205C. Neurotransmitters in Human Disorders of Motor and Cognitive Function (2 units).** Lecture, three hours. Prerequisite: graduate standing. Detailed analysis of molecules involved in interneuronal communication processes (i.e., neurotransmitters, neurohormones, "neuromodulators," neurotropic agents). Discussion of their roles in normal brain physiology, followed by detailed analyses of their perturbations in various disease states. Particular emphasis on current and past thinking about Alzheimer's disease, Parkinsonism, Huntington's disease, and Down's syndrome dementia.

**205D. Clinical Psychopharmacology (2 units).** Lecture, three hours. Prerequisite: graduate standing. General principles of brain neurotransmitters, including synthesis, cell bodies and pathways, and receptor subtypes. General principles of drug administration and pharmacokinetics. Major classes of psychoactive drugs, animal models, and "atypical" compounds.

**205E. Psychobiology of Emotion and Stress (2 units).** Lecture, three hours. Prerequisite: graduate standing. Overview of literature on role of the brain and autonomic and endocrine systems in emotion and stress-related responses. Some emphasis on involvement of neurotransmitters, neuropeptides, and hormones in emotional plasticity, visceral function, and bodily diseases.

**205F. Physiology of Learning (2 units).** Lecture, three hours. Prerequisite: graduate standing. Search for anatomical loci of engrams. Cell biology of plasticity, including electrophysiological and molecular approaches. Theories of how neural circuitry might be organized to make learning possible.

**205G. Pain (2 units).** Lecture, three hours. Prerequisite: graduate standing. Consideration of pain from both basic science and clinical perspectives. Discussion of nociceptors, spinal cord, brain mechanisms, pain inhibition, and role of endogenous opioids. Effects of pain and stress on immunity.

**205I. Motor Coordination (2 units).** Lecture, three hours. Prerequisite: graduate standing. Elementary and complex units of behavior: reflexes, servomechanisms, oscillators, and central pattern generators. Principles of coordination: efferece copy, oscillator coupling, potentiation, and depotentiation. Relation between levels of integration and anatomical levels: transections, lesions, focal stimulation, and single unit recording.

**205J. Homeostatic Drive, Hunger, and Thirst (2 units).** Lecture, three hours. Prerequisite: graduate standing. Homeostasis used as framework within which ingestive behavior is discussed. Analysis of thirst on basis of depletions of body fluid compartments. Consideration of hunger, focusing on two theories — "Glucostatic" and "Energostatic."

**205K. Vision Neurobiology (2 units).** Lecture, three hours. Prerequisite: graduate standing. Exploration of anatomy, physiology, and computation in visual system, focusing on retina, visual cortex, and overall performance.

**205L. Cognitive Neuroscience (2 units).** Lecture, three hours; Prerequisite: graduate standing. Overview of neural basis of higher cognitive functions, integrating anatomical, physiological, and behavioral approaches and incorporating clinical and experimental data. Systems covered include attention, perception, memory, language, and hemispheric specialization.

**205M. Neuropsychology of Perception (2 units).** Lecture, three hours (five weeks). Designed for graduate students. Examination of neural substrates of high-level visual processing. Topics include agnosias and characteristics of electrophysiological responses recorded in primate temporal lobe. Discussion of issues regarding neural representation of knowledge. S/U or letter grading.

**M205Z. Behavioral and Systems Neuroscience.** (Same as Neuroscience M205 and Physiological Science M205.) Lecture, three hours. Prerequisites: Neuroscience M201, M202, M203, and M204, or consent of instructor. Introduction to fundamentals of behavioral and systems neuroscience, with emphasis on role of behavioral analysis in understanding the functioning of nervous system and identifying anatomical circuits, cell physiological processes, and molecular mechanisms that mediate behaviorally defined functions.

**207A-207B-207C. Seminars: Physiological Psychology.** Prerequisite: course 115 or equivalent.

**210. Comparative Psychobiology.** Prerequisites: course 115 or equivalent, consent of instructor. Survey of determinants of species-specific behavior, including genetic influences and learning.

**212. Evaluation of Research Literature in Physiological Psychology (1 unit).** Discussion, 90 minutes. Prerequisite: consent of instructor. Papers of current interest presented by members of seminar and their significance and methodology discussed and criticized in depth. May be repeated for credit. S/U grading.

**M213. Neuroimaging and Brain Mapping.** (Same as Neuroscience M272 and Physiological Science M272.) Lecture, three hours; outside study, nine hours. Prerequisites: Neuroscience M201, M202. Recommended: mathematics and computer background. Theory, methods, applications, assumptions, and limitations of neuroimaging. Techniques, biological questions, and results. Brain structure, brain function, and their relationship discussed with regard to imaging.

**220A. Social Psychology.** Lecture, three hours. Prerequisite: graduate standing in psychology. Intensive consideration of concepts, theories, and major problems in social psychology.

**220B. Research Methods in Social Psychology.** Lecture, three hours. Prerequisite: graduate standing in psychology or consent of instructor. Research design and methodological issues in experimental and nonexperimental social research.

**220C. Advanced Social Psychology.** Lecture, three hours. Prerequisite: course 220A or 220D. Review of contemporary topics and issues in social psychological research and theory.

**220D. Introduction to Social Psychology.** Lecture, three hours. Prerequisite: graduate standing. Introduction to theory and research in social psychology for students who are not psychology majors. Service course for graduate students in education, sociology, political science, management, public health, etc.

**221. Seminar: Attitude Formation and Change.** Discussion, three hours. Prerequisites: courses 220A and 220B, or consent of instructor. Social psychological research and theories on opinions and attitudes. Effects of mass communication, social factors in assimilation of information and influence.

**222A. Interpersonal Relations.** Discussion, three hours. Prerequisite: course 220A or consent of instructor. Critical review of theory and research on interpersonal relations, with emphasis on friendship, dating, and marriage.

**222B. Interpersonal Influence and Social Power.** Seminar, three hours. Prerequisite: advanced social psychology course (psychological or sociological) or consent of instructor. Review of theory and research on interpersonal influence and social power, with applications to various power relationships such as supervisor/subordinate, health care professional/patient, doctor/nurse, parent/child, wife/husband, teacher/student, political figures, etc.

**223. Seminar: Social Survey Research.** Seminar, three hours. Prerequisite: course 220B or consent of instructor. Contemporary issues and topics in social survey research methodology.

**225. Seminar: Critical Problems in Social Psychology.** Discussion, three hours. Prerequisites: courses 220A and 220B, or consent of instructor. May be repeated for credit with consent of instructor.

**226A-226B-226C. Current Literature in Social Psychology (2 units each).** Discussion, 90 minutes. Prerequisite for courses 226B-226C: consent of instructor for nonsocial psychology students. Course 226A is limited to first-year social psychology students. Recent and current research papers in social psychology presented by members of seminar and their significance and methodology discussed and criticized in depth. S/U grading.

**227. Health Psychology.** Lecture, two hours; discussion, one hour. Prerequisite: undergraduate degree or training in psychology. Psychological and social factors involved in etiology of illness, treatment and course of illness, long-term care and adjustment of chronically ill or disabled, and practice of institutional health care and self-care.

**M228A. Proseminar: Political Psychology.** (Same as History M236A and Political Science M261A.) Discussion, three hours. Introduction to political psychology: psychobiography, personality and politics, mass attitudes, group conflict, political communication, and elite decision making.

**M228B. Seminar: Political Psychology.** (Same as Political Science M261D.) Discussion, three hours. Prerequisite: course 220A or Political Science M261A or consent of instructor. Examination of political behavior, political socialization, racial conflict, mass political movements, and public opinion.

**M228C. Critical Problems in Political Psychology.** (Same as Political Science M261E.) Discussion, three hours.

**229. Social Cognition.** Lecture, one hour; discussion, two hours. Social cognition is concerned with how people organize and interpret social information in their environment. Seminar provides broad background in the field and also gives depth and focus on particular research topics in the field. Weekly papers, as well as a lengthy final paper, required.

**231. Psychology of Gender.** Seminar, three hours. Prerequisite: one prior course on gender/women's studies or consent of instructor. Critical evaluation of current research and theory concerning psychology of gender, drawing on work from various areas of psychology to understand sources of gender differentiation and its consequences for human behavior and social interaction.

**232. Human Sexuality.** Lecture, three hours. Prerequisite: graduate standing. Designed to teach students how to carry out research on human sexual behavior. Contents include theory construction, scale development, physiological and endocrinological implications, radioimmunoassay (measuring hormones in blood sample), ethical issues, methodological and statistical considerations, measurement of sexual arousal, fantasy, and sexual dysfunction therapy. Discussion-oriented, with emphasis on operationalizing predictions concerning human sexual functioning.

**233. Seminar: Environmental Psychology.** Prerequisites: courses 235, 250A, 250B. Critical review of work in environmental psychology designed to identify basic dimensions for analysis of man/environment relationships. Use of human emotional responses to environments as intervening variables linking specific stimulus qualities to a variety of approach-avoidance behaviors. Individual differences and drug-induced states as these relate to emotional response dimensions used to explain within-individual differences in response to same environment over time or between-individual differences to same situation. Review of literature relating information rate from environments to arousal and preferences for those environments.

**234. Social Psychological Aspects of Competitive Youth Sport.** Prerequisite: consent of instructor. Review of research concerning social psychological aspects of competitive sport for children. Sport is presented as a major achievement domain for young participants. Topics include sources and consequences of competitive stress, significant adult influences and interactions, predictors of performance, determinants of participation and dropping out, and socialization through sport.

**235. Personality.** Survey of cognitive, analytic, and learning theory approaches to study of personality. Emphasis on intensive exploration of selected concepts and related research.

**M238. Survey Research Techniques in Psychocultural Studies.** (Same as Psychiatry M238.) Seminar, three hours. Designed for graduate students. Techniques for conceptualizing, conducting, and analyzing survey data; instruction in qualitative strategies for enhancing survey research on psychocultural problems.

**M239. Personality, Motivation, and Attribution.** (Same as Education M215.) Current research and theory relating personality variables (e.g., attributional styles, self-esteem) to motivational concerns such as persistence and intensity of behavior. Perceived causes of outcomes in achievement and affiliative domains.

**240A-240B. Developmental Psychology.** Lecture, three hours. Prerequisites: one undergraduate developmental psychology course, graduate standing. Consideration of variables influencing cognitive social and emotional development of the human organism from conception through adolescence. Emphasis on research methodology and research base for current theories of development.

**241. Current Developments in Developmental Psychology (1 unit).** Discussion, 90 minutes. Prerequisite: graduate standing in developmental psychology. Presentation of papers on current advances in developmental psychology and closely related areas by experts in the field. Emphasis on approaches to a problem, making it suitable to interweave presentations by graduate students.

**242A-242F. Seminars: Developmental Psychology.** Seminar, three hours. Prerequisites: courses 240A-240B or equivalent, consent of instructor. Each course may be taken independently and may be repeated for credit:

**242A.** Perceptual Development.

**242B. Cognitive Development.**

**242C. Socialization.**

**M242D. Social Development and Education.** (Same as Education M217A.) Biological and familial, school, and other influences on the child; development in context of current research and theoretical models; consideration of theoretical and methodological research on family, peer group, and school; application of developmental theory and research to educational practice.

**242F. Development of Language and Communication.**

**243A-243B. Seminars: Practical and Societal Issues in Developmental Psychology.** Seminar, three hours. Prerequisites: courses 240A-240B or equivalent, consent of instructor. Socialization processes in human development and implication for social/political, educational, research issues, values, and societal change. In Progress grading.

**244. Critical Problems in Developmental Psychology.** Lecture, three hours. Prerequisites: courses 240A-240B or equivalent, consent of instructor. Current problems; content varies depending on interest of class and instructor. May be repeated for credit with consent of instructor.

**M245. Personality Development and Education.** (Same as Education M217C.) Review of research and theory of critical content areas in personality development that bear on school performance: achievement motivation, self-concept, aggression, sex differences, empathy, and other social behaviors; review of status of emotional behavior in personality theory and development.

**M246. Psychological Aspects of Mental Retardation.** (Same as Psychiatry M246.) Lecture, 90 minutes. Discussion of psychological aspects of mental retardation, including classification, description, etiology, theory, prevention, treatment, assessment, modern and future developments, and input from other disciplines (ethics, law, religion, welfare systems).

**249. Evaluation Research.** Prerequisites: courses 250A, 250B. Introduction to evaluation research in psychology, with emphasis on clinical, community, and social psychology applications. Survey includes policy and strategy issues, design of evaluative studies, data analysis, and utilization of findings.

**250A. Advanced Psychological Statistics.** Review of fundamental concepts. Basic statistical techniques as applied to design and interpretation of experimental and observational research.

**250B. Advanced Psychological Statistics.** Advanced experimental design and planning of investigations.

**251A-251B-251C. Research Methods.** Limited to psychology graduate students. Students design and conduct original research projects under supervision of instructor in charge. It is anticipated that many students will complete their project in two terms (normally three terms allowed). S/U grading (course 251A only).

**252A. Multivariate Analysis.** Lecture, three hours. Prerequisites: courses 250A and 250B, or consent of instructor. Introduction to analysis of data having multiple dependent variables. Topics include continuous multivariate distributions, multiple regression, multivariate analysis of variance, discriminant analysis, canonical correlation, principal component analysis. Applications from clinical, cognitive, physiological, and social psychology. Computer methods.

**252B. Discrete Multivariate Analysis.** Lecture, three hours. Prerequisites: courses 250A and 250B, or consent of instructor. Introduction to analysis of frequency table data. Topics include categorical univariate and multivariate distributions, independence and conditional independence, log-linear models, multivariate categorical designs, and ordered categorical variables. Applications from various areas of psychology.

**253. Factor Analysis.** Theory and practice of factor analysis in psychological research. Methods of factor extraction and rotation. Applications of computers to computations in factor analysis.

**254A. Psychological Scaling.** Lecture, three hours. Prerequisite: graduate standing. Theory of measurement, law of comparative judgment, methods of unidimensional scaling, multidimensional scaling, and related topics of current interest.

**254B. Cluster Analysis.** Lecture, three hours. Prerequisite: graduate standing. Quantitative methods for classification. Theories and assumptions underlying major clustering methods. Use of methods in exploratory data analysis.

**255. Quantitative Aspects of Assessment.** Fundamental assumptions and equations of test theory. Current problems in assessment.

**M256. Advanced Regression Analysis.** (Same as Political Science M200E.) Seminar, three hours. Prerequisite: consent of instructor. Diagnostics, robust regression, cross validation, resampling, outliers, missing data, geometry of regression, validity of assumptions, categorical dependent variables, transformation of variables. Access to Macintosh computer very helpful.

**M257. Multivariate Analysis with Latent Variables.** (Same as Political Science M208D.) Lecture, three hours. Prerequisite: consent of instructor. Introduction to models and methods for analysis of data hypothesized to be generated by unmeasured latent variables, including latent variable analogues of traditional methods in multivariate analysis. Causal modeling: theory testing via analysis of moment structures. Measurement models such as confirmatory, higher-order, and structured-means factor analytic models. Structural equation models, including path and simultaneous equation models. Parameter estimation, hypothesis testing, and other statistical issues. Computer implementation. Applications.

**258. Special Problems in Psychological Statistics.** Lecture, three hours. Prerequisites: courses 250A and 250B, or consent of instructor. Special problems in psychological statistics and data analysis.

**259. Quantitative Methods in Cognitive Psychology.** Prerequisites: courses 250A and 250B, or consent of instructor. Number of nonstatistical mathematical methods and techniques commonly used in cognitive psychology. Topics include Markov chains, other stochastic processes, queueing theory, information theory, frequency analysis, etc.

**260A-260B-260C. Proseminars: Cognitive Psychology (1 unit each).** Presentation of research topics by students, faculty, and visiting scholars. May be repeated for credit. S/U grading.

**261. Perception.** Lecture, three hours. Prerequisite: consent of instructor. Concepts, theories, and research in study of perception. Considers the questions: Why do things look, sound, smell, taste, or feel as they do? What is the nature of perceptual systems? How do these systems process information?

**262. Human Learning and Memory.** Lecture, three hours. Prerequisite: consent of instructor. Contemporary theory and research in human verbal learning and memory; verbal and nonverbal learning and memory processes, structure and organization of short- and long-term memory.

**263. Psycholinguistics.** Lecture, three hours. Prerequisite: consent of instructor. Contemporary theory and research in psycholinguistics: coding and decoding, psycholinguistic parameters of language learning, speech recognition and perception.

**265. Thinking.** Lecture, three hours. Contemporary theory and research in thinking, problem solving, inference, semantic memory, internal representation of knowledge, imagery, concepts.

**266. Cognitive Science.** Lecture, three hours. Prerequisite: consent of instructor. Major issues in cognitive science. Representation of cognitive structures and higher-level processes. Specific areas include perception, learning and memory, problem solving, and reasoning. Relationships to artificial intelligence.

**268A-268E. Seminars: Human Information Processing.** Seminar, three hours. Topics vary with interests of instructor. Each course may be taken independently and may be repeated for credit; **268A.** Perception; **268B.** Human Learning and Memory; **268C.** Judgment and Decision Processes; **268D.** Language and Cognition; **268E.** Human Performance.

**269. Seminar: Cognitive Psychology.** Seminar, three hours. Prerequisite: consent of instructor. Discussion of problems in cognitive psychology that encompass more than a single subfield of the area. May be repeated for credit.

**270A-270B-270C. Foundations of Clinical Psychology.** Corequisites: courses 271A-271B-271C. Limited to graduate students in clinical psychology. **270A.** Analysis of phenomenological, theoretical, and research issues regarding etiology and mediating mechanisms in neurotic, affective, schizophrenic spectrum, and other personality disturbances. **270B.** Principles and methods of psychological assessment and evaluation. **270C.** Principles and methods of psychological intervention in individuals, families, and community settings.

**271A-271B-271C. Clinical Psychological Methods (2 units each).** Corequisites: courses 270A-270B-270C. Procedures in clinical psychology as applied in clinical and community settings. Supervised exposure to psychological attributes of psychopathology and procedures for psychological assessment, intervention, and research with clinical populations. Experience closely coordinated with content in courses 270A-270B-270C. S/U grading.

**271D. Clinical Research Laboratory (2 units).** Discussion, one hour; laboratory, one hour. Corequisites: courses 270A or 270B or 270C, and 271A or 271B or 271C. Limited to graduate students in clinical psychology. Acquaints students with faculty research interests and involves them in their course 251 research at an early stage to insure completion. S/U grading.

**271E-271F. Clinical Research Laboratories (2 units each).** Prerequisites: course 271D, graduate standing in clinical psychology. Required of first-year clinical psychology students. S/U grading. **271E.** Brief overview of research design issued in clinical psychology and practical issues in students' own research activities. **271F.** Discussions of students' particular research activities and issues, plus laboratories in computer analysis of statistical data.

**272A-272G. Advanced Clinical Psychological Methods.** Seminar, three hours. Prerequisite or corequisite: course 401 or 451. Each course may be taken independently for credit:

**272A.** Behavior Modification with Children. Prerequisites: courses 271A-271B-271C or consent of instructor. Course in series of clinical intervention and assessment offerings for second- and third-year clinical students that covers behavior modification research and practice in clinic, school, institution, and home settings.

**272C.** Clinical Interventions for Psychological Problems of Children.

**272D.** Family Therapy and Family Dynamics.

**272E.** Special Problems.

**272F.** Behavior Modification with Adults. Prerequisite: second-year graduate standing in clinical psychology. Current cognitive behavior modification principles and techniques. Major conceptual issues; specific techniques demonstrated and practiced by students to cover a range of adult problems such as depression, stress and anxiety, anger management, assertion problems.

**272G.** Marital Therapies. Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisites: courses 270A-270B-270C, 271A-271B-271C. Examination of assessment and treatment approaches for relationship problems in couples. Presentation, discussion, and illustration of procedures derived from social-learning, psychodynamic, and systems theories, with relevant research findings.

**275. Family Process: Psychological and Social Perspectives on the Family.** Various theoretical perspectives applicable to analysis of family structure and dynamics. Critical issues in application of family constructs to clinical problems.

**276. Clinical Approaches to Children with Learning and Related Behavior Problems.** Lecture, three hours; discussion, one hour. Prerequisite: doctoral standing. Theoretical and research issues and problems related to purposes of and practices involved in assessment and correction approaches for children with learning and behavior problems. Practicum experiences to illustrate course content and provide opportunities to improve research and clinical competence.

**277A-277B. Advanced Clinical Assessment.** Laboratory, two hours; additional hours to be arranged through Psychology Clinic. Prerequisite: graduate standing in clinical psychology. Projective techniques, clinical interpretation, case studies, psychological test battery, psychopathology, and application of assessment to problems in psychotherapy.

**279. Seminar: Research in Psychopathology.**

**M280. Affective Disorders (2 or 4 units).** (Same as Psychiatry M234.) Seminar, two hours. General topics related to primary affective disorders (depression, manic depressive illness), including diagnosis, pharmacology, epidemiology, psychology, phenomenology, biology, and treatment. Students enrolled for four units are assigned a more intensive reading list and required to make a presentation or prepare a research paper.

**283. Psychopathology.** Survey of dominant psychological attributes of particular forms of psychopathology, including analysis of status of various theories concerned with etiology and mediating mechanisms of personality, neurotic, schizophrenic spectrum, and affective disturbances.

**284. Seminar: Clinical Psychology and Communication.**

**M285. Cognitive Behavior Therapy with Children: Treatment and Systems of Care (2 or 4 units).** (Same as Psychiatry M277.) Seminar, 90 minutes. Prerequisites: graduate standing, consent of instructor. Cognitive/behavioral approaches to prevention and treatment of mental health problems in children. Examination of service delivery systems for treating troubled youth and discussion of issues with respect to current systems of care. Major problems include conduct disorders, attention deficit disorder, depression, anxiety, and learning disabilities.

**286. Issues and Concepts of Clinical Psychology.** Open to graduate students in majors other than clinical psychology. Survey of major issues and alternatives in current practice. Emphasis on assessment and intervention, with consideration of historical, theoretical, and research bases for current trends.

**287. Critical Problems in Clinical Research Methodology.** Prerequisites: courses 250A, 250B. Special problems of measurement and design in clinical research.

**290. History of Psychology.** Philosophical and historical context of contemporary psychology. Major trends from the 19th century to contemporary issues.

**291. Principles of Behavioral Pharmacology.** Prerequisite: consent of instructor. Intensive analysis of drug, brain, and behavior relationships. Discussion of nature and source of drugs, general aspects of pharmacology, neurotransmitters and basic neuropharmacology, principles of behavioral pharmacology, categories of psychopharmacological agents, and pharmacological approaches to study of drug addiction, schizophrenia, and other behavioral processes, both normal and pathological.

**292. Biobehavioral Mechanisms of Stress and Disease.** Lecture, three hours. Prerequisite: graduate standing in psychology or consent of instructor. Behavior/physiology interactions of some major bodily systems: nervous, cardiovascular, gastrointestinal, and endocrine systems. Usual and altered states of these systems (e.g., stress) as these can promote permanent tissue injuries, disease, or improved bodily function, health enhancement.

**293. Behavioral and Psychophysiological Problems of Alcoholism.** Prerequisite: consent of instructor. Behavioral and psychophysiological characteristics of alcoholism, along with theories concerning their etiology and treatment. Experimental approaches.

**M294. Seminar: Neural and Behavioral Endocrinology (2 units).** (Formerly numbered M294A-M294D.) (Same as Neurobiology M255 and Physiological Science M255.) Seminar, one hour; discussion, one hour. Topics include hormonal biochemistry and pharmacology. Hypothalamic/hypophyseal interactions, both hormonal and neural. Structure and function of the hypothalamus. Hormonal control of reproductive and other behaviors. Sexual differentiation of brain and behavior. Stress: hormonal, behavioral, and neural aspects. Aging of reproductive behaviors and function.

**M295. Laboratory for Naturalistic Observations: Developing Skills and Techniques.** (Same as Anthropology M236Q, Education M222A, and Psychiatry M235.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some uses of observations and their implications for research in social sciences. Students expected to integrate observational work into their current research interests.

**M296. Neurobiology of Sleep (3 units).** (Same as Neuroscience M259 and Psychiatry M249.) Lecture, one hour; discussion, two hours. Critical review of primary research publications concerning neural basis of sleep. Discussion of neural and biochemical control of REM and NREM sleep after reviewing sleep behavior and phenomenology, including developmental and comparative aspects. Presentation of relevant clinical phenomena. S/U or letter grading.

**297. Issues in Social Development of the Minority Child.** Seminar, three hours. Prerequisites: graduate standing, consent of instructor. Critical evaluation and integration of existing research on social psychological development of the minority child. Emphasis on socialization of cognitive and personality style, with goal of empirically clarifying issues raised in this area of developmental study.

**298. Special Problems in Psychology.** Content depends on interests of particular instructor. May be repeated for credit.

**299. Developmental Methodology.** Coverage of both theory and methods in measuring age-related changes in behavior. Experimental designs and data-analytic solutions to problems in measurement of change. Some experience in analysis of actual data sets.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**401. Fieldwork in Clinical Psychology (1 to 12 units).** Prerequisites: courses 271A-271B-271C. Students on practicum assignments are required to register for this course each term (except by consent of clinical program committee).

**402A-402B-402C. Clinical Research Practicum (2 units each).** Prerequisite: third-year graduate standing in clinical psychology. Required three-term practicum in clinical research methods. Alternate meetings cover research methodology and professional issues; remaining meetings center on student presentations of current and proposed research activity. S/U grading.

**410A-410B-410C. Clinical Teaching and Supervision.** Prerequisites: completion of Ph.D. comprehensive examinations, advancement to candidacy or preparation for dissertation research actively under way, consent of instructor and clinic steering committee. Study and practice of knowledge, concepts, and theories on teaching and supervision of applied clinical psychology.

**410D-410E-410F. Clinical Assessment Supervision.** Discussion, two hours; other, one hour. Prerequisite: third-year graduate standing in clinical psychology or consent of instructor. Study and practice of knowledge, concepts, and theories on teaching and supervision of psychological assessment.

**420A-420B. Health Psychology Practicum (2 units each).** Prerequisite: graduate standing. Determination of what areas of health, illness, treatment, and delivery of treatment can be elucidated by understanding of psychological concepts and research; psychological perspective on these problems; how psychological perspective might be enlarged and extended in the medical area. Through practical field placement, students apply knowledge acquired in class to research observation and/or clinical work in the field.

**421. Research in Social Psychology (2 units).** Discussion, two hours; reading and group work, four to six hours. Forum for faculty and graduate students pursuing research on a common topic to share research ideas, make research presentations, and obtain feedback on study designs, procedures, and results to foster collaborative investigations in common research areas. S/U grading.

**423. Social Survey Research Practicum.** Practicum, two hours; additional hours to be arranged. Methods of survey sampling, conduct and management of computer-assisted telephone interview surveys.

**425. Health Psychology Lecture Series (2 units).** Clinicians and researchers in health psychology from Los Angeles area present their research, programs, and/or clinical work as part of a training program in health psychology. May be repeated for credit. S/U grading.

**451. Internship in Clinical Psychology (6 to 12 units).** Prerequisite: course 401. Limited to students who have successfully completed departmental qualifying examinations. May be repeated for credit. S/U grading.

**454. Internship in Industrial Psychology (2 to 4 units).**

**495. Presentation of Psychological Materials.** Supervised practicum in undergraduate teaching. Students serve as discussion section leaders in selected undergraduate courses. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Research and Study in Psychology (2 to 12 units).** One 596 course is required during second year of graduate study, and one 596 or 599 course is required during each succeeding year of graduate study. (Terminal M.A. candidates are exempt from this requirement.) S/U grading.

**597. Individual Studies (2 to 12 units).** Intended primarily as preparation for Ph.D. qualifying examinations. May be required by some area committees as a prerequisite for taking examinations. S/U grading.

**599. Research for Ph.D. Dissertation (2 to 12 units).** Prerequisite: successful completion of qualifying examinations. One 599 course is required during each year following completion of qualifying examinations. S/U grading.

# PUBLIC HEALTH SCHOOLWIDE PROGRAMS

*School of Public Health*

UCLA  
16-071 Center for the Health Sciences  
Box 951772  
Los Angeles, CA 90095-1772  
(310) 825-5516  
<http://www.ph.ucla.edu/sao/>

## Scope and Objectives

The profession of public health is responsible for the protection, preservation, and promotion of the health of communities and populations. Although the health problems of today differ from those of the past and of the future, the professionals who make up the field need to be trained to respond to broad community problems utilizing the basic ideas of prevention of disease and promotion of well-being. This goal can be achieved only with an understanding of the health status of the population through data gathering and analysis, as well as knowledge of the complex relationships between disease process in the social and biological environment of the community.

The field of public health today needs practitioners from many disciplines. Candidates for graduate study may come from a wide variety of academic backgrounds, training, or experience, including both the natural and social sciences.

Certain degrees within the School of Public Health are not offered by the individual departments but are administered on a schoolwide level: the Master of Public Health; the Doctor of Public Health; the concurrent M.B.A./M.P.H. with the John E. Anderson Graduate School of Management and the concurrent M.A./M.P.H. with Islamic Studies; and two articulated M.A./M.P.H. degrees with African Area Studies and Latin American Studies.

For information on the Master of Science and Ph.D. degrees in Biostatistics, Environmental Health Sciences, Epidemiology, or Health Services, or the Master of Science and Ph.D. degrees in Public Health within the Department of Community Health Sciences, see the listings for those departments. For information on the interdepartmental D.Env. degree program housed in the Department of Environmental Health Sciences, see the listing for Environmental Science and Engineering.

Master of Science in Preventive Medicine and Public Health is not admitting new students at this time.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degrees

### Master of Public Health

The Master of Public Health (M.P.H.) is a professional degree in the field of public health. Students are expected to focus on public health practice and to acquire a broad knowledge related to professional skills.

### Admission

For admission to the Master of Public Health program, both the School of Public Health Application for Admission to Graduate Status and the UCLA *Application for Graduate Admission* must be completed. Three letters of recommendation, two from former professors and one from an employer (if no employer, three former professors), test scores, and transcripts are required before an application is considered complete. Application forms and the *Announcement of the UCLA School of Public Health* may be obtained by writing to the Student Affairs Office, School of Public Health, UCLA, Los Angeles, CA 90024-1772. It is the student's responsibility to ensure that the application file is complete.

The preferred date for receipt of applications for the following Fall Quarter is December 15. Applications received after this date have reduced opportunities for admission and financial aid.

Applicants must meet the University minimum of an acceptable bachelor's degree with a B average in upper division coursework and/or prior graduate study. Exceptionally qualified applicants may be considered on an individual basis. Prior field experience is not required as a condition of admission, although a background of public health experience may be considered. In addition, applicants must be accepted by and accommodated in the department of the School of Public Health in which they wish to study. Applicants who need help in deciding on a department should speak either to the department administrators or to the staff in the Student Affairs Office.

Applicants to the School of Public Health must perform satisfactorily on a recent Graduate Record Examination (GRE), Medical College Admission Test (MCAT), or Dental Admission Test (DAT). The Epidemiology Department requires GRE scores. MCAT or DAT scores are accepted only for applicants already holding M.D. or D.D.S. degrees. Graduate Management Admission Test (GMAT) scores are accepted only for applicants to the joint M.B.A./M.P.H. program. Applicants at the master's level require a minimum combined (verbal and

quantitative) GRE score of 1,100. The analytical section is not required. The Biostatistics Department has different criteria for evaluating performance on aptitude tests for its master's and doctoral degrees. Those applying to the biostatistics program should contact that department. No screening examination is required for admission; however, specified courses are required by the Departments of Biostatistics and Environmental Health Sciences. Applicants whose undergraduate coursework has been deficient in breadth of fundamental training have to take specified undergraduate courses after admission.

The prior program of study for applicants to the Master of Public Health degree should include adequate preparation in mathematics, physical sciences, biological sciences, and social sciences, and typically includes two courses each in mathematics, biological sciences, social sciences; one course in physical sciences; and other courses that constitute an adequate preparation for the proposed area of specialization.

Applicants whose prior work in the biological, physical, mathematical, and social sciences does not constitute adequate preparation for the proposed area of specialization must include courses in those sciences in their graduate programs; these may not be applied toward the minimum requirements for the degree.

*Interdivisional International Health.* The school offers several options for foreign or domestic students interested in international health. Faculty in all departments of the school are actively involved in health-related programs in foreign settings, and many departments on campus have international, health-related interests and courses relevant to health occupations and cross-cultural settings.

Applicants who are interested must specify the department (and program in Community Health Sciences Department) most relevant to their skills area on their application, clearly indicating their international interests. Once admitted, students are given an appropriate adviser and directed to the international health committee, which is interdepartmental and promotes internationally-oriented training and research. Its members consult with interested students and attempt to optimize the learning experience.

Applicants with particular interest in primary health care, including maternal and child health, family planning, applied nutrition, family health program planning, administration and evaluation, and refugee health, are advised to apply to the area of population and family health in the community health sciences.

### Biostatistics

Students concentrating in biostatistics should have completed at least one year of calculus. Majors in mathematics, statistics, computer science, or a field of application in biostatistics are preferred.

### Environmental Health Sciences

Students concentrating in environmental health sciences should have a bachelor's (or master's) degree in chemistry, physics, biology, engineering, or other appropriate field. Preparation should include at least three quarters of general chemistry (including quantitative analysis) and two quarters of organic chemistry and/or biochemistry, mathematics through calculus, three quarters of biological sciences, and three quarters of physics. Substitutions for these requirements are considered for applicants with an otherwise superior academic background.

### Health Services

Applicants interested in the joint M.P.H./M.B.A. program in the Health Services Department must take the GMAT, not the GRE.

Applicants to the one-year health services organization program in the Health Services Department must have a prior doctoral degree (M.D., D.D.S., J.D., Ph.D., or equivalent). Applicants with doctoral degrees from other countries should plan to take the two-year program. Satisfactory performance on the GRE is required, and a personal interview is recommended.

### M.P.H. Program for Health Professionals

Health and allied professionals who are unable to pursue a degree program during their regular working hours may earn the M.P.H. degree by completing coursework in intensive summer sessions and in extended weekend sessions during the academic year. Courses are taught by the faculty of the School of Public Health, and all five departments in the school have the option of offering a specialization in their area.

Applicants are expected to fulfill the minimum overall requirements for admission to the M.P.H. program. In addition, they must have at least three years' professional experience or its full-time equivalent in a health care setting.

The first year of study is devoted to the specific core requirements in the area of specialization and to the required M.P.H. core courses in Biostatistics, Community Health Sciences, Epidemiology, Health Services, and Environmental Health Sciences. The second year of study entails completing required and elective courses in the student's specialty area, a master's project, and a report on that project. The master's project, which includes an internship carried out under faculty supervision, addresses a significant public health problem. The master's report, based on that project, focuses on the integration and application of theoretical and methodological approaches within public health to a specific problem. For further information, contact the department of interest.

### Areas of Study

Areas of specialization and typical course plans, in addition to mandatory courses, are listed below.

### Biostatistics

Required department courses include Biostatistics 100A, 100B, and 100C (in exceptional circumstances, Biostatistics 110A, 110B, and 115 may be substituted); Biostatistics 402A, 402B (402B satisfies the field training requirement); Biostatistics 403, 406; and two courses from Biostatistics 200A through 200C, M210 through 219, 230 through M236 or 404 through 419 (except 406). Epidemiology 201A-201B are recommended. Elective courses should be selected in public health, biomathematics, or mathematics.

### Community Health Sciences

Students select one of the following areas of concentration: health education/promotion, international family health, public health nutrition, public health policy, or sociocultural aspects of health. All students are required to complete Community Health Sciences 210, 211A-211B, and 400. It is expected that Community Health Sciences 210 and 211A-211B be completed during the student's first three quarters in residence. Normally two years or six quarters are needed to complete the 60 units of coursework required. Candidates with a prior doctoral degree or advanced preparation in a related field may complete an M.P.H. degree in one year (48 units), but only after formal consideration and approval by the department's faculty.

*Health Education/Promotion.* Community Health Sciences 271, 282, 482, and 487 are required. In addition, two to three elective courses from the list of specialty areas are selected in consultation with the student's adviser. Individual and experimental courses may not be applied toward the required course units. Additional courses may be elected, in consultation with the faculty adviser, from within the school or in other schools/colleges at UCLA.

*International Family Health.* For health professionals (physicians, nurses, and nutritionists) who intend to work or have worked in developing areas and nonhealth professionals with work experience in international health, community development, or related work. Community Health Sciences 200, 434A, and 441 are required. In consultation with the adviser, additional elective courses are selected from Community Health Sciences 132, M140, 231, 233, M236, 246, 280, 294, 430A, 443, 447, 448 and relevant courses in other departments in the school or other schools/colleges at UCLA.

*Public Health Nutrition.* The public health nutrition specialization is for dietitians and nutritionists who have an R.D., are R.D.-eligible, or have an equivalent licensure/credential from another country; persons concurrently enrolled in internship leading to R.D. eligibility; physicians and dentists; and other health professionals on a case-by-case basis depending on completed graduate and undergraduate coursework. Community Health Sciences 231 and 443 are required. In consultation with the adviser, elective courses are selected from

Community Health Sciences 212, 218, M432, 436A, 436B, 444, and relevant courses in other departments in the school and currently under development in the Community Health Sciences Department.

*Public Health Policy.* The public health policy specialization provides education in the policy process and policy analysis applied to health promotion and disease prevention. In addition to department requirements, Community Health Sciences M252, M287, and 482 are required; the internship requirement may be reduced for students with extensive prior experience. In consultation with the adviser, the student must also select two courses from Community Health Sciences 214, 230, M236, 237, M274, 291, M432, and 436A-436B, and relevant courses from within the school or in other departments/schools at UCLA.

Sociocultural Aspects of Health is for students interested in the relation between location in the social system and health outcomes. In consultation with the adviser, students must also select four courses from Community Health Sciences 230, 235, 237, 238, M240, M244, M245A, M245B, M245C, 246, 272, 273, M275, 278, 281, 283, 284, 285, 290, 291, 431, M432, 433, 474, and relevant graduate and professional courses from within the school or in other schools/departments at UCLA.

### Environmental Health Sciences

Required courses include Biostatistics 100B; Environmental Health Sciences 201, 210, 230, 240, 250, 401 (or 410A and 410B), and M411. Each departmental required course may be waived if a similar college-level course has been taken elsewhere and the student can pass the waiver examination. Elective courses should be selected in the chosen area of specialization.

Units from the courses listed above sum to approximately 52. At least five of these courses must be graduate courses (200, 400, and 500 series). Thus, approximately 20 units are to be completed by specialty courses and electives for a two-year program, assuming a minimum of 12 units per quarter. It should be noted that the department core, supplemented by Environmental Health Sciences 470, satisfies the requirement for taking the registered sanitarian's examination.

### Epidemiology

Students with no prior clinical doctorate degree are required to complete Biostatistics 100B, Epidemiology 200, 201A-201B, 220, 400 and 12 elective units, at least four of which must be selected from one of the following courses featuring computer use and applications, or a relevant course decided upon after consultation with the adviser: Biostatistics 403, Epidemiology 410A, 410B, 414, 415, 418 and 261. The eight remaining units must be selected from either the computer use and applications courses or the following list of general electives: Epidemiology 202A, 202B, 203, 204,

210, M214, 223A, 223B, 224A, 224B, 227, M228, 230, 240, 241, 242, 243, 244, 246, 251, 252, 253, 260, 261, 263, 266, 270, M276, 280, 411, and M417.

Students with a prior clinical doctorate degree are required to complete Biostatistics 100B, Epidemiology 200, 201A-201B, 400 and eight total elective units from either the general list of electives or those featuring computer use and applications.

All students must submit a report demonstrating competence in epidemiologic methodology. The report may not be submitted prior to the completion of Epidemiology 400. Course 400 must be taken after completion of 201B.

### Health Services

Health Services specialization programs include (1) policy and management, (2) health services organization, and (3) a cooperative M.P.H./M.B.A. All specialization programs require Health Services 200A-200B-200C, 400, and a summer internship in a local health care organization, as well as School of Public Health core courses: Biostatistics 100A, Community Health Sciences 100, Environmental Health Sciences 100, and Epidemiology 100.

*Policy and Management.* The policy and management specialization is a two-year program requiring 18 full courses and a major written research report based on the summer internship. Required courses include Health Services 400, 422, Biostatistics 100B, and Health Services 236 and Management 403. In addition, students select five courses from Health Services 131, 134, M204A-C, 214, 220, 231, 232, M233, 234, 235, 239, 240, 244, 249A-L, M287, 431, 433, 434, 435, 436, 438, 439, 440A, 441, 442, 444, 446, or 447E. Students must select at least one other elective course and are encouraged to choose a course outside the Department of Health Services and/or the School of Public Health.

*Health Services Organization.* The health services organization specialization is a one-year program requiring a minimum of 12 full courses (48 units). Admission is limited to students with prior doctoral-level degrees (M.D., Ph.D., J.D., D.D.S., or equivalent). Required courses include Health Services 236 or Management 403. Students may petition to waive out of the summer internship and Health Services 400 requirements if they have prior experience of relevance to public health practice.

*Cooperative M.P.H./M.B.A.* The cooperative M.P.H./M.B.A. program is a three-year concurrent degree program. It requires a minimum of 12 full courses (48 units) in the School of Public Health and a summer internship in a local health care organization. Required courses include Health Services 400 and 422. Management 402 may substituted for Biostatistics 100A. Students are waived out of the Health Services 400 requirement if they have successfully completed an equivalent class in the M.B.A. program.

### Cooperative Master's Degrees

Following are descriptions of combined programs of study leading to the M.P.H. degree. In the articulated degree programs listed below, no course may be used for credit toward more than one degree.

#### M.A. African Area Studies/M.P.H.

The School of Public Health and the African Area Studies Program have an articulated degree program whereby students can work sequentially for the Master of Arts degree in African Area Studies and the Master of Public Health. By planning the major field emphasis in public health while working toward the M.A. in African Area Studies, it may be possible to shorten the amount of time it would normally take to complete both degrees.

Students interested in this articulated program should write to the Assistant Graduate Adviser, African Area Studies Program, UCLA African Studies Center, and/or the Student Affairs Office, UCLA School of Public Health.

#### M.A. Islamic Studies/M.P.H.

The School of Public Health and the Islamic Studies Program have a concurrent degree program whereby students can work for the Master of Arts in Islamic Studies and the Master of Public Health. Applicants interested in this concurrent program should write to the Islamic Studies Program and the Student Affairs Office, UCLA School of Public Health.

#### M.A. Latin American Studies/M.P.H.

The School of Public Health and the Latin American Studies Program have arranged an articulated degree program, organized to permit specializations within the M.A. and the M.P.H. degrees, with the award of both degrees after approximately three years of graduate study. Qualified students apply to the graduate adviser of the Latin American Studies M.A. degree program and to a relevant area of public health, such as (1) environmental and nutritional sciences, (2) epidemiology, (3) health education, (4) population and family health.

Potential applicants should contact the Graduate Adviser, Latin American Studies, UCLA Latin American Center, and/or the Public Health/Latin American Studies Articulated Degree Program Adviser, UCLA School of Public Health.

#### M.B.A./M.P.H.

The Department of Health Services and the John E. Anderson Graduate School of Management offer a three-year concurrent degree program designed for students who desire a management career in health care and related fields. The program reflects the combined interest of employers, faculty, and students who recognize the increasing challenges facing managers in the health care industry and the need for highly skilled and sensitive individuals who can creatively take on these challenges.

Students should request application materials from both the M.B.A. Admissions Office, Anderson Graduate School of Management, and the Health Services Management Program, UCLA School of Public Health. GMAT scores are required for admission.

### Course Requirements

Students must complete at least one year of graduate residence at the University of California and a minimum of 11 full courses (44 units), at least six of which must be graduate courses and at least two of which must be 400-series courses. Only one 596 course (four units) may be applied toward the six graduate courses; 597 and 598 courses may not be applied toward the degree. No more than 18 full courses are required for the degree.

Required school core courses include Biostatistics 100A or 110A; Community Health Sciences 100 (210 for community health sciences majors); Environmental Health Sciences 100 or 101; Epidemiology 100 (200, 201A-201B for epidemiology majors); and Health Services 100 (200A-200B-200C for health services majors). Each core course may be waived if the student has taken a similar college-level course elsewhere and can pass the waiver examination.

In addition to the core courses, at least three courses (two or four units) outside the student's area of specialization are strongly recommended.

Only courses in which a grade of C – or better is received may be applied toward the requirements for a master's degree. Students must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

### Comprehensive Examination Plan

Students must pass a comprehensive examination in their department. Students may be reexamined once. The aim of the examination, as a culminating experience, is to assess the student's ability to select theories, methods, and techniques from across the content matter of a field, integrate and synthesize knowledge, and apply it to the solution of public health problems.

### Thesis Plan

None.

### Doctoral Degree

#### Admission

In addition to the University minimum requirements, for admission to the Doctor of Public Health (Dr.P.H.) degree program, the school requires:

(1) Satisfactory performance on the Graduate Record Examination (GRE). Applicants at the doctoral level need a minimum combined (verbal and quantitative) score of 1,200. Applicants to the Department of Community Health Sciences, at the discretion of the department, may

substitute equivalent scores on the Medical College Admission Test (MCAT) or the Law School Admission Test (LSAT).

(2) Completion of the M.P.H. or a master's degree in an appropriately related field. If the master's degree is in a field other than public health, applicants must have taken the equivalent of the core mandatory M.P.H. courses or include them in the course of study after admission.

(3) At least a 3.0 junior-senior grade-point average, at least a 3.5 GPA in graduate studies or demonstrated superiority in graduate work, and at least a B in each of the mandatory core courses.

(4) A positive recommendation by a department in the School of Public Health. Applicants to the Department of Community Health Sciences must have acceptance by an initial doctoral adviser in the department.

(5) Approval by the doctoral admissions committee and the associate dean for Student Affairs. Screening examinations may be required by each department.

(6) A writing sample is required by the Department of Community Health Sciences.

(7) The Department of Community Health Sciences requires at least 600 on the Test of English as a Foreign Language (TOEFL) for students whose undergraduate degree is from an institution whose primary language of instruction is not English.

It is recommended that applicants to the Department of Community Health Sciences contact one or more members of the faculty whom they are considering as advisors in order to ensure acceptance by a faculty mentor as the initial adviser. The applicant should have favorable recommendations from teachers and employers concerning past performance and potential as a doctoral student in public health. The statement of purpose must be clear, outlining goals and career objectives as they relate to the focus of the doctoral program.

### Major fields or Subdisciplines

Major fields and subdisciplines and typical course plans, in addition to courses required for the master's degree, are listed below.

#### Biostatistics

A written screening examination of all students entering the doctoral program is required and must be successfully completed before the end of the first year in the program, if not taken prior to entering. Courses covered by this and other examinations are determined in consultation with an adviser and the department faculty. The following courses, if not already taken, should be included: Biostatistics 115, 200A, 200B-200C, M250A-M250B; any three additional graduate-level courses in biostatistics selected with consent of the adviser; three courses in the 400 series selected with consent of the adviser; Statistics M152A, 152B. All registered doctoral students enroll in Biostatistics

402B for one term each year. This may be used as the additional area of concentration referenced below.

In addition, six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments/programs other than Biostatistics are required for breadth. The department also requires an additional area of concentration which may be either inside or outside the school.

Electives, selected in consultation with the adviser, should be chosen from courses in mathematics, biomathematics, survey research methods, operations research, computer data processing, and other appropriate areas.

#### Community Health Sciences

There are five areas of specialization or examination within the department: public health policy, health education/promotion, sociocultural aspects of health, public health nutrition, and international family health.

#### Environmental Health Sciences

Recommended courses are determined in consultation with the adviser. Six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments other than Environmental Health Sciences are required for breadth. The major requires an additional area of concentration which may be either inside or outside the school.

#### Epidemiology

The recommended program includes additional courses in biostatistics, demography, and epidemiology beyond those required for the M.P.H.; courses or directed group study in specialized areas of infectious and chronic disease epidemiology or application of epidemiology to health planning, management, and/or policy; and laboratory and clinical studies in medical, health, or biological sciences.

Six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments other than Epidemiology are required for breadth. (Students may petition to include up to two 100-level courses.) The major requires an additional area of concentration which may be either inside or outside the school (e.g., biostatistics, biology, microbiology and immunology, neuroscience).

#### Health Services

The Dr.P.H. in Health Services is intended to prepare students for leadership positions in health services administration. In contrast to the Ph.D., the orientation is professional rather than academic and comprehensive rather than specialized.

The prerequisites are an M.P.H. degree or its equivalent, and full-time work experience in some aspect of public health is highly recommended. The candidate is then enrolled in the Dr.P.H. which may (with full-time study) be completed in three years.

In the first two doctoral years, the formal coursework is intended to acquaint students with the full scope of public health knowledge. Students are normally expected to complete 72 units or 18 full courses beyond the M.P.H. degree to develop mastery in the following areas: (1) basic tools of social analysis; (2) health and disease in populations; (3) promotion of health and prevention of disease; and (4) health systems and their management. The specific course program depends on the applicant's previous coursework and experience.

Students must take a minimum of six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments other than Health Services.

The third doctoral year includes a residency in a public or private health services organization, seminar courses (eight units) devoted to principles and strategies of health services leadership, and the preparation of a problem-solving dissertation related to the applicant's residency experience.

After completion of the second doctoral year, the candidate must pass a qualifying examination. Normally, one reexamination after failure is allowed. After the third doctoral year, a final oral examination based on the dissertation is required of all candidates.

### Course Requirements

Course requirements in the major field depend on the department/program and the field chosen. Students must take a minimum of six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments outside the major department.

The major department requires an additional area of concentration which may be either inside or outside the school. In departments allowing it, an equivalent field experience completed while a doctoral student and approved by the guidance committee may be substituted for the additional area of concentration.

#### Community Health Sciences

If the student does not have a master's degree in public health, the school's core courses for the Masters in Public Health (M.P.H) degree are required: Biostatistics 100A, Epidemiology 100, Health Services 100, and Environmental Health Sciences 100; and the department's core courses, Community Health Sciences 210, 211A, and 211B. Additionally, all students are required to take the following courses if they have not already taken them or their equivalents during the course of their master's studies: Community Health Sciences 212, Biostatistics 100A, 100B, and 406. These courses do not count toward the minimum course requirements for the doctoral degree.

In addition to the coursework specified above, the student must take a minimum of 48 units in residence in the doctoral program. Twenty of the 48 units required must be taken within the Department of Community Health Sciences. Only four units of individual studies (Communi-

nity Health Sciences 596) may be counted toward the 48-unit minimum requirement. Students must take a minimum of two courses (eight units) in research methodology (i.e., data acquisition) and two courses (eight units) in statistics (i.e., data analysis). These courses may be taken inside or outside of the School of Public Health. Students are required to attend the Doctoral Round Table (Community Health Sciences 242 or Community Health Sciences 286) continuously from the first year of residency until the student has been advanced to candidacy. The Doctoral Round Table does not fulfill any of the 48 units required for the doctorate.

Students must complete a minor which is expected to be in another department within the School of Public Health. Six graduate-level courses (24 units) are required, four units of which must be taken from within one department. Students must consult with their advisers before declaring a minor.

### Written and Oral Qualifying Examinations

Before advancement to candidacy, students must pass written examinations in the major prepared and administered by the guidance committee or by the faculty of the department. Normally no more than one reexamination after failure is allowed. The doctoral committee is nominated after the student has made a tentative decision on a dissertation topic.

The doctoral committee consists of at least four faculty members who hold professorial appointments. Two of the faculty must be tenured. Three of the four must hold appointments in Public Health; one must be an outside member who holds no appointment in Public Health; one of the four must be from the minor field.

The doctoral committee administers the University Oral Qualifying Examination after the written examinations have been successfully completed.

### Community Health Sciences

Before advancement to candidacy, all coursework must have been completed, and the student must have passed two written examinations and an oral qualifying examination in the major field. The first written examination is taken by all students. The other is tailored to the specific interests of the individual student. Both written examinations may be repeated only once. Additionally, the student must complete the requirements for the minor field.

The first examination provides an assessment of the student's breadth of substantive knowledge, theory, and methods that are common to the disciplines that comprise Community Health Sciences. Students are expected to demonstrate a coherent and well-synthesized command of this material. This examination is administered by the departmental doctoral committee in the Fall Quarter of each year. The second examination is in one of the areas of specialization: public health policy, health edu-

cation/promotion, sociocultural aspects of health, public health nutrition, and international family health. Students are expected to demonstrate in-depth knowledge in the area, and to be able to apply this knowledge and knowledge derived from the minor to problems or practice and policy. The examination is based on a reading list generated by the student in consultation with the student's guidance committee, which also administers the examination. It is administered after the first examination at a time that has been agreed upon mutually by the students and the guidance committee.

After the student has passed the written qualifying examinations and completed the minor requirements, and at least one month prior to taking the University Oral Qualifying Examination, a doctoral committee is nominated. The student first selects the committee chair, who also serves as the student's adviser. The student and chair then work together to nominate the remaining committee members. The doctoral committee consists of at least four faculty members including the chair, who hold professorial appointments at UCLA. Two of the faculty must be tenured. Two of the four must hold appointments in Community Health Sciences; one must be an outside member who holds no appointment in the school of Public Health; one of the four must be from the minor field. Eligible faculty include those in the tenure-eligible series, the in-residence series, acting or emeritus in these series; in addition, one of the four committee members, who may also cochair if appropriate, may hold an appointment in the adjunct or clinical professorial series. The composition of the committee must be approved by the department chair. The doctoral committee guides the student's progress toward completion of the dissertation.

The student is advanced to candidacy and commences work on a dissertation by passing the University Oral Qualifying Examination, which is administered by the doctoral committee. Only the student and the committee members attend this examination; all committee members must be present. The examination may be repeated once if a majority of the committee so recommends.

## PUBLIC POLICY AND SOCIAL RESEARCH SCHOOLWIDE PROGRAMS

*School of Public Policy and Social Research*

UCLA  
3371 Public Policy Building  
Box 951656  
Los Angeles, CA 90095-1656  
(310) 825-5463  
<http://www.spsr.ucla.edu/>

### Scope and Objectives

The School of Public Policy and Social Research offers both graduate and undergraduate programs in public policy.

### Undergraduate Study

#### Public Policy Minor

The public policy minor provides undergraduates with a systematic overview of public policy questions, deals with these questions in theoretical and conceptual ways, and exposes students to practical issues of public policy through the examination of specific policy issues and real-world policy questions.

To enter the minor, students must have an overall grade-point average of 2.0 or better, enroll in Policy Studies 10A, and file a petition at the School of Public Policy and Social Research Office of Academic Services, 3371 Public Policy Building. For further information, contact Eric H. Monkkonen at (310) 206-4613.

*Required Lower Division Core Courses:* Policy Studies 10A, 10B. Highly recommended: one statistics course.

*Required Upper Division Courses:* (1) Three courses from one of the following clusters: *labor and work cluster* — Policy Studies 141, 142, 144, 145, 148; *social welfare cluster* — Social Welfare 100A, 100B, 101, 102, 104A through 104E, 105; *urban policy and planning cluster* — Urban Planning 191, 192, 193 (may be repeated for credit with topic change), 197; (2) one elective course offered by the School of Public Policy and Social Research not used to satisfy the core or cluster requirement; (3) research seminar (Policy Studies 197); fieldwork experience taken for credit may be substituted for the research seminar by petition.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

Applicants to the Master of Public Policy (M.P.P.) program are evaluated on their overall record. The final decision is based on a subjective assessment of the applicant's potential to meet the scholarship requirements of the program and to succeed as a policy professional.

A grade-point average of 3.0 or better in the junior and senior years is required and preference is given to applicants with a 3.5 or above. Additional consideration is given to the strength of the applicant's undergraduate program and its standards. The quantitative nature of the core curriculum requires that attention be given to quantitative and analytical abilities. An elementary statistics course is strongly recommended.

Scores on the Graduate Record Examination (GRE) General Test are used in combination with the GPA to help predict academic performance in the M.P.P. program. Scores above 650 in each area are usually essential to gain admittance to the program, although possible reasons for lower scores are considered. Especially high GRE scores may help alleviate concerns about a troublesome academic record, but a high GRE score alone is insufficient reason for admission. Under certain conditions, the admissions committee may agree to consider scores on the GMAT or the LSAT in lieu of GRE scores.

The statement of purpose is evaluated to determine the applicant's genuine academic interest in and commitment to a career in public policy, as well as the applicant's general ability to write coherent and convincing prose. The statement can also help determine the match between the applicant's interests and the school's offerings and to assess written communication skills.

Applicants with at least two years of work experience in policy-making or implementation are preferred. Internships and volunteer work in a policy setting are also viewed positively.

Three letters of recommendation are required from supervisors in policy-related work or instructors in undergraduate courses. Recommenders should be individuals who know the applicant well and who can comment specifically on the potential for a career as a policy professional rather than someone of high status in a firm or school who hardly knows the applicant.

A score of at least 600 on the Test of English as a Foreign Language is required for applicants whose native language is not English.

Applications and program information can be obtained on written request to the School of Public Policy and Social Research.

### Areas of Study

In the second year, students select either two two-course concentrations or one four-course concentration from the following: social welfare, transportation and urban development, employment and labor, regional development and policy.

Concentrations in the following additional areas are also being developed and are available based on need and student/faculty interest: environmental policy, health policy, communications policy, international policy and economic development.

Students also have the option with faculty approval of designing their own concentrations from other courses offered in the School of Public Policy and Social Research or in other schools or departments.

### Course Requirements

Students take three four-unit courses per quarter for a total of 72 units, including nine core courses, four concentration courses, two electives, and a two-quarter seminar in applied policy analysis. A field internship is also required, generally between the first and second years.

All students are required to take the core curriculum, which provides a broadly based foundation in social/policy analysis together with relevant quantitative, analytical, managerial, and organizational methods. The first eight of the core courses are normally taken in the first year.

### Comprehensive Examination Plan

This requirement is met by completion of an extended policy paper during the two-quarter policy seminar, which builds on the core courses, internship experience, and the concentration courses. The final policy paper presented by the student must be certified as complete by both the relevant seminar leader and the student's adviser.

### Thesis Plan

None.

---

## RADIATION ONCOLOGY

*School of Medicine*

UCLA  
B265 UCLA Medical Plaza 200  
Box 956951  
Los Angeles, CA 90095-6951

(310) 794-1252  
<http://www.radonc.ucla.edu/rowwww/rohome.html>

### Chairs

H. Rodney Withers, M.D., D.Sc., *Chair*  
Guy J.F. Juillard, M.D., *Vice Chair, Clinical Affairs*  
William McBride, D.Sc., *Vice Chair, Division of Experimental Radiation Oncology*  
James B. Smathers, Ph.D., *Vice Chair, Physics*

## Scope and Objectives

The Department of Radiation Oncology includes clinical divisions at the UCLA Medical Plaza and Medical Center, Wadsworth VA Medical Center, and divisions of experimental radiation biology and medical radiation physics. Research and teaching facilities are available at the UCLA Medical Plaza, UCLA Medical Center, and Wadsworth VA.

The primary clinical mission of the department is the management of patients who have cancer. The purpose of using radiation therapy is to preserve function and/or cosmesis while eliminating the cancer. Other activities include total body irradiation before bone marrow transplantation and stereotactic radiosurgery and radiation therapy for benign (A-V malformations, meningiomas) and malignant intracranial lesions. Research interests include clinical trials, growth kinetics, radiation modifiers, molecular biology, immunology, and basic and applied physics. Knowledge of the disease in question, the comparative efficacy of radiation therapy and other methods, radiation biology and pathophysiology, and the physical characteristics of varying radiations is essential.

The educational programs serve medical, dental, basic science (biology and physics), nursing, and radiation therapy students, and community and postgraduate physicians; there also is a four-year program for residents who are qualifying for certification in radiation oncology by the American Board of Radiology.

For further details on the Department of Radiation Oncology and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

# RADIOLOGICAL SCIENCES

School of Medicine

UCLA  
BL-428 Center for the Health Sciences  
Box 951721  
Los Angeles, CA 90095-1721  
(310) 825-6800  
fax: (310) 794-6613  
<http://www.radsoci.ucla.edu/>

## Chairs

Richard J. Steckel, M.D. (*Leo G. Rigler Professor of Radiological Sciences*), Chair  
Richard H. Gold, M.D., *Executive Vice Chair*  
Barbara M. Kadell-Wootton, M.D., *Vice Chair*

## Scope and Objectives

The medical student program in radiological sciences is designed to introduce students to the spectrum of diagnostic imaging modalities and their role in the clinical management of patients. It provides knowledge of essential radiographic anatomy and key imaging features of common diseases. The basic principles of all forms of diagnostic imaging, including thoracic, musculoskeletal, gastrointestinal, genitourinary, cardiac, neuroradiology, mammography, pediatrics, emergency radiology, nuclear medicine, computed tomography, magnetic resonance imaging, ultrasound, and interventional radiology, are provided. Students acquire interpretative skills by didactic instruction and interactive teaching sessions and through self-study of radiologic film files. A two-week core clerkship is offered once every four weeks to third- and fourth-year medical students. There are no on-call responsibilities.

Greater depth of experience is provided by the four weeks of elective clerkship offered to fourth-year medical students which emphasizes training in the subspecialties selected by students from the list above.

For further details on the Department of Radiological Sciences and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## Adjunct Associate Professor

S. Scott Bartchy, Ph.D. (*History*)

## Adjunct Assistant Professor

David C. Wilson, Ph.D. (*Philosophy*)

## Scope and Objectives

The UCLA major in the study of religion is designed to give students a broad humanistic perspective. It introduces students to several religious traditions and thus to an appreciation of the very nucleus of civilization in various periods of history and various parts of the world, as well as to an understanding of fundamental human orientations. The program also provides opportunity to study one or more particular religious traditions in greater depth. Cohesion and integrity in the program are furthered by courses dealing with philosophical problems in religion and with general anthropological reflections.

## Undergraduate Study

### Bachelor of Arts Degree

#### Preparation for the Major

*Required:* History 4; Philosophy 2; two courses from Anthropology 9, East Asian Languages and Cultures 60, History 1A, 1B, 1C, 9A, 9C, 9D, 10A, 10B, 11A, 11B.

#### The Major

*Required:* A minimum of 14 upper division courses from the list below, of which at least four (including Study of Religion 100 and Philosophy 175) must be from Group I, at least two must be from each of Groups II and IV, and at least three must be from Group III (at least one on each of the three religious traditions listed). No more than five of the 14 may be from any one group. A course may be taken twice, on different topics, for credit toward the major where repetition is allowed by the department offering the course. Variable topics courses not listed below (e.g., History 197) may be approved by the adviser as satisfying requirements for which their content is appropriate. A maximum of two upper division courses, not listed below, in an ancient language relevant to the course of study may be applied toward the major requirements (but not the group requirements) with consent of the adviser.

Special studies courses (199) may be applied toward the major but not toward a group requirement; a maximum of 12 units, approved by the adviser, may be applied. No course for the major or preparation for the major may be taken on a P/NP grading basis.

## Honors Program

The honors program provides exceptional students with an opportunity to do independent research under the tutorial guidance of a faculty member. Students admitted to honors should take three 199 courses under the guidance of the sponsoring professor. The first 199 course should be taken in Spring Quarter of the junior year, the second during the following Fall Quarter, and the third during Winter Quarter of the senior year. The three courses count as part of the regular requirement of 14 upper division courses. The program culminates in an honors thesis.

In order to qualify for admission, students should have a minimum grade-point average of 3.4. The 199 courses designed for the program and the thesis topic should be approved by the committee in charge of the major.

For further information, contact Professor S. Scott Barty at the program address.

## Study of Religion

### Upper Division Courses

**100. Undergraduate Seminar: Study of Religion.** Prerequisite: consent of instructor. Limited to 20 students. Interdisciplinary approach to some major topics in study of religion, such as religion and politics, mysticism, ideas of revelation, myth and religion, worship and ritual. May be repeated for credit with consent of instructor.

**110. Religion and Violence.** Seminar, three hours; discussion, one hour. Exploration of capacity of religion to mobilize and legitimate violence. Materials include theoretical texts by Rene Girard, Walter Burkert, Jonathan Z. Smith, and David Rapoport and case studies dealing with religion and violence in India, Northern Ireland, Egypt, Lebanon, Israel, Palestine, Sri Lanka, and the U.S.

### Course List

Courses marked with an asterisk have readings in foreign languages. See departmental course listings for requisites.

#### Group I: Methods

##### Anthropology

156. Comparative Religion

##### History

193A. History of Religions: Myth  
193E. Special Topics in History of Religions

##### Philosophy

175. Topics in Philosophy of Religion

##### Study of Religion

100. Undergraduate Seminar: Study of Religion  
110. Religion and Violence

##### Theater

101A. History of World Theater and Drama: Ritual and Religious Drama

#### Group II: Nonliterate and Ancient Religious Traditions

##### Ancient Near East (Near Eastern Languages)

130. Ancient Egyptian Religion

##### Anthropology

114P. Ancient Civilizations of Western Middle America (Nahuatl Sphere)  
114Q. Ancient Civilizations of Eastern Middle America (Maya Sphere)  
171. Sub-Saharan Africa  
174P. Ethnography of South American Indians  
177. Cultures of the Pacific

##### Classics

166A. Greek Religion  
166B. Roman Religion  
168. Comparative Mythology

##### Folklore and Mythology

M122. Celtic Mythology  
M126. Baltic and Slavic Folklore and Mythology  
M128. Hungarian Folklore and Mythology  
M129. Folklore and Mythology of the Ugric Peoples  
130. North American Indian Folklore and Mythology Studies

131. Folklore of India

M155. Oral Traditions in Africa

##### History

193D. Religions of the Ancient Near East

##### Iranian (Near Eastern Languages)

170. Religion in Ancient Iran

##### World Arts and Cultures

181B. Dance in Southeast Asia  
181D. Dance in South Asia  
C187. Dance in Native American Cultures

#### Group III: Western and Near Eastern Religious Traditions

##### Christianity

##### Classics

M170. Power and Imagination in Byzantium

##### Greek (Classics)

\*130. Readings in the New Testament

##### History

119. The Christian Church, 100 to 1517  
120. The Christian Religion, 100 to 1350  
125B. History of Modern Europe: Baroque Culture and Absolutist Politics, 1600 to 1715  
150C. History of Religion in the U.S.  
194A. History of Early Christians  
194B. Religious Environment of Early Christians  
194C. Jesus of Nazareth in Historical Research

##### Philosophy

100B. Medieval and Early Modern Philosophy  
107. Topics in Medieval Philosophy  
118. Kierkegaard

##### Slavic (Slavic Languages)

201. Introduction to Old Church Slavic

##### Islam

##### Arabic (Near Eastern Languages)

\*120. Islamic Texts

##### Art History

C104C. Problems in Islamic Art

##### History

107A-107B. Islamic Civilization  
109A. History of North Africa from the Moslem Conquest: To 1578  
110A. Iranian History: Islamic Iran to 1800

##### Islamic (Near Eastern Languages)

110. Introduction to Islam

##### Judaism

##### Ancient Near East (Near Eastern Languages)

162. Archaeology and Religion of the Holy Land  
170. Introduction to Biblical Studies

##### Comparative Literature

M101. Hebrew Literature in English — Literary Traditions in Ancient Israel: Bible and Apocrypha

##### Hebrew (Near Eastern Languages)

\*120. Biblical Texts  
125. Hebrew Bible with Medieval Commentaries  
\*130. Rabbinic Texts

##### History

111C. History of Jews in the Ottoman Empire and the Turkish Republic, 1300 to 1923  
M191A-M191B. Survey of Jewish History  
191G. European Jewry from 1881 to the Present  
M192A-M192B. Jewish Intellectual History

##### Jewish Studies (Near Eastern Languages)

130. Modern Jewish Religious Movements and Their Ideologies  
M150A-M150B. Hebrew Literature in English

##### Sociology

159. Comparative Studies of Jewish Communities in the U.S. and Abroad

#### Group IV: South Asian and East Asian Traditions

##### Art History

114A. Early Art of India  
114C. Japanese Art  
114D. Later Art of India  
114E. Arts of Korea  
114F. Arts of Southeast Asia

##### Chinese (East Asian Languages)

160. Chinese Buddhism  
\*165. Introduction to Chinese Buddhist Texts  
175. Introduction to Chinese Thought  
265A-265B. Seminars: Chinese Buddhist Texts

##### East Asian Languages and Cultures

161. Buddhist Literature in Translation  
162. Buddhist Meditation Traditions

##### History

186. Shinto, Buddhism, and Japanese Folk Religion  
188A. Early History of India  
193B, 193C. Religions of South and Southeast Asia

##### Indic (East Asian Languages)

175. Introduction to Indic Philosophy

##### Japanese (East Asian Languages)

C160. Japanese Buddhism  
161. Religious Life in Modern Japan  
175. Introduction to Japanese Thought  
265A. Seminar: Japanese Buddhist Texts

##### Korean (East Asian Languages)

160. Korean Buddhism  
\*165. Introduction to Korean Buddhist Texts  
175. Introduction to Traditional Korean Thought

 Timothy A. Stowell, Ph.D. (*Linguistics*)

#### Assistant Professors

Andrea Loselle, Ph.D. (*French*)  
 Malina Stefanovska, Ph.D. (*French*)

## Scope and Objectives

The Romance Linguistics and Literature Program emphasizes modern linguistic and literary theories in the study of Romance languages. Linguistic and literary theories can be pursued independently or jointly; however, the integration of linguistic and literary knowledge is taken to be one of the highest aims of this interdepartmental graduate program.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

The UCLA Bachelor of Arts degree in French, Italian, Portuguese, or Spanish, or equivalent, is required. Applicants to the Master of Arts program are expected to have a grade-point average of at least 3.4 in upper division courses, especially in those judged germane to the proposed program. Three letters of recommendation and the General Test of the Graduate Record Examination (GRE) are also required. Applicants admitted from elsewhere with preparation considered deficient in view of the intended specialization are required to take specified upper division courses. Such courses

may be taken concurrently with graduate courses, but they may not be applied toward the course requirements for the M.A. degree. Before enrolling for the first quarter in the program, new students must consult the program chair concerning the formation of their guidance committee. If students know only the language of their majors, they should prepare in at least one other Romance language during the first graduate year so they can take courses in their minor no later than the second year of graduate study.

### Areas of Study

Consult the department.

### Course Requirements

Twelve courses are the minimum requirement, of which six courses (at least five of them graduate) must be in the major language, with specialization either in linguistics or in literature. One course in the history or development of the major language is highly recommended. At least three courses would be in the minor language, also with specialization in either linguistics or in literature. The remaining three courses should be selected in consultation with the guidance committee so as to be logically supportive of the student's major field of study. Linguistics 20 is required as a prerequisite for all students majoring in the linguistics field but is not counted as part of the total number of courses required for the degree. Up to eight units of Romance Linguistics and Literature 596 may be applied toward the M.A. degree. Courses 597 and 598 may not be applied toward the degree.

### Comprehensive Examination Plan

The comprehensive examination is administered by three members of the guidance committee, appointed by the program chair. The written examination, consisting of one four-hour examination in the major field, one two-hour examination in the minor field, and one oral examination not to exceed one hour, is given each quarter in the second week prior to final examinations. If the examination or any part thereof is failed, the failed portions may be retaken once when the examination is next regularly offered. Only those students who attain a high pass grade on the master's examination are automatically admitted to the Ph.D. program.

### Thesis Plan

The program favors the comprehensive examination plan, but under special circumstances M.A. theses for exceptionally well-qualified students are approved. Students may petition for authorization to write an M.A. thesis only after completion of six courses applicable toward the degree. It is the student's responsibility to choose an appropriate topic and find a professor to direct the thesis. After completion of the thesis, the student must pass a two-hour oral examination testing knowledge of the field of the thesis and general competence. Only those students who attain a high pass on the

examination are automatically eligible for admission to the Ph.D. program.

## Doctoral Degree

### Admission

The UCLA Master of Arts in Romance Linguistics and Literature or the UCLA Master of Arts in French, Italian, Portuguese, or Spanish, or equivalent is required. A strong academic record (normally a grade-point average of 3.4 or better), three letters of recommendation and the Graduate Record Examination (GRE) General Test (normally a combined verbal/quantitative score of 1,100 or better) are required.

Formal application is required of all candidates. Applicants who have completed the UCLA M.A. degree in Romance Linguistics and Literature with distinction (high pass) are automatically eligible for admission to the Ph.D. program; those who received middle pass are reviewed like candidates from other institutions; those who received low pass are ineligible for admission. Students whose M.A. program registers deficiencies in scope or quality may be admitted but are required to pass (with grades of B or better) three graduate courses approved by the chair.

Following formal admission, students form a guidance committee in consultation with the chair. Students then meet as soon as possible with their guidance committee to work out a program of courses and set a tentative date for the qualifying examinations. The guidance committee has final authority to prescribe the course of study. Until students have met with this committee and placed themselves under its direction, they are not officially in the Ph.D. program.

### Major Fields or Subdisciplines

The program recognizes two fields of specialization: linguistics or literature.

**Linguistics.** (1) The present-day grammar of the Romance language of major interest and its relation to the grammar of its sister languages and to language in general, (2) the development of the Romance language of major interest in relation to its sister languages (and possibly other interrelated cultural aspects) from the perspective of historical linguistics, (3) the genetic and typological relationships of the Romance languages to other Indo-European languages and to language in general. The two minors may be other Romance languages, or one other Romance language plus a field of Romance literature.

**Literature.** One of the following in the literatures of at least two Romance languages: (1) early Romance literature and philology; (2) Renaissance and baroque; (3) modern literature, preferably with emphasis in one century.

The first minor may be one of the preceding fields not chosen for the major. The second minor may be the same field or a new field in another Romance language, or some other re-

lated field in the major language or in Romance linguistics.

### Course Requirements

In each of the two specializations (linguistics or literature) the Ph.D. program consists of a major and two minors. The courses (a minimum program) are distributed as follows: major — five courses; first minor — three courses; second minor — two courses. At least one seminar is required in each of the three fields. In addition to those required for the master's degree (or equivalent), at least 10 other graduate courses (of which no more than two 596 courses may be applied), as well as such courses as the guidance committee may prescribe, are required. Linguistics 20 is required as a prerequisite for all students majoring in the linguistics field but is not counted as part of the total number of courses required for the degree.

### Written and Oral Qualifying Examinations

The qualifying examinations, given by the doctoral committee during the Fall, Winter, and Spring Quarters, consist of (1) a three-hour written examination in the major field; (2) a two-hour examination in the first minor; (3) a one-hour examination in the second minor; and (4) a two-hour University Oral Qualifying Examination in the three fields, at which time the prospectus for the dissertation is also discussed and approved. Failed portions of the examination may be repeated once after any remedial preparation the committee may specify.

The dissertation may be on any subject within the general area of Romance linguistics and literature. If more than five calendar years elapse between advancement to candidacy and the presentation of the dissertation, the program may require revalidation of the qualifying examinations.

## Romance Linguistics and Literature

### Graduate Courses

**204A-204B. Romance Syntax: French (1 to 4 units each).** Lecture, three hours. Prerequisites: Linguistics 120B, 200B, consent of instructor. Course 204A is prerequisite to 204B. Structure of French from point of view of contemporary syntactic theory, with emphasis on considerations of comparative syntax with other Romance languages. Topics include verbal/auxiliary system; WH-movement and Complementizer system; clitic constructions, causatives, inversion phenomena; quantifier distribution; impersonal constructions; negation and subjunctive. S/U or letter grading.

**211. Comparative Romance Syntax.** Lecture, three hours. Prerequisite: French 210A or Portuguese 204A or Spanish 204A or consent of instructor. Comparative study of syntactic processes in Romance languages. Investigation of parameters underlying linguistic variation.

**255. Topics in Romance Syntax (1 to 4 units).** Prerequisite: consent of instructor. Topics in syntax of Romance languages, with emphasis on recent development in comparative studies; theoretical innovations based on Romance syntax.

**596. Directed Individual Study or Research (4 to 8 units).** Prerequisite: consent of instructor and program chair. Study or research in areas or on subjects not offered as regular courses. Eight units may be applied toward M.A. degree requirements. S/U grading.

**597. Preparation for Graduate Examinations (4 to 12 units).** Prerequisite: consent of graduate adviser. Individual preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be taken only once for each degree examination and only in term that comprehensive or qualifying examinations are to be taken. S/U grading.

**598. Research for M.A. Thesis (2 to 12 units).** Prerequisite: consent of guidance committee. Research in preparation of M.A. thesis. S/U grading.

