215B. Syriac. (4) Lecture, two hours. Morphology and syntax of Syriac language; readings in Syriac translation of the Bible and Syriac literature. May be repeated for credit.
220A-220B. Ugaritic. (4-4) Lecture, two hours. Requisites: Hebrew 102A-102B-102C. Study of Ugaritic language and literature. Only course 220B may be repeated for credit.
225. Phoenician. (4) Lecture, two hours. Requisites: Hebrew 102A-102B-102C. Study of Phoenician language and inscriptions. May be repeated for credit.
230. Seminar: Northwest Semitic Languages and Literatures. (4) Seminar, two hours. May be repeated for credit.
240. Seminar: Akkadian Language. (4) Seminar, two hours. Readings of texts from various dialects of Akkadian; selected problems in linguistic analysis of Akkadian dialects. May be repeated for credit.
240X. Seminar: Akkadian Language. (1) Seminar, two hours. Readings of texts from various dialects of Akkadian; selected problems in linguistic analysis of Akkadian dialects. Course for students who participate regularly in class meetings but without the homework required in course 240. May be repeated for credit. S/U grading.
241. Seminar: Akkadian Literature. (4) Seminar, two hours. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. May be repeated for credit.
241X. Seminar: Akkadian Literature. (1) Seminar, two hours. Readings of texts from various Akkadian literary genres; selected problems in literary history and stylistic analysis. Course for students who participate regularly in class meetings but without the homework required in course 241. May be repeated for credit. S/U grading.
280A-280B-280C. Seminars: Comparative Semitics. (4) Seminar, two hours.
596. Directed Individual Study. (2 to 8) Tutorial, to be arranged. May be repeated for credit.
597. Examination Preparation. (2 to 8) Tutorial, to be arranged. S/U grading.
599. Ph.D. Dissertation Research and Preparation. (2 to 8) S/U grading.

Turkic Languages

Upper Division Courses

- 101A-101B-101C. Elementary Turkish. (4-4-4)** Lecture, five hours. Grammar, reading, conversation, and elementary composition drills.
102A-102B-102C. Advanced Turkish. (4) Lecture, five hours. Requisites: courses 101A-101B-101C. Continuing study of grammar, conversation, and composition. Readings in modern literature and social science texts.
111A-111B-111C. Elementary Uzbek. (4-4-4) Lecture, three hours; laboratory, two hours. Elementary grammar, reading, and composition exercises; elementary conversation.
112A-112B-112C. Advanced Uzbek. (4-4-4) Lecture, three hours; laboratory, two hours. Descriptive Uzbek grammar, reading, and analysis of Uzbek literary and folkloric texts. High-style composition and conversation.
114A-114B-114C. Bashkir. (4-4-4) Lecture, three hours. Requisite: course 102A. Grammar, reading of literary and folkloric texts.

115A-115B-115C. Elementary Azeri. (4-4-4) Knowledge of Russian, Turkish, and Iranian helpful. Grammatical competence at elementary level; knowledge of basic facts of Azeri grammar; reading competence with help of dictionary; ability to write simple compositions; basic conversational skill.

116A-116B-116C. Advanced Azeri. (4-4-4) Preparation: placement test. Proficiency-based course in descriptive Azeri grammar. Reading and analysis of Azeri literary and folkloric texts in new writing system. High-style composition and conversation.

120A-120B-120C. Descriptive Grammar of Modern Literary Uzbek. (4-4-4) Lecture, three hours; discussion, one hour; laboratory, one hour. Requisites: courses 102A-102B-102C or 111A-111B-111C or 180. Systematic and comprehensive grammatical survey of modern literary Uzbek, official language of the newly independent Republic of Uzbekistan. Phonemics, morphology, syntax, paremiology, and lexicology analyzed on today's native material.

160. Turkish Tradition. (4) Lecture/discussion. Preparation: entrance examination. Survey of cultural history of the Turks, as seen primarily through their literature, from their early history to the present.

165. Islamic Literary Heritage of Central Asia. (4) Lecture, two hours; discussion, one hour. Systematic survey of Islamic documents produced in Turkish and Persian in Central Asia, with reading of primary sources in English translation. Study of special characteristics of Central Asian Islam.

170. Turco-Mongolian Nomadic Empires. (4) Lecture, three hours. Required of students in Turkic program. Survey of history of Turkic and Mongolian dominions from the 3rd century B.C. to A.D. 19th century (Hsiung-nu, Hsien-pi, Juan-Juan, T'u-Chueh, Uyghur, Khitan, Karakhanid, Seljuq, Kara-Khitay, Khorazmian, Jengiz-Khanite).

180. Modern Turkic Languages and Peoples. (4) Lecture, three hours. Required of students in Turkic program and recommended for students in Soviet studies. Ethnic and linguistic survey of the Turkic peoples.

199. Special Studies in Turkic Languages. (2 to 8) Tutorial, to be arranged.

Graduate Courses

210A-210B-210C. Introduction to Ottoman. (4-4-4) Lecture, three hours. Introduction to literary language of Ottoman Empire from its foundation in the 14th century to its overthrow in the 20th century. For students of history, literature, and religion of the Balkans, Near East, and Central Asia. Topics include Arabic script as applied to Ottoman; Arabic and Persian elements in grammar and vocabulary. Readings of historical and literary texts.

211. Ottoman Diplomats. (4) Lecture, three hours. Requisites: courses 210A-210B-210C. Organization and contents of Ottoman archives; reading and discussion of documents and registers. Introduction to use of Ottoman archive materials as a source for historical research.

220A-220B-220C. Classical Uzbek (Chagatay). (4-4-4) Lecture, three hours. Requisites: courses 101A-101B-101C or 111A-111B-111C or Iranian 102A-102B-102C or Arabic 102A-102B-102C or Hebrew 102A-102B-102C. Language of classical Central Asian Turkic literature. Descriptive and historical grammar, text analysis, translation, and composition drills.

225A-225B-225C. Old Turkic: Turk and Uygur. (4-4-4) Lecture, three hours. Requisite: course 180. Textual and linguistic analysis of Turk and Old Uygur documents: inscriptions, Manichean and Buddhist literary works.

230A-230B-230C. Historical and Comparative Survey of Turkic Languages. (4-4-4) Lecture, three hours. Requisite: course 180. Extinct and living Turkic languages. History of Turkic: developments in phonemic, grammatical, and lexical systems from the 8th to 20th century. Structural analysis of Turkic languages on comparative basis.

235A-235B. Middle Turkic: Karakhanid, Khorazmian, Mamluk-Kipchak, and Old Anatolian. (4-4) Lecture, three hours. Requisite: course 180. Survey of Middle Turkic documents. Textual and linguistic analysis of Middle Turkic texts from various literary genres.

240A-240B-240C. Advanced Ottoman. (4-4-4) Lecture, three hours. Requisites: courses 210A-210B-210C. Emphasis on different genres of Ottoman writing (belles lettres as well as various types of state documents) in elaborate high style of classical Ottoman period (15th to 19th century). Selections are read in manuscript to prepare students to read works in form in which they are likely to encounter them in their research.

250A-250B-250C. Islamic Texts in Chagatay. (4-4-4) Lecture, three hours. Requisites: courses 220A-220B-220C. Philological and linguistic survey of basic Islamic source material written in Chagatay literary language. Reading and discussion of Chagatay texts on Islamic topics.

280A-280B. Seminars: Modern Turkish Literature. (4-4) Seminar, two hours. Requisite: course 102B. Specific issues and trends in development of Turkish literature from middle of 19th century to the present.

290A-290B. Seminars: Classical Turkic Literature — Ottoman, Chagatay, and Azeri. (4-4) Seminar, two hours. Requisites: courses 210A-210B-210C and/or 220A-220B-220C. Survey of Islamic literatures of the Turks in classical period. Readings of Ottoman, Chagatay, and Azeri texts from various literary genres. Discussion of stylistic, prosodic, and linguistic characteristics.

596. Directed Individual Study. (2 to 8) Tutorial, to be arranged. May be repeated for credit.

597. Examination Preparation. (2 to 8) Tutorial, to be arranged. S/U grading.

599. Ph.D. Dissertation Research and Preparation. (2 to 8) S/U grading.

Scope and Objectives

The graduate major in this discipline is called Islamic Studies. For details, see the program by that name earlier in this section.

The undergraduate major is designed primarily for (1) students seeking a general education and desiring a special emphasis in this geographic area from the ancient to the modern period, (2) those who plan to live and work in the Near East whose careers can be aided by a knowledge of its peoples, languages, and institutions, and (3) students preparing for academic study in the various disciplines pertaining to the Near East.

Undergraduate Study

Near Eastern Studies B.A.

Preparation for the Major

Required: The first-year course in Arabic, Armenian, Hebrew, Persian, or Turkish. Students must also obtain reading proficiency in French, German, Italian, Russian, or Spanish as demonstrated by completing six quarter courses or the equivalent in the language of their choice.

Students may substitute for the European language requirement Program in Computing 1 and one course from Economics M40, Political Science 6, Sociology M18, or Statistics 10, plus one course from Geography 171, Political Science 102, Psychology 142H, or Sociology C112. Also required are History 9D and four courses from History 1A, 1B, 1C, Anthropology 8, 9, Art History 104A, Economics 1, 2, Geography 3, Political Science 20, 50, Sociology 1.

The Major

Required: Sixteen courses as follows: (1) completion of the advanced level or equivalent in the same language taken in lower division; (2) History 106A-106B-106C and three additional courses in the history of the Near East, two of which are related to the major language; (3) four courses (two of which must be in the same discipline) from Ancient Near East M104A, M104B, Anthropology 110, Art History M102A, M102B, 104B, C104C, 105E, Economics 110, 111, 112, 190, Ethnomusicology 20B, 130, Geography 187, Political Science 132A, 132B, 157, Sociology 187. This program may be modified in exceptional cases with consent of the adviser.

For further information, contact Professor Irene A. Bierman at the program address.

Adjunct Assistant Professor

Erin Schuman, Ph.D.

Scope and Objectives

The Department of Neurobiology offers advanced training leading to the Ph.D. degree. Students graduating with a doctoral degree in anatomy and cell biology and an emphasis in neurobiology can look forward to an academic career in medical and dental schools or research institutes and, in accord with this, the department strives to produce graduates soundly qualified both for teaching at this level and for the conduct of productive research in neurobiology and cell biology. Program information is available through the department website.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree**Admission**

The Department of Neurobiology offers the Ph.D. degree in Anatomy and Cell Biology, and students may obtain the Master of Science (M.S.) degree in Anatomy and Cell Biology; however, the department normally does not admit candidates for the M.S. degree only.

Areas of Study

The major fields in which graduate research may be undertaken include (1) microscopic anatomy and cell biology, (2) molecular biology, and (3) neuroscience.

Course Requirements

A minimum of 36 units of coursework is required, 20 of which must be in graduate-level courses. Eight units of Neurobiology 597 or 598 may be applied toward the total requirement, but only four units may be applied toward the minimum graduate course requirement. All M.S. candidates must take two courses selected from Neurobiology 104, M202, M203A, M203B, M209A, and M209B; one departmental seminar; other courses essential to the student's program; courses in the minor field (for those under the comprehensive plan). If Neurobiology 104 is selected, Neurobiology 254 must be taken concurrently, making a nine-unit requirement.

Comprehensive Examination Plan

Under the written comprehensive examination plan, students must demonstrate a grasp of the general principles of the required coursework, as well as an understanding of some related field relevant to their objectives.

Thesis Plan

For the thesis plan, a committee of an adviser and two departmental members approves the thesis proposal after all coursework is completed. All members participate in criticism and approval of the eventual thesis, but there is no oral defense.

Doctoral Degree**Admission**

Applicants to the program leading to the Ph.D. degree in Anatomy and Cell Biology must have a bachelor's degree in a physical or biological science or in a premedical curriculum. Introductory courses in zoology, general and organic chemistry, biochemistry, and college physics are required. Courses in comparative anatomy, embryology, cell biology, genetics, molecular biology, and statistics are highly recommended.

Doctoral applicant admission is through UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences, 172 MBI, UCLA, Box 951570 Los Angeles, CA 90095-1570, (310) 206-6051.

Major Fields or Subdisciplines

The major fields in which graduate research may be undertaken include (1) microscopic anatomy and cell biology, (2) molecular biology, and (3) neuroscience.

Course Requirements

(1) Students are required to take for credit the following courses or course combinations: Neurobiology M202, M209A (or Biological Chemistry CM267 or Microbiology and Immunology M229), M209B, Biological Chemistry

CM253, and an elective that is sanctioned by UCLA ACCESS.

(2) Participation in at least three seminar courses, one of which should be in the Department of Neurobiology.

(3) Completion of such elective courses as are essential for research interest.

(4) Rotation through three research laboratories in the first year, one term each, with course 596 credit (four units).

Since the Department of Neurobiology graduate degree program is a full participant in UCLA ACCESS, the students are referred to that program for further course requirements.

Written and Oral Qualifying Examinations

The written qualifying examination is intended to evaluate students' knowledge of the research field and ability to formulate a practical and significant research program.

Students submit by the end of the Spring Quarter of the second year a research proposal in the format of an individual National Institutes of Health (NIH) grant application. The research proposal reflects, as closely as possible in each individual's case, the plan for the dissertation research. Students whose research goals are well focused and formulated may also assemble a doctoral committee at this time, and that committee reviews and grades the proposal. If the student has not settled on a research focus at this point, the written research proposal encompasses as closely as possible a topic within the student's area of research interest. In this instance, an appropriate faculty committee is assembled to review and grade the proposal on a pass/fail basis. In either case, a research proposal that meets with approval of the appropriate committee constitutes the written qualifying examination.

Bona fide written dissertation proposals which satisfy the requirements for the written qualifying examination can be followed closely by the University Oral Qualifying Examination, which consists of an oral defense of the proposal accompanied by a 30- to 60-minute presentation with appropriately prepared visual aids. Research proposals that are less focused on the dissertation research, but which satisfy the requirements of the written qualifying examination, can be followed by a University Oral Qualifying Examination after plans for the dissertation research are formulated. The University Oral Qualifying Examination is heard and graded on a pass/fail basis by the student's doctoral committee. The examination is scheduled by the student and major professor at a time that allows all of the members of the committee to attend. There is no specified time allotment for the examination. However, it is anticipated that one-half day should be adequate in the majority of cases. In the event that the committee reaches the conclusion that a failing grade is necessary, either because the research plan is faulty or the student is inadequately prepared to defend the plan, one addi-

tional opportunity is given to modify the proposal and pass the examination. The first University Oral Qualifying Examination should be taken no later than two and one-half years into the program and any reexamination no later than three years.

The Department of Neurobiology may decline to admit any student to the qualifying examination if, in its judgment, the student is inadequately prepared, is not sufficiently interested in those fields of research in which the department can offer sufficient guidance, or is for other reasons not adaptable to the program.

Neurobiology

Lower Division Course

88. Lower Division Seminar: Special Topics in Neurobiology. (4) Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in neurobiology approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

Upper Division Courses

104. Histology and Cell Biology. (6) Lecture, four hours; laboratory, six hours. Designed for dental students. Required of freshman dental students. Lectures, demonstrations, and laboratories dealing with structural organization of cells, tissues, and organs at microscopic level. Nervous system included.

106. Functional Neuroanatomy. (4) Lecture/laboratory, three two-hour sessions. Designed for dental students. Lectures, demonstrations, and laboratories dealing with structure and functional organization of nervous system.

199. Individual Special Studies. (2 to 8) Studies in anatomy and related subject areas appropriate for training of particular students, which may include reading assignments or laboratory work leading to a final oral or written report. P/NP or letter grading.

Graduate Courses

201. Microscopic Anatomy and Cell Biology (7 units). Lecture/laboratory, two to three three-hour sessions (16-week semester). Designed for medical students. Microscopic study of structure and function of tissues and cells, with special reference to the human body.

M202. Neuroanatomy: Structure and Function of Nervous System. (4) (Same as Neuroscience M201.) Lecture, three hours; laboratory, three hours. Requisite: Molecular, Cell, and Developmental Biology 171 or Organismic Biology M166. Anatomy of central and peripheral nervous system at the cellular histological and regional systems level. Emphasis on contemporary experimental approaches to morphological study of nervous system in discussions of circuitry and neurochemical anatomy of major brain regions. Consideration of representative vertebrate and invertebrate nervous systems.

M203A-M203B. Neuroscience. (4-4) (Same as Physiology M203A-M203B.) Lecture, four hours. Designed for medical and qualified graduate program students. Lectures, conferences, demonstrations, and laboratory procedures necessary to understand functions of nervous system, with emphasis on their applications in the medical sciences. To receive credit, both courses must be taken together in same academic year. In Progress and letter grading.

M204. Cellular and Molecular Developmental Neurobiology. (4) (Same as Neuroscience M204, Physiology M204, and Psychiatry M204.) Lecture, three hours; discussion, one hour. Requisites: Neuroscience M201, M202, and M203, or Biological Chemistry 201A-201B. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging.

M209A. Molecular Cell Biology. (6) (Same as Molecular, Cell, and Developmental Biology CM220 and Physiology M209A.) Not open for credit to students with credit for Molecular, Cell, and Developmental Biology 100 or M140. Introduction to cell biology for graduate students in basic medical sciences and selected undergraduates. Topics include membrane structure, assembly, and function; biogenesis of organelles, intercellular and intracellular signaling, immunity and gene structure, function and replication.

M209B. Cell and Tissue Neurobiology. (4) (Formerly numbered 209B.) (Same as Neuroscience M244.) Lecture, three hours; laboratory, three hours. Designed for graduate students. Introductory course for students planning to conduct cell biology or neurobiology research, with focus on cell biology and tissue organization of central and peripheral nervous system. Emphasis on normal structure of neurons, glia, and meninges.

211. Cellular Basis of Learned Behavior. (2) Lecture/discussion, one two-hour session; laboratory, to be arranged. Preparation: microscopic anatomy, mammalian physiology. Anatomy and physiology of cerebral processes in alerting, learning, focusing attention, and memory.

M221. Cellular and Molecular Neurochemistry. (4) (Same as Biological Chemistry M221, Neuroscience M240, Pharmacology M221, and Psychiatry M221.) Lecture, three hours; discussion, one hour. Preparation: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling. S/U or letter grading.

M227. Cellular, Molecular, and Functional Aspects of Reproductive System. (4) (Formerly numbered 227.) (Same as Physiological Science M227.) Lecture, three hours; discussion, one hour. Didactic presentations and discussion of developmental, anatomical/histological, physiological, cellular, and molecular aspects of reproductive system and functional integration of neuroendocrine-reproductive axis.

M229. Oral Embryology and Histology. (4) (Same as Oral Biology M203.) Lectures and laboratory instruction in development and histological structure of facial region and oral and peri-oral organs and tissues.

M234. Seminar: Developmental Neuroendocrinology. (2) (Same as Oral Biology M234.) Designed for graduate students. Psychological and physiological processes intertwine, and one important aspect of psychoneuroimmunological research is characterization of mechanisms that underlie these interactions. Examination of current literature on neuroimmune interaction from a developmental perspective. S/U or letter grading.

M235. Neuroactive Peptides: Molecular Biology to Function. (2) (Same as Medicine M235 and Neuroscience M246.) Presentation of current knowledge of gut and brain peptides by surveying their chemistry, anatomy, and physiology. Experimental approaches used to study biologically active peptides. Review of current information about each of the major gut and brain peptides. S/U or letter grading.

251. Problems in Developmental and Comparative Immunology. (2) Review of current literature emphasizing early development and evolution of immune competence.

252. Evolution as a Complex Process. (2) Designed for graduate students. Study and examination of biological evolution as a fundamental complex process. S/U or letter grading.

254. Structure and Function of Cells and Tissues. (2) Lecture, one hour; discussion, one hour. Requisite or corequisite: course 104. Current topics on structural and functional aspects of microscopic anatomy; term paper required. May be repeated for credit. S/U grading.

M255. Seminar: Neural and Behavioral Endocrinology. (2) (Same as Physiological Science M255 and Psychology M294.) Seminar, one hour; discussion, one hour. Topics include hormonal biochemistry and pharmacology. Hypothalamic/hypophyseal interactions, both hormonal and neural. Structure and function of the hypothalamus. Hormonal control of reproductive and other behaviors. Sexual differentiation of brain and behavior. Stress: hormonal, behavioral, and neural aspects. Aging of reproductive behaviors and function.

258. Seminar: Neuroscience. (2) Preparation: basic neurology. Topics of current interest or ongoing research projects; examination of both content and method of presentation. May be repeated for credit.

259. Current Topics in Neurobiology. (2) Review and discussion of current research literature in varying areas of neurobiology. S/U grading.

M261. Neuronal Circuit Analysis. (2) (Same as Neuroscience M261.) Lecture, two hours; discussion, one hour. Seminar with strong emphasis on specific reading assignments. Integrated view of neuronal circuit analysis at advanced level; layout and performance of a variety of networks serving cognitive or motor functions.

265. Evolution of Cancer. (2) Review of current literature emphasizing appearance of tumors and neoplasms in representative invertebrates, fishes, amphibians, and reptiles. Theories of cancer development from the evolutionary viewpoint.

M270A-M270B-M270C. Cell, Molecular, and Integrative Biology Seminars. (2-2-2) (Same as Physiology M270A-M270B-M270C.) Seminar, one hour; discussion, one hour. Designed for graduate students. Presentation of weekly seminars and discussion on current topics in cell and molecular biology by faculty members from Neurobiology, Physiology, and other UCLA departments, in addition to invited lecturers. S/U grading.

290. Tutorials in Anatomy. (2) Tutorial, one hour. Individual study with a faculty member leading to submission of a scientific document (usually a review article) on a topic of mutual interest to instructor and student. S/U grading.

390A-390B. Peer Review System. (2-2) Preparation: advancement to candidacy in integrative or systems biology. Introduction to peer review system for evaluation of research proposals. After consideration of grant review process, each student prepares abbreviated grant application which is evaluated in a mock peer review session moderated by the faculty. In Progress and S/U grading.

495A-495F. Preparation for Teaching in Anatomical Sciences. (2 to 4 each) Designed for graduate students. Observation and practice of methods of teaching in anatomy, including preparation of material, participation in laboratory instruction, and presentation of review sessions, all with peer and faculty criticism. Gross anatomy, microscopic anatomy, and neuroanatomy subject fields included. Maximum of three 495 courses may be taken; none may be repeated. May not be applied toward degree requirements. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study or Research. (2 to 12) Tutorial, to be arranged.

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12) Tutorial, to be arranged.

598. Thesis Research for M.S. Candidates. (2 to 12) Tutorial, to be arranged.

599. Dissertation Research for Ph.D. Candidates. (2 to 12) Tutorial, to be arranged.

Medical History Division

Professor

Ynez V. O'Neill, Ph.D., *in Residence*

Associate Professor

Robert G. Frank, Jr., Ph.D., *Division Chief*

Upper Division Courses

107A-107B. Historical Development of Medical Sciences. (4-4) Lecture, three hours. Major contributions of medicine and medical personalities from earliest times. **107A.** Contributions of medicine and medical personalities from earliest times through 1650. **107B.** Subject in the period from 1650 through the 19th century. Illustrated lectures, class discussion, and required readings from selected texts.

M108A-M108B. History of Biological Sciences. (4-4) (Same as History M195F-M195G.) Lecture, three hours. Designed for juniors/seniors. **M108A.** Biological Sciences from Ancient Times to the Early 19th Century; **M108B.** Biological Sciences from the Early 19th Century to the Mid-20th Century.

120. Health Care in Los Angeles: Introduction to Cultural Medical Traditions. (4) Lecture, one hour; discussion, three hours. Exploration of health beliefs, traditions, and practices of major ethnic groups in Los Angeles area. Scholarly perspective on uses of alternative medicine to prepare students interested in health care to assist patients in clinical settings. P/NP or letter grading.

135. Popular Beliefs and Medicine. (4) Lecture, three hours. Investigation of some basic health beliefs and traditions that can potentially conflict with biomedicine and exploration of educational resources necessary to prepare health care students for the clinical situation. P/NP or letter grading.

Graduate Courses

240A-240B. History of Medical Sciences. (2-2) Lecture, one hour. Survey of development of scientific and medical thought from ancient times to the present.

246. Survey of History of Neuroscience: Its Impact on Psychology and Medicine. (2 to 4) Lecture, one hour; discussion, two hours. Development of experimental neuroscience from ancient concepts of nervous system through medieval, Renaissance, and Enlightenment eras to mid-20th century. Emphasis on landmarks in history of human brain and behavior demonstrating multidisciplinary approaches to contemporary social contexts.

250. History of Medical Psychology. (2) Lecture, one hour. Examination of themes underlying modern mental health theories. Beginning with review of contemporary thinking, lectures focus on various factors shaping present concepts of mental disorders and provide a framework for understanding current issues.

596. Directed Individual Studies in Medical History. (2 to 12) Investigation of subjects in medical history selected by students with advice and direction of instructor. Individual reports and conferences.

NEUROLOGY

School of Medicine

UCLA
C-128 Reed Neurological Research Center
Box 951769
Los Angeles, CA 90095-1769

Chairs

Robert C. Collins, M.D. (*Frances Stark Professor of Neurology*), *Chair*

Mark A. Goldberg, M.D., Ph.D., *Vice Chair, Harbor-UCLA*

John Keeseey, M.D., *Vice Chair*

Claude G. Wasterlain, M.D., *Vice Chair, Sepulveda VA*

Scope and Objectives

Neurology is the medical science dealing with the normal and diseased nervous system. Neurological disorders are often associated with significant disability, morbidity, and mortality. Their higher incidence in association with greater longevity of the population, increased awareness, improved diagnostic methods, and other factors place neurological disorders among the major medical problems today. The Department of Neurology and the Reed Neurological Research Center provide means for a coordinated basic science and clinical research approach to neurological disorders, patient care, and neurological education.

The department instructs medical students throughout the four years. Emphasis in the first year is on basic aspects of neuroanatomy, chemistry, and physiology; in the second year, neurological history taking and neurological examination of afflicted patients are stressed. The third year consists of a clerkship, and the fourth year provides electives in neurology, including an advanced clinical clerkship.

For further details on the Department of Neurology and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

Neurology

Upper Division Course

199. Special Studies. (2 to 8) Discussion, one to two hours; laboratory, four to six hours. Individual projects carried out under direction of a faculty member. Special studies in neurology, with appropriate objectives, readings, laboratory work, or other assignments designed for proper training of students.

 Jen Yu Wei, Ph.D. (*Medicine/Digestive Diseases*)

Scope and Objectives

Neuroscience seeks to understand the brain in health and in disease. Topics of fundamental interest include perception, cognition, learning, memory, motor control, and regulation of body function. The undergraduate interdepartmental program seeks to explore the principles and concepts of this broad range of nervous system function at many levels of analysis, including molecular, cellular, synaptic, network, computational, and behavioral.

Undergraduate Study

Neuroscience B.S.

Preparation for the Major

Life Sciences Core Curriculum

Required: Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B/14BL, 14C/14CL, and 140, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.5 or better. Students are encouraged to fulfill the preparation requirements prior to enrollment in courses for the major. Transfer students are counseled on an individual basis.

In fulfilling the college general education requirements, students are encouraged to select courses that complement the major; Psychology 10 is recommended as a social sciences elective. They are also encouraged to take a statistics course (e.g., Statistics 10 or approved lower or upper division equivalent).

Transfer Students

To be admitted as Neuroscience majors, transfer students with 80 or more units must complete the following courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

The Major

The following 12 courses are required for the Neuroscience major. Consult respective departmental or program listings for course descriptions:

Group 1: Neuroscience M101A-M101B-M101C, M102, Chemistry and Biochemistry 153A, 153L.

Group 2: Three four-unit area electives (one from each area) as follows:

Area 2A: One *behavioral and cognitive neuroscience* course from Neuroscience M119L, 197A, Organismic Biology, Ecology, and Evolution 129, 132, Psychology 110, 112A, 118, 119A, 119B, 119D, 119E, 119G, 119J, 119M, 120, 124A, 186A, 186B.

Area 2B: One *systems and integrative neuroscience* course from Computer Science M196B, Molecular, Cell, and Developmental Biology 171, Neuroscience M119N, M130, M174, 197B, Organismic Biology, Ecology, and Evolution M166, 167, M173, Physiological Science 111B, C125, 126, 138, 142, C143, C144, C145, Psychology 119F.

Area 2C: One *molecular, cell, and developmental neuroscience* course from Molecular, Cell, and Developmental Biology 138, C139, M185A, Neuroscience M148, 151, 197C, Organismic Biology, Ecology, and Evolution M158, Physiological Science 147.

Group 3: One research-related course from the following: Neuroscience 101L (one term) or 199 (two terms in the same laboratory: one term applies toward Group 3 and one toward Group 4) or 199HA and 199HB (both terms in the same laboratory: one term applies toward Group 3 and one toward Group 4) or Psychology M181A-M181B (with approval of the neuroscience curriculum committee before start of project: one term applies toward Group 3 and one toward Group 4).

Group 4: Two additional elective courses from the Group 2 or 3 list or from Chemistry and Biochemistry 130B, 153C, Molecular, Cell, and Developmental Biology 104, CM156, C174A through C174F (two courses at two units each), CM185B, Neurobiology/Medical History 246, Physiological Science C100, C135.

Psychology 115 cannot be substituted for Neuroscience M101A; however, Physiological Science 111A can be substituted. Students may not apply both Molecular, Cell, and Developmental Biology 171 and Neuroscience M148/Physiological Science M148 toward the major; only one of the courses may be applied.

No more than eight courses may be from any one department. A maximum of eight units of Neuroscience 199 or 199H (in any combination) may be applied toward the major. All required and elective courses must be taken for a letter grade, and a C average must be maintained in all upper division courses taken for the major.

Honors Program

The honors program provides exceptional Neuroscience majors with the opportunity to do research culminating in an honors thesis. Requirements for admission include completion of at least 40 units toward the preparation for the major with a 3.2 grade-point average and an overall GPA of 3.2 at UCLA. Applications and program requirements are available in the Neuroscience Undergraduate Office, 1506D Gonda Center. Completed applications should be submitted at least two weeks prior to the term in which students plan to begin the honors program. After completion of all requirements and with the recommendation of the faculty sponsor and a second reader of the thesis, the chair confers honors at graduation.

Neuroscience Minor

The Neuroscience minor is designed to allow students in other majors an opportunity to explore the interdisciplinary field of neuroscience in a structured and rigorous way, while pursuing a major field of study in another discipline at the same time.

To enter the minor, students must have an overall grade-point average of 2.0 or better and a 2.5 GPA in the requisite courses for Neuroscience M101A.

Required Upper Division Courses (31 units): Neuroscience M101A-M101B-M101C (five units each) and four elective courses (16 units) selected from M102 or from Group 2, 3, or 4 as listed under the Neuroscience major.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Neuroscience

See the Neuroscience Interdepartmental Graduate Program for the graduate course offerings.

Upper Division Courses

M101A-M101B-M101C. Neuroscience: From Molecules to Mind. (5-5-5) (Same as Molecular, Cell, and Developmental Biology M175A-M175B-M175C, Physiological Science M180A-M180B-M180C, and Psychology M117A-M117B-M117C.) Lecture, four hours; discussion, one hour. P/NP or letter grading:

M101A. Cellular and Systems Neuroscience. (5) Lecture, four hours; discussion, one hour. Requisites: Chemistry 14C or 30 or former course 10D (14C may be taken concurrently), Life Sciences 2, Physics 1B or 6C. Not open for credit to students with credit for Physiological Science 111A. Cellular neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement. P/NP or letter grading.

M101B. Molecular and Developmental Neuroscience. (5) Lecture, four hours; discussion, one hour. Requisites: course M101A (or Molecular, Cell, and Developmental Biology M175A or Physiological Science M180A or Psychology M117A) or Physiological Science 111A or Psychology 115, Life Sciences 3, 4. Molecular biology of channels and receptors: focus on voltage dependent channels and neurotransmitter receptors. Molecular biology of supramolecular mechanisms: synaptic transmission, axonal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in developmental neurobiology. P/NP or letter grading.

M101C. Behavioral and Cognitive Neuroscience. (5) Lecture, four hours; discussion, one hour. Requisite: course M101B (or Molecular, Cell, and Developmental Biology M175B or Physiological Science M180B or Psychology M117B) or Physiological Science 111A or Psychology 115. Neural mechanisms underlying motivation, learning, and cognition. P/NP or letter grading.

101L. Neuroscience Laboratory. (4) Lecture, two hours; laboratory, three hours. Requisites: courses M101A-M101B (M101B may be taken concurrently). Not open for credit to students with credit for Psychology 116. Introduction to laboratory methods in neuroscience. Laboratory exercises range from molecular and cell biological to behavioral. Hands-on experience with important methodology and experimental approaches in neuroscience.

M102. Introduction to Functional Anatomy of Central Nervous System. (4) (Formerly numbered M132.) (Same as Psychology M117K.) Lecture, two hours; laboratory, two hours. Requisite: Life Sciences 2. Not open to freshmen. Overview of human nervous system; relation of behavior to higher cognitive function. Development of primate and human brain during past few million years; evolutionary aspects of neuroanatomical structures and effects of behavior and cultural attitudes of modern man. P/NP or letter grading.

103. Neuroscience for Physicists, Mathematicians, and Engineers. (4) Lecture, three hours. Introduction to the brain and neural function; mathematical models and computer simulations of neural networks. Biophysics of neurons, engineering approaches to neural control systems.

M119L. Human Neuropsychology. (4) (Same as Psychology M119L.) Lecture, three hours. Requisites: courses M101A and M101C (or Psychology 115), Psychology 120. Designed for juniors/seniors. Survey of experimental and clinical human neuropsychology; neural basis of higher cognitive functions. P/NP or letter grading.

M119N. The Visual System. (4) (Same as Psychology M119N.) Lecture, three hours. Requisite: course M101A or Molecular, Cell, and Developmental Biology 171 or Physiological Science 111A or Psychology 115. The ability to image and analyze the visual world is a truly remarkable feat. Coverage of anatomy and physiology of visual processing from the retina to visual cortex through lectures, extensive reading, and discussions.

M130. Biological Bases of Psychiatric Disorders. (4) (Same as Molecular, Cell, and Developmental Biology M191, Physiological Science M181, Psychiatry M191, and Psychology M117J.) Lecture, three hours. Requisite: course M101A (or Molecular, Cell, and Developmental Biology M175A or Physiological Science M180A or Psychology M117A) or Physiological Science 111A or Psychology 115. Underlying brain systems involved in psychiatric syndromes and neurological disorders, including schizophrenia, depression, bipolar disorders, obsessive/compulsive disorder, eating disorders. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments.

M148. Molecular and Cellular Physiology of Neurons. (5) (Same as Physiological Science M148.) Lecture, four hours; outside study, 11 hours. Requisite: course M101A or Physiological Science 111A. Advanced treatment of selected topics in cellular neurophysiology.

151. Transgenic Models and Gene Transfer Technology in Understanding and Treatment of Neuropsychiatric Disease. (4) Lecture, three hours. Requisite: course M101B. Genetic defects in neuropsychiatric disease; how genome is experimentally manipulated to understand more about role of genes in normal development of brain and in disease. Required student participation in discussions.

M174. Biomedical Systems/Biocybernetics Research Laboratory. (4) (Same as Computer Science CM196L.) Lecture, one hour; laboratory, three hours; outside study, eight hours. Requisite: Computer Science M196B. Special laboratory techniques and experience in biocybernetics research. Laboratory instruments, their use, design, and/or modification for research in life sciences. Special research hardware, firmware, software. Use of simulation in experimental laboratory. Laboratory automation and safety. Comprehensive experiment design. Radioactive isotopes and kinetic studies. Experimental animals, controls. Letter grading.

194. Independent Study of Neuroscience Literature. (2) Library research, six hours minimum. Requisite: course M101A. Directed independent library research with a faculty member. Written proposal must be submitted prior to start of course, with a paper required at end of term. May not be applied toward elective requirements for the major and may not be taken concurrently with course 199, 199HA, or 199HB. P/NP grading.

196H. Honors in Neuroscience. (4) Lecture, one hour; discussion, two hours. Preparation: one statistics course (Statistics 10 or equivalent). Limited to neuroscience honors program students. Instruction in principles of scientific method, ethics, and written and oral communication; critique of current journal articles and research projects. Presentation of individual research. May not be applied toward elective requirements for the major. Must be taken during Winter Quarter of academic year that student enrolls in courses 199HA/199HB. Letter grading.

197A-197B-197C. Special Topics in Neuroscience. (4-4-4) (Formerly numbered 197.) Lecture, three hours. Requisite: course M101A. Topics on one or more aspects of neuroscience. May be applied as an elective only in the specific area of group 2. **197A.** Behavioral and Cognitive Neuroscience; **197B.** Systems and Integrative Neuroscience; **197C.** Molecular, Cell, and Developmental Neuroscience.

199. Independent Research in Neuroscience. (4) Laboratory, 12 hours minimum. Requisite: course M101A. Limited to seniors and juniors with grades of B (3.0) or better. Directed independent research with a faculty member. Maximum of eight units of courses 199, 199HA, 199HB may be applied toward the major.

199HA. Honors Thesis in Neuroscience. (4) Laboratory, 12 hours minimum. Requisite: course M101A. Limited to neuroscience honors program students. Directed independent research involving extensive reading and research in the field of proposed honors thesis. For departmental honors, students must also take course 196H. Maximum of eight units of courses 199, 199HA, 199HB may be applied toward the major. In Progress grading (credit to be given only on completion of course 199HB).

199HB. Honors Thesis in Neuroscience. (4) Laboratory, 12 hours minimum. Requisite: course 199HA. Continued reading and research that culminate in honors thesis. For departmental honors, students must also take course 196H. Maximum of eight units of courses 199, 199HA, 199HB may be applied toward the major.

Course List

Chemistry and Biochemistry

130B. Organic Chemistry: Reactivity and Synthesis, Part II

153C. Biochemistry: Biosynthetic and Energy Metabolism and Its Regulation

Computer Science

M196B. Modeling and Simulation of Biological Systems

Molecular, Cell, and Developmental Biology

104. Cell and Molecular Biology Laboratory

138. Developmental Biology

C139. Molecular Cell Biology

CM156. Human Genetics

171. Principles of Neurobiology

C174A-C174G. Advanced Topics in Cell and Molecular Biology

M185A. Immunology

CM185B. Intermediate Immunology

Organismic Biology, Ecology, and Evolution

129. Animal Behavior

132. Field Behavioral Ecology

M158. Cell Biology

M166. Animal Physiology

167. Regulatory Physiology

M173. Anatomy and Physiology of Sense Organs

Physiological Science

C100. Experimental Statistics

111B. Foundations in Physiological Science

C125. Comparative Endocrinology: Molecular to Behavioral

126. Biological Clocks

C135. Dynamical Systems Modeling of Physiological Processes

138. Neuromuscular Physiology and Adaptation

142. Sensorimotor Physiology

C143. Neuromotor Control of Posture and Movement

C144. Neural Control of Physiological Systems

C145. Neural Mechanisms Controlling Movement

147. Neurobiology of Learning and Memory

Psychology

110. Fundamentals of Learning

112A. Basic Processes of Motivated Behavior
 118. Comparative Psychobiology
 119A. Neuropsychopharmacology
 119B. Human Neurophysiology
 119D. Behavioral Pharmacology
 119E. Stress and Bodily Disease
 119F. Neuron Circuitry and Behavior
 119G. Psychobiology of Pain and Pain Inhibition
 119J. Ethology: Behavior and Learning
 119M. Physiological Psychology of Learning
 120. Cognitive Psychology
 124A. Sensation and Perception
 M181A-M181B. Research in Contemporary Problems
 in Mental Retardation
 186A. Cognitive Science Laboratory: Introduction to
 Theory and Simulation
 186B. Cognitive Science Laboratory: Neural Net-
 works

Scope and Objectives

The goal of the interdepartmental graduate Neuroscience Program is to educate students for careers in neuroscience research and teaching. Students completing this program should be able to address both traditional and novel problems in neuroscience, armed with contemporary concepts and techniques. The program recognizes that neuroscience studies the structure and organization of nervous systems; intercellular and intracellular communication, including the cellular and molecular basis of neurotransmitter production and reception; development, including the molecular and cellular basis of trophic interactions; behavior; cognition; and the neurobiological and molecular bases of neurological and neuropsychiatric disorders.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

None.

Doctoral Degree

Admission

Successful applicants to the program leading to the Ph.D. degree in Neuroscience must satisfy the University minimum requirements. In addition, Graduate Record Examination (GRE) or Medical College Admission Test (MCAT) scores are required. Recommended preparation includes mathematics through calculus and at least one year each of general chemistry, organic chemistry and biochemistry, physics, and basic biology, including molecular and cell biology. Three letters of recommendation are required.

Major Fields or Subdisciplines

Molecular, cellular, developmental, systems, behavioral, and clinical neuroscience.

Course Requirements

First-year students take a five-course sequence (Neuroscience M201, M202, M203, M204, M205) and participate in at least two laboratory rotations. Students also attend a "Meet the Professors" presentation series and enroll in a three-quarter seminar series, Neuroscience 210A-210B-210C.

Second-year students take at least one quarter of biomathematics (either Biomathematics 160, 170A, 170B, Physiological Science CM200, or Psychology 250A), as well as three courses from a menu of advanced neuroscience courses. In the second or third year, students take an additional three quarters of Neuroscience 211A-211B-211C.

Written and Oral Qualifying Examinations

A written qualifying examination is required following completion of the core requirements, generally by the beginning of the second year. The objective of the examination is to test basic knowledge and ability to relate knowledge in different neuroscience areas, to locate and interpret literature, and to apply research problems.

After passing the written qualifying examination, students, in consultation with the adviser, choose the doctoral committee to administer the University Oral Qualifying Examination.

Neuroscience

Graduate Courses

M201. Neuroanatomy: Structure and Function of Nervous System. (4) (Same as Neurobiology M202.) Lecture, three hours; laboratory, three hours. Requisite: Molecular, Cell, and Developmental Biology 171 or Organismic Biology M166. Anatomy of central and peripheral nervous system at the cellular histological and regional systems level. Emphasis on contemporary experimental approaches to morphological study of nervous system in discussions of circuitry and neurochemical anatomy of major brain regions. Consideration of representative vertebrate and invertebrate nervous systems.

M202. Cellular Neurophysiology. (4) (Same as Physiological Science M202.) Lecture, three hours; discussion, one hour. Requisites: Molecular, Cell, and Developmental Biology 171 or Organismic Biology M166, Physiological Science 111A or M180A or Physics 6B. Advanced course in cellular physiology of neurons. Action and membrane potentials, channels and channel blockers, gates, ion pumps and neuronal homeostasis, synaptic receptors, drug-receptor interactions, transmitter release, modulation by second messengers, and sensory transduction.

M203. Molecular Neurobiology. (4) (Same as Psychiatry M203.) Lecture, three hours; discussion, one hour. Preparation: basic biochemistry. Requisites: Biological Chemistry 201A-201B. Introduction to neurochemistry for neuroscience students. Topics include protein structure and function, lipid structure and metabolism, nucleic acids/molecular biology.

M204. Cellular and Molecular Developmental Neurobiology. (4) (Same as Neurobiology M204, Physiology M204, and Psychiatry M204.) Lecture, three hours; discussion, one hour. Requisites: courses M201, M202, and M203, or Biological Chemistry 201A-201B. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging.

M205. Behavioral and Systems Neuroscience. (4) (Same as Physiological Science M205 and Psychology M205Z.) Lecture, three hours. Requisites: courses M201, M202, M203, M204. Introduction to fundamentals of behavioral and systems neuroscience, with emphasis on role of behavioral analysis in understanding the functioning of nervous system and identifying anatomical circuits, cell physiological processes, and molecular mechanisms that mediate behaviorally defined functions.

207. Integrity of Scientific Investigation: Education, Research, and Career Implications. (2) Discussion, two hours. Designed for graduate students. Debate on topics related to ethical conduct of scientific investigation, with emphasis on critical thinking. Topics include scientific misconduct, mentoring, data ownership, authorship, peer review, use of animals and humans in biomedical research, conflicts of interest, technology, and scientific integrity. S/U grading.

210A-210B-210C. Introduction to Current Literature in Neuroscience. (2-2-2) Critical discussion of current research literature related to topics of the five core courses in neuroscience graduate curriculum. S/U grading. **210A.** Corequisites: courses M201, M202, M203. **210B.** Corequisite: course M204. **210C.** Corequisite: course M205.

211A-211B-211C. Evaluation of Research Literature in Neuroscience. (2-2-2) Requisites: courses M201, M202, M203, M204, M205. Advanced critical analysis of current research in neuroscience. S/U grading.

215. Seminar: Neuroscience. (2) Topics of current importance presented for discussion. S/U grading.

M230. Molecular and Cellular Mechanisms of Neural Integration. (5) (Same as Physiological Science M210 and Physiology M210.) Lecture, four hours; discussion, one hour; outside study, 10 hours. Requisite: course M202 or Physiology M209A. Introduction to mechanisms of synaptic processing. Selected problems of current interest, including regulation and modulation of transmitter release, molecular biology and physiology of receptors, cellular basis of integration in sensory perception and learning, neural nets and oscillators, and molecular events in development and sexual differentiation.

M233. Mechanisms and Relief of Pain. (2) (Same as Oral Biology M204.) Advanced treatment of neuroanatomical, neurophysiological, and biochemical bases of pain perception. Topics include classical pain theories, pain receptors and pathways, endogenous mechanisms of pain modulation, and pharmacological basis for treatment of pain disorders.

M240. Cellular and Molecular Neurochemistry. (4) (Same as Biological Chemistry M221, Neurobiology M221, Pharmacology M221, and Psychiatry M221.) Lecture, three hours; discussion, one hour. Preparation: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling. S/U or letter grading.

M244. Cell and Tissue Neurobiology. (4) (Same as Neurobiology M209B.) Lecture, three hours; laboratory, three hours. Designed for graduate students. Introductory course for students planning to conduct cell biology or neurobiology research, with focus on cell biology and tissue organization of central and peripheral nervous system. Emphasis on normal structure of neurons, glia, and meninges.

M246. Neuroactive Peptides: Molecular Biology to Function. (2) (Same as Medicine M235 and Neurobiology M235.) Presentation of current knowledge of gut and brain peptides by surveying their chemistry, anatomy, and physiology. Experimental approaches used to study biologically active peptides. Review of current information about each of the major gut and brain peptides. S/U or letter grading.

M247. Neural Control of Cardiopulmonary Function. (4) (Same as Physiological Science M247.) Lecture, two hours; discussion, two hours. Requisites: Physiological Science 111A, 111B or 133 or 142 or M180A, M180B. Cardiorespiratory homeostasis is accomplished via central nervous system (CNS) control of respiratory and circulatory pumping systems. Focus on CNS mechanisms underlying (1) generation of respiratory rhythm, sympathetic and parasympathetic tone, (2) determination of patterns of motor outflow, and (3) responses to changes in behavioral state or afferent signals. Emphasis on critical reading of literature.

254. Interdisciplinary Research Seminar. (2) Lectures and discussions on many different disciplinary approaches to knowledge of brain function in order to broaden experience of students studying in fields other than that of lecture; new information in depth from students in fields closely related to subject discussed. S/U grading.

M255. Functional Organization of Behavior. (2) (Same as Psychiatry M255.) Changes in neuronal properties supporting changes in learned behavior. Different types of learning. Role of neurotransmitters and second messengers in changing ion channels of neurons to support associative learning versus long-term potentiation of neurotransmission. S/U or letter grading.

257. Structure and Function of Limbic System. (2) Current knowledge of mammalian limbic system presented by surveying studies of its developmental anatomy, intrinsic synaptic organization, synaptic chemistry, afferent and efferent circuits, and dysfunctions in memory and cognition association with limbic system function. S/U or letter grading.

M259. Neurobiology of Sleep. (3) (Same as Psychiatry M249 and Psychology M296.) Lecture, one hour; discussion, two hours. Critical review of primary research publications concerning neural basis of sleep. Discussion of neural and biochemical control of REM and NREM sleep after reviewing sleep behavior and phenomenology, including developmental and comparative aspects. Presentation of relevant clinical phenomena. S/U or letter grading.

M260. Neuromuscular Factors in Movement Regulation. (4) (Same as Physiological Science M260.) Requisite: Physiological Science 138. Interaction of neural and muscular factors in regulation of muscle fiber properties and importance of these properties in neural strategies of movement regulation. S/U or letter grading.

M261. Neuronal Circuit Analysis. (2) (Same as Neurobiology M261.) Lecture, two hours; discussion, one hour. Seminar with strong emphasis on specific reading assignments. Integrated view of neuronal circuit analysis at advanced level; layout and performance of a variety of networks serving cognitive or motor functions.

M262. Neural Systems for Motor Control. (4) (Same as Physiological Science M240.) Requisite: Physiological Science C143. Advanced topics on neural mechanisms related to control of posture, locomotion, and highly skilled arm and hand movements. Emphasis on role of movement-dependent feedback at spinal segments and within sensorimotor areas of cerebral cortex, with respect to modification of motor output.

M263. Neuronal Mechanisms Controlling Rhythmic Movements. (4) (Same as Physiological Science M263.) Requisite: Physiological Science C145. Advanced topics on brainstem mechanisms responsible for controlling cyclic and stereotypic movements such as mastication and locomotion. Emphasis on cellular neurophysiology and interaction between neuronal networks. Introduction to primary literature and techniques used in these areas. Students expected to critically evaluate data and conclusions drawn.

M266A-M266B-M266C. Seminars: Cellular Neuroscience. (2 to 4 each) (Same as Physiological Science M295A-M295B-M295C.) Requisite: course M202. Selected topics in sensory transduction, cellular integration, synaptic processing, central nervous system function, and learning. Students required to present two-hour seminar.

M267. Advanced Magnetic Resonance Imaging. (4) (Same as Biomedical Physics M266 and Psychiatry M266.) Lecture, four hours. Starting with basic principles, presentation of physical basis of magnetic resonance imaging (MRI), with emphasis on developing advanced applications in biomedical imaging, including both structural and functional studies. Instruction more intuitive than mathematical. Letter grading.

271. Neurobiology of Disease. (2) Analysis of clinical neurological and psychiatric disorders from perspective of basic neuroscience.

M272. Neuroimaging and Brain Mapping. (4) (Same as Physiological Science M272 and Psychology M213.) Lecture, three hours; outside study, nine hours. Recommended preparation: mathematics and computer background. Requisites: courses M201, M202. Theory, methods, applications, assumptions, and limitations of neuroimaging. Techniques, biological questions, and results. Brain structure, brain function, and their relationship discussed with regard to imaging.

M273. Neural Basis of Memory. (4) (Same as Psychiatry M270.) Lecture, two hours; discussion, one hour. Anatomical, physiological, and neurological data integrated into models for how behavioral phenomena of memory arise. Discussion of invertebrate memory, cortical conditioning, hippocampus and declarative memory, and frontal lobes and primary memory.

274. Computational Neuroscience. (4) Lecture, 90 minutes; discussion, 90 minutes. Requisites: courses M201, M202. Systematic introduction to computational neuroscience and hands-on experience in neural simulations. Computational models at synaptic, neuronal, and network levels. Sensory, motor, memory, and attentional systems and some higher cognitive functions, including language and consciousness. S/U or letter grading.

275. Advanced Techniques in Neurobiology. (2) Lecture, one hour; laboratory, one hour. Preparation: basic biology and chemistry. Designed to provide introduction and, when possible, practical demonstration of a number of techniques used in neurochemical research, with emphasis on techniques used for identification, measurement, and visualization of compounds thought to be important as mediators of intercellular communication in central nervous system. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Methods in Neuroscience Public Education. (2) Seminar, one hour; fieldwork, six hours. Designed for juniors/seniors and graduate students. Training and supervised practicum for students in teaching, presentation techniques, and public outreach of neuroscience principles. Hands-on experience through fieldwork in approved community setting. Students assist in preparation of educational materials and development of innovative programs. S/U grading.

596. Directed Individual Study or Research. (2 to 12) Tutorial, to be arranged.

597. Preparation for Ph.D. Qualifying Examinations. (2 to 12) Tutorial, to be arranged.

599. Dissertation Research for Ph.D. Candidates. (2 to 12) Tutorial, to be arranged. Designed for students requiring special instruction or time to work on dissertation.

Adjunct Assistant Professor

Suzette Cardin, R.N., D.N.Sc.

Scope and Objectives

The UCLA School of Nursing gives direction to interested potential applicants through monthly open counseling sessions. Students interested in the academic programs offered are urged to attend a counseling session or request a copy of the *Announcement of the UCLA School of Nursing* by writing to the Student Affairs Office, School of Nursing, UCLA, Box 951702, Los Angeles, CA 90095-1702 (310-825-7181, Tuesday through Thursday).

History and Accreditation

In 1949 The Regents of the University authorized the School of Nursing as one of the professional schools of the UCLA Center for the Health Sciences. This action paved the way for the development of an undergraduate basic program in Nursing leading to the Bachelor of Science degree and made possible the establishment of a graduate program leading to the Master of Science degree. In 1966 the Master of Nursing (M.N.) degree was established as an alternate option to the M.S. degree. The Master of Science degree program was discontinued in 1971. The Regents approved the Doctor of Nursing Science (D.N.Sc.) degree

program in 1986, and in Fall Quarter 1987 the first doctoral students were admitted. In 1996 the Office of the President and The Regents approved the change in the master's degree designation from M.N. to Master of Science in Nursing (M.S.N.); the change in doctoral degree designation from D.N.Sc. to Ph.D. in Nursing was approved in 1995.

The B.S. degree curriculum was revised in 1997 to meet the educational needs of students who are registered nurses with Associate Degrees or diplomas in nursing. The first group of students began their studies in the summer of 1997.

The School of Nursing became an agency member of the Department of Baccalaureate and Higher Degree Programs of the National League for Nursing in 1952. The National League for Nursing Accrediting Commission (NLNAC, 350 Hudson Street, New York, NY 10014, 212-989-9393, ext. 153) has granted full accreditation to the programs since 1954. The master's nurse practitioner program has Board of Registered Nursing approval.

Undergraduate Study

Nursing B.S.

The baccalaureate program leading to the Bachelor of Science degree provides for a close interweaving of general and professional education. The physical, social, and emotional health aspects of nursing are emphasized throughout the curriculum. Clinical nursing experience under the guidance of faculty members is provided in hospitals, outpatient clinics, homes, and community health centers.

Admission

The School of Nursing strives to attract a culturally and ethnically diverse student population. Admission, beginning in the junior year, is based on licensure as a registered nurse, completion of requisite courses, scholarship, and attainment of a passing score on four Regents College Examinations. Students must have grades of C or better in requisite courses and an overall grade-point average of 3.0 or better. Three letters of recommendation are also required. Diverse life experiences, including previous employment, volunteer work, and community service which reflect leadership, responsibility, multicultural involvement, multilingual abilities, and other unusual skills and knowledge are evaluated. Consideration is also given to social and economic disadvantage such as educational background, heavy work schedule during school, housing conditions, family responsibilities, and mastery of physical disabilities. Completed applications should reflect clearly identified career goals and documentation of potential in advanced practice nursing.

Applications for acceptance to the baccalaureate program must be filed no later than November 30 for the next Fall Quarter. The School of Nursing admits students each Fall Quarter. In

addition to the regular *UC Application for Undergraduate Admission and Scholarships* which must be returned in the self-addressed envelope included in the packet, an application must be filed with the school by November 30. This application is available directly from the Student Affairs Office, School of Nursing, UCLA, Box 951702, Los Angeles, CA 90095-1702.

Degree Requirements

Students must complete 180 quarter units of college work and satisfy the general University requirements as follows:

(1) Completion of all required general education courses as specified for completion both prior to admission and/or at UCLA: human anatomy (one course), sociocultural anthropology (one course), humanities (one or more courses), general chemistry (one college-level course), English composition (two courses), mathematics (one course), introductory or general microbiology with laboratory (one course), human nutrition (one course), introductory physics (one course or one year of high school physics with laboratory, with a grade of B or better), human physiology (one course), introductory psychology (one course), introductory sociology (one course), and electives as needed.

(2) Completion of a block of 30 units of credit by examination administered by the Regents College Examination Service in Adult Nursing, Fundamentals of Nursing, Maternal and Child Nursing-AD, and Psychiatric/Mental Health Nursing (this unit credit applies to the Nursing major only).

(3) Completion of 76 to 88 units of lower and upper division coursework in residence, including Biostatistics 100A, Chemistry and Biochemistry 14B, Epidemiology 100, Life Sciences 2, 3, Nursing C100A, 102, 104, 105, C120, 190, 192, 193, 195, 196, and one or more courses from C100B, C110F, C111F, C112, C113A, C113B, C114F, C115F, C116F, C117F, C123, C130, C132F, and three four-unit electives.

The curriculum at UCLA must be completed with a minimum overall grade-point average of 2.0 (C) or better in all courses taken while a student in the School of Nursing.

All required nursing courses in the school must be completed with a grade of C or better in each course.

Study Lists

Students may not enroll in more than four courses per term unless a petition is approved in advance by the associate dean.

Honors

Dean's Honors

Dean's Honors are awarded annually to undergraduate students completing the academic year with distinction. To be eligible students must achieve an overall grade-point average of 3.75 on a minimum of 36 graded units of work completed during the academic year.

Honors at Graduation

Honors are awarded at graduation to students with a superior overall grade-point average. The levels of honors and the requirements for each level are: *summa cum laude*, an overall average of 3.817; *magna cum laude*, 3.715; *cum laude*, 3.566. To be eligible students must have completed at least 98 University of California units for a letter grade. See the quarterly *Schedule of Classes* for the most current calculations of Latin honors.

School of Nursing Faculty Award

The Faculty Award for excellence in nursing, established in 1965, is awarded to a student graduating from the bachelor's and the master's program with the highest grade-point average in all nursing courses.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The School of Nursing offers the Master of Science in Nursing (M.S.N.) degree as well as a concurrent degree with the John E. Anderson Graduate School of Management.

Admission

The following is required of applicants to the M.S.N. program:

(1) Either graduation from a recognized college or university having a National League for Nursing-accredited baccalaureate nursing program satisfactory to the School of Nursing and to the Graduate Division, or graduation with a baccalaureate degree in nursing from an international institution with a nursing program satisfactory to the School of Nursing and to the Graduate Division. If admitted under the latter, applicants may be required to enroll in certain undergraduate nursing courses which generally may not be applied toward requirements for advanced degrees.

(2) Status as a licensed registered nurse. Prior to entry into any clinical practicum, evidence of current licensure as a registered nurse in the State of California is mandatory.

(3) An upper division statistics course or a lower division statistics course with content equivalent to Biostatistics 100A must be completed before entering the school.

(4) An upper division nursing research course taken at a National League for Nursing-accredited institution and equivalent to Nursing 193 must be completed before entering the school.

(5) An upper division physical assessment course taken at a National League for Nursing-accredited institution and equivalent to Nursing 192 must be completed before entering the school (not required of students selecting the nursing administration specialty).

(6) Professional and/or academic competence in nursing attested through three letters of recommendation.

(7) A satisfactory scholarship record.

(8) Since written and verbal communication skills are basic to the practice of nursing, it is essential that applicants read, write, and speak English well. International applicants from a country in which English is not the first language and medium of instruction, whether a licensed registered nurse in the U.S. or not, are required to pass the Test of English as a Foreign Language (TOEFL) with a score of 560 or higher (scores must be submitted prior to consideration for admission).

(9) All international applicants who are not licensed registered nurses in the U.S. prior to consideration for admission are required to pass the Commission on Graduates of Foreign Nursing Schools (CGFNS) examination.

Prospective students interested in the Master of Science in Nursing program must file two applications: (1) *Application for Graduate Admission* and (2) *Application for Admission to the School of Nursing*. Both applications may be obtained from the Student Affairs Office. The application deadline for priority consideration is December 15; February 1 is the final deadline.

M.B.A./M.S.N.

The School of Nursing and the John E. Anderson Graduate School of Management offer a concurrent degree program designed for students interested in employment in all sectors of the health care delivery system, including hospitals, corporate health care headquarters, home health care agencies, and long-term care facilities, as well as policy-making bodies and consulting firms. Applicants must request application materials from both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the School of Nursing Student Affairs Office.

M.S.N. Curriculum for Certified Nurse Practitioners/Midwives

The School of Nursing offers the opportunity for applicants with a B.S. degree in Nursing and certification in California as an adult nurse practitioner (N.P.), family N.P., pediatric N.P., women's health care N.P. or a nurse midwife (C.N.M.), to earn the M.S.N. degree in one year. Students meet all the same admission requirements for the master's degree except for an upper division physical assessment course, and must provide evidence of certification as an N.P. or C.N.M. prior to consideration for admission. While students who follow this curriculum are held to the school minimum of 44 units for the M.S.N., up to eight units may be waived

via petition based on skill and knowledge obtained through certification training. Course requirements include Nursing C200A-C200B, 204, C220, 225 (not required for students with a BRN furnishing number), C230, 237D or 238C or 239C, 264 (C.N.M. students take course 236), 437D or 438D or 439D, 597 and four units of theory elective.

Areas of Study

The School of Nursing offers graduate studies in the following areas:

- (1) Acute care.
- (2) Administration: nursing administration, nursing administration/occupational health.
- (3) Chronic care: gerontology, oncology.
- (4) Primary care: family, nurse-midwifery, occupational and environmental health nursing, pediatric.

Students in the acute, family, gerontology, and oncology nurse practitioner specialties may choose the neuropsychiatric subspecialty. All students may add preparation in consultation, education, or management to their clinical requirement.

Course Requirements

A minimum of three core courses (eight to nine units) and additional coursework in the 100, 200, and 400 series are required for each area of clinical specialization. A total of four units of 500-series courses may be applied toward the total course requirement for the degree.

A minimum grade-point average of 3.0 is required. Grades of B are required in graduate clinical nursing courses in order to advance to the next clinical course in a series. A minimum of three quarters of full-time enrollment (eight units per quarter) is required for academic residence.

Core Requirements

Core Courses. Nursing 204, C220, and 264 (students in nurse-midwifery take Nursing 236). Additional core courses for all options except nursing administration: Nursing C200A-C200B, 225, C230 (Nursing C200A, and C230 are not required for nurse-midwifery; Nursing C200A, 225, and C230 are not required for nursing administration/occupational health).

Clinical Specialty Theory Courses. Nursing C210F, C211F, C212, C213A, C213B, 213C, C214F, C215F, C216F, C217F, 219A, 219B, C223, C232F, 233F, 234, 235, 236, 241F, 242F, 243F, 244F. Course requirements vary for each specialty area; not all courses are required in each specialty.

Advanced Practice Theory Courses. Nursing 218A, 218B, 218C, 237A through 237E, 238A, 238B, 238C, 239A, 239B, 239C.

Clinical Practicum/Residency Courses. Nursing 416, 418A through 418D, 434, 437A through 437F, 438A through 438D, 439A through 439D, 441, 442.

Specialty Requirements

Additional course requirements vary according to specialty area selected:

Acute Care Specialty. The goal of the acute care specialty is to prepare nurses to assume an advanced practice role as a clinical nurse specialist or a nurse practitioner in acute care nursing. At least two years of prior experience in acute care nursing are highly recommended. Graduates are expected to function as acute care clinicians, educators, consultants, or researchers and to become leaders in a variety of inpatient and outpatient health care settings. Required courses include Nursing C200A-C200B, 204, C216F, C217F, C220, C230, 239A, 239B, 239C, 264, 416, 439A, 439B, 439C, and four units of theory elective. Additional required courses for the acute care nurse practitioner include Nursing 225, 439D.

Family Specialty. The family specialty prepares family nurse practitioners to provide primary health care for individuals throughout the life span. The focus is on collaborative, interdisciplinary practice to assure comprehensive quality health care and health maintenance in outpatient, work site, home health, nursing home, and hospital settings. Emphasis is on the assessment, treatment, and evaluation of the client's responses to actual or potential health problems which may be chronic or acute and include primary prevention and health promotion. Required courses include Nursing C200A-C200B, 204, C210F, C211F, C212, C220, 225, C230, 239A, 239B, 239C, 264, 439A through 439D, and four units of theory elective. An elective experience in the clinical nurse specialist role is also available.

Gerontology Specialty. The gerontology specialty prepares nurses to assume an advanced practice role as nurse practitioners to meet the increased demands for leadership in health care for older persons, particularly those challenged by chronic illness. Emphasis is on the comprehensive assessment, treatment, and evaluation of the client and family. Advanced knowledge and skills in pathophysiology and psychosocial concepts guide theory-based practice, with the goal of optimizing functional status. Interdisciplinary collaboration and care management are emphasized. Required courses include Nursing C200A-C200B, 204, C220, 225, C230, C232F, 233F, 239A, 239B, 239C, 264, 439A through 439D, and four units of theory elective. An elective experience in the clinical nurse specialist role is also available.

Neuropsychiatric Subspecialty. The neuropsychiatric subspecialty prepares nurses to assume an advanced practice role as a nurse practitioner in community and inpatient settings. The focus is on the primary care of adults with chronic cognitive, addictive, and affective dysfunctions. Students select both a specialty (acute care, family, gerontology, or oncology nurse practitioner) and the neuropsychiatric nurse practitioner subspecialty. Graduates are expected to function as clinicians, educators, case managers, or researchers and to become leaders in a variety of health care settings. Required courses include those listed under the acute, family, gerontology, or oncol-

ogy nurse practitioner specialties and Nursing 241F, 242F, 441, 442.

Nurse-Midwifery Specialty. The nurse-midwifery specialty prepares certified nurse-midwives to provide care to women, newborns, and their families. The focus is on independent and collaborative practice to assure comprehensive quality health care and health maintenance throughout the childbearing, interconceptional, perimenopausal, and newborn periods. Care is provided in outpatient, home, and inpatient settings. Emphasis is on the assessment, diagnosis, treatment, and evaluation of the client's responses to actual or potential health problems and includes primary prevention. Required courses include Nursing C200A, 204, C220, 225, C230, 234, 235, 236, 237A through 237E, 434, 437A through 437F.

Nursing Administration Specialty. The nursing administration specialty focuses on organizational theory, health services and financial management, and the practice of nursing administration within acute, ambulatory care, and/or community-based settings. Students gain the basic knowledge and skills required of nursing administrators in a volatile health care environment. Nursing content develops the knowledge of advanced management practice needed to plan and evaluate nursing services. Health services and financial management content provides a framework for organizing, directing, and coordinating health care resources.

The program requires both theory and management practicums, including a 10-week administrative residency. Stipends for the residency program may be provided by the institutions in which the residency is completed. Individualized plans for practicums are available. Coursework includes courses taken in the School of Nursing, School of Public Health, and the John E. Anderson Graduate School of Management. Required courses include Nursing 204, 218A, 218B, 218C, 219A, 219B, C220, 418A through 418D, and a minimum of 16 units of theory electives including a course in organizational theory and human resource management.

Nursing Administration/Occupational Health Specialty. The nursing administration/occupational health specialty integrates principles of occupational health and administration of occupational health programs. Requirements are met through a combination of courses and practicums specific to creating a healthy work environment. The specialty focuses on organizational theory, budgeting, strategic planning, leadership and management of occupational health programs, regulatory requirements, and research, as well as health promotion, illness/accident prevention, hazard control, screening, surveillance, and rehabilitation of adult workers.

The program provides both theory and occupational management practicums, including a 10-week administrative residency. Stipends for the residency program may be provided by the institutions in which the residency is com-

pleted. Individualized plans for practicums are available. Required courses include Nursing C200B, 204, 213A, C213B, 218A, 218B, 218C, 219A, 219B, C220, 264, 418A through 418D, Environmental Health Sciences 250, 251, Epidemiology 100.

Occupational and Environmental Health Nursing Specialty. The occupational and environmental health nursing specialty integrates principles of occupational and environmental health assessment and care with primary ambulatory care of adult groups. Practitioners evaluate the individual as seen within the work setting as well as within the family and community group. Primary focus and emphasis are on health status assessment, health promotion, illness/accident prevention, hazard control, screening, surveillance, and rehabilitation of adult workers. Requirements are met through a combination of courses and experiences specific to the delivery of occupational and environmental health care services. Required courses include Nursing C200A-C200B, 204, C211F, C213A, C213B, 213C, C220, 225, C230, 239A, 239B, 239C, 264, 439A through 439D, Environmental Health Sciences 200A, 251, 254, 259, 259D, and Epidemiology 100 or equivalent. An elective experience in the clinical nurse specialist role is also available.

Oncology Specialty. The oncology specialty trains advanced practice nurses to provide leadership in the field of oncology nursing. This option includes a focus on nursing care of critically and chronically ill cancer patients and their families in a variety of settings and across the health/illness continuum (prevention, diagnosis, treatment, rehabilitation, palliative care). Students undertake intensive individualized preparation in either the role of nurse practitioner or clinical nurse specialist. Required courses include Nursing C200A-C200B, 204, C214F, C215F, C220, C230, 239A, 239B, 239C, 264, 416, 439A, 439B, 439C, and four units of theory elective. Additional required courses for the oncology nurse practitioner include Nursing 225, 439D.

Pediatric Specialty. This specialty prepares pediatric nurse practitioners to assume leadership roles in the health care of children. Emphasis is on the assessment, diagnosis, treatment, and evaluation of children's actual or potential health problems. Content stresses care for acute and chronic illnesses as well as primary prevention. Required courses include Nursing C200A-C200B, 204, C212, C220, C223, 225, C230, 238A, 238B, 238C, 264, 438A through 438D, and four units of theory elective. An elective experience in the clinical nurse specialist role is also available.

Comprehensive Examination Plan

Successful completion of the comprehensive examination is required. The examination is given in written form during Spring Quarter. Students are eligible to take the examination once they are advanced to candidacy and may repeat the examination twice. Retakes only are offered during Summer and Winter Quarters.

Students must complete all requirements for the degree within one calendar year after advancement to candidacy.

Thesis Plan

None.

Doctoral Degree

Admission

Priority for admission to the program leading to the Ph.D. degree in Nursing is given to graduates of accredited master's degree programs in nursing. Those admitted to doctoral study with a bachelor's degree in nursing and a master's degree in a nonnursing field are required to make up clinical specialty deficiencies by taking clinical courses in one of the current master's advanced practice programs. Such courses may be taken concurrently with doctoral courses. Individuals admitted with a bachelor's degree in nursing are required to complete a program of master's courses in nursing at UCLA as a requisite to entry into doctoral courses.

Applicants to the Ph.D. degree program must provide evidence of the following:

- (1) A master's degree in nursing; a Bachelor of Science degree in Nursing and a master's degree in a nonnursing field; or a Bachelor of Science degree in Nursing. Degrees must be from a National League for Nursing-accredited program satisfactory to the School of Nursing and the Graduate Division. Students who are accepted with deficiencies are required to complete appropriate master's courses.
- (2) A scholarship record satisfactory to the Graduate Division and to the School of Nursing with a minimum grade-point average of 3.5.
- (3) A combined verbal, quantitative, and analytic score of 1,500 on the Graduate Record Examination (GRE), taken within the past five years. Exceptions to this score may be considered when there is compelling evidence in other areas.
- (4) An upper division statistics course with content equivalent to Biostatistics 100A or Biomathematics 170A.
- (5) A graduate-level nursing research course with content equivalent to Nursing 205.
- (6) A four-unit graduate-level nursing theory development course.
- (7) A minimum score of 560 on the Test of English as a Foreign Language (TOEFL) for applicants from countries in which English is not the primary language and medium of instruction (scores must be submitted prior to consideration for admission).
- (8) A passing score on the nursing and English portions of the Commission on Graduates of Foreign Nursing Schools (CGFNS) examination for international applicants who are not licensed as registered nurses in the U.S., prior to consideration for admission.

(9) Status as a licensed registered nurse; evidence of current licensure as a registered nurse in the State of California is mandatory.

(10) Four letters of reference affirming the applicant's potential for scholarly, investigative, and creative endeavors in nursing.

(11) Examples of scholarly papers and/or creative works.

(12) A statement of educational objectives, specific focus of research, and program and career goals.

(13) Curriculum vitae.

Prospective students interested in the Ph.D. program must file two applications: (1) *Application for Graduate Admission* and (2) *Application for Admission to the School of Nursing*. Both applications may be obtained from the Student Affairs Office. Applications are accepted for Fall Quarter admission only. The application deadline for priority consideration is December 15; February 1 is the final deadline.

Major Fields or Subdisciplines

In the doctoral program, students focus their study in one of two areas: biobehavioral research or health systems research.

Students who choose biobehavioral research focus on studies that describe, explain, and predict biologic and behavioral factors which relate to health promotion and disease prevention. Students who choose health systems research focus on studies that examine the function, structure, process, and outcome of a range of multidisciplinary health delivery systems such as hospitals, nursing homes, and community-based organizations. Both research areas incorporate human diversity and the influence of the psychosocial and physical environments.

Course Requirements

Core Requirements. The following courses are required of all students in the Ph.D. program:

(1) Nursing science: Nursing 202, 206A-206B.

(2) Nursing research: Nursing 207, 208, 299A, 299B-299C, 299D.

(3) One statistics sequence (recommended minimal sequences: Education 230B, 230C, and 231A. For additional quantitative: Education 231B; for additional qualitative: see Anthropology or sociology offerings.)

Cognate Requirements. Twenty-four units of cognate courses relevant to the major area of study (biobehavioral research, health systems research) are taken. A minimum of four units and a maximum of 12 units are taken in nursing. The remainder are taken in support discipline areas.

Written and Oral Qualifying Examinations

Written Qualifying Examination. The written qualifying examination must be passed after completion of the basic core courses. The examination evaluates three areas of knowledge:

(1) the basic concepts of nursing science; (2) nursing research methods and analysis; and (3) the basic concepts of the student's focused area of study. Normally no more than one reexamination is permitted.

Oral Qualifying Examination. The University Oral Qualifying Examination, taken after completing the course requirements and successfully passing the written qualifying examination, evaluates students' dissertation proposals. The initial step is selection of a doctoral committee. Students are responsible for obtaining the consent of four or more faculty members to serve on the committee as certifying members. Qualifications of members must be consistent with students' area of research and special interests and also with the requirements for doctoral committees as stated in the *Standards and Procedures for Graduate Study at UCLA*. Additional members, including those from an institution or clinical agency representing the student's clinical and research interests, may be appointed as noncertifying members by petition if the doctoral program committee and the student agree that additional experts are needed. The graduate adviser of the doctoral program committee must give approval of members consenting to serve on the doctoral committee before student seeks approval of the dean of the Graduate Division.

Nursing

Upper Division Courses

C100A-C100B. Biobehavioral Foundations of Health Assessment. (3-3) Lecture, two hours. Theories of health behaviors in relation to assessment of epidemiological, psychological, and developmental disorders across life span. Analysis of preventive health, disease screening, risk evaluation, and health promotion theories and interventions. Concurrently scheduled with courses C200A-C200B. Letter grading. **C100A.** Requisite: course 192 or approved physical assessment course. **C100B.** Requisite for acute care, family, gerontology, nurse midwifery, occupational health, oncology, and pediatric specialty students: course C100A.

102. Professional Nursing in Culturally Diverse Communities. (5) Lecture, four hours; community experience, one hour. Assistance for registered nurses in transition to professional nursing role (i.e., from caring for individuals to caring for families and communities). Emphasis on delivery of acute and chronic community-based care and mental health services in multicultural society. Examination of concepts of professional nursing and cultural and human diversity, as well as ethical and political issues. Letter grading.

104. Health and Illness Behaviors across Culturally Diverse Communities. (4) (Formerly numbered 104A, 104B.) Lecture, four hours. Requisite: course 102. Examination of basic concepts of health and illness from a biobehavioral and health systems framework. Nursing theory as it relates to roles, stress, loss, self-concept, and pain among culturally diverse populations. Letter grading.

105. Human Physiology. (4) Lecture, four hours; discussion, one hour. Designed for nursing students. Lecture and discussion, with emphasis on a correlative approach to anatomy and physiology of human body. Letter grading.

C110F. Theoretical Foundations of Family Nursing. (4) Lecture, three hours; selected field experiences. Theoretical and research-based content in family health and individual development throughout life span, emphasized in relationship to specific health maintenance and health problem issues of ambulatory populations. Concurrently scheduled with course C210F. Letter grading.

C111F. Theoretical Foundations of Family Nursing. (4) Lecture, three hours; selected field experiences. Requisite: course C110F. Continuation of course C110F. Concurrently scheduled with course C211F. Letter grading.

C112. Health-Related Family Theory. (2) Lecture, two hours. Overview of conceptual frameworks related to contemporary family structure and functioning, with particular emphasis on health. Identification of limitations of current theory and applicability of current knowledge to various problems encountered in care of families. Concurrently scheduled with course C212. Letter grading.

C113A. Occupational Health Nursing Role and Theory. (2) Lecture, two hours. Introduction to multidisciplinary occupational health environment, including work settings, occupational health nursing scope and standards of practice, and legal and regulatory issues that affect occupational health nursing. Concurrently scheduled with course C213A. Letter grading.

C113B. Occupational Health Programs. (2) Lecture, two hours. Requisite: course C113A. Program planning, evaluation, and management of occupational health programs, including analysis of individual leadership styles and management concepts. Assessment of economic, political, and other factors that affect occupational health and safety programs. Concurrently scheduled with course C213B. Letter grading.

C114F. Human Responses to Cancer. (4) Lecture, three hours; selected field experiences. Cancer-related research and theory from variety of disciplines, including nursing, analyzed and evaluated for application to clinical practice, with emphasis on nursing assessment and intervention of responses to cancer and cancer treatment. Concurrently scheduled with course C214F. Letter grading.

C115F. Human Responses to Cancer. (4) Lecture, three hours; selected field experiences. Requisite: course C114F. Application of cancer-related theory/research to clinical practice, with emphasis on assessment and intervention of nursing care problems in response to cancer and cancer treatment. Focus on issues affecting nursing care in prevention/screening, diagnosis, treatment, symptom management, rehabilitation, and quality of life related to responses to major cancers. Concurrently scheduled with course C215F. Letter grading.

C116F. Human Responses to Critical Illness. (4) Lecture, three hours; discussion, one hour. Biobehavioral theories and research of critical illness. Nursing aspects of selected dysfunctions and implications for critical care advanced practice nurses. Concurrently scheduled with course C216F. Letter grading.

C117F. Human Responses to Critical Illness. (4) Lecture, three hours; discussion, one hour. Requisite: course C116F. Builds on pathophysiologic concepts and nursing management of critically ill adults presented in course C116F. Emphasis on synthesis of research, theory, and experiential knowledge and skills to provide advanced preparation for critical care advanced practice nurses. Concurrently scheduled with course C217F. Letter grading.

C120. Theories of Instruction and Learning in Nursing. (3) Lecture, two hours. Theories of learning, curriculum and program development, and principles and techniques of evaluation. Consideration of needs of diverse populations in relation to educational activities. Description of educational opportunities for advanced practitioner in clinical nursing, staff development/continuing education, and academia. Concurrently scheduled with course C220. Letter grading.

C123. Childhood Development: Research and Application to Nursing. (2) Lecture, two hours. Critique and evaluation of current research and theory in child development and their application to care of children. Provides scientific basis for understanding human growth and development, anticipating problems, and managing barriers to growth and development throughout childhood. Concurrently scheduled with course C223. Letter grading.

C130. Advanced Pathophysiology. (4) Lecture, four hours. Prerequisite: course 105 or equivalent taken within past five years. Operative mechanisms and control of major portions of human organ systems (i.e., normal human physiology with application to pathophysiology). Builds on basic concepts of cell- and system-oriented physiology; presentation of emerging and topical issues affecting advanced practice and clinical management. Concurrently scheduled with course C230. Letter grading.

C132F. Human Responses to Aging and Chronic Illness. (4) Lecture, three hours; field experiences. Pathophysiologic concepts and nursing management of chronically ill older adults. Nursing aspects of selected dysfunctions and implications for advanced practice nurses. Concurrently scheduled with course C232F. Letter grading.

M158. Culture, Illness, and Healing. (4) (Same as Anthropology M168.) Lecture, four hours. Medical anthropology is organized around holistic exploration of ways in which health, illness, and medical practices are socially and culturally mediated. Topics include comparing illness experiences, understandings about health and illness, patterns of care seeking, therapeutic practices, and medical systems in context of different social and cultural settings, including our own. P/NP or letter grading.

190. Community Health Nursing. (8) (Formerly numbered 190F.) Lecture, three hours; clinical, 15 hours. Clinical concentration in multicultural community health nursing settings: public health, rehabilitation, mental health centers, occupational health, and schools. Theoretical content focuses on the community as a context for understanding the relationship between health status of individuals and groups with the psychosociophysical environment. Letter grading.

192. Physical Assessment. (4) Lecture, three hours; laboratory, three hours. Designed to provide in-depth review and synthesis of physical assessment skills and knowledge covering the life span. Individual study, use of audiovisual aids, physical assessment skills practice in laboratory, and required text are mandatory. Letter grading.

193. Introduction to Research. (4) Lecture, four hours. Introduction to planning a research project based on a simple question. Rules for definition of terms, alternative methods of writing purposes, selecting a sample, choosing a data collection instrument, planning for data analysis, protection of human rights, reading research reports, and writing a research proposal. P/NP or letter grading.

195. Nursing Management. (3) Lecture, two hours; field study, three hours. Prerequisites: course 104, Biostatistics 100A, Epidemiology 100. Management theory applied to nursing practice. Acquisition of basic knowledge of management concepts and skills as practiced in organizational structures and community health care settings. Letter grading.

196. Issues in Providing Health Care to Culturally Diverse Populations. (4) Lecture, three hours; discussion, one hour. Open to non-nursing students with consent of instructor. Theoretical and experiential course designed to provide a base for understanding issues of providing health care to culturally diverse populations, with emphasis on strategies to facilitate intercultural/intracultural communication and intergroup/intragroup dynamics in health care settings. P/NP or letter grading.

199. Special Studies in Nursing. (2 to 16) Tutorial, to be arranged. Limited to seniors. Individual study of a problem in the field of nursing. May be repeated for credit, but only four units may be applied toward degree requirements. P/NP or letter grading.

Graduate Courses

C200A-C200B. Biobehavioral Foundations of Health Assessment. (3-3) (Formerly numbered 200A-200B.) Lecture, two hours. Theories of health behaviors in relation to assessment of epidemiological, psychological, and developmental disorders across life span. Analysis of preventive health, disease screening, risk evaluation, and health promotion theories and interventions. Concurrently scheduled with courses C100A-C100B. Letter grading. **C200A.** Prerequisite: course 192 or approved physical assessment course. **C200B.** Prerequisite for acute care, family, gerontology, nurse midwifery, occupational health, oncology, and pediatric specialty students: course C200A.

201. Health-Related Quality of Life. (2) Lecture, two hours. Theoretical foundations of health-related quality of life as an outcome of disease, treatment, and style of care. Analysis of meaning, dimensions, predictors, measures, ethical dilemmas, cultural diversity issues, and biobehavioral foundations of health-related quality of life. Letter grading.

202. Philosophical Foundations of Science of Nursing. (4) Lecture, four hours. Designed for Ph.D. students. Intended to explore major schools of thought in contemporary Western philosophy of science, with emphasis on ways in which these schools may and do influence nursing science and practice. S/U or letter grading.

203. History of Nursing Thought. (2) Lecture, two hours. Analysis and evaluation of contextual forces which influenced development of discipline of nursing. Examination of nursing's historical influence on sociopolitical environment. Letter grading.

204. Research Design and Critique. (4) Lecture, 90 minutes; discussion, 90 minutes. Preparation: one statistics course. Research process and critique of research, with emphasis on quantitative research designs. Consideration of strengths and weaknesses of selected survey, quasi-experimental and true experimental designs, theoretical frameworks, identification and control of variables, measurement instruments, sampling methods, data analysis, and interpretation of results. Letter grading.

205. Advanced Research Methods. (4) Lecture, four hours. Preparation: one statistics course. Prerequisites: courses 193, 204. Research process and development of research proposals, including quantitative and qualitative approach to designs. Students encouraged to develop research proposal for clinical or basic research problem related to nursing care or variables affecting such care. Letter grading.

206A-206B. Nursing Theory Development. (4-4) Seminar, three hours. Preparation: four units of nursing theory. Prerequisite: course 202 or philosophy of science course (may be taken concurrently). Focus on major issues involved in development of nursing knowledge, including content and methods of developing nursing theory. In Progress and S/U or letter grading.

207. Research in Nursing: Measurement of Clinical Variables. (4) Lecture, two hours; discussion, two hours. Prerequisites: courses 204, 205. Analysis of methods of measurement of physiological and psychosocial variables relevant to clinical nursing research, with emphasis on purposes, underlying assumptions, strengths, and limitations of measurement techniques. Analysis of techniques to develop reliability, validity, sensitivity of measurement instruments. Letter grading.

208. Research in Nursing: Measurement of Outcomes. (4) Lecture, three hours; field application, six to eight hours. Prerequisites: courses 206A, 207. Measurement theories, including topics related to scaling and tool development as they apply to outcomes. Emphasis on opportunity to develop knowledge and skills through course content and individualized direct involvement in a clinical research project. S/U or letter grading.

209. Human Diversity in Health and Illness. (2) Lecture, two hours. Human diversity in response to illness that nurses diagnose and treat, centering on culture and human belief systems associated with diverse orientations related to ethnicity and gender. Provides conceptual base that nurses can use in clinical practice, research, teaching, and administration. Letter grading.

210. Theoretical Foundations of Family Nursing. (2) Lecture, two hours. Theoretical and research-based content in family health and individual development throughout life span, emphasized in relationship to specific health maintenance and health problem issues of ambulatory populations. Letter grading.

C210F. Theoretical Foundations of Family Nursing. (4) (Formerly numbered 210F.) Lecture, three hours; selected field experiences. Theoretical and research-based content in family health and individual development throughout life span, emphasized in relationship to specific health maintenance and health problem issues of ambulatory populations. Concurrently scheduled with course C110F. Letter grading.

211. Theoretical Foundations of Family Nursing. (2) Lecture, two hours. Prerequisite: course 210. Continuation of course 210. Letter grading.

C211F. Theoretical Foundations of Family Nursing. (4) (Formerly numbered 211F.) Lecture, three hours; selected field experiences. Prerequisite: course C110F/C210F. Continuation of course C210F. Concurrently scheduled with course C111F. Letter grading.

C212. Health-Related Family Theory. (2) (Formerly numbered 212.) Lecture, two hours. Overview of conceptual frameworks related to contemporary family structure and functioning, with particular emphasis on health. Identification of limitations of current theory and applicability of current knowledge to various problems encountered in care of families. Concurrently scheduled with course C112. Letter grading.

C213A. Occupational Health Nursing Role and Theory. (2) Lecture, two hours. Introduction to multidisciplinary occupational health environment, including work settings, occupational health nursing scope and standards of practice, and legal and regulatory issues that affect occupational health nursing. Concurrently scheduled with course C113A. Letter grading.

C213B. Occupational Health Programs. (2) Lecture, two hours. Prerequisite: course C113A/C213A. Program planning, evaluation, and management of occupational health programs, including analysis of individual leadership styles and management concepts. Assessment of economic, political, and other factors that affect occupational health and safety programs. Concurrently scheduled with course C113B. Letter grading.

213C. Health Assessment, Research, and Health Promotion in Occupational Health. (3) Lecture, three hours. Prerequisites: courses C113A/C213A, C113B/C213B. Clinical practice issues in occupational health nursing, including adult workforce health issues, adult workforce health assessment, and special populations at risk. Health promotion and research in occupational health. Letter grading.

214. Human Responses to Cancer. (2) Lecture, two hours. Cancer-related research and theory from variety of disciplines, including nursing, analyzed and evaluated for application to clinical practice, with emphasis on nursing assessment and intervention of responses to cancer and cancer treatment. Letter grading.

C214F. Human Responses to Cancer. (4) (Formerly numbered 214F.) Lecture, three hours; selected field experiences. Cancer-related research and theory from variety of disciplines, including nursing, analyzed and evaluated for application to clinical practice, with emphasis on nursing assessment and intervention of responses to cancer and cancer treatment. Concurrently scheduled with course C114F. Letter grading.

215. Human Responses to Cancer. (2) Lecture, two hours. Application of cancer-related theory/research to clinical practice, with emphasis on assessment and intervention of nursing care problems in response to cancer and cancer treatment. Focus on issues affecting nursing care in prevention/screening, diagnosis, treatment, symptom management, rehabilitation, and quality of life related to responses to major cancers. Letter grading.

C215F. Human Responses to Cancer. (4) (Formerly numbered 215F.) Lecture, three hours; selected field experiences. Requisite: course C114F/C214F. Application of cancer-related theory/research to clinical practice, with emphasis on assessment and intervention of nursing care problems in response to cancer and cancer treatment. Focus on issues affecting nursing care in prevention/screening, diagnosis, treatment, symptom management, rehabilitation, and quality of life related to responses to major cancers. Concurrently scheduled with course C115F. Letter grading.

216. Human Responses to Critical Illness. (2) Lecture, two hours. Biobehavioral theories and research of critical illness. Nursing aspects of selected dysfunctions and implications for critical care advanced practice nurses. Letter grading.

C216F. Human Responses to Critical Illness. (4) (Formerly numbered 216F.) Lecture, three hours; discussion, one hour. Biobehavioral theories and research of critical illness. Nursing aspects of selected dysfunctions and implications for critical care advanced practice nurses. Concurrently scheduled with course C116F. Letter grading.

217. Human Responses to Critical Illness. (2) Lecture, two hours. Requisite: course 216. Builds on pathophysiological concepts and nursing management of critically ill adults presented in course 216. Emphasis on synthesis of research, theory, and experiential knowledge and skills to provide advanced preparation for critical care advanced practice nurses. Letter grading.

C217F. Human Responses to Critical Illness. (4) (Formerly numbered 217F.) Lecture, three hours; discussion, one hour. Requisite: course C116F/C216F. Builds on pathophysiological concepts and nursing management of critically ill adults presented in course C216F. Emphasis on synthesis of research, theory, and experiential knowledge and skills to provide advanced preparation for critical care advanced practice nurses. Concurrently scheduled with course C117F. Letter grading.

218A. Nursing Administration Theory. (4) Lecture, four hours. Application of organizational, communication, leadership, and management theories in health care systems, including content related to organizational structure, health care delivery models, and research design and methodologies. Letter grading.

218B. Nursing Administration Theory. (4) Lecture, four hours. Requisite: course 218A. Focus on synthesizing organizational and management theories in relation to health economics and finance, quality of care, resource management, informatics, law, policy, and ethics. Letter grading.

218C. Nursing Administration Theory. (4) Lecture, four hours. Requisite: course 218B. Theories related to organizational development and change, political action, marketing, and public relations and the media, including ethics of decision making and local, national, and international markets. Letter grading.

219A. Essentials of Accounting and Budgeting in Health Care Organizations. (4) Lecture, four hours. Highly desirable preparation: functional competency in use of an electronic spreadsheet (e.g., LOTUS or EXCEL). Designed for graduate nursing administration program students. Theories of management, organization, and administration presented in relation to techniques of accounting, budgeting, finance, and health care economics. Focus on definition of terms and concepts, followed by practical applications within a variety of health care settings. Letter grading.

219B. Operations Planning and Control for Nursing Administrators. (4) Lecture, four hours. Preparation: functional competency in use of integrated spreadsheet/database/graphics software (e.g., LOTUS or EXCEL). Requisite: course 219A. Exposure to concepts, issues, and analytic techniques of C-B-A/C-E-A, CQI monitoring, decision making, forecasting, productivity determinations, and program planning and evaluation for nurse administrators. Emphasis on practical application of methods and techniques within health care arena. Letter grading.

C220. Theories of Instruction and Learning in Nursing. (3) (Formerly numbered 220.) Lecture, two hours. Theories of learning, curriculum and program development, and principles and techniques of evaluation. Consideration of needs of diverse populations in relation to educational activities. Description of educational opportunities for advanced practitioner in clinical nursing, staff development/continuing education, and academia. Concurrently scheduled with course C120. Letter grading.

222. Immunosuppression and Patient Care. (2) Lecture, two hours. Research related to immunosuppression, its causes, clinical manifestations, and modifiers. Special emphasis on physiologic and pathophysiological mechanisms of immunosuppression as a basis for information used in patient education and clinical decisions, and supportive treatments and modifiers. Letter grading.

C223. Childhood Development: Research and Application to Nursing. (2) (Formerly numbered 223.) Lecture, two hours. Critique and evaluation of current research and theory in child development and their application to care of children. Provides scientific basis for understanding human growth and development, anticipating problems, and managing barriers to growth and development throughout childhood. Concurrently scheduled with course C123. Letter grading.

224. Health-Related Problems of Vulnerable Populations. (2) Lecture, two hours. Health-related research and models focusing on health promotion and health intervention, and health ethics and policy regarding vulnerable populations. Emphasis on vulnerable or at-risk social groups in the U.S. Letter grading.

225. Pharmacology for Advanced Practice Nurses. (4) Lecture, four hours. Knowledge of and skills in pharmacology necessary for advanced practice nurses who have clients/patients with stable acute or chronic conditions. Letter grading.

229. Biologic/Psychologic Interface in Health and Illness. (2) Lecture, two hours. Interaction of physiologic, behavioral, and psychosocial factors in illness, and theory and research underlying these factors, including differential influence of gender, ethnicity, and culture. Letter grading.

C230. Advanced Pathophysiology. (4) (Formerly numbered 230.) Lecture, four hours. Requisite: course 105 or equivalent taken within past five years. Designed for graduate nursing students. Operative mechanisms and control of major portions of human organ systems (i.e., normal human physiology with application to pathophysiology). Builds on basic concepts of cell- and system-oriented physiology; presentation of emerging and topical issues affecting advanced practice and clinical management. Concurrently scheduled with course C130. Letter grading.

231. Special Topics in Cellular Physiology. (2) Lecture, two hours. Requisite: course C230. Designed for graduate nursing students. Functional organization and genetic control of human cell. Letter grading.

232. Human Responses to Aging and Chronic Illness. (2) Lecture, three hours. Pathophysiological concepts and nursing management of chronically ill older adults. Nursing aspects of selected dysfunctions and implications for advanced practice nurses. Letter grading.

C232F. Human Responses to Aging and Chronic Illness. (4) (Formerly numbered 232F.) Lecture, three hours; field experiences. Pathophysiological concepts and nursing management of chronically ill older adults. Nursing aspects of selected dysfunctions and implications for advanced practice nurses. Concurrently scheduled with course C132F. Letter grading.

233. Human Responses to Aging and Chronic Illness. (2) Lecture, two hours. Requisite: course 232. Biopsychosocial concepts and nursing management of healthy, disabled, and chronically ill older adults, addressing pathophysiological aspects of common health problems. Implications for advanced practice in gerontology/chronic care nursing. Letter grading.

233F. Human Responses to Aging and Chronic Illness. (4) Lecture, three hours; field experiences. Requisite: course C132F/C232F. Biopsychosocial concepts and nursing management of healthy, disabled, and chronically ill older adults, addressing pathophysiological aspects of common health problems. Implications for advanced practice in gerontology/chronic care nursing. Letter grading.

234. Health Assessment of Women: Primary Care. (3) Lecture, three hours. Requisite: course 192. Theoretical basis for health assessment and changes in women as related to primary care, with focus on physiologic, psychosocial, and behavioral factors and on theoretical components of nurse-midwifery management process. Common health problems other than those related to gynecology or reproduction included. Elements of primary care which focus on health promotion, education, disease prevention, and client advocacy. Letter grading.

235. Reproductive Endocrinology. (3) Lecture, two hours; seminar, one hour. Designed for nursing students. Current theory and research related to systematic evaluation of normal physiology. Highlights human growth and development, sexual differentiation, menstrual cycle, puberty, menopause, parturition, postpartum, lactation, placenta, and male and female reproduction. Letter grading.

236. Professional and Legal Issues in Nurse-Midwifery. (2) Lecture, two hours. Designed for graduate students in advanced practice in nurse-midwifery option of master's program. Current theory and research of advanced nursing roles, with emphasis on role of certified nurse/midwife. Organizational, administrative, legal, and ethical issues as required by certifying agencies. Letter grading.

237A. Primary Care of Women: Antepartum Management. (3) Lecture, three hours. Requisite: course 234. Presentation of theory and research on assessment and management of women during pregnancy, with emphasis on current nursing models of primary and independent/collaborative care of women/families during antepartum period. Review of management of normal pregnancy and health and social complications. Letter grading.

237B. Primary Care of Women: Intrapartum Management. (4) (Formerly numbered 237C.) Lecture, four hours. Requisite: course 237A. Critical analysis of theory, research, and knowledge related to primary and independent/collaborative care of intrapartum families. Management of spontaneous and assisted labors, birth, techniques of pain reduction, promotion of normal processes, and management of the newborn. Letter grading.

237C. Primary Care of Women: Postpartum and Newborn Management. (2) (Formerly numbered 237B.) Lecture, two hours. Requisite: course 237B. Theory, research, assessment, and management of common, low-risk, and high-risk conditions occurring during postnatal period and adaptation to extrauterine life, including neonatal physical assessment. Breast-feeding support and maternal/infant interactions. Letter grading.

237D. Primary Care of Women: Advanced Nurse-Midwifery Management. (2) Lecture, two hours. Requisite: course 237C. Synthesis of previous coursework, with focus on nurse-midwifery management of complications of intrapartum period and comanagement or referral as necessary. Basic theory of obstetric ultrasonography and appropriate use of information in pregnancy and parturition. Letter grading.

237E. Primary Care of Women: Family Planning and Gynecology Management. (4) Lecture, four hours. Requisite: course 234. Presentation of critical analysis and application of family planning and gynecological theory, knowledge, and research. Emphasis on assessment and primary care strategies with reference to social, legal, and ethical issues in nurse-midwifery management. Letter grading.

238A. Theoretical Foundations of Nursing of Children: Assessment and Health Guidance. (4) Lecture, four hours. Requisite: course C200B. Theory and research emphasize interaction among developmental level, family characteristics, and environmental milieu as it affects child well-being. Advanced science base for assessment and anticipatory guidance for children and families to promote child wellness and diagnose common childhood illnesses. Letter grading.

238B. Theoretical Foundations of Nursing of Children: Common Illnesses and Problems. (4) Lecture, four hours. Requisite: course 238A. Theory and research emphasize physiological and psychological basis for common childhood illnesses and problems; evaluation of alternative therapies in research literature also emphasized. Advanced science base for assessment, diagnosis, and management of common childhood illnesses and problems. Letter grading.

238C. Theoretical Foundations of Nursing of Children: Complex Health Problems. (4) Lecture, four hours. Requisite: course 238B. Advanced science base for assessment, diagnosis, and ambulatory management of complex chronic and acute childhood illnesses. Theory and research emphasize physiological basis for complex disease entities; evaluation of alternative therapies in research literature also emphasized. Letter grading.

239A. Biobehavioral Foundations of Acuity and Chronicity in Illness. (4) Lecture, four hours. Requisites: courses C200A-C200B. Organ systems approach to health maintenance and to acuity and chronicity in syndromes related to respiratory, cardiovascular, gynecological, and genitourinary organ systems. First of three-course sequence in diagnosis and management of commonly occurring medical and nursing health care problems managed by nurse practitioners in variety of clinical settings. Letter grading.

239B. Biobehavioral Foundations of Acuity and Chronicity in Illness. (4) Lecture, four hours. Requisite: course 239A. Organ systems approach to health maintenance and to acuity and chronicity in syndromes related to ocular, neurologic, endocrine, gastrointestinal, immunologic, hematologic, and dermatologic organ systems. Second of three-course sequence in diagnosis and management of commonly occurring medical and nursing health care problems managed by nurse practitioners in variety of clinical settings. Letter grading.

239C. Biobehavioral Foundations of Acuity and Chronicity in Illness. (4) Lecture, four hours. Requisite: course 239B. Review, analysis, and synthesis of current theory and research related to symptom meaning, presentation, and management. Special emphasis on acute and chronic problems across life span. Focus on advanced practice nursing assessment and intervention in common illness-associated symptoms. Letter grading.

241. Biobehavioral Foundations of Neuropsychiatric Assessment. (2) Lecture, three hours. Biologic and behavioral theories and research from variety of disciplines, including nursing, for application to neuropsychiatric assessment. Exploration of research underlying assessment and diagnosis of cognitive, addictive, and affective dysfunctions, with emphasis on developing a nursing model. Letter grading.

241F. Biobehavioral Foundations of Neuropsychiatric Assessment. (4) Lecture, three hours; field experiences. Requisites or corequisites: courses C200A-C200B. Biologic and behavioral theories and research from variety of disciplines, including nursing, for application to neuropsychiatric assessment. Exploration of research underlying assessment and diagnosis of cognitive, addictive, and affective dysfunctions, with emphasis on developing a nursing model. Letter grading.

242. Biobehavioral Foundations of Neuropsychiatric Nursing Care. (2) Lecture, three hours. Biologic and behavioral research from variety of disciplines, including nursing, for application to treatment of neuropsychiatric dysfunction. Exploration of research underlying treatment interaction in cognitive, addictive, and affective dysfunctions, with emphasis on developing a nursing model. Letter grading.

242F. Biobehavioral Foundations of Neuropsychiatric Nursing Care. (4) Lecture, three hours; field experiences. Requisite: course 241F. Biologic and behavioral research from variety of disciplines, including nursing, for application to treatment of neuropsychiatric dysfunction. Exploration of research underlying treatment interaction in cognitive, addictive, and affective dysfunctions, with emphasis on developing a nursing model. Letter grading.

243. Theoretical Foundations of Complementary Health Care I. (2) Lecture, two hours. Overview of theories and research underlying commonly used therapeutic systems available in the U.S. Major emphasis on fundamental mind-body-environment theories and principles. Focus on categories of alternative systems within framework of Western clinical practice. Letter grading.

243F. Theoretical Foundations of Complementary Health Care I. (4) Lecture, four hours. Requisites: courses C200B, 225, C230. Overview of theories and research underlying commonly used therapeutic systems available in the U.S. Major emphasis on fundamental mind-body-environment theories and principles. Focus on categories of alternative systems within framework of Western clinical practice. Letter grading.

244. Theoretical Foundations of Complementary Health Care II. (2) Lecture, two hours. Continuation of course 243. Specifics of alternative therapies, body-mind principles, and traditional Chinese medicine assessment and diagnosis provided within framework of theory and research. Major emphasis on understanding integration of these complementary therapies with Western diagnosis and management. Letter grading.

244F. Theoretical Foundations of Complementary Health Care II. (4) Lecture, four hours. Requisite: course 243F. Continuation of course 243F. Specifics of alternative therapies, body-mind principles, and traditional Chinese medicine assessment and diagnosis provided within framework of theory and research. Major emphasis on understanding integration of these complementary therapies with Western diagnosis and management. Letter grading.

264. Professional Issues in Nursing. (3) Lecture, three hours. Requisite: course 418A or 438A or 439A. Concepts of collegial practice, interprofessional and intraprofessional relationships, legal issues, and socioeconomic aspects of health care delivery. Letter grading.

M273. Advanced Seminar: Medical Anthropology. (4) (Same as Anthropology M263Q, Community Health Sciences M244, and Psychiatry M273.) Seminar, three hours. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works. S/U or letter grading.

M290A-M290B-M290C. Child Abuse and Neglect. (2-2-1) (Same as Community Health Sciences M245A-M245B-M245C, Dentistry M300.5A-M300.5B-M300.5C, Education M217G-M217H-M217I, Law M281A-M281B, Medicine M290A-M290B, and Social Welfare M290E-M290F-M290G.) Lecture, two hours. Course M290A is requisite to M290B, which is requisite to M290C. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies. S/U or letter grading.

299A. Nursing Research Seminar. (4) Seminar, three hours. Preparation: one cognate area course. Requisites: courses 206A-206B, 207, 208. Seminar to assist students who are beginning careers in scientific research to understand issues of misconduct and scientific integrity. Highlights faculty expertise in research, culminating in communication and dissemination of their research. S/U grading.

299B-299C. Nursing Research Seminars. (1 to 4 each) Seminar, one hour; discussion, one to four hours. Preparation: statistics sequence in cognate area. Requisites: courses 206A-206B, 207, 208. Seminars to assist students throughout execution of their dissertations, beginning with selection of a researchable problem and culminating in communication and dissemination of their research. S/U grading.

299D. Nursing Research Seminar. (1 to 4) Seminar, one hour; discussion, one to four hours. Preparation: statistics sequence in cognate area. Requisites: courses 206A-206B, 207, 208, C220. Seminar to assist students to prepare for careers in academic settings, with focus on teaching. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Tutorial, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

416. Advanced Practice Nursing: Acute Care Laboratory Practicum. (1) Laboratory, three hours. Required of acute care and oncology specialty students. Introduction to advanced practice diagnostic or therapeutic procedures and related indications, complications, and follow-up care in laboratory setting, including advanced electrocardiograms and chest X-ray interpretation, suturing, central and arterial line placement, intubation, bone marrow aspiration, and lumbar puncture. S/U grading.

418A. Nursing Administration Practicum. (2) Clinic practicum, six hours. Corequisite: course 218A. Analysis, evaluation, and application of organizational theory within leadership and management roles in organizations involved with health care. Provides a practice setting to apply theory, particularly content of course 218A, under supervision of a skilled preceptor. Letter grading.

418B. Nursing Administration Practicum. (2) Clinic practicum, six hours. Corequisite: course 218B. Synthesis and application of previous learning and organizational theories in development of organizational strategies in relation to health economics and finance, quality patient care, resource management, informatics, law, policy, and ethics. Provides a practice setting to apply theory, particularly content of course 218B, under supervision of a skilled preceptor. Letter grading.

418C. Nursing Administration Practicum. (2) Clinic practicum, six hours. Corequisite: course 218C. Participation in and evaluation of processes of project management, organizational development and change, political influence outside the organization, maximizing diverse relationships and relationships with physicians, administrators, and boards, marketing, dealing with the media, and ethics of administration decision making. Provides a practice setting to apply theory, particularly content of course 218C, under supervision of a skilled preceptor. Letter grading.

418D. Nursing Administration Residency (10 units). Seminar, two hours; clinic practicum, 32 hours. Requisite: course 418C. Students assume leadership role in planning, managing, and evaluating an administrative project, and demonstrate expertise in application and evaluation of organizational theories in multiple roles. Students also plan for future continuous personal and professional growth. Letter grading.

434. Health Assessment of Women: Primary Care Clinical Management. (2) Clinic practicum, six hours. Clinical experience in application of principles of health assessment and primary care of women, with focus on physiologic, psychosocial, and behavioral factors and on clinical components of nurse-midwifery management process. Common health problems other than those related to gynecology or reproduction included. Elements of primary care which focus on health promotion, education, disease prevention, and client advocacy. Letter grading.

437A. Nurse-Midwifery Clinical Management I. (4) Clinic, 11 hours; clinical conference, one hour. Corequisite: course 237A. Application of theory, knowledge, and research of primary care of women during antepartum period, with emphasis on counseling and screening for prevention and early detection of common risk conditions that may complicate prenatal period. Letter grading.

437B. Nurse-Midwifery Clinical Management II. (4) (Formerly numbered 437C.) Clinic, 12 hours. Corequisite: course 237B. Application of current theory, research, and knowledge relevant to nurse-midwifery care and management of childbearing family during intrapartum and immediate newborn periods. Letter grading.

437C. Nurse-Midwifery Clinical Management III. (4) (Formerly numbered 437B.) Clinic, 12 hours. Corequisite: course 237C. Application of knowledge to management of postpartum women and newborns, with emphasis on interventions to assist with breastfeeding and counseling about interconceptional family planning and prevention of complications in newborn's transition to extrauterine life. Letter grading.

437D. Nurse-Midwifery Clinical Management IV. (4) Clinic, 12 hours. Corequisite: course 237D. Synthesizing previous coursework and clinical work, students continue to practice assessment and management of intrapartum family. Special emphasis on management of complications in intrapartum period and on interpretation and utilization of ultrasonography in clinical settings. Letter grading.

437E. Primary Care of Women: Family Planning and Gynecology Clinical Management. (4) Clinic, 11 hours; clinical conference, one hour. Corequisite: course 237E. Primary care for gynecology, family planning, sexually transmitted diseases, and premenopausal and perimenopausal women/families. Principles of prevention, assessment, diagnosis, treatment, and counseling applied in clinical experiences, case studies, and skills laboratories. Letter grading.

437F. Primary Care of Women: Nurse-Midwifery Integration. (8) Clinic, 24 hours (10 weeks) or 40 hours (six weeks). Requisite: course 437E. Students assume management responsibility for full scope of nurse-midwifery practice, providing continuity and comprehensive obstetric care to the childbearing woman, care to the newborn, family planning, and gynecologic care to the well woman. Students expected to implement one of the functional aspects of clinical nurse specialist role (i.e., educator, practitioner, researcher, or consultant). Letter grading.

438A. Advanced Practice Nursing in Care of Children: Wellness Care. (2) Clinic practicum, six hours. Requisite: course 238A. Development of expanded skills in comprehensive assessment and provision of anticipatory guidance for children and families to promote child wellness. Application of theory and research in provision of wellness care throughout childhood years. Letter grading.

438B. Advanced Practice Nursing in Care of Children: Management of Common Illnesses. (4) Clinic practicum, 12 hours. Requisite: course 238B. Development of expanded skills in comprehensive assessment and management of common childhood illnesses and problems; students continue to gain skills in promoting child wellness. Application of theory and research in care of common illnesses throughout childhood years. Letter grading.

438C. Advanced Practice Nursing in Care of Children: Management of Complex Health Problems. (4) Clinic practicum, 12 hours. Requisite: course 238C. Development of expanded skills in assessment and ambulatory management of complex acute and chronic childhood illnesses. Application of theory and research in provision of care for complex acute and chronic illnesses throughout childhood years. Letter grading.

438D. Pediatric Primary Care: Residency. (9) Clinic practicum, 27 hours. Requisites: courses 238C, 438C. Students assume primary responsibility for planning, managing, and evaluating care of children. Research, theory, and clinical knowledge analyzed, integrated, and applied to care of children and families with actual or potential health problems. Letter grading.

439A. Advanced Practice Nursing: Clinical Practicum. (2) Clinic practicum, six hours. Corequisite: course 239A. Advanced practice nursing in critical care, family, gerontology/chronic care, occupational health, and oncology. Nursing management and evaluation of health problems in selected populations. Developmental needs of clients in relation to family, social, and cultural structures. Letter grading.

439B. Advanced Practice Nursing: Clinical Practicum. (4) Clinic practicum, 12 hours. Corequisite: course 239B. Continuation of course 439A for advanced practice nurses, with emphasis on nursing management of acute and chronic health problems in selected populations. Developmental needs of clients in relation to family, social, and cultural structures. Letter grading.

439C. Advanced Practice Nursing: Clinical Practicum. (4) Clinic practicum, 12 hours. Corequisite: course 239C. Third clinical practicum course for advanced practice nurses, with focus on nursing assessment and intervention in common illness-associated symptoms. Special emphasis on acute and chronic problems across life span, including review and analysis of current theory and research. Letter grading.

439D. Advanced Practice Nursing: Residency. (9) Clinic practicum, 27 hours. Requisites: courses 239C, 439C. Residency in advanced practice role where students assume primary responsibility for planning, managing, and evaluating care of clients in specialty setting. Emphasis on application and integration of theory, research, and clinical knowledge in advanced practice role. Letter grading.

441. Neuropsychiatric Subspecialty Clinical Seminar. (1) Clinical seminar, one hour; self-study, two hours. Requisites: courses 241F, 242F. Designed for advanced practice nurses in any adult nurse practitioner specialty. Neuropsychiatric assessment, treatment, and case presentations in selected populations with addictive, affective, and cognitive dysfunctions in relation to family, social, and cultural structures. S/U grading.

442. Neuropsychiatric Subspecialty Clinical Seminar. (1) Clinical seminar, one hour; self-study, two hours. Requisite: course 441. Designed for advanced practice nurses in any adult nurse practitioner specialty. Continuation of course 441. S/U grading.

501. Cooperative Program. (2 to 8) Tutorial, to be arranged. Preparation: consent of UCLA assistant dean and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. No more than eight units may be applied toward M.S.N. degree minimum total course requirement; may not be applied toward minimum graduate course requirement. S/U grading.

596. Directed Individual Study or Research. (4 to 8). Tutorial, to be arranged. Opportunity for individual graduate nursing students to pursue special studies or research interests. May be repeated for credit, but only four units may be applied toward graduate degree requirements. S/U grading.

597. Individual Study for Comprehensive Examination. (4 to 8) Tutorial, to be arranged. May be repeated once for credit, but only four units may be applied toward M.S.N. degree requirements. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (2 to 8) Tutorial, to be arranged. Individualized faculty supervision of Ph.D. dissertation research by student's chair. May be repeated for credit, but only eight units may be applied toward Ph.D. degree requirements. S/U grading.

Lawrence Platt, M.D., *Vice Chair, Cedars-Sinai*
Michael G. Ross, M.D., *Vice Chair, Harbor-UCLA*

Scope and Objectives

The medical student program in obstetrics and gynecology is designed to provide firm background in the essentials of women's health. Through a combination of didactic instruction and supervised clinical experience, students acquire the relevant clinical skills of history taking and physical examination and learn reproductive physiology from infancy to the postmenopausal period; antepartum, intrapartum, and postpartum obstetric care; and recognition and management of various gynecologic disorders. Third-year students work in ambulatory clinics and on inpatient services during a six-week core clerkship. Greater depth of experience is provided by elective clerkships during the fourth year which emphasize subspecialties such as maternal/fetal medicine, reproductive endocrinology, gynecologic oncology, and family planning.

For further details on the Department of Obstetrics and Gynecology and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

OPHTHALMOLOGY

School of Medicine

UCLA
2-142 Jules Stein Eye Institute
Box 957000
Los Angeles CA 90095-7000
(310) 825-5053

Chairs

Bartly J. Mondino, M.D. (*Wasserman Professor of Ophthalmology*), *Chair*
Sherwin J. Isenberg, M.D. (*Grace and Walter Lantz Endowed Professor*), *Vice Chair, Harbor-UCLA*
Arthur L. Rosenbaum, M.D., *Vice Chair*

Scope and Objectives

Ophthalmology is the medical science that encompasses knowledge concerning the eyes and the visual system. Derived from many basic and clinical fields, this knowledge must be synthesized by the physician and applied to the prevention, diagnosis, medical management, and surgical therapy of ocular disease.

In response to the steadily increasing incidence and growing importance of ocular disorders, the Department of Ophthalmology and the Jules Stein Eye Institute (including the Doris Stein Eye Research Center) are closely coordinated to form a comprehensive center for research in the sciences related to vision, for the care of patients with disease of the eyes and related structures, and for education in the broad field of ophthalmology.

The Department of Ophthalmology provides instruction to medical students during the second, third, and fourth years. Through lectures, demonstrations, discussions, and the opportunity to observe patients and review data on cases with a variety of ocular conditions, students gain knowledge and experience in ophthalmology.

For further details on the Department of Ophthalmology and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

Professors

George W. Bernard, D.D.S., Ph.D.
Douglas Junge, Ph.D.
Lawrence E. Wolinsky, D.D.S., Ph.D.

Professors Emeriti

Colin K. Franker, Ph.D.
Louis J. Goldberg, D.D.S., Ph.D.

Associate Professors

Francesco Chiappelli, Ph.D.
Robert Chiu, Ph.D.
Jacob Fleischmann, M.D.
Kenneth T. Miyasaki, D.D.S., M.S., Ph.D.

Assistant Professors

Susan A. Haake, D.M.D., M.D.S., Ph.D.
George Huang, Ph.D.
Wenyuan Shi, Ph.D.
Igor Spigelman, Ph.D.

Adjunct Professor

Bernard G. Sarnat, M.D., M.S., D.D.S.

Adjunct Associate Professor

Carol A. Bibb, Ph.D., D.D.S.

Adjunct Assistant Professors

Anahid Jewett, Ph.D.
Diana Messadi, D.D.S., Ph.D.
Shen Pang, Ph.D.

Scope and Objectives

Oral biology is that area of knowledge which deals with the development, structure, and function of the oral tissues and their interrelationships with other organ systems in normal and disease states. It is a multidisciplinary field that includes cell biology, morphology, molecular biology, biochemistry, neuroscience, immunology, microbiology, and virology. The objective of the graduate program is to provide students with a sound foundation in these areas in order to pursue an academic or research career.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The Department of Oral Biology offers the Master of Science (M.S.) degree in Oral Biology.

Admission

In addition to meeting the general admission requirements set by the Graduate Division, applicants to the M.S. program must have received a B.S., D.D.S., or D.M.D. degree, or the equivalent, with strong background in basic sciences, including two years of chemistry (inorganic, organic, and biological chemistry), one year of biology, and one year of physics.

Applicants must submit three letters of recommendation, at least two of which should be from science faculty familiar with their scholarly abilities, and a statement of purpose describing the applicant's background, work experience, research interests, and career goals.

Applicants may apply for a combined D.D.S./M.S. or advanced certificate training/M.S. by making simultaneous application for graduate study in the Oral Biology Department and for admission to the School of Dentistry and to the certificate programs. A separate application must be submitted to Graduate Admissions/Student and Academic Affairs. Applicants must be accepted by both of the concerned units in order to participate in a combined program.

Areas of Study

Bacterial and fungal pathogenesis, biochemistry, calcified tissue metabolism and developmental biology, immunology, neuroscience, pharmacology and therapeutics, and virology.

Course Requirements

A total of 36 units is required to satisfy the degree requirements. Eight core courses (Oral Biology 201A-201B-201C, 205, 215, 260, and 275) are required and should be taken during the first year of graduate study.

Additional elective courses (a minimum of five units), either at the upper division or graduate level, essential to the research area must be taken.

Eight units of courses 596 and 598 may be applied toward the total requirement, but only four units may be applied toward the minimum graduate course requirement.

Comprehensive Examination Plan

None.

Thesis Plan

The thesis is intended to demonstrate the student's ability to design and carry out a research project and analyze and present the resulting data. Results are expected to be of publishable scientific quality. The subject of the thesis must be approved by the graduate adviser and research mentor. At the end of the first year of study, students should prepare and send a proposal of the research project to the graduate adviser.

Doctoral Degree

Admission

In addition to meeting the general admission requirements set by the Graduate Division, applicants to the program leading to the Ph.D. degree in Oral Biology must have received a B.S., D.D.S., or D.M.D. degree, or the equivalent, with strong background in basic sciences, including two years of chemistry (inorganic, organic, and biological chemistry), one year of biology, and one year of physics. The Graduate Record Examination (GRE) General Test is required for admission.

Applicants must submit three letters of recommendation, at least two of which should be from science faculty familiar with their scholarly abilities, and a statement of purpose describing the applicant's background, work experience, research interests, and career goals.

Applicants may apply for a combined D.D.S./Ph.D. or advanced certificate training/Ph.D. by

making simultaneous application for graduate study in the Oral Biology Department and for admission to the School of Dentistry and to the certificate programs. A separate application must be submitted to Graduate Admissions/Student and Academic Affairs. Applicants must be accepted by both of the concerned units in order to participate in a combined program.

Major Fields or Subdisciplines

Bacterial and fungal pathogenesis, biochemistry, calcified tissue metabolism and developmental biology, immunology, neuroscience, pharmacology and therapeutics, and virology.

Course Requirements

In the first two years, Oral Biology 201A-201B-201C, 205, 206, 215, and 275 are required. Two laboratory rotations (Oral Biology 596) and the seminar (Oral Biology 260) are also required.

In the second year, students are expected to choose an area of emphasis and continue to take additional required and elective courses (a minimum of four to five courses). A menu of the second-year curriculum in each area of emphasis is available in the program office.

Written and Oral Qualifying Examinations

By the beginning of the second year of study, students are responsible, with the advice and consent of the graduate adviser, for organizing the guidance committee. Faculty members constituting the guidance committee include the student's research mentor and two others from the student's areas of emphasis. The guidance committee is responsible for approving the course of the student's doctoral study and conducting a review of the student's progress. The members of the guidance committee plus one more faculty member serve on the doctoral committee: three members must be from the Oral Biology Department and one member must be from a department outside the School of Dentistry.

After the completion of the core course requirements, a broad essay-type examination in the major areas of oral biology and cell biology is given by the graduate training committee. Based on the result of the written qualifying examination as well as performances in coursework, recommendations are made to the student to (1) continue with the Ph.D. program requirements, (2) schedule a retake of the written qualifying examination, (3) be directed to the M.S. program, or (4) be terminated. Permission to retake the examination is granted by the graduate training committee no more than two times.

After satisfactory completion of the written qualifying examination, it is expected that the University Oral Qualifying Examination be completed, preferably by the end of the summer of the second year.

The examination consists of a proposal that outlines the dissertation research, providing a review of the literature, a statement of the aims

of the research, and a description of the planned research activities. Discussion of the written proposal is followed by a question and answer period on general topics related to oral biology.

The guidance committee's decision to advance the student to candidacy, to allow for repeating the examination, or to disqualify from the program is based on the quality of the written proposal, the adequacy of the oral presentation, the overall record at UCLA as reflected in coursework, and the research ability as judged by an abstract of the research submitted with the proposal and the research mentor's written assessment.

Oral Biology

Graduate Courses

201A-201B-201C. Advanced Oral Biology. (3-2-3) Lecture, three hours/two hours/three hours:

201A. Ontogenesis. (3) Lecture, three hours. Evolutionary perspective of cellular development from simple molecules that were formed during the first billion years of the Earth to development of cells, tissues, and organs of invertebrates and vertebrates. Development of vertebrate feeding apparatus from a comparative anatomical and physiological point of view, followed by embryogenesis of orofacial and dental structures of humans. S/U or letter grading.

201B. Homeostasis in Oral Systems. (2) Lecture, two hours. Normal regulatory functions of various oral systems. Topics include mechanisms of salivary secretion and nonspecific salivary protective mechanisms; integrative action of oral sensory systems such as touch, pain, and taste; normal control of movements in jaw and face. Letter grading.

201C. Pathobiology. (3) Lecture, three hours. Molecular basis for pathogenic processes in tissues of the oral cavity. Topics include microbially mediated demineralization of hard tissues, soft tissue infections, carcinogenesis, colonization of mucosal substrates by opportunists, etc. S/U or letter grading.

M203. Oral Embryology and Histology. (4) (Same as Neurobiology M229.) Lectures and laboratory instruction in development and histological structure of facial region and oral and peri-oral organs and tissues.

M204. Mechanisms and Relief of Pain. (2) (Formerly numbered 204.) (Same as Neuroscience M233.) Advanced treatment of neuroanatomical, neurophysiological, and biochemical bases of pain perception. Topics include classical pain theories, pain receptors and pathways, endogenous mechanisms of pain modulation, and pharmacological basis for treatment of pain disorders.

205. Methodology in Research Design and Data Analysis. (4) Lecture, two hours; discussion, one hour; computer laboratory, one hour. Designed for graduate oral biology students. Integration of didactic lectures in descriptive and inferential statistics and in research design (emphasis on experimental design), presentations of statistical software, and open discussion of specific needs of oral biology students when they design their Ph.D. research.

206. Current Topics in Oral Immunology. (1) Preparation: basic immunology. Discussion and analysis of current research dealing with immunological issues related to oral health, including HIV, opportunistic oral infections, periodontal pathology, oral immunopathology, caries immunology, endodontic immunology, etc.

209. Scientific Ethics. (2) Lecture, one hour; laboratory, one hour. Required course in scientific ethics for graduate students in Oral Biology M.S. and Ph.D. programs and for NRSA trainees in School of Dentistry. Letter grading.

211. Biology of the Temporomandibular Joint. (2) Anatomy, histology, physiology, and biomechanics of the temporomandibular joint (TMJ) and related musculature. Pain mechanisms, sensorimotor integration, and motor mechanisms in TMJ function, and current methods of TMJ imaging.