**599. Research for Ph.D. Dissertation (2 to 12 units).** Prerequisite: successful completion of Ph.D. qualifying examinations. Research for and preparation of Ph.D. dissertation. S/U grading.

### Course List

In consultation with the appropriate adviser(s), courses should be selected with an eye to the organic relationship between them, preferably among those listed below and/or their requisites:

#### Introductory Courses

##### Italian

201. Bibliography and Methods of Research

##### Spanish

M200. Research Resources

#### Linguistics Courses

##### Grammatical Theory: Linguistics

201. Phonological Theory I

206. Syntactic Theory II

#### Development of the Romance Languages

##### Hispano-Romance: Spanish

M205A-M205B. Development of Portuguese and Spanish Languages

##### Indo-European: Indo-European Studies

210. Indo-European Linguistics: Advanced Course

280A-280B. Seminars: Indo-European Linguistics

##### Italic Dialects: Latin

242. Italic Dialects and Latin Historical Grammar

##### Italo-Romance: Italian

222A. History of the Italian Language

##### Latin History: Latin

240. History of the Latin Language

##### Medieval Latin: Latin

231A-231B. Seminars: Medieval Latin

##### Northern Gallo-Romance: French

210A. Phonology and Morphology from Vulgar Latin to French Classicism

210B. Syntax and Semantics from Vulgar Latin to French Classicism

##### Paleography: History

219A-219B. Paleography I, II

##### Romance Dialectology: Italian

222C. Italian Dialectology

##### Spanish

209. Dialectology

##### Romance Linguistics: Linguistics

225G. Linguistic Structures

##### Vulgar Latin: Latin

232. Vulgar Latin

### Studies in the History of the Romance Languages

#### Gallo-Romance: French

214. Problematics of Medieval Language and Literature

#### Hispano-Romance: Spanish

M251A-M251B. Studies in Galegan-Portuguese and Old Spanish

#### Italo-Romance: Italian

210. Studies in Early Italian Literature

222A-222B-222C. Studies in History of Italian Language

#### Synchronic Linguistics

##### Advanced Grammar: French

201. Literary Research and Composition

##### Italian

222B. Structure of Modern Italian

##### Portuguese

202. Synchronic Morphology and Phonology

204A-204B. Generative Grammar

##### Spanish

202A. Phonology

202B. Morphology

204A-204B. Generative Syntax and Semantics

##### Studies in Linguistics and Dialectology: Spanish

256A-256B. Studies in Spanish Linguistics

257. Studies in Dialectology

### Literature Courses

#### History of Ideas: French

260A-260B. Studies in History of Ideas

#### Literary Criticism: French

202. Historical and Philosophical Background to French Literary Criticism

203. Contemporary Theories

258A-258B. Studies in Literary Criticism

#### Italian

205A-205B. Studies in Criticism

#### Spanish

M201A-M201B. Literary Theory and Criticism

#### Literary History: History

218. Medieval Latin Literary History

#### Philosophy and Literature: French

259A-259B. Studies in Philosophy and Literature

#### Early Romance Literature

##### Petrarca: Italian

214C. Studies in Medieval Literature: Petrarca's *Canzoniere*

251. Seminar: Petrarch

##### Studies in Early Romance Literature: French

215A-215D. Medieval Literature

250A. Major Medieval Texts

250B. Structures of Medieval Literature

250C. Problems in Medieval Literature

##### Italian

210. Studies in Early Italian Literature

214A-214F. Studies in Medieval Literature

215A-215B. Studies in 15th-Century Literature

250A-250D. Seminars: Dante

252. Seminar: Boccaccio

##### Portuguese

C224. Early Portuguese Literature

##### Spanish

222. Medieval Epic and Narrative Poetry

223. Medieval Prose

262A-262B. Studies in Medieval Spanish Literature

**Modern Romance Literature****Genre Studies: Portuguese**

252. Studies in Early Portuguese Literature  
 253. Studies in Modern Portuguese Literature  
 254. Studies in Early Brazilian Literature  
 255. Studies in Modern Brazilian Literature

**Studies in the 18th Century: French**

- 218A-218B-218C. 18th Century  
 254A-254B. Studies in the 18th Century

**Italian**

- 218A-218D. Studies in 18th-Century Literature  
 256A-256B. Seminars: 18th Century

**Portuguese**

- C227. 19th-Century Portuguese Literature  
 C232. 19th-Century Brazilian Literature and Culture

**Spanish**

229. Romanticism  
 239. Romanticism and Realism in Spanish-American Literature  
 270A-270B. Studies in 18th-Century Spanish Literature  
 277A-277B. Studies in Colonial Spanish-American Literature

**Studies in the 19th Century: French**

- 219A-219D. 19th Century  
 255A-255B. Studies in the 19th Century

**Italian**

- 219A-219D. Studies in 19th-Century Literature  
 257A-257B. Seminars: Romanticism

**Portuguese**

- C228. Post-Romanticism and Naturalism in Portuguese Literature

**Spanish**

230. Realism and Naturalism  
 271A-271B. Studies in 19th-Century Spanish Literature  
 278A-278B. Studies in 19th-Century Spanish-American Literature

**Studies in the 20th Century: French**

- 220A-220D. 20th Century  
 221A-221B-221C. French-African Literature  
 256A-256B. Studies in Contemporary Literature  
 257A-257B. Studies in French-African Literature

**Italian**

220. Studies in Turn-of-the-Century Literature  
 221A-221E. Studies in 20th-Century Literature  
 258A-258B. Seminars: Contemporary Italian Literature

**Portuguese**

- C229. 20th-Century Portuguese Literature  
 C234. Brazilian Modernism  
 C235. 20th-Century Brazilian Literature

**Spanish**

232. Spanish Prose Literature from 1898 to the Civil War  
 233. Spanish Prose Literature after the Civil War  
 234. Spanish Drama and Poetry from 1898 to the Civil War  
 235. Spanish Drama and Poetry after the Civil War  
 240. Major Currents in Modern Spanish-American Literature  
 243A-243B. Contemporary Spanish-American Poetry  
 244A-244B. Contemporary Spanish-American Novel  
 245. Contemporary Spanish-American Essay  
 272A-272B. Studies in 20th-Century Spanish Literature  
 280A-280B. Studies in Contemporary Spanish-American Literature

**Renaissance and Baroque Literature****Cervantes: Spanish**

227. Cervantes

**Studies in Renaissance and Baroque Literature: French**

- 216A-216B-216C. Renaissance  
 217A-217D. 17th Century

**ROTC PROGRAMS***College of Letters and Science*

In accordance with the National Defense Act of 1920 and with the concurrence of The Regents of the University, a unit of the Senior Division Reserve Officers' Training Corps (ROTC) was established on the Los Angeles campus of the University in July 1920.

This voluntary training allows students to qualify for an officer's commission in the Army, Navy, Air Force, or Marine Corps while completing their college education. ROTC courses are offered by three departments within the College of Letters and Science: Aerospace Studies (Air Force), Military Science (Army), and Naval Science (Navy and Marine Corps). They are not considered academic majors, but ROTC courses may be taken as free electives and applied toward the total course requirements of the major. The ROTC program is also available through UCLA Extension.

All three ROTC departments offer voluntary four-year programs for incoming freshmen and two-year programs for students who apply early in their sophomore year. All have leadership laboratories which teach management skills.

All commissions are reserve commissions. Active duty obligation following commissioning varies depending on branch of service.

**Scholarships**

ROTC Scholarships are awarded on a competitive basis to U.S. citizens regardless of parents' income. Scholarships provide tuition,

a book allowance, fees, and a tax-free monetary allowance of \$150 per month during the academic year. Applications for four-year scholarships may be obtained by calling the appropriate department at UCLA — Army, (310) 825-7381; Air Force, (310) 825-1742; Navy, (310) 825-9075 — or by writing to Armed Forces Opportunities, P.O. Box 2865, Huntington Station, NY 11746-2102. When writing, specify which service (Army, Air Force, Navy/Marine) scholarship is desired. Completed applications should be submitted prior to July 15 (Army) or August 15 (Air Force and Navy) for early consideration, but no later than December 1 (all services) of the year preceding college matriculation. Two-year scholarship applications may be obtained from the appropriate UCLA department and are considered when received.

**AEROSPACE STUDIES**

UCLA  
 210 Men's Gym  
 Box 951611  
 Los Angeles, CA 90095-1611  
 (310) 825-1742  
<http://www.sscnet.ucla.edu/afrotc/>

David L. Terrell, M.S., Lieutenant Colonel,  
*Chair*

**Professor**

David L. Terrell, M.S., Lieutenant Colonel

**Adjunct Assistant Professors**

Kimel A. Kimble, M.A.S., Captain  
 Diana L. Wilcoxson, M.B.A., Captain

**Scope and Objectives**

Air Force ROTC provides selected students the opportunity to develop those attributes essential to positions of high responsibility as commissioned officers in the U.S. Air Force. This includes understanding Air Force history, doctrine, operating principles, and national security policies, demonstrating ability to apply modern principles of management and human relations in the Air Force environment, and mastering of leadership theory and techniques. Students must demonstrate dedication to their assignments, willingness to accept responsibility, and the ability to think critically and communicate with clarity and precision.

**Undergraduate Study****Four-Year Program**

The four-year program is available to first-term freshmen and those full-time students with at least four years of undergraduate and/or graduate study remaining and consists of an initial two-year General Military Course, or GMC (Aerospace Studies 1A-1B-1C and 20A-20B-20C), followed by a two-year Professional Officer Course (POC) described under Two-Year Program. GMC participation requires one hour of academic class and two hours of leadership laboratory each week during the academic year. Students incur no military obligation for GMC

participation unless they qualify and accept an Air Force ROTC Scholarship during or after their sophomore year.

Students who complete GMC and wish to enter POC attend a four-week field training course the summer following GMC completion. At field training, students are provided meals, quarters, clothing, and travel and incidental expenses. Subjects covered at field training include junior officer training, aircraft and aircrew orientation, career orientation, survival training, base functions, Air Force environment, and physical training.

## Two-Year Program

The two-year program is known as the Professional Officer Course (POC) and consists of Aerospace Studies 130A-130B-130C and 140A-140B-140C. POC participation requires two hours of leadership laboratory and three hours of academic class each week during the academic year.

Requisites for the two-year program are successful completion of the GMC and a four-week field training course (see Four-Year Program above), or successful completion of a six-week field training program on an Air Force base during the summer preceding enrollment in the program.

Students interested in the six-week field training program must apply to the department chair early during Fall Quarter of their sophomore year. U.S. citizenship is required. There is no obligation to apply. Students are selected on a competitive basis with consideration given to academic major, grade-point average, aptitude examination scores, medical examination results, performance during an officer board interview, and a physical fitness test.

Students selected for the six-week summer field training are provided meals, quarters, clothing, and travel and incidental expenses. Subjects are the same as those in the four-week course plus the academic portion of the GMC (see Four-Year Program above).

Students enrolled in the POC incur a military obligation and are paid \$150 per month during the academic year. Graduation and successful completion of the POC leads to a commission as a second lieutenant. Cadets then report to one of the challenging assignments in the Air Force.

## Aerospace Studies

### Lower Division Courses

#### Freshman-Year Courses

**Z. Leadership Laboratory (No credit).** Laboratory, three hours. Mandatory for and restricted to Air Force ROTC cadets. Provides cadets with practical command and staff leadership experiences through performance of various tasks within framework of an organized cadet corps. As integral part of aerospace studies curriculum, provides experiences designed to develop leadership potential and serves as orientation to active duty. P/NP grading.

**1A-1B-1C. The Air Force Today (2 units each).** Lecture, one hour. Survey course designed to introduce students to the U.S. Air Force and Air Force Reserve Officers' Training Corps. Topics include mission and organization of the Air Force, officership and professionalism, military customs and courtesies, Air Force officer opportunities, group leadership problems, and introduction to communication skills. P/NP or letter grading.

### Sophomore-Year Courses

**20A-20B-20C. The Air Force Way (2 units each).** Lecture, one hour. Survey course designed to facilitate transition from Air Force GMC cadet to Air Force POC candidate. Topics include Air Force heritage, Air Force leaders, Quality Air Force, introduction to ethics, values, and leadership, group leadership problems, and continuing application of communication skills. P/NP or letter grading.

### Upper Division Courses

**130A-130B-130C. Air Force Leadership and Management.** Lecture, three hours. Study of leadership and quality management fundamentals, professional knowledge, Air Force doctrine, leadership ethics, and communication skills required of an Air Force junior officer. Use of case studies to examine Air Force leadership and management situations as means of demonstrating and exercising practical application of concepts being studied. P/NP or letter grading.

**140A-140B-140C. Preparation for Active Duty.** Lecture, three hours. Study of national security processes, regional studies, advanced leadership ethics, and Air Force doctrine. Special topics focus on the military as a profession, officership, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism. Within this structure, continued emphasis on refining communication skills. P/NP or letter grading.

**199. Special Studies in Aerospace Studies (2 or 4 units).** Prerequisite: consent of instructor. Course of study for undergraduates who wish to engage in independent research under direct supervision of a department faculty member. P/NP or letter grading.

## MILITARY SCIENCE

UCLA  
127 Men's Gym

Rita J. Salley, M.S., Lieutenant Colonel, *Chair*

#### Professor

Rita J. Salley, M.S., Lieutenant Colonel

#### Adjunct Assistant Professors

Jonathan Beard, B.S., Captain  
Charles Kimball, B.A., Captain

### Scope and Objectives

Army ROTC prepares selected students for leadership as commissioned officers in the U.S. Army, Army Reserve, or National Guard. This training includes in-depth study of the military establishment, military history, doctrine, leadership principles, management, and many other basic skills required of motivated, effective leaders.

## Undergraduate Study

The military science curriculum is divided into two parts: (1) the Basic Course, two years of lower division study during which students must complete 12 units of coursework and (2) the Advanced Course, two years of upper division study consisting of 14 units of coursework and a six-week summer camp.

Transfer students and others who were unable to enroll in the Basic Course can receive equivalent credit in several different ways (see Two-Year Program below).

Admission to the Advanced Course is limited to selected students who meet all academic and physical requirements. Students in this course receive a subsistence allowance of \$150 a month for 10 months during each of the two academic years, plus military science books and uniforms. After completion of the Advanced Course and graduation, students have the opportunity to be commissioned as second lieutenants in one of the Army's 17 specialty areas in either the Army National Guard, Reserves, or Active Army. Students' preferences are a major factor in determining which specialty is awarded.

Students selected for Advanced ROTC must attend a six-week Advanced Camp between their Military Science III and IV years. Cadets receive an allowance for travel expenses and are paid for attendance.

The active duty obligation for those students selected to enter the Reserves or National Guard is for initial training, and only for a period of several months. Students accepting ROTC Scholarships and a commission in the Regular Army, or who are selected to enter the Active Army, serve longer terms. ROTC students wishing to obtain advanced degrees may be granted a delay in reporting to their initial assignment.

### Four-Year Program

Students are enrolled in the Basic Course (freshman and sophomore years) on a voluntary basis. After completion of the Basic Course and before entrance into the Advanced Course (junior and senior years), students are required to execute a contract with the Department of the Army agreeing to complete the Advanced Course and accept a commission if offered.

### Two-Year Program

The two-year program is designed for students who receive placement credit for two years of ROTC and directly enter the Advanced Course. Placement credit may be given for completing three years of high school Junior ROTC, attending a paid ROTC Basic Camp, membership in the Army Reserve or National Guard, completing two years of college-level Air Force or Navy ROTC, or previous active duty military service.

### Commissioning

Successful completion of the Advanced Course program and a bachelor's degree may

lead to a commission as a second lieutenant in the Army Reserve, National Guard, or Active Army. Distinguished graduates may qualify for a commission in the Regular Army.

## Military Science

### Lower Division Courses

Army ROTC students may satisfy military history requirements by completing History 125E, 125F, 127A, 127B, 130C, 147A, 148A, 148B, 148C, 152A, or 152B in lieu of Military Science 110, with consent of the ROTC adviser.

**Z. Leadership Laboratory (No credit).** Laboratory, three hours (lower division cadets) or four hours (upper division cadets). All cadets must be concurrently enrolled in a military science course; upper division cadets must also be under a contracted obligation with department. Designed to allow cadets to apply leadership techniques and military skills taught in classroom and to develop their confidence as future military officers.

**10. Introduction to Leadership (2 units).** Lecture, one hour; discussion, one hour. Introduction to leadership and motivational theory. Topics include nature of organizations, individual behavior, motivation and performance, values and organizational commitment, and influence processes.

**11. U.S. Defense Establishment I (2 units).** Lecture, one hour; discussion, one hour. Study of evolution and organization of U.S. Department of Defense, including study of military services, with emphasis on the U.S. Army. P/NP or letter grading.

**12. U.S. Defense Establishment II (2 units).** Lecture, one hour; discussion, one hour. Fundamentals of national security policy development. P/NP or letter grading.

**14. Principles of Land Navigation Applicable in Maneuver (2 units).** Lecture, one hour; discussion, one hour. Introduction to topographic maps and aerial photographs and their relation to land navigation; conceptual linkage to basic military tactics. Topics include map coordinate systems, scale and distance relationships, intersection and resection, photo interpretation, squad and platoon operations, and resource planning techniques. Introduction to new technologies, including Global Positioning Systems (GPS).

**18. Modern Guerrilla Warfare (2 units).** Lecture, one hour; discussion, one hour. Limited to undergraduate students. Introduction to low intensity conflict and guerrilla strategies; explanation/discussion of political, economic, religious, and social factors contributing to civil unrest and/or insurgencies. Topics include nonmilitary responses, military tactics, interrelationship of military and government, psychological warfare, and civic actions.

**21. Psychology of Leadership I (2 units).** Lecture, one hour; discussion, one hour. Study of relationship of individual differences, group dynamics, formal organizational constraints, and impact of society on leadership process. Introduction to external environmental pressures on a leader and psychology of the individual as a follower, examined in areas of motivation, peer pressure/conformity, and group norms.

**24. Theory of Warfare (2 units).** Inquiry into theory, nature, causes, and elements of warfare, with attention also to evolution of weapons and warfare.

### Upper Division Courses

**110. U.S. Military History (3 units).** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Survey of American military history from 1860 to the present. Causes of war, strategy, tactics, and technological developments set against economic, political, and diplomatic concerns. Impact of warfare on society.

**112. Psychology of Leadership II (3 units).** Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Introduction to various individual leadership styles and personalities to assist students in development of their own individual style. Different philosophies of leadership, along with dimensions of leader behavior. Special consideration to counseling, management, and communication techniques that must be mastered to be an effective leader.

**113. Theory of Learning Applied to Teaching (2 units).** Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Study of instructional processes, lesson content planning procedures, techniques of applicatory education, role of testing (including evaluation and analysis). Emphasis on development of training programs to maximize organizational effectiveness. P/NP or letter grading.

**123. Military Legal Systems (2 units).** Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Introduction to theory and application of military law and legal systems, with emphasis on Uniform Code of Military Justice and rights of the accused under the constitution.

**125. Decision Making (2 units).** Lecture, one hour; discussion, one hour. Prerequisite: consent of instructor. Designed to present students who become commissioned officers with new insight into modern methods of managerial decision making and into various steps involved in the process. Introduction to various components of leadership and functions of management in order to understand where areas of problem analysis and decision making impact and how they fit into leadership and management. Various steps which comprise the problem analysis and decision-making processes.

**126. Military Professionalism and Ethics (2 units).** Lecture, 30 minutes; discussion, 90 minutes. Prerequisite: consent of instructor. Ethical concepts held by America's military institution. Classification of the military as a profession, special social responsibilities of those in the military, values related to and accepted by military society, and an ethical reasoning/decision-making process and model.

**199. Supervised Independent Studies (1 to 3 units).** Prerequisites: upper division standing, consent of instructor. Supervised independent studies and research for undergraduate students who desire to pursue topics of their own selection.

## NAVAL SCIENCE

Daniel P. McKnight, M.S., Colonel, U.S. Marine Corps, *Chair*

### Professor

Daniel P. McKnight, M.S., Colonel, U.S. Marine Corps

### Adjunct Assistant Professors

Michael B. Sampson, B.S., Lieutenant, U.S. Navy  
Christopher P. Tinio, B.A., Lieutenant, U.S. Navy  
Eric M. Tranter, B.A., Captain, U.S. Marine Corps  
James L. Trotter, M.S., Commander, U.S. Navy  
Sean C. Walker, B.S., Lieutenant, U.S. Navy  
Steven C. Wurgler, B.S., Lieutenant, U.S. Navy

## Scope and Objectives

The Department of Naval Science provides professional training for students leading to a reserve commission at graduation in the U.S. Navy or Marine Corps. Through the Naval Reserve Officers' Training Corps (NROTC), scholarship

students receive full tuition, fees, books, and \$150 per month subsistence pay. Nonscholarship students may apply to participate as members of the midshipman battalion with limited financial assistance, earning a reserve commission on completion of the baccalaureate degree. Because of the rapid development of highly technical ship systems, aviation, and other military equipment, science and engineering majors are highly desirable; however, Navy Scholarships are currently available to students pursuing any major offered by the University, as long as they complete basic technical requirements. In addition to University requirements, midshipmen must complete 28 units of naval science courses, a physical fitness test, and three summer cruises, each about four to eight weeks long. The department also conducts a sail training program for all midshipmen. All naval science courses, from ship systems and management to naval operations and amphibious warfare, are open to students who are not in the program but have an interest in the Navy and related fields, such as engineering, navigation and naval operations, history, and management.

## Undergraduate Study

### Scholarship Program

The majority of naval science students attend the University on Naval Scholarships which are awarded primarily on a four-year basis to high school seniors selected in nationwide competition. A two-year upper division scholarship program is also available, with a similar selection process, to students who have not yet begun their junior year in college. Applications for both types of scholarships are due by December 1 and March 1, respectively, each year. In addition to tuition, fees, books, and uniforms, students receive subsistence pay of \$150 per month. Scholarship students are obligated to serve on active duty for a minimum of four years following graduation and commissioning.

### College Program (Nonscholarship)

Three- and four-year College Program students are selected by the department chair at the beginning of each academic year from applicants of the freshman and sophomore classes. These students must compete for advanced standing prior to their junior year. A two-year program is also available to students who have not yet started their junior year. Students enter the two-year program with advanced standing after selection through national competition and completion of a six-week summer training period. Applications for the two-year program are due March 1 of the sophomore year. All College Program students receive uniforms, naval science textbooks and, once selected for advanced standing, subsistence pay of \$150 per month in their junior and senior years. Nonscholarship students serve on active duty for a minimum of three years following graduation and commissioning. College Program students may be recommended for

scholarship benefits based on superior academic performance and participation in NROTC.

### Marine Corps Option

Highly motivated NROTC students may request designation as Marine Corps option students and may also pursue any UCLA academic degree. The final summer cruise involves intensive Marine training. Marine Corps option students also participate, on a limited basis, in field training exercises during the academic year.

### Commissioning

Students must meet UCLA degree requirements in their selected fields and complete the naval science courses below. In addition, scholarship students must include in their programs one year of approved calculus, one year of approved calculus-based physics, one year of approved freshman English, one term of American military history, and one term of computer science. Nonscholarship students must include in their programs one year of college algebra or higher mathematics, physical science, and English, and one term of computer science. Of these requirements, Marine Corps option students are only obligated to fulfill the American military history/national security policy requirement.

### Naval Science Minor

The naval science minor is designed for students completing a major in a departmental program who wish to augment that major. Naval science courses are open to all students with an interest in history, national security, foreign policy, organizational leadership, management, ethics, and the military sciences.

To enter the minor, students must have an overall grade-point average of 2.0 or better. For further information, contact Donna Tenerelli at (310) 825-9075.

*Required Lower Division Courses:* Naval Science 1B, 20A, 20B.

*Required Upper Division Courses:* Naval Science 101A, 101B, 102B, 103, 104.

All minor courses must be taken for a letter grade, with a grade-point average of 2.5 or better in each. Successful completion of the minor is indicated on the transcript and diploma.

## Naval Science

### Freshman-Year Courses

**1A. Introduction to Naval Science (2 units).** Introduction to organization of the Naval Service, various components of the Navy, career opportunities, shipboard damage control, fire fighting, propulsion systems, and some customs and traditions of the Naval Service.

**20B. Seapower and Maritime Affairs (2 units).** Conceptual study of seapower, emphasizing historical development of naval and commercial power. Seapower examined in relation to economic, political, and cultural strengths, focusing on current abilities of specific nations to use the oceans to attain national objectives.

### Sophomore-Year Courses

**1B. Naval Ship Systems I.** Introduction to naval engineering, with emphasis on steam, nuclear, diesel, and gas turbine propulsion systems and their associated auxiliary components. Basic thermodynamic theory, electrical theory, stability, and buoyancy.

**102B. Naval Leadership and Management I.** Examination of current and classical leadership and management theories, with emphasis on their application to junior military officer's role as a leader/manager. Topics include managerial functions, performance appraisal, motivation theories, group dynamics, leadership theories, and communication.

### Junior-Year Courses

Courses 103 and 104 are to be taken by candidates for commissions in the Marine Corps or Marine Corps Reserve in lieu of courses 101A and 101B.

**101A. Navigation I.** Study of principles of piloting, celestial, and electronic navigation employed in determining a ship's position at sea. Celestial and electronic theory, mathematical analysis, sextant sights, and use of navigational aids.

**101B. Navigation II.** Prerequisite: course 101A. Study of rules of the road, shiphandling, and basic concepts of multiple ship formations and maneuvering. In-depth analysis of problems associated with operations on high seas and inland waters applying to civil and U.S. Naval craft.

**103. Evolution of Warfare.** Study of evolution of warfare, including historical and comparative consideration of influence that leadership, political, economic, and sociological and technological development factors have had on warfare and influence they continue to exert in age of limited warfare.

### Senior-Year Courses

**20A. Naval Ship Systems II.** Study of naval weapon systems, with emphasis on infrared, radar, and sonar principles. Target designation and acquisition, methods of solving fire control problem, target detection systems. Analysis of transfer and feedback functions inherent in weapon systems.

**102C. Leadership and Ethics (2 units).** Requisite: course 102B. Current leadership and management in the U.S. Navy. Areas include human resources management, personnel management, material management, and performance and career evaluation.

**104. Expeditionary Military Operations.** Study of historical use of expeditionary military operations, with particular emphasis on doctrine, tactics, and equipment used. Examination of topics through study of political and military objectives by focusing on historical examples, including Marathon, Gallipoli, World War II, Korea, Beirut, and Grenada. Examination of contemporary doctrine through study of recent operations.

**199. Supervised Independent Studies (1 to 4 units).** Prerequisites: upper division standing, consent of instructor. Supervised independent studies and research for undergraduate students who desire to pursue topics of their own selection. P/NP or letter grading.

## Scope and Objectives

Scandinavia consists of five Northern European countries: Denmark, Finland, Iceland, Norway, and Sweden. These countries form a geographic bridge between the American and European continents and a political bridge between Western and Eastern Europe. For all students of literature, language, the arts, and the social and physical sciences, Scandinavia is of particular interest.

The modern Scandinavian program educates students about Scandinavia through the study of its languages and literatures. The Scandinavian Section offers both undergraduate and graduate degrees in the languages and literatures of Denmark, Norway, and Sweden. Danish, Norwegian, and Swedish are mutually understandable languages, giving the student of one access to the literatures and cultures of the other two. Both undergraduate and graduate majors are expected to concentrate on one Scandinavian language, though they study the literatures of the other language areas.

## Undergraduate Study

### Bachelor of Arts in Scandinavian Languages

#### Preparation for the Major

*Required:* Scandinavian 1, 2, 3, 4, and 5, or 11, 12, 13, 14, and 15, or 21, 22, 23, 24, and 25, or equivalent.

## The Major

*Required:* Twelve upper division Scandinavian courses, including 105 or 110 or 115, 141, 142, 143. As an option, three upper division courses in a related field may be taken if approved in advance by the undergraduate adviser. It is recommended that students who plan to do graduate work in Scandinavian take German 1 through 6.

## Scandinavian Minor

To enter the Scandinavian minor, students must have an overall grade-point average of 2.0 or better.

*Required Courses:* Any seven Scandinavian courses, two of which may be lower division courses selected from Scandinavian 1 through 50.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

In addition to the University minimum requirements, prospective students in the M.A. program in Scandinavian must have an undergraduate major in Scandinavian languages or equivalent. Applicants who have deficiencies in the undergraduate major must complete it by taking the appropriate courses as recommended by the graduate adviser. A placement examination in the Scandinavian languages, as well as in German, may be required.

Three letters of recommendation are required by the Graduate Division. The Scandinavian Section welcomes applications for all three quarters (Fall, Winter, Spring).

For the Ph.D. degree in Germanic Languages with Scandinavian literature as a major or minor field, see the Ph.D. in Germanic Languages. For a brochure describing the program and requirements, write to the department.

### Areas of Study

There are no specific major fields or subdisciplines in the M.A. program, but students emphasize one modern language and literature area in Danish, Norwegian, or Swedish.

### Course Requirements

A total of 12 courses is required for the M.A. degree. These include a minimum of nine upper division and graduate courses in Scandina-

vian languages, at least five of which must be graduate courses. Three courses on the upper division or graduate level may be taken in a related field of linguistic or literary study to be determined in consultation with the graduate adviser; at least one of these must be at the graduate level. Comparative Literature 200 or an equivalent course in methodology is required as one of the 12 courses.

Three 596 courses (12 units) may be applied toward the total course requirement, but only one (four units) may be applied toward the minimum graduate course requirement.

### Comprehensive Examination Plan

A comprehensive examination, based on the required coursework and a reading list, is required of all candidates for the M.A. degree. The examination is given whenever the student has completed the course requirements and feels prepared to be examined on both the coursework and the reading list. The comprehensive examination is both written and oral; students who fail may be reexamined once without petitioning.

### Thesis Plan

None.

## Scandinavian

### Lower Division Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition. Students with demonstrated preparation may be permitted a more advanced program by the section or may be transferred to a more advanced course with consent of the instructor.

Native speakers of Norwegian, Swedish, or Danish may not enroll in any language course (including courses 105, 110, 115) in the Scandinavian Section except by petition in writing to the section. Non-Scandinavian students with knowledge of one of these Scandinavian languages may not take courses in the others except by petition in writing. Petitions must include a description of the student's linguistic background and the reason for wanting to take the language course in question.

1. **Elementary Swedish.**
2. **Elementary Swedish.** Enforced requisite: course 1.
3. **Elementary Swedish.** Enforced requisite: course 2.
4. **Intermediate Swedish.** Enforced requisite: course 3.
5. **Intermediate Swedish.** Enforced requisite: course 4.
11. **Elementary Norwegian.**
12. **Elementary Norwegian.** Enforced requisite: course 11.
13. **Elementary Norwegian.** Enforced requisite: course 12.
14. **Intermediate Norwegian.** Enforced requisite: course 13.

15. **Intermediate Norwegian.** Enforced requisite: course 14.

21. **Elementary Danish.**

22. **Elementary Danish.** Enforced requisite: course 21.

23. **Elementary Danish.** Enforced requisite: course 22.

24. **Intermediate Danish.** Enforced requisite: course 23.

25. **Intermediate Danish.** Enforced requisite: course 24.

50. **Introduction to Scandinavian Literature.** Lecture, three hours; discussion, one hour; outside study, eight hours. Intended for students in general and for those wishing to prepare for more advanced and specialized studies in Scandinavian literature and culture. Selected works from literatures of Denmark, Norway, Sweden, Iceland, and Finland, ranging from myth, national epic, saga, and folktale through modern novel, poem, play, short story, and film, read in English and critically discussed. P/NP or letter grading.

## Upper Division Courses

105. **Advanced Swedish.** Discussion, three hours. Prerequisite: course 5 or equivalent. Readings, composition, and conversation in Swedish. May be repeated once for credit. P/NP or letter grading.

110. **Advanced Norwegian.** Discussion, three hours. Prerequisite: course 15. Readings, composition, and conversation in Norwegian. May be repeated once for credit. P/NP or letter grading.

115. **Advanced Danish.** Discussion, three hours. Prerequisite: course 25. Readings, composition, and conversation in Danish. May be repeated once for credit. P/NP or letter grading.

141. **Backgrounds of Scandinavian Literature.** Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussion of representative texts selected from literature of medieval, Renaissance, baroque, and Enlightenment periods. P/NP or letter grading.

142. **Scandinavian Literature of the 19th Century.** Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussion of selected works from Romantic, realistic, and post-Romantic literature of Scandinavia in the 19th century. P/NP or letter grading.

143. **Scandinavian Literature of the 20th Century.** Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussion of selected works of modern Scandinavian literature from beginning of the century to the present. P/NP or letter grading.

C144. **Henrik Ibsen on the World Stage.** Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussion of selected plays by Henrik Ibsen. May be concurrently scheduled with course C251. P/NP or letter grading.

C145. **Getting Married: Strindberg and Battle of the Sexes.** Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian language not required. August Strindberg's portrayals of marital conflict reflected and shaped literary representation of the so-called battle of the sexes. His work, as well as its literary transformations, placed into a Scandinavian, European, and feminist context. May be concurrently scheduled with course C252. P/NP or letter grading.

**C146. Kierkegaard and Foundations of Existentialism.** Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussion of selected works by Søren Kierkegaard and other existentialist writers. May be concurrently scheduled with course C253. P/NP or letter grading.

**C147. Pan's Prophets: Knut Hamsun and Other Interpreters of Nature as Modern Idyll.** Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussion of selected works by Knut Hamsun and other 19th- and 20th-century Scandinavian writers who explored theme of nature as modern idyll. May be concurrently scheduled with course C254. P/NP or letter grading.

**C180. Literature and Scandinavian Society.** Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Discussion of selected aspects of Scandinavian society based on readings of contemporary literature as well as historical and/or sociological material. May be repeated for credit (as determined by undergraduate adviser) with topic change. May be concurrently scheduled with course C263. P/NP or letter grading.

**181. Contemporary Swedish Literature.** Discussion, three hours. Prerequisite: reading knowledge of a Scandinavian language. Reading and analysis of selected texts by major 20th-century Swedish authors.

**C182. Theory of the Scandinavian Novel.** Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Analysis of predominant structures of the Scandinavian novel from its 18th-century beginnings through its rise in the 19th century and its 20th-century evolution. Discussion of application of contemporary critical theories to the novels. May be concurrently scheduled with course C264. P/NP or letter grading.

**184. Hans Christian Andersen.** Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Study of works of Hans Christian Andersen, Danish novelist, dramatist, and writer of tales, including consideration of his literary background and of his times. Analysis of his works in terms of their structure, style, and meaning. P/NP or letter grading.

**C185. Seminar: Scandinavian Literature.** Discussion, three hours. Prerequisite: reading knowledge of a Scandinavian language. Selected topics in Scandinavian prose, poetry, and drama. May be repeated for credit with consent of instructor and undergraduate adviser. May be concurrently scheduled with course C265.

**C186. Voices of Women in Scandinavian Literature.** Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Readings and discussion of writings by Scandinavian women writers analyzed in historical, theoretical, sociological, critical, and comparative contexts. May be concurrently scheduled with course C266. P/NP or letter grading.

**187. Scandinavian Film: Bergman and Others.** (Formerly numbered 60.) Discussion, three hours. Prerequisite for Scandinavian majors: course 5, 15, or 25, or equivalent; for nonmajors: knowledge of a Scandinavian language not required. Intended for students in general and for those preparing for more advanced studies in Scandinavian literature and culture. Viewing and discussion of films by Ingmar Bergman and other Scandinavians. P/NP or letter grading.

**190. Honors Course in Scandinavian.** Prerequisites: senior standing with a minimum 3.0 GPA in the major, consent of honors committee. Intensive study of a selected special topic in Scandinavian. Discussions, oral and written reports.

**199. Special Studies in Scandinavian (2 or 4 units).** Requisites: senior or graduate standing, consent of instructor. To be arranged with faculty member who directs the study (course section to be identified by two-letter code using initials of sponsoring instructor — see section for I.D. number). Independent studies designed for graduates or senior undergraduates who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite.

## Graduate Courses

**C251. Henrik Ibsen on the World Stage.** Discussion, three hours. Prerequisites: advanced knowledge of a modern Scandinavian language, consent of instructor. Intensive study of works of Henrik Ibsen. May be concurrently scheduled with course C144. Graduate students may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

**C252. Getting Married: Strindberg and Battle of the Sexes.** Discussion, three hours. Prerequisite: advanced knowledge of a Scandinavian language or consent of instructor. August Strindberg's portrayals of marital conflict reflected and shaped literary representation of the so-called battle of the sexes. His work, as well as its literary transformations, placed into a Scandinavian, European, and feminist context. May be concurrently scheduled with course C145. Graduate students may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

**C253. Kierkegaard and Foundations of Existentialism.** Discussion, three hours. Prerequisites: advanced knowledge of a modern Scandinavian language, consent of instructor. Readings and discussion of selected works of Søren Kierkegaard and other existentialist writers. May be concurrently scheduled with course C146. S/U or letter grading.

**C254. Pan's Prophets: Knut Hamsun and Other Interpreters of Nature as Modern Idyll.** Discussion, three hours. Prerequisite: advanced knowledge of a Scandinavian language or consent of instructor. Intensive study of selected works by Knut Hamsun and other 19th- and 20th-century Scandinavian writers who explored theme of nature as modern idyll. May be concurrently scheduled with course C147. Graduate students may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

**C263. Literature and Scandinavian Society.** Discussion, three hours. Prerequisite: graduate standing or consent of instructor. Intensive study of selected aspects of Scandinavian society based on readings in the literature as well as historical and/or sociological material. May be repeated for credit (as determined by graduate adviser) with topic change. May be concurrently scheduled with course C180. Graduate students may meet for extra seminar hours and write research papers of greater length and depth. S/U or letter grading.

**C264. Theory of the Scandinavian Novel.** Discussion, three hours. Prerequisites: advanced knowledge of a Scandinavian language, consent of instructor. Analysis of predominant structures of the Scandinavian novel from its 18th-century beginnings through its rise in the 19th century and its 20th-century evolution. Discussion of application of contemporary critical theories to the novels. May be concurrently scheduled with course C182. Graduate students may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

**C265. Seminar: Scandinavian Literature.** Discussion, three hours. Prerequisite: reading knowledge of a Scandinavian language. Selected topics in Scandinavian prose, poetry, and drama. May be repeated for credit with consent of instructor and graduate adviser. May be concurrently scheduled with course C185.

**C266. Voices of Women in Scandinavian Literature.** Discussion, three hours. Prerequisite: advanced knowledge of a Scandinavian language or consent of instructor. Intensive study of writings by Scandinavian women writers analyzed in historical, theoretical, sociological, critical, and comparative contexts. May be concurrently scheduled with course C186. Graduate students may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**596. Directed Individual Study or Research (2 to 6 units).** Prerequisite: graduate standing in Scandinavian. To be arranged with faculty member who directs the study or research. Twelve units may be applied toward total course requirement, but only four units may be applied toward minimum graduate course requirement. May be repeated twice. S/U or letter grading.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (4 to 8 units).** To be arranged with faculty member who directs the study or research. May be repeated once. May not be applied toward M.A. minimum course requirements. S/U grading.

**599. Research for and Preparation of Ph.D. Dissertation.** To be arranged with faculty member who directs the study or research. May be repeated. S/U grading.

## SLAVIC LANGUAGES AND LITERATURES

*College of Letters and Science*

UCLA  
115 Kinsey Hall  
Box 951502  
Los Angeles, CA 90095-1502

(310) 825-2676  
<http://www.humnet.ucla.edu/humnet/slavic/slavic.html>

Ronald Vroon, Ph.D., *Chair*

### Professors

Henning Andersen, Ph.D. (*Slavic Languages*)  
Michael Heim, Ph.D. (*Czech and Russian Literature*)  
Vyacheslav Vs. Ivanov, Ph.D. (*Slavic Languages, Russian Literature*)  
Emily Klenin, Ph.D. (*Slavic Languages and Literatures*)  
Gail Lenhoff, Ph.D. (*Russian Literature*)  
Aleksandr L. Ospovat, Ph.D. (*Russian Literature*)  
Ronald Vroon, Ph.D. (*Russian Literature*),  
Olga Yokoyama, Ph.D. (*Slavic Languages*)

### Professors Emeriti

Aleksandar Albijanić, Ph.D.  
Henrik Birnbaum, Ph.D.  
Thomas Eekman, Ph.D.  
Kenneth E. Harper, Ph.D.  
Vladimir Markov, Ph.D.  
Rochelle Stone, Ph.D.  
Dean S. Worth, Ph.D.

### Associate Professor

Peter Hodgson, Ph.D. (*Russian Literature*)

### Assistant Professors

Irina Gutkin, Ph.D. (*Russian Literature*)  
Roman Koropecy, Ph.D. (*Polish and Ukrainian Literature*)

**Lecturers**

Edward Denzler, M.A., *Emeritus*  
Olga Kagan, Diploma (*Russian*)  
Susan Kresin, Ph.D.

**Scope and Objectives**

The Bachelor of Arts degree in Russian Language and Literature is designed to provide students with basic mastery of the Russian language and familiarity with the classics of Russian literature. Within the major, students concentrate either in Russian literature and culture or Russian linguistics. Students typically begin to study Russian in their first year, but those contemplating a Russian major later in their academic program can fulfill the Russian language requirements by combining regular coursework with summer programs or with the University of California semester program in Moscow, which is open to students who have completed the equivalent of two years of study (American Council of Teachers of Foreign Languages — ACTFL — level 1). Students interested in this program should consult the undergraduate adviser as early as possible.

The Bachelor of Arts degree in Slavic Languages and Literatures is designed to provide students with basic mastery of two Slavic languages and familiarity with their literatures, as well as general background in the cultural, political, and social history of the Slavic peoples.

The department also offers a Bachelor of Arts degree in Russian Studies in which students achieve a basic mastery of the Russian language, as well as familiarity with Russian literature, history, and culture.

The graduate program provides advanced training in the Slavic literatures and linguistics leading to the M.A. and Ph.D. degrees. The primary task of the department faculty is to develop and refine the critical and analytic skills of its students in preparation for productive careers in college teaching and research in the Slavic field. Alternative careers include language teaching, business, translation, interpreting, librarianship, and government service.

**Undergraduate Study**

The department offers three majors: (1) Russian language and literature, with concentrations in Russian literature or Russian linguistics, (2) Slavic languages and literatures, and (3) Russian studies. The equivalent of a major in Slavic or Russian language and literature is normally required for admission to the department's graduate program and is used to determine the number of courses in Russian literature and/or linguistics that students majoring in Russian studies are expected to make up in order to receive graduate degrees in the department. Students not majoring in Slavic or Russian language and literature who intend to pursue graduate study in the department are strongly encouraged to take courses in Russian literature and linguistics during their undergraduate years to reduce the number of

makeup courses required. Qualified seniors may also take graduate courses numbered below 220 with consent of the instructor and the graduate and undergraduate advisers.

**Bachelor of Arts in Russian Language and Literature****Preparation for the Major**

*Required:* Russian 1, 2, 3, 4, 5, 6, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1), 99A.

**The Major**

*Required:* Russian language skills equivalent to ACTFL level 2 (students usually take Russian 101A-101B-101C and 102A-102B-102C to attain level 2 proficiency; consult the undergraduate adviser for information on summer programs and the Moscow semester program), Russian 106, 130A, 140A.

Students also must concentrate in either literature or linguistics. For the *literature* concentration, Russian 118, 119, 120 (all three may be taken in the sophomore year), and two courses from 124A through 124F, 125, 126, 130B, 130C, 134, 140B, 140C, 140D, M150 are required. For the *linguistics* concentration, two courses from Linguistics 103, 110, 120A, 120B, and two courses from Slavic 201, 202, Russian 118, 119, 120, 124A through 124F, 125, 126, 130B, 130C, 134, 140B, 140C, 140D, M150, Linguistics 103, 110, 120A, 120B, 127 are required.

**Bachelor of Arts in Slavic Languages and Literatures****Preparation for the Major**

*Required:* Russian 1, 2, 3, 4, 5, 6, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1), Slavic 99.

**The Major**

*Required:* Russian 101A-101B-101C or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1+); courses 118, 119, 120 (all three may be taken in the sophomore year); one three-course sequence from Czech 102A-102B-102C, 102D-102E-102F, Polish 102A-102B-102C, 102D-102E-102F, Serbo-Croatian 103A-103B-103C, 103D-103E-103F (placement with consent of instructor); three courses from Czech 102D, 102E, 102F, Polish 102D, 102E, 102F, Serbo-Croatian 103D, 103E, 103F, Russian 102A, 102B, 102C, 123, 130A, 130B, 130C, 134, 140A through 140D, M150; two courses from Czech 155A, 155B, Polish 152A, 152B, Serbo-Croatian 154A, 154B, Slavic M125, M126.

**Bachelor of Arts in Russian Studies****Preparation for the Major**

*Required:* Russian 1, 2, 3, 4, 5, 6, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1), 99A.

**The Major**

*Required:* Russian 101A-101B-101C or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1+), three courses in Russian literature, two courses from History 131A through 131D, two courses from Economics 182, Geography 184, Political Science 128A, 128B, 156A, Russian M170, and five additional courses selected from those listed above, from Russian language, literature, or linguistics courses, or from special courses (approved by the undergraduate adviser) offered by the Departments of Art, Art History, Design, Film and Television, History, Music, Political Science, Slavic Languages and Literatures, and Theater.

**Russian Language and Literature Minor**

To enter the Russian language and literature minor, students must have an overall grade-point average of 2.0 or better.

*Required Lower Division Courses:* Russian 3 or 13B or 15B and two courses from 25, 99A, 99B.

*Required Upper Division Courses:* Five Russian language or literature courses, including at least two from Russian 118, 119, 120.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

**Graduate Study**

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

**Master's Degree****Admission**

In addition to the University minimum requirements, the department requires the following from applicants to the Master of Arts program in Slavic Languages and Literatures: the equivalent of a UCLA B.A. in Russian Language and Literature, Slavic Languages and Literatures, or Russian Studies, or three years of Russian language and a variety of Russian history, literature, and linguistics courses.

All applicants must submit three letters of recommendation from persons capable of judging their academic potential and a writing sample in the field they wish to pursue. The Graduate Record Examination (GRE) is also required as part of the application.

A departmental brochure describing the curriculum in some detail (graduate and undergraduate) is available from the department.

## Areas of Study

Candidates for the M.A. degree choose a specialization in either literature or linguistics, with Russian as the principal language and literature.

## Course Requirements

A minimum of 36 units is required of students in literature and 40 units for students in linguistics.

Slavic 201, Russian 204, 212A, 220A are required of all M.A. students.

Literature students must also take Russian 211A, 211B, 212B, 213, 219.

Linguistics students must also take Slavic 202; Russian 220B; one course from Russian 211A, 211B, 212B, 213; three courses from Russian 241, 242, 265; Russian 243, 263, 264; and Russian 210, Slavic 241A, 241B.

Courses in the 500 series may not be applied toward the M.A. course requirements.

## Comprehensive Examination Plan

Applications for advancement to candidacy must be made no later than the second week of the quarter in which the M.A. examinations are to be taken and are accepted only if students have passed the Russian Language Proficiency Examination. M.A. examinations are offered at the end of each quarter. After students have declared their intention to take the examination in a given quarter, a committee consisting of three members is appointed by the chair. The examination has two parts — written (three hours) and oral (two hours) — and is based on coursework and the departmental reading list. The oral part may be conducted partly in Russian.

The student's combined performance in the written and oral examinations is graded high pass, pass, or fail. A grade of high pass or pass is necessary to receive the M.A. degree; the grade of high pass is necessary to enter the Ph.D. program. Examinations may be repeated once; there is a six-month limit on retaking examinations graded pass and a one-year limit on examinations graded fail.

## Thesis Plan

None.

## Doctoral Degree

### Admission

Applicants are formally admitted to the Ph.D. program after (1) passing the UCLA M.A. examination with a grade of high pass; (2) passing the reading examination in both French and German; and (3) demonstrating proficiency in modern Slavic languages other than Russian as follows: applicants to the literature area must complete one year of the language of their second Slavic literature; applicants to the linguistics area must complete one year of one language and two years of another (one of the languages should represent the West Slavic group, the other the South Slavic group).

Equivalent language proficiency may be demonstrated through written and oral examinations rather than coursework.

Applicants who do not have an M.A. in Slavic Languages and Literatures from UCLA must provide three letters of recommendation from persons capable of judging their academic potential and submit a writing sample in the field they wish to pursue. The Graduate Record Examination (GRE) is also required as part of the application.

Students with M.A. degrees from other institutions who are admitted to the program must take the UCLA M.A. comprehensive examination as a screening examination within three terms following matriculation. This determines whether they are allowed to continue for the Ph.D. Students may retake the examination once in order to attempt to achieve the high pass grade.

## Major Fields or Subdisciplines

Candidates for the Ph.D. degree choose a specialization in either literature or linguistics, with Russian usually as the principal language and literature. By special arrangement doctoral students may specialize in a language or literature other than Russian.

## Course Requirements

Before the formation of a doctoral committee, students must be officially admitted to the doctoral program and have taken the following required courses.

Students whose specialization is linguistics must take Slavic 221, 222, 223, and three other advanced linguistics courses or seminars. Recommended preparation for linguistics includes Linguistics 103, 110, 120A, 120B, M150.

Students whose specialization is literature must take two courses from Slavic 230A-230B-230C, and four advanced literature courses or seminars. Students are also advised to acquire a sound general knowledge of modern Western European literature.

## Written and Oral Qualifying Examinations

*Qualifying Paper.* Students are required to submit to the faculty a qualifying paper that demonstrates their ability to conduct serious and original research. The paper must be received and approved by the faculty adviser (usually the prospective examination and dissertation committee chair) no later than one quarter preceding the quarter in which students expect to take the qualifying examinations.

*Written Examinations.* All students are expected to have a sound general knowledge of both Slavic philology and Russian literary history.

Students in linguistics take two three-hour written examinations, usually one on the structure of modern Russian and the other on compara-

tive Slavic linguistics, the history of Russian, and the history and structure of a second Slavic language.

Students in literature must take a series of written examinations on Russian literature and one on a Slavic literature other than Russian. For the examination on Russian literature, students choose six fields and make up an appropriate reading list for each with members of their doctoral committee. A field may cover an author, genre, theme, literary movement, school of theory, etc. Each of four periods — early Russian literature, the 18th century, the 19th century, and the 20th century — must be represented by a field; the other two fields may cross period boundaries. The examination in a Slavic literature other than Russian tests students' knowledge of the history of the literature and familiarity with representative works. Each examination is one hour in length; the seven examinations are taken over the course of a single week.

*Oral Examination.* Students who receive a grade of pass on the written examinations are admitted to a two-hour University Oral Qualifying Examination, which is designed to test the fields of major interest and general background and which typically includes discussion of the dissertation topic.

After considering students' overall performance in both the oral and written examinations, the committee assigns a cumulative grade. A pass grade entitles students to write a dissertation. At the committee's discretion, students may be required to retake any or all portions of the Ph.D. examinations within one calendar year after the first attempt.

Within two quarters (or one quarter and a summer) after passing the qualifying examinations, students must submit a prospectus and commence writing the dissertation.

Students are required to deliver a formal lecture in the California Slavic Colloquium no later than two calendar years after advancement to candidacy.

## Slavic

### Lower Division Courses

**88. Seminar: Literature and Culture.** Seminar, three hours. Variable topics course designed to explore themes and issues pertinent to Slavic literature and culture. Consult *Schedule of Classes* or department for topics to be offered in a specific term.

**99. Introduction to Slavic Civilization.** Lecture, three hours. Introductory survey of social and cultural institutions of the Slavic peoples and their historical background.

### Upper Division Courses

**M125. Interwar Central European Prose.** (Same as Comparative Literature M162 and German M119G.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative authors of the 1920s and 1930s in translation. Special attention to relation between literature and historical and ethnic concerns. P/NP or letter grading.

**M126. Postwar Central European Prose.** (Same as Comparative Literature M166 and German M119H.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative contemporary authors in translation. Special attention to relation between art and ideology. P/NP or letter grading.

**177. Baltic Languages and Cultures (2 units).** General survey of peoples speaking Old Prussian, Lithuanian, and Latvian; their linguistic, historical, and ethnic affiliations.

**M179. Baltic and Slavic Folklore and Mythology.** (Same as Folklore M126.) Lecture, three hours. General course for students interested in folklore and mythology and for those interested in Indo-European mythic antiquities.

**199. Special Studies (2 to 8 units).** Prerequisites: senior standing, consent of instructor.

## Graduate Courses

**200. Proseminar.** Presentation/discussion, three hours. Prerequisite: graduate standing. Introduction to research tools and techniques, as well as broad exposure to metalanguages of linguistics and literary criticism.

## Linguistics

**201. Introduction to Old Church Slavic.** Lecture, three hours. Required for M.A. (linguistics, literature). Introduction to phonology and grammar; readings.

**202. Introduction to Comparative Slavic Linguistics.** Lecture, three hours. Prerequisite: course 201. Required for M.A. (linguistics). Introduction to comparative phonology and grammar of Slavic languages.

**211. Slavic Gender Linguistics.** Lecture, three hours. Examination of linguistic differences between male and female speech and of language used to refer to females and males. Course contributes to understanding of language, literature, sociolinguistics, gender issues, and Slavic culture in general. S/U or letter grading.

**221. Introduction to East Slavic Languages.** Lecture, three hours. Prerequisites: Russian 102A-102B-102C or Ukrainian 101A-101B-101C. Recommended: course 202. Required for Ph.D. (linguistics). Introduction to structure and history of East Slavic languages.

**222. Introduction to West Slavic Languages.** Lecture, three hours. Prerequisite: course 202. Recommended: Czech 102A-102B-102C or Polish 102A-102B-102C. Required for Ph.D. (linguistics). Introduction to structure and history of West Slavic languages.

**223. Introduction to South Slavic Languages.** Lecture, three hours. Prerequisite: course 202. Recommended: Serbo-Croatian 103A-103B-103C or Bulgarian 103A-103B-103C. Required for Ph.D. (linguistics). Introduction to structure and history of South Slavic languages.

**224. Introduction to Ukrainian and Belorussian.** Lecture, three hours. Prerequisite: course 202. Introduction to history and structure of Ukrainian and Belorussian.

**M229. Introduction to Slavic Bibliography (2 units).** (Same as Library and Information Science M229C.) Prerequisite: consent of instructor. Introduction to Slavic and East European bibliography for the humanities and social sciences. Emphasis to be determined by requirements and background of enrolled students. Topics include relevant library terminology and concepts; survey of languages and transliteration systems; acquisition of Slavic and East European library materials; Slavic and East European scholarship in the West; relevant reference sources, archival resources, and research methods; survey of on-line databases; compilation of bibliographies. S/U grading.

**241A-241B. Advanced Old Church Slavic.** Lecture, three hours. Prerequisite: course 201. **241A.** Advanced Readings in Canonical Texts; **241B.** East, West, and South Slavic Recensions of Church Slavic.

**242. Comparative Slavic Linguistics.** Lecture, three hours. Prerequisite: course 202. Selected topics in development of Common Slavic.

**251. Introduction to Baltic Linguistics.** Lecture, three hours. Prerequisite: course 202. Introduction to Baltic linguistics, with special attention to relationship between Baltic and Slavic.

**261. Slavic Paleography.** Lecture, three hours. Prerequisite: course 201. Introduction to Slavic paleography: inscriptions, birchbark letters, Glagolitic and Cyrillic texts.

**262A-262B. West Slavic Linguistics.** Lecture, three hours. Prerequisite: course 222. **262A.** Lekhitic; **262B.** Czechoslovak, Sorbian.

**263A-263B. South Slavic Linguistics.** Lecture, three hours. Prerequisite: course 223. **263A.** Serbo-Croatian, Slovene; **263B.** Bulgarian, Macedonian.

**281. Seminar: Slavic Linguistics.** Seminar, three hours. Selected topics in comparative and historical Slavic linguistics. May be repeated for credit with consent of instructor and graduate adviser.

**282. Seminar: Structural Analysis.** Seminar, three hours. Selected topics. May be repeated for credit with consent of instructor and graduate adviser.

## Literature

**230A-230B-230C. Topics in Comparative Slavic Literature.** Lecture, three hours. Recommended prerequisites: upper division courses in Czech, Polish, Russian, and Yugoslav literatures. Two terms required for Ph.D. (literature). May be repeated for credit with consent of instructor and graduate adviser. **230A.** Middle Ages through Baroque; **230B.** Classicism to Romanticism; **230C.** Realism to Modernism.

**290. Seminar: Comparative Slavic Literature.** Seminar, three hours. Prerequisites: courses 230A-230B-230C. Recommended: reading knowledge of one Slavic language in addition to Russian. Selected topics involving more than one Slavic literature or Slavic and Western literatures. May be repeated for credit with consent of instructor and graduate adviser.

**295. Seminar: Literary Analysis.** Seminar, three hours. Recommended (but not prerequisite): reading knowledge of one Slavic language in addition to Russian. Selected topics from various Slavic literatures or Slavic and Western literatures, with emphasis on analytic methods. May be repeated for credit with consent of instructor and graduate adviser.

## Special Studies

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching Slavic Languages at College Level.** Lecture, 90 minutes; discussion, 90 minutes. Designed for graduate students. Theory and practice of language teaching. Discussion of contemporary language teaching methodology as well as problems of pedagogical grammar. S/U grading.

**596. Directed Individual Study or Research (2 to 8 units).** Prerequisite: consent of instructor and graduate adviser.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units).** Prerequisite: consent of instructor and graduate adviser.

**599. Research for Ph.D. Dissertation (2 to 12 units).**

## Bulgarian

### Lower Division Course

**99. Introduction to Bulgarian Civilization.** Lecture, three hours. Introductory survey of social and cultural institutions of the Bulgarian people and their historical background.

## Upper Division Courses

**103A-103B-103C. Elementary Bulgarian (5 units each).** Recitation, five hours; outside study, 10 hours minimum. Basic courses in the Bulgarian language. P/NP or letter grading.

**154. Survey of Bulgarian Literature.** Lecture, three hours. Prerequisite: upper division standing. Lectures and readings in English. Survey of Bulgarian literature from the Middle Ages to the present.

## Czech

### Upper Division Courses

**102A-102B-102C. Elementary Czech (5 units each).** Recitation, five hours; outside study, 10 hours minimum. Basic courses in the Czech language. P/NP or letter grading.

**102D-102E-102F. Advanced Czech.** Recitation, three hours. Prerequisite: course 102C.

**155A-155B. Czech Literature.** Lecture, three hours. Lectures and readings in English. **155A.** Survey of Czech Literature from the Middle Ages to the Present; **155B.** Selected Topics.

## Polish

### Upper Division Courses

**102A-102B-102C. Elementary Polish (5 units each).** Recitation, five hours; outside study, 10 hours minimum. Basic courses in the Polish language. P/NP or letter grading.

**102D-102E-102F. Advanced Polish.** Recitation, three hours. Prerequisite: course 102C.

**152A-152B-152C. Survey of Polish Literature.** Lecture, three hours. Lectures and readings in English. **152A.** From the Middle Ages to Neoclassicism; **152B.** Reimagining a Nation. Readings in 19th-century Polish literature and culture. **152C.** Dreaming, Mocking, and Writing "as if." Readings in modern Polish literature and culture.

## Graduate Course

**280. Seminar: Polish Literature.** Seminar, three hours. Selected topics in Polish prose, poetry, and drama. May be repeated for credit with consent of instructor and graduate adviser.

## Russian

### Language

**1. Elementary Russian (5 units).** Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

**2. Elementary Russian (5 units).** Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

**3. Elementary Russian (5 units).** Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

**4. Intermediate Russian (5 units).** Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

**5. Intermediate Russian (5 units).** Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

**6. Intermediate Russian (5 units).** Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

**10. Intensive Elementary Russian (12 units).** Intensive basic course in the Russian language equivalent to courses 1, 2, and 3.

**11A-11B-12A-12B-13A-13B. Self-Paced Program in Russian (2 units each).** Basic courses in the Russian language; two to four units per term recommended. Each two-unit course in sequence requires 30 minutes of laboratory session per week and 30 minutes of discussion session per week, plus individual instruction as required by the staff. Courses 11B and higher require completion of or simultaneous enrollment in all courses lower in sequence. P/NP or letter grading.

**15A-15B. Accelerated Russian (8 units, 7 units).** Recitation, five hours; laboratory, two hours; outside study, 15 hours. Material of first-year Russian course to be covered in two terms, with extensive use of language laboratory and the Russian Room. P/NP or letter grading.

**20. Intensive Intermediate Russian (12 units).** Requisite: course 10 or one year of elementary Russian. Intermediate instruction in reading, writing, and speaking Russian equivalent to courses 4, 5, and 6.

**101A-101B-101C. Advanced Russian (5 units each).** Recitation, five hours; outside study, 10 hours minimum. Prerequisite: course 6. Advanced grammar, reading, and conversation. P/NP or letter grading.

**102A-102B-102C. Advanced Composition and Conversation: Reading of Contemporary Texts.** Lecture, three hours. Prerequisite: course 101C or consent of instructor. Advanced conversation and composition, using a multimedia approach (contemporary Russian prose, Soviet television and films).

**103. Russian for Native Speakers.** Discussion, three hours. Preparation: knowledge of Russian at advanced level. Improvement of oral and written language skills, emphasizing correct and diversified use of language and addressing individual grammatical difficulties. Russian conversation, readings from fictional and nonfictional texts; discussion of films. Final project required. P/NP or letter grading.

**106. Reading of Advanced Literary Texts.** (Formerly numbered 106A-106B.) Lecture, three hours. Prerequisite: course 101C. Emphasis on integrating concepts about the structure of Russian into reading and analysis of difficult texts.

**107. Russian for Social Scientists (2 units).** Prerequisite: three years of Russian or consent of instructor. Reading of texts relevant to social scientists; viewing of Soviet TV. May be repeated for credit.

**108A-108B-108C. Business Russian.** Prerequisite: consent of instructor. Russian grammar, conversation, reading, general and business vocabulary, and verbal etiquette; introduction to Russian business conduct. P/NP or letter grading.

## Linguistics

**123. Historical Commentary on Modern Russian.** Lecture, three hours. Prerequisite: course 101C. Historical explanation of phonological and morphological anomalies of modern Russian.

## Literature and Civilization

**25. The Russian Novel in Translation.** Lecture, three hours; discussion, one hour. Designed for non-majors. Study of major works by the great 19th-century Russian novelists.

**30. Russian Literature and World Cinema.** Lecture, three hours; discussion, one hour. Examination of Russian literary masterpieces and their screen adaptations in various national cinematic traditions, focusing on problems of perception and misperception arising when literature is translated into cinema, and one national culture is viewed through the eyes of another. P/NP or letter grading.

**99A. Introduction to Russian Civilization.** Lecture, three hours. Introductory survey of social and cultural institutions of the Russian people and their historical background.

**99B. Russian Civilization in the 20th Century.** Lecture, three hours. Survey of literature, theater, cinema, television, press, music, and arts. Emphasis on contemporary period, with constant reference to Russian and early Soviet antecedents.

**118. Russian Literature of Middle Ages and Enlightenment.** Lecture, three hours. Designed for juniors/seniors. Russian majors should take this course in their sophomore year. Lectures and readings in English. Survey of Russian literature from its origins through the Enlightenment, with focus on influence of church, state, and society in evolution of a national literature.

**119. Golden Age and the Great Realists.** Lecture, three hours. Designed for juniors/seniors. Russian majors should take this course in their sophomore year. Lectures and readings in English. Survey of 19th-century Russian literature (Pushkin, Gogol, Tolstoy, Dostoevsky, Chekhov) in its cultural, political, and social contexts.

**120. Literature and Revolution.** Lecture, three hours. Designed for juniors/seniors. Russian majors should take this course in their sophomore year. Lectures and readings in English. Major works of the 20th century (Belyi, Pasternak, Bulgakov, Solzhenitsyn, and others) from prerevolutionary avant-garde to the present.

**124A-124G. Studies in Russian Literature.** (Formerly numbered 124A-124F.) Lecture, three hours. Lectures and readings in English. Following writers are alternately discussed: **124A.** Pushkin; **124B.** Gogol; **124C.** Turgenyev; **124D.** Dostoevsky; **124E.** Tolstoy; **124F.** Chekhov; **124G.** Nabokov. Nabokov as writer (the European stories and novel *The Gift*, originally written in Russian, and the American novels *Lolita*, *Pnin*, and *Pale Fire*, originally written in English) and as critic (with excerpts from his criticism and from works by Pushkin, Gogol, and Lermontov), translator (*Eugene Onegin*), and memoirist (*Speak, Memory*).

**125. The Russian Novel in Its European Setting.** Lecture, three hours. Prerequisite: upper division standing. Lectures and readings in English. Emphasis on 19th- and 20th-century novelists.

**126. Survey of Russian Drama.** Lecture, three hours. Prerequisite: upper division standing. Lectures and readings in English. Major Russian plays from the 18th to 20th century.

**127. Women in Russian Literature.** Lecture, three hours. Prerequisite: upper division standing. Lectures and readings in English. Introduction to "alternative tradition" of women's writings in Russia and the Soviet Union. Emphasis on images of women expressed in this tradition as compared with those found in works of contemporary male writers.

**128. Russian Science Fiction.** Lecture, three hours. Readings in English. Introduction to Russian science fiction in the 20th century. Emphasis on function of science fiction in development of Russian culture before and after the October Revolution. P/NP or letter grading.

**130A-130B-130C. Russian Poetry.** Lecture, three hours. Preparation: third-year Russian recommended. Lectures and readings in Russian. **130A.** Introduction to Analysis of Russian Poetry. Role of biography, cultural subtexts, rhetoric, and form in interpreting poetic texts. **130B.** Poetry of Russian Neoclassicism, Romanticism, and Realism. Major works of late 18th and 19th centuries in their historical and cultural contexts. **130C.** Russian Poetry in the 20th Century. Major poetic schools from early modernism (symbolism, futurism, acmeism) to contemporary avant-garde.

**134. Pushkin.** Lecture, three hours. Prerequisite: course 6. Lectures and readings in Russian. Major poetical works.

**140A-140D. Russian Prose Fiction.** Lecture, three hours. Preparation: third-year Russian recommended. Lectures and readings in Russian. **140A.** Introduction to Analysis of Russian Narrative Prose. Close analysis of genre, narrative, and rhetorical strategies and interplay of literature, history, and culture. **140B.** Russian Romantic Prose. Karamzin, Pushkin, Gogol, and others. **140C.** Great Realists. Dostoevsky, Tolstoy, and others. **140D.** 20th-Century Modernism.

**M150. Russian Folk Literature.** (Same as Folklore M150.) Lecture, three hours. Lectures and readings in Russian.

**M170. Russian Folklore.** (Same as Folklore M170.) Lecture, three hours. Lectures and readings in English. General introduction to Russian folklore, including survey of genres and related folkloric phenomena.

**193. Seminar: Russian Literature.** Seminar, three hours. Prerequisite: course 6 or consent of instructor. Recommended: course 101C. Reading and discussion of selected authors; written seminar papers usually required.

## Graduate Courses

**201A-201B-201C. Introduction to Analysis of Russian Texts.** Lecture, three hours. Prerequisites: courses 102C and 106, or consent of instructor. Conducted in Russian. Reading, analysis of text structure and style, translation exercises, composition.

## Linguistics

**202. Structure of Colloquial Russian.** Phonology, morphology, word formation, lexicon, and sentence and discourse structure of contemporary vernacular of Russian intelligentsia in context of linguistic variation. S/U or letter grading.

**203. Practicum in Russian (2 units).** Prerequisite: course 201C. Two terms per year required of Ph.D. students. Reading of advanced texts; advanced composition, conversation; stylistics. May be repeated for credit. S/U grading.

**204. Introduction to History of the Russian Language.** Lecture, three hours. Prerequisites: course 220A, Slavic 201. Required for M.A. (linguistics, literature). Survey of history of the Russian language from its beginning to the present.

**210. Readings in Old Russian Texts.** Lecture, three hours. Prerequisite: Slavic 201 or consent of instructor. Readings in premodern Russian texts. May be repeated for credit.

**220A-220B. Structure of Modern Russian.** Lecture, three hours. **220A.** Phonology and Morphology. Required for M.A. (literature, linguistics). Advanced study and analysis of problems in Russian phonology, inflection, and derivation. **220B.** Morphosyntax. Prerequisite: course 220A. Required for M.A. (linguistics). Survey of Russian syntax and grammatical categories.

**241. Topics in Russian Phonology.** Lecture, three hours. Prerequisite: course 220A. Selected topics in Russian phonology. May be repeated for credit with consent of instructor.

**242. Topics in Russian Morphology.** Lecture, three hours. Prerequisite: course 220A. Selected topics in Russian inflection and derivation. May be repeated for credit with consent of instructor.

**243. Topics in Historical Russian Grammar.** Lecture, three hours. Prerequisites: course 204, Slavic 221. Selected topics in Russian historical phonology, morphology, and syntax. May be repeated for credit with consent of instructor.

**261. Discourse Grammar of Russian.** Analysis of phenomena of Contemporary Standard Russian controlled by discourse/pragmatic factors at all levels of linguistic structure from phonology to intersentential syntax. S/U or letter grading.

**263. Russian Dialectology.** Lecture, three hours. Prerequisite: Slavic 221. Phonology and grammar of modern Great Russian dialects.

**264. History of the Russian Literary Language.** Lecture, three hours. Prerequisites: course 204, Slavic 201. Evolution of literary Russian from the 11th to 20th century. Lectures and analysis of texts.

**265. Topics in Russian Syntax.** Lecture, three hours. Prerequisite: course 220B. Traditional and generative approaches to Russian syntax. May be repeated for credit with consent of instructor.

**266. Russian Lexicology.** Lecture, three hours. Examination of formal and semantic structure of Russian lexicon.

## Literature and Civilization

**211A. Literature of Medieval Rus'.** Lecture, three hours. Required for M.A. (literature). Survey of the literature from its beginning through the Kievan and Muscovite periods up to end of the 17th century.

**211B. 18th-Century Russian Literature.** Lecture, three hours. Required for M.A. (literature). Lectures and readings in major and secondary writers. Analysis of related literary works.

**212A-212B. 19th-Century Russian Literature.** Lecture, three hours:

**212A.** The Golden Age. Required for M.A. (literature, linguistics). Survey of major literary movements and schools following demise of neoclassicism: sentimental school, early and late Romanticism, and beginnings of natural school. Discussion of representative works of Karamzin, Zhukovsky, Batyushkov, Pushkin, Baratynsky, Lermontov, Gogol.

**212B.** Age of Realism. Required for M.A. (literature). Survey devoted to emergence of critical and psychological realism, beginning with early works of Turgenyev, Goncharov, and Dostoevsky, moving to major novels of Tolstoy, Dostoevsky, and Saltykov-Shchedrin, and concluding with works of the presymbolist period, especially the short stories of Chekhov.

**213. 20th-Century Russian Literature.** Lecture, three hours. Required for M.A. (literature). Lectures and readings in major and secondary writers.

**215. Contemporary Russian Literature.** Discussion, three hours. Prerequisite: course 213. Close readings in selected texts of poetry and prose, metropolitan and emigre, of recent vintage. May be repeated for credit. S/U or letter grading.

**219. Movements and Genres in Russian Literature.** Lecture, three hours. Required for M.A. (literature). Introduction to most important theoretical issues of Russian literature viewed in diachronic perspective.

**227. Linguistic Approaches to Russian Poetry.** Lecture, three hours. Prerequisite: graduate standing. Introduction to use of linguistic methods in study of Russian poetic texts. May be repeated for credit.

**251. Topics in Literature of Medieval Rus'.** Lecture, three hours. Prerequisite: course 211A. Detailed discussion of particular writers, periods, or genres. May be repeated for credit with consent of instructor and graduate adviser.

**270. Russian Poetics.** Lecture, three hours. Introduction to technical study of Russian poetics and versification, with attention to metrics, stanza forms, rhyme, and development of various verse types from the 18th into the 20th century.

**290. Seminar: Russian Poetry.** Seminar, three hours. Recommended (but not prerequisite): course 270. Detailed study of a single author, period, or work. May be repeated for credit with consent of instructor and graduate adviser.

**291A. Seminar: Literature of Medieval Rus'.** Seminar, three hours. Prerequisite: course 211A. Selected topics from the 11th through the 17th century. May be repeated for credit with consent of instructor and graduate adviser.

**291B. Seminar: 18th-Century Russian Literature.** Seminar, three hours. Prerequisite: course 211B. Selected authors and works from 18th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

**292. Seminar: 19th-Century Russian Literature.** Seminar, three hours. Prerequisites: courses 212A-212B. Selected authors and works from 19th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

**293. Seminar: 20th-Century Russian Literature.** Seminar, three hours. Prerequisite: course 213. Selected authors and works from 20th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

**294. Seminar: Russian Literary Criticism.** Seminar, three hours. Prerequisites: courses 211B, 212A-212B, 213. Detailed study of specific school of literary criticism, single literary critic, or period in Russian literary history as reflected in literary criticism. Simultaneous or similar phenomena in literary criticism in the West. May be repeated for credit with consent of instructor and graduate adviser.

**296. Seminar: History of Russian Culture.** Discussion, three hours. Reading and discussion on selected topics in history of Russian culture.

## Serbo-Croatian

### Upper Division Courses

**103A-103B-103C. Elementary Serbo-Croatian (5 units each).** Recitation, five hours; outside study, 10 hours minimum. Basic courses in the Serbo-Croatian language. P/NP or letter grading.

**103D-103E-103F. Advanced Serbo-Croatian.** Recitation, three hours. Prerequisite: course 103C.

**113A-113B-113C. Advanced Reading and Composition.** Recitation, three hours. Prerequisite: course 103F or consent of instructor. Reading and translation of difficult texts; advanced composition.

**154A-154B. Yugoslav Literature.** Lecture, three hours. Lectures and readings in English. **154A.** Survey of Yugoslav Literature from the Middle Ages to the Present; **154B.** Selected Topics.

## Slovak

### Graduate Course

**222. Structure of Slovak.** Lecture, three hours. Prerequisite: Slavic 202. Recommended: Slavic 222. Introduction to phonological and morphological structure of the Slovak language, especially as contrasted with Czech.

## Ukrainian

### Upper Division Courses

**101A-101B-101C. Elementary Ukrainian (5 units each).** Recitation, five hours; outside study, 10 hours minimum. Basic courses in the Ukrainian language. P/NP or letter grading.

**152. Ukrainian Literature.** Lecture, three hours. Lectures and readings in English. Survey of writers, literary trends, and issues in Ukrainian literature from the late 18th century to the present. Special attention to works of such major figures as I. Kotlyarevsky, T. Shevchenko, I. Franko, L. Ukrainka, and P. Tychnya.

## Non-Slavic Languages of Eastern Europe

### Lithuanian

### Upper Division Courses

**101A-101B-101C. Elementary Lithuanian.** Recitation, five hours. Basic courses in the Lithuanian language.

## Romanian

### Lower Division Course

**99. Introduction to Romanian Civilization.** Lecture, three hours. Introductory survey of social and cultural institutions of the Romanian people and their historical background.

### Upper Division Courses

**101A-101B-101C. Elementary Romanian (5 units each).** Recitation, five hours; outside study, 10 hours. Basic courses in the Romanian language. P/NP or letter grading.

**101D-101E-101F. Advanced Romanian (5 units each).** Recitation, five hours; outside study, 10 hours. Prerequisite: course 101C. Course 101D is requisite to 101E, which is requisite to 101F. Differences between oral and written discourse, expansion of students' general and academic vocabulary, and increase of range of grammatical structures for use in speaking and writing. Cultural information to be included in readings.

**104. Intensive Elementary Romanian (12 units).** Intensive basic course in Romanian equivalent to courses 101A-101B-101C. P/NP or letter grading.

**152. Survey of Romanian Literature.** Lecture, three hours. Lectures and readings in English. Survey of Romanian literature from the Middle Ages to the present.

### Graduate Course

**201. Romanian as a Romance Language.** Lecture, three hours. Survey of structure and development of the Romanian language, with special emphasis on relationship of Romanian to other members of the Romance group.

## SOCIAL SCIENCES

*College of Letters and Science*

UCLA  
1312 Murphy Hall  
Box 951438  
Los Angeles, CA 90095-1438  
(310) 825-4017

### Scope and Objectives

There is no major in social sciences; however, several undergraduate courses are offered for interested students.