215. Fundamentals of Immunology. (2) Basic cellular and molecular mechanisms involved in responses mediated by immune effectors, with emphasis on immunopathology involved in autoimmunity, cancer, and immunodeficiency syndromes.

226A-226B. Craniofacial Growth and Development. (2-2) Preparation: strong background in histology and embryology. Students acquire, from scientific literature discussed in lecture/seminar format, advanced knowledge of relevant aspects of human biology as they apply to classic and current concepts of principles governing growth and development of craniofacial region. Students required to present seminars on assigned topics which aid their understanding and analysis of course content that has application to their specific and professional fields. In Progress grading.

227. Dental Embryology and Histology. (2) Description and interpretation of important stages in development of the orofacial apparatus and histological features of its component tissues. Critique of scientific literature relevant to course content and analysis of current state of knowledge about selected features of the orofacial apparatus which are of significance to clinical dental specialists.

228. Dental Pharmacology and Therapeutics. (2) Lecture, three hours. Survey of pharmacology, with particular emphasis on how drugs interact with dentistry. General principles of drug action and drug effects on autonomic and central nervous systems.

M234. Seminar: Developmental Neuroendocrine-immunology. (2) (Same as Neurobiology M234.) Designed for graduate students. Psychological and physiological processes intertwine, and one important aspect of psychoneuroimmunological research is characterization of mechanisms that underlie these interactions. Examination of current literature on neuroimmune interaction from a developmental perspective. S/U or letter grading.

260. Oral Biology Seminar. (2) Seminar, one hour; outside research, one hour. Research seminar to discuss faculty and student research of oral biology and related disciplines. Discussion of basic sciences related to oral biology, involving participants in important areas of investigation. S/U grading.

273. Research in Clinical Immunology and Lymphology. (2) Lecture, one hour; discussion, one hour. Forum for discussion of cutting-edge topics in immunology and lymphology from clinical perspective. Emphasis on immune surveillance and lymphatic drainage of oral pathologies associated with AIDS and other diseases.

275. Molecular and Cell Biology for Oral Biology Graduate Students. (3) Lecture, two hours; literature review, one hour. Advanced course on prokaryotic and eukaryotic molecular and cell biology, with emphasis on applications in dental research.

M293. Major Concepts in Oncology. (4) (Same as Microbiology and Immunology M293 and Pathology M293.) Lecture, three hours. Designed for graduate students contemplating research in oncology. Topics include cancer pathophysiology, genetics, membranes, macromolecular synthesis and control, cell cycle, growth control; physical, chemical, and viral oncogenesis, epidemiology of cancer; tumor immunology; principles of cancer surgery, radiation therapy, and chemotherapy. S/U or letter grading.

596. Directed Individual Study or Research. (2 to 8) S/U grading.

597. Preparation for Ph.D. Qualifying Examinations. (4 to 8) S/U grading.

598. Thesis Research and Preparation. (2 to 8) S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (4 to 8) S/U grading.

Scope and Objectives

Organismic biology touches every aspect of modern life, and understanding how living organisms are adapted to their environments is the major challenge of the discipline. To meet this challenge, the Department of Organismic Biology, Ecology, and Evolution offers undergraduate and graduate instruction at all levels of biology — from regulatory and physiological processes within organisms through the natural ecology and behavior of living organisms and to the population and community dynam-

ics of multiple species. All of these subject areas address practical problems facing the world today, and all influence human decisions on matters ranging from conservation of the environment to advancement of medical science.

The Bachelor of Science degrees combine essential background studies in mathematics, chemistry, and physics with a general introduction to all of the biological subjects, as well as advanced in-depth exposure to some of them. The Master of Arts and Ph.D. degrees provide opportunities for advanced, concentrated study. The Master of Arts degree requires, in addition to specified coursework, completion of either a comprehensive examination or the performance of original research culminating in a thesis. The Ph.D. degree requires independent and innovative research that ultimately results in a dissertation.

Undergraduate Study

Students may earn a Bachelor of Science degree in one of four different majors within the department: Biology (general biology); Ecology, Behavior, and Evolution; Marine Biology; and Plant Biology. The majors build on similar lower division introductory courses and differ primarily in the upper division requirements. The Biology major is designed for students who desire exposure to a wide range of biological subjects and for students who later seek admission to health sciences-related professional schools. The remaining three majors — Ecology, Behavior, and Evolution, Marine Biology, and Plant Biology — provide more specialized instruction and strong preparation for employment or subsequent graduate study in the respective disciplines.

Biology B.S.

The Biology major is designed for students with a broad interest in biology who desire to pursue careers in a wide range of biological and related fields. It provides excellent background preparation for postgraduate training in medicine and other health sciences, in tracks leading to academic and public service careers in biology, in biological industries, and even in nonbiological careers such as business, agriculture, and law. Emphasis is on breadth of training to expose students to all levels of modern biology.

Preparation for the Major

Life Sciences Core Curriculum

Required: Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B/14BL, 14C/14CL, and 14O, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in

separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer Students

To be admitted as Biology majors, transfer students with 80 or more units must complete the following courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

The Major

Required: Two morphology and systematics/ecology, behavior, and evolution courses (Microbiology and Molecular Genetics 101/101L, Organismic Biology, Ecology, and Evolution 103, 105, 110, 116, 120, 122, C126, 129, 130, C135, 136); two developmental and molecular biology/physiology courses (Molecular, Cell, and Developmental Biology 138, C141, 144, 171, Organismic Biology, Ecology, and Evolution 121, 128, C134A or 134B, 146, M158, 162, M166, 167, 179); two additional upper division courses in molecular, cell, and developmental biology (except Molecular, Cell, and Developmental Biology 193) or organismic biology, ecology, and evolution (except Organismic Biology, Ecology, and Evolution 192); Chemistry and Biochemistry 153A, 153L; three additional upper division courses in atmospheric sciences (one course from Atmospheric Sciences 101, 102, 104, or 130), chemistry, mathematics (except Mathematics 104, 106), microbiology, molecular, cell, and developmental biology (except Molecular, Cell, and Developmental Biology 193), organismic biology, ecology, and evolution (except Organismic Biology, Ecology, and Evolution 192, 199), physics, physiological science (except Physiological Science 193, 195A, 195B, 196), or from Biomathematics 110, Biostatistics 100B, Earth and Space Sciences 116, Geography 112, Psychology 115. Courses selected must include two laboratory courses (Organismic Biology, Ecology, and Evolution 101A, 103, 105, 110, 136, M158, 162, M166, 167, 181).

Additional Requirements

(1) A maximum of eight units of the Organismic Biology, Ecology, and Evolution 190 series or four units of Organismic Biology, Ecology, and Evolution 199 may be applied toward the major. Credit for 199 courses from other departments may not be applied.

(2) Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Biology majors must earn a C– or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major.

Ecology, Behavior, and Evolution B.S.

The Ecology, Behavior, and Evolution major is appropriate for students preparing for graduate study in ecology, behavior, and evolution or for employment in areas such as environmental biology, animal behavior, conservation, teaching, museum work, and governmental positions dealing with environmental issues of wide importance and impact. A strong field component involving study in terrestrial and marine locales such as coastal, desert, and mountain environments in California and the Southwest and in the Neotropics is required.

Preparation for the Major

Life Sciences Core Curriculum

Required: Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B/14BL, 14C/14CL, and 140, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A (31A, 31B, and 32A must be taken to satisfy the calculus requirement); Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer Students

To be admitted as Ecology, Behavior, and Evolution majors, transfer students with 80 or more units must complete the following courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

The Major

Required: One morphology and systematics course (Organismic Biology, Ecology, and Evolution 103, 105, 110, or 130); one physiology course (Organismic Biology, Ecology, and Evolution 146, 162, M166, or 167); one additional laboratory course (Organismic Biology, Ecology, and Evolution 103, 105, 110, 136, 146, 162, M166, 167, or 181); three ecology, behavior, and evolution courses (Organismic Biology, Ecology, and Evolution C119, 120, 122, 129, C135); one field quarter consisting of two to four courses from the Field Biology Quarter (FBQ), Marine Biology Quarter (MBQ), or equivalent; Chemistry and Biochemistry 153A, 153L; two or more upper division courses in chemistry, geography, geology, mathematics (except Mathematics 104, 106), microbiology, organismic biology, ecology, and evolution (except Organismic Biology, Ecology, and Evolu-

tion 192, 199I), or physics (recommended: taxon-oriented courses such as Organismic Biology, Ecology, and Evolution 107, 111, 112, 113A, 114, C115, 152; other courses in ecological, behavioral, and evolutionary processes such as Organismic Biology, Ecology, and Evolution 116, 117, 122, M127, 128, C134A, in addition to courses listed above).

Courses offered as part of the Field Biology Quarter (FBQ) are open to all qualified students, but strict priority is given to students who are Ecology, Behavior, and Evolution majors, are graduating seniors, have taken a broad range of ecology, behavior, and evolution coursework, and have maintained a high grade-point average.

Additional Requirements

(1) Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Ecology, Behavior, and Evolution majors must earn a C– or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major.

(2) As requisites for the Marine Biology Quarter, students must have a 3.0 overall grade-point average and have taken Statistics 10 or equivalent. Preference for the Marine Biology Quarter is given to Ecology, Behavior, and Evolution and Marine Biology majors. It is strongly recommended that students complete Organismic Biology, Ecology, and Evolution C109/C215 prior to applying for the Marine Biology Quarter.

Marine Biology B.S.

The Marine Biology major is designed for students who wish to specialize in the area of marine sciences. Completion of this major provides students with both an excellent background in biology and specialization in various disciplines such as oceanography, subtidal and intertidal ecology, and physiology of marine organisms. Graduates are well prepared for postgraduate opportunities in the marine sciences, many other areas of biology, and medicine. The major provides valuable field experience with concomitant individual research opportunities in marine biology.

Preparation for the Major

Life Sciences Core Curriculum

Required: Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B/14BL, 14C/14CL, and 140, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C; Earth and Space Sciences 15 or Atmospheric Sciences 6 or 6A; Statistics 10 or equivalent.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same

course, are subject to dismissal from the major.

Transfer Students

To be admitted as Marine Biology majors, transfer students with 80 or more units must complete the following courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

The Major

Required: Chemistry and Biochemistry 153A, Organismic Biology, Ecology, and Evolution C109; one laboratory course (Organismic Biology, Ecology, and Evolution 110, M158, or 181); one marine organismic biology course (Organismic Biology, Ecology, and Evolution 101A, 105, 112, or 137); one physiology course (Organismic Biology, Ecology, and Evolution 128, 162, M166, 167, or 179); one ecology, behavior, and evolution course (Organismic Biology, Ecology, and Evolution 116, C119, 120, 122, 129, C135, or 136); one field quarter consisting of four courses from the Marine Biology Quarter (MBQ) or equivalent field studies given elsewhere (for a 16-unit equivalent, see undergraduate adviser); two physical, chemical, or geological oceanography courses from Anthropology M116Q, Atmospheric Sciences 102, 103, 104, 130, Chemistry and Biochemistry 103, Earth and Space Sciences 100, 116, 119, 153, Geography 100, 101, 103, 123, 130, Mechanical and Aerospace Engineering 103 (strongly recommended), 150A.

Additional Requirements

(1) Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Marine Biology majors must earn a C– or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major.

(2) As requisites for the Marine Biology Quarter, students must have a 3.0 overall grade-point average and have taken Statistics 10 or equivalent. Preference for the Marine Biology Quarter is given to Ecology, Behavior, and Evolution and Marine Biology majors. It is strongly recommended that students complete Organismic Biology, Ecology, and Evolution C109/C215 prior to applying for the Marine Biology Quarter.

Plant Biology B.S.

The Plant Biology major prepares students for postgraduate programs and careers in plant biology, including environmental biology, ecology, agricultural sciences, plant physiology, and cellular biology. Students select key courses to obtain a sound, broad foundation in plant biology, learning state-of-the-art research techniques. They are also given opportunity to

participate in individual supervised research projects using plants as experimental organisms.

Preparation for the Major

Life Sciences Core Curriculum

Required: Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B/14BL, 14C/14CL, and 14O, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer Students

To be admitted as Plant Biology majors, transfer students with 80 or more units must complete the following courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

The Major

Required: Chemistry and Biochemistry 153A, Organismic Biology, Ecology, and Evolution 146 or 162; one laboratory course (Organismic Biology, Ecology, and Evolution 101A, 103, 105, 110, M158, 162, M166, or 167); one plant morphology or anatomy course (Organismic Biology, Ecology, and Evolution 101A, 103, or 152); two molecular or cellular plant biology courses (Molecular, Cell, and Developmental Biology C141, C150, M170, Organismic Biology, Ecology, and Evolution 121); one ecology or evolution course (Organismic Biology, Ecology, and Evolution 120, 122, 128, 130, or 133); one field quarter course involving research in plant biology (Organismic Biology, Ecology, and Evolution 118, 124, 128, or 148) or a laboratory internship (Organismic Biology, Ecology, and Evolution 190 series or 199) which requires a written paper on some aspect of plant research; two additional upper division courses in chemistry, computer science, geography, microbiology, molecular, cell, and developmental biology (except Molecular, Cell, and Developmental Biology 193), or organismic biology, ecology, and evolution (except Organismic Biology, Ecology, and Evolution 192, 199I).

Additional Requirements

(1) A maximum of eight units of the Organismic Biology, Ecology, and Evolution 190 series or four units of Organismic Biology, Ecology, and Evolution 199 may be applied toward the

major. Credit for 199 courses from other departments may not be applied.

(2) Courses applied toward requirements for preparation for the major and the major must be taken for a letter grade. Plant Biology majors must earn a C– or better in each course taken as preparation for the major, and at least a 2.0 (C) overall average in all courses applied toward the major.

Field Biology

The department offers two quarter-long programs of advanced courses in field biology: the Field Biology Quarter (FBQ) and the Marine Biology Quarter (MBQ). These programs focus on the biology of organisms living in their natural environments, emphasize independent student research projects, and take place at field sites away from the UCLA campus. The course composition varies somewhat from year to year, but each program always carries 16 units of course credit. The Field Biology Quarter occurs during Spring Quarter and involves some combination of Organismic Biology, Ecology, and Evolution 103, 107, 113B, 114, C115, 118, 124, C125, C126, 131, 132, and 134B. The Marine Biology Quarter occurs during Fall Quarter and includes some combination of Organismic Biology, Ecology, and Evolution 102, C104, 106, 123, 147, 148, 163, 164, and 165. To participate, students must enroll in all courses in the respective program. Participants in both programs are selected by personal interview during Fall or Winter Quarter. Information and applications are available in the Undergraduate Advising Office.

Honors Program

An overall grade-point average of 3.4 and a 3.4 in the major are required for graduation with honors. Highest honors are awarded to majors who have a GPA of 3.6 overall and a 3.6 in the major at graduation and who have successfully completed Organismic Biology, Ecology, and Evolution 190A-190B.

Computing Specialization

Majors in Biology, Ecology, Behavior, and Evolution, Marine Biology, and Plant Biology may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, 10C, 30, and 60, and (3) completing one course from Computer Science M196B, Geography 168, Organismic Biology, Ecology, and Evolution C159, Psychology 186A, or 186B. A grade of C– or better is required in each course, with a combined grade-point average in the specialization of at least 2.0. Students must petition for admission to the program and are advised to do so after completing Program in Computing 10B (petitions should be filed in the Undergraduate Advising Office). Students graduate with a bachelor's degree in their major and a specialization in Computing.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The Department of Organismic Biology, Ecology, and Evolution offers the Master of Arts (M.A.) degree in Biology, with specialization in a wide spectrum of fields.

Admission

Applicants who plan to enter graduate school are urged to seek the advice of faculty members in their field of interest.

The department encourages applications from students in all areas of science, but expects successful applicants to have or to acquire a background comparable to the requirements for the bachelor's degree in biology at UCLA. A background in chemistry, physics, and mathematics is desirable. Deficiencies in these or other subjects should be made up at the earliest opportunity. Undergraduates who are prospective applicants should remedy their deficiencies by preparatory study at an appropriate institution. The Graduate Division or the department may initially restrict applicants with less distinguished accomplishments.

All applicants must take the General Test (verbal, quantitative, and analytical) of the Graduate Record Examination (GRE). The Subject Test in Biology is also required.

Three letters of recommendation are required. These should be from professors, supervisors, or others who may provide an evaluation of the applicant's accomplishments or potential in research, teaching, and related scholarly activities.

Applications, departmental brochures, and additional information may be obtained from the Graduate Affairs Office, Department of Organismic Biology, Ecology, and Evolution.

Students are admitted in the Fall Quarter only. Applications are reviewed by the department's admissions committee which advises prospective sponsors about the desirability of admission.

Areas of Study

Study consists of coursework and research within the department and within related programs in biochemistry, geology, microbiology, and molecular biology on campus. Opportunities are also available off campus for intensive study of marine biology at a marine science center in Fall Quarter, field biology in Spring Quarter, and tropical biology through courses

offered by the Organization for Tropical Studies.

Course Requirements

The program consists of at least nine courses completed in graduate standing, of which at least five must be graduate (200 series) courses. The remainder may be courses in the 100, 200, or 500 series. No more than two 596 courses (eight units) may be applied toward the nine courses required for the degree; only one 596 course (four units) may be applied toward the minimum five graduate courses required. Courses graded S/U may not be applied toward the minimum requirement, except that an S/U-graded course outside the major and applicable to the degree may be applied, provided that no more than one such course is taken per quarter.

Specific course requirements are established individually for students by the guidance committee.

Comprehensive Examination Plan

Students who select this plan must take a three-hour examination prepared and graded by the committee or committee chair and approved by the graduate adviser. The examination is graded pass or fail. For students who fail, recommendation for or against a second examination must be made by the graduate adviser.

Thesis Plan

A thesis reporting the results of an original investigation, written to conform to the requirements of the Graduate Division, is presented to and approved by the master's thesis committee of three faculty. Before beginning work on the thesis, approval of the subject and general plan must be obtained from the thesis committee.

Doctoral Degree

Admission

See Admission under Master's Degree above. Applicants are admitted to the program leading to the Ph.D. degree in Biology in the Fall Quarter only. Applications are reviewed by an admissions committee following a January 1 deadline. The admission committee advises prospective sponsors about the desirability of admissions.

Major Fields or Subdisciplines

See Areas of Study under Master's Degree.

Course Requirements

Students must enroll for full-time study as defined by the University. Doctoral students must complete a minimum of 20 units of graduate-level courses (200 series).

Written and Oral Qualifying Examinations

Departmental Written Qualifying Examination. Students are required to take the departmental written qualifying examination during their first year in residence.

The examination consists of two parts: Part I examines the breadth of understanding (conceptual and synthetic) of the diversity of specialized subjects within integrative biology and is coupled to two graduate courses (Organismic Biology, Ecology, and Evolution M200A, 200B). Part II is designed to test students' ability to read critically and evaluate the literature in their chosen scientific specialty.

Oral Qualifying Examination. The University Oral Qualifying Examination is conducted by the doctoral committee as prescribed by the Graduate Division. It includes students' preparation, presentation, and defense of an original written research proposal. The examination is graded pass, fail, or repeat. A failure results in dismissal. The repeat is graded pass/fail. The examination must be completed by the end of the third year following first registration.

Organismic Biology, Ecology, and Evolution

Lower Division Courses

10. Plants and Civilization. (4) Lecture, three hours; demonstration, one hour. Designed for nonmajors. Origin of crop plants; man's role in development, distribution, and modification of food, fiber, medicinal, and other plants in relation to their natural history.

11. Biomedical Research Issues in Minority Communities. (4) Limited to 30 students. Discussions and student presentations on biomedical research as it affects minority communities, with emphasis on methodology, design, consequences, and ethics of current research. Discussion leaders provide information on preparation and training for research careers. P/NP or letter grading.

12. Biodiversity and Extinction: Crisis and Conservation. (4) Lecture, three hours; discussion, one hour. Examination of ecological and evolutionary principles necessary to understand nature and importance of worldwide environmental crisis. Research by students of specific conservation issues and presentation of results to class. P/NP or letter grading.

13. Evolution of Life. (4) Lecture, three hours; discussion, one hour. Not open to life sciences majors. Limited to 100 students. Introduction to biology within the framework of evolutionary theory. Relationships of evolutionary thought to other areas of knowledge and society. Natural selection and origin of variation examined in context of genetics, molecular biology, physiology, phylogeny, population dynamics, behavior, and ecology. Emphasis on critical role of historical processes.

21. Field Biology. (4) Lecture, three hours; discussion, two hours, or field trips, three to four hours. Recommended preparation: course 2. Not open for credit to students with credit for course 122, former course 6, or Life Sciences 1. Introduction to natural history of Western North America, especially Southern California. Classification, distribution, and ecology of common plants and animals.

25. Oceans. (4) Lecture, three hours; discussion, two hours. Not open for credit to students with credit for Earth and Space Sciences 15. Physical and chemical processes that take place in oceans, with emphasis on their effects on organisms.

50. Desert Life. (4) Lecture, three hours; laboratory, two hours. Introduction to fundamental structural, physiological, and behavioral features of desert organisms, with special emphasis on deserts of Western North America. P/NP or letter grading.

Upper Division Courses

101A. Biology of Lower Plants. (6) Lecture, four hours; laboratory, six hours. Requisite: Life Sciences 1. Introduction to biology of algae, fungi, and bryophytes, with emphasis on form, function, and development, and role of lower plants in the environment. Students are strongly encouraged to take both courses 101A and 101B since these represent a course sequence surveying the entire plant world as appropriate background for upper division courses in plant biology.

101B. Biology of Vascular Plants. (6) Lecture, three hours; laboratory, six hours. Requisite: Life Sciences 1. Introduction to the diversity in form and reproduction of vascular plants, with emphasis on development, evolution, and function. Students are strongly encouraged to take both courses 101A and 101B since these represent a course sequence surveying the entire plant world as appropriate background for upper division courses in plant biology.

102. Biology of Marine Invertebrates. (4) Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Requisite: Life Sciences 1. Morphology, systematics, life histories and natural history, ecology, behavior, and physiology of marine invertebrates. Given off campus at a marine science center.

103. Plant Evolution and Systematics. (4) Lecture, three hours; laboratory, three hours. Requisites: Life Sciences 1, 2, 3, 4. Evolution, systematics, morphology, principles of taxonomy, phylogeography, phylogenetic analysis, speciation, and natural history of plants. P/NP or letter grading.

C104. Experimental Invertebrate Zoology. (6) Lecture, two hours; laboratory, 12 hours. Requisite: Life Sciences 1. Advanced treatment of physiology, behavior, and ecology of invertebrates, with emphasis on independent laboratory and field investigations. Concurrently scheduled with course C212.

105. Biology of Invertebrates. (6) Lecture, three hours; laboratory/field trips, six hours. Requisite: Life Sciences 1. Introduction to systematics, evolution, natural history, morphology, and physiology of invertebrates.

106. Experimental Marine Invertebrate Biology. (4 or 6) Lecture, two hours; laboratory, 12 hours. Requisites: courses 105, and M166 or 167 (either may be taken concurrently). Offered either as a six-unit quarter-long course or as a four-unit Marine Biology Quarter course. Advanced course of natural history, physiology, biochemistry of invertebrates, with emphasis on independent laboratory and field investigations.

107. Entomology. (6 or 8) Requisite: Life Sciences 1. Offered either as a six-unit quarter-long course or as an eight-unit Field Biology Quarter course. Six-unit course has lecture, three hours; laboratory, six hours; additional field trips. Morphology, physiology, development, systematics, behavior, and ecology of insects. Eight-unit course covers same basic lecture and laboratory material in two and one-half intensive weeks, followed by extended field trip where students do individual field projects in insect biology.

C109. Introduction to Marine Science. (4) Lecture, three hours; laboratory, three hours; weekend field trips. Requisite: Life Sciences 1. Strongly recommended for prospective MBQ students. Introduction to physical, chemical, and biological aspects of marine science. Emphasis on biological systems and natural communities. Concurrently scheduled with course C215.

110. Vertebrate Morphology. (6) Lecture, three hours; laboratory, five hours. Requisites: Life Sciences 1, 2, 3, 4. Study of vertebrate morphology, function, and evolution from viewpoint of comparative anatomy of adult forms, biomechanics, development, and paleontology. Laboratory study of selected vertebrates.

111. Biology of Vertebrates. (4) Lecture, three hours; demonstration/field trips/discussion, three hours. Requisite: Life Sciences 1. Adaptations, behavior, and ecology of vertebrates.

112. Ichthyology. (4) Lecture, two hours; laboratory, six hours; field trips. Requisite: Life Sciences 1. Highly recommended: courses 110, 111. Biology of freshwater and marine fishes, with emphasis on their evolution, systematics, morphology, zoogeography, and ecology. Field trips examine fishes of the Southern California shoreline, tidepools, and coastal streams.

113A. Herpetology. (4) Lecture, three hours; laboratory, one hour; weekend field trips. Requisite: Life Sciences 1. Vertebrate zoology course restricted to biology of reptiles and amphibians of the world, covering current systematics, ecology, behavior, morphology, and physiology of these animals.

113B. Field Herpetology. (8) Requisite: Life Sciences 1. Recommended: course 111. Two weeks of off-campus research projects followed by two-week lecture course and offered only as part of *Field Biology Quarter*. Biology, particularly ecology and behavior, of reptiles and amphibians in their natural habitat. Students carry out supervised research projects, then write up and orally present their results in seminar fashion.

114. Ornithology. (4) Lecture, two hours; laboratory/discussion/field trips, six hours. Requisite: course 111. Limited enrollment. Systematics, distribution, physiology, behavior, and ecology of birds.

C115. Mammalogy. (4) Lecture, three hours; discussion, one hour; laboratory, three hours. Requisite: course 110 or 111. Topics in mammalian biology, including evolution, ecology, behavior, functional morphology, systematics, physiology, and biogeography. Concurrently scheduled with course C213.

116. Conservation Biology. (4) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 1, 2, 3, 4. Study of ecological and evolutionary principles as they apply to preservation of genetic, species, and ecosystem diversity. Discussion sections focus on interactions of science, policy, and economics in conserving biodiversity. Oral and written student presentation on specific conservation issues.

117. Evolution of Vertebrates. (4) Lecture, three hours; laboratory, three hours. Requisite: course 110. Recommended: one general geology course. Fossil record of the evolution of vertebrates, with emphasis on paleobiology and morphology of tetrapods.

118. Plant Adaptations. (8) Lecture, one hour; field trip, 10 hours. Preparation: completion of preparation for the major courses. *Five-week course offered only as part of Field Biology Quarter*. Field-oriented introduction to mechanisms by which vascular plants adapt themselves to their abiotic and biotic environments using community, population, and ecophysiological levels of integration.

C119. Mathematical Ecology. (4) Lecture, three hours. Requisites: Mathematics 31A, 31B, 32A. Differential equation models of population growth explore theory of evolutionary ecology to determine why natural environments of the world support the kinds of living organisms they do and why organisms of the world possess the adaptations they do. Concurrently scheduled with course C219.

120. Evolution. (4) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 1, Mathematics 3A and 3B, or 31A. Recommended: Life Sciences 4. Designed for departmental majors specializing in environmental and population biology. Introduction to mechanics and processes of evolution, with emphasis on natural selection, population genetics, speciation, evolutionary rates, and patterns of adaptation. P/ NP or letter grading.

121. Molecular Biology and Evolution. (4) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 3, 4. Not open to students with credit for former course 100A or Molecular, Cell, and Developmental Biology 144. Molecular biology, with emphasis on evolutionary aspects. DNA replication, RNA transcription, protein synthesis, gene expression, and molecular evolution.

122. Ecology. (4) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 1, Mathematics 3A and 3B, or 31A. Highly recommended: Mathematics 31B, 32A. Designed for departmental majors specializing in environmental and population biology. Introduction to population and community ecology, with emphasis on growth and distributions of populations, interactions between species, and structure, dynamics, and functions of communities and ecosystems. P/ NP or letter grading.

123. Marine Ecology. (4 or 8) Lecture, five hours; laboratory, 15 hours. Recommended requisite: course 122. *Offered either as an eight-unit quarter-long course or as a four-unit five-week intensive course given off campus as part of Marine Biology Quarter*. Survey of current topics in marine ecology, including analysis of primary research literature combined with field study of ecology of marine organisms, populations, communities, and ecosystems. Original research project required.

124. Field Ecology. (4 or 8) Lecture, two hours; laboratory or field trip, 10 hours. Requisite: Life Sciences 1. Recommended: courses 111, 120, 122. *Offered either as a four-unit quarter-long course with weekend field trips or as a single field trip conducted between quarters, followed by lectures and tutorials for three weeks. When course is given as part of Field Biology Quarter, it is eight units and lasts for five weeks*. Field and laboratory research in ecology; collection, analysis, and write-up of numerical data, with emphasis on design and execution of field studies.

C125. Tropical Animal Communication. (4 or 8) Requisite: Life Sciences 1. *Offered either as a four-unit quarter-long course or as an eight-unit Field Biology Quarter course*. Four-unit course has lecture, three hours; discussion, two hours. Animal communication behavior, tropical vertebrate biology, and evolution of information processing systems. Eight-unit course covers same basic lecture material in five or six intensive weeks, followed by extended field trips where students do individual projects in animal communication. Concurrently scheduled with course C225.

C126. Behavioral Ecology. (4 or 8) Requisites: course 120 or 122 or 129, Life Sciences 1, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A. *Offered either as a four-unit quarter-long course or as an eight-unit Field Biology Quarter course*. Four-unit course has lecture, three hours; discussion, three hours. Animal communication behavior, island biogeography, and evolution of social behavior. Eight-unit course covers same basic lecture material in five intensive weeks, followed by extended field trip where students do individual projects in behavioral ecology. Concurrently scheduled with course C227.

M127. Soils and Environment. (5) (Same as Environment M127 and Geography M127.) Lecture, five hours; discussion, one hour; field trips. Requisites: Chemistry 14A and 14B/14BL, or 20A, 20B, 20L, and 30L. General treatment of soils and environmental implications: soil development, morphology, and worldwide distribution of soil orders; physical, chemical, hydrologic, and biological properties; water use, erosion, and pollution; management of soils as related to plant growth and distribution. Letter grading.

128. Plant Physiological Ecology. (4) Lecture, three hours; laboratory, three hours; one two-day field trip. Requisites: Life Sciences 1, Physics 1C or 6C. Study of plant/environment interactions under natural conditions. Transpiration and photosynthesis, leaf temperatures, and water movement in soil/plant/atmosphere continuum. Letter grading.

129. Animal Behavior. (4) Lecture, three hours; discussion, two hours. Requisites: Life Sciences 1, 4. Introduction to behavioral ecology. Methods and results of evolutionary approaches to study of animal behavior, including foraging strategies, social competition, sexual selection, mating systems, cooperation, and social organization.

130. Principles of Systematic Biology. (4) Lecture, three hours; discussion, two hours. Requisite: Life Sciences 1. Recommended: courses 120, C135. Concepts, principles, and methods of comparative biology as they apply to the inference of evolutionary relationships among organisms. Principles and application of biological nomenclature.

131. Insect Ecology. (4 or 8) Lecture, two hours; laboratory or field trip, eight hours. Requisite: Life Sciences 1. Recommended: courses 120, 122. *Offered either as a four-unit quarter-long course with weekend field trips or as an eight-unit Field Biology Quarter course with amount of fieldwork increased accordingly*. Analysis of ecological roles of insects in terrestrial communities, with emphasis on interactions with both plants and vertebrates. Group and individual field projects.

132. Field Behavioral Ecology. (8) Lecture, two hours; laboratory/field trip, 10 hours. Requisite: Life Sciences 1. Recommended: course 129. *Five-week course offered only as part of Field Biology Quarter*. Field research in behavioral ecology, emphasizing animal communication. Design and execution of individual and small group field projects during extended field trip.

133. Vegetation and Ecosystem Dynamics. (4) Lecture, three hours. Requisite: Life Sciences 1. Introduction to form and functional relationships of major world vegetation types in relation to their physical environments.

C134A. Physiological Ecology of Desert Animals. (4) Lecture, three hours; laboratory, one hour; field trips, four hours. Requisite: Life Sciences 1. Consideration of physiological, behavioral, morphological, and ecological mechanisms desert animals use to enhance their survival in an arid habitat. Concurrently scheduled with course C214.

134B. Field Physiological Ecology of Desert Animals. (8) Requisite: Life Sciences 1. Two weeks of off-campus research projects with two-week lecture course (four hours per day) and offered only as part of *Field Biology Quarter*. Consideration of physiological, behavioral, morphological, and ecological mechanisms desert animals use to enhance their survival in an arid habitat. Students carry out supervised research projects, then write up and orally present their results in seminar fashion.

C135. Population Genetics. (4) (Formerly numbered 135.) Lecture, three hours; discussion, one hour. Requisite: Life Sciences 4. Highly recommended: Mathematics 31A, 31B. Basic principles of genetics of population, dealing with genetic structure of natural populations and mechanisms of evolution. Equilibrium conditions and forces altering gene frequencies, polygenic inheritance, molecular evolution, and methods of quantitative genetics. Concurrently scheduled with course C235. Letter grading.

136. Ecology, Behavior, and Evolution Laboratory. (4) Lecture, two hours; laboratory, four hours; field trips. Requisites: course 120 or 122 or 129 (may be taken concurrently), Life Sciences 1, 4, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A. Strongly recommended: course 122. Designed for Ecology, Behavior, and Evolution majors. Laboratory and field exercises on population genetics, growth, and regulation; competition and predation; behavioral interactions; species' diversity and distribution. Methodological aspects from theoretical models and computer simulations to laboratory and garden experiments to fieldwork. Mandatory field trips, including two weekend trips.

137. Chemical Communication. (4) Lecture, three hours; discussion, one hour. Requisites: Chemistry 14A, 14B/14BL, 14C/14CL, and 140, or 20A, 20B, 20L, 30, 30L, and 130A/130AL, Life Sciences 1, 2, 3. Chemical signals are most important means by which organisms communicate. Exploration of how chemical signals are produced, transported, and influence behavior of microbes, plants, and animals. Synthetic approach, with emphasis on applications to cell biology, physiology, and ecology. P/ NP or letter grading.

CM145. Advanced Paleontology. (4) (Same as Earth and Space Sciences CM118.) Lecture, three hours. Requisite: course 110 or 117 or Earth and Space Sciences 116. Consideration of major factors that have influenced history of life, including analytical approaches to analyzing patterns in fossil record, nature of rock record, and contribution of data from stable isotopes, functional morphology, phylogenetics, and developmental biology. Concurrently scheduled with course CM245. P/NP or letter grading.

146. Physicochemical Biology. (4) Lecture, three hours; discussion, one hour. Requisites: Life Sciences 1, 2, 3, Physics 1C or 6C. Physicochemical analysis of physiology of cells and organelles, with emphasis on membranes, thermodynamics of solute and water movement, light absorption, and subcellular energy transduction. Letter grading.

147. Biological Oceanography (4) Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Requisites: Chemistry 14A and 14B/14BL, or 20A, 20B, 20L, and 30L, Life Sciences 1, 3. Lectures include physical, chemical, and biological factors affecting abundance and distribution of organisms in marine environment. Laboratory includes experimental studies of local marine organisms, with emphasis on primary and secondary production and nutrient flux.

148. Biology of Marine Plants. (4) Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Requisites: Chemistry 14A and 14B/14BL, or 20A, 20B, 20L, and 30L, Life Sciences 1, 3. Introduction to general biology of marine algae, including basics of structure reproduction, life histories, systematics, and introduction to physiology and ecology of marine algae. Techniques in culture and laboratory investigation and utilization of algae. Given off campus at a marine science center.

C151A. Tropical Ecology. (4) Requisite: Life Sciences 1. Broad introduction to biodiversity, community structure, and dynamics and ecosystem function of a range of tropical forest habitats. Discussion of such themes as biogeography, forest structure, plant growth forms, animal communities, herbivory, forest dynamics, and disturbance regimes. Concurrently scheduled with course C221A. P/NP or letter grading.

C151B. Field Tropical Ecology. (8) Requisite: Life Sciences 1. Two weeks of off-campus research projects followed by two-week lecture course and offered only as part of *Field Biology Quarter*. Introduction to biodiversity, community structure, and dynamics and ecosystem function in a tropical forest habitat. Concurrently scheduled with course C221B.

152. Functional Plant Anatomy. (4) Lecture, three hours; laboratory, six hours. Requisites: Life Sciences 1, 2, 3, 4. Structure and functional significance of various cell and tissue types in higher plants, plus patterns of growth and differentiation in roots, stems, leaves, flowers, and fruits.

M158. Cell Biology. (6) (Same as Physiological Science M158.) Lecture, three hours; laboratory, six hours. Requisites: Chemistry 14A and 14B/14BL, or 20A, 20B, 20L, and 30L, Life Sciences 1, 3, 4. Cell biology of eukaryotic cells, with emphasis on correlation of structure and function at molecular, organellar, and cellular levels. Letter grading.

C159. Computational Biology. (4) Lecture, three hours; laboratory, one hour. Requisites: Life Sciences 1, 4. Introduction to computational biology. Topics include statistical and mathematical analysis, computer simulation, use of Internet for remote databases, and connections to supercomputers, with emphasis on biological applications and individual or group projects. Concurrently scheduled with course C275.

162. Plant Physiology. (6) Lecture, four hours; laboratory, four hours. Requisites: Life Sciences 1, 2, 3. Basic aspects of plant function, including photochemical, biochemical, and physiological aspects of photosynthesis. Carbon and nitrogen metabolism and its regulation; organellar interactions and compartmentation. Water relations, ion transport, flowering, hormone action, and plant responses to stress. Letter grading.

163. Biology of Marine Tetrapods. (4) Five-week intensive course. Lecture, five hours; laboratory and fieldwork, 15 hours. Requisites: Chemistry 14A and 14B/14BL, or 20A, 20B, 20L, and 30L, Life Sciences 1, 3. Highly recommended: course 111. Survey of "higher" vertebrates living in marine habitats, including estuarine amphibians, marine reptiles, seabirds, and marine mammals. Laboratory emphasizes observational and experimental approaches to study of morphology, systematics, ecology, and behavior of local marine birds and mammals. Given off campus at a marine science center.

164. Field Biology of Marine Fishes. (4) Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Requisite: Life Sciences 1. Recommended: Mathematics 3A, 3B, 3C. Selected aspects of natural history, ecology, and behavior of the diverse assemblage of local marine fishes. Fieldwork strongly emphasized. Given off campus at a marine science center.

165. Ecological Physiology of Marine Vertebrates. (4) Five-week intensive course. Lecture, five hours; laboratory, 15 hours. Requisites: Chemistry 14A and 14B/14BL, or 20A, 20B, 20L, and 30L, Life Sciences 1, 3. Recommended: Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A, Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C. Introduction to physiological adaptations of marine vertebrates to major physicochemical variables in the oceans of the world and to major marine habitats. Given off campus at a marine science center. Letter grading.

M166. Animal Physiology. (6) (Same as Physiological Science M166.) Lecture, three hours; laboratory, five hours. Requisites: Chemistry 14A and 14B/14BL, or 20A, 20B, 20L, and 30L, 153A, Life Sciences 1, 2, 3, Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C. Not open for credit to students with credit for course 167 or Molecular, Cell, and Developmental Biology M170 or to physiological science majors. Introduction to physiological principles, with emphasis on organ systems and intact organisms. Letter grading.

167. Regulatory Physiology. (6) Lecture, three hours; laboratory, five hours. Requisites: Chemistry 14A and 14B/14BL, or 20A, 20B, 20L, and 30L, Life Sciences 1, 2, 3, Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C. Not open for credit to students with credit for course M166 or Molecular, Cell, and Developmental Biology M170 or to physiological science majors. Introduction to whole animal and organ physiology. Primary considerations to neuronal and endocrine regulations of body functions and integration of organ systems. Letter grading.

M173. Anatomy and Physiology of Sense Organs. (4) (Same as Physiological Science M173.) Lecture, three hours; discussion, one hour. Requisites: Molecular, Cell, and Developmental Biology 171 (or Physiological Science 111A) or M175A-M175B (or Physiological Science M180A-M180B). Structure and function of sense organs. Adoption of quantitative and comparative approach to provide insight into evolution of sense organs in both invertebrates and vertebrates. Letter grading.

179. Invertebrate Endocrinology. (4) Lecture, three hours. Comprehensive treatment of invertebrate endocrinology. Letter grading.

181. Parasitology. (6) Lecture, three hours; laboratory, six hours. Requisites: Life Sciences 1, 3. Introduction to principles, biology, and evolution of infectiousness, symbiosis, and parasitism, emphasizing protozoan and helminth parasites, including those of man. Letter grading.

182. Field Community and Population Ecology. (4) Lecture, five hours; field study, seven hours. Corequisites: courses 183, 184, 199. Introduction to experimental field research, with emphasis on investigating communities and populations of native plants and animals to reveal their structures, their relationships to individual members, and environmental factors in their success and limitation. Given off campus as part of UC Environmental Biology Supercourse.

183. Applied Conservation Biology. (4) Lecture, five hours; field study, seven hours. Corequisites: courses 182, 184, 199. Introduction to complexities and realities of natural resource exploitation and preservation, with emphasis on trade-offs between economic benefits and ecosystem stability and sustainability. Given off campus as part of UC Environmental Biology Supercourse.

184. Physiological Ecology. (4) Lecture, five hours; field study, seven hours. Corequisites: courses 182, 183, 199. Examination of functional means by which animals and plants cope with their environments, and physiological limits determining boundary conditions of ecological niches. Emphasis on unifying principles describing regulatory features of animals and plants, and responses of species in extreme environments. Given off campus as part of UC Environmental Biology Supercourse.

188. Seminar: Biology and Society. (2) Investigations and discussions of current socially important issues involving substantial biological considerations, either or both as background for policy and as consequences of policy. May be repeated once for credit.

CM189A-CM189B. Theoretical Behavioral Ecology. (4-4) (Same as Anthropology CM189A-CM189B.) Lecture, three hours. Preparation: one upper division introduction to behavioral ecology course, one university-level mathematics course (preferably calculus or probability and statistics). Course CM189A is requisite to CM189B. Students expected to do simple algebra, elementary calculus, and probability. A rich body of mathematical theory describing the evolution of animal behavior exists. Introduction to this body of theory at a pace and mathematical level that allows students to grasp this information. Within each area of theory (e.g., kin selection, optimal foraging theory, etc.), presentation of basic corpus of models so that students understand assumptions that underlie the models, and how main results are derived. Presentations supplemented by a survey of results printed in the literature, especially those derived using more advanced methods. Concurrently scheduled with courses CM295A-CM295B.

190A-190D. Honors Research in Organismic Biology, Ecology, and Evolution. (2 to 4 each) Individual research designed to broaden and deepen students' knowledge of some phase of biology. Must be taken with Organismic Biology, Ecology, and Evolution Department faculty for at least two terms and for a total of at least eight units. In Progress grading (credit to be given only on completion of course 190B). Students may elect to enroll in additional research through courses 190C-190D (letter grading). A report on progress must be presented to undergraduate adviser each term a 190 course is taken. Eight units may be applied toward departmental majors.

192. Teaching Practicum in Organismic Biology, Ecology, and Evolution. (1 to 4) Limited to junior/senior departmental majors. Training and supervised practicum for advanced undergraduates in teaching biology. Students serve as junior teaching assistants and assist in preparation of materials and development of innovative programs. Consult Undergraduate Office for further information. May not be applied toward course requirements for departmental majors. P/NP or letter grading.

199. Special Studies. (2 to 16) Preparation: submission of written proposal outlining the study or research to be undertaken. Studies to involve laboratory or field-related research, not literature surveys or library research. Proposal should be worked out in consultation with instructor and submitted for approval to undergraduate adviser before the day instruction begins in that term. At end of term a report describing progress of the study or research and signed by the student and instructor must be presented to undergraduate adviser. Students who wish to take more than eight units of course 199 in any one term must obtain authorization from department chair and appropriate dean. Only one 199 course may be applied toward departmental majors.

199I. Independent Studies in Application of Biology. (2 to 4) Discussion, one hour; fieldwork, five to 12 hours. Independent studies course to be supervised by Field Studies Office, fieldwork site, and faculty adviser. Consult Undergraduate Office for more information. May not be applied toward requirements for departmental majors. May be repeated for a maximum of eight units. Each repetition must have its own analytical focus or show progression of research. P/NP grading.

Graduate Courses

M200A. Evolutionary Biology. (4) (Same as Earth and Space Sciences M216.) Lecture, two hours; discussion, two hours. Current concepts and topics in evolutionary biology, including microevolution, speciation and species concepts, analytical biogeography, adaptive radiation, mass extinction, community evolution, molecular evolution, and development of evolutionary thought. S/U or letter grading.

200B. Ecology, Behavior, and Functional Ecology. (4) (Formerly numbered Biology 200B, 200C.) Lecture, two hours; discussion, two hours. Principles and current topics in ecology, behavioral biology, and plant and animal physiology. Topics may include island biogeography, habitat selection, community structure, disturbance ecology, life history evolution, social behavior, sexual selection, foraging theory, energetics, photosynthesis, water relations, chemical ecology, endocrinology, physiological ecology, and adaptation-al biology. S/U or letter grading.

203. Marine Botany and Physiology. (4) Lecture, two hours; discussion, one hour; laboratory, six hours; experimental project. Designed for graduate students. Structure, reproduction, life histories, and biology of marine algae, with emphasis on physiological ecology and biochemistry. Techniques in culture and physiological, ecological, and biochemical investigation of algae. Given off campus at a marine science center.

204. Advanced Biology of Algae. (4) Lecture, four hours; discussion, one hour. Consideration of current research in experimental phycology. Topics include discussion of appropriate aspects of chemical and physical oceanography and limnology; algal physiology; biochemistry, physiological ecology, and algal processes in ocean and freshwater habitats.

205. Marine Invertebrate Biology. (4) Lecture, four hours; laboratory, eight hours. Functional morphology, life histories, and systematics of marine invertebrates of all major and most minor taxa; emphasis on the living animal and its habitat. Given off campus at a marine science center.

206. Advanced Ichthyology. (4) Lecture, three hours; laboratory, three hours. Requisite: course 111 or 112. Advanced study of various aspects of fish biology. Theme varies from year to year. May be repeated for credit.

208. Advanced Vertebrate Morphology. (4) Lecture, two hours; laboratory, eight hours. Requisite: course 110. Emphasis on a functional approach to evolution of vertebrate locomotor, feeding, and circulatory systems. Laboratory includes comparative and experimental analyses of morphological adaptation. Independent project required. May be repeated once for credit.

209. Behavior of Arthropods. (4) Lecture, three hours; discussion, one hour. Requisite: course 105 or 107. Advanced study of topics in behavior of terrestrial arthropods, including communication, feeding, reproductive, and social behavior. Emphasis on both mechanistic and adaptive approaches toward understanding behavior. Independent project required.

210. Advanced Ornithology. (4) Lecture, two hours; laboratory, two hours; fieldwork, two hours. Requisite: course 114. Advanced study of topics in modern avian biology. Emphasis on experimental approaches to investigations of physiology (energetics, nutrition, osmoregulation), ecology (population and community organization), and behavior (foraging, breeding, sociality).

C212. Experimental Invertebrate Zoology. (6) Lecture, two hours; laboratory, 12 hours. Requisite: Life Sciences 1. Advanced treatment of physiology, behavior, and ecology of invertebrates, with emphasis on independent laboratory and field investigations. Concurrently scheduled with course C104.

C213. Mammalogy. (4) Lecture, three hours; discussion, one hour; laboratory, three hours. Requisite: course 110 or 111. Topics in mammalian biology, including evolution, ecology, behavior, functional morphology, systematics, physiology, and biogeography. Concurrently scheduled with course C115.

C214. Physiological Ecology of Desert Animals. (4) Lecture, three hours; laboratory, one hour; field trips, four hours. Requisite: Life Sciences 1. Consideration of physiological, behavioral, morphological, and ecological mechanisms desert animals use to enhance their survival in an arid habitat. Concurrently scheduled with course C134A.

C215. Introduction to Marine Science. (4) Lecture, three hours; laboratory, three hours; weekend field trips. Requisite: Life Sciences 1. Strongly recommended for prospective MBQ students. Introduction to physical, chemical, and biological aspects of marine science. Emphasis on biological systems and natural communities. Concurrently scheduled with course C109.

216. Quantitative Methods in Behavior and Ecology. (4) Lecture, two hours; laboratory, six hours. Requisite: course 122 or 129. Quantitative methods of data collection and analysis in behavioral and ecological research. Lectures review general nature of quantitative problems that arise in behavior and ecology and statistical methods used to solve them. Laboratory exercises emphasize analysis, using comprehensive statistical software routines on personal microcomputers, of the kinds of data that frequently arise in field biological research.

217. Marine Ecology. (4) Lecture, four hours; discussion, one hour. Designed for graduate students. Structure, diversity, and energetics of marine communities; behavior, population dynamics, and biogeography of component species; associated oceanography and geology. Given off campus at a marine science center.

218. Oceanology. (4) Lecture, four hours; discussion, one hour. Designed for graduate students. Ecology and dynamics of pelagic and benthic associations; physicochemical properties of seawater and marine substrates and their biological significance; qualitative and quantitative methods of oceanology. Given off campus at a marine science center.

C219. Mathematical Ecology. (4) Lecture, three hours. Requisites: Mathematics 31A, 31B, 32A. Differential equation models of population growth explore theory of evolutionary ecology to determine why natural environments of the world support the kinds of living organisms they do and why organisms of the world possess the adaptations they do. Concurrently scheduled with course C119.

C221A. Tropical Ecology. (4) Requisite: Life Sciences 1. Broad introduction to biodiversity, community structure, and dynamics and ecosystem function of a range of tropical forest habitats. Discussion of such themes as biogeography, forest structure, plant growth forms, animal communities, herbivory, forest dynamics, and disturbance regimes. Concurrently scheduled with course C151A. S/U or letter grading.

C221B. Field Tropical Ecology. (8) Requisite: Life Sciences 1. Two weeks of off-campus research projects followed by two-week lecture course and offered only as part of *Field Biology Quarter*. Introduction to biodiversity, community structure, and dynamics and ecosystem function in a tropical forest habitat. Concurrently scheduled with course C151B.

224. Marine Molecular Biology. (8) Lecture, three hours; laboratory, eight hours. Preparation: background in marine sciences, basic cell biology and biochemistry. Ten-week intensive course designed to train marine biologists in advanced techniques of cell and molecular biology. Independent project required. Given off campus at a marine science center.

C225. Tropical Animal Communication. (4 or 8) Requisite: Life Sciences 1. Offered either as a four-unit quarter-long course or as an eight-unit Field Biology Quarter course. Four-unit course has lecture, three hours; discussion, two hours. Animal communication behavior, tropical vertebrate biology, and evolution of information processing systems. Eight-unit course covers same basic lecture material in five or six intensive weeks, followed by extended field trips where students do individual projects in animal communication. Concurrently scheduled with course C125. S/U or letter grading.

C227. Behavioral Ecology. (4 or 8) Requisites: course 120 or 122 or 129, Life Sciences 1, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A. Offered either as a four-unit quarter-long course or as an eight-unit Field Biology Quarter course. Four-unit course has lecture, three hours; discussion, three hours. Animal communication behavior, island biogeography, and evolution of social behavior. Eight-unit course covers same basic lecture material in five intensive weeks, followed by extended field trip where students do individual projects in behavioral ecology. Concurrently scheduled with course C126. S/U or letter grading.

M231. Molecular Evolution. (4) (Same as Earth and Space Sciences M217.) Lecture, two hours; discussion, two hours. Series of advanced topics in molecular evolution, with special emphasis on molecular phylogenetics. Topics may include nature of the genome, neutral evolution, molecular clocks, concerted evolution, molecular systematics, statistical tests, and phylogenetic algorithms. Themes may vary from year to year. May be repeated for credit. S/U or letter grading.

232. Advanced Ecology. (4) Lecture, three hours; discussion, one hour; field trip, three hours. Requisite: course 122. Concepts and topics in ecology, evolutionary or behavioral ecology, or theoretical ecology. Topics vary from year to year and may include island biogeography, tropical biology, biodiversity, modeling in ecology, habitat selection, community structure and organization, and ecology and evolution of reproductive rates. May be repeated for credit. S/U or letter grading.

C235. Population Genetics. (4) Lecture, three hours; discussion, one hour. Requisite: Life Sciences 4. Highly recommended: Mathematics 31A, 31B. Basic principles of genetics of population, dealing with genetic structure of natural populations and mechanisms of evolution. Equilibrium conditions and forces altering gene frequencies, polygenic inheritance, molecular evolution, and methods of quantitative genetics. Concurrently scheduled with course C135. Letter grading.

236. Seminar: Marine Molecular Biology. (4) Discussion, 10 hours. Requisite: course 224. Seminar on current issues and work in marine molecular biology. Given off campus at a marine science center.

240. Physiology of Marine Animals. (4) Lecture, four hours; discussion, one hour. Designed for graduate students. Lecture and laboratory studies on cellular, tissue, organ, and animal physiology; regulatory biology; metabolic characteristics of cells, energy transformations. Given off campus at a marine science center.

243. Animal Communication. (4) Lecture, three hours; discussion, one hour. Requisites: Mathematics 3C, Physics 6C. Open to qualified undergraduates with consent of instructor. Physical properties of animal signals and physiological mechanisms underlying their generation and reception. Lectures treat signal analysis, signal transmission, and receptor design in light of constraints placed on each of the sensory modalities. Examples of communication systems using visual, auditory, chemical, electrical, and magnetic cues, with emphasis on biological adaptations for efficiently signaling species-specific information.

244. Advanced Insect Physiology. (4) Lecture, two hours; laboratory, five hours. Requisite: course 168. Detailed discussion of current problems in insect physiology, with advanced laboratory.

CM245. Advanced Paleontology. (4) (Same as Earth and Space Sciences CM218.) Lecture, three hours. Requisite: course 110 or 117 or Earth and Space Sciences 116. Consideration of major factors that have influenced history of life, including analytical approaches to analyzing patterns in fossil record, nature of rock record, and contribution of data from stable isotopes, functional morphology, phylogenetics, and developmental biology. Concurrently scheduled with course CM145. S/U or letter grading.

247. Advanced Plant Biology. (4) Lecture, three hours; discussion, two hours. Requisite: course 162 or Molecular, Cell, and Developmental Biology C141. Open to undergraduates with consent of instructor. Designed to expose first-year graduate students to topics of current interest in plant biology. Subjects include plant genetics, growth and development, organelle structure, development and function, and plant-specific metabolic processes (photosynthesis, nitrogen fixation, metabolism of small molecules). S/U or letter grading.

251. Seminar: Systematics. (2) Discussion, two to four hours. Current topics in systematic biology, including methods development and specific applications in study of phylogeny. Theme varies from year to year. May be repeated for credit.

253. Seminar: Plant Structure. (2) Seminar, two hours. S/U or letter grading.

255. Seminar: Invertebrate Zoology. (2) Seminar, two hours. S/U or letter grading.

259. Seminar: Herpetology. (2) Discussion, three hours. Seminar on current approaches to herpetology. Main theme varies from year to year in areas such as biogeography, ecology, behavior, environmental physiology.

260. Seminar: Biology of Terrestrial Vertebrates. (2) Seminar, two hours. S/U or letter grading.

263. Seminar: Population Genetics. (2 or 4) Discussion, three to six hours. Seminar on topics of current interest in population genetics, such as kin selection, sociobiology, cultural evolution, conservation genetics, etc.

264. Seminar: Stomatal Function. (4) Seminar, two hours; discussion, two hours. Open to undergraduates with consent of instructor. Structure and function of guard cells; gas exchange; environmental and hormonal regulation of stomatal responses; sensory transduction; stomatal adaptations.

265. Seminar: Biophysical Plant Ecology. (2) Seminar, two hours. S/U or letter grading.

267. Seminar: Current Topics in Evolutionary Ecology. (2) Seminar, two hours. S/U or letter grading.

268. Seminar: Population Biology. (2) Seminar, two hours. S/U or letter grading.

269. Seminar: Animal Ecology. (2) Discussion, three hours. Advanced study of specific topics in animal ecology and related fields.

270. Seminar: Environmental Physiology. (2) S/U grading.

271. Seminar: Phycology and Mycology. (2) Requisite: course 101A. Advanced study in biology of algae and fungi. Topics in physiological ecology, physiology, and biochemistry of algae and fungi, and their industrial uses. Algae and fungi as experimental organisms. Phylogeny and origin of eukaryote organisms. Evolutionary origin of chloroplasts.

272. Seminar: Marine Biology. (2) Seminar, two hours. S/U or letter grading.

273. Seminar: Entomology. (2) Discussion of specific topics in entomology and related fields. Main theme varies from year to year, but usually emphasizes areas such as behavior, ecology, and evolution. S/U grading.

274. Seminar: Behavioral Ecology. (2) Discussion of theoretical and empirical aspects of topics in behavioral ecology. S/U or letter grading.

C275. Computational Biology. (4) Lecture, three hours; laboratory, one hour. Requisites: Life Sciences 1, 4. Introduction to computational biology. Topics include statistical and mathematical analysis, computer simulation, use of Internet for remote databases, and connection to supercomputers, with emphasis on biological applications and individual or group projects. Concurrently scheduled with course C159.

279. Seminar: Evolutionary Biology. (2) Seminar, two hours; outside study, four hours. Requisite: course M231. Emphasis on a particular issue in evolutionary biology, varying in topic whenever offered. Topics may include advances in phylogenetic methodology; relationship between development and evolution; biogeography, climate change, and faunal evolution; dispersal mechanisms and macroevolutionary patterns; adaptation and diversification; macroevolutionary patterns in fossil record. S/U or letter grading.

282. Seminar: Ichthyology. (2) Requisite: course 111 or 112. Student presentations and discussion of specific topics in ichthyology. Theme varies from year to year. May be repeated for credit.

288. Seminar: Plant Cell Biology. (2) Recommended preparation: course 162.

M290. Seminar: Comparative Physiology. (2) (Same as Physiological Science M290.) Seminar, two and one-half hours. Discussion of specific topics in comparative physiology of animals. Topics vary from year to year, with emphasis on systems physiology, neuroethology, or behavioral physiology. S/U or letter grading.

291. Seminar: Physiology and Biochemistry of Arthropods. (2) Seminar, two hours. S/U or letter grading.

CM295A-CM295B. Theoretical Behavioral Ecology. (4) (Same as Anthropology CM289A-CM289B.) Lecture, three hours. Preparation: one upper division introduction to behavioral ecology course, one university-level mathematics course (preferably calculus or probability and statistics). Course CM295A is requisite to CM295B. Students expected to do simple algebra, elementary calculus, and probability. A rich body of mathematical theory describing the evolution of animal behavior exists. Introduction to this body of theory at a pace and mathematical level that allows students to grasp this information. Within each area of theory (e.g., kin selection, optimal foraging theory, etc.), presentation of basic corpus of models so that students understand assumptions that underlie the models, and how main results are derived. Presentations supplemented by a survey of results printed in the literature, especially those derived using more advanced methods. Concurrently scheduled with courses CM189A-CM189B.

296. Seminar: Integrative Biology — Cellular, Organismic, and Population. (1 to 4) Discussion, three hours. Advanced study and analysis of current topics in cellular, organismic, and population biology. Discussion of current research and literature in research specialty of faculty member teaching course. S/U grading.

299. Seminar: Parasitology. (2) Seminar, two hours. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Preparation for Teaching Biology in Higher Education. (2) Designed for graduate students. Study of problems and methodologies in teaching biology, which includes workshops, seminars, apprentice teaching, and peer observation. S/U grading.

496. Preparation for Teaching Biology in Higher Education. (2) Designed for graduate students. Strongly recommended as sequel to course 495 discussions on teaching, theory, and development of advanced skills. Study of methods and approaches to teaching of specific areas in biology, with emphasis on laboratory teaching, instructor/student interaction, and undergraduate motivation. S/U grading.

596. Directed Individual (or Tutorial) Studies. (2 to 12) Tutorial, to be arranged. Letter grading.

596F. Directed Individual (or Tutorial) Studies. (2 to 8) Given off campus at a marine science center.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12) May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

598. M.A. Thesis Research and Writing. (2 to 12) S/U grading.

599. Ph.D. Dissertation Research and Writing. (2 to 12) S/U grading.

ORGANIZATIONAL STUDIES

*Interdepartmental Program
College of Letters and Science*

UCLA
4256 Bunche Hall

Faculty Advisory Committee

Bryan C. Ellickson, Ph.D. (*Economics*)
Oscar Grusky, Ph.D. (*Sociology*)
Eric H. Monkkonen, Ph.D. (*History*), *Chair*

Scope and Objectives

Organizations are multifaceted and can usefully be explored from more than one disciplinary perspective. The undergraduate specialization in Organizational Studies brings together students and faculty from the Departments of Economics, Geography, History, Political Science, Psychology, and Sociology who share an interest in modern organizations. The program gives students a solid grounding in the organizational perspectives and methods of at least two departments. The specialization must be taken in conjunction with a major in the social sciences.

Undergraduate Study

Organizational Studies Specialization

Students may elect to combine the Organizational Studies specialization with a departmental major and may petition to have the area of specialization recognized with the bachelor's degree.

The option of completing an individual major in Organizational Studies is also open to qualified students. For more information on individual majors, see the College of Letters and Science section of this catalog.

Students with a departmental major should seek advising in their major department. Those interested in the individual major should consult a Letters and Science counselor.

Courses within the specialization must be taken for a letter grade. The specialization must be taken in conjunction with a major in the division of social sciences.

Preparation for the Specialization

Required: At least five of the following courses appropriate to the courses to be taken in the specialization: Economics 1, 2; Geography 4; Psychology 10; Sociology 1, or M18 and 104 or equivalent.

Upper Division Requirements

Required: Nine upper division courses, including (1) at least three courses outside the major department selected from Management 190, Political Science 146D, Sociology 168, 173; (2) a minimum of three courses selected from one of the following suites within the major department: Economics 147A, 147B, 170, 171; Geography 148, M149; Political Science 141C, 142A, 142B, 146E; Psychology 135; Sociology 132, 135, 156, 182; (3) a minimum of three courses selected from one of the suites in item 2 in a department outside the major department; (4) internship experience in a governmental or service organization.

Professor Eric H. Monkkonen (9252 Bunche Hall, 310-825-3376) is the program adviser. For further information, contact the political science undergraduate counselor in the program office.

Chair

Gerald A.M. Finerman, M.D.

Scope and Objectives

The medical student program in orthopaedic surgery is designed to provide experience in understanding the diagnosis and management of disorders of the musculoskeletal system. Through a combination of didactic instruction and supervised clinical experience, students acquire the clinical skills of history taking and physical examination of the musculoskeletal system. Diagnosis and orthopaedic management of bone and soft tissue trauma, skeletal development defects, tumor, spinal disorders, hand and foot disorders, and arthritis are primary objectives. Third-year students work in ambulatory clinics and on inpatient services during their core surgical clerkship. Fourth-year electives provide the opportunity for in-

depth experience on rotations at the UCLA Medical Center and affiliated institutions and emphasize subspecialties such as joint replacement, sports medicine, orthopaedic oncology, metabolic bone disorders, hand and foot surgery, spinal surgery, and pediatric orthopaedics.

For further details on the Department of Orthopaedic Surgery and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

Orthopaedic Surgery

Upper Division Course

102. Gross Anatomy of the Human Body. (8) Lecture, three hours; laboratory, nine hours. Designed for dental and graduate students. Systemic and topographical human anatomy, with dissection of human cadaver. Emphasis on head and neck. P/NP grading.

Graduate Courses

205A-205B. Gross and Developmental Anatomy for Medical Students. (5-5) Lecture/laboratory, three four-hour sessions (16 weeks beginning in August). Designed for medical students. Open to nonmedical students with consent of instructor. Gross anatomy, embryology, and radiological anatomy of the human body as taught by lectures, demonstrations, and dissections. **205A.** Limbs, Thorax, and Abdomen (first eight weeks); **205B.** Pelvis, Head, and Neck.

207. Gross and Developmental Anatomy for Graduate Students. (12) Lecture/laboratory, three four-hour sessions (16-week semester). Gross anatomy, embryology, and radiological anatomy of the human body as taught by lectures, demonstrations, and dissections. Trunk and extremities; head and neck.

Scope and Objectives

Pathology is, by definition, the science of disease. Its main purpose is to unravel disease mechanisms. Without it, progress in prevention, diagnosis, and therapy are left to chance. Yet, among medical disciplines, it is one of the youngest because scientific concepts of disease, based on direct observation of diseased organs, developed only in the last 150 years.

Once normal molecules, cells, and organs have been damaged, the result of the injury manifests itself by distortions of behavior at the molecular, cellular, and organ levels. The study of these injuries and reactions to injuries constitutes a body of knowledge well worth mastering for its own sake. Students, however, must also learn to use the existing tools or develop the new tools needed to dissect the events that follow injury. Although education in methodology is not, in principle, different in pathology from that in all other biomedical sciences, it is very different in scope.

A combined education in breadth and depth is indispensable; it is this education, as it is applied to injuries and reaction to injuries, that is the goal of the Ph.D. program in Experimental Pathology.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in

Program Requirements for the year in which they matriculate.

Master's Degree

Admission

Students are only accepted into the program for the purpose of obtaining a Ph.D. degree in Experimental Pathology. However, the department also awards a Master of Science degree in Experimental Pathology in cases where a student is unable to finish the full Ph.D. program but whose completed work is adequate to the standards and minimum requirements set for a master's degree.

Areas of Study

Consult the department.

Course Requirements

Students must complete the core courses and the six elective units required of all experimental pathology graduate students. The minimum number of units required is 36, and the minimum number of graduate units required is 35. The maximum number of units permitted in the 500 series is eight units, and the maximum number of 500-series units that may be applied toward the graduate course requirement is four units.

Students must take the written qualifying examination. An M.S. student must answer at least two thirds of the questions on the examination and pass with a minimum grade of B. Students have the same amount of time as Ph.D. students to complete the examination.

Students must execute an original scholarly research project, which must be approved by a committee of three faculty. Students then must write up the project as a thesis which requires approval of the same committee. The student and the faculty adviser must select two other faculty members for the committee. Members of the committee must be in the department

Comprehensive Examination Plan

Consult the department.

Thesis Plan

Consult the department.

Doctoral Degree

Admission

Admission to the program is through UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences, 172 MBI, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051.

Major Fields or Subdisciplines

Consult the graduate adviser.

Course Requirements

First Year. Fall Quarter: Biological Chemistry CM253, one seminar course, one laboratory rotation.

Winter Quarter: Neurobiology M209A or Biological Chemistry CM267, one seminar course, one laboratory rotation.

Spring Quarter: Choice of elective (for students obtaining degrees in experimental pathology, this is normally four units of basic mechanisms of disease), one seminar course, one laboratory rotation.

Second Year. Fall Quarter: Pathology and Laboratory Medicine 250A. (Students who have not taken basic mechanisms take a taped course and the seminar.)

Winter Quarter: Six units from Pathology and Laboratory Medicine 234A through 234D; Pathology and Laboratory Medicine 250B.

Spring Quarter: Pathology and Laboratory Medicine 250C.

Written and Oral Qualifying Examinations

The written examination must be completed by the end of the second year, after the core course requirements are completed.

The examination consists of the submission of a written grant proposal related to the general areas of the student's dissertation, yet different from the dissertation. The format of the proposal is based on the first award application from the Public Health Service Grant application, with minor modifications. The proposal must be submitted by the middle of September of the student's second year. Students must take the University Oral Qualifying Examination by the end of September of that year.

Pathology and Laboratory Medicine

Upper Division Course

199. Special Studies. (2 to 6) Supervised laboratory research, 10 hours minimum. Students select instructor among eligible research faculty and carry out independent laboratory research project under instructor supervision. P/NP or letter grading.

Graduate Courses

200A. Dental Pathology. (3) Lecture, 90 minutes; laboratory, three hours. Fundamental causes of disease processes, using as examples selected lesions or diseases of major organ systems.

M215. Interdepartmental Course: Tropical Medicine. (2) (Same as Medicine M215, Microbiology and Immunology M215, and Pediatrics M215.) Lecture, two and one-half hours. Preparation: basic courses in microbiology and parasitology of infectious diseases in School of Medicine or Public Health. Study of current knowledge about diseases prevalent in tropical areas of the world. Major emphasis on infectious diseases, with coverage of problems in nutrition and exotic noninfectious diseases. Syllabus supplements topics covered in classroom. S/U grading.

231A. Pathological Anatomy and Physiology. (6) Lecture, two hours; discussion, six hours; laboratory, four hours; other, six hours. Preparation: completion of curriculum satisfying basic requirements for study of human pathology. Designed for graduate students. Lectures, demonstrations, and individual study of a student loan collection of microscopic slide preparations and of specimens from recent autopsies. Kodachrome photomicrographs and projection of microslides. Concentration in area of general pathology.

231B-231C. Pathophysiology of Disease. (6-6) Preparation: completion of curriculum satisfying basic requirements for study of human pathology. Requisite: course 200A. Designed for graduate students. Lectures, demonstrations, and individual study of a student loan collection of microscopic slide preparations and of specimens from recent autopsies. Kodachrome photomicrographs and projection of microslides. Concentration in area of general pathology. In Progress grading.

M237. Molecular and Cellular Foundations of Disease. (4) (Same as Biological Chemistry M237.) Lecture, two hours; discussion, two hours. Preparation: one course each in molecular biology, cell biology, and biological chemistry. Discussion of key issues in disease mechanisms, with emphasis on experiments leading to understanding of these mechanisms. Identification of important questions still remaining unanswered. S/U or letter grading.

255. Mapping the Human Genome. (3) Lecture, 90 minutes; discussion, 90 minutes. Basic molecular genetic and cytogenetic techniques of gene mapping. Selected regions of human genomic map scrutinized in detail, particularly gene families and clusters of genes that have remained linked from mouse to human. Discussion of localizations of disease genes. S/U or letter grading.

M256. Seminar: Viral Oncology. (2) (Same as Microbiology and Immunology M256.) Advanced research seminar designed to consider current developments in the field. Selection of current subjects and publications dealing with tumor viruses, oncogenesis, development, and cellular regulation.

M257. Introduction to Toxicology. (4) (Same as Pharmacology M257.) Requisite: Pharmacology 241. Biochemical and systemic toxicology, basic mechanisms of toxicology, and interaction of toxic agents with specific organ systems.

M258. Pathologic Changes in Toxicology. (4) (Same as Pharmacology M258.) Designed to give students experience in learning normal histology of tissues which are major targets of toxin and the range of pathologic changes that occur in these tissues (liver, bladder, lung, kidney, nervous system, and vascular system).

M293. Major Concepts in Oncology. (4) (Same as Microbiology and Immunology M293 and Oral Biology M293.) Lecture, three hours. Designed for graduate students contemplating research in oncology. Topics include cancer pathophysiology, genetics, membranes, macromolecular synthesis and control, cell cycle, growth control; physical, chemical, and viral oncogenesis, epidemiology of cancer; tumor immunology; principles of cancer surgery, radiation therapy, and chemotherapy. S/U or letter grading.

M294. Molecular Basis of Cancer. (4) (Same as Microbiology and Immunology M294.) Lecture, three hours. Requisites: Biological Chemistry CM253, CM267, Microbiology and Immunology M229, Neurobiology M209A. Fundamental biological, genetic, and molecular process involved in genesis and growth of cancer cells and diagnosis, characterization, and treatment of cancer.

M294L. Cancer Histopathology Laboratory. (2) (Same as Microbiology M294L and Microbiology and Immunology M294L.) Lecture, one hour; laboratory, two hours. Requisites: course M294 (preferred) or M293, Biological Chemistry CM253, CM267, and Microbiology and Immunology M229 or Neurobiology M209A. Histopathological approaches to cellular or tissue alterations commonly observed in tumor progression. Introduction to characteristics that clearly distinguish between benign and malignant neoplasia, precancerous stages, carcinoma in situ, and frankly invasive and metastatic neoplasia.

298A-298B-298C. Current Research in Disease Mechanisms. (2-2-2) Seminar, 90 minutes. Preparation: one course each in molecular biology, cell biology, and biological chemistry. Designed for graduate experimental pathology students. Current research in disease mechanisms, with strong emphasis on experimental approach in pathology. Topics include genetic and metabolic disorders, thyroid disease, immunology, atherosclerosis, infectious diseases, and Alzheimer's disease.

596. Directed Individual Study or Research. (4 to 12) Individual research with members of the staff or of other departments, the latter for purpose of supplementing programs available in department. S/U grading.

597. Preparation for Qualifying Examinations. (2 to 8) Preparation: one year of pathology coursework. Individual study for qualifying examinations. S/U grading.

599. Preparation of Ph.D. Dissertation. (2 to 8) Preparation: completion of qualifying examinations and majority of Ph.D. research. Writing and completion of dissertation. S/U grading.

Frederick James, M.D., *Chair, King/Drew*
Mohammed Malekzadeh, M.D., *Interim Chair, Olive View-UCLA*
David L. Rimoin, M.D., Ph.D., *Chair, Cedars-Sinai*

Scope and Objectives

The Department of Pediatrics encompasses four teaching hospitals: UCLA, Harbor-UCLA, King/Drew, and Cedars-Sinai Medical Centers. The clinical program and teaching activities of the UCLA Medical Center are integrated with the Olive View-UCLA Medical Center. In the fundamentals of clinical medicine course, medical students receive detailed instruction in the techniques of the clinical examination of pediatric patients.

The required six-week clinical clerkship in pediatrics can be taken at any of the four medical centers. In-depth electives in the Department of Pediatrics are listed in the *School of Medicine Handbook of Clinical Courses*, as are the advanced clinical clerkships.

For further details on the Department of Pediatrics and a listing of the courses offered, see

the *Announcement of the UCLA School of Medicine*.

Pediatrics

Lower Division Course

88. Lower Division Seminar: Special Topics in Pediatrics. (4) Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in pediatrics approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

Graduate Course

M215. Interdepartmental Course: Tropical Medicine. (2) (Same as Medicine M215, Microbiology and Immunology M215, and Pathology M215.) Lecture, two and one-half hours. Preparation: basic courses in microbiology and parasitology of infectious diseases in School of Medicine or Public Health. Study of current knowledge about diseases prevalent in tropical areas of the world. Major emphasis on infectious diseases, with coverage of problems in nutrition and exotic noninfectious diseases. Syllabus supplements topics covered in classroom. S/U grading.

Scope and Objectives

In a recent survey conducted by the Conference Board of the Associated Research Councils, UCLA's Philosophy Department was judged among the six best in the nation in terms of the quality of its faculty. It offers programs leading to the Bachelor of Arts and Ph.D. degrees.

"Philosopher," translated from the Greek, literally means "lover of wisdom." The term has come to mean someone who seeks knowledge, enlightenment, and truth. The undergraduate program is not directed at career objectives (although it is traditionally good preparation for law, theology, and graduate work in philosophy). Philosophy is taught to undergraduates primarily as a contribution to their liberal education. All of the lower and most of the upper division course offerings should be of interest and useful to students who are reflective about their beliefs or who wish to become so. It also provides the occasion to ponder the foundations of almost any other subject to which they are exposed — whether history, religion, government, law, or science.

The principal goal of the graduate program is to produce philosophers of high quality, thinkers informed by the great historical traditions of Western philosophers who can apply the methods of philosophical analysis to a broad range of current philosophical problems. Since all its graduate students hope to teach at the college or university level, the department is also committed to training clear, able, and stimulating teachers.

Undergraduate Study

Philosophy B.A.

Preparation for the Major

Required: Four lower division courses, including Philosophy 7 or 21, 22, 31, and one other philosophy course.

The Major

Required: Thirteen upper division (100 series) or graduate (200 series) philosophy courses (52 units), including Philosophy 100A, 100B, 100C. Seven of the 13 courses must be distributed among the groups into which the undergraduate and graduate courses are divided, in the following manner: two courses in each of three of the groups and one course in the remaining group.

Courses listed under Special Studies may be applied toward the major but not toward a group requirement. A maximum of eight units of course 199 may be applied toward the major but not toward a group requirement. Courses 100A, 100B, 100C may not be applied toward any group requirement. No course used to satisfy the major or preparation requirements may be taken on a P/NP basis.

Students intending to do graduate work in philosophy should consult both the graduate and undergraduate advisers.

Honors Program

On recommendation of the department faculty, honors in philosophy are awarded at graduation to a major whose grade-point average in upper division philosophy courses is 3.3 and who has completed two graduate courses in the 200 series (eight units) in philosophy with an average GPA of 3.5.

Philosophy Minor

To enter the Philosophy minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (eight units): Philosophy 7 or 21, and 22 or 31.

Required Upper Division Courses (24 units): Five courses, including at least one from each of three of the four groups into which the undergraduate and graduate courses are divided (Philosophy 100A, 100B, 100C apply toward Group I); one additional upper or lower division philosophy course.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

Admission

The department does not accept students whose sole objective is the Master of Arts degree in Philosophy.

Areas of Study

Consult the department.

Course Requirements

For the Master of Arts, students must complete with grades of B or better at least nine upper division or graduate courses (36 units), includ-

ing Philosophy 199, of which five courses (20 units) must be in the philosophy series numbered between 200A and 290. The total course requirement must include Philosophy 200A-200B-200C and one designated course in logic. Consult the *Manual for Graduate Students in Philosophy* for the list of designated courses.

Courses in the 500 series may not be applied toward the course requirements for the M.A. in Philosophy.

Comprehensive Examination Plan

Students seeking the M.A. must pass the master's comprehensive examination, which consists of three different examinations. One is scheduled after each of the three first-year seminars. Consult the *Manual for Graduate Students in Philosophy* for further information about the examination. In case of failure, the examination may be repeated.

The examination is passed or failed as a whole, which does not necessarily require passing of all three parts.

Thesis Plan

None.

Doctoral Degree

Admission

Admission to the program leading to the Ph.D. degree in Philosophy requires approval both by the Graduate Division and by the Department of Philosophy. The University application should be sent directly to Graduate Admissions/Student and Academic Affairs. The departmental application, three letters of recommendation (on the official forms), official scores on the Graduate Record Examination (GRE) General Test (the Subject Test in Philosophy is not required), official scores from the Test of English as a Foreign Language (TOEFL) for applicants whose first language is other than English, and two official transcripts from each institution attended should be sent to the graduate counselor in the Philosophy Department. Departmental information and application can be obtained by writing to the department in September.

Major Fields or Subdisciplines

Consult the department.

Course Requirements

A Ph.D. candidate must complete, with a grade of B or better, the three first-year seminars, plus 11 additional upper division and graduate courses in philosophy (not including individual studies courses), distributed as follows:

Logic. Two upper division or graduate courses in logic, one of which must be completed by the end of the first year, unless a preparatory course is necessary: Philosophy 135A plus one other designated course in either the Philosophy or Mathematics Department. Consult the *Manual for Graduate Students in Philosophy* for the list of designated courses.

History of Philosophy. One graduate course in history of philosophy, plus enough graduate or undergraduate courses (taken at UCLA or elsewhere) to make up an equivalent of Philosophy 100A, 100B, 100C. Specifically, each student must have studied (or now study) Plato, Aristotle, some important medieval philosopher, Descartes, some British empiricist, and Kant.

Ethics and Value Theory. One graduate-level course.

Metaphysics and Epistemology. One graduate-level course.

Special Area Requirement. Two designated graduate courses in one of two areas: metaphysics and epistemology or ethics. Consult the *Manual for Graduate Students in Philosophy* for further details.

Electives. As many courses as needed to fulfill the requirement of 11 additional upper division or graduate philosophy courses.

Group classification of a course is generally given by its catalog listing, but final classification of a course is determined by the instructor on the basis of its content and the departmental guidelines. Normally no substitutions for these courses are allowed, but students who have done graduate coursework elsewhere as graduate students may be permitted to substitute previous graduate coursework in exceptional cases.

Written and Oral Qualifying Examinations

The department does not require any written examination to be passed by students as a condition of advancement to candidacy. It does, however, require each student to take all three parts of the master's comprehensive examination by the end of the student's first year (according to the description and schedule given above) to give the department evidence of proficiencies and deficiencies.

For advancement to candidacy, students must pass a preliminary oral qualifying examination as described below.

In the second and third years, students must satisfy two special area requirements: one in metaphysics and epistemology and one in ethics. Students must take two specially designated graduate courses in one of the two areas and write a paper prepared in accordance with a specific format called a "proposition" in the other area.

The special course requirement in either metaphysics and epistemology or in ethics should be completed in the second year, and the proposition requirement covering the remaining area should be completed in the third year. Consult the *Manual for Graduate Students in Philosophy* for further details.

In the third year, students begin a new series of individual studies courses (Philosophy 596) in consultation with the dissertation supervisor to develop a well-defined dissertation project. A

doctoral committee is chosen and the University Oral Qualifying Examination is scheduled. The primary purpose of this examination is to determine whether students are able to complete the dissertation successfully. The scope of the examination varies according to the definiteness of the dissertation topic and the extent of the student's preliminary investigations. In case of failure, the doctoral committee makes a recommendation for or against allowing a second oral examination.

Philosophy

Lower Division Courses

1. Beginnings of Western Philosophy. (4) Lecture, three hours; discussion, one hour. Origins of Greek cosmology and philosophy, beginnings of systematic thought and scientific investigation concerning such questions as origin and nature of the material world, concept of laws of nature, possibility and extent of knowledge. Concentration on pre-Socratic philosophers, particularly Anaximander, Heraclitus, the Pythagoreans, Parmenides, Empedocles, and Greek atomists, during first two thirds of course and on Socrates and some earlier works of Plato in last few weeks.

2. Introduction to Philosophy of Religion. (4) Lecture, three hours; discussion, one hour. Introductory study of such topics as nature and grounds of religious belief, relation between religion and ethics, nature and existence of God, problem of evil, and what can be learned from religious experience.

4. Philosophical Analysis of Contemporary Moral Issues. (4) Lecture, three hours; discussion, one hour. Critical study of principles and arguments advanced in discussion of current moral issues. Possible topics include revolutionary violence, rules of warfare, sexual morality, right of privacy, punishment, nuclear warfare and deterrence, abortion and mercy killing, experimentation with human subjects, rights of women.

5A. Philosophy in Literature. (4) Lecture, three hours; discussion, one hour. Philosophical inquiry into such themes as freedom, responsibility, guilt, love, self-knowledge and self-deception, death, and meaning of life through examination of great literary works in the Western tradition.

6. Introduction to Political Philosophy. (4) Lecture, three hours; discussion, one hour. Study of some classical or contemporary works in political philosophy. Questions that may be discussed include What is justice? Why obey the law? Which form of government is best? How much personal freedom should be allowed in society? P/NP or letter grading.

7. Introduction to Philosophy of Mind. (4) Lecture, three hours; discussion, one hour. Introductory study of philosophical issues about nature of the mind and its relation to the body, including materialism, functionalism, behaviorism, determinism and free will, nature of psychological knowledge.

8. Introduction to Philosophy of Science. (4) Study of selected problems concerning the character and reliability of scientific understanding, such as nature of scientific theory and explanation, reality of theoretical entities, inductive confirmation of hypotheses, and occurrence of scientific revolutions. Discussion at nontechnical level of episodes from history of science.

9. Principles of Critical Reasoning. (4) Nature of arguments: how to analyze them and assess soundness of the reasoning they represent. Common fallacies that often occur in arguments discussed in light of what counts as a good deductive or inductive inference. Other topics include use of language in argumentation to arouse emotions as contrasted with conveying thoughts, logic of scientific experiments and hypothesis-testing in general, and some general ideas about probability and its application in making normative decisions (e.g., betting).

21. Skepticism and Rationality. (4) Lecture, three hours; discussion, one hour. Can we know anything with certainty? How can we justify any of our beliefs? Introduction to study of these and related questions through works of some great philosophers of modern period, such as Descartes, Hume, Leibniz, or Berkeley.

22. Introduction to Ethical Theory. (4) Lecture, three hours; discussion, one hour. Recommended or required for many upper division courses in Group III. Systematic introduction to ethical theory, including discussion of egoism, utilitarianism, justice, responsibility, meaning of ethical terms, relativism, etc.

31. Logic, First Course. (4) Lecture, three hours; discussion, one hour. Recommended for students who plan to pursue more advanced studies in logic. Elements of symbolic logic, sentential and quantificational; forms of reasoning and structure of language.

32. Logic, Second Course. (4) Lecture, three hours; discussion, one hour. Enforced prerequisite: course 31 (preferably in preceding term). Symbolic logic: extension of systematic development of course 31. Quantifiers, identity, definite descriptions.

97. Freshman Seminar. (4) Variable topics; consult *Schedule of Classes* or "Department Announcements" for topics to be offered in a specific term. May be repeated for credit with consent of instructor.

Upper Division Courses

100A. History of Greek Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Survey of origins of Greek metaphysics from pre-Socratics through Plato and Aristotle.

100B. Medieval and Early Modern Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Strongly recommended prerequisite: course 100A. Survey of development and transformation of Greek metaphysics and epistemology within context of philosophical theology, and transition from medieval to early modern period. Special emphasis on Augustine, Anselm, Aquinas, and Descartes.

100C. History of Modern Philosophy, 1650 to 1800. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Strongly recommended prerequisite: course 100B. Courses 100A, 100B, and 100C should be taken in immediately successive terms if possible. Survey of development of metaphysics and theory of knowledge from 1650 to 1800, including Locke and/or Berkeley, Malebranche and/or Leibniz, and culminating in Hume and Kant. Topics may include views of these (and perhaps other) philosophers of the period on mind and body, causality, existence of God, skepticism, empiricism, limits of human knowledge, and philosophical foundations of modern science.

Group I: History of Philosophy

M101A. Plato — Earlier Dialogues. (4) (Same as Classics M146A.) Lecture, three hours; discussion, one hour; outside study, eight hours. Preparation: one philosophy course. Study of selected topics in early and middle dialogues of Plato.

M101B. Plato — Later Dialogues. (4) (Same as Classics M146B.) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course M101A. Study of selected topics in middle and later dialogues of Plato.

M102. Aristotle. (4) (Same as Classics M147.) Lecture, three hours; discussion, one hour; outside study, eight hours. Preparation: one philosophy course. Study of selected works of Aristotle.

M103A. Ancient Greek and Roman Philosophy. (4) (Same as Classics M145A.) Lecture, three hours; outside study, nine hours. Study of some major Greek and Roman philosophical texts, including those of pre-Socratics, Plato, Aristotle, and Hellenistic philosophers, with emphasis on historical and cultural setting of the texts, their literary form, interrelations, and contribution to discussion of basic philosophical issues.

M103B. Later Ancient Greek Philosophy. (4) (Same as Classics M145B.) Lecture, three hours; outside study, nine hours. Preparation: one course from 1, 100A, M101B, M102, M103A. Study of some major texts in Greek philosophy of the Hellenistic and Roman periods. Readings vary and include works by Stoics, skeptics, philosophers of science, Neoplatonists, etc. P/NP or letter grading.

104. Topics in Islamic Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Development of Muslim philosophy in its great age (from Kindo to Averroes, 850 to 1200), considered in connection with Muslim theology and mysticism.

105. Medieval Philosophy from Augustine to Maimonides. (4) Preparation: one philosophy course. Development of early medieval philosophy within framework of Judeo-Christian theology and its assimilation and criticism of Greek philosophical heritage. Focus on problem of universals, existence and nature of God, problem of evil, and doctrines of the Trinity and atonement. Selected writings from Augustine through Maimonides read in English translation.

106. Later Medieval Philosophy. (4) Preparation: one philosophy course. Metaphysics, theory of knowledge, and theology of Aquinas, Duns Scotus, and Ockham, with less full discussion of other authors from the 13th through early 15th century. Selected texts read in English translation.

107. Topics in Medieval Philosophy. (4) Preparation: one philosophy course. Recommended prerequisite: course 105 or 106. Study of philosophy and theology of one medieval philosopher such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham, or study of a single area such as logic or theory of knowledge in several medieval philosophers. Topic announced each term. May be repeated for credit with consent of instructor.

C108. Hobbes. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Hobbes' political philosophy, especially the *Leviathan*, with attention to its relevance to contemporary political philosophy. May be concurrently scheduled with course C208.

C109. Descartes. (4) Requisites: course 21 or two philosophy courses. Study of works of Descartes, with discussion of issues such as problem of skepticism, foundations of knowledge, existence of God, relation between mind and body, and connection between science and metaphysics. May be concurrently scheduled with course C209.

C110. Spinoza. (4) Lecture, three hours; discussion, one hour. Requisite: course 21. Study of philosophy of Spinoza. May be concurrently scheduled with course C210, in which case there is weekly discussion meeting, plus fewer readings and shorter papers for undergraduates. Limited to 30 students when concurrently scheduled.

C111. Leibniz. (4) Lecture, three hours; discussion, one hour. Requisite: course 21. Study of philosophy of Leibniz. May be concurrently scheduled with course C211, in which case there is weekly discussion meeting, plus fewer readings and shorter papers for undergraduates. Limited to 30 students when concurrently scheduled.

C112. Locke and Berkeley. (4) Preparation: one philosophy course. Study of philosophies of Locke and Berkeley, with emphasis in some cases on one or the other. Limited to 30 students when concurrently scheduled with course C212. P/NP or letter grading.

C114. Hume. (4) Preparation: one philosophy course. Selected topics from metaphysical, epistemological, and ethical writings of Hume. Limited to 40 students when concurrently scheduled with course C214.

115. Kant. (4) Lecture, three hours; discussion, one hour. Requisite: course 21 or 22. Study of Kant's views on related topics in theory of knowledge, ethics, and politics. May be repeated for credit with consent of instructor.

116. 19th-Century Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Selected topics in 19th-century thought.

117. Late 19th- and Early 20th-Century Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Selected topics in work of one or more of following philosophers: Bolzano, Frege, Husserl, Meinong, G. Moore, early Russell, and Wittgenstein. May be repeated for credit with consent of instructor.

118. Kierkegaard. (4) Preparation: one philosophy course. Philosophical study of some major works of Kierkegaard, with emphasis on interpretation of the texts.

C119. Topics in Modern Philosophy. (4) Preparation: one philosophy course. Selected topics in one or more philosophies of the early modern period, or study in a single area such as theory of knowledge or metaphysics in several of the philosophies. May be repeated for credit with consent of instructor. Concurrently scheduled with course C219.

Group II: Logic, Semantics, and Philosophy of Science

124. Philosophy of Science: Historical. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Historical introduction to philosophy of science. Several general topics discussed in context of actual episodes in development of natural sciences. May be repeated for credit with consent of instructor.

125. Philosophy of Science: Contemporary. (4) Lecture, three hours; discussion, one hour. Requisite: course 31 or 124. Introduction to contemporary philosophy of science, focusing on problems of central importance. May be repeated for credit with consent of instructor.

126. Philosophy of Science: Social Sciences. (4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Discussion of topics in philosophy of social sciences (e.g., methods of social sciences in relation to physical sciences, value-bias in social inquiry, concept formation, theory construction, explanation and prediction, nature of social laws).

127A. Philosophy of Language. (4) Requisite: course 31. Syntax, semantics, pragmatics. Semantical concept of truth, sense and denotation, synonymy and analyticity, modalities and tenses, indirect discourse, indexical terms, semantical paradoxes. May be repeated for credit with consent of instructor.

127B. Philosophy of Language. (4) Requisite: course 31. Course 127A is not requisite to 127B. Selected topics similar to those considered in course 127A, but at more advanced and technical level. May be repeated for credit with consent of instructor.

128A. Philosophy of Mathematics. (4) Requisites: courses 31, 32, and preferably one additional logic course. Philosophy of mathematics; logicism of Frege and Russell, arithmetic reduced to logic; ramified type theory and impredicative definition (Russell, Poincaré, early Weyl).

128B. Philosophy of Mathematics. (4) Requisite: course 128A. Intuitionism of Brouwer, Heyting, and later Weyl; proof theory of Hilbert.

129. Philosophy of Psychology. (4) Lecture, three hours; discussion, one hour. Preparation: one four-unit psychology course, one philosophy course. Selected philosophical issues arising from psychological theories. Relevance of computer simulation to accounts of thinking and meaning; relations between semantical theory and learning theory; psychological aspects of theory of syntax; behaviorism, functionalism, and alternatives; physiology and psychology.

130. Philosophy of Space and Time. (4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses or one philosophy course and one physics course. Selected philosophical problems concerning nature of space and time. Philosophical implications of space-time theories, such as those of Newton and Einstein. Topics may include nature of geometry, conventionalism, absolutist versus relativist views of space and time, philosophical impact of relativity theory.

131. Science and Metaphysics. (4) Preparation: two philosophy courses. Recommended: some background in basic calculus and physics. Intensive study of one or two metaphysical topics on which results of modern science have been thought to bear. Topics may include nature of causation, reality and direction of time, time-travel, backwards causation, realism, determinism, absolute view of space, etc. May be repeated for credit with consent of instructor.

132. Philosophy of Biology. (4) Preparation: one philosophy course. Intensive study of one or two current topics in philosophy of biology, which may include structure of evolutionary theory, fitness, taxonomy, reductionism, concept of a biological species, and biological explanation. P/NP or letter grading.

133. Topics in Logic and Semantics. (4) Requisite: course 32. Possible topics include formal theories, definitions, alternative theories of descriptions, many-valued logics, deviant logics.

M134. Introduction to Set Theory. (4) (Same as Mathematics M112.) Lecture, three hours; discussion, one hour. Requisite: course 32 or Mathematics 31B. Axiomatic set theory as framework for mathematical concepts; relations and functions, numbers, cardinality, axiom of choice, transfinite numbers. P/NP or letter grading.

135A. Metatheory of Sentential Logic. (4) Lecture, three hours; discussion, one hour. Requisite: course 32. Introduction to metatheory of classical sentential logic. Emphasis on fundamental metalogical ideas, including proof by induction, rigorous definition of syntactic and semantic concepts, and proof of completeness. Discussion of philosophical significance of these ideas.

135B. Metatheory of Predicate Logic. (4) Lecture, three hours; discussion, one hour. Requisite: course 135A. Classical first-order logic, its scope, and limits. Gödel completeness theorem as main positive result. Some consideration to classical negative results on truth, decidability, and completeness, and relationship between first- and second-order logic.

136. Modal Logic. (4) Requisite: course 135A. First course in two-term sequence (also see course 176). Topics include various normal modal systems, derivability within the systems, Kripke-style semantics and generalizations, Lemmon/Scott completeness, incompleteness in tense and modal logic, quantificational extensions.

Group III: Ethics and Value Theory

150. Society and Morals. (4) Lecture, three hours; discussion, one hour. Requisite: course 22. Critical study of principles and arguments advanced in discussion of current moral and social issues. Topics similar to those in course 4, but familiarity with some basic philosophical concepts and methods presupposed. May be repeated for credit with consent of instructor.

151A-151B-151C. History of Ethics. (4-4-4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Course 151A is not requisite to 151B, which is not requisite to 151C. **151A.** Selected Classics in Ancient Ethical Theories: Plato, Aristotle; **151B.** Selected Classics in Modern Ethical Theories: Hume, Kant, Mill, etc.; **151C.** Selected Classics of Medieval Ethics.

153A. Topics in Ethical Theory: Normative Ethics. (4) Requisite: course 22. Study of selected topics in normative ethical theory. Topics may include human rights, virtues and vices, principles of culpability and praiseworthiness (criteria of right action). May be repeated for credit with consent of instructor.

153B. Topics in Ethical Theory: Metaethics. (4) Requisite: course 22. Study of selected problems in metaethics. Topics may include analysis of moral language, justification of moral beliefs, moral realism, skepticism, free will, moral motivation, etc. May be repeated for credit with consent of instructor.

154. Topics in Value Theory: Rationality and Action. (4) Requisite: course 6 or 7 or 22. Selected topics concerning normative issues in practical rationality or philosophy of action. Topics may include moral and practical dilemmas, nature of reasons for action, rationality of morality and prudence, weakness of will, freedom of the will, and decision theory. May be repeated for credit with consent of instructor.

155. Medical Ethics. (4) Examination of philosophical issues raised by problems of medical ethics, such as abortion, euthanasia, and medical experimentation.

C156. Topics in Political Philosophy. (4) (Formerly numbered 156.) Lecture, three hours; discussion, one hour; outside study, eight hours. Analysis of some basic concepts in political theory. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C247. P/NP or letter grading.

157A-157B. History of Political Philosophy. (4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. May be repeated with consent of instructor. **157A.** Reading and discussion of classic works in earlier political theory, especially those by Hobbes, Locke, Hume, and Rousseau. **157B.** Reading and discussion of classic works in later political theory, especially those by Kant, Hegel, and Marx.

161. Topics in Aesthetic Theory. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Philosophical theories about nature and importance of art and art criticism, aesthetic experience, and aesthetic values. May be repeated for credit with consent of instructor.

166. Philosophy of Law. (4) Preparation: one philosophy course. Examination, through study of recent philosophical writings, of such topics as nature of law, relationship of law and morals, legal reasoning, punishment, and obligation to obey the law.

Group IV: Metaphysics and Epistemology

170. Philosophy of Mind. (4) Lecture, three hours; discussion, one hour. Preparation: two relevant philosophy courses. Analysis of various problems concerning nature of mind and mental phenomena, such as relation between mind and body, and our knowledge of other minds. May be repeated once for credit with consent of instructor.

172. Philosophy of Language and Communication. (4) Preparation: two relevant philosophy or linguistics courses. Theories of meaning and communication; how words refer to things; limits of meaningfulness; analysis of speech acts; relation of everyday language to scientific discoveries.

M173. Metaphor and Literal Speech. (4) (Same as Applied Linguistics and TESL M189.) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: Linguistics 1. Use of interdisciplinary perspective to examine systematicity of form and function peculiar to human language that underlies dichotomy between (1) neutral or literal capacity of language and (2) metaphoric capacity. P/NP or letter grading.

175. Topics in Philosophy of Religion. (4) Lecture, three hours; discussion, one hour. Requisite: course 21 or 22. Intensive investigation of one or two topics or works in philosophy of religion, such as attributes of God, arguments for or against existence of God, or relation between religion and ethics. Topics announced each term. May be repeated for credit with consent of instructor.

176. Metaphysics of Modality. (4) Requisites: courses 31, 32. Highly recommended: course 136. Second course in two-term sequence (also see course 136). Metaphysical foundations of modal logic and philosophical basis of modal theory of modal logic. What are "possible worlds"? What is the "accessibility" relation? Is modal logic a logic or a theory? Is its focus logical or metaphysical necessity? Are the two notions really distinct? How metaphysically involved is (quantified) modal logic? What is its connection to doctrines of (1) "Haecceitism" and (2) "Aristotelian Essentialism"? P/NP or letter grading.

177A. Existentialism. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Analysis of methods, problems, and views of some of the following: Kierkegaard, Nietzsche, Heidegger, Jaspers, Sartre, Marcel, and Camus. Possible topics include metaphysical foundations, nature of mind, freedom, problem of self, other people, ethics, existential psychoanalysis.

177B. Historical Studies in Existentialism. (4) Preparation: one philosophy course. Study of central philosophical texts of one of the following: Nietzsche, Heidegger, Jaspers, Buber, Sartre, or Camus. Emphasis on explication and interpretation of the texts. May be repeated for credit with consent of instructor.

178. Phenomenology. (4) Lecture, three hours; discussion, one hour. Preparation: two philosophy courses. Introduction to phenomenological method of approaching philosophical problems via works of some of the following: Brentano, Husserl, Heidegger, Scheler, Sartre, Merleau-Ponty, Ricoeur. Topics include ontology, epistemology, and particularly philosophy of mind.

179. Oriental Philosophy: Buddhism. (4) Examination of central concepts and arguments in Buddhist philosophy, with emphasis on school of Mahayana Buddhism. Appropriate parallels to social concepts in the Western tradition.

182. Elements of Metaphysics. (4) Lecture, three hours; discussion, one hour. Requisite: course 21. Study of basic metaphysical questions; nature of physical world, of minds, and of universals; and answers provided by alternative systems (e.g., phenomenalism, materialism, dualism).

183. Theory of Knowledge. (4) Requisite: course 21. Analysis of concept of empirical knowledge. May be repeated for credit with consent of instructor.

184. Topics in Metaphysics. (4) Requisite: course 21. Intensive investigation of one or two topics or works in metaphysics, such as personal identity, nature of dispositions, possibility and necessity, universals and particulars, causality. Topics announced each term. May be repeated for credit with consent of instructor.

186. Topics in Theory of Knowledge. (4) Requisite: course 182 or 183. Intensive investigation of one or two selected topics or works in theory of knowledge, such as a priori knowledge, problem of induction, memory, knowledge as justified true belief. Topics announced each term. May be repeated for credit with consent of instructor.

187. Philosophy of Action. (4) Preparation: two philosophy courses. Study of various concepts employed in understanding human action. Topics may include rational choice, desire, intention, weakness of will, and self-deception.

188. Philosophy of Perception. (4) Preparation: two philosophy courses. Critical study of main philosophical theories of perception and arguments used to establish them.

189. Major Philosophers of the 20th Century. (4) Preparation: two philosophy courses. Study of writings of one or more major modern philosophers (e.g., Russell, Moore, Wittgenstein, Carnap, Quine). May be repeated for credit with consent of instructor.

Special Studies

M192. Philosophical Analysis of Issues in Feminist Theory. (4) (Same as Women's Studies M192.) Lecture, three hours. Requisite for Women's Studies majors: Women's Studies 10; for other students: one philosophy course. Examination in depth of different theoretical positions on gender and women as they have been applied to study of philosophy. Emphasis on theoretical contributions made by the new scholarship on women in philosophy. Critical study of concepts and principles which arise in discussion of women's rights and liberation. Philosophical approach to feminist theories. May be repeated for credit with consent of instructor.

193. Christian Ethical Thought. (4) Lecture, three hours; discussion, one hour. Reading of selected classic and contemporary authors in the Christian ethical tradition, with philosophical analysis and assessment of their views on morality and religious life.

195. 19th- and 20th-Century Religious Thought. (4) Lecture, three hours; discussion, one hour. Philosophical approach to Western religious thought of last 200 years, through study of selected works by such authors as Kant, Schleiermacher, Kierkegaard, Buber, Camus, and Tillich.

196. Undergraduate Seminar: Philosophy. (4) Seminar, one hour; discussion, three hours. Variable topics; consult *Schedule of Classes* or "Department Announcements" for topic to be offered in a specific term. May be repeated for credit with consent of instructor.

199. Special Studies. (2 to 8) Eight units may be applied toward degree requirements, but course cannot be substituted for a course in one of the four groups on basis of similarity of subject matter.

Graduate Courses

200A-200B-200C. Seminar for First-Year Graduate Students. (4) Limited to and required of all first-year graduate philosophy students. Selected topics in metaphysics and epistemology, history of philosophy, and ethics.

Group I. History of Philosophy

201. Plato. (4) Study of later dialogues.

202. Aristotle. (4) Analysis of major problems in Aristotle's philosophy based on reading, exposition, and critical discussion of relevant texts in English translation.

203. Seminar: History of Ancient Philosophy. (4) Selected problems and philosophers. May be repeated for credit with consent of instructor.

206. Topics in Medieval Philosophy. (4) Study of philosophy and theology of one or several medieval philosophers such as Augustine, Anselm, Abelard, Aquinas, Scotus, or Ockham or study of a single area such as logic or theory of knowledge in several medieval philosophers. Topics announced each term. May be repeated for credit with consent of instructor.

207. Seminar: History of Medieval and Renaissance Philosophy. (4) Selected problems and philosophers. May be repeated for credit with consent of instructor.

C208. Hobbes. (4) Lecture, three hours; discussion, one hour. Preparation: one philosophy course. Hobbes' political philosophy, especially the *Leviathan*, with attention to its relevance to contemporary political philosophy. May be concurrently scheduled with course C108.

C209. Descartes. (4) Study of works of Descartes, with discussion of issues such as problem of skepticism, foundations of knowledge, existence of God, relation between mind and body, and connection between science and metaphysics. May be concurrently scheduled with course C109.

C210. Spinoza. (4) Selected topics in philosophy of Spinoza. May be concurrently scheduled with course C110, in which case there is a two-hour biweekly discussion meeting, plus additional readings and longer term paper for graduate students.

C211. Leibniz. (4) Selected topics in philosophy of Leibniz. May be concurrently scheduled with course C111, in which case there is a two-hour biweekly discussion meeting, plus additional readings and longer term paper for graduate students.

C212. Locke and Berkeley. (4) Preparation: one philosophy course. Study of philosophies of Locke and Berkeley, with emphasis in some cases on one or the other. Limited to 30 students when concurrently scheduled with course C112. S/U or letter grading.

C214. Hume. (4) Selected topics in philosophy of Hume. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C114.

215. Kant. (4) Intensive study of selected writings of Immanuel Kant.

216. 19th-Century Philosophy. (4) Topics in 19th-century philosophy. May be repeated for credit with consent of instructor.

C219. Topics in Modern Philosophy. (4) Selected topics in one or more philosophies of the early modern period, or study in a single area such as theory of knowledge or metaphysics in several of the philosophies. May be repeated for credit with consent of instructor. Concurrently scheduled with course C119.

220. Seminar: Topics in History of Philosophy. (4) Seminar, three hours. Selected problems and philosophers which may be from different periods. May be repeated for credit with consent of instructor.

Group II. Logic, Semantics, and Philosophy of Science

221A. Topics in Set Theory. (4) Requisite: Mathematics M112A. Sets, relations, functions, partial and total orderings; well-orderings. Ordinal and cardinal arithmetic, finiteness and infinity, continuum hypothesis, inaccessible numbers. Formalization of set theory: Zermelo/Fraenkel; von Neumann/Gödel theory. May be repeated for credit with consent of instructor.

221B. History of Set Theory. (4) Development of concept of set and axiomatic set theory by examining selected writings of Frege, Cantor, Russell, Zermelo, Gödel, and several others. Origins and significance of certain key ideas, such as set theory as logic, axiomatic set theory as a reaction to the paradoxes, formal first-order axiomatic set theory as opposed to informal axiomatics, type theory and rank hierarchy, ramification and predicativity, proper classes and sets as small classes, and particular Zermelo/Fraenkel axiomatic theory. Emphasis on actual expressed ideas and views of various influential authors.

222A-222B-222C. Gödel Theory. (4-4-4) **222A.** Preparation: several courses in logic, preferably including course 135B. First in series of three courses leading to Gödel incompleteness theorem and Tarski definition of truth. **222B.** Requisite: course 222A. Second-order arithmetic. Second in series of three courses leading to Gödel incompleteness theorem and Tarski definition of truth. **222C.** Requisite: course 222B. Gödel numbering and Gödel theory. Final course in Gödel theory series.

224. Philosophy of Physics. (4) Selected philosophical topics related to physical theory, depending on interests and background of participants, including space and time; observation in quantum mechanics; foundations of statistical mechanics. May be repeated for credit with consent of instructor.

225. Probability and Inductive Logic. (4) Requisites: course M134, or Mathematics M112A and 112B. Topics may include interpretations of probability, Bayesian and non-Bayesian confirmation theory, paradoxes of confirmation, coherence, and conditioning.

226. Topics in Mathematical Logic. (4) Content varies from term to term. May be repeated for credit with consent of instructor.

227. Philosophy of Social Science. (4) Examination of philosophical problems concerning concepts and methods used in social sciences. Topics may include relation between social processes and individual psychology, logic of explanation in social sciences, determinism and spontaneity in history, interpretation of cultures radically different from one's own. Students with primary interest and advanced preparation in a social science are encouraged to enroll. May be repeated for credit with consent of instructor.

230. Seminar: Logic. (4) May be repeated for credit with consent of instructor.

231. Seminar: Intensional Logic. (4) Topics may include logic of sense and denotation, modal logic, logic of demonstratives, epistemic logic, intensional logic of *Principia Mathematica*, possible worlds semantics. May be repeated for credit with consent of instructor.

232. Philosophy of Science. (4) Selected topics in philosophy of science. May be repeated for credit with consent of instructor.

233. Seminar: Philosophy of Physics. (4) May be repeated for credit with consent of instructor.

Group III. Ethics and Value Theory

241. Topics in Political Philosophy. (4) Requisites: course 150 or C156 or 157A or 157B or any two philosophy courses. Examination of one or more topics in political philosophy (e.g., justice, democracy, human rights, political obligation, alienation). May be repeated for credit with consent of instructor.

245. Seminar: History of Ethics. (4) Selected topics. May be repeated for credit with consent of instructor.

246. Seminar: Ethical Theory. (4) Selected topics. Content varies from term to term. May be repeated for credit with consent of instructor.

C247. Topics in Political Philosophy. (4) (Formerly numbered 247.) Lecture, three hours; discussion, one hour; outside study, eight hours. Analysis of some basic concepts in political theory. May be repeated for credit with consent of instructor. May be concurrently scheduled with course C156. S/U or letter grading.

248. Problems in Moral Philosophy. (4) Intensive study of some leading current problems in moral philosophy. May be repeated for credit with consent of instructor.

255. Seminar: Aesthetic Theory. (4) Selected topics. May be repeated for credit with consent of instructor.

M256. Topics in Legal Philosophy. (4) (Same as Law M217.) Lecture, three hours. Examination of topics such as concept of law, nature of justice, problems of punishments, legal reasoning, and obligation to obey the law. May be repeated for credit with consent of instructor.

M257. Seminar: Philosophy of Law. (4) (Same as Law M524.) Seminar, three hours. Selected topics in philosophy of law. May be repeated for credit with consent of instructor.

Group IV. Metaphysics and Epistemology

271. Seminar: Topics in Metaphysics and Epistemology. (4) Discussion, three hours. May be repeated for credit with consent of instructor.

275. Human Action. (4) Preparation: two upper division philosophy courses. Examination of theories, concepts, and problems concerning human actions. Topics may include analysis of intentional actions; determinism and freedom; nature of explanations of intentional actions. May be repeated for credit with consent of instructor.

280. 20th-Century Continental Philosophy. (4) Selected topics in 20th-century continental European philosophy. May be repeated for credit with consent of instructor.

281. Seminar: Philosophy of Mind. (4) May be repeated for credit with consent of instructor.

282. Seminar: Metaphysics. (4) May be repeated for credit with consent of instructor.

283. Seminar: Theory of Knowledge. (4) May be repeated for credit with consent of instructor.

284. Seminar: Philosophy of Perception. (4) May be repeated for credit with consent of instructor.

285. Philosophy of Psychoanalysis. (4) Examination of topics such as nature and validity of psychoanalytic explanations and interpretations, psychoanalysis and language, metapsychological concepts such as the unconscious, the ego, id, superego, defense mechanisms, and psychoanalytic conception of human nature.

286. Philosophy of Psychology. (4) Relevance of computer simulation to accounts of thinking and meaning; relations between semantical theory and learning theory; psychological aspects of theory of syntax; behaviorism, functionalism, and alternatives; physiology and psychology.

287. Seminar: Philosophy of Language. (4) May be repeated for credit with consent of instructor.

288. Seminar: Wittgenstein. (4) Seminar, three hours. May be repeated for credit with consent of instructor.

289. Seminar: Philosophy of Religion. (4) May be repeated for credit with consent of instructor.

290. Workshop: Philosophy of Language. (4) Seminar, two hours. Ongoing discussion of current issues in philosophy of language based on contemporary texts and current research. Presentations of ideas by attending faculty and graduate students with open discussion. May be repeated for credit with consent of instructor.

299. Seminar: Philosophical Research. (4) Seminar, three hours. Preparation: advancement to candidacy. Presentation of ongoing research by graduate students or faculty members. Participants make presentations, analyze and discuss presentations of others, and read and discuss philosophical texts related to presentations. May be repeated for credit with consent of instructor. S/U grading.

Special Studies

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching College Philosophy. (2 to 4) Seminars, workshops, and apprentice teaching. Selected topics, including evaluation scales, various teaching strategies and their effects, and other topics in college teaching. May be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Studies. (2 to 8) Properly qualified graduate students who wish to pursue a problem through reading or advanced study may do so if their proposed project is acceptable to a staff member. May be repeated for credit. S/U or letter grading.

597. Directed Studies for Graduate Examinations. (2 to 8) Preparation for M.A. comprehensive examination or Ph.D. oral qualifying examinations. S/U grading.

599. Research for Ph.D. Dissertation. (2 to 8) Preparation: advancement to Ph.D. candidacy. May be repeated for credit. S/U grading.

PHYSICS AND ASTRONOMY

College of Letters and Science

UCLA
3-174 Knudsen Hall
Box 951547
Los Angeles, CA 90095-1547
(310) 825-3224

Ferdinand V. Coroniti, Ph.D., *Chair*
Charles D. Buchanan, Ph.D., *Vice Chair, Academic Affairs*
William E. Slater, Ph.D., *Vice Chair, Resources*
Edward L. Wright, Ph.D., *Vice Chair, Astronomy*

Professors

Ernest S. Abers, Ph.D.
Katsushi Arisaka, Ph.D.
Maha Ashour-Abdalla, Ph.D.
Eric E. Becklin, Ph.D.
Robijn F. Bruinsma, Ph.D.
Charles D. Buchanan, Ph.D.
Sudip Chakravarty, Ph.D.
David B. Cline, Ph.D.
Ferdinand V. Coroniti, Ph.D.
Robert D. Cousins, Ph.D.
John M. Dawson, Ph.D.
Eric D'Hoker, Ph.D.
Sergio Ferrara, Ph.D.
Christian Fronsdal, Ph.D.
Walter N. Gekelman, Ph.D.
Graciela Gelmini, Ph.D.
George Grüner, Ph.D.
Jay Hauser, Ph.D.
Károly Holczer, Ph.D.
Hong Wen Jiang, Ph.D.
Michael A. Jura, Ph.D.
Steven Kivelson, Ph.D.
Leon Knopoff, Ph.D.
Matthew Malkan, Ph.D.
Ian McLean, Ph.D.
George J. Morales, Ph.D.
Mark Morris, Ph.D.
Bernard M.K. Neffkens, Ph.D.
William I. Newman, Ph.D.
Richard E. Norton, Ph.D.
C. Kumar N. Patel, Ph.D.
Roberto Peccei, Ph.D.
Rene Pellat, Ph.D.
Claudio Pellegrini, Ph.D.
Seth J. Putterman, Ph.D.
Joseph Rudnick, Ph.D.
Peter E. Schlein, Ph.D.
William E. Slater, Ph.D.
Reiner L. Stenzel, Ph.D.
E.T. Tomboulis, Ph.D.
Jean L. Turner, Ph.D.
Roger K. Ulrich, Ph.D.
Charles A. Whitten, Jr., Ph.D.
Gary A. Williams, Ph.D.
Alfred Y. Wong, Ph.D.
Chun Wa Wong, Ph.D.
Edward L. Wright, Ph.D.
Benjamin Zuckerman, Ph.D.

Professors Emeriti

Lawrence H. Aller, Ph.D.
Hans E. Bommel, Ph.D.
Rubin Braunstein, Ph.D.
Nina Byers, Ph.D.
Marvin Chester, Ph.D.
W. Gilbert Clark, Ph.D.
John M. Cornwall, Ph.D.
Robert J. Finkelstein, Ph.D.
Burton D. Fried, Ph.D.
Roy P. Haddock, Ph.D.
George J. Igo, Ph.D.
Kenneth R. Mackenzie, Ph.D.

Steven A. Moszkowski, Ph.D.
 Mirek Plavec, Ph.D.
 Daniel M. Popper, Ph.D.
 Robert A. Satten, Ph.D.
 David S. Saxon, Ph.D. (*University President Emeritus*)
 Donald H. Stork, Ph.D.
 Eugene Y. Wong, Ph.D.
 Byron T. Wright, Ph.D.

Associate Professors

Zvi Bern, Ph.D.
 Stuart Brown, Ph.D.
 Steven Cowley, Ph.D.
 Douglas Durian, Ph.D.
 Andrea Ghez, Ph.D.
 James Rosenzweig, Ph.D.

Assistant Professors

Huan Huang, Ph.D.
 David Saltzberg, Ph.D.

Lecturer S.O.E.

Arthur Huffman, Ph.D.

Lecturer

William Layton, M.Ed. (*M.A.T. Program*)

Adjunct Professors

Muzaffer Atac, Ph.D.
 Viktor Decyk, Ph.D.
 Phillip Pritchett, Ph.D.

Scope and Objectives

Since the time of the ancient Greeks, a natural affinity has existed between astronomy and physics, and the intellectual development of the two disciplines has often proceeded synergistically. Newton's discovery of the laws of mechanics and universal gravitation not only explained motion on Earth, but brought the heavens and Earth into a single quantitative framework in which both are governed by the same laws. The revolutionary discoveries of twentieth-century physics — quantum mechanics and nuclear physics — were rapidly adopted by astronomers to interpret the spectroscopic observations of the stars and to construct accurate models of stellar structure. Einstein's general theory of relativity predicted the expansion of the universe and that most awesome compaction of matter — the black hole.

Today astronomers study the accretion of matter onto supermassive black holes in quasars and search the most distant regions of the universe to learn about the exotic physical conditions which existed when the universe's expansion was only fractions of a second old. By measuring the gravitational interactions on distance scales from galaxies to the vast superclusters of galaxies, astronomers have concluded that most of the universe's matter is dark or nonluminous; physicists have speculated that this dark matter may consist of yet-undiscovered exotic particles which are predicted by the most advanced theories of elementary particle physics.

Department of Physics and Astronomy faculty members and students are able to study the universe in the holistic manner which is demanded by the breadth of these two disciplines.

Undergraduate Study

The Department of Physics and Astronomy offers a choice of three undergraduate majors: the B.S. degree program in Astrophysics, the B.S. degree program in Physics, and the B.A. degree program in General Physics. Courses taken to fulfill any of the requirements for the majors must be taken for a letter grade.

Astronomy Courses

The department offers general courses to all University students, including those who are not science oriented.

The Astronomy 2A-2B two-term sequence covers the material in courses 3, 4, and 6. Students may take one sequence or the other, but not both.

Astronomy 3 is the fundamental one-term course for students who do not major in physical sciences and should be taken in the first or second year. Students who had an astronomical introductory course in high school should take either courses 2A-2B, or 3H.

Astronomy 4, 5, and 6 develop the topics covered in course 3 to somewhat greater depths. They use more mathematics but are still aimed at nonscience majors. Course 4 details the stars and stellar systems; course 5 concentrates on the problem of life in the universe; course 6 discusses endpoints of stellar evolution and the structure and evolution of the universe. These three courses may be taken in any order by students with a grade of C or better in course 3, or whose astronomical knowledge is on a similar level.

Students who have had at least two courses in high school algebra and one course in trigonometry are advised to take, instead of Astronomy 3, the parallel honors course, Astronomy 3H. Declared or potential majors in Astrophysics or in physical sciences should take course 3H if they need an elementary introductory course in astronomy.

Astronomy 81 and 82 are general survey courses recommended for science majors in their second year. They systematically introduce astrophysics and require a good background in physics and mathematics (at least two terms of the Physics 1 series and two terms of the Mathematics 31/32 series).

Students of junior and senior standing in Physics or related sciences are invited to select any of these courses: 115, 117, 127, 140, 180.

Physics Courses

Students who wish to use physics to satisfy part of the general education requirements in the physical sciences and who have no mathematics background beyond the high school mathematics required for admission to UCLA may take Physics 10.

Physics 1Q is intended for entering freshman Physics majors and other interested students. Although it is not a required course or a part of or requisite to any general physics sequence of courses, its purpose is to indicate the nature of

current research problems in physics on a level intended to be attractive to entering students with a good high school science and mathematics background.

Physics 1A, 1B, and 1C, or 2AH, 2BH, and 17 form sequences of courses in general physics for majors in Physics.

The department takes into account prior preparation in physics. If students feel their background would permit acceleration, they may be exempted from one course in the 1A, 1B, 1C sequence by taking the final examination with a class at the end of any term. This serves as a placement examination. A satisfactory score on one or both parts of the College Board Advanced Placement Physics C Test may also serve as a placement examination, but placement is not automatic. Students should discuss such possibilities with their departmental adviser.

Physics 6A, 6B, 6C form a one-year sequence of courses in basic physics for students in the biological and health sciences.

Physics 10 is a one-term, nonlaboratory course which surveys the whole field of physics. Any two or more courses from Physics 1A, 6A, and 10 are limited to six units credit.

Astrophysics B.S.

Preparation for the Major

Required: Astronomy 81, 82; Physics 1A, 1B, 1C, 4AL, and 4BL, or 2AH, 2BH, and 17; Mathematics 31A, 31B, 32A, 32B, 33A, 33B; Program in Computing 3 or 10A. *Recommended:* Astronomy 3H, Chemistry and Biochemistry 20A. Systematic study of astrophysics should begin with Astronomy 81 and 82, taken in the second year.

The Major

Required: Astronomy 115, 117, 127, 140, 180; Physics 105A, 105B, 110A, 110B, 115A, 115B, 131. *Recommended:* Physics 108, M122, 123, 124, 132, 140A.

Honors Program

Senior majors in Astrophysics with a 3.4 grade-point average in all astronomy, mathematics, and physics courses are eligible for the honors program in astrophysics. In addition to completing all courses required for the major, students must complete two terms of Astronomy 199. To receive honors and highest honors at graduation, the grade-point average must remain at 3.4 or better, and work in course 199 must reflect original research and be accepted by the departmental honors committee.

Physics B.S.

The Physics major should be taken if students intend to continue toward the Ph.D. in Physics.

Preparation for the Major

Required: Physics 1A, 1B, 1C, 4AL, and 4BL, or 2AH, 2BH, and 17; Chemistry and Biochemistry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on

the major is available from the Undergraduate Office, 3-160 Knudsen Hall.

The Major

Required: Physics 105A, 105B, 110A, 110B, 112, 115A, 115B, 131. The remainder of the course of study consists of a plan, to be worked out by students in consultation with their designated departmental adviser, that details which courses they take to complete the degree. There are four overall requirements: (1) the plan must be worked out five terms before students expect to graduate; (2) the plan must include at least two courses from the Physics 180 series, which should be taken in the senior year; (3) there must be at least five upper division courses in the plan; (4) there must be written rationale for the plan. Except for the Physics 180 laboratories, the courses need not be in the Physics and Astronomy Department. However, it is expected that the courses fit into a coherent structure. It is important that the structure and rationale are thought out carefully, as the plan must be endorsed by the designated adviser and be approved by the departmental academic affairs committee. Pre-approved plans of study are available from the undergraduate advisers. A C average is required in all courses taken to satisfy the major requirements.

Students preparing for graduate school should take additional courses in physics and mathematics. Physics 108, 114, 116, M122, 123, 124, 126, 132, 140A, and 140B are recommended.

To be admitted as Physics majors, **transfer students** with 80 or more units must have completed one year of calculus (equivalent to Mathematics 31A, 31B, 32A) and one year of calculus-based physics with laboratory (equivalent to Physics 1A, 1B, 1C, 4AL, 4BL), with grades of C or better. An additional year of calculus is recommended.

Honors Programs

The department offers three honors programs leading to graduation with honors or highest honors in physics. Students are eligible after completing the preparation for the major and four upper division physics courses with an overall grade-point average of 3.0 and a 3.5 GPA in upper division physics and mathematics courses. Contact the Undergraduate Office for a complete description of the programs and an application.

General Physics B.A.

The General Physics major is intended to provide the necessary flexibility for fields in which a strong background of knowledge in physics would be helpful. If students intend to continue work toward the Ph.D. in Physics, they are advised to work for the B.S. in Physics as described earlier.

Preparation for the Major

Required: Physics 1A, 1B, 1C, 4AL, and 4BL, or 2AH, 2BH, and 17; Chemistry and Biochem-

istry 20A, 20B, 20L; Mathematics 31A, 31B, 32A, 32B, 33A, 33B. A detailed brochure on the major is available from the Undergraduate Office.

The Major

Required: Physics 105A, 110A, 110B, 112, 115A, 131, one course from the 180 series, two upper division physics electives (excluding C185 and 199), and five upper division courses in no more than two other UCLA departments. A C average in the upper division physics courses is required.