## Social Sciences

### Lower Division Courses

**20. Racial Minorities in the U.S.** Lecture, three hours; discussion, one hour. Multidisciplinary examination of history and culture of Afro-Americans, Asian Americans, Chicanos, and Native Americans in the U.S. Topics include origins and maintenance of inequality, ethnic images in literature and art, psycho-social dimensions of racism, social movements, and minorities in California.

**30. Law and Society (3 units).** Introduction to nature of legal institutions, processes, and norms.

**40. Introductory Statistics.** In a series of case studies from science and decision making, use of probability and statistics to quantify uncertainty and figure out how to make sensible choices in the face of it. Topics include how to design experiments and conduct surveys to reduce uncertainty, how to analyze data, and how to validly assess causality. Discussion-style learning blended with interactive sessions on personal computers, making numerical and graphical summaries that both measure uncertainty and help figure out what to do about it. P/NP or letter grading.

**88. Introduction to Social Sciences.** Seminar, three hours. Introduction to methods, concepts, and practices of social scientific scholarship. Organized around broad, interdisciplinary themes in anthropology, economics, geography, history, political science, psychology, and sociology. Emphasis on social sciences disciplines as a whole. P/NP or letter grading.

### Upper Division Course

**100. History and Politics of Affirmative Action.** Lecture, three hours; discussion, one hour. Selected themes in sociology, politics, and education to explore questions surrounding diversity, affirmative action, and discrimination. P/NP or letter grading.

## SOCIAL WELFARE

Mary Kay Oliveri, L.C.S.W.  
Winifred E. Smith, M.S.W., *Emerita*  
Mary Brent Wehrli, M.S.W.

### Scope and Objectives

The primary objectives of the Department of Social Welfare graduate program are to prepare leaders for the profession of social work and to develop the empirical base for all facets of practice. In response to changing demographic trends and the emergence of new social problems, the department provides leadership in the areas of policy, practice, and research and in the development of an innovative curriculum for training students and professionals to meet the service needs of a multicultural clientele.

The educational program is based on the premise that all students need to acquire a common body of knowledge and basic skills, and a common understanding of the philosophy and values of the profession. These then form a sound foundation for the development of more specialized knowledge and skills along

the lines of each student's interests and the needs of the field.

Students are encouraged to take advantage of the resources within the University by selecting elective courses in related disciplines. In addition, as a department within the School of Public Policy and Social Research, the program affords students instructional opportunities in the other affiliated departments — Policy Studies and Urban Planning.

Beyond national opportunities in the profession of social work, there is increasing demand for qualified and experienced social workers to serve in the international field, where many social service programs are conducted under the auspices of the United Nations, the U.S. government, and national sectarian organizations. Graduates of the doctoral program generally secure appointments at major universities or research centers.

The challenge to the department, the profession, and those who join us as students is to prepare to forge the paths, build the bridges, and shape the future to ensure that all individuals, families, and communities enjoy better education, better health care, better job training, and better economic futures.

### Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

In addition to University graduate admission requirements, the Master of Social Welfare (M.S.W.) program requires a minimum of seven courses in the liberal arts, including three in the sociobehavioral sciences, or a combination of liberal arts and social welfare subjects as prerequisite undergraduate preparation for graduate study in the field of social work. An elementary statistics course with a grade of B or better and one course with human biology content are also required.

The program is highly competitive and a minimum grade-point average of 3.0 or better is required in all courses taken during the junior and senior years. However, exceptional applicants who have a grade-point average below 3.0 may be considered when there is clear evidence of capacity for academic achievement and professional development. In addition, the department applies the following criteria in the selection of candidates: personal suitability for professional education and a potential for successful social work practice, a satisfactory state of health, and an adequate financial and personal plan to permit completion of degree requirements.

The General Test of the Graduate Record Examination (GRE) is required, as are official transcripts from every school attended since high school. GRE results must be submitted prior to any evaluation of the application for admission. GRE scores must be less than five years old and may be repeated to achieve a higher score, if desired. In addition, international students whose native language is not English and whose higher education was not obtained in an English-speaking institution are required to take the Test of English as a Foreign Language (TOEFL). The department may request that specified examinations be taken to assist in the assessment of candidacy for admission.

Three letters of recommendation are required. In addition, an autobiographical statement and a professional concepts and goals statement must accompany the application.

Although a personal interview is not normally required as part of the application procedure, whenever possible a meeting with a member of the faculty is arranged for the applicant.

Admission to the department requires simultaneous application to (1) the Department of Social Welfare and (2) the Graduate Division. Both applications and the program brochure can be obtained on written request to the Department of Social Welfare Admissions.

### Areas of Study

Social work practice in organizations, communities, and policy settings (SWCOPS), and social work practice with individuals, families, and groups (SWIFG) are offered as social work methods concentrations. Specializations (sub-concentrations) are available in gerontology, child welfare, school and youth services, health services, and mental health services.

### Course Requirements

A total of 76 units in courses in the department is required, including three courses in the sequence of social welfare policy and services, three courses in the human behavior and social environment sequence, six courses in methods of social work practice, four courses in social welfare research, plus six quarters of field practicum. Appropriate substitutions or waivers may be requested. With the consent of the chair, students may take courses in other graduate schools or programs of the University in fulfillment of the degree requirements.

With the consent of the instructor and chair, tutorial studies of comparable material in the 500 series may be substituted for either required or elective courses. A maximum of nine units of 500-series courses may be applied toward the entire graduate course requirement for the degree.

While no University-approved specific thesis is required for the M.S.W. degree, the curriculum requires theoretical courses in research methodology. An option to the second-year required substantive social welfare research course is the satisfactory completion of an individual re-

search project, or participation in a group research project concerned with a social welfare problem. This research option requires approval of the departmental chair and faculty research adviser.

### Comprehensive Examination Plan

All M.S.W. candidates must pass an oral comprehensive examination in the Spring Quarter of the second year of study. The examination covers the entire range of the student's program of study.

### Thesis Plan

None.

## Doctoral Degree

### Admission

Admission requirements include meeting the general admission requirements of the Graduate Division and an Master of Social Work (M.S.W.) degree from an accredited school of social work with a superior academic record. Students who possess a master's degree in social science and professional experience in a related field may also be admitted under one of the following plans:

(1) Applicants who wish to obtain an M.S.W. are required to complete the first-year M.S.W. program. Students can be exempted from some second-year M.S.W. requirements via examinations on the basis of preparation received in doctoral courses. This plan is also available to applicants with a B.A. degree who possess an outstanding academic record.

(2) Applicants who do not wish to obtain an M.S.W. may be required to take certain M.S.W. courses as prerequisites to doctoral courses.

The Graduate Record Examination (GRE) General Test is required. International applicants are required to take the Test of English as a Foreign Language (TOEFL). The program may request that additional examinations be taken to assist in the assessment of candidacy for admission.

Official transcripts from every school attended since high school are required. Three letters of recommendation and a typewritten statement of professional and educational objectives are required. To exemplify communication skills, applicants may submit any of the following: published articles, master's thesis, unpublished papers, or term papers written in graduate courses.

Admission criteria include quality of performance in previous undergraduate and graduate study, capacity for doctoral-level scholarship, ability to express oneself clearly in writing, success in professional employment and other pertinent experiences, results of the GRE, and other qualifications indicating eligibility for advanced study and research. Enrollment in the doctoral program is limited, and it may not be possible to accept all applicants who meet the formal qualifications for admission.

Prospective students must apply separately to the Department of Social Welfare and to the Graduate Division. Both applications and the school brochure are available on written request to the Department of Social Welfare doctoral program.

### Major Fields or Subdisciplines

The program trains research-oriented scholars to advance the field of social welfare through research and knowledge development, and to assume leadership roles in academic, policy, and practice settings. The curriculum is organized into three major areas: (1) specialization in a substantive area of social welfare, (2) integration of social and behavioral science knowledge into social welfare, and (3) research methods. Programs of study are planned in relation to the special and individual needs and interests of students.

### Course Requirements

There is a minimum core of required courses which includes two seminars on practice theory and research; two seminars on social welfare policy; and two graduate-level courses in statistics. In addition, students are required to take (1) at least three graduate-level courses in the social and behavioral sciences outside the department related to their specialization in social welfare; (2) three courses in advanced research methods; and (3) three quarters of research internship.

Every effort is made to individualize the curriculum around students' area of interest and plans for the dissertation. In order to achieve this goal, a variety of patterns is utilized, including tutorials, small seminar groups, special courses in the M.S.W. program, and courses in other departments and schools of the University.

### Written and Oral Qualifying Examinations

The qualifying examinations consist of two parts:

(1) An examination in social welfare policy and practice, reviewing current theory and research. The examination is given at the end of the third quarter of the first year.

(2) A series of two major papers demonstrating students' knowledge and analytical skills in (a) application of social and behavioral science knowledge of social work and (b) utilization of research methods to a problem area. Each paper must be evaluated by a two-member committee.

The qualifying examinations are graded on a pass/fail basis, and passing them is prerequisite for pursuing the dissertation. If students fail one or more components, they may be permitted to retake the examination only on recommendation by the department's doctoral program committee.

Advancement to doctoral candidacy follows successful completion of both the qualifying examination and subsequently the University Oral Qualifying Examination, which covers the

dissertation proposal and related areas. It is administered by a doctoral committee which consists of three members from the Department of Social Welfare and at least one faculty member from another department of the University.

## Social Welfare

### Upper Division Courses

**100A. Introduction to Social Welfare: Policies and Programs.** Prerequisite: consent of instructor. Origin and development of major U.S. social welfare programs and policies guiding them, with emphasis on analysis of policy developments/issues related to provision of social welfare services. Study of historical and current responses of the profession to major social problems.

**100B. Social Welfare Policy: Overview.** Prerequisite: course 100A. Review of existing policy regarding major social issues in the field of social welfare. Examination of discrepancy between need and capacity of social agencies to address need. Exploration of differential impact of policy on various populations.

**101. Social Welfare in a Multicultural Society.** (Formerly numbered 105.) Social policy viewed from perspective of various cultural groups. Students to become aware of their own cultural perspective and learn to recognize similarities and differences in values, perspectives, and beliefs across cultural groups.

**102. Social Welfare Organizations and Community Systems.** Recommended prerequisites: courses 100A, 100B. Detailed demonstration of implementation of policy via the functioning of human service organizations. Examination of organizational structures/functions. Exploration of characteristics and organization of the community and forces that influence its development and change.

**103. Introduction to Direct Practice with Individuals, Families, and Groups.** Prerequisites: courses 100A, 100B, 101. Description and demonstration of basic skills employed in direct social work practice via the casework process. Students practice these skills in written, role-play, small group, and video or audio exercises. P/NP or letter grading.

**104A. Filipino American Community and Family.** Prerequisite: consent of instructor. Examination of interaction of Filipino American families and communities within the larger social and political environment to understand importance of social, cultural, and political influences of Filipino American families and communities. P/NP or letter grading.

**104B. Japanese American Redress.** Prerequisite: consent of instructor. Examination of process through which Civil Liberties Act of 1988 was created, pursued, and passed. This act was the official apology from the U.S. government to over 110,000 Japanese Americans incarcerated in concentration camps during World War II. P/NP or letter grading.

**M104C. Diversity in Aging: Roles of Gender and Ethnicity.** (Formerly numbered 104C.) (Same as Gerontology M104C.) Exploration of complexity of variables related to diversity of the aging population and variability in aging process. Examination of gender and ethnicity within context of both physical and social aging, in a multidisciplinary perspective utilizing faculty from a variety of fields to address issues of diversity.

**M104D. Public Policy and Aging.** (Formerly numbered 104D.) (Same as Gerontology M104D.) Examination of theoretical models and concepts of the policy process, with application to aging policy. Analysis of decision-making processes that affect aging policy. Description of history of contemporary aging policy. Exploration of current policy issues affecting the elderly. P/NP or letter grading.

**M104E. Social Aspects of Aging.** (Formerly numbered 104E.) (Same as Gerontology M104E.) Topics include theories of aging, economic factors, changing roles, social relationships, and special populations. Weekly seminars organized around a key aspect of social gerontology. P/NP or letter grading.

**104F. Japanese American Community and Family.** Examination of interaction of Japanese American families and communities within the larger social and political environment to understand importance of social, cultural, and political influences of Japanese American families and communities. P/NP or letter grading.

**105. Social Welfare Policy in Modern America: Historical Perspectives.** Lecture, three hours; outside study, nine hours. Historical overview of American social policy dealing with three core societal problems: poverty, sickness, and joblessness. Programs developed by governments to ameliorate these problems have typically been public insurance programs or cash transfers such as unemployment insurance, welfare, and Social Security. Collectively these programs are known as "the welfare state"; examination of origins of the U.S. welfare state, its development over time, and features that make it distinctive as compared to welfare states in other nations.

**106. Research Seminar and Field Observation: Social Welfare.** Seminar, three hours; discussion, one hour; outside study, eight hours. Prerequisite: consent of instructor. Didactic component with focus on development of basic skills in the areas of research. Students select one field of observation experience (module) from a number of field settings. P/NP or letter grading.

**107. Field Practicum: Social Welfare.** Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisites: course 106, consent of instructor. In field practicum students are placed in a specific agency where they combine observation of agency functions with participation in specific agency tasks and roles under instructional supervision of an agency mentor and a UCLA faculty member. P/NP or letter grading.

**M140. Introduction to Study of Aging.** (Formerly numbered 140.) (Same as Gerontology M140 and Psychology M140.) Lecture, three hours. Designed for juniors/seniors. Perspectives on major features of human aging—biological, social, psychological, and humanistic. Introduction to information on the range of influences on aging to prepare students for subsequent specialization. P/NP or letter grading.

**199. Special Studies in Social Welfare (2 or 4 units).** Preparation: 3.0 grade-point average. Designed for juniors/seniors. Intensive directed research in social welfare. P/NP or letter grading.

## Graduate Courses

Consult the department for curriculum updates.

**201A-201B. Dynamics of Human Behavior (3 units each).** Biopsychosocial factors associated with individual and group behavior and development as applicable in social functioning of individuals and groups. Emphasis on theoretical issues and research evidence which contribute to a unified theory of human development.

**202A-202B. Dynamics of Human Behavior (2 units each).** Prerequisites: courses 201A-201B. Deviations and pathologies or stresses in physical, emotional, and social areas of human functioning as those problems relate to role and function of the social worker.

**203A-203B-203C. Integrative Seminars (2 units each).** Prerequisite: consent of instructor. Integrative courses which bring together theory and practice of social work in a variety of topic areas relevant to the profession. Includes identification of problem areas and populations-at-risk requiring further examination. S/U or letter grading.

**M203D. Supporting Families of Children with Special Needs (2 units).** (Same as Psychiatry M254.) Techniques and issues in counseling families through evaluation, feedback, and treatment. Social and psychological stresses on family unit, professional's reactions, community resources, and issues of genetic counseling, placement, and developmental crises. S/U grading.

**M203E. Hispanic Mental Health Issues and Treatment (2 units).** (Same as Psychiatry M231.) Mental health issues and needs of Hispanics through seminars and videotapes dealing with historical comparison of psychiatry in Mexico and the U.S., analysis of various theoretical perspectives regarding biopsychosocial behavior; distinguishing psychodynamic from cultural factors in treatment of Spanish-speaking patients; treatment of Hispanic families, couples, undocumented persons, and criminal justice system clientele.

**205A. Cross-Cultural Awareness (2 units).** Designed to aid students in development of professional perspectives that will allow them to work effectively with members of myriad cultural groups, to discuss with clarity alternative concepts of culture in determination of individual behavior responses, and to identify their own personal cultural values and assumptions. S/U grading.

**205B. Group Conflict and Change (2 units).** Study of phenomena of group conflict and change as they appear in the social welfare matrix of groups, communities, and social institutions; relationship between conflict and social and cultural change; major research contributions in understanding of these phenomena.

**220. History and Philosophy of Social Welfare (2 units).** History of social work as a field: body of knowledge, method and process, and point of view analyzed within context of economic, political, social, philosophical, and scientific climate of the period.

**M221A. Foundations of Social Welfare Policy.** (Formerly numbered 221A.) (Same as Policy Studies M210.) Lecture, three hours. Nature, roles, and history of welfare institutions in different societies; applicable social system theory of different components of the welfare system; theory and research about welfare policies and organizational forms. S/U or letter grading.

**221B. Social Welfare Policy and Services II (2 units).** Understanding of significant theoretical constructs and relevant empirical evidence dealing with how organizations develop and maintain their internal functions. Development of beginning skill in organizational analysis. Special attention to organizational analysis of social welfare services.

**223. Seminar: Social Work Profession (2 units).** Nature and role of social work in contemporary society; relationships with other professions; probable future trends in the profession; social work ethics, professional organizations, certification licensing; professional responsibility for continued self-criticism and improvement of the profession. S/U grading.

**225A-225B. Social Welfare Policy.** Discussion, three hours. Prerequisites: doctoral standing and/or consent of instructor.

**225A. Formulation and Analysis.** Examination of principal issues in development, formulation, and adoption of U.S. social welfare policies, with particular focus on income distribution and redistribution. Emphasis on analysis of social policy issues and conceptual frameworks for analysis.

**225B. Implementation and Evaluation.** Examination of issues in implementation and evaluation of social welfare policies, particularly those pertaining to provision, organization, and delivery of social services, including auspices funding, distribution, criteria for effectiveness, and use of quantitative methods in policy analysis.

**230A-230B-230C. Theory of Direct Social Work Practice I, II, III (2 units each).** Corequisite: required social work practicum. Introduction to theory of social work with individuals and small groups and to principles of practice which are derivative of this and related theory. S/U or letter grading.

**231A-231B-231C. Advanced Theory of Direct Social Work Practice IV, V, VI.** Lecture, three hours; outside study, nine hours. Corequisite: required social work practicum. Advanced level, critical analysis of theories, concepts, and principles underlying social casework practice. Specific attention to deviation and stress as conditions affecting functioning of individuals and groups, and to diagnostic knowledge and competence required in rehabilitation and prevention. S/U or letter grading.

**240A-240B-240C. Community Administration, Policy, and Planning I, II, III (2 units each).** Corequisite: required social work practicum. Historical and theoretical developments in administration, planning, and community organization; understanding the community as a social system, administration of organizations; role of the practitioner in identification, analysis, and evaluation of needs, existing programs, policies, structures, and strategies of intervention. S/U or letter grading.

**241A-241B-241C. Advanced Theory of Social Work Method (Administration, Planning, and Community Organization) IV, V, VI.** Lecture, three hours; outside study, nine hours. Corequisite: required social work practicum. Emphasis on various patterns of community action for attaining social welfare objectives; research and field experience directed toward study of social problems within context of community planning; emerging patterns of physical, economic, and social planning within framework of social change theory. S/U or letter grading.

**M241D. Social Advocacy and Domestic Violence.** (Same as Law M359.) Lecture, three hours; fieldwork. Use of domestic violence as a case study to give students skills needed to advocate for individuals or issues. How systems work, how law legitimizes systems, and how advocacy can be used to change the systems.

**245A-245B. Development of Social Work Practice Theory.** Discussion, three hours. Prerequisites: doctoral standing and/or consent of instructor:

**245A.** Epistemology of Practice. Guiding scientific models of practice theories; process of emergence, development, and change of practice theories; intellectual foundations of practice theories; how professionals learn, apply, accumulate, and modify their practice knowledge; science and practice interplay.

**245B.** Models of Social Work Practice Research. Research for practice, with major emphasis on methods of intervention research which seek to design, test, evaluate, and disseminate innovative intervention technologies.

**258. Critical Problems in Social Welfare (2 units).** Prerequisites: doctoral standing and/or consent of instructor. Current problems in the field of social welfare. Specific topics vary depending on research and educational interests and needs of class. May be repeated for credit. S/U grading.

**280. Social Welfare Research (3 units).** Lecture, three hours; outside study, six hours. Sources, nature, and uses of social work theory and research-based knowledge and of broader social data relevant to social welfare activities. Critical analysis of major methods of developing scientific knowledge. S/U or letter grading.

**281A-281B-281C. Advanced Social Welfare Research (2 units each).** Individual or group research projects requiring intensive examination and analysis of a social problem area, directed toward development of research knowledge and techniques for social work practice. In Progress grading.

**285A-285B-285C. Research in Social Welfare.** Review of areas of research of concern to social workers, with special attention to design, instrument construction, data collection, data processing, data reduction, analysis, and interpretation. Designs studied include survey, panel, experimental observation, and theory development research. S/U or letter grading.

**286A-286B-286C. Survey of Research Methods.** Prerequisites: doctoral standing and/or consent of instructor. Basic concepts underlying research methods. Content includes theoretical and conceptual approaches to research problem formulation; research design, including experimental, comparative, and survey; sampling; statistical methods; methods of observation and techniques of data analysis.

**290A-290B-290C. Seminars: Social Work.** Lecture, three hours; outside study, nine hours. Series of seminars dealing with trends in social work and social welfare, with focus on current social problems affecting individuals, groups, and communities and new patterns of intervention based on recent demonstrations and research. S/U or letter grading.

**M290D. Women, Health, and Aging: Policy Issues (2 or 4 units).** (Same as Health Services M241.) Lecture, three hours; discussion, one hour. Prerequisites: two upper division social sciences courses, two upper division biological sciences courses, or equivalent, consent of instructor. Social and economic context of older women's aging, major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to their health needs.

**M290E-M290F-M290G. Child Abuse and Neglect (2 units, 2 units, 1 unit).** (Same as Community Health Sciences M245A-M245B-M245C, Dentistry M300.5A-M300.5B-M300.5C, Education M217G-M217H-M217I, Law M281A-M281B, Medicine M290A-M290B, and Nursing M290A-M290B-M290C.) Course M290E is prerequisite to M290F, which is prerequisite to M290G. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies. S/U or letter grading.

**M290I. Children with Special Health Care Needs: Systems Perspective.** (Same as Community Health Sciences M420.) Lecture, three hours; fieldwork, one hour. Examination and evaluation of principles, policies, programs, and practices which have evolved to identify, assess, and meet special needs of infants, children, and adolescents with developmental disabilities or chronic illness and their families.

**M290J. Child Welfare Policy.** (Same as Policy Studies M212.) Lecture, three hours. Development of social policy as it affects families and children from different cultural backgrounds and as it is given form in public child welfare system. Examination of development of an infrastructure to support needs of children and families. S/U or letter grading.

**M290K. Mental Health Policy.** (Same as Policy Studies M213.) Lecture, three hours. Examination of evolution of social policy and services for the mentally ill, with emphasis on political, economic, ideological, and sociological factors that affect views of the mentally ill and services they are provided. S/U or letter grading.

**M290L. Poverty, the Poor, and Welfare Reform.** (Same as Policy Studies M214.) Lecture, three hours. Major policy and research issues concerning poverty and social welfare policy directed toward the poor in the U.S. S/U or letter grading.

**M290M. Health Policy.** (Same as Policy Studies M215.) Lecture, three hours. Introduction to contemporary issues in health care financing and delivery, providing historical perspective on emergence of these issues. Examination of major public programs and their relationship to issues of access and cost. S/U or letter grading.

**M290N. Public Policy for Children and Youth.** (Same as Policy Studies M216.) Lecture, three hours. Policy issues that affect children and adolescents in relation to their interaction with schools and the community, with emphasis on impact of policy across federal, state, and local levels. S/U or letter grading.

**M290P. Public Policy for the Elderly and Their Families.** (Same as Policy Studies M211.) Lecture, three hours. Examination of theoretical models and concepts of policy process and application to aging policy. Analysis of decision-making processes that affect social policies. Description of historical development of contemporary policy. Exploration of current proposals and issues. S/U or letter grading.

**401A-401B-401C. Practicum: Social Work (3 units each).** Laboratory, 20 hours. Educationally directed practicum conducted in selected health, welfare, and educational facilities. Provides opportunities for students to test their theoretical knowledge and to acquire a disciplined practice foundation in the profession. In Progress and S/U grading.

**402A-402B-402C. Advanced Practicum: Social Work.** Laboratory, 24 hours. Requisites: courses 401A-401B-401C. Practicum in social work, arranged for students in keeping with their major field of study. In Progress and S/U grading.

**490. Professional Communication for Social Welfare (2 units).** Writing workshop on students' papers in progress, with an eye toward scholarly publication. Analysis and group discussion of rhetorical and stylistic principles. May be repeated once. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596A. Special Study and Research in Social Welfare (2 to 8 units).** Individual programming for selected students to permit pursuit of a subject in greater depth. S/U or letter grading.

**596B. Special Study and Research for Ph.D. Candidates (2 to 8 units).** Prerequisites: doctoral standing and/or consent of instructor. S/U grading.

**597A. Preparation for M.S.W. Comprehensive Examination (2 to 8 units).** Prerequisite: consent of instructor.

**597B. Preparation for Ph.D. Qualifying Examinations (2 to 8 units).** Prerequisites: doctoral standing and/or consent of instructor. S/U grading.

**599. Ph.D. Dissertation Research in Social Welfare (2 to 8 units).** Prerequisites: doctoral standing and/or consent of instructor. S/U grading.

 David D. McFarland, Ph.D.  
 Vilma Ortiz, Ph.D.  
 Jeffrey Prager, Ph.D.  
 Edward E. Telles, Ph.D.

#### Assistant Professors

Cameron Campbell, Ph.D.  
 Rebecca Emigh, Ph.D.  
 Laura Miller, Ph.D.  
 Gi-Wook Shin, Ph.D.  
 Min Zhou, Ph.D.

## Scope and Objectives

Variety is the special characteristic both of the field of sociology and of the UCLA Department of Sociology, which was judged among the 10 best in the nation in a survey conducted by the Conference Board of the Associated Research Councils.

Sociology has a particular appeal to those students whose interests are broad and unspecialized. At both the undergraduate and graduate levels, students study history, politics, statistics and mathematics, race relations, demography, psychology, language, and many other topics. A sociology student becomes a member of an intellectual community in which all these interests are represented.

The primary purpose of the major in sociology is to enhance students' capacity for critical analysis and understanding of social phenomena. It is intended, at the same time, to serve as preparation for careers in high school or junior college teaching, social work, architecture and urban planning, law, public health, and government service, among others. It also pro-

vides training for advanced graduate work in sociology and social psychology.

The Ph.D. in Sociology usually leads to a career in research and/or teaching. Although most sociologists are employed by universities, there are increasing career opportunities in government and other nonuniversity research centers.

## Undergraduate Study

### Bachelor of Arts Degree

#### Preparation for the Major

*Required:* One course from Sociology 1, 2, 3, 4, M5, 31; one course from Mathematics 2, 3A, 31A; Sociology 18 (or Statistics 50, Psychology 41, or Economics 40).

*All courses required for the major in sociology, including lower division and allied field courses, must be taken for a letter grade. A 2.0 grade-point average is required for the preparation and for the major.*

#### The Major

*Required:* Ten upper division sociology courses (40 units), including Sociology 101, 102, and one course from 104, 104H, 105, 106, 113. These courses, devoted to the systematic exploration of sociological methods and theories, should be completed as early as possible and before taking other upper division courses. Students must also take seven additional upper division sociology courses.

To complete the major, four upper division allied field courses (16 units) in other departments are required (the allied fields are anthropology, communication studies, economics, geography, history, political science, and psychology), as is one course from English 100, 110W, 129A through 129D, 131A through 131D (may be taken on a P/NP grading basis).

Only eight units of Sociology 199 are allowed. At least six of the sociology courses must be taken while in residence in the College of Letters and Science at UCLA.

Courses 104, 210A, and 210B are recommended for students who intend to pursue graduate work in sociology.

## Honors Program

The honors program in sociology provides opportunity for outstanding students to undertake an independent year-long research project under the guidance of a faculty member.

As preparation for the honors major, students must complete Mathematics 2, 3A, or 31A, and an honors section of Sociology 1 and 18.

Prior to taking other upper division sociology courses, students must complete an honors section of Sociology 101 and 102 (Honors Collegium 61 may be substituted for course 102).

Also required are three undergraduate seminars from the Sociology 197 series; any two additional upper division sociology courses;

courses 104H and 199HA-199HB-199HC (honors thesis seminars); four upper division allied field courses (16 units) in other departments (the allied fields are anthropology, communication studies, economics, geography, history, political science, and psychology); and one course from English 100, 110W, 129A through 129D, 131A through 131D (may be taken on a P/NP grading basis).

Students must have a 3.5 overall grade-point average, have completed the sociology preparation requirements and, in most cases, have completed the required theory course. Applications are available from the Undergraduate Counselor's Office, 254A Haines Hall. Students should apply in the last term of their junior year.

## Computing Specialization

Majors in sociology may select a specialization in computing by (1) satisfying all the requirements for a bachelor's degree in the major, (2) completing Program in Computing 10A, 10B, 10C, and (3) completing Sociology 112, 113. Students graduate with a bachelor's degree in sociology and a specialization in computing.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degree

### Admission

The graduate program of the Department of Sociology takes as its primary aim the training of scholars who will conduct original research contributing to the advancement of sociological knowledge. For this reason, the department ordinarily only accepts students who are seeking the Ph.D. degree (a master's degree is earned as part of the process of completing the requirements for the Ph.D.).

In addition to the minimum University requirements (an acceptable bachelor's degree and a B average in all upper division and graduate work), the Sociology Department requires (1) three letters of recommendation, preferably from professors of sociology who are familiar with the applicant's written work and research experiences; (2) transcripts from all colleges where applicants have studied (the department's evaluation considers not only the record in sociology, but all undergraduate work, including coursework in English composition, logic, linguistics, and mathematics); (3) a statement of purpose, not to exceed three typewritten double-spaced pages, outlining reasons for pursuing graduate work, interests within sociology, career objectives, and any personal experiences bearing on these; (4) copies of one or two term papers or research reports written by the applicant; (5) an official statement of

scores on the Graduate Record Examination (GRE); and (6) for applicants whose native language is not English, the Test of English as a Foreign Language (TOEFL).

Although background preparation in sociology is highly desirable, it is not mandatory for admission to the department. Applicants need not be uniformly high on all indicators of potential. The admissions committee, which generally consists of at least five faculty members and two advisory graduate student members, uses a number of indicators of particular skills rather than relying heavily on just one or two. For example, in assessing the level of verbal skills, the committee considers several items, including samples of written work and grades in courses that ordinarily require extensive verbal skills, as well as verbal GRE scores.

In addition to relatively formal criteria (such as analytic proficiency and articulateness), the department pays particular attention to applicants who seem likely to contribute considerable intellectual, social, or cultural diversity to its student body. Women and minorities are therefore encouraged to apply.

The deadline for receipt of applications is December 1. Application forms and more detailed information are available on request from the graduate affairs assistant in the department.

### Areas of Study

See Major Fields or Subdisciplines in the Doctoral Degree section.

### Course Requirements

In addition to the departmental requirements, area programs and some subareas within area programs have their own course requirements for affiliated students. Students who intend to affiliate with an area would do well to satisfy some of its requirements in the first two years.

#### Before the Master's Paper Review

*Departmental Requirements.* For departmental requirements, all students are required to take nine courses (36 units).

(1) Sociology 202A-202B. These courses, an examination of the interrelations of theory, method, and substance in exemplary sociological works, must be taken in the first year.

(2) A two-quarter graduate-level methodology sequence of which there are several alternatives such as the survey methods course or the demographic methods course. The methodology series is presently numbered from 211A-211B through 216B, 217C, 218A-218B, C244A-C244B. Students are required to take one methods sequence before the master's paper review and one methods sequence after the review. In choosing a methodology sequence, students should note some of the Ph.D. area programs and subprograms require particular methodology sequences. If students have equivalent methodological training elsewhere, they should file a petition (along with pertinent evidence and an adviser's recommendation) with the executive committee for exemption from the methodology requirement.

(3) Five 200-level courses in Sociology, excluding 202A-202B, 211A through 216B, 217B-217C, 218A-218B, C244A-244B, 289A-289B-289C, 290A-290B-290C, 292A-292B-292C, 293A-293B-293C, and 295A-295B-295C.

Students who want to take a course outside the department because they feel it would be beneficial to their master's paper or area of interest may petition to take one course outside of sociology. The petition must be approved by the chair or graduate director.

*Area Program Prerequisites.* In addition to departmental requirements, students must take the following prerequisites to area program coursework:

*Communities and Institutions.* Sociology 209A-209B or 210A-210B.

*Ethnomethodological, Phenomenological, and Observational Sociologies.* No courses required.

*Macrosociology.* Sociology 209A-209B or 210A-210B.

*Quantitative Sociology.* Sociology 209A-209B or 210A-210B.

*Social Psychology.* Sociology 209A-209B or 210A-210B. Admission may be granted without these courses if students are changing their area of interest. In this case, 209A-209B or 210A-210B must be completed in the first year after entry to the area program.

Because four of the five area programs require satisfactory completion of Sociology 209A-209B or 210A-210B, students ordinarily take these courses in the first two years, and are strongly urged to do so in the first year. Furthermore, a background in statistics is often necessary to do the master's paper.

### Comprehensive Examination Plan

No later than in the sixth quarter of residence students must submit an acceptable master's paper for approval by the general faculty. The paper must demonstrate general competence in sociological theory, methodology, and selected substantive areas.

As early in the graduate career as possible, students select two faculty members who consent to serve as their master's committee. Faculty serving should represent a broad range of professional interests. Formation of the master's committee may not be postponed beyond the beginning of the fourth quarter of residence in graduate work. For more specific guidelines, deadlines, and procedures regarding the master's review, contact the graduate affairs assistant.

In consultation with and on the advice of this committee, students develop a paper, probably initially written for a course, demonstrating intellectual attainment. For example, the paper may show that the student (1) has an accurate grasp of the intellectual traditions of sociology, (2) can bring evidence to bear on theoretical problems, (3) can describe how some aspect

of the social order works, and (4) can adequately handle research and methodological issues. The main concern is with the student's capacity to do Ph.D.-level work.

When the master's committee feels these requirements have been met, they nominate the student for faculty review by submitting the paper to the graduate curriculum and advisement committee. That committee appoints a two-person evaluation panel which reports its assessment to the graduate curriculum and advisement committee as a whole. They consider the panel's reports as well as those of the master's committee and present an evaluation and recommendation to the full faculty. The graduate curriculum and advisement committee may recommend any of the following options:

(1) The paper is passed. The M.A. is granted and the student is permitted to proceed to the Ph.D.

(2) The paper is passed conditionally. The M.A. is granted and the student is permitted to proceed to the Ph.D. on completion of specified revisions of the paper.

(3) A terminal M.A. degree is granted.

(4) The paper is not acceptable. The student may resubmit at a later time or be asked to withdraw.

The graduate curriculum and advisement committee's recommendation and the analysis on which it is based is made available to the student, the master's committee, and the faculty no later than one week prior to the faculty review. The faculty at its review may ratify the recommendation of the graduate curriculum and advisement committee or alter it, including the option of making recommendation to the dean of the Graduate Division to terminate graduate status.

### Thesis Plan

None.

## Doctoral Degree

### Admission

In the quarter following acceptance of the master's paper, usually at the beginning of the third year, students must affiliate with one of the department's five area programs in order to pursue more specialized, advanced study and research toward the Ph.D.

Students who enter graduate studies at UCLA with a Master of Arts degree in Sociology from another institution normally come up for a master's paper review in the first quarter of residence at UCLA, and under no circumstances later than the third quarter of residence. In this review, the department determines whether or not the student may proceed directly to preparation for the field examinations, if additional courses need to be taken for breadth purposes, if the submitted paper needs additional work or if an additional paper needs to be done, and if the methodology sequence requirement has been adequately satisfied. In addition to a paper, which can be an M.A. the-

sis written at another university, students should submit for the master's paper review a transcript from the university at which the M.A. degree was earned so that this department can determine whether the requirements ordinarily constraining students in the first years of this program have been met.

### Major Fields or Subdisciplines

The five area programs represent the special strengths of the department in research and graduate instruction.

*Communities and Institutions.* Includes social demography, work and occupations, deviance and social control, criminal justice, methods of historical and ethnographic research, community organization, immigrant and minority communities, medical sociology, gender relations.

*Ethnomethodological, Phenomenological, and Observational Sociologies.* Includes ethnomethodological/methodological, ethnographic, phenomenological, or observational stances toward a range of subject matters, including studies of work especially in the sciences and professions, sociology of knowledge, sociology of law, deviance, social control, conversational and other forms of ordinary interaction, and historical studies of everyday interaction and consciousness.

*Macrosociology.* Includes political sociology, economy and society, historical and comparative sociology, macrosociological theory, and comparative stratification.

*Quantitative Sociology.* Includes methods of applied and evaluation research, survey research methods, formal and social demography, social stratification, advanced social statistics, and mathematical sociology.

*Social Psychology.* Includes attitudes and social structure, collective behavior, socialization, social interaction and small group behavior, and organizational social psychology.

The area programs have both a formal and informal aspect. Each area program has course requirements, including an area seminar or colloquium specifically for affiliated students, and areas also oversee field examinations for affiliated students. On the other hand, the area programs are intellectual and social communities of faculty and students sharing a commitment to certain topics and methods of research. While the area program system seeks to provide students with special training in theory and research, it is not intended to prevent or discourage students from pursuing topics that cut across established area programs or from working closely with faculty members whose primary affiliations lie in different area programs.

### Course Requirements

#### *After the Master's Paper Review*

*Departmental Requirements.* For departmental requirements, all students are required to take two courses (eight units) of an additional methodology sequence (from Sociology 211A through 216B, 217B-217C, 218A-218B, C244A-

C244B), which must be completed before the awarding of the Ph.D. degree. Some areas specify allowable methodology sequences.

*Area Course Requirements.* Students should contact the graduate affairs assistant or area directors for more specific details of the programs.

*Communities and Institutions.* (1) Two of the following: Sociology 229A, 229B, 234, 235, 241, 261; (2) methods — one from Sociology 211A-211B, 212A-212B, 213A-213B, 215A-215B, 216A-216B, or 217B-217C; (3) at least two of the following courses devoted to substantive area: Sociology 230, 234, 236, M249A, M249B, 259, M262, 263, 265, M275, 276, 282, 291; (4) Sociology 290A-290B-290C.

*Ethnomethodological, Phenomenological, and Observational Sociologies.* (1) Sociology 222; (2) two quarters of one of the following method sequences and at least one quarter of a second: 214A-214B, 217B-217C, 218A-218B, or C244A-C244B; (3) at least two of the following: Sociology 217A, 223, 229A, 229B, 243, 251, 258, 264, 266, 267, 271, 284 (a third methods sequence may also be taken to satisfy this requirement); (4) Sociology 293A-293B-293C.

*Macrosociology.* (1) Sociology 211A-211B; (2) Sociology 228A-228B; (3) Sociology 294A-294B-294C; (4) three additional graduate courses covering theoretical, substantive, or methodological topics.

*Quantitative Sociology.* The quantitative sociology area requires Sociology 295A-295B-295C and requirements from the speciality chosen. Quantitative sociology specialities are advanced social statistics, applied sociology and evaluation research, demography, mathematical sociology, and quantitative social stratification. Each specialty requires up to six courses, several of which are two-quarter courses. Other courses are recommended; consult a departmental adviser.

*Advanced Social Statistics:* (1) Sociology 216A-216B; (2) Sociology 219A-219B.

*Applied Sociology and Evaluation Research:* Sociology 216A-216B, 219A-219B, 279, 280.

*Demography:* (1) Sociology 213A-213B; (2) Sociology 226A-226B; (3) two electives in calculus and matrices.

*Mathematical Sociology:* (1) Preparation in calculus, matrices, and differential equations; (2) Sociology 281; (3) Sociology 596 — two or more specialized courses to be arranged with advisers; (4) two or more substantive sociology courses relevant to the areas in which mathematical modeling is carried out.

*Quantitative Social Stratification:* (1) Sociology 216A-216B; (2) Sociology 239A-239B; (3) Sociology 263; (4) two electives.

*Social Psychology.* (1) Completion of an undergraduate program equivalent to two UCLA basic undergraduate social psychology courses and at least two courses in psychology, chosen from the fields of learning, lan-

guage and communication, personality, social psychology, and abnormal psychology; (2) Sociology 224A-224B; (3) a second methods sequence in addition to the one required for the M.A., at least one of which must be from the following: Sociology 215A-215B, 216A-216B, or 217B-217C; (4) Sociology 289A-289B-289C.

Courses in the 500 series (Sociology 595, 596, 597, 599) are normally taken in preparation for the master's paper review, the field examinations, and dissertation research. While these courses may be taken to maintain enrollment, they do not count toward the course requirements.

### Written and Oral Qualifying Examinations

Two specialized field examinations are administered and evaluated according to guidelines specified by the area programs. Consult the department for details regarding field examinations.

If the performance on the field examinations is satisfactory and the foreign language requirement has been fulfilled, students may nominate a doctoral committee and proceed to take the University Oral Qualifying Examination. This examination may range over general sociology, students' specific fields, and students' dissertation plans. It is given by the doctoral committee no later than six months after the completion of the written examination. A two-page abstract of the dissertation proposal must be submitted to the graduate affairs assistant for distribution to the entire faculty of the Sociology Department within two weeks of the oral examination.

In addition to the two-page abstract, a full-length dissertation proposal is required at the time of the preliminary oral examination. A dissertation proposal approved by the committee must be filed with the department reasonably soon after the preliminary orals. In the event of a major revision in the topic or methodology of the dissertation, a revised prospectus approved by the committee is required and is filed in the same manner as the original prospectus. Minor changes in the methodology and hypotheses which normally takes place as students carry out the dissertation research do not call for a revised prospectus.

When both the written and oral qualifying examinations have been successfully completed, students are advanced to candidacy by the Graduate Division. A candidacy fee appears on students' billing statements four to eight weeks after they have been advanced to candidacy.

## Sociology

### Lower Division Courses

**1. Introductory Sociology.** Survey of characteristics of social life, processes of social interaction, and tools of sociological investigation.

**2. Changing Society and Making History.** Lecture, three hours; discussion, one hour. Leading question is how do politics, economics, and culture interact in changing society and making history? Answers provided by introductory level of study of contending substantive theories and contrasting methods of inquiry contained both in classic and exemplary contemporary works.

**3. Sociology of Everyday Life.** Lecture, three hours; discussion, one hour. Examination of ways in which taken-for-granted aspects of everyday life and relationships are shaped by interactional, cultural, and historical processes. Cultivation of capacity to critically observe tacit practices through which everyday life is constructed.

**4. Jobs and Careers: Sociological Approach.** Lecture, three hours; discussion, one hour. Application of social science knowledge to common vocational problems. Description and analysis of major trends in employment, job search and hiring, career mobility patterns, forecasting, and entrepreneurship. Analysis of current thrust to worker ownership.

**M5. Social Organization of Black Communities.** (Same as Afro-American Studies M5.) Lecture, three hours; discussion, one hour. Analysis and interpretation of social organization of black communities, with focus on origins and development of black communities, competing theories and research findings, defining characteristics and contemporary issues.

**18. Interpretation of Quantitative Data.** Enforced requisites: course 1 (may be taken concurrently) and (Mathematics 2 or 3A). Satisfies statistics requirement for sociology major. Reading graphs and tables; statistical description using indices of central tendency, dispersion, and association; simple linear regression. Probability; binomial, normal, t, and chi-square distributions and hypothesis testing based on them. Examples from recent issues of *American Sociological Review* or other leading sociological journals.

**31. Dilemmas of Third World Development.** Lecture, three hours; discussion, one hour. Introduction to understanding dilemmas of Third World social development and prospects for progress in the future.

**88A-88Z. Lower Division Seminars.** Seminar, three hours. Limited to 15 freshmen/sophomores. Variable topics of current sociological interest. Consult *Schedule of Classes* or "Department Announcements" for topics and instructors.

## Upper Division Courses

**101. Development of Sociological Theory.** Comparative survey of basic concepts and theories in sociology from 1850 to 1920; codification of analytic schemes; critical analysis of trends in theory construction.

**102. Contemporary Sociological Theory.** Prerequisite: course 101. Critical examination of significant theoretical formulations from 1920 to the present; analysis of relation between theoretical development and current research emphasis.

**103. Marxist Sociology.** Fundamentals of Marxist theory and method and their historical development. Attention to continuing debates within Marxism and to differences between Marxism and other schools of sociological thought. May not be applied toward theory requirement for the major.

**104. Introduction to Sociological Research Methods.** Not open to students with credit for course 104H. Systematic treatment and semiquantitative skills of use in sociological research (e.g., classification, questionnaire and schedule design, content analysis, critical analysis of studies, conceptual analysis of case materials). Fieldwork may be required.

**104H. Introduction to Sociological Research Methods (Honors).** Lecture, one hour; discussion, three hours. In-depth introduction to process of producing scholarly sociological research for students who intend to write an undergraduate honors thesis.

**105. Research Methods in Policy Analysis and Evaluation.** Prerequisite: course 144 or consent of instructor. Recommended: course 104. Approaches for identifying and analyzing social problems and for assessment of policies and interventions for their control and management.

**106. Field Research Methods (6 units).** Lecture, two hours; discussion, two hours; fieldwork, 12 hours. Prerequisites: upper division standing, consent of instructor. Fieldwork and extensive field notes required. Theory and practice of field research, with particular emphasis on interrelations between fieldwork role and substantive findings.

**107. Urban Poverty and Public Policy in the U.S. (Field Component).** (Formerly numbered M107.) Prerequisite: course 144. Corequisite: one course from Geography 150 or 159A through 159E. Supplements and enriches students' academic understanding of urban poverty and the underclass by personal exposure and direct observation in a field setting. Students required to develop a plan of service in a local social service agency and observe policy formulation and implementation. P/NP or letter grading.

**109A-109B. Data Analysis for Social Scientists.** Lecture, three hours; laboratory, one hour. Introduction to applied statistics and data collection for undergraduate students, especially sociology honors students. P/NP or letter grading.

**112. Introduction to Mathematical Sociology.** Prerequisites: course 18, Mathematics 2, 3A (course whose content includes introductions to probability theory, matrix algebra, and differential and integral calculus), or equivalent. Mathematical treatment of several sociological phenomena, such as occupational mobility, population growth, organizational structure, and friendship patterns, each covered in some detail, including initial development and subsequent evaluation and modification (emphasizing both deductive and computational aspects of mathematics).

**113. Statistical and Computer Methods for Social Research.** Lecture, three hours; laboratory, one hour. Prerequisite: course 18. Continuation of course 18, covering more advanced statistical techniques such as multiple regression, analysis of variance, or factor analysis. Content varies. Students learn how to use the computer and write papers analyzing prepared data sets.

**116. Social Demography.** Studies of past, present, and future trends in population growth. Sociological theories of causes and consequences of population growth and redistribution. Emphasis on correlates of fertility, mortality, and migration.

**117. Sociology of Family Demographic and Economic Behavior.** Examination of demographic behavior associated with social organization of the family and its relationship to society's economic system. American and European historical studies of family socioeconomic and demographic characteristics and behavior in first half of course; U.S. experience since the 1930s in second half.

**CM124A-CM124B. Conversational Structures I, II.** (Same as Communication Studies M144A-M144B.) Lecture, three hours; discussion, one hour. May be concurrently scheduled with courses C244A-C244B. P/NP or letter grading. **CM124A.** Introduction to some structures which are employed in organization of conversational interaction, such as turn-taking organization, organization of repair, and some basic sequence structures with limited expansions. **CM124B.** Prerequisite: course CM124A. Consideration of some more expanded sequence structures, story structures, topical sequences, and overall structural organization of single conversations.

**CM125. Talk and Social Institutions.** (Same as Communication Studies M125.) Lecture, four hours; discussion, one hour. Designed for juniors/seniors. Practices of communication and social interaction in a number of major institutional sites in contemporary society. Setting varies but may include emergency services, police and courts, medicine, news interviews, and political oratory. Concurrently scheduled with course C258. P/NP or letter grading.

**126. Study of Norms.** Properties of norms, of normatively governed conduct, of lay and professional methods for describing, producing, using, and validating norms in contrasting settings of socially organized activities; relevance of these properties for programmatic problems of analytic sociology. Fieldwork required.

**127. Mind and Society.** Lecture, two and one-half hours; discussion, one hour. Prerequisite: course 1 or equivalent. Study of social production of modes of thought and forms of knowledge. Study of ways in which bodies of knowledge and cognitive styles are produced, used, and transformed in everyday, organizational, and extraordinary contexts. P/NP or letter grading.

**128. Sociology of Emotions.** Lecture, three hours; discussion, one hour. Prerequisites: course 1 and junior standing, or consent of instructor. Sociological theories and explanations of social conditions shaping and producing emotional experiences; effects of individual expression of emotions on social conditions; relations between thought, sensations, and the emotions; the self and emotions; social construction of emotions.

**129. Sociology of Time.** Lecture, three hours; discussion, one hour. Conceptualizations of time seen from scientific, philosophical, historical, and sociological perspectives; "cyclical" and "linear" time in primitive, ancient, and medieval societies; ritual, the sacred, and experience of the eternal; structuring of urban, modern, and postmodern societies by clock, calendar, and schedule; future value orientation and notion of progress; time, labor, and social domination.

**132. Social Psychology: Sociological Approaches.** Survey of contribution of sociologists to theory and research in social psychology, including theories of social control; conformity and deviation; reference groups; and interaction process.

**133. Collective Behavior.** Prerequisites: courses 1, 18, or equivalent, upper division standing. Characteristics of crowds, mobs, publics, social movements, and revolutions; their relation to social unrest and their role in developing and changing social organization.

**134. Culture and Personality.** Prerequisites: courses 1, 18, or equivalent, upper division standing. Theories of relation of variations in personality to culture and group life, in primitive and modern societies, and influence of social role on behavior.

**135. Group Processes.** Systematic study of formation, structure, and functioning of groups; analysis of group processes and group products from a variety of theoretical viewpoints; implications of various research techniques.

**136. Process and Socialization in the Family.** Prerequisites: courses 1, 18, or equivalent, upper division standing. Examination of processes of interaction, decision making, role differentiation, conflict, integration, and socialization within the family and their interrelations with society.

**137. Psychoanalytic Sociology.** Prerequisites: courses 1, 18. Recommended: one course in theory (course 101 or 102) and in social psychology. Fieldwork may be required. Designed to review models of integration between psychoanalysis and sociology. Application of this analytical perspective to selected substantive areas and social processes, including but not limited to group development, delinquency, deviance, socialization, identity and self formation, role taking and role making.

**M138. Death, Suicide, and Trauma.** (Same as Psychology M163.) Lecture, three hours. Prerequisite: junior standing. Definition and taxonomy of death; new permissiveness and taboos related to death; romanticization of death; role of the individual in his own demise; modes of death; development of ideas of death through life span; ways in which ideas of death influence conduct of lives; impact of dying on social structure surrounding the individual; preventive, interventive, and postventive practices in relation to death and suicide; developmental perspective on witnessing traumatic death, including posttraumatic and grief reactions; partial death; megadeath; lethality; psychological autopsy; death of institutions and cultures. P/NP grading recommended (letter grading required if course to be applied toward psychology or sociology major).

**143. Human Health and Society.** Lecture, three hours; discussion, one hour. Prerequisite: course 1. Exploration of long-run historical trends in relationship between human health and social organization, drawing on historical, anthropological, demographic, and sociological concepts, theories, and data.

**144. Urban Poverty and Public Policy in the U.S.** (Formerly numbered M144.) Historical overview of urban poverty and social welfare programs; ongoing debates about causes and consequences of poverty.

**145. Sociology of Deviant Behavior.** Examination of leading sociological approaches to study of deviation and general survey of major types of deviation in American society.

**146. Sociology of Disputes and Troubles.** Lecture, three hours; discussion, one hour. Theoretical implications of everyday disputes and troubles in contemporary society; origins, progression, and outcomes of informal disputes; disputing in intimate family, community, public place, and workplace settings; forms dynamics and consequences of third-part intervention.

**147A. Sociology of Crime.** Lecture, three hours; discussion, one hour. Sociological theories of social origins, organization, and meanings of crime and criminal behaviors.

**147B. Sociology of Criminal Justice.** Lecture, three hours; discussion, one hour. Examination of structures and routine decision-making processes of key criminal justice institutions, including police, courts, probation and parole, jails and prisons.

**148. Sociology of Mental Illness.** Analysis of major sociological and social psychological models of madness. Study of social processes involved in production, recognition, labeling, and treatment of "mental illness."

**149. Social Organization of Psychiatric Treatment.** Strongly recommended (but not prerequisite): course 148. Review of current research and theory on psychiatric treatment processes and treatment organizations, including mental hospitals and community mental health organizations.

**M150. Sociology of Aging.** (Formerly numbered 150.) (Same as Gerontology M150.) Lecture, three hours; discussion, one hour. Study of sociological processes shaping definition, experience, and response to aging in contemporary society. Topics include race, class, and gender in aging over life course; interpersonal relations and social worlds of the aged; caregiving relations and institutions; professions concerned with the aged and aging.

**151. Comparative Immigration.** Lecture, three hours; discussion, one hour; outside study, eight hours. Survey of immigration of Europeans, Asians, and Hispanics to the U.S. since the mid-19th century. Overview of immigration experience on ethno-racial groups that migrated voluntarily to this country, with emphasis on immediate postimmigration settlement. P/NP or letter grading.

**152. Comparative Acculturation and Assimilation.** Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: course 151. Comparison of acculturation and assimilation of Europeans, Africans, Mexicans, and Asians in the U.S., with emphasis on long-term cultural consequences of immigration. P/NP or letter grading.

**M153. Chinese Immigration.** (Formerly numbered 153.) (Same as Asian American Studies M154.) Lecture, two hours; discussion, one hour. Survey of sociological studies of Chinese immigration, with focus on international context, organization, and institutions of Chinese America and its interactions with the social environment. P/NP or letter grading.

**154. Race and Ethnicity: International Perspectives.** Lecture, three hours; discussion, one hour. Not open to freshmen. Role of race and ethnicity in political, economic, and social lives of nations other than the U.S.

**M155. Latinos in the U.S.** (Formerly numbered 155.) (Same as Chicana and Chicano Studies M155.) Lecture, three hours; discussion, one hour. Prerequisites: course 1 and junior standing, or consent of instructor. Exploration of history and social conditions of Latinos in Los Angeles as well as nationally, with particular emphasis on their location in the larger social structure and on comparisons with other minority groups. Topics include migration, family, education, and work issues. P/NP or letter grading.

**156. Ethnic and Status Groups.** Characteristics of "visible" ethnic groups (e.g., Japanese, Mexican, and black); their organization, acculturation, and differentiation. Development, operation, and effects of selective immigration and population mobility. Status of chief minorities in continental U.S., with comparative materials from Jamaica, Hawaii, and other areas.

**157. Social Stratification.** Analysis of American social structure in terms of evaluational differentiation. Topics include criteria for differentiation, bases for evaluation, types of stratification, composition of strata and status systems, mobility, consequences of stratification, and problems of methodology.

**158. Urban Sociology.** Lecture, three hours. Description and analysis of urbanization and urbanism in the U.S. and the world.

**159. Comparative Studies of Jewish Communities in the U.S. and Abroad.** Lecture, three hours; discussion, one hour. History, distribution, structure, and functioning of major Jewish communities, with particular emphasis on North America and Israel. Interrelationships and sources of conflict between Jews and Gentiles in Western countries. More generally, economic and social integration of Diaspora Jewish communities. Fieldwork may be required. P/NP or letter grading.

**160. Intergroup Conflict and Prejudice.** Study of causes and consequences of group conflict, with emphasis on majority/minority relations, prejudice, and discrimination. Special attention to alternative sociological and psychological theories of prejudice; effects of minority status on the individual; and possibilities for attitude and behavior change.

**M161. Comparative American Indian Societies.** (Formerly numbered 161.) (Same as American Indian Studies M161.) Lecture, three hours. Prerequisite: course 1 or American Indian Studies 10. Comparative and historical study of political, economic, and cultural change in indigenous North American societies. Several theories of social change, applied to selected case studies.

**M162. Sociology of Gender.** (Same as Women's Studies M162.) Lecture, three hours; discussion, one hour. Prerequisite: course 1 or Women's Studies 10 or consent of instructor. Examination of processes by which gender is socially constructed. Topics include distinction between biological sex and sociological gender, causes and consequences of gender inequality, and recent changes in gender relations in modern industrial societies. P/NP or letter grading.

**M163. Gender and Work.** (Same as Women's Studies M163.) Lecture, three hours. Prerequisite: course 1 or Women's Studies 10. Exploration of relationship of gender to work, concentrating on the U.S. experience but also including some comparative material. Particular emphasis on analysis of causes and consequences of job segregation by gender and of wage inequality.

**168. Organizations and Society.** Sociological analysis of organizations and their social environment. Introduction to basic theories, concepts, methods, and research on behavior of organizations in society.

**169. Law and Society.** Specific topics may include law in preindustrial and industrialized societies, legalization of contemporary social relations, participants' experiences of legal processes, lay perceptions of justice, social movements toward equal justice, roles of lawyers and judges, social impact of court decisions.

**170. Medical Sociology.** Prerequisite: course 1 or consent of instructor. Provides majors in sociology and other social sciences, as well as students preparing for health sciences careers, with understanding of health-seeking behavior and interpersonal and organizational relations that are involved in receipt and delivery of health services.

**171. Occupations and Professions.** Description and analysis of representative occupations and professions, with emphasis on the contemporary U.S.

**172. Entrepreneurship.** Lecture, three hours; discussion, one hour. Prerequisite: course 1. Description and analysis of entrepreneurship, with special reference to historical origins, ideology, international comparisons, women and ethnic minority participation, legal and illegal forms, public and private auspices.

**173. Economy and Society.** Sociology of economic life, with emphasis on principal economic institutions of the U.S.

**174. Sociology of the Family.** Theory and research dealing with the modern family, its structure, and functions, including historical changes, variant family patterns, family as an institution, and influence of contemporary society on the family.

**M175. Sociology of Education.** (Same as Education M108.) Prerequisite: course 1. Study of social processes and interaction patterns in educational organizations; relationship of such organizations to aspects of society, social class, and power; social relations within school, college, and university; formal and informal groups, subcultures in educational systems; roles of teachers, students, and administrators. Fieldwork may be required.

**M176. Sociology of Mass Communication.** (Same as Communication Studies M147.) Prerequisite: course 1. Studies in relationship between mass communication and social organization. Topics include history and organization of major media institutions, social forces that shape production of mass media news and entertainment, selected studies in media content, and effects of media on society.

**M180. Introduction to Development Studies: Political Economy of Development.** (Same as International Development Studies M100B and Political Science M197G.) Seminar, three hours. Analysis of determinants of underdevelopment, with focus on impact of colonialism, foreign investment, and trade, and on political economy.

**182. Political Sociology.** Contributions of sociology to study of politics, including analysis of political aspects of social systems, social context of action, and social bases of power.

**183. Comparative and Historical Sociology.** Prerequisite: course 1. Survey of central themes of comparative and historical studies in sociology. Various aspects of development of modern society, including development of nation-state, emergence of capitalism, industrialization, and population growth. Variation in contemporary society, viewed from a variety of theoretical perspectives.

**184. Social Change.** Study of patterns of social change, resistance to change, and change-producing agencies and processes.

**185. American Society.** Analysis of major institutions in the U.S. in historical and international perspective, with emphasis on topics such as industrialization, work, the state, politics, community, the family, religion, and American culture. Theories of social change, conflict, and order applied to the case of the U.S.

**186. Latin American Societies.** Descriptive survey of major Latin American societies, emphasizing their historical backgrounds and their emergent characteristics, with special attention to relations between rural and urban life.

**187. Population and Society in the Middle East.** Prerequisites: upper division standing, consent of instructor. Survey of Middle Eastern societies; their historic and environmental bases; contemporary demographic and cultural situation.

**188. Comparative East Asian Societies before World War II.** Lecture, two hours; discussion, one hour. Designed for juniors/seniors. Introductory and comparative survey of traditional societies of East Asia, including China, Japan, Korea, and Vietnam, with focus on dynamic interactions between culture, state, and society in process of change.

**189. Japanese Society.** Lecture, two and one-half hours; discussion, two hours. Prerequisite: course 1 or consent of instructor. Analysis of social-structural characteristics and functioning of contemporary Japanese society, with focus on (1) forms of social interaction and social structure, (2) work, family, and the life course, and (3) education and opportunity. Emphasis on structural perspectives, more than cultural perspectives.

**190. Capitalism, Socialism, and Alternative Social Systems.** Lecture, three hours; discussion, one hour. Prerequisite: junior or senior standing. Theories of capitalism and socialism, history of social experiments with socialism and other noncapitalist systems, and assessment of the record of these experiments. P/NP or letter grading.

**191. Society and Politics in Korea.** Lecture, three hours; discussion, one hour. Examination of society and politics in 20th-century Korea from a comparative/historical perspective; Korean case used to discuss major sociological and theoretical issues in social change and development (political and economic). P/NP or letter grading.

**192. State and Society in China.** Lecture, three hours. Designed for juniors/seniors. Thematic overview of post-1949 society and politics in China, with emphasis on long-term evolution of China's state and society from 1949 to the present.

**193. Asia-Pacific Social Transformation since World War II.** Lecture, three hours. Designed for juniors/seniors. Introductory and comparative survey of post-World War II development in Asia-Pacific region, with focus on ascent of Japan, newly industrialized capitalist countries, and emergence of socialist states.

**195A-195Z. Special Topics in Sociology.** Prerequisite: upper division standing (some sections may require prior coursework or consent of instructor). Study of selected current topics of sociological interest. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit and may be applied as elective units toward sociology major.

**M196A-M196B. Contemporary Issues in Urban Poverty Research.** (Formerly numbered 196A-196B.) (Same as Anthropology M196A-M196B.) Requisites: Honors Collegium 7A, 7B. Two-term research seminar designed to engage students in ongoing faculty research projects focusing on models of urban poverty and underclass behaviors. P/NP or letter grading.

**197A-197Z. Undergraduate Seminars.** Preparation: upper division standing, major in sociology, consent of instructor.

**199. Special Studies (2 to 8 units).** Prerequisites: senior standing, 3.0 GPA in major, courses 1 and 18 or equivalent, consent of instructor and department chair. Course of independent studies designed for graduate or senior undergraduate students who (1) desire a more advanced or specialized treatment of an area covered in regular course list and who present that course as a prerequisite or (2) desire work in an area of sociological analysis currently not covered by an upper division course. Only eight units are allowed. See undergraduate counselor for course contract.

**199HA-199HB-199HC. Special Studies for Honors.** Preparation: honors program standing. Requisite: course 104H. **199HA.** Design of research project to serve as student's honors thesis. Research proposal, detailed bibliography, and regular meetings with sponsoring faculty member required. **199HB.** Continuation of work initiated in course 199HA. Series of progress reports are prepared in consultation with instructor. **199HC.** Completion of written report or honors thesis.

**199I. Independent Studies for Internships (2 to 4 units).** Prerequisite: consent of instructor and department. Independent studies course to be supervised jointly by Field Studies Office and faculty adviser. Further supervision to be provided by business for which student is doing internship. May not be applied toward major requirements. Normally only four units of internship are allowed. P/NP grading.

## Graduate Courses

**202A-202B. Theory and Research in Sociology: Exemplary Studies, Classical and Contemporary.** Lecture, two hours; discussion, two hours. Prerequisite: graduate standing. Required of first-year sociology graduate students. Introduction to study of the discipline's formative and exemplary works to learn about theory and research by reading work done by other people. Designed to help students link their research to the great traditions of sociological enterprise. In Progress grading.

**203A. Social Survey Practicum.** Lecture, one hour; discussion, one hour; laboratory, two hours. Prerequisite: graduate standing or consent of instructor. Training through practice in basic techniques of survey research.

**203B. Social Survey Research Seminar.** Seminar, one hour; discussion, one hour; laboratory, two hours. Prerequisite: graduate standing or consent of instructor. Development of individual survey research projects under faculty supervision.

**208A-208B. Social Network Methods.** Lecture, three hours; laboratory, one hour. Requisites: courses 209A-209B or 210A-210B. Techniques for measuring characteristics of networks and positions in networks. Centrality of positions, centralization and density of networks, structural equivalence, cliques. Readings of exemplars of network research. Computer programs. In Progress grading.

**209A-209B. Data Analysis for Social Scientists.** Lecture, three hours; laboratory, one hour. Introduction to applied statistics and data collection for graduate students in social sciences. In Progress grading.

**209C. Mathematics for Social Statistics.** Lecture, three hours; computer exercises. Prerequisites: graduate standing, consent of instructor. Discussion of elementary mathematical techniques needed for more advanced statistics courses in various social sciences, psychology, and education. Calculus of sets, sets of numbers, sequences of numbers, notion of a function, polynomials, differentiation, elementary matrices, and vectors.

**210A-210B. Intermediate Statistical Methods I, II.** Lecture, three hours; discussion, two hours. Prerequisite: course 18 or equivalent. Required for M.A. degree by four area programs. Intermediate statistical methods using computers: probability theory, sampling distributions, hypothesis testing, interval estimation, multiple regression and correlation, experimental design, analysis of variance and covariance, contingency tables, sampling theory. In Progress grading.

**211A-211B. Comparative and Historical Methods.** In Progress grading. **211A.** Strategies of Research and Conceptualization. Prerequisite: consent of instructor. Topics include relationship of theory and fact to social sciences, logic of comparative and historical analysis, and substantive paradigms of comparative and historical analysis. Reading involves methodological examination of basic works in representative problem areas. **211B.** Research Techniques. Prerequisite: course 211A. Topics include problem of evidence, quantitative and qualitative data. Techniques of data analysis, including use of manuscript census, content analysis, collective biography, and secondary analysis.

**212A-212B. Marxist Methodology.** Prerequisite: course 101 or consent of instructor. Practice in dialectical method of attaining scientific knowledge about society as a process and mode of production. Critical examination of methodological issues and techniques and practical field research.

**213A-213B. Techniques of Demographic and Ecological Analysis.** Prerequisite: course 210A or equivalent. Procedures and techniques for collection, evaluation, and analysis of demographic and ecological data; models of population and ecological structure and change; applications to study of social structure and social change.

**214A-214B. Naturalistic Methods for Recorded Data.** Prerequisite: consent of instructor. Special features of audio and video recordings as sources of data; problems of description and analysis posed by working with recorded data; practical exploration of techniques of data collection and transcription with both audio and video data; analysis of single cases and analytically defined collections; use of computer to organize research with recorded data. In Progress grading.

**215A-215B. Experimental Sociology.** Prerequisites: course 210A or equivalent, consent of instructor. Basic fundamentals of experimental method, particularly as it is used in social psychology. In Progress grading.

**216A-216B. Survey Research Methods.** Course in methodology and techniques: formulation of research problem; study design; hypotheses; sampling; measurement; questionnaire and schedule construction; interviewing and data collection; processing and tabulation; analysis and interpretation; presentation of findings; cross-national, replicative, panel, and other complex survey designs. Students participate in survey research project. In Progress grading.

**217A. Analyzing Ethnographies.** Seminar, three hours. Prerequisite: consent of instructor. Analysis of ethnographic monographs.

**217B-217C. Ethnographic Fieldwork.** Seminar, three hours. Prerequisite: consent of instructor. Recommended: course 217A. Theories and techniques of ethnographic fieldwork. Kinds of problems amenable to ethnographic approaches, methods, and techniques for doing fieldwork, and ethnical problems involved in such research. In Progress grading.

**218A-218B. Ethnomethodological Methods.** Prerequisite: consent of instructor. Examination of techniques used in ethnomethodological research, practice in critical evaluation of research, and directed experience in conduct of an extended investigation employing ethnomethodological procedures. In Progress grading.

**219A-219B. Advanced Statistical Methods I, II.** Lecture, three hours; discussion, two hours. Prerequisites: courses 210A-210B or equivalent or consent of instructor. Not required. Advanced multivariate statistical methods: discrete variables and events, logit and log-linear regression, event-history analysis, general linear model, exploratory and confirmatory factor analysis, linear causal models, latent variables, reciprocal causation, classification and clustering, time-series analysis.

**220. Role Theory.** Prerequisites: graduate standing, consent of instructor. Review of theories and research dealing with social roles, with special emphasis on roles in social interaction and in formation of the social self.

**221. Social Ecology.** Prerequisites: courses 18, 116, or equivalent, and graduate standing, or consent of instructor. Examination of various approaches to both microecology and macroecology, including classical and neoclassical ecology, social area analysis, socio-cultural ecology, city-size distributions, effects of population density on animals and humans, proxemics, territoriality, and effects of physical environment on humans.

**222. Foundations of Ethnomethodological, Phenomenological, and Analytic Sociologies.** Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Basic issues, methods, and topics of ethnomethodological, phenomenological, conversation-analytic, and related varieties of inquiry. Central themes such as the world of everyday life, problem of rationality, rules/norms and tacit knowledge, problem of social order, speaking and discourse, constitutive practices, and production of ordinary interaction in first part; guest presentations by affiliated faculty in second part.

**223. Phenomenological and Interactionist Perspectives on Selected Topics.** Lecture, three hours. Comparison of phenomenological and symbolic interactionist perspectives by examining a particular body of live or currently unresolved substantive issues. Topics vary; attention on development of phenomenological and interactionist thought on topic of concern, with special concern for ambiguities and divergences both within and between the two approaches. When relevant, attention to logical and historical relations of phenomenology and interactionism of pragmatist, existentialist, and ordinary language philosophies.

**224A-224B. Problems in Social Psychology.** Prerequisites: course 210A, consent of instructor. Basic course for graduate students intending to specialize in social psychology. **224A.** Major theoretical contributions to the field. **224B.** Current work being done in department in several subfields.

**225A-225B. Demographic Perspectives on Relationship of Family and Economic Systems.** Prerequisites: courses 210A-210B or consent of instructor. Examination of interrelationship of family and economic systems in societies at different levels of economic development, focusing particularly on the U.S. experience. Central to course: (1) analysis of how demographic factors affect economic and family systems; (2) how these systems, and changes in them, affect demographic variables; and (3) how this two-way process influences relationship of family and economic systems over time. **225A.** Lectures and readings. **225B.** Individual research projects involving term paper and classroom reports of results.

**226A-226B. Introduction to Theory and Major Empirical Research in Social Demography.** Lecture, two hours; discussion, one hour. Prerequisites: course 210A, consent of instructor. Survey and critical examination of population theories and related major empirical research. Emphasis on interrelation of cultural, socioeconomic, and demographic factors. Introduction to elementary demographic methods utilizing microcomputers.

**227. Sociology of Knowledge.** Prerequisite: graduate standing or consent of instructor. Survey of theories and research concerning social determinants of systems of knowledge and role of intellectual and artistic elites in Western societies.

**228A-228B. Critical Issues in Macrosociology.** Lecture, two hours; discussion, one hour. Prerequisite: graduate standing. Conceptual introduction to the area of macrosociology in which exemplary works are read, studied for substance and methods, and critiqued in seminar and in written papers. Usually team taught by faculty of varying orientations. In Progress grading.

**229A. Informal Social Control.** Lecture, three hours. Development and transformation of informal disputes and troubles in communities, neighborhoods, public places, work settings, households, and families.

**229B. Social Control Institutions.** Lecture, three hours. Course 229A is not prerequisite to 229B. Current research and theory in formal social control processes and institutions, including police, courts, schools, and nonvoluntary treatment programs, among others.

**230. Nations and Nationalism.** Lecture, three hours. Preparation for independent work in the area of nations and nationalism through close reading of key theoretical and empirical works in this or related areas. S/U or letter grading.

**231. Race and Ethnicity: International Perspectives.** Lecture, one hour; discussion, two hours. Prerequisite: graduate standing or consent of instructor. Role of race and ethnicity in political, economic, and social lives of nations other than the U.S., with emphasis on theoretical and methodological issues in comparative research.

**232. Survey Data Acquisition.** Lecture, three hours. Prerequisites: courses 210A-210B. Traditional topics on survey research practice in study design, instrument design, sampling, interviewing, and data management. Parallel coverage of research literature on various sources of nonsampling response bias that influence survey results. Ongoing survey that employs Computer-Assisted Telephone Interviewing is available as a resource for course.

**233. Foundations of Political Sociology.** Lecture, three hours. Prerequisite: graduate standing or consent of instructor. Survey of the field of political sociology, oriented around critical themes in major theoretical traditions and contemporary exemplars. Special attention to competing perspectives on power, theory of the state, and relationship of class structure to politics.

**234. Sociology of Community Organization.** Prerequisites: graduate standing, consent of instructor. Survey of recent and classical research and literature dealing with predominantly political institutions, problem of order, and organization of communal life in the village and metropolis.

**235. Theories of Ethnicity.** Lecture, one hour; discussion, two hours. Prerequisite: graduate standing or consent of instructor. Examination of variety of theoretical approaches in understanding race and ethnicity in contemporary societies, with emphasis on recent debates among class analysis, pluralist, primordialist, and rational choice perspectives.

**236. Immigration.** Lecture, three hours. Emphasis on recent immigration to the U.S. in light of historical experience. Examination of patterns of adaptation and ethnic change, with particular attention to new theoretical approaches within multidisciplinary framework. S/U or letter grading.

**237. Seminar: Theory and Research in Comparative Social Analysis (2 units).** Prerequisite: graduate standing. Emphasis on one issue of particular importance for comparative analysis of capitalism and socialism, North America and Western Europe, developed capitalist and socialist countries and the Third World, and implications for theory construction and social research. S/U grading.

**239A-239B. Quantitative Research on Social Stratification and Social Mobility.** Lecture, three hours. Prerequisites: courses 210A-210B or equivalent. Introduction to English language research literature on quantitative social stratification and social mobility in the U.S. and abroad. In Progress grading.

**240. Mathematics of Population.** Prerequisite: prior knowledge of matrices, calculus, and probability theory. Discrete and continuous deterministic and probabilistic models of growth and composition of a one-sexed population classified by age, plus selected topics on more complicated population models.

**241. Theories of Gender in Society.** Lecture, one hour; discussion, two hours. Gender stratification in society and sociology; extent of gender diversity in human societies past and present; why gender is absent in classical macrosociology; can masculinist paradigms make space for gender or does a feminist-informed sociology necessitate a fresh approach?

**242. Analysis of Categorical Data.** Lecture, three hours. Prerequisites: courses 210A-210B or Statistics M152A and 152B-152C or equivalent or consent of instructor. Log-linear and log-bilinear analysis (hierarchical log-linear models, logit models, association models, quasi-symmetry models, log-rate models, latent-structure models, and latent-trait models).

**243. Interaction and Institutions.** Lecture, three hours. Examination of ethnographic and conversation analytic research on structure and processes of interaction in several institutional settings, taken from the following: medicine, criminal justice, psychiatry, social welfare, education, mass communications.

**C244A-C244B. Conversational Structures I, II.** Lecture, three hours; discussion, one hour. May be concurrently scheduled with courses CM124A-CM124B. Graduate students have additional assignments and/or meet as a group one additional hour each week. S/U or letter grading. **C244A.** Introduction to some structures which are employed in organization of conversational interaction, such as turn-taking organization, organization of repair, and some basic sequence structures with limited expansions. **C244B.** Prerequisite: course C244A. Consideration of some more expanded sequence structures, story structures, topical sequences, and overall structural organization of single conversations.

**245. Cultural Sociology: Classical and Contemporary Approaches.** Lecture, one hour; discussion, two hours. Exploration of classical approaches to cultural dimension of social life — Weberian, Durkheimian, Parsonian, and critical — and living traditions they have spawned. Examination of contemporary efforts at constructing a new cultural sociology. Theoretical focus, with consideration of case studies.

**246. Cultural Studies: Hermeneutic, Semiotic, and Poststructural Traditions.** Lecture, one hour; discussion, two hours. Examination of cultural analysis as it has evolved outside the discipline of sociology, on premise that these extra-sociological approaches provide critical resources in advancing the field of cultural sociology today. Theoretical and comparative emphasis, with consideration of case studies.

**247. Sociology of Emotions.** Lecture, two hours; discussion, one hour. Designed for graduate students. Sociological theories of emotional expression; experiential approaches to emotions: motivational, cognitive, psychophysiological, and behavioral; repression, social oppression, and the emotions; creativity and expressed affect; thought, sensations, and the emotions; specific emotions; cultural differences in emotional expression; measurement of emotions.

**248. Selected Topics in Culture and Society.** Seminar, three hours. Prerequisite: graduate standing. Seminar on selected topics on culture and society. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit. S/U or letter grading.

**M249A. Health Professions.** (Same as Community Health Sciences M274.) Lecture, three hours. Prerequisite: Community Health Sciences 210 or consent of instructor. Sociological examination of concepts "health" and "illness" and role of various health professionals, especially physicians. Attention to meaning of professionalization and professional/client relationships within a range of organizational settings.