Instructional Credentials

Students may earn credentials for teaching physical sciences and other subjects in California elementary and secondary schools. Completion of the instructional credential program in the Teacher Education Laboratory is required. Consult the Department of Education, 1009 Moore Hall, (310) 825-8328, for information.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Astronomy

Master's Degrees

The department offers the Master of Science (M.S.) degree and the Master of Arts in Teaching (M.A.T.) degree in Astronomy; however, the department is not admitting students to the M.A.T. program at this time.

Master of Science

Admission

The basic requirement for admission to the M.S. program in Astronomy is a bachelor's degree in physics or astronomy. Applicants in closely related fields (such as mathematics or chemistry) may be admitted at the discretion of the department. Applicants should submit at least three letters of recommendation and scores from the Graduate Record Examination (GRE) General Test and Subject Test in Physics.

Entering students or those who have not been admitted to candidacy for the Ph.D. should consult with the chair of graduate admissions at the beginning of the Fall Quarter to determine a program for the year.

Areas of Study

Consult the department.

Course Requirements

Eleven courses are required for the master's degree, of which at least 10 must be at the graduate level in physics and astronomy. At least one of the courses must consist of a quarter of work on the second-year research project. Courses taken in the 300 or 500 series may not be applied toward the total course requirements or the graduate course requirement.

Comprehensive Examination Plan

The comprehensive examination consists of satisfactory completion of the second-year research project, culminating in a written report of the methods used and results obtained, and the oral portion of the comprehensive examination at the master's level. The oral portion is described in more detail under the description of the written and oral qualifying examinations for the doctorate.

Thesis Plan

None.

Master of Arts in Teaching

Admission

The department is not admitting students to the M.A.T. program at this time.

Areas of Study

It is not required to designate an area of specialization for the M.A.T. degree

Course Requirements

Nine courses are required for the academic portion of the M.A.T. program. They must include at least five graduate courses in astronomy, mathematics, or physics, or 100- or 200-series courses in education required for the instructional credential. Although it does not count for degree credit, Physics 370 is also required. Courses taken in the 300 or 500 series may not be applied toward the total course requirement or the graduate course requirement.

In order to obtain a secondary credential with the M.A.T. in Astronomy, additional courses in education, including supervised teaching, should be taken.

Comprehensive Examination Plan

The comprehensive examination plan is the same as for the M.S. degree.

Thesis Plan

None.

Doctoral Degree

Admission

The basic requirement for admission to the program leading to the Ph.D. degree in Astronomy is a bachelor's degree in physics or astronomy. Students in closely related fields (such as mathematics or chemistry) may be admitted at the discretion of the department. Applicants should submit at least three letters of recommendation and scores from the Grad-

uate Record Examination (GRE) General Test and Subject Test in Physics.

Entering students or those who have not been admitted to candidacy for the Ph.D. should consult with the chair of graduate admissions at the beginning of the Fall Quarter to determine a program for the year.

Major Fields or Subdisciplines

Consult the department.

Course Requirements

The required courses for the Ph.D. degree are Astronomy 270 through 276, Physics 210A, 210B, 221A. During the Fall and Winter Quarters of the second year, students must enroll in Astronomy 277A-277B. In addition, Astronomy 278 must be taken at least once per year for the first two years. Students must take the nine core courses in astronomy and physics offered during the first five quarters of residence and achieve a grade-point average of at least B, averaged over all astronomy and physics graduate courses taken during this time. Exceptions or substitutions can be made by petition only and must be arranged in advance or, for students transferring from another institution, during or before the first quarter of residence.

Research Project. Students must satisfactorily complete the two-quarter second-year research project, culminating in a written report of the methods and the results of the research performed. Before undertaking the second-year research project, students must identify a faculty adviser who is willing to oversee their work on the project.

Written and Oral Qualifying Examinations

Inasmuch as the primary goal of the graduate program in astronomy is to train students to do research at the Ph.D. level, the purpose of the master's comprehensive/doctoral qualifying examination is (1) to assess students' general knowledge of astronomy and physics at the graduate level and (2) to assess students' capacity to perform fundamental research, and thus to become successful research scientists. The structure of the comprehensive examination is designed accordingly.

The master's comprehensive/doctoral qualifying examination and the requirements leading up to it are administered by a graduate evaluation committee, appointed by the vice chair, and consisting of three members. The graduate evaluation committee evaluates all second-year students every Spring Quarter.

All second-year students are assessed by the graduate evaluation committee for their performance on the qualifying examination on the basis of the following:

- (1) A collective assessment of the written report on the second-year research project, which constitutes the written qualifying examination.
- (2) Performance on the oral portion of the comprehensive examination, administered by

the comprehensive examination committee at the beginning of the Spring Quarter of the student's second year. During this oral portion of the comprehensive examination, students present the results of their second-year research project and are expected to be able to respond to questions and to solve basic problems from all core areas of astrophysics in which they have had the opportunity to take the course following the normal schedule of classes.

The graduate evaluation committee notifies students of the assessment of their performance on the examination by June 30. The examination is based primarily on the combination of the oral examination plus the written report on the second-year research project. In addition, the committee reviews the instructors' written narratives and the file of the student's final examinations in all graduate courses taken in order to place the student's performance on the oral examination into a maximally broad context. The potential outcomes of the assessment are

- (1) Pass — with immediate eligibility to proceed to the University Oral Qualifying Examination.
- (2) No pass — with the possibility of reassessment in the following year on the basis of a specific written list of requirements supplied by the graduate evaluation committee. (This option is meant to be used sparingly for students with a single, identifiable and presumably correctable weakness, but who are otherwise above the passing threshold.) The no-pass option can only be used once for any particular student.
- (3) Terminal master's pass — allowing the student only to finish any outstanding course requirements for the master's degree, if any.
- (4) Fail — resulting in immediate termination of the student's affiliation with the department.

After the scope of the Ph.D. dissertation research has been clearly defined and in consultation with the student's dissertation adviser, a doctoral committee is nominated, approved by the department chair, and finally appointed by the dean of the Graduate Division. This committee, generally consisting of three members from the Physics and Astronomy Department and one member from another department, conducts the University Oral Qualifying Examination. The main purpose of the examination is to discuss and evaluate the student's proposed dissertation problem, but at the discretion of the committee, questions may be asked with regard to other material in the student's field of specialization and related matters. The committee members guide, read, approve, and certify the dissertation. At least two members from the Physics and Astronomy Department and at least one outside member must serve as certifying members for the dissertation. At the end of the examination, the committee decides whether a final oral examination is required.

The oral qualifying examination is taken no later than the tenth quarter in residence.

Physics

Master's Degrees

The department offers the Master of Science (M.S.) degree in Physics and the Master of Arts in Teaching (M.A.T.) degree.

Master of Science

Admission

Applicants to the M.S. program in Physics must have an excellent undergraduate record in addition to meeting the University minimum requirements. Applicants are required to submit three letters of recommendation and scores from the Graduate Record Examination (GRE) Subject Test in Physics. International applicants applying for financial support (fellowships, teaching and research assistantships) should have a letter of recommendation (included as one of the three required letters of recommendation) which comments on their verbal ability in English. The Test of English as a Foreign Language (TOEFL) is a University entrance requirement.

Areas of Study

It is not required to designate an area of specialization for a terminal master's degree.

Course Requirements

The University requires a total of nine courses for the M.S. degree. To satisfy the minimum requirement of six graduate courses in physics specified by the department, it is recommended that five of the minimum requirement of six be the five fundamental core courses: Physics 210A, 210B, 215A, 221A, 221B, since the comprehensive examination is based on the content of these courses. Students must also take, and pass with a grade of B or better, one of the following breadth courses: Physics 220, 221C, 231A. The remaining three courses of the minimum nine courses required for the M.S. degree may be satisfied through upper division or graduate courses in physics or a related field, which are acceptable to the Physics and Astronomy Department for credit toward the M.S. degree, with the restriction that no more than two may be chosen from Physics 596 and/or seminar courses. Physics 597 and 598 may not be applied.

Comprehensive Examination Plan

A passing grade on the written comprehensive examination is required. If students fail to pass the examination at the master's level, they may take it a second time the next quarter it is given. For more detailed information, see Written and Oral Qualifying Examinations in the Doctoral Degree section.

Thesis Plan

Although the department operates under the comprehensive examination plan rather than the thesis plan, arrangements can usually be made for students to write a master's thesis,

provided they have a particularly interesting subject and provided a professor is willing to undertake the guidance of their project. In this case, students must petition the committee of graduate advisers for permission to pursue the thesis plan. If the petition is approved, the comprehensive examination is waived.

Master of Arts in Teaching

Admission

For information about the M.A.T. program in Physics, direct inquiries to the Director of the Master of Arts in Teaching Program, Department of Physics and Astronomy, 3-164 Knudsen Hall, UCLA, Box 951547, Los Angeles, CA 90095-1547.

Areas of Study

It is not required to designate an area of specialization for the M.A.T. degree.

Course Requirements

This degree leads to qualification for instructional credentials at the secondary school or junior college level. The University requires a total of 12.5 courses for the M.A.T. degree. The program consists of at least five graduate physics courses, four of which are chosen from Physics 210A, 210B, 215A, 221A, 221B, and five professional (300 series) courses.

Courses required are (1) the five graduate physics courses and (2) the courses necessary for completion of the preliminary State of California Single Subject Instructional Credential, K-12 (Education 406A-406B-406C, 407A-407B, 312, 315A-315B, 330B, 330C, and Physics 370, which is a special physics teaching laboratory).

Courses in the 500 series are not applicable toward the M.A.T. degree. Students are required to see the adviser at the beginning of each quarter through the completion of the degree.

Comprehensive Examination Plan

A passing grade on the written comprehensive examination is required. Students who fail to qualify at the master's level of achievement may repeat the examination a second time.

Thesis Plan

None.

Doctoral Degree

Admission

Applicants to the program leading to the Ph.D. degree in Physics must have an excellent undergraduate record in addition to meeting the University minimum requirements. Applicants are required to submit three letters of recommendation and scores from the Graduate Record Examination (GRE) Subject Test in Physics. International applicants applying for financial support (fellowships, teaching and research assistantships) should have a letter of recommendation (included as one of the three required letters of recommendation) which comments on their verbal ability in English.

The Test of English as a Foreign Language (TOEFL) is a University entrance requirement.

Major Fields or Subdisciplines

Doctoral degrees are based on original work, generally in one of the following fields of specialization: accelerator physics; elementary particles; intermediate energy and nuclear physics; low-temperature/acoustics; plasma and astrophysics; condensed matter, including solid-state; and spectroscopy.

Arrangements can also be made to obtain a Ph.D. in Physics while doing research in interdisciplinary fields such as biophysics, astrophysics, and geophysics. The details of each program should be established in consultation with the graduate affairs officer.

Course Requirements

By the end of the first year of graduate study students are expected to acquire a mastery of the core graduate physics material represented by Physics 210A and 210B (electromagnetic theory), 215A (statistical physics), and 221A and 221B (quantum mechanics). Detailed syllabi for these courses are available in the graduate counselor's office. Since the material in these core courses represents the body of knowledge tested on the written comprehensive examination, usually all or most of the five courses are the student's main course load in the first year of graduate study.

No later than the fourth quarter of residence, students are expected, in consultation with their adviser, to have begun taking a series of courses, seminars, and tutorials to prepare them for original research in a given area of specialization. Information produced by various area committees on preferred course sequences and programs is available to students and to their advisers. No later than the sixth quarter of residence, students are expected to begin taking a sequence of Physics 596 courses with a faculty member in their chosen field of specialization. The purpose of these 596 courses is to prepare students for original Ph.D. dissertation research and to enable them to obtain a Ph.D. research sponsor. It is the responsibility of the faculty member with whom the 596 courses are taken to provide the student with a frank, on-going evaluation of progress toward these goals. By the second quarter of the 596 sequence, students are expected to make a substantive oral presentation describing the results of a problem in the 596 program before an audience which includes the faculty member(s) with whom they are taking course 596 and three other faculty members. It is the responsibility of the faculty member to specify the content of the presentation. The function of the three additional faculty members is to serve as a departmental resource in the event that difficulties arise during the presentation. The presentation is intended both to allow the faculty member to assess the student's ability to carry out research and to provide a forum to discuss the student's research goals.

No later than the end of the eighth quarter of residence, students are expected to make a formal arrangement with a faculty member who agrees to serve as the Ph.D. research sponsor. This agreement, which includes a general statement on the direction of the Ph.D. dissertation research, is communicated to the graduate affairs officer. If by the end of the eighth quarter of residence students have not obtained a Ph.D. research sponsor, this situation is referred by the graduate affairs officer to the Committee of Graduate Advisers. The committee then makes a decision on whether the student should continue in the graduate program based on discussions with the student, the student's 596 advisers, and other concerned parties.

All students must fulfill a breadth requirement by passing one of the following with a grade of B or better: Physics 220, 221C, or 231A. In addition, students who have not taken Physics 132 or its equivalent in undergraduate status must do so at the beginning of the graduate program. The core and breadth requirements should be completed by the fifth quarter in residence.

Written and Oral Qualifying Examinations

A written comprehensive examination is required of all graduate students. The examination is administered by a departmental comprehensive examination committee and is graded as follows: (1) pass at the Ph.D. level of achievement; (2) pass at the master's level of achievement; or (3) fail.

The written comprehensive examination consists of two three-hour sections given on consecutive days, and its scope is defined by the graduate physics material in the five core courses (Physics 210A, 210B, 215A, 221A, and 221B).

The written comprehensive examination is offered twice a year, in the week before the beginning of classes in the Fall Quarter and in the period between the Winter and Spring Quarters.

Students entering the graduate program in the Fall Quarter are expected to take the written comprehensive examination before their fourth quarter of residence.

Students who fail the examination at the desired level and want to repeat it must take it the next time it is offered.

After the scope of the Ph.D. dissertation research has been clearly defined and in consultation with the student's dissertation adviser, a doctoral committee is nominated, approved by the department chair, and finally appointed by the dean of the Graduate Division. This committee, generally consisting of three members from the Physics and Astronomy Department and one member from another department, conducts the University Oral Qualifying Examination. The main purpose of the examination is to discuss and evaluate the student's proposed dissertation problem, but at the discretion of

the committee, questions may be asked in regard to other material in the student's field of specialization and related matters. The committee members guide, read, approve, and certify the dissertation. At least two members from the Physics and Astronomy Department and at least one outside member must serve as certifying members for the dissertation. At the end of the examination, the committee decides whether a final oral examination is required. The oral qualifying examination is taken no later than the tenth quarter in residence.

Astronomy

Lower Division Courses

2A-2B. Introduction to the Physical Universe. (4-4) Lecture, three hours; discussion, one hour. Thorough introductory survey of astronomy for students not planning to major in physical sciences. Same topics as course 3 but in greater depth, with emphasis on physical reasoning. **2A.** Planets and Stars; **2B.** Galaxies and Cosmology. Enforced requisite: course 2A (C or better).

3. Astronomy: Nature of the Universe. (4) Lecture, three hours; discussion, one hour. Not open to students with credit for or currently enrolled in course 3H or 81 or 82. No special mathematical preparation required beyond that necessary for admission to the University in freshman standing. Course for general University students, normally not intending to major in physical sciences, on development of ideas in astronomy and what has been learned of the nature of the universe, including recent discoveries and developments.

3H. Introductory Astronomy and Astrophysics. (4) Lecture, three hours; discussion, one hour. Not open to students with credit for or currently enrolled in course 3. Introduction to astronomy and astrophysics for freshmen who are seriously interested in science. Requires ability to understand mathematical and physical concepts, but high school algebra and trigonometry classes provide sufficient qualification. Particularly recommended for declared or potential majors in Astrophysics or in physical and mathematical sciences.

4. Universe of Stars and Stellar Systems. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 3 or 3H. Essentially nonmathematical course for general University students with previous introduction to astronomy; sequel to course 3, dealing in greater detail with stars and stellar systems. Various observed types of stars in relation to their internal structure and evolutionary state. Interacting binary stars, pulsating stars, explosive stars (novae and supernovae). Mass loss from stars, stellar wind. Galactic and planetary nebulae and their relation to stars. Interstellar medium. Initial stages of stellar evolution (protostars, T Tauri stars) and final stages (degenerate and collapsed stars). Stellar systems from clusters to galaxies.

5. Life in the Universe. (4) Preparation: prior introduction to astronomy. Life on Earth and prospects for life elsewhere in the context of the evolution of the universe from the simple to complex. Course material primarily from astronomy and biology but includes some chemistry, geology, and physics. Selected topics treated in some depth, but with little or no formal mathematics.

6. Cosmology: Our Changing Concepts of the Universe. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 3 or 3H. Exposition of our ideas about the structure and evolution of the universe and its contents. Special and general relativity; black holes, neutron stars, and other endpoints of stellar evolution. Expanding universe, cosmic microwave background radiation, dark matter. Big Bang and inflation.

81. Astrophysics I: Stars and Nebulae. (4) Lecture, three hours; laboratory, one hour. Enforced requisites: Mathematics 31A, 31B, and Physics 1A or 2AH. Open to qualified sophomore and upper division students. Survey of our knowledge about stars: their distances, masses, luminosities, temperatures, and interrelations between these parameters. Methods and importance for astrophysics. Variable stars. Planetary and gaseous nebulae. P/NP or letter grading.

82. Astrophysics II: Stellar Evolution, Galaxies, and Cosmology. (4) Lecture, three hours; discussion, one hour. Enforced requisites: Mathematics 31A, 31B, and Physics 1A or 2AH. Recommended: course 81, Physics 1B and 1C, or 2BH and 17. Open to qualified sophomore and upper division students. Basic principles of stellar structure and evolution. Red giants, white dwarfs, novae, supernovae, neutron stars, and black holes. Pulsars and galactic X-ray sources. Milky Way galaxy and the interstellar medium. Extragalactic astronomy, galaxy clustering, active galactic nuclei, and quasars. Introduction to cosmology: Hubble law, thermal history of the Big Bang, and earliest moments of the universe. P/NP or letter grading.

88A-88Z. Lower Division Seminars. (2 each) Discussion, two hours; outside study, four hours. Limited to freshmen. Variable topics; consult *Schedule of Classes* for topics to be offered in a specific term. P/NP or letter grading.

88A. Cosmic Evolution. Varied astronomical and physical processes of evolution; discussion of how, over billions of years, basic mechanisms of cosmic evolution have transformed universe from fiery origin at Big Bang into abode for intelligent life.

Upper Division Courses

115. Statistical Mechanics and Its Application to Astrophysics. (4) Lecture, three hours; discussion, one hour. Requisites: Mathematics 31A, 31B, 32A, 32B, 33A, 33B, Physics 1A, 1B, and 1C, or 2AH, 2BH, and 17. Particle distributions, partition functions, black body radiation, Saha equation, degeneracy. Applications to stellar atmospheres, stellar interiors, and the interstellar medium. P/NP or letter grading.

117. Radiation and Fluids in Astrophysics. (4) Lecture, three hours. Requisite: course 115. Designed for junior/senior Astrophysics and Physics majors. Emission and absorption of radiation by matter, spectroscopy, spectral lines, and radiative transfer. Hydrodynamics and shock waves. Applications to stars, to interstellar and intergalactic media, and to the early universe.

127. Stellar Atmospheres, Interiors, and Evolution. (4) Lecture, three hours. Recommended requisites: courses 115, 117. Designed for senior Astrophysics and Physics majors. Physical conditions in stellar interiors. Energy production in stars. Stellar evolution from star formation through normally observed stages to white dwarfs, neutron stars, and black holes. Novae, supernovae, other variable stars, chromospheres and coronae of sun and stars. Evolution of binary stars. Analysis of stellar atmospheres.

140. Stellar Systems and Cosmology. (4) Lecture, three hours. Designed for senior Astrophysics and Physics majors. Properties of star clusters and galaxies, with particular emphasis on Milky Way galaxy. Clusters and superclusters of galaxies. Extragalactic distance scale. Quasars and active galaxies. Topics in cosmology, including expansion of the universe, microwave background, galaxy formation from primordial fluctuations, and observational constraints on the Big Bang.

180. Astrophysics Laboratory. (4) Lecture, two hours; laboratory, four hours. Designed for juniors/seniors in Astrophysics, Physics, or a related field. Lectures cover statistical methods in astrophysics, one- and two-dimensional random processes, and numerical methods. Laboratory experiments involve radio astronomy, interferometry, narrowband solar imaging, and visual photometry. Emphasis on use of computers for automatic collection of data and for processing two-dimensional astronomical images.

199. Special Studies. (2 or 4) Limited to senior Astrophysics and Physics majors (with an outstanding record). Special studies with an individual faculty member.

Graduate Courses

270. Fundamentals I: Fluids and Dynamics. (4) Lecture, three hours. Dynamics of gaseous flows and collisionless, self-gravitating systems. Basic equations of fluid dynamics, with application to shocks, winds, and accretion. The Jeans, Kelvin/Helmholtz, and Rayleigh/Taylor instabilities. Basic equations of stellar dynamics and application to relaxation processes, including virialization, core collapse, and dynamical friction.

271. Fundamentals II: Radiation. (4) Lecture, three hours. Radiative transitions in molecules, atoms, and nuclei. Sources of continuous and line radiation. Transition probabilities for spontaneous and stimulated emission and for absorption. Source function and equation of radiative transfer, with applications. Curve of growth and abundance determinations. Scattering processes, polarized light, masers.

272. Stellar Structure and Evolution. (4) Lecture, three hours. Structure and evolution of stars, stellar energy sources and problems of nucleosynthesis, theory of variable stars, structure of the sun from helioseismology and neutrinos. Supernova processes. Binary systems.

273. Stellar Photospheres. (4) Lecture, three hours. Physics of stellar photospheres. Radiative transfer under stellar atmosphere conditions. Continuous and line spectra of stars. Chemical abundances in stars. Stellar winds and stars with extended atmospheres.

274. Galaxies. (4) Lecture, three hours. Galaxy properties: kinematics, mass, morphology, stellar populations; stellar orbits and spiral structure; galaxy formation; galaxy clusters, collisions, and mergers; observations and theory of quasars and active galactic nuclei.

275. Cosmology. (4) Lecture, three hours. Requisite: course 274. Thermal and physical history of the universe. Interaction of matter and cosmic microwave background radiation. Study of inhomogeneities in the universe from inflationary epoch to the current large-scale structure.

276. Instrumentation and Observational Techniques. (4) Lecture, three hours. Telescopes, optical principles, cameras, and spectrographs. Optical detectors; photomultiplier tubes, CCDs. Infrared detectors and arrays. Radio detectors. X-ray and gamma-ray detectors. Interferometry and aperture synthesis. Data analysis techniques. Statistical methods.

277A-277B. Astronomy Research Project. (6-6) Designed for second-year graduate astronomy students. Two-term research project planned in conjunction with a faculty adviser on any suitable research topic in astronomy or astrophysics, culminating in a written report at end of second term. S/U (course 277A) or letter (course 277B) grading.

278. Special Topics in Astronomy. (2 or 4) Informal course with lecture/seminar format, focusing on one of a set of specific topics in astronomy. S/U (two-unit course) or letter (four-unit course) grading.

279. Seminar: Current Astronomical Research. (2) Astronomy and astrophysics colloquium with lectures on current research by local and visiting researchers. S/U grading.

M285. Origin and Evolution of Solar System. (4) (Same as Earth and Space Sciences M285.) Dynamical problems of solar system; chemical evidences from geochemistry, meteorites, and solar atmosphere; nucleosynthesis; solar origin, evolution, and termination; solar nebula, hydromagnetic processes, formation of planets and satellite systems. Content varies from year to year. May be repeated for credit. S/U grading.

296. Research Topics in Astronomy. (2) (Formerly numbered 296A-296Z.) Advanced study and analysis of current topics in astronomy. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

M297. Research Tutorial: Astroparticle Physics. (2 or 4) (Same as Physics M297.) Lecture, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of current interest in astroparticle physics. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596A. Directed Individual Studies. (4 to 10) May be repeated at discretion of department.

596L. Advanced Study and Research at Lick Observatory. (4 to 12) Designed for graduate students who require observational experience, as well as those working on observational problems for their thesis. May be repeated at discretion of department.

599. Ph.D. Research and Writing. (10 to 12) May be repeated at discretion of department.

Physics

Lower Division Courses

1A. Physics for Scientists and Engineers: Mechanics. (5) Lecture/demonstration, four hours; discussion, one hour. Recommended preparation: high school physics, one year of high school calculus or Mathematics 31A and 31B. Enforced requisites: Mathematics 31A, 31B (corequisite). Recommended corequisite: Mathematics 32A. Motion, Newton laws, work, energy, linear and angular momentum, rotation, equilibrium, gravitation. P/NP or letter grading.

1B. Physics for Scientists and Engineers: Oscillations, Waves, Electric and Magnetic Fields. (5) Lecture/demonstration, four hours; discussion, one hour. Enforced requisites: course 1A, Mathematics 31B, 32A (corequisite). Recommended corequisite: Mathematics 32B. Damped and driven oscillators, mechanical and acoustic waves. Electrostatics: electric field and potential, capacitors, and dielectrics. Currents and DC circuits. Magnetic field. P/NP or letter grading.

1C. Physics for Scientists and Engineers: Electrodynamics, Optics, and Special Relativity. (5) Lecture/demonstration, four hours; discussion, one hour. Enforced requisites: courses 1A, 1B, Mathematics 32A, 32B (corequisite). Recommended corequisite: Mathematics 33A. Ampere law, Faraday law, inductance, and LRC circuits. Maxwell equations in integral and differential form. Electromagnetic waves. Light, geometrical, and physical optics. Special relativity. P/NP or letter grading.

1Q. Contemporary Physics. (2) Review of current problems in physics, with emphasis on those being studied at UCLA. Significance of the problems and their historical context. P/NP grading.

2AH. Physics for Scientists and Engineers: Mechanics (Honors). (5) Lecture/demonstration, four hours; discussion, one hour. Preparation: one year of high school physics. Enforced requisites: Mathematics 31A, 31B, 32A (corequisite). Introduction to classical mechanics for physics, physical sciences, and engineering majors. Motion. Newton laws, work energy, linear and angular momentum, rotation, equilibrium, gravitation, damped and driven oscillators, mechanical waves.

2BH. Physics for Scientists and Engineers: Electricity and Magnetism (Honors). (5) Lecture/demonstration, four hours; discussion, one hour. Enforced requisites: course 2AH, Mathematics 31B, 32A, 32B (corequisite). Introduction to electricity and magnetism for physics, physical sciences, and engineering majors. Electrostatics: electric field and potential, capacitors, and dielectrics. Current, resistance, and DC circuits. Magnetic fields and forces, Ampere law, Faraday law, inductance. AC circuits, Maxwell equations in integral and differential form. Electromagnetic waves.

3A. General Physics: Mechanics of Solids and Fluids. (4) Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Preparation: three years of high school mathematics including trigonometry or two years of high school mathematics and one-term college course in mathematics with trigonometry included in the group of courses or equivalent courses. Not open for credit to students with credit for course 8A or equivalent. Fundamentals of classical mechanics: Newton laws; conservation of momentum, angular momentum, energy; Kepler laws; dynamics of systems of particles; fluid mechanics.

3B. General Physics: Heat, Sound, Electricity and Magnetism. (4) Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: course 3A. Temperature, heat, and laws of thermodynamics. Introduction to wave motion, resonance. Sound and acoustics. Electric and magnetic fields. Electric power. Elements of DC and AC circuits.

3C. General Physics: Light, Relativity, and Modern Physics. (4) Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: course 3B. Light, optical instruments. Introduction to relativity. Electron and atom. Matter waves. Nuclear and particle physics.

4AL. Physics Laboratory for Scientists and Engineers: Mechanics. (2) Laboratory, three hours. Enforced requisites: courses 1A and 1B (corequisite), or 2AH. Experiments on measuring gravity, accelerated motion, kinetic and potential energy, impulse and momentum, damped and driven oscillators, resonance and vibrating strings. Computer data acquisition and analysis. Introduction to error analysis, including distributions and least-squares fitting procedures.

4BL. Physics Laboratory for Scientists and Engineers: Electricity and Magnetism. (2) Laboratory, three hours. Enforced requisites: courses 1A, 1B, and 1C (corequisite), or 2AH, 2BH, and 17 (corequisite), 4AL. Experiments on electric forces, fields, and potentials. Magnetic fields. Linear and nonlinear devices. Resistors, capacitors, and inductors. Modern circuits. Geometrical and physical optics.

6A. Physics for Life Sciences Majors: Statics and Dynamics. (4) Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisites: Mathematics 3A, 3B, 3C (corequisite). Statics and dynamics of forces, energy, and momentum, with applications to biological and biochemical systems. Physics of states of matter (solids, liquids, and gases) and of surfaces and interfaces as they apply to biological organisms. P/NP or letter grading.

6B. Physics for Life Sciences Majors: Sound, Light, and Hydrodynamics. (4) (Not the same as course 6B prior to Winter Quarter 1999.) Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: course 6A. Sound and electromagnetic waves, interference and diffraction, radioactivity, and hydrodynamics, with applications to biological and biochemical systems. P/NP or letter grading.

6BB. Physics for Life Sciences Majors: Electricity and Magnetism. (4) (Formerly numbered 6B.) Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: course 6A. P/NP or letter grading.

6C. Physics for Life Sciences Majors: Electricity, Magnetism, and Transport. (4) (Not the same as course 6C prior to Spring Quarter 1999.) Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: course 6B. Electrostatics in vacuum and in water. Electric current with applications to electrophysiology. Magnetism, especially NMR. Diffusion and heat flow, with applications to biological and biochemical systems. P/NP or letter grading.

6CC. Physics for Life Sciences Majors: Light and Modern Physics. (4) (Formerly numbered 6C.) Lecture/demonstration, three hours; discussion, one hour; laboratory, two hours. Enforced requisite: course 6B. P/NP or letter grading.

10. Physics. (4) Lecture, three hours; discussion, one hour. Not open for credit to students with credit for course 1A or 2AH or 6A. Special mathematical preparation beyond that necessary for admission to University in freshman standing not required. Topics include planetary motion, Newton laws, gravitation, electricity and magnetism, wave motion, light, sound, and heat, relativity, quantum mechanics, atoms, and subatomic particles. As time permits, development of physical ideas placed in cultural and historical perspective. P/NP or letter grading.

17. Light, Atomic Nature of Matter, and Special Relativity. (4) Lecture, three hours; discussion, one hour. Enforced requisites: courses 2AH and 2BH (or 1A, 1B, and 1C), Mathematics 32A, 32B, 33A (corequisite). Electromagnetic waves, geometrical and physical optics, photons, photoelectric effect, blackbody radiation. Atomic spectra, Bohr atom, wave-particle duality, kinetic theory of gases, solids, and liquids. Nature of space and time: special relativity. Letter grading.

18L. Modern Physics Laboratory. (3) Laboratory, six hours. Enforced requisites: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, 4AL, 4BL. Strongly recommended for students with credit for courses 1A, 1B, 1C: course 17. Experiments on superconductivity, radioactivity, atomic clock; measurement of speed of light, fine structure constant, Boltzmann constant, Planck constant. Letter grading.

88. Lower Division Seminar: Current Topics in Physics. (2) Limited to freshmen/sophomores. Intensive exploration of a particular theme or topic based on current research. Consult *Schedule of Classes* for topics to be offered in a specific term. P/NP or letter grading.

M88. Limits of Biological Design through Physical Principles. (4) (Same as Molecular, Cell, and Developmental Biology M88H.) Seminar, three hours. Enforced requisites: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, or 6A, 6B, and 6C, Chemistry 20A and 20B (or former courses 10A and 10B), Life Sciences 1, 3, Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A. Specific examples of diverse biological design such as scaling of metabolic activity, bone and muscle mass, cell size, cell membranes and pumps, heart and blood circulation, swim bladders, insect vision, magnetic bacteria, etc., studied quantitatively using elementary mathematics and physical principles. Letter grading.

Upper Division Courses

105A. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisite: Mathematics 32A. Corequisite: Mathematics 32B. Newtonian mechanics and conservation laws, gravitational potentials, calculus of variations, Lagrangian and Hamiltonian mechanics, central force motion, linear and nonlinear oscillations.

105B. Analytic Mechanics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, 105A, Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Relativity with four vectors, noninertial reference frames, dynamics of rigid bodies, coupled oscillators, normal modes of oscillation, vibrating strings, and wave propagation. P/NP or letter grading.

108. Optical Physics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, 110B, Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Interaction of light with matter; dispersion theory, oscillator strength, line widths, molecular scattering. Coherence theory, Kirchhoff formulation of diffraction theory, crystal optics, optical rotation, electro and magneto optical effects. Additional topics of fundamental or current interest. P/NP or letter grading.

110A. Electricity and Magnetism. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, 131, Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Electrostatics and magnetostatics. P/NP or letter grading.

110B. Electricity and Magnetism. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, 110A, Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Faraday law and Maxwell equations. Propagation of electromagnetic radiation. Multipole radiation and radiation from an accelerated charge. Special theory of relativity. P/NP or letter grading.

112. Thermodynamics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, 115A, Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Fundamentals of thermodynamics, including first, second, and third laws. Statistical mechanical point of view and its relation to thermodynamics. Some simple applications. P/NP or letter grading.

114. Mechanics of Wave Motion and Sound. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, 110A, Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Vibrating systems and wave propagation in gases, liquids, and solids, including elements of hydrodynamics and elasticity. Applications in ultrasonics, low-temperature physics, solid-state physics, architectural acoustics. P/NP or letter grading.

115A. Quantum Mechanics. (4) Lecture, three hours; discussion, one hour. Enforced requisites: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, 105B (corequisite), Mathematics 33A, 33B. Strongly recommended for students with credit for courses 1A, 1B, 1C: course 17. Classical background. Basic ideas of quantum nature of light, wave-particle duality, Heisenberg uncertainty principle, Bohr atom, physical operators. Schrödinger equation. One-dimensional square well and harmonic oscillator problems. Boundary values. Classical correspondences.

115B. Quantum Mechanics. (4) Lecture, three hours; discussion, one hour. Enforced requisites: courses 115A, 131. Formal theory: commutator algebra, Hermitian operators, generalized uncertainty principle, Ehrenfest relations. Three-dimensional problems. Central potentials. Angular momentum. Hydrogen atom. Identical particles and Pauli exclusion principle. Electrons in an electromagnetic field. Letter grading.

115C. Quantum Mechanics. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 115B. Matrix mechanics. Addition of angular momentum. Time-independent and time-dependent perturbation theory. Fermi Golden Rule. Applications. Scattering theory. Letter grading.

116. Electronics. (4) Lecture, three hours; laboratory, three hours. Alternating current circuits, transmission line circuits, transistor and IC circuits to generate, modify, and detect electrical signals, introduction to digital circuits, analysis of noise and methods to reduce its influence in electrical measurements.

117. Electronics for Physics Measurement. (4) Lecture, two hours; laboratory, four hours. Requisites: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Hands-on experimental course to develop understanding of design principles in modern electronics for physics measurements. Broad introduction to analog and digital electronics from practical viewpoint, followed by examination of typical circuits for scientific instrumentation and study of methods of computer data acquisition and signal processing. P/NP or letter grading.

M122. Introduction to Plasma Electronics. (4) (Same as Electrical Engineering M185.) Lecture, three hours; outside study, nine hours. Requisite: course 110A or Electrical Engineering 101. Senior-level introductory course on electrodynamics of ionized gases and applications to materials processing, generation of coherent radiation and particle beams, and renewable energy sources. Letter grading.

123. Atomic Structure. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, 115B, Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Theory of atomic structure. Interaction of radiation with matter. P/NP or letter grading.

124. Nuclear Physics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, 115B, Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Nuclear properties, nuclear forces, nuclear structure, nuclear decays, and nuclear reactions. P/NP or letter grading.

126. Elementary Particle Physics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, 115B, Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Introduction to physics of elementary particles. The four basic interactions: strong, electromagnetic, weak, and gravitational. Properties of baryons, mesons, quarks, and leptons; conservation laws, symmetries and broken symmetries; the Standard Model; experimental techniques; new physics at the new accelerators. P/NP or letter grading.

131. Mathematical Methods of Physics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Vectors and fields in space, linear transformations, matrices, and operators; Fourier series and integrals. P/NP or letter grading.

132. Mathematical Methods of Physics. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, 131, Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Functions of a complex variable, including Riemann surfaces, analytic functions, Cauchy theorem and formula, Taylor and Laurent series, calculus of residues, and Laplace transforms. P/NP or letter grading.

140A. Introduction to Solid-State Physics. (4) (Formerly numbered 140.) Lecture, three hours; discussion, one hour. Enforced requisite: course 115C. Introduction to basic theoretical concepts of solid-state physics with applications. Crystal symmetry; cohesive energy; diffraction of electron, neutron, and electromagnetic waves in a lattice; reciprocal lattice; phonons and their interactions; free electron theory of metals; energy bands. Letter grading.

140B. Properties of Solids. (4) Lecture, three hours; discussion, one hour. Enforced requisite: course 140A. Elementary discussion of properties of solids. Use of theory of electrons and the lattice to examine properties of semiconductors, metals, and superconductors, together with magnetic and dielectric properties of materials. Properties of noncrystalline solids. Letter grading.

150. Physics of Charged-Particle and Laser Beams. (4) Lecture, three hours; discussion, one hour. Requisites: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, 110A, 110B, 115A, 115B, Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Physics of charged-particle and laser beams presented as a unified subject. Basic physics of charged-particle beams, covering relativistic particle motion in electromagnetic fields, transverse focusing, acceleration mechanisms, linear and circular accelerators, and advanced topics. Some fundamentals of laser physics, including gain and broadening mechanisms, linear light optics, laser resonators, and advanced topics and applications. P/NP or letter grading.

160. Numerical Analysis Techniques and Particle Simulations. (4) Lecture, three hours; computer terminals, six hours. Preparation: minimum knowledge of computer programming (FORTRAN). Requisites: courses 1A, 1B, and 1C, or 2AH, 2BH, and 17, 105A, 105B, 110A, 110B, Mathematics 31A, 31B, 32A, 32B, 33A, 33B. Introduction to the field of computer modeling of physical systems using particle models; numerical models and methods, methods of diagnosing results, experience with running interesting physical problems. P/NP or letter grading.

180A. Nuclear Physics Laboratory. (4) Laboratory, four hours. P/NP or letter grading.

180B. Physical Optics and Spectroscopy Laboratory. (4) Laboratory, four hours. P/NP or letter grading.

180C. Solid-State Laboratory. (4) Laboratory, four hours. P/NP or letter grading.

180D. Acoustics Laboratory. (4) Laboratory, four hours. P/NP or letter grading.

180E. Plasma Physics Laboratory. (4) Laboratory, four hours. P/NP or letter grading.

180F. Elementary Particle Laboratory. (4) Laboratory, four hours. P/NP or letter grading.

C185. Foundations of Physics. (4) (Formerly numbered 185.) Lecture, three hours. Historical development and philosophical sources of classical and modern physics. Concurrently scheduled with course C285. Letter grading.

199. Special Studies in Physics. (2 to 4) May be repeated, but no more than 12 units may be applied toward Physics B.S. degree requirements.

Graduate Courses

201Q. Modern Physics Research Areas. (2) Review of modern physics research areas, with emphasis on those actively pursued at UCLA. S/U grading.

210A. Electromagnetic Theory. (4) Boundary value problems in electrostatics and magnetostatics. Multipole expansions; dielectrics and macroscopic media. Maxwell equations and conservation laws. Wave guides and resonators; simple radiating systems.

210B. Electromagnetic Theory. (4) Electromagnetic potentials and Hertz vectors. Cylindrical waves. Spherical waves. Debye potentials. Multipole radiation. Classical relativistic electrodynamics. Radiation from moving charges.

213A. Advanced Atomic Structure. (4) Group representation theory. Angular momentum and coupling schemes. Interaction of radiation with matter.

213B. Advanced Atomic Structure. (4) N-j symbols, continuous groups, fractional parentage coefficients, n electron systems.

213C. Molecular Structure. (4) Application of group theory to vibrational and electronic states of molecules. Molecular orbital theory. Raman effect. Angular momentum and coupling in molecules.

214A. Advanced Acoustics. (4) Propagation of waves in elastic and fluid media. Reflection, refraction, diffraction, and scattering of waves in fluids. Attenuation mechanisms in fluids.

214B. Advanced Acoustics. (4) Propagation in non-homogeneous fluids and in moving fluids. Radiation pressure, acoustic streaming, and attenuation in large amplitude sound fields. Propagation of sound in liquid helium. Mechanisms resulting in attenuation for elastic waves in solids.

215A. Statistical Physics. (4) Thermodynamics and statistical mechanics with applications.

215B. Nonequilibrium Statistical Mechanics. (4) Probability theory, Markov processes, equations of change, BBGKY hierarchy and its consequences, Boltzmann equation, Chapman/Enskog method, transport coefficients, fluctuation/dissipation theorems, density matrix, H-theorems.

215C. Quantum Statistical Mechanics and the Many Body Problem. (4) Classical methods for interacting systems; quantum field theory techniques in statistical mechanics; Green's function approach; Coulomb gas; imperfect Bose gas; electron/phonon interaction; superconductivity; phase transitions; theory of Fermi liquid.

220. Classical Mechanics. (4) Lecture, three hours. Hamilton/Jacobi theory, action-angle variables, classical perturbation theory, and selected topics such as introduction to physics of continuous media and fluids, nonlinear phenomena.

221A-221B-221C. Quantum Mechanics. (4-4-4) Lecture, three hours. **221A.** Fundamentals of quantum mechanics, operators and state vectors, equations of motion. **221B.** Requisite: course 221A. Rotations and other symmetry operations, perturbation theory. **221C.** Formal theory of collision processes, quantum theory of radiation, introduction to relativistic quantum mechanics.

222A-222B-222C. Plasma Physics. (4-4-4) Properties of a Coulomb gas with and without a magnetic field: equilibrium, oscillations, instabilities, fluctuations, collective phenomena, transport properties, and radiation. Description via single-particle orbit theory, magnetohydrodynamics, and kinetic equations of various types.

223. Advanced Classical Mechanics. (4) Requisite: course 220. Topics such as nonlinear mechanics, ergodic theory, mechanics of continuous media.

224. Introduction to the Strong Interaction. (4) Evidence concerning the strong interaction, particularly as exemplified in nucleon/nucleon and pion/nucleon systems. Isospin, scattering matrix, density matrix and polarization, properties of pions, one pion exchange potential, phase shift analysis.

225A-225B. Advanced Nuclear Physics. (4-4) Requisites: courses 221A-221B. Normally preceded by course 224. Advanced course in structure of complex nuclei, nuclear models, scattering and reactions.

226A-226B-226C. Elementary Particle Physics. (6-6-6) Lecture, four hours. Requisites: courses 221A-221B-221C, 230A-230B (may be taken concurrently). Modern theories of elementary particle physics beginning with symmetry principles and conserved quantities, classic V-A theory of weak interactions, gauge field theories (Abelian and non-Abelian), spontaneous symmetry breaking, $SU(2) \times U(1)$ electroweak interactions of leptons, quarks, W s, Z^0 and γ , quark theory of hadrons and quantum chromodynamics.

226D. Beyond the Standard Model. (4) Lecture, three hours. Requisites: courses 226A-226B-226C, 230A-230B-230C. Discussion of possible extensions of the current standard model of electroweak and strong interactions, including axions, technicolor, grand unified theories, supersymmetry, supergravity, and superstrings. S/U grading.

230A-230B-230C. Relativistic Quantum Theory. (6-6-6) Lecture, four hours. Requisites: courses 221A-221B-221C. Modern quantum field theory, including quantum electrodynamics and quantum chromodynamics, renormalization group methods, path-integral quantization, spontaneous symmetry breaking, monopoles and other solitons.

231A. Methods of Mathematical Physics. (4) Not open for credit to students with credit for Mathematics 266A. Linear operators, review of functions of a complex variable, integral transforms, partial differential equations.

231B. Methods of Mathematical Physics. (4) Not open for credit to students with credit for Mathematics 266B. Ordinary differential equations, partial differential equations, and integral equations. Calculus of variations.

231C. Methods of Mathematical Physics. (4) Not open for credit to students with credit for Mathematics 266C. Perturbation theory. Singular integral equations. Numerical methods.

232A-232B. Relativity. (4-4) Special and general theories, with applications to elementary particles and astrophysics.

232C. Special Topics in General Relativity. (4) Lecture, four hours. S/U or letter grading.

233. Introduction to High-Energy Astrophysics. (4) Introductory lectures on modern high-energy astrophysics. High-energy radiation processes. Neutron stars. Pulsars. X-ray sources. Black holes. Supermassive rotators and quasars.

235. Group Theory and Quantum Mechanics. (4) Requisite: course 221A. Group representation theory and applications to quantum mechanics of atoms, molecules, and solids.

M236. Geometry and Physics. (4) (Same as Mathematics M217.) Lecture, three hours. Interdisciplinary course on topics at interface between physics quantum fields and superstrings and mathematics of differential and algebraic geometry. Topics include supersymmetry, Seiberg/Witten theory, conformal field theory, Calabi/Yau manifolds, mirror symmetry and duality, integrable systems. S/U grading.

241A. Solid-State Physics. (4) Requisites: courses 140, 215A, 221A. Symmetry, free electrons, electrons in a periodic potential, experimental measurement of band structure and Fermi surface parameters, cohesive energy, lattice vibrations, thermal properties.

241B. Solid-State Physics. (4) Requisite: course 241A. Transport theory with applications, electron/electron interactions.

241C. Solid-State Physics. (4) Requisite: course 241B. Semiconductors, magnetism, phase transitions, superconductivity.

242A-242B. Advanced Solid-State Theory. (4) Requisites: courses 241A, 241B, 241C (may be taken concurrently). Many body methods in solid-state physics.

243A-243K. Special Topics in Solid-State Physics. (4 each) **243A.** Disordered Systems; **243B.** Magnetic Resonance; **243C.** Phase Transitions; **243D.** Magnetism; **243E.** Superconductivity; **243F.** Macromolecules; **243G.** Semiconductors; **243H.** Optical Interactions; **243I.** Nonlinear Optics; **243J.** Hopping Transport; **243K.** Low-Temperature Physics.

250. Introduction to Acceleration of Charged Particles. (4) Lecture, three hours. Requisites: courses 210A, 210B, 215A. Principles of charged-particle acceleration, including principles of synchrotrons and storage rings, beam parameter determination, statistical behavior of beams and beam cooling techniques, synchrotron light sources, colliding beam storage rings, medical accelerators, and free electron lasers.

260. Seminar: Problems in Plasma Physics. (4) Seminar, four hours. S/U or letter grading.

261. Seminar: Special Problems in Theoretical Physics. (4) Seminar, four hours. S/U or letter grading.

262. Seminar: Physics of the Solid State. (2 to 4) Seminar, three hours. S/U or letter grading.

264. Seminar: Advanced Physical Acoustics. (4) Seminar, four hours. S/U or letter grading.

266. Seminar: Propagation of Waves in Fluids. (2 to 4) Seminar, three hours. S/U or letter grading.

268. Seminar: Spectroscopy. (2 to 4) Seminar, three hours. S/U or letter grading.

269A. Seminar: Nuclear Physics. (2 to 4) Seminar, three hours. S/U or letter grading.

269B. Seminar: Elementary Particle Physics. (2 to 4) Seminar, three hours. S/U or letter grading.

269C. Seminar: Accelerator Physics. (2 to 4) Seminar, three hours. Physics principles governing design and performance analysis of particle accelerators, using existing accelerators as examples and emphasizing interplay among design goals, component performance, and operational experience. S/U grading.

280E. Advanced Plasma Laboratory. (4) Lecture, two hours; laboratory, four hours. Requisites: courses M122, 180E. Laboratory experiments on behavior of plasmas in magnetic fields. Study of basic physics of particle motions, distribution functions, and fluid dynamics. Plasma waves and nonlinear phenomena. Advanced probe, microwave and plasma diagnostics.

C285. Foundations of Physics. (4) Lecture, three hours. Historical development and philosophical sources of classical and modern physics. Concurrently scheduled with course C185.

290. Research Tutorial: Plasma Physics. (2 or 4) Three terms required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff and students directed toward problems of current research interest in plasma physics group, both experimental and theoretical. May be repeated for credit. S/U grading.

291. Research Tutorial: Elementary Particle Theory. (2 or 4) Requisites: courses 226A, 230A-230B. Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff, postdoctoral fellows, and graduate students. May be repeated for credit. S/U grading.

292. Research Tutorial: Spectroscopy, Low-Temperature, and Solid-State Physics. (2 or 4) Required of each graduate student doing research in these fields, ordinarily during second or third year. Seminar and discussion by staff and students on problems of current research interest in spectroscopy, low-temperature, and solid-state physics. May be repeated for credit. S/U grading.

293. Research Tutorial: Current Topics in Physics. (2) Lecture, one hour. Seminar and discussion by staff and students on current topics in physics, both experimental and theoretical (topics not limited to one field of physics). Strongly recommended for graduate students in physics. May be repeated for credit. S/U grading.

294. Research Tutorial: Accelerator Physics. (2 or 4) Lecture, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of current interest in accelerator physics. May be repeated for credit. S/U grading.

295. Research Tutorial: Solid Earth Physics. (2 or 4) Required (or course 292 if appropriate) of each graduate student doing research in this field, ordinarily in second or third year. Seminar and discussion on solid earth physics. May be repeated for credit. S/U grading.

296. Research Topics in Physics. (2) (Formerly numbered 296A-296Z.) Advanced study and analysis of current topics in physics. Discussion of current research and literature in research specialty of faculty member teaching course. May be repeated for credit. S/U grading.

M297. Research Tutorial: Astroparticle Physics. (2 or 4) (Same as Astronomy M297.) Lecture, one hour; discussion, two hours. Required of each graduate student doing research in this field. Seminar and discussion by faculty, postdoctoral fellows, and graduate students on topics of current interest in astroparticle physics. May be repeated for credit. S/U grading.

298. Research Tutorial: Experimental Elementary Particle Physics. (2 or 4) Limited to six students. Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion by staff and students on current problems in experimental elementary particle physics. May be repeated for credit. S/U grading.

299. Research Tutorial: Nuclear Physics. (2 or 4) Required of each graduate student doing research in this field, ordinarily during second or third year. Seminar and discussion on nuclear physics by staff and students, in both experiment and theory. May be repeated for credit. S/U grading.

370. Teaching Physics. (4) Study of physics laboratory experiments and demonstrations available today for secondary school and community college physics courses. Part of Master of Arts in Teaching (M.A.T.) program but open to other interested students.

375. Teaching Apprentice Practicum. (1 to 4)

Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching College Physics. (2) Seminar (five or more one-hour meetings during term, plus intensive training week at beginning of Fall Quarter). Required of all new teaching assistants. Special course for teaching assistants designed to deal with problems and techniques of teaching college physics. Ideas and techniques learned are applied and evaluated in the sections of each teaching assistant. May be repeated for credit. S/U grading.

596. Directed Individual Studies. (2 to 12) May be repeated for credit. S/U grading.

597. Preparation for Master's Comprehensive Examination or Ph.D. Qualifying Examinations. (4) May be repeated twice for credit. S/U grading.

598. Master's Thesis Research and Writing. (4) May be repeated twice for credit.

599. Ph.D. Research and Writing. (8 or 12) May be repeated for a maximum of 18 units. S/U grading.

Alan Garfinkel, Ph.D. (*Cardiac Electrophysiology, Mathematical Modeling*)
Patricia E. Phelps, Ph.D. (*Developmental Neurobiology*)

Adjunct Associate Professors

Nasser A. Farahbakhsh, Ph.D.
Fernando Gómez-Pinilla, Ph.D.

Adjunct Assistant Professors

Ronald H. Cooper, Ph.D.
William C. Whiting, Ph.D.

Scope and Objectives

The cornerstone of the physiological science curriculum is vertebrate physiology, with emphases on integrative functions. The research and educational programs focus on integrative physiology at several levels of organization from molecules to living organisms, microscopic structures to macroscopic organization, and cellular properties to organ functions. Students receive comprehensive instruction in all areas of physiological science, while elective courses reflect faculty research expertise, including cardiopulmonary function and adaptation, musculoskeletal physiology, cell biology, biomechanics, neural control of movement and homeostasis including neuroendocrinology, and neural integration and sensory transduction. Many Physiological Science majors enter graduate programs in biomedical sciences and professions in other health-related fields.

Undergraduate Study

Physiological Science B.S.

Preparation for the Major

Life Sciences Core Curriculum

Required: Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B/14BL, 14C/14CL, and 14O, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

All core curriculum courses must be passed with a grade of C– or better and must be completed with an overall grade-point average of 2.0 or better. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer Students

To be admitted as Physiological Science majors, transfer students with 80 or more units must complete the following courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory, and one semester of organic chem-

istry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission.

Transfer credit for UCLA Extension coursework and for any departmental courses is subject to prior approval by the department; consult the undergraduate counselor before enrolling in any courses for the major.

The Major

Required: Physiological Science 107, 111A (or M180A), 111B-111C, 111L, Chemistry and Biochemistry 153A, 153L.

A total of four upper division physiological science electives (16 units) is required. Four units of course 190 or 199 may be applied toward the elective requirement. Courses 193, 195A, 195B, 196, and graduate courses at the 300, 400, or 500 level may not be applied toward this requirement. One graduate course at the 200 level may be applied toward the elective requirement by petition.

All required and elective courses must be taken for a letter grade, and a C average must be maintained in all upper division courses taken for the major.

Honors Program

The honors program provides exceptional students with the opportunity for individual research culminating in an honors thesis. Requirements for admission include a 3.0 overall grade-point average and a 3.2 GPA in the life sciences core curriculum. After completion of all requirements and with the recommendation of the faculty adviser, the undergraduate affairs committee confers departmental honors at graduation.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The Department of Physiological Science offers the Master of Science (M.S.) degree in Physiological Science.

Admission

Applicants to the M.S. program are expected to have completed an undergraduate degree in the biological or physical sciences. In general, at the time of admission students should have completed a year of coursework in each of the following: calculus, physics, biology, inorganic chemistry, and organic biochemistry. A grade-point average of at least 3.0 (B) in all upper divi-

sion undergraduate coursework is required. A departmental faculty committee considers applicants on the following bases: (1) prior scholastic performance, (2) three letters of recommendation, and (3) applicant's statement of purpose, which should include (a) relevant background or preparation; (b) field of emphasis, specific study interests, and type of research sought; (c) expectations, goals, degree objective; (d) one or more departmental faculty members whose research area parallels the study interest. The Graduate Record Examination (GRE) is required as part of the admission file.

A brochure of faculty names and research interests is available from the department. Applicants are encouraged to communicate directly with the faculty, and personal interviews are encouraged.

Areas of Study

Consult the department.

Course Requirements

The M.S. degree requires nine courses, including a second-level statistics or research design course. A minimum of six of the nine courses must be graduate-level (200) courses, toward which two 596 courses may be applied. Coursework is selected by the student and the student's advisory committee, with approval by the graduate affairs committee. All coursework must be completed by the end of the second year. Courses 597 and 598 may not be applied toward any of the course requirements for the degree. There is no limit on the number of times master's students may enroll in course 597 or 598.

Comprehensive Examination Plan

If this plan is elected, students must achieve a passing mark on a comprehensive examination. Breadth of knowledge is demonstrated by passing a written comprehensive examination administered at the end of the Fall and Spring Quarters. Preparation for the examination varies with background; students follow a curriculum during the master's program that is designed to prepare them for the examination. Coursework, including formal courses and tutorials, is selected from the offerings in physiological science or other departments. The examination consists of three sections in the context of general physiological problems: (1) molecular biology or neurochemistry; (2) cell biology or cellular neurophysiology; and (3) systems physiology or systems neuroscience. The examination is scored passed at the master's level of achievement, passed at the Ph.D. level of achievement, which permits students to continue into the Ph.D. program, or failed at the master's level of achievement, and therefore also at the Ph.D. level of achievement. Students failing the examination at either the master's or Ph.D. levels of achievement are required to retake the examination at the next offering. Students wishing to continue into the Ph.D. program who fail the examination at the Ph.D. level on the second attempt are awarded a terminal Master of Science degree.

Thesis Plan

If the thesis plan is elected, students must report the results of an original research investigation. Under the guidance of the thesis committee, students must propose a problem area or outline of study, conduct original research in a specific area, and report the results. With committee approval, students may submit either a thesis manuscript or a manuscript suitable for publication.

Doctoral Degree

Admission

Applicants to the program leading to the Ph.D. degree in Physiological Science are expected to complete the same admission requirements as outlined for the M.S. degree. In addition to the above, students may also be admitted to the program through UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences, 172 MBI, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6051.

Major Fields or Subdisciplines

Consult the department.

Course Requirements

Nine courses, at minimum, are specified for the doctoral degree. Two 596 courses may be applied toward the degree requirements. Courses are selected by the student and the student's advisory committee and approved by the graduate affairs committee.

Written and Oral Qualifying Examinations

Breadth of knowledge is demonstrated by passing a written preliminary examination administered at the end of Fall Quarter of the second year. Preparation for the examination varies with background, and students follow a curriculum during the first year of study that is designed to prepare them for the examination. Coursework, including formal courses and tutorials, is selected from the offerings in physiological science or other departmental curricula. The examination consists of three sections in the context of general physiological problems: (1) molecular biology or neurochemistry, (2) cell biology or cellular neurophysiology, (3) systems physiology or systems neuroscience. The examination is scored passed at the Ph.D. level of achievement, passed at the master's level of achievement (students are required to pass a second examination at the Ph.D. level within the following six months), or failed (students are required to leave the program). Alternatively, students receiving a master's level of achievement score may leave the doctoral program and complete the M.S. degree.

After successfully passing the departmental written qualifying examination, and before advancement to candidacy, a University Oral Qualifying Examination is conducted by the doctoral committee. The examination must be passed by the end of the third year of study. Students present a written research proposal of their intended dissertation project to their

advisory committee and one member of the graduate affairs committee at least two weeks prior to the examination. Students are expected to have formulated a research plan, have demonstrated appropriate research capability, and be knowledgeable of relevant research literature. Students may petition the graduate affairs committee for extension of the deadline. If students do not pass, the examination may be rescheduled once at the discretion of the doctoral committee.

Physiological Science

Lower Division Courses

3. Introduction to Human Physiology. (4) Lecture, three hours. Not open to Physiological Science majors. Courses 3 and 5 may be taken independently, concurrently, or in either sequence. Presentation of integrative approach to basic anatomy and physiology of major organs and organ systems. P/NP or letter grading.

5. Issues in Human Physiology: Diet and Exercise. (4) Lecture, three hours. Not open to Physiological Science majors. Basic introduction to principles of human biology, with special emphasis on roles that exercise and nutrition play in health, and prevention and management of such illnesses as hypertension, diabetes, and heart disease. P/NP or letter grading.

6. The Human Machine: Physiological Processes. (4) Not open to Physiological Science majors. General introduction to human musculoskeletal, cardiovascular, and respiratory systems and their function, with special emphasis on mechanical and physiological aspects of homeostasis and environmental interaction. Application of physical principles in selected areas of biomechanics, hemodynamics, ergonomics, orthopedics, and robotics. P/NP or letter grading.

13. Introduction to Human Anatomy. (5) Lecture, four hours; laboratory, three hours. Not open to Physiological Science majors. Structural survey of human body, including skeletomuscular, nervous, circulatory, respiratory, digestive, and genitourinary systems. Laboratory includes examination of human cadaver specimens. Letter grading.

90. Introduction to Physiological Science. (2) Lecture, one hour; discussion, one hour. Limited to freshmen/sophomores. Introduction to current topics in physiological science by a team of departmental faculty members. P/NP grading.

Upper Division Courses

C100. Experimental Statistics. (4) (Formerly numbered 100.) Lecture, four hours; outside study, eight hours. Introduction to statistics with focus on computer simulation instead of formulas. Bootstrap and Monte Carlo methods used to analyze physiological data. Concurrently scheduled with course CM200. P/NP or letter grading.

M102. Human Anatomy for Biomedical Engineers. (4) (Same as Biomedical Engineering M102.) Lecture, three hours; laboratory, two hours. Not open for credit to Physiological Science majors. Designed to provide foundation in human gross and microscopic anatomy for graduate biomedical engineering students. Broad overview of structural organization of human body and detailed examination of specific systems pertinent to biomedical research. Letter grading.

M103. Human Physiology for Biomedical Engineers. (4) (Same as Biomedical Engineering M103.) Lecture, three hours; laboratory, two hours. Not open for credit to Physiological Science majors. Designed to provide foundation in human physiology for graduate biomedical engineering students. Systematic approach to examination of major systems function, with emphasis on regulatory mechanisms controlling normal function. Detailed examination of specific systems pertinent to major areas of biomedical research. Letter grading.

107. Systems Anatomy. (5) (Formerly numbered 27.) Lecture, four hours; laboratory, three hours; outside study, 10 to 15 hours. Requisites: Life Sciences 2, Physics 6A or 8A. Systems anatomy focused primarily on human anatomy. Topics include cardiorespiratory, reproductive, nervous, and skeletomuscular systems, with introduction to biomechanical principles.

111A-111B-111C. Foundations in Physiological Science. (6-6-6) Lecture, four hours; laboratory, two hours. Letter grading. **111A.** Requisites: course 107, Chemistry 14C or 30, Life Sciences 1, 2, 3, 4, Physics 1B or 6C. Not open for credit to students with credit for course M180A. Introduction to principles of neurophysiology: cellular and systems neuroscience, including factors controlling membrane excitability, neuronal circuits, sensorimotor regulation, special senses, cortical functions, and neuronal plasticity. **111B.** Requisites: course 111A or M180A, Chemistry 130A. Principles of muscular, cardiovascular, and pulmonary physiology. **111C.** Requisites: course 111A or M180A, Chemistry 153A. Principles of gastrointestinal, renal, endocrine, and reproductive physiology.

111L. Physiological Science Laboratory. (2) Laboratory, four hours; outside study, two hours. Requisites: courses 111A-111B-111C (111C may be taken concurrently). Required of physiological science majors. Designed to illustrate physiological principles studied in courses 111A-111B-111C.

C125. Comparative Endocrinology: Molecular to Behavioral. (4) Lecture, two hours; discussion, two hours. Requisite: course 111C. Important concepts in endocrinology, with focus on current research involving invertebrate and vertebrate animal models in areas of reproduction, neuroendocrine control of behavior, metabolism, and insect metamorphosis. Concurrently scheduled with course CM225.

126. Biological Clocks. (4) (Formerly numbered 198.) Lecture, three hours; discussion, one hour. Requisite: course 111A or M180A. Most organisms, including humans, exhibit daily rhythms in physiology and behavior. In many cases these rhythms are generated from within the organisms and are called circadian rhythms. Exploration of molecular, cellular, and system-level organization of these timing systems.

133. Exercise Physiology. (5) Lecture, three hours; laboratory, two hours; outside study, 10 hours. Requisite: course 111C. Physiological responses and adaptations to acute and chronic exercise.

C135. Dynamical Systems Modeling of Physiological Processes. (5) Lecture, four hours; laboratory, two hours. Examination of art of making and evaluating dynamical models of physiological systems and of dynamical principles inherent in physiological systems. Concurrently scheduled with course C235.

136. Exercise and Cardiovascular Function. (5) Lecture, four hours; outside study, 11 hours. Requisite: course 111B. Consideration of acute and chronic effects of exercise in diagnosis, prevention, and treatment of cardiovascular disorders.

C137. Growth and Adaptation in Cardiovascular System. (4) Requisite: course 111B. Regulation of normal and pathological cellular growth in cardiac and vascular tissue. Modification of gene expression in response to diverse physiological stimuli. Emphasis on molecular and cell biology approaches. Concurrently scheduled with course C237.

138. Neuromuscular Physiology and Adaptation. (4) Requisites: course 111B, Chemistry 153A. Cellular responses to acute and chronic exercise and environmental states of neuromuscular system.

142. Sensorimotor Physiology. (5) Lecture, three hours; laboratory, two hours; outside study, 10 hours. Requisite: course 111A or M180A. Neurophysiological principles governing control of limb movements, including regulation by spinal cord circuits, cerebellum, basal ganglia, and sensorimotor cortices.

C143. Neuromotor Control of Posture and Movement. (5) Lecture, four hours; outside study, 11 hours. Requisite: course 142. Examination of theories for neuromotor control of posture, walking, and voluntary arm movements. Concurrently scheduled with course C243.

C144. Neural Control of Physiological Systems. (5) Lecture, four hours; outside study, 11 hours. Requisite: course 111B or M180B. Role of central nervous system in control of respiration, circulation, sexual function, and bladder control. Material for each section to be developed by combination of lecture and open discussion. Concurrently scheduled with course C244.

C145. Neural Mechanisms Controlling Movement. (5) Lecture, four hours; outside study, 11 hours. Requisite: course 111A or M180A. Examination of central nervous system organization required for production of complex movements such as locomotion, mastication, and swallowing. Concurrently scheduled with course C245.

147. Neurobiology of Learning and Memory. (5) Lecture, four hours; research demonstration, one hour; outside study, 10 hours. Requisite: course 111A or M180A. Changes in central nervous system that accompany learning, with emphasis on cellular mechanisms.

M148. Molecular and Cellular Physiology of Neurons. (5) (Formerly numbered 148.) (Same as Neuroscience M148.) Lecture, four hours; outside study, 11 hours. Requisite: course 111A or M180A. Advanced treatment of selected topics in cellular neurophysiology.

150. Musculoskeletal Mechanics. (5) Lecture, three hours; outside study, 12 hours. Requisite: course 111B. Introduction to biomechanical analysis of human musculoskeletal system. Examination of cinematographic, force platform, and digital computer techniques to characterize and evaluate kinematic and kinetic components of movement. Topics include biostatistics, biodynamics, and modeling.

151. Limb Dynamics. (5) Lecture, three hours; laboratory, two hours; outside study, 10 hours. Requisite: course 150. Biomechanical analysis of human movement, with special emphasis on control of limb movements.

C152. Musculoskeletal Anatomy, Physiology, and Biomechanics. (5) Lecture, three hours; outside study, 12 hours. Requisite: course 111A. Anatomical, physiological, and mechanical characteristics of cartilaginous, fibrous, and bony tissues examined in normal and abnormal stress situations. Connective tissue growth processes, normal physiology, and repair mechanisms analyzed in conjunction with musculoskeletal injuries and effects of exercise. Concurrently scheduled with course C252.

153. Dissection Anatomy. (4) Lecture, two hours; laboratory, six hours. Requisite: course 111B. Departmental application required. Study and dissection of upper and lower extremities of human cadavers; dissection of thorax and abdomen limited to musculature and neurovascular supply.

155. Development and Structure of Musculoskeletal System. (4) Requisite: course 111B. Development, histology, cell biology, and biochemistry of musculoskeletal soft tissues. Integration of knowledge of muscle and connective tissue structure and function on each of these levels to understand organization and physiological behavior of the intact system.

M158. Cell Biology. (6) (Same as Organismic Biology M158.) Lecture, three hours; laboratory, six hours. Requisites: Chemistry 14A and 14B/14BL, or 20A, 20B, 20L, and 30L, Life Sciences 1, 3, 4. Cell biology of eukaryotic cells, with emphasis on correlation of structure and function at molecular, organellar, and cellular levels. Letter grading.

M166. Animal Physiology. (6) (Same as Organismic Biology M166.) Lecture, three hours; laboratory, five hours. Requisites: Chemistry 14A and 14B/14BL, or 20A, 20B, 20L, and 30L, 153A, Life Sciences 1, 2, 3, Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C. Not open for credit to students with credit for Molecular, Cell, and Developmental Biology M170 or Organismic Biology 167 or to Physiological Science majors. Introduction to physiological principles, with emphasis on organ systems and intact organisms. Letter grading.

167. Physiology of Nutrition. (4) (Formerly numbered 197B.) Lecture, four hours. Limited to senior Physiological Science majors. Topics include physiological adaptation to starvation and physiological responses to oxidants/antioxidants, vitamins, minerals, photochemicals, and their relationship to common chronic diseases and aerobiology of fuel utilization during aerobic and anaerobic exercise. Letter grading.

M173. Anatomy and Physiology of Sense Organs. (4) (Same as Organismic Biology M173.) Lecture, three hours; discussion, one hour. Requisites: courses 111A (or Molecular, Cell, and Developmental Biology 171) or M180A-M180B (or Molecular, Cell, and Developmental Biology M175A-M175B). Structure and function of sense organs. Adoption of quantitative and comparative approach to provide insight into evolution of sense organs in both invertebrates and vertebrates. Letter grading.

M180A-M180B-M180C. Neuroscience: From Molecules to Mind. (5-5-5) (Same as Molecular, Cell, and Developmental Biology M175A-M175B-M175C, Neuroscience M101A-M101B-M101C, and Psychology M117A-M117B-M117C.) Lecture, four hours; discussion, one hour. P/NP or letter grading:

M180A. Cellular and Systems Neuroscience. (5) Lecture, four hours; discussion, one hour. Requisites: Chemistry 14C or 30 or former course 10D (14C may be taken concurrently), Life Sciences 2, Physics 1B or 6C. Not open for credit to students with credit for Physiological Science 111A. Cellular neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement. P/NP or letter grading.

M180B. Molecular and Developmental Neuroscience. (5) Lecture, four hours; discussion, one hour. Requisites: course 111A or M180A (or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A or Psychology M117A) or Psychology 115, Life Sciences 3, 4. Molecular biology of channels and receptors: focus on voltage dependent channels and neurotransmitter receptors. Molecular biology of supramolecular mechanisms: synaptic transmission, axonal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in developmental neurobiology. P/NP or letter grading.

M180C. Behavioral and Cognitive Neuroscience. (5) Lecture, four hours; discussion, one hour. Requisite: course 111A or M180B (or Molecular, Cell, and Developmental Biology M175B or Neuroscience M101B or Psychology M117B) or Psychology 115. Neural mechanisms underlying motivation, learning, and cognition. P/NP or letter grading.

M181. Biological Bases of Psychiatric Disorders. (4) (Same as Molecular, Cell, and Developmental Biology M191, Neuroscience M130, Psychiatry M191, and Psychology M117J.) Lecture, three hours. Requisite: course 111A or M180A (or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A or Psychology M117A). Underlying brain systems involved in psychiatric syndromes and neurological disorders, including schizophrenia, depression, bipolar disorders, obsessive/compulsive disorder, eating disorders. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments.

190A. Honors Thesis. (4) (Formerly numbered 199HA.) Requisites: courses 111A-111B. Limited to physiological science honors program students. Directed independent research for departmental honors with a faculty member, involving definition of research topic and extensive reading and research in the field of proposed honors thesis. In Progress grading (credit to be given only on completion of course 190B).

190B. Honors Thesis. (4) (Formerly numbered 199HB.) Requisite: course 190A. Continued reading and research that culminate in final honors thesis. Only four units of course 190/199 may be applied toward elective requirements for the major.

190C. Advanced Studies for Honors Thesis. (4) (Formerly numbered 199HC.) Requisite: course 190B. Additional course to provide further research opportunities for departmental honors students.

192. Intracellular Calcium Regulation. (4) Lecture, one hour; discussion, two hours. Requisites: courses 111A-111B-111C. Lecture on and review of current literature covering broad issues of intracellular calcium metabolism, regulation, and transport.

193. Field Studies in Physiological Science. (4) Lecture, one hour; fieldwork, six to eight hours. Limited to seniors. Departmental application required. Supervised field studies in specific careers related to physiological science. May not be repeated for credit and may not be applied toward elective requirements for the major. P/NP grading.

195A. Scientific Research and Ethics. (2) (Formerly numbered 195.) Lecture, one hour; discussion, one hour. Corequisites: courses 190A/190B or 199 or participant in Student Research Program. Instruction in principles of scientific method, writing, and ethics; critique of current journal articles and research projects. Students present individual research proposal with background literature. P/NP grading.

195B. Advances in Biological Research. (2) Lecture, one hour; discussion, one hour. Requisites or corequisites: courses 190A/190B or 199. Critical discussion of current research literature in biological sciences, with emphasis on design, analysis, and reporting of scientific investigation. P/NP or letter grading.

196. Laboratory Practicum in Systems Anatomy. (2) (Formerly numbered 196A-196B.) Lecture, one hour; laboratory practicum, three hours; outside study, eight hours. Requisite: course 107. Departmental application required. Supervised practicum and training for advanced students who serve as undergraduate assistants in anatomy laboratory for courses 13 and 107. May not be applied toward elective requirements and may not be repeated for credit. P/NP or letter grading.

197A-197Z. Variable Topics in Physiological Science. (4 each) Limited to juniors/seniors. Variable topics courses which cover specific subjects of special interest. May be repeated for credit with topic change.

199. Special Studies in Physiological Science. (2 or 4) Requisites: courses 111A-111B. Limited to Physiological Science majors with advanced junior standing and 3.0 grade-point average in major, or seniors. Directed independent research with a faculty member. Course application must be submitted to undergraduate affairs chair during first week of classes. Only four units of course 199 may be applied toward elective requirements for the major.

Graduate Courses

CM200. Experimental Statistics. (4) (Same as Bio-statistics M220.) Lecture, four hours; outside study, eight hours. Introduction to statistics with focus on computer simulation instead of formulas. Bootstrap and Monte Carlo methods used to analyze physiological data. Concurrently scheduled with course C100. S/U or letter grading.

M202. Cellular Neurophysiology. (4) (Same as Neuroscience M202.) Lecture, three hours; discussion, one hour. Requisites: course 111A or M180A or Physics 6B, Molecular, Cell, and Developmental Biology 171 or Organismic Biology M166. Advanced course in cellular physiology of neurons. Action and membrane potentials, channels and channel blockers, gates, ion pumps and neuronal homeostasis, synaptic receptors, drug-receptor interactions, transmitter release, modulation by second messengers, and sensory transduction.

M205. Behavioral and Systems Neuroscience. (4) (Same as Neuroscience M205 and Psychology M205Z.) Lecture, three hours. Requisites: Neuroscience M201, M202, M203, M204. Introduction to fundamentals of behavioral and systems neuroscience, with emphasis on role of behavioral analysis in understanding the functioning of nervous system and identifying anatomical circuits, cell physiological processes, and molecular mechanisms that mediate behaviorally defined functions.

M210. Molecular and Cellular Mechanisms of Neural Integration. (5) (Same as Neuroscience M230 and Physiology M210.) Lecture, four hours; discussion, one hour; outside study, 10 hours. Requisite: Neuroscience M202 or Physiology M209A. Introduction to mechanisms of synaptic processing. Selected problems of current interest, including regulation and modulation of transmitter release, molecular biology and physiology of receptors, cellular basis of integration in sensory perception and learning, neural nets and oscillators, and molecular events in development and sexual differentiation.

211. Exercise Cardiovascular Physiology. (4) Attention to cardiovascular adaptations to acute exercise as well as adaptations associated with regular exercise training.

M212. Introduction to Cellular Physiology and Biophysics. (6) (Same as Molecular, Cell, and Developmental Biology M237 and Physiology M212.) Lecture, five hours. Requisite: course 111A or Physiology M209A. Development of fundamental physiological and biophysical concepts associated with all membranes, membrane channels and transporters, membrane potential, membrane excitability, electrical signal transmission and transduction, and muscle contraction and their application to study of basic cellular processes. Emphasis in laboratory on development of skills using computer programming languages, spreadsheets, and graphics for modeling and analysis of cellular processes.

M213. Principles of Integrative Physiology. (6) (Same as Physiology M213.) Lecture, four hours; discussion, two hours. Designed for graduate students. Open to juniors/seniors with consent of instructor. Basic principles of biological integration, including regulation, homeostasis, feedback, and natural selection, to be illustrated by applying them to a molecules-through-whole animal view of four sets of problems: information processing, development, and plasticity in central nervous system; endocrine regulation of reproduction; feedback regulation of blood pressure and control of eye movements; and matching of enzyme, transporter, and bone capacities to natural loads.

215. Molecular and Cellular Foundations of Physiology. (5) Lecture, three hours; discussion, two hours. Application of molecular and cellular approaches to systems level questions. Basic foundation for study of major physiological systems, with emphasis on levels of organization from molecular to macroscopic. Letter grading.

CM225. Comparative Endocrinology: Molecular to Behavioral. (4) (Same as Physiology M225.) Lecture, two hours; discussion, two hours. Designed for graduate students. Important concepts in endocrinology, with focus on current research involving invertebrate and vertebrate animal models in areas of reproduction, neuroendocrine control of behavior, metabolism, and insect metamorphosis. Concurrently scheduled with course C125.

M227. Cellular, Molecular, and Functional Aspects of Reproductive System. (4) (Same as Neurobiology M227.) Lecture, three hours; discussion, one hour. Didactic presentations and discussion of developmental, anatomical/histological, physiological, cellular, and molecular aspects of reproductive system and functional integration of neuroendocrine-reproductive axis.

C235. Dynamical Systems Modeling of Physiological Processes. (5) Lecture, four hours; laboratory, two hours. Examination of art of making and evaluating dynamical models of physiological systems and of dynamical principles inherent in physiological systems. Concurrently scheduled with course C135.

C237. Growth and Adaptation in Cardiovascular System. (4) Requisite: course 111B. Regulation of normal and pathological cellular growth in cardiac and vascular tissue. Modification of gene expression in response to diverse physiological stimuli. Emphasis on molecular and cell biology approaches. Concurrently scheduled with course C137.

M240. Neural Systems for Motor Control. (4) (Same as Neuroscience M262.) Requisite: course C143. Advanced topics on neural mechanisms related to control of posture, locomotion, and highly skilled arm and hand movements. Emphasis on role of movement-dependent feedback at spinal segments and within sensorimotor areas of cerebral cortex, with respect to modification of motor output.

C243. Neuromotor Control of Posture and Movement. (5) Lecture, four hours; outside study, 11 hours. Requisite: course 142. Examination of theories for neuromotor control of posture, walking, and voluntary arm movements. Concurrently scheduled with course C143.

C244. Neural Control of Physiological Systems. (5) Lecture, four hours; outside study, 11 hours. Requisite: course 111B or M180B. Role of central nervous system in control of respiration, circulation, sexual function, and bladder control. Material for each section to be developed by combination of lecture and open discussion. Concurrently scheduled with course C144.

C245. Neural Mechanisms Controlling Movement. (5) Lecture, four hours; outside study, 11 hours. Requisite: course 111A or M180A. Examination of central nervous system organization required for production of complex movements such as locomotion, mastication, and swallowing. Concurrently scheduled with course C145.

M247. Neural Control of Cardiopulmonary Function. (4) (Same as Neuroscience M247.) Lecture, two hours; discussion, two hours. Requisites: courses 111A, 111B or 133 or 142 or M180A, M180B. Cardio-respiratory homeostasis is accomplished via central nervous system (CNS) control of respiratory and circulatory pumping systems. Focus on CNS mechanism underlying (1) generation of respiratory rhythm, sympathetic and parasympathetic tone, (2) determination of patterns of motor outflow, and (3) responses to changes in behavioral state or afferent signals. Emphasis on critical reading of literature.

250A. Muscle Dynamics. (4) Requisite: course 151. Integrated study of electrical and dynamic parameters of muscle-action, including topics in length-tension and force-velocity interrelationships; critical analysis of electromyographic and digital computer techniques.

250B. Musculoskeletal Mechanics. (4) Requisites: course 151, Mathematics 3A, 3B. Mechanical parameters of moving human musculoskeletal system, including use of cinematographic, force platform, and digital computer techniques. Topics include biostatistics, biodynamics, and empirical data modeling.

C252. Musculoskeletal Anatomy, Physiology, and Biomechanics. (5) Lecture, three hours; outside study, 12 hours. Requisite: course 111A. Anatomical, physiological, and mechanical characteristics of cartilaginous, fibrous, and bony tissues examined in normal and abnormal stress situations. Connective tissue growth processes, normal physiology, and repair mechanisms analyzed in conjunction with musculoskeletal injuries and effects of exercise. Concurrently scheduled with course C152.

M255. Seminar: Neural and Behavioral Endocrinology. (2) (Same as Neurobiology M255 and Psychology M294.) Seminar, one hour; discussion, one hour. Topics include hormonal biochemistry and pharmacology. Hypothalamic/hypophyseal interactions, both hormonal and neural. Structure and function of the hypothalamus. Hormonal control of reproductive and other behaviors. Sexual differentiation of brain and behavior. Stress: hormonal, behavioral, and neural aspects. Aging of reproductive behaviors and function.

M260. Neuromuscular Factors in Movement Regulation. (4) (Same as Neuroscience M260.) Requisite: course 138. Interaction of neural and muscular factors in regulation of muscle fiber properties and importance of these properties in neural strategies of movement regulation. S/U or letter grading.

M263. Neuronal Mechanisms Controlling Rhythmic Movements. (4) (Same as Neuroscience M263.) Requisite: course C145. Advanced topics on brainstem mechanisms responsible for controlling cyclic and stereotypic movements such as mastication and locomotion. Emphasis on cellular neurophysiology and interaction between neuronal networks. Introduction to primary literature and techniques used in these areas. Students expected to critically evaluate data and conclusions drawn.

M272. Neuroimaging and Brain Mapping. (4) (Same as Neuroscience M272 and Psychology M213.) Lecture, three hours; outside study, nine hours. Recommended preparation: mathematics and computer background. Requisites: course M202, Neuroscience M201. Theory, methods, applications, assumptions, and limitations of neuroimaging. Techniques, biological questions, and results. Brain structure, brain function, and their relationship discussed with regard to imaging.

M290. Seminar: Comparative Physiology. (2) (Same as Organismic Biology M290.) Seminar, two and one-half hours. Discussion of specific topics in comparative physiology of animals. Topics vary from year to year, with emphasis on systems physiology, neuroethology, or behavioral physiology. S/U or letter grading.

291A-291B-291C. Seminars: Cardiovascular Function and Adaptation. (2 to 4 each) Selected topics on cardiovascular function and adaptation. Students required to present two-hour seminar.

292. Evolution and Development of Auditory System. (2 or 4) Seminar, two hours. Discussion of specific topics related to evolution, embryology, morphogenesis, cytodifferentiation, and onset of function of auditory system, with special attention to centrifugal pathways. Emphasis on primary literature sources as well as current methodological approaches. Two-hour seminar presentation required for two units; seminar paper and two-hour seminar presentation required for four units. S/U or letter grading.

293A-293B-293C. Seminars: Musculoskeletal Function and Adaptation. (2 to 4 each) Requisites: courses 138 M260. Selected topics on muscular determinants of movement, metabolic aspects of exercise, and mechanics of connective tissue. Students required to present two-hour seminar.

M295A-M295B-M295C. Seminars: Cellular Neuroscience. (2 to 4 each) (Same as Neuroscience M266A-M266B-M266C.) Requisite: course M202. Selected topics in sensory transduction, cellular integration, synaptic processing, central nervous system function, and learning. Students required to present two-hour seminar.

296. Research Seminar: Physiological Science. (2) Review of literature, discussion of original research, and analysis of current topics in physiological science. May not be applied toward M.S. or Ph.D. course requirements. May be repeated for credit. S/U grading.

297. Seminar: Muscle Cell Biology. (2 to 4) (Formerly numbered 297A-297B-297C.) Seminar, two hours. Selected topics in muscle cell biology. Students required to present two-hour seminar. May be repeated for credit.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. In-Service Practicum for Teaching Assistants in Physiological Science. (2) Required of all teaching assistants. Supervised practicum in teaching laboratory courses in physiological science; material preparation and use of teaching aids. May not be applied toward degree requirements. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Individual Studies for Graduate Students. (2 to 8) To enroll for letter grade, petition signed by faculty sponsor, graduate adviser, and graduate affairs committee chair must be submitted prior to end of second week of class. Eight units may be applied toward degree requirements for M.S. or Ph.D. degree, provided that students enroll in two different four-unit 596 courses in different laboratories under supervision of different mentors. Term paper required for letter grading. S/U or letter grading.

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 16) To be arranged with faculty member serving as student's comprehensive examination chair or Ph.D. committee chair. May not be applied toward M.S. or Ph.D. course requirements. May be repeated as necessary. S/U grading.

598. Research for and Preparation of M.S. Thesis. (2 to 16) To be arranged with faculty member serving as student's thesis committee chair. May not be applied toward M.S. course requirements. May be repeated as necessary. S/U grading.

599. Research for and/or Preparation of Ph.D. Dissertation. (2 to 16) May not be applied toward Ph.D. course requirements. May be repeated as necessary. S/U grading.

Oscar U. Scremin, M.D., *in Residence*
Enrico Stefani, M.D., Ph.D.
John McD. Tormey, M.D.
Julio L. Vergara, Ph.D.
James N. Weiss, M.D. (*Chizuko Kawata Professor of Cardiology*)
Ernest M. Wright, D.Sc.
Guido Zampighi, Ph.D.

Professors Emeriti

Allan J. Brady, Ph.D.
Jennifer S. Buchwald, Ph.D.
Sergio Ciani, Ph.D.
George Eisenman, M.D.
Joy S. Frank, Ph.D.
Glenn A. Langer, M.D. (*Castera Professor Emeritus of Cardiology*)
Donald B. Lindsley, Ph.D.
Gordon Ross, M.D.
Ralph R. Sonnenschein, M.D.
Bernice M. Wenzel, Ph.D.
Brian J. Whipp, Ph.D.

Associate Professors

Gregory Brent, M.D.
Linda Demer, M.D., Ph.D.
Sally J. Krasne, Ph.D.
Thomas J. O'Dell, Ph.D.
Diane M. Papazian, Ph.D.
Helen Raybould, Ph.D.

Assistant Professors

Jonathan Monck, Ph.D.
Brett Premack, Ph.G.
Robert Ross, M.D.
Nancy L. Wayne, Ph.D.

Adjunct Professors

Christopher B. Cooper, M.D.
Arthur Peskoff, Ph.D.
Douglas Rees, Ph.D.
Kenneth P. Roos, Ph.D.

Adjunct Assistant Professor

Bernard Ribalet, Ph.D.

Scope and Objectives

Physiology is the science of the functional activities of the human body. This covers a wide range, including observations on humans and experiments on animals and model systems in order to understand principles. Physiology is the science most directly relevant to human medicine in all its specialties and to understanding all environmental factors affecting human life. It is also a pure science of great challenge because of the complexity of its problems and its extensive interaction with mathematical, physical, biochemical, and engineering sciences, as well as with other branches of biology.

Within the prescribed curriculum, students may specialize in cellular and molecular physiology, theoretical and mathematical physiology, neurobiology, communication and information, organ systems and integrative phenomena, and behavioral physiology.

In a recent survey conducted by the Conference Board of the Associated Research Councils, UCLA's Physiology Department was judged fifth best in the nation in terms of the quality of its faculty. In addition to the Ph.D. program, the department offers postdoctoral training in research and welcomes students interested in articulated M.D./Ph.D. programs.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

Admission

A master's degree program is not a general objective of the department. However, the Master of Science degree in Physiology may be awarded by comprehensive examination or thesis in special cases.

Areas of Study

See Doctoral Degree.

Course Requirements

Nine courses, of which at least five must be graduate courses, are required for the master's degree. A maximum of eight units of 500-series courses may be applied to the total course requirements; only four units may be applied to the graduate course requirement.

Comprehensive Examination Plan

Consult the department.

Thesis Plan

Consult the department.

Doctoral Degree

Admission

All candidates for admission to graduate status in the Department of Physiology are expected to pursue the Ph.D. degree in Physiology; the department does not admit candidates for the M.S. degree. Ph.D. students must conform to the general admission requirements established by the Graduate Division and have received a bachelor's degree in a biological or physical science or in the premedical curriculum. In general, at the time of admission, completed coursework should include courses in mathematics through calculus and differential equations, college physics, chemistry (including organic chemistry and biochemistry), and biology (courses in cell biology and molecular biology are highly recommended).

In general, candidates seeking admission to the Physiology Department should apply through UCLA ACCESS to Programs in Molecular, Cellular, and Integrative Life Sciences, 172 MBI, UCLA, Box 951570, Los Angeles, CA 90095-1570, (310) 206-6150. Additional information can be obtained from the Graduate Student Office, Department of Physiology, UCLA School of Medicine, Box 951751, Los Angeles, CA 90095-1751. Applicants should submit applications by December 15.

In certain cases, at the discretion of the department, if applicants lack preparation in one of the above-mentioned courses but have a strong background in areas pertinent to physiology, students may be admitted to graduate status provided that deficiencies are made up. (It is recommended that the deficiencies be corrected prior to matriculation.)

Applicants must submit (1) transcripts of grades for all college-level work; (2) the results of the Graduate Record Examination (GRE), including the Subject Test in Biology or in the applicant's undergraduate major (MCAT scores are accepted in lieu of the GRE); (3) at least three letters of recommendation from professors stressing potential for successful completion of graduate studies and creative independent research; and (4) an essay describing academic background, work experience, motivation for research, and career goals. Selected applicants are asked to have an interview with members of the graduate program committee (composed of faculty and a graduate student representative) or a designated interviewer. The graduate program committee then, in a written evaluation, advises the departmental committee on instruction of its recommended admits. Final decisions of admittance to the graduate program reside with the committee on instruction which examines the recommendations for academic excellence, promise in scientific career goals consistent with the scientific expertise of the faculty, and the existence of financial support for the admit during the first and subsequent years of training.

Major Fields or Subdisciplines

The major fields in which graduate students may pursue research include (1) cellular physiology and biophysics; (2) molecular physiology; and (3) integrative physiology. The subdisciplines of these areas include cellular and molecular electrophysiology; membrane transport; cellular signal transduction; channel and transporter structure and function; muscle physiology; fundamental neurophysiology; neuromuscular physiology; and cardiovascular, gastrointestinal, respiratory, and reproductive physiology.

Course Requirements

The following courses are required during the first two years: Biological Chemistry CM253; Physiology M204 or M210 or Neuroscience M205; Physiology M209A. Biological Chemistry CM267 or Microbiology and Immunology M229 may be substituted with permission of the graduate adviser, M212, M213. In addition, during the first two years, a total of 12 units must be completed in techniques or special topics courses (e.g., Physiology 220 through 298) or comparable courses in cell biology, neuroscience, molecular biology, chemistry, or biology) as governed by research interest. The specific courses are determined in consultation with the mentor and the Instruction Committee.

Three laboratory rotations must be taken during the first year. The remaining time is to be devoted to developing and pursuing dissertation research (Physiology 597 and 599).

Written and Oral Qualifying Examinations

The written examination is taken during the summer following the completion of the second year. The purpose of the examination is to assess ability to read and critically evaluate research papers in the chosen division of physiology (e.g., molecular, cellular, or integrative physiology). About three to four weeks prior to the examination, students are given three reading lists (generated by professors selected by the graduate program committee), each containing five to 10 articles (including review articles and short reports such as those found in *Science* and *Nature*) on three different topics. During the written examination, students are asked one or more essay questions in the area of two of the reading lists. For the third area, students are given an actual short article that is missing its discussion section; students are asked to write a discussion for that paper. The examination is taken on two consecutive half days. The examination is number coded and given a pass/fail grade by the examining committee.

The University Oral Qualifying Examination is designed to establish that students can independently identify significant research questions, put them in context of existing knowledge in physiology, design appropriate and realistic protocols for testing hypotheses, and assure that the dissertation project is both appropriate and feasible. The examination takes place by the end of the Fall Quarter of the third year (end of seventh quarter) and is based on a written proposal circulated to members of the doctoral committee at least seven days prior to the examination. The proposal should pose an original research question outside the immediate area of dissertation research, should provide enough background (with references) to put the question in context of previous work, and should propose the experimental design that would be used to test the hypotheses in the proposal. The proposal must have the form of a mini-research grant application of about 20 pages, double spaced. Students must have independently generated the hypotheses to be tested and the experimental design for the testing of the hypotheses. Although students may consult faculty members or other students for information as to the execution of certain protocols, such as for references, the creative and critical aspects of the proposal must be the students' own work. The examination is an oral presentation of this proposal with concurrent questioning by the committee. The written proposal contains a brief two- to four-page summary of the proposed dissertation which is also discussed at the oral examination with the goal of clarifying its suitability as a Ph.D. project.

Midstream Oral Presentation. In addition to the oral qualifying examination, there is a mid-

stream oral presentation (to occur eight to 12 months after the oral qualifying examination) in which progress on the research project is reviewed by the thesis committee. The purpose of the presentation is to inform the committee of research progress, to gain approval of significant changes in research direction that may have occurred, and to provide any additional help or guidance from the committee to assure that the dissertation is completed in an appropriate and timely fashion. The presentation is mandatory but is not an examination. The dissertation research adviser is expected to write a summary of any comments made by the doctoral committee at this time for inclusion in the student's folder.

Grades and Reexamination. Both the written and University Oral Qualifying Examinations are graded pass or fail. In the event that the committee for either examination concludes that a failing grade is necessary, the examining committee may decide to grant one additional opportunity to pass the examination at a time to be determined by the committee. The interval between the first and second examination, however, should not exceed two months, except in special circumstances. The same faculty committee administers and grades the second examination.

Physiology

Lower Division Course

88. Lower Division Seminar: Special Topics in Physiology. (4) Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in physiology approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

Upper Division Courses

100. Elements of Human Physiology. (6) Designed for first-year dental students. Major organ body functions. With special supplementation, a suitable introduction to the field for graduate students for whom the 201A-201B course sequence is too extensive.

199. Special Studies (1 to 8 units). Special studies in physiology, including either reading assignments or laboratory work or both, designed for proper training of students.

Graduate Courses

201A-201B. Organ System Physiology. (6-6) Lecture, six hours; laboratory, three and one-half hours. Designed for medical and qualified graduate program students. Recommended corequisites: courses M203A-M203B. Runs throughout School of Medicine's second semester. Lectures, laboratories, and conferences. Properties of biological membranes. Contractility of muscle. Epithelial transport. Cardiovascular, renal, respiratory, and gastrointestinal systems. Fluid and electrolyte balance. To receive credit, both courses must be taken together in same academic year. In Progress grading.

M203A-M203B. Neuroscience. (4-4) (Same as Neurobiology M203A-M203B.) Lecture, four hours. Designed for medical and qualified graduate program students. Lectures, conferences, demonstrations, and laboratory procedures necessary to understand functions of nervous system, with emphasis on their applications in the medical sciences. To receive credit, both courses must be taken together in same academic year. In Progress and letter grading.

M204. Cellular and Molecular Developmental Neurobiology. (4) (Same as Neurobiology M204, Neuroscience M204, and Psychiatry M204.) Lecture, three hours; discussion, one hour. Requisites: Neuroscience M201, M202, and M203, or Biological Chemistry 201A-201B. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging.

M209A. Molecular Cell Biology. (6) (Same as Molecular, Cell, and Developmental Biology CM220 and Neurobiology M209A.) Not open for credit to students with credit for Molecular, Cell, and Developmental Biology 100 or M140. Introduction to cell biology for graduate students in basic medical sciences and selected undergraduates. Topics include membrane structure, assembly, and function; biogenesis of organelles, intercellular and intracellular signaling, immunity and gene structure, function and replication.

M210. Molecular and Cellular Mechanisms of Neural Integration. (5) (Same as Neuroscience M230 and Physiological Science M210.) Lecture, four hours; discussion, one hour; outside study, 10 hours. Requisite: course M209A or Neuroscience M202. Introduction to mechanisms of synaptic processing. Selected problems of current interest, including regulation and modulation of transmitter release, molecular biology and physiology of receptors, cellular basis of integration in sensory perception and learning, neural nets and oscillators, and molecular events in development and sexual differentiation.

M212. Introduction to Cellular Physiology and Biophysics. (6) (Same as Molecular, Cell, and Developmental Biology M237 and Physiological Science M212.) Lecture, five hours. Requisite: course M209A or Physiological Science 111A. Development of fundamental physiological and biophysical concepts associated with all membranes, membrane channels and transporters, membrane potential, membrane excitability, electrical signal transmission and transduction, and muscle contraction and their application to study of basic cellular processes. Emphasis in laboratory on development of skills using computer programming languages, spreadsheets, and graphics for modeling and analysis of cellular processes.

M213. Principles of Integrative Physiology. (6) (Same as Physiological Science M213.) Lecture, four hours; discussion, two hours. Designed for graduate students. Open to juniors/seniors with consent of instructor. Basic principles of biological integration, including regulation, homeostasis, feedback, and natural selection, to be illustrated by applying them to a molecules-through-whole animal view of four sets of problems: information processing, development, and plasticity in central nervous system; endocrine regulation of reproduction; feedback regulation of blood pressure and control of eye movements; and matching of enzyme, transporter, and bone capacities to natural loads.

220. Methods in Cell Physiology. (6) Linear circuit analysis, including admittance, transfer admittance, transfer function, and filters using transform methods. Application of these concepts to electronic analog circuits in lectures and laboratory, with emphasis on operational amplifiers. Applications to electrophysiology include microelectrode amplifiers, voltage clamp and patch clamp techniques, with circuit analysis and noise considerations. Digital electronics cover logic gates, sequential circuits, and A/D and D/A conversion, with introduction to sampling theory.

221. Cell Physiology: Excitability. (6) Requisite: course 220. In-depth coverage of general properties of excitable cells, linear cable properties, nonlinear conductance changes, and generation and propagation of the nerve impulse. Voltage gating and gating currents, as well as relationship between macroscopic conductance and single channel properties discussed in analytical detail using original publications.

M223. Membrane Molecular Biology. (4) (Same as Biological Chemistry M223.) Lecture, two hours; discussion, two hours. Requisite: Biological Chemistry CM253. Advanced course in molecular aspects of membrane physiology and biochemistry covering lipids and physical chemistry of biological membranes; membrane biogenesis and targeting of proteins to membranes; pumps, carriers, and channels; receptors and transmembrane signaling. S/U or letter grading.

M225. Comparative Endocrinology: Molecular to Behavioral. (4) (Same as Physiological Science CM225.) Lecture, two hours; discussion, two hours. Designed for graduate students. Important concepts in endocrinology, with focus on current research involving invertebrate and vertebrate animal models in areas of reproduction, neuroendocrine control of behavior, metabolism, and insect metamorphosis.

M270A-M270B-M270C. Cell, Molecular, and Integrative Biology Seminars. (2-2-2) (Same as Neurobiology M270A-M270B-M270C.) Seminar, one hour; discussion, one hour. Designed for graduate students. Presentation of weekly seminars and discussion on current topics in cell and molecular biology by faculty members from Neurobiology, Physiology, and other UCLA departments, in addition to invited lecturers. S/U grading.

298. Current Topics in Physiology. (2 to 4) (Formerly numbered 250A-250B-250C.) Designed for graduate students. Students read primary literature in a specified area and conduct or participate in discussions on these papers. S/U or letter grading.

596. Directed Individual Study or Research. (2 to 12) Tutorial, to be arranged.

597. Preparation for M.S. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 12) Tutorial, to be arranged.

598. Thesis Research for M.S. Candidates. (2 to 12) Tutorial, to be arranged.

599. Dissertation Research for Ph.D. Candidates. (2 to 12) Tutorial, to be arranged.

 Meredith Phillips, Ph.D.
 Michael A. Stoll, Ph.D.

Scope and Objectives

The Department of Policy Studies is an interdisciplinary unit composed of faculty members from around the campus, as well as faculty unique to the department. Its goal is to foster an understanding of the theory and practice of public policy in the many fields in which it applies. Examples include social insurance and welfare programs, unemployment and training, drug policy and crime, economic development, environmental quality, education, and health care. The department plays a major role in two schoolwide programs: the Master of Public Policy (M.P.P.) degree and the undergraduate minor in Public Policy.

The M.P.P. degree program is designed to train professionals in both public- and private-sector policy analysis and implementation and provides coursework in such areas as microeconomics, statistics, and political processes.

The undergraduate minor in Public Policy familiarizes students with key issues in public policy. Both programs have a heavy applied orientation. For further information on the minor, see Public Policy and Social Research Schoolwide Programs later in this section of the catalog.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

Admission

Applicants to the program leading to the Master of Public Policy (M.P.P.) degree are evaluated on their overall record. The final decision is based on a subjective assessment of the applicant's potential to meet the scholarship requirements of the program and to succeed as a policy professional.

A grade-point average of 3.0 or better in the junior and senior years is required and prefer-

ence is given to applicants with a 3.5 or above. Additional consideration is given to the strength of the applicant's undergraduate program and its standards. The quantitative nature of the core curriculum requires that attention be given to quantitative and analytical abilities. An elementary statistics course is strongly recommended.

Scores on the Graduate Record Examination (GRE) General Test are used in combination with the GPA to help predict academic performance in the M.P.P. program. Scores above 650 in each area are usually essential to gain admittance to the program, although possible reasons for lower scores are considered. Especially high GRE scores may help alleviate concerns about a troublesome academic record, but a high GRE score alone is insufficient reason for admission. Under certain conditions, the Admissions Committee may agree to consider scores on the Graduate Management Admission Test (GMAT) or the Law School Admission Test (LSAT) in lieu of GRE scores.

The statement of purpose is evaluated to determine the applicant's genuine academic interest in and commitment to a career in public policy, as well as the applicant's general ability to write coherent and convincing prose. The statement can also help determine the match between the applicant's interests and the school's offerings, and to assess written communication skills.

Applicants with at least two years of work experience in policy-making or implementation are preferred. Internships and volunteer work in a policy setting are also viewed positively.

Three letters of recommendation are required from supervisors in policy-related work or instructors in undergraduate courses. Recommenders should be individuals who know the applicant well and who can comment specifically on the potential for a career as a policy professional rather than someone of high status in a firm or school who hardly knows the applicant.

A score of at least 600 on the Test of English as a Foreign Language (TOEFL) is required for applicants whose native language is not English.

Applications and program information can be obtained on written request to the School of Public Policy and Social Research, or by emailing mppinfo@ucla.edu.

Areas of Study

In the second year, students select either two two-course concentrations or one four-course concentration from the following: social welfare, transportation and urban development, employment and labor, regional development and policy.

Concentrations in the following additional areas are also being developed and are available based on need and student/faculty interest: environmental policy, health policy, communica-

tions policy, international policy and economic development.

Students also have the option, with their faculty adviser's approval, of designing their own concentrations from other courses offered in the School of Public Policy and Social Research or in other UCLA schools or departments.

Course Requirements

Students take three four-unit courses per quarter for a total of 72 units, including nine core courses, four concentration courses, two electives, and a two-quarter seminar in applied policy analysis. A field internship is also required, generally between the first and second years.

All students are required to take the core curriculum, which provides a broadly based foundation in social/policy analysis together with relevant quantitative, analytical, managerial, and organizational methods. The first eight of the core courses are normally taken in the first year.

Comprehensive Examination Plan

The comprehensive examination requirement is met by completion of an extended policy paper during the two-quarter policy seminar, which builds on the core courses, internship experience, and the concentration courses. The final policy paper presented by the student must be certified as complete by both the relevant seminar leader and the student's adviser.

Thesis Plan

None.

Policy Studies

Lower Division Courses

10A. Introduction to Public Policy. (4) Lecture, three hours; outside study, nine hours. Overview of principal topics of contemporary policy analysis, developing their applications with examples from instructor's own research, visitors, small student projects, or field trips.

10B. California Policy Issues. (4) Lecture, three hours; outside study, nine hours. Enforced requisite: course 10A. Application of policy analysis to California issues. Guest lectures from practitioners and academics along with readings and videos. Student written reports and oral presentations required. Letter grading.

Upper Division Courses

101. Drug Abuse Control Policy. (4) Lecture, three hours; outside study, nine hours. Introduction to and development of main ideas and themes that enter into analysis and execution of policies directed at control of substance abuse and its side effects; illustration and instantiation of main techniques and concepts of policy and management analysis.

102. Rational Policies, Irrational People. (4) Lecture, three hours; outside study, nine hours. Development of some central concepts of rational-choice model and examination of theories and evidence about systematic ways in which actual behavior deviates from that model. Exploration of various reasons groups of rationally self-seeking individuals might fail to act as rationally self-seeking groups and discussion of policy implications of individual and collective departures from rational action.

103. Ethics, Morality, and Public Life: Contemporary Controversies. (4) Lecture, four hours; outside study, eight hours. Study of ethical and moral questions that arise in public life. Goal is not to imbue students with a given body of factual knowledge or to develop new quantitative or social science methodologies to analyze such questions, but to enhance their critical thinking skills.

104. Culture and Political Structure of Los Angeles. (4) Lecture, three hours; outside study, nine hours. Exploration of two pieces of the puzzle in modern urban life: the different communities that live here (and in most other major cities) and political structure that binds us all together. Who are the communities living here? How do they organize themselves and develop leaders? How does integration into mainstream take place? What is "mainstream" today? How does political structure help or impede the notion of a united city?

CM110. Information Superhighway. (4) (Same as Communication Studies M155.) Lecture, three hours. Information Superhighway seen from a non-American viewpoint, considering its meanings, potentials, structures, applications, policy implications, economic, social, and cultural impacts, and public perceptions in a number of countries. Special emphasis on Western Europe, Canada, and Australia, with a look at Japan and China also. Opportunities for Africa and Latin America suggested, especially education, health, and other public services. Concurrently scheduled with course C270.

M111. Culture, Identity, and Media. (4) (Same as Communication Studies M157.) Discussion, three hours. Interplay of national culture and identity with electronic media, both "old" and "new." Examination of how national mythologies, constructive or pernicious, are reinforced through the media in several countries: U.K., France, Germany, Canada; analysis of how media manipulation, especially of radio and television, increasingly paves the way to war: Bosnia, Rwanda, Somalia.

C115. Environmental and Resource Economics and Policy. (4) Lecture, three hours. Requisites: Economics 11, 143. Survey of ways economics is used to define, analyze, and resolve problems of environmental management. Overview of analytical questions addressed by environmental economists which bear on public policies. Concurrently scheduled with course CM250. Letter grading.

M116. Nuclear Weapons: Critical Decisions. (4) (Same as Honors Collegium M119.) Lecture, three hours; outside study, nine hours. Examination of critical decisions regarding nuclear weapons, starting with President Roosevelt's decision to build atomic bomb and ending with current policies on containing nuclear proliferation and on avoiding nuclear catastrophe. Letter grading.

M120. Race, Inequality, and Public Policy. (4) (Formerly numbered 120.) (Same as Afro-American Studies M120.) Lecture, three hours. Background in economics, sociology, or urban studies preferred but not required. Survey course to examine major debates and current controversies concerning public policy responses to social problems in urban America.

141. Employment and Labor Policy: Survey. (4) Lecture, three hours; outside study, nine hours. Requisite: course 10A. Introduction to current public policy issues in employment, labor relations, and labor markets. Historical context for current employment and labor policies in the U.S. Pro and con philosophical analysis of reasons for government regulation. Analysis of current data on labor unions, the workplace, and labor-market trends. Workforce diversity, education and training, social welfare policy, and global issues (immigration, trade, and global economy as it affects the workforce). Future trends and issues on policy horizon.

C142. Labor Markets and Public Policy. (4) (Formerly numbered 142.) Lecture, three hours; outside study, nine hours. Requisite: course 10A. Survey of major topics in economic analysis of labor markets and public policies toward the labor market. Topics include labor force trends and measurement, compensation determination, productivity, internal labor markets, human capital, union wage effects, unemployment, and minority and female labor-market experience. Concurrently scheduled with course CM230.

C144. Comparative Industrial Relations. (4) (Formerly numbered 144.) Lecture, three hours; outside study, nine hours. Requisite: course 10A. At national and international levels, historical and contemporary analytical comparison of political, social, and economic contexts influencing human resource systems of selected developed countries. In addition to discussing possible frameworks for analyzing human resource systems, examination of institutions and ideologies of labor, management, and government, and interaction of their power relationships; substance and manner of determination of "web of rules" governing rights and obligations of the parties; and resolution of conflicts. Concurrently scheduled with course CM231.

145. Labor Policies in the U.S.: Historical Perspective. (4) Lecture, three hours; outside study, nine hours. Requisite: course 10A. Insight into evolution of labor policies in the U.S. from 19th century to the present. Exploration of important policy areas such as child labor, labor standards, protective legislation for women workers, industrial relations, civil rights, occupational safety and health, and international labor standards in (1) historical context (economic, political, and social factors that shaped the debate), (2) motivation and action of major players (business, labor, government), and (3) changing patterns of government involvement in public policy.

148. Business and Public Policy. (4) Lecture, three hours; outside study, nine hours. Requisite: course 10A. Introduction to key issues arising at interface between business and government policy. Discussion of why government focuses so intensively on regulating economic outcomes, nature of business/government relationship, business political activity, and major government policies. Topics include economic regulation (industrial policy, antitrust, technology policy); social regulation of business (energy, environment, risk, liability, corporate governance); and corporate social responsibility, business ethics, and green business. Discussion of topics in their historical and political context, with comparison between economic regulation in the U.S. and other countries.

190. Special Topics in Public Policy. (4) Discussion, three hours. Examination of particular subfields of policy studies (e.g., international policy, crime policy, policy history) in depth, with specific topics to be identified by instructor. Must be taken for credit if applied toward minor in Public Policy. May be repeated for credit with topic change. P/NP or letter grading.

197. Research Seminar: Policy Studies. (4) Seminar, three hours; outside study, nine hours. Requisites: courses 10A, 10B. Required of students in policy studies minor. Production of research paper that examines in depth a particular policy issue in its social context, including political pressures involved and problems of implementation. Emphasis on skills of data acquisition and analysis, conceptualization, and written analysis and presentation.

199. Special Studies in Policy Studies. (2 or 4) Preparation: 3.0 grade-point average. Limited to juniors/seniors. Intensive directed research in policy studies. P/NP or letter grading.

Graduate Courses

201. Principles of Microeconomic Theory I. (4) Lecture, three hours; outside study, nine hours. First course in two-term sequence (see course 204) to prepare students for economic analysis of public policy, with review of economic principles and basic microeconomic theory and policy applications. Consumer theory and demand, producer theory and supply, equilibrium of product and factor markets. Letter grading.

202. American Political Institutions and Processes. (4) Lecture, three hours; outside study, nine hours. Designed to provide background necessary to develop strategies for dealing effectively with political environment of policy and administration. Discussion of U.S. constitutional arrangements, followed by instrumental and integrative examination of primary institutions of politics and governance from organized interests to legislatures, bureaucracies, and courts. Letter grading.

203. Statistical Methods of Policy Analysis I. (4) Lecture, three hours; outside study, nine hours. First course in two-term sequence (see course 208). Review of statistical principles useful to policy research and analysis. Topics include descriptive statistics, expectations, univariate distribution, probability, covariance and correlations, statistical independence, random sampling, estimators, unbiasedness and efficiency, statistical inference, confidence intervals, and hypothesis testing. Letter grading.

204. Principles of Microeconomic Theory II. (4) Lecture, three hours; outside study, nine hours. Requisite: course 201. Second course in two-term sequence (see course 201) covering both theory and policy applications. Topics include monopoly, factor markets, general equilibrium, welfare economics, externalities, public goods, uncertainty, and intertemporal optimization. Letter grading.

205. Bureaucracy and Public Management. (4) Lecture, three hours; outside study, nine hours. Problems posed by behaviors within and by bureaucracies. Conceptual tools for comprehending organization environment in which policy analysts work; tools for understanding role of manager with such organizations. Practical suggestions for policy analyst attempting to navigate waters of bureaucracy. Theoretical analysis integrated with case studies.

206. Political Economy of Policy Adoption and Implementation. (4) Lecture, three hours; outside study, nine hours. Analysis of how policy is formed, adopted, and implemented. How policies are formulated, by whom, how policy agendas are set, how to define relationships between politicians, bureaucrats, lobbyists, and media experts. Letter grading.

207. Political Economy. (4) Lecture, three hours; outside study, nine hours. Examination of political, legal, and social institutions to show where the U.S. fits in among varieties of modern capitalism and business/government relations. Analysis of domestic policy options nations are pursuing in response to economic globalization, such as protectionism, mercantilism, and deregulation. Introduction to international coalitions being formed, including NAFTA and non-governmental organizations, to address global environmental crisis, etc.

208. Statistical Methods of Policy Analysis II. (4) Lecture, three hours; outside study, nine hours. Requisite: course 203. Second core course in statistics and quantitative methods for M.P.P. degree. Quantitative studies of public policy, covering regression analysis and its application to public policy questions. Letter grading.

209. Management in the 21st Century. (4) Lecture, three hours; outside study, nine hours. Overview of moral philosophy, political theory, and public-sector ethics using readings from classical and contemporary literature and case studies. Consideration of various ways in which terms such as "democracy" and "liberty" are used in public discourse. Practice in developing and defending moral arguments, both orally and in writing. Letter grading.

M210. Foundations of Social Welfare Policy. (4) (Same as Social Welfare M221A.) Lecture, three hours. Nature, roles, and history of welfare institutions in different societies; applicable social system theory of different components of the welfare system; theory and research about welfare policies and organizational forms. S/U or letter grading.

M211. Public Policy for the Elderly and Their Families. (4) (Same as Social Welfare M290P.) Lecture, three hours. Examination of theoretical models and concepts of policy process and application to aging policy. Analysis of decision-making processes that affect social policies. Description of historical development of contemporary policy. Exploration of current proposals and issues. S/U or letter grading.

M212. Child Welfare Policy. (4) (Same as Social Welfare M290J.) Lecture, three hours. Development of social policy as it affects families and children from different cultural backgrounds and as it is given form in public child welfare system. Examination of development of an infrastructure to support needs of children and families. S/U or letter grading.

M213. Mental Health Policy. (4) (Same as Social Welfare M290K.) Lecture, three hours. Examination of evolution of social policy and services for the mentally ill, with emphasis on political, economic, ideological, and sociological factors that affect views of the mentally ill and services they are provided. S/U or letter grading.

M214. Poverty, the Poor, and Welfare Reform. (4) (Same as Social Welfare M290L.) Lecture, three hours. Major policy and research issues concerning poverty and social welfare policy directed toward the poor in the U.S. S/U or letter grading.

M215. Health Policy. (4) (Same as Social Welfare M290M.) Lecture, three hours. Introduction to contemporary issues in health care financing and delivery, providing historical perspective on emergence of these issues. Examination of major public programs and their relationship to issues of access and cost. S/U or letter grading.

M216. Public Policy for Children and Youth. (4) (Same as Social Welfare M290N.) Lecture, three hours. Policy issues that affect children and adolescents in relation to their interaction with schools and the community, with emphasis on impact of policy across federal, state, and local levels. S/U or letter grading.

217. Methods of Evaluating Social Programs. (4) Lecture, three hours; outside study, nine hours. Requisites: courses 203, 208. Examination of design of and statistical methods for evaluating impacts of social programs. Introduction to use of experimental and nonexperimental designs and to various methods for estimating impacts of social programs. Discussion of designs for process analyses. Letter grading.

M220. Transportation, Land Use, and Urban Form. (4) (Same as Urban Planning M286.) Lecture, three hours. Historical evolution of urban form and transportation systems, intrametropolitan location theory, recent trends in urban form, spatial mismatch hypothesis, jobs/housing balance, transportation in the strong central city and polycentric city, neotraditional town planning debate, rail transit and urban form.

M221. Travel Behavior Analysis. (4) (Same as Urban Planning M287.) Lecture, three hours. Requisites: courses 201 and 203, or Urban Planning 207 and 220B. Descriptions of travel patterns in metropolitan areas, recent trends and projections into the future, overview of travel forecasting methods, trip generation, trip distribution, mode split traffic assignment, critique of traditional travel forecasting methods and new approaches to travel behavior analysis. Letter grading.

M222. Transportation Economics, Finance, and Policy. (4) (Same as Urban Planning M289.) Lecture, three hours. Overview of transportation finance and economics; concepts of efficiency and equity in transportation finance; historical evolution of highway and transit finance; current issues in highway finance; private participation in road finance, toll roads, road costs and cost allocation, truck charges, congestion pricing; current issues in transit finance; transit fare and subsidy policies, contracting and privatization of transit services.

M223. Transportation and Environmental Issues. (4) (Same as Urban Planning M290.) Lecture, three hours. Regulatory structure linking transportation, air quality, and energy issues, chemistry of air pollution, overview of transportation-related approaches to air quality enhancement; new car tailpipe standards; vehicle inspection and maintenance issues; transportation demand management and transportation control measures; alternative fuels and electric vehicles; corporate average fuel economy and global warming issues; growth of automobile worldwide fleet; the automobile in the sustainability debate.

CM230. Labor Markets and Public Policy. (4) (Formerly numbered M230.) (Same as Management M259C.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Survey of major topics in economic analysis of labor markets and public policies toward the labor market. Topics include labor force trends and measurement, compensation determination, productivity, internal labor markets, human capital, union wage effects, unemployment, and minority and female labor-market experience. Concurrently scheduled with course C142. S/U or letter grading.

CM231. Comparative Industrial Relations. (4) (Formerly numbered M231.) (Same as Management M255.) Lecture, three hours; outside study, nine hours. Requisite: Management 409 or elementary knowledge of labor economics. At national and international levels, historical and contemporary analytical comparison of political, social, and economic contexts influencing human resource systems of selected developed countries. In addition to discussing possible frameworks for analyzing human resource systems, examination of institutions and ideologies of labor, management, and government, and interaction of their power relationships; substance and manner of determination of "web of rules" governing rights and obligations of the parties; and resolution of conflicts. Concurrently scheduled with course C144. S/U or letter grading.

M232. Labor Relations: Process and Law. (4) (Same as Management M250A.) Lecture, three hours. Designed for graduate students. Consideration, at advanced level, of collective bargaining process, labor/management agreement, administration of the contract, law of labor/management relations, union structure and goals, and influence of external labor markets on labor relations. S/U or letter grading.

233. Employment Issues in California. (4) Lecture, three hours; outside study, nine hours. Designed for graduate students. Drawing on resources of UCLA Business Forecasting Project, introduction to general features of California labor market, analysis of employment fluctuations and forecasting techniques including linkages between employment fluctuations in California and elsewhere in the country, and social issues related to labor market. Letter grading.

234. Labor Markets and Social Policy. (4) Lecture, three hours; outside study, nine hours. Examination of analytical tools and conceptual models needed to understand policies directed toward people in lower tail of income distribution. Concepts include static and dynamic labor supply, labor demand, compensating differentials, human capital, and economic models of immigration and crime. Letter grading.

M240. Theories of Regional Economic Development I. (4) (Same as Urban Planning M236A.) Lecture, three hours; laboratory, one hour. Introduction to theories of location of economic activity, trade, and other forms of contact between regions, process of regional growth and decline, reasons for different levels of economic development, relations between more and less developed regions.

M241. Introduction to Regional Planning: Evolution of Regional Planning Doctrines. (4) (Same as Urban Planning M232A.) Lecture, three hours. Critical and historical survey of evolution of regional planning theory and practice, with particular emphasis on relations between regional planning and developments within Western social and political philosophy. Major concepts include regions and regionalism, territorial community, and social production of space.

M242. Regional Development, Urbanization, and Industrial Policy. (4) (Same as Urban Planning M234.) Lecture, three hours. Survey of theories of regional development, with special reference to "new economic geography" and its relevance for formulation of local economic development policies.

CM250. Environmental and Resource Economics and Policy. (4) (Formerly numbered C250.) (Same as Urban Planning M280.) Lecture, three hours. Requisites: courses 204 and 208, or Urban Planning 207 and 220B. Survey of ways economics is used to define, analyze, and resolve problems of environmental management. Overview of analytical questions addressed by environmental economists which bear on public policies. Concurrently scheduled with course C115. Letter grading.

M267. Medicare Reform. (4) (Same as Health Services M252.) Lecture, three hours; outside study, nine hours. Designed for graduate students. Analytical and managerial skills learned earlier to be used to analyze problems with existing medicare program and to develop specific options for reforming features of program to accommodate coming pressures generated by retirement of baby-boom generation. Letter grading.

M268. Microeconomic Theory of Health Sector. (4) (Same as Health Services M236.) Lecture, four hours; discussion, two hours. Preparation: intermediate microeconomics. Requisite: Biostatistics 100A. Microeconomic aspects of the health care system, including health manpower substitution, choice of efficient modes of treatment, market efficiency, and competition. Letter grading.

M269. Health Care Policy and Finance. (4) (Same as Health Services M249E.) Seminar, four hours. Requisites: Biostatistics 100A, 100B, Health Services 200A-200B, 236. Public policy concerning payment for medical care services and characteristics of the market for those services: demand for care, fee-for-service and prepaid payment systems, regulation of price and capital investment, private sector efforts to control health care costs. Letter grading.

C270. Information Superhighway. (4) Lecture, three hours. Information Superhighway seen from a non-American viewpoint, considering its meanings, potentials, structures, applications, policy implications, economic, social, and cultural impacts, and public perceptions in a number of countries. Special emphasis on Western Europe, Canada, and Australia, with a look at Japan and China also. Opportunities for Africa and Latin America suggested, especially education, health, and other public services. Concurrently scheduled with course CM110.

280. Science, Technology, and Industrial Policy. (4) Lecture, three hours. Designed for graduate students. Examination of government support of research and development and industrial policy; approaches to fostering science, technology, and industrial growth and commercialization of public sector knowledge; selective subsidies and support of research and development and individual firms; technology change and the labor market.

M281. Growth, Science, and Technology. (4) (Same as Management M202C.) Lecture, three hours. Economic growth and change. Role of advances in science and technology, and actions of maximizing innovators and factors impinging on their behavior. How technological breakthroughs (or discontinuities) can form new industries or transform nature of and population of firms in existing industries. S/U or letter grading.

290. Special Topics in Public Policy. (4) Discussion, two to three hours. Advanced seminar on emerging issues in public policy. May be repeated for credit. S/U grading.

291. Methods of Policy Analysis. (4) Lecture, three hours; outside study, nine hours. Designed for graduate students. Techniques of policy analysis with applications: benefit and cost; optimization and constraint; risk, risk aversion, risk spreading; tax incidence, incentive effects, and deadweight loss; strategic interactions (games and negotiations). Emphasis on concepts rather than computation.

292. Quantitative Policy Analysis. (4) Lecture, three hours. Requisites: courses 203, 208. Exploration of additional statistical and econometric tools (e.g., discrete choice analysis, methods to deal with endogeneity bias, and analysis of longitudinal data) as follow-up to requisite courses. Application of statistical tools in conduct of analysis and evaluations of public policy initiatives and policy-relevant issues.

M293. Privatization, Regulation, and Public Finance. (4) (Formerly numbered 293.) (Same as Urban Planning M243.) Lecture, three hours; outside study, nine hours. Requisite: course 201. Evaluation of economic and political determinants of trend toward privatizing public services, and equity and efficiency outcomes of this trend as expressed through new pricing, financing, and service-level policies. Exploration of new regulatory role this trend implies for state and local governments. Letter grading.

294. Education Markets and Education Policy. (4) Lecture, three hours. Designed for graduate students. Provides set of tools that can be used to analyze pressing policy questions in field of education and some substantive background in policy issues of the day.

M295. Law and the Poor. (4) (Same as Law M215, Social Welfare M290R, and Urban Planning M248.) Lecture, three hours. Designed for graduate students. Study of major income-maintenance programs in the U.S., with emphasis on interaction of moral attitudes toward the poor and structure and implementation of the law, policy, and administration. Current reform consensus and major reforms. Letter grading.

298A-298B. Seminars: Applied Policy Analysis. (4-4) Seminar, three hours; outside study, nine hours. Preparation: completion of M.P.P. core curriculum, two policy cluster courses, and internship (unless waived). Two-term seminar in which students prepare major public policy projects and papers which are case studies of policy evaluation and implementation and are equivalent to professional master's theses. Papers build on prior core courses, internship experience, and policy cluster courses. Letter grading.

596. Directed Studies. (2 to 8) Limited to graduate students. Individual programming for selected students to permit pursuit of a subject in greater depth. S/U or letter grading.

different national and cultural contexts. It also covers the interaction between national states, the changing character of the relations between citizens and governments, and the values and criteria by which the quality of political life is judged. The program may be individually focused to serve the needs of the liberal arts major, the student seeking preparation for graduate work in political science, public administration, law, and other professional fields, and the student preparing for specialized roles in political and public organizations.

The graduate program leads to the Ph.D. degree in Political Science (a master's degree may be earned in the process of completing Ph.D. requirements). It is designed to give students a strong foundation in the discipline while enabling them to acquire additional skills for advancing their professional careers.

Undergraduate Study

Political Science B.A.

Prepolitical Science Major

All students intending to major in Political Science must enroll as Prepolitical Science majors. After completion of preparation for the major courses, they need to petition to enter the major in the Undergraduate Office, 4256 Bunche Hall.

Preparation for the Major

Required: Four lower division courses from Political Science 10, 20, 30, 40, 50. These lower division courses are requisites to upper division courses and 10, 20, 40, and 50 are required in those fields designated as the concentration or distribution field. Students must also take Political Science 6 or one of the following statistics courses: Anthropology M80, Economics M40, Geography M40, Social Sciences 40, Sociology M18, Statistics 10.

Students must complete all premajor courses with a 2.0 grade-point average by the time they attain 135 units. Admission to the major is granted only after successful completion of all lower division requirements.

The Major

Required: Ten upper division courses (40 units) selected from Political Science 102 through 199 taken for a letter grade. Students are also required to complete four upper division courses (16 units) in one or two of the following social sciences: anthropology, communication studies (only Communication Studies 160), economics, geography, history, management (only Management 150, 190), psychology (except Psychology 115, 116), sociology. These courses must be taken for a letter grade. Students are required to maintain a 2.0 overall grade-point average in all upper division political science courses.

Upper division political science courses are organized into four fields: (I) political theory, (II) international relations, (III) American politics, and (IV) comparative politics.

POLITICAL SCIENCE

College of Letters and Science

UCLA
4289 Bunche Hall
Box 951472
Los Angeles, CA 90095-1472

(310) 825-4331
<http://www.sscnet.ucla.edu/polsci/>

Scope and Objectives

The undergraduate major in Political Science aims to provide understanding of basic political processes and institutions as these operate in

In fulfilling the requirement of 10 upper division political science courses, students must satisfy the following:

- (1) A **concentration** in one field by completing the lower division course and at least four upper division courses in that field.
- (2) A **distribution** of the lower division course and two upper division courses in each of two other fields (four upper division courses).
- (3) Two additional elective courses in political science to comprise the total of 10.

Field Concentration Requirements

The lower division course is requisite to upper division courses in those fields designated as the concentration field and the two distribution fields for majors. Specific requirements for the field concentration are as follows:

- (I) *Political Theory*: Political Science 10 and any four courses in Field I.
- (II) *International Relations*: Course 20 and any four upper division courses in Field II.
- (III) *American Politics*: Course 40 and any four courses in Field III.
- (IV) *Comparative Politics*: Courses 50, 168, and any three additional courses in Field IV. Course 118 may also be applied toward concentration in this field.

Courses 119, 139, 149, and 169 may be applied no more than twice toward the field concentration requirement. No more than three of these courses may be applied toward the major.

Courses 195A-195B-195C and 199 may not be applied toward either the concentration or distribution requirement.

Political Science majors should be aware that the upper division course requirements in the major (56 units) do not meet the upper division requirement of 60 units (effective Fall Quarter 1997) for graduation. Additional upper division units must be taken to reach the 60-unit total.

Undergraduate Seminars

Each term the department offers a series of seminars (Political Science C197A-C197D) in each field. The requisites are two upper division courses in the field in which the seminar is offered, a 3.25 average at the upper division level in political science, or discretion of the instructor. These courses may be applied toward either the concentration or distribution requirement, and students who qualify are encouraged to take them.

Honors Program

The department honors program is open to seniors and to students who (1) have completed five upper division political science courses (two of which are in one field), (2) have a 3.5 grade-point average in upper division political science courses, and (3) are eligible for College of Letters and Science honors. Students should have substantial experience in writing research papers and take at least one seminar

course in the Political Science C197 series before they enter the honors program or course 195A.

Students wishing to qualify for graduation with departmental honors must complete the following: (1) courses 195A-195B-195C, in which a senior thesis is written; (2) eight upper division courses (excluding courses 119, 139, 149, and 169) distributed as follows: four courses in one field and four additional courses, two in each of two other fields; (3) four upper division courses in one or two of the social sciences other than political science.

Political Science Minor

The Political Science minor introduces students to political processes and institutions.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in the Undergraduate Office, 4256 Bunche Hall.

Required Lower Division Courses (eight units): Any two lower division political science courses.

Required Upper Division Courses (20 units): Any five upper division political science courses.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

Admission

The department admits only those students whose objective is the Ph.D. degree. A Master of Arts degree in Political Science may be earned as part of the process of completing requirements for the Ph.D.

Areas of Study

Consult the department.

Course Requirements

A student must successfully complete 12 of the 16 courses required for the doctorate with a grade-point average of 3.0 or better.

Comprehensive Examination Plan

The master's comprehensive examination consists of the submission of one doctoral qualifying paper that is deemed acceptable by the faculty for fulfillment of this requirement.

Thesis Plan

None.

Doctoral Degree

Admission

Applicants to the program leading to the Ph.D. degree in Political Science must meet the University minimum requirements for admission; in addition, the department requires three letters of recommendation, scores of the General Test of the Graduate Record Examination (GRE), and a sample of applicants' analytical writing skills (e.g., senior or M.A. thesis, term paper). Applicants are selected on the basis of perceived promise. Applicants may write for departmental brochures to the Graduate Studies Office. The department does not have an application form in addition to the UCLA *Application for Graduate Admission*. The deadline for receipt of all application materials is December 15 of the year preceding the Fall Quarter in which students plan to register.

Major Fields or Subdisciplines

Five fields of study are offered to graduate students in the department: political theory; international relations; American politics; comparative politics; and formal theory and quantitative methods.

Course Requirements

Students must take Political Science 200A and 200AL (statistics), four courses in each of two major fields, one course in each of two minor fields, and four additional graded courses, including no more than two independent study courses. Fields decide which courses meet major and minor field requirements.

Of the 16 required courses, students must take at least seven during their first year of graduate study and 12 by the end of their second year.

With the approval of the graduate adviser and the dean of the Graduate Division, graduate courses in political science taken elsewhere may be applied toward departmental course requirements. The maximum number of such courses is six if students come to UCLA with a master's degree in political science and choose to forego another master's degree from UCLA. In all other cases, the maximum is four for courses taken at another UC campus and two for courses taken outside the UC system.

Written and Oral Qualifying Examinations

Research Paper Requirement. Students must submit two research papers, one by the beginning of the seventh term of graduate study and one by the beginning of the ninth term of graduate study. These papers may also have been used to meet course requirements. Each paper is assigned to two or more faculty graders by the Graduate Studies Committee. Papers can be graded qualified, not qualified, or qualified with distinction. If a paper is graded not qualified, students may submit a revised version or another paper once only. Resubmitted first papers are due two weeks before the end

of the ninth quarter. Resubmitted second papers are due two weeks before the end of the tenth quarter. For the Ph.D., students must receive at least a qualified grade on both papers.

Papers are evaluated for knowledge of subject, originality of ideas, and craftsmanship of research. They are also evaluated for conciseness: good papers may vary in length but are not expected to exceed 30 pages. They need not be publishable, but in their structure and format and in their coverage of topics and tasks are expected to resemble papers published in peer-reviewed journals of their fields. The committee evaluating the papers assumes that students have not devoted all their research time to two papers but have selected for submission, or for revision and submission, the best two from a portfolio of several seminar papers.

By the tenth quarter of graduate study, students must present a research design for their dissertation in a seminar or colloquium. It need not be the version students submit for the University Oral Qualifying Examination. The requirement may be waived at a field's discretion.

Students may take that examination after they have completed their course and paper requirements and written a dissertation proposal accepted by their research adviser. But students must take it no later than their twelfth quarter of graduate study, and the examination committee must have the proposal at least two weeks before the examination.

The examination committee judges the feasibility and worth of the project and the student's ability to undertake it. The committee also may recommend changes in the research design.

Political Science

Lower Division Courses

6. Introduction to Quantitative Research. (4) Lecture, three hours; discussion, one hour. Introduction to collection and analysis of political data, with emphasis on application of statistical reasoning to study of relationships among political variables. Use of computer as an aid in analyzing data from various fields of political science, among them comparative politics, international relations, American politics, and public administration.

10. Introduction to Political Theory. (4) Lecture, three hours; discussion, one hour. Exposition and analysis of selected political theorists and concepts from Plato to the present.

20. World Politics. (4) Lecture, three hours; discussion, one hour. Required of all students concentrating in Field II. Introduction to problems of world politics.

30. Introduction to Political Economy. (4) Lecture, three hours; discussion, one hour. Introduction to political economy, especially application of economic reasoning to political and social phenomena. P/NP or letter grading.

40. Introduction to American Politics. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Basic institutions and processes of democratic politics. Treatment of themes such as constitutionalism, representation, participation, and leadership coupled with particular emphasis on the American case. P/NP or letter grading.

50. Introduction to Comparative Politics. (4) Lecture, three hours; discussion, one hour. Comparative study of constitutional principles, governmental institutions, and political processes in selected countries. P/NP or letter grading.

88A-88D. Lower Division Seminars. (4 each) Seminar, three hours. Limited to freshmen/sophomores. Opportunity to enhance writing, verbal, and reasoning skills. General introduction to a subfield of a major area, or intensive exploration of a particular theme or topic. Variable topics; consult *Schedule of Classes* for topics to be offered in a specific term. May not be repeated for credit except by students who receive a grade of C-, D, or F. P/NP or letter grading. **88A.** Political Theory; **88B.** International Relations; **88C.** Politics; **88D.** Comparative Politics.

Upper Division Courses

102. Statistical Analysis of Political Data. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 6. Designed for juniors/seniors. Introduction to statistical inference. Topics include measures of central tendency, elementary probability theory, common probability distributions, least-squares and maximum likelihood estimation, confidence intervals and statistical tests, comparison of means, analysis of variance, and multiple regression and correlation. Statistical techniques and topics illustrated with applications to a variety of political data.

104A-104B. Introduction to Survey Research. (4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 6. Designed for juniors/seniors. Courses in fundamentals of survey research as a method.

104A. Sampling theory and methods, writing of questions, questionnaire construction, and interviewing. Attitudes, attitude measurement, and attitude change. Participation in formulation of research problem.

104B. Prerequisite: course 104A. Conducting a survey. Development of survey questionnaire, designing a sample, collecting interviews, maintaining quality control, and coding interviews for machine tabulation. Performance of computer-aided analysis of some part of data and submission of written report of that research.

M105. Economic Models of Public Choice. (4) (Same as Economics M135.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Preparation: any lower division political science course. Enforced prerequisite: Economics 11. Designed for juniors/seniors. Analysis of methods and consequences of arriving at collective decisions through political mechanisms. Topics include free-rider problem, voting and majority choice, demand revelation, and political bargaining.

M106. Economic Models of Political Conflict and Conflict Resolution. (4) (Same as Economics M136.) Seminar, three hours; discussion, one hour. Enforced prerequisite: Economics 11. Prior political science course desirable but not essential. Designed for juniors/seniors. Biological, cultural, and organizational sources of political conflict. Role of threats, promises, commitments. Models of the onset and termination of conflict. Conduct of war: strategy and tactics. P/NP or letter grading.

107. Women and Politics. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Introduction to rapidly growing body of empirical and theoretical scholarship on women and politics in both national and international contexts. Topics may include women's movement in the U.S. and globally; women's electoral participation; representation of women in Congress and in legislatures worldwide; women as heads of government and state; feminist critiques of political science; women and human rights; ERA; struggle for suffrage; mothers as political actors; women and the military; women, development, and globalization. May be applied toward Field I, III, or IV. P/NP or letter grading.

Field I: Political Theory

111A-111B-111C. History of Political Thought. (4-4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Exposition and critical analysis of major political philosophers and schools.

111A. Ancient and Medieval Political Theory from Plato to Machiavelli; **111B.** Early Modern Political Theory from Hobbes to Bentham; **111C.** Late Modern and Contemporary Political Theory from Hegel to the Present.

112A. Democratic Theory. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Critical analysis of selected major authors, issues, and arguments in contemporary democratic theory.

113. Problems in 20th-Century Political Theory. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Study and interpretation of theorists who have focused their analyses on social and political problems of the 20th century.

114A-114B. American Political Thought. (4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. **114A.** Exposition and critical analysis of American political thinkers from the Puritan period to 1865. **114B.** Prerequisite: course 114A. Exposition and critical analysis of American political thinkers from 1865 to the present.

116. Marxism. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Critical analysis of origins, nature, and development of Marxist political theory.

117. Jurisprudence. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Development of law and legal systems; consideration of fundamental legal concepts; contributions and influence of modern schools of legal philosophy in relation to law and government. Letter grading.

118. Political Violence. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Examination of one or several different uses of violence in the revolutionary process: demonstrations, mass uprisings, coup d'etat, assassination, and terrorism. May be applied toward either Field II or IV.

119A-119Z. Special Studies in Political Theory. (4 each) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Preparation: one course in Field I. Prerequisite: course 10. Designed for juniors/seniors. Intensive examination of one or more special problems appropriate to political theory. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, and 169 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major.

Field II: International Relations

120. Foreign Relations of the U.S. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Survey of factors and forces entering into formation and implementation of American foreign policy, with special emphasis on contemporary problems.

121. Studies in Formulation of American Foreign Policy. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Study of formation of American foreign policy with respect to individual cases. Consult *Schedule of Classes* for topics to be offered in a specific term.

122. World Order. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Prerequisite: course 20. Designed for juniors/seniors. Study of problems of the international system seen as a community capable of cooperation and development.

123A-123B. International Law. (4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 20. Course 123A is requisite to 123B. Designed for juniors/seniors. Study of nature and place of international law in conduct of international relations. Letter grading.

124. International Political Economy. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 20. Designed for juniors/seniors. Study of political aspects of international economic issues.

125. Arms Control and International Security. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Arms control in context of international security in the nuclear age. Nuclear arms race; relationship between deterrence doctrines and nuclear war; roles of technology and ideology; nuclear proliferation; outer space.

126. Peace and War. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 20. Designed for juniors/seniors. Theory and research on causes of war and conditions of peace.

127A-127B. Atlantic Area in World Politics. (4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. **127A.** Western Europe. External relations of United Kingdom, West Germany, France, Italy, and other European members of NATO, in regard to European security in context of the Atlantic Alliance. **127B.** U.S. and Europe. Requisite: course 127A. Relations between the U.S. and Western European members of the Atlantic Alliance, in context of U.S./Soviet relations.

128A. U.S./Soviet Relations. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 20. Designed for juniors/seniors. Survey of relations between the U.S. and former Soviet Union from Revolutions of 1917 to collapse of the U.S.S.R. in 1991.

128B. International Relations of Post-Communist Russia. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisites: courses 20, 128A. Designed for juniors/seniors. Survey of foreign policy of post-Communist Russia, with special emphasis on Russia's relations with NATO, the former communist states of East Central Europe, China, and the Commonwealth of Independent States.

129. Comparative Foreign Economic Policy. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Examination of foreign trade, monetary, and investment policies of the U.S., Japan, France, and Federal Republic of Germany since 1945.

130. Politics of Latin American Economic Development. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Interaction of international and domestic factors in political and economic evolution of Latin America.

131. Latin American International Relations. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 20. Designed for juniors/seniors. Major problems of Latin American international relations and organization in recent decades.

132A-132B. International Relations of the Middle East. (4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. **132A.** Requisite: course 20. Contemporary regional issues and conflicts, with particular attention to inter-Arab politics, Arab-Israeli problem, and Persian Gulf area. **132B.** Role of the great powers in the Middle East, with emphasis on American, Soviet, and West European policies since 1945.

133. International Relations of Sub-Saharan Africa. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Contemporary regional issues and conflicts; foreign policies of African states; role of external powers.

134. Foreign Policy Decision Making and Tools of Statecraft. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 120. Designed for juniors/seniors. Contrasts purposive and process models of individual and group decision making. Impact of strategic interaction and situational factors on foreign policy decision making. Implications for policy choice of tools of statecraft (i.e., threats/promises, military/economic/diplomacy). P/NP or letter grading.

135. International Relations of China. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 20. Designed for juniors/seniors. Relations of China with its neighbors and the other powers, with emphasis on contemporary interests and policies of China vis-à-vis the U.S. and Soviet Union.

136. International Relations of Japan. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 20. Designed for juniors/seniors. Foreign policies of Japan and interests and policies of other countries, particularly the U.S., as they relate to Japan.

137A-137B. International Relations Theory. (4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. **137A.** Examination of various theoretical approaches to international relations. P/NP or letter grading. **137B.** Alternative approaches to analysis of international politics and their application to historical and contemporary cases.

139A-139Z. Special Studies in International Relations. (4 each) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisites: two courses in Field II, or course 20 and one course in Field II. Designed for juniors/seniors. Intensive examination of one or more special problems appropriate to international relations. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, and 169 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major:

M139A. Political and Economic Issues in the Proliferation of Nuclear Weapons. (Same as Economics M103A.) Interdisciplinary approach to the problem of nuclear proliferation. Economic aspects of acquisition of nuclear weapons and economic aspects of nuclear energy treating technological, bargaining, and stability issues.

Field III: American Politics

140A-140B-140C. National Institutions. (4-4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 40. Designed for juniors/seniors. **140A.** Congress. Study of those factors which affect character of the legislative process and capacity of representative institutions to govern in contemporary society. **140B.** The Presidency. Study of nature and problems of presidential leadership, emphasizing impact of the bureaucracy, congress, public opinion, interest groups, and party system on the presidency and national policy-making. **140C.** Supreme Court. Introduction to American constitutional development and role of Supreme Court as interpreter of the U.S. Constitution. Reading of Supreme Court cases as well as various historical and current commentaries.

M141A-M141D. Electoral Politics. (4 each) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors:

M141A. Political Psychology. (Same as Psychology M13B.) Requisite: course 40. Examination of political behavior, political socialization, personality and politics, racial conflict, and psychological analysis of public opinion on these issues.

141B. Public Opinion and Voting Behavior. Requisite: course 40. Study of character and formation of political attitudes and public opinion. Role of public opinion in elections, relationship of political attitudes to the vote decision, and influence of public opinion on public policy formulation.

141C. Political Behavior Analysis. Requisites: courses 6, 40, 141B. Advanced course in use of quantitative methods in study of political behavior, especially in relation to voting patterns, political participation, and techniques of political action. Students conduct computer-aided analyses of issues and problems treated in course 141B and similar courses.

M141D. Mass Media and Elections. (Same as Communication Studies M161.) Requisite: course 40. Assessment of manner in which Americans' political beliefs, choices, and actions are influenced by mass media presentations, particularly during election campaigns. Topics include processes of political attitude formation and change, different types of media "effects," and role of the media in the American political process.

142A-142B-142C. Political Parties and Interest Groups. (4-4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 40. Designed for juniors/seniors. **142A.** Political Parties. Organization and activities of political parties in the U.S. Attention to historical development of the parties, nature of party change, campaign functions and electoral role of the parties, membership problems and party activists, political finance, and policy formulation practices. **142B.** Politics of Interest Groups. Systematic investigation of role of political interest groups in governmental process, with attention to internal organization, leadership, and politics of such groups to goals and functions of various types of groups and to strategy and tactics of influence. **142C.** Government and Labor. Labor force and nature of trade union; regulation of labor relations; programs to encourage full employment and to mitigate unemployment; protective labor legislation.

143A-143B. Subnational Government. (4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 40. Designed for juniors/seniors. **143A.** American State Government. Examination of governments of states of federal union as major sources of public policy in the U.S., with government of California as principal topic. **143B.** Government of American Cities. Intensive analysis of contemporary urban governance in the U.S. Emphasis on such student participatory activities as fieldwork, research, and gaming of urban politics and policy problems.

M144A-M144B. Ethnic Politics. (4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Preparation: one 140-level course or one upper division course on race or ethnicity from history, psychology, or sociology. Requisite: course 40. Designed for juniors/seniors:

M144A. Chicano/Latino Politics. (Same as Chicana and Chicano Studies M147A.) Introduction to political economy of racial domination in the U.S., concentrating on study of Mexican origin communities. Emphasis on identifying and explaining the historically changing relationship between class, race, and power by studying the interaction between state policies and practices, class and racial stratification systems, and cultural codes and modes of ideological discourse in each historical period.

M144B. African American Politics. (Same as Afro-American Studies M144.) Course M144A is not requisite to M144B. Emphasis on dynamics of minority group politics in the U.S., touching on conditions facing racial and ethnic groups, with black Americans being the primary case for analysis. Three primary objectives: (1) to provide descriptive information about social, political, and economic conditions of the black community, (2) to analyze important political issues facing black Americans, (3) to sharpen students' analytical skills.

145A-145D. Public Law and Judicial Process. (4 each) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 40. Designed for juniors/seniors:

145A. Anglo-American Legal System. Evolution of English common law courts and their legal system, with emphasis on development of basic concepts of law which were received from that system in the U.S. and remain relevant today.

145B. Constitutional Law — Separation of Powers. Constitutional questions concerning separation of powers, federalism, and relationship between government and property.

145C. Constitutional Law — Civil Liberties. Protection of civil and political rights and liberties under the constitution.

145D. Judicial Oversight of the Bureaucracy. Legal controls of administration action. Substantive and procedural limits on administrative discretion imposed by legislation, executive and judicial agencies, and sources of legal powers of administrative bodies within these limits. P/NP or letter grading.

146A-146F. Organization Theory, Public Policy, and Administration. (4 each) (Formerly numbered 146A-146E.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors:

146A. Public Administration and Policy. Requisite: course 40. Introduction to processes of policy formation and implementation. Exploration of emergence and performance of government bureaucracies and their role in American political process. P/NP or letter grading.

146B. Bureaucracy and Public Management. Preparation: familiarity with American government. Requisite: course 40. Nature of bureaucracy in modern government, with emphasis on the U.S.; explanation of why government agencies behave as they do. Focus on real and imagined problems with bureaucratic rule; evaluation of commonly proposed solutions for these problems. Examples from schools, armies, welfare bureaus, regulatory agencies, and intelligence services, among others. P/NP or letter grading.

146C. Governing the Bureaucracy in the U.S. Requisite: course 40. Relationship between elected officials and administrators in the U.S., especially efforts of elected and appointed officials to monitor and control behavior of those in "permanent government" (career bureaucrats).

146D. Theories of Organization and Decision Making. Requisite: course 40. Examination of theoretical frameworks for studying public and private bureaucracies, with emphasis on ideologies, values, behavioral patterns, and concepts of organization. P/NP or letter grading.

146E. National Policy Development and Implementation. Requisite: course 40. Investigation of complex process of policy development and implementation in the U.S., including roles of federal, state, and local agencies as well as private organizations. Subsections offered on particular policy areas, with topics announced in preceding term.

146F. Politics, Ethics, and Business. Requisite: course 40. Examination of political issues, interests, and institutions that impose constraints on and provide opportunities for business. Ethical issues that arise in external environment of business and its internal operations. Examples of topics include government regulation, product liability, affirmative action, lobbying Congress, exporting hazardous waste to developing countries.

149. Special Topics in American Government and Politics. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisites: course 40, two courses in Field III. Designed for juniors/seniors. Intensive examination of one or more special problems appropriate to American politics. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, and 169 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major.

Also see course 117

Field IV: Comparative Politics

151A-151B-151C. African Politics. (4-4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors:

151A. Government and Politics of Africa. (Formerly numbered 166A, 166C.) Comparative study of government and politics in contemporary Africa, with special attention to state/society relations, interaction of politics and economic development, political institutions, and conflict and conflict resolution.

151B. Political Economy of Africa. (Formerly numbered 166B.) Examination of interactions of economic and political factors in African development, with special attention to political basis of inappropriate economic policy during early post-independence period and change toward a more appropriate economic strategy in recent times.

151C. Special Topics in African Politics. (Formerly numbered 166D.) Consult *Schedule of Classes* for topics to be offered in a specific term.

152A-152B-152C. Government and Politics of West European Countries. (4-4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Constitutional and political structure and development of one or more states in Europe, especially Britain, France, or Germany, with particular attention to contemporary problems. P/NP or letter grading.

152A. Britain. (Formerly numbered 152.); **152B.** France; **152C.** Germany. (Formerly numbered 154.)

153A-153B. Comparative Government and Politics of Western Europe. (4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. P/NP or letter grading:

153A. West European Government and Politics. (Formerly numbered 153.) Requisite: course 50. Comparison of constitutional and political structure of West European states, with particular attention to contemporary problems.

153B. Game-Theoretic Approach to West European Politics. (Formerly numbered 153A.) Course 153A is not requisite to 153B. Uses of elementary game theory to investigate post-World War II Western European politics. Social and political forces, and political institutions. Particular emphasis on study of three West European countries — United Kingdom, France, and Federal Republic of Germany. Consideration of current developments and comparisons with the U.S.

154A-154B. Government and Politics in Latin America. (4-4) (Formerly numbered 163A-163B.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Comparative study of governmental and political development, organization, and practices. **154A.** States of Middle America; **154B.** States of South America.

155. Advanced Pluralist Democracies. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Main features and basic problems of economically advanced democracies, analyzed in comparative framework, topic by topic. Emphasis on cross-Atlantic comparisons, not only political but also sociological.

156A-156D. Government and Politics of Post-Communist States. (4 each) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. P/NP or letter grading:

156A. Russia. Intensive study of institutions and political development in Russia, with special attention to legacy of the Soviet Union.

156B. Eastern Europe. (Formerly numbered 157.) Survey of institutions and political processes in selected post-Communist states of Eastern Europe.

156C. Post-Soviet States. (Formerly numbered 156B.) Survey of institutions and political processes in selected former Soviet republics other than Russia.

156D. Political Economy of Post-Communist Reform. Focused study of interaction between transitions to democracy and to the market in selected post-Communist countries, with emphasis on development of general theories of political and economic reform.

157. Government and Politics in the Middle East. (4) (Formerly numbered 164.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Comparative study of government in the Arab States, Turkey, Israel, and Iran. P/NP or letter grading.

159A-159B. Government and Politics of China. (4-4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors:

159A. Chinese Revolution and Age of Mao Zedong. (Formerly numbered 159.) Survey of modern Chinese politics from decline of Manchu dynasty and rise of revolutionary nationalism to death of Mao Zedong, with emphasis on socioeconomic foundations and political dynamics of revolution in modern China.

159B. China in Age of Reform. Survey of China's political and ideological transformation in post-Mao era. Assessment of impact of changing socioeconomic conditions on revolutionary policies and programs of Chinese Communist Party. Exploration of etiology of 1989 Tiananmen crisis and consequences for China of collapse of Communism in East Europe and the Soviet Union.

160. Government and Politics of Japan. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 50. Designed for juniors/seniors. Structure and operation of contemporary Japanese political system, with special attention to domestic political forces and problems.

165. Islam and Politics. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Designed for juniors/seniors. Religious and spiritual foundations of Islamic legal and political institutions; legitimacy of historical and contemporary Islamic regimes, movements, and ideologies; political strategies of Islamic activism. P/NP or letter grading.

166. Comparative Analysis of Government Institutions. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Comparison of major institutional structures such as presidentialism vs. parliamentarism, unicameralism vs. bicameralism, two-party vs. multiparty systems, federal vs. unitary systems, plurality vs. proportional electoral systems, etc. Method of analysis is rational choice (political actors are assumed to optimize their results given institutional constraints and action of other actors). Result is that institutions affect political outcomes in systematic ways. P/NP or letter grading.

167A. Ideology and Development in World Politics. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 50. Designed for juniors/seniors. Comparative study of major modes of political and economic development in the world today. Relations between industrial and nonindustrial societies in light of current debate about imperialism.

167B. Comparative Development and Administration. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 50. Designed for juniors/seniors. Analysis of bureaucratic structures and function in the U.S., other industrialized, and less developed countries, primarily at national level. Special attention to methods of comparative analysis and utility of various methods. P/NP or letter grading.

168. Comparative Political Analysis. (4) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisites: two courses in Field IV, or course 50 and one course in Field IV. Designed for juniors/seniors. Required of all students concentrating in Field IV. Major approaches to study of comparative politics. Concepts and methodology of comparative analysis.

169. Special Studies in Comparative Politics. (4) (Formerly numbered 169A-169Z.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Preparation: two courses in Field IV. Designed for juniors/seniors. Intensive examination of one or more special problems appropriate to comparative politics. Sections offered on regular basis, with topics announced in preceding term. Courses 119, 139, 149, and 169 may be applied no more than twice toward field concentration requirement. No more than three of these courses may be applied toward the major.

Also see course 115

Special Studies

194. Selected Topics in Political Science. (2 to 4) Seminar, three hours; outside study, eight or nine hours. Designed for juniors/seniors. Seminar on selected current topics of interest in political science. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit; may be applied toward major but not to concentration or distribution requirement. P/NP or letter grading.

195A-195B-195C. Honors Seminars and Thesis. (4-4-4) Preparation: one course in C197 series, 3.5 grade-point average in upper division political science courses, eligibility for Letters and Science honors. Course 195A is requisite to 195B, which is requisite to 195C. Designed for juniors/seniors. One-year honors seminar and thesis-writing sequence. Students entering course 195A are expected to have some experience in writing research papers and to have in mind a research topic suitable for treatment at length and in depth:

195A. Students define their research topic, select a suitable research method, determine appropriate sources of information, prepare research proposal, find a thesis director, begin their research, and submit progress reports or preliminary drafts. Class sessions emphasize critical and constructive discussions of students' topics, methods, and problems in research, as well as general consideration of political science research topics and methods of current or continuing interest. Students also meet privately with instructor to discuss research progress.

195B-195C. Writing of honors thesis under direction of a faculty member. Thesis is read by appropriate field committee and graded high honors, honors, or no honors. In Progress grading.

C197A-C197D. Seminars for Majors. (4 each) Seminar, three hours. Preparation: two upper division courses in field in which seminar is offered. Limited to junior/senior Political Science majors with 3.25 grade-point average in upper division political science courses. Consult *Schedule of Classes* for topics to be offered in a specific term. May be applied toward distribution or concentration requirement. May be concurrently scheduled with various graduate courses. **C197A.** Political Theory; **C197B.** International Relations; **C197C.** Politics; **C197D.** Comparative Government.

M197G. Introduction to Development Studies: Political Economy of Development. (4) (Same as International Development Studies M100B and Sociology M180.) Seminar, three hours. Designed for juniors/seniors. Analysis of determinants of underdevelopment, with focus on impact of colonialism, foreign investment, and trade, and on political economy.

197W. CAPP Washington Research Seminar. (8) Seminar, three hours; laboratory, 24 hours. Limited to CAPP Program students. Seminar for undergraduates in Center for American Politics and Public Policy's program in Washington, DC. Focus on development and execution of original empirical research based on experiences from Washington, DC-based field placements. Study of variety of qualitative methods (observation, interviewing, etc.), with comparison to quantitative analysis. Examination of features of solid and significant research; intensive writing.

199. Readings in Political Science. (2 to 4) Preparation: 3.0 overall grade-point average. Limited to juniors/seniors. Individual studies. May not be applied toward concentration or distribution requirement. May be repeated for a maximum of 16 units.

Graduate Courses

Formal Theory and Quantitative Methods

200A. Statistical Methods I. (4) Lecture, three hours. Corequisite: course 200AL. Introduction to statistical analysis of political data. Methods of data analysis, estimation, and inference.

200AL. Statistical Methods Laboratory I. (4) Laboratory, three hours. Corequisite: course 200A.

200B. Statistical Methods II. (4) Lecture, three hours. Recommended preparation: knowledge of elementary calculus. Requisites: courses 200A/200AL. Applications of multiple regression in political science.

200C. Statistical Methods III. (4) Lecture, three hours. Preparation: knowledge of elementary calculus. Requisites: courses 200A/200AL, 200B. Statistical modeling of political processes. Topics include simultaneous equations models, discrete choice models, time-series models.

200D. Quantitative Methods in Politics. (4) Seminar, three hours. Preparation: knowledge of calculus and matrix algebra. Recommended requisite: course 200C. Designed to build on foundations set in course 200C. Focus on logical and mathematical structure underlying some statistical methods that are frequently used in political science. Emphasis on understanding structure of the models rather than on gaining added experience using them to analyze data. Applied data analysis. Letter grading.

M200E. Advanced Regression Analysis. (4) (Same as Psychology M256.) Seminar, three hours. Diagnostics, robust regression, cross validation, resampling, outliers, missing data, geometry of regression, validity of assumptions, categorical dependent variables, transformation of variables. Access to Macintosh computer very helpful.

201A. Introduction to Formal Political Analysis. (4) Seminar, three hours. Survey of formal political theory to enhance literacy and provide analytical tools without presupposing mathematical background. Model building, collective goods, unanimity and the social contract, voting rules, paradoxes and impossibility theorems, stability, individual liberty and decentralization, strategic manipulation representation, vote trading.

201B. Theory of Collective Choice. (4) Seminar, three hours. Recommended preparation for political science students: course 201A. Open to any student of politics, economics, philosophy, or mathematics with ability for deductive reasoning. Introduction to abstract, deductive study of voting systems and other collective-choice processes. Axiomatic method applied to politics and political economy, concept of rationality, and agenda control, choice-set or solution concepts.

202. Mathematics for Political Science. (4) Lecture, three hours. Preparation: working knowledge of high school algebra. Survey of mathematical methods useful in political science. Topics include differential and integral calculus, differential equations, optimization, and linear algebra.

203A. Economic Theory and Methods for Political Science I. (4) Discussion, three hours. Preparation: knowledge of elementary calculus. Introduction to techniques of economic analysis and survey of major topics in formal political economy. Investigation of models of regulation, trade protection, collective bargaining, and economic growth as time permits.

203B. Economic Theory and Methods for Political Science II. (4) Discussion, three hours. Requisite: course 203A. Continuing survey of microeconomic techniques used in formal political science, with focus on market failures and on modeling individual choice in nonmarket situations. Specific topics include externalities, public goods and allocation mechanisms, collective action, spatial models, structure-induced equilibrium, and information asymmetries.

204. Game Theory in Politics. (4) Seminar, three hours. Survey of game theory, with emphasis on utilizing mathematical models to understand political and economic phenomena. Applications concern political participation, public goods, legislatures, industrial regulation, bureaucracies, interest groups, and party competition. Designed to help students become informed consumers of game-theoretical literature in political science.

M208A. Game Theory. (4) (Same as Economics M214B and Mathematics M261.) Lecture, three hours. Designed for graduate economics, mathematics, and political science students. Bargaining theory, the core, the value, other solution concepts. Applications to oligopoly, general exchange and production economies, and allocation of joint costs. S/U or letter grading.

M208B. Topics in Applied Game Theory. (4) (Same as Economics M215.) Lecture, three hours. Preparation: calculus or introductory probability. Designed for graduate economics and political science students. Survey and applications of major solution concepts to models of bargaining, oligopoly, cost allocation, and voting power. S/U or letter grading.

M208D. Multivariate Analysis with Latent Variables. (4) (Same as Psychology M257.) Lecture, three hours. Introduction to models and methods for analysis of data hypothesized to be generated by unmeasured latent variables, including latent variable analogues of traditional methods in multivariate analysis. Causal modeling: theory testing via analysis of moment structures. Measurement models such as confirmatory, higher-order, and structured-means factor analytic models. Structural equation models, including path and simultaneous equation models. Parameter estimation, hypothesis testing, and other statistical issues. Computer implementation. Applications.

M208E. Bayesian Econometrics. (4) (Same as Economics M232A.) Lecture, three hours. Requisites: Economics 231A, 231B. Subjective probability, introduction to decision theory, Bayesian analysis of regression, sensitivity analysis, simplification of models, criticism. S/U or letter grading.

209. Special Topics in Formal Theory and Quantitative Methods. (4) Seminar, three hours.

Political Theory

210A-210B. Introduction to Political Theory. (4-4) Lecture, three hours. Exploration of major texts and issues in political theory. **210A.** Classical and Medieval Formulations from Plato through Aquinas; **210B.** Early Modern Period from Machiavelli through the Enlightenment.

M211. Morality of Capitalism. (4) (Same as Management M293B.) Lecture, three hours. Examination of major philosophical writings that defend or criticize capitalism on basis of principles of right conduct and just social arrangements (i.e., on moral grounds).

212. Seminar: Political Theory. (4) Seminar, three hours.

214. Political Theory in Transnational Context. (4) Seminar, three hours; discussion, one hour (optional). Critical analysis of selected text from postcolonial, spatial, feminist, postmodern, and post-structuralist theories that assess impact of processes of globalization on such major concepts and problems of traditional social and political theory as sovereignty, citizenship, rights, community, representation, and democracy. S/U or letter grading.

215. Liberalism and Its Critics. (4) Seminar, three hours; discussion, one hour (optional). Examination of works of one or more major contemporary liberal theorists (Rawls, Dworkin, Habermas, Nussbaum, etc.) in light of alternatives which have been proposed to the liberal position (communitarianism, post-structuralism, group rights theories, etc.). S/U or letter grading.

C217. Selected Texts in Political Theory. (4) Discussion, three hours. Critical examination of major texts in political theory, with particular attention to their philosophic system, their relations to contemporary political and intellectual currents, and importance of the system for present-day political analysis. May be concurrently scheduled with course C197A.

C218. Selected Topics in Political Theory. (4) Discussion, three hours. Critical examination of a major problem in political theory. May be concurrently scheduled with course C197A.

219. Workshop: Political Theory. (4) Discussion, three hours.

International Relations

220. International Relations Theory. (4) Discussion, three hours. Approaches to and central problems of international relations theory.

C221. Advanced International Relations Theory. (4) Discussion, three hours. Introduction to contemporary problems in international relations theory. May be concurrently scheduled with course C197B.

222. Seminar: Strategic Interaction. (4) Seminar, three hours. A strategic move influences the other person's choice by affecting his expectations of how we will behave. Discussion of theories of deterrence, coercive diplomacy, crisis management, war termination, and negotiation. Use of various theoretical approaches to explaining strategic interaction, including psychology, bargaining theory, and game theory.

C223. Politics and Strategies of Modern War. (4) Seminar, three hours. Analysis of various national security problems in both their military/technical and political dimensions. May be concurrently scheduled with course C197B.

225. American Foreign Policy. (4) Discussion, three hours. Discussion of approaches used to explain foreign policy-making at individual, small group, bureaucratic, and domestic politics levels. Application to selected cases in American foreign policy.

C226. The Making of American Foreign Policy. (4) Seminar, three hours. Intensive analysis of policy formulation process and substance of selected contemporary problems in foreign policy. Political and institutional factors affecting foreign policies; analysis of policy options. May be concurrently scheduled with course C197B.

C227. Foreign Policy Process. (4) Discussion, three hours. Prerequisites: courses 120, 220. Political science and policy science approaches to national foreign policy process, with primary focus on formulation and implementation of American foreign policy. May be concurrently scheduled with course C197B.

230. Contending Perspectives on International Political Economy. (4) Discussion, three hours. Survey of various theoretical approaches to international political economy.

231. International Political Economy I. (4) Seminar, three hours. Interaction between international trade and investment and domestic political economics of both industrialized and industrializing societies.

232. International Political Economy II. (4) Seminar, three hours. Designed to develop Ph.D. students' skills in setting up and solving simple institutional design, political economy macro, signaling, and participation models, as well as two-level game models of domestic politics and international conflict and cooperation, with emphasis on applications in international political economy and comparative politics.

233A-233B-233C. Political Economy Workshops (0-4-8). Discussion, two hours. Preparation: successful completion of major field examinations. Workshops for students writing or preparing to write dissertations. Reading and discussion of research in progress presented by UCLA faculty, visiting scholars, and advanced graduate students. Research paper of publishable length and quality required. In Progress and letter grading (courses 233A-233B); letter grading (course 233C).

234A-234B-234C. Workshops: National Security, Foreign Policy, and International Relations (0-0-12). Discussion, two hours. Preparation: successful completion of major field examinations. Course 234A is requisite to 234B, which is requisite to 234C. Courses must be taken in sequence. Workshops for students preparing for or working on dissertations. Reading and discussion of research in progress presented by UCLA faculty, visiting scholars, and advanced graduate students. Major research paper required. In Progress grading.

C239. Selected Topics in International Relations. (4) Discussion, three hours. May be concurrently scheduled with course C197B.

Comparative Politics

240A-240B. Seminars: Comparative Politics. (4-4) Seminar, three hours. Course 240A is not requisite to 240B. Letter grading. **240A.** (Formerly numbered 240.) Survey of ideas and approaches that have been historically important in field of comparative politics, with a selection of theories and methodologies that have comprised the field over time. **240B.** Survey of contemporary research approaches and problems in field of comparative politics, with a range of theories and methodologies used by practitioners in the field.

C241. African Politics. (4) Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

C242. Chinese and East Asian Politics. (4) Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

C243. Japanese and Western Pacific Politics. (4) Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

C244. Latin American Politics. (4) Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

C245. Middle Eastern Politics. (4) Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

C246A. Western European Politics. (4) (Formerly numbered C250A.) Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

246B. Political Development of Modern Europe. (4) (Formerly numbered 250B.) Seminar, three hours; discussion, one hour (optional). Principal phases of political development from high feudalism to the present, together with theories of causation.

C247. Politics of the Soviet Union and Post-Soviet Region. (4) Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

247A. Evolution of Soviet and Russian Politics. (4) Seminar, three hours; discussion, one hour (optional). Discussion seminar surveying political evolution of Soviet Union and its transformation.

C247B. Domestic Context of Russian Foreign Policy. (4) Seminar, three hours; discussion, one hour (optional). Examination of domestic social, political, bureaucratic, and organizational sources of Russian foreign and strategic policy. May be concurrently scheduled with course C197B.

C248. South Asian Politics. (4) Seminar, three hours; discussion, one hour (optional). May be concurrently scheduled with course C197D.

251. Political Economy of Structural Adjustment. (4) Discussion, three hours. Some familiarity with economics helpful. Principal arguments for structural adjustment (trade and economic liberalization) and consideration of political issues that arise from this process.

252. Parties and Party Systems. (4) (Formerly numbered 252A.) Seminar, three hours; discussion, one hour (optional). Theories and practices of political parties, party systems, and elections in comparative perspective.

253. Political Change in Communist Systems. (4) Discussion, three hours. Examination of political context and consequences of structural reform in Communist systems; theories of post-Leninist political pluralization and convergence.

254A-254B. Institutions and Comparative Politics. (4-4) Seminar, three hours; discussion, one hour (optional):

254A. Comparative Institutional Analysis. Use of advances of rational choice theory and new institutionalism to compare and analyze major institutional structures, including presidentialism vs. parliamentarism, unicameralism vs. bicameralism, two-party vs. multiparty systems, cadre vs. mass parties, and plurality vs. proportional electoral systems.

254B. Political Institutions, Delegation, and Policy-Making. Analysis of political foundations of policy-making. Characterization of democratic institutions as a series of delegations, from voters to elected officials, within parties and legislatures, and from elected politicians to unelected bureaucrats. Examination of implications of different institutional designs for how those delegations are made and controlled.

255. Seminar: Political Change. (4) Seminar, three hours. Interdisciplinary seminar directed toward comparative analysis of political development and modernization.

256. External Sources of Domestic Politics. (4) Discussion, three hours. Theoretical and historical studies of impact of war and trade on domestic cleavages, policy, and institutions.

257. Labor and Working-Class Politics. (4) Discussion, three hours. Questions and topics on comparative labor and working-class politics.

259. Selected Topics in Comparative Politics. (4) Discussion, three hours. Critical examination of a major problem in comparative politics.

American Politics

260A. Survey Course in American Politics: Political Parties and the Electoral Process. (4) Discussion, three hours.

260B. Survey Course in American Politics: American Political Institutions. (4) Discussion, three hours.

M261A. Proseminar: Political Psychology. (4) (Same as History M236A and Psychology M228A.) Discussion, three hours. Introduction to political psychology: psychobiography, personality and politics, mass attitudes, group conflict, political communication, and elite decision making.

C261B. Mass Attitudes and Political Behavior. (4) Discussion, three hours. Prerequisite: course 141B or 260A. Analysis of development and change of political attitudes in mass publics and their relationship to voting, protest, and violence. May be concurrently scheduled with course C197C.

261C. Political Communication. (4) Discussion, three hours. Broad survey of research bearing on role of mass media in the American political process. Topics include theories of persuasion, evolution of "media effects" research, reporting and advertising as determinants of election outcomes, adversarial versus differential journalism, and analyses of media bias.

M261D. Seminar: Political Psychology. (4) (Same as Psychology M228B.) Discussion, three hours. Prerequisite: course M261A or Psychology 220A. Examination of political behavior, political socialization, racial conflict, mass political movements, and public opinion.

M261E. Critical Problems in Political Psychology. (4) (Same as Psychology M228C.) Discussion, three hours.

C262. Political Parties. (4) Discussion, three hours. Critical examination of literature on party systems and organization. Special attention to political functions, electoral campaigns, and party cadres. May be concurrently scheduled with course C197C.

C264. Politics and Society. (4) Discussion, three hours. Application of selected classical and contemporary sociological theories to politics. May be concurrently scheduled with course C197C.

265. Politics and Economy. (4) Discussion, three hours. Analysis of theoretical and practical relationships between economic organization and governmental institutions. Development and political implications of the market system, banking and finance, corporate enterprise, and organized labor.

266. Group Theories of Politics. (4) Discussion, three hours. Critical appraisal of "group theory" approaches to study of political decision making, with special attention to empirical research problems and findings.

268. Seminar: Political and Electoral Problems. (4) Seminar, three hours. Preparation: two graduate courses in politics.

269. Seminar: Political Behavior. (4) Seminar, three hours.

C270. Legislative Behavior. (4) Discussion, three hours. Analysis of major approaches to study of representative institutions, with special emphasis on assumptions, concepts, methods, and theoretical implications associated with each approach. May be concurrently scheduled with course C197C.

C271. Executive Politics and the Presidency. (4) Discussion, three hours. Analysis of executive organization and leadership, with emphasis on the American Presidency. Special attention to theories of organization and personality and relationship between the executive and other institutions and groups. May be concurrently scheduled with course C197C.

272. Political Environment of the Federal Executive. (4) Discussion, three hours. Examination of political environment of the federal executive in the U.S. Special attention to executive/legislative relations.

273. American Political Development. (4) Discussion, three hours. National political institutions in historical perspective, theories of state building, state societal relations, political culture.

275. Seminar: American Political Institutions. (4) Seminar, three hours.

C279. Seminar: Public Law. (4) Seminar, three hours. May be concurrently scheduled with course C197C.

C281. Public Policy Studies. (4) Discussion, three hours. Systematic analysis of nature and scope of public policy and its programmatic implications. Special emphasis on government organizations and process, as well as types of government intervention and stages of the policy process. Substantive focus primarily on American public policy and analysis. May be concurrently scheduled with course C197C.

284. Seminar: Bureaucracy and Organization. (4) Seminar, three hours. Exploration of topics in analysis of public and private bureaucracies and organizational theory. Topics include empirical theories of bureaucratic behavior; bureaucratic growth; bureaucratic behavior and political culture; organizational structures and strategies; and function of the executive.

Special Studies

290. Modern Political Economy. (4) Discussion, three hours. Discussion of implications for understanding politics of the thinking of politicians, bureaucrats, producers, consumers, and nations as utility maximizers. Topics include microfoundations for macro models, forms of political participation, the state, government regulation, growth of government, bureaucracy elections, public policy, inflation.

M291A-M291B. Social Theory and Comparative History. (4-4) (Same as History M203A-M203B and Sociology M296A-M296B.) Colloquium, three and one-half hours every other week. Introduction to historically rooted social theory and theoretically sensitive history, following the program of the Center for Social Theory and Comparative History. Each course may be taken independently for credit.

292A-292B. Introduction to Political Inquiry. (4-4) Seminar, three hours; discussion, one hour (optional). **292A.** Problems of Scientific Inquiry and Normative Discourse; **292B.** Research Design. Prerequisite: course 292A. Major conceptual frameworks and approaches to political science.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching Political Science. (4) Seminar in teaching techniques, including evaluation of each student's own performance as a teaching assistant. Normally to be taken by all new teaching assistants in first term of their assistantships. May be taken only in term in which students are teaching assistants. May not be applied toward M.A. or Ph.D. course requirements. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Study or Research. (2 to 4) May be applied only three times toward minimum course requirement in first two years. May be repeated.

597. Preparation for Ph.D. Qualifying Examinations. (2 to 12) May be repeated. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (2 to 12) May be repeated. S/U grading.

Scope and Objectives

The Department of Psychiatry and Biobehavioral Sciences offers interdisciplinary courses related to the mental health professions of the biobehavioral sciences in addition to its pro-

grams for psychiatry interns and residents and for medical students.

Enrollment in department courses is limited to registered UCLA students, students registered in programs officially affiliated with UCLA, and students enrolled concurrently through UCLA Extension. Students who meet these requirements, but who are not affiliated with a departmental training program, must also meet required course requisites determined by specific educational programs. Additional information is available from the department office.

Developmental Disabilities Immersion Program

The Developmental Disabilities Immersion Program (DDIP) is cosponsored by the Department of Psychology, the Department of Psychiatry and Biobehavioral Sciences, and the Office of Instructional Development — Center for Experiential Education and Service Learning (formerly Field Studies Development). Each year a group of 30 students is selected for the program which runs during Winter/Spring Quarters. Students participate in courses, fieldwork, and research at selected University and community facilities serving persons with developmental disabilities. Required courses include Psychology/Psychiatry M180A, M180B, M181A-M181B. Students also take other courses related to developmental disabilities. Many of the courses fulfill Psychology undergraduate major requirements. Student individualized research projects are also part of the immersion experience. Students interested in the program should contact the Office of Instructional Development — Center for Experiential Education and Service Learning (160 Powell Library) or the Psychology Undergraduate Advising Office (1531 Franz Hall).

Clinical Psychology Internship

The department offers a 12-month Clinical Psychology Internship, which is a Graduate Division certificate program. Students enrolled in clinical psychology programs at APA-approved universities are eligible to apply. Applications are accepted through December 1. The primary goals of the internship are to provide a year of intensive exposure to a wide variety of clinical and human services experiences and to maximize the personal growth of each professional. Students interested in this certificate program should contact the Psychology Internship Training Office, 68-265B NPI&H (310-794-1587).

Information on clinical practicums which are offered in conjunction with other educational institutions and UCLA departments may be obtained from the department office.

Psychiatry and Biobehavioral Sciences

Lower Division Course

88. Lower Division Seminar: Special Topics in Psychiatry and Biobehavioral Sciences. (4) Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in psychiatry and biobehavioral sciences approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

Upper Division Courses

M112. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (4) (Same as Anthropology M136Q.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Group and individual projects. Discussion of some of the uses of observations and their implications for research in social sciences.

M180A. Contemporary Problems in Mental Retardation. (4) (Same as Psychology M180A.) Lecture, three hours. Requisites: Psychology 10, 100A, and 127 or 130 or 133A through 133I. Corequisite: course M181A. Limited to Immersion Program students. Presentation of concepts, issues, and research techniques in the area of mental retardation. Biological, psychological, and community questions concerning causes and treatment of developmental disabilities, as well as systems for care and training of retarded individuals. Lectures, directed reading, and discussion. P/NP or letter grading.

M180B. Contemporary Issues in Mental Retardation. (4) (Same as Psychology M180B.) Lecture, three hours. Requisite: course M180A. Corequisite: course M181B. Limited to Immersion Program students. Psychoeducational issues in mental retardation relating literature to ongoing field experiences through lectures, discussions, media, and six student papers. P/NP or letter grading.

M181A-M181B. Research in Contemporary Problems in Mental Retardation. (4-4) (Same as Psychology M181A-M181B.) Corequisites: courses M180A, M180B. Research experience. In Progress and P/NP or letter grading.

185. Social Psychology of Urban Student Education. (6) Lecture, 90 minutes; discussion, 90 minutes; fieldwork, six to eight hours. Designed for juniors/seniors. Students interested in study of urban youth and their education acquire comprehensive and first-hand knowledge of factors affecting these students' achievement. Field study component requires students to intern with youth in schools and after-school programs. P/NP or letter grading.

M191. Biological Bases of Psychiatric Disorders. (4) (Same as Molecular, Cell, and Developmental Biology M191, Neuroscience M130, Physiological Science M181, and Psychology M117J.) Lecture, three hours. Requisite: Neuroscience M101A (or Molecular, Cell, and Developmental Biology M175A or Physiological Science M180A or Psychology M117A) or Physiological Science 111A or Psychology 115. Underlying brain systems involved in psychiatric syndromes and neurological disorders, including schizophrenia, depression, bipolar disorders, obsessive/compulsive disorder, eating disorders. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments.

M192A. Health Outreach Issues and Interventions for At-Risk Populations: Prefield Course. (4) (Same as Medicine M190A.) Lecture, two hours; discussion, two hours; possible field observations. Preparation: application and interview. First in series of courses to explore prevention of disease in at-risk populations, clinical services for disadvantaged, medical and psychological issues of homelessness, and effects of low socioeconomic status on parenting. Lectures from expert faculty and practitioners in the field, with visits to shelters and facilities where homeless are provided with health care. P/NP or letter grading.

M192B. Field Studies Seminar: Health Outreach Issues and Interventions. (2 or 4) (Same as Medicine M190B.) Discussion, two hours; fieldwork, three to four hours (two-unit course) or six to eight hours (four-unit course). Requisite: course M192A. Dynamics of multidisciplinary approaches to preventive health education for at-risk populations by student delivery of needed services to homeless families, under supervision of professional staff. P/NP or letter grading.

199. Special Studies in Psychiatry. (2 to 4) Preparation: submission of written proposal outlining course of study (to be structured by instructor and student at time of initial enrollment). Additional information and course proposal forms are available in Office of Education, C8-202 NPI&H.

Graduate Courses

M203. Molecular Neurobiology. (4) (Same as Neuroscience M203.) Lecture, three hours; discussion, one hour. Preparation: basic biochemistry. Requisites: Biological Chemistry 201A-201B. Introduction to neurochemistry for neuroscience students. Topics include protein structure and function, lipid structure and metabolism, nucleic acids/molecular biology.

M204. Cellular and Molecular Developmental Neurobiology. (4) (Same as Neurobiology M204, Neuroscience M204, and Physiology M204.) Lecture, three hours; discussion, one hour. Requisites: Neuroscience M201, M202, and M203, or Biological Chemistry 201A-201B. Cellular and molecular processes that regulate development of nervous systems of vertebrates and invertebrates. Topics include regional specification in early neurogenesis, generation of neuronal diversity, cell surface interactions and growth factors, neuronal and glial proliferation and migration, axonal outgrowth and guidance, synaptogenesis, trophic interaction, plasticity, regeneration, and aging.

207A-207B-207C. Hypnosis Seminars. (2-2-2) Experiential seminars to prepare mental health professionals for adult and child clinical applications, involving didactics, demonstrations, trainee practice, and feedback. Following training in inductions and development of classic hypnotic phenomena (e.g., age regression, hypnoanesthesia, self-hypnosis), focus on psychotherapeutic applications, including direct symptom removal, behavioral methods, and hypnoanalysis. Emphasis on acquiring skills for clinical practice. S/U grading.

208A-208B. Clinical Neuropsychology. (2-2) (Formerly numbered 208A-208B-208C.) Lecture, 90 minutes. Designed for graduate and postgraduate students. Introduction and review of neuropsychological concepts, including functional neuroanatomical systems of the brain, analytic and synthetic activities of the brain, effects of generalized and focal brain impairment on behavior, and introduction to use of neuropsychological test instruments. Letter grading.

M209. Introduction to Neural Networks: Modeling and Applications. (4) (Same as Biomathematics CM208C.) Lecture, three hours. Preparation: calculus. Introduction to theory of neural networks and their applications. Survey of current neural-network models of cognitive functions. S/U or letter grading.

M210. Seminar: Psychocultural Studies and Medical Anthropology. (4) (Same as Anthropology M234.) Seminar, three hours. Devoted to present state of research in psychocultural studies. Survey of work in child development and socialization, personality, psychobiology, transcultural psychiatry, deviance, learning, perception, cognition, and psychocultural perspectives on change. S/U or letter grading.

M213. The Individual in Culture. (4) (Same as Anthropology M235.) Seminar, three hours. Designed for graduate students.

M214. Cross-Cultural Studies of Socialization and Children. (4) (Same as Anthropology M236P.) Seminar, three hours. Selected topics in cross-cultural study of socialization and child training. Methods, ethnographic data, and theoretical orientations. Emphasis on current research.

M221. Cellular and Molecular Neurochemistry. (4) (Same as Biological Chemistry M221, Neurobiology M221, Neuroscience M240, and Pharmacology M221.) Lecture, three hours; discussion, one hour. Preparation: biochemistry. Contemporary neurochemistry topics — metabolic specialization and compartments, metabolism and function of ion channels, structure and function of neurotransmitters. Inborn errors and molecular genetics, molecular imaging, aging, and regeneration. Receptor/effector coupling. S/U or letter grading.

M222. Transcultural Psychiatry. (4) (Same as Anthropology M234P.) Lecture, three hours. Consideration of psychiatric topics in cross-cultural perspective, such as studies of drug use, deviance, suicide, homicide, behavioral disorders, "culture specific" syndromes, non-Western psychiatries, and questions of "sick" societies. May be repeated for credit.

226A-226B. Childhood Psychopathology Research Seminars. (2-2) Seminar, 90 minutes. Current research in causes and behavioral manifestations of childhood psychopathology. Discussion on diagnosis and etiology of childhood disturbances.

M231. Hispanic Mental Health Issues and Treatment. (2) (Formerly numbered 231.) (Same as Social Welfare M203E.) Mental health issues and needs of Hispanics through seminars and videotapes dealing with historical comparison of psychiatry in Mexico and the U.S., analysis of various theoretical perspectives regarding biopsychosocial behavior; distinguishing psychodynamic from cultural factors in treatment of Spanish-speaking patients; treatment of Hispanic families, couples, undocumented persons, and criminal justice system clientele.

M232. Causal Inference. (4) (Same as Biostatistics M235.) Lecture, three hours; discussion, one hour. Prerequisite: Biostatistics 200A. Selection bias, confounding, ecological paradox, contributions of Fisher and Neyman. Rubin model for causal inference, propensity scores. Analysis of clinical trials with noncompliance. Addressing confounding in longitudinal studies. Path analysis, structural equation, and graphical models. Decision making when causality is disputed. Letter grading.

M234. Affective Disorders. (2 or 4) (Same as Psychology M280.) Seminar, two hours. General topics related to primary affective disorders (depression, manic depressive illness), including diagnosis, pharmacology, epidemiology, psychology, phenomenology, biology, and treatment. Students enrolled for four units are assigned a more intensive reading list and required to make a presentation or prepare a research paper.

M235. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (4) (Same as Anthropology M236Q, Education M222A, and Psychology M295.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some uses of observations and their implications for research in social sciences. Students expected to integrate observational work into their current research interests.

236A-236B-236C. Psychology Interns Seminars. (1-1-1) Seminar, 90 minutes. Current topics in clinical psychology. Group-selected topics for discussion pertaining to psychopathology, diagnostic evaluation, and modalities of treatment. S/U grading.

237. Seminar: Behavioral Neuroimmunology. (1) Seminar, one hour per month; discussion, 30 minutes per month. Series of lectures presented the second Wednesday of each month throughout academic year by invited speakers. S/U grading.

M238. Survey Research Techniques in Psychocultural Studies. (4) (Formerly numbered 238.) (Same as Psychology M238.) Seminar, three hours. Designed for graduate students. Techniques for conceptualizing, conducting, and analyzing survey data; instruction in qualitative strategies for enhancing survey research on psychocultural problems.

M240. Assessment and Treatment of African American Families. (3) (Same as Afro-American Studies M240.) Seminar, two hours. Designed for graduate students. Course aids mental health professionals and trainees in evaluation and treatment of African American families in terms of their cultural milieu, historical background, and economic status. Didactic presentations by instructors and invited guests form basis for supervised evaluation and case management with an African American child and family.

242. Parent and Child Psychotherapy Seminar. (1) Preparation: current experience in psychoanalytically oriented child psychotherapy. Seminar meets throughout year. During Summer Quarter emphasis on initial clinical and research evaluation as well as early treatment of the child and family. During Fall, Winter, and Spring Quarters instructors use videotaped sessions and notes from their own clinical work to discuss such topics as diagnostic criteria, family system treatment formulations stressing work with parents and children, and such theoretical and technical issues as transference, resistance, overdetermined nature of symptoms, and termination. Student presentations encouraged in order to amplify clinical and theoretical issues and to become familiar with ongoing cases which are part of a systematic outcome study.

243A-243B-243C. Mental Retardation and Chronic Medical Illness Interdisciplinary Core Curriculum (1-1-1). Lecture, 90 minutes. Survey series on major topic areas of mental retardation and chronic medical illness, covering epidemiology, nosology, assessment, health care delivery systems, basic genetics, nutrition, direct care, and special deficits. Presented in interdisciplinary framework as generic information independent of discipline. S/U grading.

M246. Psychological Aspects of Mental Retardation. (4) (Same as Psychology M246.) Lecture, 90 minutes. Discussion of psychological aspects of mental retardation, including classification, description, etiology, theory, prevention, treatment, assessment, modern and future developments, and input from other disciplines (ethics, law, religion, welfare systems).

M249. Neurobiology of Sleep. (3) (Same as Neuroscience M259 and Psychology M296.) Lecture, one hour; discussion, two hours. Critical review of primary research publications concerning neural basis of sleep. Discussion of neural and biochemical control of REM and NREM sleep after reviewing sleep behavior and phenomenology, including developmental and comparative aspects. Presentation of relevant clinical phenomena. S/U or letter grading.

M251. Mental Health Services. (4) (Same as Health Services M249J.) Lecture, three hours. Prerequisites: Health Services 200A-200B-200C. Designed for doctoral students. Survey of contemporary American delivery of health services to emotionally and mentally ill and retarded. Analysis of characteristics of such services, with historical background of their evolution and projections of their future prospects. Letter grading.

253. Seminar: Child Development. (1) Theories of development, systems of child development, and chronological aspects of child development. Presentation of assigned readings by students plays major role in each session.

M254. Supporting Families of Children with Special Needs. (2) (Formerly numbered 254.) (Same as Social Welfare M203D.) Techniques and issues in counseling families through evaluation, feedback, and treatment. Social and psychological stresses on family unit, professional's reactions, community resources, and issues of genetic counseling, placement, and developmental crises. S/U grading.

M255. Functional Organization of Behavior. (2) (Same as Neuroscience M255.) Changes in neuronal properties supporting changes in learned behavior. Different types of learning. Role of neurotransmitters and second messengers in changing ion channels of neurons to support associative learning versus long-term potentiation of neurotransmission. S/U or letter grading.

256. Basic Clinical Child Psychopathology. (1) Weekly seminar covering basic clinical aspects of child psychopathology. Readings provided for basis of discussion on topics including interviewing of parents and children, diagnosis, and related syndromes. S/U grading.

257A-257B-257C. Communication Disorders Associated with Developmental Disabilities and Psychiatric Disorders. (3-3-3) Laboratory, 90 minutes; didactic, 90 minutes. Didactic and practical training in communication and its dysfunction as these relate to language disabilities seen in interdisciplinary medical setting. Provides background for graduate and post-doctoral students who plan to engage in clinical work and/or clinical research in which language disturbances of childhood and adulthood are relevant.

259. Legal and Ethical Issues with Vulnerable Populations. (3) Lecture, 90 minutes; laboratory, three and one-half hours. Discussion of current laws dealing with vulnerable populations (e.g., children, developmentally disabled people, elderly people); philosophies, ethics, ethical codes, issues, and how to resolve them. Use of videotapes and discussion of cases.

261. Advanced Seminar: Child and Adolescent Psychopharmacology. (1) Use of problem-based teaching methods and critical reviews of medical literature as basis for rational pharmacotherapy in children and adolescents. Major focus on development of a clinical decision-making process, given the limited scientific evidence supporting pharmacological practice in the field. S/U grading.

262A-262B-262C. Clinical Fieldwork in Developmental Disabilities and Chronic Illness (1 to 4 each). Prerequisites or corequisites: courses 243A-243B-243C. Placement and supervision of clinical and consultation activities of interdisciplinary trainees in various community agencies, hospitals, or other related settings serving developmentally disabled or chronically medically ill children, youth, or adults. Supervision done jointly by community personnel on site, in collaboration with interdisciplinary faculty. S/U grading.

M266. Advanced Magnetic Resonance Imaging. (4) (Same as Biomedical Physics M266 and Neuroscience M267.) Lecture, four hours. Starting with basic principles, presentation of physical basis of magnetic resonance imaging (MRI), with emphasis on developing advanced applications in biomedical imaging, including both structural and functional studies. Instruction more intuitive than mathematical. Letter grading.

M270. Neural Basis of Memory. (4) (Same as Neuroscience M273.) Lecture, two hours; discussion, one hour. Anatomical, physiological, and neurological data integrated into models for how behavioral phenomena of memory arise. Discussion of invertebrate memory, cortical conditioning, hippocampus and declarative memory, and frontal lobes and primary memory.

M272. Psychological Anthropology. (4) (Same as Anthropology M234Q.) Lecture, three hours. Various psychological issues in anthropology, both theoretical and methodological. Areas of interest include such things as culture and theory, culture and personality, and culture psychiatry. Discussion of questions relating to symbolic and unconsciousness process as they relate to culture. Topics vary from term to term. May be repeated for credit.

M273. Advanced Seminar: Medical Anthropology. (4) (Same as Anthropology M263Q, Community Health Sciences M244, and Nursing M273.) Seminar, three hours. Limited to 15 students. Examination of interrelationships between society, culture, ecology, health, and illness. Bases for written critical analysis and class discussion provided through key theoretical works. S/U or letter grading.

275A-275B. Sociobiology Seminars. (2-2) Review of sociological theory as it applies to adult bonding behavior: kin-selection theory, reciprocal altruism theory, mate selection theory, and bond strategy theory. Bonds viewed primarily from biological rather than psychological perspective. In Progress and S/U or letter grading.

M277. Cognitive Behavior Therapy with Children: Treatment and Systems of Care. (2 or 4) (Same as Psychology M285.) Seminar, 90 minutes. Designed for graduate students. Cognitive/behavioral approaches to prevention and treatment of mental health problems in children. Examination of service delivery systems for treating troubled youth and discussion of issues with respect to current systems of care. Major problems include conduct disorders, attention deficit disorder, depression, anxiety, and learning disabilities.

M280. Politics of Reproduction. (4) (Same as Anthropology M269P.) Seminar, three hours. Examination of various ways that power, as it is structured and enacted in everyday activities, shapes human reproductive behavior. Case materials from diverse cultures illuminate how competing interests within households, communities, states, and institutions influence reproductive arrangements in society.

281. Behavioral Therapy in an Educational Setting. (4) Lecture, one hour; laboratory, six to 10 hours. Supervised experience in classroom working with exceptional children. Theoretical background furnished through one-hour weekly lecture.

M282. Anthropology of Human Body. (4) (Same as Anthropology M234T.) Seminar, three hours. Exploration of how sociocultural and political dynamics shape perceptions of and understandings about the human body, and how, reciprocally, those perceptions and understandings influence social processes. Includes materials from both non-Western and Western societies.

M285. Functional Neuroimaging: Techniques and Applications. (4) (Same as Biomedical Physics M285.) In-depth examination of activation imaging, including PET and MRI methods, data acquisition and analysis, experimental design, and results obtained thus far in human systems. Strong focus on understanding technologies, how to design activation imaging paradigms, and how to interpret results. Laboratory visits and design and implementation of a functional MRI experiment. S/U or letter grading.

M286A-M286B-M286C. Statistics in Psychiatric and Biobehavioral Research. (2-2-2) (Same as Biostatistics M206A-M206B-M206C.) Seminar, 90 minutes. Prerequisite: Biostatistics 100B. Designed for graduate students. Examples from psychiatric literature used to illustrate statistical ideas and analysis strategies. Topics include experimental designs, sample size calculations, parametric versus nonparametric tests, regression, ANOVA, factor analysis, defining composite variables, causal inference. Computer used to illustrate basic data analysis. S/U or letter grading.

287. Small Group Cognitive/Behavioral Interventions. (4) Lecture, three hours. Presentation of brief therapeutic interventions for adults and children at risk for suicide, depression, conduct problems, and HIV, with didactic and experiential techniques.

M289. Intervention to Reduce HIV and Its Consequences. (4) (Same as Community Health Sciences M299.) Lecture, three hours. Examination of interventions to reduce HIV/AIDS transmission. Review of theory and research supporting efficacy of HIV interventions for a variety of high-risk populations. Letter grading.

290. Los Angeles HIV-Community Colloquia. (1) Lecture, two hours. Examination of emerging scientific HIV-related research. Discussion of policy issues, theories, and designs of HIV-related services and programs and shifting epidemiology of the virus and disease. S/U grading.

291. Seminar: Behavioral Biology — Rage. (4) (Formerly numbered 291A-291B.) Seminar, three hours. Graduate and professional seminar focusing on proximate causation, development, and evolution of human behavior and vertebrate social organization. Emphasis on deviant and rage behavior. S/U or letter grading.

295A-295B-295C. Advanced Seminars: Substantive Issues in Substance Abuse I, II, III. (2-2-2) S/U grading:

295A. Neurobiology and psychopharmacology of drug abuse, as well as epidemiology and prevention. Discussion of pros and cons of various treatment modalities for drug dependence.

295B. Drug use patterns and treatment issues in specific populations such as women, adolescents, the homeless, the multiply diagnosed, as well as different ethnic populations. Exploration of relationship between drug abuse, sexuality, and HIV/AIDS.

295C. Theoretical perspectives on drug use and abuse as well as policy and ethical aspects of drug abuse research. Research design and analysis issues pertinent to drug abuse research.

298. Current Topics in Biobehavioral Sciences. (1 to 4) Current issues in biobehavioral sciences offered on selective basis depending on instructor interest and topical relevancy of problems. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit.

402. Journal Club. (1) Seminar, two hours; outside study, two hours. Presentation of participants' current research. Critical review of recent articles on drug abuse. Training sessions included in areas in which fellows believe they have a recognized need. S/U grading.

403. Individual Case Supervision. (1 to 4) Preparation: submission of written proposal to be structured by instructor and student prior to enrollment; additional information and proposal forms available in Office of Education, C8-202 NPI&H. One-to-one supervision of individual therapy cases, including analyses of patient data, supervision of ongoing treatment, informal didactic sessions on personality theory, and applications to patient management.

M424. Functional Magnetic Resonance Imaging Journal Club. (1) (Formerly numbered 424.) (Same as Biomedical Physics M424.) Discussion, 90 minutes. Directed reading and discussion of current topics and developments in functional magnetic resonance imaging. S/U grading.

425. Teaching Case Conference. (1) Review of diagnosis and treatment of full spectrum of disorders, with expert off-unit consultants.

429. Child Outpatient Team. (1) Weekly team meetings to coordinate clinical activities of trainees in Child Outpatient Department. Discussion of literature and theories related to selected cases. S/U grading.

449. Parent Training Intervention Workshop. (2) Lecture, 90 minutes; discussion, one hour. Advanced clinical trainees learn behavioral techniques of assessment and treatment of parent/child problems. Lectures, case presentations, and workshops on various skills necessary.

471. Grand Rounds (No credit). Designed for second-year residents in Child Service and child psychiatry fellows. Each month one second-year child psychiatry fellow presents a major clinical problem. Senior faculty discussants preside. Presenting trainees expected to cover pertinent literature and to assemble critical elements of information on case or problem at hand. Most sessions eligible for Continuing Medical Education credit.

478. Clinical Genetics Rounds (No credit). Designed for medical graduates. Weekly clinical rounds on patients seen in the wards during preceding week. House staff and others involved in clinical work may attend. Usually in-depth discussion of medical and genetic aspects of one or more disorders presented.

479. Genetics Clinic Presentation. (No credit) Weekly clinical teaching session on patients seen in preceding genetics clinic. In-depth discussion on genetics of each disorder.

480. Analysis of Human Chromosome Studies. (1) Chromosome karyotypes prepared in cytogenetics laboratory during preceding week presented and discussed with reference to clinical findings. Teaching includes interpretation of abnormal karyotypes and technical aspects of routine and special chromosome stains.

482. Cognitive Behavior Therapy Practicum: Child Anxiety and Depressive Disorders. (3). Seminar, two hours. Training in cognitive/behavioral assessment and treatment of children and adolescents with anxiety and depressive disorders. Didactic and experiential training, including direct patient care, clinical supervision, and participation in weekly team meetings.

485. Medical Genetics Seminar (No credit). Preparation: introductory course. Weekly lecture series intended for those interested in genetics or in specific topic to be presented. Speakers are invited for their expertise or research in some special area related to genetics and may be from UCLA or elsewhere. Discussion and questions from audience encouraged.

596P. Individual Studies in Psychiatry. (2 to 12) Preparation: submission of written proposal outlining course of study (to be structured by instructor and student at time of initial enrollment). Additional information and course proposal forms available in Office of Education, C8-202 NPI&H. Directed individual research and study in psychiatry at graduate level.

 Nancy J. Woolf, Ph.D.

Scope and Objectives

Psychology is a subject of considerable interest to most people — we all tend to practice some form of intuitive psychology in an attempt to understand ourselves and the people and groups with whom we interact. The curriculum offered by the UCLA Department of Psychology presents psychology as a scientific discipline that employs systematic methods of inquiry to study and explain human and animal behavior — both normal and abnormal — in terms of a variety of underlying variables, including neural, physiological, and cognitive processes; developmental factors and individual differences; and social and interpersonal influences and contexts. According to recent surveys, the UCLA Psychology Department is ranked as one of the top departments of its kind in the country.

The structure of the undergraduate curriculum has been designed to reflect the extensive breadth of psychology — in terms of both the range of behavioral phenomena studied and the variety of methods and theoretical approaches employed — while allowing students to pursue in greater depth those areas in which they become most interested. Beyond basic core courses, students can take many specialized courses in areas such as psychobiology, animal behavior, learning and memory, motivation, perception, cognition, measurement, personality, and clinical, social, developmental, community, and health psychology. The curriculum also provides excellent opportunities for research experience — either in the form of laboratory courses or by participation with faculty and graduate students in a wide variety of research projects.

A choice of three undergraduate majors is offered: a B.A. degree in Psychology and B.S. degrees in Cognitive Science and in Psychobiology. While the majors overlap in certain fundamental and basic knowledge bases, they differ considerably in their focus (i.e., the extent to which certain areas of psychology and related disciplines are studied) and in terms of the different student interests and needs they satisfy. For nonmajors, the department offers many courses that can give them new and valuable

insights into the understanding of human behavior, including their own.

At the graduate level, the department offers training leading to the Ph.D. degree with emphases in areas such as behavioral neuroscience, clinical, cognitive, developmental, learning and behavior, measurement, and social psychology. The program is designed to prepare future psychologists for careers as scientific investigators, college and university teachers, and professional psychologists.

Undergraduate Study Psychology B.A.

The Psychology major is the most general of the three majors and offers both broad and in-depth coverage of the fundamental and traditional areas of psychology. It provides students with a strong foundation for postgraduate education in psychology and can serve as excellent background to prepare them for further training in such fields as law, education, government and public policy, business, and many of the health-related professions. Its basic liberal-arts orientation also provides excellent foundation for immediate postbaccalaureate careers in many areas, particularly ones in which an understanding of human behavior and its diversity of expression would be an asset.

The requirements described below represent the minimum requirements in satisfaction of the preparation and the major. Additional courses in psychology, statistics, and related sciences, as well as other types of research and fieldwork experiences, are highly recommended if students plan to pursue graduate work in psychology and related fields. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for the major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.

Preparation for the Major

Students need to file a petition in the Undergraduate Advising Office to declare the Prepsychology major. They are then identified as Prepsychology majors until they (1) satisfy the preparation for the major requirements and (2) file a petition to declare the Psychology major. The following required courses must be taken for a letter grade (a C– or better in each course and a 2.3 overall grade-point average in the preparation courses) before students reach 110 total units (transfer students must complete all remaining preparation courses by the end of the first year of enrollment): Anthropology 7 or 10 or 12; Life Sciences 1 or Physiological Science 3; Chemistry and Biochemistry 2 or 14A or 20A (if students have completed one year of high school chemistry with a C or better, this requirement is waived); one course from Computer Science 2, Mathematics 2, Program in Computing 10A, Statistics 10, or one term of calculus; Physics 10 or 1A or 6A; one course from Philosophy 1, 4, 6, 7, 8, 9, 21, 22;

Psychology 10, 100A, 100B. Students cannot take Psychology 100B until they have passed course 100A with a grade of C– or better. Psychology 100A and 100B should be taken early in the career; these courses are open only to students who have declared the Prepsychology major one term before the term in which they plan to enroll. Students with no background in introductory statistics should take Statistics 10 before enrolling in course 100A.

Repetition of more than two preparation courses in which a grade of D or F was received or of any preparation course more than once results in automatic denial of admission to the major.

Students planning to transfer with 90 or more units should have completed the following courses prior to admission to UCLA: introductory psychology, physical anthropology, introductory biology, introductory physics, introductory chemistry (or one year of high school chemistry with a C or better), introductory philosophy, and one course from statistics (recommended), finite mathematics, calculus, computer science theory, or computer programming in C++.

The Major

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office.

Required: (1) Core courses: Psychology 110, 115 (or M117A-M117B-M117C), 120, 130 or one course from 133A through 133I, 135; (2) one laboratory/fieldwork course from 111, 113, 116, 121, 131, 136A, 136B, 136C, 171A, 174, 186A, 186B; (3) four additional upper division elective courses (16 units) in psychology.

Students who complete Psychology M117A-M117B-M117C receive equivalent credit for course 115 and two upper division psychology electives.

All upper division courses must be taken for a letter grade. For all entering freshmen and transfer students, a C– or better is required in each core course and in at least one laboratory/fieldwork course. Students must have a 2.0 grade-point average in all upper division courses selected to satisfy major requirements.

Cognitive Science B.S.

The Cognitive Science major focuses on the study of intelligent systems, both real and artificial. While including a strong foundation in the traditional areas of psychology, the major is interdisciplinary in nature and emphasizes subject matter within cognitive psychology, computer science, mathematics, and related disciplines.

The requirements described below include sufficient preparation if students plan to pursue graduate work in cognitive science or related fields; however, they may want to include additional advanced courses in psychology and fields related to cognitive science (e.g., computer science, linguistics, mathematics, philosophy, and statistics) as well as other types of

research and fieldwork experiences. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for the major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.

Preparation for the Major

Students need to file a petition in the Undergraduate Advising Office to declare the Precognitive Science major. They are then identified as Precognitive Science majors until they (1) satisfy the preparation for the major requirements and (2) file a petition to declare the Cognitive Science major. Questions about the major should be directed to the Undergraduate Advising Office, 1531 Franz Hall.

The following required courses must be taken for a letter grade (a C or better in each course and a 2.5 overall grade-point average in the preparation courses) before students reach 130 total units: Life Sciences 1 or Physiological Science 3; Chemistry and Biochemistry 2 or 14A or 20A (if students have completed one year of high school chemistry with a C or better, this requirement is waived); Mathematics 31A, 31B; Philosophy 7, 8, or 9; Physics 10 or 1A or 6A; Program in Computing 10A, 10B, 15; Psychology 10, 85, 100A, 100B. Students cannot take Psychology 100B until they have passed course 100A with a grade of C or better. Psychology 100A and 100B should be taken early in the career; these courses are open only to students who have declared the Precognitive Science major one term before the term in which they plan to enroll. Students with no background in introductory statistics should take Statistics 10 before enrolling in course 100A.

Repetition of more than two preparation courses in which a grade of D or F was received or of any preparation course more than once results in automatic denial of admission to the major.

Students planning to transfer with 90 or more units should have completed the following courses prior to admission to UCLA: two courses in calculus/analytical geometry, introductory psychology, statistics (recommended), introductory biology, introductory physics, one philosophy course (critical reasoning, philosophy of science, or philosophy of the mind), introductory chemistry (or one year of high school chemistry with a C or better), and one course in computer programming in C++.

The Major

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office.

Required: (1) Psychology 115 (or M117A-M117B-M117C), 120, and one course from 124A through 124G; (2) one course from 186A or 186B and one course from 121, 186A, 186B, or Computer Science 161; (3) three upper division elective courses (12 units) from Psychology 110, 112A through M119N, 123, 124A through 124G (if taken for the major, may not

be applied as an elective), 130, 133B, 135, 142H, 150, 151, 187A, 189, 190B or 190C (if content is approved by the Undergraduate Advising Office and courses have not been applied toward the Psychology 188A/188B requirement), 197 (content must be approved by the Undergraduate Advising Office before elective credit may be granted), Communication Studies 156, Computer Science 111 through M196B, Ethnomusicology 172A, Linguistics 103 through C185B, Mathematics 110A through 171, Philosophy 124 through 136, Statistics M100A, 100B, 100C, M120A, M120B; (4) two terms of Psychology 188A or 188B (may be fulfilled by taking any two courses from 188A, 188B, or 190C, provided content is approved by the Undergraduate Advising Office).

Students who complete Psychology M117A-M117B-M117C receive equivalent credit for course 115 and two upper division cognitive science electives.

Students must have a 2.0 grade-point average in all upper division courses selected to satisfy major requirements. With the exception of Psychology 188A and 188B, each course must be taken for a letter grade.

Psychobiology B.S.

The Psychobiology major is designed for students who plan to go on to postgraduate work in physiological psychology, neuroscience, behavioral aspects of biology, or the health sciences. Psychobiology involves the study of brain-behavior relations and laboratory training in standard brain research techniques.

The requirements described below include sufficient preparation if students plan to pursue graduate work in any of the above fields; however, they may want to include additional advanced courses in psychology and related sciences as well as other types of research and fieldwork experiences. Under special circumstances, graduate-level courses can be taken by undergraduate students, although such courses may not be applied toward degree requirements for the major. For additional information, contact the Undergraduate Advising Office, 1531 Franz Hall.

Preparation for the Major

Students need to file a petition in the Undergraduate Advising Office to declare the Prepsychobiology major. They are then identified as Prepsychobiology majors until they (1) satisfy the preparation for the major requirements and (2) file a petition to declare the Psychobiology major.

Life Sciences Core Curriculum

Required: Life Sciences 1, 2, 3, 4; Chemistry and Biochemistry 14A, 14B/14BL, 14C/14CL, and 14D, or 20A, 20B, 20L, 30, 30L, and 130A/130AL; Mathematics 3A, 3B, and 3C, or 31A, 31B, and 32A; Physics 1A, 1B, 1C, 4AL, and 4BL, or 6A, 6B, and 6C.

Also required are Psychology 10, 100A, 100B. Students cannot take Psychology 100B until

they have passed course 100A with a grade of C– or better. Psychology 100A and 100B should be taken early in the career; these courses are open only to students who have declared the Prepsychobiology major one term before the term in which they plan to enroll. Students with no background in introductory statistics should take Statistics 10 before enrolling in course 100A.

All core curriculum courses must be taken for a letter grade (a C– or better in each course and a 2.0 overall grade-point average in the core curriculum) before students reach 150 total units. Psychology 100A and 100B must be completed before students reach 130 total units. Students receiving a grade of D or F in two core curriculum courses, either in separate courses or repetitions of the same course, are subject to dismissal from the major.

Transfer Students

To be admitted as Psychobiology majors, transfer students with 80 or more units must complete the following courses prior to admission to UCLA: one year of general biology with laboratory for majors, preferably equivalent to Life Sciences 1 and 2, one year of calculus, one year of general chemistry with laboratory, and one semester of organic chemistry with laboratory. A second semester of organic chemistry or one year of calculus-based physics is strongly recommended but not required for admission. Introductory psychology and statistics are recommended.

The Major

After satisfying the preparation for the major requirements, students need to petition to enter the major at the Undergraduate Advising Office.

Required: (1) Organismic Biology, Ecology, and Evolution 129 or Psychology 118 or Anthropology 128A and 128B, and Psychology 110, 115 (or M117A-M117B-M117C), 116, 120; (2) one course from Psychology 127, 130, 133A through 133I, 135; (3) 16 units of graded elective courses from the following list: Organismic Biology, Ecology, and Evolution 107, 112, 113A, 114 (no more than one from this group), Psychology M117A, M117B, M117C, M117J, M117K, 119A through M119N, 190C (only if content is approved by the Undergraduate Advising Office), 197 (content must be approved by the Undergraduate Advising Office before elective credit may be granted), Chemistry and Biochemistry 153A, 153L, Molecular and Medical Pharmacology 110A, 110B, Molecular, Cell, and Developmental Biology 104, 138, C139, CM156, 171, M185A, Neuroscience 151, M174, Organismic Biology, Ecology, and Evolution 102, C104, 105, 106, 110, 111, C115, 117, C119, 120, 121, 122, 124 (only four units may be applied toward the major), 131 (only four units may be applied toward the major), C135, 146, M158, 164, M166, 167, 179, Physiological Science 142, C144, 147, M173.

Students who complete Psychology M117A-M117B-M117C receive equivalent credit for

course 115 and 10 units of upper division psychobiology electives.

Students must have a 2.0 grade-point average in all upper division courses selected to satisfy major requirements, and each must be taken for a letter grade.

Fieldwork and Research Opportunities

Many research and fieldwork opportunities are open to students who wish to expand their knowledge and broaden their background in the field of psychology. These experiences can be enriching and help bring undergraduates closer to understanding research and its applications in the everyday world. At least one of the following courses is recommended for students planning postgraduate study: Psychology 188A, 188B, 192, 193, 194A, 194B, 199, or the Student Research Program (SRP) through the College of Letters and Science. Information about these courses and programs is available from the Undergraduate Advising Office, 1531 Franz Hall.

Honors

Honors Courses

Each year the department offers a selection of honors courses, designated with an H suffix. The courses provide close contact with faculty members, emphasize readings in the original literature, student reports, and small group discussions, and may include field or research experience. All such courses offer credit toward the departmental honors program. Enrollment priority in honors courses is given to students in the departmental honors program. Consult the College of Letters and Science for information on requirements for College Honors.

Honors Program

Psychology, Cognitive Science, and Psychobiology majors intending to continue study at the graduate level are encouraged to apply for the departmental honors program. Students work for one year with a faculty sponsor on a research project that is the basis of a formal honors thesis. During that year they also participate in a weekly seminar (Psychology 190A-190B-190C) in which thesis projects are presented and discussed and other topics of interest are explored with invited faculty members and other guests. In addition, they must take at least two psychology honors courses selected from a list provided by the department, with a grade of B or better in each. Satisfactory completion of the program and the other requirements for the major leads to awarding of the degree with honors or highest honors. Consult the Undergraduate Advising Office early in the educational planning for further information and application forms.

Student Award for Research Training (START)

The Student Award for Research Training (START) represents a vital effort to identify and mentor underrepresented minority and/or low-income students. The purpose of START is to encourage such students to participate in research and pursue graduate studies leading to careers in academia. The recruitment and application process for START takes place each Fall Quarter. Most students selected to participate are awarded stipends for Winter and Spring Quarters, during which time they do research under the mentorship of a psychology faculty member. In addition, they are required to attend a weekly seminar in which presenters, including faculty members, address topics such as graduate school, careers in academia, and research in psychology. START provides students with the opportunity to work closely with faculty research sponsors, graduate students, and departmental counselors.

Developmental Disabilities Immersion Program and Concentration

The Developmental Disabilities Immersion Program (DDIP) is cosponsored by the Department of Psychology, the Department of Psychiatry and Biobehavioral Sciences, and the Office of Instructional Development — Center for Experiential Education and Service Learning (formerly Field Studies Development). Each year a group of 30 students is selected for the program which runs during Winter/Spring Quarters. Students participate in courses, fieldwork, and research at selected University and community facilities serving persons with developmental disabilities.

Required courses include Psychology/Psychiatry M180A, M180B, M181A-M181B. Students also take other courses related to developmental disabilities. Many of the courses fulfill Psychology undergraduate major requirements (consult the Undergraduate Advising Office for details). Student individualized research projects are also part of the immersion experience.

To earn a **concentration**, majors in Psychology, Cognitive Science, and Psychobiology must be accepted into the Developmental Disabilities Immersion Program. Information and applications are available from the Center for Experiential Education and Service Learning, 160 Powell Library. The following courses are required for the concentration: Psychology 127 (may also be applied as one of the three upper division electives required for the Psychology major), 130 or one course from 133A through 133I (also satisfies a core requirement for the Psychology major), M180A, M180B, M181A-M181B, 193 (two terms). With the exception of course 193, each course must be taken for a letter grade. Students in the department who complete the requirements receive a departmental certificate of completion at graduation; they must notify the department during the

term they plan to graduate to receive the certificate. The concentration does not appear on the diploma or transcript.

If a psychology major earns the DDIP concentration, upper division elective credit for Psychology M180A, M180B, M181A-M181B does not apply toward the major.

For more information, contact the Undergraduate Advising Office (1531 Franz Hall) or the Center for Experiential Education and Service Learning (160 Powell Library).

Computing Specialization

Majors in Psychology, Psychobiology, and Cognitive Science may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the specified major, (2) completing Program in Computing 10A, 10B, and at least one course from 10C, 15 (recommended), 30, 60, and (3) completing Psychology 85 and at least two courses from 121, 142H, 150, 151, 186A, 186B (one 199 course may be substituted for one of these courses provided project has been approved by vice chair). A grade of C or better is required in each course. Students graduate with a bachelor's degree in their major and a specialization in Computing. Students planning to enter this specialization should consult the Undergraduate Advising Office.

Applied Developmental Psychology Minor

The Applied Developmental Psychology minor is designed to (1) provide a coherent academic program with focus on issues central to improving the well-being of children and their families, (2) teach undergraduates how to apply theories, research methods, and research findings to practical concerns, and (3) prepare students to join or receive further training in various child-related professions.

The minor is open to all enrolled UCLA students (including Cognitive Science, Psychobiology, and Psychology majors) who have an overall grade-point average of 2.0 or better and have been accepted into an approved applied developmental psychology internship program. For further information about applying to the internship program, contact the director of the Infant Development Program, 1611 Franz Hall, (310) 825-2896. For questions about additional course requirements for the minor, contact a counselor in the Undergraduate Advising Office, 1531 Franz Hall, (310) 825-2730.

Required Lower Division Course (four units): Psychology 10.

Required Upper Division Courses (24 units): Psychology 133X and 133Y (to be taken concurrently with the two-term internship described below) and four additional courses, of which at least three must be upper division, from Education 91A through 91D, 125A, Linguistics C130, C135, Psychology 129F, 130, 131, 132, 133A through 133I, M176, 197 (content must be approved by the Undergraduate

Advising Office), 199 (content must be approved by the Undergraduate Advising Office), Sociology 136, M174. One of the four additional courses must include either Psychology 130, one course in the 133 series, or 197 (content must be approved by the Undergraduate Advising Office).

Internship Requirement: Students work as interns for two academic terms at an approved daycare center/school and enroll concurrently in Psychology 133X and 133Y. The internship provides hands-on experience working with young children as teacher's aids and opportunities for observing children. By completing an additional one-term internship (see the director of the Infant Development Program, 1611 Franz Hall, for details), students may meet many of the "Teacher Qualifications and Duties" outlined in Section 101316.2 under Title 22, Division 12, California Department of Social Services.

All minor courses, except for the internship courses, must be taken for a letter grade, with an overall grade-point average of 2.0 or better. No more than two courses may be applied toward both the students' majors and this minor. Successful completion of the minor is indicated on the transcript and diploma.

Cognitive Science Minor

The Cognitive Science minor is designed to introduce students to cognitive science topics as addressed in a number of different disciplines, such as biology, computer science, engineering, linguistics, mathematics, philosophy, and psychology, while allowing them to pursue a more in-depth study of cognitive science topics within specific areas of their own choice.

The minor consists of two parts. In the first part students complete background courses and satisfy a computer programming experience requirement. In the second part they select a primary cluster from four clusters of upper division courses that have been organized to reflect different aspects of cognitive science. Students take three courses within their primary cluster and two additional courses from the remaining clusters (secondary clusters).

The minor is open to all enrolled UCLA students, other than Cognitive Science majors, who have an overall grade-point average of 2.0 or better. Students must make an appointment with a counselor in the Undergraduate Advising Office, 1531 Franz Hall, (310) 825-2730, to enter the minor and receive counseling on how to select a primary cluster.

Required Courses (28 units): Psychology 85 and one course from 15, 100B, Computer Science 2, Linguistics 1, 20.

The computer programming experience requirement is satisfied by petition based on coursework (e.g., completion of Program in Computing 10A) or other relevant programming experience.

Students must also select (with approval of the Undergraduate Advising Office) and complete

one of the following four primary clusters: (1) *biological basis of cognition cluster* — three courses from Linguistics C135, Psychology 115, 116, M117C (or Molecular, Cell, and Developmental Biology M175C or Neuroscience M101C or Physiological Science M180C), M117K, 119B, 119F, M119L, M119N; (2) *computation and modeling cluster* — three courses from Biomathematics 108, Computer Science 161, 163, Psychology 150, 151, 186A, 186B (at least one course must be from Computer Science 161, Psychology 186A, 186B); (3) *human cognition cluster* — Psychology 121 and two courses from 112C, 120, 124A through 124F, 133B, 133BH, 133C, 133E; (4) *mind and language cluster* — three courses from Linguistics 120A, 120B, 125, C130, C132, C135, C185A, Philosophy 124, 125, 126, 127A, 127B, 129, 170, 172, Psychology 122, 123, 124A.

Students must also fulfill a secondary cluster requirement of two additional courses from one or more of the clusters not selected as the primary cluster.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. No more than two courses may be applied toward both the students' majors and this minor. Successful completion of the minor is indicated on the transcript and diploma.

Infant Development Program

The Infant Development Program is designed as a teaching and research facility for the department and is set up to accommodate both cross-sectional and longitudinal investigation of infants, toddlers, and their parents. In addition, the program provides an opportunity for students in developmental psychology and other areas to acquire firsthand experience working with infants and toddlers through a two- or three-term sequence of Psychology 133X, 133Y, and 193. The program is located in Franz Hall and provides child care for about 15 infants ranging in age from three months to three years.

Clinic for the Behavioral Treatment of Children

The Clinic for the Behavioral Treatment of Children carries out diagnosis, treatment, and research on children with severe psychological problems, such as children with autism and those with severe developmental disorders. The treatment philosophy is largely behavioral/educational, with emphasis on language acquisition, peer and school integration, and parent training. Students are taught behavioral treatment procedures and work in an apprenticeship relation to senior staff. Prior research has focused on variables controlling self-destructive behavior, perceptual deficits, language acquisition, and emotional/social attachments. The clinic serves as a teaching and research environment for both graduate and undergraduate students.

Psychology Clinic

The Psychology Clinic in the Department of Psychology is a major training center for clinical psychology students in the Ph.D. program. It provides a broad range of psychological services to children and adults, including assessment and individual, couples, family, and group therapy. Clients cover the entire age range and represent diverse populations in the community.

Student therapists receive very close supervision and are encouraged to relate their case material to academic learning and current research. Students and faculty members are also involved in a variety of research projects through the clinic.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

Admission

The Department of Psychology does not admit candidates for the Master of Arts degree in Psychology only, although students may be awarded the M.A. en route to the Ph.D.

Areas of Study

Consult the department.

Course Requirements

Requirements for the M.A. are nine graduate courses (36 units), including Psychology 250A, 250B, 251A-251B (research project must be completed), and at least three of the four required core courses (refer to the section on doctoral course requirements for further details). One 596 course (four units) may be applied as an elective. Courses in the 400 series may not be applied. All undergraduate deficiencies must be cleared before the M.A. is awarded.

Comprehensive Examination Plan

Consult the department.

Thesis Plan

None.

Doctoral Degree

Admission

A departmental brochure describing the graduate program in psychology is available from the department.

Admission to the program leading to the Ph.D. degree in Psychology normally requires an undergraduate degree in psychology. However,

students from other areas (particularly the mathematical, physical, biological, and social sciences) may be admitted. Admission is for Fall Quarter only and on a full-time basis only. Applicants should mail the following documents directly to the Psychology Department by December 15 for clinical area applicants and January 2 for applicants to other areas to be considered for admission the following Fall Quarter.

(1) The University's *Application for Graduate Admission*, available in 3453 Franz Hall.

(2) Three letters of recommendation.

(3) One official transcript from each college attended.

(4) Scores from the Graduate Record Examination (GRE) General Test and the Subject Test in Psychology (taken within the last three years).

(5) The Test of English as a Foreign Language (TOEFL), required of all international applicants whose native language is not English.

Interviews (in person or by phone) are required for clinical area finalists.

Students entering the graduate program must demonstrate adequate breadth of preparation in psychology and related disciplines. Students are expected to have taken courses equivalent to the following: (1) Psychology 100A; (2) two courses selected from Psychology 110, 115, and 120; and (3) two courses selected from Psychology 127, 130, 135. In addition, it is recommended that students have the following college-level coursework: one course in biology or zoology, one course in mathematics (such as calculus), and two courses in the physical sciences (physics and/or chemistry). A course in anthropology, philosophy, or sociology may be substituted for one of the physical sciences courses. The recommended courses may be waived by the student's adviser.

Students who have completed any of the undergraduate majors offered by the UCLA Department of Psychology have satisfied the undergraduate preparation requirements. Students who have not had training in the areas cited above may either take the missing courses or have their area evaluate their preparation and, in consultation with the student, plan a program of study that provides the appropriate breadth.

The individual program may include undergraduate coursework, graduate coursework, readings followed by an examination, or some combination of these. Emphasis is on breadth and preparation, both within and outside the Department of Psychology. The plan should include a firm date of completion and requires approval of the graduate affairs committee. Continuation in the Ph.D. program is contingent on satisfactorily clearing undergraduate deficiencies by the end of the fourth quarter in residence.

Major Fields or Subdisciplines

Students are required to obtain a thorough background in research methodology and psy-

chological theory. Major specialized training is available in the following areas of psychology: behavioral neuroscience, clinical, cognitive, cognitive neuroscience, developmental, learning and behavior, measurement and psychometrics, or social psychology. Students admitted in either the behavioral neuroscience or cognitive areas may take the program in cognitive neuroscience. The course requirements serve as a combined major and minor. Students who select this option remain in their area of admission for administrative purposes.

Course Requirements

General Core Requirements

All students, regardless of area, must fulfill the requirements listed below. A course may not be used to fulfill requirements in more than one major or minor area unless no other course options are designated. The core program includes four courses, plus Psychology 250A, 250B, 251A-251B (and 251C, if an additional quarter is needed to complete the course). Courses 250A and 250B must be completed in the first two quarters; 251A-251B-251C must be completed by the end of the fourth quarter. The additional four core courses must be completed within the first six quarters in residence. If the core courses have not been completed by the end of the fifth quarter, the balance of courses must be completed during the sixth quarter, even if the preferred courses are not offered at that time.

By the end of the second year, students must complete at least one individual research course (596) and at least three second-year graduate courses, including one quantitative course from Psychology 252A, 252B, 253, 254A, 254B, 255, M256, M257, 258, 259, 287.

During the third year, students must enroll in a minimum of three graduate-level courses, plus one quarter of course 596. At least one quarter of 596 or 599 should be taken during the fourth year and each remaining year in the graduate program.

Major Area Course Requirements

Each area requires certain courses of students majoring in that area. Requirements are as follows:

Behavioral Neuroscience. Neuroscience M201 and either option 1 — Neuroscience M202 and M204 or option 2 — Psychology M117A. Students interested in molecular biology generally take option 1 and minor in neuroscience. In addition, all majors take eight units from the Psychology 205 series, three quarters of Psychology 212, and two approved behavioral neuroscience seminars.

Clinical. Psychology 270A-270B-270C, 271A-271B-271C, 277A, and two advanced clinical courses from Psychology 272A through 298. All 298 courses must be first approved by the clinical area. At least one of the advanced courses must be numbered above 272A.

Practicum and Internship Requirements for Clinical Students.

(1) At least 400 hours of approved supervised preinternship practicum (Psychology 401) are required, of which 150 hours must involve direct clinical service and 75 hours must be formal schedule supervision. These hours are usually completed during the second through fourth years.

(2) The equivalent of one-year of full-time supervised internship (Psychology 451) in an acceptable setting approved by the faculty, is required. This is usually taken in the fourth or fifth year. Contact the department for further information on internship requirements.

In cases in which graduate students have (1) completed all academic requirements, (2) passed the final oral examination, (3) received doctoral committee approval to file the dissertation, (4) provided evidence of satisfactory completion of at least nine months of an internship approved by the faculty, and (5) obtained approval from the clinical area chair, students may petition to file the dissertation and be awarded the Ph.D. degree with the clear understanding that the remaining months of internship that are required by the American Psychological Association will be completed as outlined in the internship contract. Such petitions are considered to be exceptions rather than the rule. Documentation of subsequent internship completion is provided by the director of clinical training.

Cognitive. Psychology 260A-260B plus four courses, including at least two from Psychology 259, 261 through 266, and at least one from Psychology 268A through 268E or 269.

Cognitive Neuroscience. The following course requirements satisfy both major and minor area requirements: Neuroscience M201, Psychology M117A or Neuroscience M202, Psychology 212, Psychology 260A, 260B, eight units of Psychology 205, Psychology 207A, 207B, or 207C. Four additional courses are required in the cognitive area, which must include at least one core course and one seminar.

Developmental. Psychology 240A-240B; two courses from Psychology 242A through 242F, 243B, 244, 299.

Learning and Behavior. Psychology 200A, 200B, plus two courses from 204B through 204E, 210, 290, 293.

Measurement and Psychometrics. Five courses from Psychology 249, 252A, 252B, 253, 254A, 254B, 255, M256, M257, 258.

Social. Psychology 220A, 220B, and three social seminars taught by three different faculty members. In addition, Psychology 226A is required in the first year, and 226B-226C are required in the first, second, and third years of the program.

Minor Area Course Requirements

Students must select one minor area. Students may minor in any of the areas listed under Major Fields or Subdisciplines, with the exception of clinical, as well as in health psychology or political psychology. Students may petition for

individualized minors or a minor in experimental psychopathology. Training is also available in community psychology.

Courses taken to satisfy a student's minor area requirements cannot be chosen from among those that could satisfy the major area requirements. The minor is normally satisfied by taking three to four specified courses as indicated below. Other options are also available; see departmental bulletins for further details. The following is standardized departmental coursework for minors.

Behavioral Neuroscience. Four units from the Psychology 205 series, plus two of the following: four additional units from Psychology 205A through M205Z, 207A, 207B, 207C, or 291. In addition, students may select Neuroscience M201 and M205.

Cognitive. Three of the following courses, two of which must be from Psychology 259 through 266: Psychology 259, 261, 262, 263, 265, 266, 268A through 268E, 269.

Developmental. Psychology 240A or 240B, plus two courses from Psychology 242A through 242F, 243A, 243B, 244, M246, 299.

Experimental Psychopathology. Four courses petitioned and approved by the clinical area.

Health Psychology/Behavioral Medicine. Psychology 227 and two quarters of 425, plus two courses selected from Psychology 222B, four units of 205 or 225, and 298 seminars on relevant topics approved by the health psychology faculty and the Graduate Affairs Committee.

Learning and Behavior. (1) Comparative option — Psychology 210, plus two of the following: Organismic Biology, Ecology, and Evolution 120, C219, 274, Psychology 204E, Anthropology 128A, 128B; (2) learning option — Psychology 200A, 200B, plus one course from Psychology 204B through 204F and 293.

Measurement and Psychometrics. Three courses from Psychology 249, 252A, 252B, 253, 254A, 254B, 255, M256, M257, 258.

Political Psychology. See departmental bulletin for details.

Social. Psychology 220A and 220B, or 220A and 220C, plus one course from Psychology 221, 222A, 222B, 223, 225, 227, M228A, M228B, 231, M239.

Written and Oral Qualifying Examination

The qualifying examination generally consists of three separate sections. The first is an examination administered by the major area, which examines in breadth the student's knowledge of the major field. The second section is an individualized examination which examines in depth the student's knowledge of the area of specialization within the major field. The third section is the University Oral Qualifying Examination. All Ph.D. requirements listed above must be completed before the oral qualifying examination can be taken.

Contact the department for the specific examination requirements of the various areas of specialization.

Psychology

Lower Division Courses

10. Introductory Psychology. (4) Lecture, four hours. General introduction including topics in cognitive, experimental, personality, developmental, social, and clinical psychology; six hours of psychological research. P/NP or letter grading.

15. Introductory Psychobiology. (4) Lecture, three hours. Designed for nonmajors. Survey of genetic, evolutionary, physiological, pharmacological, and experiential factors affecting behavior. Using comparative approach where appropriate, emphasis on relevance of biological mechanisms to understanding of humans and their interaction with their environment.

85. Introduction to Cognitive Science. (4) Lecture, three hours. Exploration of computer metaphor of mind as an information-processing system, focusing especially on perception, knowledge representation, and thought based on research in cognitive psychology, neuropsychology, and artificial intelligence. Many examples from visual information processing.

88A-88Z. Lower Division Seminars. (4 each) Seminar, three hours. Enforced requisite: course 10. Limited to freshmen/sophomores. Intensive analysis in seminar situations of selected topics of current psychological interest. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit.

88A. Stress, Adaptation, and Coping. Limited to freshmen. Physiological and psychological processes related to stresses and strains of daily living and potential relation of these processes to disease states. Examination of multifaceted nature of coping with stressors and exploration of strategies for stress management. P/NP or letter grading.

97. Variable Topics in Psychology. (4) Lecture, three hours. Enforced requisite: course 10. Study of selected topics in psychology at introductory level; lecture format designed for freshmen/sophomores. P/NP or letter grading.

Upper Division Courses

100A. Psychological Statistics. (4) (Formerly numbered 41.) Lecture, three hours; laboratory, two hours. Requisites: course 10, and one course from Computer Science 2, Mathematics 2, Program in Computing 10A, Statistics 10, or one term of calculus. Designed for premajors. Basic statistical procedures and their application to research and practice in various areas of psychology. P/NP or letter grading.

100B. Research Methods in Psychology. (6) (Formerly numbered 42.) Lecture, two hours; laboratory, four hours. Enforced requisites: courses 10, 100A (C- or better for prepsychology and psychobiology, C or better for precognitive science). Introduction to research methods and critical analysis in psychology. Lecture and laboratory topics include experimental and nonexperimental research methods, statistical design and analysis as applied to a broad range of basic and applied research issues. P/NP or letter grading.

M107. Asian American Personality and Mental Health. (4) (Same as Asian American Studies M117.) Lecture, three hours. Requisite: course 10. Foundations of personality development and mental health among Asian Americans. Topics include culture, family patterns, achievements, stressors, resources, and immigrant and minority group status. P/NP or letter grading.

110. Fundamentals of Learning. (4) Lecture, three hours; discussion, one hour. Requisites: courses 10, 100A. Designed for juniors/seniors. Experimental findings on animal and human conditioning; retention and transfer of training; relation of learning and motivation. Intended to provide empirical basis for theory and research in this area. P/NP or letter grading.

111. Learning Laboratory. (4) Lecture, two hours; laboratory, three hours. Requisites: courses 100A, 100B, 110. Designed for departmental majors. Laboratory experience with techniques in study of learning, especially with animals. Letter grading.

112A. Basic Processes of Motivated Behavior. (4) Lecture, 90 minutes; discussion, 90 minutes. Requisites: courses 10, 100A, 110. Designed for juniors/seniors. Examination of some basic processes underlying motivated behavior, stressing environmental determinants of behaviors such as feeding, drinking, and reproduction-related behavior. Discussion of physiological mechanisms that contribute to such behaviors. Consideration of topics such as reinforcement, acquired motivation, and drug addiction. Evaluation of evidence obtained in laboratory studies conducted with animals. P/NP or letter grading.

112B. Psychobiology of Fear and Anxiety. (4) Lecture, three hours; outside study, nine hours. Requisites: courses 10, 100A, 110. Recommended: course 115. Designed for juniors/seniors. Presentation of biological and behavioral approaches to fear and anxiety, taken from laboratory and applied research. In addition to overview of major principles from each approach, emphasis on areas in which significant research advances have recently occurred. Examination of concordance and discordance between results from laboratory and applied research. P/NP or letter grading.

112C. Principles of Skill Acquisition. (4) Lecture, three hours. Requisite: course 110 or 120 (recommended). Designed for Psychology majors. Investigation into principles of human skill learning, with focus on general principles of skill learning derived from laboratory settings. These principles have relevance to various industrial or occupational settings, musical performances, vehicle control, sport, and other activities in which complex perceptual-motor skills must be acquired with practice. Major topics include laboratory measurement procedures, effective structure of practice settings, feedback and knowledge of results, learning of automaticity, individual differences, and evaluation of various theories of skill learning.

113. Behavior and Alcohol Laboratory. (4) Discussion, two hours; laboratory, four hours. Requisites: courses 10, 100A, 100B. Students conduct an experiment studying effects of alcohol on learning and complex processes using paid volunteers. Examination of set and setting and role of individual differences in relation to current theories of alcohol use and abuse. P/NP or letter grading.

113H. Behavior and Alcohol Laboratory (Honors). (4) Discussion, two hours; laboratory, four hours. Requisites: courses 10, 100A, 100B. Honors course parallel to course 113. P/NP or letter grading.

114. Alcoholism. (4) Designed for juniors/seniors. Theories and research on impact, causes, characteristics, and treatment of alcoholism considered from a biobehavioral point of view.

115. Principles of Behavioral Neuroscience. (4) Lecture, three hours; discussion, one hour. Requisites for majors: course 100A, Organismic Biology 2; for nonmajors: Life Sciences 1, 2, 3. Designed for juniors/seniors. Nervous system anatomy, physiology, pharmacology, and their relationship to behavior. P/NP or letter grading.

116. Behavioral Neuroscience Laboratory. (4) Lecture, one hour; laboratory, three hours. Requisites: courses 100A, 100B, 115 (may be taken concurrently). Designed for psychobiology and psychology majors. Laboratory experience with various topics in behavioral neuroscience. P/NP or letter grading.

M117A-M117B-M117C. Neuroscience: From Molecules to Mind. (5-5-5) (Same as Molecular, Cell, and Developmental Biology M175A-M175B-M175C, Neuroscience M101A-M101B-M101C, and Physiological Science M180A-M180B-M180C.) Lecture, four hours; discussion, one hour. P/NP or letter grading:

M117A. Cellular and Systems Neuroscience. (5) Lecture, four hours; discussion, one hour. Requisites: Chemistry 14C or 30 or former course 10D (14C may be taken concurrently), Life Sciences 2, Physics 1B or 6C. Not open for credit to students with credit for Physiological Science 111A. Cellular neurophysiology, membrane potential, action potentials, and synaptic transmission. Sensory systems and motor system; how assemblies of neurons process complex information and control movement. P/NP or letter grading.

M117B. Molecular and Developmental Neuroscience. (5) Lecture, four hours; discussion, one hour. Requisites: course 115 or M117A (or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A or Physiological Science M180A) or Physiological Science 111A, Life Sciences 3, 4. Molecular biology of channels and receptors: focus on voltage dependent channels and neurotransmitter receptors. Molecular biology of supramolecular mechanisms: synaptic transmission, axonal transport, cytoskeleton, and muscle. Classical experiments and modern molecular approaches in developmental neurobiology. P/NP or letter grading.

M117C. Behavioral and Cognitive Neuroscience. (5) Lecture, four hours; discussion, one hour. Requisite: course 115 or M117B (or Molecular, Cell, and Developmental Biology M175B or Neuroscience M101B or Physiological Science M180B) or Physiological Science 111A. Neural mechanisms underlying motivation, learning, and cognition. P/NP or letter grading.

M117J. Biological Bases of Psychiatric Disorders. (4) (Same as Molecular, Cell, and Developmental Biology M191, Neuroscience M130, Physiological Science M181, and Psychiatry M191.) Lecture, three hours. Requisite: course 115 or M117A (or Molecular, Cell, and Developmental Biology M175A or Neuroscience M101A or Physiological Science M180A) or Physiological Science 111A. Underlying brain systems involved in psychiatric syndromes and neurological disorders, including schizophrenia, depression, bipolar disorders, obsessive/compulsive disorder, eating disorders. Provides basic understanding of brain dysfunctions that contribute to disorders and rationales for pharmacological treatments.

M117K. Introduction to Functional Anatomy of Central Nervous System. (4) (Same as Neuroscience M102.) Lecture, two hours; laboratory, two hours. Requisite: Life Sciences 2. Not open to freshmen. Overview of human nervous system; relation of behavior to higher cognitive function. Development of primate and human brain during past few million years; evolutionary aspects of neuroanatomical structures and effects of behavior and cultural attitudes of modern man. P/NP or letter grading.

118. Comparative Psychobiology. (4) Requisite: course 115. Designed for junior/senior majors. Survey of determinants of species-specific behavior, including genetic influences and learning.

119A. Neuropsychopharmacology. (4) Lecture, three hours. Requisite: course 115. Designed for juniors/seniors. Analysis of basic pharmacologic principles to include interaction of drugs with neurochemically significant substances in the brain.

119AH. Neuropsychopharmacology (Honors). (4) Lecture, three hours; discussion, one hour. Honors course parallel to course 119A.

119B. Human Neurophysiology. (4) Lecture, three hours. Requisite: course 115. Designed for juniors/seniors. Exploration of biological basis of human cognitive processing, with emphasis on function of cerebral cortex.

119D. Behavioral Pharmacology. (4) Requisite: course 115. Designed for juniors/seniors. Experimental and theoretical treatment of drug-behavior relationships. Particular emphasis on behavior and pharmacological mechanisms of drug action and interaction with neuronal function.

119DH. Behavioral Pharmacology (Honors). (4) Lecture, three hours; discussion, one hour. Experimental and theoretical treatment of drug-behavior relationships; pharmacological approaches to mood, aggression, learning, motivation; experimental studies of addiction.

119E. Stress and Bodily Disease. (4) Lecture, three hours. Requisite: course 115. Designed for juniors/seniors. Psychobiological processes as they pertain to development of stress responses and disease states. Consideration of stress-related topics, including behavioral and pharmacological variables in stress and stress management.

119F. Neuron Circuitry and Behavior. (4) Requisites: course 115, Molecular, Cell, and Developmental Biology 171. Designed for juniors/seniors. Presentation of current data and theory concerning how neuron circuits produce behavior. Mechanisms of perception, response selection, motor pattern generation, learning, and motivation, with emphasis on operation of these processes in well-defined neural circuits.

119G. Psychobiology of Pain and Pain Inhibition. (4) Lecture, three hours. Requisite: course 115. Designed for seniors. Lectures and discussions on neural mechanisms of pain and problem of chronic pain disease.

119I. Psychophysiology of Motivation. (4) Lecture, three hours. Requisite: course 115. Designed for juniors/seniors. Basic psychophysiology, including brain and endocrine mechanisms, involved in control of motivation. Discussion of homeostatic drives such as hunger and thirst and nonhomeostatic drives such as reproduction behavior.

119J. Ethology: Behavior and Learning. (4) (Formerly numbered M119J.) Lecture, three hours. Requisite: course 115. Designed for juniors/seniors. Basic course for undergraduate students which integrates systematic overview of common forms of behavioral plasticity and standard training procedures in laboratory animals (in behavioral, neurophysiological, and pharmacological studies) with broad biological, evolutionary perspective. P/NP or letter grading.

M119L. Human Neuropsychology. (4) (Formerly numbered 119L.) (Same as Neuroscience M119L.) Lecture, three hours. Requisites: courses 115 (or M117A and M117C), 120. Designed for juniors/seniors. Survey of experimental and clinical human neuropsychology; neural basis of higher cognitive functions. P/NP or letter grading.

119M. Physiological Psychology of Learning. (4) Lecture, 90 minutes; discussion, 90 minutes. Requisite: course 115. Designed for juniors/seniors. Introduction to classical and current literature on mechanisms of learning, considering both cell-biological mechanisms and brain circuitry.

M119N. The Visual System. (4) (Formerly numbered 119N.) (Same as Neuroscience M119N.) Lecture, three hours. Requisite: course 115 or Molecular, Cell, and Developmental Biology 171 or Neuroscience M101A or Physiological Science 111A. The ability to image and analyze the visual world is a truly remarkable feat. Coverage of anatomy and physiology of visual processing from the retina to visual cortex through lectures, extensive reading, and discussions.

M119O. Psychology of Aging. (4) (Same as Gerontology M119O.) Requisite: course 115. Designed for juniors/seniors. Aging refers to developmental changes occurring at end stages of life. Some alterations that occur represent improvement, others are detrimental. Examination of impact of aging process on mental phenomena and exploration of ways in which positive changes can be maximally utilized and impact of detrimental alterations minimized. P/NP or letter grading.

120. Cognitive Psychology. (4) Lecture, three hours; discussion, one hour. Requisites: courses 10, 100A. Designed for juniors/seniors. Survey of cognitive psychology: how people acquire, represent, transform, and use verbal and nonverbal information. Perception, attention, imagery, memory, representation of knowledge, language, action, decision making, thinking. P/NP or letter grading.

121. Laboratory in Cognitive Psychology. (4) Laboratory, four hours. Requisites: courses 10, 100A, 100B, 120 (may be taken concurrently). Designed for Psychology and Cognitive Science majors. Laboratory experience with methods and phenomena from research on human perception, memory, and cognition. P/NP or letter grading.

122. Language and Communication. (4) Lecture, three hours. Requisite: course 10. Introduction to psychology of language and communication; verbal and nonverbal channels; interlinguistic and intralinguistic variation; animal communication; biological bases of language; production and comprehension of speech and writing; relation to perception, memory, and thought; conversational interaction; language development.

123. Psycholinguistics. (4) Designed for juniors/seniors. Current theory and research in psycholinguistics: survey of language acquisition, language perception, and language production; language physiology and pathology; problems of representation, sequencing, and timing in language and other cognitive skills; errors in speech production and perception.

124A. Sensation and Perception. (4) Lecture, three hours. Requisites: courses 10, 100A, 120. Designed for juniors/seniors. Contemporary research and theory about visual and auditory perception. Topics include physiological mechanisms, psychophysical studies and models, and computational approaches. P/NP or letter grading.

124AH. Sensation and Perception (Honors). (4) Lecture, three hours; discussion, one hour. Honors course parallel to course 124A.

124B. Visual Information Processing. (4) Lecture, two hours; discussion, one hour. Requisites: courses 10, 100A, 120. Exploration of issues in visual information, such as storage and representation of visual information in memory, pattern recognition, nature and role of attention in visual processing, word and picture recognition, object perception, and imagery. Possible consideration of developmental aspects. P/NP or letter grading.

124C. Human Memory. (4) Lecture, two hours; discussion, one hour. Requisite: course 120. Designed for juniors/seniors. Analysis of recent research on basic processes and structural components that comprise the human memory system. Discussion topics include practical implications of such research for instruction, marketing, and witness testimony.

124D. Principles of Human Performance. (4) Designed for Psychology majors. Investigation into laboratory-based methods and principles of human performance. Major topics include research methods for human performance, central control of movements, anticipation and timing, automaticity, sensory involvement in action such as vision and kinesthesia, role of reflexes, speed-accuracy trade-offs, and individual differences and abilities. Principles discussed should have relevance for numerous real-world situations in which complex perceptual-motor skills are required, such as in industrial or occupational settings, musical performances, vehicle control, and sport.

124E. Language and Cognition. (4) Lecture, three hours; outside study, nine hours. Requisites: courses 10, 120. Designed for juniors/seniors. Recent theories of language and cognition; nature of categories, feedback, and error detection in language and cognition; modularity; ambiguity; knowledge acquisition; processes and representations underlying perception, production, attention, and awareness in language and cognition.

124F. Thinking. (4) Lecture, three hours. Requisite: course 120. Analysis of experimental studies of human categorization, reasonings, decision making, problem solving, creativity, and related topics.

124FH. Thinking (Honors). (4) Lecture, three hours. Honors course parallel to course 124F. P/NP or letter grading.

124G. Cognitive Aging. (4) Lecture, 90 minutes; discussion, 90 minutes. Requisites: courses 10, 41, 120. Designed for juniors/seniors. Recent facts and theories on relations between normal aging and cognition, including perception, language comprehension, learning, memory, thinking, inhibitory processes in attention, sequential processes in action, general slowing phenomenon, and related neuropsychological issues. P/NP or letter grading.

127. Abnormal Psychology. (4) Lecture, three hours. Requisite: course 10. Study of dynamics and prevention of abnormal behavior, including neuroses, psychoses, character disorders, psychosomatic reactions, and other abnormal personality patterns.

127H. Abnormal Psychology (Honors). (4) Lecture, three hours. Overview of characteristics of major forms of psychopathology, theories and research on causes of disorder, types of treatment, social and legal issues in mental illness.

129A. Personality Measurement. (4) Lecture, three hours. Requisites: courses 10, 100A. Rationale, methods, and content of studies dealing with problems of describing persons in terms of a limited set of dimensions. Detailed consideration of research literature dealing with a few representative personality dimensions. P/NP or letter grading.

129B. Introduction to Psychoanalysis. (4) Lecture, three hours. Requisites: courses 10, 100A. Development of Freud's ideas from 1895 to 1926, with emphasis on how his theory evolved from a drive-based reinforcement model to the structural theory in which unconscious fantasy plays a crucial role. Coverage of developments beyond Freud, especially work of the British school under leadership of Klein, Winnicott, and Bim. P/NP or letter grading.

129C. Culture and Mental Health. (4) Lecture, two hours; discussion, one hour; outside study, nine hours. Requisites: courses 10, 100A. Introduction to study of culture and human behavior in general, and culture and mental health in particular. Emphasis on cultural groups that comprise major U.S. ethnic groups (i.e., African Americans, Latinos/Chicanos, Asian Americans, and American Indians). P/NP or letter grading.

129D. Personality. (4) Lecture, three hours. Requisite: course 10. Survey of major topics in field of personality, including personality theory, personality assessment, and physiological, behavioral, and cultural role of perception, learning, and motivation in personality.

129E. Human Sexuality. (4) Lecture, three hours. Designed for senior Psychology majors. Overview of psychology of human sexuality. Psychological research, assessment, and therapy described in a format which highlights their significance for understanding human sexual functioning. Psychological mechanisms underlying expression of human sexuality.

129F. Clinical Psychology of Childhood and Adolescence. (4) Lecture, two hours; discussion, one hour. Requisite: course 127. Survey of child and adolescent psychopathology and psychotherapy from a developmental perspective. Coverage includes such conditions as anxiety disorders, depression, conduct and attention problems, eating disorders, and autism, with information on prevalence, causes, common treatments and their effects. P/NP or letter grading.

130. Developmental Psychology. (4) Lecture, three hours; discussion, one hour. Requisites: courses 10, 100A. Designed for juniors/seniors. Elaboration of developmental aspects of physical, mental, social, and emotional growth from birth to adolescence. P/NP or letter grading.

131. Research in Developmental Psychology. (4) Discussion, one hour; laboratory, three hours; outside study, eight hours. Requisites: courses 10, 100A, 100B, and 130 or one course from 133A through 133I. Designed for Psychology and Cognitive Science majors. Forms of scientific writing; ethics of research, especially with minors; special advantages and problems of asking developmental research questions; relevant methodologies for experimental and observational work; data analyses and data presentation options. Letter grading.

132. Learning Disabilities in Perspective. (4) Lecture, three hours. Designed for juniors/seniors. Exploration of different orientations to persons with learning problems, emphasizing assessment and intervention approaches and psychological impact of such approaches. Topics include interaction of learner and environment, sociopolitical nature of classroom, psychological impact of schooling, grades, and evaluations, process vs. goal focus in learning.

133A. Adolescent Development. (4) Lecture, three hours. Requisites: courses 10, 100A. Examination of cognitive, social, physical, and physiological development of the adolescent. P/NP or letter grading.