**M249B. Health and Illness Behavior.** (Same as Community Health Sciences M275.) Prerequisites: Community Health Sciences 210 and Epidemiology 100, or consent of instructor. Sociocultural factors affecting differential patterns of health behavior, illness behavior, and sick-role behavior.

**250. Methodological Problems.**

**251. Topics in the Problem of Social Order.**

**253. Quantitative Methods in Sociology.**

**254. Human Capital, Social Capital, and Cultural Capital.** Lecture, three hours. Designed for graduate students. Intellectual history of these concepts, points of difference and similarity among the concepts, current exemplars of research that utilize these concepts, and critical reflection on research traditions.

**255A-255B. Selected Issues in Sociological Theory.** Seminar. Prerequisite: consent of instructor. Course 255A is not ordinarily prerequisite to 255B. Examination of selected issues and problems in classical or contemporary sociological theory and in history of development of sociological theory.

**256. Demography.**

**257. Demography of Marriage Formation and Dissolution.** Discussion, three hours. Prerequisites: course 210A, consent of instructor. Extensive and intensive critical examination of major approaches to analysis of marriage formation and dissolution, with focus primarily on demographic literature.

**C258. Talk and Social Institutions.** (Formerly numbered 258.) Lecture, four hours; discussion, one hour. Practices of communication and social interaction in a number of major institutional sites in contemporary society. Setting varies but may include emergency services, police and courts, medicine, news interviews, and political oratory. Concurrently scheduled with course CM125. S/U or letter grading.

**259. Social Structure and Economic Change: Historical and Comparative Perspectives.**

**260. Economy and Society.** Discussion, two hours. Prerequisite: graduate standing or consent of instructor. Review and critique of major analytical traditions in economy and society.

**261. Ethnic Minorities.**

**M262. Selected Problems in Urban Sociology.** (Same as Afro-American Studies M200C.) Seminar. Prerequisite: consent of instructor.

**263. Social Stratification.**

**264. Personal Identity in Historical Perspective.** Lecture, three hours. Prerequisite: graduate standing. Examination of distinctive features of personal identity in contemporary society through use of historical materials on various aspects of private life. Topics include home, food, clothing and appearance, personal odor, and cleanliness in everyday life.

**265. Problems in Organization Theory.**

**266. Selected Problems in Analysis of Conversation.** Prerequisites: courses C244A-C244B or consent of instructor. Variable topics/formats course. Consult instructor for topics and formats to be offered in a specific term. May be repeated for credit with topic change. S/U or letter grading.

**267. Selected Problems in Communication.**

**268. Selected Problems in Psychoanalytic Sociology.** Discussion, three hours. Recommended (but not prerequisite): at least one year of methods courses. Selected problems in interpretation of sociology and psychoanalysis, which may be substantive (group development, socialization, culture, deviance, collective behavior) or methodological; latter focuses on clinical fieldwork and experimental use of psychoanalytic and sociological techniques.

**269. Collective Behavior.**

**270. Selected Problems in Socialization.**

**271. Ethnomethodology.**

**272. Topics in Political Sociology.**

**273. Attitudes and Social Structure.**

**274. Social Change and Development in Korea.** Seminar, three hours. Requisite: course 191. In-depth understanding of social change and development in 20th-century Korea. Discussion, in comparative/historical perspective, of major theoretical and empirical issues related to social, political, and economic Korean transformation.

**M275. Contemporary Issues of the American Indian.** (Same as American Indian Studies M200C and Anthropology M269.) Introduction to most important issues facing American Indians as individuals, communities, tribes, and organizations in the contemporary world, building on historical background presented in American Indian Studies M200A and cultural and expressive experience of American Indians presented in American Indian Studies M200B.

**276. Selected Topics in Sociology of East Asia.** Prerequisites: graduate standing, consent of instructor. Selected problems in China, or in China and Japan comparatively. Possible topics include (1) China's Great Proletarian Cultural Revolution, (2) internal contradictions in Chinese society: male/female relations, city and countryside, minority nationalities, class struggle under socialism, etc., (3) China and Japan: two models of development.

**277. Japanese Society: Selected Topics.** Lecture, two and one-half hours. Prerequisite: graduate standing. Social structural characteristics and functioning of contemporary Japanese society, with focus on comparison and evaluations of functional (or rational) and cultural explanations of selected social phenomena. Topics include forms of social interaction, work organization, family, education, and equality.

**278. Sociology of Latin America.** Lecture, one hour; discussion, two hours. Prerequisite: graduate standing or consent of instructor. Selected topics in sociological study of Latin America. Possible topics include social movements, race and ethnicity, stratification, and social development.

**279. Seminar: Applied Social Research.** Seminar, two hours; discussion, one hour. Opportunities for applied research, distinctive features of applied work, and procedures commonly employed in various areas of research. Examination of representative work in specific areas of applied research.

**280. Seminar: Evaluation Research.** Prerequisite: graduate standing. Technical and political aspects of implementing evaluation research studies. Role of evaluation research in social policy development, as well as procedures for undertaking process and impact evaluations. S/U or letter grading.

**281. Selected Problems in Mathematical Sociology.** Prerequisite: consent of instructor. Exploration of some mathematical models of sociological processes. Possible topics include models of small groups, social mobility, kinship relations, organizations, social interaction.

**282. Organizations and the Professions.**

**283. Applied Sociology.** Discussion, two hours. Prerequisite: graduate standing. Examination of roots and intellectual traditions underlying contemporary interest and work in applied sociology. Discussion of range of methodological perspectives used in applied research, utility of social research in various substantive domains and conflicts and controversies related to ideological activities, competence and performance requirements, and identification with and participation in the discipline.

**284. Topics in Mental Health and Illness.** Prerequisites: course 148 or equivalent, graduate standing.

**285A-285Z. Special Topics in Sociology.** Seminar, three hours. Prerequisite: graduate standing. Seminars on selected current topics of sociological interest. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit.

**286. Event History Analysis.** Lecture, three hours. Prerequisites: courses 209A-209B and 209C, or 210A-210B, or equivalent, or consent of instructor. Logit models for discrete-time event history models; piecewise exponential hazards models based on use of log-linear analysis; proportional hazards, nonproportional hazards, and stratified models based on Cox partial likelihood method; and accelerated failure-time regression models. S/U or letter grading.

**287. Topics in Chinese Society.** Discussion, three hours. Preparation: at least two upper division courses on China in any social sciences discipline. Introduction to current research questions in Chinese sociology, as well as major themes in study of Chinese society, both historical and contemporary, including demographic, economic, political, and social change before and after 1949. S/U or letter grading.

**288A-288B-288C. Mental Health Services for Persons with AIDS.** Designed for graduate students. Analysis of current research on mental health service systems for persons with AIDS. S/U grading.

**289A-289B-289C. Social Psychology Seminars (2 units each).** Seminar, one hour; discussion, one hour. Prerequisite: graduate standing. Required of students in social psychology area program, but open to all graduate students in good standing. Forums for presentation of advanced work in social psychology designed to develop ability to understand, critically evaluate, and present research in fields relevant to study of social psychology. May be repeated for credit. S/U grading.

**290A-290B-290C. Communities and Institutions Seminars (2 units each).** Seminar, one hour; discussion, one hour. Prerequisite: graduate standing. Required of students in communities and institutions area program, but open to all graduate students in good standing in department. Seminars for presentation of advanced work in communities and institutions designed to contribute to theoretical and methodological comprehension of work in this area program and to critically evaluate avenues for further research advancements. May be repeated for credit. In Progress and S/U grading.

**291. Moral Solidarity in Communities.** Comparative analysis of social solidarity and collapse of social solidarity in voluntary and traditional communities. Contrasts more and less solidarity types, with special reference to utopian communities and developmental processes.

**292A-292B-292C. Research Development.**

**293A-293B-293C. Colloquia: Ethnomethodological, Phenomenological, and Observational Sociologies (2 units each).** Prerequisites: courses CM124A-CM124B or 217B-217C or 218A-218B and 222, or consent of instructor. Participants present ongoing work and read and discuss exemplary past work of common interest. Continuing colloquia in which participation is expected of faculty and graduate students affiliated with ethnomethodological, phenomenological, and observational sociologies area program (students taking a minor field examination may be exempt on request). S/U grading.

**294A-294B-294C. Research Seminars: Macrosociology.** Discussion, two hours. Prerequisite: consent of instructor. Required of students in macrosociology area program. Training in conduct, presentation, and critical evaluation of original research and analysis of substantive and methodological questions in macrosociology. In Progress and S/U grading.

**295A-295B-295C. Seminars: Quantitative Sociology (2 units each).** Ongoing seminars in quantitative sociology area program. Forum in which faculty, students, and visitors make presentations and obtain feedback on research being planned or conducted or recently completed, including didactic presentations on important developments in the area. Students required to make a presentation each term they are enrolled for credit. S/U grading.

**M296A-M296B. Social Theory and Comparative History.** (Same as History M203A-M203B and Political Science M291A-M291B.) Colloquium, three and one-half hours every other week. Introduction to historically rooted social theory and theoretically sensitive history, following the program of the Center for Social Theory and Comparative History. Each course may be taken independently for credit.

**M296C. Theories in Cultural History.** (Same as History M203C.) Discussion, three hours. Introduction to social, linguistic, semiotic, or other new interpretive theories and practices developed in other fields and applied to historical material.

**297A-297B-297C. Colloquia: Macrosociology (2 units each).** Weekly forums for presentation of advanced work in macrosociology by graduate students and faculty, as well as visitors from other campuses. Intended to contribute to theoretical and methodological understanding of work in area of macrosociology. S/U grading.

**298A-298B-298C. Workshops in Culture and Society (2 units each).** Discussion, 90 minutes every other week. Interdisciplinary workshops for graduate students and faculty pursuing theory and research in topics related to interplay of culture and society, whether social, literary, or philosophical in nature. In Progress and S/U or letter grading.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495A-495B. Supervised Teaching of Sociology (2 units each).** Prerequisite: appointment as teaching assistant in Sociology Department or equivalent. Special course for teaching assistants designed to deal with problems and techniques of teaching introductory sociology. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**595. Directed Research for Master's Paper (4 to 12 units).** Directed research for and writing of M.A. degree paper under guidance of student's M.A. committee chair. S/U grading.

**596. Directed Individual Study and Research in Sociology (2 to 12 units).**

**597. Individual Study for Examinations (4 to 12 units).** Preparation for Ph.D. qualifying examinations. S/U grading.

**599. Research in Sociology for Ph.D. Candidates (4 to 12 units).**

A. John Skirius, Ph.D. (*Spanish*)  
Paul C. Smith, Ph.D. (*Spanish*)

### Lecturers

José M. Cruz-Salvadores, M.A. (*Spanish*)  
George L. Voyt, J.D., *Emeritus*

## Scope and Objectives

The Department of Spanish and Portuguese is dedicated to the study and teaching of the languages, literatures, and cultures of the Hispanic heritage in all areas of the world, particularly on the continents of Europe and America. It maintains a strong commitment to the value of original research and professional instruction at all levels of its activities.

Whether studying for the B.A., M.A., or Ph.D. degree, students are given careful guidance in the choice of courses and in the preparation of a study program. The richness of Hispanic culture is amply represented in the extensive range of courses in language, linguistics, and literature. Although the literatures of Spain, Portugal, Brazil, and Spanish America predominate, courses are also offered in Chicano literature. The breadth of courses offered by the department allows undergraduate students to pursue many possible interests and enables graduate students to concentrate in depth in several areas of specialization.

The department's courses are primarily designed to serve the four B.A. programs: B.A. in Spanish (Plan A), B.A. in Spanish and Linguistics (Plan B), B.A. in Portuguese, and B.A. in Spanish and Portuguese, as well as to prepare students for its three graduate programs: M.A. in Spanish, M.A. in Portuguese, and Ph.D. in Hispanic Languages and Literatures. The courses are also functionally supportive of such interdepartmental programs as the California State Instructional Credential in Spanish, B.A. and M.A. programs in Latin American Studies, M.A. program in Folklore and Mythology, and M.A. and Ph.D. programs in Comparative Literature and Romance Linguistics and Literature.

## Undergraduate Study

### Bachelor of Arts in Spanish and in Spanish and Linguistics

Students with one or more years of high school Spanish who plan to enroll in Spanish 1 through 25 must take the departmental placement examination. Consult the *Schedule of Classes* or the department office for test dates and location.

#### Preparation for the Major

*Required:* Spanish 25 or 25A or equivalent as determined by the placement test; courses M35, M42, M44, or equivalent as determined by the undergraduate adviser. These courses must be passed with an average grade of C or better prior to beginning upper division work in either major.

#### The Major

##### Plan A: Spanish Language and Hispanic Literature

*Required:* (1) Nine core courses, including Spanish 100A-100B, 119A, 119B, 120A through 120D (must be taken in sequence),

and 127, all (except course 127) of which must be taken during the junior year (transfer students should consult the departmental counselor for sequencing) and (2) five upper division Spanish elective courses, selected in consultation with an adviser, in which several areas of study are possible (e.g., language and linguistics as preparation for teaching Spanish at the secondary level; literature of Spain; literature of Latin America; Chicano literature; or any combination which might also include literature and film, or women in Spanish and Latin American literature).

##### Plan B: Spanish and Linguistics

*Required:* Completion of six terms of study in one language other than Spanish and English or three terms in each of two other languages, in addition to the preparation for the major courses. Portuguese is recommended.

The major consists of 15 upper division courses, including Spanish 100A-100B, 105, 115, M118A-M118B, Linguistics 103, 110, 120A, 120B, 165A or 165B, and four upper division Spanish electives.

#### Honors Program

The honors program is open to Spanish majors who have completed the required nine upper division core courses with a 3.5 grade-point average. Eligibility is verified by the departmental counselor.

Two honors projects and an honors thesis are required. To graduate with departmental honors, students must first complete an honors project in each of two of their upper division Spanish elective courses. The honors project is a 12- to 15-page term paper on a special topic, selected in consultation with the instructor, to be completed in addition to the normal course requirements. On the basis of the coursework and special interests, students then consult a faculty member in that field and formulate a research project which they pursue under the faculty member's guidance through Spanish 170. Students research and write an honors thesis (not to be confused with an honors project) of approximately 25 pages on the selected topic. Approval of the honors thesis is the final requirement for departmental honors.

## Bachelor of Arts in Portuguese

### Preparation for the Major

*Required:* Portuguese 3, M35, M42 or M44, 46, or equivalent.

#### The Major

##### Portuguese Language and Literature

*Required:* Thirteen upper division courses, including Portuguese 100A, 100B, 105, 120A-120B or 130A-130B, and eight elective courses in Portuguese, or six electives in Portuguese plus two courses from areas that complement the program approved by the undergraduate adviser in Portuguese.

### Portuguese and Linguistics Concentration

*Required:* Completion of six terms of study in one other foreign language or three terms in each of two other foreign languages, in addition to the preparation for the major courses. Spanish is recommended.

The concentration consists of 13 upper division courses, including Portuguese 100A, 100B, 105, M118A-M118B, Linguistics 100, 103, 110, 120A, 120B, and three electives, two of which must be in Luso-Brazilian literature.

### Double Majors

Through judicious use of electives, students may find it possible to secure the B.A. degree with two complete majors (e.g., Portuguese/Spanish, Portuguese/History, Portuguese/Sociology, etc.). Interested students should consult the undergraduate adviser in Portuguese as early as possible in their B.A. program.

### Study in a Portuguese-Speaking Country

Students are encouraged to spend up to one year in a Portuguese-speaking country to study in a university or conduct research. Appropriate credit may be granted in accordance with the individual program, arranged in consultation with the undergraduate faculty adviser in Portuguese. Proposals must be submitted in advance in writing and must be approved by the department.

## Bachelor of Arts in Spanish and Portuguese

### Preparation for the Major

*Required:* Spanish 25, Portuguese 25, M35, M42 or M44, 46, or equivalent.

### The Major

*Required:* Six upper division courses in language and linguistics, including Spanish 100A-100B, Portuguese 100A, 100B, M118A or M118B, and either Spanish 105 or Portuguese 105; nine upper division courses in literature selected from one of the following groups: *group A* (peninsular literature to 1700) — Spanish 123, 124, 127, Portuguese C124, C125, C126, and three other literature courses, one of which must be in Spanish and one in Portuguese; *group B* (peninsular literature from 1700 to the present) — Spanish 128, 130, 133, Portuguese C127, C128, C129, and three other literature courses, one of which must be in Spanish and one in Portuguese; *group C* (Spanish-American and Brazilian literature to 1900) — Spanish 137, 139, 140, Portuguese C131, C132, C133, and three other literature courses, one of which must be in Spanish and one in Portuguese; *group D* (Spanish-American and Brazilian literature from 1900 to the present) — Spanish 142, 143, Portuguese C134, C135, and five other literature courses, two of which must be in Spanish and two in Portuguese.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degrees

### Spanish

#### Admission

Admission to the Master of Arts program in Spanish is based on a careful review of the applicant's academic record by the graduate admissions committee. Minimum requirements are the B.A. in Spanish from UCLA or another recognized university and a satisfactory score on the Graduate Record Examination (GRE) General Test. If the graduate admissions committee deems that some area of the applicant's preparation in language or literature needs to be strengthened, it may require that one or more complementary courses be taken.

#### Areas of Study

The department offers four plans of study for the M.A. degree in Spanish: Plan A, Linguistics; Plan B, Literature; Plan C, Linguistics and Literature; and Plan D, Spanish and Portuguese.

#### Course Requirements

Eleven graduate courses offered by the department are required for the M.A.; at least one must be a seminar taken only after the appropriate preseminar. Spanish 596 may be taken only once; courses 597 and 598 do not count toward the degree. Four courses are chosen for the major field, with two courses for each of the minor fields.

*Plan A: Linguistics.* Students choose one major field and one minor field from the following areas of specialization: phonology and morphology, syntax, diachronic or synchronic language variation. Five courses are chosen for the major field, three courses for the minor field, and either Spanish M201A-M201B or two linguistic courses from the area not chosen for the student's major and minor fields. Also required is one graduate course in literature offered by the department.

*Plan B: Literature.* Spanish M201A-M201B, one course from 202A through 209, and eight elective graduate courses are required. Four courses are chosen for the major field, three for the minor field, and one additional course from an area outside the major and minor fields. Students choose one major field and one minor field from the following areas of specialization:

- (1) Spanish literature from its beginning to 1700.
- (2) Spanish literature from 1700 to the present.

(3) Spanish-American literature from its beginning to 1900.

(4) Spanish-American literature from 1900 to the present.

*Plan C: Linguistics and Literature.* Required courses are Spanish M201A-M201B and nine elective graduate courses, four in literature and five in linguistics. The four courses in literature are chosen from two of the Plan B areas of specialization, two from each area.

Of the five courses in linguistics, one must be in phonology and morphology, one in syntax, and one in diachronic or synchronic language variation.

*Plan D: Spanish and Portuguese.* Under this option, the department recognizes two areas of specialization: literature and linguistics.

(1) Literature: Spanish M201A-M201B plus nine elective courses (at least eight of them graduate) are the minimum requirement. Four of the nine must be in appropriate areas of Spanish, four in Portuguese. The remaining course may be in the major field or may be selected as a supplementary course in an area supportive of the major and fields of specialization and must be chosen in consultation with the graduate adviser.

(2) Linguistics: Eleven courses (at least 10 of them graduate) are the minimum requirement. Four must be in appropriate areas in Spanish, four in Portuguese. The remaining three courses may constitute a minor or supplementary courses in an area supportive of the two major fields of specialization and must be chosen in consultation with graduate adviser. Course 596 may be included once; courses 597 and 598 may not be applied toward the degree.

### Comprehensive Examination Plan

*Plan A.* A list of essential reading is given to each student on entry to Plan A. One quarter before students propose to take their M.A. examination, they must present to their guidance committee two reading lists, one for the major field and one for the minor field. These reading lists, which must be approved by the guidance committee, must incorporate both the prescribed reading and reading undertaken independently to complement coursework. These two reading lists form the basis of the M.A. examination, which consists of (1) a three-hour written examination on the major field and (2) a two-hour written examination on the minor field.

*Plan B.* One quarter before students propose to take their M.A. examination, they must present to their guidance committee two reading lists, one for the major field and one for the minor field. These reading lists, which must be approved by the student's guidance committee, must adequately represent both the readings for individual courses and readings undertaken independently to complement coursework. The reading list for the major field should comprise approximately 15 authors and 30

works; the reading list for the minor field should comprise approximately nine authors and 18 works. The guidance committee has the right to prescribe authors and texts not included in the lists. These two reading lists form the basis of the M.A. examination, which consists of (1) a three-hour written examination on the major field and (2) a two-hour written examination on the minor field.

*Plan C.* One quarter before students propose to take their M.A. examination, they must present to their guidance committee a reading list that must adequately represent both their readings for individual literature courses and readings undertaken independently to complement coursework. The reading list for literature should comprise approximately 12 authors and 24 works. The reading list must be approved by the guidance committee, which has the right to prescribe authors and works not included in the list, and forms the basis of the literature section of the M.A. examination. The guidance committee establishes the reading list for linguistics. The examination consists of (1) a three-hour examination in linguistics and (2) a three-hour examination in literature.

*Plan D.* One quarter before students propose to take their M.A. examination, they must present to their guidance committee two reading lists, one for the major field and one for the minor field. These reading lists, which must be approved by the student's guidance committee, must adequately represent both the readings for individual courses and readings undertaken independently to complement coursework. The reading list for the major field should comprise approximately 15 authors and 30 works; the reading list for the minor field should comprise approximately nine authors and 18 works. The guidance committee has the right to prescribe authors and texts not included in these lists. These two reading lists form the basis of the M.A. examination, which consists of (1) a three-hour written examination on the major field and (2) a two-hour written examination on the minor field.

### Thesis Plan

In lieu of taking the comprehensive examination, a student in any one of the four plans may seek permission to present a thesis for the M.A. degree. The student must first complete five graduate courses, one of which must be a seminar. In order to endorse the petition, the graduate adviser and the guidance committee need to find evidence of exceptional ability and promise in term papers and coursework.

## Portuguese

### Admission

Admission to the Master of Arts program in Portuguese is based on a careful review of the applicant's academic record by the graduate admissions committee. Minimum requirements are the UCLA B.A. in Portuguese or its equivalent and a satisfactory score in the Graduate Record Examination (GRE) General Test; three letters of recommendation may also be

sought. If the graduate admissions committee deems that some area of the applicant's preparation in language or literature needs to be strengthened, it may require that one or more complementary courses be taken.

### Areas of Study

The program allows two options:

*Plan A:* Portuguese. Students must select one major field and one minor field from the following areas of specialization: Brazilian literature; Portuguese literature; Portuguese linguistics.

*Plan B:* Portuguese and Spanish. Under this option, the department recognizes two areas of specialization: literature and linguistics.

(1) Literature: major field of specialization: Brazilian or Portuguese literature; minor field of specialization: Spanish or Spanish-American literature.

(2) Linguistics: major field of specialization: Portuguese linguistics; minor field of specialization: Spanish linguistics.

### Course Requirements

*Option A.* Eleven graduate courses are required, at least one of which must be a seminar. Students must select at least five courses in the major field and three in the minor field. In addition, three courses, at least two of which must be at the graduate level, must be selected, with the approval of the graduate adviser, either as part of the major field, as a second minor field, or as supplementary courses supportive of the major. Course 596 may be included once; courses 597 and 598 may not be applied toward the degree.

*Option B.* (1) Literature: Portuguese M201A-M201B plus nine elective courses (at least eight of them at the graduate level) are the minimum requirement. Four of the nine must be in appropriate areas of Portuguese, four in Spanish. The remaining course may be in Portuguese or may be selected as a supplementary course in an area supportive of the major fields of specialization and must be chosen in consultation with the graduate adviser.

(2) Linguistics: Eleven courses (at least 10 of them graduate) are the minimum requirement. Four must be in appropriate areas in Portuguese, four in Spanish. The remaining three courses may constitute a minor or supplementary courses in an area supportive of the two major fields of specialization and must be chosen in consultation with the graduate adviser. Course 596 may be included once; courses 597 and 598 may not be applied toward the degree.

### Comprehensive Examination Plan

*Plan A.* One quarter before the proposed date of the M.A. examination, the student must present to the guidance committee a reading list that adequately represents both the readings completed for individual literature courses and the readings undertaken independently to supplement coursework. The student's reading list for a major field in literature should com-

prise approximately 15 authors and 30 works; the reading list for a minor field in literature should comprise approximately six authors and 15 works. The reading list for linguistics is established by the guidance committee. The reading lists form the bases of the examination. Students selecting a second minor field from outside the department submit two research papers from courses in that field in lieu of a third examination. Research papers from courses taken outside the department must be submitted prior to the comprehensive examination.

The examination consists of (1) a three-hour examination in the major field and (2) a 90-minute written examination in the minor field.

*Plan B.* One quarter before students propose to take their M.A. examination, they must present to their guidance committee two reading lists, one for the major field and one for the minor field. These reading lists, which must be approved by the student's guidance committee, must adequately represent both the readings for individual courses and readings undertaken independently to complement coursework. The reading list for the major field should comprise approximately 15 authors and 30 works; the reading list for the minor field should comprise approximately nine authors and 18 works. The guidance committee has the right to prescribe authors and texts not included in these lists. These two reading lists form the basis of the M.A. examination, which consists of (1) a three-hour written examination on the major field and (2) a two-hour written examination on the minor field.

### Thesis Plan

In lieu of taking the comprehensive examination, a student may seek permission to present a thesis for the M.A. degree. The student must first complete five graduate courses, one of which must be a seminar. In order to endorse the petition, the graduate adviser and the guidance committee need to find evidence of exceptional ability and promise in term papers and coursework.

## Doctoral Degree

### Admission

The UCLA M.A. in Spanish or in Portuguese, or equivalent, is required for admission to the Ph.D. program in Hispanic Languages and Literatures. Three letters of recommendation are also required from professors familiar with the applicant's work as a graduate student, which address the applicant's capacity for research-oriented doctoral studies and possible entry into the profession. The Graduate Record Examination (GRE) General Test is also required. A combined score of 1,000 is preferred, and the verbal score is considered more important than the quantitative.

Applicants holding the M.A. in Spanish or in Portuguese from UCLA are in one of three categories and are so notified on receipt of the degree. The categories are (1) low pass (termi-

nal M.A., not eligible for admission into the Ph.D. program); (2) mid pass (may continue toward the Ph.D. on a probationary basis); and (3) high pass (automatically eligible to enter the Ph.D. program).

### Major Fields or Subdisciplines

Spanish linguistics; Portuguese linguistics; diachronic Hispanic linguistics and philology; medieval Spanish literature; Renaissance and Golden Age Spanish literature; 18th- and 19th-century Spanish literature; 20th-century Spanish literature; colonial and 19th-century Spanish-American literature; 20th-century Spanish-American literature; early Portuguese literature; modern Portuguese literature; Brazilian literature; Spanish and Luso-Brazilian folklore.

### Course Requirements

After the B.A., a minimum of 20 graduate courses is required. The two-quarter sequence, Spanish or Portuguese M201A-M201B, may be required if students have not previously taken it or similar courses elsewhere. In the major field, students normally take a minimum of six graduate courses, of which at least two are seminars. In each of the minor fields, students normally take a minimum of four graduate courses, of which at least one must be a seminar. Seminars may be taken for credit no more than twice, with the approval of the appropriate guidance committee, if the content of the course is substantially different.

### Written and Oral Qualifying Examinations

The qualifying examinations consist of (1) a four-hour written examination on the major field; a two-hour written examination on each of the minor fields. These examinations take place during the fifth and sixth weeks of the Fall, Winter, and Spring Quarters; (2) a two-hour University Oral Qualifying examination.

The examinations are normally taken no later than nine quarters after receiving the B.A. and six quarters after receiving the M.A. Only students who pass the qualifying examination are advanced to candidacy for the Ph.D.

## Spanish

### Lower Division Courses

Spanish 1 through 3 use Garner, Rusch, and Domínguez' *Claro que sí*. The method is inductive. Selected examples are given to enable students to inductively grasp the rules and develop their own grammar. This enables students to use language effectively and creatively. The courses are taught entirely in Spanish — students simultaneously learn to understand, speak, read, and write Spanish.

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in grammar and/or composition.

Students with one or more years of high school Spanish who plan to enroll in Spanish 1

through 25 must take the departmental placement examination. Consult the *Schedule of Classes* or the department office for test dates.

**1. Elementary Spanish.** Discussion, five hours; laboratory, one hour.

**1G. Reading Course for Graduate Students.** Lecture, three hours. Knowledge of Spanish not required. May not be applied toward degree requirements. S/U grading.

**2. Elementary Spanish.** Discussion, five hours; laboratory, one hour. Enforced requisite: course 1.

**2G. Reading Course for Graduate Students.** Lecture, three hours. Enforced requisite: course 1G. May not be applied toward degree requirements. S/U grading.

**3. Elementary Spanish.** Discussion, five hours; laboratory, one hour. Enforced requisite: course 2.

**4. Intermediate Spanish.** Discussion, five hours; laboratory, one hour. Enforced requisite: course 3.

**5. Intermediate Spanish.** Discussion, five hours; laboratory, one hour. Enforced requisite: course 4.

**6. Intermediate Spanish.** Discussion, five hours. Enforced requisite: course 5. Review and analysis of the more sophisticated and complex syntactic structures of Spanish, verb morphology, and lexical discrimination. Students who have completed course 5 with a grade of A – or better may enroll directly in course 25.

**6A. Intermediate Spanish for Spanish Speakers.** Preparation: proficiency as determined by placement test. Concentration on formal aspects of the language (i.e., spelling, punctuation, accentuation, composition, reading, and traditional grammar) in lieu of course 6.

**8A-8B. Spanish Conversation (2 units each).** Discussion, three hours. Course 8A is open to students with credit for course 4 or equivalent. Students who have completed course 3 with a grade of B or better may be admitted.

**9A-9B. Advanced Conversation (2 units each).** Discussion, three hours. Enforced requisite: course 8B.

**25. Advanced Spanish and Composition.** Lecture, three hours. Enforced requisite: course 5. Emphasis on writing grammatically correct, lexically sophisticated, and rhetorically competent expository prose. Course 25 or 25A is requisite to all upper division courses in Spanish.

**25A. Composition for Spanish Speakers.** Lecture, three hours. Enforced requisite: course 5. Practice in reading and writing of Spanish for students with oral proficiency in Spanish (in lieu of course 25).

**M35. Spanish, Portuguese, and Nature of Language.** (Same as Portuguese M35.) Lecture, three hours. Introduction to language study within context of Romance languages, focusing on Spanish and Portuguese. Nature of language: structure, diversity, evolution, social and cultural settings, literary uses. Study of language and its relation to other areas of human knowledge.

**M42. Civilization of Spain and Portugal.** (Same as Portuguese M42.) Required of majors. Conducted in English. Highlights of civilization of Spain and Portugal, with emphasis on the artistic, economic, social, and historical development as background for upper division courses.

**M44. Civilization of Spanish America and Brazil.** (Same as Portuguese M44.) Required of majors. Conducted in English. Highlights of civilization of Spanish America and Brazil, with emphasis on the artistic, economic, social, and historical development as background for upper division courses.

**60A-60B-60C. Hispanic Literatures in Translation.** Lecture, three hours. Class readings and analysis of selected works in translation. Classroom discussion, papers, and examinations in English. **60A.** Spanish Literature; **60B.** Spanish-American Literature; **60C.** *Don Quijote*.

**61A-61B-61C. Hispanic Literatures in Spanish.** Lecture, three hours. Not open for credit to students with credit for corresponding course in 60 series. Class readings and analysis of selected works. Classroom discussion, papers, and examinations in Spanish. **61A.** Spanish Literature; **61B.** Spanish-American Literature; **61C.** *Don Quijote*.

**62A-62B-62C. Hispanic Literatures and Film.** Lecture, three hours; film screenings, two to three hours. Analysis of main aesthetic, cultural, and philosophical questions in the Hispanic world as articulated in literature and film, addressing not only principal currents affecting Hispanic artistic expression but also diverse strategies employed by two distinct modes of representation. **62A.** Spain; **62B.** Spanish America; **62C.** The Chicano Experience.

**88A-88Z. Lower Division Seminars.** Discussion, three hours. Knowledge of Spanish not essential. Variable topics courses designed to explore various themes and issues pertinent to Hispanic literature and culture:

**88A.** Reaching 2001 (Fantasy of Reality and Reality of Fantasy). Introduction to some specific literary strategies employed by writers of the Hispanic world and analysis of formal characteristics that define categories such as surrealism, magical realism, the fantastic, and realism.

### Upper Division Courses

Requisite to all upper division courses is Spanish 25 or equivalent as determined by the placement test.

**100A-100B. Introduction to Study of Spanish Grammar.** Lecture, three hours. Prerequisite: course M35. **100A.** Phonology and Morphology. Analysis of phonemic and morphological systems of Spanish. **100B.** Syntax. Study of syntactical systems of Spanish.

**105. Spanish Composition.** Lecture, three hours. Practice in writing Spanish with appropriate vocabulary, syntactical structures, and stylistic patterns.

**107. The Spanish of Southern California.** Lecture, three hours. Prerequisites: courses M35 and 100A-100B, or consent of instructor. Analysis of pronunciation, word formation, syntax, and lexicon of the Spanish of Southern California, with attention to regional features, social and age levels of speech, and interference from English.

**115. Applied Linguistics.** Lecture, three hours. Prerequisites: courses M35, 100B. Survey of major linguistic problems faced by teachers of Spanish.

**M118A-M118B. History of Portuguese and Spanish.** (Same as Portuguese M118A-M118B.) Lecture, three hours. Prerequisites: courses M35, 100A. Major features of development of Portuguese and Spanish languages from their origins in Vulgar Latin to modern times. **M118A.** Phonology; **M118B.** Morphology and Syntax.

**119A. Introduction to Study of Literature: Prose.** Lecture, three hours. Introduction to study of literary devices, figures of speech, and distinctive stylistic features in prose literature of Spain and Spanish America, particularly in the novel and essay.

**119B. Introduction to Study of Literature: Poetry and Drama.** (Formerly numbered 119B, 119C.) Lecture, three hours. Introduction to study of literary devices, figures of speech, versification, and distinctive stylistic features in the poetry and drama of Spain and Spanish America.

**120A-120D. Literature in the Hispanic World (5 units each).** Lecture, four hours; discussion, one hour. Required of Spanish majors; must be taken in sequence. Historical/cultural survey of Hispanic literature from its beginning in medieval Iberia to contemporary writing in Spain, Latin America, and the U.S. Relationship between fundamental unity and astonishing geographic and cultural diversity. Particular attention to relation between literature and multicultural societies in which it is produced, as well as to individual texts which define or create new artistic possibilities.

**120A.** Hispanic Literature to 1700. Multilingual Iberia: first literary texts in Hispanic dialects. Medieval Castilian literature. America: literature of discovery and conquest. Renaissance literature in Spain and America. Spanish Golden Age. Baroque literature in Spain and America.

**120B.** Hispanic Literature, 1700 to 1898. Requisite: course 120A. The Enlightenment, Spanish nationalism, and Spanish-American nation building. Romanticism in Spain and America. Journalism and *costumbrismo* in Spain and America. Historical narrative and sentimental novel in Spain and America. Regionalism in Spain. National diversity in America: *indigenismo*, gaucho literature, Mexican *corrido*, Afro-Americanism.

**120C.** Hispanic Literature since 1898. Requisites: courses 120A-120B. Unity and divergence. *Modernismo* and Spanish Civil War in Spain and America. Representations of America. Spanish surrealism. American vanguardism. *Franquismo* and after. Mexico and Mexican Revolution. New American narratives, testimony, feminism.

**120D.** Hispanic Literature in the U.S. Requisites: courses 120A-120B-120C. Spanish presence in the Southwest. Ethnic diversity: Spaniards, *criollos*, *mestizos*. Mexican War and Mexican American literature. Literature of the Chicano movement: recovering *mestizo* heritage, feminist consciousness.

**122. Medieval Literature: Prose.** Lecture, three hours. Recommended (but not prerequisite): course 120A. Study of main genres through representative works.

**123. Medieval Literature: Poetry.** Lecture, three hours. Recommended (but not prerequisite): course 120A. Study of main genres through representative works.

**124. Golden Age: Poetry and Drama.** Lecture, three hours. Recommended (but not prerequisite): course 120A. Study, through representative works, of the Golden Age poetry and drama.

**125. Golden Age: Prose.** Lecture, three hours. Recommended (but not prerequisite): course 120A. Study of 16th- and 17th-century prose writing in Spain, with particular emphasis on *Lazarillo de Tormes* and the picaresque tradition.

**127. Golden Age: Don Quijote.** Lecture, three hours. Recommended (but not prerequisite): course 120A. Development of the novel in the Golden Age, with particular reference to *Don Quijote*.

**128. The Enlightenment and Romanticism in Spain.** Lecture, three hours. Recommended (but not prerequisite): course 120B. Study, through representative works, of main manifestations of thought and literature from 1700 to 1850.

**130. Post-Romanticism, Realism, and Naturalism in Spain.** Lecture, three hours. Recommended (but not prerequisite): course 120B. Development of main trends of Spanish literature from 1850 to 1898.

**132. 20th-Century Spanish Prose.** Lecture, three hours. Recommended (but not requisite): course 120C. Study of several representative works of Spanish prose literature since 1898.

**133. 20th-Century Spanish Poetry and Drama.** Lecture, three hours. Recommended (but not requisite): course 120C. Study of several representative works of Spanish poetry and drama since 1898.

**137. Literature of Colonial Spanish America.** Lecture, three hours. Recommended (but not requisite): course 120A. Study of most important genres and authors from the Conquest to 1810.

**139. Romanticism and Realism in Spanish-American Literature.** Lecture, three hours. Recommended (but not requisite): course 120B. Study, through representative literary works, of most important currents of thought and literary trends from 1810 to 1880.

**140. Modernismo.** Lecture, three hours. Recommended (but not requisite): course 120B. Study, through representative works, of principal characteristics of *modernismo* in Spanish-American literature.

**142. 20th-Century Spanish-American Literature: Fiction and the Essay.** Lecture, three hours. Recommended (but not requisite): course 120C. Study, through representative novels, short stories, and essays, of Spanish-American prose literature since 1910.

**143. 20th-Century Spanish-American Literature: Poetry and Drama.** Lecture, three hours. Recommended (but not requisite): course 120C. Study of principal poets, dramatists, and dramatic movements in Spanish-American literature since 1910.

**144. Mexican Literature.** Lecture, three hours. Recommended (but not requisite): course 120C. Study of major movements and authors of Mexican literature.

**M145A-M145B. Introduction to Chicano Literature.** (Formerly numbered M145.) (Same as Chicana and Chicano Studies M145A-M145B.) Lecture, three hours. Prerequisite: course 25 or 25A. Introduction to texts representative of the Chicano literary heritage. Sampling of genres, as well as historical and geographical settings and points of view characteristic of work written by Chicanos during the 20th century. Most required reading is in Spanish. Bilingual and English works are included and discussed. Reading and analysis of a number of important scholarly and critical statements pertaining to characteristics and development of the Chicano literary corpus. **M145A.** Literature to 1960; **M145B.** Literature after 1960.

**M146. Chicano Narrative.** (Same as Chicana and Chicano Studies M146.) Lecture, three hours. Introduction to major narrative genres in Chicana/Chicano literary tradition — *Corrido*, *Semblanza*, chronicle, autobiography, novel, romance, and satire. Emphasis on way in which narrative forms are formed by and address specific social/historical problems.

**M149. Folk Literature of the Hispanic World.** (Same as Folklore M149.) Lecture, three hours. Study of history and present dissemination of principal forms of folk literature throughout the Hispanic countries.

**151A-151B. Women in Hispanic Literature.** Discussion, three hours. Recommended (but not requisite): courses 120A-120B-120C. Study of works by and about women, with emphasis on portrayal of women, women's roles, and myths of womanhood within the Hispanic socio-ideological context. **151A.** Spain; **151B.** Spanish America.

**M161. Film and Literature of the Spanish-Speaking World.** (Same as Comparative Literature M174.) Lecture, three hours. Exploration of perceptions of reality offered by different authors from Spain, Latin America, and the Chicano community. P/NP or letter grading.

**170. Senior Honors Tutorial.** (Formerly numbered 170A, 170B, 170C.) Preparation: completion of required nine upper division major core courses with 3.5 grade-point average. Directed individual research and writing of honors thesis.

**197. Undergraduate Seminar.** Seminar, three hours. Prerequisites: upper division Spanish major, consent of instructor. Limited to 15 students. Variable topics course with readings, discussions, and papers; consult *Schedule of Classes* or department counselor for topic to be offered in a specific term.

**197A. Studies in Hispanic Culture and Civilization.** Lecture, three hours. Required of students preparing for a California State Instructional Credential in Spanish. Advanced course that studies diverse aspects of Hispanic culture, civilization, and history. Classroom discussions, papers, and examinations in Spanish.

**199. Special Studies (2 to 4 units).** Prerequisite: consent of adviser and instructor. Eight units may be applied toward the major requirements.

## Graduate Courses

**M200. Research Resources.** (Same as Portuguese M200.) Lecture, three hours. Identification and use of research resources for graduate students.

**M201A-M201B. Literary Theory and Criticism.** (Same as Portuguese M201A-M201B.) Lecture, three hours. Definition, discussion, and application of main currents of contemporary literary theory and criticism. In Progress grading.

**202A. Phonology.** Lecture, three hours. Study of the sound structure of Spanish and main phonological processes that map underlying representations into surface representations. Bearing of phonological theory on study of meter.

**202B. Morphology.** Lecture, three hours. Study of derivational and inflectional word formation processes and their interaction with syntactic structure.

**204A-204B. Generative Syntax and Semantics.** Lecture, three hours. Study of syntactic structure of Spanish and relation between underlying representations and logical form within a principles-and-parameters framework. Bearing of syntactic and semantic structure on study of literature.

**M205A-M205B. Development of Portuguese and Spanish Languages.** (Same as Portuguese M205A-M205B.) Lecture, three hours. Intensive study of historical development of Portuguese and Spanish languages from their origin in spoken Latin.

**209. Dialectology.** Lecture, three hours. Major dialect areas of peninsular and American Spanish, with distinguishing features of each. Influence and contribution of cultural and historical features, including indigenous languages, to their formation.

**221. Medieval Lyric Poetry.** Lecture, three hours. Readings of and lectures on Spanish lyric poetry from the beginning to 1500.

**222. Medieval Epic and Narrative Poetry.** Lecture, three hours. Readings of and lectures on Spanish epic and narrative poetry from the beginning to 1500.

**223. Medieval Prose.** Lecture, three hours. Readings of and lectures on Spanish prose from the beginning to 1500.

**224. Poetry of the Golden Age.** Lecture, three hours. Readings of and lectures on Spanish poetry from 1500 to 1700.

**225. Drama of the Golden Age.** Lecture, three hours. Readings of and lectures on the *comedia*.

**226. Prose of the Golden Age.** Lecture, three hours. Readings of and lectures on fictional, didactic, religious, and historical writings.

**227. Cervantes.** Lecture, three hours. Readings of and lectures on works of Cervantes.

**228. The Enlightenment.** Lecture, three hours. Readings of and lectures on representative works of the period.

**229. Romanticism.** Lecture, three hours. Readings of and lectures on representative works of the period.

**230. Realism and Naturalism.** Lecture, three hours. Readings of and lectures on literary works, principally novels, from 1850 to 1898.

**231. Major Currents in Modern Spanish Literature.** Lecture, three hours. Introduction to major literary currents, including symbolism, Parnassianism, and the Generation of 1898.

**232. Spanish Prose Literature from 1898 to the Civil War.** Lecture, three hours. Readings of and lectures on representative essays, novels, and short stories of the period.

**233. Spanish Prose Literature after the Civil War.** Lecture, three hours. Readings of and lectures on representative essays, novels, and short stories of the period.

**234. Spanish Drama and Poetry from 1898 to the Civil War.** Lecture, three hours. Readings of and lectures on representative plays and poems.

**235. Spanish Drama and Poetry after the Civil War.** Lecture, three hours. Readings of and lectures on representative plays and poems of the period.

**237. Literature of the Spanish Conquest.** Lecture, three hours. Readings of and lectures on chronicles, poems, and indigenous accounts of the Spanish Conquest.

**238. Baroque, Enlightenment, and Neoclassicism in Colonial Literature.** Lecture, three hours. Readings of and lectures on representative texts.

**239. Romanticism and Realism in Spanish-American Literature.** Lecture, three hours. Intensive study of Romanticism and realism in Spanish-American literature.

**240. Major Currents in Modern Spanish-American Literature.** Lecture, three hours. Study of principal trends in modern Spanish-American literature, particularly *naturalismo* and *modernismo*.

**241A-241B. Contemporary Spanish-American Short Story.** Lecture, three hours. Study of important short story writers from modernism to the present.

**243A-243B. Contemporary Spanish-American Poetry.** Lecture, three hours. Intensive study of important poets of Spanish America from modernism to the present.

**244A-244B. Contemporary Spanish-American Novel.** Lecture, three hours. Study of important novelists from modernism to the present.

**245. Contemporary Spanish-American Essay.** Lecture, three hours. Study of important Spanish-American essayists of the 20th century.

**246. Contemporary Spanish-American Drama.** Lecture, three hours. Study of principal Spanish-American dramatists and theater movements in the 20th century.

**247. Chicano Literature.** Lecture, three hours. Study of major movements and authors of Mexican American literature.

**M249. Folk Literature of the Spanish and Portuguese Worlds.** (Same as Folklore M249 and Portuguese M249.) Lecture, three hours. Intensive study of folk literature of the Spanish and Portuguese cultures as represented in (1) ballad and poetry, (2) narrative and drama, (3) speech.

Seminar courses (M251A through 290) may be taken for a maximum of eight units each with consent of the appropriate guidance committee and with topic change.

**M251A-M251B. Studies in Galegan-Portuguese and Old Spanish.** (Same as Portuguese M251A-M251B.) Lecture, two hours. Study of problems related to historical development of Galegan-Portuguese and Old Spanish.

**256A-256B. Studies in Spanish Linguistics.** Lecture, two hours. Study of problems in analysis and description of the contemporary Spanish language.

**257. Studies in Dialectology.** Discussion, two hours.

**262A-262B. Studies in Medieval Spanish Literature.** Discussion, two hours.

**264A-264B. Studies in Golden Age Spanish Literature.** Discussion, two hours.

**265. Cervantes.** Discussion, two hours.

**270A-270B. Studies in 18th-Century Spanish Literature.** Discussion, two hours.

**271A-271B. Studies in 19th-Century Spanish Literature.** Discussion, two hours.

**272A-272B. Studies in 20th-Century Spanish Literature.** Discussion, two hours.

**277A-277B. Studies in Colonial Spanish-American Literature.** Discussion, two hours.

**278A-278B. Studies in 19th-Century Spanish-American Literature.** Discussion, two hours.

**280A-280B. Studies in Contemporary Spanish-American Literature.** Discussion, two hours.

**281. Studies in Chicano Literature.** Discussion, two hours.

**M286A-M286B. Studies in Hispanic Folk Literature.** (Same as Folklore M286A-M286B.) Lecture, two hours.

**290. Special Topics.** Lecture, two hours. Variable topics; consult *Schedule of Classes* or department counselor for topics to be offered in a specific term.

**310. Teaching Spanish in Elementary School.** Lecture, three hours.

**370. Teaching Spanish in Secondary School.** Lecture, three hours.

**373. Teaching Composition (2 units).** Prerequisites: graduate standing, consent of instructor. Seminar on teaching writing in Spanish language courses. Introduction to composition theory. Instruction and practice in integrating writing into curriculum, setting goals and standards, designing and sequencing course materials, evaluating and commenting on papers. May not be repeated for credit. S/U grading.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**495. Teaching Spanish at College Level.** Prerequisite: graduate standing in department. Basic concepts of modern theories of language and language acquisition which underlie modern methods of second language teaching. S/U grading.

**596. Directed Individual Study or Research (4 to 8 units).** Prerequisite: consent of graduate adviser and chair. Study or research in areas or subjects not offered as regular courses. No more than four units may be applied toward M.A. course requirements.

**597. Preparation for Graduate Examinations (4 to 12 units).** Prerequisites: official acceptance of candidacy by department, consent of graduate adviser. Individual preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be taken only once for each degree examination and only in term that comprehensive or qualifying examinations are to be taken. S/U grading.

**598. Research for M.A. Thesis (4 to 12 units).** Prerequisite: consent of guidance committee. Research in preparation of M.A. thesis. S/U grading.

**599. Research for Ph.D. Dissertation (4 to 8 units).** Limited to students who have passed Ph.D. qualifying examinations. Research for and preparation of Ph.D. dissertation. S/U grading.

## Portuguese

### Lower Division Courses

No credit is allowed for completing a less advanced course after completion of a more advanced course in grammar and/or composition.

**1. Elementary Portuguese.** Discussion, five hours; laboratory, one hour.

**2. Elementary Portuguese.** Discussion, five hours; laboratory, one hour. Enforced requisite: course 1.

**3. Intermediate Portuguese.** Discussion, five hours; laboratory, one hour. Enforced requisite: course 2.

**8A-8B. Portuguese Conversation (2 units each).** Discussion, three hours. Enforced requisite: course 3 (B or better).

**25. Advanced Portuguese.** Enforced requisite: course 3.

**M35. Spanish, Portuguese, and Nature of Language.** (Same as Spanish M35.) Lecture, three hours. Introduction to language study within context of Romance languages, focusing on Spanish and Portuguese. Nature of language: structure, diversity, evolution, social and cultural settings, literary uses. Study of language and its relation to other areas of human knowledge.

**40A-40B. Portuguese, Brazilian, and African Literature in Translation.** Lecture, three hours. Reading and discussion of selected works in translation. Papers and examinations in English. **40A.** Portuguese and Portuguese-African Literature; **40B.** Brazilian Literature.

**M42. Civilization of Spain and Portugal.** (Same as Spanish M42.) Required of majors. Conducted in English. Highlights of civilization of Spain and Portugal, with emphasis on the artistic, economic, social, and historical development as background for upper division courses.

**M44. Civilization of Spanish America and Brazil.** (Same as Spanish M44.) Required of majors. Conducted in English. Highlights of civilization of Spanish America and Brazil, with emphasis on the artistic, economic, social, and historical development as background for upper division courses.

**46. Brazilian Culture and Civilization.** Lecture, three hours. Conducted in English. Topical analysis of cultural history of Brazil, with emphasis on physical environment, principal historical, social, and economic development, and artistic manifestations. P/NP or letter grading.

## Upper Division Courses

Requisite to all upper division courses is Portuguese 25 or consent of instructor.

**100A. Phonology and Morphology.** Lecture, three hours. Analysis of phonetic, phonemic, and morphological systems of Portuguese.

**100B. Syntax.** Lecture, three hours. Review of patterns of the Portuguese language.

**102A-102B. Intensive Portuguese.** Prerequisite: foreign language experience (other than Portuguese) or consent of instructor. Development of speaking and reading skills equivalent to those covered in three terms of the traditional pattern and to meet special needs of advanced undergraduate and graduate students.

**103. Language and Popular Culture.** (Formerly numbered 101A.) Lecture, three hours. Requisite: course 102B. Development of speaking, reading, and writing skills. Structured in thematic units, with songs, videos, and specific vocabulary emphasizing questions of Brazilian cultural identity.

**105. Advanced Composition and Style.** Practice in writing Portuguese with appropriate vocabulary, syntactical structures, and stylistic patterns.

**M118A-M118B. History of Portuguese and Spanish.** (Same as Spanish M118A-M118B.) Lecture, three hours. Prerequisites: courses M35, 100A. Major features of development of Portuguese and Spanish languages from their origins in Vulgar Latin to modern times. **M118A.** Phonology; **M118B.** Morphology and Syntax.

**120A-120B. Introduction to Portuguese Literature.** Lecture, three hours. Introduction to principal periods, currents, and authors of Portuguese literature.

**C124. Early Portuguese Literature.** Lecture, three hours. Study of main genres of medieval Portuguese and Galician literature through representative works. Concurrently scheduled with course C224. P/NP or letter grading.

**C125. Camões and the Portuguese Renaissance.** Lecture, three hours. Study of main genres of Renaissance Portuguese literature, with particular emphasis on the works of Luis de Camões. Concurrently scheduled with course C225. P/NP or letter grading.

**C126. Baroque and Neoclassical Portuguese Literature.** Lecture, three hours. Study of main genres of baroque and neoclassical Portuguese literature through representative works. May be concurrently scheduled with course C226.

**C127. 19th-Century Portuguese Literature.** Lecture, three hours. Study of principal features through representative works. May be repeated for credit with topic change. Concurrently scheduled with course C227. P/NP or letter grading.

**C128. Post-Romanticism and Naturalism in Portuguese Literature.** Lecture, three hours. Study of principal features through representative works. May be concurrently scheduled with course C228.

**C129. 20th-Century Portuguese Literature.** Lecture, three hours. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C229. P/NP or letter grading.

**130A-130B. Brazilian Literature and Identity: Introduction.** Lecture, three hours. Introduction to principal periods, currents, and authors of Brazilian literature.

**C131. Colonial Brazilian Literature and Culture.** Lecture, three hours. Study of most important authors to 1830. May be repeated for credit with topic change. Concurrently scheduled with course C231. P/NP or letter grading.

**C132. 19th-Century Brazilian Literature and Culture.** Lecture, three hours. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C232. P/NP or letter grading.

**C133. Machado de Assis.** (Not the same as course C133 prior to Fall Quarter 1995.) Lecture, three hours. Study of selected works by Joaquim Maria Machado de Assis. Concurrently scheduled with course C233. P/NP or letter grading.

**C134. Brazilian Modernism.** (Not the same as course C134 prior to Fall Quarter 1995.) Lecture, three hours. Study of principal characteristics of Brazilian modernism through representative works. Concurrently scheduled with course C234. P/NP or letter grading.

**C135. 20th-Century Brazilian Literature.** Lecture, three hours. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C235. P/NP or letter grading.

**141. Brazilian Film and Literature.** Lecture, three hours. Conducted in English. Topical analysis of main literary and historical themes of Brazilian culture, through films and literary texts. P/NP or letter grading.

**197. Undergraduate Seminar.** Seminar, three hours. Variable topics course with readings, discussions, and papers; consult *Schedule of Classes* or department counselor for topic to be offered in a specific term.

**199. Special Studies (2 to 4 units).** Prerequisite: consent of adviser and instructor. Eight units may be applied toward the major requirements.

## Graduate Courses

**M200. Research Resources.** (Same as Spanish M200.) Lecture, three hours. Identification and use of research resources for graduate students.

**M201A-M201B. Literary Theory and Criticism.** (Same as Spanish M201A-M201B.) Lecture, three hours. Definition, discussion, and application of main currents of contemporary literary theory and criticism. In Progress grading.

**202. Synchronic Morphology and Phonology.** Lecture, three hours. Study of theoretical synchronic linguistics as applied to Portuguese.

**204A-204B. Generative Grammar.** Lecture, three hours. Prerequisite: consent of instructor. Course 204A or consent of instructor is prerequisite to 204B. Generative approach to the Portuguese language, with some consideration of bearing of syntax, semiology, and phonology on style, metaphor, and meter.

**M205A-M205B. Development of Portuguese and Spanish Languages.** (Same as Spanish M205A-M205B.) Lecture, three hours. Intensive study of historical development of Portuguese and Spanish languages from their origin in spoken Latin.

**C224. Early Portuguese Literature.** Lecture, three hours. Study of main genres of medieval Portuguese and Galician literature through representative works. Concurrently scheduled with course C124. S/U or letter grading.

**C225. Camões and the Portuguese Renaissance.** Lecture, three hours. Study of main genres of Renaissance Portuguese literature, with particular emphasis on works of Luis de Camões. Concurrently scheduled with course C125. S/U or letter grading.

**C226. Baroque and Neoclassical Portuguese Literature.** Lecture, three hours. Study of main genres of baroque and neoclassical Portuguese literature through representative works. May be concurrently scheduled with course C126.

**C227. 19th-Century Portuguese Literature.** Lecture, three hours. Study of principal features through representative works. May be repeated for credit with topic change. Concurrently scheduled with course C127. S/U or letter grading.

**C228. Post-Romanticism and Naturalism in Portuguese Literature.** Lecture, three hours. Study of principal features through representative works. May be concurrently scheduled with course C128.

**C229. 20th-Century Portuguese Literature.** Lecture, three hours. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C129. S/U or letter grading.

**C231. Colonial Brazilian Literature and Culture.** Lecture, three hours. Study of most important authors to 1830. May be repeated for credit with topic change. Concurrently scheduled with course C131. S/U or letter grading.

**C232. 19th-Century Brazilian Literature and Culture.** Lecture, three hours. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C132. S/U or letter grading.

**C233. Machado de Assis.** (Not the same as course C233 prior to Fall Quarter 1995.) Lecture, three hours. Study of selected works by Joaquim Maria Machado de Assis. Concurrently scheduled with course C133. S/U or letter grading.

**C234. Brazilian Modernism.** (Not the same as course C234 prior to Fall Quarter 1995.) Lecture, three hours. Study of principal characteristics of Brazilian modernism through representative works. Concurrently scheduled with course C134. S/U or letter grading.

**C235. 20th-Century Brazilian Literature.** Lecture, three hours. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C135. S/U or letter grading.

**M249. Folk Literature of the Spanish and Portuguese Worlds.** (Same as Folklore M249 and Spanish M249.) Lecture, three hours. Intensive study of folk literature of the Spanish and Portuguese cultures as represented in (1) ballad and poetry, (2) narrative and drama, (3) speech.

**M251A-M251B. Studies in Galegan-Portuguese and Old Spanish.** (Same as Spanish M251A-M251B.) Lecture, two hours. Study of problems related to historical development of Galegan-Portuguese and Old Spanish.

**252. Studies in Early Portuguese Literature.** Discussion, two hours.

**253. Studies in Modern Portuguese Literature.** Discussion, two hours.

**254. Studies in Early Brazilian Literature.** Discussion, two hours.

**255. Studies in Modern Brazilian Literature.** Discussion, two hours.

**256A-256B. Studies in Portuguese Linguistics.** Lecture, two hours. Study of problems in analysis and description of the contemporary Portuguese language.

**290. Special Topics.** Discussion, two hours. Prerequisite: graduate standing or consent of instructor. Consult *Schedule of Classes* or department counselor for topics to be offered in a specific term. S/U or letter grading.

**370. Teaching Portuguese in Secondary School.** For future teachers in this field.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**596. Directed Individual Study or Research (4 to 8 units).** Prerequisite: consent of graduate adviser and chair. Study or research in areas or subjects not offered as regular courses. No more than eight units may be applied toward M.A. course requirements.

**597. Preparation for Graduate Examinations (4 to 12 units).** Prerequisites: official acceptance of candidacy by department, consent of graduate adviser. Individual preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be taken only once for each degree examination and only in term that comprehensive or qualifying examinations are to be taken. S/U grading.

**598. Research for M.A. Thesis (4 to 12 units).** Prerequisite: consent of guidance committee. Research in preparation of M.A. thesis. S/U grading.

**599. Research for Ph.D. Dissertation (4 to 8 units).** Limited to students who have passed Ph.D. qualifying examinations. Research for and preparation of Ph.D. dissertation. S/U grading.

### Professor

Neil M. Malamuth, Ph.D. (*Communication Studies*)

### Professors Emeriti

Donald E. Hargis, Ph.D.  
Charles W. Lomas, Ph.D.  
Ralph Richardson, Ph.D.

### Associate Professor

Paul I. Rosenthal, Ph.D. (*Communication Studies*)

### Lecturers

Dee Bridgewater, Ph.D.  
Stephen A. Doyle, M.A.  
Marde S. Gregory, M.A., *Senior*  
Thomas E. Miller, M.A.  
Sonya H. Packer, M.A.

## Scope and Objectives

There is no major in speech; however, several undergraduate courses are offered for interested students.

## Speech

### Lower Division Courses

**1. Principles of Oral Communication.** Preparation: satisfaction of Subject A requirement. Theory and practice of informal public speaking, including selection of content, organization of ideas, language, and delivery; practice in extemporaneous and manuscript speaking; training in critical analysis through reading and listening to contemporary speeches.

**2. Public Speaking and Discussion.** Enforced requisite: course 1. Continuation of course 1, with special emphasis on group discussions, panels, symposia, debates, and formal public speaking. Critical analysis of speeches in both contemporary and historical settings.

## Upper Division Courses

**107. Principles of Argumentation.** Analysis of propositions, tests of evidence, briefing. Study of hindrances to clear thinking, ambiguity of terms, and prejudices. Critical analysis of selected argumentative speeches.

**190A-190B. Forensics (2 units each).** Prerequisite: consent of instructor. May be repeated once for credit.

**191. Analysis and Briefing (2 units).** Intensive study of selected political or social issues; preparation of bibliography; analysis and evaluation of issues and arguments. May be repeated once for credit.

**197. Proseminar: Rhetoric.** Prerequisite: senior standing or consent of instructor. Variable topics course involving intensive study of discourse associated with a single major issue or personality.

**199. Special Studies (2 to 4 units).** Prerequisites: senior standing, consent of instructor.

## STUDY OF RELIGION

### Chairs

E. Carmack Holmes, M.D. (*William P. Longmire, Jr., Professor of Surgery*), *Executive Chair*  
James B. Atkinson, M.D., *Vice Chair for Clinical Affairs*  
Achilles Demetrios, M.D., *Vice Chair, Cedars-Sinai*  
Edward H. Livingston, M.D., *Vice Chair, Wadsworth VA*  
Howard A. Reber, M.D., *Vice Chair, Sepulveda VA*  
Bruce E. Stabile, M.D., *Vice Chair, Harbor-UCLA*  
Jesse E. Thompson, Jr., M.D., *Vice Chair, Olive View-UCLA*

## Scope and Objectives

The Department of Surgery instructs medical students during all four years of medical school. Students are expected to obtain broad knowledge of diseases treated by surgical means and to understand the pathology of these conditions, the therapy that may be applied, and the anticipated results of treatment. They are also encouraged to learn about the impact of surgical illness on the patient and the patient's family and environment.

Third-year students participate in one 12-week core clerkship in clinical surgery and are assigned to rotations at a combination of UCLA, Harbor-UCLA, West Los Angeles VA, and Olive View-UCLA Medical Centers. Each facility has a special orientation depending on the patient population and the individual staff, in addition to the initial surgery clerkship orientation.

During the fourth year students may elect to take additional clinical rotations with increasing responsibilities. Additional in-depth elective courses are offered in collaboration with other departments.

For further details on the Department of Surgery and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

## Surgery

### Upper Division Course

**199. Special Studies (2 to 8 units).** Prerequisite: consent of instructor. Individual projects carried out under direction of a faculty member. Special studies in surgery, with appropriate objectives, readings, laboratory work, or other assignments designed for proper training of students. P/NP or letter grading.

John H. Schumann, Ed.D., *Chair*

### Professors

Roger W. Andersen, Ph.D.  
Lyle Bachman, Ph.D.  
Marianne Celce-Murcia, Ph.D.  
Charles Goodwin, Ph.D.  
Elinor Ochs, Ph.D.  
John H. Schumann, Ed.D.

### Professors Emeriti

Russell N. Campbell, Ph.D.  
Evelyn R. Hatch, Ph.D.  
Earl J. Rand, Ph.D.

### Assistant Professor

Asif Agha, Ph.D.

### Lecturers

Donna Brinton, M.A.  
Janet Goodwin, M.A.  
Christine Holten, M.A.  
Linda Jensen, M.A.

## Scope and Objectives

The M.A. program in Applied Linguistics and Teaching English as a Second Language (TESL) is intended primarily for individuals who wish to pursue a career in applied linguistics research. It is designed to provide both breadth of knowledge in several areas of applied linguistics and the specialized knowledge and skills needed to plan and conduct research in one area.

The program is a two-year course of graduate study leading to a Master of Arts degree. The orientation of the program is toward research, and a thesis is required. The first year is designed to provide students with a fundamental understanding of the principles, issues, problems, and approaches to research in each of three areas within the discipline: second language acquisition, assessment, and discourse analysis. It is expected that during the first year students identify one of these areas for specialization and begin consulting with a faculty member about areas of possible thesis research. During the second year students are expected to complete advanced courses in their selected area of specialization and to complete their thesis research.

In addition, the Department of Teaching English as a Second Language and Applied Linguistics and the Department of Linguistics offer an interdepartmental degree program leading to a Ph.D. in Applied Linguistics. For information, write to the Applied Linguistics Program, 3300 Rolfe Hall, UCLA, Los Angeles, CA 90024-1531. (Also see Applied Linguistics earlier in this section of the catalog.)

A limited number of teaching assistantships are available to qualified M.A. and Ph.D. students. For information and applications, write to the Academic Coordinator, ESL Service Courses, 3310 Rolfe Hall, UCLA, Los Angeles, CA 90024-1531.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Applied Linguistics and Teaching English as a Second Language

### Master's Degree

#### Admission

Students normally apply for the Master of Arts in Applied Linguistics and Teaching English as a Second Language if they desire advanced training in the field. Because of the sequential nature of courses given during the first year, students are admitted only for Fall Quarter. To be admitted to the M.A. program, U.S. citizens

and students from other countries must have the equivalent of an American bachelor's degree. Applicants must also have taken the equivalent of Linguistics 120A and Linguistics 120B (or make them up as deficiency courses).

After admission, students must maintain a grade point average of at least B (3.0). A GPA of 3.25 (B+) is a prerequisite for entering the second year of the M.A. program and must be maintained throughout the second year.

Applications for admission may be obtained from the graduate adviser. The program requires three letters of recommendation in support of the application. Students are requested to submit letters of recommendation directly to the graduate adviser, Department of Teaching English as a Second Language and Applied Linguistics, UCLA, 3300 Rolfe Hall, Box 951531, Los Angeles, CA 90095-1531. Since admission is limited to approximately 20 students per year, it is important that completed applications and supporting papers be submitted by December 15.

The admissions committee screens all applications using the following criteria: grade point average (must be 3.0 or better), Graduate Record Examination (GRE) scores, Test of English as a Foreign Language (TOEFL) examination for international applicants whose native language is not English, a relevant research paper, letters of recommendation, and a statement of purpose. A personal interview is not required for admission. The statement of purpose should contain the following information: (1) reasons for wishing to study Applied Linguistics at UCLA; (2) area of Applied Linguistics the applicant may want to specialize and do research, reasons for this interest, qualifications and professional experience relevant to doing research in this area; and (3) knowledge of other languages, dialects or cultures.

International students who hold a bachelor's degree or higher from a university in a country where the official language is English and in which English is the medium of instruction, or who have completed at least two years of full-time study at such an institution, are exempt from the Test of English as Foreign Language (TOEFL) and the UCLA English as a Second Language Placement (ESLPE). All other applicants must take the TOEFL prior to arrival at UCLA, submitting the score as part of the application process. These students must also take the ESLPE upon arrival at UCLA. Depending on the results of this examination, students may be required to take English as a Second Language courses to improve their command of academic English.

### Areas of Study

Three areas of specialization in Applied Linguistics and Teaching English as a Second Language are available: second language acquisition, assessment, and discourse analysis.

### Second Language Acquisition

Research in this area focuses predominantly on second language processes, which include research on (1) interlanguage systems; (2) underlying cognitive mechanisms that account for these systems; (3) the social, affective, and neurobiological factors that influence second language development, and; (4) the effect of instruction on the process. Additional areas of inquiry include the relationship between first and second language acquisition, the effect of first language transfer, the interface between various linguistic theories and second language acquisition, and the comparisons between native and nonnative linguistic systems and how speakers use them in natural discourse.

### Language Assessment

Language assessment is an area of Applied Linguistics that is concerned with the empirical investigation of theoretical questions on the one hand, and with providing useful tools for assessment on the other. Language testing research has as its goals the formulation and empirical investigation of theories of language use in its widest sense. Specialization in the area of language assessment enables students to acquire an understanding of the conceptual foundations for language testing, the goals of language testing research and language test development, and current issues and problems in language testing. Students receive training in the development of language tests, the analysis of test results, and the interpretation and use of test results, enabling them to design and conduct research into theoretical questions in language testing.

### Discourse Analysis

Discourse Analysis is a broad area of research concerned with how language users produce and interpret language in context. Discourse analysts study the linguistic structure of speech acts, conversational sequences, speech activities, oral and literate registers, and stance marking, among other constructions, and seek to relate these constructions to social and cultural norms, preferences, and expectations. The field articulates how lexicogrammar and discourse systematically vary across social situations and at the same time help to define those situations. Analysis is conducted primarily through databases or corpus-based research, supplemented by other methods as appropriate (e.g., observation, elicitation, introspection). Analysts attend to the form, meaning, and function of language whether they begin with discourse-level segments and work down to forms or begin with forms and work up to the discourse-level.

Discourse analysis may be carried out as an end in itself or as a tool contributing to research in language acquisition or language assessment

### Course Requirements

A total of 10 courses is required for the M.A. degree, including a minimum of seven 200-series courses. Nine of these courses are applied toward the University's nine-course minimum for the master's degree. A total of eight units of 500-series courses may be applied toward the 10 courses required by the department for the M.A.; however, only four of those units may be used to fulfill the University's nine-course minimum requirement for the degree. In addition, those students lacking a significant foreign language background are required to complete two additional foreign language electives.

*Prerequisites:* Introductory course in phonetics, phonology, and syntax equivalent to courses taught at UCLA (Linguistics 103, 120A, 120B.). A minimum of two quarters of a foreign language.

### First-Year Curriculum

The typical course of study for the first year of the M.A. program is as follows:

*Fall Quarter:* Teaching English as a Second Language and Applied Linguistics 204, 206, one additional course.

*Winter Quarter:* Teaching English as a Second Language and Applied Linguistics 201, two additional courses.

*Spring Quarter:* Teaching English as a Second Language and Applied Linguistics 202, two additional courses.

Five foundation courses (Applied Linguistics 200, 202, 204, 206, 210) are required. Choice of additional coursework in the first year is flexible and is to be determined in conjunction with the faculty mentor and graduate adviser. Those students lacking the prerequisite linguistics courses and foreign language background are expected to take these courses within their first two quarters.

Students wishing to obtain a certificate in Teaching English as a Second Language or desire advanced language education training in order to serve as teaching assistants might choose to take certain professional development electives. Students coming to the program from fields other than linguistics may need to take additional courses in the nature of language and language analysis, in order to better prepare themselves for advanced study in one of the three areas of specialization offered in this program. Exceptions to the above requirements are made only after consultation with the faculty mentor and graduate adviser.

### Second-Year Curriculum

The typical course of study for the second year of the M.A. program is as follows:

*Fall Quarter:* Teaching English as a Second Language and Applied Linguistics 200, two guided electives.

*Winter Quarter:* Teaching English as a Second Language and Applied Linguistics 598, two guided electives.

*Spring Quarter:* Teaching English as a Second Language and Applied Linguistics 400, 598.

During the second year, students complete their specialization and elective course requirements and work on their thesis. The four elective courses are to be chosen in consultation with the student's faculty adviser/mentor from courses in the department. Two of these electives must be 200-series courses in the student's area of specialization, beyond the foundation courses. In order to enhance an interdisciplinary perspective, students are also encouraged to take relevant electives in other departments, such as anthropology, education, linguistics, neuroscience, psychology, and sociology.

At the beginning of the fourth quarter, each student must enroll in Teaching English as a Second Language and Applied Linguistics 200. By the end of the fourth quarter the thesis proposal must be approved by the thesis committee and submitted to the department chair. Once students complete the thesis proposal, they enroll in Teaching English as a Second Language and Applied Linguistics 598, which is conducted as an independent tutorial with the master's thesis committee chair as mentor until the thesis is completed, typically the end of the second year. Students may only apply course 598 once towards the 10-course requirement.

Teaching English as a Second Language and Applied Linguistics 400 is a seminar in which Applied Linguistics and Teaching English as a Second Language M.A. candidates present and defend the results of their thesis research. Enrollment is required in the Spring Quarter but does not count as one of the 10 courses required for the M.A. degree.

### Teaching English as a Second Language Certificate

Successful completion of the following courses, by graduate students enrolled in degree programs, qualifies students for a Teaching English as a Second Language Certificate, which is not a California State Teaching Credential: Linguistics 20; Teaching English as a Second Language and Applied Linguistics 202 or 220 or 230 or 231; 210; C211/C106 or C212/C107 or C217/C109; C213/C103 or Linguistics 103; C216/C122; 218; and two quarters of a foreign language.

### Comprehensive Examination

None.

### Thesis Plan

The culmination of the mentoring relationship during the M.A. degree is the master's thesis, which is based on research that each student plans and conducts under the supervision of a faculty mentor. The master's thesis is a substantial research report, which could provide the basis for a journal article. During the fourth quarter, each student must enroll in Teaching English as a Second Language and Applied

Linguistics 598. In this course, the student prepares a thesis proposal and forms, in collaboration with a faculty mentor, a thesis committee, which consists of three members of the Academic Senate, at least two of whom must be from the department. By the end of the fourth quarter the thesis proposal must be approved by the thesis committee and submitted to the department chair.

## Teaching English as a Second Language

### Master's Degree

#### Admission

Students normally apply for the M.A. in Teaching English as a Second Language if they desire advanced training in the field. Because of the sequential nature of courses given during the first year, students are admitted only at the beginning of Fall Quarter. To be admitted to the M.A. program, U.S. citizens and students from other countries must have the equivalent of an American bachelor's degree.

After admission, students must maintain a grade-point average of at least B (3.0). A GPA of 3.25 (B+) is required of students entering the second year of the M.A. program and must be maintained throughout the second year.

Applications for admission may be obtained from the graduate adviser. The program requires three letters of recommendation in support of the application. Applicants are requested to submit the letters of recommendation directly to the graduate adviser in the department. Since admission is limited to approximately 25 students per year, it is important that completed applications and supporting papers be submitted by January 8.

The admissions committee screens all applications, using the following criteria: grade-point average (must be 3.0 or better); Graduate Record Examination (GRE) scores; Test of English as a Foreign Language (TOEFL) scores for international applicants whose native language is not English; a relevant research paper; letters of recommendation; and a statement of purpose. A personal interview is not required for admission. The statement of purpose should contain the following information: (1) reasons for wishing to study Teaching English as a Second Language at UCLA; (2) special qualifications as a researcher or a teacher; (3) knowledge of languages other than English; and (4) knowledge of other cultures.

#### Areas of Study

Consult the department.

#### Course Requirements

*Prerequisite.* Linguistics 20 or its equivalent.

#### First-Year Curriculum

The typical course of study for the first year of the M.A. program is as follows:

*Fall Quarter:* Teaching English as a Second Language and Applied Linguistics 210, 265, foreign language requirement or elective (course depends on language requirement plan).

*Winter Quarter:* Teaching English as a Second Language and Applied Linguistics C216 or C122, 220 or 229 or 231, foreign language requirement or elective (course depends on language requirement plan).

*Spring Quarter:* Teaching English as a Second Language and Applied Linguistics C211 or C106, or C212 or C107, or C217 or C109, or 218, Linguistics 103 or Teaching English as a Second Language and Applied Linguistics C213 or C103.

Exceptions to the above requirements are made only after consultation with the graduate adviser.

Of the nine courses required the first year, at least seven must be in Teaching English as a Second Language and Applied Linguistics, English, linguistics, or structure of language courses in language departments.

Successful completion of the above courses qualifies students for a Teaching English as a Second Language Certificate, which is not a California State Instructional Credential.

#### Second-Year Curriculum

A total of 14 courses is required for the M.A. degree, including a minimum of four 200-series courses. Four of the nine courses taken during the first year (usually Teaching English as a Second Language and Applied Linguistics C216 or C122, 220 or 229 or 231, 265, and Linguistics 103 or Teaching English as a Second Language and Applied Linguistics C103 or C213) and, in special cases, two of the electives (100 or 200 series only) may be applied toward the University's nine-course minimum requirement for master's degrees. This leaves five courses to be completed in consultation with the graduate adviser during the second year.

Once the thesis proposal in course 598 is completed, the student continues to enroll in this course until the thesis is completed, typically the end of the second year. Only one 598 course may be applied toward the 14-course requirement.

A total of eight units of 500-series courses may be applied toward the 14 courses required for the degree; however, only four units may be used to fulfill the Graduate Division minimum requirement of five graduate-level courses.

Teaching English as a Second Language and Applied Linguistics 400 is a seminar in which M.A. candidates present and defend the results of their thesis research. Enrollment is required in the Spring Quarter but does not count as one of the 14 courses required for the M.A. degree.