133B. Cognitive Development. (4) Lecture, three hours. Requisites: courses 10, 100A. Major theories, approaches, and issues in study of cognitive development. Readings include original research on important topics such as development of perception, language, thinking, and problem solving, and acquisition of concepts and domain-specific language. P/NP or letter grading.

133BH. Seminar: Cognitive Development (Honors). (4) Seminar, three hours. Honors course parallel to course 133B.

133C. Language Development. (4) Lecture, three hours. Requisites: courses 10, 100A. Application of principles of cognitive development, learning, and perception to study of language development. Topics include first and second language acquisition (sounds, meanings, grammatical structures), learning mechanisms, communication skills, and relation between language and thought in children. P/NP or letter grading.

133D. Social and Personality Development. (4) Lecture, three hours. Requisites: courses 10, 100A. Theory and research on social and personality development during childhood. Topics include parent/child attachment, temperament, self-control, aggression, sex-typing, self-concept, moral reasoning and behavior, social status and social skills, and peer group relations. P/NP or letter grading.

133E. Perceptual Development. (4) Lecture, three hours. Requisites: courses 10, 100A. Topics include origins and development of human perceptual abilities, origins of knowledge about functionally important aspects of the environment, ecological and computational issues in perception, research and theory about initial perceptual capacities, and some sensory foundations. P/NP or letter grading.

133F. Psychology and Education. (4) (Formerly numbered 134.) Lecture, three hours. Requisites: courses 10, 100A. Application of principles of cognitive development, learning, and perception to educational problems. Topics include general instructional issues, psychology of reading and mathematics, exceptional children, early childhood education, and education of the disadvantaged. P/NP or letter grading.

133G. Culture and Human Development. (4) Lecture, three hours. Requisites: courses 10, 100A. Role of culture in human development through psychology, anthropology, and autobiography. Students relate material from lectures and readings, through empirical research projects, to diverse cultural backgrounds in class, at UCLA, and in the broader community. P/NP or letter grading.

133I. Applied Developmental Psychology. (4) Lecture, three hours. Requisites: courses 10, 100A. Application of developmental psychology to issues pertaining to improving well-being of children and their families. Topics include quality of child care, patterns and ranges of normal child behaviors, developmental disabilities, safety, legal, and public policy issues, child-rearing practices. P/NP or letter grading.

133X. Applied Developmental Psychology. (4) Lecture, 90 minutes; discussion, 90 minutes. Requisite: course 10. Designed for Applied Developmental Psychology minors. Issues on improving well-being of children and their families, relating research literature to ongoing fieldwork experiences through lectures and discussion, conducting and writing up assessment and observation of children, and designing day-care curricula. P/NP grading.

133Y. Advanced Applied Developmental Psychology. (4) Lecture, 90 minutes; discussion, 90 minutes. Requisites: courses 10, 133X. Designed for Applied Developmental Psychology minors. Advanced issues on improving well-being of children and their families, relating research literature to ongoing fieldwork experiences through lectures and discussion, conducting and writing up assessment and observation of children, and designing daycare curricula. P/NP or letter grading.

135. Social Psychology. (4) Lecture, three hours; discussion, one hour. Requisites: courses 10, 100A. Designed for juniors/seniors. Interrelationships between the individual and his social environment. Social influences on motivation, perception, and behavior. Development and change of attitudes and opinions. Psychological analysis of small groups, social stratification, and mass phenomena. P/NP or letter grading.

136A. Social Psychology Laboratory. (4) Lecture, one hour; laboratory, four hours. Requisites: courses 100A, 100B, 135 (may be taken concurrently). Designed for Psychology majors. Introduction to research designs and methods used to test social psychological hypothesis, including experiments, observation, content analysis, and/or questionnaires. P/NP or letter grading.

136B. Nonexperimental Methods in Social Psychology. (4) Lecture, two hours; laboratory, two hours. Requisites: courses 100A, 100B. Designed for Psychology majors. Research experience with nonexperimental methods for study of social attitudes or behavior, including fieldwork with survey research, naturalistic observation, or questionnaires. P/NP or letter grading.

136C. Survey Methods in Psychology. (4) Lecture, two hours; laboratory, three hours. Requisites: courses 100A, 100B. Designed for Psychology majors. Survey research in psychology, with particular emphasis on surveys of social and political attitudes. Actual experience in systematic survey research such as that done by media polling agencies, market research companies, and academic survey research centers. Topics include survey design, sampling, interviewing techniques, response rates, questionnaire design, data coding, and analysis. Training in telephone interviewing techniques in laboratories. P/NP or letter grading.

137A. Sport Psychology. (4) Lecture, three hours. Designed for junior/senior Psychology majors. Introduction to field of sport psychology. Coverage of research and applied aspects of a range of topics, including youth sport participants as well as world-class performers.

137AH. Sport Psychology (Honors). (4) Lecture, three hours; discussion, one hour. Honors course parallel to course 137A.

137B. Attitude Formation and Change. (4) Lecture, three hours. Requisites: courses 10, 100A, 135. Structure and functions of attitudes, their measurement, how they develop, and methods for changing them. P/NP or letter grading.

137C. Close Relationships. (4) Lecture, three hours. Requisites: courses 10, 100A, 135. Examination of research and theory about friendship, dating, and marriage, with emphasis on how these relationships are affected by gender and changing sex roles. P/NP or letter grading.

137D. Introduction to Health Psychology. (4) Requisite: course 10. Areas of health, illness, treatment, and delivery of treatment that can be elucidated by understanding of psychological concepts and research, psychological perspective on these problems, and how psychological perspective might be enlarged and extended in the medical area.

M137E. Work Behavior of Women and Men. (4) (Same as Women's Studies M137E.) Requisite: course 10 or Women's Studies 10. Designed for seniors. Examination of work behavior of women and men. Topics include antecedents of career choice, job findings, leadership, performance evaluation, discrimination and evaluation bias, job satisfaction, and interdependence of work and family roles.

137F. Introduction to Sport Psychology. (4) Lecture, three hours. Designed for juniors/seniors. Survey of topics in sport psychology, including leadership and team dynamics, moral development and aggression, personality, motivation, fan behavior, and performance enhancement. Consideration of youth sport through world-class athletics. P/NP or letter grading.

137I. Interpersonal Influence and Social Power. (4) Lecture, three hours. Requisite: course 135. Theory and research focusing on how people influence one another and resist such influence, and on the bases of social power. Motivations and effects of influence for the powerholder and target of influence. Applications to such problems and issues as power and leadership in organizations, interpersonal influence and health, power relationships in the family, interpersonal influence in everyday life, social power of political figures.

M137J. Psychology of Language and Gender. (4) (Same as Communication Studies M124 and Women's Studies M137J.) Lecture, three hours. Requisite: course 10. Designed for juniors/seniors. Examination of current topics at intersection of gender and language. Topics include sex differentiation in language cross-culturally; sex bias in lexicon and usage; sex differences in lexicon, syntax, phonology, and nonverbal behavior; development of sex-differentiated language in children; "women's" and "men's" language in various racial/ethnic/class/sexual preference groups; and conversational interaction.

M138. Electoral Politics: Political Psychology. (4) (Same as Political Science M141A.) Lecture, three or four hours; discussion, one hour (optional); outside study, eight or nine hours. Requisite: course 10. Designed for juniors/seniors. Examination of political behavior, political socialization, personality and politics, racial conflict, and psychological analysis of public opinion on these issues.

M140. Introduction to Study of Aging. (4) (Same as Gerontology M140 and Social Welfare M140.) Lecture, three hours. Designed for juniors/seniors. Perspectives on major features of human aging — biological, social, psychological, and humanistic. Introduction to information on the range of influences on aging to prepare students for subsequent specialization. P/NP or letter grading.

142H. Advanced Statistical Methods in Psychology (Honors). (4) (Formerly numbered 142.) Lecture, three hours; laboratory, two hours. Requisites: courses 100A, 100B. Survey of statistical techniques commonly used in psychology, education, and behavioral and social sciences: correlational techniques, analysis variance, and multiple regression. P/NP or letter grading.

144. Psychological Tests and Evaluation. (4) Lecture, three hours. Requisite: course 100A. Further study of principles of measurement, stressing basic concepts. Application to problems of test construction, administration, and interpretation. P/NP or letter grading.

150. Mathematical Models in Psychology. (4) Lecture, two hours; discussion, two hours. Requisites: Mathematics 3C or 31B, Computer Science 10C or 10F. Review of theoretical models and experimental evidence for these models in various areas of psychology. Topics include mathematical computer models of learning, perception, cognition, and personality.

151. Computer Applications in Psychology. (4) Lecture, two hours; discussion, two hours. Requisite: Computer Science 10C or 10F. Topics include hardware and software computer problems in design, control, and analysis of experiments; programming problems arising in evaluation of models of psychological processes of various content areas such as learning, perception, social, personality, and clinical.

M163. Death, Suicide, and Trauma. (4) (Same as Sociology M138.) Lecture, three hours. Designed for juniors/seniors. Definition and taxonomy of death; new permissiveness and taboos related to death; romanticization of death; role of the individual in his own demise; modes of death; development of ideas of death through life span; ways in which ideas of death influence conduct of lives; impact of dying on social structure surrounding the individual; preventive, interventive, and postventive practices in relation to death and suicide; developmental perspective on witnessing traumatic death, including posttraumatic and grief reactions; partial death; megadeath; lethality; psychological autopsy; death of institutions and cultures. P/NP or letter grading recommended (letter grading required if course to be applied toward Psychology or Sociology major).

M165. Psychology of Gender. (4) (Same as Women's Studies M165.) Lecture, three hours. Consideration of psychological literature relevant to understanding contemporary sex differences. Topics include sex-role development and role conflict, physiological and personality differences between men and women, sex differences in intellectual abilities and achievement, and impact of gender on social interaction.

168. Environmental Psychology. (4) Lecture, three hours. Requisites: courses 10, 100A. Research-oriented course which surveys theoretical and methodological issues which comprise the area of environmental psychology. Discussion of basic dimensions of emotional response to physical and social environments, measurement of information of rate of situations, and personality variables that are relevant to environmental theory. Residential, therapeutic, work, and recreational environments within a unified framework. P/NP or letter grading.

170A. Behavior Modification. (4) Lecture, three hours. Designed for juniors/seniors. Applied behavior theory; study of application of principles derived from learning theory, as in classical and instrumental (operant) conditioning, to treatment of developmentally disabled, autistic, and schizophrenic children, adult schizophrenics, affective disorders, anxiety states, drug abuse, marital discord, etc. Lectures, discussions, and demonstrations.

170B. Fieldwork in Behavior Modification. (4) Discussion, two hours; fieldwork, six hours. Requisite: course 110 with a grade of A or 170A. Fieldwork in applied behavior theory, especially to problems of retarded and autistic children.

170C. Advanced Fieldwork in Behavior Modification for Nonpsychology Majors. (4) Lecture, two hours; fieldwork, six hours. Requisite: course 170B. Not open to students with credit for course 171A. Does not fulfill laboratory requirement for majors. Advanced fieldwork in applied behavior theory, especially related to problems of retarded and autistic children. Review of current research in the field. May not be applied as an elective toward any Psychology Department major.

171A. Advanced Fieldwork in Behavior Modification for Psychology Majors. (4) Discussion, two hours; fieldwork, six hours; to be arranged, 20 hours. Requisite: course 170B. Designed for Psychology majors. Advanced fieldwork in applied behavior theory, especially related to problems of retarded and autistic children. Students design and carry out individualized experimental study to evaluate behavioral interventions with developmentally disabled clients.

171B. Practicum: Design and Implementation of Behavioral Interventions. (4) Discussion, two hours; fieldwork, six hours; to be arranged, 20 hours. Requisite: course 171A. Design and implementation of behavioral interventions with developmentally disabled children. Topics include goal selection, ethical considerations, behavioral contracting, client right and human use procedures, home and community management, parent and staff training, working with schools, clinical issues.

M172. The Afro-American Woman in the U.S. (4) (Same as Afro-American Studies M172 and Women's Studies M172.) Designed for juniors/seniors. Impact of social, psychological, political, and economic forces which impact on interpersonal relationships of Afro-American women as members of a large society and as members of their biological and ethnic group.

173. Advanced Abnormal Psychology. (4) Lecture, three hours. Requisites: courses 10, 100A, 127. Examination of research and theory concerning origins, course, and outcomes of disordered behavior. Focus on continuity and change in patterns of behavior, assessment methods, and research approaches. Concentration on one of following: childhood disorders, anxiety and stress, the schizophrenias, or mood disorders. P/NP or letter grading.

174. Interpersonal Process Analysis. (4) Lecture, two hours; laboratory, three hours. Requisites: courses 100A, 100B, 127. Designed for Psychology majors. Introduction to conceptual tools for analyzing interpersonal structures and functions in goal-oriented human interaction such as psychotherapy, persuasion, courtship, etc. Small group exercises integrated with lecture and discussion (additional laboratory work to be arranged). P/NP or letter grading.

175. Community Psychology. (4) Designed for junior/senior Psychology majors. Application of psychological principles to understanding and solution of community problems. Topics include community development, community mental health problems, drugs, racism, and rehabilitation of prisoners.

175H. Community Psychology (Honors). (4) Lecture, three hours; discussion, one hour. Honors course parallel to course 175.

M176. Communication and Conflict in Couples and Families. (4) (Same as Communication Studies M116.) Lecture, 90 minutes; discussion, 90 minutes. Requisites: courses 10, 100A, 127. Examination of (1) dysfunctional communication and conflict in couples and families and (2) relationship of these processes to individual psychopathology, marital discord, and family disruption (e.g., separation and divorce). P/NP or letter grading.

177. Counseling Relationships. (4) Lecture, three hours. Requisites: courses 10, 100A, 127. Designed for junior/senior Psychology majors. Conceptual and empirical foundations of psychological counseling; comparison of alternative models of counseling processes. Emphasis on counseling approaches in community mental health areas such as drug abuse, suicide prevention, and crisis intervention. P/NP or letter grading.

178. Human Motivation. (4) Lecture, three hours. Designed for juniors/seniors. Examination of theories of human motivation, experimental findings supporting the theories, and history of study of motivation. Topics include sociobiology, conflict, aspiration level, achievement strivings, and causal attributions.

178H. Human Motivation (Honors). (4) Lecture, three hours; discussion, one hour. Honors course parallel to course 178.

179A. Health Behavior and Health Status of Ethnic Groups: Behavioral Perspective. (4) Lecture, three hours. Requisite: course 10. Designed for juniors/seniors. Survey course of psychological aspects of health behavior and health status in major ethnic groups in the U.S. Emphasis on major diseases outlined by the U.S. Public Health Service (USPHS).

179B. Biomedical and Psychosocial Aspects of AIDS/HIV. (4) Lecture, three hours. Requisite: course 137D or 179A or Health Services 100. Designed for juniors/seniors. Basics of epidemiology of the disease, routes of transmission, clinical characteristics of AIDS, neurological and psychological aspects of coping with HIV infection and AIDS. Presentation of biologic, behavioral, and therapeutic interventions.

M180A. Contemporary Problems in Mental Retardation. (4) (Same as Psychiatry M180A.) Lecture, three hours. Requisites: courses 10, 100A, and 127 or 130 or 133A through 133I. Corequisite: course M181A. Limited to Immersion Program students. Presentation of concepts, issues, and research techniques in the area of mental retardation. Biological, psychological, and community questions concerning causes and treatment of developmental disabilities, as well as systems for care and training of retarded individuals. Lectures, directed reading, and discussion. P/NP or letter grading.

M180B. Contemporary Issues in Mental Retardation. (4) (Same as Psychiatry M180B.) Lecture, three hours. Requisite: course M180A. Corequisite: course M181B. Limited to Immersion Program students. Psychoeducational issues in mental retardation relating literature to ongoing field experiences through lectures, discussions, media, and six student papers. P/NP or letter grading.

M181A-M181B. Research in Contemporary Problems in Mental Retardation. (4) (Same as Psychiatry M181A-M181B.) Corequisites: courses M180A, M180B. Research experience. In Progress and P/NP or letter grading.

186A. Cognitive Science Laboratory: Introduction to Theory and Simulation. (4) Lecture, two and one-half hours; discussion, 30 minutes; laboratory, three hours. Requisites: course 85, Program in Computing 15. Designed for junior/senior departmental majors. Models in several psychological domains (e.g., visual perception, categorization, reasoning, and problem solving). Types of models include semantic networks, search, production systems, connectionist networks, and mathematical models. Lectures and discussions interwoven with computer simulations written in common LISP.

186B. Cognitive Science Laboratory: Neural Networks. (4) Lecture, two and one-half hours; discussion, 30 minutes; laboratory, three hours. Recommended preparation: knowledge of calculus. Requisites: course 85, Program in Computing 10A, 10B (or PASCAL). Designed for junior/senior departmental majors. Lectures and laboratory work in neural network modeling of perception and cognition. Specific topics include essential neurophysiology, basic architectures, learning, and programming techniques. Principles illustrated and discussed in context of models of specific perceptual and cognitive processes. Simulations written in PASCAL.

187A. Psychology and Law. (4) Lecture, two hours; discussion, two hours. Designed for juniors/seniors. Study of new topics on legal psychology, including suspect identification, witness reports, and police procedures. Outside speakers utilized in presentation of these materials. Students participate in presentations and/or discussions.

187AH. Psychology and Law (Honors). (4) Lecture, two hours; discussion, two hours. Honors course parallel to course 187A.

187B. Advanced Psychology and Law. (4) Lecture, three hours; discussion, one hour. Requisite: course 187A. Designed for juniors/seniors. Study of additional topics on legal psychology, including gang violence, theories of crime, corrections, repeat offenders, community policing, and interrogation. Outside speakers utilized in presentation of these materials. P/NP or letter grading.

188A. Research in Cognitive Science. (4) Seminar, two hours; laboratory, six hours. Designed for Cognitive Science majors. Practical applications of cognitive science through research. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. May be repeated once for credit. P/NP grading.

188B. Fieldwork in Cognitive Science. (4) (Formerly numbered 188.) Seminar, two hours; fieldwork, six hours. Designed for Cognitive Science majors. Practical applications of cognitive science through fieldwork. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. May be repeated once for credit. P/NP grading.

189. Ergonomics and Human Factors. (4) Lecture, three hours; outside study, nine hours. Requisites: courses 10, 120. Designed for juniors/seniors. Examination of human capabilities and limitations in design of human/machine systems such as vehicles, workspaces, and computer software for goals of safety and efficiency. Topics include sources of error, information processing, manual control, training, and personnel selection.

189H. Ergonomics and Human Factors (Honors). (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Honors course parallel to course 189. P/NP or letter grading.

190A-190B-190C. Honors Course. (4) Seminar, two hours. Limited to psychology honors program students. Opportunity for development and analysis of creative ideas through individual research projects with a faculty sponsor and discussion of student and faculty research presentations. Information and applications may be obtained from Undergraduate Advising Office, 1531 Franz Hall. If approved in advance by Undergraduate Office, course 190C may be applied toward elective course requirement for any Psychology Department major.

192. Practicum in Teaching Psychology. (4) Limited to junior/senior Psychology, Cognitive Science, and Psychobiology majors. Training and supervised practicum for advanced undergraduates in teaching psychology. Students serve as junior teaching assistants and assist in preparation of materials and development of innovative programs. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. P/NP grading.

193. Fieldwork in Psychology. (4) Seminar, two hours; fieldwork (approved community setting), six hours. Limited to sophomore/junior/senior Prepsychology, Precognitive Science, Prepsychobiology, Psychology, Cognitive Science, and Psychobiology majors. Fieldwork in applications of psychology. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. P/NP grading.

194A. Research in Psychology. (4) (Formerly numbered 194.) Seminar, one hour; internship (approved research setting), seven hours. Limited to sophomore/junior/senior Prepsychology, Precognitive Science, Prepsychobiology, Psychology, Cognitive Science, and Psychobiology majors. Practical applications of psychology through research. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. P/NP grading.

194B-194C. Ongoing Research in Psychology. (4) (Formerly numbered 194B.) Seminar, one hour; internship (approved research setting), seven hours. Limited to sophomore/junior/senior Prepsychology, Precognitive Science, Prepsychobiology, Psychology, Cognitive Science, and Psychobiology majors. Minimum of two terms required. Practical applications of psychology through research. Consult Undergraduate Advising Office, 1531 Franz Hall, for contracts and further information. Only 12 units from courses 192, 193, and 194 may be applied toward undergraduate degree. May not be applied toward course requirements for any Psychology Department major. In Progress and P/NP grading.

197. Current Issues in Psychology. (4) Lecture, three hours. Designed for junior/senior majors. Study of selected current topics of psychological interest. Consult *Schedule of Classes* for topics and instructors. Only one graded 197 course may be applied as an elective toward Psychology major. If content is approved in advance by Undergraduate Advising Office, Psychobiology and Cognitive Science majors can petition to use course to satisfy an elective requirement. May be repeated for credit with consent of department.

199. Directed Individual Research and Studies. (4) Preparation: submission of written proposal outlining course of study. Limited to junior/senior Psychology, Psychobiology, and Cognitive Science majors (juniors must have at least 3.0 grade-point average in major). Consult Undergraduate Advising Office, 1531 Franz Hall, for further information and approval forms. Only one four-unit 199 course may be taken per term and only one for a letter grade (additional 199 courses may be taken on a P/NP basis). If approved in advance by Undergraduate Office, four units of course 199 may be applied toward elective course requirement for Psychology major and toward Psychology 188 requirement for Cognitive Science major.

Graduate Courses

200A. Animal Learning and Behavior. (4) Basic principles and characteristics of learning and behavior, including Pavlovian conditioning, instrumental learning, and species-specific behavior.

200B. Human Learning and Behavior. (4) Lecture, three hours. Topics include human learning and conditioning and application of learning principles in etiology and treatment of a variety of socially significant problems.

201. Current Issues in Learning and Behavior. (1) Discussion, 90 minutes. Designed for graduate students. Required of learning and behavior students a minimum of four times (entire first year and winter of second year). Presentation of papers of current interest in learning, behavior, or applied behavioral analyses by experts in the field. Evaluation of their significance and methodology in detail. May be repeated for credit. S/U grading.

202. Research in Learning and Behavior. (2) Forum in which graduate students discuss the literature and methodological, analytical, and interpretational issues related to specific topics of research in learning and behavior. S/U grading.

204B. Theories of Learning. (4) Discussion, three hours. Requisite: course 200A. Critical discussion and in-depth analysis of current major theoretical approaches to associative learning, with emphasis on recent experimental analyses of conditioning phenomena.

204C. Applied Learning. (4) Lecture, three hours. Designed for graduate psychology students. Lectures and discussion on current research in application of learning principles to clinical and social problems such as alcohol and drug abuse, aggression, fear management, mental retardation, behavioral medicine, autism/schizophrenia, etc.

204D. Fear and Anxiety. (4) Lecture, three hours. Preparation: graduate training. Presentation of theoretical and empirical advances, from biological and behavioral perspectives, in the area of fear and anxiety. Integration of animal and human research.

204E. Primitive Motivational Processes. (4) Lecture, three hours. Designed for graduate students. Analysis, using a behavioral systems approach, of basic motivated behavior such as feeding, drinking, foraging, and reproduction. Same approach also applied to phenomena such as acquired motivation, reinforcement, and drug addiction. Historical survey of behavioral analyses of motivation and goal-directed behavior.

204F. Animal Cognition and Cellular Basis of Learning. (4) Discussion, three hours. Designed for graduate students. Discussion of experimental literature on spatial and temporal learning, learning of relative rates of reward (the matching law), and classical conditioning, all treated from a computational/representational, perspective, with emphasis on implications for cellular bases of learning and memory. S/U or letter grading.

205A. Behavioral Neuroendocrinology. (2) Lecture, three hours. Designed for graduate students. Mechanisms of hormone action on the brain that influence behavior, including permanent actions in development and transient actions in adulthood. Using a comparative approach, topics include sexual differentiation, long-term effects of stress, seasonal and other changes in adulthood, and aging.

205B. Human Neurophysiology. (2) Lecture, three hours. Designed for graduate students. Examination of higher cognitive processes in terms of neural mechanisms that underlie them. Topics include cortical modularity and organization, coordinated sensory representation, language, regional functional specialization, attention, and regulation of cortical function by extracortical systems.

205C. Neurotransmitters in Human Disorders of Motor and Cognitive Function. (2) Lecture, three hours. Designed for graduate students. Detailed analysis of molecules involved in interneuronal communication processes (i.e., neurotransmitters, neurohormones, "neuromodulators," neurotropic agents). Discussion of their roles in normal brain physiology, followed by detailed analyses of their perturbations in various disease states. Particular emphasis on current and past thinking about Alzheimer's disease, Parkinsonism, Huntington's disease, and Down's syndrome dementia.

205D. Clinical Psychopharmacology. (2) Lecture, three hours. Designed for graduate students. General principles of brain neurotransmitters, including synthesis, cell bodies and pathways, and receptor subtypes. General principles of drug administration and pharmacokinetics. Major classes of psychoactive drugs, animal models, and "atypical" compounds.

205E. Psychobiology of Emotion and Stress. (2) Lecture, three hours. Designed for graduate students. Overview of literature on role of the brain and autonomic and endocrine systems in emotion and stress-related responses. Some emphasis on involvement of neurotransmitters, neuropeptides, and hormones in emotional plasticity, visceral function, and bodily diseases.

205F. Physiology of Learning. (2) Lecture, three hours. Designed for graduate students. Search for anatomical loci of engrams. Cell biology of plasticity, including electrophysiological and molecular approaches. Theories of how neural circuitry might be organized to make learning possible.

205G. Pain. (2) Lecture, three hours. Designed for graduate students. Consideration of pain from both basic science and clinical perspectives. Discussion of nociceptors, spinal cord, brain mechanisms, pain inhibition, and role of endogenous opioids. Effects of pain and stress on immunity.

205I. Motor Coordination. (2) Lecture, three hours. Designed for graduate students. Elementary and complex units of behavior: reflexes, servomechanisms, oscillators, and central pattern generators. Principles of coordination: efference copy, oscillator coupling, potentiation, and depotentiation. Relation between levels of integration and anatomical levels: transections, lesions, focal stimulation, and single unit recording.

205J. Homeostatic Drive, Hunger, and Thirst. (2) Lecture, three hours. Designed for graduate students. Homeostasis used as framework within which ingestive behavior is discussed. Analysis of thirst on basis of depletions of body fluid compartments. Consideration of hunger, focusing on two theories — "Glucostatic" and "Energostatic."

205K. Vision Neurobiology. (2) Lecture, three hours. Designed for graduate students. Exploration of anatomy, physiology, and computation in visual system, focusing on retina, visual cortex, and overall performance.

205L. Cognitive Neuroscience. (2) Lecture, three hours. Designed for graduate students. Overview of neural basis of higher cognitive functions, integrating anatomical, physiological, and behavioral approaches and incorporating clinical and experimental data. Systems covered include attention, perception, memory, language, and hemispheric specialization.

205M. Neuropsychology of Perception. (2) Lecture, three hours (five weeks). Designed for graduate students. Examination of neural substrates of high-level visual processing. Topics include agnosias and characteristics of electrophysiological responses recorded in primate temporal lobe. Discussion of issues regarding neural representation of knowledge. S/U or letter grading.

M205Z. Behavioral and Systems Neuroscience. (4) (Same as Neuroscience M205 and Physiological Science M205.) Lecture, three hours. Requisites: Neuroscience M201, M202, M203, M204. Introduction to fundamentals of behavioral and systems neuroscience, with emphasis on role of behavioral analysis in understanding the functioning of nervous system and identifying anatomical circuits, cell physiological processes, and molecular mechanisms that mediate behaviorally defined functions.

207A-207B-207C. Seminars: Physiological Psychology. (4-4-4) Requisite: course 115.

210. Comparative Psychobiology. (4) Requisite: course 115. Survey of determinants of species-specific behavior, including genetic influences and learning.

212. Evaluation of Research Literature in Physiological Psychology. (1) Discussion, 90 minutes. Papers of current interest presented by members of seminar and their significance and methodology discussed and criticized in depth. May be repeated for credit. S/U grading.

M213. Neuroimaging and Brain Mapping. (4) (Same as Neuroscience M272 and Physiological Science M272.) Lecture, three hours; outside study, nine hours. Recommended preparation: mathematics and computer background. Requisites: Neuroscience M201, M202. Theory, methods, applications, assumptions, and limitations of neuroimaging. Techniques, biological questions, and results. Brain structure, brain function, and their relationship discussed with regard to imaging.

220A. Social Psychology. (4) Lecture, three hours. Designed for graduate psychology students. Intensive consideration of concepts, theories, and major problems in social psychology.

220B. Research Methods in Social Psychology. (4) Lecture, three hours. Designed for graduate psychology students. Research design and methodological issues in experimental and nonexperimental social research.

220C. Advanced Social Psychology. (4) Lecture, three hours. Requisite: course 220A or 220D. Review of contemporary topics and issues in social psychological research and theory.

220D. Introduction to Social Psychology. (4) Lecture, three hours. Designed for graduate students. Introduction to theory and research in social psychology for students who are not psychology majors. Service course for graduate students in education, sociology, political science, management, public health, etc.

221. Seminar: Attitude Formation and Change. (4) Discussion, three hours. Requisites: courses 220A, 220B. Social psychological research and theories on opinions and attitudes. Effects of mass communication, social factors in assimilation of information and influence.

222A. Interpersonal Relations. (4) Discussion, three hours. Requisite: course 220A. Critical review of theory and research on interpersonal relations, with emphasis on friendship, dating, and marriage.

- 222B. Interpersonal Influence and Social Power. (4)** Seminar, three hours. Preparation: advanced social psychology course (psychological or sociological). Review of theory and research on interpersonal influence and social power, with applications to various power relationships such as supervisor/subordinate, health care professional/patient, doctor/nurse, parent/child, wife/husband, teacher/student, political figures, etc.
- 223. Seminar: Social Survey Research. (4)** Seminar, three hours. Requisite: course 220B. Contemporary issues and topics in social survey research methodology.
- 225. Seminar: Critical Problems in Social Psychology. (4)** Discussion, three hours. Requisites: courses 220A, 220B. May be repeated for credit with consent of instructor.
- 226A-226B-226C. Current Literature in Social Psychology. (2-2-2)** Discussion, 90 minutes. Course 226A is limited to first-year social psychology students. Courses 226B-226C are open to nonsocial psychology students with consent of instructor. Recent and current research papers in social psychology presented by members of seminar and their significance and methodology discussed and criticized in depth. S/U grading.
- 227. Health Psychology. (4)** Lecture, two hours; discussion, one hour. Preparation: undergraduate degree or training in psychology. Psychological and social factors involved in etiology of illness, treatment and course of illness, long-term care and adjustment of chronically ill or disabled, and practice of institutional health care and self-care.
- M228A. Proseminar: Political Psychology. (4)** (Same as History M236A and Political Science M261A.) Discussion, three hours. Introduction to political psychology: psychobiography, personality and politics, mass attitudes, group conflict, political communication, and elite decision making.
- M228B. Seminar: Political Psychology. (4)** (Same as Political Science M261D.) Discussion, three hours. Requisite: course 220A or Political Science M261A. Examination of political behavior, political socialization, racial conflict, mass political movements, and public opinion.
- M228C. Critical Problems in Political Psychology. (4)** (Same as Political Science M261E.) Discussion, three hours.
- 229. Social Cognition. (4)** Lecture, one hour; discussion, two hours. Social cognition is concerned with how people organize and interpret social information in their environment. Seminar provides broad background in the field and also gives depth and focus on particular research topics in the field. Weekly papers, as well as a lengthy final paper, required.
- 231. Psychology of Gender. (4)** Seminar, three hours. Preparation: one prior course on gender/women's studies. Critical evaluation of current research and theory concerning psychology of gender, drawing on work from various areas of psychology to understand sources of gender differentiation and its consequences for human behavior and social interaction.
- 232. Human Sexuality. (4)** Lecture, three hours. Designed for graduate students. Intended to teach students how to carry out research on human sexual behavior. Contents include theory construction, scale development, physiological and endocrinological implications, radioimmunoassay (measuring hormones in blood sample), ethical issues, methodological and statistical considerations, measurement of sexual arousal, fantasy, and sexual dysfunction therapy. Discussion-oriented, with emphasis on operationalizing predictions concerning human sexual functioning.
- 233. Seminar: Environmental Psychology. (4)** Requisites: courses 235, 250A, 250B. Critical review of work in environmental psychology designed to identify basic dimensions for analysis of man/environment relationships. Use of human emotional responses to environments as intervening variables linking specific stimulus qualities to a variety of approach-avoidance behaviors. Individual differences and drug-induced states as these relate to emotional response dimensions used to explain within-individual differences in response to same environment over time or between-individual differences to same situation. Review of literature relating information rate from environments to arousal and preferences for those environments.
- 234. Social Psychological Aspects of Competitive Youth Sport. (4)** Review of research concerning social psychological aspects of competitive sport for children. Sport is presented as a major achievement domain for young participants. Topics include sources and consequences of competitive stress, significant adult influences and interactions, predictors of performance, determinants of participation and dropping out, and socialization through sport.
- 235. Personality. (4)** Survey of cognitive, analytic, and learning theory approaches to study of personality. Emphasis on intensive exploration of selected concepts and related research.
- M238. Survey Research Techniques in Psychocultural Studies. (4)** (Same as Psychiatry M238.) Seminar, three hours. Designed for graduate students. Techniques for conceptualizing, conducting, and analyzing survey data; instruction in qualitative strategies for enhancing survey research on psychocultural problems.
- M239. Personality, Motivation, and Attribution. (4)** (Same as Education M215.) Current research and theory relating personality variables (e.g., attributional styles, self-esteem) to motivational concerns such as persistence and intensity of behavior. Perceived causes of outcomes in achievement and affiliative domains.
- 240A-240B. Developmental Psychology. (4-4)** Lecture, three hours. Preparation: one undergraduate developmental psychology course. Designed for graduate students. Consideration of variables influencing cognitive social and emotional development of the human organism from conception through adolescence. Emphasis on research methodology and research base for current theories of development.
- 241. Current Developments in Developmental Psychology. (1)** Discussion, 90 minutes. Designed for graduate developmental psychology students. Presentation of papers on current advances in developmental psychology and closely related areas by experts in the field. Emphasis on approaches to a problem, making it suitable to interweave presentations by graduate students.
- 242A-242F. Seminars: Developmental Psychology. (4 each)** Seminar, three hours. Requisites: courses 240A-240B. Each course may be taken independently and may be repeated for credit:
- 242A.** Perceptual Development.
- 242B.** Cognitive Development.
- 242C.** Socialization.
- M242D.** Social Development and Education. (Same as Education M217A.) Biological and familial, school, and other influences on the child; development in context of current research and theoretical models; consideration of theoretical and methodological research on family, peer group, and school; application of developmental theory and research to educational practice.
- 242F.** Development of Language and Communication.
- 243A-243B. Seminars: Practical and Societal Issues in Developmental Psychology. (4-4)** Seminar, three hours. Requisites: courses 240A-240B. Socialization processes in human development and implication for social/political, educational, research issues, values, and societal change. In Progress grading.
- 244. Critical Problems in Developmental Psychology. (4)** Lecture, three hours. Requisites: courses 240A-240B. Current problems; content varies depending on interest of class and instructor. May be repeated for credit with consent of instructor.
- M245. Personality Development and Education. (4)** (Same as Education M217C.) Review of research and theory of critical content areas in personality development that bear on school performance: achievement motivation, self-concept, aggression, sex differences, empathy, and other social behaviors; review of status of emotional behavior in personality theory and development.
- M246. Psychological Aspects of Mental Retardation. (4)** (Same as Psychiatry M246.) Lecture, 90 minutes. Discussion of psychological aspects of mental retardation, including classification, description, etiology, theory, prevention, treatment, assessment, modern and future developments, and input from other disciplines (ethics, law, religion, welfare systems).
- 249. Evaluation Research. (4)** Requisites: courses 250A, 250B. Introduction to evaluation research in psychology, with emphasis on clinical, community, and social psychology applications. Survey includes policy and strategy issues, design of evaluative studies, data analysis, and utilization of findings.
- 250A. Advanced Psychological Statistics. (4)** Review of fundamental concepts. Basic statistical techniques as applied to design and interpretation of experimental and observational research.
- 250B. Advanced Psychological Statistics. (4)** Advanced experimental design and planning of investigations.
- 251A-251B-251C. Research Methods. (4-4-4)** Designed for graduate psychology students. Students design and conduct original research projects under supervision of instructor in charge. It is anticipated that many students will complete their project in two terms (normally three terms allowed). S/U grading (course 251A only).
- 252A. Multivariate Analysis. (4)** Lecture, three hours. Requisites: courses 250A, 250B. Introduction to analysis of data having multiple dependent variables. Topics include continuous multivariate distributions, multiple regression, multivariate analysis of variance, discriminant analysis, canonical correlation, principal component analysis. Applications from clinical, cognitive, physiological, and social psychology. Computer methods.
- 252B. Discrete Multivariate Analysis. (4)** Lecture, three hours. Requisites: courses 250A, 250B. Introduction to analysis of frequency table data. Topics include categorical univariate and multivariate distributions, independence and conditional independence, log-linear models, multivariate categorical designs, and ordered categorical variables. Applications from various areas of psychology.
- 253. Factor Analysis. (4)** Theory and practice of factor analysis in psychological research. Methods of factor extraction and rotation. Applications of computers to computations in factor analysis.
- 254A. Psychological Scaling. (4)** Lecture, three hours. Designed for graduate students. Theory of measurement, law of comparative judgment, methods of unidimensional scaling, multidimensional scaling, and related topics of current interest.
- 254B. Cluster Analysis. (4)** Lecture, three hours. Designed for graduate students. Quantitative methods for classification. Theories and assumptions underlying major clustering methods. Use of methods in exploratory data analysis.
- 255. Quantitative Aspects of Assessment. (4)** Fundamental assumptions and equations of test theory. Current problems in assessment.
- M256. Advanced Regression Analysis. (4)** (Same as Political Science M200E.) Seminar, three hours. Diagnostics, robust regression, cross validation, resampling, outliers, missing data, geometry of regression, validity of assumptions, categorical dependent variables, transformation of variables. Access to Macintosh computer very helpful.

M257. Multivariate Analysis with Latent Variables.

(4) (Same as Political Science M208D.) Lecture, three hours. Introduction to models and methods for analysis of data hypothesized to be generated by unmeasured latent variables, including latent variable analogues of traditional methods in multivariate analysis. Causal modeling: theory testing via analysis of moment structures. Measurement models such as confirmatory, higher-order, and structured-means factory analytic models. Structural equation models, including path and simultaneous equation models. Parameter estimation, hypothesis testing, and other statistical issues. Computer implementation. Applications.

258. Special Problems in Psychological Statistics.

(4) Lecture, three hours. Requisites: courses 250A, 250B. Special problems in psychological statistics and data analysis.

259. Quantitative Methods in Cognitive Psychology.

(4) Requisites: courses 250A, 250B. Number of nonstatistical mathematical methods and techniques commonly used in cognitive psychology. Topics include Markov chains, other stochastic processes, queueing theory, information theory, frequency analysis, etc.

260A-260B-260C. Proseminars: Cognitive Psychology (1-1-1) Presentation of research topics by students, faculty, and visiting scholars. May be repeated for credit. S/U grading.

261. Perception. (4) Lecture, three hours. Concepts, theories, and research in study of perception. Considers the questions: Why do things look, sound, smell, taste, or feel as they do? What is the nature of perceptual systems? How do these systems process information?

262. Human Learning and Memory. (4) Lecture, three hours. Contemporary theory and research in human verbal learning and memory; verbal and non-verbal learning and memory processes, structure and organization of short- and long-term memory.

263. Psycholinguistics. (4) Lecture, three hours. Contemporary theory and research in psycholinguistics: coding and decoding, psycholinguistic parameters of language learning, speech recognition and perception.

265. Thinking. (4) Lecture, three hours. Contemporary theory and research in thinking, problem solving, inference, semantic memory, internal representation of knowledge, imagery, concepts.

266. Cognitive Science. (4) Lecture, three hours. Major issues in cognitive science. Representation of cognitive structures and higher-level processes. Specific areas include perception, learning and memory, problem solving, and reasoning. Relationships to artificial intelligence.

268A-268E. Seminars: Human Information Processing. (4 each) Seminar, three hours. Topics vary with interests of instructor. Each course may be taken independently and may be repeated for credit. **268A.** Perception; **268B.** Human Learning and Memory; **268C.** Judgment and Decision Processes; **268D.** Language and Cognition; **268E.** Human Performance.

269. Seminar: Cognitive Psychology. (4) Seminar, three hours. Discussion of problems in cognitive psychology that encompass more than a single subfield of the area. May be repeated for credit.

270A-270B-270C. Foundations of Clinical Psychology. (4-4-4)

Corequisites: courses 271A-271B-271C. Designed for graduate clinical psychology students. **270A.** Analysis of phenomenological, theoretical, and research issues regarding etiology and mediating mechanisms in neurotic, affective, schizophrenic spectrum, and other personality disturbances. **270B.** Principles and methods of psychological assessment and evaluation. **270C.** Principles and methods of psychological intervention in individuals, families, and community settings.

271A-271B-271C. Clinical Psychological Methods. (2-2-2)

Corequisites: courses 270A-270B-270C. Procedures in clinical psychology as applied in clinical and community settings. Supervised exposure to psychological attributes of psychopathology and procedures for psychological assessment, intervention, and research with clinical populations. Experience closely coordinated with content in courses 270A-270B-270C. S/U grading.

271D. Clinical Research Laboratory. (2) Discussion, one hour; laboratory, one hour. Corequisites: courses 270A or 270B or 270C, and 271A or 271B or 271C. Designed for graduate clinical psychology students. Acquaints students with faculty research interests and involves them in their course 251 research at an early stage to insure completion. S/U grading.

271E-271F. Clinical Research Laboratories. (2-2)

Requisite: course 271D. Designed for graduate clinical psychology students. Required of first-year clinical psychology students. S/U grading. **271E.** Brief overview of research design issued in clinical psychology and practical issues in students' own research activities. **271F.** Discussions of students' particular research activities and issues, plus laboratories in computer analysis of statistical data.

272A-272G. Advanced Clinical Psychological Methods. (4 each) Seminar, three hours. Requisite or corequisite: course 401 or 451. Each course may be taken independently for credit:

272A. Behavior Modification with Children. Requisites: courses 271A-271B-271C. Course in series of clinical intervention and assessment offerings for second- and third-year clinical students that covers behavior modification research and practice in clinic, school, institution, and home settings.

272C. Clinical Interventions for Psychological Problems of Children.

272D. Family Therapy and Family Dynamics.

272E. Special Problems.

272F. Behavior Modification with Adults. Designed for second-year graduate clinical psychology students. Current cognitive behavior modification principles and techniques. Major conceptual issues; specific techniques demonstrated and practiced by students to cover a range of adult problems such as depression, stress and anxiety, anger management, assertion problems.

272G. Marital Therapies. Lecture, two hours; discussion, one hour; laboratory, one hour. Requisites: courses 270A-270B-270C, 271A-271B-271C. Examination of assessment and treatment approaches for relationship problems in couples. Presentation, discussion, and illustration of procedures derived from social-learning, psychodynamic, and systems theories, with relevant research findings.

273A-273B-273C. Professional and Ethical Issues in Clinical Psychology. (2-2-2)

Lecture, one hour; discussion, one hour. Designed for graduate clinical psychology students. Year-long course sequence covering variety of topics necessary for clinical psychologists in their clinical work, including legal and ethical issues, child abuse, suicide assessment, issues in empirically validated treatments, psychiatric consultation and psychoactive medications, working with diverse client populations, etc. S/U grading.

275. Family Process: Psychological and Social Perspectives on the Family. (4)

Various theoretical perspectives applicable to analysis of family structure and dynamics. Critical issues in application of family constructs to clinical problems.

276. Clinical Approaches to Children with Learning and Related Behavior Problems. (4)

Lecture, three hours; discussion, one hour. Designed for Ph.D. students. Theoretical and research issues and problems related to purposes of and practices involved in assessment and correction approaches for children with learning and behavior problems. Practicum experiences to illustrate course content and provide opportunities to improve research and clinical competence.

277A-277B. Advanced Clinical Assessment. (4-4)

Laboratory, two hours; additional hours to be arranged through Psychology Clinic. Designed for graduate clinical psychology students. Projective techniques, clinical interpretation, case studies, psychological test battery, psychopathology, and application of assessment to problems in psychotherapy.

279. Seminar: Research in Psychopathology. (4) Seminar, four hours. S/U or letter grading.

M280. Affective Disorders. (2 or 4) (Same as Psychiatry M234.) Seminar, two hours. General topics related to primary affective disorders (depression, manic depressive illness), including diagnosis, pharmacology, epidemiology, psychology, phenomenology, biology, and treatment. Students enrolled for four units are assigned a more intensive reading list and required to make a presentation or prepare a research paper.

283. Psychopathology. (4) Survey of dominant psychological attributes of particular forms of psychopathology, including analysis of status of various theories concerned with etiology and mediating mechanisms of personality, neurotic, schizophrenic spectrum, and affective disturbances.

284. Seminar: Clinical Psychology and Communication. (4) Seminar, four hours. S/U or letter grading.

M285. Cognitive Behavior Therapy with Children: Treatment and Systems of Care. (2 or 4)

(Same as Psychiatry M277.) Seminar, 90 minutes. Designed for graduate students. Cognitive/behavioral approaches to prevention and treatment of mental health problems in children. Examination of service delivery systems for treating troubled youth and discussion of issues with respect to current systems of care. Major problems include conduct disorders, attention deficit disorder, depression, anxiety, and learning disabilities.

286. Issues and Concepts of Clinical Psychology. (4)

Open to graduate students in majors other than clinical psychology. Survey of major issues and alternatives in current practice. Emphasis on assessment and intervention, with consideration of historical, theoretical, and research bases for current trends.

287. Critical Problems in Clinical Research Methodology. (4) Requisites: courses 250A, 250B. Special problems of measurement and design in clinical research.

289A-289B-289C. Current Issues in Clinical Psychology (1-1-1)

Discussion, two hours. Designed for first-year graduate clinical psychology students. Presentation of research and applied topics relevant to clinical psychology. In Progress and S/U grading.

290. History of Psychology. (4) Philosophical and historical context of contemporary psychology. Major trends from the 19th century to contemporary issues.

291. Principles of Behavioral Pharmacology. (4)

Intensive analysis of drug, brain, and behavior relationships. Discussion of nature and source of drugs, general aspects of pharmacology, neurotransmitters and basic neuropharmacology, principles of behavioral pharmacology, categories of psychopharmacological agents, and pharmacological approaches to study of drug addiction, schizophrenia, and other behavioral processes, both normal and pathological.

292. Biobehavioral Mechanisms of Stress and Disease. (4)

Lecture, three hours. Designed for graduate psychology students. Behavior/physiology interactions of some major bodily systems: nervous, cardiovascular, gastrointestinal, and endocrine systems. Usual and altered states of these systems (e.g., stress) as these can promote permanent tissue injuries, disease, or improved bodily function, health enhancement.

293. Behavioral and Psychophysiological Problems of Alcoholism. (4)

Behavioral and psychophysiological characteristics of alcoholism, along with theories concerning their etiology and treatment. Experimental approaches.

M294. Seminar: Neural and Behavioral Endocrinology. (2) (Same as Neurobiology M255 and Physiological Science M255.) Seminar, one hour; discussion, one hour. Topics include hormonal biochemistry and pharmacology. Hypothalamic/hypophyseal interactions, both hormonal and neural. Structure and function of the hypothalamus. Hormonal control of reproductive and other behaviors. Sexual differentiation of brain and behavior. Stress: hormonal, behavioral, and neural aspects. Aging of reproductive behaviors and function.

M295. Laboratory for Naturalistic Observations: Developing Skills and Techniques. (4) (Same as Anthropology M236Q, Education M222A, and Psychiatry M235.) Skill of observing and recording behavior in natural settings, with emphasis on field training and practice in observing behavior. Discussion of some uses of observations and their implications for research in social sciences. Students expected to integrate observational work into their current research interests.

M296. Neurobiology of Sleep. (3) (Same as Neuroscience M259 and Psychiatry M249.) Lecture, one hour; discussion, two hours. Critical review of primary research publications concerning neural basis of sleep. Discussion of neural and biochemical control of REM and NREM sleep after reviewing sleep behavior and phenomenology, including developmental and comparative aspects. Presentation of relevant clinical phenomena. S/U or letter grading.

297. Issues in Social Development of the Minority Child. (4) Seminar, three hours. Designed for graduate students. Critical evaluation and integration of existing research on social psychological development of the minority child. Emphasis on socialization of cognitive and personality style, with goal of empirically clarifying issues raised in this area of developmental study.

298. Special Problems in Psychology. (4) Content depends on interests of particular instructor. May be repeated for credit.

299. Developmental Methodology. (4) Coverage of both theory and methods in measuring age-related changes in behavior. Experimental designs and data-analytic solutions to problems in measurement of change. Some experience in analysis of actual data sets.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

401. Fieldwork in Clinical Psychology (1 to 12). Requisites: courses 271A-271B-271C. Students on practicum assignments are required to register for this course each term (except by consent of clinical program committee).

402. Clinical Research Practicum. (2) (Formerly numbered 402A-402B-402C.) Faculty and graduate students who share interests discuss current literature, new ideas, methodological issues, and preliminary findings. Meetings include research presentations and opportunities for feedback on current and proposed research activity to encourage, support, and facilitate student research expertise. Assigned reading included. S/U grading.

403. Special Topics Study Course. (1 to 4) Under faculty supervision, group of students meets each week for a quarter in a self-led study group to pursue a specific topic of their choice that is not covered in other department courses. S/U grading.

410A-410B-410C. Clinical Teaching and Supervision. (4-4-4) Preparation: completion of Ph.D. comprehensive examinations, advancement to candidacy or preparation for dissertation research actively under way. Study and practice of knowledge, concepts, and theories on teaching and supervision of applied clinical psychology.

410D-410E-410F. Clinical Assessment Supervision. (4-4-4) Discussion, two hours; other, one hour. Designed for third-year graduate clinical psychology students. Study and practice of knowledge, concepts, and theories on teaching and supervision of psychological assessment.

420A-420B. Health Psychology Practicum. (2-2) Designed for graduate students. Determination of what areas of health, illness, treatment, and delivery of treatment can be elucidated by understanding of psychological concepts and research; psychological perspective on these problems; how psychological perspective might be enlarged and extended in the medical area. Through practical field placement, students apply knowledge acquired in class to research observation and/or clinical work in the field.

421. Research in Social Psychology. (2) Discussion, two hours; reading and group work, four to six hours. Forum for faculty and graduate students pursuing research on a common topic to share research ideas, make research presentations, and obtain feedback on study designs, procedures, and results to foster collaborative investigations in common research areas. S/U grading.

423. Social Survey Research Practicum. (4) Practicum, two hours; additional hours to be arranged. Methods of survey sampling, conduct and management of computer-assisted telephone interview surveys.

425. Health Psychology Lecture Series. (2) Clinicians and researchers in health psychology from Los Angeles area present their research, programs, and/or clinical work as part of a training program in health psychology. May be repeated for credit. S/U grading.

451. Internship in Clinical Psychology. (6 to 12) Preparation: successful completion of departmental qualifying examinations. Requisite: course 401. May be repeated for credit. S/U grading.

454. Internship in Industrial Psychology. (2 to 4) Fieldwork, to be arranged. S/U or letter grading.

495. Presentation of Psychological Materials. (4) Supervised practicum in undergraduate teaching. Students serve as discussion section leaders in selected undergraduate courses. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Directed Individual Research and Study in Psychology. (2 to 12) One 596 course is required during second year of graduate study, and one 596 or 599 course is required during each succeeding year of graduate study. (Terminal M.A. candidates are exempt from this requirement.) S/U grading.

597. Individual Studies. (2 to 12) Designed primarily as preparation for Ph.D. qualifying examinations. May be required by some area committees as a requisite for taking examinations. S/U grading.

599. Research for Ph.D. Dissertation. (2 to 12) Preparation: successful completion of qualifying examinations. One 599 course is required during each year following completion of qualifying examinations. S/U grading.

PUBLIC HEALTH SCHOOLWIDE PROGRAMS

School of Public Health

UCLA
16-071 Center for the Health Sciences
Box 951772
Los Angeles, CA 90095-1772
(310) 825-5524
<http://www.ph.ucla.edu>

Scope and Objectives

The profession of public health is responsible for the protection, preservation, and promotion of the health of communities and populations. Although the health problems of today differ from those of the past and of the future, the professionals who make up the field need to be trained to respond to broad community problems utilizing the basic ideas of prevention of disease and promotion of well-being. This goal can be achieved only with an understanding of the health status of the population through data gathering and analysis, as well as knowledge of the complex relationships between disease process in the social and biological environment of the community.

The field of public health today needs practitioners from many disciplines. Candidates for graduate study may come from a wide variety of academic backgrounds, training, or experience, including both the natural and social sciences.

Certain degrees within the School of Public Health are not offered by the individual departments but are administered on a schoolwide level: the Master of Public Health; the Doctor of Public Health; three concurrent degree programs: M.B.A./M.P.H. with the John E. Anderson Graduate School of Management and M.A./M.P.H. with Asian American Studies and with Islamic Studies; and three articulated degree programs: M.D./M.P.H. with the School of Medicine and M.A./M.P.H. with African Area Studies and with Latin American Studies.

For information on the Master of Science and Ph.D. degrees in Biostatistics, Environmental Health Sciences, Epidemiology, or Health Services, or the Master of Science and Ph.D. degrees in Public Health within the Department of Community Health Sciences, see the listings for those departments. For information on the interdepartmental D.Env. degree program housed in the Department of Environmental Health Sciences, see the listing for Environmental Science and Engineering.

The Master of Science in Preventive Medicine and Public Health program is not admitting new students at this time.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degrees

The School of Public Health offers the Master of Public Health (M.P.H.) degree and participates in concurrent and articulated degree programs with other schools and departments. Master of Science (M.S.) degree programs offered through the school are listed under the departments of Biostatistics, Community Health Sciences, Environmental Health Sciences, Epidemiology, and Health Services.

Master of Public Health

The M.P.H. is a professional degree in the field of public health. Students are expected to focus on public health practice and to acquire a broad knowledge related to professional skills.

Admission

For admission to the M.P.H. program, both the School of Public Health Application for Admission to Graduate Status and the UCLA *Application for Graduate Admission* must be completed. Three letters of recommendation, two from former professors and one from an employer (if no employer, three former professors), test scores, and transcripts are required before an application is considered complete. Application forms and the *Announcement of the UCLA School of Public Health* may be obtained by writing to the Student Affairs Office, School of Public Health, 16-071 CHS, UCLA, Box 951772, Los Angeles, CA 90095-1772. It is the student's responsibility to ensure that the application file is complete.

The preferred date for receipt of applications for the following Fall Quarter is December 15. Applications received after this date have reduced opportunities for admission and financial aid.

Applicants must meet the University minimum requirement of an acceptable bachelor's degree with a B average in upper division coursework and/or prior graduate study. Exceptionally qualified applicants may be considered on an individual basis. Prior field experience is not required as a condition of admission, although a background of public health experience may be considered. In addition, applicants must be accepted by and accommodated in the department of the School of Public Health in which they wish to study. Applicants who need help in deciding on a department should speak either to the department administrators or to the staff in the Student Affairs Office.

Applicants to the School of Public Health must perform satisfactorily on the verbal and quantitative sections of a recent Graduate Record Examination (GRE), Medical College Admission Test (MCAT), or Dental Admission Test (DAT). MCAT or DAT scores are accepted only for applicants already holding M.D. or D.D.S. degrees. Graduate Management Admission Test (GMAT) scores are accepted only for applicants to the joint M.B.A./M.P.H. program.

The Epidemiology Department requires GRE scores. The Biostatistics Department has different criteria for evaluating performance on aptitude tests for its master's and doctoral degrees. Those applying to the biostatistics program should contact that department. No screening examination is required for admission; however, specified courses are required by the Departments of Biostatistics and Environmental Health Sciences. Applicants whose undergraduate coursework has been deficient in breadth of fundamental training have to take specified undergraduate courses after admission.

The prior program of study for applicants to the Master of Public Health degree should include adequate preparation in mathematics, physical sciences, biological sciences, and social sciences, and typically includes two courses each in mathematics, biological sciences, social sciences; one course in physical sciences; and other courses that constitute an adequate preparation for the proposed area of specialization.

Applicants whose prior work in the biological, physical, mathematical, and social sciences does not constitute adequate preparation for the proposed area of specialization must include courses in those sciences in their graduate programs; these may not be applied toward the minimum requirements for the degree.

Interdivisional International Health. The school offers several options for international or domestic students interested in international health. Faculty in all departments of the school are actively involved in health-related programs in foreign settings, and many departments on campus have international, health-related interests and courses relevant to health occupations and cross-cultural settings.

Interested students must specify the department most relevant to their skills area on their application, clearly indicating their international interests. Once admitted, students are given an appropriate adviser and directed to the international health committee, which is interdepartmental and promotes internationally oriented training and research. Its members consult with interested students and attempt to optimize the learning experience.

Applicants with particular interest in primary health care, including maternal and child health, family planning, applied nutrition, family health program planning, administration and evaluation, and refugee health, are advised to

apply to the Community Health Sciences Department.

Biostatistics

Students concentrating in biostatistics should have completed at least one year of calculus. Students whose mathematical preparation does not include sufficient calculus must take courses in the Mathematics Department while in the M.P.H. program. Majors in mathematics, statistics, computer science, or a field of application in biostatistics are preferred.

Environmental Health Sciences

Students concentrating in environmental health sciences should have a bachelor's (or master's) degree in chemistry, physics, biology, engineering, or other appropriate field. Preparation should include at least three quarters of general chemistry (including quantitative analysis) and two quarters of organic chemistry and/or biochemistry, mathematics through calculus, three quarters of biological sciences, and three quarters of physics. Substitutions for these requirements are considered for applicants with an otherwise superior academic background.

Health Services

Applicants interested in the joint M.P.H./M.B.A. program in the Health Services Department must take the GMAT, not the GRE.

Applicants to the one-year health services organization program must have a prior doctoral degree (M.D., D.D.S., J.D., Ph.D., or equivalent). Applicants with doctoral degrees from other countries should plan to take the two-year program. Satisfactory performance on the GRE is required, and a personal interview is recommended.

M.P.H. Program for Health Professionals

Health and allied professionals who are unable to pursue a degree program during their regular working hours may earn the M.P.H. degree by completing coursework in intensive summer sessions and in extended weekend sessions during the academic year. Courses are taught by the faculty of the School of Public Health, and all five departments in the school have the option to offer a specialization in their area.

Applicants are expected to fulfill the minimum overall requirements for admission to the M.P.H. program. In addition, they must have at least three years of professional experience or its full-time equivalent in a health care setting.

The first year of study is devoted to the specific core requirements in the area of specialization and to the required M.P.H. core courses in biostatistics, community health sciences, epidemiology, health services, and environmental health sciences. The second year of study entails completing required and elective courses in the specialty area, a master's project, and a report on that project. The master's project, which includes an internship carried out under faculty supervision, addresses a significant public health problem. The master's report, based on that project, focuses on the integra-

tion and application of theoretical and methodological approaches within public health to a specific problem. For further information, contact the department of interest.

Areas of Study

Areas of specialization and typical course plans, in addition to mandatory courses, are listed below.

Biostatistics

Required department courses include Biostatistics 110A and 110B (100A and 100B may be substituted with departmental permission); Biostatistics 200A, 201, 402A, 402B (402B satisfies the field training requirement), 403A, and 406; and eight units of elective courses from Biostatistics 200B, 200C, M210 through M237B, or 403B through 419 (except 406). Additional elective courses are recommended and should be selected in public health, biostatistics, or mathematics.

Community Health Sciences

Students select one of the following areas of concentration: health education/promotion, international family health, public health nutrition, public health policy, or sociocultural aspects of health. All students are required to complete Community Health Sciences 210, 211A-211B, and 400. It is expected that Community Health Sciences 210 and 211A-211B be completed during the student's first three quarters in residence. Normally two years or six quarters are needed to complete the 60 units of coursework required. Candidates with a prior doctoral degree or advanced preparation in a related field may complete an M.P.H. degree in one year (48 units), but only after formal consideration and approval by the department's faculty.

Health Education/Promotion. Community Health Sciences 282, 482, 483, and 487 are required. In addition, two to three elective courses from the list of specialty areas are selected in consultation with the adviser. Individual and experimental courses may not be applied toward the required course units. Additional courses may be elected, in consultation with the faculty adviser, from within the school or in other departments/schools at UCLA.

International Family Health. For health professionals (physicians, nurses, and nutritionists) who intend to work or have worked in developing areas and nonhealth professionals with work experience in international health, community development, or related work. Community Health Sciences 200, 434A, and 441 are required. In consultation with the adviser, additional elective courses are selected from Community Health Sciences 132, M140, 231, 233, M236, 246, 280, 294, 443, 447, 448, and relevant courses from within the school or other departments/schools at UCLA.

Public Health Nutrition. The public health nutrition specialization is for dietitians and nutritionists who have an R.D., are R.D.-eligible, or have an equivalent licensure/credential from another country; persons concurrently enrolled in an internship leading to R.D. eligibility; physi-

cians and dentists; and other health professionals on a case-by-case basis depending on completed graduate and undergraduate coursework. Community Health Sciences 231 and 443 are required. In consultation with the adviser, elective courses are selected from Community Health Sciences 212, 218, 233, 432, M436A, M436B, 444, 448, 449, and relevant courses from within the school and currently under development in the Community Health Sciences Department.

Public Health Policy. The public health policy specialization provides education in the policy process and policy analysis applied to health promotion and disease prevention. In addition to department requirements, Community Health Sciences M252, M287, and 482 are required; the internship requirement may be reduced for students with extensive prior experience. In consultation with the adviser, students must also select two courses from Community Health Sciences 214, 230, M236, 237, M274, 291, 432, M436A, M436B, and relevant courses from within the school or in other departments/schools at UCLA.

Sociocultural Aspects of Health is for students interested in the relation between social and cultural characteristics and health-related behaviors and outcomes. At least 20 units of sociocultural aspects of health courses are required. Students are required to complete Community Health Sciences 221 and one course from each of the following four areas: (1) age and the course of one's life: 237, 238, 285, 291; (2) ethnicity and culture: M140, M239, 447, 483; (3) gender: 220, 246, 431, 435; (4) social context: 230, 235, 272, 273, M275, 284. In consultation with the adviser, students may select additional electives from Community Health Sciences 283, 293, 294, 433, 474, and relevant graduate and professional courses from within the school or in other departments/schools at UCLA.

Environmental Health Sciences

Required courses include Biostatistics 100B; Environmental Health Sciences 200A, 200B 201, 210, 401 (or 410A and 410B), M411. Each departmental required course may be waived if a similar college-level course has been taken elsewhere, students can pass the waiver examination. Elective courses should be selected in the chosen area of specialization.

At least five of the courses must be graduate courses (200, 400, and 500 series). Thus, approximately 20 units are to be completed by specialty courses and electives for a two-year program, assuming a minimum of 12 units per quarter. It should be noted that the department core, supplemented by Environmental Health Sciences 470, satisfies the requirement for taking the registered sanitarian's examination.

Epidemiology

Students with no prior clinical doctorate degree are required to complete Biostatistics 100B, Epidemiology 200, 201A-201B, 220, 400, and

12 elective units, at least four of which must be selected from one of the following courses featuring computer use and applications, or a relevant course decided on after consultation with the adviser: Biostatistics 403A, 403B, Epidemiology 261, 401, 402, 410A, 410B, 414, 415, 418, and 419. The eight remaining units must be selected from either the computer use and applications courses or the following list of general electives: Epidemiology 202A, 203, 210, M212, 221, 222 223A, 223B, 224A, 224B, 227, M228, 230, 240, 241, 246, 247, 248, 251, 252, 253, M255, 260, 270, 280, 290, 411, and 417.

Students with a prior clinical doctoral degree are required to complete Biostatistics 100B, Epidemiology 200, 201A-201B, 400, and eight total elective units from either the general list of electives or those featuring computer use and applications.

All students must submit a report demonstrating competence in epidemiologic methodology. The report may not be submitted prior to the completion of Epidemiology 400, which must be taken after completion of course 201B.

Health Services

Health Services specialization programs include (1) health care management, (2) health policy, (3) health professionals, (4) health services organization, and (5) a cooperative M.P.H./M.B.A. All specialization programs require Health Services 200A-200B, 400, and a summer internship in a local health care organization, as well as School of Public Health core courses: Biostatistics 100A, Community Health Sciences 100, Environmental Health Sciences 100, and Epidemiology 100.

Students with a prior M.B.A. and three years of managerial experience in health care are required to take 15 courses rather than 18.

Health Care Management. The health care management specialization is a two-year program requiring 21 full courses and a major written research report based on the summer internship. Required courses include Health Services 234, M236, M249L, 251, 400, M422, 431, 433, 436, 442A, 442B, and Management 403. In addition, students select at least one elective course from Health Services 131, 132, 134, M204A, M204B, M204C, 214, 220, 231, 232, M233, 235, 238, 239, 240, CM241, M242, 249A through 249L, 250, M287, M411, 427, 434, 435, 438, 441, 444, 446, or 447E.

Health Policy. The Health Policy specialization is a two-year program requiring 21 full courses, a summer internship in a local health care organization, and a major written research report. Required courses include Health Services 214 or 249F or 249K, M233, M236, M249E, M249L, M287, 400, M422, 427, and 431. In addition, students select at least two elective courses from Health Services 131, 132, 134, M204A, M204B, M204C, 220, 231, 232, 234, 235, 238, 239, 240, CM241, M242, 249A through 249L, 250, M411, 431, 433, 434, 435, 438, 441, 442A, 444, 446, or 447E.

Health Professionals. The Health Professionals specialization is an executive-style program for people with at least three years of managerial experience in the health care field. It is a two-year program requiring 18 full courses and a major written research report based on the summer internship. Required courses include Health Services 132, 234, M236, M422, 431, 433, 436, 440A, 442A, 450, and Biostatistics 100B.

Health Services Organization. The health services organization specialization is a one-year program requiring a minimum of 12 full courses (48 units). Admission is limited to students with prior doctoral-level degrees (M.D., Ph.D., J.D., D.D.S., or equivalent). Required courses include Health Services M236 and either Management 403 or Health Services M249E. Students may petition to waive out of the summer internship and Health Services 400 requirements if they have prior experience of relevance to public health practice.

Cooperative M.P.H./M.B.A. The cooperative M.P.H./M.B.A. program is a three-year concurrent degree program. It requires a minimum of 12 full courses (48 units) in the School of Public Health and a summer internship in a local health care organization. Required courses include Health Services 400 and M422. Management 402 may substituted for Biostatistics 100A. Students are waived out of the Health Services 400 requirement if they have successfully completed an equivalent course in the M.B.A. program.

Cooperative Master's Degrees

Following are descriptions of combined programs of study leading to the M.P.H. degree. In the articulated degree programs listed below, no course may be used for credit toward more than one degree.

M.A. African Area Studies/M.P.H.

The School of Public Health and the African Area Studies Program have an articulated degree program whereby students can work sequentially for the Master of Arts degree in African Area Studies and the Master of Public Health. By planning the major field emphasis in public health while working toward the M.A. in African Area Studies, it may be possible to shorten the amount of time it would normally take to complete both degrees.

Students interested in this articulated program should write to the Assistant Graduate Adviser, African Area Studies Program, UCLA African Studies Center, and/or the Student Affairs Office, UCLA School of Public Health.

M.A. Asian American Studies/M.P.H.

The Asian American Studies Program and the Department of Community Health Sciences in the School of Public Health offer a concurrent degree program whereby students can work for the Master of Arts degree in Asian American Studies and the Master of Public Health. Students must complete the program requirements for both degrees. However, a maximum of 12 units of coursework in the School of Pub-

lic Health. may be applied toward both the M.A. in Asian American Studies and the Master of Public Health. When applying, the same statement of purpose may be submitted to each program. Applicants interested in this concurrent program should contact the Asian American Studies Program and the Student Affairs Office, UCLA School of Public Health.

M.A. Islamic Studies/M.P.H.

The School of Public Health and the Islamic Studies Program have a concurrent degree program whereby students can work for the Master of Arts degree in Islamic Studies and the Master of Public Health. A maximum of 12 units of coursework in the School of Public Health may be applied toward both the M.A. in Islamic Studies and the Master of Public Health. Applicants interested in this concurrent program should write to the Islamic Studies Program and the Student Affairs Office, UCLA School of Public Health.

M.A. Latin American Studies/M.P.H.

The School of Public Health and the Latin American Studies Program have arranged an articulated degree program, organized to permit specializations within the M.A. and the M.P.H. degrees, with the award of both degrees after approximately three years of graduate study. Qualified students apply to the graduate adviser of the Latin American Studies M.A. degree program and to a relevant area of public health, such as (1) environmental and nutritional sciences, (2) epidemiology, (3) health education, (4) population and family health.

Potential applicants should contact the Graduate Adviser, Latin American Studies, UCLA Latin American Center, and/or the Public Health/Latin American Studies Articulated Degree Program Adviser, UCLA School of Public Health.

M.B.A./M.P.H.

The Department of Health Services and the John E. Anderson Graduate School of Management offer a three-year concurrent degree program designed for students who desire a management career in health care and related fields. The program reflects the combined interest of employers, faculty, and students who recognize the increasing challenges facing managers in the health care industry and the need for highly skilled and sensitive individuals who can creatively take on these challenges. Students should request application materials from both the M.B.A. Admissions Office, John E. Anderson Graduate School of Management, and the Health Services Management Program, UCLA School of Public Health. GMAT scores are required for admission.

Course Requirements

Students must complete at least one year of graduate residence at the University of California and a minimum of 11 full courses (44 units), at least six of which must be graduate courses and at least two of which must be 400-series courses. Only one 596 course (four

units) may be applied toward the six graduate courses; 597 and 598 courses may not be applied toward the degree.

Required school core courses include Biostatistics 100A or 110A; Community Health Sciences 100 (210 for community health sciences majors); Environmental Health Sciences 100 (200A-200B for environmental health sciences majors); Epidemiology 100 (200, 201A-201B for epidemiology majors); and Health Services 100 (200A-200B for health services majors). Each core course may be waived if students have taken a similar college-level course elsewhere and can pass the waiver examination.

In addition to the core courses, at least three courses (two or four units) outside the area of specialization are strongly recommended.

Only courses in which a grade of C- or better is received may be applied toward the requirements for a master's degree. Students must maintain an average of no less than 3.0 (B) in all courses required or elected during graduate residence at the University of California.

Comprehensive Examination Plan

Students must pass a comprehensive examination in their department. Students may be reexamined once. The aim of the examination, as a culminating experience, is to assess the student's ability to select theories, methods, and techniques from across the content matter of a field, integrate and synthesize knowledge, and apply it to the solution of public health problems.

Thesis Plan

None.

Doctoral Degree

Admission

In addition to the University minimum requirements, for admission to the Doctor of Public Health (Dr.P.H.) degree program, the school requires:

(1) Satisfactory performance on the Graduate Record Examination (GRE). Applicants to the Department of Community Health Sciences, at the discretion of the department, may substitute equivalent performance on the Medical College Admission Test (MCAT) or the Law School Admission Test (LSAT).

(2) Completion of the M.P.H. or a master's degree in an appropriately related field. If the master's degree is in a field other than public health, applicants must have taken the equivalent of the core mandatory M.P.H. courses or include them in the course of study after admission.

(3) At least a 3.0 junior/senior grade-point average, at least a 3.5 GPA in graduate studies or demonstrated superiority in graduate work, and at least a B in each of the mandatory core courses.

(4) A positive recommendation by a department in the School of Public Health. Applicants to the Department of Community Health Sci-

ences must have acceptance by an initial doctoral adviser in the department.

(5) Approval by the doctoral admissions committee and the associate dean for Student Affairs. Screening examinations may be required by each department.

(6) A writing sample is required by the Department of Community Health Sciences.

(7) The Department of Community Health Sciences requires at least 600 on the Test of English as a Foreign Language (TOEFL) for students whose undergraduate degree is from an institution whose primary language of instruction is not English.

It is recommended that applicants to the Department of Community Health Sciences contact one or more members of the faculty whom they are considering as advisers in order to ensure acceptance by a faculty mentor as the initial adviser. The applicant should have favorable recommendations from teachers and employers concerning past performance and potential as a doctoral student in public health. The statement of purpose must be clear, outlining goals and career objectives as they relate to the focus of the doctoral program.

Major fields or Subdisciplines

Major fields and subdisciplines and typical course plans are listed below.

Biostatistics

Consult the graduate adviser.

Community Health Sciences

There are five areas of specialization or examination within the department: public health policy, health education/promotion, sociocultural aspects of health, public health nutrition, and international family health.

Environmental Health Sciences

Recommended courses are determined in consultation with the adviser. Six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments other than Environmental Health Sciences are required for breadth. The major requires an additional area of concentration which may be either inside or outside the school.

Epidemiology

The recommended program includes additional courses in biostatistics, demography, and epidemiology beyond those required for the M.P.H.; courses or directed group study in specialized areas of infectious and chronic disease epidemiology or application of epidemiology to health planning, management, and/or policy; and laboratory and clinical studies in medical, health, or biological sciences.

Six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments other than Epidemiology are required for breadth. (Students may petition to include up to two 100-level courses.) The major requires an additional area of concentration which may be either inside or outside the

school (e.g., biostatistics, biology, microbiology and immunology, neuroscience).

Health Services

The Dr.P.H. in Health Services is intended to prepare students for leadership positions in health services administration. In contrast to the Ph.D., the orientation is professional rather than academic and comprehensive rather than specialized.

The requisites are an M.P.H. degree or its equivalent, and full-time work experience in some aspect of public health is highly recommended. Candidates are then enrolled in the Dr.P.H. which may (with full-time study) be completed in three years.

In the first two doctoral years, the formal coursework is intended to acquaint students with the full scope of public health knowledge. Students are normally expected to complete 72 units or 18 full courses beyond the M.P.H. degree to develop mastery in the following areas: (1) basic tools of social analysis; (2) health and disease in populations; (3) promotion of health and prevention of disease; and (4) health systems and their management. The specific course program depends on the applicant's previous coursework and experience.

Students must take a minimum of six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments other than Health Services.

The third doctoral year includes a residency in a public or private health services organization, seminar courses (eight units) devoted to principles and strategies of health services leadership, and the preparation of a problem-solving dissertation related to the residency experience.

After completion of the second doctoral year, candidates must pass a qualifying examination. Normally, one reexamination after failure is allowed. After the third doctoral year, a final oral examination based on the dissertation is required of all candidates.

Course Requirements

Course requirements in the major field depend on the department/program and the field chosen. Students must take a minimum of six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments outside the major department.

The major department requires an additional area of concentration which may be either inside or outside the school. In departments allowing it, an equivalent field experience completed while a doctoral student and approved by the guidance committee may be substituted for the additional area of concentration.

Biostatistics

A written screening examination of all students entering the doctoral program is required and must be successfully completed before the end of the first year in the program, if not taken prior to entering. Courses covered by this and other examinations are determined in consul-

tation with an adviser and the department faculty. Students must complete the following courses, unless previously taken: Biostatistics 115, 200A, 200B-200C, M250A-M250B; any three additional graduate-level courses in biostatistics selected with consent of the adviser; three courses in the 400 series selected with consent of the adviser; Statistics M100A, 100B. All registered doctoral students must enroll in Biostatistics 402B (consulting laboratory/field training course) for one quarter each year and in Biostatistics 245 every quarter.

In addition, six full courses (four must be at the 200 or 400 level) in at least two School of Public Health departments/programs other than Biostatistics are required for breadth. The department also requires an additional area of concentration which may be either inside or outside the school. Biostatistics 402B may be used as the additional area of concentration.

Electives, selected in consultation with the adviser, should be chosen from courses in mathematics, biomathematics, survey research methods, operations research, computer data processing, and other appropriate areas.

Community Health Sciences

If students do not have a master's degree in public health, the school's core courses for the Master of Public Health (M.P.H) degree are required: Biostatistics 100A, Epidemiology 100, Health Services 100, and Environmental Health Sciences 100; and the department's core courses, Community Health Sciences 210, 211A-211B. Additionally, all students are required to take the following courses if they have not already taken them or their equivalents during the course of their master's studies: Community Health Sciences 212, Biostatistics 100A, 100B, and 406. These courses do not count toward the minimum course requirements for the doctoral degree.

In addition to the coursework specified above, students must take a minimum of 48 units in residence in the doctoral program. Twenty of the 48 units required must be taken within the Department of Community Health Sciences. Only four units of individual studies (Community Health Sciences 596) may be counted toward the 48-unit minimum requirement. Students must take a minimum of two courses (eight units) in research methodology (i.e., data acquisition) and two courses (eight units) in statistics (i.e., data analysis). These courses may be taken inside or outside of the School of Public Health. Students are required to attend the Doctoral Roundtable (Community Health Sciences 286) continuously from the first year of residency until they have been advanced to candidacy. The Doctoral Roundtable does not fulfill any of the 48 units required for the doctorate.

Students must complete a minor which is expected to be in another department within the School of Public Health. Six graduate-level courses (24 units) are required, four units of which must be taken from within one depart-

ment. Students must consult with their advisers before declaring a minor.

Written and Oral Qualifying Examinations

Before advancement to candidacy, students must pass written examinations in the major field prepared and administered by the guidance committee or by the faculty of the department. Normally no more than one reexamination after failure is allowed. The doctoral committee is nominated after students have made a tentative decision on a dissertation topic.

The doctoral committee consists of at least four faculty members who hold professorial appointments. Two of the faculty must be tenured. Three of the four must hold appointments in the School of Public Health; one must be an outside member who holds no appointment in the School of Public Health; one of the four must be from the minor field.

The doctoral committee administers the University Oral Qualifying Examination after the written examinations have been successfully completed.

Community Health Sciences

Before advancement to candidacy, all coursework must have been completed, and students must have passed two written examinations and an oral qualifying examination in the major field. The first written examination is taken by all students. The other is tailored to the specific interests of the individual student. Both written examinations may be repeated only once. Additionally, students must complete the requirements for the minor field.

The first examination provides an assessment of the student's breadth of substantive knowledge, theory, and methods that are common to the disciplines that comprise community health sciences. Students are expected to demonstrate a coherent and well-synthesized command of this material. The examination is administered by the departmental doctoral committee in the Fall Quarter of each year. The second examination is in one of the areas of specialization: public health policy, health education/promotion, sociocultural aspects of health, public health nutrition, and international family health. Students are expected to demonstrate in-depth knowledge in the area and to be able to apply this knowledge and knowledge derived from the minor to problems or practice and policy. The examination is based on a reading list generated by the student in consultation with the student's guidance committee, which also administers the examination. It is administered after the first examination at a time that has been agreed upon mutually by the students and the guidance committee.

After the student has passed the written qualifying examinations and completed the minor requirements, and at least one month prior to taking the University Oral Qualifying Examination, a doctoral committee is nominated. The student first selects the committee chair, who

also serves as the adviser. The student and chair then work together to nominate the remaining committee members. The doctoral committee consists of at least four faculty members including the chair, who hold professorial appointments at UCLA. Two of the faculty must be tenured. Two of the four must hold appointments in the Department of Community Health Sciences; one must be an outside member who holds no appointment in the School of Public Health; one of the four must be from the minor field. Eligible faculty include those in the tenure-eligible series, the in-residence series, acting or emeritus in these series; in addition, one of the four committee members, who may also cochair if appropriate, may hold an appointment in the adjunct or clinical professorial series. The composition of the committee must be approved by the department chair. The doctoral committee guides the student's progress toward completion of the dissertation.

The student is advanced to candidacy and commences work on a dissertation by passing the University Oral Qualifying Examination, which is administered by the doctoral committee. Only the student and the committee members attend this examination; all committee members must be present. The examination may be repeated once if a majority of the committee so recommends.

PUBLIC POLICY AND SOCIAL RESEARCH SCHOOLWIDE PROGRAMS

School of Public Policy and Social Research

UCLA
3250 Public Policy Building
Box 951656
Los Angeles, CA 90095-1656
(310) 206-4613
<http://www.spspr.ucla.edu/>

Scope and Objectives

The School of Public Policy and Social Research offers an undergraduate minor in Public Policy.

Undergraduate Study

Public Policy Minor

The Public Policy minor provides undergraduates with a systematic overview of public policy questions, deals with these questions in theoretical and conceptual ways, and exposes students to practical issues of public policy through the examination of specific policy issues and real-world policy questions.

To enter the minor, students must have an overall grade-point average of 2.0 or better, enroll in Policy Studies 10A, and file a petition at the School of Public Policy and Social Research Office of Academic Services, 3371 Public Policy Building. For further information, contact Professor Eric H. Monkkenon at (310) 206-4613.

Required Lower Division Core Courses (eight units): Policy Studies 10A, 10B. Highly recommended: one statistics course.

Required Upper Division Courses (20 units): (1) Three courses from one of the following clusters: *labor and work cluster* — Policy Studies 141, C142, C144, 145, 148; *policy studies cluster* — Policy Studies 101, 102, 103, 104, M120; *social welfare cluster* — Social Welfare 100A, 100B, 101, 102, 104A through 104E, 105; *urban policy and planning cluster* — Urban Planning 191, 192, 193 (may be repeated for credit with topic change), 197; (2) one elective course offered by the School of Public Policy and Social Research not used to satisfy the core or cluster requirement; (3) research seminar (Policy Studies 197); fieldwork experience taken for credit may be substituted for the research seminar by petition.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

RADIATION ONCOLOGY

School of Medicine

UCLA
B265 UCLA Medical Plaza 200
Box 956951
Los Angeles, CA 90095-6951
(310) 794-1252

Chairs

H. Rodney Withers, M.D., D.Sc., *Chair*
Guy J.F. Juillard, M.D., *Vice Chair, Clinical Affairs*
William McBride, D.Sc., *Vice Chair, Division of Experimental Radiation Oncology*
James B. Smathers, Ph.D., *Vice Chair, Physics*

Scope and Objectives

The Department of Radiation Oncology includes clinical divisions at the UCLA Medical Plaza and Medical Center, West Los Angeles VA Medical Center, and divisions of experimental radiation biology and medical radiation physics. Research and teaching facilities are available at the UCLA Medical Plaza, UCLA Medical Center, and West Los Angeles VA Medical Center.

The primary clinical mission of the department is the management of patients who have cancer. The purpose of using radiation therapy, rather than or in addition to surgery, is to pre-

serve function and/or cosmesis while eliminating the cancer. Other activities include total body irradiation before bone marrow transplantation and stereotactic radiosurgery for A-V malformations, meningiomas, and malignant intracranial lesions. Research interests include clinical trials, radiation biology, radiation modifiers, molecular biology, immunology, and applied physics. Knowledge of the disease in question, the comparative efficacy of radiation therapy and other methods, radiation biology and pathophysiology, and the physical characteristics of various radiations is essential.

The educational programs serve medical, dental, basic science (biology and physics), nursing, and radiation therapy students, and community and postgraduate physicians; there also is a four-year program for residents who are qualifying for certification in radiation oncology by the American Board of Radiology.

For further details on the Department of Radiation Oncology and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

RADIOLOGICAL SCIENCES

School of Medicine

UCLA
BL-428 Center for the Health Sciences

Chairs

Richard J. Steckel, M.D. (*Leo G. Rigler Professor of Radiological Sciences*), *Chair*
Richard H. Gold, M.D., *Executive Vice Chair*
Barbara M. Kadell-Wootton, M.D., *Vice Chair*
Osman Ratib, M.D., Ph.D., *Vice Chair*

Scope and Objectives

The medical student program in radiological sciences is designed to introduce students to the spectrum of diagnostic imaging modalities and their role in the clinical management of patients. It provides knowledge of essential radiographic anatomy and key imaging features of common diseases. The basic principles of all forms of diagnostic imaging pertaining to thoracic, musculoskeletal, gastrointestinal, genitourinary, cardiac, neuroradiology, mammography, pediatrics, emergency radiology, nuclear medicine, computed tomography, magnetic resonance imaging, ultrasound, and interventional radiology are provided. Students acquire interpretative skills by didactic instruction and interactive teaching sessions and through self-study of radiologic film files. A two-week core clerkship is offered once every four weeks to

third- and fourth-year medical students. There are no on-call responsibilities.

Greater depth of experience is provided by the four weeks of elective clerkship offered to fourth-year medical students which emphasizes training in the subspecialties selected by students from the list above.

For further details on the Department of Radiological Sciences and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

Adjunct Associate Professor

S. Scott Bartchy, Ph.D. (*History*)

Adjunct Assistant Professor

David C. Wilson, Ph.D. (*Philosophy*)

Scope and Objectives

The UCLA major in the Study of Religion is designed to give students a broad humanistic perspective. It introduces students to several religious traditions and thus to an appreciation of the very nucleus of civilization in various periods of history and various parts of the world, as well as to an understanding of fundamental human orientations. The program also provides opportunity to study one or more particular religious traditions in greater depth. Cohesion and integrity in the program are furthered by courses dealing with philosophical problems in religion and with general anthropological reflections.

Undergraduate Study

Study of Religion B.A.

Preparation for the Major

Required: History 4; Philosophy 2; two courses from Anthropology 9, East Asian Languages and Cultures 60, History 1A, 1B, 1C, 9A, 9C, 9D, 10A, 10B, 11A, 11B.

The Major

Required: A minimum of 14 upper division courses from the list below, of which at least four (including Study of Religion 100 and Philosophy 175) must be from Group I, at least two must be from each of Groups II and IV, and at least three must be from Group III (at least one on each of the three religious traditions listed). No more than five of the 14 may be from any one group. A course may be taken twice, on different topics, for credit toward the major where repetition is allowed by the department offering the course. Variable topics courses not listed below (e.g., History 197) may be approved by the adviser as satisfying requirements for which their content is appropriate. A maximum of two upper division courses, not listed below, in an ancient language relevant to the course of study may be applied toward the major requirements (but not the group requirements) with consent of the adviser.

Special studies courses (199) may be applied toward the major but not toward a group requirement; a maximum of 12 units, approved by the adviser, may be applied. No course for the major or preparation for the major may be taken on a P/NP grading basis.

Honors Program

The honors program provides exceptional students with an opportunity to do independent research under the tutorial guidance of a faculty member. Students admitted to honors should take three 199 courses under the guidance of the sponsoring professor. The first 199 course should be taken in Spring Quarter of the junior year, the second during the following Fall Quarter, and the third during Winter Quarter of the senior year. The three courses count as part of the regular requirement of 14 upper division courses. The program culminates in an honors thesis.

In order to qualify for admission, students should have a minimum grade-point average of 3.4. The 199 courses designed for the program and the thesis topic should be approved by the committee in charge of the major.

For further information, contact Professor S. Scott Bartchy at the program address.

Study of Religion

Upper Division Courses

100. Undergraduate Seminar: Study of Religion. (4) Limited to 20 students. Interdisciplinary approach to some major topics in study of religion, such as religion and politics, mysticism, ideas of revelation, myth and religion, worship and ritual. May be repeated for credit with consent of instructor.

110. Religion and Violence. (4) Seminar, three hours; discussion, one hour. Exploration of capacity of religion to mobilize and legitimate violence. Materials include theoretical texts by Rene Girard, Walter Burkert, Jonathan Z. Smith, and David Rapoport and case studies dealing with religion and violence in India, Northern Ireland, Egypt, Lebanon, Israel, Palestine, Sri Lanka, and the U.S.

120. Abrahamic Religions: Traditions in Tension. (4) Seminar, three hours. Examination of Abrahamic tradition as received and developed by Jews, Christians, and Muslims according to rubrics of linkage and interaction, with view both to potential clashes in the 21st century and to resources inherent in these traditions for heading off such clashes and misunderstandings.

Course List

Courses marked with an asterisk have readings in foreign languages. See departmental course listings for requisites.

Group I: Methods

Anthropology

156. Comparative Religion

History

193A. History of Religions: Myth

193E. Special Topics in History of Religions

Philosophy

175. Topics in Philosophy of Religion

Study of Religion

100. Undergraduate Seminar: Study of Religion

110. Religion and Violence

Theater

101A. History of World Theater and Drama: Ritual and Religious Drama

Group II: Nonliterate and Ancient Religious Traditions

Ancient Near East (Near Eastern Languages)

130. Ancient Egyptian Religion

Anthropology

114P. Ancient Civilizations of Western Middle America (Nahuatl Sphere)

114Q. Ancient Civilizations of Eastern Middle America (Maya Sphere)

171. Sub-Saharan Africa

174P. Ethnography of South American Indians

177. Cultures of the Pacific

Classics

166A. Greek Religion

166B. Roman Religion

168. Comparative Mythology

Folklore and Mythology

M122. Celtic Mythology

M126. Baltic and Slavic Folklore and Mythology

130. North American Indian Folklore and Mythology Studies

131. Folklore of India

M155. Oral Traditions in Africa

History

193D. Religions of the Ancient Near East

Iranian (Near Eastern Languages)

170. Religion in Ancient Iran

World Arts and Cultures

181B. Dance in Southeast Asia

181D. Dance in South Asia

C187. Dance in Native American Cultures

Group III: Western and Near Eastern Religious Traditions

Christianity

Classics

M170. Power and Imagination in Byzantium

Greek (Classics)

*130. Readings in the New Testament

History

119M. The Christian Church, 100 to 1517

120M. The Christian Religion, 100 to 1350

125B. History of Modern Europe: Baroque Culture and Absolutist Politics, 1600 to 1715

150C. History of Religion in the U.S.

194A. History of Early Christians

194B. Religious Environment of Early Christians

194C. Jesus of Nazareth in Historical Research

Philosophy

100B. Medieval and Early Modern Philosophy

107. Topics in Medieval Philosophy

118. Kierkegaard

Slavic (Slavic Languages)

201. Introduction to Old Church Slavic

Islam

Arabic (Near Eastern Languages)

*120. Islamic Texts

Art History

Scope and Objectives

The Romance Linguistics and Literature Program emphasizes modern linguistic and literary theories in the study of Romance languages. Linguistic and literary theories can be pursued independently or jointly; however, the integration of linguistic and literary knowledge is taken to be one of the highest aims of this interdepartmental graduate program.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The Romance Linguistics and Literature Program offers the Master of Arts (M.A.) degree in Romance Linguistics and Literature.

Admission

The UCLA B.A. degree in French, Italian, Portuguese, or Spanish, or equivalent, is required. Applicants to the M.A. program are expected to have a grade-point average of at least 3.4 in upper division courses, especially in those judged germane to the proposed program. Three letters of recommendation and the General Test of the Graduate Record Examination (GRE) are also required. Applicants admitted from elsewhere with preparation considered deficient in view of the intended specialization are required to take specified upper division courses. Such courses may be taken concurrently with graduate courses, but they may not be applied toward the course requirements for the M.A. degree. Before enrolling for the first quarter in the program, new students must consult the program chair concerning the formation of their guidance committee. If students know only the language of their majors, they should prepare in at least one other Romance language during the first graduate year so they can take courses in their minor no later than the second year of graduate study.

Areas of Study

Consult the department.

Course Requirements

Twelve courses are the minimum requirement, of which six courses (at least five of them graduate) must be in the major language, with specialization either in linguistics or in literature. One course in the history or development of the major language is highly recommended. At least three courses would be in the minor language, also with specialization in either linguistics or in literature. The remaining three courses should be selected in consultation with the guidance committee so as to be logically supportive of the student's major field of study. Linguistics 20 is required as a requisite for all students majoring in the linguistics field but is not counted as part of the total number of courses required for the degree. Up to eight units of Romance Linguistics and Literature 596 may be applied toward the M.A. degree. Courses 597 and 598 may not be applied toward the degree.

Comprehensive Examination Plan

The comprehensive examination is administered by three members of the guidance committee, appointed by the program chair. The written examination, consisting of one four-hour examination in the major field, one two-hour examination in the minor field, and one oral examination not to exceed one hour, is given each quarter in the second week prior to final examinations. If the examination or any part thereof is failed, the failed portions may be retaken once when the examination is next regularly offered. Only those students who attain a high pass grade on the master's examination are automatically admitted to the Ph.D. program.

Thesis Plan

The program favors the comprehensive examination plan, but under special circumstances M.A. theses for exceptionally well-qualified students are approved. Students may petition for authorization to write an M.A. thesis only after completion of six courses applicable toward the degree. It is the student's responsibility to choose an appropriate topic and find a professor to direct the thesis. After completion of the thesis, students must pass a two-hour oral examination testing knowledge of the field of the thesis and general competence. Only those students who attain a high pass on the examination are automatically eligible for admission to the Ph.D. program.

Doctoral Degree

Admission

The UCLA Master of Arts degree in Romance Linguistics and Literature or the UCLA Master or Arts degree in French, Italian, Portuguese, or Spanish, or equivalent is required for admission to the program leading to the Ph.D. degree in Romance Linguistics and Literature. A strong academic record (normally a grade-point average of 3.4 or better), three letters of recommendation, and the Graduate Record Examination (GRE) General Test (normally a combined verbal/quantitative score of 1,100 or better) are required.

Formal application is required of all candidates. Applicants who have completed the UCLA M.A. degree in Romance Linguistics and Literature with distinction (high pass) are automatically eligible for admission to the Ph.D. program; those who received a middle pass are reviewed like candidates from other institutions; those who received a low pass are ineligible for admission. Students whose M.A. program registers deficiencies in scope or quality may be admitted but are required to pass (with grades of B or better) three graduate courses approved by the chair.

Following formal admission, students form a guidance committee in consultation with the chair. Students then meet as soon as possible with their guidance committee to work out a program of courses and set a tentative date for the qualifying examinations. The guidance

committee has final authority to prescribe the course of study. Until students have met with this committee and placed themselves under its direction, they are not officially in the Ph.D. program.

Major Fields or Subdisciplines

The program recognizes two fields of specialization: linguistics or literature.

Linguistics. (1) The present-day grammar of the Romance language of major interest and its relation to the grammar of its sister languages and to language in general, (2) the development of the Romance language of major interest in relation to its sister languages (and possibly other interrelated cultural aspects) from the perspective of historical linguistics, and (3) the genetic and typological relationships of the Romance languages to other Indo-European languages and to language in general. The two minors may be other Romance languages, or one other Romance language plus a field of Romance literature.

Literature. One of the following in the literatures of at least two Romance languages: (1) early Romance literature and philology; (2) Renaissance and baroque; (3) modern literature, preferably with emphasis in one century.

The first minor may be one of the preceding fields not chosen for the major. The second minor may be the same field or a new field in another Romance language, or some other related field in the major language or in Romance linguistics.

Course Requirements

In each of the two specializations (linguistics or literature) the Ph.D. program consists of a major and two minors. The courses (a minimum program) are distributed as follows: major — five courses; first minor — three courses; second minor — two courses. At least one seminar is required in each of the three fields. In addition to those required for the master's degree (or equivalent), at least 10 other graduate courses (of which no more than two 596 courses may be applied), as well as such courses as the guidance committee may prescribe, are required. Linguistics 20 is required as a prerequisite for all students majoring in the linguistics field but is not counted as part of the total number of courses required for the degree.

Written and Oral Qualifying Examinations

The qualifying examinations, given by the doctoral committee during the Fall, Winter, and Spring Quarters, consist of (1) a three-hour written examination in the major field; (2) a two-hour examination in the first minor; (3) a one-hour examination in the second minor; and (4) a two-hour University Oral Qualifying Examination in the three fields, at which time the prospectus for the dissertation is also discussed and approved. Failed portions of the examination may be repeated once after any

remedial preparation the committee may specify.

The dissertation may be on any subject within the general area of Romance linguistics and literature. If more than five calendar years elapse between advancement to candidacy and the presentation of the dissertation, the program may require revalidation of the qualifying examinations.

Romance Linguistics and Literature

Graduate Courses

202A-202B. Topics in Historical Romance. (4-4) Seminar, three hours; outside study, nine hours. Requisites: Linguistics 120A/120B or Spanish 120A/120B. Course 202A is requisite to 202B. Study of main historical changes in phonology, morphology, and syntax undergone by different Romance languages (mainly Spanish, Italian, and French). S/U or letter grading.

204A-204B. Romance Syntax: French (1 to 4 each). Lecture, three hours. Requisites: Linguistics 120B, 200B. Course 204A is requisite to 204B. Structure of French from point of view of contemporary syntactic theory, with emphasis on considerations of comparative syntax with other Romance languages. Topics include verbal/auxiliary system; WH-movement and Complementizer system; clitic constructions, causatives, inversion phenomena; quantifier distribution; impersonal constructions; negation and subjunctive. S/U or letter grading.

211. Comparative Romance Syntax. (4) Lecture, three hours. Requisite: French 210A or Portuguese 204A or Spanish 204A. Comparative study of syntactic processes in Romance languages. Investigation of parameters underlying linguistic variation.

255. Topics in Romance Syntax. (1 to 4) Topics in syntax of Romance languages, with emphasis on recent development in comparative studies; theoretical innovations based on Romance syntax.

596. Directed Individual Study or Research. (4 to 8) Study or research in areas or on subjects not offered as regular courses. Eight units may be applied toward M.A. degree requirements. S/U grading.

597. Preparation for Graduate Examinations. (4 to 12) Individual preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be taken only once for each degree examination and only in term that comprehensive or qualifying examinations are to be taken. S/U grading.

598. Research for M.A. Thesis. (2 to 12) Research in preparation of M.A. thesis. S/U grading.

599. Research for Ph.D. Dissertation. (2 to 12) Preparation: successful completion of Ph.D. qualifying examinations. Research for and preparation of Ph.D. dissertation. S/U grading.

Course List

In consultation with the appropriate adviser(s), courses should be selected with an eye to the organic relationship between them, preferably among those listed below and/or their requisites:

Introductory Courses

Italian

201. Bibliography and Methods of Research

Spanish

M200. Research Resources

Linguistics Courses

Grammatical Theory: Linguistics

201. Phonological Theory II

206. Syntactic Theory II

Development of the Romance Languages

Hispano-Romance: Spanish

M205A-M205B. Development of Portuguese and Spanish Languages

Indo-European: Indo-European Studies

210. Indo-European Linguistics: Advanced Course

280A-280B. Seminars: Indo-European Linguistics

Italic Dialects: Latin

242. Italic Dialects and Latin Historical Grammar

Italo-Romance: Italian

222A. History of the Italian Language

Latin History: Latin

240. History of the Latin Language

Medieval Latin: Latin

231A-231B. Seminars: Medieval Latin

Paleography: History

219A-219B. Paleography I, II

Romance Dialectology: Italian

222C. Italian Dialectology

Spanish

209. Dialectology

Romance Linguistics: Linguistics

225G. Linguistic Structures

Vulgar Latin: Latin

232. Vulgar Latin

Studies in the History of the Romance Languages

Gallo-Romance: French

214. Problematics of Medieval Language and Literature

Hispano-Romance: Spanish

M251A-M251B. Studies in Galegan-Portuguese and Old Spanish

Italo-Romance: Italian

210. Studies in Early Italian Literature

222A-222B-222C. Studies in History of Italian Language

Synchronic Linguistics

Advanced Grammar: French

201. Literary Research and Composition

Italian

222B. Structure of Modern Italian

Portuguese

202. Synchronic Morphology and Phonology

204A-204B. Generative Grammar

Spanish

202A. Phonology

202B. Morphology

204A-204B. Generative Syntax and Semantics

Studies in Linguistics and Dialectology: Spanish

256A-256B. Studies in Spanish Linguistics

257. Studies in Dialectology

Literature Courses

History of Ideas: French

260A-260B. Studies in History of Ideas

Literary Criticism: French

202. Historical and Philosophical Background to French Literary Criticism

203. Contemporary Theories

258A-258B. Studies in Literary Criticism

Italian

205A-205B. Studies in Criticism

Spanish

M201A-M201B. Literary Theory and Criticism

Literary History: History

218. Medieval Latin Literary History

Philosophy and Literature: French

259A-259B. Studies in Philosophy and Literature

Early Romance Literature

Petrarca: Italian

214C. Studies in Medieval Literature: Petrarca's *Canzoniere*

251. Seminar: Petrarch

Studies in Early Romance Literature: French

215A-215B. Medieval Literature

250A. Major Medieval Texts

250B. Structures of Medieval Literature

250C. Problems in Medieval Literature

Italian

210. Studies in Early Italian Literature

214A-214F. Studies in Medieval Literature

215A-215B. Studies in 15th-Century Literature

250A-250D. Seminars: Dante

252. Seminar: Boccaccio

Portuguese

C224. Early Portuguese Literature

Spanish

222. Medieval Epic and Narrative Poetry

223. Medieval Prose

262A-262B. Studies in Medieval Spanish Literature

Modern Romance Literature

Genre Studies: Portuguese

252. Studies in Early Portuguese Literature

253. Studies in Modern Portuguese Literature

254. Studies in Early Brazilian Literature

255. Studies in Modern Brazilian Literature

Studies in the 18th Century: French

218. Enlightenment

254A-254B. Studies in the 18th Century

Italian

218A-218D. Studies in 18th-Century Literature

256A-256B. Seminars: 18th Century

Portuguese

C227. 19th-Century Portuguese Literature

C232. 19th-Century Brazilian Literature and Culture

Spanish

229. Romanticism

239. Romanticism and Realism in Spanish-American Literature

270A-270B. Studies in 18th-Century Spanish Literature

277A-277B. Studies in Colonial Spanish-American Literature

Studies in the 19th Century: French

219. 19th Century

255A-255B. Studies in the 19th Century

Italian

219A-219D. Studies in 19th-Century Literature

257A-257B. Seminars: Romanticism

Portuguese

C228. Post-Romanticism and Naturalism in Portuguese Literature

Spanish

230. Realism and Naturalism

271A-271B. Studies in 19th-Century Spanish Literature

278A-278B. Studies in 19th-Century Spanish-American Literature

Studies in the 20th Century: French

220. 20th Century

221A-221B-221C. French-African Literature

256A-256B. Studies in Contemporary Literature

257A-257B. Studies in French-African Literature

Italian

220. Studies in Turn-of-the-Century Literature

221A-221E. Studies in 20th-Century Literature

258A-258B. Seminars: Contemporary Italian Literature

Portuguese

C229. 20th-Century Portuguese Literature

C234. Brazilian Modernism

C235. 20th-Century Brazilian Literature

Spanish

232. Spanish Prose Literature from 1898 to the Civil War

233. Spanish Prose Literature after the Civil War

234. Spanish Drama and Poetry from 1898 to the Civil War

235. Spanish Drama and Poetry after the Civil War

240. Major Currents in Modern Spanish-American Literature

243A-243B. Contemporary Spanish-American Poetry

244A-244B. Contemporary Spanish-American Novel

245. Contemporary Spanish-American Essay

272A-272B. Studies in 20th-Century Spanish Literature

280A-280B. Studies in Contemporary Spanish-American Literature

Renaissance and Baroque Literature

Cervantes: Spanish

227. Cervantes

Studies in Renaissance and Baroque Literature: French

216. Renaissance

217. 17th Century

251A-251B. Studies in the Renaissance

253A-253B. Studies in the 17th Century

Italian

216A-216E. Studies in the Renaissance

217. Studies in 17th-Century Literature

253A-253B-253C. Seminars: Chivalric Poetry in Italy

255A-255B. Seminars: Baroque

Portuguese

C225. Camões and the Portuguese Renaissance

C226. Baroque and Neoclassical Portuguese Literature

C231. Colonial Brazilian Literature and Culture

Spanish

224. Poetry of the Golden Age

225. Drama of the Golden Age

226. Prose of the Golden Age

237. Literature of the Spanish Conquest

264A-264B. Studies in Golden Age Spanish Literature

ROTC PROGRAMS

College of Letters and Science

In accordance with the National Defense Act of 1920 and with the concurrence of The Regents of the University, a unit of the Senior Division Reserve Officers' Training Corps (ROTC) was established on the Los Angeles campus of the University in July 1920.

This voluntary training allows students to qualify for an officer's commission in the Army, Navy, Air Force, or Marine Corps while completing their college education. ROTC courses are offered by three departments within the College of Letters and Science: Aerospace Studies (Air Force), Military Science (Army), and Naval Science (Navy and Marine Corps). They are not considered academic majors, but ROTC courses may be taken as free electives and applied toward the total course requirements of the major. The ROTC program is also available through UCLA Extension.

All three ROTC departments offer voluntary four-year programs for incoming freshmen and two-year programs for students who apply early in their sophomore year. All have leadership laboratories which teach management skills.

All commissions are reserve commissions. Active duty obligation following commissioning varies depending on branch of service and designated career field or occupational specialty.

Scholarships

ROTC Scholarships are awarded on a competitive basis to U.S. citizens regardless of parents' income. Scholarships provide tuition, a book allowance, fees, and a tax-free monetary allowance of \$150 per month during the academic year. Applications for four-year scholarships may be obtained by calling the appropriate department at UCLA — Army, (310) 825-7381; Air Force, (310) 825-1742; Navy, (310) 825-9075 — or by writing to Armed Forces Opportunities, P.O. Box 2865, Huntington Station, NY 11746-2102. When writing, specify which service (Army, Air Force, Navy/Marine) scholarship is desired. Applications for Army scholarships can also be obtained by calling (800) 872-7682. Completed applications should be submitted prior to July 15 (Army) or August 15 (Air Force and Navy) for early consideration, but no later than December 1 (all services) of the year preceding college matriculation. Two-year scholarship applications may be obtained from the appropriate UCLA department and are considered when received.

AEROSPACE STUDIES

UCLA

David L. Terrell, M.S., *Lieutenant Colonel, Chair*

Professor

David L. Terrell, M.S., *Lieutenant Colonel*

Adjunct Assistant Professor

David R. Shepler, M.A., *Captain*

Scope and Objectives

Air Force ROTC provides selected students the opportunity to develop those attributes essential to positions of high responsibility as commissioned officers in the U.S. Air Force. This includes understanding Air Force history, doctrine, operating principles, and national security policies, demonstrating ability to apply modern principles of management and human relations in the Air Force environment, and mastering of leadership theory and techniques. Students must demonstrate dedication to their assignments, willingness to accept responsibility, and the ability to think critically and communicate with clarity and precision.

Undergraduate Study

Four-Year Program

The four-year program is available to first-term freshmen and those full-time students with at least four years of undergraduate and/or graduate study remaining and consists of an initial two-year General Military Course, or GMC (Aerospace Studies 1A-1B-1C and 20A-20B-20C), followed by a two-year Professional Officer Course (POC) described under Two-Year Program. GMC participation requires one hour of academic class and two hours of leadership laboratory each week during the academic year. Students incur no military obligation for GMC participation unless they qualify and accept an Air Force ROTC Scholarship during or after their sophomore year.

Students who complete GMC and wish to enter POC attend a four-week field training course the summer following GMC completion. At field training, students are provided meals, quarters, clothing, and travel and incidental expenses. Subjects covered at field training include junior officer training, aircraft and aircrew orientation, career orientation, survival training, base functions, Air Force environment, and physical training.

Two-Year Program

The two-year program is known as the Professional Officer Course (POC) and consists of Aerospace Studies 130A-130B-130C and 140A-140B-140C. POC participation requires two hours of leadership laboratory and three hours of academic class each week during the academic year.

Requisites for the two-year program are successful completion of the GMC and a four-week field training course (see Four-Year Program above), or successful completion of a five-week field training program on an Air Force base during the summer preceding enrollment in the program.

Students interested in the five-week field training program must apply to the department chair early during Fall Quarter of their sophomore year. U.S. citizenship is required. There is no obligation to apply. Students are selected on a competitive basis with consideration given to academic major, grade-point average, apti-

tude examination scores, medical examination results, performance during an officer board interview, and a physical fitness test.

Students selected for the five-week summer field training are provided meals, quarters, clothing, and travel and incidental expenses. Subjects are the same as those in the four-week course plus the academic portion of the GMC (see Four-Year Program above).

Students enrolled in the POC incur a military obligation and are paid \$150 per month during the academic year. Additionally, they can qualify for up to \$3,450 for tuition and textbooks. Graduation and successful completion of the POC leads to a commission as a second lieutenant. Cadets then report to one of the challenging assignments in the Air Force.

Aerospace Studies

Lower Division Courses

Freshman-Year Courses

Z. Leadership Laboratory. (No credit) Laboratory, three hours. Mandatory for and limited to Air Force ROTC cadets. Provides cadets with practical command and staff leadership experiences through performance of various tasks within framework of an organized cadet corps. As integral part of aerospace studies curriculum, provides experiences designed to develop leadership potential and serves as orientation to active duty. P/NP grading.

1A-1B-1C. Foundation of U.S. Air Force. (2-2-2) Lecture, one hour. Survey course designed to introduce students to the U.S. Air Force and Air Force Reserve Officers' Training Corps. Topics include mission and organization of the Air Force, officership and professionalism, military customs and courtesies, Air Force officer opportunities, group leadership problems, and introduction to communication skills. P/NP or letter grading.

Sophomore-Year Courses

20A-20B-20C. Evolution of U.S. Air Force Air and Space Power. (2-2-2) Lecture, one hour. Historical survey of air and space power designed to motivate students to transition from Air Force ROTC cadet to officer candidate. Featured topics include Air Force heritage and leaders; introduction to air and space power through examination of competencies, functions, and doctrines; and continued application of communication skills. P/NP or letter grading.

Upper Division Courses

130A-130B-130C. Air Force Leadership Studies. (4-4-4) Lecture, three hours. Study of leadership and quality management fundamentals, professional knowledge, Air Force doctrine, leadership ethics, and communication skills required of an Air Force junior officer. Use of case studies to examine Air Force leadership and management situations as means of demonstrating and exercising practical application of concepts being studied. P/NP or letter grading.

140A-140B-140C. National Security Affairs/Preparation for Active Duty. (4-4-4) Lecture, three hours. Study of national security processes, regional studies, advanced leadership ethics, and Air Force doctrine. Special topics focus on the military as a profession, officership, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism. Within this structure, continued emphasis on refining communication skills. P/NP or letter grading.

199. Special Studies in Aerospace Studies. (2 or 4) Course of study for undergraduates who wish to engage in independent research under direct supervision of a department faculty member. P/NP or letter grading.

MILITARY SCIENCE

Adjunct Assistant Professors

Jonathan Beard, B.S., *Major*

Jonathan Fox, B.S., *Captain*

David Pojtinger, M.B.A., *Captain*

Scope and Objectives

Army ROTC prepares selected students for leadership as commissioned officers in the U.S. Army, Army Reserve, or National Guard. This training includes in-depth study of the military establishment, military history, doctrine, leadership principles, management, and many other basic skills required of motivated, effective leaders.

Undergraduate Study

The military science curriculum is divided into two parts: (1) the Basic Course, two years of lower division study during which students must complete 12 units of coursework and (2) the Advanced Course, two years of upper division study consisting of 14 units of coursework and a six-week summer camp.

Army ROTC students may satisfy military history requirements by completing History 125E, 125F, 127A, 127B, 130, 147A, 148A, 148B, 148C, 152A, or 152B in lieu of Military Science 110, with consent of the ROTC adviser.

Transfer students and others who were unable to enroll in the Basic Course can receive equivalent credit in several different ways (see Two-Year Program below).

Admission to the Advanced Course is limited to selected students who meet all academic and physical requirements. Students in this course receive a subsistence allowance of \$150 a month for 10 months during each of the two academic years, plus military science books and uniforms. After completion of the Advanced Course and graduation, students have the opportunity to be commissioned as second lieutenants in one of the Army's 17 specialty areas in either the Army National Guard, Reserves, or Active Army. Students' preferences are a major factor in determining which specialty is awarded.

Students selected for Advanced ROTC must attend a six-week Advanced Camp between their Military Science III and IV years. Cadets receive an allowance for travel expenses and are paid for attendance.

The active duty obligation for those students selected to enter the Reserves or National Guard is for initial training, and only for a period of several months. Students accepting ROTC Scholarships and a commission in the Regular Army, or who are selected to enter the Active Army, serve longer terms. ROTC students wishing to obtain advanced degrees may be granted a delay in reporting to their initial assignment.

Four-Year Program

Students are enrolled in the Basic Course (freshman and sophomore years) on a voluntary basis. After completion of the Basic Course and before entrance into the Advanced Course (junior and senior years), students are required to execute a contract with the Department of the Army agreeing to complete the Advanced Course and accept a commission if offered.

Two-Year Program

The two-year program is designed for students who receive placement credit for two years of ROTC and directly enter the Advanced Course. Placement credit may be given for completing three years of high school Junior ROTC, attending a paid ROTC Basic Camp, membership in the Army Reserve or National Guard, completing two years of college-level Air Force or Navy ROTC, or previous active duty military service.

Commissioning

Successful completion of the Advanced Course program and a bachelor's degree may lead to a commission as a second lieutenant in the Army Reserve, National Guard, or Active Army. Distinguished graduates may qualify for a commission in the Regular Army.

Military Science

Lower Division Courses

Z. Leadership Laboratory. (No credit) Laboratory, three hours (lower division cadets) or four hours (upper division cadets). All cadets must be concurrently enrolled in a military science course; upper division cadets must also be under a contracted obligation with department. Designed to allow cadets to apply leadership techniques and military skills taught in classroom and to develop their confidence as future military officers.

10. Introduction to Leadership. (2) Lecture, one hour; discussion, one hour. Introduction to leadership and motivational theory. Topics include nature of organizations, individual behavior, motivation and performance, values and organizational commitment, and influence processes.

11. U.S. Defense Establishment I. (2) Lecture, one hour; discussion, one hour. Study of evolution and organization of U.S. Department of Defense, including study of military services, with emphasis on the U.S. Army. P/NP or letter grading.

12. U.S. Defense Establishment II. (2) Lecture, one hour; discussion, one hour. Fundamentals of national security policy development. P/NP or letter grading.

14. Principles of Land Navigation Applicable in Maneuver. (2) Lecture, one hour; discussion, one hour. Introduction to topographic maps and aerial photographs and their relation to land navigation; conceptual linkage to basic military tactics. Topics include map coordinate systems, scale and distance relationships, intersection and resection, photo interpretation, squad and platoon operations, and resource planning techniques. Introduction to new technologies, including Global Positioning Systems (GPS).

18. Modern Guerrilla Warfare. (2) Lecture, one hour; discussion, one hour. Limited to undergraduate students. Introduction to low intensity conflict and guerrilla strategies; explanation/discussion of political, economic, religious, and social factors contributing to civil unrest and/or insurgencies. Topics include nonmilitary responses, military tactics, interrelationship of military and government, psychological warfare, and civic actions.

21. Psychology of Leadership I. (2) Lecture, one hour; discussion, one hour. Study of relationship of individual differences, group dynamics, formal organizational constraints, and impact of society on leadership process. Introduction to external environmental pressures on a leader and psychology of the individual as a follower, examined in areas of motivation, peer pressure/conformity, and group norms.

24. Theory of Warfare. (2) Inquiry into theory, nature, causes, and elements of warfare, with attention also to evolution of weapons and warfare.

Upper Division Courses

110. U.S. Military History. (3) Lecture, three hours; discussion, one hour. Survey of American military history from 1860 to the present. Causes of war, strategy, tactics, and technological developments set against economic, political, and diplomatic concerns. Impact of warfare on society.

112. Psychology of Leadership II. (3) Lecture, one hour; discussion, one hour. Introduction to various individual leadership styles and personalities to assist students in development of their own individual style. Different philosophies of leadership, along with dimensions of leader behavior. Special consideration to counseling, management, and communication techniques that must be mastered to be an effective leader.

113. Theory of Learning Applied to Teaching. (2) Lecture, one hour; discussion, one hour. Study of instructional processes, lesson content planning procedures, techniques of applicatory education, role of testing (including evaluation and analysis). Emphasis on development of training programs to maximize organizational effectiveness. P/NP or letter grading.

123. Military Legal Systems. (2) Lecture, one hour; discussion, one hour. Introduction to theory and application of military law and legal systems, with emphasis on Uniform Code of Military Justice and rights of the accused under the constitution.

125. Decision Making. (2) Lecture, one hour; discussion, one hour. Designed to present students who become commissioned officers with new insight into modern methods of managerial decision making and into various steps involved in the process. Introduction to various components of leadership and functions of management in order to understand where areas of problem analysis and decision making impact and how they fit into leadership and management. Various steps which comprise the problem analysis and decision-making processes.

126. Military Professionalism and Ethics. (2) Lecture, 30 minutes; discussion, 90 minutes. Ethical concepts held by America's military institution. Classification of the military as a profession, special social responsibilities of those in the military, values related to and accepted by military society, and an ethical reasoning/decision-making process and model.

199. Supervised Independent Studies (1 to 3 units). Limited to juniors/seniors. Supervised independent studies and research for undergraduate students who desire to pursue topics of their own selection.

NAVAL SCIENCE

UCLA
123 Men's Gym
Box 951399
Los Angeles, CA 90095-1399

William H. Allen, M.A., *Captain, Chair*

Professor

William H. Allen, M.A., *Captain, U.S. Navy*

Adjunct Assistant Professors

William B. Eckerdt, B.S., *Lieutenant, U.S. Navy*
Gregory P. Torgersen, B.S., *Captain, U.S. Marine Corps*

James L. Trotter, M.S., *Commander, U.S. Navy*
Chad M. Smith, B.A., *Lieutenant, U.S. Navy*

Scope and Objectives

The Department of Naval Science provides professional training for students leading to a reserve commission at graduation in the U.S. Navy or Marine Corps. Through the Naval Reserve Officers' Training Corps (NROTC), scholarship students receive full tuition, fees, books, and \$150 per month subsistence pay. Non-scholarship students may apply to participate as members of the midshipman battalion with limited financial assistance, earning a reserve commission on completion of the baccalaureate degree. Because of the rapid development of highly technical ship systems, aviation, and other military equipment, science and engineering majors are highly desirable; however, Navy Scholarships are currently available to students pursuing any major offered by the University, as long as they complete basic technical requirements. In addition to University requirements, midshipmen must complete 28 units of naval science courses, a physical fitness test, and three summer cruises, each about four to eight weeks long. The department also conducts a sail training program for all midshipmen. All naval science courses, from ship systems and management to naval operations and amphibious warfare, are open to students who are not in the program but have an interest in the Navy and related fields, such as engineering, navigation and naval operations, history, and management.

Undergraduate Study

Scholarship Program

The majority of naval science students attend the University on Naval Scholarships which are awarded primarily on a four-year basis to high school seniors selected in nationwide competition. A two-year upper division scholarship program is also available, with a similar selection process, to students who have not yet begun their junior year in college. Applications for both types of scholarships are due by December 1 and March 1, respectively, each year. In addition to tuition, fees, books, and uniforms, students receive subsistence pay of \$150 per

month. Scholarship students are obligated to serve on active duty for a minimum of four years following graduation and commissioning.

College Program (Nonscholarship)

Three- and four-year College Program students are selected by the department chair at the beginning of each academic year from applicants of the freshman and sophomore classes. These students must compete for advanced standing prior to their junior year. A two-year program is also available to students who have not yet started their junior year. Students enter the two-year program with advanced standing after selection through national competition and completion of a six-week summer training period. Applications for the two-year program are due March 1 of the sophomore year. All College Program students receive uniforms, naval science textbooks and, once selected for advanced standing, subsistence pay of \$150 per month in their junior and senior years. Nonscholarship students serve on active duty for a minimum of three years following graduation and commissioning. College Program students may be recommended for scholarship benefits based on superior academic performance and participation in NROTC.

Marine Corps Option

Highly motivated NROTC students may request designation as Marine Corps option students and may also pursue any UCLA academic degree. The final summer cruise involves intensive Marine training. Marine Corps option students also participate, on a limited basis, in field training exercises during the academic year.

Commissioning

Students must meet UCLA degree requirements in their selected fields and complete the naval science courses as follows: Naval Science 1A, 20A (freshman year), 102B (sophomore year), 103 (junior year), 102C (senior year). Courses 1B, 20A, 101A, and 101B can be taken in either the sophomore or junior year. Courses 103 and 104 are to be taken by candidates for commissions in the Marine Corps or Marine Corps Reserve in lieu of courses 101A and 101B.

In addition, scholarship students must include in their programs one year of approved calculus, one year of approved calculus-based physics, one year of approved freshman English, one term of American military history, and one term of computer science. Nonscholarship students must include in their programs one year of college algebra or higher mathematics, physical science, and English, and one term of computer science. Of these requirements, Marine Corps option students are only obligated to fulfill the American military history/national security policy requirement.

Naval Science Minor

The Naval Science minor is designed for students completing a major in a departmental

program who wish to augment that major. Naval science courses are open to all students with an interest in history, national security, foreign policy, organizational leadership, management, ethics, and the military sciences.

To enter the minor, students must have an overall grade-point average of 2.0 or better. For further information, contact Donna Tenerelli at (310) 825-9075.

Required Lower Division Courses (10 units):
Naval Science 1B, 20A, 20B.

Required Upper Division Courses (20 units):
Naval Science 101A, 101B, 102B, 103, 104.

All minor courses must be taken for a letter grade, with a grade-point average of 2.5 or better in each. Successful completion of the minor is indicated on the transcript and diploma.

Naval Science

Lower Division Courses

1A. Introduction to Naval Science. (2) Introduction to organization of the Naval Service, various components of the Navy, career opportunities, shipboard damage control, fire fighting, propulsion systems, and some customs and traditions of the Naval Service.

1B. Naval Ship Systems I. (4) Introduction to naval engineering, with emphasis on steam, nuclear, diesel, and gas turbine propulsion systems and their associated auxiliary components. Basic thermodynamic theory, electrical theory, stability, and buoyancy.

20A. Naval Ship Systems II. (4) Study of naval weapon systems, with emphasis on infrared, radar, and sonar principles. Target designation and acquisition, methods of solving fire control problem, target detection systems. Analysis of transfer and feedback functions inherent in weapon systems.

20B. Seapower and Maritime Affairs. (2) Conceptual study of seapower, emphasizing historical development of naval and commercial power. Seapower examined in relation to economic, political, and cultural strengths, focusing on current abilities of specific nations to use the oceans to attain national objectives.

Upper Division Courses

101A. Navigation I. (4) Study of principles of piloting, celestial, and electronic navigation employed in determining a ship's position at sea. Celestial and electronic theory, mathematical analysis, sextant sights, and use of navigational aids.

101B. Navigation II. (4) Requisite: course 101A. Study of rules of the road, shiphandling, and basic concepts of multiple ship formations and maneuvering. In-depth analysis of problems associated with operations on high seas and inland waters applying to civil and U.S. Naval craft.

102B. Naval Leadership and Management I. (4) Examination of current and classical leadership and management theories, with emphasis on their application to junior military officer's role as a leader/manager. Topics include managerial functions, performance appraisal, motivation theories, group dynamics, leadership theories, and communication.

102C. Leadership and Ethics. (2) Requisite: course 102B. Current leadership and management in the U.S. Navy. Areas include human resources management, personnel management, material management, and performance and career evaluation.

103. Evolution of Warfare. (4) Study of evolution of warfare, including historical and comparative consideration of influence that leadership, political, economic, and sociological and technological development factors have had on warfare and influence they continue to exert in age of limited warfare.

104. Expeditionary Military Operations. (4) Study of historical use of expeditionary military operations, with particular emphasis on doctrine, tactics, and equipment used. Examination of topics through study of political and military objectives by focusing on historical examples, including Marathon, Gallipoli, World War II, Korea, Beirut, and Grenada. Examination of contemporary doctrine through study of recent operations.

199. Supervised Independent Studies. (1 to 4) Limited to juniors/seniors. Supervised independent studies and research for undergraduate students who desire to pursue topics of their own selection. P/NP or letter grading.

Scope and Objectives

Scandinavia consists of five Northern European countries: Denmark, Finland, Iceland, Norway, and Sweden. These countries form a geographic bridge between the American and European continents and a political bridge between Western and Eastern Europe. For all students of literature, language, the arts, and the social and physical sciences, Scandinavia is of particular interest.

The modern Scandinavian program educates students about Scandinavia through the study of its languages and literatures. The Scandinavian Section offers both undergraduate and graduate degrees in the languages and literatures of Denmark, Norway, and Sweden. Danish, Norwegian, and Swedish are mutually understandable languages, giving the student of one access to the literatures and cultures of the other two. Both undergraduate and gradu-

ate majors are expected to concentrate on one Scandinavian language, though they study the literatures of the other language areas.

Undergraduate Study

Undergraduate Courses

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in Danish, Norwegian, and Swedish grammar and/or composition. Students with demonstrated preparation may be permitted a more advanced program by the section or may be transferred to a more advanced course with consent of the instructor.

Native speakers of Norwegian, Swedish, and Danish may not enroll in any language course (including courses 105, 110, 115) in the Scandinavian Section except by petition in writing to the section. Non-Scandinavian students with knowledge of one of these Scandinavian languages may not take courses in the others except by petition in writing. Petitions must include a description of the student's linguistic background and the reason for wanting to take the language course in question.

Scandinavian Languages B.A.

Preparation for the Major

Required: Scandinavian 1, 2, 3, 4, and 5, or 11, 12, 13, 14, and 15, or 21, 22, 23, 24, and 25, or equivalent.

The Major

Required: Twelve upper division Scandinavian courses, including 105 or 110 or 115, 141, 142, 143. As an option, three upper division courses in a related field may be taken if approved in advance by the undergraduate adviser. It is recommended that students who plan to do graduate work in Scandinavian take German 1 through 6.

Scandinavian Minor

To enter the Scandinavian minor, students must have an overall grade-point average of 2.0 or better.

Required Courses (28 units): Any seven Scandinavian courses, two of which may be lower division courses selected from Scandinavian 1 through 50.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in

Program Requirements for the year in which they matriculate.

Master's Degree

The Scandinavian Section offers the Master of Arts (M.A.) degree in Scandinavian.

Admission

In addition to the University minimum requirements, prospective students in the M.A. program must have an undergraduate major in Scandinavian languages or equivalent. Applicants who have deficiencies in the undergraduate major must remedy them by taking the appropriate courses as recommended by the graduate adviser. A placement examination in the Scandinavian languages, as well as in German, may be required.

Three letters of recommendation are required by the Graduate Division. The Scandinavian Section welcomes applications for all three quarters (Fall, Winter, Spring).

For the Ph.D. degree in Germanic Languages with Scandinavian literature as a major or minor field, see the Ph.D. in Germanic Languages. For a brochure describing the program and requirements, write to the department.

Areas of Study

There are no specific major fields or disciplines in the M.A. program, but students emphasize one modern language and literature area in Danish, Norwegian, or Swedish.

Course Requirements

A total of 12 courses is required for the M.A. degree. These include a minimum of nine upper division and graduate courses in Scandinavian languages, at least five of which must be graduate courses. Three courses on the upper division or graduate level may be taken in a related field of linguistic or literary study to be determined in consultation with the graduate adviser; at least one of these must be at the graduate level. Comparative Literature 200 or an equivalent course in methodology is required as one of the 12 courses.

Three 596 courses (12 units) may be applied toward the total course requirement, but only one (four units) may be applied toward the minimum graduate course requirement.

Comprehensive Examination Plan

A comprehensive examination, based on the required coursework and a reading list, is required of all candidates for the M.A. degree. The examination is given whenever students have completed the course requirements and feel prepared to be examined on both the coursework and the reading list. The comprehensive examination is both written and oral; students who fail may be reexamined once without petitioning.

Thesis Plan

None.

Scandinavian

Lower Division Courses

1. **Elementary Swedish. (4)** Discussion, four hours. P/NP or letter grading.
2. **Elementary Swedish. (4)** Enforced prerequisite: course 1.
3. **Elementary Swedish. (4)** Enforced prerequisite: course 2.
4. **Intermediate Swedish. (4)** Enforced prerequisite: course 3.
5. **Intermediate Swedish. (4)** Enforced prerequisite: course 4.
11. **Elementary Norwegian. (4)** Discussion, four hours. P/NP or letter grading.
12. **Elementary Norwegian. (4)** Enforced prerequisite: course 11.
13. **Elementary Norwegian. (4)** Enforced prerequisite: course 12.
14. **Intermediate Norwegian. (4)** Discussion, four hours. Enforced prerequisite: course 13.
15. **Intermediate Norwegian. (4)** Discussion, four hours. Enforced prerequisite: course 14.
21. **Elementary Danish. (4)** Discussion, four hours. P/NP or letter grading.
22. **Elementary Danish. (4)** Enforced prerequisite: course 21.
23. **Elementary Danish. (4)** Enforced prerequisite: course 22.
24. **Intermediate Danish. (4)** Enforced prerequisite: course 23.
25. **Intermediate Danish. (4)** Enforced prerequisite: course 24.
50. **Introduction to Scandinavian Literature. (4)** Lecture, three hours; discussion, one hour; outside study, eight hours. Designed for students in general and for those wishing to prepare for more advanced and specialized studies in Scandinavian literature and culture. Selected works from literatures of Denmark, Norway, Sweden, Iceland, and Finland, ranging from myth, national epic, saga, and folktale through modern novel, poem, play, short story, and film, read in English and critically discussed. P/NP or letter grading.

Upper Division Courses

105. **Advanced Swedish. (4)** Discussion, three hours. Requisite: course 5. Readings, composition, and conversation in Swedish. May be repeated once for credit. P/NP or letter grading.
110. **Advanced Norwegian. (4)** Discussion, three hours. Requisite: course 15. Readings, composition, and conversation in Norwegian. May be repeated once for credit. P/NP or letter grading.
115. **Advanced Danish. (4)** Discussion, three hours. Requisite: course 25. Readings, composition, and conversation in Danish. May be repeated once for credit. P/NP or letter grading.
141. **Backgrounds of Scandinavian Literature. (4)** Discussion, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Readings and discussion of representative texts selected from literature of medieval, Renaissance, baroque, and Enlightenment periods. P/NP or letter grading.
142. **Scandinavian Literature of the 19th Century. (4)** Discussion, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Readings and discussion of selected works from Romantic, realistic, and post-Romantic literature of Scandinavia in the 19th century. P/NP or letter grading.
143. **Scandinavian Literature of the 20th Century. (4)** Discussion, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Readings and discussion of selected works of modern Scandinavian literature from beginning of the century to the present. P/NP or letter grading.

C144. Henrik Ibsen on the World Stage. (4) Discussion, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Readings and discussion of selected plays by Henrik Ibsen. May be concurrently scheduled with course C251. P/NP or letter grading.

C145. Getting Married: Strindberg and Battle of the Sexes. (4) Discussion, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. August Strindberg's portrayals of marital conflict reflected and shaped literary representation of the so-called battle of the sexes. His work, as well as its literary transformations, placed into a Scandinavian, European, and feminist context. May be concurrently scheduled with course C252. P/NP or letter grading.

C146. Kierkegaard and Foundations of Existentialism. (4) Discussion, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Readings and discussion of selected works by Søren Kierkegaard and other existentialist writers. May be concurrently scheduled with course C253. P/NP or letter grading.

C147. Pan's Prophets: Knut Hamsun and Other Interpreters of Nature as Modern Idyll. (4) Discussion, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Readings and discussion of selected works by Knut Hamsun and other 19th- and 20th-century Scandinavian writers who explored theme of nature as modern idyll. May be concurrently scheduled with course C254. P/NP or letter grading.

C180. Literature and Scandinavian Society. (4) Discussion, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Discussion of selected aspects of Scandinavian society based on readings of contemporary literature as well as historical and/or sociological material. May be repeated for credit (as determined by undergraduate adviser) with topic change. May be concurrently scheduled with course C263. P/NP or letter grading.

181. Contemporary Swedish Literature. (4) Discussion, three hours. Preparation: reading knowledge of a Scandinavian language. Reading and analysis of selected texts by major 20th-century Swedish authors.

C182. Theory of the Scandinavian Novel. (4) Discussion, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Analysis of predominant structures of the Scandinavian novel from its 18th-century beginnings through its rise in the 19th century and its 20th-century evolution. Discussion of application of contemporary critical theories to the novels. May be concurrently scheduled with course C264. P/NP or letter grading.

184. Hans Christian Andersen. (4) Lecture, two hours; discussion, one hour; outside study, nine hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Study of works of Hans Christian Andersen, Danish novelist, dramatist, and writer of tales, including consideration of his literary background and of his times. Analysis of his works in terms of their structure, style, and meaning. P/NP or letter grading.

C185. Seminar: Scandinavian Literature. (4) Discussion, three hours. Preparation: reading knowledge of a Scandinavian language. Selected topics in Scandinavian prose, poetry, and drama. May be repeated for credit with consent of instructor and undergraduate adviser. May be concurrently scheduled with course C265.

CM186. Voices of Women in Scandinavian Literature. (4) (Formerly numbered C186.) (Same as Women's Studies M186.) Discussion, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Readings and discussion of writings by Scandinavian women writers analyzed in historical, theoretical, sociological, critical, and comparative contexts. May be concurrently scheduled with course C266. P/NP or letter grading.

187. Scandinavian Film: Bergman and Others. (4) Discussion, three hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Designed for students in general and for those preparing for more advanced studies in Scandinavian literature and culture. Viewing and discussion of films by Ingmar Bergman and other Scandinavians. P/NP or letter grading.

C188. Scandinavian Folk Narrative. (4) Lecture, three hours; outside study, nine hours. Requisite: course 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Introduction to fairy tales and legends of Scandinavian tradition as well as to interpretive methodologies which strive to answer the question "why do people tell the stories that they tell?" Concurrently scheduled with course C267. Letter grading.

190. Honors Course in Scandinavian. (4) Limited to seniors with a minimum 3.0 grade-point average in major. Intensive study of a selected special topic in Scandinavian. Discussions, oral and written reports.

199. Special Studies in Scandinavian. (2 or 4) Limited to seniors and graduate students. To be arranged with faculty member who directs the study (course section to be identified by two-letter code using initials of sponsoring instructor — see section for I.D. number). Independent studies designed for graduates and senior undergraduates who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite.

Graduate Courses

C251. Henrik Ibsen on the World Stage. (4) Discussion, three hours. Preparation: advanced knowledge of a modern Scandinavian language. Intensive study of works of Henrik Ibsen. May be concurrently scheduled with course C144. Graduate students may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C252. Getting Married: Strindberg and Battle of the Sexes. (4) Discussion, three hours. Preparation: advanced knowledge of a Scandinavian language. August Strindberg's portrayals of marital conflict reflected and shaped literary representation of the so-called battle of the sexes. His work, as well as its literary transformations, placed into a Scandinavian, European, and feminist context. May be concurrently scheduled with course C145. Graduate students may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C253. Kierkegaard and Foundations of Existentialism. (4) Discussion, three hours. Preparation: advanced knowledge of a modern Scandinavian language. Readings and discussion of selected works of Søren Kierkegaard and other existentialist writers. May be concurrently scheduled with course C146. S/U or letter grading.

C254. Pan's Prophets: Knut Hamsun and Other Interpreters of Nature as Modern Idyll. (4) Discussion, three hours. Preparation: advanced knowledge of a Scandinavian language. Intensive study of selected works by Knut Hamsun and other 19th- and 20th-century Scandinavian writers who explored theme of nature as modern idyll. May be concurrently scheduled with course C147. Graduate students may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C263. Literature and Scandinavian Society. (4) Discussion, three hours. Designed for graduate students. Intensive study of selected aspects of Scandinavian society based on readings in the literature as well as historical and/or sociological material. May be repeated for credit (as determined by graduate adviser) with topic change. May be concurrently scheduled with course C180. Graduate students may meet for extra seminar hours and write research papers of greater length and depth. S/U or letter grading.

C264. Theory of the Scandinavian Novel. (4) Discussion, three hours. Preparation: advanced knowledge of a Scandinavian language. Analysis of predominant structures of the Scandinavian novel from its 18th-century beginnings through its rise in the 19th century and its 20th-century evolution. Discussion of application of contemporary critical theories to the novels. May be concurrently scheduled with course C182. Graduate students may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C265. Seminar: Scandinavian Literature. (4) Discussion, three hours. Preparation: reading knowledge of a Scandinavian language. Selected topics in Scandinavian prose, poetry, and drama. May be repeated for credit with consent of instructor and graduate adviser. May be concurrently scheduled with course C185.

C266. Voices of Women in Scandinavian Literature. (4) Discussion, three hours. Preparation: advanced knowledge of a Scandinavian language. Intensive study of writings by Scandinavian women writers analyzed in historical, theoretical, sociological, critical, and comparative contexts. May be concurrently scheduled with course CM186. Graduate students may meet as a group one additional hour each week and write research papers of greater length and depth. S/U or letter grading.

C267. Scandinavian Folk Narrative. (4) Lecture, three hours; outside study, nine hours. Preparation: advanced knowledge of a modern Scandinavian language. Introduction to fairy tales and legends of Scandinavian tradition as well as to interpretive methodologies which strive to answer the question "why do people tell the stories that they tell?" Concurrently scheduled with course C188. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research. (2 to 6) Limited to graduate Scandinavian students. To be arranged with faculty member who directs the study or research. Twelve units may be applied toward total course requirement, but only four units may be applied toward minimum graduate course requirement. May be repeated twice. S/U or letter grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (4 to 8) To be arranged with faculty member who directs the study or research. May be repeated once. May not be applied toward M.A. minimum course requirements. S/U grading.

599. Research for and Preparation of Ph.D. Dissertation. (4) To be arranged with faculty member who directs the study or research. May be repeated. S/U grading.

SLAVIC LANGUAGES AND LITERATURES

 Olga Yokoyama, Ph.D. (*Slavic Languages*)

Professors Emeriti

Aleksandar Albijanić, Ph.D.
 Henrik Birnbaum, Ph.D.
 Thomas Eekman, Ph.D.
 Kenneth E. Harper, Ph.D.
 Peter C. Hodgson, Jr., Ph.D.
 Vladimir Markov, Ph.D.
 Rochelle Stone, Ph.D.
 Dean S. Worth, Ph.D.

Assistant Professor

Roman Koropecjy, Ph.D. (*Polish and Ukrainian Literature*)

Senior Lecturer S.O.E.

Olga Kagan, Ph.D. (*Russian*)

Lecturers

Edward Denzler, M.A., *Emeritus*
 Georgiana Galateanu, Ph.D.
 Susan Kresin, Ph.D.
 Judith Simon, Ph.D.

Scope and Objectives

The Bachelor of Arts degree in Russian Language and Literature is designed to provide students with basic mastery of the Russian language and familiarity with the classics of Russian literature. Within the major, students concentrate either in Russian literature and culture or Russian linguistics. Students typically begin to study Russian in their first year, but those contemplating a Russian major later in their academic program can fulfill the Russian language requirements by combining regular coursework with summer programs or with the University of California semester program in Moscow, which is open to students who have completed the equivalent of two years of study (American Council of Teachers of Foreign Languages — ACTFL — level 1). Students interested in this program should consult the undergraduate adviser as early as possible.

The Bachelor of Arts degree in Slavic Languages and Literatures is designed to provide students with basic mastery of two Slavic languages and familiarity with their literatures, as well as general background in the cultural, political, and social history of the Slavic peoples.

The department also offers a Bachelor of Arts degree in Russian Studies in which students achieve a basic mastery of the Russian language, as well as familiarity with Russian literature, history, and culture.

The graduate program provides advanced training in the Slavic literatures and linguistics leading to the M.A. and Ph.D. degrees. The primary task of the department faculty is to develop and refine the critical and analytic skills of its students in preparation for productive ca-

reers in college teaching and research in the Slavic field. Alternative careers include language teaching, business, translation, interpreting, librarianship, and government service.

Undergraduate Study

The department offers three majors: (1) Russian Language and Literature, with concentrations in Russian literature or Russian linguistics, (2) Slavic Languages and Literatures, and (3) Russian Studies. The equivalent of a major in Slavic or Russian Language and Literature is normally required for admission to the department's graduate program and is used to determine the number of courses in Russian literature and/or linguistics that students majoring in Russian Studies are expected to make up in order to receive graduate degrees in the department. Students not majoring in Slavic or Russian Language and Literature who intend to pursue graduate study in the department are strongly encouraged to take courses in Russian literature and linguistics during their undergraduate years to reduce the number of makeup courses required. Qualified seniors may also take graduate courses numbered below 220 with consent of the instructor and the graduate and undergraduate advisers.

Russian Language and Literature B.A.**Preparation for the Major**

Required: Russian 1, 2, 3, 4, 5, 6, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1), 99A.

The Major

Required: Russian language skills equivalent to ACTFL level 2 (students usually take Russian 101A-101B-101C and 102A-102B-102C to attain level 2 proficiency; consult the undergraduate adviser for information on summer programs and the Moscow semester program), Russian 106, 130A, 140A.

Students also must concentrate in either literature or linguistics. For the *literature* concentration, Russian 118, 119, 120 (all three may be taken in the sophomore year), and two courses from 124C through 124T, 125, 130B, 130C, 140B, 140C, 140D, M150 are required. For the *linguistics* concentration, two courses from Linguistics 103, 110, 120A, 120B, and two courses from Slavic 201, 202, Russian 118, 119, 120, 124C through 124T, 125, 130B, 130C, 140B, 140C, 140D, M150, Linguistics 103, 110, 120A, 120B, 127 are required.

Slavic Languages and Literatures B.A.**Preparation for the Major**

Required: Russian 1, 2, 3, 4, 5, 6, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1), Slavic 99.

The Major

Required: Russian 101A-101B-101C or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1+); courses 118, 119, 120 (all three may be taken in the sophomore year); one three-course sequence from Czech 102A-102B-102C, 102D-102E-102F, Polish 102A-102B-102C, 102D-102E-102F, Serbian/Croatian 103A-103B-103C, 103D-103E-103F (placement with consent of instructor); three courses from Czech 102D, 102E, 102F, Polish 102D, 102E, 102F, Serbian/Croatian 103D, 103E, 103F, Russian 102A, 102B, 102C, 123, 130A, 130B, 130C, 140A through 140D, M150; two courses from Czech 155, Polish 152A, 152B, Serbian/Croatian 154, Slavic 125, 126.

Russian Studies B.A.**Preparation for the Major**

Required: Russian 1, 2, 3, 4, 5, 6, or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1), 99A.

The Major

Required: Russian 101A-101B-101C or equivalent proficiency as determined through departmental testing (equivalent to ACTFL level 1+), three courses in Russian literature, two courses from History 131A through 131D, two courses from Economics 182, Geography 184, Political Science 128A, 128B, 156A, Russian M170, and five additional courses selected from those listed above, from Russian language, literature, or linguistics courses, or from special courses (approved by the undergraduate adviser) offered by the Departments of Art, Art History, Design, Film and Television, History, Music, Political Science, Slavic Languages and Literatures, and Theater.

Russian Language Minor

To enter the Russian Language minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (13 units): Russian 6 and two courses from 25, 99A, 99B.

Required Upper Division Courses (23 units): Russian 101A-101B-101C and two additional upper division Russian language and literature courses.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Russian Language and Literature Minor

The Russian Language and Literature minor was discontinued effective Fall Quarter 1998. Students currently participating in the program (1) must fulfill all requirements for the minor by Winter Quarter 2001 or (2) may modify their programs to fit any of the three new minors.

Required Lower Division Courses (10 to 15 units): Russian 3 or 13B or 15B and two courses from 25, 99A, 99B.

Required Upper Division Courses (20 units): Five Russian language or literature courses, including at least two from Russian 118, 119, 120.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Russian Literature Minor

To enter the Russian Literature minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (10 to 15 units): Russian 3 or 13B or 15B and two courses from 25, 99A, 99B.

Required Upper Division Courses (20 units): Five Russian language or literature courses, including at least two from Russian 118, 119, 120, 130A, 130B, 130C, 140A through 140D.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Russian Studies Minor

To enter the Russian Studies minor, students must have an overall grade-point average of 2.0 or better.

Required Lower Division Courses (10 to 15 units): Russian 3 or 13B or 15B and two courses from 25, 99A, 99B.

Required Upper Division Courses (20 units): Five courses dealing directly with Russia, to be selected from any upper division Russian language and literature courses, Economics 182, Geography 184, History 131A through 131D, Political Science 128A, 128B, 156A, Russian M170. With approval of the undergraduate adviser, other related courses may be applied toward the minor.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The Department of Slavic Languages and Literatures offers the Master of Arts (M.A.) degree in Slavic Languages and Literatures.

Admission

In addition to the University minimum requirements, the department requires the following from applicants to the M.A. program: the equivalent of a UCLA B.A. in Russian Language and Literature, Slavic Languages and Literatures, or Russian Studies, or three years of Russian language and a variety of Russian history, literature, and linguistics courses.

All applicants must submit three letters of recommendation from persons capable of judging their academic potential and a writing sample in the field they wish to pursue. The Graduate Record Examination (GRE) is also required as part of the application; it is not an obligation for foreign students whose native language is not English, unless they have a bachelor's degree from a university where the instruction is in English. The Test of English as a Foreign Language (TOEFL) is required of all international students whose first language is not English.

A departmental brochure describing the curriculum in some detail (graduate and undergraduate) is available from the department.

Areas of Study

Candidates for the M.A. degree choose a specialization in either literature or linguistics, with Russian as the principal language and literature.

Course Requirements

A minimum of 36 units is required of students in literature and 40 units of students in linguistics.

Slavic 201, Russian 204, 212A, and 220A are required of all M.A. students.

Literature students must also take Russian 211A, 211B, 212B, 213, and 219.

Linguistics students must also take Slavic 202; Russian 220B; one course from Russian 211A, 211B, 212B, 213; three courses from Russian 241, 242, 265; Russian 243, 263, 264; and Russian 210, Slavic 241A, 241B.

Courses in the 500 series may not be applied toward the M.A. course requirements.

Students with M.A. degrees from other institutions must pass the M.A. comprehensive examination in order to be admitted to the doctoral program. Those whose degree is in Slavic languages and literatures and who are continuing in the same area of specialization (literature or linguistics) should take the examination within three quarters following matriculation. Courses should be selected to fill in lacunae as determined by the requirements of the UCLA M.A. program. All lacunae must be filled before admittance to the doctoral examinations.

Students with M.A. degrees in disciplines other than that of their planned specialization, or students who do not have an M.A. but have taken graduate-level courses equivalent to those re-

quired at UCLA for an M.A. degree, must complete the required number of course units; course substitutions may be made with the permission of the graduate adviser. Independent study courses (500-level) may not be used as substitutes.

Comprehensive Examination Plan

Applications for advancement to candidacy must be made no later than the second week of the quarter in which the M.A. examinations are to be taken and are accepted only if students have passed the Russian language proficiency examination. M.A. examinations are offered at the end of each quarter. After students have declared their intention to take the examination in a given quarter, a committee consisting of three members is appointed by the chair. The examination has two parts — written (three hours) and oral (two hours) — and is based on coursework and the departmental reading list. The oral part may be conducted partly in Russian.

The student's combined performance in the written and oral examinations is graded high pass, pass, or fail. A grade of high pass or pass is necessary to receive the M.A. degree; the grade of high pass is necessary to enter the Ph.D. program. Examinations may be repeated once; there is a six-month limit on re-taking examinations graded pass and a one-year limit on examinations graded fail.

Thesis Plan

None.

Doctoral Degree

Admission

Applicants are formally admitted to the Ph.D. program after (1) passing the UCLA M.A. comprehensive examination with a grade of high pass; (2) passing the reading examination in both French and German; and (3) demonstrating proficiency in modern Slavic languages other than Russian as follows: applicants to the literature area must complete one year of the language of their second Slavic literature; applicants to the linguistics area must complete one year of one language and two years of another (one of the languages should represent the West Slavic group, the other the South Slavic group). Equivalent language proficiency may be demonstrated through written and oral examinations rather than coursework.

Applicants who do not have an M.A. in Slavic Languages and Literatures from UCLA must provide three letters of recommendation from persons capable of judging their academic potential and submit a writing sample in the field they wish to pursue. The Graduate Record Examination (GRE) is also required as part of the application.

Major Fields or Subdisciplines

Candidates for the Ph.D. degree choose a specialization in either literature or linguistics, with Russian usually as the principal language and literature. By special arrangement doctoral stu-

dents may specialize in a language or literature other than Russian.

Course Requirements

Before the formation of a doctoral committee, students must be officially admitted to the doctoral program and have taken the following required courses.

Students whose specialization is linguistics must take Slavic 221, 222, 223, and three other advanced linguistics courses or seminars. Recommended preparation for linguists includes Linguistics 103, 110, 120A, 120B, M150.

Students whose specialization is literature must take two courses from Slavic 230A-230B-230C and four advanced literature courses or seminars. Students are also advised to acquire a sound general knowledge of modern Western European literature.

Written and Oral Qualifying Examinations

Qualifying Paper. Students are required to submit to the faculty a qualifying paper that demonstrates their ability to conduct serious and original research. The paper must be received and approved by the faculty adviser (usually the prospective examination and dissertation committee chair) no later than one quarter preceding the quarter in which students expect to take the qualifying examinations.

Examinations. All students are expected to have a sound general knowledge of both Slavic philology and Russian literary history.

Students in linguistics take two three-hour written examinations and a two-hour oral examination. Usually one of the written examinations is on the structure of modern Russian and the other on comparative Slavic linguistics, the history of Russian, and the history and structure of a second Slavic language. The oral examination is designed to test fields of major interest and general background and typically includes discussion of the dissertation topic.

Students in literature must take a series of written examinations on Russian literature and one on a Slavic literature other than Russian. For the examination on Russian literature, students choose six fields and make up an appropriate reading list for each with members of their doctoral committee. A field may cover an author, genre, theme, literary movement, school of theory, etc. Each of four periods — early Russian literature, the 18th century, the 19th century, and the 20th century — must be represented by a field; the other two fields may cross period boundaries. The examination in a Slavic literature other than Russian tests students' knowledge of the history of the literature and familiarity with representative works. Each examination is one hour in length; the seven examinations are taken over the course of a single week.

Students who receive a grade of pass on the written examinations are admitted to a two-hour University Oral Qualifying Examination,

which is designed to test the fields of major interest and general background and which typically includes discussion of the dissertation topic.

After considering students' overall performance in both the oral and written examinations, the committee assigns a cumulative grade. A pass grade entitles students to write a dissertation. At the committee's discretion, students may be required to retake any or all portions of the Ph.D. examinations within one calendar year after the first attempt.

Within two quarters (or one quarter and a summer) after passing the qualifying examinations, students must submit a prospectus and commence writing the dissertation.

Formal Lecture. Students are required to deliver a formal lecture in the California Slavic Colloquium no later than two calendar years after advancement to candidacy.

Slavic

Lower Division Courses

88. Seminar: Literature and Culture. (4) Seminar, three hours. Variable topics course designed to explore themes and issues pertinent to Slavic literature and culture. Consult *Schedule of Classes* or department for topics to be offered in a specific term.

99. Introduction to Slavic Civilization. (4) Lecture, three hours. Introductory survey of social and cultural institutions of the Slavic peoples and their historical background.

Upper Division Courses

125. Interwar Central European Prose. (4) (Formerly numbered M125.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative authors of the 1920s and 1930s in translation. Special attention to relation between literature and historical and ethnic concerns. P/NP or letter grading.

126. Postwar Central European Prose. (4) (Formerly numbered M126.) Lecture, three hours. Analysis of selected novels, stories, plays, and essays of representative contemporary authors in translation. Special attention to relation between art and ideology. P/NP or letter grading.

M179. Baltic and Slavic Folklore and Mythology. (4) (Same as Folklore M126.) Lecture, three hours. General course for students interested in folklore and mythology and for those interested in Indo-European of antiquities.

199. Special Studies. (2 to 8) Limited to seniors.

Graduate Courses

Linguistics

201. Introduction to Old Church Slavic. (4) Lecture, three hours. Required for M.A. (linguistics, literature). Introduction to phonology and grammar; readings.

202. Introduction to Comparative Slavic Linguistics. (4) Lecture, three hours. Requisite: course 201. Required for M.A. (linguistics). Introduction to comparative phonology and grammar of Slavic languages.

211. Slavic Gender Linguistics. (4) Lecture, three hours. Examination of linguistic differences between male and female speech and of language used to refer to females and males. Course contributes to understanding of language, literature, sociolinguistics, gender issues, and Slavic culture in general. S/U or letter grading.

221. Introduction to East Slavic Languages. (4) Lecture, three hours. Requisites: Russian 102A-102B-102C or Ukrainian 101A-101B-101C. Recommended: course 202. Required for Ph.D. (linguistics). Introduction to structure and history of East Slavic languages.

222. Introduction to West Slavic Languages. (4) Lecture, three hours. Requisite: course 202. Recommended: Czech 102A-102B-102C or Polish 102A-102B-102C. Required for Ph.D. (linguistics). Introduction to structure and history of West Slavic languages.

223. Introduction to South Slavic Languages. (4) Lecture, three hours. Requisite: course 202. Recommended: Serbian/Croatian 103A-103B-103C or Bulgarian 103A-103B-103C. Required for Ph.D. (linguistics). Introduction to structure and history of South Slavic languages.

M229. Introduction to Slavic Bibliography. (2) (Same as Library and Information Science M229C.) Introduction to Slavic and East European bibliography for the humanities and social sciences. Emphasis to be determined by requirements and background of enrolled students. Topics include relevant library terminology and concepts; survey of languages and East European library materials; Slavic and East European scholarship in the West; relevant reference sources, archival resources, and research methods; survey of on-line databases; compilation of bibliographies. S/U grading.

241A-241B. Advanced Old Church Slavic. (4-4) Lecture, three hours. Requisite: course 201. **241A.** Advanced Readings in Canonical Texts; **241B.** East, West, and South Slavic Recensions of Church Slavic.

242. Comparative Slavic Linguistics. (4) Lecture, three hours. Requisite: course 202. Selected topics in development of Common Slavic.

251. Introduction to Baltic Linguistics. (4) Lecture, three hours. Requisite: course 202. Introduction to Baltic linguistics, with special attention to relationship between Baltic and Slavic.

261. Slavic Paleography. (4) Lecture, three hours. Requisite: course 201. Introduction to Slavic paleography: inscriptions, birchbark letters, Glagolitic and Cyrillic texts.

281. Seminar: Slavic Linguistics. (4) Seminar, three hours. Selected topics in comparative and historical Slavic linguistics. May be repeated for credit with consent of instructor and graduate adviser.

282. Seminar: Structural Analysis. (4) Seminar, three hours. Selected topics. May be repeated for credit with consent of instructor and graduate adviser.

Literature

230A-230B-230C. Topics in Comparative Slavic Literature. (4-4-4) Lecture, three hours. Recommended preparation: upper division courses in Czech, Polish, Russian, and Yugoslav literatures. Two terms required for Ph.D. (literature). May be repeated for credit with consent of instructor and graduate adviser. **230A.** Middle Ages through Baroque; **230B.** Classicism to Romanticism; **230C.** Realism to Modernism.

Special Studies

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching Slavic Languages at College Level. (4) Seminar, 90 minutes; discussion, 90 minutes. Designed for graduate students. Theory and practice of language teaching. Discussion of contemporary language teaching methodology as well as problems of pedagogical grammar. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. S/U grading.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8) Tutorial, to be arranged. S/U grading.

599. Research for Ph.D. Dissertation. (2 to 12) Tutorial, to be arranged. S/U grading.

Bulgarian

Upper Division Courses

103A-103B-103C. Elementary Bulgarian. (5-5-5) Recitation, five hours; outside study, 10 hours minimum. Basic courses in the Bulgarian language. P/NP or letter grading.

154. Survey of Bulgarian Literature. (4) Lecture, three hours. Designed for juniors/seniors. Lectures and readings in English. Survey of Bulgarian literature from the Middle Ages to the present.

Czech

Upper Division Courses

102A-102B-102C. Elementary Czech. (5-5-5) Recitation, five hours; outside study, 10 hours minimum. Basic courses in the Czech language. P/NP or letter grading.

102D-102E-102F. Advanced Czech. (4-4-4) Recitation, three hours. Requisite: course 102C.

155. Survey of Czech Literature from Middle Ages to the Present. (4) (Formerly numbered 155A-155B.) Lecture, three hours. Lectures and readings in English. P/NP or letter grading.

Polish

Upper Division Courses

102A-102B-102C. Elementary Polish. (5-5-5) Recitation, five hours; outside study, 10 hours minimum. Basic courses in the Polish language. P/NP or letter grading.

102D-102E-102F. Advanced Polish. (4-4-4) Recitation, three hours. Requisite: course 102C.

152A-152B-152C. Survey of Polish Literature. (4-4-4) Lecture, three hours. Lectures and readings in English. **152A.** From the Middle Ages to Neoclassicism; **152B.** Reimagining a Nation. Readings in 19th-century Polish literature and culture. **152C.** Dreaming, Mocking, and Writing "as if." Readings in modern Polish literature and culture.

Graduate Course

280. Seminar: Polish Literature. Seminar, three hours. Selected topics in Polish prose, poetry, and drama. May be repeated for credit with consent of instructor and graduate adviser.

Russian

Language

1. Elementary Russian. (5) Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

2. Elementary Russian. (5) Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

3. Elementary Russian. (5) Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

4. Intermediate Russian. (5) Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

5. Intermediate Russian. (5) Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

6. Intermediate Russian. (5) Recitation, five hours; laboratory, one hour; outside study, 10 hours minimum. P/NP or letter grading.

10. Intensive Elementary Russian. (12) Intensive basic course in the Russian language equivalent to courses 1, 2, and 3.

11A-11B-12A-12B-13A-13B. Self-Paced Program in Russian. (2 each) Basic courses in the Russian language; two to four units per term recommended. Each two-unit course in sequence requires 30 minutes of laboratory session per week and 30 minutes of discussion session per week, plus individual instruction as required by the staff. Courses 11B and higher require completion of or simultaneous enrollment in all courses lower in sequence. P/NP or letter grading.

15A-15B. Accelerated Elementary Russian. (8-7) Recitation, five hours; laboratory, two hours; outside study, 15 hours. Material of first-year Russian course to be covered in two terms, with extensive use of language laboratory and the Russian Room. P/NP or letter grading.

16. Preintermediate Russian. (2) Enforced requisite: course 3 or 13B or 15B. Designed for students who have completed first year of Russian (course 3 or 13B or 15B) but cannot take course 4 immediately. Conversation, reading, and composition. P/NP or letter grading.

20. Intensive Intermediate Russian. (12) Requisite: course 10 or one year of elementary Russian. Intermediate instruction in reading, writing, and speaking Russian equivalent to courses 4, 5, and 6.

100A-100B. Literacy in Russian. (4-4) Discussion, three hours. For students who speak Russian but have difficulty reading and writing. Each course may be taken independently for credit with consent of instructor. P/NP or letter grading.

101A-101B-101C. Third-Year Russian. (5-5-5) Recitation, five hours; outside study, 10 hours minimum. Requisite: course 6. Advanced grammar, reading, and conversation. P/NP or letter grading. **101A.** Russia and the West; **101B.** Soviet Russia; **101C.** Contemporary Russia.

102A-102D. Fourth-Year Russian. (4-4) (Formerly numbered 102A-102B-102C.) Lecture, three hours. Requisite: course 101C. Advanced conversation and composition, with emphasis on vocabulary development and review of selected grammar topics in fiction, nonfiction, poetry, film. Each course may be taken independently for credit. P/NP or letter grading. **102A.** The Individual and the State; **102B.** The Family in Contemporary Russia; **102C.** Growing Up in Russia; **102D.** Emphasis on Social Science.

103A-103B-103C. Russian for Native and Near-Native Speakers. (4-4-4) (Formerly numbered 103.) Discussion, three hours. Improvement of oral and written language skills, emphasizing correct and diversified use of language and addressing individual grammatical difficulties. Courses may be taken independently for credit and may be repeated for credit with topic and/or instructor change. P/NP or letter grading. **103A.** Russian National Identity. Readings in literature, philosophy, criticism, film. **103B.** Literature and Film. Film adaptations of Russian literature. Readings and screenings. **103C.** Special Topics.

106. Russian for Advanced Native and Near-Native Speakers. (4) Lecture, three hours. Requisite: course 101C. Analysis of literary texts. P/NP or letter grading.

107. Russian for Social Scientists. (2) Preparation: three years of Russian. Reading of texts relevant to social scientists: viewing of Soviet TV. May be repeated for credit.

108. Russian for Business: Language and Culture. (4) (Formerly numbered 108A-108B-108C.) Recitation, three hours. Discussion of economics and business in Russia, language and advertising, business and official correspondence. P/NP or letter grading.

Linguistics

123. Historical Commentary on Modern Russian. (4) Lecture, three hours. Requisite: course 101C. Historical explanation of phonological and morphological anomalies of modern Russian.

Literature and Civilization

25. The Russian Novel in Translation. (4) Lecture, three hours; discussion, one hour. Designed for non-majors. Study of major works by the great 19th-century Russian novelists.

30. Russian Literature and World Cinema. (4) Lecture, three hours; discussion, one hour. Examination of Russian literary masterpieces and their screen adaptations in various national cinematic traditions, focusing on problems of perception and misperception arising when literature is translated into cinema, and one national culture is viewed through the eyes of another. P/NP or letter grading.

99A. Introduction to Russian Civilization. (4) Lecture, three hours. Introductory survey of social and cultural institutions of the Russian people and their historical background.

99B. Russian Civilization in the 20th Century. (4) Lecture, three hours. Survey of literature, theater, cinema, television, press, music, and arts. Emphasis on contemporary period, with constant reference to Russian and early Soviet antecedents. P/NP or letter grading.

118. Russian Literature of Middle Ages and Enlightenment. (4) Lecture, three hours. Designed for juniors/seniors. Russian majors should take this course in their sophomore year. Lectures and readings in English. Survey of Russian literature from its origins through the Enlightenment, with focus on influence of church, state, and society in evolution of a national literature.

119. Golden Age and the Great Realists. (4) Lecture, three hours. Designed for juniors/seniors. Russian majors should take this course in their sophomore year. Lectures and readings in English. Survey of 19th-century Russian literature (Pushkin, Gogol, Tolstoy, Dostoevsky, Chekhov) in its cultural, political, and social contexts.

120. Literature and Revolution. (4) Lecture, three hours. Designed for juniors/seniors. Russian majors should take this course in their sophomore year. Lectures and readings in English. Major works of the 20th century (Belyi, Pasternak, Bulgakov, Solzhenitsyn, and others) from prerevolutionary avant-garde to the present.

124C-124T. Studies in Russian Literature. (4 each) (Formerly numbered 124A-124G.) Lecture, three hours. Lectures and readings in English. P/NP or letter grading. Following writers are alternately discussed: **124C.** Chekhov. (Formerly numbered 124F); **124D.** Dostoevsky; **124G.** Gogol. (Formerly numbered 124B); **124N.** Nabokov. (Formerly numbered 124G.) Nabokov as writer (the European stories and novel *The Gift*, originally written in Russian, and the American novels *Lolita*, *Invitation to a Beheading*, and *Pale Fire*, originally written in English) and as critic (with excerpts from his criticism and from works by Pushkin, Gogol, and Lermontov), translator (*Eugene Onegin*), and memoirist (*Speak, Memory*). **124T.** Tolstoy. (Formerly numbered 124E.)

125. The Russian Novel in Its European Setting. (4) Lecture, three hours. Designed for juniors/seniors. Lectures and readings in English. Emphasis on 19th- and 20th-century novelists.

127. Women in Russian Literature. (4) Lecture, three hours. Designed for juniors/seniors. Lectures and readings in English. Introduction to "alternative tradition" of women's writings in Russia and the Soviet Union. Emphasis on images of women expressed in this tradition as compared with those found in works of contemporary male writers.

128. Russian Science Fiction. (4) Lecture, three hours. Readings in English. Introduction to Russian science fiction in the 20th century. Emphasis on function of science fiction in development of Russian culture before and after the October Revolution. P/NP or letter grading.

130A-130B-130C. Russian Poetry. (4-4-4) Lecture, three hours. Preparation: third-year Russian recommended. Lectures and readings in Russian. May be repeated for credit with topic and/or instructor change. **130A.** Introduction to Analysis of Russian Poetry. Role of biography, cultural subtexts, rhetoric, and form in interpreting poetic texts. **130B.** Poetry of Russian Neoclassicism, Romanticism, and Realism. Major works of late 18th and 19th centuries in their historical and cultural contexts. **130C.** Russian Poetry in the 20th Century. Major poetic schools from early modernism (symbolism, futurism, acmeism) to contemporary avant-garde.

140A-140D. Russian Prose Fiction. (4-4-4-4) Lecture, three hours. Preparation: third-year Russian recommended. Lectures and readings in Russian. May be repeated for credit with topic and/or instructor change. **140A.** Introduction to Analysis of Russian Narrative Prose. Close analysis of genre, narrative, and rhetorical strategies and interplay of literature, history, and culture. **140B.** Russian Romantic Prose. Karamzin, Pushkin, Gogol, and others. **140C.** Great Realists. Dostoevsky, Tolstoy, and others. **140D.** 20th-Century Modernism.

M150. Russian Folk Literature. (4) (Same as Folklore M150.) Lecture, three hours. Lectures and readings in Russian.

M170. Russian Folklore. (4) (Same as Folklore M170.) Lecture, three hours. Lectures and readings in English. General introduction to Russian folklore, including survey of genres and related folkloric phenomena.

193. Seminar: Russian Literature. (4) Seminar, three hours. Requisite: course 6. Recommended: course 101C. Reading and discussion of selected authors; written seminar papers usually required. May be repeated for credit with topic and/or instructor change.

Graduate Courses

201A-201B-201C. Russian: Vocabulary, Pronunciation, Style. (4-4-4) Lecture, three hours. Requisites: courses 102C, 106. Conducted in Russian. Reading and analysis of texts with focus on vocabulary, pronunciation, and style, respectively, in three consecutive terms. Letter grading.

Linguistics

202. Structure of Colloquial Russian. (4) Phonology, morphology, word formation, lexicon, and sentence and discourse structure of contemporary vernacular of Russian intelligentsia in context of linguistic variation. S/U or letter grading.

203. Practicum in Russian. (2) Requisite: course 201C. Two terms per year required of Ph.D. students. Reading of advanced texts; advanced composition, conversation; stylistics. May be repeated for credit. S/U grading.

204. Introduction to History of the Russian Language. (4) Lecture, three hours. Requisites: course 220A, Slavic 201. Required for M.A. (linguistics, literature). Survey of history of the Russian language from its beginning to the present.

210. Readings in Old Russian Texts. (4) Lecture, three hours. Requisite: Slavic 201. Readings in pre-modern Russian texts. May be repeated for credit.

220A-220B. Structure of Modern Russian. (4) Lecture, three hours. **220A.** Phonology and Morphology. Required for M.A. (literature, linguistics). Advanced study and analysis of problems in Russian phonology, inflection, and derivation. **220B.** Morphosyntax. Requisite: course 220A. Required for M.A. (linguistics). Survey of Russian syntax and grammatical categories.

241. Topics in Russian Phonology. (4) Lecture, three hours. Requisite: course 220A. Selected topics in Russian phonology. May be repeated for credit with consent of instructor.

242. Topics in Russian Morphology. (4) Lecture, three hours. Requisite: course 220A. Selected topics in Russian inflection and derivation. May be repeated for credit with consent of instructor.

243. Topics in Historical Russian Grammar. (4) Lecture, three hours. Requisites: course 204, Slavic 221. Selected topics in Russian historical phonology, morphology, and syntax. May be repeated for credit with consent of instructor.

261. Discourse Grammar of Russian. (4) Analysis of phenomena of Contemporary Standard Russian controlled by discourse/pragmatic factors at all levels of linguistic structure from phonology to intersentential syntax. S/U or letter grading.

263. Russian Dialectology. (4) Lecture, three hours. Requisite: Slavic 221. Phonology and grammar of modern Great Russian dialects.

264. History of the Russian Literary Language. (4) Lecture, three hours. Requisites: course 204, Slavic 201. Evolution of literary Russian from the 11th to 20th century. Lectures and analysis of texts.

265. Topics in Russian Syntax. (4) Lecture, three hours. Requisite: course 220B. Traditional and generative approaches to Russian syntax. May be repeated for credit with consent of instructor.

Literature and Civilization

211A. Literature of Medieval Rus'. (4) Lecture, three hours. Required for M.A. (literature). Survey of the literature from its beginning through the Kievan and Muscovite periods up to end of the 17th century.

211B. 18th-Century Russian Literature. (4) Lecture, three hours. Required for M.A. (literature). Lectures and readings in major and secondary writers. Analysis of related literary works.

212A-212B. 19th-Century Russian Literature. (4-4) Lecture, three hours:

212A. The Golden Age. Required for M.A. (literature, linguistics). Survey of major literary movements and schools following demise of neoclassicism: sentimental school, early and late Romanticism, and beginnings of natural school. Discussion of representative works of Karamzin, Zhukovsky, Batyushkov, Pushkin, Baratynsky, Lermontov, Gogol.

212B. Age of Realism. Required for M.A. (literature). Survey devoted to emergence of critical and psychological realism, beginning with early works of Turgenyev, Goncharov, and Dostoevsky, moving to major novels of Tolstoy, Dostoevsky, and Saltykov-Shchedrin, and concluding with works of the presymbolist period, especially the short stories of Chekhov.

213. 20th-Century Russian Literature. (4) Lecture, three hours. Required for M.A. (literature). Lectures and readings in major and secondary writers.

215. Contemporary Russian Literature. (4) Discussion, three hours. Requisite: course 213. Close readings in selected texts of poetry and prose, metropolitan and emigre, of recent vintage. May be repeated for credit. S/U or letter grading.

219. Movements and Genres in Russian Literature. (4) Lecture, three hours. Required for M.A. (literature). Introduction to most important theoretical issues of Russian literature viewed in diachronic perspective.

227. Linguistic Approaches to Russian Poetry. (4) Lecture, three hours. Designed for graduate students. Introduction to use of linguistic methods in study of Russian poetic texts. May be repeated for credit.

251. Topics in Literature of Medieval Rus'. (4) Lecture, three hours. Requisite: course 211A. Detailed discussion of particular writers, periods, or genres. May be repeated for credit with consent of instructor and graduate adviser.

270. Russian Poetics. (4) Lecture, three hours. Introduction to technical study of Russian poetics and versification, with attention to metrics, stanza forms, rhyme, and development of various verse types from the 18th into the 20th century.

290. Seminar: Russian Poetry. (4) Seminar, three hours. Recommended preparation: course 270. Detailed study of a single author, period, or work. May be repeated for credit with consent of instructor and graduate adviser.

291A. Seminar: Literature of Medieval Rus'. (4) Seminar, three hours. Requisite: course 211A. Selected topics from the 11th through the 17th century. May be repeated for credit with consent of instructor and graduate adviser.

291B. Seminar: 18th-Century Russian Literature. (4) Seminar, three hours. Requisite: course 211B. Selected authors and works from 18th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

292. Seminar: 19th-Century Russian Literature. (4) Seminar, three hours. Requisites: courses 212A-212B. Selected authors and works from 19th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

293. Seminar: 20th-Century Russian Literature. (4) Seminar, three hours. Requisite: course 213. Selected authors and works from 20th-century poetry, prose, and drama. May be repeated for credit with consent of instructor and graduate adviser.

294. Seminar: Russian Literary Criticism. (4) Seminar, three hours. Requisites: courses 211B, 212A-212B, 213. Detailed study of specific school of literary criticism, single literary critic, or period in Russian literary history as reflected in literary criticism. Simultaneous or similar phenomena in literary criticism in the West. May be repeated for credit with consent of instructor and graduate adviser.

296. Seminar: History of Russian Culture. (4) Discussion, three hours. Reading and discussion on selected topics in history of Russian culture.

Serbian/Croatian

Upper Division Courses

103A-103B-103C. Elementary Serbian/Croatian. (5-5-5) Recitation, five hours; outside study, 10 hours minimum. Basic courses in Serbian/Croatian. P/NP or letter grading.

103D-103E-103F. Advanced Serbian/Croatian. (4-4-4) Recitation, three hours. Requisite: course 103C. P/NP or letter grading.

154. South Slavic Literature. (4) (Formerly numbered 154A-154B.) Lecture, three hours. Lectures and readings in English. Survey of South Slavic literature from Middle Ages to the present. P/NP or letter grading.

Ukrainian

Upper Division Courses

101A-101B-101C. Elementary Ukrainian. (5-5-5) Recitation, five hours; outside study, 10 hours minimum. Basic courses in the Ukrainian language. P/NP or letter grading.

152. Ukrainian Literature. (4) Lecture, three hours. Lectures and readings in English. Survey of writers, literary trends, and issues in Ukrainian literature from the late 18th century to the present. Special attention to works of such major figures as I. Kotlyarevsky, T. Shevchenko, I. Franko, L. Ukrainka, and P. Tytchyna.

Non-Slavic Languages of Eastern Europe

Hungarian

Upper Division Courses

101A-101B-101C. Elementary Hungarian. (4-4-4) Discussion, three to four hours. Course 101A is requisite to 101B, which is requisite to 101C. Introduction to grammar; instruction in speaking, listening, reading, and writing. P/NP or letter grading.

199. Special Studies in Hungarian. (2 to 4) Tutorial, to be arranged. Independent studies course for students who desire more intensive or specialized investigation of material covered in a regular course and who present such a course as a requisite. P/NP or letter grading.

Romanian

Lower Division Course

99. Introduction to Romanian Civilization. (4) Lecture, three hours. Introductory survey of social and cultural institutions of the Romanian people and their historical background.

Upper Division Courses

101A-101B-101C. Elementary Romanian. (5-5-5) Recitation, five hours; outside study, 10 hours. Basic courses in the Romanian language. P/NP or letter grading.

101D-101E-101F. Advanced Romanian. (5-5-5) Recitation, five hours; outside study, 10 hours. Requisite: course 101C. Course 101D is requisite to 101E, which is requisite to 101F. Differences between oral and written discourse, expansion of students' general and academic vocabulary, and increase of range of grammatical structures for use in speaking and writing. Cultural information to be included in readings.

104. Intensive Elementary Romanian. (12) Intensive basic course in Romanian equivalent to courses 101A-101B-101C. P/NP or letter grading.

152. Survey of Romanian Literature. (4) Lecture, three hours. Lectures and readings in English. Survey of Romanian literature from the Middle Ages to the present.

Graduate Course

201. Romanian as a Romance Language. (4) Lecture, three hours. Survey of structure and development of the Romanian language, with special emphasis on relationship of Romanian to other members of the Romance group.

SOCIAL SCIENCES

College of Letters and Science

UCLA

1312 Murphy Hall

Box 951438

Los Angeles, CA 90095-1438

(310) 825-4017

Scope and Objectives

There is no major in social sciences; however, several undergraduate courses are offered for interested students.

Social Sciences

Lower Division Courses

20. Racial Minorities in the U.S. (4) Lecture, three hours; discussion, one hour. Multidisciplinary examination of history and culture of Afro-Americans, Asian Americans, Chicanos, and Native Americans in the U.S. Topics include origins and maintenance of inequality, ethnic images in literature and art, psychosocial dimensions of racism, social movements, and minorities in California.

30. Law and Society. (3) Introduction to nature of legal institutions, processes, and norms.

40. Introductory Statistics. (4) In a series of case studies from science and decision making, use of probability and statistics to quantify uncertainty and figure out how to make sensible choices in the face of it. Topics include how to design experiments and conduct surveys to reduce uncertainty, how to analyze data, and how to validly assess causality. Discussion-style learning blended with interactive sessions on personal computers, making numerical and graphical summaries that both measure uncertainty and help figure out what to do about it. P/NP or letter grading.

88. Introduction to Social Sciences. (4) Seminar, three hours. Introduction to methods, concepts, and practices of social scientific scholarship. Organized around broad, interdisciplinary themes in anthropology, economics, geography, history, political science, psychology, and sociology. Emphasis on social sciences disciplines as a whole. P/NP or letter grading.

Upper Division Course

100. History and Politics of Affirmative Action. (4) Lecture, three hours; discussion, one hour. Selected themes in sociology, politics, and education to explore questions surrounding diversity, affirmative action, and discrimination. P/NP or letter grading.

Scope and Objectives

The primary objectives of the Department of Social Welfare graduate program are to prepare leaders for the profession of social work and to develop the empirical base for all facets of practice. In response to changing demographic trends and the emergence of new social problems, the department provides leadership in the areas of policy, practice, and research and in the development of an innovative curriculum for training students and professionals to meet the service needs of a multicultural clientele.

The educational program is based on the premise that all students need to acquire a common body of knowledge and basic skills, and a common understanding of the philosophy and values of the profession. These then form a sound foundation for the development of more specialized knowledge and skills along the lines of each student's interests and the needs of the field.

Students are encouraged to take advantage of the resources within the University by selecting elective courses in related disciplines. In addition, as a department within the School of Public Policy and Social Research, the program affords students instructional opportunities in the other affiliated departments — Policy Studies and Urban Planning.

Beyond national opportunities in the profession of social work, there is increasing demand for qualified and experienced social workers to serve in the international field, where many social service programs are conducted under the auspices of the United Nations, the U.S. government, and national sectarian organizations. Graduates of the doctoral program generally secure appointments at major universities or research centers.

The challenge to the department, the profession, and those who join us as students is to prepare to forge the paths, build the bridges, and shape the future to ensure that all individuals, families, and communities enjoy better education, better health care, better job training, and better economic futures.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The Department of Social Welfare offers the Master of Social Welfare (M.S.W.) degree.

Admission

In addition to University graduate admission requirements, the M.S.W. program requires a minimum of seven courses in the liberal arts, including three in the sociobehavioral sciences, or a combination of liberal arts and social welfare subjects as requisite undergraduate preparation for graduate study in the field of social work. An elementary statistics course with a grade of B or better and one course with human biology content are also required.

A grade-point average of 3.0 or better is required in all courses taken during the junior and senior years. However, applicants who have a grade-point average below 3.0 may be considered when there is clear evidence of capacity for academic achievement and professional development. In addition, the department applies the following criteria in the selection of candidates: personal suitability for professional education and a potential for successful social work practice, a satisfactory state of health, and an adequate financial and personal plan to permit completion of degree requirements.

The General Test of the Graduate Record Examination (GRE) is required, as are official transcripts from every school attended since high school. GRE results must be submitted prior to any evaluation of the application for admission. GRE scores must be less than five years old and may be repeated to achieve a higher score, if desired. In addition, international students whose native language is not English and whose higher education was not obtained in an English-speaking institution are required to take the Test of English as a Foreign Language (TOEFL). The department may request that specified additional examinations are taken to assist in the assessment of candidacy for admission.

Three letters of recommendation are required. In addition, an autobiographical statement and a professional concepts and goals statement must accompany the application.

Although a personal interview is not normally required as part of the application procedure, whenever possible a meeting with a member of the faculty is arranged for applicants.

Admission to the department requires simultaneous application to (1) the Department of Social Welfare and (2) the Graduate Division. Both applications and the program brochure can be obtained on written request to the Department of Social Welfare Admissions.

Concurrent Degree Program

The Department of Social Welfare and the School of Law offer a concurrent degree program whereby students may pursue the M.S.W. and the Juris Doctor degrees at the same time. For admission, applicants are required to satisfy the regular admission requirements of both schools. Students complete their first year of law study in the first year of the four-year program. Students complete their first year of social welfare study in the second

year of the four-year program. In the third and fourth years, students meet the other requirements for both programs. The total number of units reduced from the social welfare portion of the concurrent program is 10, and the total number reduced from the law portion of the concurrent program is 12. Students complete a total of 66 quarter units in social welfare and 75 semester units in law to achieve both degrees. Students must qualify for graduation in both the School of Law and Social Welfare to obtain either degree. Applicants interested in the program should contact the Department of Social Welfare or the School of Law.

Areas of Study

Social work practice in organizations, communities, and policy settings (SWCOPS), and social work practice with individuals, families, and groups (SWIFG) are offered as social work methods concentrations. Specializations (sub-concentrations) are available in gerontology, child welfare, school and youth services, health services, and mental health services.

Course Requirements

A total of 76 units in departmental courses is required, including three courses in the sequence of social welfare policy and services, three courses in the human behavior and social environment sequence, six courses in methods of social work practice, four courses in social welfare research, plus six quarters of field practicum. Appropriate substitutions or waivers may be requested. With the consent of the chair, students may take courses in other graduate schools or programs of the University in fulfillment of the degree requirements.

With the consent of the instructor and chair, tutorial studies of comparable material in the 500 series may be substituted for either required or elective courses. A maximum of nine units of 500-series courses may be applied toward the entire graduate course requirement for the degree.

While no University-approved specific thesis is required for the M.S.W. degree, the curriculum requires theoretical courses in research methodology. An option to the second-year required substantive social welfare research course is the satisfactory completion of an individual research project, or participation in a group research project concerned with a social welfare problem. This research option requires approval of the department chair and faculty research adviser.

Comprehensive Examination Plan

All M.S.W. candidates must pass an oral comprehensive examination in the Spring Quarter of the second year of study. The examination covers the entire range of the student's program of study.

Thesis Plan

None.

Doctoral Degree

Admission

Admission requirements for the program leading to the Ph.D. degree in Social Welfare include meeting the general admission requirements of the Graduate Division and a Master of Social Work (M.S.W.) degree from an accredited school of social work with a superior academic record. Students who possess a master's degree in social science and professional experience in a related field may also be admitted under one of the following plans:

(1) Applicants who wish to obtain an M.S.W. are required to complete the first-year M.S.W. program. Students can be exempted from some second-year M.S.W. requirements via examinations on the basis of preparation received in doctoral courses. This plan is also available to applicants with a B.A. degree who possess an outstanding academic record.

(2) Applicants who do not wish to obtain an M.S.W. may be required to take certain M.S.W. courses as requisites to doctoral courses.

The Graduate Record Examination (GRE) General Test is required. International applicants are required to take the Test of English as a Foreign Language (TOEFL). The program may request that additional examinations be taken to assist in the assessment of candidacy for admission.

Official transcripts from every school attended since high school are required. Three letters of recommendation and a typewritten statement of professional and educational objectives are required. To exemplify communication skills, applicants may submit any of the following: published articles, master's thesis, unpublished papers, or term papers written in graduate courses.

Admission criteria include quality of performance in previous undergraduate and graduate study, capacity for doctoral-level scholarship, ability to express oneself clearly in writing, success in professional employment and other pertinent experiences, results of the GRE, and other qualifications indicating eligibility for advanced study and research. Enrollment in the doctoral program is limited, and it may not be possible to accept all applicants who meet the formal qualifications for admission.

Prospective students must apply separately to the Department of Social Welfare and to the Graduate Division. Both applications and the school brochure are available on written request to the Department of Social Welfare doctoral program.

Major Fields or Subdisciplines

The program trains research-oriented scholars to advance the field of social welfare through research and knowledge development, and to assume leadership roles in academic, policy, and practice settings. The curriculum is organized into three major areas: (1) specialization in a substantive area of social welfare, (2) integration of social and behavioral

science knowledge into social welfare, and (3) research methods. Programs of study are planned in relation to the special and individual needs and interests of students.

Course Requirements

There is a minimum core of required courses which includes two seminars on practice theory and research; two seminars on social welfare policy; and two graduate-level courses in statistics. In addition, students are required to take (1) at least three graduate-level courses in the social and behavioral sciences outside the department related to their specialization in social welfare; (2) three courses in advanced research methods; and (3) three quarters of research internship.

Every effort is made to individualize the curriculum around students' area of interest and plans for the dissertation. In order to achieve this goal, a variety of patterns is utilized, including tutorials, small seminar groups, special courses in the M.S.W. program, and courses in other departments and schools of the University.

Written and Oral Qualifying Examinations

The qualifying examinations consist of two parts:

(1) An examination in social welfare policy and practice, reviewing current theory and research. The examination is given at the end of the third quarter of the first year.

(2) A major publishable scholarly paper on a social welfare topic, demonstrating the student's mastery of social science theory and methods of scientific inquiry. The paper is evaluated by a three-member committee appointed by the chair of the doctoral committee.

The qualifying examinations are graded on a pass/fail basis, and passing them is requisite to pursuing the dissertation. If students fail one or more components, they may be permitted to re-take the examination only on recommendation of the department's doctoral program committee.

Advancement to doctoral candidacy follows successful completion of both the written qualifying examination and subsequently the University Oral Qualifying Examination, which covers the dissertation proposal and related areas. It is administered by a doctoral committee which consists of three members from the Department of Social Welfare and at least one faculty member from another department of the University.

Social Welfare

Upper Division Courses

100A. Introduction to Social Welfare: Policies and Programs. (4) Origin and development of major U.S. social welfare programs and policies guiding them, with emphasis on analysis of policy developments/issues related to provision of social welfare services. Study of historical and current responses of the profession to major social problems.

100B. Social Welfare Policy: Overview. (4) Requisite: course 100A. Review of existing policy regarding major social issues in the field of social welfare. Examination of discrepancy between need and capacity of social agencies to address need. Exploration of differential impact of policy on various populations.

101. Social Welfare in a Multicultural Society. (4) Social policy viewed from perspective of various cultural groups. Students to become aware of their own cultural perspective and learn to recognize similarities and differences in values, perspectives, and beliefs across cultural groups.

102. Social Welfare Organizations and Community Systems. (4) Recommended requisites: courses 100A, 100B. Detailed demonstration of implementation of policy via the functioning of human service organizations. Examination of organizational structures/functions. Exploration of characteristics and organization of the community and forces that influence its development and change.

103. Introduction to Direct Practice with Individuals, Families, and Groups. (4) Requisites: courses 100A, 100B, 101. Description and demonstration of basic skills employed in direct social work practice via the casework process. Students practice these skills in written, role-play, small group, and video or audio exercises. P/NP or letter grading.

104A. Filipino American Community and Family. (4) Examination of interaction of Filipino American families and communities within the larger social and political environment to understand importance of social, cultural, and political influences of Filipino American families and communities. P/NP or letter grading.

104B. Japanese American Redress. (4) Examination of process through which Civil Liberties Act of 1988 was created, pursued, and passed. This act was the official apology from the U.S. government to over 110,000 Japanese Americans incarcerated in concentration camps during World War II. P/NP or letter grading.

M104C. Diversity in Aging: Roles of Gender and Ethnicity. (4) (Formerly numbered 104C.) (Same as Gerontology M104C and Women's Studies M104C.) Lecture, four hours. Exploration of complexity of variables related to diversity of the aging population and variability in aging process. Examination of gender and ethnicity within context of both physical and social aging, in a multidisciplinary perspective utilizing faculty from a variety of fields to address issues of diversity. Letter grading.

M104D. Public Policy and Aging. (4) (Formerly numbered 104D.) (Same as Gerontology M104D.) Examination of theoretical models and concepts of the policy process, with application to aging policy. Analysis of decision-making processes that affect aging policy. Description of history of contemporary aging policy. Exploration of current policy issues affecting the elderly. P/NP or letter grading.

M104E. Social Aspects of Aging. (4) (Formerly numbered 104E.) (Same as Gerontology M104E.) Topics include theories of aging, economic factors, changing roles, social relationships, and special populations. Weekly seminars organized around a key aspect of social gerontology. P/NP or letter grading.

104F. Japanese American Community and Family. (4) Examination of interaction of Japanese American families and communities within the larger social and political environment to understand importance of social, cultural, and political influences of Japanese American families and communities. P/NP or letter grading.

105. Social Welfare Policy in Modern America: Historical Perspectives. (4) Lecture, three hours; outside study, nine hours. Historical overview of American social policy dealing with three core societal problems: poverty, sickness, and joblessness. Programs developed by governments to ameliorate these problems have typically been public insurance programs or cash transfers such as unemployment insurance, welfare, and Social Security. Collectively these programs are known as "the welfare state"; examination of origins of the U.S. welfare state, its development over time, and features that make it distinctive as compared to welfare states in other nations.

106. Research Seminar and Field Observation: Social Welfare. (4) Seminar, three hours; discussion, one hour; outside study, eight hours. Didactic component with focus on development of basic skills in the areas of research. Students select one field of observation experience (module) from a number of field settings. P/NP or letter grading.

107. Field Practicum: Social Welfare. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 106. In field practicum students are placed in a specific agency where they combine observation of agency functions with participation in specific agency tasks and roles under instructional supervision of an agency mentor and a UCLA faculty member. P/NP or letter grading.

M108. Violence against Women. (4) (Same as Women's Studies M187.) Lecture, three hours. Requisites: Women's Studies 10, 110A. Factual information and theoretical analyses regarding various forms of violence against women and girls in their homes, workplaces, and communities through critical examination of social structures and social science research.

M140. Introduction to Study of Aging. (4) (Formerly numbered 140.) (Same as Gerontology M140 and Psychology M140.) Lecture, three hours. Designed for juniors/seniors. Perspectives on major features of human aging — biological, social, psychological, and humanistic. Introduction to information on the range of influences on aging to prepare students for subsequent specialization. P/NP or letter grading.

199. Special Studies in Social Welfare. (2 or 4) Preparation: 3.0 grade-point average. Designed for juniors/seniors. Intensive directed research in social welfare. P/NP or letter grading.

Graduate Courses

201A-201B. Dynamics of Human Behavior. (3-3) Lecture, two hours; discussion, one hour. Biopsychosocial factors associated with individual and group behavior and development as applicable in social functioning of individuals and groups. Emphasis on theoretical issues and research evidence which contribute to a unified theory of human development. Letter grading.

202A-202B. Dynamics of Human Behavior. (2-2) Requisites: courses 201A-201B. Deviations and pathologies or stresses in physical, emotional, and social areas of human functioning as those problems relate to role and function of the social worker.

203A-203B-203C. Integrative Seminars. (2-2-2) Integrative courses which bring together theory and practice of social work in a variety of topic areas relevant to the profession. Includes identification of problem areas and populations-at-risk requiring further examination. S/U or letter grading.

M203D. Supporting Families of Children with Special Needs. (2) (Same as Psychiatry M254.) Techniques and issues in counseling families through evaluation, feedback, and treatment. Social and psychological stresses on family unit, professional's reactions, community resources, and issues of genetic counseling, placement, and developmental crises. S/U grading.

M203E. Hispanic Mental Health Issues and Treatment. (2) (Same as Psychiatry M231.) Mental health issues and needs of Hispanics through seminars and videotapes dealing with historical comparison of psychiatry in Mexico and the U.S., analysis of various theoretical perspectives regarding biopsychosocial behavior; distinguishing psychodynamic from cultural factors in treatment of Spanish-speaking patients; treatment of Hispanic families, couples, undocumented persons, and criminal justice system clientele.

205. Cross-Cultural Awareness. (4) (Formerly numbered 205A.) Lecture, two hours; discussion, two hours. Designed to aid students in development of professional perspectives that will allow them to work effectively with members of myriad cultural groups, to discuss with clarity alternative concepts of culture in determination of individual behavior responses, and to identify their own personal cultural values and assumptions. S/U or letter grading.

220. History and Philosophy of Social Welfare. (2) History of social work as a field: body of knowledge, method and process, and point of view analyzed within context of economic, political, social, philosophical, and scientific climate of the period.

M221A. Foundations of Social Welfare Policy. (4) (Formerly numbered 221A.) (Same as Policy Studies M210.) Lecture, three hours. Nature, roles, and history of welfare institutions in different societies; applicable social system theory of different components of the welfare system; theory and research about welfare policies and organizational forms. S/U or letter grading.

221B. Social Welfare Policy and Services II. (2) Understanding of significant theoretical constructs and relevant empirical evidence dealing with how organizations develop and maintain their internal functions. Development of beginning skill in organizational analysis. Special attention to organizational analysis of social welfare services.

223. Seminar: Social Work Profession. (2) Nature and role of social work in contemporary society; relationships with other professions; probable future trends in the profession; social work ethics, professional organizations, certification licensing; professional responsibility for continued self-criticism and improvement of the profession. S/U grading.

225A-225B. Social Welfare Policy. (4-4) Discussion, three hours. Designed for Ph.D. students:

225A. Formulation and Analysis. Examination of principal issues in development, formulation, and adoption of U.S. social welfare policies, with particular focus on income distribution and redistribution. Emphasis on analysis of social policy issues and conceptual frameworks for analysis.

225B. Implementation and Evaluation. Examination of issues in implementation and evaluation of social welfare policies, particularly those pertaining to provision, organization, and delivery of social services, including auspices funding, distribution, criteria for effectiveness, and use of quantitative methods in policy analysis.

230A-230B-230C. Theory of Social Welfare Practice with Individuals, Families, and Groups I, II, III. (2-2-2) Lecture, two hours. Corequisite: required social work practicum. Introduction to theory of social work with individuals and small groups and to principles of practice which are derivative of this and related theory. S/U or letter grading.

231A-231B-231C. Advanced Theory of Social Welfare Practice with Individuals, Families, and Groups IV, V, VI. (4-4-4) Lecture, three hours; outside study, nine hours. Corequisite: required social work practicum. Advanced level, critical analysis of theories, concepts, and principles underlying social case-work practice. Specific attention to deviation and stress as conditions affecting functioning of individuals and groups, and to diagnostic knowledge and competence required in rehabilitation and prevention. S/U or letter grading.

240A-240B-240C. Theory of Social Welfare Practice in Organizations, Communities, and Policy Settings I, II, III. (2-2-2) Lecture, two hours. Corequisite: required social work practicum. Historical and theoretical developments in administration, planning, and community organization; understanding the community as a social system, administration of organizations; role of the practitioner in identification, analysis, and evaluation of needs, existing programs, policies, structures, and strategies of intervention. S/U or letter grading.

241A-241B-241C. Advanced Theory of Social Welfare Practice in Organizations, Communities, and Policy Settings IV, V, VI. (4-4-4) Lecture, three hours; outside study, nine hours. Corequisite: required social work practicum. Emphasis on various patterns of community action for attaining social welfare objectives; research and field experience directed toward study of social problems within context of community planning; emerging patterns of physical, economic, and social planning within framework of social change theory. S/U or letter grading.

M241D. Social Advocacy and Domestic Violence. (4) (Same as Law M359.) Lecture, three hours; field-work. Use of domestic violence as a case study to give students skills needed to advocate for individuals or issues. How systems work, how law legitimizes systems, and how advocacy can be used to change the systems.

245A-245B. Development of Social Work Practice Theory. (4-4) Discussion, three hours. Designed for Ph.D. students:

245A. Epistemology of Practice. Guiding scientific models of practice theories; process of emergence, development, and change of practice theories; intellectual foundations of practice theories; how professionals learn, apply, accumulate, and modify their practice knowledge; science and practice interplay.

245B. Models of Social Work Practice Research. Research for practice, with major emphasis on methods of intervention research which seek to design, test, evaluate, and disseminate innovative intervention technologies.

258. Critical Problems in Social Welfare. (2) Designed for Ph.D. students. Current problems in the field of social welfare. Specific topics vary depending on research and educational interests and needs of class. May be repeated for credit. S/U grading.

280. Social Welfare Research. (3) Lecture, three hours; outside study, six hours. Sources, nature, and uses of social work theory and research-based knowledge and of broader social data relevant to social welfare activities. Critical analysis of major methods of developing scientific knowledge. S/U or letter grading.

281A-281B-281C. Advanced Social Welfare Research. (2-2-2) Individual or group research projects requiring intensive examination and analysis of a social problem area, directed toward development of research knowledge and techniques for social work practice. In Progress and S/U or letter grading.

285A-285B-285C. Research in Social Welfare. (4) Review of areas of research of concern to social workers, with special attention to design, instrument construction, data collection, data processing, data reduction, analysis, and interpretation. Designs studied include survey, panel, experimental observation, and theory development research. S/U or letter grading.

286A. Survey of Research Methods. (4) Discussion, four hours. Basic concepts underlying research methods. Content includes theoretical and conceptual approaches to research problem formulation; research design, including experimental, comparative, and survey; sampling; statistical methods; methods of observation and techniques of data analysis. S/U or letter grading.

286B. Advanced Research Methods. (4) Discussion, four hours. Advanced concepts underlying research methods. Continuing study of theoretical and conceptual approaches to research problem formulation; research design, including experimental, comparative, and survey; sampling; statistical methods; methods of observation and techniques of data analysis. S/U or letter grading.

286C. Research Internship. (4) Discussion, four hours. Supervised study and training through participation in on-going research project or one initiated by students and carried out under faculty supervision, enabling students to apply research skills developed in prior courses. May be repeated for credit. S/U or letter grading.

290A-290B-290C. Seminars: Social Work. (4-4-4) Seminar, three hours; outside study, nine hours. Series of seminars dealing with trends in social work and social welfare, with focus on current social problems affecting individuals, groups, and communities and new patterns of intervention based on recent demonstrations and research. S/U or letter grading.

M290D. Women, Health, and Aging: Policy Issues. (4) (Same as Health Services CM241.) Lecture, three hours; discussion, one hour. Preparation: two upper division social sciences courses, two upper division biological sciences courses. Social and economic context of older women's aging, major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to their health needs. Letter grading.

M290E-M290F-M290G. Child Abuse and Neglect (2-2-1) (Same as Community Health Sciences M245A-M245B-M245C, Dentistry M300.5A-M300.5B-M300.5C, Education M217G-M217H-M217I, Law M281A-M281B, Medicine M290A-M290B, and Nursing M290A-M290B-M290C.) Lecture, two hours. Course M290E is requisite to M290F, which is requisite to M290G. Intensive interdisciplinary study of child physical and sexual abuse and neglect, with lectures by faculty members of the Schools of Dentistry, Law, Medicine, Nursing, and Public Health and the Departments of Education and Psychology, as well as by the relevant public agencies. S/U or letter grading.

M290I. Children with Special Health Care Needs: Systems Perspective. (4) (Same as Community Health Sciences M420.) Lecture, three hours; field-work, one hour. Examination and evaluation of principles, policies, programs, and practices which have evolved to identify, assess, and meet special needs of infants, children, and adolescents with developmental disabilities or chronic illness and their families. Letter grading.

M290J. Child Welfare Policy. (4) (Same as Policy Studies M212.) Lecture, three hours. Development of social policy as it affects families and children from different cultural backgrounds and as it is given form in public child welfare system. Examination of development of an infrastructure to support needs of children and families. S/U or letter grading.

M290K. Mental Health Policy. (4) (Same as Policy Studies M213.) Lecture, three hours. Examination of evolution of social policy and services for the mentally ill, with emphasis on political, economic, ideological, and sociological factors that affect views of the mentally ill and services they are provided. S/U or letter grading.

M290L. Poverty, the Poor, and Welfare Reform. (4) (Same as Policy Studies M214.) Lecture, three hours. Major policy and research issues concerning poverty and social welfare policy directed toward the poor in the U.S. S/U or letter grading.

M290M. Health Policy. (4) (Same as Policy Studies M215.) Lecture, three hours. Introduction to contemporary issues in health care financing and delivery, providing historical perspective on emergence of these issues. Examination of major public programs and their relationship to issues of access and cost. S/U or letter grading.

M290N. Public Policy for Children and Youth. (4) (Same as Policy Studies M216.) Lecture, three hours. Policy issues that affect children and adolescents in relation to their interaction with schools and the community, with emphasis on impact of policy across federal, state, and local levels. S/U or letter grading.

M290P. Public Policy for the Elderly and Their Families. (4) (Same as Policy Studies M211.) Lecture, three hours. Examination of theoretical models and concepts of policy process and application to aging policy. Analysis of decision-making processes that affect social policies. Description of historical development of contemporary policy. Exploration of current proposals and issues. S/U or letter grading.

M290Q. Social Welfare Policy in Asian American Communities. (4) (Same as Asian American Studies M290Q.) Seminar, three hours. Overview of social welfare policy in Asian American communities. Introduction to major social welfare policies and programs in the U.S. and impact on Asian American communities. Policy development, approaches, processes of implementation, evaluation, and strategies to effect policy. S/U or letter grading.

M290R. Law and the Poor. (4) (Same as Law M215, Policy Studies M295, and Urban Planning M248.) Lecture, three hours. Designed for graduate students. Study of major income-maintenance programs in the U.S., with emphasis on interaction of moral attitudes toward the poor and structure and implementation of the law, policy, and administration. Current reform consensus and major reforms. Letter grading.

401A-401B-401C. Practicum: Social Work. (3-3-3) Laboratory, 20 hours. Educationally directed practicum conducted in selected health, welfare, and educational facilities. Provides opportunities for students to test their theoretical knowledge and to acquire a disciplined practice foundation in the profession. In Progress and S/U grading.

402A-402B-402C. Advanced Practicum: Social Work. (4-4-4) Laboratory, 24 hours. Requisites: courses 401A-401B-401C. Practicum in social work, arranged for students in keeping with their major field of study. In Progress and S/U grading.

490. Professional Communication for Social Welfare. (2) Writing workshop on students' papers in progress, with an eye toward scholarly publication. Analysis and group discussion of rhetorical and stylistic principles. May be repeated once. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596A. Special Study and Research in Social Welfare. (2 to 8) Tutorial, to be arranged. Individual programming for selected students to permit pursuit of a subject in greater depth. S/U or letter grading.

596B. Special Study and Research for Ph.D. Candidates. (2 to 12) Tutorial, to be arranged. Limited to Ph.D. students. S/U grading.

597A. Preparation for M.S.W. Comprehensive Examination. (2 to 8) Tutorial, to be arranged. S/U grading.

597B. Preparation for Ph.D. Qualifying Examinations. (2 to 12) Tutorial, to be arranged. Limited to Ph.D. students. S/U grading.

599. Ph.D. Dissertation Research in Social Welfare. (2 to 12) Tutorial, to be arranged. Limited to Ph.D. students. S/U grading.

Rebecca J. Emigh, Ph.D.
John H. Evans, Ph.D.
Laura L. Miller, Ph.D.

Adjunct Assistant Professors

Zsuzsa Berend, Ph.D.
Kathleen Johnston Roberts, Ph.D.
Neil Steers, Ph.D.

Scope and Objectives

Variety is the special characteristic both of the field of sociology and of the UCLA Department of Sociology, which was judged among the 10 best in the nation in a survey conducted by the Conference Board of the Associated Research Councils.

Sociology has a particular appeal to those students whose interests are broad and unspecialized. At both the undergraduate and graduate levels, students study history, politics, statistics and mathematics, race relations, demography, psychology, language, and many other topics. A sociology student becomes a member of an intellectual community in which all these interests are represented.

The primary purpose of the major in Sociology is to enhance students' capacity for critical

analysis and understanding of social phenomena. It is intended, at the same time, to serve as preparation for careers in high school or junior college teaching, social work, architecture and urban planning, law, public health, and government service, among others. It also provides training for advanced graduate work in sociology and social psychology.

The Ph.D. in Sociology usually leads to a career in research and/or teaching. Although most sociologists are employed by universities, there are increasing career opportunities in government and other nonuniversity research centers.

Undergraduate Study

Sociology B.A.

Preparation for the Major

Required: One course from Sociology 1, 2, 3, 4, M5, 31; one course from Mathematics 2, 3A, 31A; Sociology M18 (or Statistics 10, Psychology 100A, or Economics M40).

All courses required for the major in Sociology, including lower division and allied field courses, must be taken for a letter grade. A 2.0 grade-point average is required for the preparation and for the major.

The Major

Required: Ten upper division sociology courses (40 units), including Sociology 101, 102, and one course from 104, 104H, 105, 106, 113. These courses, devoted to the systematic exploration of sociological methods and theories, should be completed as early as possible and before taking other upper division courses. Students must also take seven additional upper division sociology courses.

To complete the major, four upper division allied field courses (16 units) in other departments are required (the allied fields are anthropology, communication studies, economics, geography, history, political science, and psychology), as is one course from English Composition 100, 110W, 129A through 129D, 131A through 131D (may be taken on a P/NP grading basis).

Only eight units of Sociology 199 are allowed. At least six of the sociology courses must be taken while in residence in the College of Letters and Science at UCLA.

Courses 104, 210A, and 210B are recommended for students who intend to pursue graduate work in sociology.

Honors Program

The honors program in sociology provides opportunity for outstanding students to undertake an independent year-long research project under the guidance of a faculty member.

As preparation for the honors major, students must complete Mathematics 2, 3A, or 31A, and an honors section of Sociology 1 and M18.

Prior to taking other upper division sociology courses, students must complete an honors section of Sociology 101 and 102 (Honors Collegium 61 may be substituted for course 102).

Also required are three undergraduate seminars from the Sociology 197 series; any two additional upper division sociology courses; courses 104H and 199HA-199HB-199HC (honors thesis seminars); four upper division allied field courses (16 units) in other departments (the allied fields are anthropology, communication studies, economics, geography, history, political science, and psychology); and one course from English Composition 100, 110W, 129A through 129D, 131A through 131D (may be taken on a P/NP grading basis).

Students must have a 3.5 overall grade-point average, have completed the sociology preparation requirements and, in most cases, have completed the required theory course. Applications are available from the Undergraduate Counselor's Office, 2201 Hershey Hall. Students should apply in the last term of their junior year.

Computing Specialization

Majors in Sociology may select a specialization in Computing by (1) satisfying all the requirements for a bachelor's degree in the major, (2) completing Program in Computing 10A, 10B, 10C, and (3) completing Sociology C112, 113. Students graduate with a bachelor's degree in sociology and a specialization in Computing.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

Admission

The graduate program of the Department of Sociology takes as its primary aim the training of scholars who will conduct original research contributing to the advancement of sociological knowledge. For this reason, the department ordinarily only accepts students who are seeking the Ph.D. degree. The M.A. degree in Sociology is earned as part of the process of completing the requirements for the Ph.D.

In addition to the minimum University requirements (an acceptable bachelor's degree and a B average in all upper division and graduate work), the Sociology Department requires (1) three letters of recommendation, preferably from professors of sociology who are familiar with the applicant's written work and research experiences; (2) transcripts from all colleges

where applicants have studied (the department's evaluation considers not only the record in sociology, but all undergraduate work, including coursework in English composition, logic, linguistics, and mathematics); (3) a statement of purpose, not to exceed three typewritten double-spaced pages, outlining reasons for pursuing graduate work, interests within sociology, career objectives, and any personal experiences bearing on these; (4) copies of one or two term papers or research reports written by the applicant; (5) an official statement of scores on the Graduate Record Examination (GRE); and (6) for applicants whose native language is not English, the Test of English as a Foreign Language (TOEFL).

Although background preparation in sociology is highly desirable, it is not mandatory for admission to the department. Applicants need not be uniformly high on all indicators of potential. The admissions committee, which generally consists of at least five faculty members and two advisory graduate student members, uses a number of indicators of particular skills rather than relying heavily on just one or two. For example, in assessing the level of verbal skills, the committee considers several items, including samples of written work and grades in courses that ordinarily require extensive verbal skills, as well as verbal GRE scores.

In addition to relatively formal criteria (such as analytic proficiency and articulateness), the department pays particular attention to applicants who seem likely to contribute considerable intellectual, social, or cultural diversity to its student body. Women and minorities are therefore encouraged to apply.

The deadline for receipt of applications is December 1. Application forms and more detailed information are available on request from the graduate affairs assistant in the department.

Areas of Study

See Major Fields or Subdisciplines in the Doctoral Degree section.

Course Requirements

In addition to the departmental requirements, some field examinations have their own course requirements for students who plan to take that field examination.

Before the Master's Paper Review

All students are required to take nine courses (36 units).

(1) Sociology 202A-202B. The courses, an examination of the interrelations of theory, method, and substance in exemplary sociological works, must be taken in the first year.

(2) A two-quarter graduate-level methodology sequence of which there are several alternatives such as the survey methods course or the demographic methods course. The methodology series is presently numbered Sociology 208A-208B, 211 through 216B, 217B-217C, 218A-218B, C244A-C244B. Students are required to take one methods sequence before the master's paper review and one methods

sequence after the review. In choosing a methodology sequence, students should note that some of the Ph.D. area programs and subprograms require particular methodology sequences. If students have equivalent methodological training elsewhere, they should file a petition (along with pertinent evidence and an adviser's recommendation) with the executive committee for exemption from the methodology requirement.

(3) Five 200-level courses in sociology, excluding Sociology 202A-202B, 211A through 216B, 217B-217C, 218A-218B, C244A-C244B, 289A-289B-289C, 290A-290B-290C, 292A-292B-292C, 293A-293B-293C, and 295A-295B-295C.

Students who want to take a course outside the department because they feel it would be beneficial to their master's paper or area of interest may petition to take one course outside of sociology. The petition must be approved by the chair or graduate director.

Comprehensive Examination Plan

No later than in the sixth quarter of residence students must submit an acceptable master's paper for approval by the general faculty. The paper must demonstrate general competence in sociological theory, methodology, and selected substantive areas.

As early in the graduate career as possible, students select two faculty members who consent to serve as their master's committee. Faculty serving should represent a broad range of professional interests. Formation of the master's committee may not be postponed beyond the beginning of the fourth quarter of residence in graduate work. For more specific guidelines, deadlines, and procedures regarding the master's review, contact the graduate affairs assistant.

In consultation with and on the advice of the committee, students develop a paper, usually initially written for a course, demonstrating intellectual attainment. For example, the paper may show that the student (1) has an accurate grasp of the intellectual traditions of sociology, (2) can bring evidence to bear on theoretical problems, (3) can describe how some aspect of the social order works, and (4) can adequately handle research and methodological issues. The main concern is with the student's capacity to do Ph.D.-level work.

When the master's committee feels these requirements have been met, they nominate the student for faculty review by submitting the paper to the Graduate Curriculum and Advisement Committee. That committee appoints a two-person evaluation panel which reports its assessment to the Graduate Curriculum and Advisement Committee as a whole. They consider the panel's reports as well as those of the master's committee and present an evaluation and recommendation to the full faculty. The Graduate Curriculum and Advisement Committee may recommend any of the following options:

(1) The paper is passed. The M.A. is granted and the student is permitted to proceed to the Ph.D.

(2) The paper is passed conditionally. The M.A. is granted and the student is permitted to proceed to the Ph.D. on completion of specified revisions of the paper.

(3) A terminal M.A. degree is granted.

(4) The paper is not acceptable. The student may resubmit at a later time or be asked to withdraw.

The Graduate Curriculum and Advisement Committee's recommendation and the analysis on which it is based is made available to the student, the master's committee, and the faculty no later than one week prior to the faculty review. The faculty at its review may ratify the recommendation of the Graduate Curriculum and Advisement Committee or alter it, including the option of making recommendation to the dean of the Graduate Division to terminate graduate status.

Thesis Plan

None.

Doctoral Degree

Admission

For general admission information for the program leading to the Ph.D. degree in Sociology, see Admission under Master's Degree.

In the quarter following acceptance of the master's paper, usually at the beginning of the third year, students must submit a proposal to the Graduate Curriculum and Advisement Committee specifying two of the field examinations listed below and a time table for completing these examinations.

Students who enter graduate studies at UCLA with a Master of Arts degree in Sociology from another institution normally come up for a master's paper review in the first quarter of residence at UCLA, and under no circumstances later than the third quarter of residence. In this review, the department determines whether or not the student may proceed directly to preparation for the field examinations, if additional courses need to be taken for breadth purposes, if the submitted paper needs additional work or if an additional paper needs to be done, and if the methodology sequence requirement has been adequately satisfied. In addition to a paper, which can be an M.A. thesis written at another university, students should submit for the master's paper review a transcript from the university at which the M.A. degree was earned so that this department can determine whether the requirements ordinarily constraining students in the first years of this program have been met.

Major Fields or Subdisciplines

Class, Politics and Society. The class structure, broadly defined, is the center of contemporary capitalism. The class, politics, and society field focuses on the nature of the class structure,

how it affects the character of work and the work process, the nature of the modern corporation, and the relation of the class structure to politics and political power. The field pays attention to the issue of salience of class versus other identities such as gender, age, race, and nationalism, and examines the contemporary globalization tendencies of capitalism.

Comparative Ethnicity and Nationalism. The comparative ethnicity and nationalism field focuses on the comparative study of race, ethnicity, and nationalism. It addresses the rationale, or lack of rationale, for distinguishing analytically between nation and race; differences across time, place, and context in the conceptualization of ethnicity, nation, and race; the distinctiveness in comparative perspective of the organization and understanding of ethnicity, nation, and race in America; the manner in which the modern state, in different contexts, has shaped the organization and expression of claims based on ethnicity, nation and race; the opposition (or pseudo-opposition) between primordialist and contextualist or constructivist theories of ethnicity, nation, and race; and the contribution, and limitations, of rational choice and other microanalytical approaches to the understanding of ethnicity, nation, and race.

Conversation Analysis. Conversation analysis is a field of inquiry that addresses talk and other forms of conduct in interaction studies through the detailed examination of naturally occurring instances or specimens of its occurrences. Talk-in-interaction is taken to be that primordial site of sociality in which much of what composes the life of a society and its institutions is realized. Although conversation has been the most intensively and extensively examined domain of talk-in-interaction, the field encompasses a broad range of settings and specialized genres of talk or speech-exchange systems, especially talk in work settings.

Economic Sociology. The economic sociology field provides an overview of the major debates in economic sociology, at both the macro and micro level. Topics include precapitalist economies and the development of capitalism: modernization, dependency, development, and the world system; global economy; economic institutions of advanced economies; labor, capital, property, and entrepreneurship; and class, stratification, and inequality.

Ethnographic Methodology. Sociology in the U.S. was largely created through a series of ethnographic studies. Over the last 25 years, ethnographic research has been the focus of some of the most probing self-examination in social science as a whole, featuring debates over reflexivity, human subjects' consent in narrow and broad senses of the issue, the importance of context for understanding individual acts and items of culture, social constructionism and relativism, and bias (gender, cultural, etc.) in research procedures and the conceptualization of data.

Ethnomethodology. Ethnomethodology is a field of sociology which studies the common sense resources, procedures, and practices through which members of a culture produce and recognize mutually intelligible objects, events, and courses of action. Studies in the field are directed to the investigation of social processes underlying the construction of social phenomena ranging from factual knowledge, social organization, and attributes such as race and gender, through the acquisition of skills and management of memory.

Mathematical Sociology. The questions that mathematical sociologists work on span sociology. Graph theory and linear algebra are useful in the analysis of social structure. Markov models, difference equations, and differential equations have been used to describe change. Game theory is helpful in the analysis of conflict and interdependence. Computer simulations are often useful additions to mathematical analysis.

People-Processing Institutions. Complex modern societies rely on bureaucratic institutions for both social control and service provision purposes. What is distinctive of a number of such institutions is that they change the official status of some population or clientele who come within the jurisdiction. The people-processing institutions field examines interactional and institutional processes common to such institutions, which range from criminal and juvenile courts to schools and welfare agencies and from psychiatric clinics and emergency rooms to health maintenance organizations (HMOs).

Political Sociology. The political sociology field addresses four major topics: (1) the formation and transformation of states and political regimes; (2) collective action, social movements, and revolution; (3) ideology, consciousness, and attitudes; and (4) political organization and behavior.

Race and Ethnicity. The race and ethnicity field focuses on the nature and persistence of ethnic and racial categories and groupings in contemporary societies, and on how these structures relate to social stratification systems and political and economic dynamics. The field includes a variety of perspectives and concerns, including race relations, racism, ethnic stratification, immigration, ethnic economies, and ethnic politics. While race and ethnicity in the U.S. today are the central substantive concerns, the field is explicitly comparative-historical, viewing contemporary ethnic and racial structures in the context of the spread of European colonialism and imperialism.

Self and Society. The self and society field originates in the seminal insights of social psychology that the most personal experiences – the very sense of self and personal identity – are constituted through social relations. The field focuses on the interactional, discursive, and embodied processes through which selves are created, enacted, transformed, or dissolved. Classical and contemporary perspec-

tives and issues such as the role of emotions and embodiment are studied.

Social Demography. The social demography field examines key issues and debates related to the biological, economic, social, and environmental causes and consequences of trends and patterns in demographic behaviors such as fertility, marriage, divorce, migration, social stratification, health, and mortality. Particular attention is paid to the rapidly growing literature on racial and socioeconomic differentials in demographic behavior, aging, the causes and consequences of population growth, and family and household structure and composition.

Social Stratification and Social Mobility. The major issues studied in the social stratification and social mobility field are stratification determinants of who gets greater and lesser amounts of scarce resources, in particular, the extent to which those resources are passed on from generation to generation within families and the extent to which those answers depend on the organization of families, schools, labor markets, and other institutions.

Sociology Of Gender. The sociology of gender field is concerned with gender inequality and gender differences and the social processes producing and reproducing them. It includes both macrosociological and microsociological perspectives on these processes. It also encompasses the growing scholarship on the intersection between race, class, and gender.

Urban and Suburban Sociology. The urban and suburban sociology field comprises the major topics in urban and suburban sociology. It addresses two main issues: (1) historical and comparative perspectives of urbanization and (2) urbanization and suburbanization in the U.S.

Course Requirements

After the Master's Paper Review

All students are required to take two courses (eight units) of an additional methodology sequence (Sociology 208A-208B, 211A through 216B, 217B-217C, 218A-218B, C244A-C244B), which must be completed before the award of the Ph.D. degree.

Class, Politics and Society. Required: Sociology 232. Recommended: Sociology 211A-211B, 228A-228B, 233, 252, 274.

Comparative Ethnicity and Nationalism. Recommended: Sociology 230, 231, 235.

Conversation Analysis. Recommended: Sociology C244A-C244B, 258, 266.

Economic Sociology. Recommended: Sociology 237, 254, 259, and special topics courses in economic sociology selected from courses 285A through 285Z.

Ethnographic Methodology. Required: Sociology 217A, 217B-217C, and one substantive graduate course that uses ethnographic studies.

Ethnomethodology. Recommended: Sociology 222, 271.

Mathematical Sociology. Required: Sociology C243, 281. Recommended: Sociology 208A-208B, 239A-239B, 240.

People-Processing Institutions. Required: Sociology C229B, C258. Recommended: Sociology C229A.

Political Sociology. Recommended: Sociology 228A-228B, 233, 237, 269, 272.

Race and Ethnicity. Required: Sociology 235, 261. Recommended: Sociology 230, 231, 236.

Self and Society. Required: Sociology 220 and one course from 222, 223, 224A, 224B, 264.

Social Demography. Required: Sociology 213A-213B, 226A-226B.

Social Stratification and Social Mobility. Required: Sociology 210A-210B, 239A-239B. Recommended: Sociology 263.

Sociology of Gender. Required: Any two courses from Sociology 238, 241, 252.

Urban and Suburban Sociology. Recommended: Sociology 231, 236, 297B.

Courses in the 500 series (Sociology 595, 596, 597, 599) are normally taken in preparation for the master's paper review, the field examinations, and dissertation research. While these courses may be taken to maintain enrollment, they do not count toward the course requirements.

Written and Oral Qualifying Examinations

Two specialized field examinations are administered and evaluated according to guidelines specified by the area programs. Consult the department for details regarding field examinations.

If the performance on the field examinations is satisfactory and the foreign language requirement has been fulfilled, students may nominate a doctoral committee and proceed to take the University Oral Qualifying Examination. The examination may range over general sociology, students' specific fields, and students' dissertation plans. It is given by the doctoral committee no later than six months after the completion of the written examination. A two-page abstract of the dissertation proposal must be submitted to the graduate affairs assistant for distribution to the entire faculty of the Sociology Department within two weeks of the oral examination.

In addition to the two-page abstract, a full-length dissertation proposal is required at the time of the preliminary oral examination. A dissertation proposal approved by the committee must be filed with the department reasonably soon after the preliminary orals. In the event of a major revision in the topic or methodology of the dissertation, a revised prospectus approved by the committee is required and is filed in the same manner as the original prospectus. Minor changes in the methodology and hypotheses which normally takes place as students carry out the dissertation research do not call for a revised prospectus.

When both the written and oral qualifying examinations have been successfully completed, students are advanced to candidacy by the Graduate Division.

Sociology

Lower Division Courses

1. Introductory Sociology. (4) Lecture, four hours. Survey of characteristics of social life, processes of social interaction, and tools of sociological investigation. P/NP or letter grading.

2. Changing Society and Making History. (4) Lecture, three hours; discussion, one hour. Leading question is how do politics, economics, and culture interact in changing society and making history? Answers provided by introductory level of study of contending substantive theories and contrasting methods of inquiry contained both in classic and exemplary contemporary works.

3. Sociology of Everyday Life. (4) Lecture, three hours; discussion, one hour. Examination of ways in which taken-for-granted aspects of everyday life and relationships are shaped by interactional, cultural, and historical processes. Cultivation of capacity to critically observe tacit practices through which everyday life is constructed.

4. Jobs and Careers: Sociological Approach. (4) Lecture, three hours; discussion, one hour. Application of social science knowledge to common vocational problems. Description and analysis of major trends in employment, job search and hiring, career mobility patterns, forecasting, and entrepreneurship. Analysis of current thrust to worker ownership.

M5. Social Organization of Black Communities. (4) (Same as Afro-American Studies M5.) Lecture, three hours; discussion, one hour. Analysis and interpretation of social organization of black communities, with focus on origins and development of black communities, competing theories and research findings, defining characteristics and contemporary issues.

M18. Interpretation of Quantitative Data. (4) (Formerly numbered 18.) (Same as Statistics M21C.) Lecture, three hours; discussion, one hour. Enforced requisites: course 1 (may be taken concurrently) and (Mathematics 2 or 3A). Satisfies statistics requirement for Sociology major. Reading graphs and tables; statistical description using indices of central tendency, dispersion, and association; simple linear regression. Probability; binomial, normal, t, and chi-square distributions and hypothesis testing based on them. Examples from recent issues of *American Sociological Review* or other leading sociological journals. P/NP or letter grading.

24. Conversation and Society. (4) Lecture, three hours. Examination of social norms that organize conversational interaction in everyday life. Consideration of relationship between conversation and other institutions in society. P/NP or letter grading.

31. Dilemmas of Third World Development. (4) Lecture, three hours; discussion, one hour. Introduction to understanding dilemmas of Third World social development and prospects for progress in the future.

88A-88Z. Lower Division Seminars. (4) Seminar, three hours. Limited to 15 freshmen/sophomores. Variable topics of current sociological interest. Consult *Schedule of Classes* or "Department Announcements" for topics and instructors.

Upper Division Courses

101. Development of Sociological Theory. (4) Comparative survey of basic concepts and theories in sociology from 1850 to 1920; codification of analytic schemes; critical analysis of trends in theory construction.

102. Contemporary Sociological Theory. (4) Requisite: course 101. Critical examination of significant theoretical formulations from 1920 to the present; analysis of relation between theoretical development and current research emphasis.

103. Marxist Sociology. (4) Fundamentals of Marxist theory and method and their historical development. Attention to continuing debates within Marxism and to differences between Marxism and other schools of sociological thought. May not be applied toward theory requirement for the major.

104. Introduction to Sociological Research Methods. (4) Not open to students with credit for course 104H. Systematic treatment and semiquantitative skills of use in sociological research (e.g., classification, questionnaire and schedule design, content analysis, critical analysis of studies, conceptual analysis of case materials). Fieldwork may be required.

104H. Introduction to Sociological Research Methods (Honors). (4) Lecture, one hour; discussion, three hours. In-depth introduction to process of producing scholarly sociological research for students who intend to write an undergraduate honors thesis.

105. Research Methods in Policy Analysis and Evaluation. (4) Requisite: course 144. Recommended: course 104. Approaches for identifying and analyzing social problems and for assessment of policies and interventions for their control and management.

106. Field Research Methods. (6) Lecture, two hours; discussion, two hours; fieldwork, 12 hours. Designed for juniors/seniors. Fieldwork and extensive field notes required. Theory and practice of field research, with particular emphasis on interrelations between fieldwork role and substantive findings.

107. Urban Poverty and Public Policy in the U.S. (Field Component). (4) Requisite: course 144. Corequisite: one course from Geography 150 or 159A through 159E. Supplements and enriches students' academic understanding of urban poverty and the underclass by personal exposure and direct observation in a field setting. Students required to develop a plan of service in a local social service agency and observe policy formulation and implementation. P/NP or letter grading.

109A-109B. Data Analysis for Social Scientists. (4-4) Lecture, three hours; laboratory, one hour. Introduction to applied statistics and data collection for undergraduate students, especially sociology honors students. P/NP or letter grading.

C112. Introduction to Mathematical Sociology. (4) (Formerly numbered 112.) Lecture, three hours; laboratory, two hours. Requisites: course M18, Mathematics 2, 3A (course whose content includes introductions to probability theory, matrix algebra, and differential and integral calculus). Mathematical treatment of several sociological phenomena, such as occupational mobility, population growth, organizational structure, and friendship patterns, each covered in some detail, including initial development and subsequent evaluation and modification (emphasizing both deductive and computational aspects of mathematics). Concurrently scheduled with course C243. Letter grading.

113. Statistical and Computer Methods for Social Research. (4) Lecture, three hours; laboratory, one hour. Requisite: course M18. Continuation of course M18, covering more advanced statistical techniques such as multiple regression, analysis of variance, or factor analysis. Content varies. Students learn how to use the computer and write papers analyzing prepared data sets.

116. Social Demography. (4) Studies of past, present, and future trends in population growth. Sociological theories of causes and consequences of population growth and redistribution. Emphasis on correlates of fertility, mortality, and migration.

117. Sociology of Family Demographic and Economic Behavior. (4) Examination of demographic behavior associated with social organization of the family and its relationship to society's economic system. American and European historical studies of family socioeconomic and demographic characteristics and behavior in first half of course; U.S. experience since the 1930s in second half.

CM124A-CM124B. Conversational Structures I, II. (4-4) (Same as Communication Studies M144A-M144B.) Lecture, three hours; discussion, one hour. May be concurrently scheduled with courses C244A-C244B. P/NP or letter grading. **CM124A.** Introduction to some structures which are employed in organization of conversational interaction, such as turn-taking organization, organization of repair, and some basic sequence structures with limited expansions. **CM124B.** Requisite: course CM124A. Consideration of some more expanded sequence structures, story structures, topical sequences, and overall structural organization of single conversations.

CM125. Talk and Social Institutions. (4) (Same as Communication Studies M125.) Lecture, four hours; discussion, one hour. Designed for juniors/seniors. Practices of communication and social interaction in a number of major institutional sites in contemporary society. Setting varies but may include emergency services, police and courts, medicine, news interviews, and political oratory. Concurrently scheduled with course C258. P/NP or letter grading.

126. Study of Norms. (4) Properties of norms, of normatively governed conduct, of lay and professional methods for describing, producing, using, and validating norms in contrasting settings of socially organized activities; relevance of these properties for programmatic problems of analytic sociology. Fieldwork required.

127. Mind and Society. (4) Lecture, two and one-half hours; discussion, one hour. Requisite: course 1. Study of social production of modes of thought and forms of knowledge. Study of ways in which bodies of knowledge and cognitive styles are produced, used, and transformed in everyday, organizational, and extraordinary contexts. P/NP or letter grading.

128. Sociology of Emotions. (4) Lecture, three hours; discussion, one hour. Requisite: course 1. Designed for juniors/seniors. Sociological theories and explanations of social conditions shaping and producing emotional experiences; effects of individual expression of emotions on social conditions; relations between thought, sensations, and the emotions; the self and emotions; social construction of emotions.

129. Sociology of Time. (4) Lecture, three hours; discussion, one hour. Conceptualizations of time seen from scientific, philosophical, historical, and sociological perspectives; "cyclical" and "linear" time in primitive, ancient, and medieval societies; ritual, the sacred, and experience of the eternal; structuring of urban, modern, and postmodern societies by clock, calendar, and schedule; future value orientation and notion of progress; time, labor, and social domination.

132. Social Psychology: Sociological Approaches. (4) Survey of contribution of sociologists to theory and research in social psychology, including theories of social control; conformity and deviation; reference groups; and interaction process.

133. Collective Behavior. (4) Requisites: courses 1, M18. Designed for juniors/seniors. Characteristics of crowds, mobs, publics, social movements, and revolutions; their relation to social unrest and their role in developing and changing social organization.

134. Culture and Personality. (4) Requisites: courses 1, M18. Designed for juniors/seniors. Theories of relation of variations in personality to culture and group life, in primitive and modern societies, and influence of social role on behavior.

135. Group Processes. (4) Systematic study of formation, structure, and functioning of groups; analysis of group processes and group products from a variety of theoretical viewpoints; implications of various research techniques.

136. Process and Socialization in the Family. (4) Requisites: courses 1, M18. Designed for juniors/seniors. Examination of processes of interaction, decision making, role differentiation, conflict, integration, and socialization within the family and their interrelations with society.

137. Psychoanalytic Sociology. (4) Recommended preparation: one course in theory (course 101 or 102) and in social psychology. Requisites: courses 1, M18. Fieldwork may be required. Designed to review models of integration between psychoanalysis and sociology. Application of this analytical perspective to selected substantive areas and social processes, including but not limited to group development, delinquency, deviance, socialization, identity and self formation, role taking and role making.

M138. Death, Suicide, and Trauma. (4) (Same as Psychology M163.) Lecture, three hours. Designed for juniors/seniors. Definition and taxonomy of death; new permissiveness and taboos related to death; romanticization of death; role of the individual in his own demise; modes of death; development of ideas of death through life span; ways in which ideas of death influence conduct of lives; impact of dying on social structure surrounding the individual; preventive, interventive, and postventive practices in relation to death and suicide; developmental perspective on witnessing traumatic death, including posttraumatic and grief reactions; partial death; megadeath; lethality; psychological autopsy; death of institutions and cultures. P/NP grading recommended (letter grading required if course to be applied toward Psychology or Sociology major).

143. Human Health and Society. (4) Lecture, three hours; discussion, one hour. Requisite: course 1. Exploration of long-run historical trends in relationship between human health and social organization, drawing on historical, anthropological, demographic, and sociological concepts, theories, and data.

144. Urban Poverty and Public Policy in the U.S. (4) Historical overview of urban poverty and social welfare programs; ongoing debates about causes and consequences of poverty.

145. Sociology of Deviant Behavior. (4) Examination of leading sociological approaches to study of deviation and general survey of major types of deviation in American society.

C146. Sociology of Disputes and Troubles. (4) (Formerly numbered 146.) Lecture, three hours; discussion, one hour. Development and transformation of everyday disputes and interpersonal troubles; dispute processing as informal social control in public places, neighborhoods, workplaces, and household settings in contemporary society. Concurrently scheduled with course C229A. Letter grading.

147A. Sociology of Crime. (4) Lecture, three hours; discussion, one hour. Sociological theories of social origins, organization, and meanings of crime and criminal behaviors.

147B. Sociology of Criminal Justice. (4) Lecture, three hours; discussion, one hour. Examination of structures and routine decision-making processes of key criminal justice institutions, including police, courts, probation and parole, jails and prisons.

148. Sociology of Mental Illness. (4) Analysis of major sociological and social psychological models of madness. Study of social processes involved in production, recognition, labeling, and treatment of "mental illness."

C149. People Processing Institutions. (4) Discussion, three hours. Theory and research analyzing operation and decision-making processes of a variety of people processing institutions, including police, courts, schools, psychiatry, human service agencies, and medicine. Concurrently scheduled with course C229B. Letter grading.

M150. Sociology of Aging. (4) (Formerly numbered 150.) (Same as Gerontology M150.) Lecture, three hours; discussion, one hour. Study of sociological processes shaping definition, experience, and response to aging in contemporary society. Topics include race, class, and gender in aging over life course; interpersonal relations and social worlds of the aged; caregiving relations and institutions; professions concerned with the aged and aging.

151. Comparative Immigration. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Survey of immigration of Europeans, Asians, and Hispanics to the U.S. since the mid-19th century. Overview of immigration experience on ethno-racial groups that migrated voluntarily to this country, with emphasis on immediate postimmigration settlement. P/NP or letter grading.

152. Comparative Acculturation and Assimilation. (4) Lecture, three hours; discussion, one hour; outside study, eight hours. Requisite: course 151. Comparison of acculturation and assimilation of Europeans, Africans, Mexicans, and Asians in the U.S., with emphasis on long-term cultural consequences of immigration. P/NP or letter grading.

M153. Chinese Immigration. (4) (Same as Asian American Studies M154.) Lecture, two hours; discussion, one hour. Survey of sociological studies of Chinese immigration, with focus on international context, organization, and institutions of Chinese America and its interactions with the social environment. P/NP or letter grading.

154. Race and Ethnicity: International Perspectives. (4) Lecture, three hours; discussion, one hour. Not open to freshmen. Role of race and ethnicity in political, economic, and social lives of nations other than the U.S.

M155. Latinos in the U.S. (4) (Same as Chicana and Chicano Studies M155.) Lecture, three hours; discussion, one hour. Requisite: course 1. Designed for juniors/seniors. Exploration of history and social conditions of Latinos in Los Angeles as well as nationally, with particular emphasis on their location in the larger social structure and on comparisons with other minority groups. Topics include migration, family, education, and work issues. P/NP or letter grading.

156. Ethnic and Status Groups. (4) Characteristics of "visible" ethnic groups (e.g., Japanese, Mexican, and black); their organization, acculturation, and differentiation. Development, operation, and effects of selective immigration and population mobility. Status of chief minorities in continental U.S., with comparative materials from Jamaica, Hawaii, and other areas.

157. Social Stratification. (4) Analysis of American social structure in terms of evaluational differentiation. Topics include criteria for differentiation, bases for evaluation, types of stratification, composition of strata and status systems, mobility, consequences of stratification, and problems of methodology.

158. Urban Sociology. (4) Lecture, three hours. Description and analysis of urbanization and urbanism in the U.S. and the world.

159. Comparative Studies of Jewish Communities in the U.S. and Abroad. (4) Lecture, three hours; discussion, one hour. History, distribution, structure, and functioning of major Jewish communities, with particular emphasis on North America and Israel. Interrelationships and sources of conflict between Jews and Gentiles in Western countries. More generally, economic and social integration of Diaspora Jewish communities. Fieldwork may be required. P/NP or letter grading.

160. Intergroup Conflict and Prejudice. (4) Study of causes and consequences of group conflict, with emphasis on majority/minority relations, prejudice, and discrimination. Special attention to alternative sociological and psychological theories of prejudice; effects of minority status on the individual; and possibilities for attitude and behavior change.

M161. Comparative American Indian Societies. (4) (Formerly numbered 161.) (Same as American Indian Studies M161.) Lecture, three hours. Requisite: course 1 or American Indian Studies 10. Comparative and historical study of political, economic, and cultural change in indigenous North American societies. Several theories of social change, applied to selected case studies.

M162. Sociology of Gender. (4) (Same as Women's Studies M162.) Lecture, three hours; discussion, one hour. Requisite: course 1 or Women's Studies 10. Examination of processes by which gender is socially constructed. Topics include distinction between biological sex and sociological gender, causes and consequences of gender inequality, and recent changes in gender relations in modern industrial societies. P/NP or letter grading.

M163. Gender and Work. (4) (Same as Women's Studies M163.) Lecture, three hours. Requisite: course 1 or Women's Studies 10. Exploration of relationship of gender to work, concentrating on the U.S. experience but also including some comparative material. Particular emphasis on analysis of causes and consequences of job segregation by gender and of wage inequality.

M164. Politics of Reproduction. (4) (Same as Women's Studies M164.) Lecture, three hours; discussion, one hour. Title refers to intersection between politics and life cycle. Topics include social construction of gender and population, reproductive issues, politicization of mothers, motherhood, and mothering, surrogacy, and new reproductive technologies.

M166. Women in Socialist and Post-Socialist States. (4) (Same as Women's Studies M166.) Lecture, three hours; discussion, one hour. Exploration of diverse aspects of women's lives in socialist and post-socialist states. Although transition from socialism occurs differently, gender differences are everywhere central to democratization and marketization. Discussion of ways in which state policies affect women.

M167. Contested Sexualities. (4) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M167 and Women's Studies M167.) Lecture, three hours; discussion, one hour. Sociological perspectives on formation, control, and resistance of lesbian, gay, bisexual, and transgendered people. Variable topics include identity and community; age, class, gender, and racial diversity; and analysis of contemporary issues affecting contested sexualities. Letter grading.

168. Organizations and Society. (4) Sociological analysis of organizations and their social environment. Introduction to basic theories, concepts, methods, and research on behavior of organizations in society.

169. Law and Society. (4) Specific topics may include law in preindustrial and industrialized societies, legalization of contemporary social relations, participants' experiences of legal processes, lay perceptions of justice, social movements toward equal justice, roles of lawyers and judges, social impact of court decisions.

170. Medical Sociology. (4) Requisite: course 1. Provides majors in Sociology and other social sciences, as well as students preparing for health sciences careers, with understanding of health-seeking behavior and interpersonal and organizational relations that are involved in receipt and delivery of health services.

171. Occupations and Professions. (4) Description and analysis of representative occupations and professions, with emphasis on the contemporary U.S.

172. Entrepreneurship. (4) Lecture, three hours; discussion, one hour. Requisite: course 1. Description and analysis of entrepreneurship, with special reference to historical origins, ideology, international comparisons, women and ethnic minority participation, legal and illegal forms, public and private auspices.

173. Economy and Society. (4) Sociology of economic life, with emphasis on principal economic institutions of the U.S.

M174. Sociology of the Family. (4) (Formerly numbered 174.) (Same as Women's Studies M174.) Lecture, four hours. Theory and research dealing with the modern family, its structure, and functions, including historical changes, variant family patterns, family as an institution, and influence of contemporary society on the family. P/NP or letter grading.

M175. Sociology of Education. (4) (Same as Education M108.) Requisite: course 1. Study of social processes and interaction patterns in educational organizations; relationship of such organizations to aspects of society, social class, and power; social relations within school, college, and university; formal and informal groups, subcultures in educational systems; roles of teachers, students, and administrators. Fieldwork may be required.

M176. Sociology of Mass Communication. (4) (Same as Communication Studies M147.) Requisite: course 1. Studies in relationship between mass communication and social organization. Topics include history and organization of major media institutions, social forces that shape production of mass media news and entertainment, selected studies in media content, and effects of media on society.

M177. The Military and Society. (4) (Formerly numbered 177.) (Same as Women's Studies M177.) Lecture, three hours; discussion, one hour. Examination of the military as an organization and profession: personnel issues such as family, class, race, gender, and sexual orientation and postmodern military issues such as civil/military relations, media coverage, peacekeeping operations, and the future of war. P/NP or letter grading.

M180. Introduction to Development Studies: Political Economy of Development. (4) (Same as International Development Studies M100B and Political Science M197G.) Seminar, three hours. Analysis of determinants of underdevelopment, with focus on impact of colonialism, foreign investment, and trade, and on political economy.

182. Political Sociology. (4) Contributions of sociology to study of politics, including analysis of political aspects of social systems, social context of action, and social bases of power.

183. Comparative and Historical Sociology. (4) Requisite: course 1. Survey of central themes of comparative and historical studies in sociology. Various aspects of development of modern society, including development of nation-state, emergence of capitalism, industrialization, and population growth. Variation in contemporary society, viewed from a variety of theoretical perspectives.

184. Social Change. (4) Study of patterns of social change, resistance to change, and change-producing agencies and processes.

185. American Society. (4) Analysis of major institutions in the U.S. in historical and international perspective, with emphasis on topics such as industrialization, work, the state, politics, community, the family, religion, and American culture. Theories of social change, conflict, and order applied to the case of the U.S.

186. Latin American Societies. (4) Descriptive survey of major Latin American societies, emphasizing their historical backgrounds and their emergent characteristics, with special attention to relations between rural and urban life.

187. Population and Society in the Middle East. (4) Designed for juniors/seniors. Survey of Middle Eastern societies; their historic and environmental bases; contemporary demographic and cultural situation.

188. Comparative East Asian Societies before World War II. (4) Lecture, two hours; discussion, one hour. Designed for juniors/seniors. Introductory and comparative survey of traditional societies of East Asia, including China, Japan, Korea, and Vietnam, with focus on dynamic interactions between culture, state, and society in process of change.

189. Japanese Society. (4) Lecture, two and one-half hours; discussion, two hours. Requisite: course 1. Analysis of social-structural characteristics and functioning of contemporary Japanese society, with focus on (1) forms of social interaction and social structure, (2) work, family, and the life course, and (3) education and opportunity. Emphasis on structural perspectives, more than cultural perspectives.

190. Capitalism, Socialism, and Alternative Social Systems. (4) Lecture, three hours; discussion, one hour. Designed for juniors/seniors. Theories of capitalism and socialism, history of social experiments with socialism and other noncapitalist systems, and assessment of the record of these experiments. P/NP or letter grading.

191. Society and Politics in Korea. (4) Lecture, three hours; discussion, one hour. Examination of society and politics in 20th-century Korea from a comparative/historical perspective; Korean case used to discuss major sociological and theoretical issues in social change and development (political and economic). P/NP or letter grading.

192. State and Society in China. (4) Lecture, three hours. Designed for juniors/seniors. Thematic overview of post-1949 society and politics in China, with emphasis on long-term evolution of China's state and society from 1949 to the present.

193. Asia-Pacific Social Transformation since World War II. (4) Lecture, three hours. Designed for juniors/seniors. Introductory and comparative survey of post-World War II development in Asia-Pacific region, with focus on ascent of Japan, newly industrialized capitalist countries, and emergence of socialist states.

M194. Senior Seminar: Language, Interaction, and Culture. (4) (Same as Anthropology M194 and Applied Linguistics and TESL M194.) Seminar, four hours. Limited to seniors in Language, Interaction, and Culture minor. Capstone course. Students carry out and present empirical research project that integrates methodologies and perspectives of at least two of the disciplinary areas (anthropology, applied linguistics, sociology) covered in course. Letter grading.

195A-195Z. Special Topics in Sociology. (4 each) Limited to juniors/seniors. Study of selected current topics of sociological interest. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit and may be applied as elective units toward Sociology major.

M196A-M196B. Contemporary Issues in Urban Poverty Research. (4-4) (Formerly numbered 196A-196B.) (Same as Anthropology M196A-M196B.) Requisites: Honors Collegium 7A, 7B. Two-term research seminar designed to engage students in ongoing faculty research projects focusing on models of urban poverty and underclass behaviors. P/NP or letter grading.

197A-197Z. Undergraduate Seminars. (4 each) Limited to junior/senior Sociology majors.

199. Special Studies. (2 to 8) Preparation: 3.0 grade-point average in major. Requisites: courses 1, M18. Limited to senior Sociology majors and graduate students. Course of independent studies designed for students who (1) desire a more advanced or specialized treatment of an area covered in regular course list and who present that course as a requisite or (2) desire work in an area of sociological analysis currently not covered by an upper division course. Only eight units are allowed. See undergraduate counselor for course contract.

199HA-199HB-199HC. Special Studies for Honors. (4-4-4) Requisite: course 104H. Limited to sociology honors program students. **199HA.** Design of research project to serve as student's honors thesis. Research proposal, detailed bibliography, and regular meetings with sponsoring faculty member required. **199HB.** Continuation of work initiated in course 199HA. Series of progress reports are prepared in consultation with instructor. **199HC.** Completion of written report or honors thesis.

199I. Independent Studies for Internships. (2 to 4) Independent studies course to be supervised jointly by Field Studies Office and faculty adviser. Further supervision to be provided by business for which student is doing internship. May not be applied toward major requirements. Normally only four units of internship are allowed. P/NP grading.

Graduate Courses

201A-201B-201C. Proseminars: Sociology. (2-2-2) Seminar, two hours every other week. Required of first-year sociology graduate students. Introduction to range of theoretical and research interests represented by department faculty members. S/U grading.

202A-202B. Theory and Research in Sociology. (4-4) Lecture, two hours; discussion, two hours. Required of first-year sociology graduate students. Examination of interrelations of theory, method, and substance in exemplary sociological works, with analytical and skills-centered orientation. Letter grading.

203A. Social Survey Practicum. (4) Lecture, one hour; discussion, one hour; laboratory, two hours. Designed for graduate students. Training through practice in basic techniques of survey research.

203B. Social Survey Research Seminar. (4) Seminar, one hour; discussion, one hour; laboratory, two hours. Designed for graduate students. Development of individual survey research projects under faculty supervision.

204. Topics in Sociological Theorizing. (4) (Formerly numbered 255A-255B.) Seminar, four hours. Examination of selected issues and problems in classical or contemporary sociological theory. S/U or letter grading.

208A-208B. Social Network Methods. (4) Lecture, three hours; laboratory, one hour. Requisites: courses 209A-209B or 210A-210B. Techniques for measuring characteristics of networks and positions in networks. Centrality of positions, centralization and density of networks, structural equivalence, cliques. Readings of exemplars of network research. Computer programs. In Progress grading.

209A-209B. Data Analysis for Social Scientists. (4) Lecture, three hours; laboratory, one hour. Introduction to applied statistics and data collection for graduate social sciences students. In Progress grading.

209C. Mathematics for Social Statistics. (4) Lecture, three hours; computer exercises. Designed for graduate students. Discussion of elementary mathematical techniques needed for more advanced statistics courses in various social sciences, psychology, and education. Calculus of sets, sets of numbers, sequences of numbers, notion of a function, polynomials, differentiation, elementary matrices, and vectors.

210A-210B. Intermediate Statistical Methods I, II. (4-4) Lecture, three hours; discussion, two hours. Requisite: course M18. Required for M.A. degree by four area programs. Intermediate statistical methods using computers: probability theory, sampling distributions, hypothesis testing, interval estimation, multiple regression and correlation, experimental design, analysis of variance and covariance, contingency tables, sampling theory. S/U or letter grading.

210C. Intermediate Statistical Methods III. (4) Lecture, four hours. Requisite: course 210B. Survey of advanced statistical methods used in social research, with focus on problems for which classical linear regression model is inappropriate, including categorical data, structural equations, longitudinal data, incomplete and erroneous data, and complex samples. Letter grading.

211A-211B. Comparative and Historical Methods. (4-4) In Progress grading. **211A.** Strategies of Research and Conceptualization. Topics include relationship of theory and fact to social sciences, logic of comparative and historical analysis, and substantive paradigms of comparative and historical analysis. Reading involves methodological examination of basic works in representative problem areas. **211B.** Research Techniques. Requisite: course 211A. Topics include problem of evidence, quantitative and qualitative data. Techniques of data analysis, including use of manuscript census, content analysis, collective biography, and secondary analysis.

212A-212B. Survey Data Analysis. (4-4) (Not the same as courses 212A-212B prior to Fall Quarter 1998.) Lecture, three hours. Requisites: courses 210A-210B. Analysis and interpretation of primarily nonexperimental quantitative data, focusing on sample survey and census data. Extensive practice at utilizing statistical methods encountered in previous courses, culminating in term paper in style of *American Sociological Review* or similar journal article. Topics include simple tabular analysis, log-linear analysis, ordinary least squares regression, robust regression, binomial and multinomial logistic regression, and scale construction. Logic of analysis and problems of statistical inference, including diagnostic procedures and methods for handling complex sample survey designs. In Progress and letter grading.

213A-213B. Techniques of Demographic and Ecological Analysis. (4-4) Requisite: course 210A. Procedures and techniques for collection, evaluation, and analysis of demographic and ecological data; models of population and ecological structure and change; applications to study of social structure and social change.

214A-214B. Naturalistic Methods for Recorded Data. (4-4) Special features of audio and video recordings as sources of data; problems of description and analysis posed by working with recorded data; practical exploration of techniques of data collection and transcription with both audio and video data; analysis of single cases and analytically defined collections; use of computer to organize research with recorded data. In Progress grading.

215A-215B. Experimental Sociology. (4-4) Requisite: course 210A. Basic fundamentals of experimental method, particularly as it is used in social psychology. In Progress grading.

216A-216B. Survey Research Design. (4-4) Lecture, 90 minutes; discussion, 90 minutes. Requisite: course 210A. History of the survey method; facet metatheory and concept formation; questionnaire and item design; scales, indices typologies; data collection — planning and management; network, snowball, and experience sampling; multistage probability sampling, stratification and clustering. Students participate in survey research project. Letter grading.

217A. Analyzing Ethnographies. (4) Seminar, three hours. Analysis of ethnographic monographs.

217B-217C. Ethnographic Fieldwork. (4-4) Seminar, three hours. Recommended prerequisite: course 217A. Theories and techniques of ethnographic fieldwork. Kinds of problems amenable to ethnographic approaches, methods, and techniques for doing fieldwork, and ethnical problems involved in such research. In Progress grading.