The electives taken during the second year should be selected, in consultation with the

faculty M.A. adviser and the chair of the thesis committee, as a sequence of related courses relevant to the student's thesis topic. Any changes in the program must be approved by both the committee chair and the M.A. adviser.

### Comprehensive Examination Plan

None.

### Thesis Plan

By the end of the fourth quarter, a thesis proposal, signed by two faculty members, is submitted to the faculty. At this time, plans for the thesis are approved and the thesis committee is established. An outside member is required.

## Teaching English as a Second Language and Applied Linguistics

### Upper Division Courses

**100. Discourse and Society.** Lecture, four hours; discussion, two hours. Important contemporary perspectives for study of language in its social and cultural matrix. Topics include conversational organization, narrative, repair and grammatical organization, language in cultural settings, language socialization, and language impairment and institutional discourse. Focus on analysis of audio and video recordings of talk in a variety of natural settings. P/NP or letter grading.

**101. Introduction to Language Learning and Language Teaching.** Lecture, two hours; discussion, two hours. Prerequisite: Linguistics 1 or consent of instructor. Exploration of skills and conditions involved in successful second and foreign language learning; application of this knowledge in development of framework for teaching second and foreign languages. P/NP or letter grading.

**C103. Phonetics for Language Education.** (Formerly numbered 103.) Requisite: Linguistics 20. Examination of phonological structure of contemporary American English, with emphasis on appropriate teaching techniques in ESL/EFL settings, including critical examination of classroom materials and overview of methods of evaluating student pronunciation. Concurrently scheduled with course C213. P/NP or letter grading.

**C106. Writing for Language Education.** (Formerly numbered 106.) Survey of important theoretical and methodological issues related to second language written discourse and composition for second language writers, including critical examination of classroom research and overview of issues in evaluating and responding to written text. Concurrently scheduled with course C211. P/NP or letter grading.

**C107. Reading in Language Education.** (Formerly numbered 107.) Survey of important theoretical and methodological issues related to second language reading, including critical examination of reading research and evaluation of research paradigms and classroom materials. Concurrently scheduled with course C212. P/NP or letter grading.

**C109. Literature in Language Education.** (Formerly numbered 109.) Survey of important theoretical and methodological issues related to teaching literature to students in ESL/EFL settings and examination of appropriate classroom materials. Strong emphasis on cultural basis for literature. Concurrently scheduled with course C217. P/NP or letter grading.

**C122. Structure of Present-Day English.** (Formerly numbered 122.) Lecture, six hours. Prerequisite: Linguistics 20 or consent of instructor. Survey of grammatical structures of English. Aims to provide insights from discourse analysis and a variety of approaches to grammatical analysis, including error analysis and remediation techniques. May be concurrently scheduled with course C216.

**M189. Metaphor and Literal Speech.** (Formerly numbered 189.) (Same as Philosophy M173.) Lecture, three hours; discussion, one hour; outside study, eight hours. Prerequisite: Linguistics 1 or equivalent or consent of instructor. Use of interdisciplinary perspective to examine systematicity of form and function peculiar to human language that underlies dichotomy between (1) neutral or literal capacity of language and (2) metaphoric capacity. P/NP or letter grading.

### Graduate Courses

All graduate courses are open to qualified graduate students from other departments with consent of department.

**200. Research in Applied Linguistics.** Requisites: courses 201, 202, 204, 206. Within context of a current research area in applied linguistics (language assessment, language acquisition, discourse/functional grammar), all M.A. students prepare and submit viable research proposal for M.A. thesis.

**201. Functional Foundations of Language.** Requisite: Linguistics 20. Introduction to analysis and description of form, meaning, and function of structures (morphological and syntactic), lexical items, and linguistic features of discourse. Exploration of variety of approaches integrating form, meaning, and function.

**202. Foundations of Language Acquisition.** Requisite: Linguistics 20. Introduction to theoretical and empirical research in language acquisition and second language acquisition. Linguistic nature of learners' interlanguage systems and underlying cognitive mechanisms posited to explain them, as well as various social, affective, and neurobiological factors which affect ultimate success of learner.

**204. Foundations of Language Assessment.** Requisite: Linguistics 20. Conceptual foundations of language assessment, including nature of measurement, nature of language ability, uses of language assessment in research, types and characteristics of assessment methods, reliability, and validity. Current issues and problems in language assessment.

**206. Social Foundations of Language.** Requisite: Linguistics 20. Basic grounding in sociolinguistic theory and methodology. Introduction to current issues in study of situated behavior, including varied ways scholars visualize relation between language and social context.

**210. Theories of Language Education and Learning.** Requisite: Linguistics 20. Survey of theory and practice in teaching of second languages, including (1) current and historical views of second language instruction, (2) overview of first language acquisition and comparison of second language acquisition, (3) survey of factors which affect second language acquisition process, (4) presentation of language learning and teaching models. S/U or letter grading.

**C211. Writing for Language Education.** Survey of important theoretical and methodological issues related to second language written discourse and composition for second language writers, including critical examination of classroom research and overview of issues in evaluating and responding to written text. Concurrently scheduled with course C106. Additional assignments required of graduate students. S/U or letter grading.

**C212. Reading in Language Education.** Survey of important theoretical and methodological issues related to second language reading, including critical examination of reading research and evaluation of research paradigms and classroom materials. Concurrently scheduled with course C107. Additional assignments required of graduate students. S/U or letter grading.

**C213. Phonetics for Language Education.** Requisite: Linguistics 20. Examination of phonological structure of contemporary American English, with emphasis on appropriate teaching techniques in ESL/EFL settings, including critical examination of classroom materials and overview of methods of evaluating student pronunciation. Concurrently scheduled with course C103. Additional assignments required of graduate students. S/U or letter grading.

**214. Materials Development for Language Education.** (Formerly numbered 220.) Preparation: at least two years of second language instruction experience. Requisite: course 210. Planning and preparation of an original set of language teaching materials geared to needs of a specified group of learners. Revisions of first drafts and evaluation of one's own work and that of one's peers. Introduction to process of publishing language teaching materials.

**215. Media for Language Education.** (Formerly numbered 221.) Requisite: course 210. Rationale and pedagogical application for using media equipment and materials in the second language classroom. Training in standard classroom media equipment operation and basic materials preparation and production techniques, focusing on application to second language instruction.

**C216. Structure of Present-Day English.** Lecture, six hours. Prerequisite: Linguistics 20 or consent of instructor. Survey of grammatical structures of English. Aims to provide insights from discourse analysis and a variety of approaches to grammatical analysis, including error analysis and remediation techniques. May be concurrently scheduled with course C122. Additional assignments required of graduate students.

**C217. Literature in Language Education.** Survey of important theoretical and methodological issues related to teaching literature to students in ESL/EFL settings and examination of appropriate classroom materials. Strong emphasis on cultural basis for literature. Concurrently scheduled with course C109. Additional assignments required of graduate students. S/U or letter grading.

**218. Language Teaching Practicum.** Requisites: courses 210, C216. Theoretical and practical concerns regarding second language teaching, with emphasis on fieldwork experiences and grounding of solutions to problems faced in current research in language education and language pedagogy. Project required if taken for letter grade. S/U or letter grading.

**219. Current Issues in Language Education.** (Formerly numbered 229.) Requisite: course 210. Specialized topics in language education of interest to graduate students. Emphasis varies according to current topics of theoretical concern in the field. May be repeated for credit with topic change. S/U or letter grading.

**220. Language Acquisition.** (Formerly numbered 241.) Requisite: course 202. Designed for advanced graduate students (beginning Ph.D. and second-year M.A.). Hands-on project-oriented survey of research on acquisition of both first and second languages from a crosslinguistic and interdisciplinary perspective.

**221. Experiential Seminar: Second Language Learning.** (Formerly numbered 227.) Requisite: course 202. Students learn an uncommonly taught language with use of authentic language materials (video and audio recordings and print materials). Discussion of experience in terms of issues in language learning and language teaching. S/U or letter grading.

**222. Discourse-Centered Language Learning.** (Not the same as course 222 prior to Fall Quarter 1997.) Requisite: course 202. Case-study and project-based research seminar on classroom language learning with authentic discourse input (usually in form of video and audio recordings of natural spoken discourse). Development of theoretical and technical tools for determining what can be learned from such recordings and how this learning might be facilitated, based on current second language acquisition research.

**223. Topics in Psycholinguistics.** (Formerly numbered 260.) Requisite: course 202. Detailed examination of specialized topics in psycholinguistics. Topics vary from year to year and may include language and cognitive science, types and theories of bilingualism, learning theories and their influence on language teaching. May be repeated for credit with topic change.

**224. Language Socialization.** (Formerly numbered 285.) Requisite: course 206. Exploration of process of socialization through language and socialization to use language across the life span, across communities of practice within a single society, and across different ethnic and socioeconomic groups. Ways in which verbal interaction between novices and experts is structured linguistically and culturally.

**229. Current Issues in Language Acquisition.** (Formerly numbered 269.) Requisite: course 202. Designed to explore current issues in language acquisition from both a theoretical and applied research perspective and to provide actual experience in addressing a current topic. Specific topics vary according to trends in the field. May be repeated for credit with topic change.

**230. Advanced Seminar: Interlanguage Analysis.** (Formerly numbered 251.) Requisite: course 220. Analysis of interlanguage from various points of view (e.g., topic-comment structure, tense, aspect, modality, thematic structure of utterances), with aim of understanding how interlanguage is organized. Original research projects.

**231. Crosslinguistic Topics in Language Acquisition.** (Formerly numbered 271.) Requisite: course 220. Advanced seminar on language acquisition in which a particular linguistics topic (e.g., development of tense/aspect, reference, subordination, agreement) is pursued from crosslinguistic and cross-disciplinary perspectives. Focus on language-specific vs. universal (i.e., crosslinguistically valid) mechanisms of language development.

**240. Design and Development of Language Assessment Procedures.** Requisite: course 204. Considerations in design and development of language assessment procedures and major types of assessment procedures for different language abilities. Practical experience in design and construction of assessment procedures. Project required. S/U or letter grading.

**241. Analysis and Use of Language Assessment Data.** Requisite: course 204. Collection, analysis, and use of data from language assessment procedures. Topics include collecting feedback, descriptive statistics, qualitative data reduction techniques, item analysis and approaches to estimation of reliability and to validation of data-based interpretations. Project required. S/U or letter grading.

**242. Experimental Design and Statistics for Applied Linguistics.** (Formerly numbered 209.) Requisite: course 204. Specialized topics of interest to graduate students in applied linguistics, with focus on design and interpretation of research projects in the field. Exploration of issues in both qualitative and quantitative study design, interpretation of findings, and presentation of results. Emphasis varies according to current theoretical methodological trends in the field. Project required. S/U or letter grading.

**249. Current Issues in Language Assessment.** (Formerly numbered 232.) Requisite: course 204. Designed to explore current issues in language assessment from both theoretical and practical perspectives and to provide actual experience in addressing a current issue. Specific topics vary according to trends in the field. May be repeated for credit with topic change. S/U or letter grading.

**250. Advanced Seminar: Language Assessment.** Requisites: courses 204, 241. Designed to cover application of a technical issue such as reliability, validation, criterion-referenced assessment, generalizability theory, item-response theory, or program evaluation to language assessment in depth. Specific topics vary. Project required. May be repeated for credit with topic change. S/U or letter grading.

**258. Assessment Laboratory.** Collaborative coursework, with focus on specific theoretical and applied issues in development of innovative language assessment procedures for use in real-world settings. Specific projects determined by research being conducted by the working group in language assessment. Activities include designing and developing measurement instruments, gathering and analyzing data, and interpreting and reporting results. May be repeated for credit. S/U or letter grading.

**260. Discourse Analysis.** (Formerly numbered 283.) Requisite: course 206. Survey course covering language teaching and discourse analysis; discourse analysis and syntax; planned and unplanned discourse; conversational analysis; analysis of speech events; unequal power discourse; and analysis of classroom discourse.

**263. Crosslinguistic Topics in Functional Grammar I: Typology.** Requisite: course 202. Survey of a particular linguistic area from typological perspective within functional grammar framework. Topics include tense/mood/aspect, nominal reference, word order. May be repeated for credit with topic change.

**264. Crosslinguistic Topics in Functional Grammar II: Discourse.** Requisite: course 263. Crosslinguistic study of discourse function of grammatical devices. Topics include tense/mood/aspect, nominal reference, word order. May be repeated for credit with topic change.

**265. Topics in Functional Grammar.** (Formerly numbered 249.) Requisite: course 201. Specialized topics in functional grammar of interest to graduate students in applied linguistics. Emphasis varies according to current topics of theoretical import in the field, such as voice, nominal reference, and word order. May be repeated for credit with topic change.

**M266. Topics in Semantics and Pragmatics.** (Formerly numbered 266.) (Same as Anthropology M247.) Requisite: course 201. Detailed examination of specialized topics in semantics and pragmatics. Topics vary from year to year and may include metaphor, theories of reference and denotation, honorific speech, evidentiality, reported speech, etc. May be repeated for credit with topic change.

**268. Crosslinguistic Research Laboratory.** (Formerly numbered 286.) Advanced procedures in data analysis in crosslinguistic research, including critical reading of relevant publications. Students must work toward a specific program-relevant product, such as thesis, dissertation proposal, qualifying paper, dissertation, research paper, or grant proposal. May be repeated for credit. S/U or letter grading.

**269. Current Issues in Discourse Analysis.** (Formerly numbered 289.) Requisite: course 206. Specialized topics in discourse analysis of interest to graduate students in applied linguistics. Emphasis varies according to current topics of theoretical and practical concern in the field. May be repeated for credit with topic change.

**M270A-M270B. Ethnographic Methods in Discourse Analysis I, II.** (Same as Anthropology M249A-M249B.) Two-term sequence on ethnographic approaches to recording and analyzing communicative events and practices in their sociocultural context, involving student-initiated fieldwork in a community setting. Emphasis on hands-on activities within theoretical frameworks that consider language as a social and cultural practice. S/U or letter grading.

**M270A.** Devoted to skills related to collecting socially and culturally meaningful data. **M270B.** Requisite: course M270A. Devoted to production of ethnographic analysis, including how to present an analysis in form of a conference talk and how to develop an analysis into a grant or dissertation proposal.

**M270P. Ethnographic Technologies Laboratory I.** (Same as Anthropology M249P.) Corequisite: course M270A or Anthropology M249A. Hands-on mentorship in entering a community, obtaining informed consent, interviewing, note taking, and videorecording verbal interaction. S/U grading.

**M270Q. Ethnographic Technologies Laboratory II.** (Same as Anthropology M249Q.) Corequisite: course M270B or Anthropology M249B. Hands-on mentorship in editing ethnographic video footage, incorporating video frame grabs into transcript and analysis of verbal interaction, writing a grant proposal, and assembling a conference presentation. S/U grading.

**271. Advanced Seminar: Cohesion Analysis of English Structure.** (Formerly numbered 250.) Requisite: course C216. Investigation in depth of selected linguistic features of oral and written texts that go beyond sentence level and thus signal cohesion. Study of structures to determine their function in a variety of English texts representing several discourse types.

**M272. Grammar and Discourse.** (Formerly numbered 272.) (Same as Anthropology M246A.) Requisite: course 201. Survey of grammar- and discourse-based approaches to study of language as meaningful form. Topics include grammatical and indexical categories, referential and social indexicality, relation of syntax to semantics and pragmatics, markedness, universals, cultural and cognitive implications of language structure and use. S/U or letter grading.

**M273. Grammar and Discourse Practicum.** (Formerly numbered 273.) (Same as Anthropology M246B.) Requisite: course M272. Survey of advanced topics in grammar and discourse, including predicates, arguments and grammatical relations, noun phrase categories, case marking, verbal categories, topic marking devices, registers and speech varieties, reported speech, genre and text structure in discourse. Presentation and analysis of data from range of languages. S/U or letter grading.

**274. Advanced Seminar: Contextual Analysis of English Structure.** (Formerly numbered 252.) Requisite: course C216. Examination of selected words and/or structures in oral and written texts to determine when and why they occur. Beginning with frequency and distribution of the form(s), exploration of meaning and function of the form(s).

**278. Discourse Laboratory.** (Formerly numbered 288.) Requisites: courses 206, 260, two other discourse analysis courses. Designed for applied linguistics doctoral students. Advanced procedures in data analysis in the field of discourse analysis, including development of a large-scale research project and critical review of current research. May be repeated for credit. S/U or letter grading.

**291. Current Issues in Applied Linguistics.** Specialized topics in applied linguistics of current relevance in two or more of the following areas: language acquisition, language assessment, and discourse analysis/functional grammar, and of interest to students in applied linguistics and TESL. Emphasis varies according to current topics of theoretical concern in the field. May be repeated for credit with topic change. S/U or letter grading.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**400. TESL Colloquium.** Prerequisite: consent of TESL M.A. adviser. M.A. candidates present and defend results of their thesis research. Required of all candidates but may not be applied toward M.A. degree requirements. Candidates for Ph.D. in Applied Linguistics may also use this course to report on their dissertations. S/U grading.

**495. Training and Supervision of Teaching Assistants (2 units).** Lecture, two or more hours. Corequisite: appointment as a teaching assistant. Orientation, preparation, and supervision of graduate students who have responsibility for teaching ESL courses at UCLA. Syllabus revision and materials preparation. May not be applied toward degree requirements for M.A. or certificate in TESL or Ph.D. in Applied Linguistics. S/U grading.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Directed Individual Study.** Prerequisite: graduate standing. Independent study in an area related to English as a second language. May not be repeated for credit.

**598. M.A. Research and Thesis Preparation (4 to 8 units).** Prerequisite: graduate standing. Survey of research needs and thesis preparation. Includes optional section on experimental design and statistical methods in Fall Quarter. Credit (four units) toward degree is allowed only once, but all M.A. candidates must enroll in course each term they are registered and engaged in thesis preparation. S/U grading.

## English as a Second Language (ESL)

UCLA  
3300B Rolfe Hall  
Box 951531  
Los Angeles, CA 90095-1531  
(310) 825-4378

### Lower Division Courses

The following courses are only for students whose native language is not English. Placement in these courses is established on the basis of the UCLA English as a Second Language Placement Examination (ESLPE), which students whose native language is not English must take in addition to the Subject A Examination (see Subject A in the Undergraduate Study section of this catalog).

Depending on the results of this examination, students may either be exempt from any special ESL requirement or may be required to take one or more courses. They are placed into the ESL track at a particular level and must enroll in one ESL course each term, beginning in their first term in residence at UCLA, until the sequence is completed. The required sequence for undergraduates is English as a Second Language 33A, 33B, 33C, and 35; each course must be passed with a grade of C or better (C – or a Passed grade is not acceptable). The re-

quired sequence for graduate students is English as a Second Language 33A, 33B, and 33C; each course must be passed with a grade of C or better if taken for a letter grade, or B or better if taken on an S/U basis. If students do not achieve a minimum score on the placement examination, they may be required to spend a term studying elementary English exclusively, through UCLA Extension, before re-taking the ESLPE and continuing through the appropriate sequence of courses at UCLA.

Undergraduates may satisfy the English Composition requirement by completing course 36 with a grade of C or better (C – or a Passed grade is not acceptable). Admission into course 36 is determined by completion of course 35 with a passing grade or proficiency demonstrated on the ELSPE.

**32. Oral Communication Skills: Stress and Intonation.** Lecture, four hours; outside study, eight hours. Requisite: course 33A or 33B or 33C or 35 or proficiency demonstrated on English as a Second Language Placement Examination. Course 33B, 33C, or 35 may be taken concurrently. Develops oral skills that prepare nonnative speakers of English to participate in class discussions, make oral presentations before an audience, ask and answer questions, participate appropriately in conversations with members of the academic community, and improve through self-evaluation of speech. P/NP (undergraduates), S/U (graduates), or letter grading.

**33A. Low Intermediate English as a Second Language.** Recitation, eight hours; laboratory, two hours. Requisite: Extension course XL832 (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Displaces eight units on student's Study List but yields only four units of credit toward a degree. Intensive instruction in structure of English, with focus on vocabulary building, listening and speaking skills, and basic composition techniques.

**33B. High Intermediate English as a Second Language.** Recitation, five hours. Requisite: course 33A (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Emphasis on reading comprehension, vocabulary development, and composition techniques, with additional work on structure and oral skills.

**33C. Advanced English as a Second Language.** Recitation, five hours. Requisite: course 33B (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Emphasis on academic reading, writing, study skills, and lecture comprehension.

**34. Advanced Oral Communication Skills for ESL Students.** Lecture, four hours; outside study, eight hours. Requisite: course 33C or 35 (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Develops oral skills that prepare nonnative speakers of English to present ideas extemporaneously, lead class discussions, give lectures or speeches before an audience, respond to questions posed by the audience, and improve through self-evaluation of speech. P/NP (undergraduates), S/U (graduates), or letter grading.

**35. Developmental Composition for ESL Students.** Requisite: course 33C (C or better) or proficiency demonstrated on English as a Second Language Placement Examination. Developmental composition skills for ESL students, with focus on the writing process, grammatical structures, mechanics of writing, and practice with major forms of academic writing. Additional emphasis on academic reading skills.

**36. Intermediate Composition for ESL Students.** Lecture, four hours; outside study, eight hours. Requisite: course 35 or proficiency demonstrated on English as a Second Language Placement Examination. Focus on major rhetorical techniques found in academic writing. Special attention to individual research, grammatical structures, and style. P/NP (undergraduates), S/U (graduates), or letter grading.

**37. English Grammar and Style for Academic Purposes.** Lecture, four hours; outside study, eight hours. Requisite: course 33C or 35 (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Review of form and use of common grammatical structures found in academic discourse. Analysis of stylistic function of certain structures and practice in self-editing strategies. P/NP (undergraduates), S/U (graduates), or letter grading.

### Upper Division Courses

**103. Pronunciation for ESL Students.** Lecture, four hours; outside study, eight hours. Prerequisite: course 33C or 35 (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Detailed and systematic study of the sounds of American English and way in which they are put together in connected speech, applied to improvement of student's own accent. P/NP (undergraduates), S/U (graduates), or letter grading.

**106. Advanced Composition for ESL Students.** Prerequisites: course 36 (C or better) or proficiency demonstrated on English as a Second Language Placement Examination, and an appropriate Composition Placement Test score. Focus on production of fully developed, stylistically sophisticated expository and argumentative essays based on complex academic readings. Additional emphasis on grammatical structure and style.

**107. Advanced Reading and Vocabulary for ESL Students.** Lecture, four hours; outside study, eight hours. Prerequisite: course 33C or 35 (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Instruction in and practice of academic reading skills using authentic university texts. Focus on improving reading rate and comprehension, expanding academic vocabulary, and developing critical reading skills. P/NP (undergraduates), S/U (graduates), or letter grading.

**109. Introduction to Literature for ESL Students.** Lecture, four hours; outside study, eight hours. Prerequisite: course 33C or 35 (may be taken concurrently) or proficiency demonstrated on English as a Second Language Placement Examination. Selections from English and American literature presented so as to make full allowance for students' linguistic and cultural problems and to contribute to increasing command of the English language. P/NP (undergraduates), S/U (graduates), or letter grading.

**199. Special Studies in English as a Second Language.** Requisites: consent of instructor and academic coordinator of English as a Second Language Program. Independent studies course for undergraduate and graduate students who desire more advanced or specialized treatment of issues in English as a second language beyond those covered in current courses. May be repeated for credit. See academic coordinator for course contract. P/NP (undergraduates), S/U (graduates), or letter grading.

## South and Southeast Asian Languages

### Lower Division Courses

**40A-40B-40C. Introductory Hindi.** (Formerly numbered Teaching English as a Second Language 98D-98E-98F.) Discussion, five hours; laboratory, one hour; outside study, six hours. Course 40A is enforced requisite to 40B, which is enforced requisite to 40C. Coverage of basic Hindi grammar, with equal emphasis on reading, writing, conversation, and comprehension.

**41A-41B-41C. Intermediate Hindi.** Discussion, five hours; laboratory, one hour; outside study, six hours. Enforced requisite: course 40C. Course 41A is enforced requisite to 41B, which is enforced requisite to 41C. Reinforcement of basic Hindi grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts.

**50A-50B-50C. Introductory Vietnamese.** Discussion, five hours; laboratory, one hour; outside study, six hours. Course 50A is enforced requisite to 50B, which is enforced requisite to 50C. Coverage of basic Vietnamese grammar, with equal emphasis on reading, writing, conversation, and comprehension.

**51A-51B-51C. Intermediate Vietnamese.** (Formerly numbered Teaching English as a Second Language 98G-98H-98I.) Discussion, five hours; laboratory, one hour; outside study, six hours. Enforced requisite: course 50C. Course 51A is enforced requisite to 51B, which is enforced requisite to 51C. Reinforcement of basic Vietnamese grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts.

**60A-60B-60C. Introductory Thai.** (Formerly numbered Teaching English as a Second Language 98A-98B-98C.) Discussion, five hours; laboratory, one hour; outside study, six hours. Course 60A is enforced requisite to 60B, which is enforced requisite to 60C. Coverage of basic Thai grammar, with equal emphasis on reading, writing, conversation, and comprehension.

**61A-61B-61C. Intermediate Thai.** Discussion, five hours; laboratory, one hour; outside study, six hours. Enforced requisite: course 60C. Course 61A is enforced requisite to 61B, which is enforced requisite to 61C. Reinforcement of basic Thai grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts.

**70A-70B-70C. Introductory Tagalog.** (Formerly numbered Linguistics 98A-98B-98C.) Discussion, five hours; laboratory, one hour; outside study, six hours. Course 70A is enforced requisite to 70B, which is enforced requisite to 70C. Coverage of basic Tagalog grammar, with equal emphasis on reading, writing, conversation, and comprehension.

**71A-71B-71C. Intermediate Tagalog.** Discussion, five hours; laboratory, one hour; outside study, six hours. Enforced requisite: course 70C. Course 71A is enforced requisite to 71B, which is enforced requisite to 71C. Reinforcement of basic Tagalog grammar and coverage of more advanced topics. Broadening of skills in conversation and composition; reading of selected texts.

### Upper Division Course

**199. Special Studies in South and Southeast Asian Languages.** Requisites: consent of instructor and academic coordinator of South and Southeast Asian Languages Program. Independent studies course for junior/senior undergraduate and graduate students who desire more advanced or specialized treatment of one language offered in the program beyond introductory and intermediate courses currently offered. May be repeated for credit. See academic coordinator for course contract. P/NP (undergraduates), S/U (graduates), or letter grading.

## THEATER

*School of Theater, Film, and Television*

UCLA  
103 East Melnitz Building  
Box 951622  
Los Angeles, CA 90095-1622  
(310) 825-5761  
<http://www.theater.ucla.edu/>

Robert Israel, M.F.A., *Cochair*  
Rich Rose, M.F.A., *Cochair*

### Professors

Alan M. Armstrong, M.F.A.  
Gilbert Cates, M.A., *Dean*  
Michael J. Hackett, Ph.D.  
Patricia M. Harter, Ph.D.  
Robert Israel, M.F.A.  
Neil Jampolis, B.F.A.  
Michael S. McLain, Ph.D.  
Dunya Ramicova, M.F.A.  
Beverly J. Robinson, Ph.D.  
Rich Rose, M.F.A.  
Carol F. Sorgenfrei, Ph.D.  
Mel Shapiro, M.F.A.  
José Luis Valenzuela, B.A.  
William D. Ward, M.F.A.

### Professors Emeriti

Walden P. Boyle, Ph.D.  
John R. Cauble, M.A.  
Donald B. Crabs, M.A.  
Burdette Fitzgerald  
Henry Goodman, Ph.D.  
Robert H. Hethmon, Ph.D.  
John H. Jones, M.A.  
Joanne T. McMaster, M.F.A.  
Sylvia E. Moss, B.A.  
Carl R. Mueller, Ph.D.  
George L. Schaefer, B.A.  
Norman F. Welsh, B.A.  
William T. Wheatley, Ph.D.

### Associate Professors

Gary A. Gardner, Ph.D.  
Edit Villarreal, M.F.A.  
Margaret L. Wilbur, M.F.A.

### Lecturers

John Brandt, A.A.  
Jacques Heim  
Gordon Hunt, B.A.  
Daniel A. Ionazzi, M.B.A.

### Visiting Professor

Leon Katz, Ph.D.

### Adjunct and Visiting Associate Professors

Ellen Geer, *Visiting*  
Hanay Geiogamah, B.F.A., *Visiting*  
Salome Jens, *Visiting*  
Anna Krajewska-Wieczorek, Ph.D., *Adjunct*

### Adjunct and Visiting Assistant Professors

Sandra Caruso, M.A., *Visiting*  
Marsha Ginsberg, M.F.A., *Visiting*  
Delbert Highlands, M.A., *Visiting*  
Nancy Keystone, M.F.A., *Visiting*  
Roberta Levitow, B.A., *Adjunct*  
Tim Miller, *Adjunct*  
Ed Monaghan, *Visiting*  
Donald Morgan, *Visiting*  
Judith Moreland, M.F.A., *Visiting*  
Ndubisi Nwafor, Ph.D., *Visiting*  
Andre Paradis, *Visiting*  
Jean Louis Rodrigue, *Visiting*  
Leslie Rose, *Visiting*

## Scope and Objectives

UCLA's theater program offers comprehensive training for the profession, as well as serious study of theater's 2,000-year history and rich literature. Drawing on this vibrant heritage, the curriculum promotes an awareness of theater as a global phenomenon embodying the contributions of diverse cultures and explores theater as a forum for reflecting the human experience as revealed through the dynamics of theater production. With this in mind, students engage in the presentation of dramatic work in a community where creativity and critical thought combine in the exploration of the artistic and intellectual challenges inherent in the making of theater.

Manifesting talent and promise as well as representing a wide range of backgrounds and interests, prospective students are selected by the faculty through auditions and interviews in cities throughout the U.S.

At the undergraduate level, students receive education in acting, design, or the comprehensive study of theater, all within the rigorous liberal arts framework of the B.A. degree. At the graduate level, students in the M.F.A. program develop as artists and are given preprofessional training in the skills of theater, while Ph.D. students engage in critical investigations of the art form. In conjunction with their theater studies, students also have the opportunity to pursue elective courses in the area of film and television.

## Undergraduate Study

### Bachelor of Arts Degree

The Bachelor of Arts degree provides a liberal education and preprofessional training in a program that combines the study of the arts, humanities, and sciences with exploration of the principal areas of theater practice — performance, playwriting, directing, design, technical theater, and the history and criticism of theater and drama. The program is designed to ensure that students graduate with a sound humanistic and experiential base for further pursuits in education and in life beyond the University.

The *comprehensive program* provides a liberal education by combining critical study of theater with experiential practice in one or more of its component parts. Students explore each of the principal areas of theater practice — acting, directing, design, playwriting, and production — to build a foundation for future creative work. Specialized and advanced training is available to prepare students for a variety of careers, further training, or graduate study. At the upper division level, students choose from an array of advanced courses in playwriting, directing, and theater history and drama, leading to a culminating research or creative experience in the senior project.

The *acting program* includes specialized and advanced courses that prepare students for careers in performance. Lower division

courses introduce improvisation, sense memory, actions, objectives, and character work. There is some performance in projects, but emphasis is on class and studio work. Upper division advanced courses explore verse, scene study, comedy, cabaret, and performance for film and video. Performance is accentuated in the senior year which culminates in a senior production project combining research of character and play with performance.

The *design and production program* introduces design principles and investigates the design of scenery, lighting, costumes, and sound for theater, film, and television in lower division courses. Three design concentrations are available at the upper division level — scenic and lighting design, scenic and costume design, and lighting and sound design. Students select from an array of design skills courses to develop proficiency in essential areas of rendering, drafting, painting, and technology. Courses in art, history, and philosophy build an understanding of the social history of visual ideas. A sequence of courses in each concentration examines design principles and practice specific to each field, leading to assignment as a member of a production design team and the preparation and realization of designs for a production. The senior project includes a design portfolio project which culminates in the preparation of complete designs and drawings for a production and the assembly of a design portfolio and résumé.

### Admission

All applicants must meet the admission standards of UCLA and the departmental screening process. Applications are accepted only in November for admission to the following Fall Quarter. There are no mid-year admissions. On receipt of the application the department notifies students of the screening process, which includes submission of a written personal essay, letters of recommendation, and an interview and/or audition. Information on the scheduling of the audition/interview is sent to each applicant with the departmental request for supplemental materials. Every applicant must complete the interview portion of the application process. The audition is optional for all students except those wishing to qualify for admission on the basis of their ability in performance. Applicants may submit materials for consideration in one or more of the following areas: acting, directing, design and technical theater, playwriting, and history and criticism.

All entering students are admitted to the comprehensive program and may audition and/or interview for courses in the acting and design programs as continuing students.

### Preparation for the Major

*Required:* Theater 11, 13, 14A-14B-14C, 15, 50. Students in the comprehensive and design programs must also take course 12.

### The Major

*Required:* A total of 58 upper division units, including Theater 101A-101B-101C and 150, and

a specialization (42 units) from one of the following: (1) *acting program* — courses 115A-115B-115C, 116A-116B-116C, 124A, 124B, 125A, 125B, 126A-126B-126C, 127A-127B-127C, 180; (2) *comprehensive program* — courses 106, 180, and 34 elective units; (3) *design and production program* — course 159, six units of design skills courses, and one of the following emphasis sequences: (a) 151A-151B, C151C, 152A-152B, C152C, (b) 151A-151B, C151C, 153A-153B, C153C, (c) 152A-152B, C152C, 154A-154B, C154C.

Through certain of these required courses, students are responsible for completing specific production assignments related to production activity of the theater curriculum.

### Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

### Master of Arts

#### Admission

The Master of Arts degree is awarded only in conjunction with study in the Ph.D. degree program to students who have successfully completed one year of graduate work and all requirements for the M.A. degree and who do not wish to continue in the doctoral program.

Students are admitted in the Fall Quarter only. Admission is competitive, and only a limited number of applicants are accepted each year in each program. The department does not have an application in addition to the UCLA *Application for Graduate Admissions*, and no screening examination prior to admission is required. For further information, contact the Student Services Office in the department.

Applicants are advised that all records submitted in support of an application, including creative work (original or otherwise), are not returnable nor is the department responsible for such material.

In addition to satisfying minimum University requirements for graduate admission, applicants must have completed an undergraduate major in any area comparable to that offered at UCLA and must provide the department with at least three letters of reference and a statement of purpose.

Requirements include the results of the Graduate Record Examination (GRE), a sample of scholarly or critical writing, a statement of purpose, and other information such as résumé, portfolio, script, production book, and interview that may be required to establish the quality of applicants' work in the specialization. Consult the Student Services Office.

### Areas of Study

The program leads to a general graduate degree, though there are opportunities, through electives and thesis or research paper topic, to stress a particular interest such as acting, design, directing, dramatic writing, or theater history and criticism.

### Course Requirements

Students are required to complete a minimum of 10.5 courses (42 units), five of which must be at the graduate level, in at least one year of intensive study and research leading to the successful completion of either the thesis or comprehensive examination plan.

The required courses are Theater 245A and C272 (a two-unit course to be taken three times). After consultation with an adviser, students select seven other courses, including one graduate course in theater history (Theater 205A, 205B, or 205C), one graduate course in theater production theory (Theater 241, 290A, or 290B), and five other courses which emphasize production practice or historical study. Students accepted for joint M.A. and Ph.D. programs are required to take Theater 205A-205B- 205C.

Only eight units from the 596 series may be applied toward the total course requirement, and only four of these units may be applied toward the minimum graduate course requirement. No 598 courses may be applied toward the total course requirement.

### Comprehensive Examination Plan

Students must complete an examination consisting of a 50-page research paper which may be associated with four units of Theater 596A, a one-hour oral defense of the paper, and a two-part, six-hour written examination covering theater history and production practice. The examination normally occurs during the final quarter of residency, at which time the student should have advanced to candidacy.

### Thesis Plan

Before beginning work on the thesis, students must obtain approval of a subject dealing with the history, aesthetics, criticism, or techniques of the theater and a general plan of investigation from the Ph.D. critical studies committee. A thesis committee is then formed when students are within one quarter of completing the coursework, at which time they are eligible to advance to candidacy. The adviser and the committee must have a prospectus of the thesis and a petition to advance to candidacy. Both are used as the basis for approval.

If the thesis fails to pass the committee, the student may present a rewritten version for approval. The number of times a thesis may be presented depends on assessments made by the committee.

## Master of Fine Arts

The department is not admitting students at this time to the M.F.A. producers and sound design programs.

### Admission

Students are admitted in the Fall Quarter only. Admission is competitive, and only a limited number of applicants are accepted each year in each program. The department does not have an application in addition to the *UCLA Application for Graduate Admissions*, and no screening examination prior to admission is required. For further information, contact the Student Services Office in the department.

Applicants are advised that all records submitted in support of an application, including creative work (original or otherwise), are not returnable nor is the department responsible for such material.

In addition to satisfying minimum University requirements for graduate admission, applicants must have completed an undergraduate major in any area comparable to that offered at UCLA and must provide the department with at least three letters of reference and a statement of purpose.

Evidence of creative ability and professional intent is required. When submitting the application, applicants must indicate the M.F.A. degree objective and satisfy the specific admission requirements of one of the following areas of specialization within the M.F.A. program.

*Acting.* Submit a complete résumé and audition for the acting committee or its representative.

*Design and Production (scenic, costume, lighting, and sound design, or production management/technology).* Submit a résumé and evidence of ability appropriate to the area of emphasis as demonstrated by sketches, renderings, photographs, production books, plots, technical papers, reviews, or other appropriate exhibits. An interview and presentation of the portfolio is required.

*Directing.* Submit a résumé and evidence of production work, which may include copies of prompt books, photographs, reviews and critical commentaries, and an essay outlining a directorial approach to a selected play. If the review committee requests an interview, applicants are notified of city location and dates at which time a full portfolio may be presented. Interviews are conducted at various locations around the country in February.

*Playwriting.* Submit a résumé and two examples of creative writing which may include dramatic writing or narrative fiction such as full-length plays, one-act plays, and screenplays. At least one stage play must be included. An interview may be required by the department.

*Producer's Program.* Submit a résumé, examples of related coursework, and a statement outlining areas of specific interest and intent.

An interview may be required by the department.

In addition, all applicants must submit three letters of recommendation. The Graduate Record Examination (GRE) is not required. Consult the Student Services Office.

### Areas of Study

The areas of specialization for the M.F.A. program are as specified above under the Admission section.

### Course Requirements

*Acting.* A total of 23.5 courses (94 units) is required for the degree; of these, 20.5 courses (82 units) must be graduate-level (200 and 400 series) courses. Only 12 units of 596 courses may be applied toward the total number of units for the degree and the minimum graduate course requirement.

*Design and Production (scenic, costume, lighting, and sound design, or production management/technology).* A total of 26 courses (104 units) is required for the degree; of these, 23.5 courses (94 units) must be graduate-level (200 and 400 series) courses. A maximum of 10 units of undergraduate courses and a maximum of 12 units of 596 courses may be applied toward the total number of units for the degree.

*Directing.* A total of 26.5 courses (106 units) is required for the degree; of these, 23.5 (94 units) must be graduate-level (200 and 400 series) courses. A maximum of 12 units of undergraduate courses and a maximum of 12 units of 596 courses may be applied toward the total number of units for the degree.

Students are required to enroll in a minimum of 12 units per quarter. Required courses are scheduled to permit completion within a three-year period.

Specific course requirements for each program are available in the Student Services Office.

### Comprehensive Examination Plan

The plan is satisfied by fulfilling a series of creative projects appropriate to students' specializations. On completion of the final creative project or in the last quarter of residence, whichever is last, students must file for advancement to candidacy. The committee then reviews and evaluates students' records. Student participation in the final review is at the discretion of the committee.

If students fail the review and evaluation of their creative work by the examining committee, they may, with the approval of the department chair, be reexamined.

### Thesis Plan

None.

## Doctoral Degree

### Admission

Applicants must submit evidence of potential as a practicing scholar as indicated by (1) breadth and depth of advanced coursework in history, theory, criticism, (2) the imagination and quality of scholarly writing and academic achievements, (3) grade-point average, Graduate Record Examination (GRE) scores, awards, scholarships, and fellowships. Additionally, candidates should demonstrate awareness and experience in one of the major fields of theater.

Applicants may be admitted with an M.F.A., M.A., or B.A. degree. The dossier for admission must contain a statement of purpose indicating areas of interest appropriate to the doctoral degree, as well as a thesis or other writing samples.

Further information is available from the Student Services Office.

### Major Fields or Subdisciplines

The Ph.D. student in theater is expected to be knowledgeable regarding theater history and theory, critical methods, theatrical production, and dramatic literature.

### Course Requirements

During the first six quarters (two academic years), students must complete a minimum of 12 graduate courses (200 or 500 level) and two professional courses (Theater 495A and 495B). Theater 216A, 216B, 216C are required. The remaining nine courses are elective graduate courses, seminars, or tutorials. Of these electives, no more than four may be taken outside the department and no more than two may be tutorials. In addition, the distribution of electives must include at least one each in the areas of Western or non-Western theater study. These electives must augment the required courses so as to constitute a definable area of study associated with the dissertation topic. The dissertation is a historical, critical, analytical, or experimental study of a theater topic. A screening examination is administered during the first week of the Fall Quarter based on a reading list supplied at the time of application. Results of this examination may require the completion of background courses.

### Written and Oral Qualifying Examinations

At the end of the student's second quarter in residence, a preliminary oral examination is administered by a representative committee of the faculty. The committee specifies the area of review, tests background preparation and progress to date, and determines general fitness to continue in the doctoral program.

After completing all language and course requirements, approval of a dissertation prospectus, and appointment of a dissertation committee, the student is required to pass a

written qualifying examination administered during four successive days. Information regarding the examination is available from the Ph.D. committee. With approval of the committee, the student may be reexamined on any failed portions of the examination when it is next regularly scheduled, or within the year following the quarter in which it was first taken.

After the written examination is passed, a doctoral committee is formed to administer the University Oral Qualifying Examination. The student is advanced to candidacy only on successful completion of this examination.

## Theater

### Lower Division Courses

**11. Contemporary Theater Issues.** Lecture, three hours. Investigation of theater in contemporary American culture and society. Topics illustrated by faculty and guest speakers, visits to off-campus theaters, and reading from contemporary plays.

**12. Introduction to Performance.** Lecture, two hours; studio, four hours. Investigation of phenomenon of performance and role of the performer in the theatrical event, including interpretation of drama through performance. Examination of various forms of theatrical performance and styles of expression, and development of acting, voice, and movement skills.

**13. Play Reading and Analysis.** Lecture, three hours. Provides a base for subsequent study in theater. Development of techniques of play reading and habits of scholarship useful to further study in each of the theater's subdisciplines, including acting, directing, design, playwrighting, and critical study.

**14A-14B-14C. Introduction to Design.** Lecture, three hours; studio, six hours. Exploration of visual interpretation of drama. Study of styles and techniques of design, collaborative role of the designer, principles of design for scenery, lighting, costumes, and sound. Both technical and aesthetic groundwork for further study.

**15. Introduction to Directing.** Lecture, two hours; studio, four hours. Prerequisite: course 11. Investigation of role of the director in theatrical production and theories of play direction, with emphasis on analysis and interpretation of dramatic work and its realization in production.

**20. Acting Fundamentals.** Lecture/laboratory. Required of theater majors. Introduction to interpretation of drama through art of the actor. Development of individual insights, skills, and disciplines in presentation of dramatic material to an audience.

**28A-28F. Acting, Voice, and Movement Workshops I (2 units each).** Studio, three to six hours. Study of beginning acting technique, scene study, and development of voice and movement skills. May be repeated for a maximum of 12 units.

**50. Theater Production and Performance (2 units).** Studio, six hours. Laboratory experience in various aspects of theater production, including performance in a project or production, stage management, or member of a crew. May be repeated for a maximum of eight units.

### Upper Division Courses

**101A-101B-101C. History of World Theater and Drama.** Lecture, three hours; discussion, one hour. Survey of history of influence of different cultures, traditions, and technologies on development of theater as a social institution. **101A.** Ritual and Religious Drama. Study of origins of theater and drama from oral tradition, myth, storytelling, Shamanism, collective ritual, Greek festival drama, and cloister drama of different cultures. **101B.** Rise of Secular Drama. Study of Renaissance secular theater and drama in Europe, Asia, Africa, and the New World. **101C.** Emergence of Realism and 20th-Century Responses. Study of realism and subsequent departures from realism in theater and drama.

**102A. Theater of Japan.** Lecture, three hours. Exploration of major theater traditions of Japan from emergence of earliest theatrical activity to the present, including investigation of Noh, Bunraku, and Kabuki performance traditions.

**102B. Theater of Southeast Asia.** Lecture, three hours. Examination of representative theatrical genre from various geographical areas in Southeast Asia to illustrate importance and contribution that theater plays in society.

**102C. Cross-Cultural Currents in Theater.** Lecture, three hours. Exploration of interculturalism in theater, with focus on 20th-century alternatives to naturalism. Analysis of historical materials and dramatic texts to investigate cultural, aesthetic, ethical, and social implications of borrowing from other cultures.

**102E. Theater of Non-European World.** Lecture, three hours; discussion, one hour. Survey of theater forms of non-European world in which primary attention is concentrated on examination and analysis of traditional dance-drama and puppet theaters of East Asia, Southeast Asia, South Asia, the Middle East, and Africa. Analogous forms from European theater included for comparative purposes.

**M103A. African American Theater History: Slavery to Mid-1800s.** (Same as Afro-American Studies M103A.) Lecture, three hours. Prerequisite: upper division standing. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from slavery to the mid-1800s.

**M103B. African American Theater History: Minstrel Stage to Rise of the American Musical.** (Same as Afro-American Studies M103B.) Lecture, three hours. Prerequisite: upper division standing. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from the minstrel stage to the rise of the American musical.

**M103C. Origins and Evolution of Chicano Theater.** (Same as Chicana and Chicano Studies M103C.) Lecture, three hours. Prerequisite: upper division standing. Exploration of development of Chicano theater from its beginning in legends and rituals of ancient Mexico to work of Luis Valdez (late 1960s).

**M103D. Contemporary Chicano Theater: Beginning of Chicano Theater Movement.** (Same as Chicana and Chicano Studies M103D and World Arts and Cultures M103D.) Analysis and discussion of historical and political events from 1965 to 1980, as well as theatrical traditions which led to emergence of Chicano theater.

**M103E. African American Theater History: The Depression to the Present.** (Same as Afro-American Studies M103E.) Lecture, three hours. Prerequisite: upper division standing. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from the Depression to the present.

**103F. Native American Theater.** Prerequisite: consent of instructor. Study of American Indian theater as an evolving art form.

**M103H. Contemporary Chicano Theater: Chicano Theater since 1980.** (Same as Chicana and Chicano Studies M103H and World Arts and Cultures M103H.) Requisite: course M103D. Analysis and discussion of Chicano theater since 1980, including discussion of Chicana playwrights, magic realism, Chicano comedy, and Chicano performance art.

**104A-104B-104C. History of American Theater.** Lecture, three hours. Study of history of influence of different cultures, traditions, and technologies on development of theater as a social institution in America.

**104A.** Revolutionary War to the Civil War; **104B.** Civil War to WWI; **104C.** WWI to the Present.

**105. Main Currents in Theater.** Lecture, three hours. Critical examination of leading theories of theater from 1887 to the present. Study and discussion of modern styles of production.

**106. History of American Theater and Drama.** Lecture, three hours. Survey of key works of American dramatic literature and landmarks of American theater history.

**107. Drama of Diversity.** Lecture, three hours. Investigation of diversity in American society as manifested in dramatic works and theatrical presentations.

**108. Special Topics in History and Criticism.** Lecture, three hours. Investigation of selected topics of diversity in American society as manifested in dramatic works and theatrical presentations.

**111A. Selected Topics on History of European Theater from Primitive Times to 1640.** Lecture, three hours. Investigation in depth of a selected area of study in theater history from the Greeks to 1640. May be repeated twice for credit.

**111B. Selected Topics on History of European Theater from 1640 to 1900.** Lecture, three hours. Investigation in depth of a selected area of study in theater history from the Renaissance through 1900. May be repeated twice for credit.

**111C. Selected Topics on History of European Theater from 1900 to the Present.** Lecture, three hours. Investigation in depth of a selected area of study in theater history from the baroque to the present. May be repeated twice for credit.

**115A-115B-115C. Acting, Voice, and Movement I (6 units, 6 units, 5 units).** (Formerly numbered 21A-21B, 115.) Studio, 14 to 17 hours. Prerequisite: consent of instructor. Study of beginning acting technique: improvisation, games, and sense memory with examination of action and objective exercises, outline of Stanislavsky system, and development of voice and movement skills.

**116A-116B-116C. Acting, Voice, and Movement II (6 units, 6 units, 5 units).** Studio, 14 to 17 hours. Prerequisite: consent of instructor. Development of acting skills through scene study, use of self, and personalization. Examination of characterization exercises and their application to contemporary American scenes. Development of speech, voice, and movement skills.

**118A. Creative Dramatics.** Lecture/laboratory. Studies of principles and procedures of improvisational approach to drama as done with children from nursery school to junior high.

**118B. Advanced Creative Dramatics (2 to 4 units).** Lecture, four hours; other, to be arranged. Prerequisite: consent of instructor. Practical application of creative drama process. Exploration of interrelationships of the arts to traditional disciplines of learning. May be repeated once for credit.

**118C. Interactive Theater.** Laboratory. Active, problem-solving process of theater exercises and games designed to examine racial stereotypes, sexual harassment, gender discrimination, and other issue that divide members of the campus community, as well as issues which divide the campus from the Los Angeles community. Selected to increase social and political awareness of problems and ideas fundamental to intellectual development, exercises and games nurture skills and attitudes useful in facilitating discussions between actors and audience participants. Use of techniques of sensory awareness, movement, pantomime, improvisation, and characterization.

**119A. Theater for the Child Audience: Theory and Criticism.** Lecture/laboratory. Principles of production and performance for the child audience.

**119B. Theater for the Child Audience: Performance.** Lecture, two hours; laboratory, four hours. Prerequisites: audition and consent of instructor prior to first class meeting. Designed to provide opportunity for students to work together as an ensemble, creating through improvisation a theater presentation for a young audience. Emphasis on testing theoretical concepts through ensemble work, rehearsal, pretesting, and evaluation of an original production for possible presentation outside the classroom.

**120A-120B. Acting for Camera (2 units each).** Studio, six hours. Prerequisite: consent of instructor. Development of performance techniques for camera and interpretation of comedy and drama for television, film, and emerging technologies. Study and practice in single- and multiple-camera productions.

**121. Acting Workshop (2 units).** Laboratory, to be arranged. Prerequisites: course 20, consent of instructor. Courses 160, 163A, 163B, and 163C may be taken concurrently. Workshop which provides students with opportunity to rehearse, perform, and criticize scenes. May be repeated once for credit.

**122. Makeup for the Stage (2 units).** Prerequisite: consent of instructor. Art of makeup and its relation to the production as a whole. History, aesthetics, materials, and procedures of makeup.

**123. Intermediate Acting for the Stage.** Lecture/laboratory. Prerequisites: course 20, consent of instructor. Study and practice of art of acting through perfecting of techniques and application of those techniques to acting problems.

**124A. Advanced Voice (2 units).** Studio/laboratory, three to four hours. Prerequisites: courses 126A-126B-126C. Development of voice techniques for the stage, including work in relaxation, limbering, breathing, articulators, and resonators.

**124B. Advanced Speech (2 units).** Studio/laboratory, three to four hours. Prerequisite: course 124A. Designed to acquaint students with International Phonetic Alphabet and its uses and to exercise students' skills in pronunciation, enunciation, and development of diction versatility.

**125A. Advanced Movement (2 units).** Studio/laboratory, three hours. Physical awareness for the actor, concentrating on warming up the body, relaxation, control, stunts, and gymnastics.

**125B. Advanced Movement and Combat (2 units).** Studio/laboratory, three to four hours. Prerequisite: course 125A. Advanced and contemporary approach to classical and modern movement for the stage actor.

**126A-126B-126C. Acting, Voice, Movement III.** Studio, nine hours. Prerequisites: courses 21A-21B. Study of characterization, including introduction to Shakespeare. Approach to verse, scansion, use of emollient in classic texts. Personalization within heightened reality. Further work in voice, speech, and movement.

**127A-127B-127C. Advanced Acting (2 units each).** Studio, six hours. Prerequisites: courses 126A-126B-126C. Comedy workshop, stand-up comedy, performance art pieces. Audition and cold reading workshop. Solving individual acting projects.

**128A-128F. Acting, Voice, and Movement Workshops II (2 units each).** Studio, four to six hours. Prerequisite: consent of instructor. Study of advanced acting technique, scene study, and development of voice and movement skills. May be repeated for a maximum of 12 units.

**CM129. Contemporary Topics in Theater, Film, and Television (2 units).** (Same as Film and Television CM129.) Lecture, two hours; screenings, two hours. Prerequisite: upper division or graduate standing in theater/film and television. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in the collaborative effort; examination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated for a maximum of six units. Concurrently scheduled with course CM229.

**130A. Beginning Playwriting.** Lecture, three hours; discussion, one hour. Prerequisite: consent of instructor. Required of theater majors. Designed to stimulate students' creative faculties through preparation and completion of a one-act play. Students' critical faculties stimulated by play analysis and scene exercises in discussion section.

**130B. Fundamentals of Playwriting II.** Lecture, three hours plus conference. Prerequisites: course 130A, consent of instructor. Study in original material for the theater, its preparation and development. Designed to give further insight into critical and creating aspects of short and full-length plays and guidance in completion of one-act and full-length plays. May be repeated twice for credit.

**130C. Writing for American Musical Theater.** Lecture/laboratory, three hours. Prerequisite: consent of instructor. Study of practice and techniques used in writing a libretto for musical theater: opening numbers, romance, subplots, and comedy. May be repeated once for credit.

**132. Manuscript Evaluation for Theater.** Lecture, three hours. Prerequisites: course 130A, consent of instructor. Principles and practices in evaluation of manuscripts for theater. May be repeated once for credit.

**C133A-C133B-C133C. Script Development Workshops.** Laboratory, three hours. Prerequisite for playwrights and directors: consent of instructor. Guided preparation of a script for production, focusing on collaborative process between playwright and director, scene work, staged readings, casting, rehearsal, and production. Emphasis on communication, artistic growth, and professional process. Course C133A may be repeated once for credit. Concurrently scheduled with courses C433A-C433B-C433C.

**136. Advanced Acting for the Stage.** Lecture/laboratory. Prerequisites: course 123, consent of instructor. Study and practice of art of acting through a progression to more advanced acting problems. May be repeated twice for credit. Consecutive enrollment with same instructor not permitted. Total units for courses 136, 137A, 137B, and 137C may not exceed 12 units.

**137A-137B-137C. Continuum Study in Acting for the Stage.** Studio, six hours. Prerequisite: course 123. Technique of characterization and performance in advanced and complex acting styles. May be repeated once for credit.

**138. Special Problems in Performance Techniques.** Lecture/laboratory. Prerequisite: consent of instructor. Study of complex problems in voice, movement, and acting. May be repeated twice for credit.

**140A. Scenic Techniques for the Stage.** Lecture, three hours; laboratory, six hours. Prerequisites: course 10, consent of instructor. Intensive study of stage scenery techniques; tools, hardware, and materials; and their relationship to the art of theatrical scenic design through analysis of scenic design history, overall production concepts, and design styles.

**141A. Lighting Techniques for the Stage.** Lecture, three hours; laboratory, six hours. Prerequisites: course 10, consent of instructor. Required of theater majors. Intensive study of theater lighting, with emphasis on relationship of lighting instruments and control equipment to lighting design. Courses 141A, 140A, and 142A may be taken in any sequence, but not concurrently.

**142B. Advanced Costuming for the Stage.** Lecture, three hours; laboratory, four hours. Prerequisites: course 142A, consent of instructor. Special problems in procuring, designing, construction, and management of costumes used in theatrical productions.

**144. Theater Sound Techniques (2 units).** Lecture, two hours; laboratory, two hours. Prerequisites: courses 14A-14B-14C or consent of instructor. Study of equipment and techniques utilized in recording and reproduction of sound for the theater.

**145. Costume Design for the Theater.** Lecture/laboratory. Prerequisite: consent of instructor. Design of costumes for theatrical presentations. Study of use of silhouette, fabrics, color, and decoration as related to theatrical characterizations. May be repeated once for credit.

**147A. Drafting (2 units).** Studio, four hours. Development of visual communication skills through drafting. Exploration of drafting for scenic and lighting designs. May be repeated once for credit.

**147B. Rendering (2 units).** Studio, four hours. Introductory course in basic skills necessary for drawing and rendering for scenic, costume, and lighting design for theater, film, and television. May be repeated once for credit.

**148. Special Courses in Design and Technical Theater.** Lecture, three hours. Prerequisite: consent of instructor. Group study of selected subjects in design and technical theater. May be repeated twice for credit.

**150. Theater Production and Performance (2 units).** Studio, six hours. Prerequisite: course 50. Laboratory experience in various aspects of theater production, including performance in a project or production, stage management, member of a crew, or assignment as a designer or assistant on a production. May be repeated for a maximum of eight units.

**151A-151B. Scenic Design.** Lecture/studio. Prerequisites: courses 14A-14B-14C. Introduction to principles of study and practice of the design of scenery for theater, film, and television. Imagination as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process, composition, and style leading to visual presentation of the design.

**C151C. Production Design for Film and Television.** Lecture/studio. Prerequisite: consent of instructor. Study of role of art director. Production design for single- and multiple-camera production and set decoration. Concurrently scheduled with course C451C.

**152A-152B. Lighting Design.** Lecture/studio. Prerequisites: courses 14A-14B-14C. Investigation of principles and techniques of lighting design for theater and television. Study of lighting, with emphasis on imagination, text analysis, metaphor, and conceptualization. Investigation of composition and control of light and color in relation to the actor.

**C152C. Lighting Design for Television.** Lecture/studio. Prerequisite: consent of instructor. Study of current professional lighting design practices in television for single- and multiple-camera production. Concurrently scheduled with course C452C.

**153A-153B. Costume Design.** Lecture/studio. Prerequisites: courses 14A-14B-14C. **153A.** (Formerly numbered 142A.) Imagination as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process and character analysis leading to visual presentation of the design. **153B.** Study of costume design for period productions, development of conceptual designs, and costume design for music theater.

**C153C. Costume Design for Film and Television.** Lecture/studio. Prerequisites: courses 14A-14B-14C. Study of current professional costume design and wardrobe practices in film and television, including effect of differing media on design choices. Concurrently scheduled with course C453C.

**154A-154B. Sound Design.** Lecture/studio. Prerequisites: courses 14A-14B-14C. **154A.** Study of recording, mixing, editing, and playback of sound effects, voice, and music in the theater. **154B.** Introduction to use of delay, equalization, and microphone placement for theater sound reinforcement. Study of creation of sound effects, control of MIDI data, and design techniques for musical theater.

**C154C. Sound for Film and Television.** Lecture/studio. Prerequisite: consent of instructor. Study of current professional sound recording, rerecording, mixing, and synchronization practices for film and television. Concurrently scheduled with course C454C.

**C155A-C155G. Graphic Representation of Design (2 units each).** Studio, four hours. Prerequisite: course 147A or 147B. Concurrently scheduled with courses C455A-C455G:

**C155A.** Perspective Drawing. Introduction to use of pencil and pen to communicate scenic designs, including one- and two-point perspective, form light, shade, and textures.

**C155B.** Watercolor Rendering. Study of watercolor techniques as they relate to interpretation of scenic designs, including painting of brick, wood, stone, fabrics, and other surfaces.

**C155C.** Marker Rendering. Study and practice of marker rendering techniques as a means of communication for scenic and costume designers.

**C155D.** Model Making. Study of the model for representation of scenic designs from initial working prototypes to finished color models. Use of wide variety of materials and techniques for execution of the model.

**C155E.** Life Drawing. Study and practice in drawing of human form.

**C155F.** Costume Rendering. Study of techniques for rendering theatrical costumes, with emphasis on figure, clothing, and fabrics.

**C155G.** Scene Painting Techniques. (Formerly numbered C146.) Study of scenic painting techniques and materials and their realization of color design and elevations. May be repeated once for credit.

**C156A. Introduction to Computer-Assisted Drafting (2 units).** Studio, four hours. Prerequisite: course 147A or 147B. Study of computer-assisted design for theater, film, and television. Introduction to computer drafting, drawing and editing techniques, drawing floor plans, and elevation drawings. Concurrently scheduled with course C456A.

**C156B. Introduction to Computer-Assisted Design (2 units).** Studio, four hours. Prerequisite: course 147A or 147B. Study of computer-assisted design for theater, film, and television. Investigation of computer-assisted design techniques, including lighting designs, use of symbol libraries, and pictorial. Introduction to computer-assisted drafting. Concurrently scheduled with course C456B.

**C156C. Introduction to Computer-Assisted Rendering (2 units).** Studio, four hours. Prerequisite: course 147A or 147B. Study of computer design for theater, film, and television. Investigation of three-dimensional computer drawing: wire-frame perspective drawing and photo-realistic computer rendering techniques. Concurrently scheduled with course C456C.

**C157A-C157B-C157C. Costume Construction Techniques (2 units each).** Studio, four hours. Study of theory and application of drafting, pattern making, fitting, and construction techniques for period costumes and undergarments to achieve an authentic-looking costume using contemporary methods. Concurrently scheduled with courses C457A-C457B-C457C. **C157A.** Prerequisites: courses 14A-14B-14C, consent of instructor. Introduction to draping, pattern grading fitting, and slash and spread adaptation. **C157B.** Prerequisite: course C157A. Introduction to costume drafting, construction of period undergarments. **C157C.** Prerequisites: courses C157A-C157B. Draping, patterning, and fitting techniques for period garments.

**C158A. Scenic Design Technology.** Lecture/studio. Prerequisites: courses 14A-14B-14C. Investigation of materials, systems, and techniques for realization of scenic designs for theater, film, and television. Study of advanced techniques and materials for construction, finishing, and rigging of scenery and properties. Concurrently scheduled with course C458A.

**C158B. Lighting Design Technology.** Lecture/studio. Prerequisites: courses 14A-14B-14C. Investigation of materials, systems, and techniques for realization of lighting designs for theater, film, and television. Study of design, operation, and performance of lighting instruments, dimming equipment, and control systems, including automated fixtures, projection equipment, and computer systems for lighting. Concurrently scheduled with course C458B.

**C158C. Sound Design Technology.** Lecture/studio. Prerequisites: courses 14A-14B-14C. Investigation of materials, systems, and techniques for realization of sound designs for theater, film, and television. Study of operation and performance of equipment for recording, mixing, and reproduction of theater sound. Concurrently scheduled with course C458C.

**159. Design Portfolio Project.** Lecture/studio. Prerequisites: courses 14A-14B-14C. Preparation of complete designs and drawings for a production and assembly of a design portfolio and résumé. Projects prepared under guidance of a faculty adviser.

**160. Fundamentals of Play Direction (5 units).** Lecture, two hours; laboratory, four hours. Prerequisite: consent of instructor. Required of theater majors. Course 121 may be taken concurrently. Basic theories of play direction and their application through preparation of scenes under rehearsal conditions.

**163A-163B-163C. Directing for the Stage.** (Formerly numbered 161A, 161B, 161C.) Lecture/studio. Prerequisites: course 15, consent of instructor:

**163A.** Intensive development of primary directing skills and process, including text analysis and exploration of craft fundamentals as a basis for director/actor communication and effective staging. Students direct scenes from plays under laboratory conditions.

**163B.** Further development of craft elements of directorial method, with additional emphasis on psychological aspects of director/actor communication. Students direct scenes under laboratory conditions in alternative stage configurations.

**163C.** Culminating development of directorial methods, with particular emphasis on challenges of style in text and production. Students direct scenes under laboratory conditions in alternative stage configurations.

**C163D. Directing Project for the Stage.** Lecture, four hours; studio, six hours. Prerequisites: courses 163A-163B-163C, consent of instructor. Completion of course C163D satisfies course 180 requirement. Application of stage directing techniques in production of a short play. Students direct a one-act play. May be repeated once for credit. Concurrently scheduled with course C263D.

**171A. Advanced Theater Laboratory (1 to 4 units).** Hours to be arranged. Prerequisite: consent of instructor. Creative participation as actor or stage manager in public presentation of departmental productions. May be taken for a maximum of four units.

**171B. Advanced Theater Laboratory (1 to 4 units).** Hours to be arranged. Prerequisite: consent of instructor. Creative participation in realization of production elements related to public presentation of departmental productions. May be taken for a maximum of four units.

**C172. Technical Theater Laboratory (2 units).** Hours to be arranged. Prerequisite: consent of instructor. Required of theater majors. Laboratory in various aspects of theater production. Must be repeated for a maximum of eight units, but no assignment may be repeated more than once. Concurrently scheduled with courses C272 and C472.

**173A. Design Assignment: Assistant Designer (2 units).** Studio, six hours. Prerequisites: courses 14A-14B-14C. Laboratory experience as an assistant designer, including participation in preparation and realization of scenic, lighting, costume, or sound designs. May be repeated twice.

**173B. Production Design Assignment: Designer (2 units).** Studio, six hours. Prerequisites: courses 14A-14B-14C. Laboratory experience as a designer, including preparation and realization of scenic, lighting, costume, or sound designs. May be repeated twice.

**174A. Stage Managing Techniques (2 units).** Studio, six hours. Prerequisites: courses 14A-14B-14C. Professional duties of stage manager. Problems of unions, professional auditions, organization, scheduling, out-of-town openings, Broadway openings, and responsibilities of a lengthy run.

**174B. Project in Stage Management (3 units).** Studio, nine hours. Prerequisite: course 174A. Laboratory experience in the professional duties of assistant stage manager, including participation as an assistant stage manager in preproduction, rehearsal, and performance phases of a production. May be repeated once for credit.

**174C. Project in Stage Management.** Studio, 12 hours. Prerequisite: course 174A. Laboratory experience in the professional duties of stage manager, including participation as a stage manager in preproduction, rehearsal, and performance phases of a production. Problems of unions, auditions, organization, scheduling, and responsibilities of a lengthy run. May be repeated once for credit.

**180. Senior Project.** Lecture/studio, three hours. Prerequisites: courses 101A-101B-101C. Preparation of a conceptual or creative project to provide a culminating experience in the production of a creative or research work.

**C190A. Role of Producer in Professional Theater (2 units).** Study of structure governing economic and artistic decision-making processes in professional theater of America. Concurrently scheduled with course C294A.

**C190B. Role of Management in Educational and Community Theater (2 units).** Study of artistic, social, and economic criteria in administration of educational and community theater. Concurrently scheduled with course C294B.

**191. The Touring Company (2 to 12 units).** Lecture, 20 hours; laboratory, 22 hours. Prerequisite: consent of instructor. Rehearsal and technical preparation of a theatrical work for touring and performance of that work on tour.

**192. Motion Picture, Television, and Theater Internship (2, 4, or 8 units).** Field experience, eight, 16, or 24 hours; individual conferences, to be arranged. Prerequisite: consent of instructor. Limited to senior Department of Theater majors. Internship at various studios or theaters accentuating creative contribution, organization, and work of professionals in their various specialties. May be taken for a maximum of eight units.

**199. Special Studies in Theater Arts (2 to 8 units).** Hours to be arranged. Prerequisite: senior standing, 3.0 GPA in major, consent of instructor. May be taken for a maximum of eight units.

## Graduate Courses

Certain graduate courses concerned with individual student projects may be repeated for credit on recommendation of the departmental graduate adviser. Graduate courses are not open to undergraduate students.

**202A. Seminar: Western Classical Theater.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Examination of theatrical production and dramatic form in the Greek and Roman periods. May be repeated twice for credit.

**202B. Seminar: Medieval Theater.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies of theatrical production and dramatic form in the Middle Ages. May be repeated twice for credit.

**202C. Seminar: Renaissance and Baroque Theater.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies in theater architecture, theatrical production, and dramatic form in English and Continental theater from 1485 to the early 18th century. May be repeated twice for credit.

**202D. Seminar: Bourgeois and Romantic Theater.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies in theater architecture, theatrical production, and dramatic form in English and Continental theater from 1700 to 1870. May be repeated twice for credit.

**202E. Seminar: Modern Consciousness in Theater.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Study of prototypes of modern experience as encountered in work of Ibsen and Strindberg. May be repeated twice for credit.

**202F. Seminar: Modern Realism.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies of theater's response to science and technology, politics, and revolution. May be repeated twice for credit.

**202G. Seminar: Modern Theatricalism.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies in symbolism and avant-garde theater. Exploration of dream experience and private psyche, religious experience, and revitalization of myth and ritual. May be repeated twice for credit.

**202M. Seminar: American Theater.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies in development of theatrical production and dramatic writing in American theater. May be repeated twice for credit.

**202P. Seminar: Traditions of African Theater.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected studies of traditional theater forms such as those indigenous to Ghana, Nigeria, and other African nations and their diaspora (Haiti, Jamaica, and other areas of the Caribbean) through examination of character, structure, performance modes, and archetypes. May be repeated twice for credit.

**202R. Seminar: East Asian Theater.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in theater forms of East Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit.

**202S. Seminar: South Asian Theater.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in theater forms of South Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit.

**202T. Seminar: Southeast Asian Theater.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Selected topics in theater forms of Southeast Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit.

**203. Theater Ethics and Issues (5 units).** Seminar, four hours. Prerequisites: graduate standing, consent of instructor. Investigation of a selected area of theater and drama study that explores significant issues and ethical considerations of the modern world. May be repeated four times for credit.

**204. Theater Genres (5 units).** Seminar, four hours. Prerequisites: graduate standing, consent of instructor. Investigation of history and literature of the theater as manifested in one or more of its major forms or genres. May be repeated four times for credit.

**205A-205B-205C. Background of Theatrical Art.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Analysis of major plays, commentaries, and historical materials. **205A.** Classical and Medieval Periods; **205B.** Renaissance, Baroque, and Rococo Periods; **205C.** Romantic, Naturalistic, and Symbolist Periods.

**206. Themes in World Theater and Drama (5 units).** Seminar, four hours. Prerequisites: graduate standing, consent of instructor. Selected topics in world theater history, drama, production, and/or architecture organized on a thematic basis. May be repeated four times for credit.

**207A-207B. Theater Aesthetics.** Prerequisites: graduate standing, consent of instructor. Discussion of essential issues in aesthetics of theater and drama based on philosophy of art and theories of the theater.

**207A.** Classical and Medieval Theories of Art and Theater; **207B.** Renaissance Theories of Art and Theater to the Present.

**208. Dramaturgy.** Discussion/laboratory, three hours. Prerequisites: graduate standing, consent of instructor. Theoretical and practical aspects of the dramatist's work in contemporary theater.

**209. Theater Authors (5 units).** Prerequisites: graduate standing, consent of instructor. Investigation of work of a theater artist from history of world theater, with special emphasis on relationship to time in which the work was generated. May be repeated four times for credit.

**210. Topics in World Theater and Drama (5 units).** Prerequisites: graduate standing, consent of instructor. Investigation of selected topics in world theater, drama, production, and architecture. May be repeated four times for credit.

**216A. Critical and Historical Methods.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Studies in theater historiography and sociological criticism.

**216B. Critical Methods.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Studies in critical theories of theatrical form and structure.

**216C. Critical Methods.** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Studies in contemporary modes of psychoanalytic and archetypal criticism for theater.

**220. Graduate Forum (1 unit).** Seminar, two hours bimonthly or five times per term. Prerequisite: graduate standing in theater. Presentation and discussion of issues informing and affecting contemporary theater. May be repeated four times for credit. S/U grading.

**CM229. Contemporary Topics in Theater, Film, and Television (2 units).** (Same as Film and Television CM229.) Lecture, two hours; screenings, two hours. Prerequisite: upper division or graduate standing in theater/film and television. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in the collaborative effort; examination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated for a maximum of six units. Concurrently scheduled with course CM129.

**230A-230B-230C. Writing for the Contemporary Theater (4 to 8 units each).** Lecture, three hours; studio, two hours. Prerequisites: graduate standing, consent of instructor. **230A.** One-Act Play. Analysis of strategy and dramatic structure of selected contemporary short plays leading to the guided completion and critique of student-written one-act plays. **230B.** Full-Length Play. Analysis of strategy and dramatic structure of selected contemporary full-length plays leading to the guided completion and critique of a student-written full-length play. **230C.** Performance and Text. Exploration of structural strategies, political implications, and technical demands of selected contemporary American plays leading to the guided completion and critique of student work.

**232. Manuscript Analysis.** Lecture, three hours. Prerequisites: graduate standing, consent of instructor. Critical and constructive study of dramatic techniques as employed by playwrights and screenwriters in selected examples of contemporary work. May be repeated once for credit.

**241. Research in Technical Theater.** Prerequisites: graduate standing, consent of instructor. Research in technical processes and equipment in theater.

**242A-242B-242C. History of Style and Ornamentation.** Prerequisites: graduate standing, consent of instructor. In-depth study of history of costume, architecture, interiors, furnishings, and their interrelationships from early Western culture through the late Gothic period. Emphasis on those periods most prolific in dramatic literature and on resources and research techniques for visual artists.

**243A-243B-243C. Scenic Design.** Prerequisite: consent of instructor. Advanced study and practice in scenic design for theater. Imagination as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process, composition, and style leading to visual presentation of the design. May be repeated once for credit.

**244A. Advanced Theater Laboratory (2 or 4 units).** Laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Creative participation as assistant director, stage manager, or performer in public presentation of departmental productions. May be taken for a maximum of four units.

**244B. Advanced Theater Laboratory (2 or 4 units).** Laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Creative participation in realization of production elements related to public presentation of departmental productions. May be taken for a maximum of four units.

**245A. Production Management.** Lecture, three hours. Prerequisite: consent of instructor. Study in production management for the theater. Examination of professional duties of production manager, including preproduction, rehearsal, and performance phases of a production. Problems of resource management, unions, organization, scheduling, and budgeting while maintaining a creative and collaborative environment.

**245B. Production Management.** Lecture, three hours. Prerequisite: course 245A. Advanced study in production management for the theater, with focus on planning process of professional production manager in a seasonal and repertory environment. Problems of resource allocation, unions, organizational structure, scheduling, and budgeting to establish a creative and collaborative environment.

**245C. Projects in Production Management.** Studio/laboratory. Prerequisite: course 245B. Laboratory experience in professional duties of production manager, including participation as a production manager in preproduction, rehearsal, and performance phases of a production. Problems of resource management, unions, organization, scheduling, and budgeting.

**246A-246B-246C. History of Costume.** Lecture/studio. Prerequisite: graduate standing. Study of history of costume as a manifestation of cultural, social, economic, and political influences to provide a historical framework for design of costumes for theater, film, and television. Historic survey and in-depth exploration of a selected period, with study of influences of diverse cultures.

**247. Collaborative Project in Design and Production (3 to 4 units).** Studio, four hours. Prerequisites: graduate standing, consent of instructor. Collaborative project in design, including analysis, conceptual development, and preparation of scenic, lighting, costume, or sound designs. May be repeated once for credit.

**260. Directing I.** Lecture, four hours; studio, 24 hours. Prerequisites: graduate standing, consent of instructor. Development of directorial skills of analysis, planning, staging, and criticism through medium of written preparations and directing of scenes.

**261. Directing II.** Lecture, four hours; studio, 30 hours. Prerequisites: graduate standing, consent of instructor. Problems in direction of post-realist plays through medium of interpretation and laboratory scene work.

**263. Production Project in Direction for the Stage (2 to 6 units).** Discussion, one hour; studio, 12 to 24 hours. Prerequisites: graduate standing, consent of instructor. Direction of a dramatic work for public performance. Discussion and critique of work in progress. May be repeated for a total of no more than 12 units.

**C263D. Directing Project for the Stage.** Lecture, four hours; studio, six hours. Prerequisites: courses 163A-163B-163C, consent of instructor. Application of stage directing techniques in production of short play. Students direct a one-act play. May be repeated once for credit. Concurrently scheduled with course C163D.

**264. Directing Classical and Historical Drama.** Lecture, four hours; studio, 30 hours. Prerequisites: graduate standing, consent of instructor. Problems in interpretation and direction of historical or classical drama through medium of laboratory scene work.

**265. Modern Theories of Production.** Examination of modern theories of production from emergence of the director in the 19th century to the present. Investigation of different responses to problems of creating a vital theater event in context of ongoing evolution of theater as an art form. Examination of contribution of significant directors and movements; relation between theater and other forms of representation.