218A-218B. Ethnomethodological Methods. (4-4) Examination of techniques used in ethnomethodological research, practice in critical evaluation of research, and directed experience in conduct of an extended investigation employing ethnomethodological procedures. In Progress grading.

219A-219B. Advanced Statistical Methods I, II. (4-4) Lecture, three hours; discussion, two hours. Requisites: courses 210A-210B. Not required. Advanced multivariate statistical methods: discrete variables and events, logit and log-linear regression, event-history analysis, general linear model, exploratory and confirmatory factor analysis, linear causal models, latent variables, reciprocal causation, classification and clustering, time-series analysis.

220. Self and Society. (4) (Not the same as course 220 prior to Fall Quarter 1998.) Lecture, three hours. Examination of social and cultural processes shaping definition and experience of the self, embodied interactional practices through which the self is constructed in everyday and institutional contexts, formation and transformation of self during life course, and construction of collective identity. Letter grading.

221. Social Ecology. (4) Requisites: courses M18, 116. Designed for graduate students. Examination of various approaches to both microecology and macroecology, including classical and neoclassical ecology, social area analysis, sociocultural ecology, city-size distributions, effects of population density on animals and humans, proxemics, territoriality, and effects of physical environment on humans.

222. Foundations of Ethnomethodological, Phenomenological, and Analytic Sociologies. (4) Lecture, three hours. Designed for graduate students. Basic issues, methods, and topics of ethnomethodological, phenomenological, conversation-analytic, and related varieties of inquiry. Central themes such as the world of everyday life, problem of rationality, rules/norms and tacit knowledge, problem of social order, speaking and discourse, constitutive practices, and production of ordinary interaction in first part; guest presentations by affiliated faculty in second part.

223. Phenomenological and Interactionist Perspectives on Selected Topics. (4) Lecture, three hours. Comparison of phenomenological and symbolic and perspectives by examining a particular body of live or currently unresolved substantive issues. Topics vary; attention on development of phenomenological and interactionist thought on topic of concern, with special concern for ambiguities and divergences both within and between the two approaches. When relevant, attention to logical and historical relations of phenomenology and interactionism of pragmatist, existentialist, and ordinary language philosophies.

224A-224B. Problems in Social Psychology. (4) Requisite: course 210A. Basic course for graduate students intending to specialize in social psychology.

224A. Major theoretical contributions to the field. **224B.** Current work being done in department in several and.

225A-225B. Demographic Perspectives on Relationship of Family and Economic Systems. (4-4) Requisites: courses 210A-210B. Examination of interrelationship of family and economic systems in societies at different levels of economic development, focusing particularly on the U.S. experience. Central to course: (1) analysis of how demographic factors affect economic and family systems; (2) how these systems, and changes in them, affect demographic variables; and (3) how this two-way process influences relationship of family and economic systems over time. **225A.** Lectures and readings. **225B.** Individual research projects involving term paper and classroom reports of results.

226A-226B. Introduction to Theory and Major Empirical Research in Social Demography. (4-4) Lecture, two hours; discussion, one hour. Requisite: course 210A. Survey and critical examination of population theories and related major empirical research. Emphasis on interrelation of cultural, socioeconomic, and demographic factors. Introduction to elementary demographic methods utilizing microcomputers.

227. Sociology of Knowledge. (4) Designed for graduate students. Survey of theories and research concerning social determinants of systems of knowledge and role of intellectual and artistic elites in Western societies.

228A-228B. Critical Issues in Macrosociology. (4-4) Lecture, two hours; discussion, one hour. Designed for graduate students. Conceptual introduction to the area of macrosociology in which exemplary works are read, studied for substance and methods, and critiqued in seminar and in written papers. Usually team taught by faculty of varying orientations. In Progress grading.

C229A. Sociology of Disputes and Troubles. (4) (Formerly numbered 229A.) Lecture, three hours; discussion, two hours. Development and transformation of everyday disputes and interpersonal troubles; dispute processing as informal social control in public places, neighborhoods, workplaces, and household settings in contemporary society. Concurrently scheduled with course C146. Letter grading.

C229B. People Processing Institutions. (4) (Formerly numbered 229B.) Lecture, three hours; discussion, two hours. Course C229A is not requisite to C229B. Theory and research analyzing operation and decision-making processes of a variety of people processing institutions, including police, courts, schools, psychiatry, human service agencies, and medicine. Concurrently scheduled with course C149. Letter grading.

230. Nations and Nationalism. (4) Lecture, three hours. Preparation for independent work in the area of nations and nationalism through close reading of key theoretical and empirical works in this or related areas. S/U or letter grading.

231. Race and Ethnicity: International Perspectives. (4) Lecture, one hour; discussion, two hours. Designed for graduate students. Role of race and ethnicity in political, economic, and social lives of nations other than the U.S., with emphasis on theoretical and methodological issues in comparative research.

232. Class, Politics, and Society. (4) (Not the same as course 232 prior to Fall Quarter 1998.) Lecture, four hours. Nature of class structure and how it affects relation of class structure to politics and political power. Issue of salience of class versus other identities such as gender, age, race, and nationalism. Examination of contemporary "globalization" tendencies of capitalism. Letter grading.

233. Foundations of Political Sociology. (4) Lecture, three hours. Designed for graduate students. Survey of the field of political sociology, oriented around critical themes in major theoretical traditions and contemporary exemplars. Special attention to competing perspectives on power, theory of the state, and relationship of class structure to politics.

234. Sociology of Community Organization. (4) Designed for graduate students. Survey of recent and classical research and literature dealing with predominantly political institutions, problem of order, and organization of communal life in the village and metropolis.

235. Theories of Ethnicity. (4) Lecture, one hour; discussion, two hours. Designed for graduate students. Examination of variety of theoretical approaches in understanding race and ethnicity in contemporary societies, with emphasis on recent debates among class analysis, pluralist, primordialist, and rational choice perspectives.

236. Immigration. (4) Lecture, three hours. Emphasis on recent immigration to the U.S. in light of historical experience. Examination of patterns of adaptation and ethnic change, with particular attention to new theoretical approaches within multidisciplinary framework. S/U or letter grading.

237. Seminar: Theory and Research in Comparative Social Analysis. (2) Designed for graduate students. Emphasis on one issue of particular importance for comparative analysis of capitalism and socialism, North America and Western Europe, developed capitalist and socialist countries and the Third World, and implications for theory construction and social research. S/U grading.

238. Feminist Theory. (4) Designed for graduate students. Analysis of current American feminist theory relevant to sociologists. Exploration of critiques of second wave feminism by working class feminists and/or feminists of color, feminist scholars from other countries, and recent "antifeminist" feminists. Discussion of directions for future feminist sociology.

239A-239B. Quantitative Research on Social Stratification and Social Mobility. (4-4) Lecture, three hours. Requisites: courses 210A-210B. Introduction to English language research literature on quantitative social stratification and social mobility in the U.S. and abroad. In Progress grading.

240. Mathematics of Population. (4) Preparation: prior knowledge of matrices, calculus, and probability theory. Discrete and continuous deterministic and probabilistic models of growth and composition of a one-sexed population classified by age, plus selected topics on more complicated population models.

241. Theories of Gender in Society. (4) Lecture, one hour; discussion, two hours. Gender stratification in society and sociology; extent of gender diversity in human societies past and present; why gender is absent in classical macrosociology; can masculinist paradigms make space for gender or does a feminist-informed sociology necessitate a fresh approach?

M242. Analysis of Data with Qualitative and Limited Dependent Variables. (4) (Formerly numbered 242.) (Same as Statistics M211.) Lecture, three hours. Requisites: courses 210A-210B or Statistics M100A and 100B-100C. Models for binary, polytomous, and ordered outcomes; censored and truncated dependent variables; sample selection bias and qualitative response models; count outcomes; multi-level models; log-linear models. S/U or letter grading.

C243. Introduction to Mathematical Sociology. (4) (Not the same as course 243 prior to Fall Quarter 1998.) Lecture, three hours; discussion, one hour; laboratory, two hours. Requisites: courses 210A-210B. Mathematical treatment of several sociological phenomena, such as occupational mobility, population growth, organizational structure, and friendship patterns, each covered in some detail, including initial development and subsequent evaluation and modification (emphasizing both deductive and computational aspects of mathematics). Concurrently scheduled with course C112. Graduate students have additional readings, meet as a group one additional hour each week, and learn to use mathematical software such as MATHEMATICA. Letter grading.

C244A-C244B. Conversational Structures I, II. (4-4) Lecture, three hours; discussion, one hour. May be concurrently scheduled with courses CM124A-CM124B. Graduate students have additional assignments and/or meet as a group one additional hour each week. S/U or letter grading. **C244A.** Introduction to some structures which are employed in organization of conversational interaction, such as turn-taking organization, organization of repair, and some basic sequence structures with limited expansions. **C244B.** Requisite: course C244A. Consideration of some more expanded sequence structures, story structures, topical sequences, and overall structural organization of single conversations.

245. Cultural Sociology: Classical and Contemporary Approaches. (4) Lecture, one hour; discussion, two hours. Exploration of classical approaches to cultural dimension of social life — Weberian, Durkheimian, Parsonian, and critical — and living traditions they have spawned. Examination of contemporary efforts at constructing a new cultural sociology. Theoretical focus, with consideration of case studies.

246. Cultural Studies: Hermeneutic, Semiotic, and Poststructural Traditions. (4) Lecture, one hour; discussion, two hours. Examination of cultural analysis as it has evolved outside the discipline of sociology, on premise that these extra-sociological approaches provide critical resources in advancing the field of cultural sociology today. Theoretical and comparative emphasis, with consideration of case studies.

247. Sociology of Emotions. (4) Lecture, two hours; discussion, one hour. Designed for graduate students. Sociological theories of emotional expression; experiential approaches to emotions: motivational, cognitive, psychophysiological, and behavioral; repression, social oppression, and the emotions; creativity and expressed affect; thought, sensations, and the emotions; specific emotions; cultural differences in emotional expression; measurement of emotions.

248. Selected Topics in Culture and Society. (4) Seminar, three hours. Designed for graduate students. Seminar on selected topics on culture and society. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit. S/U or letter grading.

M249A. Health Professions. (4) (Same as Community Health Sciences M274.) Lecture, three hours. Requisite: Community Health Sciences 210. Sociological examination of concepts "health" and "illness" and role of various health professionals, especially physicians. Attention to meaning of professionalization and professional/client relationships within a range of organizational settings. S/U or letter grading.

M249B. Health and Illness Behavior. (4) (Same as Community Health Sciences M275.) Lecture, four hours. Requisites: Community Health Sciences 210, Epidemiology 100. Sociocultural factors affecting differential patterns of health behavior, illness behavior, and sick-role behavior. S/U or letter grading.

250. Methodological Problems. (4) Lecture, four hours. S/U or letter grading.

251. Topics in the Problem of Social Order. (4) Lecture, four hours. S/U or letter grading.

252. Selected Topics in Sociology of Gender. (4) Lecture, two hours; discussion, two hours. Designed for graduate students. Seminar on selected topics in sociology of gender. May be repeated for credit.

253. Quantitative Methods in Sociology. (4) Lecture, four hours. S/U or letter grading.

254. Human Capital, Social Capital, and Cultural Capital. (4) Lecture, three hours. Designed for graduate students. Intellectual history of these concepts, points of difference and similarity among the concepts, current exemplars of research that utilize these concepts, and critical reflection on research traditions.

256. Demography. (4) Lecture, four hours. S/U or letter grading.

257. Demography of Marriage Formation and Dissolution. (4) Discussion, three hours. Requisite: course 210A. Extensive and intensive critical examination of major approaches to analysis of marriage formation and dissolution, with focus primarily on demographic literature.

C258. Talk and Social Institutions. (4) (Formerly numbered 258.) Lecture, four hours; discussion, one hour. Practices of communication and social interaction in a number of major institutional sites in contemporary society. Setting varies but may include emergency services, police and courts, medicine, news interviews, and political oratory. Concurrently scheduled with course CM125. S/U or letter grading.

259. Social Structure and Economic Change: Historical and Comparative Perspectives. (4) Lecture, four hours. S/U or letter grading.

260. Economy and Society. Discussion, two hours. (4) Designed for graduate students. Review and critique of major analytical traditions in economy and society.

261. Ethnic Minorities. (4) Lecture, four hours. S/U or letter grading.

M262. Selected Problems in Urban Sociology. (4) (Same as Afro-American Studies M200C.) Seminar.

263. Social Stratification. (4) Lecture, four hours. S/U or letter grading.

264. Personal Identity in Historical Perspective. (4) Lecture, three hours. Designed for graduate students. Examination of distinctive features of personal identity in contemporary society through use of historical materials on various aspects of private life. Topics include home, food, clothing and appearance, personal odor, and cleanliness in everyday life.

265. Problems in Organization Theory. (4) Lecture, four hours. S/U or letter grading.

266. Selected Problems in Analysis of Conversation. (4) Requisites: courses C244A-C244B. Variable topics/formats course. Consult instructor for topics and formats to be offered in a specific term. May be repeated for credit with topic change. S/U or letter grading.

267. Selected Problems in Communication. (4) Lecture, four hours. S/U or letter grading.

268. Selected Problems in Psychoanalytic Sociology. (4) Discussion, three hours. Recommended preparation: at least one year of methods courses. Selected problems in interpretation of sociology and psychoanalysis, which may be substantive (group development, socialization, culture, deviance, collective behavior) or methodological; latter focuses on clinical fieldwork and experimental use of psychoanalytic and sociological techniques.

269. Collective Behavior and Social Movements. (4) Lecture, three hours. Characteristics of crowds, mobs, publics, social movements, and revolutions; their relation to social unrest and their role in developing and changing social organization. Impact of collective behavior and social movements on social and political changes. S/U or letter grading.

270. Selected Problems in Socialization. (4) Lecture, four hours. S/U or letter grading.

271. Ethnomethodology. (4) Lecture, four hours. S/U or letter grading.

272. Topics in Political Sociology. (4) Lecture, four hours. S/U or letter grading.

273. Attitudes and Social Structure. (4) Lecture, four hours. S/U or letter grading.

274. Social Change and Development in Korea. (4) Seminar, three hours. Requisite: course 191. In-depth understanding of social change and development in 20th-century Korea. Discussion, in comparative/historical perspective, of major theoretical and empirical issues related to social, political, and economic Korean transformation.

M275. Contemporary Issues of the American Indian. (4) (Same as American Indian Studies M200C and Anthropology M269.) Introduction to most important issues facing American Indians as individuals, communities, tribes, and organizations in the contemporary world, building on historical background presented in American Indian Studies M200A and cultural and expressive experience of American Indians presented in American Indian Studies M200B.

276. Selected Topics in Sociology of East Asia. (4) Designed for graduate students. Selected problems in China, or in China and Japan comparatively. Possible topics include (1) China's Great Proletarian Cultural Revolution, (2) internal contradictions in Chinese society: male/female relations, city and countryside, minority nationalities, class struggle under socialism, etc., (3) China and Japan: two models of development.

277. Japanese Society: Selected Topics. (4) Lecture, two and one-half hours. Designed for graduate students. Social structural characteristics and functioning of contemporary Japanese society, with focus on comparison and evaluations of functional (or rational) and cultural explanations of selected social phenomena. Topics include forms of social interaction, work organization, family, education, and equality.

278. Sociology of Latin America. (4) Lecture, one hour; discussion, two hours. Designed for graduate students. Selected topics in sociological study of Latin America. Possible topics include social movements, race and ethnicity, stratification, and social development.

279. Seminar: Applied Social Research. (4) Seminar, two hours; discussion, one hour. Opportunities for applied research, distinctive features of applied work, and procedures commonly employed in various areas of research. Examination of representative work in specific areas of applied research.

280. Seminar: Evaluation Research. (4) Designed for graduate students. Technical and political aspects of implementing evaluation research studies. Role of evaluation research in social policy development, as well as procedures for undertaking process and impact evaluations. S/U or letter grading.

281. Selected Problems in Mathematical Sociology. (4) Exploration of some mathematical models of sociological processes. Possible topics include models of small groups, social mobility, kinship relations, organizations, social interaction.

282. Organizations and the Professions. (4) Lecture, four hours. S/U or letter grading.

283. Applied Sociology. (4) Discussion, two hours. Designed for graduate students. Examination of roots and intellectual traditions underlying contemporary interest and work in applied sociology. Discussion of range of methodological perspectives used in applied research, utility of social research in various substantive domains and conflicts and controversies related to ideological activities, competence and performance requirements, and identification with and participation in the discipline.

284. Topics in Mental Health and Illness. (4) Requisite: course 148. Designed for graduate students.

285A-285Z. Special Topics in Sociology. (4) Seminar, three hours. Designed for graduate students. Seminars on selected current topics of sociological interest. Consult *Schedule of Classes* for topics and instructors. May be repeated for credit.

M286. Applied Event History Analysis. (4) (Formerly numbered 286.) (Same as Statistics M213.) Lecture, three hours. Requisites: courses 209A-209B and 209C, or 210A-210B. Introduction to regression-like analyses in which outcome is "time to event." Topics include logit models for discrete-time event history models; piecewise exponential hazards models; proportional hazards; nonproportional hazards; parametric survival models; heterogeneity; multilevel survival models. S/U or letter grading.

287. Topics in Chinese Society. (4) Discussion, three hours. Preparation: at least two upper division courses on China in any social sciences discipline. Introduction to current research questions in Chinese sociology, as well as major themes in study of Chinese society, both historical and contemporary, including demographic, economic, political, and social change before and after 1949. S/U or letter grading.

288A-288B-288C. Mental Health Services for Persons with AIDS. (4-4-4) Designed for graduate students. Analysis of current research on mental health service systems for persons with AIDS. S/U grading.

291. Moral Solidarity in Communities. (4) Comparative analysis of social solidarity and collapse of social solidarity in voluntary and traditional communities. Contrasts more and less solidarity types, with special reference to utopian communities and developmental processes.

292A-292B-292C. Research Development. (4-4-4) Lecture, four hours. S/U or letter grading.

M296A-M296B. Social Theory and Comparative History. (4-4) (Same as History M203A-M203B and Political Science M291A-M291B.) Colloquium, three and one-half hours every other week. Introduction to historically rooted social theory and theoretically sensitive history, following the program of the Center for Social Theory and Comparative History. Each course may be taken independently for credit.

M296C. Theories in Cultural History. (4) (Same as History M203C.) Discussion, three hours. Introduction to social, linguistic, semiotic, or other new interpretive theories and practices developed in other fields and applied to historical material.

297B. Urban and Suburban Sociology. (4) (Not the same as course 297B prior to Fall Quarter 1998.) Lecture, three hours. History and present condition of cities and suburbs in America. Today's urban/suburban neighborhoods contrasted with premodern cities. Examination of process of suburbanization as it began in the early 19th century and as it still continues; house and architectural styles and changing patterns of family and social life associated with them; patterns of racial, ethnic, income, and social class distribution in city and suburb; origin and nature of today's urban ghettos; politics of cities and suburbs. Focus on urban/suburban megalopolises associated with New York City, Los Angeles, Chicago, and Boston. GIS mapping. Letter grading.

298A-298B-298C. Workshops in Culture and Society. (2-2-2) Discussion, 90 minutes every other week. Interdisciplinary workshops for graduate students and faculty pursuing theory and research in topics related to interplay of culture and society, whether social, literary, or philosophical in nature. In Progress and S/U or letter grading.

299A-299B-299C. Seminars: Latin American Sociology. (2-2-2) Seminar, one hour; discussion, one hour. Regular forum for presentation, reading, and discussion of research on sociology of Latin America, including presentations by invited lecturers in Mellon Seminar in Latin American Sociology series. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

M402. Practices of Evaluation in Health Services: Theory and Methodology. (4) (Same as Health Services M422.) Lecture, four hours. Requisites: Health Services 200A-200B. Introduction to health services evaluation. Examination and performance of specific evaluation procedures. Conducting of health services investigations, reporting results and methodologies. Letter grading.

495A-495B. Supervised Teaching of Sociology. (2-2) Preparation: appointment as teaching assistant in Sociology Department. Special course for teaching assistants designed to deal with problems and techniques of teaching introductory sociology. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

595. Directed Research for Master's Paper. (4 to 12) Directed research for and writing of M.A. degree paper under guidance of student's M.A. committee chair. S/U grading.

596. Directed Individual Study and Research in Sociology. (2 to 12) Tutorial, to be arranged. S/U grading.

597. Individual Study for Examinations. (4 to 12) Tutorial, to be arranged. Preparation for Ph.D. qualifying examinations. S/U grading.

599. Research in Sociology for Ph.D. Candidates. (4 to 12) Tutorial, to be arranged. S/U grading.

Lecturer

George L. Voyt, J.D., *Emeritus*

Scope and Objectives

The Department of Spanish and Portuguese is dedicated to the study and teaching of the languages, literatures, and cultures of the Hispanic heritage in all areas of the world, particularly on the continents of Europe and America. It maintains a strong commitment to the value of original research and professional instruction at all levels of its activities.

Whether studying for the B.A., M.A., or Ph.D. degree, students are given careful guidance in the choice of courses and in the preparation of a study program. The richness of Hispanic culture is amply represented in the extensive range of courses in language, linguistics, and literature. Although the literatures of Spain, Portugal, Brazil, and Spanish America predominate, courses are also offered in Chicano literature. The breadth of courses offered by the department allows undergraduate students to pursue many possible interests and enables graduate students to concentrate in depth in several areas of specialization.

The department's courses are primarily designed to serve the four B.A. programs: B.A. in Spanish (Plan A), B.A. in Spanish and Linguistics (Plan B), B.A. in Portuguese, and B.A. in Spanish and Portuguese, as well as to prepare students for its three graduate programs: M.A. in Spanish, M.A. in Portuguese, and Ph.D. in Hispanic Languages and Literatures. The courses are also functionally supportive of such interdepartmental programs as the California State Instructional Credential in Spanish, B.A. and M.A. programs in Latin American Studies, M.A. program in Folklore and Mythology, and M.A. and Ph.D. programs in Comparative Literature and Romance Linguistics and Literature.

Undergraduate Study

Undergraduate Courses

Spanish 1 through 3 use Garner, Rusch, and Domínguez' *Claro que sí*. The method is induc-

tive. Selected examples are given to enable students to inductively grasp the rules and develop their own grammar. This enables students to use language effectively and creatively. The courses are taught entirely in Spanish — students simultaneously learn to understand, speak, read, and write Spanish.

No credit is allowed for completing a less advanced course after successful completion of a more advanced course in Spanish and Portuguese grammar and/or composition.

Spanish B.A./Spanish and Linguistics B.A.

Students with one or more years of high school Spanish who plan to enroll in Spanish 1 through 25 must take the departmental placement examination. Consult the *Schedule of Classes* or the department office for test dates and location.

Preparation for the Majors

Required: Spanish 25 or 25A or equivalent as determined by the placement test; courses M35, M42, M44, or equivalent as determined by the undergraduate adviser. These courses must be passed with an average grade of C or better prior to beginning upper division work in either major.

The Majors

Plan A: Spanish Language and Hispanic Literature

Required: (1) Nine core courses, including Spanish 100A-100B, 119A, 119B, 120A through 120D, and 127 and (2) five upper division Spanish elective courses, selected in consultation with an adviser, in which several areas of study are possible (e.g., language and linguistics as preparation for teaching Spanish at the secondary level; literature of Spain; literature of Latin America; Chicano literature; or any combination which might also include literature and film, or women in Spanish and Latin American literature).

Plan B: Spanish and Linguistics

Required: Completion of six terms of study in one language other than Spanish and English or three terms in each of two other languages, in addition to the preparation for the major courses. Portuguese is recommended.

The major consists of 15 upper division courses, including Spanish 100A-100B, 105, 115, M118A-M118B, Linguistics 103, 110, 120A, 120B, 165A or 165B, and four upper division Spanish electives.

Honors Program

The honors program is open to Spanish majors who have completed the required nine upper division core courses with a 3.5 grade-point average. Eligibility is verified by the departmental counselor.

Two honors projects and an honors thesis are required. To graduate with departmental honors, students must first complete an honors project in each of two of their upper division

Spanish elective courses. The honors project is a 12- to 15-page term paper on a special topic, selected in consultation with the instructor, to be completed in addition to the normal course requirements. On the basis of the coursework and special interests, students then consult a faculty member in that field and formulate a research project which they pursue under the faculty member's guidance through Spanish 170. Students research and write an honors thesis (not to be confused with an honors project) of approximately 25 pages on the selected topic. Approval of the honors thesis is the final requirement for departmental honors.

Portuguese B.A.

Preparation for the Major

Required: Portuguese 3, M35, M42 or M44, 46, or equivalent.

The Major

Portuguese Language and Literature

Required: Thirteen upper division courses, including Portuguese 100A, 100B, 105, 120A-120B or 130A-130B, and eight elective courses in Portuguese, or six electives in Portuguese plus two courses from areas that complement the program approved by the undergraduate adviser in Portuguese.

Portuguese and Linguistics Concentration

Required: Completion of six terms of study in one other foreign language or three terms in each of two other foreign languages, in addition to the preparation for the major courses. Spanish is recommended.

The concentration consists of 13 upper division courses, including Portuguese 100A, 100B, 105, M118A-M118B, Linguistics 100, 103, 110, 120A, 120B, and three electives, two of which must be in Luso-Brazilian literature.

Double Majors

Through judicious use of electives, students may find it possible to secure the B.A. degree with two complete majors (e.g., Portuguese/Spanish, Portuguese/History, Portuguese/Sociology, etc.). Interested students should consult the undergraduate adviser in Portuguese as early as possible in their B.A. program.

Study in a Portuguese-Speaking Country

Students are encouraged to spend up to one year in a Portuguese-speaking country to study in a university or conduct research. Appropriate credit may be granted in accordance with the individual program, arranged in consultation with the undergraduate faculty adviser in Portuguese. Proposals must be submitted in advance in writing and must be approved by the department.

Spanish and Portuguese B.A.

Preparation for the Major

Required: Spanish 25, Portuguese 25, M35, M42 or M44, 46, or equivalent.

The Major

Required: Six upper division courses in language and linguistics, including Spanish 100A-100B, Portuguese 100A, 100B, M118A or M118B, and either Spanish 105 or Portuguese 105; nine upper division courses in literature selected from one of the following groups: *group A* (peninsular literature to 1700) — Spanish 123, 124, 127, Portuguese C124, C125, C126, and three other literature courses, one of which must be in Spanish and one in Portuguese; *group B* (peninsular literature from 1700 to the present) — Spanish 128, 130, 133, Portuguese C127, C128, C129, and three other literature courses, one of which must be in Spanish and one in Portuguese; *group C* (Spanish-American and Brazilian literature to 1900) — Spanish 137, 139, 140, Portuguese C131, C132, C133, and three other literature courses, one of which must be in Spanish and one in Portuguese; *group D* (Spanish-American and Brazilian literature from 1900 to the present) — Spanish 142, 143, Portuguese C134, C135, and five other literature courses, two of which must be in Spanish and two in Portuguese.

Portuguese Minor

To enter the Portuguese minor, students must have an overall grade-point average of 2.0 or better and must complete Portuguese 3 or 102B.

Required Lower Division Course (four units): Portuguese 46.

Required Upper Division Courses (24 units): Portuguese 105 and five Portuguese courses selected from 100A through 199 (except 102A-102B). Only one four-unit Portuguese 199 course may be selected.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Spanish Minor

To enter the Spanish minor, students must have an overall grade-point average of 2.0 or better and must complete or show proficiency equivalent to two years of college-level Spanish.

Required Lower Division Courses (eight units): Spanish 25 or 25A, and M42 or M44.

Required Upper Division Courses (26 units): Five courses (22 units) in literature selected from Spanish 119A through 197 (two of the five must be from 120A through 120D). Only one four-unit Spanish 199 course may be selected.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Spanish Linguistics Minor

To enter the Spanish Linguistics minor, students must have an overall grade-point aver-

age of 2.0 or better and must complete or show proficiency equivalent to two years of college-level Spanish.

Required Lower Division Courses (eight units): Spanish 25 or 25A, and M35.

Required Upper Division Courses (24 units): Spanish 100A-100B, three courses from 107, 115, M118A, M118B, and one other upper division Spanish course.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Successful completion of the minor is indicated on the transcript and diploma.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degrees

Spanish

Admission

The department considers only applicants whose objective is the Ph.D. Admission to the program leading to the Master of Arts degree in Spanish is based on a careful review of the applicant's academic record by the graduate admissions committee. Minimum requirements are the B.A. in Spanish from UCLA or another recognized university and a satisfactory score on the Graduate Record Examination (GRE) General Test. If the graduate admissions committee deems that some area of the applicant's preparation in language or literature needs to be strengthened, it may require that one or more complementary courses be taken.

Areas of Study

The department offers two areas of concentration for the M.A. degree in Spanish: literature and linguistics.

Course Requirements

Ten courses, seven of which must be at the graduate level, are required for the MA. Spanish 495 may count as one of the 10 courses but may not replace one of the graduate courses. Up to two graduate courses may be taken in another department with the approval of the graduate adviser. Spanish 596 may be taken only once; courses 597 and 598 do not count toward the degree.

Students choose a concentration from either literature or linguistics.

Literature. Students who choose the literature concentration must take Spanish M201A-M201B and one graduate course in Spanish or

Portuguese linguistics. The remaining seven elective courses are selected in consultation with the graduate adviser, who takes into account the student's interests as well as the necessary preparation for the comprehensive examination.

Linguistics. Students who choose the linguistics concentration are required to take either Spanish M201A or M201B and nine elective courses to be selected in consultation with the graduate adviser, who takes into account the student's interests as well as the necessary preparation for the comprehensive examination.

Comprehensive Examination Plan

Both concentrations offer six examination areas from which a student will choose four:

Literature. (1) Spanish literature (medieval-Golden Age); (2) Spanish literature (18th to 20th centuries); (3) Spanish-American literature (Colonial and 19th century); (4) Spanish-American literature (20th Century/Chicano); (5) Luso-Brazilian literature; (6) linguistics.

Linguistics. (1) Spanish syntax, (2) Portuguese syntax; (3) Spanish phonetics and morphology; (4) Spanish diachronic and synchronic language variation; (5) Spanish/Spanish-American literature; (6) Luso-Brazilian literature.

Faculty members provide reading lists for their respective areas and prepare and grade examinations based on the lists. Reading lists are made public each Spring Quarter for the next academic year. Each examination area is intended either to offer the students a general overview or it can reflect the central issues in the area.

Two examinations may be chosen in the same area. For example, a student who chooses the literature concentration may take two different examinations in area one (medieval to Golden Age), if the examinations are with two different faculty members. Examinations will be administered in all areas twice a year (during the fourth week of Fall and Spring Quarters).

Once the student chooses the concentration and examination areas, the professors representing those areas become the student's de facto committee. Students are urged to discuss the reading lists and the expectations with each professor.

The M.A. comprehensive examination consists of four two-hour examinations.

The M.A. program in Spanish is the first phase of the Ph.D. degree program in Hispanic Languages and Literatures. When students have completed all requirements for the M.A. degree, the student's examination committee meets to evaluate the student by considering the following: (1) one writing sample in Spanish; (2) results of the comprehensive examination; (3) coursework.

A recommendation is made by the student's committee at a general department meeting. The department decides whether (1) the student has earned a terminal M.A. degree (that is, the student may not proceed to the doctoral

program) or (2) the student has earned the M.A. degree and may proceed to the second phase of the Ph.D.

Students holding an M.A. degree from another university must take the comprehensive examination and present a writing sample to their committee. Up to eight graduate courses may be petitioned to count toward the Ph.D. degree.

Thesis Plan

In lieu of taking the comprehensive examination, students in either concentration may seek permission to present a thesis for the M.A. degree. Students must first complete five graduate courses, one of which must be a seminar. In order to endorse the petition, the graduate adviser and the guidance committee need to find evidence of exceptional ability and promise in term papers and coursework.

Portuguese

Admission

The department considers only applicants whose objective is the Ph.D. Admission to the program leading to the Master of Arts degree in Portuguese is based on a careful review of the applicant's academic record by the graduate admissions committee. Minimum requirements are the UCLA B.A. in Portuguese or its equivalent and a satisfactory score in the Graduate Record Examination (GRE) General Test; three letters of recommendation may also be sought. If the graduate admissions committee deems that some area of the applicant's preparation in language or literature needs to be strengthened, it may require that one or more complementary courses be taken.

Areas of Study

The department offers two areas of concentration for an M.A. degree in Portuguese: literature and linguistics.

Course Requirements

Ten courses, seven of which must be at the graduate level, are required for the MA. Spanish 495 may count as one of the 10 courses but may not replace one of the graduate courses. Up to two graduate courses may be taken in another department with the approval of the graduate adviser.

Literature. Students who choose the literature concentration must take Portuguese M201A-M201B and one graduate course in Spanish or Portuguese linguistics. The remaining seven elective courses are selected in consultation with the graduate adviser, who takes into account the student's interests as well as the necessary preparation for the comprehensive examination.

Linguistics. Students who choose the linguistics concentration are required to take either Portuguese M201A or M201B and nine elective courses to be selected in consultation with the adviser, who takes into account the student's interests as well as the necessary preparation for the comprehensive examination.

Comprehensive Examination Plan

Both concentrations offer six examinations, from which students must choose four:

Literature. (1) Brazilian literature (colonial and 19th century); (2) Brazilian literature (20th century); (3) Portuguese literature; (4) Spanish literature; (5) Spanish American literature (6) Portuguese linguistics.

Linguistics. (1) Spanish syntax; (2) Portuguese syntax; (3) Portuguese phonetics and morphology; (4) Portuguese diachronic and synchronic language variation; (5) Spanish/Spanish American literature; (6) Luso-Brazilian literature.

Faculty members provide reading lists for their respective areas and prepare and grade examinations based on the lists. Reading lists are made public each Spring Quarter for the next academic year. Each examination area is intended either to offer the students a general overview or it can reflect the central issues in the area.

Two examinations may be chosen in the same area. For example, a student who chooses the literature concentration may take two different examinations in area one (colonial and 19th century) if the examinations are with two different faculty members. Examinations are administered in all areas twice a year (during the fourth week of Fall and Spring Quarters).

Once the student chooses the concentration and examination areas, the professors representing those areas become the student's *de facto* committee. Students are urged to discuss the reading lists and the expectations with each professor.

The M.A. comprehensive examination consists of four two-hour examinations.

The M.A. program in Portuguese is the first phase of the Ph.D. degree program in Hispanic Languages and Literatures. When students have completed all requirements for the M.A. degree, the examination committee meets to evaluate the student by considering the following: (1) one writing sample in Portuguese; (2) results of the comprehensive examination; (3) coursework.

A recommendation is made by the student's committee at a general department meeting. The department decides whether (1) the student has earned a terminal M.A. degree (that is, the student may not proceed to the doctoral program) or (2) the student has earned the M.A. degree and may proceed to the second phase of the Ph.D.

Students holding an M.A. degree from another institution must take the comprehensive examination and present a writing sample to their committee. Up to eight courses may be petitioned to count toward the Ph.D. degree.

Thesis Plan

In lieu of taking the comprehensive examination, students may seek permission to present a thesis for the M.A. degree. Students must

first complete five graduate courses, one of which must be a seminar. In order to endorse the petition, the graduate adviser and the guidance committee need to find evidence of exceptional ability and promise in term papers and coursework.

Doctoral Degree

Admission

The UCLA M.A. in Spanish or in Portuguese, or equivalent, is required for admission to the program leading to the Ph.D. degree in Hispanic Languages and Literatures. Three letters of recommendation, which address the applicant's capacity for research-oriented doctoral studies and possible entry into the profession, are also required from professors familiar with the applicant's work as a graduate student. The Graduate Record Examination (GRE) General Test is also required.

Applicants holding the M.A. in Spanish or in Portuguese from UCLA must have the recommendation of the department to proceed toward the Ph.D. degree and are so notified on receipt of the M.A. degree.

Major Fields or Subdisciplines

Dissertation topics may be selected from any field in Spanish and Portuguese language and literature. Possible fields include: Spanish linguistics; Portuguese linguistics; diachronic Hispanic linguistics and philology; medieval Spanish literature; Renaissance and Golden Age Spanish literature, 18th- and 19th-century Spanish literature; 20th-century Spanish literature; colonial Spanish American literature; 19th-century Spanish-American literature; 20th-century Spanish-American literature; Chicano literature; early Portuguese literature; modern Portuguese literature; early Brazilian literature; modern Brazilian literature; Spanish and Luso-Brazilian folklore.

Course Requirements

After the B.A., a minimum of 18 graduate courses is required. The two-quarter sequence, Spanish or Portuguese M201A-M201B, may be required if students have not previously taken it or similar courses elsewhere. Up to one third of the total courses may be taken in other departments with the approval of the dissertation adviser. Seminars may be taken for credit no more than twice, with the approval of the appropriate guidance committee, if the content of the courses is substantially different.

Written and Oral Qualifying Examinations

The qualifying examinations consist of (1) presentation of a 40-60 page paper related to the specific dissertation area, (2) presentation of a 20- to 30-page paper in the general area of the dissertation; this paper may be comparative or theoretical, (3) a two-hour University Oral Qualifying Examination at which the above research papers and a dissertation prospectus are discussed.

The examinations are normally taken no later than nine quarters after receiving the B.A. and six quarters after receiving the M.A. Only students who pass the qualifying examination are advanced to candidacy for the Ph.D.

Spanish

Lower Division Courses

1. Elementary Spanish. (4) Discussion, five hours; laboratory, one hour.

1G. Reading Course for Graduate Students. (4) Lecture, three hours. Knowledge of Spanish not required. May not be applied toward degree requirements. S/U grading.

2. Elementary Spanish. (4) Discussion, five hours; laboratory, one hour. Enforced requisite: course 1.

2A. Intensive Spanish. (4) Lecture, 20 hours; laboratory, five hours. Enforced requisite: course 1 or one year of high school Spanish. Intensive basic course in Spanish, with cultural activities, field trips, luncheons. Offered in summer only. P/NP or letter grading.

2G. Reading Course for Graduate Students. (4) Lecture, three hours. Enforced requisite: course 1G. May not be applied toward degree requirements. S/U grading.

3. Elementary Spanish. (4) Discussion, five hours; laboratory, one hour. Enforced requisite: course 2.

3A. Intensive Spanish. (4) Lecture, 20 hours; laboratory, five hours. Enforced requisite: course 1 or one year of high school Spanish. Intensive basic course in Spanish, with cultural activities, field trips, luncheons. Offered in summer only. P/NP or letter grading.

4. Intermediate Spanish. (4) Discussion, five hours; laboratory, one hour. Enforced requisite: course 3.

5. Intermediate Spanish. (4) Discussion, five hours; laboratory, one hour. Enforced requisite: course 4.

6. Intermediate Spanish. (4) Discussion, five hours. Enforced requisite: course 5. Review and analysis of the more sophisticated and complex syntactic structures of Spanish, verb morphology, and lexical discrimination. Students who have completed course 5 with a grade of A- or better may enroll directly in course 25.

6A. Intermediate Spanish for Spanish Speakers. (4) Preparation: proficiency as determined by placement test. Concentration on formal aspects of the language (i.e., spelling, punctuation, accentuation, composition, reading, and traditional grammar) in lieu of course 6.

8A-8B. Spanish Conversation. (2-2) Discussion, three hours. Course 8A is open to students with credit for course 4. Students who have completed course 3 with a grade of B or better may be admitted.

9A-9B. Advanced Conversation. (2-2) Discussion, three hours. Enforced requisite: course 8B.

25. Advanced Spanish and Composition. (4) Lecture, three hours. Enforced requisite: course 5. Emphasis on writing grammatically correct, lexically sophisticated, and rhetorically competent expository prose. Course 25 or 25A is requisite to all upper division courses in Spanish.

25A. Composition for Spanish Speakers. (4) Lecture, three hours. Enforced requisite: course 5. Practice in reading and writing of Spanish for students with oral proficiency in Spanish (in lieu of course 25).

M35. Spanish, Portuguese, and Nature of Language. (4) (Same as Portuguese M35.) Lecture, three hours. Introduction to language study within context of Romance languages, focusing on Spanish and Portuguese. Nature of language: structure, diversity, evolution, social and cultural settings, literary uses. Study of language and its relation to other areas of human knowledge.

M42. Civilization of Spain and Portugal. (4) (Same as Portuguese M42.) Lecture, three hours; discussion, one hour. Required of majors. Conducted in English. Highlights of civilization of Spain and Portugal, with emphasis on the artistic, economic, social, and historical development as background for upper division courses.

M44. Civilization of Spanish America and Brazil. (4) (Same as Portuguese M44.) Required of majors. Conducted in English. Highlights of civilization of Spanish America and Brazil, with emphasis on the artistic, economic, social, and historical development as background for upper division courses.

60A-60B-60C. Hispanic Literatures in Translation. (4-4-4) Lecture, three hours. Class readings and analysis of selected works in translation. Classroom discussion, papers, and examinations in English. **60A.** Spanish Literature; **60B.** Spanish-American Literature; **60C.** *Don Quijote*.

61A-61B-61C. Hispanic Literatures in Spanish. (4-4-4) Lecture, three hours. Not open for credit to students with credit for corresponding course in 60 series. Class readings and analysis of selected works. Classroom discussion, papers, and examinations in Spanish. **61A.** Spanish Literature; **61B.** Spanish-American Literature; **61C.** *Don Quijote*.

62A-62B-62C. Hispanic Literatures and Film. (4-4-4) Lecture, three hours; film screenings, two to three hours. Analysis of main aesthetic, cultural, and philosophical questions in the Hispanic world as articulated in literature and film, addressing not only principal currents affecting Hispanic artistic expression but also diverse strategies employed by two distinct modes of representation. **62A.** Spain; **62B.** Spanish America; **62C.** The Chicano Experience.

88A-88Z. Lower Division Seminars. (4 each) Seminar, three hours. Knowledge of Spanish not essential. Variable topics courses designed to explore various themes and issues pertinent to Hispanic literature and culture:

88A. Reaching 2001 (Fantasy of Reality and Reality of Fantasy). Seminar, three hours. Introduction to some specific literary strategies employed by writers of the Hispanic world and analysis of formal characteristics that define categories such as surrealism, magical realism, the fantastic, and realism.

Upper Division Courses

100A-100B. Introduction to Study of Spanish Grammar. (4-4) Lecture, three hours. Requisite: course M35. **100A.** Phonology and Morphology. Analysis of phonemic and morphological systems of Spanish. **100B.** Syntax. Study of syntactical systems of Spanish.

105. Spanish Composition. (4) Lecture, three hours. Requisite: course 25. Practice in writing Spanish with appropriate vocabulary, syntactical structures, and stylistic patterns.

107. The Spanish of Southern California. (4) Lecture, three hours. Requisites: courses M35, 100A-100B. Analysis of pronunciation, word formation, syntax, and lexicon of the Spanish of Southern California, with attention to regional features, social and age levels of speech, and interference from English.

115. Applied Linguistics. (4) Lecture, three hours. Requisites: courses M35, 100B. Survey of major linguistic problems faced by teachers of Spanish.

M118A-M118B. History of Portuguese and Spanish. (4-4) (Same as Portuguese M118A-M118B.) Lecture, three hours. Requisites: courses M35, 100A. Major features of development of Portuguese and Spanish languages from their origins in Vulgar Latin to modern times. **M118A.** Phonology; **M118B.** Morphology and Syntax.

119A. Introduction to Study of Literature: Prose. (4) Lecture, three hours. Requisite: course 25. Introduction to study of literary devices, figures of speech, and distinctive stylistic features in prose literature of Spain and Spanish America, particularly in the novel and essay.

119B. Introduction to Study of Literature: Poetry and Drama. (4) (Formerly numbered 119B, 119C.) Lecture, three hours. Requisite: course 25. Introduction to study of literary devices, figures of speech, versification, and distinctive stylistic features in the poetry and drama of Spain and Spanish America.

120A-120D. Literature in the Hispanic World. (5-5-5-5) Lecture, four hours; discussion, one hour. Required of Spanish majors; must be taken in sequence. Historical/cultural survey of Hispanic literature from its beginning in medieval Iberia to contemporary writing in Spain, Latin America, and the U.S. Relationship between fundamental unity and astonishing geographic and cultural diversity. Particular attention to relation between literature and multicultural societies in which it is produced, as well as to individual texts which define or create new artistic possibilities:

120A. Hispanic Literature to 1700. Requisite: course 25. Multilingual Iberia: first literary texts in Hispanic dialects. Medieval Castilian literature. America: literature of discovery and conquest. Renaissance literature in Spain and America. Spanish Golden Age. Baroque literature in Spain and America.

120B. Hispanic Literature, 1700 to 1898. Requisite: course 120A. The Enlightenment, Spanish nationalism, and Spanish-American nation building. Romanticism in Spain and America. Journalism and *costumbrismo* in Spain and America. Historical narrative and sentimental novel in Spain and America. Regionalism in Spain. National diversity in America: *indigenismo*, gaucho literature, Mexican *corrido*, Afro-Americanism.

120C. Hispanic Literature since 1898. Requisites: courses 120A-120B. Unity and divergence. *Modernismo* and Spanish Civil War in Spain and America. Representations of America. Spanish surrealism. American vanguardism. *Franquismo* and after. Mexico and Mexican Revolution. New American narratives, testimony, feminism.

120D. Hispanic Literature in the U.S. Requisites: courses 120A-120B-120C. Spanish presence in the Southwest. Ethnic diversity: Spaniards, *criollos*, *mestizos*. Mexican War and Mexican American literature. Literature of the Chicano movement: recovering *mestizo* heritage, feminist consciousness.

122. Medieval Literature: El Camino de Santiago. (4) Lecture, three hours. Introductory course in medieval Spanish literatures following route of imaginary pilgrimage through northern Spain in the year 1300, from French border near Roncesvalles to shrine of St. James in Santiago de Compostela. Reading works of literature (and viewing slides, listening to music, etc.) associated with each stop along the way. Letter grading.

123. Medieval Literature: Poetry. (4) Lecture, three hours. Recommended preparation: course 120A. Study of main genres through representative works.

124. Golden Age: Poetry and Drama. (4) Lecture, three hours. Recommended preparation: course 120A. Study, through representative works, of the Golden Age poetry and drama.

125. Golden Age: Prose. (4) Lecture, three hours. Recommended preparation: course 120A. Study of 16th and 17th-century prose writing in Spain, with particular emphasis on *Lazarillo de Tormes* and the picaresque tradition.

127. Golden Age: Don Quijote. (4) Lecture, three hours. Recommended preparation: course 120A. Development of the novel in the Golden Age, with particular reference to *Don Quijote*.

128. The Enlightenment and Romanticism in Spain. (4) Lecture, three hours. Recommended preparation: course 120B. Study, through representative works, of main manifestations of thought and literature from 1700 to 1850.

130. Post-Romanticism, Realism, and Naturalism in Spain. (4) Lecture, three hours. Recommended preparation: course 120B. Development of main trends of Spanish literature from 1850 to 1898.

132. 20th-Century Spanish Prose. (4) Lecture, three hours. Recommended preparation: course 120C. Study of several representative works of Spanish prose literature since 1898.

133. 20th-Century Spanish Poetry and Drama. (4) Lecture, three hours. Recommended preparation: course 120C. Study of several representative works of Spanish poetry and drama since 1898.

137. Literature of Colonial Spanish America. (4) Lecture, three hours. Recommended preparation: course 120A. Study of most important genres and authors from the Conquest to 1810.

139. Romanticism and Realism in Spanish-American Literature. (4) Lecture, three hours. Recommended preparation: course 120B. Study, through representative literary works, of most important currents of thought and literary trends from 1810 to 1880.

140. Modernismo. (4) Lecture, three hours. Recommended preparation: course 120B. Study, through representative works, of principal characteristics of *modernismo* in Spanish-American literature.

142. 20th-Century Spanish-American Literature: Fiction and the Essay. (4) Lecture, three hours. Recommended preparation: course 120C. Study, through representative novels, short stories, and essays, of Spanish-American prose literature since 1910.

143. 20th-Century Spanish-American Literature: Poetry and Drama. (4) Lecture, three hours. Recommended preparation: course 120C. Study of principal poets, dramatists, and dramatic movements in Spanish-American literature since 1910.

144. Mexican Literature. (4) Lecture, three hours. Recommended preparation: course 120C. Study of major movements and authors of Mexican literature.

M145A-M145B. Introduction to Chicano Literature. (4-4) (Same as Chicana and Chicano Studies M145A-M145B.) Lecture, three hours. Requisite: course 25 or 25A. Introduction to texts representative of the Chicano literary heritage. Sampling of genres, as well as historical and geographical settings and points of view characteristic of work written by Chicanos during the 20th century. Most required reading is in Spanish. Bilingual and English works are included and discussed. Reading and analysis of a number of important scholarly and critical statements pertaining to characteristics and development of the Chicano literary corpus. **M145A.** Literature to 1960; **M145B.** Literature after 1960.

M146. Chicano Narrative. (4) (Same as Chicana and Chicano Studies M146.) Lecture, three hours. Introduction to major narrative genres in Chicana/Chicano literary tradition — *Corrido*, *Semblanza*, chronicle, autobiography, novel, romance, and satire. Emphasis on way in which narrative forms are formed by and address specific social/historical problems.

M149. Folk Literature of the Hispanic World. (4) (Same as Folklore M149.) Lecture, three hours. Study of history and present dissemination of principal forms of folk literature throughout the Hispanic countries.

151A-151B. Women in Hispanic Literature. (4-4) Discussion, three hours. Recommended preparation: courses 120A-120B-120C. Study of works by and about women, with emphasis on portrayal of women, women's roles, and myths of womanhood within the Hispanic socio-ideological context. **151A.** Spain; **151B.** Spanish America.

M161. Film and Literature of the Spanish-Speaking World. (4) (Same as Comparative Literature M174.) Lecture, three hours. Exploration of perceptions of reality offered by different authors from Spain, Latin America, and the Chicano community. P/NP or letter grading.

170. Senior Honors Tutorial. (4) (Formerly numbered 170A, 170B, 170C.) Preparation: completion of required nine upper division major core courses with 3.5 grade-point average. Directed individual research and writing of honors thesis.

197. Undergraduate Seminar. (4) Seminar, three hours. Limited to 15 junior/senior Spanish majors. Variable topics course with readings, discussions, and papers; consult *Schedule of Classes* or department counselor for topic to be offered in a specific term:

M197A. Introduction to Caribbean Literature. (4) (Same as Latin American Studies M197A.) Lecture, two hours; discussion, two hours. Interdisciplinary introduction to literature of French, Spanish, and English Caribbean.

197A. Studies in Hispanic Culture and Civilization. (4) Lecture, three hours. Required of students preparing for a California State Instructional Credential in Spanish. Advanced course that studies diverse aspects of Hispanic culture, civilization, and history. Classroom discussions, papers, and examinations in Spanish.

199. Special Studies. (2 to 4) Eight units may be applied toward the major requirements.

Graduate Courses

M200. Research Resources. (4) (Same as Portuguese M200.) Lecture, three hours. Identification and use of research resources for graduate students.

M201A-M201B. Literary Theory and Criticism. (4-4) (Same as Portuguese M201A-M201B.) Lecture, three hours. Definition, discussion, and application of main currents of contemporary literary theory and criticism. Letter grading.

202A. Phonology. (4) Lecture, three hours. Study of the sound structure of Spanish and main phonological processes that map underlying representations into surface representations. Bearing of phonological theory on study of meter.

202B. Morphology. (4) Lecture, three hours. Study of derivational and inflectional word formation processes and their interaction with syntactic structure.

204A-204B. Generative Syntax and Semantics. (4-4) Lecture, three hours. Study of syntactic structure of Spanish and relation between underlying representations and logical form within a principles-and-parameters framework. Bearing of syntactic and semantic structure on study of literature.

M205A-M205B. Development of Portuguese and Spanish Languages. (4-4) (Same as Portuguese M205A-M205B.) Lecture, three hours. Intensive study of historical development of Portuguese and Spanish languages from their origin in spoken Latin.

209. Dialectology. (4) Lecture, three hours. Major dialect areas of peninsular and American Spanish, with distinguishing features of each. Influence and contribution of cultural and historical features, including indigenous languages, to their formation.

221. Medieval Lyric Poetry. (4) Lecture, three hours. Readings of and lectures on Spanish lyric poetry from the beginning to 1500.

222. Medieval Epic and Narrative Poetry. (4) Lecture, three hours. Readings of and lectures on Spanish epic and narrative poetry from the beginning to 1500.

223. Medieval Prose. (4) Lecture, three hours. Readings of and lectures on Spanish prose from the beginning to 1500.

224. Poetry of the Golden Age. (4) Lecture, three hours. Readings of and lectures on Spanish poetry from 1500 to 1700.

225. Drama of the Golden Age. (4) Lecture, three hours. Readings of and lectures on the *comedia*.

226. Prose of the Golden Age. (4) Lecture, three hours. Readings of and lectures on fictional, didactic, religious, and historical writings.

227. Cervantes. (4) Lecture, three hours. Readings of and lectures on works of Cervantes.

228. The Enlightenment. (4) Lecture, three hours. Readings of and lectures on representative works of the period.

229. Romanticism. (4) Lecture, three hours. Readings of and lectures on representative works of the period.

230. Realism and Naturalism. (4) Lecture, three hours. Readings of and lectures on literary works, principally novels, from 1850 to 1898.

231. Major Currents in Modern Spanish Literature. (4) Lecture, three hours. Introduction to major literary currents, including symbolism, Parnassianism, and the Generation of 1898.

232. Spanish Prose Literature from 1898 to the Civil War. (4) Lecture, three hours. Readings of and lectures on representative essays, novels, and short stories of the period.

233. Spanish Prose Literature after the Civil War. (4) Lecture, three hours. Readings of and lectures on representative essays, novels, and short stories of the period.

234. Spanish Drama and Poetry from 1898 to the Civil War. (4) Lecture, three hours. Readings of and lectures on representative plays and poems.

235. Spanish Drama and Poetry after the Civil War. (4) Lecture, three hours. Readings of and lectures on representative plays and poems of the period.

237. Literature of the Spanish Conquest. (4) Lecture, three hours. Readings of and lectures on chronicles, poems, and indigenous accounts of the Spanish Conquest.

238. Baroque, Enlightenment, and Neoclassicism in Colonial Literature. (4) Lecture, three hours. Readings of and lectures on representative texts.

239. Romanticism and Realism in Spanish-American Literature. (4) Lecture, three hours. Intensive study of Romanticism and realism in Spanish-American literature.

240. Major Currents in Modern Spanish-American Literature. (4) Lecture, three hours. Study of principal trends in modern Spanish-American literature, particularly *naturalismo* and *modernismo*.

241A-241B. Contemporary Spanish-American Short Story. (4-4) Lecture, three hours. Study of important short story writers from modernism to the present.

243A-243B. Contemporary Spanish-American Poetry. (4-4) Lecture, three hours. Intensive study of important poets of Spanish America from modernism to the present.

244A-244B. Contemporary Spanish-American Novel. (4-4) Lecture, three hours. Study of important novelists from modernism to the present.

245. Contemporary Spanish-American Essay. (4) Lecture, three hours. Study of important Spanish-American essayists of the 20th century.

246. Contemporary Spanish-American Drama. (4) Lecture, three hours. Study of principal Spanish-American dramatists and theater movements in the 20th century.

247. Chicano Literature. (4) Lecture, three hours. Study of major movements and authors of Mexican American literature.

M249. Folk Literature of the Spanish and Portuguese Worlds. (4) (Same as Folklore M249 and Portuguese M249.) Lecture, three hours. Intensive study of folk literature of the Spanish and Portuguese cultures as represented in (1) ballad and poetry, (2) narrative and drama, (3) speech.

M251A-M251B. Studies in Galegan-Portuguese and Old Spanish. (4-4) (Same as Portuguese M251A-M251B.) Lecture, two hours. Study of problems related to historical development of Galegan-Portuguese and Old Spanish. Each course may be repeated once with topic change and consent of appropriate guidance committee.

256A-256B. Studies in Spanish Linguistics. (4-4) Lecture, two hours. Study of problems in analysis and description of the contemporary Spanish language. Each course may be repeated once with topic change and consent of appropriate guidance committee.

257. Studies in Dialectology. (4) Discussion, two hours. May be repeated once with topic change and consent of appropriate guidance committee.

262A-262B. Studies in Medieval Spanish Literature. (4-4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

264A-264B. Studies in Golden Age Spanish Literature. (4-4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

265. Cervantes. (4) Discussion, two hours. May be repeated once with topic change and consent of appropriate guidance committee.

270A-270B. Studies in 18th-Century Spanish Literature. (4-4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

271A-271B. Studies in 19th-Century Spanish Literature. (4-4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

272A-272B. Studies in 20th-Century Spanish Literature. (4-4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

277A-277B. Studies in Colonial Spanish-American Literature. (4-4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

278A-278B. Studies in 19th-Century Spanish-American Literature. (4-4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

280A-280B. Studies in Contemporary Spanish-American Literature. (4-4) Discussion, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

281. Studies in Chicano Literature. (4) Discussion, two hours. May be repeated once with topic change and consent of appropriate guidance committee.

M286A-M286B. Studies in Hispanic Folk Literature. (4-4) (Same as Folklore M286A-M286B.) Lecture, two hours. Each course may be repeated once with topic change and consent of appropriate guidance committee.

290. Special Topics. (4) Lecture, two hours. Variable topics; consult *Schedule of Classes* or department counselor for topics to be offered in a specific term. May be repeated once with topic change and consent of appropriate guidance committee.

310. Teaching Spanish in Elementary School. (4) Lecture, three hours.

370. Teaching Spanish in Secondary School. (4) Lecture, three hours.

373. Teaching Composition. (2) Designed for graduate students. Seminar on teaching writing in Spanish language courses. Introduction to composition theory. Instruction and practice in integrating writing into curriculum, setting goals and standards, designing and sequencing course materials, evaluating and commenting on papers. May not be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching Spanish at College Level. (4) Designed for graduate Spanish and Portuguese students. Basic concepts of modern theories of language and language acquisition which underlie modern methods of second language teaching. S/U grading.

596. Directed Individual Study or Research. (4 to 8) Study or research in areas or subjects not offered as regular courses. No more than four units may be applied toward M.A. course requirements.

597. Preparation for Graduate Examinations. (4 to 12) Preparation: official acceptance of candidacy by department. Individual preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be taken only once for each degree examination and only in term that comprehensive or qualifying examinations are to be taken. S/U grading.

598. Research for M.A. Thesis. (4 to 12) Research in preparation of M.A. thesis. S/U grading.

599. Research for Ph.D. Dissertation. (4 to 8) Limited to students who have passed Ph.D. qualifying examinations. Research for and preparation of Ph.D. dissertation. S/U grading.

Portuguese

Lower Division Courses

1. Elementary Portuguese. (4) Discussion, five hours; laboratory, one hour.

2. Elementary Portuguese. (4) Discussion, five hours; laboratory, one hour. Enforced requisite: course 1.

3. Intermediate Portuguese. (4) Discussion, five hours; laboratory, one hour. Enforced requisite: course 2.

8A-8B. Portuguese Conversation. (2-2) Discussion, three hours. Enforced requisite: course 3 (B or better).

25. Advanced Portuguese. (4) Enforced requisite: course 3.

M35. Spanish, Portuguese, and Nature of Language. (4) (Same as Spanish M35.) Lecture, three hours. Introduction to language study within context of Romance languages, focusing on Spanish and Portuguese. Nature of language: structure, diversity, evolution, social and cultural settings, literary uses. Study of language and its relation to other areas of human knowledge.

40A-40B. Portuguese, Brazilian, and African Literature in Translation. (4-4) Lecture, three hours. Reading and discussion of selected works in translation. Papers and examinations in English. **40A.** Portuguese and Portuguese-African Literature; **40B.** Brazilian Literature.

M42. Civilization of Spain and Portugal. (4) (Same as Spanish M42.) Lecture, three hours; discussion, one hour. Required of majors. Conducted in English. Highlights of civilization of Spain and Portugal, with emphasis on the artistic, economic, social, and historical development as background for upper division courses.

M44. Civilization of Spanish America and Brazil. (4) (Same as Spanish M44.) Required of majors. Conducted in English. Highlights of civilization of Spanish America and Brazil, with emphasis on the artistic, economic, social, and historical development as background for upper division courses.

46. Brazilian Culture and Civilization. (4) Lecture, three hours. Conducted in English. Topical analysis of cultural history of Brazil, with emphasis on physical environment, principal historical, social, and economic development, and artistic manifestations. P/NP or letter grading.

Upper Division Courses

100A. Phonology and Morphology. (4) Lecture, three hours. Requisite: course 25. Analysis of phonetic, phonemic, and morphological systems of Portuguese.

100B. Syntax. (4) Lecture, three hours. Requisite: course 25. Review of patterns of the Portuguese language.

102A-102B. Intensive Portuguese. (4-4) Preparation: foreign language experience (other than Portuguese). Development of speaking and reading skills equivalent to those covered in three terms of the traditional pattern and to meet special needs of advanced undergraduate and graduate students.

103. Language and Popular Culture. (4) (Formerly numbered 101A.) Lecture, three hours. Requisite: course 102B. Development of speaking, reading, and writing skills. Structured in thematic units, with songs, videos, and specific vocabulary emphasizing questions of Brazilian cultural identity.

105. Advanced Composition and Style. (4) Requisite: course 25. Practice in writing Portuguese with appropriate vocabulary, syntactical structures, and stylistic patterns.

M118A-M118B. History of Portuguese and Spanish. (4-4) (Same as Spanish M118A-M118B.) Lecture, three hours. Requisites: courses M35, 100A. Major features of development of Portuguese and Spanish languages from their origins in Vulgar Latin to modern times. **M118A.** Phonology; **M118B.** Morphology and Syntax.

120A-120B. Introduction to Portuguese Literature. (4-4) Lecture, three hours. Requisite: course 25. Introduction to principal periods, currents, and authors of Portuguese literature.

C124. Early Portuguese Literature. (4) Lecture, three hours. Requisite: course 25. Study of main genres of medieval Portuguese and Galician literature through representative works. Concurrently scheduled with course C224. P/NP or letter grading.

C125. Camões and the Portuguese Renaissance. (4) Lecture, three hours. Requisite: course 25. Study of main genres of Renaissance Portuguese literature, with particular emphasis on the works of Luis de Camões. Concurrently scheduled with course C225. P/NP or letter grading.

C126. Baroque and Neoclassical Portuguese Literature. (4) Lecture, three hours. Requisite: course 25. Study of main genres of baroque and neoclassical Portuguese literature through representative works. May be concurrently scheduled with course C226.

C127. 19th-Century Portuguese Literature. (4) Lecture, three hours. Requisite: course 25. Study of principal features through representative works. May be repeated for credit with topic change. Concurrently scheduled with course C227. P/NP or letter grading.

C128. Post-Romanticism and Naturalism in Portuguese Literature. (4) Lecture, three hours. Requisite: course 25. Study of principal features through representative works. May be concurrently scheduled with course C228.

C129. 20th-Century Portuguese Literature. (4) Lecture, three hours. Requisite: course 25. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C229. P/NP or letter grading.

130A-130B. Brazilian Literature and Identity: Introduction. (4-4) Lecture, three hours. Requisite: course 25. Introduction to principal periods, currents, and authors of Brazilian literature.

C131. Colonial Brazilian Literature and Culture. (4) Lecture, three hours. Requisite: course 25. Study of most important authors to 1830. May be repeated for credit with topic change. Concurrently scheduled with course C231. P/NP or letter grading.

C132. 19th-Century Brazilian Literature and Culture. (4) Lecture, three hours. Requisite: course 25. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C232. P/NP or letter grading.

C133. Machado de Assis. (4) Lecture, three hours. Requisite: course 25. Study of selected works by Joaquim Maria Machado de Assis. Concurrently scheduled with course C233. P/NP or letter grading.

C134. Brazilian Modernism. (4) Lecture, three hours. Requisite: course 25. Study of principal characteristics of Brazilian modernism through representative works. Concurrently scheduled with course C234. P/NP or letter grading.

C135. 20th-Century Brazilian Literature. (4) Lecture, three hours. Requisite: course 25. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C235. P/NP or letter grading.

141. Brazilian Film and Literature. (4) Lecture, three hours. Conducted in English. Topical analysis of main literary and historical themes of Brazilian culture, through films and literary texts. P/NP or letter grading.

197. Undergraduate Seminar. (4) Seminar, three hours. Requisite: course 25. Variable topics course with readings, discussions, and papers; consult *Schedule of Classes* or department counselor for topic to be offered in a specific term.

199. Special Studies. (2 to 4) Eight units may be applied toward the major requirements.

Graduate Courses

M200. Research Resources. (4) (Same as Spanish M200.) Lecture, three hours. Identification and use of research resources for graduate students.

M201A-M201B. Literary Theory and Criticism. (4-4) (Same as Spanish M201A-M201B.) Lecture, three hours. Definition, discussion, and application of main currents of contemporary literary theory and criticism. Letter grading.

202. Synchronic Morphology and Phonology. (4) Lecture, three hours. Study of theoretical synchronic linguistics as applied to Portuguese.

204A-204B. Generative Grammar. (4-4) Lecture, three hours. Course 204A is requisite to 204B. Generative approach to the Portuguese language, with some consideration of bearing of syntax, semiology, and phonology on style, metaphor, and meter.

M205A-M205B. Development of Portuguese and Spanish Languages. (4-4) (Same as Spanish M205A-M205B.) Lecture, three hours. Intensive study of historical development of Portuguese and Spanish languages from their origin in spoken Latin.

C224. Early Portuguese Literature. (4) Lecture, three hours. Study of main genres of medieval Portuguese and Galician literature through representative works. Concurrently scheduled with course C124. S/U or letter grading.

C225. Camões and the Portuguese Renaissance. (4) Lecture, three hours. Study of main genres of Renaissance Portuguese literature, with particular emphasis on works of Luis de Camões. Concurrently scheduled with course C125. S/U or letter grading.

C226. Baroque and Neoclassical Portuguese Literature. (4) Lecture, three hours. Study of main genres of baroque and neoclassical Portuguese literature through representative works. May be concurrently scheduled with course C126.

C227. 19th-Century Portuguese Literature. (4) Lecture, three hours. Study of principal features through representative works. May be repeated for credit with topic change. Concurrently scheduled with course C127. S/U or letter grading.

C228. Post-Romanticism and Naturalism in Portuguese Literature. (4) Lecture, three hours. Study of principal features through representative works. May be concurrently scheduled with course C128.

C229. 20th-Century Portuguese Literature. (4) Lecture, three hours. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C129. S/U or letter grading.

C231. Colonial Brazilian Literature and Culture. (4) Lecture, three hours. Study of most important authors to 1830. May be repeated for credit with topic change. Concurrently scheduled with course C131. S/U or letter grading.

C232. 19th-Century Brazilian Literature and Culture. (4) Lecture, three hours. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C132. S/U or letter grading.

C233. Machado de Assis. (4) Lecture, three hours. Study of selected works by Joaquim Maria Machado de Assis. Concurrently scheduled with course C133. S/U or letter grading.

C234. Brazilian Modernism. (4) Lecture, three hours. Study of principal characteristics of Brazilian modernism through representative works. Concurrently scheduled with course C134. S/U or letter grading.

C235. 20th-Century Brazilian Literature. (4) Lecture, three hours. Study of representative trends and authors. May be repeated for credit with topic change. Concurrently scheduled with course C135. S/U or letter grading.

M249. Folk Literature of the Spanish and Portuguese Worlds. (4) (Same as Folklore M249 and Spanish M249.) Lecture, three hours. Intensive study of folk literature of the Spanish and Portuguese cultures as represented in (1) ballad and poetry, (2) narrative and drama, (3) speech.

M251A-M251B. Studies in Galegan-Portuguese and Old Spanish. (4-4) (Same as Spanish M251A-M251B.) Lecture, two hours. Study of problems related to historical development of Galegan-Portuguese and Old Spanish. Each course may be repeated once with topic change and consent of appropriate guidance committee.

252. Studies in Early Portuguese Literature. (4) Discussion, two hours.

253. Studies in Modern Portuguese Literature. (4) Discussion, two hours.

254. Studies in Early Brazilian Literature. (4) Discussion, two hours.

255. Studies in Modern Brazilian Literature. (4) Discussion, two hours.

256A-256B. Studies in Portuguese Linguistics. (4-4) Lecture, two hours. Study of problems in analysis and description of the contemporary Portuguese language.

290. Special Topics. (4) Discussion, two hours. Designed for graduate students. Consult *Schedule of Classes* or department counselor for topics to be offered in a specific term. S/U or letter grading.

370. Teaching Portuguese in Secondary School. (4) Designed for future teachers in this field.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

596. Directed Individual Study or Research. (4 to 8) Study or research in areas or subjects not offered as regular courses. No more than eight units may be applied toward M.A. course requirements.

597. Preparation for Graduate Examinations. (4 to 12) Preparation: official acceptance of candidacy by department. Individual preparation for M.A. comprehensive examination or Ph.D. qualifying examinations. May be taken only once for each degree examination and only in term that comprehensive or qualifying examinations are to be taken. S/U grading.

598. Research for M.A. Thesis. (4 to 12) Research in preparation of M.A. thesis. S/U grading.

599. Research for Ph.D. Dissertation. (4 to 8) Limited to students who have passed Ph.D. qualifying examinations. Research for and preparation of Ph.D. dissertation. S/U grading.

Professor Emeritus

Ralph Richardson, Ph.D.

Associate Professor

Paul I. Rosenthal, Ph.D. (*Communication Studies*)

Senior Lecturers

Marde S. Gregory, M.A.

Thomas E. Miller, M.A.

Lecturers

Dee Bridgewater, Ph.D.

John Kochian, M.A.

Sonya H. Packer, M.A.

Scope and Objectives

There is no major in speech; however, several undergraduate courses are offered for interested students.

Speech

Lower Division Courses

A. Oral Communication for Nonnative Speakers. (No credit) Lecture, four hours. Speech A displaces four units on student's Study List but yields no credit toward a degree. Emphasis on public and private speaking skills in American English necessary for social, academic, and professional growth in this country. Provides experiences necessary to remove barriers to communication created by inappropriate oral language usage. Offered in summer only. P/NP grading.

1. Principles of Oral Communication. (4) Preparation: satisfaction of Subject A requirement. Theory and practice of informal public speaking, including selection of content, organization of ideas, language, and delivery; practice in extemporaneous and manuscript speaking; training in critical analysis through reading and listening to contemporary speeches.

1A. English Language Program in Effective Speaking. (4) Lecture, eight hours and 20 minutes. Combination of courses A and 1 to help nonnative speakers of English increase fluency and vocabulary while also improving presentation skills. Language usage, reasoning, style, and delivery. Conversation and pronunciation practice. Offered in summer only. P/NP or letter grading.

2. Public Speaking and Discussion. (4) Enforced requisite: course 1. Continuation of course 1, with special emphasis on group discussions, panels, symposia, debates, and formal public speaking. Critical analysis of speeches in both contemporary and historical settings.

Upper Division Courses

107. Principles of Argumentation. (4) Analysis of propositions, tests of evidence, briefing. Study of hindrances to clear thinking, ambiguity of terms, and prejudices. Critical analysis of selected argumentative speeches.

190A-190B. Forensics. (2-2) May be repeated once for credit.

191. Analysis and Briefing. (2) Intensive study of selected political or social issues; preparation of bibliography; analysis and evaluation of issues and arguments. May be repeated once for credit.

197. Proseminar: Rhetoric. (4) Designed for seniors. Variable topics course involving intensive study of discourse associated with a single major issue or personality.

199. Special Studies. (2 to 4) Limited to seniors.

Scope and Objectives

The Department of Statistics was formally established in April 1998. One of the department goals is to coordinate both the undergraduate and graduate teaching of statistics at UCLA. Statistics is important for all sciences because a great deal of advanced work in each scientific discipline involves statistical analysis and interpretation of data. In addition, many laws, proposals, and programs in society require statistics for the purpose of evaluating collected quantitative data.

Undergraduate Study

Undergraduate Courses

Students planning to pursue advanced degrees in statistics should enroll in the Statistics M100A, 100B-100C sequence. The 110A-110B sequence is less comprehensive than the 100 series. In particular, probability topics do not receive the same level of coverage. Courses 110A-110B are offered each term. The remaining upper division courses are usually offered once or twice each year. The tentative class schedule for the forthcoming academic year is posted in the department office in February.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and

is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degree

The Department of Statistics offers the Master of Science (M.S.) degree in Statistics.

Admission

Prospective graduate students in statistics need not have an undergraduate statistics major but should have at least 12 quarter courses (or eight semester courses) in substantial upper division quantitative work, preferably in mathematics and statistics. Applicants must have a cumulative grade-point average of at least 3.2 in the upper division courses.

Applicants must take the Graduate Record Examination (GRE) General Test and a Subject Test, preferably in Mathematics, and must submit at least three letters of recommendation from persons who can attest to their quantitative skills.

Areas of Study

The strengths of current and prospective faculty members dictate the specific fields of emphasis in the department: computational and computer-intensive statistics, applied multivariate analysis, social statistics, and program evaluation.

Comprehensive Examination Plan

Students must pass the applied and theoretical statistics qualifying examinations at the M.S. level within seven quarters of full-time study. The examinations are offered during the Fall Quarter and toward the end of the Spring Quarter and are three-hour tests. Students may retake them any number of times until the examinations have been passed.

Thesis Plan

None.

Doctoral Degree

Admission

Prospective graduate students in statistics need not have an undergraduate statistics major but should have completed at least 12 quarter courses (or eight semester courses) in substantial upper division quantitative work, preferably in mathematics and statistics. For direct admission to the program leading to the Ph.D. degree in Statistics, a grade-point average of at least 3.5 must be presented. Applicants who have already obtained a master's degree must have maintained an average of better than 3.5 in graduate study.

Applicants must take the Graduate Record Examination (GRE) General Test and a Subject Test, preferably in Mathematics, and must sub-

mit at least three letters of recommendation from persons who can attest to their quantitative skills.

Major Fields or Subdisciplines

The strengths of current and prospective faculty members dictate the specific fields of emphasis in the department: computational and computer-intensive statistics, applied multivariate analysis, social statistics, and program evaluation.

Course Requirements

Students are required to pass (with grades of A or B) at least 18 approved graduate courses, of which at least six are outside the department. These courses are to be in professional or scientific fields closely related to research in statistics.

Written and Oral Qualifying Examinations

There are four qualifying examinations: one in theoretical statistics, one in applied statistics, one in data analysis, and one in probability. Students are required to pass three of the four exams at the Ph.D. level. The three passed must include applied and theoretical statistics. Students should pass qualifying examinations early in their graduate studies, preferably early in the second year. Students should consult an adviser in the area in which they plan to do research for advice on which qualifying examinations should be taken. After passing the written qualifying examinations, students set up a doctoral committee to administer the University Oral Qualifying Examination for advancement to candidacy.

Statistics

Lower Division Courses

10. Elementary Statistics. (4) (Formerly numbered 50.) Lecture, three hours; discussion, one hour. Preparation: three years of high school mathematics. Descriptive statistics, elementary probability, random variables, binomial and normal distributions. Large and small sample inference concerning means. P/NP or letter grading.

M11. Introduction to Statistical Methods for Business and Economics. (4) (Formerly numbered M51B.) (Same as Economics M40.) Lecture, three hours; discussion, one hour. Not open to students with credit for course 10, M100A, 100B, Mathematics M170A, 170B, or 171. Elements of statistical analysis. Presentation and interpretation of data; descriptive statistics; theory of probability and basic sampling distributions; statistical inference, including principles of estimation and tests of hypotheses; introduction to regression and correlation. P/NP or letter grading.

M12. Introduction to Statistical Methods. (4) (Formerly numbered M51C.) (Same as Geography M40.) Lecture, three hours; laboratory, 90 minutes; outside study, seven and one-half hours. Satisfies statistics requirement for Geography major. Presentation and interpretation of data, descriptive statistics and measures of spatial patterns, introduction to statistical inference and measures of association. P/NP or letter grading.

M21A. Introduction to Quantitative Methods. (4) (Formerly numbered M51A.) (Same as Anthropology M80.) Lecture, three hours; discussion, one hour. Data analysis as a way to reason with quantitative information. Topics include description (frequency distribution tables, histograms), population specification (mean and standard deviation, normal distribution), samples and estimation procedures (central limit theorem), and hypothesis testing (t-test, chi-square test). P/NP or letter grading.

M21C. Interpretation of Quantitative Data. (4) (Formerly numbered M51F.) (Same as Sociology M18.) Lecture, three hours; discussion, one hour. Enforced requisites: (Mathematics 2 or 3A) and Sociology 1 (may be taken concurrently). Satisfies statistics requirement for Sociology major. Reading graphs and tables; statistical description using indices of central tendency, dispersion, and association; simple linear regression. Probability; binomial, normal, t, and chi-square distributions and hypothesis testing based on them. Examples from recent issues of American Sociological Review or other leading sociological journals. P/NP or letter grading.

Upper Division Courses

M100A. Probability Theory. (4) (Formerly numbered M152A.) (Same as Mathematics M170A.) Lecture, three hours; discussion, one hour. Enforced requisites: Mathematics 32B, 33B. Not open to students with credit for course 110A, Mathematics M170A, or Electrical Engineering 131A. Probability distributions, random variables and vectors, expectation, normal approximations. P/NP or letter grading.

100B-100C. Statistics. (4-4) (Formerly numbered 152B-152C.) Lecture, three hours; discussion, one hour. Not open to students with credit for courses 110A-110B. P/NP or letter grading. **100B.** Requisite: course M100A. Survey sampling, estimation, testing, data summary, one- and two-sample problems. **100C.** Requisite: course 100B. Analysis of variance, categorical data, linear regression, decision theory and Bayesian inference.

110A-110B. Statistics. (4-4) (Formerly numbered 154A-154B.) Lecture, three hours; discussion, one hour. Not open to students with credit for courses M100A and 100B. P/NP or letter grading. **110A.** Requisites: Mathematics 32B, 33B. Not open to students with credit for course M100A, Mathematics M170A, or Electrical Engineering 131A. Probability, distributions, expectation, estimation, central limit theorem, confidence intervals, testing. **110B.** Requisite: course 110A. One- and two-sample problems, goodness of fit and contingency tables, correlation and regression, analysis of variance, nonparametrics.

M120A-M120B. Regression Analysis. (4-4) (Formerly numbered M153A-M153B.) (Same as Biomathematics M153A-M153B and Biostatistics M153A-M153B.) Lecture, three hours; discussion, one hour. Requisites: course 100B, Mathematics 115A. Linear and nonlinear regression analysis using package programs. Emphasis on relation between statistical theory, numerical results, and analysis of data. P/NP or letter grading. **M120A.** BMDP, SAS, and SPSS regression programs; general linear model theory; linear regression analysis; transforming and weighting; regression diagnostics; model building. **M120B.** Analysis of variance and covariance; nonlinear regression programs, analysis, and applications; maximum likelihood analysis; robust regression.

130. Statistical Analysis System (SAS). (4) Lecture, three hours; discussion, one hour. How to enter and analyze data with Statistical Analysis System (SAS). Discussion of the many statistical techniques available in SAS and ways to extend basic system by SAS programming. P/NP or letter grading.

199I. Independent Studies for Internships. (2 to 4) Tutorial, to be arranged. Independent studies course to be supervised jointly by the Field Studies Office and faculty supervisor. Further supervision to be provided by business for which student is doing internship. P/NP grading.

Graduate Courses

200A-200B. Statistical Theory. (4-4) (Formerly numbered Mathematics 276A-276B.) Lecture, three hours. Requisite: course 100C. Letter grading. **200A.** Sufficiency, exponential families, least squares, maximum likelihood estimation, Fisher information, Cramér/Rao inequality, confidence intervals. **200B.** Asymptotic properties of tests and estimates, consistency and efficiency, likelihood ratio tests, chi-squared tests.

201. Nonparametric and Robust Statistics. (4) (Formerly numbered Mathematics 278B.) Lecture, three hours. Requisite: course 200B. Development of nonparametric and robust procedures for hypothesis testing, estimation in one- and two-sample problems, linear and nonlinear regression, multiple classification, density estimation. Letter grading.

202. Decision Theory. (4) (Formerly numbered Mathematics 278C.) Lecture, three hours. Requisites: course 200B, Mathematics 131A. Bayes, admissible, and minimax decision rules. Invariant tests and estimates, best unbiased tests, locally best tests. Application to general linear model. Letter grading.

203. Sequential Analysis. (4) (Formerly numbered Mathematics 278D.) Lecture, three hours. Requisites: course 200B, Mathematics 131A. Bayes sequential decision problems, stopping rule problems, optimality of sequential probability ratio test, Wald identity, asymptotic theory, and other topics. Letter grading.

204. Nonparametric Function Estimation and Modeling. (4) (Formerly numbered Mathematics 278I.) Lecture, three hours. Requisite: course 200A. Introduction to many useful nonparametric techniques such as nonparametric density estimation, nonparametric regression, and high-dimensional statistical modeling. Some semiparametric techniques and functional data analysis. Letter grading.

210A-210B. Applied Statistics. (4-4) (Formerly numbered Mathematics 277.) Lecture, three hours. Requisites: courses M120A-M120B. Outline of principles of applied statistics, followed by survey of specific data analyses from physical, life, and social sciences. Methods include regression, analysis of variance and covariance, survival analysis, categorical data analysis, and simple time-series analysis. Illustration of transformations, plotting, model selection and evaluation, and estimation and decision procedures. Letter grading.

M211. Analysis of Data with Qualitative and Limited Dependent Variables. (4) (Formerly numbered Mathematics M278G.) (Same as Sociology M242.) Lecture, three hours. Requisites: courses M100A and 100B-100C, or Sociology 210A-210B. Models for binary, polytomous, and ordered outcomes; censored and truncated dependent variables; sample selection bias and qualitative response models; count outcomes; multilevel models; log-linear models. S/U or letter grading.

212. Evaluation and Survey Analysis. (4) (Formerly numbered Mathematics 278E.) Lecture, three hours. Requisite: course M120B. Primary focus on methods of program evaluation. Randomized experiments, observational studies, and topics such as matching, stratification, covariance adjustments, and sensitivity analyses. Letter grading.

M213. Applied Event History Analysis. (4) (Formerly numbered Mathematics M278H.) (Same as Sociology M286.) Lecture, three hours. Requisites: Sociology 209A-209B and 209C, or 210A-210B. Introduction to regression-like analyses in which outcome is "time to event." Topics include logit models for discrete-time event history models; piecewise exponential hazards models; proportional hazards; nonproportional hazards; parametric survival models; heterogeneity; multilevel survival models. S/U or letter grading.

M215A-M215B. Linear Statistical Models. (4-4) (Formerly numbered Mathematics M279A-M279B.) (Same as Biostatistics M250A-M250B.) Lecture, three hours; discussion, one hour. Preparation: one upper division three-term theoretical statistics course. Topics include linear algebra applied to linear statistical models, distribution of quadratic forms, Gauss/Markov theorem, fixed and random component models, balanced and unbalanced designs. Letter grading.

M220A-M220B. Applied Probability. (4-4) (Same as Mathematics M282A-M282B.) Lecture, three hours. Requisite: course M100A or Mathematics M170A. S/U or letter grading. **M220A.** Conditioning, Markov chains, Poisson process, Brownian motion, stationary processes, applications. **M220B.** Simulation, renewal theory, martingale, and selected topics from queuing, reliability, speech recognition, computational biology, mathematical finance, epidemiology.

221. Time-Series Analysis. (4) Lecture, three hours. Requisites: courses M100A, 100B-100C. Exploration of methods for analyzing numerical time-series data. Basic topics in temporal and frequency analysis, followed by more recent topics. Examples in various fields including economics, signal processing, and atmospheric sciences. Letter grading.

M230. Statistical Computing. (4) (Formerly numbered Mathematics M280.) (Same as Biomathematics M280 and Biostatistics M280.) Lecture, three hours. Requisites: course 100C, Mathematics 115A. Introduction to theory and design of statistical programs: computing methods for linear and nonlinear regression, dealing with constraints, robust estimation, and general maximum likelihood methods. Letter grading.

240. Multivariate Analysis. (4) (Formerly numbered Mathematics 278A.) Lecture, three hours. Requisite: course 200B. Distributions in several dimensions, partial and multiple correlation. Normal distribution theory, Wishart distribution, Hotelling T^2 . Principal components, canonical correlation, discriminant analysis. Introduction to linear structural relations and factor analysis. Letter grading.

285. Current Topics in Statistics. (4) (Formerly numbered Mathematics 285L.) Seminar, three hours. Topics in various statistical areas by means of lectures and informal conferences with staff members. S/U or letter grading.

296. Participating Seminar: Statistics. (1 to 2) (Formerly numbered Mathematics 296L.) Seminar and discussion by staff and students. S/U grading.

370. Teaching of Statistics. (4) Lecture, four hours. Exhaustive review of literature in teaching of statistics followed by analysis of what is missing in this area. Discussion of prevalent education, cognitive psychology, and evaluation theories and strategies that help to improve teaching of statistics. Letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Tutorial, to be arranged. Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

495. Teaching College Statistics. (2) Seminar, two hours; intensive training at beginning of Fall Quarter. Required of all potential departmental teaching assistants and new Ph.D. students. Practical and theoretical issues in teaching of statistics. S/U grading.

596. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. Supervised individual reading and study on project approved by a faculty member. May be repeated for credit. Letter grading.

599. Ph.D. Dissertation Research. (2 to 12) Tutorial, to be arranged. Preparation: advancement to Ph.D. candidacy. Study and research for Ph.D. dissertation. May be repeated for credit. S/U grading.

Chairs

E. Carmack Holmes, M.D. (*William P. Longmire, Jr., Professor of Surgery*), *Executive Chair*
James B. Atkinson, M.D., *Vice Chair for Clinical Affairs*
Achilles Demetrios, M.D., *Vice Chair, Cedars-Sinai*
Edward H. Livingston, M.D., *Vice Chair, Wadsworth VA*
Howard A. Reber, M.D., *Vice Chair, Sepulveda VA*
Bruce E. Stabile, M.D., *Vice Chair, Harbor-UCLA*
Jesse E. Thompson, Jr., M.D., *Vice Chair, Olive View-UCLA*

Scope and Objectives

The Department of Surgery instructs medical students during all four years of medical school. Students are expected to obtain broad knowledge of diseases treated by surgical means and to understand the pathology of these conditions, the therapy that may be applied, and the anticipated results of treatment. They are also encouraged to learn about the impact of surgical illness on the patient and the patient's family and environment.

Third-year students participate in one 12-week core clerkship in clinical surgery and are assigned to rotations at a combination of UCLA, Harbor-UCLA, West Los Angeles VA, and Olive View-UCLA Medical Centers. Each facility has a special orientation depending on the patient population and the individual staff, in addition to the initial surgery clerkship orientation. During the fourth year students may elect to take additional clinical rotations with increasing responsibilities. Additional in-depth elective courses are offered in collaboration with other departments.

For further details on the Department of Surgery and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

Surgery

Upper Division Course

199. Special Studies. (2 to 8) Tutorial, to be arranged. Individual projects carried out under direction of a faculty member. Special studies in surgery, with appropriate objectives, readings, laboratory work, or other assignments designed for proper training of students. P/NP or letter grading.

Scope and Objectives

UCLA's theater program offers comprehensive training for the profession, as well as serious study of theater's 2,000-year history and rich literature. Drawing on this vibrant heritage, the curriculum promotes an awareness of theater as a global phenomenon embodying the contributions of diverse cultures and explores theater as a forum for reflecting the human experience as revealed through the dynamics of theater production. With this in mind, students engage in the presentation of dramatic work in a community where creativity and critical thought combine in the exploration of the artistic and intellectual challenges inherent in the making of theater.

Manifesting talent and promise as well as representing a wide range of backgrounds and interests, prospective students are selected by the faculty through auditions and interviews in cities throughout the U.S.

At the undergraduate level, students receive education in acting, design, or the comprehensive study of theater, all within the rigorous liberal arts framework of the B.A. degree. At the graduate level, students in the M.F.A. program develop as artists and are given preprofessional training in the skills of theater, while Ph.D. students engage in critical investigations of the art form. In conjunction with their theater studies, students also have the opportunity to pursue elective courses in the area of film and television.

Undergraduate Study

Theater B.A.

The Bachelor of Arts degree provides a liberal education and preprofessional training in a comprehensive program that combines the study of the arts, humanities, and sciences with exploration of the principal areas of theater practice — acting, design, directing, the history and criticism of theater and drama, mu-

sical theater, and playwriting. The program is designed to ensure that students graduate with a sound humanistic and experiential base for further pursuits in education and in life beyond the University.

This comprehensive program in Theater provides a liberal education by combining critical study of theater with experiential practice in one or more of its component parts. Students explore acting, design, directing, playwriting, and production to build a foundation for future creative work. Specialized and advanced training is available to prepare students for a variety of careers, further training, or graduate study. At the upper division level, students choose from an array of advanced elective courses in acting, design and production, directing, musical theater, playwriting, and theater history and drama, leading to a culminating research or creative experience in the senior project.

The acting sequence electives include fundamental and advanced courses in all aspects of performance training that prepare students for careers in performance. There is some performance in projects, but emphasis is on class and studio work. Upper division advanced courses explore verse, scene study, comedy, cabaret, movement, and combat.

The design and production sequence electives introduce design principles and investigate the design of scenery, lighting, costumes, and sound for theater, film, and television in lower division courses. Four design and production areas of study are available at the upper division level — scenic design, costume design, lighting design, and sound design. Students select from an array of design skills courses to develop proficiency in essential areas of rendering, drafting, painting, computer-aided design, and technology. Courses in art, history, and philosophy build an understanding of the social history of visual ideas. A sequence of courses in each area of study examines design principles and practice specific to each field.

The directing sequence electives explore the basic theories of play direction, as well as text analysis and craft fundamentals. Advanced courses emphasize psychological aspects of director-actor communication and development of specific directorial and production styles.

The Ray Bolger musical theater program sequence electives are aimed at providing pre-professional training in a specific area of theater practice. Courses are designed to train selected students in acting, singing, and dance for the musical theater stage as well as providing knowledge of music theater history. The dance courses (Theater 1A-1B-1C) are open to all freshman Theater majors and must be taken as requisites to be considered for the music theater program. Auditions for the program are held during Spring Quarter of the freshman year. Junior transfer students are also eligible for consideration for an audition. The number of juniors admitted varies each year and is based on sophomore attrition. Ad-

ditional courses provide hands-on training with various artists and a range of performing experiences from workshops to full production.

The history and criticism of theater and drama sequence electives include the study of fundamental cultural, social, ethical, and political issues in the context of artistic expression enriched by historical perspective. The curriculum promotes an awareness of the theater as a global phenomenon embodying the contributions of diverse cultures and explores the verbal and visual elements of its language as revealed through the dynamics of theater production.

The playwriting sequence electives include specialized and advanced courses that prepare students to write one-act and full-length plays, books and lyrics for music theater, and scripts for the one-person show.

Admission

All applicants must meet the admission standards of UCLA and the departmental screening process. Applications are accepted only in November for admission to the following Fall Quarter. There are no mid-year admissions. On receipt of the application the department notifies students of the screening process, which includes submission of a written essay on a topic selected annually by faculty members, letters of recommendation, and an interview and/or audition. Information on the scheduling of the audition/interview is sent to each applicant with the departmental request for supplemental materials. Every applicant must complete the interview portion of the application process. The audition is optional for all students except those wishing to qualify for admission on the basis of their ability in performance. Applicants may submit materials for consideration in one or more of the following areas: acting, design and production, directing, history and criticism, musical theater, and playwriting.

All entering students are admitted to the Theater major and may audition and/or interview for elective courses in acting, design and production, directing, history and criticism of theater and drama, musical theater, or playwriting.

Preparation for the Major

Required: Theater 11, 12, 13, 14A-14B-14C, 15, 50 (must be taken for four units total).

The Major

Required: A total of 58 upper division units, including Theater 101A-101B-101C, 106, 150 (must be taken for four units total), 180, and 34 upper division elective units selected from courses 100 through 199 not otherwise specified as requirements.

The Ray Bolger musical theater program sequence electives are Theater 104C, 114A-114B-114C, 115A-115B-115C, 116A-116B-116C, 134A-134B-134C, 135A-135B-135C, and 137A-137B-137C.

Through certain of these required courses, students are responsible for completing specific

production assignments related to production activity of the theater curriculum.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degrees

The Department of Theater offers a Master of Arts (M.A.) degree in Theater and a Master of Fine Arts (M.F.A.) degree in Theater.

Master of Arts

Admission

The M.A. degree is awarded only in conjunction with study in the Ph.D. degree program to students who have successfully completed one year of graduate work and all requirements for the M.A. degree and who do not wish to continue in the doctoral program.

Students are admitted in the Fall Quarter only. Admission is competitive, and only a limited number of applicants are accepted each year in each program. The department does not have an application in addition to the UCLA *Application for Graduate Admissions*, and no screening examination prior to admission is required. For further information, contact the Student Services Office in the department.

Applicants are advised that all records submitted in support of an application, including creative work (original or otherwise), are not returnable nor is the department responsible for such material.

In addition to satisfying minimum University requirements for graduate admission, applicants must have completed an undergraduate major in any area comparable to that offered at UCLA and must provide the department with at least three letters of reference and a statement of purpose.

Requirements include the results of the Graduate Record Examination (GRE), a sample of scholarly or critical writing, a statement of purpose, and other information such as résumé, portfolio, script, production book, and interview that may be required to establish the quality of applicants' work in the specialization. Consult the Student Services Office.

Areas of Study

The program leads to a general graduate degree, though there are opportunities, through electives and thesis or research paper topic, to stress a particular interest such as acting, design, directing, dramatic writing, or theater history and criticism.

Course Requirements

Students are required to complete a minimum of 10.5 courses (42 units), five of which must be at the graduate level, in at least one year of intensive study and research leading to the successful completion of either the thesis or comprehensive examination plan.

The required courses are Theater 245A and C272 (a two-unit course to be taken three times). After consultation with an adviser, students select seven other courses, including one graduate course in theater history (Theater 205A, 205B, or 205C), one graduate course in theater production theory (Theater 241, 290A, or 290B), and five other courses which emphasize production practice or historical study. Students accepted for joint M.A. and Ph.D. programs are required to take Theater 205A-205B-205C.

Only eight units from the 596 series may be applied toward the total course requirement, and only four of these units may be applied toward the minimum graduate course requirement. No 598 courses may be applied toward the total course requirement.

Comprehensive Examination Plan

Students must complete an examination consisting of a 50-page research paper which may be associated with four units of Theater 596A, a one-hour oral defense of the paper, and a two-part, six-hour written examination covering theater history and production practice. The examination normally occurs during the final quarter of residency, at which time students should have advanced to candidacy.

Thesis Plan

Before beginning work on the thesis, students must obtain approval of a subject dealing with the history, aesthetics, criticism, or techniques of the theater and a general plan of investigation from the Ph.D. critical studies committee. A thesis committee is then formed when students are within one quarter of completing the coursework, at which time they are eligible to advance to candidacy. The adviser and the committee must have a prospectus of the thesis and a petition to advance to candidacy. Both are used as the basis for approval.

If the thesis fails to pass the committee, students may present a rewritten version for approval. The number of times a thesis may be presented depends on assessments made by the committee.

Master of Fine Arts

Admission

Students are admitted to the M.F.A. program in the Fall Quarter only. Admission is competitive, and only a limited number of applicants are accepted each year in each program. The department does not have an application in addition to the UCLA *Application for Graduate Admissions*, and no screening examination prior to admission is required. For further information, contact the Student Services Office in the department.

Applicants are advised that all records submitted in support of an application, including creative work (original or otherwise), are not returnable nor is the department responsible for such material.

In addition to satisfying minimum University requirements for graduate admission, applicants must have completed an undergraduate major in any area comparable to that offered at UCLA and must provide the department with at least three letters of reference and a statement of purpose.

Evidence of creative ability and professional intent is required. When submitting the application, applicants must indicate the M.F.A. degree objective and satisfy the specific admission requirements of one of the following areas of specialization within the M.F.A. program.

Acting. Submit a complete résumé and audition for the acting committee or its representative.

Design and Production (scenic, costume, lighting, and sound design, or production management/technology). Submit a résumé and evidence of ability appropriate to the area of emphasis as demonstrated by sketches, renderings, photographs, production books, plots, technical papers, reviews, or other appropriate exhibits. An interview and presentation of the portfolio is required.

Directing. Submit a résumé and evidence of production work, which may include copies of prompt books, photographs, reviews, and critical commentaries, and an essay outlining a directorial approach to a selected play. If the review committee requests an interview, applicants are notified of city location and dates at which time a full portfolio may be presented. Interviews are conducted at various locations around the country in February.

Playwriting. Submit a résumé and two examples of creative writing which may include dramatic writing or narrative fiction such as full-length plays, one-act plays, and screenplays. At least one stage play must be included. An interview may be required by the department.

Producer's Program. Submit a résumé, examples of related coursework, and a statement outlining areas of specific interest and intent. An interview may be required by the department.

In addition, all applicants must submit three letters of recommendation. The Graduate Record Examination (GRE) is not required. Consult the Student Services Office.

Areas of Study

The areas of specialization for the M.F.A. program are as specified above under the Admission section.

Course Requirements

Acting. A total of 23.5 courses (94 units) is required for the degree; of these, 20.5 courses (82 units) must be graduate-level (200 and 400 series) courses. Only 12 units of 596 courses

may be applied toward the total number of units for the degree and the minimum graduate course requirement.

Design and Production (scenic, costume, lighting, and sound design, or production management/technology). A total of 26 courses (104 units) is required for the degree; of these, 23.5 courses (94 units) must be graduate-level (200 and 400 series) courses. A maximum of 10 units of undergraduate courses and a maximum of 12 units of 596 courses may be applied toward the total number of units for the degree.

Directing. A total of 26.5 courses (106 units) is required for the degree; of these, 23.5 (94 units) must be graduate-level (200 and 400 series) courses. A maximum of 12 units of undergraduate courses and a maximum of 12 units of 596 courses may be applied toward the total number of units for the degree.

Students are required to enroll in a minimum of 12 units per quarter. Required courses are scheduled to permit completion within a three-year period.

Specific course requirements for each program are available in the Student Services Office.

Comprehensive Examination Plan

The plan is satisfied by fulfilling a series of creative projects appropriate to students' specializations. On completion of the final creative project or in the last quarter of residence, whichever is last, students must file for advancement to candidacy. The committee then reviews and evaluates students' records. Student participation in the final review is at the discretion of the committee.

If students fail the review and evaluation of their creative work by the examining committee, they may, with the approval of the department chair, be reexamined.

Thesis Plan

None.

Doctoral Degree

Admission

Applicants to the program leading to the Ph.D. program in Theater must submit evidence of potential as a practicing scholar as indicated by (1) breadth and depth of advanced coursework in history, theory, and criticism, (2) the imagination and quality of scholarly writing and academic achievements, (3) grade-point average, Graduate Record Examination (GRE) scores, awards, scholarships, and fellowships. Additionally, candidates should demonstrate awareness and experience in one of the major fields of theater.

Applicants may be admitted with an M.F.A., M.A., or B.A. degree. The dossier for admission must contain a statement of purpose indicating areas of interest appropriate to the doctoral degree, as well as a thesis or other writing samples.

Further information is available from the Student Services Office.

Major Fields or Subdisciplines

Ph.D. students in theater are expected to be knowledgeable regarding theater history and theory, critical methods, theatrical production, and dramatic literature.

Course Requirements

During the first six quarters (two academic years), students must complete a minimum of 12 graduate courses (200 or 500 level) and two professional courses (Theater 495A and 495B). Theater 216A-216B-216C are required. The remaining nine courses are elective graduate courses, seminars, or tutorials. Of these electives, no more than four may be taken outside the department and no more than two may be tutorials. In addition, the distribution of electives must include at least one each in the areas of Western or non-Western theater study. These electives must augment the required courses so as to constitute a definable area of study associated with the dissertation topic. The dissertation is a historical, critical, analytical, or experimental study of a theater topic. A screening examination is administered during the first week of the Fall Quarter based on a reading list supplied at the time of application. Results of this examination may require the completion of background courses.

Written and Oral Qualifying Examinations

At the end of the student's second quarter in residence, a preliminary oral examination is administered by a representative committee of the faculty. The committee specifies the area of review, tests background preparation and progress to date, and determines general fitness to continue in the doctoral program.

After completing all language and course requirements, approval of a dissertation prospectus, and appointment of a dissertation committee, students are required to pass a written qualifying examination administered during four successive days. Information regarding the examination is available from the Ph.D. committee. With approval of the committee, students may be reexamined on any failed portions of the examination when it is next regularly scheduled, or within the year following the quarter in which it was first taken.

After the written examination is passed, a doctoral committee is formed to administer the University Oral Qualifying Examination. Students are advanced to candidacy only on successful completion of this examination.

Theater

Lower Division Courses

1A-1B-1C. Introduction to Dance for Music Theater. (1-1-1) Studio, four hours. Designed for Theater majors. Introduction to basic music theater dance technique. Letter grading.

11. Contemporary Theater Issues. (4) Lecture, three hours. Investigation of theater in contemporary American culture and society. Topics illustrated by faculty and guest speakers, visits to off-campus theaters, and reading from contemporary plays. Letter grading.

12. Introduction to Performance. (4) Lecture, two hours; studio, four hours. Investigation of phenomenon of performance and role of the performer in the theatrical event, including interpretation of drama through performance. Examination of various forms of theatrical performance and styles of expression, and development of acting, voice, and movement skills. Letter grading.

13. Play Reading and Analysis. (4) Lecture, three hours. Provides a base for subsequent study in theater. Development of techniques of play reading and habits of scholarship useful to further study in each of the theater's subdisciplines, including acting, directing, design, playwrighting, and critical study. Letter grading.

14A-14B-14C. Introduction to Design. (4-4-4) Lecture, three hours; studio, six hours. Exploration of visual interpretation of drama. Study of styles and techniques of design, collaborative role of the designer, principles of design for scenery, lighting, costumes, and sound. Both technical and aesthetic groundwork for further study. Letter grading.

15. Introduction to Directing. (4) Lecture, two hours; studio, four hours. Requisite: course 11. Investigation of role of the director in theatrical production and theories of play direction, with emphasis on analysis and interpretation of dramatic work and its realization in production.

20. Acting Fundamentals. (4) Lecture/laboratory. Required of Theater majors. Introduction to interpretation of drama through art of the actor. Development of individual insights, skills, and disciplines in presentation of dramatic material to an audience.

28A-28F. Acting, Voice, and Movement Workshops I. (2 each) Studio, three to six hours. Study of beginning acting technique, scene study, and development of voice and movement skills. May be repeated for a maximum of 12 units.

50. Theater Production and Performance. (2) Studio, six hours. Laboratory experience in various aspects of theater production, including scenery, costumes, lighting, stage management, or member of a crew. May be repeated for a maximum of eight units.

Upper Division Courses

101A-101B-101C. History of World Theater and Drama. (4-4-4) Lecture, three hours; discussion, one hour. Survey of history of influence of different cultures, traditions, and technologies on development of theater as a social institution. **101A.** Ritual and Religious Drama. Study of origins of theater and drama from oral tradition, myth, storytelling, Shamanism, collective ritual, Greek festival drama, and cloister drama of different cultures. **101B.** Rise of Secular Drama. Study of Renaissance secular theater and drama in Europe, Asia, Africa, and the New World. **101C.** Emergence of Realism and 20th-Century Responses. Study of realism and subsequent departures from realism in theater and drama.

102A. Theater of Japan. (4) Lecture, three hours. Exploration of major theater traditions of Japan from emergence of earliest theatrical activity to the present, including investigation of Noh, Bunraku, and Kabuki performance traditions.

102B. Theater of Southeast Asia. (4) Lecture, three hours. Examination of representative theatrical genre from various geographical areas in Southeast Asia to illustrate importance and contribution that theater plays in society.

102C. Cross-Cultural Currents in Theater. (4) Lecture, three hours. Exploration of interculturalism in theater, with focus on 20th-century alternatives to naturalism. Analysis of historical materials and dramatic texts to investigate cultural, aesthetic, ethical, and social implications of borrowing from other cultures.

102E. Theater of Non-European World. (4) Lecture, three hours; discussion, one hour. Survey of theater forms of non-European world in which primary attention is concentrated on examination and analysis of traditional dance-drama and puppet theaters of East Asia, Southeast Asia, South Asia, the Middle East, and Africa. Analogous forms from European theater included for comparative purposes.

M103A. African American Theater History: Slavery to Mid-1800s. (4) (Same as Afro-American Studies M103A.) Lecture, three hours. Designed for juniors/seniors. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from slavery to the mid-1800s.

M103B. African American Theater History: Minstrel Stage to Rise of the American Musical. (4) (Same as Afro-American Studies M103B.) Lecture, three hours. Designed for juniors/seniors. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from the minstrel stage to the rise of the American musical.

M103C. Origins and Evolution of Chicano Theater. (4) (Same as Chicana and Chicano Studies M103C.) Lecture, three hours. Designed for juniors/seniors. Exploration of development of Chicano theater from its beginning in legends and rituals of ancient Mexico to work of Luis Valdez (late 1960s).

M103D. Contemporary Chicano Theater: Beginning of Chicano Theater Movement. (4) (Same as Chicana and Chicano Studies M103D and World Arts and Cultures M103D.) Analysis and discussion of historical and political events from 1965 to 1980, as well as theatrical traditions which led to emergence of Chicano theater.

M103E. African American Theater History: The Depression to the Present. (4) (Same as Afro-American Studies M103E.) Lecture, three hours. Designed for juniors/seniors. Exploration of extant materials on history and literature of theater as developed and performed by African American artists in America from the Depression to the present.

103F. Native American Theater. (4) Study of American Indian theater as an evolving art form.

M103H. Contemporary Chicano Theater: Chicano Theater since 1980. (4) (Same as Chicana and Chicano Studies M103H and World Arts and Cultures M103H.) Requisite: course M103D. Analysis and discussion of Chicano theater since 1980, including discussion of Chicana playwrights, magic realism, Chicano comedy, and Chicano performance art.

104A-104B-104C. History of American Theater. (4-4-4) Lecture, three hours. Study of history of influence of different cultures, traditions, and technologies on development of theater as a social institution in America. **104A.** Revolutionary War to the Civil War; **104B.** Civil War to WWII; **104C.** WWII to the Present.

105. Main Currents in Theater. (4) Lecture, three hours. Critical examination of leading theories of theater from 1887 to the present. Study and discussion of modern styles of production.

106. History of American Theater and Drama. (4) Lecture, three hours. Survey of key works of American dramatic literature and landmarks of American theater history.

107. Drama of Diversity. (4) Lecture, three hours. Investigation of diversity in American society as manifested in dramatic works and theatrical presentations.

108. Special Topics in History and Criticism. (4) Lecture, three hours. Investigation of selected topics of diversity in American society as manifested in dramatic works and theatrical presentations.

111A. Selected Topics on History of European Theater from Primitive Times to 1640. (4) Lecture, three hours. Investigation in depth of a selected area of study in theater history from the Greeks to 1640. May be repeated twice for credit.

111B. Selected Topics on History of European Theater from 1640 to 1900. (4) Lecture, three hours. Investigation in depth of a selected area of study in theater history from the Renaissance through 1900. May be repeated twice for credit.

111C. Selected Topics on History of European Theater from 1900 to the Present. (4) Lecture, three hours. Investigation in depth of a selected area of study in theater history from the baroque to the present. May be repeated twice for credit.

114A-114B-114C. Dance and Singing for Music Theater I. (1-1-1) Studio, five hours. Requisite: course 1A. Designed for Theater majors. Sophomore-level course providing foundation for music theater students' voice training, as well as dance and movement technique. Letter grading.

115A-115B-115C. Acting, Voice, and Movement I. (6-6-5) Studio, 14 to 17 hours. Study of beginning acting technique: improvisation, games, and sense memory with examination of action and objective exercises, outline of Stanislavsky system, and development of voice and movement skills.

116A-116B-116C. Acting, Voice, and Movement II. (6-6-5) Studio, 14 to 17 hours. Development of acting skills through scene study, use of self, and personalization. Examination of characterization exercises and their application to contemporary American scenes. Development of speech, voice, and movement skills.

118A. Creative Dramatics. (4) Lecture/laboratory. Studies of principles and procedures of improvisational approach to drama as done with children from nursery school to junior high.

118B. Advanced Creative Dramatics. (2 to 4) Lecture, four hours; other, to be arranged. Practical application of creative drama process. Exploration of interrelationships of the arts to traditional disciplines of learning. May be repeated once for credit.

118C. Interactive Theater. (4) Laboratory. Active, problem-solving process of theater exercises and games designed to examine racial stereotypes, sexual harassment, gender discrimination, and other issue that divide members of the campus community, as well as issues which divide the campus from the Los Angeles community. Selected to increase social and political awareness of problems and ideas fundamental to intellectual development, exercises and games nurture skills and attitudes useful in facilitating discussions between actors and audience participants. Use of techniques of sensory awareness, movement, pantomime, improvisation, and characterization.

119A. Theater for the Child Audience: Theory and Criticism. (4) Lecture/laboratory. Principles of production and performance for the child audience.

119B. Theater for the Child Audience: Performance. (4) Lecture, two hours; laboratory, four hours. Preparation: audition prior to first class meeting. Designed to provide opportunity for students to work together as an ensemble, creating through improvisation a theater presentation for a young audience. Emphasis on testing theoretical concepts through ensemble work, rehearsal, pretesting, and evaluation of an original production for possible presentation outside the classroom.

120A-120B. Acting for Camera. (2-2) Studio, six hours. Development of performance techniques for camera and interpretation of comedy and drama for television, film, and emerging technologies. Study and practice in single- and multiple-camera productions.

121. Acting Workshop. (2) Laboratory, to be arranged. Requisite: course 20. Courses 160, 163A, 163B, and 163C may be taken concurrently. Workshop which provides students with opportunity to rehearse, perform, and criticize scenes. May be repeated once for credit.

122. Makeup for the Stage. (2) Art of makeup and its relation to the production as a whole. History, aesthetics, materials, and procedures of makeup.

123. Intermediate Acting for the Stage. (4) Lecture/laboratory. Requisite: course 20. Study and practice of art of acting through perfecting of techniques and application of those techniques to acting problems.

124A. Advanced Voice. (2) Studio/laboratory, three to four hours. Requisites: courses 126A-126B-126C. Development of voice techniques for the stage, including work in relaxation, limbering, breathing, articulators, and resonators.

124B. Advanced Speech. (2) Studio/laboratory, three to four hours. Requisite: course 124A. Designed to acquaint students with International Phonetic Alphabet and its uses and to exercise students' skills in pronunciation, enunciation, and development of diction versatility.

125A. Advanced Movement. (2) Studio/laboratory, three hours. Physical awareness for the actor, concentrating on warming up the body, relaxation, control, stunts, and gymnastics.

125B. Advanced Movement and Combat. (2) Studio/laboratory, three to four hours. Requisite: course 125A. Advanced and contemporary approach to classical and modern movement for the stage actor.

126A-126B-126C. Acting, Voice, Movement III. (4-4-4) Studio, nine hours. Requisite: course 12. Study of characterization, including introduction to Shakespeare. Approach to verse, scansion, use of emollient in classic texts. Personalization within heightened reality. Further work in voice, speech, and movement.

127A-127B-127C. Advanced Acting. (2-2-2) Studio, six hours. Requisites: courses 126A-126B-126C. Comedy workshop, stand-up comedy, performance art pieces. Audition and cold reading workshop. Solving individual acting projects.

128A-128F. Acting, Voice, and Movement Workshops II. (2 each) Studio, four to six hours. Study of advanced acting technique, scene study, and development of voice and movement skills. May be repeated for a maximum of 12 units.

CM129. Contemporary Topics in Theater, Film, and Television. (2) (Same as Film and Television CM129.) Lecture, two hours; screenings, two hours. Limited to junior/senior and graduate theater/film and television students. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in the collaborative effort; examination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated for a maximum of six units. Concurrently scheduled with course CM229.

130A. Fundamentals of Playwriting I. (4) Lecture, three hours; discussion, one hour. Required of Theater majors. Designed to stimulate students' creative faculties through preparation and completion of a one-act play. Students' critical faculties stimulated by play analysis and scene exercises in discussion section.

130B. Fundamentals of Playwriting II. (4) Lecture, three hours plus conference. Requisite: course 130A. Study in original material for the theater, its preparation and development. Designed to give further insight into critical and creating aspects of short and full-length plays and guidance in completion of one-act and full-length plays. May be repeated twice for credit.

130C. Writing for American Musical Theater. (4) Lecture/laboratory, three hours. Study of practice and techniques used in writing a libretto for musical theater: opening numbers, romance, subplots, and comedy. May be repeated once for credit.

132. Manuscript Evaluation for Theater. (4) Lecture, three hours. Requisite: course 130A. Principles and practices in evaluation of manuscripts for theater. May be repeated once for credit.

C133A-C133B-C133C. Script Development Workshops. (4-4-4) Laboratory, three hours. Guided preparation of a script for production, focusing on collaborative process between playwright and director, scene work, staged readings, casting, rehearsal, and production. Emphasis on communication, artistic growth, and professional process. Course C133A may be repeated once for credit. Concurrently scheduled with courses C433A-C433B-C433C.

134A-134B-134C. Dance and Singing for Music Theater III. (1-1-1) Studio, five hours. Requisites: courses 1A, 114A-114B-114C. Designed for Theater majors. Junior-level course providing intermediate-level instruction for music theater students' voice training, as well as dance and movement technique. Letter grading.

135A-135B-135C. Dance and Singing for Music Theater III. (1-1-1) Studio, five hours. Requisites: courses 1A, 114A-114B-114C, 134A-134B-134C. Designed for Theater majors. Senior-level course providing advanced instruction for music theater students' voice training, as well as dance and movement technique. Letter grading.

136. Advanced Acting for the Stage. (4) Lecture/laboratory. Requisite: course 123. Study and practice of art of acting through a progression to more advanced acting problems. May be repeated twice for credit. Consecutive enrollment with same instructor not permitted. Total units for courses 136, 137A, 137B, and 137C may not exceed 12 units.

137A-137B-137C. Continuum Study in Acting for the Stage. (4-4-4) Studio, six hours. Requisite: course 123. Technique of characterization and performance in advanced and complex acting styles. May be repeated once for credit.

138. Special Problems in Performance Techniques. (4) Lecture/laboratory. Study of complex problems in voice, movement, and acting. May be repeated twice for credit.

141A. Lighting Techniques for the Stage. (4) Lecture, three hours; laboratory, six hours. Requisite: course 10. Required of Theater majors. Intensive study of theater lighting, with emphasis on relationship of lighting instruments and control equipment to lighting design. Courses 141A, 140A, and 142A may be taken in any sequence, but not concurrently.

144. Theater Sound Techniques. (2) Lecture, two hours; laboratory, two hours. Requisites: courses 14A-14B-14C. Study of equipment and techniques utilized in recording and reproduction of sound for the theater.

145. Costume Design for the Theater. (4) Lecture/laboratory. Design of costumes for theatrical presentations. Study of use of silhouette, fabrics, color, and decoration as related to theatrical characterizations. May be repeated once for credit.

147A. Drafting. (4) Development of visual communication skills through drafting. Exploration of drafting for scenic and lighting designs. May be repeated once for credit.

147B. Rendering. (4) Introductory course in basic skills necessary for drawing and rendering for scenic, costume, and lighting design for theater, film, and television. May be repeated once for credit.

148. Special Courses in Design and Technical Theater. (4) Lecture, three hours. Group study of selected subjects in design and technical theater. May be repeated twice for credit.

150. Theater Production and Performance. (2) Studio, six hours. Requisite: course 50. Laboratory experience in various aspects of theater production, including performance in a project or production, stage management, member of a crew, or assignment as a designer or assistant on a production. May be repeated for a maximum of eight units.

151A-151B. Scenic Design. (4-4) Lecture/studio. Requisites: courses 14A-14B-14C. Introduction to principles of study and practice of the design of scenery for theater, film, and television. Imagination as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process, composition, and style leading to visual presentation of the design.

C151C. Production Design for Film and Television. (4) Lecture/studio. Study of role of art director. Production design for single- and multiple-camera production and set decoration. Concurrently scheduled with course C451C.

152A-152B. Lighting Design. (4-4) Lecture/studio. Requisites: courses 14A-14B-14C. Investigation of principles and techniques of lighting design for theater and television. Study of lighting, with emphasis on imagination, text analysis, metaphor, and conceptualization. Investigation of composition and control of light and color in relation to the actor.

C152C. Lighting Design for Television. (4) Lecture/studio. Study of current professional lighting design practices in television for single- and multiple-camera production. Concurrently scheduled with course C452C.

153A-153B. Costume Design. (4-4) Lecture/studio. Requisites: courses 14A-14B-14C. **153A.** Imagination as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process and character analysis leading to visual presentation of the design. **153B.** Study of costume design for period productions, development of conceptual designs, and costume design for music theater.

C153C. Costume Design for Film and Television. (4) Lecture/studio. Requisites: courses 14A-14B-14C. Study of current professional costume design and wardrobe practices in film and television, including effect of differing media on design choices. Concurrently scheduled with course C453C.

154A-154B. Sound Design. (4-4) Lecture/studio. Requisites: courses 14A-14B-14C. **154A.** Study of recording, mixing, editing, and playback of sound effects, voice, and music in the theater. **154B.** Introduction to use of delay, equalization, and microphone placement for theater sound reinforcement. Study of creation of sound effects, control of MIDI data, and design techniques for musical theater.

C154C. Sound for Film and Television. (4) Lecture/studio. Study of current professional sound recording, rerecording, mixing, and synchronization practices for film and television. Concurrently scheduled with course C454C.

C155A-C155H. Graphic Representation of Design. (2 each) (Formerly numbered C155A-C155G.) Studio. Concurrently scheduled with courses C455A-C455H. Letter grading:

C155A. Perspective Drawing. (2) Studio, four hours. Requisite: course 147A or 147B. Introduction to use of pencil and pen to communicate scenic designs, including one- and two-point perspective, form light, shade, and textures. Letter grading.

C155B. Watercolor Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study of watercolor techniques as they relate to interpretation of scenic designs, including painting of brick, wood, stone, fabrics, and other surfaces. Letter grading.

C155C. Marker Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study and practice of marker rendering techniques as a means of communication for scenic and costume designers. Letter grading.

C155D. Model Making. (2) Studio, four hours. Requisite: course 147A or 147B. Study of the model for representation of scenic designs from initial working prototypes to finished color models. Use of wide variety of materials and techniques for execution of the model. Letter grading.

C155E. Life Drawing. (2) Studio, four hours. Requisite: course 147A or 147B. Study and practice in drawing of human form. Letter grading.

C155F. Costume Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study of techniques for rendering theatrical costumes, with emphasis on figure, clothing, and fabrics. Letter grading.

C155G. Scene Painting Techniques. (2) Studio, four hours. Requisite: course 147A or 147B. Study of scenic painting techniques and materials and their realization of color design and elevations. May be repeated once for credit. Letter grading.

C155H. Selected Topics in Graphic Representation of Design. (2) Studio, six hours. Group study of selected subjects in techniques for interpretation of design for theater. May be repeated for a maximum of four units. Letter grading.

C156A. Introduction to Computer-Assisted Drafting. (2) Studio, four hours. Requisite: course 147A or 147B. Study of computer-assisted design for theater, film, and television. Introduction to computer drafting, drawing and editing techniques, drawing floor plans, and elevation drawings. Concurrently scheduled with course C456A.

C156B. Introduction to Computer-Assisted Design. (2) Studio, four hours. Requisite: course 147A or 147B. Study of computer-assisted design for theater, film, and television. Investigation of computer-assisted design techniques, including lighting designs, use of symbol libraries, and pictorial. Introduction to computer-assisted drafting. Concurrently scheduled with course C456B.

C156C. Introduction to Computer-Assisted Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study of computer design for theater, film, and television. Investigation of three-dimensional computer drawing: wire-frame perspective drawing and photo-realistic computer rendering techniques. Concurrently scheduled with course C456C.

C157A-C157B-C157C. Costume Construction Techniques. (2-2-2) Studio, four hours. Study of theory and application of drafting, pattern making, fitting, and construction techniques for period costumes and undergarments to achieve an authentic-appearing costume using contemporary methods. Concurrently scheduled with courses C457A-C457B-C457C.

C157A. Requisites: courses 14A-14B-14C. Introduction to draping, pattern grading fitting, and slash and spread adaptation. **C157B.** Requisite: course C157A. Introduction to costume drafting, construction of period undergarments. **C157C.** Requisites: courses C157A-C157B. Draping, patterning, and fitting techniques for period garments.

C158A. Scenic Design Technology. (4) Lecture/studio. Requisites: courses 14A-14B-14C. Investigation of materials, systems, and techniques for realization of scenic designs for theater, film, and television. Study of advanced techniques and materials for construction, finishing, and rigging of scenery and properties. Concurrently scheduled with course C458A.

C158B. Lighting Design Technology. (4) Lecture/studio. Requisites: courses 14A-14B-14C. Investigation of materials, systems, and techniques for realization of lighting designs for theater, film, and television. Study of design, operation, and performance of lighting instruments, dimming equipment, and control systems, including automated fixtures, projection equipment, and computer systems for lighting. Concurrently scheduled with course C458B.

C158C. Sound Design Technology. (4) Lecture/studio. Requisites: courses 14A-14B-14C. Investigation of materials, systems, and techniques for realization of sound designs for theater, film, and television. Study of operation and performance of equipment for recording, mixing, and reproduction of theater sound. Concurrently scheduled with course C458C.

159. Design Portfolio Project. (4) Lecture/studio. Requisites: courses 14A-14B-14C. Preparation of complete designs and drawings for a production and assembly of a design portfolio and résumé. Projects prepared under guidance of a faculty adviser.

160. Fundamentals of Play Direction. (5) Lecture, two hours; laboratory, four hours. Required of theater majors. Course 121 may be taken concurrently. Basic theories of play direction and their application through preparation of scenes under rehearsal conditions.

163A-163B-163C. Directing for the Stage. (4-4-4) Lecture/studio. Requisite: course 15:

163A. Intensive development of primary directing skills and process, including text analysis and exploration of craft fundamentals as a basis for director/actor communication and effective staging. Students direct scenes from plays under laboratory conditions.

163B. Further development of craft elements of directorial method, with additional emphasis on psychological aspects of director/actor communication. Students direct scenes under laboratory conditions in alternative stage configurations.

163C. Culminating development of directorial methods, with particular emphasis on challenges of style in text and production. Students direct scenes under laboratory conditions in alternative stage configurations.

C163D. Directing Project for the Stage. (4) Lecture, four hours; studio, six hours. Requisites: courses 163A-163B-163C. Completion of course C163D satisfies course 180 requirement. Application of stage directing techniques in production of a short play. Students direct a one-act play. May be repeated once for credit. Concurrently scheduled with course C263D.

171A. Advanced Theater Laboratory. (1 to 4) Hours to be arranged. Creative participation as actor or stage manager in public presentation of departmental productions. May be taken for a maximum of four units.

171B. Advanced Theater Laboratory. (1 to 4) Hours to be arranged. Creative participation in realization of production elements related to public presentation of departmental productions. May be taken for a maximum of four units.

C172. Technical Theater Laboratory. (2) Hours to be arranged. Required of Theater majors. Laboratory in various aspects of theater production. Must be repeated for a maximum of eight units, but no assignment may be repeated more than once. Concurrently scheduled with courses C272 and C472.

173A. Design Assignment: Assistant Designer. (2) Studio, six hours. Requisites: courses 14A-14B-14C. Laboratory experience as an assistant designer, including participation in preparation and realization of scenic, lighting, costume, or sound designs. May be repeated twice.