**266. Theatrical Conceptualization.** Examination of process of conceptualization in dramatic production; centrality of theater conceptualization in interpretation of dramatic text; exploration of range of possibilities inherent in different theatrical spaces and options in design components. Consideration of visual arts and music as sources of stimulus for theatrical conceptualization, with focus on collaborative aspect of theatrical production.

**C272. Production and Performance Laboratory (2 units).** Lecture, three hours; laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Credit for creative production assignments required of all M.A. students during first three terms in residence. May be repeated twice for credit. Concurrently scheduled with courses C172 and C472.

**290A. Role of Management in Artistic Decision Making in the Theater.** Prerequisite: consent of instructor. Descriptive study of criteria for decision making in artistic institutions, including role of the institution in society, economic environment of the arts, and artistic value systems of arts organizations.

**290B. Programming and Planning Policies in the Theater.** Prerequisite: consent of instructor. Analysis of social, artistic, and economic roles of the arts as reflected in programming policy. Examination of social goals pursued in establishing relationships between the arts and their environment.

**C294A. Artistic Control of Theatrical Production by Professional Producer (2 units).** Prerequisites: graduate standing, consent of instructor. Study of structure governing economic and artistic decision-making processes in professional theater of America and historical development of involvement of producer in artistic process. Concurrently scheduled with course C190A. Additional research and writing required of graduate students.

**C294B. Organization and Operation of Community Theater (2 units).** Prerequisites: graduate standing, consent of instructor. Study of artistic, social, and economic criteria in administration of educational and community theater, with research in history of current practices in operations, administration, and organization. Concurrently scheduled with course C190B.

**298A-298B. Special Studies in Theater Arts (2 to 4 units each).** Lecture/discussion. Prerequisites: graduate standing, consent of instructor. Seminar study of problems in theater arts, organized on topic basis. May be repeated once for credit.

**375. Teaching Apprentice Practicum (1 to 4 units).** Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**420A-420B-420C. Advanced Acting I (4 to 8 units, 4 units, 4 units).** Studio, six to 18 hours:

**420A.** Development of an internal technique, beginning with an autodrama which is a dramatization of one's personal history. Scene work follows, with emphasis on off-stage preparations, improvisations capturing the circumstances, life of the character, and intentions of the scene.

**420B.** Scene work, usually from 20 to 30 minutes in length. Continuation of work on off-stage preparation, with further development of how the actor goes about doing research and fieldwork on the character being played.

**420C.** Development of an external technique through comedy and of skits, improvisation, physical humor, delivery of a line, rhythm, timing, and public cabaret. Fusion of the internal; use of action and objective with the external.

**421A-421B-421C. Advanced Acting II (4 or 8 units each).** Studio/laboratory, six to 18 hours. **421A.** Extending the idea of autobiography and using it as art. The actor as performance artist. Playing characters quite removed from oneself. Using language. Using Shakespeare and oneself to play him. **421B.** Continued character behavior study through language and movement. Further work on actions, objectives, and researching the role. **421C.** Comedy workshop. Exploration of craft of comedy and development of cabaret pieces.

**422. Advanced Acting for Theater, Film, and Television (8 to 12 units).** Studio/laboratory. Intensive performance experience. May be repeated for a maximum of 24 units. S/U grading.

**424A-424B-424C. Advanced Voice and Speech I (2 or 4 units each).** Studio/laboratory, three to six hours. Development of voice and speech techniques for the stage, including those of relaxation, breathing, resonance, and development of speaking voice. Speech training uses International Phonetic Alphabet to train students in standard American speech. Text work in poetry and prose.

**424D-424E-424F. Advanced Voice and Speech II (2 or 4 units each).** Studio/laboratory, three to six hours. Advanced voice problems. Extension of first-year work, with increased demands on voice. Range, resonance, and breathing capacity extension. Articulation and phonetic alphabet. Text work in classical verse.

**425A-425B-425C. Advanced Movement I (2 or 4 units each).** Studio/laboratory, three to six hours. Discovery of body's unique language through exercises designed to explore and free the total instrument. Development of a flexible actor with range, expression, and confidence physically. Awakening of the imagination while exploring the worlds of ritual, animal, conceptual, and modern dance movements.

**425D-425E-425F. Advanced Movement II (2 or 4 units each).** Studio/laboratory, three to six hours. Presentation of a more complete picture of stage movement and its relationship to theater, music, and dance. Advancement of physical training of individual actors to their maximum potential. Experience in techniques and discovery of origins of a variety of acrobatic and dance disciplines, including ballet, ballroom, period dance, and circus techniques.

**429. Performance Workshop (2 units).** Studio, four hours. Prerequisites: graduate standing, consent of instructor. Limited to graduate students not enrolled in M.F.A. acting program. Exercises in performance techniques, including autodrama and scene study. Development of performance skills through scene study, use of self, and personalization. Examination of characterization exercises and their application to scenes.

**430A-430B-430C. Advanced Studies in Playwriting (4 to 8 units each).** Lecture, three hours. Prerequisite: graduate standing in M.F.A. playwriting program. Guided completion of full-length scripts for the stage.

**431. Special Topics in Playwriting.** Discussion, three hours. Prerequisites: graduate standing in M.F.A. playwriting program and/or consent of instructor. Analysis and practice of varied aspects of playwright's art. Variable content selected from topics such as comedy writing, docudrama, writing for alternative audiences, adaptation from stage to screen, children's theater, or improvisational techniques. May be repeated twice for credit.

**C433A-C433B-C433C. Script Development Workshops.** Laboratory, three hours. Prerequisites for playwrights and directors: graduate standing, consent of instructor. Guided preparation of a script for production, focusing on collaborative process between playwright and director, scene work, staged readings, casting, rehearsal, and production. Emphasis on communication, artistic growth, and professional process. Course C433A may be repeated once for credit. Concurrently scheduled with courses C133A-C133B-C133C.

**435AF-435AW-435AS. Problems in Advanced Writing for the Stage (0 units, 0 units, 2 units).** Prerequisite: consent of instructor. Limited to M.F.A. candidates. Review discussion and critique of playwriting projects. May be repeated for a maximum of six units. In Progress and S/U grading.

**441A-441B-441C. Lighting Design.** Lecture/studio. Prerequisite: consent of instructor:

**441A.** Study and practice in lighting the actor, emphasizing textual and character analysis from lighting designer's perspective, conceptual development with the director, effect of light on dynamics of staging, use of color in light, and relationship of lighting designer to the actor. May be repeated once for credit.

**441B.** Study of use of light and color to define space, effect of light on scenery and costumes, lighting for arena/thrust theaters, multisensory productions, lighting patterns, and moving scenery. May be repeated once for credit.

**441C.** Investigation of lighting design in production, musical theater, opera, touring, and repertory situations. Study of analysis of script and score for lighting designer. May be repeated once for credit.

**441D. Scenic Projection and Media Techniques.** Lecture/laboratory. Prerequisites: graduate standing, consent of instructor. Advanced study and practice in scenic projection and media techniques, with emphasis on analysis, design, and execution of theatrical projection and photographic technique for the stage.

**442A-442B-442C. Costume Design.** Lecture/studio. Prerequisite: consent of instructor. Advanced study and practice in costume design for theater. Imagination as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process, period style, and character analysis leading to visual presentation of the design. Study of costume design for theatrical productions, ballet, opera, and musical theater. May be repeated once for credit.

**443. Problems in Design (2 or 4 units).** Lecture/laboratory, four hours (additional hours as required). Prerequisite: consent of instructor. Study and practice in design techniques for theater. May be repeated for a maximum of 12 units.

**444A-444B-444C. Sound Design.** Lecture/studio. Prerequisite: consent of instructor:

**444A.** Study of sound and acoustics as they relate to performance environments, techniques associated with recording, mixing, processing, automation, and reproduction of dialogue, effects, and music tracks for theater sound design. May be repeated once for credit.

**444B.** Advanced study and practice in preparation and recording of theater sound designs, with emphasis on analysis of script and score, conceptual development of the design, and multitrack recording techniques to realize the design. May be repeated once for credit.

**444C.** Study and practice in processing and mixing of live and recorded sound; mix-down of multitrack recordings; preparation of sound tracks and sound reinforcement in the theater. Study of creation of sound effects, control of MIDI data, and design techniques for music theater. May be repeated once for credit.

**C451C. Production Design for Film and Television.** Lecture/studio. Prerequisite: consent of instructor. Study of role of art director. Production design for single- and multiple-camera production and set decoration. Concurrently scheduled with course C151C.

**C452C. Lighting Design for Television.** Lecture/studio. Prerequisite: consent of instructor. Study of current professional lighting design practices in television for single- and multiple-camera production. Concurrently scheduled with course C152C.

**C453C. Costume Design for Film and Television.** Lecture/studio. Prerequisites: courses 14A-14B-14C. Study of current professional costume design and wardrobe practices in film and television, including effect of differing media on design choices. Concurrently scheduled with course C153C.

**C454C. Sound for Film and Television.** Lecture/studio. Prerequisite: consent of instructor. Study of current professional sound recording, rerecording, mixing, and synchronization practices for film and television. Concurrently scheduled with course C154C. Graduate students expected to produce designs demonstrating a higher level of proficiency and skill.

**C455A-C455G. Graphic Representation of Design (2 units each).** Studio, four hours. Prerequisite: course 147A or 147B. Concurrently scheduled with courses C155A-C155G:

**C455A.** Perspective Drawing. Introduction to use of pencil and pen to communicate scenic designs, including one- and two-point perspective, form light, shade, and textures. Graduate students expected to produce drawings demonstrating a higher level of proficiency and skill.

**C455B.** Watercolor Rendering. Study of watercolor techniques as they relate to interpretation of scenic designs, including painting of brick, wood, stone, fabrics, and other surfaces. Graduate students expected to produce drawings demonstrating a higher level of proficiency and skill.

**C455C.** Marker Rendering. Study and practice of marker rendering techniques as a means of communication for scenic and costume designers.

**C455D.** Model Making. Study of the model for representation of scenic designs from initial working prototypes to finished color models. Use of wide variety of materials and techniques for execution of the model. Graduate students expected to produce models demonstrating a higher level of proficiency and skill.

**C455E.** Life Drawing. Study and practice in drawing of human form.

**C455F.** Costume Rendering. Study of techniques for rendering theatrical costumes, with emphasis on figure, clothing, and fabrics.

**C455G.** Scene Painting Techniques. Study of scenic painting techniques and materials and their realization of color design and elevations. May be repeated once for credit.

**C456A. Introduction to Computer-Assisted Drafting (2 units).** Studio, four hours. Prerequisite: course 147A or 147B. Study of computer-assisted design for theater, film, and television. Introduction to computer drafting, drawing and editing techniques, drawing floor plans, and elevation drawings. Concurrently scheduled with course C156A.

**C456B. Introduction to Computer-Assisted Design (2 units).** Studio, four hours. Prerequisite: course 147A or 147B. Study of computer-assisted design for theater, film, and television. Investigation of computer-assisted design techniques, including lighting designs, use of symbol libraries, and pictorial. Introduction to computer-assisted drafting. Concurrently scheduled with course C156B.

**C456C. Introduction to Computer-Assisted Rendering (2 units).** Studio, four hours. Prerequisite: course 147A or 147B. Study of computer design for theater, film, and television. Investigation of three-dimensional computer drawing: wire-frame perspective drawing and photo-realistic computer rendering techniques. Concurrently scheduled with course C156C.

**C457A-C457B-C457C. Costume Construction Techniques (2 units each).** Studio, four hours. Study of theory and application of drafting, pattern making, fitting, and construction techniques for period costumes and undergarments to achieve an authentic-looking costume using contemporary methods. Concurrently scheduled with courses C157A-C157B-C157C. **C457A.** Prerequisites: courses 14A-14B-14C, consent of instructor. Introduction to draping, pattern grading fitting, and slash and spread adaptation. **C457B.** Prerequisite: course C457A. Introduction to costume drafting, construction of period undergarments. **C457C.** Prerequisites: courses C457A-C457B. Draping, patterning, and fitting techniques for period garments.

**C458A. Scenic Design Technology.** Lecture/studio. Prerequisites: courses 14A-14B-14C. Investigation of materials, systems, and techniques for realization of scenic designs for theater, film, and television. Study of advanced techniques and materials for construction, finishing, and rigging of scenery and properties. Concurrently scheduled with course C158A.

**C458B. Lighting Design Technology.** Lecture/studio. Prerequisites: courses 14A-14B-14C. Investigation of materials, systems, and techniques for realization of lighting designs for theater, film, and television. Study of design, operation, and performance of lighting instruments, dimming equipment, and control systems, including automated fixtures, projection equipment, and computer systems for lighting. Concurrently scheduled with course C158B.

**C458C. Sound Design Technology.** Lecture/studio. Prerequisites: courses 14A-14B-14C. Investigation of materials, systems, and techniques for realization of sound designs for theater, film, and television. Study of operation and performance of equipment for recording, mixing, and reproduction of theater sound. Concurrently scheduled with course C158C.

**459A-459B. Directing for Theater, Film, and Television.** Lecture, three hours. Prerequisite: consent of instructor. Limited to graduate students in Department of Theater. Analysis and exploration, with specific scenes, of differences and many similarities in directorial approach to same literary material in three media.

**460AF-460AW-460AS. Contemporary Issues in Direction (1 unit each).** Discussion, three hours. Prerequisites: graduate standing, consent of instructor. Discussion of role of director in contemporary professional practice. Review discussion and critique of directing projects. May be repeated for a maximum of four units.

**460B-460C. Problems in Advanced Direction for the Stage.** Lecture, to be arranged. Prerequisite: consent of instructor. Limited to M.F.A. candidates. Discussion and critique of work in progress. **460B.** Preparation and presentation of a published play under rehearsal conditions. **460C.** Preparation and presentation of a full-length original play under rehearsal conditions.

**462. Production Project in Direction for the Stage (4 or 8 units).** Lecture, to be arranged. Prerequisite: consent of instructor. Limited to M.F.A. candidates. Preparation and presentation of an original play under minimal production conditions. Discussion and critique of work in progress.

**463. Production Project in Direction for the Stage (8 or 12 units).** Lecture, to be arranged. Prerequisite: consent of instructor. Limited to M.F.A. candidates. Preparation and presentation of a play under fully produced theater conditions.

**C472. Production and Performance Laboratory (2 to 8 units).** Laboratory, to be arranged. Prerequisites: M.F.A. candidate, consent of instructor. Credit for creative production projects required of all M.F.A. students. May be repeated three times for a maximum of 16 units. Concurrently scheduled with courses C172 and C272.

**474. Projects in Theater Design (2 or 4 units).** Discussion, three hours; laboratory, 12 hours to be arranged. Prerequisites: graduate standing, consent of instructor. Study and practice in preparation and performance of dramatic works for public performances as a contributing artistic member of a departmental production. Creative responsibilities include designer, technical supervisor, production manager, choreographer, or dramaturge. May be repeated for a maximum of 16 units.

**495A. Practicum in Teaching Theater.** Lecture/laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Study of and practice in teaching theater at college and university level.

**495B. Practicum in Theater Production (2 or 4 units).** Laboratory, to be arranged. Prerequisites: graduate standing, consent of instructor. Demonstration of competence in theater production through successful completion of a major teaching production assignment. May be repeated for a maximum of 12 units.

**496. Practice of Teaching Theater (2 units).** Discussion. Required once of all teaching assistants or associates in department. Orientation and preparation of graduate students who have responsibility to assist in teaching undergraduate courses in department; discussion of problems common to the teaching experience. May not be applied toward M.A., M.F.A., or Ph.D. May be repeated. S/U grading.

**498. Professional Internship in Theater, Film, and Television (4, 8, or 12 units).** Full- or part-time at a studio or on a professional project. Prerequisites: graduate standing, advanced standing in M.F.A. program, consent of instructor. Internship at various film, television, or theater facilities accentuating creative contribution, organization, and work of professionals in their various specialties. Given only when projects can be scheduled.

**501. Cooperative Program (2 to 8 units).** Prerequisite: consent of graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596A. Directed Individual Studies: Research (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**596B. Directed Individual Studies: Writing (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**596C. Directed Individual Studies: Directing (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**596D. Directed Individual Studies: Design (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**596E. Directed Individual Studies: Acting (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**596F. Directed Individual Studies: Production (2 to 12 units).** Hours to be arranged. Prerequisite: graduate standing. May be repeated with consent of instructor.

**597. Preparation for Ph.D. Qualifying Examinations in Theater Arts (2 to 8 units).** May be repeated for a maximum of 12 units.

**598. M.A. Thesis in Theater Arts (2 to 8 units).** Prerequisite: advancement to M.A. candidacy. Research and writing for M.A. thesis. May be repeated for a maximum of 12 units.

**599. Ph.D. Dissertation in Theater Arts (2 to 8 units).** Prerequisite: advancement to Ph.D. candidacy. Research and writing for Ph.D. dissertation. May be repeated for a maximum of 12 units.

Paul Ong, Ph.D., *Chair*

### Professors

Lucie C. Cheng, Ph.D.  
J. Eugene Grigsby III, Ph.D.  
Susanna B. Hecht, Ph.D.  
Allan D. Heskin, Ph.D., LL.B.  
Shirley Hune, Ph.D.  
Jacqueline Leavitt, Ph.D.  
Robin Liggett, Ph.D.  
James E. Lubben, D.S.W.  
Barbara J. Nelson, Ph.D.  
Paul Ong, Ph.D.  
Donald Shoup, Ph.D.  
Edward W. Soja, Ph.D.  
Michael Storper, Ph.D.

### Professors Emeriti

Leland S. Burns, Ph.D.  
John Friedmann, Ph.D.  
Peter Kamnitzer, M.Pl., M.Arch.  
Peter Marris, B.A.

### Associate Professors

Dana Cuff, Ph.D.  
Leobardo Estrada, Ph.D.

### Assistant Professors

Raul Hinojosa-Ojeda, Ph.D.  
Anastasia Loukaitou-Sideris, Ph.D.  
Brian Taylor, Ph.D.  
Abel Valenzuela, Jr., Ph.D.

### Lecturers

Stephen Commins, Ph.D.  
Carol Goldstein, B.A.  
Gilda Haas, M.A.  
Neal Richman, Ph.D.  
Goetz Wolff, M.Phil.

### Adjunct Professors

Robert Gottlieb, B.A.  
Karen Hill Scott, Ph.D.

## Scope and Objectives

The professional urban planner works on the creation and management of the urban environment, including its physical, economic, and social elements. Housing, transportation, air and water quality, the preservation of historic communities, and the development of community-level economic and employment programs are some of the tasks undertaken by recent graduates of the UCLA Department of Urban Planning. Graduates have taken positions in local, state, and national governments, and increasingly with private companies whose products and services affect the urban environment. While most UCLA graduates find positions in the U.S., the program offers the opportunity to specialize in development planning abroad, including rural development, and many graduates have found positions in Latin America, Africa, and Asia.

The program offers a two-year Master of Arts degree and a Ph.D. Concurrent degree programs allow students to combine study for an M.A. in Urban Planning with work toward an M.B.A. in the John E. Anderson Graduate School of Management, a J.D. in the School of Law, or an M.A. in Latin American Studies.

The department takes pride in its collegial atmosphere. It features a lively mix of students from diverse academic backgrounds, drawn from many foreign countries and from every avenue of American life. It includes many members of racial and ethnic minority groups, and more than half the students are women. A number of student organizations provide an interesting program of extracurricular activities.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degrees

The Department of Urban Planning offers the Master of Arts degree in Urban Planning and participates in concurrent degree programs.

## Master of Arts

### Admission

The Department of Urban Planning admits students in the Fall Quarter only, and the application process should begin a year in advance of the quarter for which applicants are applying. Applicants who are admitted but do not enroll are not guaranteed admission at a later date.

Prospective applicants may obtain a detailed program statement and Graduate Division ap-

plication by writing to the Department of Urban Planning, School of Public Policy and Social Research, 3250 Public Policy Building, 90024-1656.

A statement of purpose, letters of recommendation, grade-point averages, and relevant experience are all considered in the review process for admission. Applicants must submit transcripts from each college attended and should have a minimum grade-point average of 3.0 or B for their junior and senior years. Applicants are also encouraged to submit Graduate Record Examination (GRE) scores especially if they are applying for fellowships. The Test of English as a Foreign Language (TOEFL) is required for those whose native language is not English, unless at least two years of university-level coursework at an English-language institution has been completed. A score of 600 on the TOEFL is expected, and applicants with a score below 550 are not considered for admission. For master's applicants, work samples such as reports, research papers, and slides are optional. No more than two pieces of work should be submitted; samples written in a foreign language are not considered. Work samples are returned only on request. Applicants in the U.S. must enclose a self-addressed, stamped envelope.

## Concurrent Degrees

### J.D./M.A. Urban Planning

The School of Law and the Department of Urban Planning offer a concurrent plan of study providing an integrated curriculum for those planning to specialize in the legal aspects of urban problems. Education in planning offers an overview of theories and methods that permit identification and treatment of urban problems; education in law offers insight into the institutional causes and possibilities for treatment of these problems. Students pursue studies in both areas and receive both the J.D. and M.A. degrees at the end of four years.

In order to be considered for the concurrent degree program, applicants must apply and be admitted to both the School of Law and the Department of Urban Planning.

During the first year, students follow the required law curriculum and must attain at least a 70 average to continue in the concurrent degree program. The second year is spent in the urban planning program, taking 36 units toward the M.A. degree. During the third and fourth years, students take 36 additional quarter units to complete the planning degree and the necessary coursework to complete the law degree. Of the 72 quarter units toward planning, three courses must be taken from the multiple-listed courses offered by both law and planning (Law M285, M286, M287, M290, and M526) which may be applied toward both the J.D. and the M.A. degrees. Students may also petition to substitute other policy-oriented law courses for one or more of the multiple-listed courses.

Students who decide not to complete either the J.D. or M.A. must complete all the regular requirements for the program they wish to pursue.

For additional information, contact the graduate adviser in the Department of Urban Planning.

### **M.B.A./M.A. Urban Planning**

The M.B.A./M.A. program is a three-year concurrent degree program jointly sponsored by the John E. Anderson Graduate School of Management and the Department of Urban Planning. The program is designed for individuals who seek careers which draw on general and specialized skills in urban planning and management. By providing knowledge of the workings of both the private and public sectors, the program enables individuals who have acquired these skills to move easily between careers in private industry and public service.

Students interested in the M.B.A./M.A. program should contact the M.B.A. Program Office, Anderson Graduate School of Management, regarding admission requirements and application procedures.

A total of 36 courses (144 units) is required: from 18 to 24 courses in the Anderson Graduate School of Management and from 12 to 18 courses in the Department of Urban Planning. All core and concentration requirements for each program must be met, but where the two programs' core courses are substantially the same, students may choose from either program's offerings. A maximum of six courses count toward unit requirements for both degrees. Students complete all first-year M.B.A. requirements during the first year of residence; the second and third years of study are divided between both programs.

Further details may be obtained from the graduate adviser in the Department of Urban Planning.

### **M.A. Latin American Studies/M.A. Urban Planning**

The Latin American Studies Program and the Department of Urban Planning offer a two and one-half to three-year concurrent degree program leading to an M.A. degree in each program. Issues related to migration and settlement, comparative urbanization, human resources development and distribution, and rural economics are all of direct concern to planners and other policymakers working in Latin America. The program provides an integrated curriculum through which students can develop professional knowledge and skills while receiving advanced area studies and language training.

Applicants apply through the Department of Urban Planning. Graduate Record Examinations (GRE) scores are required.

A total of 25 courses (100 units) is required for the concurrent degree program: eighteen courses for the M.A. in Urban Planning and

nine courses for the M.A. in Latin American Studies. Two courses, selected from a list of urban planning courses approved by the Latin American Studies Program, may be applied toward both degrees. All requirements for each program must be met, and the degrees may be awarded simultaneously.

Further details may be obtained from the graduate adviser in the Department of Urban Planning.

### **Areas of Study**

Students choose an area of concentration by the end of the first quarter in the program. Areas of concentration are fields in which planners characteristically become engaged, professionally or through research. They are not meant to be mutually exclusive.

*Regional and International Development.* This concentration concerns the interrelated aspects of area development in both developed and developing countries. The perspective on questions of area development is that of political economy and spatial analysis. Industrialization, urbanization, and rural development are major focal points of interest. Within this area, students are expected to choose an emphasis on either developing or advanced economics.

*Social Policy and Analysis.* The analysis of social services includes questions of production and distribution — how efficiently are services provided, who pays, and who benefits? These questions lead to more fundamental ones about the functions of planning and social policy. In the broadest sense, social policy comprises the whole context of social actions which together determine the distribution of goods, services, and opportunities between rich and poor, men and women, young and old, and people of different ethnic and social origins. Students may specialize in one of four areas: transportation, housing and real estate development, social services and social policy, or information decision systems.

*Environmental Analysis and Policy.* The natural environment is both the context within which all human activities take place and a social product of those activities. Environmental planning begins as an attempt to mitigate often unforeseen consequences of economic growth and expansion where these seem to threaten social well-being and continuing political consensus. Courses are designed to introduce students to the linkages between environmental problems and social processes.

*The Built Environment.* This area of concentration represents a blending of urban planning and architecture. It deals with the social and economic forces affecting the three-dimensional built environment on an urban scale. Within this area, students can choose one of two specializations: community planning and development or physical development and public policy.

*Additional Areas of Concentration.* In special circumstances, students may devise their own

area in consultation with appropriate faculty members. Final approval of the proposed additional area of concentration must be obtained from the department chair. Further details may be obtained from the graduate adviser.

### **Course Requirements**

Students must complete a minimum of 72 units (18 courses). Students usually take 12 units per quarter, completing the program in two years.

A minimum of 13 courses must be graduate courses (all 200-series courses except for up to four courses or 16 units of 500-series courses) in urban planning or a related field. Two courses or eight units of course 496 may be applied as electives.

*Core Course Requirements.* The core areas comprise knowledge common to all areas of planning, regardless of one's specific focus. Seven core courses are required: Urban Planning 220A (Quantitative Analysis in Urban Planning I) waiver by examination, 220B (Quantitative Analysis in Urban Planning II), 207 (Public Resource Allocation), 222 (History and Theory of Planning), two courses on urbanization covering urban problems and processes chosen from a menu of options, and 211 (Law and the Quality of Urban Life) or a course from the School of Law may be substituted). Urban Planning courses 207, 220A, and 222, which are offered in the Fall Quarter, include required workshops on writing, verbal and graphic presentation.

Upon entering the program, students must pass proficiency examinations in basic mathematics and microeconomics before enrolling in Urban Planning 220A and 207 respectively. Copies of sample examinations are mailed to applicants accepted into the program. An undergraduate course in college algebra or precalculus should provide suitable background to pass the basic mathematics examination. An undergraduate course in microeconomics should be sufficient preparation for the microeconomics examination. Students are strongly encouraged to prepare for the examinations before beginning the program so that they can take Urban Planning 207 and 220A during their first year of study. If students do not pass either or both examinations, they are advised to take Mathematics A or 1 and/or Economics 1, 11, or 100 at UCLA during their first year of study. (These courses do not count toward the master's degree.) Proficiency examinations need to be passed at the start of the second year in order to enroll in required courses 220A and/or 207, which are only offered in the Fall Quarter.

*Area Course Requirement.* Students must choose an area of concentration and select at least five courses, two of which are generally specified, from a list of courses prepared for that area. One of the required core courses on urbanization may be used to fulfill an area of concentration requirement.

Students may seek waivers for requirements that have been met through coursework prior to entering the M.A. program.

### Comprehensive Examination Plan

A student must select this option by the deadline set by the department. Once a deadline has passed, students are limited to options with subsequent deadlines.

*Plan A (Client-Oriented Project).* A client-oriented project is recommended if students are more interested in practical application of what they have learned than in scholarly research. The time span of the final project approximates that of the thesis. Academic credit for project involvement is given through required course 205 (Research Seminar for Client Project), and through course 597 for faculty supervised independent research. Guidance of the project rests with a committee of at least one faculty committee chair, one consulting faculty, and a representative of the client. The project proposal should be ready for committee review by the end of the seventh week of Fall Quarter of the second year of study. The project must be successfully completed when it is approved by the faculty committee and delivered to the client.

As an alternative under Plan A, students may take Urban Planning 217A-217B (group comprehensive project sequence), for eight units credit, offered each year during the Winter and Spring quarters to fulfill the comprehensive examination requirement. The faculty members in charge of this course sequence, one supervising, one consulting, plus a representative of the client make up the comprehensive examination committee. Students must notify the graduate counselor that they have selected this option and (in the event that more than one section is offered) they must indicate in which section of Urban Planning 217A-217B they will enroll, by the end of the Fall Quarter of the second year of study.

*Plan B (Two-Week Examination).* Examinations for all areas of concentration are normally offered during the break between Winter and Spring Quarters. Each area-of-concentration faculty coordinator appoints a committee of three faculty members to cover this examination. Students may be requested to do additional work on the examination after it has been reviewed by the committee. No course credit is received for the two-week examination. Students who choose this option must notify the graduate counselor by the end of the Fall Quarter of the second year of study.

Client and comprehensive projects and two-week examinations must receive a grade of B to be of passing quality. To receive an S grade for a project graded on an S/U basis, the work must be at the level of B. The comprehensive letter-graded project (Urban Planning 217A-217B) must receive a B average over the two terms to be of passing quality.

### Thesis Plan

A student must select this option by the deadline set by the department. Once a deadline has passed, students are limited to options with subsequent deadlines.

The thesis is intended to provide the opportunity for independent scholarly research and should be the length and quality of a publishable journal article. In order to meet graduation deadlines, students must begin thesis work no later than the beginning of Fall Quarter of the second year and present a preliminary proposal to their thesis committee chair by the end of the second week of classes. The thesis committee consists of three ladder faculty and must be selected by the end of Fall Quarter of the second year. Students enroll in required course Urban Planning 205 (Research Seminar for Master's Thesis) for four units of academic credit for thesis preparation, and for four units of course 598 for faculty supervised independent research.

The thesis project (598) must receive a grade of S to be of passing quality.

### Doctoral Degree

#### Admission

The Department of Urban Planning admits students in the Fall Quarter only, and the application process should begin a year in advance of the quarter for which applicants are applying. Applicants who are admitted but do not enroll are not guaranteed admission at a later date.

Prospective applicants may obtain a detailed program statement and Graduate Division application by writing to the department.

A statement of purpose, letters of recommendation, grade-point averages, and relevant experience are all considered in the review process for admission. Applicants must submit transcripts from each college attended and should have a minimum grade-point average of 3.0 or B for their junior and senior years. Applicants are required to submit Graduate Record Examination (GRE) scores. The Test of English as a Foreign Language (TOEFL) is required for those whose native language is not English, unless at least two years of university-level coursework at an English-language institution has been completed. A score of 600 on the TOEFL is expected, and applicants with a score below 550 are not considered for admission. Work samples, preferably research papers and/or a copy of the master's thesis, are required of doctoral applicants. No more than two pieces of work should be submitted; samples written in a foreign language are not considered. Work samples are returned only on request. Applicants in the U.S. must enclose a self-addressed, stamped envelope.

Students admitted to the Ph.D. program in Urban Planning must have a master's degree in planning or a closely related field. Students in the M.A. degree program in Urban Planning at UCLA should inform the graduate adviser before December 15 of their second year if they

wish to be considered for the Ph.D. program for the following Fall Quarter.

A minimum grade-point average of 3.5 is required in all graduate work completed for consideration for the Ph.D. program. Employment experience in planning or a closely related field is strongly recommended.

Applicants are required to submit two statements of purpose. The first should address how past experiences have shaped the applicant's interest in planning, the applicant's personal career plans, and how a Ph.D. in planning will contribute to those plans. The second statement should describe the applicant's intended area of concentration, specific areas of interest in planning, including research interests and current plans for the dissertation.

Before acceptance into the program, two faculty members must agree to assume responsibility for guiding students in their studies.

### Major Fields or Subdisciplines

Students choose an area of concentration by the end of the first quarter in the program. Areas of concentration are fields in which planners characteristically become engaged, professionally or through research. They are not meant to be mutually exclusive.

*Regional and International Development.* This concentration concerns the interrelated aspects of area development in both developed and developing countries. The perspective on questions of area development is that of political economy and spatial analysis. Industrialization, urbanization, and rural development are major focal points of interest. Within this area, students are expected to choose an emphasis on either developing or advanced economics.

*Social Policy and Analysis.* The analysis of social services includes questions of production and distribution — how efficiently are services provided, who pays, and who benefits? These questions lead to more fundamental ones about the functions of planning and social policy. In the broadest sense, social policy comprises the whole context of social actions which together determine the distribution of goods, services, and opportunities between rich and poor, men and women, young and old, and people of different ethnic and social origins. Students may specialize in one of four areas: transportation, housing and real estate development, social services and social policy, or information decision systems.

*Environmental Analysis and Policy.* The natural environment is both the context within which all human activities take place and a social product of those activities. Environmental planning begins as an attempt to mitigate often unforeseen consequences of economic growth and expansion where these seem to threaten social well-being and continuing political consensus. Courses are designed to introduce students to the linkages between environmental problems and social processes.

*The Built Environment.* This area of concentration represents a blending of urban planning and architecture. It deals with the social and economic forces affecting the three-dimensional built environment on an urban scale. Within this area, students can choose one of two specializations: community planning and development or physical development and public policy.

*Additional Areas of Concentration.* In special circumstances, students may devise their own area in consultation with appropriate faculty members. Final approval of the proposed additional area of concentration must be obtained from the department chair. Further details may be obtained from the graduate adviser.

## Course Requirements

A high level of competence in an area of concentration and in planning theory and history, as measured by coursework and doctoral examinations, is required. In addition, a student must satisfy a requirement in research methods outside of coursework and is required to take Urban Planning 208 to aid in the preparation of dissertation research and writing.

*Planning Theory and History Requirement.* Planning theory is concerned with the ways that philosophers and social scientists have examined the question of how scientific and technical knowledge is to be joined to practice and action, with particular emphasis on the field of urban and regional planning. Planning history looks at how planning has evolved in the U.S., Western Europe, and elsewhere in the world as a form of institutionalized practice. Students are expected to acquire an understanding of both and become familiar with the several styles and forms of planning and the major debates in the field.

Two advanced courses are required of all doctoral students during the first year and must be passed with grades of A– or better: Urban Planning 210B and an advanced seminar (Urban Planning 210C). Students may waive the two courses by taking a six-hour comprehensive written examination. Students who do not pass the examination must either take the courses the next time they are offered or repeat the examination (once only) after a period of no less than six months.

Students who receive less than an A– in the courses may either repeat the courses once in the following year or sit for a waiver examination once in the failed subjects (history in the case of course 210B; theory in the case of 210C).

*Area of Concentration.* The area of concentration is defined as a subject in which a student is prepared to teach two or three courses and conduct advanced research. The area should be generally recognized by academics in other planning schools and should be substantially broader than a dissertation topic.

To prepare for an individualized area of concentration examination which tests compe-

tence in an area of planned study, students must submit for approval a plan of study to their advisory committee and to the coordinator of doctoral studies, preferably no later than the beginning of Winter Quarter of the first year. The plan must include (1) a short description of the area selected for study; (2) an indication of their major focus of research; (3) a short bibliography; and (4) a list of suggested courses and research papers through which they propose to prepare for the area examination. The list of courses must include a minimum of three from outside the department and three methods courses (see Research Methods Requirement). Once approved, the plan is filed with the graduate adviser. The normal time for completion of the area of concentration requirement is two academic years. The actual timing for the examination is set by agreement between the student and the advisory committee. Students may submit revised plans when necessary after consultation with their advisers and the coordinator of doctoral studies.

*Research Methods Requirement.* To fulfill the research methods requirement, a student must complete a sequence of three methods courses beyond the introductory level with grades of B or better. All doctoral students must first demonstrate competence in statistical methods at the master's level (Urban Planning 220B or equivalent) either by completing Urban Planning 220B with a grade of B+ or better or by submitting a waiver petition with appropriate documentation.

In addition, as part of their plan of study, all student must take a preapproved set of three advanced courses in research methods. These courses, which students should begin taking in the first year in the Ph.D. program, must be closely related to the area of concentration and must be completed with grades of B+ or better. A list of recommended courses is included in the Ph.D. handbook. Students may waive a portion of this requirement on the basis of prior work by submitting a petition with the appropriate documentation to their committee and the coordinator of graduate studies.

## Written and Oral Qualifying Examinations

For details on the written qualifying examinations, see Planning Theory and History Requirement and Area of Concentration in the Course Requirements section above.

After successful completion of the planning theory and history, area of concentration, and research methods requirements, students may nominate their doctoral committee. The committee (see graduate adviser for details) consists of four members, three of whom may be chosen from the advisory committee and one of whom must come from outside of the department.

The doctoral committee administers the University Oral Qualifying Examination. At this examination the student defends the dissertation proposal. To assist in the development of the

proposal, the student is required to complete Urban Planning 208.

The University Oral Qualifying Examination should be taken by the end of the third year of doctoral study.

## Urban Planning

### Lower Division Course

**88. Lower Division Seminar: Special Topics in Urban Planning.** Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in urban planning approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

### Upper Division Courses

**CM128. Global Environment and Development: Problems and Issues.** (Formerly numbered Architecture and Urban Planning CM128.) (Same as Geography M128.) Lecture, three hours; discussion, one hour. Requisite: Geography 5. Designed for juniors/seniors. Questions of population, resource use, Third World poverty, and the environment. Analysis of global economic restructuring and its connections to changing organization of production and resulting environmental impacts. Examination of emergent local and regional coalitions for self-reliance and sustainable development. Case studies from Africa, Latin America, Asia, and the U.S. Concurrently scheduled with course C252. P/NP or letter grading.

**M149. Transportation Geography.** (Formerly numbered Architecture and Urban Planning M149.) (Same as Geography M149.) Prerequisite: consent of instructor. Study of geographical aspects of transportation, focusing on characteristics and functions of the various modes and on complexities of intra-urban transport.

**179. Variable Topics in Urban Planning (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 179.) Lecture, three hours. Variable topics course in selected subjects in social policy and public services, urban and regional development, natural environment and resources, and the built environment. May be repeated for credit.

**C184. Looking at Los Angeles.** Discussion, three hours. Introduction to physical form and history of Los Angeles, with emphasis on visual observation of the city as a skill for architects and planners. Field trips throughout the city. Concurrently scheduled with course C284.

**187. Planning and Designing Our Cities.** (Formerly numbered Architecture and Urban Planning 187.) Introduction to urban planning and urban design, with emphasis on methods and tools used in practice. Overview of planning field; physical planning for redevelopment, for projects in expanding areas, and for new towns. Lectures (with illustrated examples), field visits, and presentation of students' own projects create framework for expanding understanding of urban planning and design process.

**CM189. Environmentalism: Past, Present, and Future (4 to 6 units).** (Formerly numbered Architecture and Urban Planning CM189.) (Same as Geography M115.) Discussion, three hours; optional field study, five to 10 hours. Exploration of history, politics, and theories of environmental movements, dynamics of race, class, and gender in relation to environmental agendas, and potential role of environmentalism in reshaping our society. Readings, discussion, and research papers. Offered annually as a graduate research seminar and biannually as an undergraduate upper division lecture and field studies program. Concurrently scheduled with course C265. P/NP or letter grading.

**M190. Human Environment: Introduction to Architecture and Urban Planning.** (Formerly numbered Architecture and Urban Planning 190.) (Same as Architecture and Urban Design M190.) Lecture, three hours; outside study, nine hours. Kinds of problems that arise in creating and maintaining an environment for urban activities, and approaches and methods of architecture and urban planning in helping to cope with such problems. Complexities involved in giving expression to human needs and desires in provision of shelters and movement systems, to possibilities and limitations of technology and building forms, and to issues involved in relating the human-made to the natural environment. Students encouraged to comprehend major urban issues both as citizens and as potential technical experts.

**191. Urban Structure and Dynamics.** Survey of urban history and evolution in the U.S., urban social theory, current growth trends, system of cities, urban economy and economic restructuring, traditional and alternative location theories, urban transportation, and residential location and segregation. P/NP or letter grading.

**192. Urban Policy and Planning.** Examination of current urban planning and policy issues and debates, such as normative theories of good urban form, metropolitan organization and governance, economic development and growth management, edge cities, spatial mismatch hypothesis, urban poverty, racial/ethnic inequality, gender and urban structure, sustainability, and future of cities. P/NP or letter grading.

**193. Special Topics in Urban Policy and Research.** Examination of a particular planning/policy subfield (e.g., economic development, environmental planning, housing and community development, international planning and development, land use, or urban design) in some depth. Specific topic area rotates depending on instructor. P/NP or letter grading.

**197. Planning for Minority Communities.** (Formerly numbered Architecture and Urban Planning 197.) Lecture, three hours. Introduction to inner-city policy issues on three separate levels: (1) each student develops a comprehensive inner-city urban program using materials from Alternatives Inner-City Future Exercise, (2) each student is expected to identify value assumptions and theories of social justice implicit or explicit in alternative intervention programs, and (3) each student is expected to participate in class discussions that emphasize minority issues which affect implementation.

**199. Special Studies (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 199.) Prerequisite: consent of instructor. Independent research or investigation on a selected topic to be arranged with a faculty member. May be repeated for credit.

## Graduate Courses

**M202A. Public Control of Land Development (3 to 6 units).** (Formerly numbered Architecture and Urban Planning M202A.) (Same as Law M286.) Lecture, three hours. Analysis of legal and constitutional constraints on land-use planning and development; administrative and environmental regulatory processes, including relationship between law and planning, formulating land-use legislation, zoning, subdivision controls, eminent domain, taxation, urban development, environmental law, and negotiation. Theory and doctrine applied to case studies; research project/paper and/or examination required.

**M202B. Governance: State, Regional, and Local (3 to 6 units).** (Formerly numbered Architecture and Urban Planning M202B.) (Same as Law M285.) Lecture, three hours. Analysis of structure and function of local, regional, and state government in historical and institutional context: organization, finance, intergovernmental relations, role of judiciary, public services, lawmaking, citizen participation through initiatives and referenda, and government tort liability.

**M202C. Seminar: Urban Affairs (3 to 6 units).** (Formerly numbered Architecture and Urban Planning M202C.) (Same as Law M526.) Seminar, two hours; two field trips. Consideration of selected aspects of housing law and policy, including current federal and state housing subsidies; remedies of housing consumers; impacts of market discrimination against children, racial minorities, and women; and local governmental laws influencing cost and supply, such as antispeculation and rent control legislation. Catalytic role of economic and community development in expansion of housing supply also considered.

**205. Seminar: Master's Thesis/Comprehensive Examination.** (Formerly numbered Architecture and Urban Planning 205.) Discussion, three hours. Designed for second-year students in M.A. program. Preparation for student thesis research and client projects. Through discussion of each other's work, participants learn how to design and implement a research/client project. Administrative issues and common implementation problems. S/U grading.

**206A. Urban Data Analysis: Demographic Applications.** (Formerly numbered Architecture and Urban Planning 206A.) Lecture, three hours; laboratory, one hour. Prerequisites: one graduate-level statistics course, familiarity with one of the packaged statistics programs. Development of basic demographic methods of analysis in a policy context, providing parallel development of content, data sources, and applications. Topics include data sources and errors, mortality, fertility, age structure, and their effects on planning policy.

**206B. Urban Data Analysis: Planning Models.** (Formerly numbered Architecture and Urban Planning 206B.) Lecture, three hours; laboratory, one hour. Prerequisite: course 206A or equivalent. Advanced course in urban data analysis which builds on course 206A. Examination of relationship between demographic and other socioeconomic processes, with emphasis on planning models. Topics include internal and international migration, crime analysis, transportation demand, and economic activity forecasting.

**207. Public Resource Allocation.** (Formerly numbered Architecture and Urban Planning 207.) Lecture, three hours. Prerequisite: passing score on microeconomics examination given first day of class. Practical use of economics in analyzing public resource allocation problems. Topics include review of marginal analysis, difference between equity and efficiency, public goods and free rider problem, environmental pricing, public service pricing, and conflicts between individual and collective rationality.

**208. Seminar: Advanced Research Methods.** (Formerly numbered Architecture and Urban Planning 208.) Seminar, three hours. Prerequisites: doctoral standing, consent of instructor. Required of Ph.D. students in or following second year. Process of developing dissertation proposal; introduction to alternative conceptions of science (or rigorous scholarship) now apparent in various social science paradigms. S/U grading.

**209. Special Topics in Planning Theory (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 209.) Seminar, three hours. Topics in planning theory selected by faculty. May be repeated for credit.

**210A. Introduction to Planning Theory.** (Formerly numbered Architecture and Urban Planning 210A.) Lecture, three hours. Historical introduction to major ideas and theories of planning which have influenced its development from the early 19th century to the present.

**210B. Comparative History of Planning Practice.** (Formerly numbered Architecture and Urban Planning 210B.) Lecture, three hours. Limited to Ph.D. and advanced M.A. students. History of city planning, its critics, and profession of planning through the 19th and 20th centuries. Comparison of evolution of the field in several countries, especially English-speaking countries.

**210C. Colloquium in Planning Theory.** (Formerly numbered Architecture and Urban Planning 210C.) Lecture, one hour; discussion, two hours. Prerequisite: course 210A. Limited to Ph.D. students. Introduction to some central theoretical issues of contemporary planning.

**211. Law and the Quality of Urban Life.** (Formerly numbered Architecture and Urban Planning 211.) Lecture, three hours. Introduction to law as an urban system, directed primarily toward those interested in intersection of law and policy: broad array of urban issues examined, as is law's role as a partial cause and cure of urban problems. Examination of law as a changing process rather than a collection of principles, so that students develop facility to interact with law and lawyers in a positive and forceful manner.

**214. Ethics in Planning.** (Formerly numbered Architecture and Urban Planning 214.) Examination of ethical dimensions of planning at many levels, including issues of bribery and corruption, aspects of client/sponsor and employer/employee relationships, collection, use, and release of information, and ethical aspects of administrative discretion. Ethical aspects of planning methods, concept of environmental ethics, and evolution of code of ethics in planning profession.

**M215. Spatial Statistics.** (Formerly numbered Architecture and Urban Planning M215.) (Same as Geography M272.) Lecture, two hours; discussion, one hour; laboratory, one hour. Prerequisite: consent of instructor. Specific techniques useful in analysis of spatial data and modeling of spatial distributions.

**216. Introduction to Nonprofit Development.** (Formerly numbered Architecture and Urban Planning 219.) Discussion, three hours. Overview of basic concepts and skills utilized in nonprofit development initiatives, especially by community-based organizations. Focus on nonprofit provision of subsidized housing, emphasizing way professionals "broker" debt and equity funding from private, governmental, and philanthropic sources. Use of client projects and negotiation exercises.

**217A-217B. Comprehensive Planning Project.** (Formerly numbered Architecture and Urban Planning 217A-217B.) Prerequisite: second-year standing. Comprehensive project brings together students of varying backgrounds and interests in joint solution of an urban planning problem. Each project spans two terms. Successful completion of project meets requirements of Comprehensive Examination Plan A of master's program.

**218. Graphics and Urban Information.** (Formerly numbered Architecture and Urban Planning 218.) Lecture, two hours; studio, one hour. Presentation of basic graphic methods and tools for conceptualization, analysis, and documentation of the built environment. Development of fundamental skills of graphic ideation and communication.

**219. Special Topics in the Built Environment (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 219.) Seminar, three hours. Topics in the built environment selected by the faculty. May be repeated for credit.

**220A. Quantitative Analysis in Urban Planning I.** (Formerly numbered Architecture and Urban Planning 220A.) Lecture, three hours. Prerequisite: passing score on basic mathematics proficiency examination given first day of class. Introduction to mathematical and statistical concepts and methods with applications in urban planning. Review of basic mathematical concepts fundamental to planning methods; linear and nonlinear functions focusing on growth curves and mathematics of finance; data measurement and display; descriptive statistics and probability. Introduction to use of computer as a tool in analysis of planning-related data.

**220B. Quantitative Analysis in Urban Planning II.** (Formerly numbered Architecture and Urban Planning 220B.) Lecture, three hours. Prerequisite: course 220A or equivalent (demonstrated by passing score on mathematics proficiency examination given first day of course 220A). Introduction to concepts of statistical inference and modeling, with emphasis on urban planning applications. Topics include sampling, hypothesis testing, analysis of variance, correlation, and simple and multiple regression. Use of computer as a tool in statistical analysis and modeling.

**221. Evaluation Methods.** (Formerly numbered Architecture and Urban Planning 221.) Lecture, three hours. Prerequisites: courses 207, 220A. Examination of methods used to evaluate efficiency and effectiveness of government programs and investment projects. Theory and practice of evaluation, with emphasis on techniques of cost-effectiveness analysis, cost-benefit analysis, discounting, sensitivity analysis, target efficiency, fiscal audits, and evaluation design.

**222. Introduction to Histories and Theories of Urban Planning.** (Formerly numbered Architecture and Urban Planning 222.) Lecture, 90 minutes; discussion, 90 minutes. Exploration of planning thought and practice over time, leading authors and key issues in field of planning, traditional and insurgent histories of planning, and alternative approaches to planning for multiple and pluralistic publics. Generally taken Fall Quarter of first year of M.A. program.

**223. Professional Development Seminar.** (Formerly numbered Architecture and Urban Planning 223.) Seminar, 90 minutes; discussion, 90 minutes. Recommended (but not prerequisite): course 222. Problems of professional practice. Development of methods which integrate theory and practice through readings and individual and collective analyses of each student's fieldwork experience. Students must be working in a field setting to enroll. Job fair is held at end of Fall Quarter to place students in field settings. Students combine course 223 with one term of course 490 or 496 to meet fieldwork requirement.

**229. Special Topics in Planning Methods (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 229.) Seminar on topics in planning methodology selected by faculty. May be repeated for credit.

**M231. Urban Housing and Community Development (3 to 6 units).** (Formerly numbered Architecture and Urban Planning M231.) (Same as Law M287.) Lecture, three hours; discussion, one hour. Examination of past 40 years of federal and state programs to stem urban decline and improve housing in the U.S.; comparison and contrast of legal and policy initiatives in areas of public housing, housing segregation, mortgage subsidies, landlord/tenant law, urban renewal, and community organizing. Research paper required.

**M232A. Introduction to Regional Planning: Evolution of Regional Planning Doctrines.** (Formerly numbered 232A.) (Same as Policy Studies M241.) Lecture, three hours. Critical and historical survey of evolution of regional planning theory and practice, with particular emphasis on relations between regional planning and developments within Western social and political philosophy. Major concepts include regions and regionalism, territorial community, and social production of space.

**232B. Spatial Planning: Regional and International Development.** (Formerly numbered Architecture and Urban Planning 232B.) Examination of theory and practice of spatial planning at regional, national, and international scales, including evaluation of regional growth strategies, national settlement policy, growth center concepts, and normative-ideological issues involved in international development planning. Generally taken in first year.

**233. Political Economy of Urbanization.** (Formerly numbered Architecture and Urban Planning 233.) Introduction to basic concepts and analytical approaches of urban political economy, with major emphasis on American urban problems. Topics include historical geography of urbanization, development and transformation of urban spatial structure, suburbanization and metropolitan political fragmentation, urban fiscal crisis, and role of urban social movements.

**M234. Regional Development, Urbanization, and Industrial Policy.** (Same as Policy Studies M242.) Lecture, three hours. Survey of theories of regional development, with special reference to "new economic geography" and its relevance for formulation of local economic development policies.

**235A-235B. Urbanization and Rural Development in Third World Countries.** (Formerly numbered Architecture and Urban Planning 235A-235B.) Lecture, 90 minutes; discussion, 90 minutes. Prerequisite for course 235A: course 266 or consent of instructor; for course 235B: course 235A or consent of instructor. Questions of urbanization and planning in first term; rural development in second term. Case studies from Latin America, Africa, and Asia. Lectures, student presentations, and policy debates.

**235C. Research Seminar: Alternative Development.** (Formerly numbered Architecture and Urban Planning 235C.) Discussion, three hours. Prerequisites: courses 235A-235B or M267A and 267B. Thesis and dissertation research seminar, consisting of review of major issues in an alternative development, specifically in poor countries, addressing issues in urban and rural development, with focus on one or more of following: inclusive democracy, appropriate economic growth, gender equality, and environmental sustainability; guest lectures and student presentations. S/U grading.

**M236A. Urban and Regional Economic Development I.** (Formerly numbered 236A.) (Same as Policy Studies M240.) Lecture, three hours. Introduction to industrial change and effect on urban and regional development theory and policy. Major topics include role of industrialization in economic development, explanations of regional industrial growth and decline, rise and fall of Fordism and its regional patterns, new forms of industrialization with particular emphasis on flexible production, and debates regarding political economy of industrialization.

**236B. Urban and Regional Economic Development II.** (Formerly numbered Architecture and Urban Planning 236B.) Lecture, three hours. Prerequisite: course M236A. Examination of local economic development theory and history and issues associated with different public policies. Topics include changing patterns of employment, job creation, job retention, and forms of income redistribution aimed at stabilizing a community's economy, with particular concern for women, minorities, and the poor.

**236C. Urban and Regional Economic Development III.** (Formerly numbered Architecture and Urban Planning 236C.) Discussion, three hours. Prerequisite: course 236B. Advanced seminar in community economic development, involving case study analysis, fieldwork, and individual student projects.

**238. Advanced Seminar: Urban and Regional Development.** (Formerly numbered Architecture and Urban Planning 238.) Seminar, two hours; discussion, two hours. Prerequisite: doctoral standing or consent of instructor. Advanced research seminar on major issues in urban and regional development theory and/or policy. Topics usually reflect faculty research projects and change from year to year. May be repeated for credit.

**239. Special Topics in Urban and Regional Development Policy (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 239.) Seminar, three hours. Topics in urban and regional development policy selected by faculty. May be repeated for credit.

**244. Housing Markets.** (Formerly numbered Architecture and Urban Planning 244.) Lecture, three hours. Ways that housing markets should but sometimes do not work in developed economies. Interaction of demand factors such as population distribution, household formation, income, and credit, as well as their particular impacts on groups of the population. Topics include filtering, housing search, segregation, pricing, production efficiency, organization of construction industry, market failure, and appropriate policy responses.

**245. Urban Public Finance.** (Formerly numbered Architecture and Urban Planning 245.) Lecture, three hours. Prerequisites: courses 207 and 220A, or consent of instructor. Theory and practice of urban public finance, with emphasis on methods used to fund public infrastructure. Topics include fiscal impact analysis of real estate development, effects of taxes on land-use decisions, benefit assessments to finance neighborhood public investment, private and intergovernmental contracting as method of supplying urban public services, tax increment finance for urban redevelopment, and municipal bond market.

**246. Housing in Social and Economic Development Policy.** (Formerly numbered Architecture and Urban Planning 246.) Seminar, three hours. Position of housing in national and regional development strategies, with focus on policies for Third World nations. Topics include nature of housing "need," market responses, evolution of housing policy, theory of intervention, alternative policies for increasing housing supply. Numerous case studies.

**247. Race, Gender, Culture, and Cities.** (Formerly numbered Architecture and Urban Planning 249.) Discussion, three hours. Exploration of multicultural context of contemporary U.S. cities, with focus on changing social and spatial relations of ethnic communities and their policy implications. Topics relate the new diversity and gender with global restructuring, new urban economy, and policies of workplace, housing, schools, and governance.

**249. Special Topics in Social Policy and Analysis (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 249.) Seminar, three hours. Topics in social policy and analysis selected by faculty. May be repeated for credit.

**250. Introduction to Social Policy.** (Formerly numbered Architecture and Urban Planning 250.) Lecture, three hours. Analysis of demographic changes, history, needs, and ideological debates which affect development of social policy in the U.S., compared with Western Europe.

**251. Planning for Multiple Publics.** (Formerly numbered Architecture and Urban Planning 251.) Lecture, three hours. Exploration of planning needs of various social groups in urban settings, using existing literature and research studies to determine appropriate mechanisms of planning for multiple publics. Analysis of communities in Los Angeles metropolitan area to gain insights into practical, theoretical, and methodological problems of planning for multiple publics. Generally taken in first year.

**C252. Global Environment and Development: Problems and Issues.** (Formerly numbered Architecture and Urban Planning C252.) Lecture, three hours; discussion, one hour. Questions of population, resource use, Third World poverty, and the environment. Analysis of global economic restructuring and its connections to changing organization of production and resulting environmental impacts. Examination of emergent local and regional coalitions for self-reliance and sustainable development. Case studies from Africa, Latin America, Asia, and the U.S. Concurrently scheduled with course CM128. S/U or letter grading.

**254. Survey Methods in Planning.** (Formerly numbered Architecture and Urban Planning 254.) Lecture, three hours. Prerequisite: course 220B or equivalent. Use of surveys in planning. Conducting of a small area survey, with emphasis on methods to obtain quality data appropriate for planning: questionnaire development, sample design, interviewing, data processing, and analysis. Presentation of survey to planners or public agencies.

**256. Social Impact Analysis.** (Formerly numbered Architecture and Urban Planning 256.) Lecture, three hours. Exploration of ways of assessing and determining social impacts on communities resulting from large-scale planning projects. Students develop mitigation measures to address identified adverse consequences.

**M259. Advanced Real Estate Development for Planners and Architects.** (Formerly numbered 219.) (Same as Architecture and Urban Design M259.) Discussion, three hours. Prerequisite: course 216. Review of basic site planning and design, with emphasis on how development plans (including proposed design solutions) are iteratively modified to achieve economic and political feasibility. Organized as a studio to produce a buildable project, including design and finance plans, for a client. S/U or letter grading.

**260A. Political Economy and the Environment.** (Formerly numbered Architecture and Urban Planning 260A.) Lecture, three hours. Debate about environmental policy is increasingly couched in economic terms. Environmental issues have become questions of political economy, as they influence international and domestic policy and reflect on functioning of market system. Examination of assumptions and implications of alternative approaches to political economy, as these pertain to questions of environmental policy.

**260B. Politics, Institutions, and the Environment.** (Formerly numbered Architecture and Urban Planning 260B.) Lecture, three hours. Planners face some important dilemmas in designing institutions and policies intended to correct or prevent disruptions of the environment. Introduction to these problems, focusing on essential theoretical questions that must be addressed in attempts to control environmental problems in our society. Review of recent developments in environmental policy in light of growing environmental movements; evaluation of current approaches to environmental problems, considering their institutional forms and epistemological foundations.

**261. Land-Use Control: Economic and Structural Perspectives.** (Formerly numbered Architecture and Urban Planning 261.) Lecture, two hours; discussion, one hour. Prerequisites: courses 260A and 260B, or consent of instructor. Comparison of regulatory methods of land-use control to command or planning methods. Basics of land use as a commodity in first part: land economics, land markets. Development, historically, of a structuralist perspective on use of land in cities and regions in second part. Land-use regulation (in third part) in light of first two, to see how effective it is in steering course of land development. Regulatory approach compared with real planning.

**M262A. Toxics Reduction: Science, Engineering, and Policy Issues.** (Formerly numbered Architecture and Urban Planning M262A.) (Same as Chemical Engineering M290U and Environmental Health Sciences M249.) Lecture, three hours. Requisites: courses 260A, 260B. Public health experts, industrial engineers, and planners are being asked to assess risks biologically active chemicals present and to take such risks into account in planning process. Examination of potential for toxics reduction and current state of government and industry activities in this area.

**262B. Urban Environmental Problems: Water Resources.** (Formerly numbered Architecture and Urban Planning 262B.) Lecture, three hours. Water is life and wealth in California, which has world's most extensive long-distance, interbasin water transfer system. To date, water resources planning has been devoted almost exclusively to adding facilities for water delivery. But conflicts over additional developments have basically precluded further extension of this system, despite growing pressures to increase supplies. Examination of environmental impacts, geography, use of water, and consideration of resource planning.

**M262C. Pollution Prevention (2 units).** (Formerly numbered Architecture and Urban Planning M262C.) (Same as Environmental Health Sciences M239.) Seminar, one hour. Designed for graduate students. Series of talks by academics, policymakers, industry representatives, and public interest advocates addressing opportunities for and obstacles to adopting principles of pollution prevention, including several case studies of specific policy and industry initiatives in this area. S/U grading.

**263. Natural Resource Conservation.** (Formerly numbered Architecture and Urban Planning 263.) Discussion, three hours. Prerequisites: courses 260A and 260B, or consent of instructor. Exploration, through reading, discussion, and student presentations, of meaning of resource conservation, its desirability, and ways of achieving it. Emphasis on integrated management of public lands, though students may attend particularly to a specific resource (minerals, water, timber, wilderness).

**M264. Environmental Law (3 to 6 units).** (Formerly numbered Architecture and Urban Planning M264.) (Same as Law M290.) Lecture, three to three and one-half hours. Examination of the field of environmental law through analysis of various legal issues and public policy: legal consequences of public decision-making strategies and allocation of primary responsibility for various environmental decisions. Focus on air pollution and Clean Air Act as a means of illustrating policy issues underlying the field.

**C265. Environmentalism: Past, Present, and Future (4 to 6 units).** (Formerly numbered Architecture and Urban Planning C265.) Discussion, three hours; optional field study, five to 10 hours. Exploration of history, politics, and theories of environmental movements, dynamics of race, class, and gender in relation to environmental agendas, and potential role of environmentalism in reshaping our society. Readings, discussion, and research papers. Offered annually as a graduate research seminar and biannually as an undergraduate upper division lecture and field studies program. Concurrently scheduled with course CM189. S/U or letter grading.

**266. City and Countryside in the Third World.** (Formerly numbered Architecture and Urban Planning 266.) Lecture, three hours. Review of basic literature and schools of thought on development theory through analysis of impact of mercantilism, colonialism, capitalism, and socialism on various urban and rural social and economic structures in the Third World. Presentation, through evaluation of theoretical writings and case studies, of complexity and diversity of developing countries. Emphasis on linkages between policy and rural and urban impacts. Gives students important background for courses M267A, 267B, and many of the other planning courses addressing Third World issues.

**M267A. Resource-Based Development Issues: First World and Third World — Environmental Issues and Processes.** (Formerly numbered 267A.) (Same as Geography M229.) Discussion, three hours. Recommended (but not requisite): course 266. Some major issues associated with development of specific natural resources. Topics include nature of particular resource (or region associated with it), its previous management, involvement of the state, corporations, and local groups, and environmental and social impact of its development.

**267B. Rural Development Issues.** (Formerly numbered Architecture and Urban Planning 267B.) Lecture, three hours. Recommended (but not prerequisite): course 266. Development more thoroughly of themes raised in earlier courses. Topics may include peasantries, development and rural women, agricultural ecology, comparative land reform, agrarian revolution, and special problems of tropical development. May be repeated for credit with consent of instructor.

**268. Advanced Seminar: Environmental Analysis and Policy.** (Formerly numbered Architecture and Urban Planning 268.) Discussion, three hours. Generally intended for second-year M.A. and Ph.D. students. Exploration of broad issues related to environmental and resource planning. May be repeated for credit.

**269. Special Topics in Environmental Analysis and Policy (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 269.) Seminar, three hours. Topics in environmental analysis and policy selected by faculty. May be repeated for credit.

**270. Homelessness: Housing and Social Service Issues.** (Formerly numbered Architecture and Urban Planning 270.) Lecture, 90 minutes; discussion, 90 minutes; one field trip. Review of current status of homelessness: who homeless are, what social services and housing are available, existing and proposed programs — appropriate architecture, management, and sources of funding. Outside speakers include providers of services to the homeless.

**M272. Real Estate Development for Planners and Architects.** (Formerly numbered Architecture and Urban Planning 272.) (Same as Architecture and Urban Design M272.) Lecture, two hours; workshop, two hours. Introduction to real estate development process specifically geared to students in planning, architecture, and urban design. Financial decision model, market studies, designs, loan packages, development plan, and feasibility studies. Lectures and projects integrate development process with proposed design solutions which are interactively modified to meet economic feasibility tests.

**273. Site Planning.** (Formerly numbered Architecture and Urban Planning 273.) Lecture, 90 minutes; laboratory, 90 minutes. Introduction to principles of site planning for urban areas.

**274. Introduction to Physical Planning.** (Formerly numbered Architecture and Urban Planning 274.) Lecture, 90 minutes; discussion, 90 minutes. Overview of physical planning, land use, site analysis, and surveys; general plans and community plans; environmental review; zoning and ordinances; social impacts.

**275. Inner-City Housing Policies: Old and New Approaches.** (Formerly numbered Architecture and Urban Planning 275.) Lecture, 90 minutes; discussion, 90 minutes. Study of federal and local housing policy as it affects inner cities, with emphasis on New York and Los Angeles. Examination of research on housing conditions and community development policies, with particular emphasis on alternatives such as resident-controlled housing; analysis of rehabilitation policies; review of new concepts and current legislative proposals.

**276. Planning Workshop (4 to 8 units).** (Formerly numbered Architecture and Urban Planning 276.) Lecture, one hour; discussion, one hour; laboratory, four hours. Prerequisite: consent of instructor. Planning projects with focus on physical planning.

**277. Historic Preservation: Principles and Practices.** (Formerly numbered Architecture and Urban Planning 277.) Lecture, 90 minutes; discussion, 90 minutes. Overview of preservation field, including history and theory, current legislation, tax incentives, preservation planning, landmark and district surveys and designations, adaptive reuse, citizen involvement, and social issues.

**278. Qualitative Research Methods for Planners and Designers.** (Formerly numbered Architecture and Urban Planning 278.) Lecture, 90 minutes; discussion, 90 minutes. Emphasis on conceptualizing research projects using grounded theory; relation to survey data. Techniques include content analysis, user needs analysis, participant observation, questionnaire construction, interview techniques. Projects include students' own research.

**279. Seminar: Public Space.** Seminar, three hours. Investigation of changes in production, consumption, design, and meaning of public space and analysis of socioeconomic, political, and cultural factors that lie behind them.

**281A. Introduction to History of the Built Environment in the U.S.** (Formerly numbered Architecture and Urban Planning 281A.) Lecture, two hours; discussion, one hour. Open to advanced undergraduates with consent of instructor. Introduction to history of physical forms of urbanization in America; survey of economic, political, social, and aesthetic forces behind creation of built environments.

**281B. Advanced Seminar: History of the Built Environment.** (Formerly numbered Architecture and Urban Planning 281B.) Discussion, three hours. Prerequisite: course 281A. Extended discussion of research methods and writing techniques suitable for advanced students working toward completion of some research on history of the built environment in the U.S.

**283. History of the American Household and American Home.** (Formerly numbered Architecture and Urban Planning 283.) Lecture, 90 minutes; discussion, 90 minutes. Prerequisite: course 281A or consent of instructor. Introduction to history of housing design in the U.S., emphasizing changing roles of women and men from Colonial times to the present and effects of these social changes on physical form of the dwelling and settlement. Discussion of concerns of professional architects and planners, as well as activity of bankers, builders, and homemakers.

**C284. Looking at Los Angeles.** (Formerly numbered 284.) Discussion, three hours. Introduction to physical form and history of Los Angeles, with emphasis on visual observation of the city as a skill for architects and planners. Field trips throughout the city. Concurrently scheduled with course C184.

**285. Great Planning Debates: Gender.** (Formerly numbered Architecture and Urban Planning 285.) Seminar, 90 minutes; discussion, 90 minutes. Seminar on substantial literature on complex relationships between gender, race, and class in urban planning. Alternative theories describe an inadequate fit between American households, housing, and services and document environmental inequities women and children face in contemporary cities. Students prepare oral seminar reports on topics such as social service provision, housing, transportation planning, economic development, and safe public spaces.

**M286. Transportation and Land Use.** (Formerly numbered 286.) (Same as Policy Studies M220.) Lecture, three hours. Historical evolution of urban form and transportation systems, intrametropolitan location theory, recent trends in urban form, spatial mismatch hypothesis, jobs/housing balance, transportation in the strong central city and polycentric city, neotraditional town planning debate, rail transit and urban form.

**287. Travel Behavior Analysis.** Lecture, three hours. Prerequisites or corequisites: courses 207, 220B. Descriptions of travel patterns in metropolitan areas, recent trends and projections into the future, overview of travel forecasting methods, trip generation, trip distribution, mode split, traffic assignment, critique of traditional travel forecasting methods and new approaches to travel behavior analysis.

**288. Transportation System Operations and Performance.** Lecture, three hours. Transportation system supply analysis, highway capacity analysis, traffic flow theory, measuring congestion, level of service, queuing, traffic impact analysis, travel demand management, parking management and pricing, high-occupancy vehicle treatments of highways, transit operations, transit performance, ridesharing, paratransit, specialized transportation for elderly and disabled people and the Americans with Disabilities Act.

**M289. Transportation Economics, Finance, and Policy.** (Formerly numbered 289.) (Same as Policy Studies M222.) Lecture, three hours. Overview of transportation finance and economics; concepts of efficiency and equity in transportation finance; historical evolution of highway and transit finance; current issues in highway finance; private participation in road finance, toll roads, road costs and cost allocation, truck charges, congestion pricing; current issues in transit finance; transit fare and subsidy policies, contracting and privatization of transit services.

**M290. Transportation and Environmental Issues.** (Formerly numbered 290.) (Same as Policy Studies M223.) Lecture, three hours. Regulatory structure linking transportation, air quality, and energy issues, chemistry of air pollution, overview of transportation-related approaches to air quality enhancement; new car tailpipe standards; vehicle inspection and maintenance issues; transportation demand management and transportation control measures; alternative fuels and electric vehicles; corporate average fuel economy and global warming issues; growth of automobile worldwide fleet; the automobile in the sustainability debate.

**298. Special Topics in Emerging Planning Issues (2 to 4 units).** Discussion, two to three hours. Topics in newly emerging planning issues such as role of cutting edge technology, innovative policies, and experimental programs. May be repeated for credit. S/U grading.

**375. Teaching Apprentice Practicum (1 to 4 units).** (Formerly numbered Architecture and Urban Planning 375.) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**M404. Joint Planning/Architecture Studio.** (Formerly numbered Architecture and Urban Planning 404.) (Same as Architecture and Urban Design M404.) Lecture, one hour; discussion, one hour; studio, four hours. Prerequisite: consent of instructor. Opportunity to work on joint planning/architecture project for a client. Outside speakers; field trips. Examples of past projects include Third Street Housing, Santa Monica; New American House for nontraditional households; Pico-Aliso Housing, Boyle Heights; working with resident leaders at Los Angeles City public housing developments.

**494. Supervised Independent Teaching (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 494.) Supervised individual teaching experience. May be repeated for credit. S/U grading.

**496. Field Projects (2 to 8 units).** (Formerly numbered 496F.) May be repeated for credit. S/U grading.

**501. Cooperative Program (2 to 8 units).** (Formerly numbered Architecture and Urban Planning 501.) Prerequisite: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

**596. Research in Planning (2 to 8 units).** (Formerly numbered 596P.) May be repeated for credit.

**597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations (2 to 8 units).** (Formerly numbered 597P.) May be repeated for credit. S/U grading.

**598. Preparation for M.A. Thesis in Urban Planning (2 to 8 units).** (Formerly numbered 598P.) May be repeated for credit. S/U grading.

**599. Ph.D. Dissertation Research in Planning (2 to 8 units).** (Formerly numbered 599P.) May be repeated for credit. S/U grading.

Eric H. Monkkonen, Ph.D., *Chair*

#### Professors

Bryan C. Ellickson, Ph.D. (*Economics*)  
Eric H. Monkkonen, Ph.D. (*History*)

#### Assistant Professors

Brian Taylor, Ph.D. (*Urban Planning*)  
Jan Reiff, Ph.D. (*History*)

## Scope and Objectives

Cities are multifaceted and can usefully be explored from more than one disciplinary perspective. The undergraduate specialization in urban studies brings together students and faculty from the Departments of Economics, Geography, History, Political Science, Psychology, and Sociology who share an interest in the modern city. The program gives students a solid grounding in the urban perspectives and methods of at least two departments. The specialization must be taken in conjunction with a major in the social sciences.

## Undergraduate Study

### Urban Studies Specialization

Students may elect to combine the urban studies specialization with a departmental major and may petition to have the area of specialization recognized with the bachelor's degree.

The option of completing an individual major in urban studies is also open to qualified students. For more information on individual majors, see the College of Letters and Science section of this catalog.

Students with a departmental major should seek advising in their major department. Those interested in the individual major should consult a Letters and Science counselor.

Courses within the specialization must be taken for a letter grade. The specialization must be taken in conjunction with a major in the division of social sciences.

### Preparation for the Specialization

*Required:* At least five of the following courses appropriate to the courses to be taken in the specialization: Economics 1, 2; Geography 4; Political Science 40; Psychology 10; Sociology 1, 18, 104 or equivalent.

### Upper Division Requirements

*Required:* Nine upper division courses, including (1) at least three courses outside the major department selected from Anthropology 167, Economics 120, Geography 150, Psychology 168, Sociology 158; (2) a minimum of three courses selected from one of the following suites within the major department: Economics 130, 133; Geography 150, 151, 156; History 154A through 154D; Political Science 143A, 143B, 167B; Psychology 127, 135; Sociology 132, 156, 160; (3) a minimum of three courses selected from one of the suites in item 2 in a department outside the major department; (4) in-

### Chairs

Jean B. deKernion, M.D. (*Fran and Ray Stark Foundation Professor of Urology*), *Chair*  
Robert B. Smith, M.D., *Vice Chair*

### Director

Mark S. Litwin, M.D., M.P.H., *Director of Medical Student Education*

## Scope and Objectives

The fundamental goal of the Department of Urology is to teach medical students the general principles of diagnosis and management in diseases of the genitourinary tract. Urology encompasses a wide scope of human illness, including conditions that are congenital and acquired, pediatric and adult, male and female, malignant and benign. The department functions to acquaint students with the skills necessary to manage these conditions in the initial stages and over the long term.

Instruction spans all four years of the undergraduate medical school curriculum but is concentrated during the clinical rotations. Students spend two weeks on the urology service during the third year and may return for an additional four-week elective rotation during the fourth year. The clinical experience includes time spent in the operating room, the faculty clinics, on ward rounds, and in didactic conferences that cover general urology, urological subspecialties, uropathology, and uroradiology. Urology teaching settings include the UCLA, Harbor-UCLA, Olive View-UCLA, and West Los Angeles VA Medical Centers.

For further details on the Department of Urology and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

### Adjunct Associate Professor

Jacqueline D. Goodchilds, Ph.D. (*Psychology*)

## Scope and Objectives

The Women's Studies Program, established in 1975, is an interdisciplinary academic program spanning departments, disciplines, and ideologies and offering two options for study: an undergraduate major and a minor. Students wishing to focus their studies on multidisciplinary perspectives in order to create a coherent and comprehensive analysis of women and gender may elect the major. Those wishing to enhance study in a traditional discipline may elect the women's studies minor in addition to a major in their chosen discipline.

The program offers the singular opportunity to study the full range of human experience and arrangements of social organization from the perspectives of those whose participation has been traditionally distorted, omitted, neglected, or denied — women in their racial, class, sexual, and cultural diversity. Students develop critical reasoning and analytical skills, research and communication skills, a deep appreciation for complexities of power, asymmetries in gender relations across time, class, and cultures, and conceptual tools for social change. Emphasis on multidisciplinary and multiethnic approaches assures a broader exposure to the humanities and social sciences than is commonly available within disciplinary confines. A background in women's studies offers unique contextual validation for today's woman and prepares students for a wide range of career and life choices, as well as for advanced study in traditional disciplines and the professions.

The field of women's studies has exploded over the past 30 years. It has developed a theoretical base, body of knowledge, and perspective which cannot be attained as a by-product of studying other fields. Where the study of women has been neglected or omitted, the field develops new knowledge through research and fills in gaps in the existing curriculum. Further, women's studies generates new perspectives on existing knowledge of women and gender, offers a critique of accepted beliefs and ideas, intellectually challenges existing structures of knowledge, and introduces new conceptual paradigms.

The core faculty members who teach women's studies courses come from various UCLA departments and professional schools. Many

professionals within and outside the University contribute their time, expertise, and enthusiasm. A governance committee composed of the chair, faculty members, and a student representative sets program policies and curricula.

The program sponsors a Student Association and assists other student groups with extra-curricular programming on feminist issues. Research in women's studies is promoted in cooperation with the Center for the Study of Women.

While no formal graduate program exists at UCLA at this time, graduate students are invited to use the program's resources, attend lectures and events, and participate in the feminist research seminar sponsored by the center.

## Undergraduate Study

### Bachelor of Arts Degree

The interdisciplinary major in women's studies may be taken alone or in conjunction with another Letters and Science major. In the case of a double major, no more than five courses may be applied toward both majors.

### Admission

To be admitted to the major, students must have completed Women's Studies 10, be in good standing, and formally register with the program. They are encouraged to declare their major as early as possible and to discuss their proposed course of study with the chair or undergraduate adviser.

Students are encouraged to draw on the University's diverse resources in creating their program of study. They may pursue traditional and/or innovative subjects in fields ranging from the humanities and fine arts to the social and life sciences. In addition to courses on the women's studies approved list, students may petition to have diverse courses accepted, including courses outside the College of Letters and Science, independent studies, or field study courses.

All courses applied toward the major must be taken for a letter grade, and students must have a GPA of 2.0 or better in women's studies courses to receive credit for completing the program. Courses in which they receive a grade of C– or lower may not be applied toward the major.

### Preparation for the Major

*Required:* Women's Studies 10. Students must also complete departmental lower division prerequisites, as applicable, for upper division women's studies courses in the disciplines.

### The Major

The major is designed to (1) impart core concepts in theory and critical analysis, research design, and methods, (2) provide exposure to a range of feminist scholarship across disciplines, and (3) enable students to acquire a depth of knowledge within one or two disciplin-

ary or topical fields of inquiry. To achieve this goal, the major is divided into three categories.

*Required:* At least 13 upper division courses as follows:

(1) Three *core* courses, including Women's Studies 110A or 110B, 130 or one course on the study of American ethnic minority women from the approved list of women's studies credit courses issued each term by the program, and 197 (departmental 197 courses may not be applied).

(2) A *distribution* of at least four courses, each from a different department or discipline, selected from the approved list of women's studies courses.

(3) Six additional *concentration* courses from one or two of the disciplines in which the core and distribution courses have been taken. Students may petition for interdisciplinary or topical concentrations such as feminist theory, women of color, women's health, or lesbian studies. If two fields are selected, the six courses may be in any ratio.

Four units of Women's Studies 199 may be applied toward the concentration requirement for the major. This limit does not apply to Women's Studies 199HA-199HB.

### Honors Program

The honors program is open to advanced junior and senior women's studies majors with a 3.0 grade-point average in women's studies courses and a minimum 3.0 overall GPA who have no outstanding Incomplete grades, and to majors who demonstrate ability to do honors work by submitting a paper to the program chair for approval. Students wishing to undertake honors in the major are advised to complete Women's Studies 197 by Spring Quarter of the junior year.

To be eligible for honors at graduation, students must successfully complete course 197 and two successive terms of independent studies (courses 199HA-199HB) with their faculty sponsor and receive a grade of B+ or better on their research paper/project. Course 199HA may be applied toward the concentration requirement; course 199HB is in addition to the minimum required concentration courses. Further information is available from the undergraduate counselor in the program office.

### Women's Studies Minor

The women's studies minor augments study in a traditional field. Students participating in this program are required to complete both a departmental major and the women's studies minor.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in 240 Kinsey Hall. They are encouraged to declare the minor as early as possible and to discuss their proposed course of study with the chair or undergraduate adviser.

*Required Lower Division Course:* Women's Studies 10.

*Required Upper Division Courses:* Women's Studies 110A or 110B, 120 or 197, and five elective courses from the approved list of women's studies courses issued each term by the program. At least three elective courses must be taken in departments other than the major department. No more than four units of any 199 course may be applied.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

## Women's Studies

### Lower Division Courses

**10. Introduction to Women's Studies: Feminist Perspectives on Women and Society.** Lecture, two and one-half hours; discussion, one hour. Introduction to study of women and men in society, covering comparative issues of social, political, and economic position in the workplace, family, cultural institutions; historical basis of women's subordination; the female experience; the male experience; relations between women and men; intersections of ethnicity, class, and gender; violence against women; cultural images of women and men; social roles of women and men and movements for social change.

**M14. Introduction to Lesbian, Gay, and Bisexual Studies.** (Formerly numbered 114.) (Same as Lesbian, Gay, and Bisexual Studies M14.) Lecture, three hours; discussion, one hour. Introduction to study of lesbians and gay men as social groups; examination of sexual orientation as a category for investigation; interdisciplinary approaches to theories and research on commonalities and diversity of gay, lesbian, and bisexual experience, including race/ethnicity. P/NP or letter grading.

### Upper Division Courses

#### Core Courses

**110A. Feminist Theories in Social Sciences.** Lecture/discussion, three hours. Requisite: course 10. Multidisciplinary explorations of theorists' attempts to describe, explain, and critique social institutions, considering impact of race, ethnicity, class, etc. Emphasis on relation of theories to change in law, work, politics, education, economics, family, religion, sexuality, etc. Applications of theories to research questions and methodologies.

**110B. Feminist Theories in the Humanities.** Lecture/discussion, three hours. Requisite: course 10. Examination of theoretical positions on gender and women in study of literature and the arts. Analysis of ways in which women and sexuality have been represented in cultural production, considering impact of race, ethnicity, class, etc. Applications of theories to research questions and methodologies.

**M110D. Philosophical Analysis of Issues in Feminist Theory.** (Same as Philosophy M192.) Lecture, three hours. Prerequisite for women's studies majors: course 10; for other students: one philosophy course or consent of instructor. Examination in depth of different theoretical positions on gender and women as they have been applied to study of philosophy. Emphasis on theoretical contributions made by the new scholarship on women in philosophy. Critical study of concepts and principles which arise in discussion of women's rights and liberation. Philosophical approach to feminist theories. May be repeated for credit with consent of instructor.

**197. Senior Research Seminar.** Seminar, three hours. Prerequisites: courses 10, and 110A or 110B. Designed for advanced junior/senior women's studies majors or minors. In-depth study of a major theme in feminist research. Themes vary by instructor and term. Students pursue independent research related to course theme, with guidance from instructor, then share and critique other student works in progress.

## Supporting Courses

**105. Topics in Women and Medicine.** Lecture/discussion, three hours. Examination of medical conditions of women in context of issues that impact women's health, health care, and health care providers. Discussion of basic health concepts and self-care; consideration of a woman's health speciality and ways to deliver health care to women. Exploration of roles and lifestyles of female physicians. P/NP or letter grading.

**M106. Imaginary Women.** (Same as Honors Collegium M106.) Prerequisite: upper division standing. Study of four female cultural archetypes — absconding wife/mother, infanticide mother, intellectual woman, and warrior woman — as they appear in their classical and modern manifestations in European and American cultures. P/NP or letter grading.

**M107A. American Women Writers.** (Same as English M107A.) Prerequisite: satisfaction of Subject A requirement. Survey of literary works by American women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by American women.

**M107B. British Women Writers.** (Same as English M107B.) Prerequisite: satisfaction of Subject A requirement. Survey of literary works by British women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by British women.

**M107C. Special Topics in Women and Literature.** (Same as English M107C.) Prerequisite: satisfaction of Subject A requirement. Variable specialized studies course in women and literature, with emphasis on a period, genre, particular theme, or nonnational literary grouping.

**M112. Special Topics in Women and the Arts.** (Same as World Arts and Cultures M112.) Lecture, three hours; outside study, nine hours. Prerequisite: course 10. Selected topics relating feminist theories to creation of art by women, with consideration of cultural contexts in which they work. Approach to be comparative, cross-cultural, and interdisciplinary. Consideration of artistic practice by women in relation to issues of power, representation, and access. May be repeated three times, except for credit toward women's studies major. P/NP or letter grading.

**M115. Topics in Study of Sexual and Gender Orientation.** (Formerly numbered 115.) (Same as Lesbian, Gay, and Bisexual Studies M115.) Lecture/discussion, three hours. Prerequisite: course 10 or M14. Studies in arts, humanities, social sciences, and/or life sciences on aspects of sexual orientation, gender identity, and lesbian, gay, and/or bisexual issues; variable topics may include cultural representations, historical and political change, life and health experiences, and queer or transgender theories; multiethnic and cross-cultural emphases. May be repeated for credit.

**M116. Sexuality and the City: Queer Los Angeles.** (Formerly numbered 116.) (Same as Lesbian, Gay, and Bisexual Studies M116.) Lecture, three hours. Prerequisite: course M14. Investigation of history, culture, and political economy of lesbian, gay, and bisexual Los Angeles.

**M119. Tristan, Isolde, and History of Heterosexuality.** (Same as German M119K.) Lecture, three hours; outside study, nine hours. Tristan and Isolde are among the more famous and enduring of European literary lovers, and following their tradition from Middle Ages to the present provides opportunity to consider a host of issues — from questions of genre to those of kinship, from representation of love to tyranny of gender, and history of heterosexuality. P/NP or letter grading.

**120. Internship in Women's Studies.** Seminar, three hours; internship, eight hours. Prerequisites: courses 10, 110A or 110B, at least two other upper division women's studies courses. Field studies course combining seminar with field placement. Practical experience in working on women's issues and connecting these experiences to methodological and theoretical themes explored in course 110A or 110B.

**M123. International Political Economy of Work and Gender.** (Same as Economics M158.) Lecture, three hours; outside study, nine hours. Prerequisite: Economics 1 or 5 or 100. Analysis of women's economic status in world economy by taking account of interdependencies between household and market activities and between economic systems and legal and political institutions. Introduction of alternative theoretical approaches in social sciences; presentation of empirical evidence.

**125. Women and Health Care in the U.S.** Lecture/discussion, three hours. Prerequisite: course 10. Examination in depth of various ways women provide health care in both paid and unpaid capacities and of political, economic, and social factors affecting women as recipients of health care. P/NP or letter grading.

**128. Roots of Patriarchy: Ancient Goddesses and Heroines.** (Formerly numbered CED 128.) Lecture, three hours. Examination of ancient goddesses and heroines — European, Neolithic, Near Eastern, Celtic, Scandinavian, Balto-Slavic, Indo-Iranian, and Greco-Roman — using translations of ancient texts, archaeological evidence, and feminist methodology in order to discover implications of ancient patriarchy on modern society.

**130. Women of Color in the U.S.** Lecture/discussion, three hours. Prerequisite: course 10. Exploration of experiences of African American, Asian American, Chicana, and Native American women in order to assess intersections of race, ethnicity, class, and gender. Contemporary and/or historical and/or theoretical perspectives on racism and its relation to feminism as defined by women of color.

**M132A. Chicana Feminism.** (Same as Chicana and Chicano Studies M110.) Lecture, three hours. Prerequisite: course 10 or consent of instructor. Examination of theories and practices of women who identify as "Chicana feminist." Analysis of writings of Chicanas who do not identify as feminist but whose practices attend to gender inequities faced by Chicanas both within the Chicana/Chicano community and the dominant society. Attention to Anglo-European and Third World women.

**M132B. Contemporary Issues among Chicanas.** (Same as Chicana and Chicano Studies M154.) Prerequisite: course 10 or consent of instructor. Overview of conditions facing Chicanas in the U.S., including issues on family, immigration, reproduction, employment conditions. Comparative analysis with other Latinas.

**M133. Chicana Lesbian Literature.** (Same as Chicana and Chicano Studies M133 and Lesbian, Gay, and Bisexual Studies M133.) Lecture, three hours. Exploration of intersection of radical First and Third World feminist politics, lesbian sexuality and its relationship to Chicana identity, representation of lesbianism in Chicana literature, meaning of *familia* in Chicana lesbian lives, and impact of Chicana lesbian theory on Chicana/Chicano studies.

**134. Gender, Science, and Theory.** (Formerly numbered 110C.) Prerequisite: course 10. Examination of differing theoretical perspectives on relation between ideologies of gender and conceptualization and practice of science and medicine. Study of relations among gender, race, class, and sexual orientation and production and legitimation of scientific knowledge. Applications of theoretical critiques to research design, practice, and interpretation.

**135. Women in Physics and Mathematics.** Examination of lives and scientific contributions of five women of the 20th century — Lise Meitner, discoverer of nuclear fission; Emmy Noether, mathematician; Maria Goeppert Mayer, discoverer of nuclear shell model; Dorothy Crowfoot Hodgkin, X-ray crystallographer and organic chemist; and Chien-Shiung Wu, nuclear physicist. P/NP or letter grading.

**M137E. Work Behavior of Women and Men.** (Same as Psychology M137E.) Prerequisite: course 10 or Psychology 10 or senior standing. Examination of work behavior of women and men. Topics include antecedents of career choice, job findings, leadership, performance evaluation, discrimination and evaluation bias, job satisfaction, and interdependence of work and family roles.

**M137J. Psychology of Language and Gender.** (Same as Communication Studies M124 and Psychology M137J.) Lecture, three hours. Prerequisites: Psychology 10 or equivalent, junior standing. Examination of current topics at intersection of gender and language. Topics include sex differentiation in language cross-culturally; sex bias in lexicon and usage; sex differences in lexicon, syntax, phonology, and nonverbal behavior; development of sex-differentiated language in children; "women's" and "men's" language in various racial/ethnic/class/sexual preference groups; and conversational interaction.

**139. Women and Art in Contemporary U.S.** (Formerly numbered CED 139.) Lecture/discussion, three hours. Prerequisite: course 10. Exploration of some significant cultural issues of contemporary American women's art movement. Representation, resistance, and critical intervention in relation to gender, race, and class. Emphasis on visual and performance arts as these reflect various perspectives of feminism.

**M148. Women in Higher Education.** (Same as Education M148.) Limited to juniors/seniors. Education and career development of women in higher education. Specifically, emphasis on undergraduate and graduate women; women faculty and administrators; curricula, programs, and counseling services designed to enhance women's educational and career development, affirmative action, and other recent legislation.

**M154P. Gender Systems: North American.** (Formerly numbered M154.) (Same as Anthropology M154P) Lecture, three hours. Prerequisite: course 10. Designed for upper division social sciences majors. Comparative study of women's lives and gender systems in North American cultures from an anthropological perspective. Critical review of relevant theoretical and practical issues using ethnography, case study, and student fieldwork, internship, and presentation. P/NP or letter grading.

**M154Q. Gender Systems: Global.** (Formerly numbered M154.) (Same as Anthropology M154Q.) Lecture, three hours. Prerequisite: course 10. Designed for upper division social sciences majors. Comparative study of gender systems globally from an anthropological perspective. Outline of material conditions of women's lives in the world — gender division of labor, relationship of gender to the state, and colonialism and resistance movements. P/NP or letter grading.

**M155Q. Women and Social Movements.** (Formerly numbered M160.) (Same as Anthropology M155Q.) Lecture/discussion, three hours. Recommended (but not requisite): prior women's studies or anthropology courses. Comparative studies of social movements (e.g., nationalist, socialist, liberal/reform), beginning with Russia and China and including Cuba, Algeria, Guinea-Bissau, Mozambique, Nicaragua, and Iran. Analysis of women's participation in social transformations and the centrality of gender interests. P/NP or letter grading.

**M158. Women in Italian Culture.** (Same as Italian M158.) Lecture, three hours; discussion, one hour; outside study, eight hours. Examination of role of women in Italian society through history, politics, literature, film, and art. Italian majors required to read texts in Italian. P/NP or letter grading.

**M162. Sociology of Gender.** (Same as Sociology M162.) Lecture, three hours; discussion, one hour. Prerequisite: course 10 or Sociology 1 or consent of instructor. Examination of processes by which gender is socially constructed. Topics include distinction between biological sex and sociological gender, causes and consequences of gender inequality, and recent changes in gender relations in modern industrial societies. P/NP or letter grading.

**M163. Gender and Work.** (Formerly numbered M164.) (Same as Sociology M163.) Lecture, three hours. Requisite: course 10 or Sociology 1. Exploration of relationship of gender to work, concentrating on the U.S. experience but also including some comparative material. Particular emphasis on analysis of causes and consequences of job segregation by gender and of wage inequality.

**M165. Psychology of Gender.** (Same as Psychology M165.) Lecture, three hours. Consideration of psychological literature relevant to understanding contemporary sex differences. Topics include sex-role development and role conflict, physiological and personality differences between men and women, sex differences in intellectual abilities and achievement, and impact of gender on social interaction.

**170. Jurisprudence of Sexual Equality.** Prerequisites: course 10 and one course from 110A through M110D or Political Science 10 or Philosophy 6 or 9 or consent of instructor. Exploration of models of equality described and/or advocated by legal theorists — equality of opportunity, equality of outcome, equality of respect, etc. — using specific problems of women (e.g., sexual harassment or pregnancy leave policy) for purposes of comparison and critique.

**M172. The Afro-American Woman in the U.S.** (Same as Afro-American Studies M172 and Psychology M172.) Limited to juniors/seniors. Impact of social, psychological, political, and economic forces which impact on interpersonal relationships of Afro-American women as members of a large society and as members of their biological and ethnic group.

**M173. Interracial Work, Friendship, and Love Relationships of African American Men and Women.** (Formerly numbered M103.) (Same as Afro-American Studies M175.) Seminar, three hours. Examination of factors that influence development, maintenance, and dissolution of interracial relationships of African Americans in three areas: work life, friendships, and intimate love relationships. P/NP or letter grading.

**185A-185Z. Special Topics in Women's Studies.** Preparation: one prior women's studies course. Designed for juniors/seniors. Specialized or advanced study in an area within women's studies.

**199. Special Studies in Women's Studies.** Prerequisites: at least two upper division women's studies courses, minimum 3.0 GPA, consent of instructor and program director. Directed program of independent readings and/or research on a specific topic within women's studies. No more than four units may be applied toward women's studies major or minor.

**199HA-199HB. Directed Studies for Honors.** Requisites: course 197, 3.0 GPA overall, 3.0 GPA in major. Limited to women's studies honors majors. Two-term sequence to research and write honors thesis under direction of faculty sponsor. In Progress grading.

Christopher Waterman, Ph.D., *Chair*  
Judy Mitoma, M.A., *Chair and Integrated Concentration Adviser*  
Victoria Marks, M.A., *Dance Concentration Adviser*  
Peter Nabokov, Ph.D., *Cultural Studies Concentration Adviser*

### Professors

James W. Bassler, M.A.

Irma Dosamantes Beaudry, Ph.D.

Michael O. Jones, Ph.D.

Judy Mitoma, M.A.

Christopher Waterman, Ph.D.

### Professors Emeriti

Elsie Dunin, M.A.

Pia Gilbert

Alma M. Hawkins, Ed.D.

Carol Scothorn, M.A.

Marion Scott

Doris Siegel

Allegra Fuller Snyder, M.A.

Emma Lewis Thomas, Ph.D.

### Associate Professors

Judith Alter, Ph.D.

Donald J. Cosentino, Ph.D.

Angelia Leung, M.A., C.M.A.

Peter Nabokov, Ph.D.

Colin Quigley, Ph.D.

### Assistant Professor

Victoria Marks, M.A.

### Lecturers

Nzingha Camara

Pamela Fairweather

Charles Tomlinson

Rebecca Wright

### Visiting Professor

Peter Sellars, B.A.

### Adjunct and Visiting Associate Professors

Ronald E. Brown, *Adjunct*

Guillermo Gomez Pena, *Visiting*

David Rousseve, M.A., *Visiting*

### Visiting Assistant Professors

John Bishop

Janis Brenner

Judy Gantz-Siegel, M.A., C.M.A.

David Gere, M.M.

## Scope and Objectives

The mission of the Department of World Arts and Cultures (WAC) centers on the creation, critical analysis, and contextualization of arts practice throughout the world, with particular reference to the diverse populations of the U.S. The program reflects an approach that advocates the inclusion and integration of performance practice, studies in cultural and performance theory, and the real-world application of both forms of knowledge. It offers an environ-

ment for interdisciplinary inquiry that responds to the challenges facing our pluralistic society. Within this context, both practical and theoretical studies in dance and interdisciplinary artistic and expressive performance practices are major emphases.

The undergraduate program offers concentrations in dance and cultural studies, as well as the more flexible integrated and honors options. The graduate program offers a Master of Arts in Dance, a Master of Arts in Dance/Movement Therapy, and a Master of Fine Arts in Dance. Students are encouraged to explore relationships among the different curricular emphases, including ethnology, history and criticism, movement studies, education, and therapy, as a means to tailor a particular course of study to their professional goals.

Students in world arts and cultures at UCLA study with faculty members of international standing engaged in both creative artistic work and research. Students from this unique department have gone on to pursue advanced degrees and/or careers in dance- and humanities-based fields, arts management or practice, education, cultural policy, community outreach, architecture and urban planning, law, public service, and many others, limited only by their imaginations.

## Undergraduate Study

### Bachelor of Arts Degree

The world arts and cultures major leads to the Bachelor of Arts degree and is designed to offer choice and flexibility while maintaining balance and rigor. Courses may be taken in three different categories — performance, theoretical, and applied. Performance courses include the study of movement, art making, and aesthetic expression. Theoretical courses consider critical analysis, history, and theory as means for the contextualization of creative products and processes. Applied courses address the utilization of artistic practices in alternative formats and real-world situations. Courses from each of these categories are configured into the following concentrations, one of which students declare by the end of their sophomore year.

The *dance concentration* offers courses in a wide range of idioms from throughout the world, including studies in modern dance and ballet. Opportunities for performance, production, and movement studies, as well as dance history, kinesiology, and performance criticism and philosophy, are further options in this concentration. Multimedia forms of expression integrating music, theater, visual arts, film, and other technologies along with hybrid forms of cultural expression utilizing both emerging and classically based vocabularies are encouraged.

The *cultural studies concentration* allows students to select from a range of courses offered within the department, as well as in anthropology, art history, ethnomusicology, folklore and

mythology, film, music, and theater. Students may also consider courses from ethnic and area studies programs and may organize their course of study in relation to particular interests or professional goals (e.g., international comparative studies, intercultural studies, area specializations such as Africa, Asia, or Latin America, minority discourse, gender or women's studies).

The *integrated studies concentration* offers an opportunity for students to select an equal number of units from each of the three categories of course listings — performance, theoretical, and applied. Opportunities for hands-on experience through internships, apprenticeships, and field studies, as well as the opportunity to develop skills in media technology, are emphasized in this concentration.

The *honors concentration* is intended for exceptional students who have a minimum UCLA 3.5 grade-point average. Students can select their own program of study in close consultation with faculty. They develop a rationale outlining the objectives of their study, a self-assessment of their needs for the future, a proposed list of courses, some indication of their senior project, and a title for the course of study. This proposal is submitted to the student affairs officer and the faculty at the end of the sophomore year. After approval, students are assigned a faculty adviser for their junior and senior years. This structure allows them to focus on personal educational objectives.

Students who wish to confer with the departmental counselor regarding program planning and major requirements should contact Wendy Temple, Student Affairs Officer, at (310) 825-8537.

### Admission

New students are admitted to the major for Fall Quarter only. All applicants are reviewed individually, based on a questionnaire, transcripts, two letters of recommendation, and a personal essay. These materials are requested from students in mid-December, after the general UC application is received and processed, and are due back in the department in January. For freshman applicants, college placement test scores are also considered. Freshmen interested in the dance concentration must submit a videotape. Transfer applicants interested in the dance concentration must participate in a January audition.

Current UCLA students who petition to change their major are required to meet with the student affairs officer prior to application. They are advised to take world arts and cultures courses during the term in which they apply to the program. They must have a minimum 3.0 overall grade-point average and no more than 120 quarter units. Students interested in the dance concentration must participate in the January transfer student audition.

### The Major

The major includes a core of 32 units introducing the diverse forms of artistic practice, one of

four concentrations (see above) consisting of 48 units, and an eight-unit senior project.

The following courses are required:

(1) A core of nine courses (32 units): World Arts and Cultures 12, 20, 80A-80B, 80C, 134, 140A or 140B, Design 182, and Anthropology 9 or 33.

(2) A concentration of 48 units (see specific course listings below) as follows:

*Dance Concentration:* 32 units from group A, eight units from group B, eight units from group C

*Cultural Studies Concentration:* eight units from group A, 32 units from group B, eight units from group C

*Integrated Studies Concentration:* 16 units from group A, 16 units from group B, 16 units from group C

*Honors Concentration:* 48 units of coursework to be approved by the department faculty; a minimum 3.5 UCLA grade-point average is required. Proposals are to be submitted to the department faculty at the end of the sophomore year.

#### Group A: Performance Courses

Ethnomusicology 91A through 91Z, Theater 12, 15, 50, 130A, 138 (by petition), 150, World Arts and Cultures 1C, 5, 7A, 7B, 7C, 70, 71B through 79, 101A, 101B, 101C, C102A, C102B, C102C, 103, 105, 106A, 106B, 106C, C107A, C107B, C107C, 115, 130 (by petition), 140C, 149, C171B through C179, 191, 192.

#### Group B: Theoretical Courses

Anthropology 9 or 33 (if not used to satisfy the core requirement), 34, 60, 114Q, 114R, 130, 133R, 135A, 135B, 141, 144, M145, 146, 150, 151, 152, M154P, M154Q, 161, M164, 165, 167, 171, 172R, M172T, 173Q, 174Q, 175R, 175T, 175U, Art History 50, 51, 54, 55A, 55B, 56A, 56B, 57, 104A, 104B, 110G, 114A, 114C through 114F, C115D, C115E, C115F, C117A, C117B, C117C, 118A, 118D, Ethnomusicology 106A, 106B, 106C, M108A, 108B, M110A, M110B, M111, M115, 120A, 120B, M126, 128, 136A, 136B, 147, 156A, 156B, 160A, 160B, 174, M180, 181, Film and Television 106C, 112, 128, Folklore and Mythology 101, C105, CM106, C107, 108, 118, M122, M127, M128, M129, 130, 131, CM132, M142, M149, M150, M154A, M154B, M155, 163, C165, M170, 172, C175, M180, M181, M182, 183, CM184, 190, German 134, Music 158, Musicology 130, 135A, 135B, 135C, Theater 11, 13, 101A, 101B, 101C, 102A, 102B, 102C, 102E, M103A through 103F, 104A, 104B, 104C, 106, 107, 111A, 111B, 111C, World Arts and Cultures 40, M112, 128, 130 (by petition), 132A, 135, 141A, 150, M152, C161A, 181A through 181D, 182, 183, CM184, C187.

#### Group C: Applied Courses

Anthropology 118B, M136Q, 143, Ethnomusicology 10A, 10B, 10C, Folklore and Mythology C145, Music 1A, 1B, 4A, 4B, 4C, 20A, 20B, 20C, 23, 105, Theater 174A, World Arts and Cultures 23L, 48, 50, 110, C120, 122, 123A,

123B, 125, 126, C127, 130 (by petition), 141, 142, 144, 145, 148, 151A, 151B, 153, C160A, C160B, C160C, C180A, C180B.

(3) World Arts and Cultures 190A-190B (eight units total). These courses are the culmination of the major and have three possible areas of focus — performance, applied research, or cultural studies research — as follows: (a) the performance project is a creative project leading to the production and public performance of original or traditional work; (b) the applied research focus implies an application of knowledge in a hands-on situation and includes projects in and with the community or campus; (c) the cultural studies focus involves students in independent ethnographic research in some aspect of the arts. The subject of study can be found in, but is not restricted to, the Los Angeles community. Field study includes the use of video, slides, and sound recordings.

## Graduate Study

The following constitutes introductory information regarding the graduate degree program. For a complete outline of degree requirements, see *Program Requirements for UCLA Graduate Degrees* available in the program office and accessible from the Graduate Division homepage at <http://www.gdnet.ucla.edu>.

## Master's Degrees

The Department of World Arts and Cultures offers the following master's degrees: Master of Arts degree in Dance, Master of Arts degree in Dance/Movement Therapy, and Master of Fine Arts degree in Dance.

## Admission

For the Master of Arts in Dance or Dance/Movement Therapy, a baccalaureate degree with an undergraduate major in dance or equivalent experience is required. Some of this experience may have been gained outside the academic setting through such avenues as dance studios or dance performance. Prospective students may contact the UCLA Department of World Arts and Cultures for a brochure which gives additional information on the overall graduate program and specific curriculum for the stated area of specialization.

In addition to the application for admission, the department has its own screening procedure: three letters of recommendation, an audition, and a personal interview. The audition evaluates applicants' creative potential and technical proficiency with consideration toward applicants' primary focus.

Admission to the dance/movement therapy program requires one undergraduate course in abnormal psychology in addition to the requirements listed above.

M.F.A. applicants must demonstrate exceptional promise in either choreography or performance. Auditioners in choreography show three original works; auditioners in perfor-

mance present three selections already in their repertory. Applicants are required to prepare a statement (no more than one page) describing the works shown.

## Areas of Study

The M.A. degree in Dance is designed for students preparing to continue professionally as researchers and teachers. The M.A. program in Dance/Movement Therapy is approved by the American Dance Therapy Association (ADTA). The M.F.A. degree is designed for students preparing to continue professionally as choreographers and/or performers.

Unique interests in areas such as dance ethnology, education, history, philosophy and criticism, dance kinesiology, dance production, dance and media, computer-aided dance studies, and music for dance may be pursued on advisement.

## Course Requirements

Course requirements, beyond the basic requirements previously outlined, vary for each program and are determined under the direction of faculty advisers.

*M.A. in Dance.* Thirty-six units, including nine courses (or more depending on the specialization chosen), distributed as follows: (1) World Arts and Cultures 230; (2) four courses (16 units) in the department at the graduate level (200 series); (3) four courses (16 units) in or outside the department at the upper division or graduate level. These may not be courses taken to fulfill prerequisites or studio technique courses. Eight units of 500-series courses (World Arts and Cultures 596A, 596R, 598) may be applied toward the total course requirement; four units may be applied toward the minimum graduate course requirement. Specific concentrations within the M.A. may be designed under the direction of faculty advisers.

*M.A. in Dance/Movement Therapy.* A total of 66 units distributed as follows: (1) World Arts and Cultures 230; (2) 46 units in the department at the graduate level (200 series); (3) 16 units in or outside the department at the upper division or graduate level. These may not be technique courses nor courses taken to fulfill prerequisites. A total of 18 units of 500-series courses (World Arts and Cultures 596A, 596R, 598) may be applied toward the total course requirement; eight units may be applied toward the minimum graduate course requirement.

These course requirements are to be partially fulfilled by World Arts and Cultures 225A-225B; C260A-C260B-C260C; C261A, 261B-261C; 262A-262B-262C; 460A-460B-460C; 596A, 596R.

While an undergraduate course in abnormal psychology is a prerequisite for the M.A., other courses in psychology (developmental, personality, and group dynamics) are highly recommended.

The program in dance/movement therapy requires an intensive experience in a therapeutic setting during the second year. This internship provides an orientation to the hospital clinical setting and experience as a movement therapist.

*M.F.A. in Dance.* A total of 72 units distributed as follows: (1) 20 units of choreographic/performance training, including at least 12 units from World Arts and Cultures 211A through 211D and at least eight units from 192 and/or 490; (2) 12 units of studio technique courses at the 400 level; (3) 12 units of production courses from 142, 145, 221, C227, 240B, 240C, 240D; (4) eight units of movement studies from 122, 225A, 225B; (5) eight units of cultural/critical studies from 181A, 181B, 181C, 181D, 182, 183, 230, 232, C233, 234, 235, 236, 240A, 280A, 280B, CM284, C287; (6) eight units of education, internship, field studies, and practicum studies from 151A, 151B, 153, 191, 251A, 251B, 251C, C261A, 261B, 261C, 262A, 262B, 262C, 400, 441, 452, 498; (7) four units of elective coursework. Only four units of 500-level courses may be applied toward the degree. Students must enroll in a studio technique class every quarter except during an internship or the final concert/production. The required 72 units for the degree must include a minimum of 32 units of coursework at the graduate (200 and 400) level. The four units of coursework at the 500 level may be applied toward the overall unit total. Required courses are individually designed through advisement with the faculty academic adviser.

Students are expected to choose choreography or performance as their M.F.A. focus.

## Comprehensive Examination Plan

During the first year students in dance or dance/movement therapy who decide to take the comprehensive examination option write a proposal stating why this option is most suitable to their M.A. program. There are specific steps to the proposal presentation and approval process. Guidelines may be obtained from the department.

After completing coursework, passing the presentation, and nominating the comprehensive examination committee, students may file the advancement to candidacy petition. Students are allowed one year after advancement to candidacy to complete their comprehensive examination.

Examining committee members grade each question (1) pass with honors, (2) pass, (3) pass minus, or (4) fail. In order to pass, each question must be graded pass or better by two out of three committee members. If the questions are failed, the examination may be retaken once only during the next scheduled examination period.

For M.F.A. students, the preliminary examination consists of a written proposal submitted to a faculty panel and a presentation of proposed works. The written proposal includes funda-

mental concepts, objectives for the concert material, and production plans.

After passing the preliminary examination, a three-member M.F.A. comprehensive examination committee is selected to advise students in developing the final concert material. Obtain specific guidelines for nominating the comprehensive examination committee from the department. The student may advance to candidacy when the coursework toward the degree is completed and the presentation is passed. Students are allowed one year after advancement to candidacy to complete their M.F.A. comprehensive examination. Choreographers and performers prepare a major concert in the third year, or a series of concerts in the second and third years. An oral defense of the concert material is held with the M.F.A. comprehensive examination committee and production staff.

A written production book with visual materials and a concept paper are completed after the performance. Obtain specific guidelines from the department.

### Thesis Plan

During the first year M.A. students in dance or dance/movement therapy who decide to take the thesis option discuss potential thesis topics with faculty members. They prepare a written proposal which is presented to a faculty panel. After the thesis proposal is approved by the faculty panel, a three-member thesis committee is formed. There are specific steps to the proposal presentation and approval process. These guidelines may be obtained from the department.

After completing coursework, passing the presentation, and selecting the thesis committee, students may file the advancement to candidacy petition. Students are allowed one year after advancement to candidacy to file the thesis.

## World Arts and Cultures

### Lower Division Courses

**1A-1B. Fundamentals of Modern Dance (2 units each).** Laboratory, four hours. Designed for nondance majors. Courses should be taken in sequence. Study of dance technique, improvisation, and choreography. Critical viewing, reading, and discussion of modern dance artists' works. Each course may be repeated once. P/NP or letter grading.

**1C. Fundamentals of Modern Dance (2 units).** Laboratory, four hours. Study of dance technique and improvisation. Critical viewing, reading, and discussion of modern dance artists' works. May be repeated twice. P/NP or letter grading.

**5. Creative Process: Developing Imagination and Craft (2 units).** Lecture, one hour; laboratory, three hours. Introduction to creative exploration in movement through improvisational and compositional exercises that access and develop the imagination, find relationship between imagination and dance making, and enrich movement vocabulary. May be repeated once. P/NP or letter grading.

**6. Fundamentals of Ballet (2 units).** (Formerly numbered Dance 6.) Laboratory, four hours. Study of ballet techniques and principles, including dance terminology. May be repeated twice; only two units may be applied toward the major. P/NP or letter grading.

**7A-7B-7C. Beginning Ballet (2 units each).** (Formerly numbered Dance 7A-7B-7C.) Laboratory, four hours. Limited to world arts and cultures majors. Study of beginning ballet techniques and principles, including dance terminology. Only two units may be applied toward the major. P/NP or letter grading.

**10. Introduction to Dance (2 units).** (Formerly numbered Dance 10.) Introduction to the many and varied theoretical aspects of dance as a discipline.

**12. Integrated Arts.** (Formerly numbered 100.) Lecture, three hours. Limited to world arts and cultures majors. Introduction to concepts and theories which integrate and underlie the multidisciplinary world arts and cultures major.

**20. Fundamentals of Music: Sounds and Systems.** (Formerly numbered Dance 20.) Lecture, three hours; laboratory, one hour. Study of basic musical concepts through movement, with introductory survey of major world music/dance systems. P/NP or letter grading.

**23L. Laboratory in Conditioning for Dancers (2 units).** (Formerly numbered Dance 23L.) Laboratory, four hours. Specific conditioning principles applied to strengthening, stretching, and endurance training. Personalized attention enables students to increase their ability to dance more efficiently and to prevent dance injuries. May be repeated twice. P/NP grading.

**25. Introduction to Dance/Movement Notation (2 units).** (Formerly numbered Dance 25.) Lecture, two hours; laboratory, one hour. Beginning skills in observing, analyzing, reconstructing, and recording dance/movement based on principles of the labanotation and labananalysis systems.

**40. Introduction to Dance Theater (2 units).** (Formerly numbered Dance 40.) Lecture, two hours; laboratory, two hours. Introduction to practical and aesthetic perspectives on theater space, as well as basic aspects of scene, lighting, costume, and sound design technology for dance production.

**48. Laboratory in Dance Production (1 unit).** (Formerly numbered Dance 48.) Laboratory, two hours. Realization of concepts of lighting, sound, costume, scene design, and stage practices in departmental dance productions. Must be repeated once in another year. P/NP grading.

**50. World Arts Forum (1 unit).** Lecture, 90 minutes. Introduction to various arts resources on campus. Presentations by curators, artistic directors, performers, scholars, national leaders in the arts, international guests. Specific presentations vary from term to term. May be repeated for a maximum of four units. P/NP grading.

**70. Survey of Dancing in Selected Cultures (2 units).** (Formerly numbered Dance 70.) Studio, three hours. Introduction to dances and their movement characteristics in Western and non-Western cultures.

**71B. Dance of Indonesia (2 units).** (Formerly numbered Dance 71B.) Studio, three hours. Dance experience not required. Introduction to technique and repertory of dance traditions (e.g., Java, Bali, Sunda).

**71C. Dance of Japan (2 units).** (Formerly numbered Dance 71C.) Studio, three hours. Dance experience not required. Technique and repertory from the court dance tradition (e.g., Gagaku).

**71D. Dance of India (2 units).** (Formerly numbered Dance 71D.) Studio, three hours. Dance experience not required. Introduction to dance in India, with emphasis on a particular tradition (e.g., Bharata Natyam).

**71E. Dance of Korea (2 units).** (Formerly numbered Dance 71E.) Studio, three hours. Dance experience not required. Technique and repertory of a selected dance tradition (e.g., Korean classical and folk).

**72B. Dance of West Africa (2 units).** (Formerly numbered Dance 72B.) Studio, three hours. Dance experience not required. Introduction to technique and repertory of a selected region (e.g., Ghana, Guinea, Nigeria).

**73B. Dance of Mexico (2 units).** (Formerly numbered Dance 73B.) Studio, three hours. Dance experience not required. Introduction to forms and styles in dances of several ethnographic regions. Emphasis on identifying dance characteristics through actual dancing.

**74C. Dance of Spain (2 units).** (Formerly numbered Dance 74C.) Studio, three hours. Dance experience not required. Technique and repertory of dances from selected ethnographic regions.

**74D. Dance of Anglo- and Celtic-American Tradition (2 units).** (Formerly numbered Dance 74D.) Laboratory, four hours. Introduction to technique and repertory of vernacular dance traditions of the British Isles and their derivatives in North America. P/NP or letter grading.

**76B. Dance of Israel (2 units).** (Formerly numbered Dance 76B.) Studio, three hours. Dance experience not required. Technique and repertory from selected ethnographic regions.

**79. Dance of a Selected Culture (2 units).** (Formerly numbered Dance 79.) Laboratory, four hours. Introduction to selected dance forms from a culture area or historical period or of a particular dance genre. P/NP or letter grading.

**80A-80B. Movement as Cultural Behavior (2 units each).** (Formerly numbered Dance 80A-80B.) Studio, three hours. Limited to world arts and cultures majors. Studio/laboratory examination of individual and cultural factors which affect expressive movement in cultures. Experimental classes which enhance kinesthetic and movement awareness of self and others through cultural perspective.

**80C. Fundamentals of Movement.** Lecture, three hours; laboratory, two hours. Introduction to dance/movement principles and concepts, with primary emphasis on developing skills for understanding and analysis of art of moving. Techniques from Laban movement analysis work to be used to increase body instrument's effectiveness as a source of knowledge.

### Upper Division Courses

**101A-101B-101C. Intermediate Modern Dance Technique (2 units each).** (Formerly numbered Dance 101A-101B-101C.) Lecture, two hours; laboratory, two hours. Technique levels II and III. Emphasis on increasing technical skill. Each course may be repeated once.

**C102A-C102B-C102C. Advanced Modern Dance Technique (2 units each).** (Formerly numbered Dance C102A-C102B-C102C.) Laboratory, four and one-half hours. Prerequisite: course 101C or consent of instructor. Technique levels IV and V. Studies in advanced modern dance technique, with emphasis on performing skills. Each course may be repeated for a maximum of six units. Concurrently scheduled with courses C402A-C402B-C402C. P/NP or letter grading.

**103. Improvisation in Dance (2 units).** (Formerly numbered Dance 103.) Studio, four hours. Designed for world arts and cultures majors. Development of aesthetic perspective through use of imagery, sound, and other art. Concentration and projection. May be repeated twice.

**M103D. Contemporary Chicano Theater: Beginning of Chicano Theater Movement.** (Same as Chicana and Chicano Studies M103D and Theater M103D.) Analysis and discussion of historical and political events from 1965 to 1980, as well as theatrical traditions which led to emergence of Chicano theater.

**M103H. Contemporary Chicano Theater: Chicano Theater since 1980.** (Same as Chicana and Chicano Studies M103H and Theater M103H.) Requisite: course M103D. Analysis and discussion of Chicano theater since 1980, including discussion of Chicana playwrights, magic realism, Chicano comedy, and Chicano performance art.

**105. Form and Motion in Choreography (2 units).** (Formerly numbered 114.) Lecture, one hour; laboratory, three hours. Requisite: course 5. Study of processes derived from a Western theatrical tradition by which movement is generated with specific consideration toward shaping/forming of movement materials. May be repeated twice for credit. P/NP or letter grading.

**106A-106B-106C. Intermediate Ballet (2 units each).** (Formerly numbered Dance 106A-106B-106C.) Laboratory, four hours. Prerequisites: courses 7A-7B-7C or consent of instructor. Study of techniques and principles of ballet, including phrasing, combinations, and repertory. Each course may be repeated once. P/NP or letter grading.

**C107A-C107B-C107C. Advanced Ballet (2 units each).** (Formerly numbered Dance C107A-C107B-C107C.) Laboratory, four and one-half hours. Prerequisite: course 106C or consent of instructor. Advanced technique in ballet, with emphasis on performing skills. Each course may be repeated for a maximum of six units. Concurrently scheduled with courses C407A-C407B-C407C. P/NP or letter grading.

**110. Field Studies in World Arts and Cultures (2 to 4 units).** (Formerly numbered 120.) Seminar, two to four hours; fieldwork in community settings, eight to 12 hours. Field studies in the arts. Seminars, guest speakers, and field trips provide theory and methodology related to ethnographic research and/or internship placements. Projects emphasize ethnic communities or international arts organizations. May be repeated once for credit. P/NP or letter grading.

**M112. Special Topics in Women and the Arts.** (Same as Women's Studies M112.) Lecture, three hours; outside study, nine hours. Selected topics relating feminist theories to creation of art by women, with consideration of cultural contexts in which they work. Approach to be comparative, cross-cultural, and interdisciplinary. Consideration of artistic practice by women in relation to issues of power, representation, and access. May be repeated twice, except for credit toward women's studies major. P/NP or letter grading.

**115. Topics in Choreography (3 units).** Lecture, two hours; laboratory, four hours. Requisite: course 5 or 103 or 105. Directed exploration in composition, with focus on developing theme-based choreographic works that are informed by theoretical engagement with selected topic through lectures, readings, and discussion. Thematic topics include contemporary issues and concerns such as image, essence, and abstraction; home, history, and memory; interculturalism; constructing identity. May be repeated for a maximum of 12 units. P/NP or letter grading.

**C120. Music as Dance Accompaniment.** (Formerly numbered Dance C120.) Prerequisite: course 20 or consent of instructor. Piano and percussion improvisation for dance. Choreographer/composer relationships. History of music for dance, with emphasis on contemporary trends. Music for dance performance. May be concurrently scheduled with course C220.

**122. Movement Theories: Variable Topics (2 units).** (Formerly numbered Dance 122.) Lecture, two hours; laboratory, two hours. Study of motor coordination patterns as related to expressive movement features for dance performance. Personalized attention and use of video to increase students' stylistic diversity. Development of movement efficiency for prevention of dance injuries. May be repeated twice. P/NP or letter grading.

**123A. Anatomy for the Dancer.** (Formerly numbered Dance 123A.) Prerequisite: course 11F or consent of instructor. Study of human muscular-skeletal system as related to dance.

**123B. Principles of Conditioning and Correctives for Dance.** (Formerly numbered Dance 123B.) Prerequisite: course 123A. Study of biological and physical principles of human movement as related to dance. Prevention and care of dance injuries.

**123C. Projects in Dance Kinesiology.** (Formerly numbered Dance 123C.) Prerequisite: course 123B. In-depth study of selected topics introduced in courses 123A and 123B.

**125. Principles of Movement Analysis: Laban-analysis.** (Formerly numbered Dance 125.) Lecture, two hours; laboratory, two hours. Prerequisite: course 25. Basic principles of labananalysis. Emphasis on experiential understanding of movement through study of motion factors and elementary concepts of spatial dynamics. Focus on qualitative area of movement to further comprehension of dance as a creative art form.

**126. Principles of Movement Analysis: Labanotation.** (Formerly numbered Dance 126.) Lecture, two hours; laboratory, two hours. Prerequisite: course 25. Developing skills in reading, writing, reconstructing, and score preparation of complex movement.

**C127. Production Techniques for Dance/Video.** (Formerly numbered Dance C127.) Lecture, one hour; laboratory, three hours. Experiential dance/video workshop concentrating on effective techniques of shooting, as well as choreographing movement especially for the camera. Choreographers/dancers and camerapeople/technicians with dance experience collaborate to establish a common vocabulary, set of values, and sensitivity to each other's concerns. Concurrently scheduled with course C227. Undergraduates required to complete short self-designed, edited video work as final project.

**128. Dance and the Visual Media.** (Formerly numbered Dance 128.) Examination of aesthetic differences between dance, film, and video and exploration of the new aesthetic when they are combined. Analysis of the record and documentary dance film, choreo-cinema, and impact of MTV, as well as integration of media with performance.

**130. Selected Topics in World Arts and Cultures.** Lecture, three hours. Prerequisite: junior standing. Selected topics dealing with arts and cultures through disciplines of anthropology, art history, dance, folklore and mythology, music, and theater, and additional multidisciplinary cross-cultural areas. Consult *Schedule of Classes* for topics to be offered in a specific term. May be repeated twice for credit. P/NP or letter grading.

**132A-C132B. Philosophical Bases and Trends in Dance (4 units, 2 units).** (Formerly numbered Dance 132A-C132B.) Course 132A is prerequisite to C132B. Critical analysis of dance as a creative experience and role of professional and educational dance in our society. Study of present-day concepts and their relationships to other art forms and cultures. Course C132B is concurrently scheduled with C231B.

**C133. Baroque Dance: Analysis and Re-creation.** (Formerly numbered Dance C133.) Lecture, two hours; laboratory, two hours. Prerequisites: courses 134A-134B or equivalent experience, consent of instructor. Analysis and re-creation of 17th- and 18th-century dance as recorded in dance notation of the era. Study of cultural context, aesthetics, style, music. Social and theatrical dance forms. Concurrently scheduled with course C233.

**134. History of Dance in Culture and Performance.** (Formerly numbered Dance 134A.) Lecture, two hours; discussion, one hour; laboratory, one hour. Study of dance in historical and cultural context, its function in society and its relationship to contemporary artistic expression. Focus on topics from traditional and recent research in world dance. P/NP or letter grading.

**135. Dance in the U.S.** Lecture, two hours; discussion, one hour; laboratory, one hour. Limited to juniors/seniors. Study of dance expression in the U.S., including concert modern dance and ballet, popular idioms, and video dance. Special attention to influences from Native America, Asia, Africa, and Europe. P/NP or letter grading.

**140A. Art as Social Action.** Limited to juniors/seniors. Discussion of what constitutes an artist's social responsibility and in what ways art is qualified to engage in direct political action. Study of tension between the powers of this world and the powers of art. P/NP or letter grading.

**140B. Art as Moral Action.** Prerequisite: junior standing. One's ability to distinguish between right and wrong action is culturally intuited, nurtured, and developed. Study of cultural strategies of moral engagement, persuasion, and inquiry in personal and public life, including acts of conscience and civil disobedience. P/NP or letter grading.

**140C. Seminar: Intercultural and Interdisciplinary Performance.** Prerequisite: junior standing. Recent discussions of multiculturalism have demanded a broader base of cultural literacy for society in general and from artists in particular. Moving beyond stereotyping and formalism, focus on areas of overlap and exchange, collaborations, collective creation, hybridization, and evolving possibilities of video and extended media. P/NP or letter grading.

**141. Lighting Design for Dance Theater.** (Formerly numbered Dance 141.) Lecture, four hours; laboratory, two hours. Prerequisite: course 11F or consent of instructor. Lighting for dance: examination of aesthetics, principles, and technical elements. Application to selected choreographies to be publicly performed.

**141A. The City as a Work of Art.** Lecture, three hours. Limited to juniors/seniors. Interdisciplinary approach to complex physical, emotional, psychological, and spiritual dynamics that create and sustain urban life, with emphasis on artist's role in shaping the spaces which affect people's lives. Discussion of religious and social aspirations as expressed in music, poetry, dance, and visual arts, as well as architecture and city planning. P/NP or letter grading.

**142. Advanced Studies in Dance Theater Lighting (2 or 4 units).** (Formerly numbered Dance 142.) Lecture, four hours; laboratory, four or more hours. Prerequisite: course 141 or consent of instructor. Analysis of diverse dance theater lighting problems at advanced level and individual development of creative solutions. May be taken for a maximum of four units.

**144. Costume and Scenic Design Concepts for Dance Theater.** (Formerly numbered Dance 144.) Prerequisite: course 11F or consent of instructor. Study of theory for conceptualizing dance performance environments, communication through visual elements, artistic properties of costume and sets media, and procedures for producing dance costumes and sets in order to facilitate choreographer/designer communication.

**145. Advanced Dance Costuming.** (Formerly numbered Dance 145.) Lecture, three hours; laboratory, six hours. Prerequisite: course 144 or consent of instructor. Theory of dance costume construction as it relates to design intent; enhancement, accommodation, and impact on movement. Choice of textiles, construction methodology, fabric modification, and accessories. Laboratories include dance design projects currently in production.

**148. Advanced Laboratory in Dance Production (1 unit).** (Formerly numbered Dance 148.) Laboratory, two hours. Prerequisites or corequisites: courses 141 and 144, or consent of instructor. Further development and application of concepts of lighting, sound, costume, scene design, and stage practices in departmental dance productions. May be repeated once. P/NP or letter grading.

**149. Dance Performance Practicum (1 unit).** (Formerly numbered Dance 149.) Laboratory, four hours. Dancing in selected choreography or repertory in performance. May be repeated for credit. P/NP or letter grading.

**150. Viewing Native American Culture.** Lecture, three hours; outside study, nine hours. Exploration of artistic, political, folk, and religious images of American Indians as demonstrated in literature, art, anthropology, film, and folklore and contrasted with historic and contemporary views held by Native Americans and others. P/NP or letter grading.

**151A. Foundations of Dance Education.** (Formerly numbered Dance 151.) Lecture, two hours; laboratory, three hours. Designed for world arts and cultures majors. Introduction to movement concepts, skills, and teaching principles for modern dance instruction. Supervised teaching practicum included.

**151B. Dance as Culture in Education.** (Formerly numbered Dance 152.) Lecture, two hours; laboratory, two hours. Prerequisite: course 70 or consent of instructor. Theoretical and practical aspects of teaching ethnic dance, especially in higher education.

**M152. Asian American Aesthetics.** (Same as Asian American Studies M119.) Lecture, four hours; outside study, eight hours. Limited to juniors/seniors. Exploration of shared and distinctive aspects of aesthetics found among groups of Asian Americans through lecture, readings, and field study. Formal and informal expressions of the culture, with focus on origins, artists, arts activists, and reinterpretations of culture through the arts. Individual project required. P/NP or letter grading.

**153. Creative Dance for Children.** (Formerly numbered Dance 153.) Lecture, three hours; laboratory, one hour. Designed for world arts and cultures majors. Introduction to movement concepts, skills, and principles for teaching children's dance; emphasis on dance as a creative medium of expression.

**C160A-C160B-C160C. Group Dynamics and Process (2 units each).** (Formerly numbered Dance C160A-C160B-C160C.) Lecture, one hour; laboratory, three hours. Prerequisite: consent of instructor. Exploration of individual and group dynamics within context of an ongoing dance/movement therapy group. Courses must be taken in sequence. Concurrently scheduled with courses C260A-C260B-C260C. P/NP or letter grading.

**C161A. Ritual and Transformation.** Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Exploration of transformative functions served by cultural and personal rituals of passage and healing. Class discussion to be informed by Western and non-Western points of view and by therapeutic and ethnographic models. Concurrently scheduled with course C261A.

**M162P. Destruction and Survival of Indigenous Societies.** (Same as Anthropology M162P.) Lecture, three hours. Prerequisite: Anthropology 9 or upper division standing or consent of instructor. Clarification of concepts and forms of destruction and survival; analysis directed to different processes threatening the institutions of a group and its survival. Exploration of current theories of ethnocide and genocide for their relevance and validity. P/NP or letter grading.

**M166. Beyond the Mexican Mural: Muralism and Community Development.** (Same as Chicana and Chicano Studies M166.) Studio course to explore muralism as a method of community education, development, and empowerment, using Los Angeles resources as "mural capital of the world." Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, work with community participants, and install a portable mural which is placed in a community site to be determined by the class. P/NP or letter grading.

**M167. Whose Monument Where: Course on Public Art.** (Same as Chicana and Chicano Studies M167.) Lecture, three hours; outside research. Recommended corequisite: course M166. Examination of public monuments in the U.S. as a basis for cultural insight and critique of American values from perspective of an artist. Use of urban Los Angeles as textbook in urban space issues such as who is the "public," what is "public space" in the 1990s, what defines a neighborhood, and do different ethnic populations use public space differently. P/NP or letter grading.

**C171B. Dance of Indonesia (2 units).** (Formerly numbered Dance C171B.) Studio, three hours. Prerequisite: course 71B or consent of instructor. Technique and repertoire of a selected dance tradition (e.g., Java, Bali, or Sunda). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C471B.

**C171C. Dance of Japan (2 units).** (Formerly numbered Dance C171C.) Studio, three hours. Prerequisite: course 71C. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C471C.

**C171D. Dance of India (2 units).** (Formerly numbered Dance C171D.) Studio, three hours. Prerequisite: course 71D. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C471D.

**C171E. Dance of Korea (2 units).** (Formerly numbered Dance C171E.) Studio, three hours. Prerequisite: course 71E. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C471E.

**C172B. Dance of West Africa (2 units).** (Formerly numbered Dance C172B.) Studio, three hours. Prerequisite: course 72B. Technique and repertoire of a selected region (e.g., Ghana, Guinea, Nigeria). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C472B.

**C173B. Dance of Mexico (2 units).** (Formerly numbered Dance C173B.) Studio, three hours. Prerequisite: course 73B. Dance techniques of selected ethnographic regions. May be repeated once. Concurrently scheduled with course C473B.

**C174C. Dance of Spain (2 units).** (Formerly numbered Dance C174C.) Studio, three hours. Prerequisite: course 74C. Techniques and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C474C.

**174D. Dance of Anglo- and Celtic-American Tradition (2 units).** (Formerly numbered Dance 174D.) Laboratory, four hours. Prerequisite: course 74D or consent of instructor. Technique and repertoire of vernacular dance traditions of the British Isles and their derivatives in North America. May be repeated for credit. P/NP or letter grading.

**C176B. Dance of Israel (2 units).** (Formerly numbered Dance C176B.) Studio, three hours. Prerequisite: course 76B. Technique and repertoire from selected ethnographic regions. May be repeated once. Concurrently scheduled with course C476B.

**C179. Dance of a Selected Culture (2 units).** (Formerly numbered Dance C179.) Laboratory, four hours. Prerequisite: consent of instructor. Dance technique of a selected dance form from a culture area or historical period or of a particular dance genre. May be repeated for credit. Concurrently scheduled with course C479. P/NP or letter grading.

**C180A-C180B. Studies in Dance Ethnography.** (Formerly numbered Dance C180A-C180B.) Lecture, two hours; discussion, two hours. Development of observation and recording skills for study of dance events, including both analytical consideration of selected ethnographies and training in and application of field research methodologies. Concurrently scheduled with courses C279A-C279B. P/NP or letter grading.

**C180A. Dance Event Ethnographies; C180B. Field Research.** Requisite: course C180A.

**181A. Dance Cultures of Asia.** (Formerly numbered Dance 181A.) Introduction to dance cultures of Asia. How theories and practices of dance are influenced by historical and social factors and by ideological and aesthetic systems. Lectures illustrated with demonstrations, films, and slides.

**181B. Dance in Southeast Asia.** (Formerly numbered Dance 181B.) Prerequisite: course 181A or consent of instructor. Survey of selected ritual, social, and court dances of Indonesia, Cambodia, Thailand, and the Philippines. Social, historical, and aesthetic factors. Lectures illustrated with demonstrations, films, and slides.

**181C. Dance in East Asia.** (Formerly numbered Dance 181C.) Prerequisite: course 181A or consent of instructor. Survey of dances of Japan, China, and Korea and factors which have influenced their development and social function. Consideration of relationship of dance to other art forms. Lectures illustrated with demonstrations, films, and slides.

**181D. Dance in South Asia.** (Formerly numbered Dance 181D.) Prerequisite: course 181A or consent of instructor. Survey of dance forms in India and Sri Lanka. Factors influencing development of dance, its social function, and its relationship to other art forms. Lectures illustrated with demonstrations, films, and slides.

**182. Dance in Africa and the African Diaspora.** (Formerly numbered Dance 182.) Survey of dance in sub-Saharan cultures and their new world transformations, with consideration of role of dance in society, its cultural significance, and historical background. Emphasis on various African and African American cultures and genres.

**183. Dance in Latino American Cultures.** (Formerly numbered Dance 183.) Survey of dance in Latin America, with consideration of role of dance in society, its cultural significance, historical background, and relationship to other art forms. Emphasis on various Latino American cultures and dance genres.

**CM184. Dance and Folklore.** (Formerly numbered Dance CM184.) (Same as Folklore CM184.) Consideration of vernacular tradition as a site for cultural configuration, social construction, representation, and display of national, ethnic, and other affinity identities. Emphasis on various European and European-American dance idioms. Concurrently scheduled with course CM284.

**C187. Dance in Native American Cultures.** (Formerly numbered Dance C187.) Survey of Native American dance; role of dance in society, its cultural significance, and historical background. Concurrently scheduled with course C287.

**190A-190B. World Arts and Cultures Senior Colloquium.** Limited to senior world arts and cultures majors. Comparative and integrative studies in world arts and cultures, with application of concepts and content from the six disciplines of the major. Lecture/seminar format with World Arts and Cultures faculty during first term; topics include arts in a societal context, ethnicity and the individual, and problems and approaches to fieldwork. Faculty-directed individual projects during second term. Fieldwork on some aspect of various arts/expressive behaviors found in ethnic communities of Los Angeles. In Progress grading.

**191. Repertory Dance Tour (2 or 4 units).** (Formerly numbered Dance 191.) Lecture, two hours; rehearsal or performance, four to six hours. Designed for world arts and cultures majors. Creation and performance of dance concerts in the community, with special emphasis on problems of touring dance company with a variable repertoire. May be repeated once.

**192. Projects in Dance (2 to 4 units).** (Formerly numbered Dance 190.) Laboratory, four to six hours (one or two hours may be individualized consultation). Individualized major projects in choreography, performance, production, media. May be repeated for credit. P/NP or letter grading.

**196. Senior Project (2 or 4 units).** (Formerly numbered Dance 196.) Seminar, two hours; discussion, two hours, or laboratory, to be arranged. Prerequisites: course 100C, senior standing. Advanced project reflecting student's area of concentration. May be taken for a maximum of four units.

**C197. Selected Topics in Dance (2 to 4 units).** (Formerly numbered Dance C197.) Lecture, discussion, and analysis of a selected dance style, specific time period, or dance of a particular culture group. May be repeated once. Concurrently scheduled with course C297.

**199. Special Studies in World Arts and Cultures (2 to 8 units).** Prerequisites: junior standing, 3.0 GPA in major, consent of instructor. Individual studies for world arts and cultures majors. May be taken twice for a maximum of eight units.

## Graduate Courses

**211A-211F. Advanced Choreography.** (Formerly numbered Dance 211A-211F.) Lecture, two hours; laboratory, two hours. Prerequisite: course 113C or equivalent. Theoretical aspects of advanced choreography for students who have reached the level of self-initiation of substantial creative works. Refinement and realistic self-evaluation; critical counsel by acknowledged choreographers.

**C220. Music as Dance Accompaniment.** (Formerly numbered Dance C220.) Prerequisite: course 20 or consent of instructor. Piano and percussion improvisation for dance. Choreographer/composer relationships. History of music for dance, with emphasis on contemporary trends. Music for dance performance. May be concurrently scheduled with course C120. Graduate students must complete two additional assignments. May not be applied toward M.A. degree requirements.

**221. Music for Dance.** (Formerly numbered Dance 221.) Prerequisite: course C120. Theory of aesthetic and functional relationship of music to dance.

**223. Principles of Dance Kinesiology.** (Formerly numbered Dance 223.) Prerequisite: consent of instructor. Scientific basis for movement for dance. Study of anatomical, kinesiological, and physical principles and demands of dance.

**225A-225B. Theories of Movement: Labananalysis.** (Formerly numbered Dance 225A-225B.) Lecture, two hours; laboratory, two hours. Theories of Laban movement analysis as means for analyzing and describing human movement. Use of Laban movement analysis to increase movement observation skills and theoretical understanding of role of movement in dance, nonverbal behavior, and cross-cultural dance studies. Focus on complex movement patterns and timing.

**226. Advanced Studies in Notation (2 units).** (Formerly numbered Dance 226.) Prerequisite: course 126. Selected problems in directing from notated repertoire; principles of teaching, comparative notation systems, writing projects.

**C227. Production Techniques for Dance/Video.** (Formerly numbered Dance C227.) Lecture, one hour; laboratory, three hours. Experiential dance/video workshop concentrating on effective techniques of shooting, as well as choreographing movement especially for the camera. Choreographers/dancers and camerapeople/technicians with dance experience collaborate to establish a common vocabulary, set of values, and sensitivity to each other's concerns. Concurrently scheduled with course C127. Graduate students expected to complete written papers related to reading and viewing assignments and final video project.

**230. Research Methods and Bibliography in Dance.** (Formerly numbered Dance 230.) Survey of methods for scholarly analysis of dance materials using systems from social sciences, physical sciences, and humanities.

**231A. Basic Issues in Dance and Dance Theory.** (Formerly numbered Dance 231A.) Prerequisite: course 100C. Issues common to specialization areas in the field of dance: movement, presentation and transformation, composition, contexts (such as historical, ritual, social, educational, therapeutic), documentation (notation, film, video), production, etc.

**C231B. Philosophical Bases and Trends in Dance (2 units).** (Formerly numbered Dance C231B.) Prerequisite: course 231A. Study of present-day concepts and their relationship to other art forms and cultures. Concurrently scheduled with course C132B. Evaluations of graduate students based on extended reading list and term papers.

**232. Aesthetics of Dance.** (Formerly numbered Dance 232.) Analysis of aesthetic concepts and critical methods used in writing about dance.

**C233. Baroque Dance: Analysis and Re-creation.** (Formerly numbered Dance C233.) Lecture, two hours; laboratory, two hours. Prerequisites: courses 134A-134B or equivalent experience, consent of instructor. Analysis and re-creation of 17th- and 18th-century dance as recorded in Feuillet notation. Study of cultural context, aesthetics, style, music. Social and theatrical dance forms. Concurrently scheduled with course C133.

**234. Renaissance Dance: Analysis and Re-creation.** (Formerly numbered Dance 234.) Lecture, two hours; studio, two hours. Prerequisites: courses 134A-134B or consent of instructor. Analysis and re-creation of study of 15th- and 16th-century dance styles from Domenico da Piacenza through Cesare Negri.

**235. History of Ballet.** (Formerly numbered Dance 235.) Development of ballet from 19th-century Romanticism to the present. Stylistic differences in Italy, France, England, Denmark, and Russia. S/U or letter grading.

**236. Dance in the 20th Century.** (Formerly numbered Dance 236.) Seminar in historical development of 20th-century dance. S/U or letter grading.

**240A. Production Arts Seminar.** (Formerly numbered Dance 240A.) Seminar, two hours; discussion, two hours; laboratory, two hours. Prerequisite: consent of instructor. Examination and research of dance and performer/audience relationships in various historic periods and cultural settings. Impact of different aesthetic/directorial approaches to theatrical production of dance. Exploration of selection of locale, style, aural and visual enhancements.

**240B. Production Arts Seminar.** (Formerly numbered Dance 240B.) Seminar, four hours; laboratory, to be arranged. Prerequisite: consent of instructor. Study of elements of design. Development of a vocabulary for analysis of dance movement and choreography. Communication among collaborating artists. Conceptualizing and producing the design and sound score for a dance production.

**240C. Production Arts Seminar.** (Formerly numbered Dance 240C.) Seminar, four hours; laboratory, to be arranged. Examination of contemporary art world, including arts organizations, funding sources, legal aspects of arts production, support groups, public relations and publicity. S/U or letter grading.

**240D. Production Arts Seminar (2 units).** (Formerly numbered Dance 240D.) Seminar, three hours. Prerequisite: consent of instructor. Corequisites: courses 441, 490. Topics from current problems of students preparing M.F.A. concert productions.

**251A-251D. Advanced Studies in Dance Education.** (Formerly numbered Dance 251A-251D.) Lecture, two hours; discussion, two hours. Preparation: previous teaching experience. S/U or letter grading:

**251A.** Historical and Theoretical Framework for Dance Education. Development of a framework for teaching/learning process in dance and application to varied settings and populations.

**251B.** Theories and Methods. Examination of current theories of artistic intelligence, body education systems, motor learning, and creativity and how they are related to teaching dance, including analysis of traditional models for developing alternative methodologies.

**251C.** Curriculum Development in Varied Dance Settings. Issues include course/program/materials planning, development, implementation, and evaluation, with emphasis on analyzing underlying educational values affecting decision-making process.

**251D.** Dance Administration. Relation of theories and practice to dance settings, clarifying issues of hierarchical structures, chains of command, staffing, facilities, and budget and why and how dance courses/programs succeed or fail.

**C260A-C260B-C260C. Group Dynamics and Process (2 units each).** (Formerly numbered Dance C260A-C260B-C260C.) Lecture, one hour; laboratory, three hours. Prerequisite: consent of instructor. Exploration of individual and group dynamics within context of an ongoing dance/movement therapy group. Concurrently scheduled with courses C160A-C160B-C160C. S/U grading.

**C261A. Ritual and Transformation.** (Formerly numbered Dance 261A.) Lecture, two hours; discussion, two hours. Prerequisite: consent of instructor. Exploration of transformative functions served by cultural and personal rituals of passage and healing. Class discussion to be informed by Western and non-Western points of view and by therapeutic and ethnographic models. Concurrently scheduled with course C161A.

**261B. Self and Culture.** (Not the same as course 261B prior to Fall Quarter 1997.) Lecture, two hours; laboratory, two hours. Requisite: course 261A. Examination of critical developmental processes and situational factors contributing to construction of a sense of self and emergence of creativity and subjective relatedness in different cultural contexts.

**261C. Dance/Movement Therapy: Dance as Healing and Therapy.** (Formerly numbered Dance 261C.) Lecture, two hours; laboratory, two hours. Requisites: courses C261A, 261B. Historical overview of various theoretical approaches and corresponding methodologies encompassed by dance/movement therapy, a contemporary creative arts therapy field which encompasses healing and therapeutic aspects of dance.

**262A-262B-262C. Seminars: Dance/Movement Therapy.** (Formerly numbered Dance 262A-262B-262C.) Seminar, two hours; laboratory, two hours. Prerequisites: courses C261A, 261B-261C. Year-long sequential dance/movement therapy seminars adopting a psychodynamic life-span developmental approach to clinical community work with ethnically diverse populations.

**C279A-C279B. Studies in Dance Ethnography.** (Formerly numbered Dance C279A-C279B.) Lecture, two hours; discussion, two hours. Development of observation and recording skills for study of dance events, including both analytical consideration of selected ethnographies and training in and application of field research methodologies. Concurrently scheduled with courses C180A-C180B. S/U or letter grading. **C279A.** Dance Event Ethnographies; **C279B.** Field Research. Requisite: course C279A.

**280A-280B. Advanced Studies in Dance Ethnology.** (Formerly numbered Dance 280A-280B.) Dance viewed as an aspect of culture and human behavior. S/U or letter grading. **280A.** Survey of literature of the field of dance ethnology and in related fields of anthropology, folklore, performance studies, and sociology. **280B.** Advanced studies in methodologies and theories to develop dance-focused ethnographic research.

**CM284. Dance and Folklore.** (Formerly numbered Dance CM284.) (Same as Folklore CM284.) Consideration of vernacular tradition as a site for cultural configuration, social construction, representation, and display of national, ethnic, and other affinity identities. Emphasis on various European and European-American dance idioms. Concurrently scheduled with course CM184.

**C287. Dance in Native American Cultures.** (Formerly numbered Dance C287.) Survey of Native American dance; role of dance in society, its cultural significance, and historical background. Concurrently scheduled with course C187.

**C297. Selected Topics in Dance (2 to 4 units).** (Formerly numbered Dance C297.) Lecture, discussion, and analysis of a selected dance style, specific time period, or dance of a particular culture group. May be repeated once. Concurrently scheduled with courses C197. S/U or letter grading.

**375. Teaching Apprentice Practicum (1 to 4 units).** (Formerly numbered Dance 375.) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

**400. Directed Professional Activities (2 to 8 units).** (Formerly numbered Dance 400.) Prerequisite: consent of graduate adviser. Directed projects in professional editing, bibliography, filmography, videography, conference and festival direction, and other professional activities. May not be applied toward M.A. degree requirements. May be repeated. S/U grading.

**C402A-C402B-C402C. Advanced Modern Dance Technique (2 units each).** (Formerly numbered Dance C402A-C402B-C402C.) Laboratory, four and one-half hours. Technique levels IV and V. Studies in advanced modern dance technique, with emphasis on performing skills. May be repeated for credit. Concurrently scheduled with courses C102A-C102B-C102C. S/U or letter grading.

**C407A-C407B-C407C. Advanced Ballet (2 units each).** (Formerly numbered Dance C407A-C407B-C407C.) Laboratory, four and one-half hours. Prerequisite: course 106C or consent of instructor. Advanced technique in ballet, with emphasis on performing skills. May be repeated for credit. Concurrently scheduled with courses C107A-C107B-C107C. S/U or letter grading.

**441. Dance Production Practicum (2 to 4 units).** (Formerly numbered Dance 441.) Laboratory, four to eight hours (one or two hours may be individualized consultation). Prerequisite: consent of instructor. Skills and understanding of production components in roles of stage manager, production assistants, and producer. May be repeated for a maximum of eight units. S/U grading.

**451. Teaching Assistant Seminar (2 units).** (Formerly numbered Dance 451.) Seminar, one hour; laboratory, three hours. Required of all World Arts and Cultures Department teaching assistants. Lectures, discussion, readings, and practice teaching. May be repeated once for credit. S/U grading.

**452. Directed Field Study in Dance Education (2 to 8 units).** (Formerly numbered Dance 452.) Seminar, one hour; field study, two hours minimum. Prerequisite: consent of instructor. Directed field study to provide teaching experience in the community school or other approved site. No more than four units may be applied toward M.A. degree requirements. S/U grading.

**460A-460B-460C. Clinical Internship Supervision.** (Formerly numbered Dance 460A-460B-460C.) Lecture, two hours; discussion, two hours. Corequisites: courses 262A-262B-262C, 596R. Practicum dealing with student internship: movement/observation, therapeutic goals, therapeutic process, and other clinical uses. S/U grading.

**C471B. Dance of Indonesia (2 units).** (Formerly numbered Dance C471B.) Studio, three hours. Prerequisite: course 71B or consent of instructor. Technique and repertoire of a selected dance tradition (e.g., Java, Bali, or Sunda). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171B.

**C471C. Dance of Japan (2 units).** (Formerly numbered Dance C471C.) Studio, three hours. Prerequisite: course 71C. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171C.

**C471D. Dance of India (2 units).** (Formerly numbered Dance C471D.) Studio, three hours. Prerequisite: course 71D. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171D.

**C471E. Dance of Korea (2 units).** (Formerly numbered Dance C471E.) Studio, three hours. Prerequisite: course 71E. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171E.

**C472B. Dance of West Africa (2 units).** (Formerly numbered Dance C472B.) Studio, three hours. Prerequisite: course 72B. Technique and repertoire of a selected region (e.g., Ghana, Guinea, Nigeria). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C172B.

**C473B. Dance of Mexico (2 units).** (Formerly numbered Dance C473B.) Studio, three hours. Prerequisite: course 73B. Dance techniques of selected ethnographic regions. May be repeated once. Concurrently scheduled with course C173B.

**C474C. Dance of Spain (2 units).** (Formerly numbered Dance C474C.) Studio, three hours. Prerequisite: course 74C. Techniques and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C174C.

**C476B. Dance of Israel (2 units).** (Formerly numbered Dance C476B.) Studio, three hours. Prerequisite: course 76B. Technique and repertory from selected ethnographic regions. May be repeated once. Concurrently scheduled with course C176B.

**C479. Dance of a Selected Culture (2 units).** (Formerly numbered Dance C479.) Laboratory, four hours. Dance technique of a selected dance form from a culture area or historical period or of a particular dance genre. May be repeated for credit. Concurrently scheduled with course C179. S/U or letter grading.

**480. Seminar: Research Topics (2 units).** (Formerly numbered Dance 480.) Forum in which faculty, students, and visitors make presentations and obtain feedback on research being planned, conducted, or recently completed. Students required to make a presentation each term they are enrolled for credit. May be repeated for a maximum of eight units. S/U grading.

**490. Projects in Choreography and Performance (2 to 8 units).** (Formerly numbered Dance 490.) Tutorial, one three-hour rehearsal per unit per week minimum. Prerequisite: course 240C or consent of instructor. Creation, casting, and rehearsing of culminating concert, reflecting professional achievement in choreography or performance, in first term. In second term, direction of on-stage rehearsals for culminating concert by each student leading to fully staged performance. May be repeated for a maximum of 16 units.

**498. Professional Internship in Dance (4, 8, or 12 units).** (Formerly numbered Dance 498.) Full- or part-time supervised fieldwork. Prerequisites: advanced standing in M.F.A. program, consent of instructor. Internship in dance, theater, film, or television organization. Participation in creative, administrative, or technical work of professionals in their specialties.

**596A. Directed Individual Study or Research (2 to 8 units).** (Formerly numbered Dance 596A.)

**596R. Directed Study or Research in a Hospital or Clinic (2 to 8 units).** (Formerly numbered Dance 596R.) S/U grading.

**597. Preparation for Master's Comprehensive Examination (2 to 8 units).** (Formerly numbered Dance 597.) Preparation for M.A. or M.F.A. comprehensive examination. S/U grading.

**598. Research for and Preparation of Master's Thesis (2 to 8 units).** (Formerly numbered Dance 598.) Research for and preparation of M.A. or M.F.A. thesis. S/U grading.

# Appendix A

## Regulations and Policies

### Nondiscrimination

The University of California, in accordance with applicable Federal and State Laws and University Policies, does not discriminate on the basis of race, color, national origin, religion, sex, disability, age, medical condition (cancer-related), ancestry, marital status, citizenship, sexual orientation, or status as a Vietnam-era veteran or special disabled veteran. The University also prohibits sexual harassment. This nondiscrimination policy covers admission, access, and treatment in University programs and activities.

Inquiries regarding the University's student-related nondiscrimination policies may be directed to the UCLA Campus Counsel, 3149 Murphy Hall, Los Angeles, CA 90024-1405, (310) 825-4042. Speech- and hearing-impaired persons may call TDD (310) 206-6083.

Inquiries regarding Americans with Disabilities Act (ADA) or 504 Compliance may be directed to Dr. Douglas Martin, Special Assistant to the Chancellor/Coordinator of ADA and 504 Compliance, A239 Murphy Hall, UCLA, Los Angeles, CA 90024-1405, voice (310) 825-2242, TTY (310) 206-3349.

Students may complain of any action which they believe discriminates against them on the ground of race, color, national origin, marital status, sex, sexual orientation, disability, or age and may contact the Office of the Dean of Students, 1206 Murphy Hall, and/or refer to Section 111.00 of the *University of California Policies Applying to Campus Activities, Organizations, and Students* (available in 1206 Murphy Hall) for further information and procedures.

### Student Conduct: Violation of University Policies

Students are subject to disciplinary action for several types of misconduct or attempted misconduct while on University property or in connection with official University functions, including but not limited to cheating, multiple submission (i.e., the resubmission of any work which has been previously submitted for credit in identical or similar form in one course to fulfill any of the requirements of another course without the prior consent of the current instructor), fabrication, plagiarism, or facilitating academic dishonesty; fabricating information or knowingly furnishing false information or reporting a false emergency to the University or to University officials acting in the performance of their duties; forgery, alteration, or misuse of any University document, record, key, electronic device, or identification; theft of, conversion of, damage to, or destruction of any property of the University or property of others while on University premises, or possession of any property of the University or others stolen while on University premises; theft or other abuse of computing facilities or computer time, including but not limited to unauthorized entry into a file to use, read, or change the contents or any other purpose; unauthorized transfer of a file; unauthorized use of another individual's identification or password; use of computing facilities to interfere with the work of another student, faculty member, or University official; use of computing facilities to interfere with a University computing system; unauthorized entry to, possession of, receipt of, duplication of, or use of the University's name, insignia, or seal; unauthorized entry to, possession of, receipt of, or use of University properties, equipment, resources, or services; violation of policies, regulations, or rules governing University-owned or operated housing facilities or leased housing facilities located on University property; physical abuse, including but not limited to rape, sexual assault, sex offenses, and other physical assault; threats of violence

or conduct that threatens the health or safety of any person; sexual harassment; stalking behavior in which an individual willfully, maliciously, and repeatedly engages in a knowing course of conduct directed at a specific person which reasonably and seriously alarms, torments, or terrorizes the person, and which serves no legitimate purpose; the use of "fighting words" when they constitute harassment; hazing or any method of initiation or preinitiation into a campus organization or any activity engaged in by the organization or members of the organization which causes, or is likely to cause, bodily danger, physical harm, or personal degradation or disgrace resulting in physical or mental harm to any student or other person; obstruction or disruption of teaching, research, administration, disciplinary procedures, or other University activities; disorderly or lewd conduct; participation in a disturbance of the peace or unlawful assembly; failure to identify oneself to, or comply with directions of, University officials or other public officials acting in the performance of their duties while on University property or at official University functions, or resisting or obstructing such University or other public officials in the performance of or the attempt to perform their duties; unlawful manufacture, distribution, dispensing, possession, use, or sale of, or the attempted manufacture, distribution, dispensing, or sale of controlled substances identified in Federal and State Laws or Regulations; manufacture, distribution, dispensing, possession, use, or sale of, or the attempted manufacture, distribution, dispensing, or sale of alcohol which is unlawful or otherwise prohibited by, or not in compliance with, University policy or campus regulations; possession, use, storage, or manufacture of explosives, firebombs, or other destructive devices except as expressly permitted by law; possession, use, or manufacture of a firearm or other weapon specified in campus regulations; violation of the conditions contained in the terms of a disciplinary action; violation of the conditions contained in a written Notice of Emergency Suspension or violation of

## Salary and Employment Information, University of California

	DEGREE LEVEL OF GRADUATES		
	BACHELOR'S	MASTER'S	DOCTORATE
	AVERAGE MONTHLY SALARY*		
Engineering	\$3,147	\$3,584	\$4,963
Humanities	1,968	2,718	2,264
Life Sciences	1,993	2,209	3,342
Management	2,334	3,471	4,535
Physical Sciences	2,453	2,962	4,378
Social Sciences	1,945	2,872	3,695

\*Source: A national survey of a representative group of colleges conducted by the National Association of Colleges and Employers, representing the 80 percent range of offers for April 1997 throughout the country. It should be noted that a wide variation in starting salaries exists within each discipline based on job location, type of employer, personal qualifications of the individual, and employment conditions at the time of job entry.

emergency regulations or procedures during a declared state of emergency; and violations of other University policies or campus rules and regulations.

Further information on these infractions and on the procedures concerning student discipline are contained in the *University of California Policies Applying to Campus Activities, Organizations, and Students*; *Universitywide Student Conduct Harassment Policy*; *UCLA Student Conduct Code of Procedures*; and *UCLA Activity Guidelines*. Copies of these documents are available in the Office of the Dean of Students (1206 Murphy Hall), Center for Student Programming (105 Kerckhoff Hall), and Student Psychological Services (A3-062 CHS). Also see the Office of the Dean of Students website at <http://www.saonet.ucla.edu/dos/>.

In addition, the Office of the Dean of Students publishes "Official Notices" in the *Daily Bruin* at various times during the year. Such notices are important, and *all students are held responsible* for the information in them.

## Rape and Other Forms of Sexual Assault

UCLA does not tolerate sexual assault in any form, including acquaintance or date rape. Where there is probable cause to believe that the campus regulations prohibiting sexual assault have been violated, the campus pursues disciplinary actions which may include sanctions up to and including dismissal from the University.

A student charged with sexual assault can be prosecuted under California criminal statutes *and* disciplined under the campus student conduct policies and regulations. Even if the criminal justice authorities choose not to prosecute, the campus can pursue disciplinary action.

### Definitions

A student who individually, or in concert with others, participates in any of the following misconduct while on University property or in connection with official University functions is subject to University discipline (refer to the *University of California Policies Applying to Campus Activities, Organizations, and Students* which is available from the Office of the Dean of Students, 1206 Murphy Hall, and on the website at <http://www.saonet.ucla.edu/dos/>). The following language describes specific conduct which, at UCLA, may subject a student to University discipline:

Physical abuse, including but not limited to rape, sexual assault, sex offenses, and other physical assault; threats of violence; or conduct that threatens the health or safety of any person.

### Rape

For the purposes of this policy, rape refers to "rape" as defined by the California Penal Code (as it may be amended from time to time).

The acts summarized below are among the behaviors prohibited by the California Penal Code:

- (1) Sexual intercourse against a person's will accomplished by force or threats of bodily injury.
- (2) Sexual intercourse against a person's will where the person has reasonable fear that she (or he) or another will be injured if she (or he) does not submit to the intercourse.
- (3) Sexual intercourse where the person is incapable of giving consent, or is prevented from resisting, due to alcohol or drugs, and this condition was known, or reasonably should have been known by the accused.
- (4) Sexual intercourse where the person is incapable of resisting because he or she, at the time, is unconscious or asleep, and this is known to the accused.

### Other Forms of Sexual Assault

The act of sexual assault includes forced sodomy (anal intercourse); forced oral copulation (oral-genital contact); rape by foreign object (forced penetration by a foreign object, including a finger); and sexual battery (the unwanted touching of an intimate part of another person for the purpose of sexual arousal). These also include situations where the accused sexually assaults a complainant incapable of giving consent, including where the complainant is prevented from resisting due to alcohol or drugs and this condition was known, or reasonably should have been known by the accused.

Note: For the purpose of this policy, students should understand that

- (1) Forced intercourse or other unwanted sexual contact is defined as rape or sexual assault whether the assailant is a stranger or an acquaintance of the complainant.
- (2) Intoxication of the assailant shall not diminish the assailant's responsibility for sexual assault.

### If a Person Has Been Raped or Sexually Assaulted

Those who believe that they are the victims of rape or other forms of sexual assault should

- (1) **Immediately call the police department.** If possible, call the UCLA Police Department at (310) 825-1491 or 911.
- (2) **Get medical attention.** Campus police will provide transportation to the Santa Monica Hospital Emergency Room for emergency medical treatment and evidence collection. A counselor from the Santa Monica Rape Treatment Center will be available at that time, free of charge.

Utilize campus and community support services:

- (1) **Contact a Rape Services Consultant (RSC)** at the Women's Resource Center. RSCs have expertise in working with victims of

rape or sexual assault. They can discuss options and alternatives, help identify the most appropriate support services, and provide information about medical care, psychological counseling, academic assistance, legal options, how to file a police report, and how to file a complaint through the Office of the Dean of Students. RSCs are available to assist UCLA faculty, staff, and students regardless of where or when the assault occurred. For assistance, contact the Women's Resource Center at (310) 206-8240 or go to 2 Dodd Hall and ask to speak to an RSC.

- (2) **Contact the Rape Treatment Center** at Santa Monica Hospital (310-319-4000) for free emergency medical treatment and counseling services.

### Campus Discipline Process When the Assailant Is a Student

Those who believe that they are the victims of rape or other forms of sexual assault by a student on University properties or in conjunction with an official University function may file a complaint directly with the Office of the Dean of Students, 1206 Murphy Hall.

Cases referred to the Office of the Dean of Students will be treated under the hearing procedures set forth in the *UCLA Student Conduct Code of Procedures*. Where the allegation is of rape or other forms of sexual assault, and the case is referred to the Student Conduct Committee, the following *additional* procedures shall apply:

- (1) The complainant shall be entitled, for support, to have up to two persons of the complainant's choice accompany the complainant to the hearing. A support person may be called as a witness, and the fact that he or she is to act as a witness shall not preclude that person's attendance throughout the entire hearing. If a support person is also a witness, the committee chair (or the hearing officer) may require him or her to testify before the complainant. Neither of these persons shall be entitled to represent or defend the complainant. Similar rights shall be afforded to the accused student.
- (2) The complainant shall have the right to be present during the entire hearing, notwithstanding the fact that the complainant is to be called as a witness.
- (3) Evidence of the complainant's past sexual history, including opinion evidence, reputation evidence, and evidence of specific instances of the complainant's sexual conduct, shall not be admissible by the accused student unless the committee chair or hearing officer makes a specific finding of relevance after an offer of proof by the accused student. Under no circumstances is past sexual history admissible to prove consent. The offer of proof must be made and resolved by the panel before the complainant testifies.
- (4) The hearing shall be closed to spectators.

## Harassment

### Sexual Harassment

Every member of the campus community should be aware that the University is strongly opposed to sexual harassment and that such behavior is prohibited both by law and by University policy.

#### Definition

Unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature constitute sexual harassment when

- (1) Submission to such conduct is made either explicitly or implicitly a term or condition of instruction, employment, or participation in other University activity;
- (2) Submission to or rejection of such conduct by an individual is used as a basis for evaluation in making academic or personnel decisions affecting an individual; OR
- (3) Such conduct has the purpose or effect of unreasonably interfering with an individual's performance or creating an intimidating, hostile, or offensive University environment.

In determining whether the alleged conduct constitutes sexual harassment, consideration will be given to the record of the incident as a whole and to the totality of the circumstances, including the nature of the sexual advances and the context in which the alleged incidents occurred (*University of California Policies Applying to Campus Activities, Organizations, and Students*, Section 160.00).

#### Complaint Resolution

Experience has demonstrated that many complaints of sexual harassment can be effectively resolved through informal intervention. Individuals who experience what they consider to be sexual harassment are advised to confront the alleged offender immediately and firmly.

Additionally, an individual who believes that she or he has been sexually harassed may contact the alleged offender's supervisor and/or a Sexual Harassment Information Center counselor for help and information regarding sexual harassment complaint resolution or grievance procedures at one of the locations listed below as determined by the complainant's status at the University at the time of the alleged incident:

- (1) Campus Ombuds Office, 1172 Career Center, (310) 825-7627 (for faculty, staff, and students)
- (2) Women's Resource Center, 2 Dodd Hall, (310) 825-3945 (for faculty, staff, and students)
- (3) Office of Residential Life, Residential Life Building, (310) 825-3401 (for students)
- (4) Office of International Students and Scholars, Tom Bradley International Center on the west side of campus, (310) 825-1681 (for international students)

(5) Student Psychological Services, 4223 Math Sciences, (310) 825-0768, or A3-062 Center for the Health Sciences, (310) 825-7985 (for students)

(6) Office of Vice Chancellor — Academic Personnel, 2147 Murphy Hall, (310) 206-9345 (for faculty, including non-Senate academic appointees and student academic appointees when acting in the capacity of their non-Senate appointments)

(7) Campus Human Resources/Employee and Labor Relations Division, 200 UCLA Wilshire Center, (310) 794-0859 (for campus staff employees and students when acting in the capacity of their staff appointments)

(8) Medical Center Human Resources Office, 924 Westwood Boulevard (Bank of America Building), Suite 200, (310) 794-0500 (for Medical Center staff employees and students when acting in the capacity of their staff appointments)

(9) UCLA Extension Dean's Office, 770 UCLA Extension (UNEX), (310) 825-5603 (for UCLA Extension faculty, staff employees, and students)

### Other Forms of Harassment

The University strives to create an environment which fosters the values of mutual respect and tolerance and is free from discrimination based on race, ethnicity, sex, religion, sexual orientation, disability, age, and other personal characteristics. Certainly harassment, in its many forms, works against those values and often corrodes a person's sense of worth and interferes with one's ability to participate in University programs or activities. While the University is committed to the free exchange of ideas and the full protection of free expression, the University also recognizes that words can be used in such a way that they no longer express an idea, but rather injure and intimidate, thus undermining the ability of individuals to participate in the University community. The *University of California Policies Applying to Campus Activities, Organizations, and Students* (hereafter referred to as *Policies*) presently prohibit a variety of conduct by students which, in certain contexts, may be regarded as harassment or intimidation.

For example, harassing expression which is accompanied by physical abuse, threats of violence, or conduct that threatens the health or safety of any person on University property or in connection with official University functions may subject an offending student to University discipline under the provisions of Section 102.08 of the *Policies*.

Similarly, harassing conduct, including symbolic expression, which also involves conduct resulting in damage to or destruction of any property of the University or property of others while on University premises may subject a student violator to University discipline under the provisions of Section 102.04 of the *Policies*.

Further, under specific circumstances described in the *Universitywide Student Conduct Harassment Policy*, students may be subject to University discipline for misconduct which may consist solely of expression. Copies of this *Policy* are available in the Office of the Dean of Students, 1206 Murphy Hall, or in any of the Harassment Information Centers listed below:

- (1) Campus Ombuds Office, 1172 Career Center, (310) 825-7627
- (2) Women's Resource Center, 2 Dodd Hall, (310) 825-3945
- (3) Office of Residential Life, Residential Life Building, (310) 825-3401
- (4) Office of International Students and Scholars, Tom Bradley International Center on the west side of campus, (310) 825-1681
- (5) Student Psychological Services, 4223 Math Sciences, (310) 825-0768, or A3-062 Center for the Health Sciences, (310) 825-7985
- (6) Office of Fraternity and Sorority Relations, 118 Men's Gym, (310) 825-6322

#### Complaint Resolution

One of the necessary measures in our efforts to assure an atmosphere of civility and mutual respect is the establishment of procedures which provide effective informal and formal mechanisms for those who believe that they have been victims of any of the above misconduct.

Many incidents of harassment and intimidation can be effectively resolved through informal means. For example, an individual may wish to confront the alleged offender immediately and firmly. An individual who chooses not to confront the alleged offender and who wishes help, advice, or information is urged to contact any of the Harassment Information Centers listed immediately above.

In addition to providing support for those who believe they have been victims of harassment, Harassment Information Centers offer persons the opportunity to learn about the phenomena of harassment and intimidation; to understand the formal and informal mechanisms by which misunderstandings may be corrected and, when appropriate, student perpetrators may be disciplined; and to consider which of the available options is the most useful for the particular circumstances.

With regard to the *Universitywide Student Conduct Harassment Policy*, complainants should be aware that not all conduct which is offensive may be regarded as a violation of this *Policy* and may, in fact, be protected expression. Thus, the application of formal institutional discipline to such protected expression may not be legally permissible. Nevertheless, the University is committed to reviewing any complaint of harassing or intimidating conduct by a student and intervening on behalf of the complainant to the extent possible.

## Faculty Code of Conduct

The entire Faculty Code of Conduct can be found in the *UCLA Faculty Handbook* (copies are available in the Academic Personnel Office, 3109 Murphy Hall). Part IIA outlines faculty obligations to students and reads as follows:

### Teaching and Students

Ethical Principles: "As a teacher, the professor encourages the free pursuit of learning in students; holds before them the best scholarly standards of the discipline; demonstrates respect for the student as an individual and adheres to the proper role as intellectual guide and counselor; makes every reasonable effort to foster honest academic conduct and to assure that the evaluation of students reflects their true merit; respects the confidential nature of the relationship between professor and student; avoids any exploitation of students for private advantage and acknowledges significant assistance from them; and protects their academic freedom." (from 1966 AAUP statement)

### Types of Unacceptable Conduct

(1) Failure to meet the responsibilities of instruction, including (a) arbitrary denial of access to instruction, (b) significant intrusion of material unrelated to the course, (c) significant failure to adhere, without legitimate reason, to the rules of the faculty in the conduct of courses, to meet class, to keep office hours, or to hold examinations as scheduled, (d) evaluation of student work by criteria not directly reflective of course performance, (e) undue and unexcused delay in evaluating student work.

(2) Discrimination against a student on political grounds, or for reasons of race, religion, sex, sexual orientation, ethnic origin, national origin, ancestry, marital status, medical condition, status as a Vietnam-era veteran or disabled veteran or, within the limits imposed by law or University regulations, because of age or citizenship or for other arbitrary or personal reasons.

(3) Use of the position or powers of a faculty member to coerce the judgment or conscience of a student or to cause harm to a student for arbitrary or personal reasons.

(4) Participating in or deliberately abetting disruption, interference, or intimidation in the classroom.

### Charges of Violation

If a student has reason to believe that a faculty member has violated the code, the student may consult with a member of the Academic Senate Grievance and Disciplinary Procedures Committee (3125 Murphy Hall, 310-825-3852) for help in deciding on appropriate action. If the student believes that formal discipline may be warranted, the alleged violator should be reported to the chair of the department and to the dean of the division or school with a request that a charge be filed with the

Academic Senate Charges Committee. If the dean, in consultation with the vice chancellor of Academic Personnel, determines that there are not sufficient grounds for the administration to file a charge, the student may, after discussing the matter with a member of the Academic Senate Grievance and Disciplinary Procedures Committee, file such a charge in person if the student continues to feel it is warranted.

## Residence for Tuition Purposes

Students who have not been living in California with intent to make it their permanent home for more than one year immediately before the residence determination date for each term in which they propose to attend the University must pay a nonresident tuition fee in addition to all other fees. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter, and for schools on the semester system, the day instruction begins for the semester.

### Law Governing Residence

The rules regarding residence for tuition purposes at the University of California are governed by the California Education Code and implemented by Standing Orders of The Regents of the University of California. Under these rules adult citizens and certain classes of aliens can establish residence for tuition purposes. There are particular rules that apply to the residence classification of minors (see below).

### Who Is a Resident?

Persons who are adult students (at least 18 years of age) may establish residence for tuition purposes in California if (1) they are U.S. citizens, (2) they are permanent residents or other immigrants, or (3) they are nonimmigrants who are not precluded from establishing a domicile in the U.S. Nonimmigrants who are not precluded from establishing domicile in the U.S. include those who hold valid visas of the following types — A, E, G, H-1, H-4, I, K, L, O-1, O-3, or R. To establish residence students must be physically present in California for more than one year, and they must have come here with the intent to make California their home as opposed to coming to this state to go to school. Physical presence within the state solely for educational purposes does not constitute the establishment of California residence, regardless of the length of stay. Students must demonstrate their intention to make California their home by severing their residential ties with their former state of residence and establishing those ties with California. If these steps are delayed, the one-year durational period is extended until students have demonstrated both presence and intent for one full year. If their parents are not California residents or students were not enrolled in a regular session at any

University of California campus prior to fall 1993, they are required to be financially independent in order to be a resident for tuition purposes. Their residence cannot be derived from their spouse or their parents.

## Requirements for Financial Independence

Students are considered "financially independent" if one or more of the following apply: (1) they are at least 24 years of age by December 31 of the calendar year for which they are requesting residence classification; (2) they are a veteran of the U.S. Armed Forces; (3) they are a ward of the court or both parents are deceased; (4) they have legal dependents other than a spouse; (5) they are married, or a graduate student or a professional student, and they were not claimed as an income tax deduction by their parents or any other individual for the tax year immediately preceding the term for which they are requesting resident classification; or (6) they are a single undergraduate student and they were not claimed as an income tax deduction by their parents or any other individual for the two tax years immediately preceding the term for which they are requesting resident classification, and they can demonstrate self-sufficiency for those years and the current year. *Note:* Financial dependence is not a factor in determining residence status for graduate student instructors, graduate student teaching assistants, research assistants, junior specialists, post-graduate researchers, graduate student researchers, and teaching associates who are employed 49 percent or more of full time or awarded the equivalent in University-administered funds (e.g., grants, stipends, fellowships) in the term for which classification is sought.

## Establishing Intent to Become a California Resident

Indications of students' intent to make California their permanent residence can include the following: registering to vote and voting in California elections; designating California as their permanent address on all school and employment records, including military records if they are in the military service; obtaining a California driver's license or, if they do not drive, a California Identification Card; obtaining California vehicle registration; paying California income taxes as a resident, including taxes on income earned outside California from the date they establish residence; establishing a California residence in which they keep their personal belongings; and licensing for professional practice in California. The absence of these indicia in other states during any period for which students claim residence can also serve as an indication of their intent. Documentary evidence is required, and all relevant indications are considered in determining the classification. Intent is questioned if students return to their prior state of residence when the University is not in session.

## General Rules Applying to Minors

If students are unmarried minors (under age 18), the residence of the parent with whom they live is considered to be their residence. If they have a parent living, they cannot change their residence by their own act, by the appointment of a legal guardian, or by the relinquishment of their parent's right of control. If students live with neither parent, their residence is that of the parent with whom they last lived. Unless they are minor aliens present in the U.S. under the terms of a nonimmigrant visa which precludes them from establishing domicile in the U.S., students may establish their own residence when both their parents are deceased and a legal guardian has not been appointed. If they derive California residence from a parent, that parent must satisfy the one-year durational residence requirement.

## Specific Rules Applying to Minors

(1) **Divorced or Separated Parents.** Students may be able to derive California resident status from a California resident parent if they move to California to live with that parent on or before their 18th birthday. If they begin residing with their California parent after their 18th birthday, they are treated like any other adult student coming to California to establish residence.

(2) **Parent of Minor Moves from California.** Students may be entitled to resident status if they are minor U.S. citizens or eligible aliens whose parent(s) was a resident of California who left the state within one year of the residence determination date if (a) they remained in California after their parent(s) departed, (b) they enroll in a California public postsecondary institution within one year of their parent(s) departure, and (c) once enrolled, they maintain continuous attendance in that institution. Financial independence is not required in this case.

(3) **Two-Year Care and Control.** Students may be entitled to resident status if they are U.S. citizens or eligible aliens and they have lived continuously with an adult who is not their parent for at least two years prior to the residence determination date. The adult with whom they are living must have been responsible for their care and control for the entire two-year period and must have been residing in California during the one year immediately preceding the residence determination date.

## Exemptions from Nonresident Tuition

(1) **Member of the Military.** If students are members of the U.S. military stationed in California on active duty, unless they are assigned for educational purposes to a state-supported institution of higher education, they may be exempt from the nonresident tuition fees until they have lived in California long enough to become a resident. They must provide the residence deputy on campus with a statement from their commanding officer or person-

nel officer stating that their assignment to active duty in California is not for educational purposes. The letter must include the dates of their assignment to the state.

(2) **Spouse or Other Dependents of Military Personnel.** Students are exempt from payment of the nonresident tuition fee if they are a spouse or a natural or adopted child or stepchild who is a dependent of a member of the U.S. military stationed in California on active duty. The exemption is available until they have lived in California long enough to become a resident. Students must petition for a waiver of the nonresident tuition fee each term they are eligible. If they are enrolled in an educational institution and the member of the military is transferred on military orders to a place outside California where he or she continues to serve in the Armed Forces, or the member of the military retires from active duty immediately after having served in California on active duty, they may retain this exemption under conditions listed above.

(3) **Child or Spouse of Faculty Member.** To the extent funds are available, if students are an unmarried dependent child under age 21 or the spouse of a member of the University faculty who is a member of the Academic Senate, they may be eligible for a waiver of the nonresident tuition fee. Confirmation of the faculty member's membership on the Academic Senate must be secured each term this waiver is granted.

(4) **Child or Spouse of University Employee.** Students may be entitled to resident classification if they are an unmarried dependent child or the spouse of a full-time University employee whose assignment is outside California (e.g., Los Alamos Scientific Laboratory). Their parent's or spouse's employment status with the University must be ascertained each term.

(5) **Child of Deceased Public Law Enforcement or Fire Suppression Employee.** Students may be entitled to a waiver of the nonresident tuition fee if they are the child of a deceased public law enforcement or fire suppression employee who was a California resident at the time of his or her death and who was killed in the course of fire suppression or law enforcement duties.

(6) **Dependent Child of a California Resident.** If students have not been an adult resident of California for more than one year and are the natural or adopted dependent child of a California resident who has been a resident for more than one year immediately prior to the residence determination date, they may be entitled to a waiver of the nonresident tuition until they have resided in California the minimum time necessary to become a resident, so long as continuous attendance is maintained at an institution.

## Temporary Absences

If persons are nonresident students who are in the process of establishing a residence for tu-

ition purposes and they return to their former home during noninstructional periods, their presence in the state is presumed to be solely for educational purposes and only convincing evidence to the contrary rebuts this presumption. **Students who are in the state solely for educational purposes are NOT classified as residents for tuition purposes regardless of the length of their stay.**

If persons are students who have been classified as residents for tuition purposes and they leave the state temporarily, their absence could result in the loss of their California residence. The burden is on students (or their parents if they are minors) to verify that they did nothing inconsistent with their claim of a continuing California residence during their absence. Steps that students (or their parents) should take to retain a California residence include the following:

(1) Continue to use a California permanent address in all records — educational, employment, military, etc.

(2) Continue to satisfy California tax obligations. If students are claiming California residence, they are liable for payment of income taxes on their total income from the date they establish their residence in the state, including income earned in another state or country.

(3) Retain a California voter's registration and vote by absentee ballot.

(4) Maintain a California driver's license and vehicle registration. If it is necessary to change the driver's license or vehicle registration, students must change them back within the time prescribed by law.

## Petition for Resident Classification

Students MUST PETITION IN PERSON at 1113 Murphy Hall for a change of classification from nonresident to resident status. All changes of status must be initiated prior to the first day of classes for the term for which they intend to be classified as residents.

## Time Limitation on Providing Documentation

If additional documentation is required for residence classification but is not readily accessible, students are allowed until the end of the applicable term to provide it.

## Incorrect Classification

Students who were incorrectly classified as residents are subject to nonresident classification and to payment of all nonresident tuition fees not paid. If they concealed information or furnished false information and were classified incorrectly as a result, you are also subject to University discipline. Resident students who become nonresidents must immediately notify the residence deputy.

## Inquiries and Appeals

Inquiries regarding residence requirements, determination, and/or recognized exceptions should be directed to the Residence Deputy, Office of the Registrar, 1113 Murphy Hall, 405 Hilgard Avenue, Los Angeles, CA 90024-1429 (310-825-3447) or to the Legal Analyst — Residence Matters, 300 Lakeside Drive, 7th Floor, Oakland, CA 94612-3565. NO OTHER UNIVERSITY PERSONNEL ARE AUTHORIZED TO SUPPLY INFORMATION RELATIVE TO RESIDENCE REQUIREMENTS FOR TUITION PURPOSES.

Students are cautioned that this summary is NOT a complete explanation of the law regarding residence. Note that changes may be made in the residence requirements between the publication of this statement and the relevant residence determination date. Any student, following a final decision on residence classification by the residence deputy, may appeal in writing to the legal analyst within 45 days of notification of the residence deputy's final decision.

## Privacy Notice

All of the information requested on the Statement of Legal Residence form is required (by the authority of Standing Order 110.2 (a)-(d) of The Regents of the University of California) for determining whether or not students are legal residents for tuition purposes. Registration cannot be processed without this information. The Registrar's Office on campus maintains the requested information. Students have the right to inspect University records containing the residence information requested on the form.

## Financial Aid Minimum Progress Standards

Federal regulations require UCLA to establish, publish, and apply standards of satisfactory academic progress for financial aid eligibility. Students who fail to meet minimum progress standards become ineligible to receive financial aid until they are in compliance with the standards. If, during any term, students expect they cannot meet the satisfactory academic progress requirements listed below, they should contact the Financial Aid Office immediately for further advising.

### Undergraduate Students

#### Qualitative Standard

The qualitative standard is enforced by the college or school. Students are notified by their academic department if they fall below the required grade-point average (GPA).

#### Quantitative Standard

This standard is enforced by the Financial Aid Office on the basis of the number of units (including remedial courses) successfully completed within any given number of regular ses-

sion terms. It may differ from the college/school requirement.

All students receiving aid as full-time students must be enrolled in at least 12 units in order to obtain funds. To be eligible for financial aid as full-time students, they must successfully complete at least 24 units in each of their first two academic years at UCLA to maintain satisfactory academic progress. Thereafter, students must successfully complete 84 units by the end of the ninth term, 120 units by the end of the twelfth term, 156 units by the end of the fifteenth term, and 180 units by the end of the seventeenth term.

After 17 terms of enrollment as a full-time student or the equivalent as a part-time student, no further need-based financial aid is granted.

The measurement of progress occurs at the end of the academic year. The schedule above is adjusted appropriately for students ending an academic year with a different number of terms completed than is listed above. If students enter UCLA in advanced standing, the number of terms for which they are eligible for aid is reduced proportionally to the number of transfer units credited to their record. For example, students who are credited with 84 transfer units would have only eight terms of financial aid eligibility as an undergraduate at UCLA.

If persons are continuing students at UCLA at the time they apply for financial aid, their progress is measured by the satisfactory academic progress chart to determine their eligibility (i.e., they must have successfully completed 48 units if they attended UCLA for six terms). They would then have only 11 terms of financial aid eligibility.

#### Nonstandard Enrollment

Part-time students' progress is measured by a modified schedule, and aid is similarly modified. Summer enrollment counts as a term of enrollment for the following year if students apply the units earned toward graduation. Accommodation is made for students enrolled in a joint degree program.

#### Successful Completion

To successfully complete units, students must receive a grade of A, B, C, D, or P (S for graduate students) in a course. Grades of F, I, NP (U for graduate students), NR (No Report), and DR (Deferred Report) do not earn completed units. An I or DR grade that is replaced with a passing grade does earn units.

#### Withdrawal and Cancellation

Withdrawal from a term in which students receive financial aid applies as a term attended and works to their disadvantage on the units-per-term schedule. Cancellation of registration (prior to the first day of classes), however, does not apply as a term attended. Refund and payback of aid received is based on published schedules and the date students officially withdraw or cancel.

## Disqualification and Reinstatement

The Financial Aid Office monitors satisfactory progress annually after Winter Quarter grades are recorded. Progress is measured according to the number of terms students have attended and the number of units they have successfully completed.

If students have not met the requirements shown on the schedule, their financial aid is discontinued until the deficiencies are satisfied. They may use Summer Sessions or completion of extra units during regular academic terms to make up deficiencies.

Financial aid eligibility is reinstated for the term following the term in which students reestablish compliance with the units-per-term schedule. For example, if they successfully complete 16 units in Fall Quarter and therefore make up the deficiency, they become eligible for financial aid in Winter Quarter. Financial aid is then awarded on the basis of their need and the availability of funds.

### Appeal Process

Students who fail to meet the satisfactory academic progress standards because of debilitating illness, prolonged hospitalization, death in the immediate family, or other such mitigating circumstances may appeal their disqualification.

To appeal, students should submit a letter and supporting documentation to the Financial Aid Appeal Committee explaining the circumstances and how they affected their ability to meet the requirements. The committee evaluates the request based on the rationale and evidence provided.

## Graduate Students

### Qualitative Standard

The qualitative standard is enforced by the dean of the Graduate Division in consultation with the department.

### Quantitative Standard

Students must successfully complete at least 12 units per term of enrollment to be eligible for financial aid as full-time students. Approved study loads of less than 12 units result in proportionally reduced aid for that term and are charged against the maximum period of eligibility at the appropriate proportional rate.

### Disqualification and Appeal Process

If students fail to meet the qualitative and quantitative requirements, their financial aid is discontinued until the deficiencies are made up. Appeals are reviewed by their academic department, the dean of the Graduate Division, and/or the Financial Aid Appeal Committee.

### Period of Eligibility

The degree program to which students are admitted determines the maximum number of terms for which they can receive need-based financial aid. Terms for which no need-based aid is received are considered when determin-

ing the remaining number of terms of financial aid eligibility.

Students who are in a credential program or a professional master's program (other than Master of Fine Arts) are eligible for a maximum of nine terms of need-based financial aid.

Students who are in a Master of Fine Arts program are eligible to apply for aid for the first 12 terms of enrollment. If students are in an M.A. or M.S. program, a doctoral program, or a combination master's/doctoral program, their eligibility expires after 27 terms of enrollment. Students who change their program may be accommodated through an extension of terms of eligibility. The extension should be secured at the time the program change is made.

#### **Professional Schools**

Students attending the Schools of Dentistry, Law, and Medicine are covered by criteria established by the respective school.

## **Grading Regulations**

### **Assigning a Grade**

The instructor in charge of a course is responsible for determining the grade of each student in the course. The standards for evaluating student performance are based on the course description as approved by the appropriate course committee.

The final grade in the course is based on the instructor's evaluation of the student's achievement in the course. When on an examination or other work submitted by a student, the student is suspected of having engaged in plagiarism or otherwise having cheated, the suspected infraction is to be reported to the appropriate administrative officer of the University for consideration of disciplinary proceedings against the student. Until such proceedings, if any, have been completed, the grade DR (Deferred Report) is assigned for that course. If in such disciplinary proceedings it is determined that the student did engage in plagiarism or otherwise cheat, the administrative officer, in addition to imposing discipline, reports back to the instructor of the course involved, the nature of the plagiarism or cheating. In light of that report, the instructor may replace the grade DR with a final grade that reflects an evaluation of that which may fairly be designated as the student's own achievement in the course as distinguished from any achievement that resulted from plagiarism or cheating.

### **Grade Complaints**

A grade may be appealed, on any reasonable grounds, to the instructor, the chair of the department, and the dean of the division or school.

If the student believes that the instructor has violated the Faculty Code of Conduct by assigning the grade on any basis other than academic, the matter should first be taken up with the instructor. If the matter is not resolved, the student

may go for counsel to the Campus Ombuds Office or may follow the procedures for the formal filing of charges (see "Faculty Code of Conduct" earlier in the Appendix). If a charge is sustained by the Academic Senate Committees on Charges and on Privilege and Tenure, an ad hoc committee is appointed within two weeks to review the disputed grade, and any warranted change is made within four weeks.

### **Correction of Grades**

All grades, except DR, I, and IP, are final when filed by the instructor in the end-of-term course report. However, the Registrar's Office is authorized to change a final grade (1) on written request of an instructor, provided that a clerical or procedural error is the reason for the change or (2) on written request of the chair of the UCLA Academic Senate in cases where it has been determined by the Committee on Privilege and Tenure that an instructor has assigned a grade on any basis other than academic grounds. No change of grade may be made on the basis of reexamination or, with the exception of the I and IP grades, the completion of additional work. Any grade change request made more than one year after the original filing must be validated for authenticity of the instructor's signature by the department chair. Any grade change request made by an instructor who has left the University must be countersigned by the department chair. All grade changes are recorded on the transcript.

### **Policy on Alternate Examination Dates**

In compliance with Section 92640(a) of the California Education Code, the University must accommodate requests for alternate examination dates at a time when that activity would not violate a student's religious creed. This requirement does not apply in the event that administering the test or examination at an alternate time would impose an undue hardship which could not reasonably be avoided. Accommodation for alternate examination dates will be worked out directly and on an individual basis between the student and the faculty member involved.

(1) In general, students should make such requests of the instructor during the first two weeks of any given academic term, or as soon as possible after a particular examination date is announced by the instructor.

(2) Students unable to reach a satisfactory arrangement with their instructor should contact the Campus Ombuds Office, 1172 Career Center, or the Office of the Dean of Students, 1206 Murphy Hall, for assistance.

(3) Instructors who have questions or who wish to verify the nature of the religious event or practice involved should contact the Campus Ombuds Office or the Office of the Dean of Students for assistance.

## **Undergraduate Final Examinations**

No student shall be excused from assigned final examinations, except as provided above in the policy on alternate examination dates and as provided in the following three paragraphs.

The instructor in charge of an undergraduate course is responsible for assigning the final grade in the course. The final grade shall reflect the student's achievement in the course and shall be based on adequate evaluation of that achievement. The instructor's method of evaluation must be announced at the beginning of the course. The methods may include a final written examination, a term paper, a final oral examination, a take-home examination, or other evaluation device. Evaluation methods must be of reasonable duration and difficulty and must be in accord with applicable departmental policies. Final written examinations may not exceed three hours' duration and are given only at the times and places established and published by the department chair and the Registrar's Office.

At the end of the term in which a student is expected to be graduated, a student's major department may examine him or her in the field of the major, may excuse the student from final examinations in courses offered by the department during that term and, with the approval of the Undergraduate Council, assign a credit value to such general examination.

An instructor shall, if he or she wishes, release to individual students their original final examinations (or copies). This may be done by any method which insures the students' right to privacy. Otherwise, the instructor shall retain final examination materials, or a copy thereof, until the end of the next succeeding regular term of instruction, during which period students shall have access to their examinations.

## **Disclosure of Student Records**

Pursuant to the Federal Family Educational Rights and Privacy Act, the California Education Code, and the University of California Policies Applying to the Disclosure of Information from Student Records, students at UCLA have the right (1) to inspect and review records pertaining to themselves in their capacity as students, except as the right may be waived or qualified under the Federal and State Laws and the University Policies, (2) to have withheld from disclosure, absent their prior consent for release, personally identifiable information from their student records, except as provided by the Federal and State Laws and the University Policies, (3) to inspect records maintained by UCLA of disclosures of personally identifiable information from their student records, (4) to seek correction of their student records through a request to amend the records or, if such request is denied, through a hearing, and (5) to file complaints with the U.S. De-

partment of Education regarding alleged violations of the rights accorded them by the Federal Act.

UCLA, in accordance with the Federal and State Laws and the University Policies, has designated the following categories of personally identifiable information as "public information" which UCLA may release and publish without the student's prior consent: name, address (local/mailling, permanent, and/or e-mail), telephone numbers, major field of study, dates of attendance, number of course units in which enrolled, degrees and honors received, the most recent previous educational institution attended, participation in officially recognized activities (including intercollegiate athletics), and the name, weight, and height of participants on intercollegiate athletic teams.

Students who do not wish certain items (i.e., name, local/mailling, permanent, and/or e-mail address, telephone numbers, major field of study, dates of attendance, number of course units in which enrolled, and degrees and honors received) of this "public information" released and published may so indicate on URSA Telephone at (310) 208-0425 or URSA OnLine at <http://www.ursa.ucla.edu/>. To restrict the release and publication of the additional items in the category of "public information," complete the Decline to Release form available from Enrollment and Degree Services, 1113 Murphy Hall.

Student records which are the subject of the Federal and State Laws and the University Policies may be maintained in a variety of offices, including the Registrar's Office, Office of the Dean of Students, UCLA Career Center, Graduate Division, and the offices of a student's college or school and major department. Students are referred to the *UCLA Campus and CHS Directory* which lists all the offices that may maintain student records, together with their campus address and telephone number. Students have the right to inspect their student records in any such office subject to the terms of the Federal and State Laws and the University Policies. Inspection of student records maintained by the Registrar's Office is by appointment only. Call (310) 206-0482 or inquire at Academic Record Services, 1134 Murphy Hall.

A copy of the Federal and State Laws, the University Policies, and the *UCLA Campus and CHS Directory* may be inspected in the office of the Information Practices Coordinator, 600 UCLA Wilshire Center. Information concerning students' hearing rights may be obtained from that office and from the Office of the Dean of Students, 1206 Murphy Hall.

In addition to the public information described above, information related to students' Social Security number, sex, and marital status, and the name(s), address(es), and telephone number(s) of their parents or next of kin are made

available to the UCLA University Relations Department for use in alumni, development, and public relations activities. To restrict the release of this additional information, complete a Request for University Relations Information Restriction form available from Enrollment and Degree Services, 1113 Murphy Hall.

## UCLA Retention/Graduation Rates and Time to Degree

Retention and graduation rates at UCLA are at all-time high levels for the campus and among the highest rates observed at public universities anywhere in the country. One-year retention rates for complete undergraduate cohorts have been above 90 percent for more than a decade and continue to rise. Over 94 percent of new freshmen and 92 percent of new transfers who entered UCLA from Fall Quarter 1993 to Fall Quarter 1995 were still enrolled at UCLA one year later.

Graduation rates have also increased steadily. Four-year, five-year, and six-year graduation rates for complete cohorts of entering fall freshmen have averaged 37, 72, and 78 percent respectively over the past three years, up from 26, 64, and 72 percent respectively for freshmen entering in Fall Quarter 1985. More than 80 percent of all 1987 fall freshmen have graduated from UCLA; final graduation rates of better than 80 percent are projected for all freshmen cohorts arriving since that date. Two-year, three-year, and four-year graduation rates for complete cohorts of entering fall transfers have averaged 34, 70, and 78 percent respectively over the past three years, up from 19, 60, and 73 percent respectively for transfers entering in Fall Quarter 1985. More than 80 percent of all 1990 fall transfers have now graduated from UCLA; final graduation rates of better than 80 percent are likely to be observed for all transfer cohorts arriving since that date. Graduation rates listed above refer exclusively to degrees awarded by UCLA. Students in entering cohorts who transfer to and graduate from another UC campus or university are not included.

Time to degree for undergraduates at UCLA has declined significantly during the 1990s. During the past three years (1993-94 to 1995-96), more than 10,000 baccalaureate degrees were awarded to students who entered UCLA directly from high school. The average number of quarters registered at UCLA was 13.27, declining from an average of 13.74 quarters registered for similar graduates in 1989-90. Among the recent graduates, 47 percent were registered for 12 quarters or less (i.e., four years or less), 58 percent were registered for 13 quarters or less, 70 percent were registered for 14 quarters or less, and 92 percent were registered for 15 quarters or less (i.e., five years or less). During the same three years, more than 4,800 baccalaureate degrees were awarded to students who entered UCLA as junior transfers. The average number of quarters registered at UCLA was 7.31, declining from

an average of 7.93 quarters registered for similar graduates in 1989-90. Among the recent graduates, 46 percent were registered for six quarters or less (i.e., two years or less), 62 percent were registered for seven quarters or less, 73 percent were registered for eight quarters or less, and 91 percent were registered for 15 quarters or less (i.e., three years or less).

## Campus Security Information

### UCLA Police Department

The UCLA Police Department (310-825-1491; <http://www.ucpd.ucla.edu/>), located at Westwood Plaza and Circle Drive South, has 59 sworn California State Police Officers empowered by the State of California with the authority to enforce all state and local laws. UCLA police officers patrol the campus 24 hours a day, 365 days a year. They enforce all applicable local, state, and federal laws, arrest violators, investigate and suppress crime, and provide a full range of police services.

The department is linked by computer to city, state, and federal criminal justice agencies that provide access to information concerning criminal records, wanted persons, stolen property, and vehicle identification. The Detective Bureau handles all criminal investigations, and detectives conduct interviews, arrest violators, execute search warrants, and file cases with the city attorney's office.

### Incident Reporting

UCLA police officers have primary jurisdiction over the UCLA campus and the Center for the Health Sciences. The City of Los Angeles Police Department does not handle calls for service on campus. All requests for police service should be made to the UCLA Police Department (Circle Drive South and Westwood Plaza). All crime occurring on campus and in the Center for the Health Sciences should be reported immediately to the department to ensure appropriate action is taken. The University endorses a policy that strongly encourages victims to report all incidents to the department anytime of the day or night. Crimes occurring off campus should be reported immediately to the law enforcement agency with proper jurisdiction over that area.

Police, fire, or medical EMERGENCIES can be reported by dialing **911** from any telephone on campus. All telephones (University, private, public) located on University grounds are tied into the 911 emergency system. Emergencies can also be reported by using the blue-hooded Emergency Reporting Telephones located throughout the campus.

NONEMERGENCY calls for service can be made by contacting the department at (310) 825-1491.

### Community Service Officers

The UCLA Police Department employs approximately 200 student community service officers (CSOs) who are the “eyes and ears” (trained observers) of the department and act as non-intervention visual deterrents to crime. CSOs wear high-visibility uniforms and carry two-way police radios. They are dispatched by the department’s Communications Center and provide a direct link to police, fire, or medical aid. The CSO Division provides over 20 different safety and security programs but is most well-known for the Campus Escort Service and the Evening Van Service. The Campus Escort Service operates every day of the year from dusk to 1 a.m. Individuals requesting the service call the Communications Center; a CSO is then dispatched to walk them safely to their destina-

tion. The service is available to UCLA students, staff, faculty, and visitors and operates on campus and in the nearby residential areas. The Evening Van Service provides a safe and convenient mode of transportation around campus at night.

Additionally, the department employs unarmed security personnel to assist in crime prevention efforts in the Center for the Health Sciences and UCLA Medical Plaza. These guards provide on-site security and assistance for all who use the facilities.

### Crime Prevention

The UCLA Police Department has established a Community-Oriented Policing (COP) Program. One component of that program — crime prevention — provides the best measure

of protection. Therefore, the department supports a proactive Crime Prevention Unit that works closely with community members to make UCLA a safer place to work, live, and learn. The unit gives presentations on vehicle and residential security, personal safety, office and equipment security, and rape prevention. Brochures and literature on crime prevention and personal safety are available. Throughout the year, the crime prevention officer and the student housing offices present personal safety workshops and many other crime awareness programs. The Women’s Resource Center (WRC) and the Crime Prevention Unit provide presentations on sexual assault issues. Topics include acquaintance rape education and prevention, personal safety and prevention techniques, recovery from sexual assault, clear communications, pornography, and the continuum of violence and rape in society. The educational programs, tailored to meet the needs of individual audiences, include films, discussion groups, lectures, role-plays, and communication exercises. The WRC reaches students through the residence halls, sororities, fraternities, athletic teams, student clubs, and various student functions. Services include crisis intervention and advocacy for victims of sexual assault; short-term counseling and referrals for survivors, their families, and friends; support groups for rape survivors; and self-defense classes and a lending library. The WRC works closely with the student housing offices and the police department to increase campus safety.

Several programs have been designed to increase the level of crime awareness and campus safety at UCLA. All incidents of criminal activity which pose a potential threat to the campus are brought immediately to the attention of the community through *Campus Alert Bulletins*. With the combined efforts of the Crime Prevention Unit, the Women’s Resource Center, and the CSOs, incidents of sexual assault on campus have been reduced.

### Alcohol and Substance Abuse Education

Students with alcohol or substance abuse problems create safety and health risks for themselves and others. Such abuses also can result in a wide range of emotional and behavioral problems. Therefore, UCLA makes available to every student a variety of alcohol and substance abuse awareness programs which are designed to discourage the use of illicit substances and to educate students on the merits of legal and responsible alcohol consumption. Student Psychological Services (310-825-7985) provides counseling and referral assistance to students who are troubled by alcohol or substance abuse problems. The service is completely confidential and free to regularly enrolled students. All information and counseling is treated in accordance with University Policies and State and Federal Laws. Any decision to seek assistance is not used in connection with any academic determination or as a basis for disciplinary proceedings.

## Policies

UCLA has been designated drug free, and only under certain conditions is alcohol consumption permitted (none is permitted at athletic events). In keeping with its educational mission, the University assumes the responsibility to better inform the UCLA community about alcohol and substance abuse.

The sale, manufacture, distribution, or possession of any controlled substance without a prescription is illegal under both State and Federal Laws. Such laws are strictly enforced by UCLA police officers. Student violators are subject to University disciplinary action, criminal prosecution, fine, and imprisonment. Refer to the UCLA policies on substance abuse for further information.

The sale, consumption, and distribution of alcohol on the UCLA campus is restricted by the UCLA alcohol policy and California State Law. Organizations or groups violating alcohol or substance policies or laws may be subject to sanctions by the University.

## Residential Housing

UCLA is the size of a small city and provides residential housing to approximately 18,000 students. Housing facilities range from apartments designed for students with children to multi-student apartment complexes to high-rise student residence halls. The UCLA Police Department and student housing staff work hand in hand to create a safe and comfortable living and learning environment.

Campuswide security and safety programs for residents are held throughout the year to increase crime potential awareness and improve campus safety. To keep residents immediately informed of major crime or threats to the campus, *Crime Alert Bulletins* are posted in residential areas by the housing staff. However, residents must take an active role to ensure their own safety by exercising simple common-sense crime prevention techniques. Because the campus is open 24 hours a day, visitation to residence halls and apartments is not restricted. All residence halls have 24-hour access control on entrance doors, and during the evening hours access control monitors are stationed at each entrance. Police officers and CSOs are also assigned to the residence halls.

UCLA-affiliated organizations that maintain off-campus facilities come under the jurisdiction of their local police department. The department does not compile statistical data on criminal activity that occurs in such facilities, including off-campus housing facilities *not operated by the University*. Information related to specific locations should be requested from the law enforcement agency with proper jurisdiction over those areas.

## Safety Tips

The nature of the studies and research done at UCLA requires many of the campus buildings to be open 24 hours. Because the campus is so large and adjacent to the greater Los Ange-

les community, individuals with criminal intent find it easy to access the University grounds. Regardless of the time of day or night and no matter where persons are on campus, they should be alert and aware of their surroundings and exercise good commonsense safety precautions. Anyone parking on campus should remember to lock their vehicles and consider investing in a steering wheel locking device and/or alarm. Take advantage of all of the safety services provided by the University and the UCLA Police Department. Use the Campus Escort Service when walking at night. Keep room and apartment doors locked at all times. Most important, anyone needing assistance should not hesitate to contact the department.

# Appendix B

## University Administrative Officers

Terms of Regents appointed by the Governor expire March 1 of the year in parentheses. The Student Regent (Kathryn T. McClymond) and Alumni Regents serve a one-year term beginning July 1 and ending June 30 of the year listed.

### Regents Ex Officio

*Governor of California*

Pete Wilson

*Lieutenant Governor of California*

Gray Davis

*Speaker of the Assembly*

Cruz M. Bustamante

*State Superintendent of Public Instruction*

Delaine Eastin

*President of the Alumni Association of the University of California*

Judith Willick Levin

*Vice President of the Alumni Association of the University of California*

Charles J. Soderquist

*President of the University*

Richard C. Atkinson

### Appointed Regents

William T. Bagley (2002)

Roy T. Brophy (1998)

Frank W. Clark, Jr. (2000)

Ward Connerly (2005)

John G. Davies (2004)

Tirso del Junco (2000)

Alice J. Gonzales (1998)

S. Sue Johnson (2002)

Meredith J. Khachigian (2001)

Howard H. Leach (2001)

David S. Lee (2006)

Velma Montoya (2005)

S. Stephen Nakashima (2004)

Gerald L. Parsky (2008)

Peter Preuss (2008)

Tom Sayles (2006)

Kathryn T. McClymond, Student Regent (1998)

### Faculty Representatives to the Board of Regents

Duncan Mellichamp

Sandra Weiss

### Officers of The Regents

*President of The Regents*

Pete Wilson

*Chair of The Regents*

Tirso del Junco

*Vice Chair of The Regents*

Meredith J. Khachigian

*General Counsel*

James E. Holst

*Secretary*

Leigh Trivette

*Treasurer*

Patricia A. Small

### Office of the President

*President of the University*

Richard C. Atkinson

*Provost and Senior Vice President — Academic Affairs*

C. Judson King

*Senior Vice President — Business and Finance*

V. Wayne Kennedy

*Vice President — Agriculture and Natural Resources*

W.R. Gomes

*Vice President — Clinical Services Development*

William H. Gurtner

*Vice President — Health Affairs*

Cornelius L. Hopper, M.D.

*Vice President — University and External Relations*

Bruce B. Darling

### Officers Emeriti

*President Emeritus of the University and Professor Emeritus of Education*

David P. Gardner

*President Emeritus of the University and Professor Emeritus of Business Administration*

Clark Kerr

*President Emeritus of the University and Professor Emeritus of Political Science*

J.W. Peltason

*President Emeritus of the University and Professor Emeritus of Physics*

David S. Saxon

*Vice President Emeritus of the University, Professor Emeritus of Agricultural Economics, and Agricultural Economist Emeritus*  
Harry R. Wellman

*Vice President Emeritus — Agriculture and Natural Resources*  
Kenneth R. Farrell

*Vice President Emeritus — Budget Plans and Relations*  
Thomas E. Jenkins

*Vice President Emeritus — Financial and Business Management and Professor Emeritus of Pathology*  
Baldwin G. Lamson

*Vice President Emeritus — Physical Planning and Construction*  
Elmo R. Morgan

*University Provost Emeritus, Chancellor Emeritus, and Professor Emeritus of Mathematics*  
Angus E. Taylor

*Assistant President Emeritus*  
Dorothy E. Everett

*Associate Vice President Emeritus — Agriculture and Natural Resources Programs*  
Lowell J. Lewis

*Assistant Vice President Emeritus*  
Loren Furtado

*University Auditors Emeriti*  
Norman H. Gross  
Robert Tuffnell

*Secretary Emeritus of The Regents*  
Bonnie M. Smotony

*Associate Secretary Emeritus of The Regents*  
Elizabeth O. Hansen

*Treasurers Emeriti of The Regents*  
Herbert M. Gordon  
Owsley B. Hammond

## Chancellors of the Campuses

*Chancellor at Berkeley*  
Robert M. Berdahl

*Chancellor at Davis*  
Larry N. Vanderhoef

*Chancellor at Irvine*  
Laurel L. Wilkening

*Chancellor at Los Angeles*  
Albert Carnesale

*Chancellor at Riverside*  
Raymond L. Orbach

*Chancellor at San Diego*  
Robert C. Dynes

*Chancellor at San Francisco*  
Haile T. Debas, *Interim*

*Chancellor at Santa Barbara*  
Henry T. Yang

*Chancellor at Santa Cruz*  
M.R.C. Greenwood

## University Professors

J. Michael Bishop, *University Professor Emeritus*, San Francisco, Department of Microbiology and Immunology

E. Margaret Burbidge, *University Professor Emerita*, San Diego, Department of Physics

Marvin L. Cohen, *University Professor*, Berkeley, Department of Physics

Donald J. Cram, *University Professor Emeritus*, Los Angeles, Department of Chemistry and Biochemistry

Gerard Debreu, *University Professor Emeritus*, Berkeley, Departments of Economics and Mathematics

Robert B. Edgerton, *University Professor*, Los Angeles, Departments of Anthropology and Psychiatry and Biobehavioral Sciences

Sandra M. Faber, *University Professor*, Santa Cruz, Department of Astronomy

Richard Karp, *University Professor Emeritus*, Berkeley, Departments of Electrical Engineering and Computer Sciences, Industrial Engineering and Operations Research, and Mathematics

Murray Krieger, *University Professor Emeritus*, Irvine, Department of English and Comparative Literature

Yuan T. Lee, *University Professor Emeritus*, Berkeley, Department of Chemistry

Glenn T. Seaborg, *University Professor Emeritus*, Berkeley, Lawrence Berkeley Laboratory

S. Jonathan Singer, *University Professor Emeritus*, San Diego, Department of Biology

Neil J. Smelser, *University Professor Emeritus*, Berkeley, Department of Sociology

Edward Teller, *University Professor Emeritus*, Livermore, Lawrence Livermore Laboratory

Charles H. Townes, *University Professor Emeritus*, Berkeley, Department of Physics

Sherwood L. Washburn, *University Professor Emeritus*, Berkeley, Department of Anthropology

John R. Whinnery, *University Professor Emeritus*, Berkeley, Department of Electrical Engineering and Computer Sciences

Hayden White, *University Professor Emeritus*, Santa Cruz, Board of Studies in History of Consciousness

## UCLA Administrative Officers

*Chancellor*  
Albert Carnesale, Ph.D.

*Executive Vice Chancellor*  
Charles F. Kennel, Ph.D.

*Administrative Vice Chancellor*  
Peter W. Blackman, J. D.

*Vice Chancellor — Academic Affairs and Dean of Graduate Division*  
Claudia Mitchell-Kernan, Ph.D.

*Vice Chancellor — Academic Personnel*  
Norman Abrams, J.D.

*Vice Chancellor — Legal Affairs*  
Joseph D. Mandel, LL.B.

*Vice Chancellor — Research Programs*  
C. Kumar N. Patel, Ph.D.

*Vice Chancellor — Student Affairs*  
Winston C. Doby, Ed.D.

*Chief of Staff*  
Gloria K. Stypinski

*Director of UCLA Medical Center*  
Michael Karpf, M.D.

*University Librarian*  
Gloria S. Werner, M.L.

*Dean of International Studies and Overseas Programs*  
John N. Hawkins, Ph.D.

*Dean of UCLA Extension and Continuing Education*  
Robert Lapiner, Ph.D.

## Deans of UCLA Colleges and Schools

*School of the Arts and Architecture*  
Daniel Neuman, Ph.D.

*School of Dentistry*  
Wyatt R. Hume, B.D.S., Ph.D., D.D.Sc.

*Graduate School of Education and Information Studies*  
Theodore R. Mitchell, Ph.D.

*School of Engineering and Applied Science*  
A.R. Frank Wazzan, Ph.D.

*School of Law*  
Susan W. Prager, J.D.

*College of Letters and Science Provost*  
Brian P. Copenhaver, Ph.D.

*Division of Humanities*  
Pauline R. Yu, Ph.D.

*Division of Life Sciences*  
Frederick A. Eiserling, Ph.D.

*Division of Physical Sciences*  
Roberto Peccei, Ph.D.

*Division of Social Sciences*  
Scott L. Waugh, Ph.D.

*John E. Anderson Graduate School of Management*  
William P. Pierskalla, Ph.D.

*School of Medicine*  
Gerald S. Levey, M.D.

*School of Nursing*  
Marie J. Cowan, R.N., Ph.D.

*School of Public Health*  
Abdelmonem A. Affi, Ph.D.

*School of Public Policy and Social Research*  
Barbara J. Nelson, Ph.D.

*School of Theater, Film, and Television*  
Gilbert Cates, M.A.

---

# Appendix C

## Endowed Chairs

Although UCLA is a public institution, private gifts are increasingly important in maintaining the quality of the University's three missions of teaching, research, and community service. Among the principal forms of private support are endowed professorships or "chairs," which support the educational and research activities of distinguished members of the faculty.

As this catalog goes to press, UCLA has 126 endowed chairs which have been approved by the Office of the President of the University of California, as follows. (Asterisks indicate new chairs which have been approved by the Office of the President since publication of the 1995-97 *UCLA General Catalog*.)

### School of the Arts and Architecture

S. Charles Lee Chair in Architecture and Urban Design  
Harvey S. Perloff Chair  
UCLA Art Council Professorship of Art  
\*Presidential Chair in Music and Interactive Arts

### Graduate School of Education and Information Studies

Allan Murray Cartter Chair in Higher Education  
George F. Kneller Chair in Education and Philosophy

### School of Engineering and Applied Science

L.M.K. Boelter Chair in Engineering  
Norman E. Friedmann Chair in Knowledge Sciences  
Hughes Aircraft Company Chair in Electrical Engineering  
Hughes Aircraft Company Chair in Manufacturing Engineering  
Levi James Knight, Jr., Chair in Engineering  
Nippon Sheet Glass Company Chair in Materials Science  
Northrop Chair in Electrical Engineering/Electromagnetics  
Ralph M. Parsons Chair in Chemical Engineering  
\*Ben Rich Lockheed Martin Chair in Aeronautics  
Rockwell International Chair in Engineering  
TRW Chair in Electrical Engineering

### School of Law

Harry Graham Balter Chair in Law  
Connell Professorship of Law  
Richard C. Maxwell Chair in Law  
Arjay and Frances Fearing Miller Chair in Law

David G. and Dallas P. Price Chair in Law  
Security Pacific Bank Chair  
William D. Warren Chair in Law

### College of Letters and Science

Maurice Amado Chair in Sephardic Studies  
Armenian Educational Foundation Chair in Modern Armenian History  
Henry J. Bruman Chair in German History  
Ralph Bunche Chair in International Studies  
Edward W. Carter Chair in Netherlandish Art  
James S. Coleman Chair in International Development Studies  
Courtaulds Chair in Chemistry  
Mr. and Mrs. C.N. Flint Professorship of Philosophy  
Gloria and Paul Griffin Chair in Philosophy  
Armand Hammer Chair in Leonardo Studies  
Marvin Hoffenberg Chair in American Politics and Public Policy  
Franklin D. Murphy Chair in Italian Renaissance Studies  
Narekatsi Chair in Armenian Studies  
"1939" Club Chair  
President's Chair in Developmental Immunology  
Hans Reichenbach Chair in Scientific Philosophy  
David S. Saxon Presidential Chair in Physics  
Louis B. Slichter Chair in Geophysics and Planetary Physics  
Charles Speroni Chair in Italian Literature and Culture  
UCLA Alumni and Friends of Japanese Ancestry Chair in Japanese American Studies  
UCLA Foundation Chair  
Eugen Weber Chair in Modern European History  
\*Alexander von Humboldt Endowed Chair in Geography  
Saul Winstein Chair in Organic Chemistry

### John E. Anderson Graduate School of Management

Allstate Chair in Insurance and Finance  
Andersen Worldwide Chair in Management  
John E. Anderson Chair in Management  
Marion Anderson Chair in Management  
California Chair in Real Estate and Land Economics  
Edward W. Carter Chair in Business Administration  
\*William M. Cockrum Professorship in Entrepreneurial Finance  
James A. Collins Chair in Management  
Warren C. Corder Chair in Money and Financial Markets  
Ernst and Young Chair in Accounting  
Henry Ford II Chair in International Management

Goldyne and Irwin Hearsh Chair in Money and Banking  
IBM Chair in Computers and Information Systems  
Joseph Jacobs Chair in Entrepreneurial Studies  
\*Neil Jacoby Chair in Management  
Kommerstad Chair in Financial Markets  
Harry and Elsa Kunin Chair in Business and Society  
William E. Leonhard Chair in Management  
Chauncey J. Medberry Chair in Management  
\*Howard Noble Chair in Management  
Paine Chair in Management  
\*George Robbins Chair in Management  
Sanford and Betty Sigoloff Chair in Corporate Renewal  
Times Mirror Chair in Management Strategy and Policy  
\*Ho-Su Wu Chair in Management

### School of Medicine

William S. Adams, M.D., Chair in Medicine  
Louis D. Beaumont Chair in Surgery  
Bowyer Professorship of Medical Oncology  
Judson Braun Chair in Biological Psychiatry  
Joseph Campbell Chair in Child Psychiatry  
Iris Cantor Chair in Breast Imaging  
Edward W. Carter Chair in Internal Medicine  
Castera Chair in Cardiology  
Tony Coelho Chair in Neurology  
Crump Chair in Medical Engineering  
M. Philip Davis Chair in Microbiology and Immunology  
Dumont-UCLA Chair in Transplantation Surgery  
Max Factor Family Foundation Chair in Nephrology  
Charles Kenneth Feldman Chair in Ophthalmology  
Dolly Green Chair in Ophthalmology  
Maud Cady Guthman Chair in Cardiology  
Chizuko Kawata Chair in Cardiology  
George F. Kneller Chair in Family Medicine  
Grace and Walter Lantz Endowed Chair  
Eleanor I. Leslie Chair in Neuroscience  
William P. Longmire, Jr., Chair in Surgery  
Markham Chair in Neurology  
Della Martin Chair in Psychiatry  
Sherman M. Mellinkoff Distinguished Professor in Medicine Endowed Chair  
James H. Nicholson Chair in Pediatric Cardiology  
Samuel J. Pearlman, M.D., and Della Z. Pearlman Chair in Head and Neck Surgery  
Thomas P. and Katherine K. Pike Chair in Alcohol Studies  
Elizabeth R. and Thomas E. Plott Chair in Gerontology

\*Edith Agnes Plumb Endowed Chair in Neurobiology  
 \*Revlon Chair in Women's Health  
 Leo G. Rigler Chair in Radiological Sciences  
 Augustus S. Rose Chair in Neurology  
 \*Jennifer Jones Simon Chair in Radiation Oncology  
 Norton Simon Chair in Biophysics  
 Norman F. Sprague Chair in Molecular Oncology  
 \*Fran and Ray Stark Foundation Chair in Digestive Diseases  
 \*Fran and Ray Stark Foundation Chair in Urology  
 Frances and Ray Stark Chair in Ophthalmology  
 Frances Stark Chair in Neurology  
 Jules Stein Chair in Ophthalmology  
 W. Eugene Stern Chair in Neurosurgery  
 Stotter Chair in Neurosurgery  
 \*Bradley R. Straatsma, M.D., Endowed Chair in Ophthalmology  
 Dorothy and Leonard Straus Chair in Gastroenterology in Memory of Gussie Borun  
 Streisand Chair in Cardiology  
 Leon J. Tiber, M.D., and David S. Alpert, M.D., Chair in Medicine  
 Vernon O. Underwood Family Chair in Ophthalmology  
 Richard D. and Ruth P. Walter Chair in Neurology  
 Wasserman Professor of Ophthalmology

### School of Nursing

Lulu Wolf Hassenplug Chair in Nursing

### School of Public Health

Fred H. Bixby Chair in Population Policy  
 Fred W. and Pamela K. Wasserman Chair in Health Services

### School of Public Policy and Social Research

Marjorie Crump Chair in Social Welfare  
 Harvey S. Perloff Chair

## Appendix D

### Distinguished Teaching Awards

#### Academic Senate Recipients

Each year the UCLA Alumni Association presents Distinguished Teaching Awards to five Academic Senate faculty members. The highly

prized awards are presented at the annual UCLA Alumni Association Awards Ceremony, and selection of recipients is based on recommendations of the Academic Senate Committee on Teaching. Nominations are solicited from academic departments during Fall Quarter.

The Luckman Distinguished Teaching Awards Program was established in late 1991 after receipt of a generous gift from Harriet and Charles Luckman. Awards given for 1992 through 1997 are to be named the Luckman Distinguished Teaching Awards.

#### 1961

John F. Barron (*Economics*)  
 Hector E. Hall (*Physiology*)  
 Kenneth N. Trueblood (*Chemistry and Biochemistry*)

#### 1962

Charles W. Hoffman (*Germanic Languages*)  
 Thomas P. Jenkin (*Political Science*)  
 Ken Nobe (*Chemical Engineering*)

#### 1963

Carl W. Hagge (*Germanic Languages*)  
 Wendell P. Jones (*Education*)  
 Robert H. Sorgenfrey (*Mathematics*)  
 Saul Winstein (*Chemistry and Biochemistry*)

#### 1964

Mostafa A. El-Sayed (*Chemistry and Biochemistry*)  
 Leon Howard (*English*)  
 Moshe F. Rubinstein (*Civil and Environmental Engineering*)

#### 1965

E.A. Carlson (*Biology*)  
 W.R. Hitchcock (*History*)  
 Allen Parducci (*Psychology*)  
 William R. Romig (*Microbiology and Molecular Genetics*)

#### 1966

George A. Bartholomew (*Biology*)  
 William P. Gerberding (*Political Science*)  
 Hans Meyerhoff (*Philosophy*)  
 Joseph E. Spencer (*Geography*)

#### 1967

Basil Gordon (*Mathematics*)  
 J.A.C. Grant (*Political Science*)  
 William Matthews (*English*)  
 David S. Saxon (*Physics and Astronomy*)  
 E.K.L. Upton (*Physics and Astronomy*)

#### 1968

Edward W. Graham (*Chemistry and Biochemistry*)  
 W. James Popham (*Education*)  
 Sydney C. Rittenberg (*Microbiology and Molecular Genetics*)  
 Robert P. Stockwell (*Linguistics*)  
 Fred N. White (*Physiology*)

#### 1969

Robert J. Finkelstein (*Physics and Astronomy*)  
 Douglas S. Hobbs (*Political Science*)  
 J.E. Phillips (*English*)  
 Raymond M. Redheffer (*Mathematics*)  
 Margaret I. Sellers (*Microbiology and Immunology*)

#### 1970

Ehrhard Bahr (*Germanic Languages*)  
 Joseph Cascarano (*Biology*)  
 B. Lamar Johnson (*Education*)  
 Daniel Kivelson (*Chemistry and Biochemistry*)  
 Richard D. Lehan (*English*)

#### 1971

Vernon E. Denny (*Chemical Engineering*)  
 Peter N. Ladefoged (*Linguistics*)  
 Arthur D. Schwabe (*Medicine*)  
 Duane E. Smith (*Political Science*)  
 Andreas Tietze (*Near Eastern Languages and Cultures*)

#### 1972

Barbara K. Keogh (*Education*)  
 James N. Miller (*Microbiology and Immunology*)  
 David S. Rodes (*English*)  
 Ned A. Shearer (*Speech*)  
 Charles A. West (*Chemistry and Biochemistry*)

#### 1973

Kirby A. Baker (*Mathematics*)  
 David Evans (*Chemistry and Biochemistry*)  
 Albert Hoxie (*History*)  
 Nhan Levan (*Electrical Engineering*)  
 Judith L. Smith (*Physiological Science*)

#### 1974

Robert B. Edgerton (*Anthropology, Psychiatry and Biobehavioral Sciences*)  
 David S. Eisenberg (*Chemistry and Biochemistry*)  
 Victoria A. Fromkin (*Linguistics*)  
 Robert C. Neerhout (*Pediatrics*)  
 Andrea L. Rich (*Speech*)

#### 1975

Alma M. Hawkins (*World Arts and Cultures*)  
 Morris Holland (*Psychology*)  
 Paul M. Schachter (*Linguistics*)  
 Stanley A. Wolpert (*History*)  
 Richard W. Young (*Neurobiology*)

#### 1976

Marianne Celce-Murcia (*Teaching English as a Second Language and Applied Linguistics*)  
 Jesse J. Dukeminier (*Law*)  
 George R. Guffey (*English*)  
 Marilyn L. Kourilsky (*Education*)  
 Chand R. Viswanathan (*Electrical Engineering*)

**1977**

Michael J.B. Allen (*English*)  
 Henry M. Cherrick (*Dentistry*)  
 Richard C. Maxwell (*Law*)  
 J. William Schopf (*Earth and Space Sciences*)  
 Verne N. Schumaker (*Chemistry and Biochemistry*)

**1978**

William R. Allen (*Economics*)  
 Michael E. Jung (*Chemistry and Biochemistry*)  
 J. Fred Weston (*Management*)  
 Thomas D. Wickens (*Psychology*)  
 Johannes Wilbert (*Anthropology*)

**1979**

Steven Krantz (*Mathematics*)  
 Paul I. Rosenthal (*Communication Studies*)  
 Christopher Salter (*Geography*)  
 James H. White (*Mathematics*)  
 Stephen C. Yeazell (*Law*)

**1980**

A.R. Braunmuller (*English*)  
 Fredi Chiappelli (*Italian*)  
 Kenneth L. Karst (*Law*)  
 Richard F. Logan (*Geography*)  
 Ronald F. Zernicke (*Physiological Science*)

**1981**

Arnold J. Band (*Near Eastern Languages and Cultures*)  
 Charles L. Batten, Jr. (*English*)  
 Lucien B. Guze (*Medicine*)  
 Gerald Lopez (*Law*)  
 Andy Wong (*Dentistry*)

**1982**

Dean Bok (*Neurobiology*)  
 Robin S. Liggett (*Architecture and Urban Design, Urban Planning*)  
 William Melnitz (*Theater*)  
 Joseph K. Perloff (*Medicine*)  
 Karen E. Rowe (*English*)

**1983**

Claude Bernard (*Physics and Astronomy*)  
 Bryan C. Ellickson (*Economics*)  
 Robert S. Elliott (*Electrical Engineering*)  
 Albert D. Hutter (*English*)  
 Charles M. Knobler (*Chemistry and Biochemistry*)

**1984**

Robert Dallek (*History*)  
 Hooshang Kangerloo (*Radiological Sciences*)  
 Jeffrey Prager (*Sociology*)  
 Stanley Siegel (*Law*)  
 Sandra A. Thompson (*Linguistics*)

**1985**

Patricia M. Greenfield (*Psychology*)  
 David F. Martin (*Computer Science*)  
 Mark W. Plant (*Economics*)  
 Ross P. Shideler (*Scandinavian Section, Comparative Literature*)  
 William D. Warren (*Law*)

**1986**

Roger A. Gorski (*Neurobiology*)  
 Patricia A. Keating (*Linguistics*)  
 Leonard Kleinrock (*Computer Science*)  
 Martin Wachs (*Urban Planning*)  
 Scott L. Waugh (*History*)

**1987**

Lawrence W. Bassett (*Radiological Sciences*)  
 E. Bradford Burns (*History*)  
 Kenneth W. Graham, Jr. (*Law*)  
 Howard Suber (*Film and Television*)  
 Richard A. Yarborough (*English*)

**1988**

Alison G. Anderson (*Law*)  
 Ann L.T. Bergren (*Classics*)  
 Charles A. Berst (*English*)  
 Michael J. Goldstein (*Psychology*)  
 Richard L. Sklar (*Political Science*)

**1989**

John B. Garnett (*Mathematics*)  
 Kathleen L. Komar (*Germanic Languages*)  
 William G. Roy (*Sociology*)  
 Stephen Yenser (*English*)  
 Eric M. Zolt (*Law*)

**1990**

Peter M. Narins (*Physiological Science*)  
 Gary B. Nash (*History*)  
 John S. Wiley (*Law*)  
 Merlin C. Wittrock (*Education*)  
 Ruth Yeazell (*English*)

**1991**

Michael R. Asimow (*Law*)  
 Edward G. Berenson (*History*)  
 Robert A. Bjork (*Psychology*)  
 Margaret FitzSimmons (*Urban Planning*)  
 Kenneth R. Lincoln (*English*)

**1992**

Bruce L. Baker (*Psychology*)  
 Paul B. Bergman (*Law*)  
 Robert B. Goldberg (*Molecular, Cell, and Developmental Biology*)  
 Peter E. Kollock (*Sociology*)  
 Eugen Weber (*History*)

**1993**

Calvin B. Bedient (*English*)  
 Richard B. Kaner (*Chemistry and Biochemistry*)  
 Katherine C. King (*Classics*)  
 William G. Ouchi (*Management*)  
 Bruce Schulman (*History*)

**1994**

David A. Binder (*Law*)  
 Jon P. Davidson (*Earth and Space Sciences*)  
 Melvin Oliver (*Sociology*)  
 Barbara L. Packer (*English*)  
 E. Victor Wolfenstein (*Political Science*)

**1995**

Noriko Akatsuka (*East Asian Languages and Cultures*)  
 Douglas Hollan (*Anthropology*)  
 V.A. Kolve (*English*)  
 Jerome Rabow (*Sociology*)  
 Paul V. Reale (*Music*)

**1996**

Walter Allen (*Sociology*)  
 Judith A. Carney (*Geography*)  
 William M. Gelbart (*Chemistry and Biochemistry*)  
 Phyllis A. Guzé (*Medicine*)  
 Peter B. Hammond (*Anthropology*)

**1997**

Uptal Banerjee (*Molecular, Cell, and Developmental Biology*)  
 Christine D. Gutierrez (*Education*)  
 Susan McClary (*Musicology*)  
 Arnold B. Scheibel (*Neurobiology, Psychiatry and Biobehavioral Sciences*)  
 Ivan Szelenyi (*Sociology*)

**Non-Academic Senate Recipients**

In spring of 1985, the Office of Instructional Development began sponsorship of awards to three instructors who are not members of the Academic Senate. This category includes lecturers and adjunct and clinical faculty members. All non-Academic Senate faculty members who are nominated by their departments are eligible. Recipients are selected by the Academic Senate Committee on Teaching, utilizing the same criteria as that used for Academic Senate members.

The Luckman Distinguished Teaching Awards Program was established in late 1991 after receipt of a generous gift from Harriet and Charles Luckman. Awards given for 1992 through 1997 are to be named the Luckman Distinguished Teaching Awards.

- 1985**  
 L. Geoffrey Cowan (*Communication Studies*)  
 Mary Elizabeth Perry (*History*)  
 Linda Diane Venis (*English*)
- 1986**  
 David Cohen (*Mathematics*)  
 Johanna Harris-Heggie (*Music*)  
 Paul Von Blum (*Interdisciplinary*)
- 1987**  
 Carol D. Berkowitz (*Pediatrics*)  
 Jeffrey I. Cole (*Communication Studies*)  
 Cheryl Giuliano (*Writing Programs*)
- 1988**  
 Jeanne Gunner (*Writing Programs*)