173B. Production Design Assignment: Designer. (2) Studio, six hours. Requisites: courses 14A-14B-14C. Laboratory experience as a designer, including preparation and realization of scenic, lighting, costume, or sound designs. May be repeated twice.

174A. Stage Managing Techniques. (2) Studio, six hours. Requisites: courses 14A-14B-14C. Professional duties of stage manager. Problems of unions, professional auditions, organization, scheduling, out-of-town openings, Broadway openings, and responsibilities of a lengthy run.

174B. Project in Stage Management. (3) Studio, nine hours. Requisite: course 174A. Laboratory experience in the professional duties of assistant stage manager, including participation as an assistant stage manager in preproduction, rehearsal, and performance phases of a production. May be repeated once for credit.

174C. Project in Stage Management. (4) Studio, 12 hours. Requisite: course 174A. Laboratory experience in the professional duties of stage manager, including participation as a stage manager in preproduction, rehearsal, and performance phases of a production. Problems of unions, auditions, organization, scheduling, and responsibilities of a lengthy run. May be repeated once for credit.

175A-175D. Summer Theater Workshops. (4 or 8 each) Lecture. Participation in production and performance of full-length plays for general public. Offered in summer only. Letter grading. **175A-175B.** Practice in and observation of complete operation of a summer theater company. **175C-175D.** Specialization in technical theater.

177. Computer-Assisted Design Techniques. (4) Studio, six hours. Hands-on exploration of use of computers for design of scenery and lighting in theater, film, and television. May be taken for a maximum of eight units. Offered in summer only. Letter grading.

180. Senior Project. (4) Lecture/studio, three hours. Requisites: courses 101A-101B-101C. Preparation of a conceptual or creative project to provide a culminating experience in the production of a creative or research work.

C190A. Role of Producer in Professional Theater. (2) Study of structure governing economic and artistic decision-making processes in professional theater of America. Concurrently scheduled with course C294A.

C190B. Role of Management in Educational and Community Theater. (2) Study of artistic, social, and economic criteria in administration of educational and community theater. Concurrently scheduled with course C294B.

191. The Touring Company. (2 to 12) Lecture, 20 hours; laboratory, 22 hours. Rehearsal and technical preparation of a theatrical work for touring and performance of that work on tour.

192. Motion Picture, Television, and Theater Internship. (2, 4, or 8) Field experience, eight, 16, or 24 hours; individual conferences, to be arranged. Limited to senior Theater majors. Internship at various studios or theaters accentuating creative contribution, organization, and work of professionals in their various specialties. May be taken for a maximum of eight units.

M193. Art Alive: Art and Performance in the Museum. (4) (Same as Honors Collegium M116.) Offered in collaboration with the Los Angeles County Museum of Art (LACMA). Interpretation of art in the collection through acting, dialogues, movement, and music. Research into history and art history and production of a creative performance piece required. P/NP or letter grading.

199. Special Studies in Theater Arts. (2 to 8) Hours to be arranged. Preparation: 3.0 grade-point average in major. Limited to seniors. May be taken for a maximum of eight units.

Graduate Courses

202A. Seminar: Western Classical Theater. (4) Discussion, three hours. Designed for graduate students. Examination of theatrical production and dramatic form in the Greek and Roman periods. May be repeated twice for credit.

202B. Seminar: Medieval Theater. (4) Discussion, three hours. Designed for graduate students. Selected studies of theatrical production and dramatic form in the Middle Ages. May be repeated twice for credit.

202C. Seminar: Renaissance and Baroque Theater. (4) Discussion, three hours. Designed for graduate students. Selected studies in theater architecture, theatrical production, and dramatic form in English and Continental theater from 1485 to the early 18th century. May be repeated twice for credit.

202D. Seminar: Bourgeois and Romantic Theater. (4) Discussion, three hours. Designed for graduate students. Selected studies in theater architecture, theatrical production, and dramatic form in English and Continental theater from 1700 to 1870. May be repeated twice for credit.

202E. Seminar: Modern Consciousness in Theater. (4) Discussion, three hours. Designed for graduate students. Study of prototypes of modern experience as encountered in work of Ibsen and Strindberg. May be repeated twice for credit.

202F. Seminar: Modern Realism. (4) Discussion, three hours. Designed for graduate students. Selected studies of theater's response to science and technology, politics, and revolution. May be repeated twice for credit.

202G. Seminar: Modern Theatricalism. (4) Discussion, three hours. Designed for graduate students. Selected studies in symbolism and avant-garde theater. Exploration of dream experience and private psyche, religious experience, and revitalization of myth and ritual. May be repeated twice for credit.

202M. Seminar: American Theater. (4) Discussion, three hours. Designed for graduate students. Selected studies in development of theatrical production and dramatic writing in American theater. May be repeated twice for credit.

202P. Seminar: Traditions of African Theater. (4) Discussion, three hours. Designed for graduate students. Selected studies of traditional theater forms such as those indigenous to Ghana, Nigeria, and other African nations and their diaspora (Haiti, Jamaica, and other areas of the Caribbean) through examination of character, structure, performance modes, and archetypes. May be repeated twice for credit.

202R. Seminar: East Asian Theater. (4) Discussion, three hours. Designed for graduate students. Selected topics in theater forms of East Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit.

202S. Seminar: South Asian Theater. (4) Discussion, three hours. Designed for graduate students. Selected topics in theater forms of South Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit.

202T. Seminar: Southeast Asian Theater. (4) Discussion, three hours. Designed for graduate students. Selected topics in theater forms of Southeast Asia, including dramatic literature, costume, theater spaces, and critical writings. May be repeated twice for credit.

203. Theater Ethics and Issues. (5) Seminar, four hours. Designed for graduate students. Investigation of a selected area of theater and drama study that explores significant issues and ethical considerations of the modern world. May be repeated four times for credit.

204. Theater Genres. (5) Seminar, four hours. Designed for graduate students. Investigation of history and literature of the theater as manifested in one or more of its major forms or genres. May be repeated four times for credit.

205A-205B-205C. Background of Theatrical Art. (4-4-4) Discussion, three hours. Designed for graduate students. Analysis of major plays, commentaries, and historical materials. S/U or letter grading. **205A.** Classical and Medieval Periods; **205B.** Renaissance, Baroque, and Rococo Periods; **205C.** Romantic, Naturalistic, and Symbolist Periods.

206. Themes in World Theater and Drama. (5) Seminar, four hours. Designed for graduate students. Selected topics in world theater history, drama, production, and/or architecture organized on a thematic basis. May be repeated four times for credit.

207A-207B. Theater Aesthetics. (4-4) Designed for graduate students. Discussion of essential issues in aesthetics of theater and drama based on philosophy of art and theories of the theater. **207A.** Classical and Medieval Theories of Art and Theater; **207B.** Renaissance Theories of Art and Theater to the Present.

208A-208B. Dramaturgy I, II. (4-4) Lecture, three hours; laboratory, one hour. Designed for graduate students. Letter grading. **208A.** (Formerly numbered 208.) Theoretical and practical aspects of the dramatist's work in contemporary theater. **208B.** Requisite: course 208A. Continuation of study of theory and practice of dramaturgy.

208C. Practicum in Dramaturgy. (2 to 12) (Formerly numbered 495B.) Laboratory, to be arranged. Requisites: courses 208A-208B. Demonstration of competence in practice of dramaturgy through completion of approved dramaturgical assignment. May be repeated for a maximum of 12 units. Letter grading.

209. Theater Authors. (5) Designed for graduate students. Investigation of work of a theater artist from history of world theater, with special emphasis on relationship to time in which the work was generated. May be repeated four times for credit.

210. Topics in World Theater and Drama. (5) Designed for graduate students. Investigation of selected topics in world theater, drama, production, and architecture. May be repeated four times for credit.

216A-216B-216C. Theory and Criticism I, II, III. (6-6-6) Lecture, four hours; laboratory, one hour. Designed for graduate students. Studies in theory and criticism of theater, dramatic literature, and performance. Letter grading. **216A.** Through the 16th Century. **216B.** 16th through 19th Centuries. Requisite: course 216A. **216C.** 19th Century to the Present. Requisite: course 216B.

220. Graduate Forum. (1) Seminar, two hours bi-monthly or five times per term. Limited to graduate theater students. Presentation and discussion of issues informing and affecting contemporary theater. May be repeated four times for credit. S/U grading.

CM229. Contemporary Topics in Theater, Film, and Television. (2) (Same as Film and Television CM229.) Lecture, two hours; screenings, two hours. Limited to junior/senior and graduate theater/film and television students. Examination of creative process in theater, film, and television, with consideration of writing, direction, production, and performance. Overview of individual contributions in the collaborative effort; examination of distinctiveness and interrelations among these arts. Individual units include participation of leading members of theater, film, and television professions. May be repeated for a maximum of six units. Concurrently scheduled with course CM129.

230A-230B-230C. Writing for the Contemporary Theater. (4 to 8 each) Lecture, three hours; studio, two hours. Designed for graduate students. **230A.** One-Act Play. Analysis of strategy and dramatic structure of selected contemporary short plays leading to the guided completion and critique of student-written one-act plays. **230B.** Full-Length Play. Analysis of strategy and dramatic structure of selected contemporary full-length plays leading to the guided completion and critique of a student-written full-length play. **230C.** Performance and Text. Exploration of structural strategies, political implications, and technical demands of selected contemporary American plays leading to the guided completion and critique of student work.

232. Manuscript Analysis. (4) Lecture, three hours. Designed for graduate students. Critical and constructive study of dramatic techniques as employed by playwrights and screenwriters in selected examples of contemporary work. May be repeated once for credit.

241. Research in Technical Theater. (4) Designed for graduate students. Research in technical processes and equipment in theater.

242A-242B-242C. History of Style and Ornamentation. (4-4-4) Designed for graduate students. In-depth study of history of costume, architecture, interiors, furnishings, and their interrelationships from early Western culture through the late Gothic period. Emphasis on those periods most prolific in dramatic literature and on resources and research techniques for visual artists.

243A-243B-243C. Scenic Design. (4-4-4) Advanced study and practice in scenic design for theater. Imagination as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process, composition, and style leading to visual presentation of the design. May be repeated once for credit.

244A. Advanced Theater Laboratory. (2 or 4) Laboratory, to be arranged. Designed for graduate students. Creative participation as assistant director, stage manager, or performer in public presentation of departmental productions. May be taken for a maximum of four units.

244B. Advanced Theater Laboratory. (2 or 4) Laboratory, to be arranged. Designed for graduate students. Creative participation in realization of production elements related to public presentation of departmental productions. May be taken for a maximum of four units.

245A. Production Management. (4) Lecture, three hours. Study in production management for the theater. Examination of professional duties of production manager, including preproduction, rehearsal, and performance phases of a production. Problems of resource management, unions, organization, scheduling, and budgeting while maintaining a creative and collaborative environment.

245B. Production Management. (4) Lecture, three hours. Requisite: course 245A. Advanced study in production management for the theater, with focus on planning process of professional production manager in a seasonal and repertory environment. Problems of resource allocation, unions, organizational structure, scheduling, and budgeting to establish a creative and collaborative environment.

245C. Projects in Production Management. (4) Studio/laboratory. Requisite: course 245B. Laboratory experience in professional duties of production manager, including participation as a production manager in preproduction, rehearsal, and performance phases of a production. Problems of resource management, unions, organization, scheduling, and budgeting.

246A-246B-246C. History of Costume. (4-4-4) Lecture/studio. Designed for graduate students. Study of history of costume as a manifestation of cultural, social, economic, and political influences to provide a historical framework for design of costumes for theater, film, and television. Historic survey and in-depth exploration of a selected period, with study of influences of diverse cultures.

247. Collaborative Project in Design and Production. (3 to 4) Studio, four hours. Designed for graduate students. Collaborative project in design, including analysis, conceptual development, and preparation of scenic, lighting, costume, or sound designs. May be repeated once for credit.

260. Directing I. (4) Lecture, four hours; studio, 24 hours. Designed for graduate students. Development of directorial skills of analysis, planning, staging, and criticism through medium of written preparations and directing of scenes.

261. Directing II. (4) Lecture, four hours; studio, 30 hours. Designed for graduate students. Problems in direction of post-realist plays through medium of interpretation and laboratory scene work.

263. Production Project in Direction for the Stage. (2 to 6) Discussion, one hour; studio, 12 to 24 hours. Designed for graduate students. Direction of a dramatic work for public performance. Discussion and critique of work in progress. May be repeated for a total of no more than 12 units.

C263D. Directing Project for the Stage. (4) Lecture, four hours; studio, six hours. Requisites: courses 163A-163B-163C. Application of stage directing techniques in production of short play. Students direct a one-act play. May be repeated once for credit. Concurrently scheduled with course C163D.

264. Directing Classical and Historical Drama. (4) Lecture, four hours; studio, 30 hours. Designed for graduate students. Problems in interpretation and direction of historical or classical drama through medium of laboratory scene work.

265. Modern Theories of Production. (4) Examination of modern theories of production from emergence of the director in the 19th century to the present. Investigation of different responses to problems of creating a vital theatrical event in context of ongoing evolution of theater as an art form. Examination of contribution of significant directors and movements; relation between theater and other forms of representation.

266. Theatrical Conceptualization. (4) Examination of process of conceptualization in dramatic production; centrality of theatrical conceptualization in interpretation of dramatic text; exploration of range of possibilities inherent in different theatrical spaces and options in design components. Consideration of visual arts and music as sources of stimulus for theatrical conceptualization, with focus on collaborative aspect of theatrical production.

C272. Production and Performance Laboratory. (2) Lecture, three hours; laboratory, to be arranged. Designed for graduate students. Credit for creative production assignments required of all M.A. students during first three terms in residence. May be repeated twice for credit. Concurrently scheduled with courses C172 and C472.

290A. Role of Management in Artistic Decision Making in the Theater. (4) Discussion, four hours. Descriptive study of criteria for decision making in artistic institutions, including role of the institution in society, economic environment of the arts, and artistic value systems of arts organizations. S/U or letter grading.

290B. Programming and Planning Policies in the Theater. (4) Analysis of social, artistic, and economic roles of the arts as reflected in programming policy. Examination of social goals pursued in establishing relationships between the arts and their environment.

C294A. Artistic Control of Theatrical Production by Professional Producer. (2) Designed for graduate students. Study of structure governing economic and artistic decision-making processes in professional theater of America and historical development of involvement of producer in artistic process. Concurrently scheduled with course C190A. Additional research and writing required of graduate students.

C294B. Organization and Operation of Community Theater. (2) Designed for graduate students. Study of artistic, social, and economic criteria in administration of educational and community theater, with research in history of current practices in operations, administration, and organization. Concurrently scheduled with course C190B.

298A-298B. Special Studies in Theater Arts. (2 to 4 each) Lecture/discussion. Designed for graduate students. Seminar study of problems in theater arts, organized on topic basis. May be repeated once for credit.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

420A-420B-420C. Advanced Acting I. (4 to 8-4-4) Studio, six to 18 hours:

420A. Development of an internal technique, beginning with an autodrama which is a dramatization of one's personal history. Scene work follows, with emphasis on off-stage preparations, improvisations capturing the circumstances, life of the character, and intentions of the scene.

420B. Scene work, usually from 20 to 30 minutes in length. Continuation of work on off-stage preparation, with further development of how the actor goes about doing research and fieldwork on the character being played.

420C. Development of an external technique through comedy and of skits, improvisation, physical humor, delivery of a line, rhythm, timing, and public cabaret. Fusion of the internal; use of action and objective with the external.

421A-421B-421C. Advanced Acting II. (4 or 8 each) Studio/laboratory, six to 18 hours. **421A.** Extending the idea of autobiography and using it as art. The actor as performance artist. Playing characters quite removed from oneself. Using language. Using Shakespeare and oneself to play him. **421B.** Continued character behavior study through language and movement. Further work on actions, objectives, and researching the role. **421C.** Comedy workshop. Exploration of craft of comedy and development of cabaret pieces.

422. Advanced Acting for Theater, Film, and Television. (8 to 12) Studio/laboratory. Intensive performance experience. May be repeated for a maximum of 24 units. S/U grading.

424A-424B-424C. Advanced Voice and Speech I. (2 or 4 each) Studio/laboratory, three to six hours. Development of voice and speech techniques for the stage, including those of relaxation, breathing, resonance, and development of speaking voice. Speech training uses International Phonetic Alphabet to train students in standard American speech. Text work in poetry and prose.

424D-424E-424F. Advanced Voice and Speech II. (2 or 4 each) Studio/laboratory, three to six hours. Advanced voice problems. Extension of first-year work, with increased demands on voice. Range, resonance, and breathing capacity extension. Articulation and phonetic alphabet. Text work in classical verse.

425A-425B-425C. Advanced Movement I. (2 or 4 each) Studio/laboratory, three to six hours. Discovery of body's unique language through exercises designed to explore and free the total instrument. Development of a flexible actor with range, expression, and confidence physically. Awakening of the imagination while exploring the worlds of ritual, animal, conceptual, and modern dance movements.

425D-425E-425F. Advanced Movement II. (2 or 4 each) Studio/laboratory, three to six hours. Presentation of a more complete picture of stage movement and its relationship to theater, music, and dance. Advancement of physical training of individual actors to their maximum potential. Experience in techniques and discovery of origins of a variety of acrobatic and dance disciplines, including ballet, ballroom, period dance, and circus techniques.

429. Performance Workshop. (2) Studio, four hours. Limited to graduate students not enrolled in M.F.A. acting program. Exercises in performance techniques, including autodrama and scene study. Development of performance skills through scene study, use of self, and personalization. Examination of characterization exercises and their application to scenes.

430A-430B-430C. Advanced Studies in Playwriting. (4 to 8 each) Lecture, three hours. Limited to M.F.A. playwriting program students. Guided completion of full-length scripts for the stage.

431. Special Topics in Playwriting. (4) Discussion, three hours. Designed for M.F.A. playwriting program students. Analysis and practice of varied aspects of playwright's art. Variable content selected from topics such as comedy writing, docudrama, writing for alternative audiences, adaptation from stage to screen, children's theater, or improvisational techniques. May be repeated twice for credit.

C433A-C433B-C433C. Script Development Workshops. (4-4-4) Laboratory, three hours. Designed for graduate students. Guided preparation of a script for production, focusing on collaborative process between playwright and director, scene work, staged readings, casting, rehearsal, and production. Emphasis on communication, artistic growth, and professional process. Course C433A may be repeated once for credit. Concurrently scheduled with courses C133A-C133B-C133C.

435AF-435AW-435AS. Problems in Advanced Writing for the Stage. (0-0-2) Limited to M.F.A. candidates. Review discussion and critique of playwriting projects. May be repeated for a maximum of six units. In Progress and S/U grading.

441A-441B-441C. Lighting Design. (4-4-4) Lecture/studio:

441A. Study and practice in lighting the actor, emphasizing textual and character analysis from lighting designer's perspective, conceptual development with the director, effect of light on dynamics of staging, use of color in light, and relationship of lighting designer to the actor. May be repeated once for credit.

441B. Study of use of light and color to define space, effect of light on scenery and costumes, lighting for arena/thrust theaters, multiscenic productions, lighting patterns, and moving scenery. May be repeated once for credit.

441C. Investigation of lighting design in production, musical theater, opera, touring, and repertory situations. Study of analysis of script and score for lighting designer. May be repeated once for credit.

441D. Scenic Projection and Media Techniques. (4) Lecture/laboratory. Designed for graduate students. Advanced study and practice in scenic projection and media techniques, with emphasis on analysis, design, and execution of theatrical projection and photographic technique for the stage.

442A-442B-442C. Costume Design. (4-4-4) Lecture/studio. Advanced study and practice in costume design for theater. Imagination as impetus for design, text analysis, metaphor, and conceptualization. Investigation of design research process, period style, and character analysis leading to visual presentation of the design. Study of costume design for theatrical productions, ballet, opera, and musical theater. May be repeated once for credit.

443. Problems in Design. (2 or 4) Lecture/laboratory, four hours (additional hours as required). Study and practice in design techniques for theater. May be repeated for a maximum of 12 units.

444A-444B-444C. Sound Design. (4-4-4) Lecture/studio:

444A. Study of sound and acoustics as they relate to performance environments, techniques associated with recording, mixing, processing, automation, and reproduction of dialogue, effects, and music tracks for theater sound design. May be repeated once for credit.

444B. Advanced study and practice in preparation and recording of theater sound designs, with emphasis on analysis of script and score, conceptual development of the design, and multitrack recording techniques to realize the design. May be repeated once for credit.

444C. Study and practice in processing and mixing of live and recorded sound; mix-down of multitrack recordings; preparation of sound tracks and sound reinforcement in the theater. Study of creation of sound effects, control of MIDI data, and design techniques for music theater. May be repeated once for credit.

C451C. Production Design for Film and Television. (4) Lecture/studio. Study of role of art director. Production design for single- and multiple-camera production and set decoration. Concurrently scheduled with course C151C.

C452C. Lighting Design for Television. (4) Lecture/studio. Study of current professional lighting design practices in television for single- and multiple-camera production. Concurrently scheduled with course C152C.

C453C. Costume Design for Film and Television. (4) Lecture/studio. Requisites: courses 14A-14B-14C. Study of current professional costume design and wardrobe practices in film and television, including effect of differing media on design choices. Concurrently scheduled with course C153C.

C454C. Sound for Film and Television. (4) Lecture/studio. Study of current professional sound recording, rerecording, mixing, and synchronization practices for film and television. Concurrently scheduled with course C154C. Graduate students expected to produce designs demonstrating a higher level of proficiency and skill.

C455A-C455H. Graphic Representation of Design. (2 each) (Formerly numbered C455A-C455G.) Studio. Concurrently scheduled with courses C155A-C155H. Letter grading:

C455A. Perspective Drawing. (2) Studio, four hours. Requisite: course 147A or 147B. Introduction to use of pencil and pen to communicate scenic designs, including one- and two-point perspective, form light, shade, and textures. Graduate students expected to produce drawings demonstrating a higher level of proficiency and skill. Letter grading.

C455B. Watercolor Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study of watercolor techniques as they relate to interpretation of scenic designs, including painting of brick, wood, stone, fabrics, and other surfaces. Graduate students expected to produce drawings demonstrating a higher level of proficiency and skill. Letter grading.

C455C. Marker Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study and practice of marker rendering techniques as a means of communication for scenic and costume designers. Letter grading.

C455D. Model Making. (2) Studio, four hours. Requisite: course 147A or 147B. Study of the model for representation of scenic designs from initial working prototypes to finished color models. Use of wide variety of materials and techniques for execution of the model. Graduate students expected to produce models demonstrating a higher level of proficiency and skill. Letter grading.

C455E. Life Drawing. (2) Studio, four hours. Requisite: course 147A or 147B. Study and practice in drawing of human form. Letter grading.

C455F. Costume Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study of techniques for rendering theatrical costumes, with emphasis on figure, clothing, and fabrics. Letter grading.

C455G. Scene Painting Techniques. (2) Studio, four hours. Requisite: course 147A or 147B. Study of scenic painting techniques and materials and their realization of color design and elevations. May be repeated once for credit. Letter grading.

C455H. Selected Topics in Graphic Representation of Design. (2) Studio, six hours. Group study of selected subjects in techniques for interpretation of design for theater. May be repeated for a maximum of four units. Letter grading.

C456A. Introduction to Computer-Assisted Drafting. (2) Studio, four hours. Requisite: course 147A or 147B. Study of computer-assisted design for theater, film, and television. Introduction to computer drafting, drawing and editing techniques, drawing floor plans, and elevation drawings. Concurrently scheduled with course C156A.

C456B. Introduction to Computer-Assisted Design. (2) Studio, four hours. Requisite: course 147A or 147B. Study of computer-assisted design for theater, film, and television. Investigation of computer-assisted design techniques, including lighting designs, use of symbol libraries, and pictorial. Introduction to computer-assisted drafting. Concurrently scheduled with course C156B.

C456C. Introduction to Computer-Assisted Rendering. (2) Studio, four hours. Requisite: course 147A or 147B. Study of computer design for theater, film, and television. Investigation of three-dimensional computer drawing: wire-frame perspective drawing and photo-realistic computer rendering techniques. Concurrently scheduled with course C156C.

C457A-C457B-C457C. Costume Construction Techniques. (2-2-2) Studio, four hours. Study of theory and application of drafting, pattern making, fitting, and construction techniques for period costumes and undergarments to achieve an authentic-appearing costume using contemporary methods. Concurrently scheduled with courses C157A-C157B-C157C.

C457A. Requisites: courses 14A-14B-14C. Introduction to draping, pattern grading fitting, and slash and spread adaptation. **C457B.** Requisite: course C457A. Introduction to costume drafting, construction of period undergarments. **C457C.** Requisites: courses C457A-C457B. Draping, patterning, and fitting techniques for period garments.

C458A. Scenic Design Technology. (4) Lecture/studio. Requisites: courses 14A-14B-14C. Investigation of materials, systems, and techniques for realization of scenic designs for theater, film, and television. Study of advanced techniques and materials for construction, finishing, and rigging of scenery and properties. Concurrently scheduled with course C158A.

C458B. Lighting Design Technology. (4) Lecture/studio. Requisites: courses 14A-14B-14C. Investigation of materials, systems, and techniques for realization of lighting designs for theater, film, and television. Study of design, operation, and performance of lighting instruments, dimming equipment, and control systems, including automated fixtures, projection equipment, and computer systems for lighting. Concurrently scheduled with course C158B.

C458C. Sound Design Technology. (4) Lecture/studio. Requisites: courses 14A-14B-14C. Investigation of materials, systems, and techniques for realization of sound designs for theater, film, and television. Study of operation and performance of equipment for recording, mixing, and reproduction of theater sound. Concurrently scheduled with course C158C.

459A-459B. Directing for Theater, Film, and Television. (4-4) Lecture, three hours. Limited to graduate theater students. Analysis and exploration, with specific scenes, of differences and many similarities in directorial approach to same literary material in three media.

460AF-460AW-460AS. Contemporary Issues in Direction. (1-1-1) Discussion, three hours. Designed for graduate students. Discussion of role of director in contemporary professional practice. Review discussion and critique of directing projects. May be repeated for a maximum of four units.

460B-460C. Problems in Advanced Direction for the Stage. (4-4) Lecture, to be arranged. Limited to M.F.A. candidates. Discussion and critique of work in progress. **460B.** Preparation and presentation of a published play under rehearsal conditions. **460C.** Preparation and presentation of a full-length original play under rehearsal conditions.

462. Production Project in Direction for the Stage. (4 or 8) Lecture, to be arranged. Limited to M.F.A. candidates. Preparation and presentation of an original play under minimal production conditions. Discussion and critique of work in progress.

463. Production Project in Direction for the Stage (8 or 12 units). Lecture, to be arranged. Limited to M.F.A. candidates. Preparation and presentation of a play under fully produced theater conditions.

C472. Production and Performance Laboratory. (2 to 8) Laboratory, to be arranged. Limited to M.F.A. candidates. Credit for creative production projects required of all M.F.A. students. May be repeated three times for a maximum of 16 units. Concurrently scheduled with courses C172 and C272.

474. Projects in Theater Design. (2 or 4) Discussion, three hours; laboratory, 12 hours to be arranged. Designed for graduate students. Study and practice in preparation and performance of dramatic works for public performances as a contributing artistic member of a departmental production. Creative responsibilities include designer, technical supervisor, production manager, choreographer, or dramaturge. May be repeated for a maximum of 16 units.

495A-495B-495C. Practicum and Practice in Teaching Theater. (2-2-2) (Formerly numbered 495A, 496.) Seminar, to be arranged; discussion, two hours. Limited to Ph.D. students. Study and practice of teaching theater at university level. Orientation and preparation of graduate (Ph.D.) students who have responsibility to assist in teaching undergraduate courses in department. Discussion of problems common to the teaching experience. Letter grading.

498. Professional Internship in Theater, Film, and Television. (4, 8, or 12) Full- or part-time at a studio or on a professional project. Designed for advanced M.F.A. students. Internship at various film, television, or theater facilities accentuating creative contribution, organization, and work of professionals in their various specialties. Given only when projects can be scheduled.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596A. Directed Individual Studies: Research. (2 to 12) Hours to be arranged. Designed for graduate students. May be repeated with consent of instructor.

596B. Directed Individual Studies: Writing. (2 to 12) Hours to be arranged. Designed for graduate students. May be repeated with consent of instructor.

596C. Directed Individual Studies: Directing. (2 to 12) Hours to be arranged. Designed for graduate students. May be repeated with consent of instructor.

596D. Directed Individual Studies: Design. (2 to 12) Hours to be arranged. Designed for graduate students. May be repeated with consent of instructor.

596E. Directed Individual Studies: Acting. (2 to 12) Hours to be arranged. Designed for graduate students. May be repeated with consent of instructor.

596F. Directed Individual Studies: Production. (2 to 12) Hours to be arranged. Designed for graduate students. May be repeated with consent of instructor.

597. Preparation for Ph.D. Qualifying Examinations in Theater Arts. (2 to 8) May be repeated for a maximum of 12 units.

598. M.A. Thesis in Theater Arts. (2 to 8) Preparation: advancement to M.A. candidacy. Research and writing for M.A. thesis. May be repeated for a maximum of 12 units.

599. Ph.D. Dissertation in Theater Arts. (2 to 8) Preparation: advancement to Ph.D. candidacy. Research and writing for Ph.D. dissertation. May be repeated for a maximum of 12 units.

Karen Hill Scott, Ph.D.

Scope and Objectives

The professional urban planner works on the creation and management of the urban environment, including its physical, economic, and social elements. Housing, transportation, air and water quality, the preservation of historic communities, and the development of community-level economic and employment programs are some of the tasks undertaken by recent graduates of the UCLA Department of Urban Planning. Graduates have taken positions in local, state, and national governments, and increasingly with private companies whose products and services affect the urban environment. While most UCLA graduates find positions in the U.S., the program offers the opportunity to specialize in development planning abroad, including rural development, and many graduates have found positions in Latin America, Africa, and Asia.

The program offers a two-year Master of Arts degree and a Ph.D. degree. Concurrent degree programs allow students to combine study for an M.A. in Urban Planning with work toward an M.B.A. in the John E. Anderson Graduate School of Management, a J.D. in the School of Law, an M.Arch. I in the Department of Architecture and Urban Design, or an M.A. in Latin American Studies.

The department takes pride in its collegial atmosphere. It features a lively mix of students from diverse academic backgrounds, drawn from many foreign countries and from every avenue of American life. It includes many members of racial and ethnic minority groups, and more than half the students are women. A number of student organizations provide an interesting program of extracurricular activities.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degrees

The Department of Urban Planning offers the Master of Arts (M.A.) degree in Urban Planning and participates in concurrent degree programs.

Master of Arts

Admission

The Department of Urban Planning admits students in the Fall Quarter only, and the application process should begin a year in advance of the quarter for which applicants are applying. Applicants who are admitted but do not enroll are not guaranteed admission at a later date.

Prospective applicants may obtain a detailed program statement and Graduate Division application by writing to the Department of Urban Planning, School of Public Policy and Social Research, UCLA, 3250 Public Policy Building, Box 951656, Los Angeles, CA 90095-1656.

A statement of purpose, letters of recommendation, grade-point averages, and relevant experience are all considered in the review process for admission. Applicants must submit transcripts from each college attended and should have a minimum grade-point average of 3.0 or B for their junior and senior years. Applicants are also encouraged to submit Graduate Record Examination (GRE) scores. The Test of English as a Foreign Language (TOEFL) is required for students whose native language is not English, unless at least two years of university-level coursework at an English-language institution have been completed. A score of 600 on the TOEFL is expected, and applicants with a score below 550 are not considered for admission. For master's applicants, work samples such as reports, research papers, and slides are optional. No more than two pieces of work should be submitted; samples written in a foreign language are not considered. Work samples are returned only on request. Applicants in the U.S. must enclose a self-addressed, stamped envelope.

J.D./M.A. Urban Planning

The School of Law and the Department of Urban Planning offer a concurrent plan of study providing an integrated curriculum for those planning to specialize in the legal aspects of urban problems. Education in planning offers an overview of theories and methods that permit identification and treatment of urban problems; education in law offers insight into the institutional causes and possibilities for treatment of these problems. Students pursue studies in both areas and receive both the J.D. and M.A. degrees at the end of four years.

In order to be considered for the concurrent degree program, applicants must apply and be admitted to both the School of Law and the Department of Urban Planning.

For additional information, contact the graduate adviser in the Department of Urban Planning.

M.B.A./M.A. Urban Planning

The M.B.A./M.A. program is a three-year concurrent degree program jointly sponsored by the John E. Anderson Graduate School of Management and the Department of Urban Planning. The program is designed for individuals who seek careers which draw on general and specialized skills in urban planning and management. By providing knowledge of the workings of both the private and public sectors, the program enables individuals who have acquired these skills to move easily between careers in private industry and public service.

Students interested in the M.B.A./M.A. program should contact the M.B.A. Program Office, John E. Anderson Graduate School of Management, regarding admission requirements and application procedures.

Further details may be obtained from the graduate adviser in the Department of Urban Planning.

M.A. Latin American Studies/M.A. Urban Planning

The Latin American Studies Program and the Department of Urban Planning offer a two and one-half to three-year concurrent degree program leading to an M.A. degree in each program. Issues related to migration and settlement, comparative urbanization, human resources development and distribution, and rural economics are all of direct concern to planners and other policymakers working in Latin America. The program provides an integrated curriculum through which students can develop professional knowledge and skills while receiving advanced area studies and language training.

Applicants apply through the Department of Urban Planning. Graduate Record Examinations (GRE) scores are required.

Further details may be obtained from the graduate adviser in the Department of Urban Planning.

M.Arch. I/M.A. Urban Planning

The Architecture and Urban Design Department in the School of the Arts and Architecture and the Department of Urban Planning in the School of Public Policy and Social Research offer a concurrent plan of study providing an integrated curriculum for architects interested in specializing in social, economic, and environmental policy issues and for urban planners interested in integrating architecture and urban design into policy and planning practice. Education in planning offers an overview of theories and methods that permit identification and treatment of urban problems; education in architecture stresses physical, aesthetic, and technical issues in the design of buildings and building complexes. In the program, students pursue studies in both schools/departments and receives both the Master of Architecture degree (M.Arch. I) and the M.A. in Urban Planning at the end of four years.

Students interested in the concurrent degree program, must apply and be admitted to the M.Arch. I Program in the Department of Architecture and Urban Design, and the M.A. Program in the Department of Urban Planning.

For additional information, contact the graduate adviser in the Department of Urban Planning or the graduate adviser in the Department of Architecture and Urban Design.

Areas of Study

Students choose an area of concentration by the end of the first quarter in the program. Areas of concentration are fields in which planners characteristically become engaged, professionally or through research. They are not meant to be mutually exclusive.

Regional and International Development. The concentration concerns the interrelated aspects of area development in both developed and developing countries. The perspective on questions of area development is that of political economy and spatial analysis. Industrialization, urbanization, and rural development are major focal points of interest. Within this area, students are expected to choose an emphasis on either developing or advanced economies.

Social Policy and Analysis. The analysis of social services includes questions of production and distribution — how efficiently are services provided, who pays, and who benefits? These questions lead to more fundamental ones about the functions of planning and social policy. In the broadest sense, social policy comprises the whole context of social actions which together determine the distribution of goods, services, and opportunities between rich and poor, men and women, young and old, and people of different ethnic and social origins. Students may specialize in one of four areas: transportation, housing and real estate development, social services and social policy, or information decision systems.

Environmental Analysis and Policy. The natural environment is both the context within which all human activities take place and a social product of those activities. Environmental planning begins as an attempt to mitigate often unforeseen consequences of economic growth and expansion where these seem to threaten social well-being and continuing political consensus. Courses are designed to introduce students to the linkages between environmental problems and social processes.

Community Development and the Built Environment. This area of concentration represents a blending of urban planning and architecture. It deals with the social and economic forces affecting the three-dimensional built environment on an urban scale. Within this area, students can choose one of two specializations: community planning and development or physical development and public policy.

Additional Areas of Concentration. In special circumstances, students may devise their own area in consultation with appropriate faculty members. Final approval of the proposed addi-

tional area of concentration must be obtained from the department chair. Further details may be obtained from the graduate adviser.

Course Requirements

Students must complete a minimum of 72 units (18 courses). Students usually take 12 units per quarter, completing the program in two years.

A minimum of 13 courses must be graduate courses (all 200-series courses except for up to four courses or 16 units of 500-series courses) in urban planning or a related field. One 496 course (four units) may be applied toward the degree. Eight units of course 496 may be applied as electives.

Core Course Requirements. The core areas comprise knowledge common to all areas of planning, regardless of one's specific focus. Six core courses are required: Urban Planning 207, 211 (or a course from the School of Law), 220A (waiver by examination), 220B, 222, and one course on urbanization covering urban problems and processes chosen from a menu of options. Course 222 may be waived with the instructor's consent if the students can demonstrate mastery of the material through previous coursework with similar concepts, instructional materials, and content. Students are expected to present the relevant course syllabi. Qualified students with background in planning history may be allowed to waive course 222 and to enroll in 210B with permission of the instructor. Urban Planning 207, 220A, and 222, which are offered in the Fall Quarter, include required workshops on writing, verbal, and graphic presentation. Students who can demonstrate mastery of graphic presentation skills through prior background in design and/or graphic communications may waive the graphics workshop by portfolio review. The writing workshop may be waived by a written examination which is administered by the writing instructor at the beginning of Fall Quarter. Students must demonstrate sufficient writing skills and mastery of professional writing techniques.

On entering the program, students must pass proficiency examinations in basic mathematics and microeconomics before enrolling in Urban Planning 220A and 207 respectively. Copies of sample examinations are mailed to applicants accepted into the program. An undergraduate course in college algebra or precalculus should provide suitable background to pass the basic mathematics examination. An undergraduate course in microeconomics should be sufficient preparation for the microeconomics examination. Students are strongly encouraged to prepare for the examinations before beginning the program so that they can take Urban Planning 207 and 220A during their first year of study. If students do not pass either or both examinations, they are advised to take Mathematics 1 and/or Economics 1, 11, or 100 at UCLA during their first year of study. (These courses do not count toward the master's degree.) Proficiency examinations need to be passed at the start of the second year in order to enroll in re-

quired courses 220A and/or 207, which are only offered in the Fall Quarter.

Area Course Requirement. Students must choose an area of concentration and select at least five courses, two of which are generally specified, from a list of courses prepared for that area. One of the required core courses on urbanization may be used to fulfill an area of concentration requirement.

Students may seek waivers for requirements that have been met through coursework prior to entering the M.A. program.

Comprehensive Examination Plan

Students must select this option by the deadline set by the department. Once a deadline has passed, students are limited to options with subsequent deadlines.

Plan A (Client-Oriented Project). A client-oriented project is recommended if students are more interested in practical application of what they have learned than in scholarly research. The time span of the final project approximates that of the thesis. Academic credit for project involvement is given through Urban Planning 205 and through course 597. Guidance of the project rests with a committee of at least one faculty committee chair, one consulting faculty, and a representative of the client. The project proposal should be ready for committee review by the end of the seventh week of Fall Quarter of the second year of study. The project must be successfully completed when it is approved by the faculty committee and delivered to the client.

As an alternative under Plan A, students may take Urban Planning 217A-217B for eight units credit, offered each year during the Winter and Spring Quarters, to fulfill the comprehensive examination requirement. The faculty members in charge of this course sequence, one supervising, one consulting, plus a representative of the client, make up the comprehensive examination committee. Students must notify the graduate counselor that they have selected this option and (in the event that more than one section is offered), they must indicate in which section of Urban Planning 217A-217B they are to enroll, by the end of the Fall Quarter of the second year of study.

Plan B (Two-Week Examination). Examinations for all areas of concentration are normally offered during the break between Winter and Spring Quarters. Each area-of-concentration faculty coordinator appoints a committee of three faculty members to cover the examination. Students may be requested to do additional work on the examination after it has been reviewed by the committee. No course credit is received for the two-week examination. Students who choose this option must notify the graduate counselor by the end of the Fall Quarter of the second year of study.

Client and comprehensive projects and two-week examinations must receive a grade of B to be of passing quality. To receive an S grade for a project graded on an S/U basis, the work

must be at the level of B. The comprehensive letter-graded project (Urban Planning 217A-217B) must receive a B average over the two terms to be of passing quality.

Thesis Plan

Students must select this option by the deadline set by the department. Once a deadline has passed, students are limited to options with subsequent deadlines.

The thesis is intended to provide the opportunity for independent scholarly research and should be the length and quality of a publishable journal article. In order to meet graduation deadlines, students must begin thesis work no later than the beginning of Fall Quarter of the second year and present a preliminary proposal to their thesis committee chair by the end of the second week of classes. The thesis committee consists of three ladder faculty and must be selected by the end of Fall Quarter of the second year. Students enroll in Urban Planning 205 for four units of academic credit for thesis preparation, and in four units of course 598.

The thesis project (course 598) must receive a grade of S to be of passing quality.

Doctoral Degree

Admission

The Department of Urban Planning admits students to the program leading to the Ph.D. in Urban Planning in the Fall Quarter only, and the application process should begin a year in advance of the quarter for which applicants are applying. Applicants who are admitted but do not enroll are not guaranteed admission at a later date.

Prospective applicants may obtain a detailed program statement and Graduate Division application by writing to the department.

A statement of purpose, letters of recommendation, grade-point averages, and relevant experience are all considered in the review process for admission. Applicants must submit transcripts from each college attended and should have a minimum grade-point average of 3.0 or B for their junior and senior years. Applicants are required to submit Graduate Record Examination (GRE) scores. The Test of English as a Foreign Language (TOEFL) is required for students whose native language is not English, unless at least two years of university-level coursework at an English-language institution have been completed. A score of 600 on the TOEFL is expected, and applicants with a score below 550 are not considered for admission. Work samples, preferably research papers and/or a copy of the master's thesis, are required of doctoral applicants. No more than two pieces of work should be submitted; samples written in a foreign language are not considered. Work samples are returned only on request. Applicants in the U.S. must enclose a self-addressed, stamped envelope.

Students admitted to the Ph.D. program must have a master's degree in planning or a closely related field. Students in the M.A. degree program in Urban Planning at UCLA should inform the graduate adviser before December 15 of their second year if they wish to be considered for the Ph.D. program for the following Fall Quarter.

A minimum grade-point average of 3.5 is required in all graduate work completed for consideration for the Ph.D. program. Employment experience in planning or a closely related field is strongly recommended.

Applicants are required to submit two statements of purpose. The first should address how past experiences have shaped the applicant's interest in planning, the applicant's personal career plans, and how a Ph.D. in planning contributes to those plans. The second statement should describe the applicant's intended area of concentration, specific areas of interest in planning, including research interests, and current plans for the dissertation.

Before acceptance into the program, two faculty members must agree to assume responsibility for guiding students in their studies.

Major Fields or Subdisciplines

See Areas of Study under the Master of Arts section.

Course Requirements

A high level of competence in a major field and in planning theory and history, as measured by coursework and doctoral examinations, is required. In addition, students must satisfy a requirement in research methods outside of coursework and are required to take Urban Planning 208 to aid in the preparation of study for the major field examination. Also highly recommended in helping to develop a dissertation research and preparing for the Oral Qualifying Examination is Urban Planning 229.

Planning Theory and History Requirement. Planning theory is concerned with the ways that philosophers and social scientists have examined the question of how scientific and technical knowledge is to be joined to practice and action, with particular emphasis on the field of urban and regional planning. Planning history looks at how planning has evolved in the U.S., Western Europe, and elsewhere in the world as a form of institutionalized practice. Students are expected to acquire an understanding of both and become familiar with the several styles and forms of planning and the major debates in the field.

Two advanced courses are required of all doctoral students during the first year and must be passed with grades of A– or better: Urban Planning 210B and 210C. Students may waive the two courses by taking a six-hour comprehensive written examination. Students who do not pass the examination must either take the courses the next time they are offered or repeat the examination (once only) after a period of no less than six months.

Students who receive less than an A– in the courses may either repeat the courses once in the following year or sit for a waiver examination once in the failed subjects (history in the case of course 210B; theory in the case of 210C).

Major Field. The major field is defined as a subject in which a student is prepared to teach two or three courses and conduct advanced research. The area should be generally recognized by academics in other planning schools and should be substantially broader than a dissertation topic.

To prepare for an individualized major field examination which tests competence in an area of planned study, students must submit for approval a plan of study to their advisory committee and to the coordinator of doctoral studies, preferably no later than the beginning of Spring Quarter of the first year. The plan must include (1) a one- to two-page description of the major field and its subspecializations; (2) a short indicative bibliography; (3) a list of suggested courses and research papers through which the student proposes to prepare for the examination; (4) a list of three courses to satisfy the research methods and outside field requirements; (5) a timetable indicating expected completion dates for all requirements and examinations; and (6) a brief statement identifying a possible dissertation research topic. Once approved, the plan is filed with the graduate adviser. The normal time for completion of the major field requirement is two academic years. The actual timing of the examination is set by agreement between the student and the advisory committee. Students may submit revised plans when necessary after consultation with their advisers and the coordinator of doctoral studies.

Research Methods Requirement. To fulfill the research methods requirement, students must complete a sequence of three methods courses beyond the introductory level with grades of B or better. All doctoral students must first demonstrate competence in statistical methods at the master's level (Urban Planning 220B or equivalent) either by completing Urban Planning 220B with a grade of B+ or better or by submitting a waiver petition with appropriate documentation.

In addition, as part of their plan of study, all students must take a preapproved set of three advanced courses in research methods. These courses, which students should begin taking in the first year in the Ph.D. program, must be closely related to the major field and must be completed with grades of B+ or better. A list of recommended courses is included in the Ph.D. handbook. Students may waive a portion of this requirement on the basis of prior work by submitting a petition with the appropriate documentation to their committee and the coordinator of graduate studies.

Outside Field Requirement. As with methods, the outside field requirement should be complementary with both the major field and with

the preparation of a detailed dissertation research proposal. Three courses are required and must be completed with grades of B+ or better. Students are encouraged to take these courses outside the Department of Urban Planning, but with approval from the advisory committee; courses in urban planning that are outside the major field can be included.

Written and Oral Qualifying Examinations

For details on the written qualifying examinations, see planning theory and history requirement and major field in the Course Requirements section above.

After successful completion of the planning theory and history, major field, and research methods requirements, students may nominate their doctoral committee. The committee (see graduate adviser for details) consists of four members, three of whom may be chosen from the advisory committee and one of whom must come from outside of the department.

The doctoral committee administers the University Oral Qualifying Examination. At this examination the students defend the dissertation proposal.

The University Oral Qualifying Examination should be taken by the end of the third year of doctoral study.

Urban Planning

Lower Division Course

88. Lower Division Seminar: Special Topics in Urban Planning. (4) Seminar, three hours; outside study, nine hours. Preparation: satisfaction of Subject A requirement. Variable topics seminar which examines specific issues or problems and ways that professionals in urban planning approach study of them. Students define, prepare, and present their own research projects with guidance of a professional school faculty member.

Upper Division Courses

CM128. Global Environment and Development: Problems and Issues. (4) (Same as Geography M128.) Lecture, three hours; discussion, one hour. Prerequisite: Geography 5. Designed for juniors/seniors. Questions of population, resource use, Third World poverty, and the environment. Analysis of global economic restructuring and its connections to changing organization of production and resulting environmental impacts. Examination of emergent local and regional coalitions for self-reliance and sustainable development. Case studies from Africa, Latin America, Asia, and the U.S. Concurrently scheduled with course C252. P/NP or letter grading.

M149. Transportation Geography. (4) (Same as Geography M149.) Study of geographical aspects of transportation, focusing on characteristics and functions of the various modes and on complexities of intra-urban transport.

C184. Looking at Los Angeles. (4) Discussion, three hours. Introduction to physical form and history of Los Angeles, with emphasis on visual observation of the city as a skill for architects and planners. Field trips throughout the city. Concurrently scheduled with course C284.

187. Planning and Designing Our Cities. (4) Introduction to urban planning and urban design, with emphasis on methods and tools used in practice. Overview of planning field; physical planning for redevelopment, for projects in expanding areas, and for new towns. Lectures (with illustrated examples), field visits, and presentation of students' own projects create framework for expanding understanding of urban planning and design process.

CM189. Environmentalism: Past, Present, and Future. (4 to 6) (Same as Geography M115.) Discussion, three hours; optional field study, five to 10 hours. Exploration of history, politics, and theories of environmental movements, dynamics of race, class, and gender in relation to environmental agendas, and potential role of environmentalism in reshaping our society. Readings, discussion, and research papers. Offered annually as a graduate research seminar and biannually as an undergraduate upper division lecture and field studies program. Concurrently scheduled with course C265. P/NP or letter grading.

M190. Human Environment: Introduction to Architecture and Urban Planning. (4) (Same as Architecture and Urban Design M190.) Lecture, three hours; outside study, nine hours. Kinds of problems that arise in creating and maintaining an environment for urban activities, and approaches and methods of architecture and urban planning in helping to cope with such problems. Complexities involved in giving expression to human needs and desires in provision of shelters and movement systems, to possibilities and limitations of technology and building forms, and to issues involved in relating the human-made to the natural environment. Students encouraged to comprehend major urban issues both as citizens and as potential technical experts.

191. Introduction to Cities and Planning. (4) Survey of urban history and evolution in the U.S., urban social theory, current growth trends, system of cities, urban economy and economic restructuring, traditional and alternative location theories, urban transportation, and residential location and segregation. P/NP or letter grading.

192. Urban Policy and Planning. (4) Examination of current urban planning and policy issues and debates, such as normative theories of good urban form, metropolitan organization and governance, economic development and growth management, edge cities, spatial mismatch hypothesis, urban poverty, racial/ethnic inequality, gender and urban structure, sustainability, and future of cities. P/NP or letter grading.

193. Special Topics in Urban Policy and Research. (4) Lecture, three hours. Examination of a particular planning/policy subfield (e.g., economic development, environmental planning, housing and community development, international planning and development, land use, or urban design) in some depth. Specific topic area rotates depending on instructor. May be repeated for credit with topic change. P/NP or letter grading.

M194. Women and the City. (4) (Same as Women's Studies M194.) Lecture, three hours. Examination of relationship between women and cities: (1) how cities have affected women's opportunities for economic and social equality, (2) women's contributions to development of U.S. cities, and (3) contemporary strategies and efforts to create urban environments that reflect women's needs and interests. P/NP or letter grading.

197. Planning for Minority Communities. (4) Lecture, three hours. Introduction to inner-city policy issues on three separate levels: (1) each student develops a comprehensive inner-city urban program using materials from Alternatives Inner-City Future Exercise, (2) each student is expected to identify value assumptions and theories of social justice implicit or explicit in alternative intervention programs, and (3) each student is expected to participate in class discussions that emphasize minority issues which affect implementation.

199. Special Studies. (2 to 8) Independent research or investigation on a selected topic to be arranged with a faculty member. May be repeated for credit.

Graduate Courses

M202A. Public Control of Land Development. (3 to 6) (Same as Law M286.) Lecture, three hours. Analysis of legal and constitutional constraints on land-use planning and development; administrative and environmental regulatory processes, including relationship between law and planning, formulating land-use legislation, zoning, subdivision controls, eminent domain, taxation, urban development, environmental law, and negotiation. Theory and doctrine applied to case studies; research project/paper and/or examination required.

M202B. Governance: State, Regional, and Local. (3 to 6) (Same as Law M285.) Lecture, three hours. Analysis of structure and function of local, regional, and state government in historical and institutional context: organization, finance, intergovernmental relations, role of judiciary, public services, lawmaking, citizen participation through initiatives and referenda, and government tort liability.

M202C. Seminar: Urban Affairs. (3 to 6) (Same as Law M526.) Seminar, two hours; two field trips. Consideration of selected aspects of housing law and policy, including current federal and state housing subsidies; remedies of housing consumers; impacts of market discrimination against children, racial minorities, and women; and local governmental laws influencing cost and supply, such as antispeculation and rent control legislation. Catalytic role of economic and community development in expansion of housing supply also considered.

205. Seminar: Master's Thesis/Comprehensive Examination. (4) Discussion, three hours. Designed for second-year M.A. students. Preparation for student thesis research and client projects. Through discussion of each other's work, participants learn how to design and implement a research/client project. Administrative issues and common implementation problems. S/U grading.

206A. Urban Data Analysis: Introduction to Geographic Information Systems. (4) Lecture, three hours; laboratory, one hour. Preparation: one graduate-level statistics course, familiarity with one of the packaged statistics programs. Principles of Geographic Information Systems (GIS) and applied techniques of using spatial data for mapping and analysis. Topics include data quality, data manipulation, spatial analysis, and information systems. Use of mapping and spatial analysis to address a planning problem. Letter grading.

206B. Urban Data Analysis: Planning Models. (4) Lecture, three hours; laboratory, one hour. Prerequisite: course 206A. Advanced course in urban data analysis which builds on course 206A. Examination of relationship between demographic and other socioeconomic processes, with emphasis on planning models. Topics include internal and international migration, crime analysis, transportation demand, and economic activity forecasting.

207. Public Resource Allocation. (4) Lecture, three hours. Preparation: passing score on microeconomics examination given first day of class. Practical use of economics in analyzing public resource allocation problems. Topics include review of marginal analysis, difference between equity and efficiency, public goods and free rider problem, environmental pricing, public service pricing, and conflicts between individual and collective rationality.

208. Seminar: Advanced Research Methods. (4) Seminar, three hours. Required of Ph.D. students in their first year. Process of developing Ph.D. plan of study in preparation for major field examination. Advanced critical analysis of research methods prominent in social sciences and field of urban planning. S/U grading.

209. Special Topics in Planning Theory. (2 to 8) Seminar, three hours. Topics in planning theory selected by faculty. May be repeated for credit.

210A. Introduction to Planning Theory. (4) Lecture, three hours. Historical introduction to major ideas and theories of planning which have influenced its development from the early 19th century to the present.

210B. Comparative History of Planning Practice. (4) Lecture, three hours. Limited to Ph.D. and advanced M.A. students. History of city planning, its critics, and profession of planning through the 19th and 20th centuries. Comparison of evolution of the field in several countries, especially English-speaking countries.

210C. Colloquium in Planning Theory. (4) Lecture, one hour; discussion, two hours. Requisite: course 210A. Limited to Ph.D. students. Introduction to some central theoretical issues of contemporary planning.

211. Law and the Quality of Urban Life. (4) Lecture, three hours. Introduction to law as an urban system, directed primarily toward those interested in intersection of law and policy: broad array of urban issues examined, as is law's role as a partial cause and cure of urban problems. Examination of law as a changing process rather than a collection of principles, so that students develop facility to interact with law and lawyers in a positive and forceful manner.

214. Ethics in Planning. (4) Examination of ethical dimensions of planning at many levels, including issues of bribery and corruption, aspects of client/sponsor and employer/employee relationships, collection, use, and release of information, and ethical aspects of administrative discretion. Ethical aspects of planning methods, concept of environmental ethics, and evolution of code of ethics in planning profession.

M215. Spatial Statistics. (4) (Same as Geography M272.) Lecture, two hours; discussion, one hour; laboratory, one hour. Specific techniques useful in analysis of spatial data and modeling of spatial distributions.

216. Introduction to Nonprofit Development. (4) Discussion, three hours. Overview of basic concepts and skills utilized in nonprofit development initiatives, especially by community-based organizations. Focus on nonprofit provision of subsidized housing, emphasizing way professionals "broker" debt and equity funding from private, governmental, and philanthropic sources. Use of client projects and negotiation exercises.

217A-217B. Comprehensive Planning Project. (4-4) Designed for second-year students. Comprehensive project brings together students of varying backgrounds and interests in joint solution of an urban planning problem. Each project spans two terms. Successful completion of project meets requirements of Comprehensive Examination Plan A of master's program.

218. Graphics and Urban Information. (4) Lecture, two hours; studio, one hour. Presentation of basic graphic methods and tools for conceptualization, analysis, and documentation of the built environment. Development of fundamental skills of graphic ideation and communication.

219. Special Topics in the Built Environment. (2 to 8) Seminar, three hours. Topics in the built environment selected by the faculty. May be repeated for credit.

220A. Quantitative Analysis in Urban Planning I. (4) Lecture, three hours. Preparation: passing score on basic mathematics proficiency examination given first day of class. Introduction to mathematical and statistical concepts and methods with applications in urban planning. Review of basic mathematical concepts fundamental to planning methods; linear and nonlinear functions focusing on growth curves and mathematics of finance; data measurement and display; descriptive statistics and probability. Introduction to use of computer as a tool in analysis of planning-related data.

220B. Quantitative Analysis in Urban Planning II. (4) Lecture, three hours. Requisite: course 220A or equivalent as demonstrated by passing score on mathematics proficiency examination given first day of course 220A. Introduction to concepts of statistical inference and modeling, with emphasis on urban planning applications. Topics include sampling, hypothesis testing, analysis of variance, correlation, and simple and multiple regression. Use of computer as a tool in statistical analysis and modeling.

221. Evaluation Methods. (4) Lecture, three hours. Requisites: courses 207, 220A. Examination of methods used to evaluate efficiency and effectiveness of government programs and investment projects. Theory and practice of evaluation, with emphasis on techniques of cost-effectiveness analysis, cost-benefit analysis, discounting, sensitivity analysis, target efficiency, fiscal audits, and evaluation design.

222. Introduction to Histories and Theories of Urban Planning. (4) Lecture, 90 minutes; discussion, 90 minutes. Exploration of planning thought and practice over time, leading authors and key issues in field of planning, traditional and insurgent histories of planning, and alternative approaches to planning for multiple and pluralistic publics. Generally taken Fall Quarter of first year of M.A. program.

223. Professional Development Seminar. (4) Seminar, 90 minutes; discussion, 90 minutes. Recommended preparation: course 222. Problems of professional practice. Development of methods which integrate theory and practice through readings and individual and collective analyses of each student's fieldwork experience. Students must be working in a field setting to enroll. Job fair is held at end of Fall Quarter to place students in field settings. Students combine course 223 with one term of course 490 or 496 to meet fieldwork requirement.

229. Special Topics in Planning Methods. (2 to 8) Seminar on topics in planning methodology selected by faculty. May be repeated for credit.

M231. Urban Housing and Community Development. (3 to 6) (Same as Law M287.) Lecture, three hours; discussion, one hour. Examination of past 40 years of federal and state programs to stem urban decline and improve housing in the U.S.; comparison and contrast of legal and policy initiatives in areas of public housing, housing segregation, mortgage subsidies, landlord/tenant law, urban renewal, and community organizing. Research paper required.

M232A. Introduction to Regional Planning: Evolution of Regional Planning Doctrines. (4) (Formerly numbered 232A.) (Same as Policy Studies M241.) Lecture, three hours. Critical and historical survey of evolution of regional planning theory and practice, with particular emphasis on relations between regional planning and developments within Western social and political philosophy. Major concepts include regions and regionalism, territorial community, and social production of space.

232B. Spatial Planning: Regional and International Development. (4) Examination of theory and practice of spatial planning at regional, national, and international scales, including evaluation of regional growth strategies, national settlement policy, growth center concepts, and normative-ideological issues involved in international development planning. Generally taken in first year.

233. Political Economy of Urbanization. (4) Introduction to basic concepts and analytical approaches of urban political economy, with major emphasis on American urban problems. Topics include historical geography of urbanization, development and transformation of urban spatial structure, suburbanization and metropolitan political fragmentation, urban fiscal crisis, and role of urban social movements.

M234. Regional Development, Urbanization, and Industrial Policy. (4) (Same as Policy Studies M242.) Lecture, three hours. Survey of theories of regional development, with special reference to "new economic geography" and its relevance for formulation of local economic development policies.

235A-235B. Urbanization and Rural Development in Third World Countries. (4-4) Lecture, 90 minutes; discussion, 90 minutes. Requisite for course 235A: course 266; for course 235B: course 235A. Questions of urbanization and planning in first term; rural development in second term. Case studies from Latin America, Africa, and Asia. Lectures, student presentations, and policy debates.

M236A. Theories of Regional Economic Development I. (4) (Formerly numbered 236A.) (Same as Policy Studies M240.) Lecture, three hours; laboratory, one hour. Introduction to theories of location of economic activity, trade, and other forms of contact between regions, process of regional growth and decline, reasons for different levels of economic development, relations between more and less developed regions.

236B. Theories of Regional Economic Development II. (4) Lecture, three hours. Requisite: course M236A. Application of theories of regional economic development, location, and trade learned in course M236A to contemporary process known as globalization. Examination of nature and effects of globalization on development, employment, and social structure, along with implications for policy.

236C. Regional World: Territorial Development in Global Economy. (4) Lecture, three hours. Requisite: course 236B. Advanced course in regional development examining changes in organization of economic systems, their geographies, and scale at which local, national, and international economies operate. Emphasis on importance of rules, information exchanges, and institutional and cognitive processes. Letter grading.

238. Advanced Seminar: Urban and Regional Development. (4) Seminar, two hours; discussion, two hours. Designed for Ph.D. students. Advanced research seminar on major issues in urban and regional development theory and/or policy. Topics usually reflect faculty research projects and change from year to year. May be repeated for credit.

239. Special Topics in Urban and Regional Development Policy. (2 to 8) Seminar, three hours. Topics in urban and regional development policy selected by faculty. May be repeated for credit.

M243. Privatization, Regulation, and Public Finance. (4) (Same as Policy Studies M293.) Lecture, three hours; outside study, nine hours. Requisite: Policy Studies 201. Evaluation of economic and political determinants of trend toward privatizing public services, and equity and efficiency outcomes of this trend as expressed through new pricing, financing, and service-level policies. Exploration of new regulatory role this trend implies for state and local governments. Letter grading.

244. Housing Markets. (4) Lecture, three hours. Ways that housing markets should but sometimes do not work in developed economies. Interaction of demand factors such as population distribution, household formation, income, and credit, as well as their particular impacts on groups of the population. Topics include filtering, housing search, segregation, pricing, production efficiency, organization of construction industry, market failure, and appropriate policy responses.

245. Urban Public Finance. (4) Lecture, three hours. Requisites: courses 207, 220A. Theory and practice of urban public finance, with emphasis on methods used to fund public infrastructure. Topics include fiscal impact analysis of real estate development, effects of taxes on land-use decisions, benefit assessments to finance neighborhood public investment, private and intergovernmental contracting as method of supplying urban public services, tax increment finance for urban redevelopment, and municipal bond market.

246. Housing in Social and Economic Development Policy. (4) Seminar, three hours. Position of housing in national and regional development strategies, with focus on policies for Third World nations. Topics include nature of housing "need," market responses, evolution of housing policy, theory of intervention, alternative policies for increasing housing supply. Numerous case studies.

247. Race, Gender, Culture, and Cities. (4) Discussion, three hours. Exploration of multicultural context of contemporary U.S. cities, with focus on changing social and spatial relations of ethnic communities and their policy implications. Topics relate the new diversity and gender with global restructuring, new urban economy, and policies of workplace, housing, schools, and governance.

M248. Law and the Poor. (4) (Same as Law M215, Policy Studies M295, and Social Welfare M290R.) Lecture, three hours. Designed for graduate students. Study of major income-maintenance programs in the U.S., with emphasis on interaction of moral attitudes toward the poor and structure and implementation of the law, policy, and administration. Current reform consensus and major reforms. Letter grading.

249. Special Topics in Social Policy and Analysis. (2 to 8) Seminar, three hours. Topics in social policy and analysis selected by faculty. May be repeated for credit.

250. Introduction to Social Policy. (4) Lecture, three hours. Analysis of demographic changes, history, needs, and ideological debates which affect development of social policy in the U.S., compared with Western Europe.

251. Planning for Multiple Publics. (4) Lecture, three hours. Exploration of planning needs of various social groups in urban settings, using existing literature and research studies to determine appropriate mechanisms of planning for multiple publics. Analysis of communities in Los Angeles metropolitan area to gain insights into practical, theoretical, and methodological problems of planning for multiple publics. Generally taken in first year.

C252. Global Environment and Development: Problems and Issues. (4) Lecture, three hours; discussion, one hour. Questions of population, resource use, Third World poverty, and the environment. Analysis of global economic restructuring and its connections to changing organization of production and resulting environmental impacts. Examination of emergent local and regional coalitions for self-reliance and sustainable development. Case studies from Africa, Latin America, Asia, and the U.S. Concurrently scheduled with course CM128. S/U or letter grading.

254. Survey Methods in Planning. (4) Lecture, three hours. Requisite: course 220B. Use of surveys in planning. Conducting of a small area survey, with emphasis on methods to obtain quality data appropriate for planning: questionnaire development, sample design, interviewing, data processing, and analysis. Presentation of survey to planners or public agencies.

256. Social Impact Analysis. (4) Lecture, three hours. Exploration of ways of assessing and determining social impacts on communities resulting from large-scale planning projects. Students develop mitigation measures to address identified adverse consequences.

M259. Advanced Real Estate Development for Planners and Architects. (4) (Same as Architecture and Urban Design M259.) Discussion, three hours. Requisite: course 216. Review of basic site planning and design, with emphasis on how development plans (including proposed design solutions) are iteratively modified to achieve economic and political feasibility. Organized as a studio to produce a buildable project, including design and finance plans, for a client. S/U or letter grading.

260A. Political Economy and the Environment. (4) Lecture, three hours. Debate about environmental policy is increasingly couched in economic terms. Environmental issues have become questions of political economy, as they influence international and domestic policy and reflect on functioning of market system. Examination of assumptions and implications of alternative approaches to political economy, as these pertain to questions of environmental policy.

260B. Politics, Institutions, and the Environment. (4) Lecture, three hours. Planners face some important dilemmas in designing institutions and policies intended to correct or prevent disruptions of the environment. Introduction to these problems, focusing on essential theoretical questions that must be addressed in attempts to control environmental problems in our society. Review of recent developments in environmental policy in light of growing environmental movements; evaluation of current approaches to environmental problems, considering their institutional forms and epistemological foundations.

261. Land-Use Control: Economic and Structural Perspectives. (4) Lecture, two hours; discussion, one hour. Requisites: courses 260A, 260B. Comparison of regulatory methods of land-use control to command or planning methods. Basics of land use as a commodity in first part: land economics, land markets. Development, historically, of a structuralist perspective on use of land in cities and regions in second part. Land-use regulation (in third part) in light of first two, to see how effective it is in steering course of land development. Regulatory approach compared with real planning.

M262A. Toxics Reduction: Science, Engineering, and Policy Issues. (4) (Same as Chemical Engineering M290U and Environmental Health Sciences M249.) Lecture, three hours. Requisites: courses 260A, 260B. Public health experts, industrial engineers, and planners are being asked to assess risks biologically active chemicals present and to take such risks into account in planning process. Examination of potential for toxics reduction and current state of government and industry activities in this area. S/U or letter grading.

262B. Urban Environmental Problems: Water Resources. (4) Lecture, three hours. Water is life and wealth in California, which has world's most extensive long-distance, interbasin water transfer system. To date, water resources planning has been devoted almost exclusively to adding facilities for water delivery. But conflicts over additional developments have basically precluded further extension of this system, despite growing pressures to increase supplies. Examination of environmental impacts, geography, use of water, and consideration of resource planning.

M262C. Pollution Prevention. (2) (Same as Environmental Health Sciences M239.) Seminar, one hour. Designed for graduate students. Series of talks by academics, policymakers, industry representatives, and public interest advocates addressing opportunities for and obstacles to adopting principles of pollution prevention, including several case studies of specific policy and industry initiatives in this area. S/U grading.

263. Natural Resource Conservation. (4) Discussion, three hours. Requisites: courses 260A, 260B. Exploration, through reading, discussion, and student presentations, of meaning of resource conservation, its desirability, and ways of achieving it. Emphasis on integrated management of public lands, though students may attend particularly to a specific resource (minerals, water, timber, wilderness).

M264. Environmental Law. (3 to 6) (Same as Law M290.) Lecture, three to three and one-half hours. Examination of the field of environmental law through analysis of various legal issues and public policy: legal consequences of public decision-making strategies and allocation of primary responsibility for various environmental decisions. Focus on air pollution and Clean Air Act as a means of illustrating policy issues underlying the field.

C265. Environmentalism: Past, Present, and Future. (4 to 6) Discussion, three hours; optional field study, five to 10 hours. Exploration of history, politics, and theories of environmental movements, dynamics of race, class, and gender in relation to environmental agendas, and potential role of environmentalism in reshaping our society. Readings, discussion, and research papers. Offered annually as a graduate research seminar and biannually as an undergraduate upper division lecture and field studies program. Concurrently scheduled with course CM189. S/U or letter grading.

266. City and Countryside in the Third World. (4) Lecture, three hours. Review of basic literature and schools of thought on development theory through analysis of impact of mercantilism, colonialism, capitalism, and socialism on various urban and rural social and economic structures in the Third World. Presentation, through evaluation of theoretical writings and case studies, of complexity and diversity of developing countries. Emphasis on linkages between policy and rural and urban impacts. Gives students important background for courses M267A, 267B, and many of the other planning courses addressing Third World issues.

M267A. Resource-Based Development Issues: First World and Third World — Environmental Issues and Processes. (4) (Formerly numbered 267A.) (Same as Geography M229.) Discussion, three hours. Recommended preparation: course 266. Some major issues associated with development of specific natural resources. Topics include nature of particular resource (or region associated with it), its previous management, involvement of the state, corporations, and local groups, and environmental and social impact of its development.

267B. Rural Development Issues. (4) Lecture, three hours. Recommended preparation: course 266. Development more thoroughly of themes raised in earlier courses. Topics may include peasantries, development and rural women, agricultural ecology, comparative land reform, agrarian revolution, and special problems of tropical development. May be repeated for credit with consent of instructor.

268. Advanced Seminar: Environmental Analysis and Policy. (4) Discussion, three hours. Generally designed for second-year M.A. and Ph.D. students. Exploration of broad issues related to environmental and resource planning. May be repeated for credit.

269. Special Topics in Environmental Analysis and Policy. (2 to 8) Seminar, three hours. Topics in environmental analysis and policy selected by faculty. May be repeated for credit.

270. Homelessness: Housing and Social Service Issues. (4) Lecture, 90 minutes; discussion, 90 minutes; one field trip. Review of current status of homelessness: who homeless are, what social services and housing are available, existing and proposed programs — appropriate architecture, management, and sources of funding. Outside speakers include providers of services to the homeless.

271. Community Economic Development. (4) (Formerly numbered 236C.) Lecture, three hours. Requisite: course 236B. Introduction to fundamentals of community economic development and neighborhood development strategies. Overview of basic approaches, important concepts, resources and language of the field, and major strategies for revitalization of low-income neighborhoods.

M272. Real Estate Development for Planners and Architects. (4) (Same as Architecture and Urban Design M272.) Lecture, two hours; workshop, two hours. Introduction to real estate development process specifically geared to students in planning, architecture, and urban design. Financial decision model, market studies, designs, loan packages, development plan, and feasibility studies. Lectures and projects integrate development process with proposed design solutions which are interactively modified to meet economic feasibility tests.

273. Site Planning. (4) Lecture, 90 minutes; laboratory, 90 minutes. Introduction to principles of site planning for urban areas.

274. Introduction to Physical Planning. (4) Lecture, 90 minutes; discussion, 90 minutes. Overview of physical planning, land use, site analysis, and surveys; general plans and community plans; environmental review; zoning and ordinances; social impacts.

275. Inner-City Housing Policies: Old and New Approaches. (4) Lecture, 90 minutes; discussion, 90 minutes. Study of federal and local housing policy as it affects inner cities, with emphasis on New York and Los Angeles. Examination of research on housing conditions and community development policies, with particular emphasis on alternatives such as resident-controlled housing; analysis of rehabilitation policies; review of new concepts and current legislative proposals.

277. Historic Preservation: Principles and Practices. (4) Lecture, 90 minutes; discussion, 90 minutes. Overview of preservation field, including history and theory, current legislation, tax incentives, preservation planning, landmark and district surveys and designations, adaptive reuse, citizen involvement, and social issues.

278. Qualitative Research Methods for Planners and Designers. (4) Lecture, 90 minutes; discussion, 90 minutes. Emphasis on conceptualizing research projects using grounded theory; relation to survey data. Techniques include content analysis, user needs analysis, participant observation, questionnaire construction, interview techniques. Projects include students' own research.

279. Seminar: Public Space. (4) Seminar, three hours. Investigation of changes in production, consumption, design, and meaning of public space and analysis of socioeconomic, political, and cultural factors that lie behind them.

M280. Environmental and Resource Economics and Policy. (4) (Same as Policy Studies CM250.) Lecture, three hours. Requisites: courses 207 and 220B, or Policy Studies 204 and 208. Survey of ways economics is used to define, analyze, and resolve problems of environmental management. Overview of analytical questions addressed by environmental economists which bear on public policies. Letter grading.

281A. Introduction to History of the Built Environment in the U.S. (4) Lecture, two hours; discussion, one hour. Open to advanced undergraduates with consent of instructor. Introduction to history of physical forms of urbanization in America; survey of economic, political, social, and aesthetic forces behind creation of built environments.

281B. Advanced Seminar: History of the Built Environment. (4) Discussion, three hours. Requisite: course 281A. Extended discussion of research methods and writing techniques suitable for advanced students working toward completion of some research on history of the built environment in the U.S.

282. Urban Design: Theories, Paradigms, Applications. (4) Lecture, three hours. Discussion and evaluation of philosophical bases, ideologies, and paradigms of urban design in last century; examination of how these are reflected on the built environment of cities.

283. History of the American Household and American Home. (4) Lecture, 90 minutes; discussion, 90 minutes. Requisite: course 281A. Introduction to history of housing design in the U.S., emphasizing changing roles of women and men from Colonial times to the present and effects of these social changes on physical form of the dwelling and settlement. Discussion of concerns of professional architects and planners, as well as activity of bankers, builders, and homemakers.

C284. Looking at Los Angeles. (4) (Formerly numbered 284.) Discussion, three hours. Introduction to physical form and history of Los Angeles, with emphasis on visual observation of the city as a skill for architects and planners. Field trips throughout the city. Concurrently scheduled with course C184.

285. Great Planning Debates: Gender. (4) Seminar, 90 minutes; discussion, 90 minutes. Seminar on substantial literature on complex relationships between gender, race, and class in urban planning. Alternative theories describe an inadequate fit between American households, housing, and services and document environmental inequities women and children face in contemporary cities. Students prepare oral seminar reports on topics such as social service provision, housing, transportation planning, economic development, and safe public spaces.

M286. Transportation, Land Use, and Urban Form. (4) (Formerly numbered 286.) (Same as Policy Studies M220.) Lecture, three hours. Historical evolution of urban form and transportation systems, intrametropolitan location theory, recent trends in urban form, spatial mismatch hypothesis, jobs/housing balance, transportation in the strong central city and polycentric city, neotraditional town planning debate, rail transit and urban form.

M287. Travel Behavior Analysis. (4) (Formerly numbered 287.) (Same as Policy Studies M221.) Lecture, three hours. Requisites: courses 207 and 220B, or Policy Studies 201 and 203. Descriptions of travel patterns in metropolitan areas, recent trends and projections into the future, overview of travel forecasting methods, trip generation, trip distribution, mode split traffic assignment, critique of traditional travel forecasting methods and new approaches to travel behavior analysis. Letter grading.

288. Transportation Planning. (4) Lecture, three hours. Examination of how planners analyze, manage, and operate transportation systems. Measuring system performance, intelligent transportation systems, transportation system demand management, parking management, freight movement and facilities, public transit evaluation and management, paratransit, bicycle and pedestrian planning, transportation for elderly and disabled.

M289. Transportation Economics, Finance, and Policy. (4) (Formerly numbered 289.) (Same as Policy Studies M222.) Lecture, three hours. Overview of transportation finance and economics; concepts of efficiency and equity in transportation finance; historical evolution of highway and transit finance; current issues in highway finance; private participation in road finance, toll roads, road costs and cost allocation, truck charges, congestion pricing; current issues in transit finance; transit fare and subsidy policies, contracting and privatization of transit services.

M290. Transportation and Environmental Issues. (4) (Formerly numbered 290.) (Same as Policy Studies M223.) Lecture, three hours. Regulatory structure linking transportation, air quality, and energy issues, chemistry of air pollution, overview of transportation-related approaches to air quality enhancement; new car tailpipe standards; vehicle inspection and maintenance issues; transportation demand management and transportation control measures; alternative fuels and electric vehicles; corporate average fuel economy and global warming issues; growth of automobile worldwide fleet; the automobile in the sustainability debate.

298. Special Topics in Emerging Planning Issues. (2 to 4) Discussion, two to three hours. Topics in newly emerging planning issues such as role of cutting edge technology, innovative policies, and experimental programs. May be repeated for credit. S/U grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

M404. Joint Planning/Architecture Studio. (4) (Same as Architecture and Urban Design M404.) Lecture, one hour; discussion, one hour; studio, four hours. Opportunity to work on joint planning/architecture project for a client. Outside speakers; field trips. Examples of past projects include Third Street Housing, Santa Monica; New American House for nontraditional households; Pico-Aliso Housing, Boyle Heights; working with resident leaders at Los Angeles City public housing developments.

M470. Introduction to Occupational and Environmental Health Education. (4) (Same as Community Health Sciences M470.) Lecture, four hours. Preparation: at least three social sciences courses. Designed to provide students with understanding of problem areas of occupational and environmental health and health education interventions which can be applied. Letter grading.

494. Supervised Independent Teaching. (2 to 8) Supervised individual teaching experience. May be repeated for credit. S/U grading.

496. Field Projects. (2 to 8) (Formerly numbered 496F.) May be repeated for credit. S/U grading.

501. Cooperative Program. (2 to 8) Preparation: consent of UCLA graduate adviser and graduate dean, and host campus instructor, department chair, and graduate dean. Used to record enrollment of UCLA students in courses taken under cooperative arrangements with USC. S/U grading.

596. Research in Planning. (2 to 8) May be repeated for credit.

597. Preparation for M.A. Comprehensive Examination or Ph.D. Qualifying Examinations. (2 to 8) May be repeated for credit. S/U grading.

598. Preparation for M.A. Thesis in Urban Planning. (2 to 8) May be repeated for credit. S/U grading.

599. Ph.D. Dissertation Research in Planning. (2 to 8) May be repeated for credit. S/U grading.

Professors

Bryan C. Ellickson, Ph.D. (*Economics*)
Eric H. Monkkonen, Ph.D. (*History*)

Assistant Professors

Brian Taylor, Ph.D. (*Urban Planning*)
Jan Reiff, Ph.D. (*History*)

Scope and Objectives

Cities are multifaceted and can usefully be explored from more than one disciplinary perspective. The undergraduate specialization in Urban Studies brings together students and faculty from the Departments of Economics, Geography, History, Political Science, Psychology, and Sociology who share an interest in the modern city. The program gives students a solid grounding in the urban perspectives and methods of at least two departments. The spe-

cialization must be taken in conjunction with a major in the social sciences.

Undergraduate Study

Urban Studies Specialization

Students may elect to combine the Urban Studies specialization with a departmental major and may petition to have the area of specialization recognized with the bachelor's degree.

The option of completing an individual major in Urban Studies is also open to qualified students. For more information on individual majors, see the College of Letters and Science section of this catalog.

Students with a departmental major should seek advising in their major department. Those interested in the individual major should consult a Letters and Science counselor.

Courses within the specialization must be taken for a letter grade. The specialization must be taken in conjunction with a major in the division of social sciences.

Preparation for the Specialization

Required: At least five of the following courses appropriate to the courses to be taken in the specialization: Economics 1, 2; Geography 4; Political Science 40; Psychology 10; Sociology 1, M18, 104 or equivalent.

Upper Division Requirements

Required: Nine upper division courses, including (1) at least three courses outside the major department selected from Anthropology 167, Economics 120, Geography 150, Psychology 168, Sociology 158; (2) a minimum of three courses selected from one of the following suites within the major department: Economics 130, 133; Geography 150, 156; History 154A through 154D; Political Science 143A, 143B, 167B; Psychology 127, 135; Sociology 132, 156, 160; (3) a minimum of three courses selected from one of the suites in item 2 in a department outside the major department; (4) internship experience in an urban governmental or community service organization.

Professor Eric H. Monkkonen (9252 Bunche Hall, 310-825-3376) is the program adviser. For further information, contact the political science undergraduate counselor in the program office.

Chairs

Jean B. deKernion, M.D. (*Fran and Ray Stark Foundation Professor of Urology*), Chair
Robert B. Smith, M.D., *Vice Chair*

Director

Mark S. Litwin, M.D., M.P.H., *Director of Medical Student Education*

Scope and Objectives

The fundamental goal of the Department of Urology is to teach medical students the general principles of diagnosis and management in diseases of the genitourinary tract. Urology encompasses a wide scope of human illness, including conditions that are congenital and acquired, pediatric and adult, male and female, malignant and benign. The department functions to acquaint students with the skills necessary to manage these conditions in the initial stages and over the long term.

Instruction spans all four years of the undergraduate medical school curriculum but is concentrated during the clinical rotations. Students spend two weeks on the urology service during the third year and may return for an additional four-week elective rotation during the fourth year. The clinical experience includes time spent in the operating room, the faculty clinics, on ward rounds, and in didactic conferences that cover general urology, urological subspecialties, uropathology, and uroradiology. Urology teaching settings include the UCLA, Harbor-UCLA, Olive View-UCLA, and West Los Angeles VA Medical Centers.

For further details on the Department of Urology and a listing of the courses offered, see the *Announcement of the UCLA School of Medicine*.

Scope and Objectives

The Women's Studies Program, established in 1975, is an interdisciplinary academic program spanning departments, disciplines, and ideologies and offering two options for study: an undergraduate major and a minor. Students wishing to focus their studies on multidisciplinary perspectives in order to create a coherent and comprehensive analysis of women and gender may elect the major. Those wishing to enhance study in a traditional discipline may elect the Women's Studies minor in addition to a major in their chosen discipline.

The program offers the singular opportunity to study the full range of human experience and arrangements of social organization from the perspectives of those whose participation has been traditionally distorted, omitted, neglected, or denied — women in their racial, class, sexual, and cultural diversity. Students develop critical reasoning and analytical skills, research and communication skills, a deep appreciation for complexities of power, asymmetries in gender relations across time, class, and cultures, and conceptual tools for social change. Emphasis on multidisciplinary and multiethnic approaches assures a broader exposure to the humanities and social sciences than is commonly available within disciplinary confines. A background in women's studies offers unique contextual validation for today's gender controversies and prepares students for a wide range of career and life choices, as well as for advanced study in traditional disciplines and the professions.

The field of women's studies has exploded over the past 30 years. It has developed a theoretical base, body of knowledge, and perspective which cannot be attained as a by-product of studying other fields. Where the study of women has been neglected or omitted, the field develops new knowledge through research and fills in gaps in the existing curriculum. Further, women's studies generates new perspectives on existing knowledge of women and gender, offers a critique of accepted beliefs and ideas, intellectually challenges existing structures of knowledge, and introduces new conceptual paradigms.

The core faculty members who teach women's studies courses come from various UCLA departments and professional schools. Many professionals within and outside the University contribute their time, expertise, and enthusiasm. A governance committee composed of the chair, faculty members, and a student representative sets program policies and curricula.

The program sponsors two student associations and assists other student groups with extracurricular programming on feminist issues. Research in women's studies is promoted in cooperation with the Center for the Study of Women.

While no formal graduate program exists at UCLA at this time, a proposal for one is in the

final stages of review for implementation in 2000. Meanwhile, graduate students are invited to use the program's resources, attend lectures and events, and participate in the feminist research seminar sponsored by the center.

Undergraduate Study

Women's Studies B.A.

The interdisciplinary major in Women's Studies may be taken alone or in conjunction with another Letters and Science major. In the case of a double major, no more than five courses may be applied toward both majors.

Admission

To be admitted to the major, students must have completed Women's Studies 10, be in good standing, and formally register with the program. They are encouraged to declare their major as early as possible and to discuss their proposed course of study with the chair or undergraduate adviser.

Students are encouraged to draw on the University's diverse resources in creating their program of study. They may pursue traditional and/or innovative subjects in fields ranging from the humanities and fine arts to the social and life sciences. In addition to courses on the women's studies approved list, students may petition to have diverse courses accepted, including courses outside the College of Letters and Science, independent studies, or field study courses.

All courses applied toward the major must be taken for a letter grade, and students must have a grade-point average of 2.0 or better in women's studies courses to receive credit for completing the program. Courses in which they receive a grade of C- or lower may not be applied toward the core requirements in the major.

Preparation for the Major

Required: Women's Studies 10. Students must also complete departmental lower division requisites, as applicable, for upper division women's studies courses in the disciplines.

The Major

The major is designed to (1) impart core concepts in theory and critical analysis, research design, and methods, (2) provide exposure to a range of feminist scholarship across disciplines, and (3) enable students to acquire a depth of knowledge within one or two disciplinary or topical fields of inquiry. To achieve this goal, the major is divided into three categories.

Required: At least 13 upper division courses as follows:

(1) Three *core* courses, including (a) one feminist theory course from Women's Studies 110A or 110B or M192, (b) course 130 or one course on the study of American ethnic minority women from the approved list of women's studies credit courses issued each term by the

program, and (c) course 197 (departmental 197 courses may not be applied).

(2) A *distribution* of at least four courses, each from a different department or discipline, selected from the approved list of women's studies courses.

(3) Six additional *concentration* courses from one or two of the disciplines in which the core and distribution courses have been taken. Students may petition for interdisciplinary or topical concentrations such as feminist theory, women of color, women's health, or lesbian studies. If two fields are selected, the ratio of the six courses may be divided 3-3 or 4-2.

Four units of Women's Studies 199 may be applied toward the concentration requirement for the major. This limit does not apply to Women's Studies 199HA-199HB.

Honors Program

The honors program is open to advanced junior and senior Women's Studies majors with a 3.0 grade-point average in women's studies courses and a minimum 3.0 overall GPA who have no outstanding Incomplete grades, and to majors who demonstrate ability to do honors work by submitting a paper to the program chair for approval. Students wishing to undertake honors in the major are advised to complete Women's Studies 197 by Spring Quarter of the junior year.

To be eligible for honors at graduation, students must successfully complete course 197 and two successive terms of independent studies (courses 199HA-199HB) with their faculty sponsor and receive a grade of B+ or better on their research paper/project. Course 199HA may be applied toward the concentration requirement; course 199HB is in addition to the minimum required concentration courses. Further information is available from the undergraduate counselor in the program office.

Women's Studies Minor

The Women's Studies minor augments study in a traditional field. Students participating in this program are required to complete both a departmental major and the Women's Studies minor.

To enter the minor, students must have an overall grade-point average of 2.0 or better and file a petition in 240 Kinsey Hall. They are encouraged to declare the minor as early as possible and to discuss their proposed course of study with the chair or undergraduate adviser.

Required Lower Division Course (four units): Women's Studies 10.

Required Upper Division Courses (28 units): One feminist theory course from Women's Studies 110A or 110B or M192, 120 or 197, and five elective courses from the approved list of women's studies courses issued each term by the program. At least three elective courses must be taken in departments other than the

major department. No more than four units of any 199 course may be applied.

All minor courses must be taken for a letter grade, with an overall grade-point average of 2.0 or better. Courses in which students receive a grade of C– or lower may not be applied toward the core requirements in the minor. Successful completion of the minor is indicated on the transcript and diploma.

Women's Studies

Lower Division Course

10. Introduction to Women's Studies: Feminist Perspectives on Women and Society. (4) Lecture, two and one-half hours; discussion, one hour. Introduction to study of women and men in society, covering comparative issues of social, political, and economic position in the workplace, family, cultural institutions; historical basis of women's subordination; the female experience; the male experience; relations between women and men; intersections of ethnicity, class, and gender; violence against women; cultural images of women and men; social roles of women and men and movements for social change.

Upper Division Courses

Core Courses

110A. Feminist Theories in Social Sciences. (4) Lecture/discussion, three hours. Requisite: course 10. Multidisciplinary explorations of theorists' attempts to describe, explain, and critique social institutions, considering impact of race, ethnicity, class, etc. Emphasis on relation of theories to change in law, work, politics, education, economics, family, religion, sexuality, etc. Applications of theories to research questions and methodologies.

110B. Feminist Theories in the Humanities. (4) Lecture/discussion, three hours. Requisite: course 10. Examination of theoretical positions on gender and women in study of literature and the arts. Analysis of ways in which women and sexuality have been represented in cultural production, considering impact of race, ethnicity, class, etc. Applications of theories to research questions and methodologies.

197. Senior Research Seminar. (4) Seminar, three hours. Requisites: courses 10, and 110A or 110B. Designed for advanced junior/senior Women's Studies majors or minors. In-depth study of a major theme in feminist research. Themes vary by instructor and term. Students pursue independent research related to course theme, with guidance from instructor, then share and critique other student works in progress. P/NP or letter grading.

Supporting Courses

M101A. Lesbian and Gay Literature before Stonewall. (4) (Same as English M101A and Lesbian, Gay, Bisexual, and Transgender Studies M101A.) Lecture, four hours. Preparation: satisfaction of English Composition requirement. Survey of lesbian and gay literature in English from earlier periods through the 1960s. Works by such authors as Walt Whitman, Oscar Wilde, Radclyffe Hall, E.M. Forster, Willa Cather, Virginia Woolf, James Baldwin, Christopher Isherwood, William S. Burroughs, John Rechy, Audre Lorde, and Edward Albee. P/NP or letter grading.

M101B. Lesbian and Gay Literature after Stonewall. (4) (Same as English M101A and Lesbian, Gay, Bisexual, and Transgender Studies M101B.) Lecture, four hours. Preparation: satisfaction of English Composition requirement. Survey of lesbian and gay literature in English since 1969, year of Stonewall Riots in New York City, commonly recognized as beginning of modern lesbian and gay culture. Works by such authors as Adrienne Rich, Jane Rule, Maureen Duffy, Brigid Brophy, Larry Kramer, Bertha Harris, Edmund White, Rita Mae Brown, Alan Hollinghurst, and Emma Donahue. P/NP or letter grading.

M104C. Diversity in Aging: Roles of Gender and Ethnicity. (4) (Same as Gerontology M104C and Social Welfare M104C.) Lecture, four hours. Exploration of complexity of variables related to diversity of the aging population and variability in aging process. Examination of gender and ethnicity within context of both physical and social aging, in a multidisciplinary perspective utilizing faculty from a variety of fields to address issues of diversity. Letter grading.

105. Topics in Women and Medicine. (4) Lecture/discussion, three hours. Examination of medical conditions of women in context of issues that impact women's health, health care, and health care providers. Discussion of basic health concepts and self-care; consideration of a women's health speciality and ways to deliver health care to women. Exploration of roles and lifestyles of female physicians. P/NP or letter grading.

M106. Imaginary Women. (4) (Same as Honors Collegium M106.) Designed for juniors/seniors. Study of four female cultural archetypes — absconding wife/mother, infanticide mother, intellectual woman, and warrior woman — as they appear in their classical and modern manifestations in European and American cultures. P/NP or letter grading.

M107A. American Women Writers. (4) (Same as English M107A.) Preparation: satisfaction of Subject A requirement. Survey of literary works by American women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by American women.

M107B. British Women Writers. (4) (Same as English M107B.) Preparation: satisfaction of Subject A requirement. Survey of literary works by British women writers, with emphasis on roles of women, portrayal of nature and society, and evolution of forms and techniques in writing by British women.

M107C. Special Topics in Women and Literature. (4) (Same as English M107C.) Preparation: satisfaction of Subject A requirement. Variable specialized studies course in women and literature, with emphasis on a period, genre, particular theme, or nonnational literary grouping.

M109. Women in Jazz. (4) (Same as Afro-American Studies M109 and Ethnomusicology M109.) Lecture, four hours; discussion, one hour. Sociocultural history of women in jazz and allied musical traditions from the 1880s to the present. Survey of women vocalists, instrumentalists, composers/arrangers, and producers and their impact on development of jazz. P/NP or letter grading.

M112. Special Topics in Women and the Arts. (4) (Same as World Arts and Cultures M112.) Lecture, three hours; outside study, nine hours. Requisite: course 10. Selected topics relating feminist theories to creation of art by women, with consideration of cultural contexts in which they work. Approach to be comparative, cross-cultural, and interdisciplinary. Consideration of artistic practice by women in relation to issues of power, representation, and access. May be repeated twice, except for credit toward women's studies major. P/NP or letter grading.

M114. Introduction to Lesbian, Gay, Bisexual, and Transgender Studies. (4) (Formerly numbered M14.) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M114.) Lecture, three hours; discussion, one hour. Introduction to history, politics, culture, and scientific study of lesbians, gay men, bisexuals, and transgendered people; examination of sexuality and gender as categories for investigation; interdisciplinary theories and research on minority sexualities and genders. P/NP or letter grading.

M115. Topics in Study of Sexual and Gender Orientation. (4) (Formerly numbered 115.) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M115.) Lecture/discussion, three hours. Requisite: course 10 or M114. Studies in arts, humanities, social sciences, and/or life sciences on aspects of sexual orientation, gender identity, and lesbian, gay, and/or bisexual issues; variable topics may include cultural representations, historical and political change, life and health experiences, and queer or transgender theories; multiethnic and cross-cultural emphases. May be repeated for credit.

M116. Sexuality and the City: Queer Los Angeles. (4) (Formerly numbered 116.) (Same as Lesbian, Gay, Bisexual, and Transgender Studies M116.) Lecture, three hours. Requisite: course M114. Investigation of history, culture, and political economy of lesbian, gay, bisexual, and transgender Los Angeles.

M119. Tristan, Isolde, and History of Heterosexuality. (4) (Same as German M119K.) Lecture, three hours; outside study, nine hours. Tristan and Isolde are among the more famous and enduring of European literary lovers, and following their tradition from Middle Ages to the present provides opportunity to consider a host of issues — from questions of genre to those of kinship, from representation of love to tyranny of gender, and history of heterosexuality. P/NP or letter grading.

120. Internship in Women's Studies. (4) Seminar, three hours; internship, eight hours. Preparation: at least two upper division women's studies courses. Requisites: courses 10, 110A or 110B. Field studies course combining seminar with field placement. Practical experience in working on women's issues and connecting these experiences to methodological and theoretical themes explored in course 110A or 110B. Letter grading.

M123. International Political Economy of Work and Gender. (4) (Same as Economics M158.) Lecture, three hours; outside study, nine hours. Requisite: Economics 1 or 5 or 100. Analysis of women's economic status in world economy by taking account of interdependencies between household and market activities and between economic systems and legal and political institutions. Introduction of alternative theoretical approaches in social sciences; presentation of empirical evidence.

125. Women and Health Care in the U.S. (4) Lecture/discussion, three hours. Requisite: course 10. Examination in depth of various ways women provide health care in both paid and unpaid capacities and of political, economic, and social factors affecting women as recipients of health care. P/NP or letter grading.

M128. Roots of Patriarchy: Ancient Goddesses and Heroines. (4) (Formerly numbered 128.) (Same as Honors Collegium M118.) Lecture, three hours; outside study, nine hours. Examination of ancient goddesses and heroines — European, Neolithic, Near Eastern, Celtic, Scandinavian, Balto-Slavic, Indo-Iranian, and Greco-Roman — using translations of ancient texts, archaeological evidence, and feminist methodology in order to discover implications of ancient patriarchy on modern society. P/NP or letter grading.

130. Women of Color in the U.S. (4) Lecture/discussion, three hours. Requisite: course 10. Exploration of experiences of African American, Asian American, Chicana, and Native American women in order to assess intersections of race, ethnicity, class, and gender. Contemporary and/or historical and/or theoretical perspectives on racism and its relation to feminism as defined by women of color.

M132A. Chicana Feminism. (4) (Same as Chicana and Chicano Studies M110.) Lecture, three hours. Requisite: course 10. Examination of theories and practices of women who identify as "Chicana feminist." Analysis of writings of Chicanas who do not identify as feminist but whose practices attend to gender inequities faced by Chicanas both within the Chicana/Chicano community and the dominant society. Attention to Anglo-European and Third World women.

M132B. Contemporary Issues among Chicanas.

(4) (Same as Chicana and Chicano Studies M154.) Requisite: course 10. Overview of conditions facing Chicanas in the U.S., including issues on family, immigration, reproduction, employment conditions. Comparative analysis with other Latinas.

M133. Chicana Lesbian Literature. **(4)** (Same as Chicana and Chicano Studies M133 and Lesbian, Gay, Bisexual, and Transgender Studies M133.) Lecture, three hours. Exploration of intersection of radical First and Third World feminist politics, lesbian sexuality and its relationship to Chicana identity, representation of lesbianism in Chicana literature, meaning of familia in Chicana lesbian lives, and impact of Chicana lesbian theory on Chicana/Chicano studies.

134. Gender, Science, and Theory. **(4)** (Formerly numbered 110C.) Requisite: course 10. Examination of differing theoretical perspectives on relation between ideologies of gender and conceptualization and practice of science and medicine. Study of relations among gender, race, class, and sexual orientation and production and legitimation of scientific knowledge. Applications of the theoretical critiques to research design, practice, and interpretation.

135. Women in Physics and Mathematics. **(4)** Examination of lives and scientific contributions of five women of the 20th century — Lise Meitner, discoverer of nuclear fission; Emmy Noether, mathematician; Maria Goeppert Mayer, discoverer of nuclear shell model; Dorothy Crowfoot Hodgkin, X-ray crystallographer and organic chemist; and Chien-Shiung Wu, nuclear physicist. P/NP or letter grading.

M136. Music and Gender. **(4)** (Same as Music History M136.) Lecture, four hours. Analysis of gender ideologies in several musical cultures; representations of gender, the body, and sexuality by both male and female musicians; contributions of women to Western art and popular musics; methods in feminist and gay/lesbian theory and criticism. Letter grading.

M137E. Work Behavior of Women and Men. **(4)** (Same as Psychology M137E.) Requisite: course 10 or Psychology 10. Designed for seniors. Examination of work behavior of women and men. Topics include antecedents of career choice, job findings, leadership, performance evaluation, discrimination and evaluation bias, job satisfaction, and interdependence of work and family roles.

M137J. Psychology of Language and Gender. **(4)** (Same as Communication Studies M124 and Psychology M137J.) Lecture, three hours. Requisite: Psychology 10. Designed for juniors/seniors. Examination of current topics at intersection of gender and language. Topics include sex differentiation in language cross-culturally; sex bias in lexicon and usage; sex differences in lexicon, syntax, phonology, and nonverbal behavior; development of sex-differentiated language in children; "women's" and "men's" language in various racial/ethnic/class/sexual preference groups; and conversational interaction.

139. Women and Art in Contemporary U.S. **(4)** Lecture/discussion, three hours. Requisite: course 10. Exploration of some significant cultural issues of contemporary American women's art movement. Representation, resistance, and critical intervention in relation to gender, race, and class. Emphasis on visual and performance arts as these reflect various perspectives of feminism.

M140. Women's Studies in French Literature. **(4)** (Same as French M140.) Lecture, three hours. Exploration of a selected aspect of the situation of women in French literature as author, character, symbol, etc. P/NP or letter grading.

M141. Women, Health, and Aging: Policy Issues. **(4)** (Same as Gerontology M141 and Health Services CM141.) Lecture, three hours; discussion, one hour. Preparation: two upper division social sciences courses, two upper division biological sciences courses. Social and economic context of older women's aging, major physical and psychological changes older women experience, delivery of health services to this population, and policies that respond to their health needs. Letter grading.

142. Maya Women and Contemporary Social Change.

(4) Seminar, three hours. Requisite: course 10. Survey of recent literature on Maya culture in Chiapas, Mexico, and Guatemala. Examination of culture change through study of women as social actors, participating in political, economic, and religious change. Letter grading.

M148. Women in Higher Education. **(4)** (Same as Education M148.) Designed for juniors/seniors. Education and career development of women in higher education. Specifically, emphasis on undergraduate and graduate women; women faculty and administrators; curricula, programs, and counseling services designed to enhance women's educational and career development, affirmative action, and other recent legislation.

M154P. Gender Systems: North American. **(4)** (Formerly numbered M154.) (Same as Anthropology M154P.) Lecture, three hours. Requisite: course 10. Designed for junior/senior social sciences majors. Comparative study of women's lives and gender systems in North American cultures from an anthropological perspective. Critical review of relevant theoretical and practical issues using ethnography, case study, and student fieldwork, internship, and presentation. P/NP or letter grading.

M154Q. Gender Systems: Global. **(4)** (Formerly numbered M154.) (Same as Anthropology M154Q.) Lecture, three hours. Requisite: course 10. Designed for junior/senior social sciences majors. Comparative study of gender systems globally from an anthropological perspective. Outline of material conditions of women's lives in the world — gender division of labor, relationship of gender to the state, and colonialism and resistance movements. P/NP or letter grading.

M155Q. Women and Social Movements. **(4)** (Formerly numbered M160.) (Same as Anthropology M155Q.) Lecture/discussion, three hours. Recommended preparation: prior women's studies or anthropology courses. Comparative studies of social movements (e.g., nationalist, socialist, liberal/reform), beginning with Russia and China and including Cuba, Algeria, Guinea-Bissau, Mozambique, Nicaragua, and Iran. Analysis of women's participation in social transformations and the centrality of gender interests. P/NP or letter grading.

M158. Women in Italian Culture. **(4)** (Same as Italian M158.) Lecture, three hours; discussion, one hour; outside study, eight hours. Examination of role of women in Italian society through history, politics, literature, film, and art. Italian majors required to read texts in Italian. P/NP or letter grading.

M162. Sociology of Gender. **(4)** (Same as Sociology M162.) Lecture, three hours; discussion, one hour. Requisite: course 10 or Sociology 1. Examination of processes by which gender is socially constructed. Topics include distinction between biological sex and sociological gender, causes and consequences of gender inequality, and recent changes in gender relations in modern industrial societies. P/NP or letter grading.

M163. Gender and Work. **(4)** (Formerly numbered M164.) (Same as Sociology M163.) Lecture, three hours. Requisite: course 10 or Sociology 1. Exploration of relationship of gender to work, concentrating on the U.S. experience but also including some comparative material. Particular emphasis on analysis of causes and consequences of job segregation by gender and of wage inequality.

M164. Politics of Reproduction. **(4)** (Same as Sociology M164.) Lecture, three hours; discussion, one hour. Title refers to intersection between politics and life cycle. Topics include social construction of gender and population, reproductive issues, politicization of mothers, motherhood, and mothering, surrogacy, and new reproductive technologies.

M165. Psychology of Gender. **(4)** (Same as Psychology M165.) Lecture, three hours. Consideration of psychological literature relevant to understanding contemporary sex differences. Topics include sex-role development and role conflict, physiological and personality differences between men and women, sex differences in intellectual abilities and achievement, and impact of gender on social interaction.

M166. Women in Socialist and Post-Socialist States.

(4) (Same as Sociology M166.) Lecture, three hours; discussion, one hour. Exploration of diverse aspects of women's lives in socialist and post-socialist states. Although transition from socialism occurs differently, gender differences are everywhere central to democratization and marketization. Discussion of ways in which state policies affect women.

M167. Contested Sexualities. **(4)** (Same as Lesbian, Gay, Bisexual, and Transgender Studies M167 and Sociology M167.) Lecture, three hours; discussion, one hour. Sociological perspectives on formation, control, and resistance of lesbian, gay, bisexual, and transgendered people. Variable topics include identity and community; age, class, gender, and racial diversity; and analysis of contemporary issues affecting contested sexualities. Letter grading.

171. Jurisprudence of Sexual Equality. **(4)** (Formerly numbered 170.) Lecture, four hours. Requisites: course 10 and one course from 110A through M110D or Political Science 10 or Philosophy 6 or 9. Exploration of models of equality described and/or advocated by legal theorists — equality of opportunity, equality of outcome, equality of respect, etc. — using specific problems of women (e.g., sexual harassment or pregnancy leave policy) for purposes of comparison and critique. P/NP or letter grading.

M172. The Afro-American Woman in the U.S. **(4)** (Same as Afro-American Studies M172 and Psychology M172.) Designed for juniors/seniors. Impact of social, psychological, political, and economic forces which impact on interpersonal relationships of Afro-American women as members of a large society and as members of their biological and ethnic group.

M173. Interracial Work, Friendship, and Love Relationships of African American Men and Women. **(4)** (Same as Afro-American Studies M175.) Seminar, three hours. Examination of factors that influence development, maintenance, and dissolution of interracial relationships of African Americans in three areas: work life, friendships, and intimate love relationships. P/NP or letter grading.

M174. Sociology of the Family. **(4)** (Same as Sociology M174.) Lecture, four hours. Theory and research dealing with the modern family, its structure, and functions, including historical changes, variant family patterns, family as an institution, and influence of contemporary society on the family. P/NP or letter grading.

M177. The Military and Society. **(4)** (Same as Sociology M177.) Lecture, three hours; discussion, one hour. Examination of the military as an organization and profession: personnel issues such as family, class, race, gender, and sexual orientation and post-modern military issues such as civil/military relations, media coverage, peacekeeping operations, and the future of war. P/NP or letter grading.

185A-185Z. Special Topics in Women's Studies. **(4 each)** Preparation: one prior women's studies course. Designed for juniors/seniors. Specialized or advanced study in an area within women's studies.

M186. Voices of Women in Scandinavian Literature. **(4)** (Same as Scandinavian CM186.) Discussion, three hours. Requisite: Scandinavian 5 or 15 or 25. Knowledge of a Scandinavian language not required for nonmajors. Readings and discussion of writings by Scandinavian women writers analyzed in historical, theoretical, sociological, critical, and comparative contexts. P/NP or letter grading.

M187. Violence against Women. **(4)** (Same as Social Welfare M108.) Lecture, three hours. Requisites: courses 10, 110A. Factual information and theoretical analyses regarding various forms of violence against women and girls in their homes, workplaces, and communities through critical examination of social structures and social science research.

188. Women and Economic Development. **(4)** Lecture, three hours. Requisite: course 10. Examination of effects of economic development on women, with primary focus on Third World and transition economies of Eastern Europe and former Soviet Union, including roles of women in policy and practice, disparate effects by economic sector, and socioeconomic groups. Letter grading.

M192. Philosophical Analysis of Issues in Feminist Theory. (4) (Formerly numbered M110D.) (Same as Philosophy M192.) Lecture, three hours. Prerequisite for Women's Studies majors: course 10; for other students: one philosophy course. Examination in depth of different theoretical positions on gender and women as they have been applied to study of philosophy. Emphasis on theoretical contributions made by the new scholarship on women in philosophy. Critical study of concepts and principles which arise in discussion of women's rights and liberation. Philosophical approach to feminist theories. May be repeated for credit with consent of instructor.

M194. Women and the City. (4) (Same as Urban Planning M194.) Lecture, three hours. Examination of relationship between women and cities: (1) how cities have affected women's opportunities for economic and social equality, (2) women's contributions to development of U.S. cities, and (3) contemporary strategies and efforts to create urban environments that reflect women's needs and interests. P/NP or letter grading.

199. Special Studies in Women's Studies. (4) Preparation: at least two upper division women's studies courses, minimum 3.0 grade-point average. Directed program of independent readings and/or research on a specific topic within women's studies. No more than four units may be applied toward Women's Studies major or minor.

199HA-199HB. Directed Studies for Honors. (4-4) Preparation: 3.0 grade-point average overall, 3.0 grade-point average in major. Prerequisite: course 197. Limited to women's studies honors program students. Two-term sequence to research and write honors thesis under direction of faculty sponsor. In Progress grading.

Scope and Objectives

The mission of the Department of World Arts and Cultures (WAC) centers on the creation, critical analysis, and contextualization of arts practice throughout the world, with particular reference to the diverse populations of the U.S. The program reflects an approach that advocates the inclusion and integration of performance practice, studies in cultural and performance theory, and the real-world application of both forms of knowledge. It offers an environment for interdisciplinary inquiry that responds to the challenges facing our pluralistic society. Within this context, both practical and theoretical studies in dance and interdisciplinary artistic and expressive performance practices are major emphases.

The undergraduate program offers concentrations in dance and cultural studies, as well as the more flexible integrated and honors options. The graduate program offers a Master of Arts in Dance, a Master of Arts in Dance/Movement Therapy (admission currently suspended), and a Master of Fine Arts in Dance. Students are encouraged to explore relationships among the different curricular emphases, including ethnology, history and criticism, movement studies, education, and therapy, as a means to tailor a particular course of study to their professional goals.

Students in world arts and cultures at UCLA study with faculty members of international standing engaged in both creative artistic work and research. Students from this unique department have gone on to pursue advanced degrees and/or careers in dance- and humanities-based fields, arts management or practice, education, cultural policy, community outreach, architecture and urban planning, law, public service, and many others.

Undergraduate Study

World Arts and Cultures B.A.

The World Arts and Cultures major leads to the Bachelor of Arts degree and is designed to offer choice and flexibility while maintaining balance and rigor. Courses may be taken in three

different categories — performance, theoretical, and applied. Performance courses include the study of movement, art making, and aesthetic expression. Theoretical courses consider critical analysis, history, and theory as means for the contextualization of creative products and processes. Applied courses address the utilization of artistic practices in alternative formats and real-world situations. Courses from each of these categories are configured into the following concentrations, one of which students declare by the end of their sophomore year.

The *dance concentration* offers courses in a wide range of idioms from throughout the world, including studies in modern dance and ballet. Opportunities for performance, production, and movement studies, as well as dance history, kinesiology, and performance criticism and philosophy, are further options in this concentration. Multimedia forms of expression integrating music, theater, visual arts, film, and other technologies along with hybrid forms of cultural expression utilizing both emerging and classically based vocabularies are encouraged.

The *cultural studies concentration* allows students to select from a range of courses offered within the department, as well as in anthropology, art history, ethnomusicology, folklore and mythology, film, music, and theater. Students may also consider courses from ethnic and area studies programs and may organize their course of study in relation to particular interests or professional goals (e.g., international comparative studies, intercultural studies, area specializations such as Africa, Asia, or Latin America, minority discourse, gender or women's studies).

The *integrated studies concentration* offers an opportunity for students to select an equal number of units from each of the three categories of course listings — performance, theoretical, and applied. Opportunities for hands-on experience through internships, apprenticeships, and field studies, as well as the opportunity to develop skills in media technology, are emphasized in this concentration.

The *honors concentration* is intended for exceptional students who have a minimum UCLA 3.5 grade-point average. Students can select their own program of study in close consultation with faculty. They develop a rationale outlining the objectives of their study, a self-assessment of their needs for the future, a proposed list of courses, some indication of their senior project, and a title for the course of study. This proposal is submitted to the student affairs officer and the faculty at the end of the sophomore year. After approval, students are assigned a faculty adviser for their junior and senior years. This structure allows them to focus on personal educational objectives.

Students who wish to confer with the departmental counselor regarding program planning and major requirements should contact Wendy

Temple, Student Affairs Officer, at (310) 825-8537.

Admission

New students are admitted to the major for Fall Quarter only. All applicants are reviewed individually, based on a questionnaire, transcripts, two letters of recommendation, and a personal essay. These materials are requested from students in mid-December, after the general UC application is received and processed, and are due back in the department in January. For freshman applicants, college placement test scores are also considered. Students interested in the dance concentration must participate in a January audition.

Current UCLA students who petition to change their major are required to meet with the student affairs officer prior to application. They are advised to take world arts and cultures courses during the term in which they apply to the program. They must have a minimum 3.0 overall grade-point average and no more than 120 quarter units. Students interested in the dance concentration must participate in the January audition.

The Major

The major includes a core of 32 units introducing the diverse forms of artistic practice, one of four concentrations (see above) consisting of 48 units, and an eight-unit senior project.

The following courses are required:

(1) A core of nine courses (32 units): World Arts and Cultures 12, 20, 80A-80B, 80C, 134, 140A or 140B, Design 182, and Anthropology 9 or 33.

(2) A concentration of 48 units (see specific course listings below) as follows:

Dance Concentration: 32 units from group A, eight units from group B, eight units from group C

Cultural Studies Concentration: eight units from group A, 32 units from group B, eight units from group C

Integrated Studies Concentration: 16 units from group A, 16 units from group B, 16 units from group C

Honors Concentration: 48 units of coursework to be approved by the department faculty; a minimum 3.5 UCLA grade-point average is required. Proposals are to be submitted to the department faculty at the end of the sophomore year.

Group A: Performance Courses

Ethnomusicology 91A through 91Z, Theater 12, 15, 50, 130A, 138 (by petition), 150, World Arts and Cultures 1C, 5, 7A, 7B, 7C, 70, 71B through 79, 101A, 101B, 101C, C102A, C102B, C102C, 103, 105, C107, 115, 130 (by petition), 140C, 149, C171B through C179, 191, 192.

Group B: Theoretical Courses

Anthropology 9 or 33 (if not used to satisfy the core requirement), 34, 114Q, 114R, 130,

133R, 135A, 135B, 141, 144, M145, 146, 150, 151, 152, M154P, M154Q, 161, M164, 165, 167, 171, 172R, 173Q, 175R, 175T, 175U, Art History 50, 51, 54, 55A, 55B, 56A, 56B, 57, 104A, 104B, 110G, 114A, 114C through 114F, C115D, C115E, C115F, C117A, C117B, C117C, 118A, 118D, Ethnomusicology 106A, 106B, 106C, M108A, 108B, M110A, M110B, M111, M115, 120A, 120B, M126, 128, 136A, 136B, 147, 156A, 156B, 160A, 160B, 174, M180, 181, Film and Television 106C, 112, 128, Folklore and Mythology 101, C105, CM106, C107, 108, 118, M122, M127, 130, 131, CM132, M142, M149, M150, M154A, M154B, M155, 163, C165, M170, 172, C175, M180, M181, CM182, M183, CM184, 190, German 120, Music 158, Music History 130, 135A, 135B, 135C, Theater 11, 13, 101A, 101B, 101C, 102A, 102B, 102C, 102E, M103A through 103F, 104A, 104B, 104C, 106, 107, 111A, 111B, 111C, World Arts and Cultures 40, M103D, M103H, M112, 128, 130 (by petition), 132A, 135, 141A, 146, 150, M152, C161A, 163, C164, 165A, 165B, M167, 181A through 181D, 182, 183, CM184, C187.

Group C: Applied Courses

Anthropology 118B, M136Q, 143, Ethnomusicology 10A, 10B, 10C, Folklore and Mythology C145, Music 1A, 1B, 4A, 4B, 4C, 20A, 20B, 20C, 23, 105, Theater 174A, World Arts and Cultures 23L, 48, 50, 110, C120, 122, 123A, 123B, 125, 126, C127, 130 (by petition), 141, 142, 144, 145, 148, 151A, 151B, 153, C160A, C160B, C160C, M166A/M166AL, M166B/M166BL, M166C/M166CL, C180A, C180B.

(3) World Arts and Cultures 190A-190B (eight units total). These courses are the culmination of the major and have three possible areas of focus — performance, applied research, or cultural studies research — as follows: (a) the performance project is a creative project leading to the production and public performance of original or traditional work; (b) the applied research focus implies an application of knowledge in a hands-on situation and includes projects in and with the community or campus; (c) the cultural studies focus involves students in independent ethnographic research in some aspect of the arts. The subject of study can be found in, but is not restricted to, the Los Angeles community. Field study includes the use of video, slides, and sound recordings.

Graduate Study

The following constitutes introductory information regarding graduate degree programs and is based on the 1998-99 edition of *Program Requirements for UCLA Graduate Degrees*. Complete, annual editions of *Program Requirements* are available (listed under "Publications") on the Graduate Division website at <http://www.gdnet.ucla.edu>. Students are subject to the degree requirements as published in *Program Requirements* for the year in which they matriculate.

Master's Degrees

The Department of World Arts and Cultures offers the following master's degrees: Master of Arts (M.A.) degree in Dance, Master of Arts degree in Dance/Movement Therapy, and Master of Fine Arts (M.F.A.) degree in Dance.

Admission

The program in dance/movement therapy is not accepting applications for 1999-00.

Master of Arts

For the M.A. degree in Dance or in Dance/Movement Therapy, a baccalaureate degree with an undergraduate major in dance or equivalent experience is required. Some of this experience may have been gained outside the academic setting through such avenues as dance studios or dance performance. Prospective students may contact the UCLA Department of World Arts and Cultures for a brochure which gives additional information on the overall graduate program and specific curriculum for the stated area of specialization.

In addition to the application for admission, the department has its own screening procedure: three letters of recommendation, an audition, and a personal interview. The audition evaluates applicants' creative potential and technical proficiency with consideration toward applicants' primary focus.

Admission to the dance/movement therapy program requires one undergraduate course in abnormal psychology in addition to the requirements listed above.

Master of Fine Arts

M.F.A. applicants must demonstrate exceptional promise in either choreography or performance. Auditioners in choreography show three original works; auditioners in performance present three selections already in their repertory. Applicants are required to prepare a statement (no more than one page) describing the works shown.

Areas of Study

The M.A. degree in Dance is designed for students preparing to continue professionally as researchers and teachers. The M.A. program in Dance/Movement Therapy is approved by the American Dance Therapy Association (ADTA). The M.F.A. degree is designed for students preparing to continue professionally as choreographers and/or performers.

Unique interests in areas such as dance ethnology, education, history, philosophy and criticism, dance kinesiology, dance production, dance and media, computer-aided dance studies, and music for dance may be pursued on advisement.

Course Requirements

Course requirements, beyond the basic requirements previously outlined, vary for each program and are determined under the direction of faculty advisers.

M.A. in Dance

Thirty-six units are required, including nine courses (or more depending on the specialization chosen), distributed as follows: (1) World Arts and Cultures 230; (2) four courses (16 units) in the department at the graduate level (200 series); (3) four courses (16 units) in or outside the department at the upper division or graduate level. These may not be courses taken to fulfill prerequisites nor studio technique courses. Eight units of 500-series courses (World Arts and Cultures 596A, 596R, 598) may be applied toward the total course requirement; four units may be applied toward the minimum graduate course requirement. Specific concentrations within the M.A. may be designed under the direction of faculty advisers.

M.A. in Dance/Movement Therapy

A total of 66 units is required distributed as follows: (1) World Arts and Cultures 230; (2) 46 units in the department at the graduate level (200 series); (3) 16 units in or outside the department at the upper division or graduate level. These may not be technique courses nor courses taken to fulfill prerequisites. A total of 18 units of 500-series courses (World Arts and Cultures 596A, 596R, 598) may be applied toward the total course requirement; eight units may be applied toward the minimum graduate course requirement.

These course requirements are to be partially fulfilled by World Arts and Cultures 225A-225B, C260A-C260B-C260C, C261A, 261B, 261C, 262A-262B-262C, 460A-460B-460C, 596A, 596R.

While an undergraduate course in abnormal psychology is a requisite for the M.A., other courses in psychology (developmental, personality, and group dynamics) are highly recommended.

The program in dance/movement therapy requires an intensive experience in a therapeutic setting during the second year. The internship provides an orientation to the hospital clinical setting and experience as a movement therapist.

M.F.A. in Dance

A total of 72 units is required, distributed as follows: (1) 20 units of choreographic/performance training, including at least 12 units from World Arts and Cultures 211A through 211D and at least eight units from courses 192 and/or 490; (2) 12 units of studio technique courses at the 400 level; (3) 12 units of production courses from World Arts and Cultures 142, 145, 221, C227, 240B, 240C, 240D; (4) eight units of movement studies from World Arts and Cultures 122, 225A, 225B; (5) eight units of cultural/critical studies from World Arts and Cultures 181A through 181D, 182, 183, 230, 232, 235, 236, 240A, 280A, 280B, CM284, C287; (6) eight units of education, internship, field studies, and practicum studies from World Arts and Cultures 151A, 151B, 153, 191, 251A, 251B, 251C, C261A, 261B, 261C, 262A, 262B, 262C, 400, 441, 452, 498; (7) four units of

elective coursework. Only four units of 500-level courses may be applied toward the degree. Students must enroll in a studio technique class every quarter except during an internship or the final concert/production. The required 72 units for the degree must include a minimum of 32 units of coursework at the graduate (200 and 400) level. The four units of coursework at the 500 level may be applied toward the overall unit total. Required courses are individually designed through advisement with the faculty academic adviser.

Students are expected to choose choreography or performance as their M.F.A. focus.

Comprehensive Examination Plan

Master of Arts

During the first year students in dance or dance/movement therapy who decide to take the comprehensive examination option write a proposal stating why this option is most suitable to their M.A. program. There are specific steps to the proposal presentation and approval process. Guidelines may be obtained from the department.

After completing coursework, passing the presentation, and nominating the comprehensive examination committee, students may file the advancement to candidacy petition. Students are allowed one year after advancement to candidacy to complete their comprehensive examination.

Examining committee members grade each question (1) pass with honors, (2) pass, (3) pass minus, or (4) fail. In order to pass, each question must be graded pass or better by two out of three committee members. If the questions are failed, the examination may be retaken once only during the next scheduled examination period.

Master of Fine Arts

For M.F.A. students, the preliminary examination consists of a written proposal submitted to a faculty panel and a presentation of proposed works. The written proposal includes fundamental concepts, objectives for the concert material, and production plans.

After passing the preliminary examination, a three-member M.F.A. comprehensive examination committee is selected to advise students in developing the final concert material. Obtain specific guidelines for nominating the comprehensive examination committee from the department. Students may advance to candidacy when the coursework toward the degree is completed and the presentation is passed. Students are allowed one year after advancement to candidacy to complete their M.F.A. comprehensive examination. Choreographers and performers prepare a major concert in the third year, or a series of concerts in the second and third years. An oral defense of the concert material is held with the M.F.A. comprehensive examination committee and production staff.

A written production book with visual materials and a concept paper are completed after the performance. Obtain specific guidelines from the department.

Thesis Plan

Master of Arts

During the first year M.A. students in dance or dance/movement therapy who decide to take the thesis option discuss potential thesis topics with faculty members. They prepare a written proposal which is presented to a faculty panel. After the thesis proposal is approved by the faculty panel, a three-member thesis committee is formed. There are specific steps to the proposal presentation and approval process. These guidelines may be obtained from the department.

After completing coursework, passing the presentation, and selecting the thesis committee, students may file the advancement to candidacy petition. Students are allowed one year after advancement to candidacy to file the thesis.

World Arts and Cultures

Lower Division Courses

1A-1B. Fundamentals of Modern Dance. (2-2) Laboratory, four hours. Designed for nondance majors. Courses should be taken in sequence. Study of dance technique, improvisation, and choreography. Critical viewing, reading, and discussion of modern dance artists' works. Each course may be repeated once. P/NP or letter grading.

1C. Fundamentals of Modern Dance. (2) Laboratory, four hours. Study of dance technique and improvisation. Critical viewing, reading, and discussion of modern dance artists' works. May be repeated twice. P/NP or letter grading.

5. Creative Process: Developing Imagination and Craft. (2) Lecture, one hour; laboratory, three hours. Introduction to creative exploration in movement through improvisational and compositional exercises that access and develop the imagination, find relationship between imagination and dance making, and enrich movement vocabulary. May be repeated once. P/NP or letter grading.

6. Fundamentals of Ballet. (2) Laboratory, four hours. Study of ballet techniques and principles, including dance terminology. May be repeated twice; only two units may be applied toward the major. P/NP or letter grading.

7A-7B-7C. Beginning Ballet. (2-2-2) Laboratory, four hours. Limited to World Arts and Cultures majors. Study of beginning ballet techniques and principles, including dance terminology. Only two units may be applied toward the major. P/NP or letter grading.

10. Introduction to Dance. (2) Introduction to the many and varied theoretical aspects of dance as a discipline.

12. Integrated Arts. (Formerly numbered 100.) Lecture, three hours. Limited to World Arts and Cultures majors. Introduction to concepts and theories which integrate and underlie the multidisciplinary World Arts and Cultures major.

20. Fundamentals of Music: Sounds and Systems. (4) Lecture, three hours; laboratory, one hour. Study of basic musical concepts through movement, with introductory survey of major world music/dance systems. P/NP or letter grading.

23L. Laboratory in Conditioning for Dancers. (2) Laboratory, four hours. Specific conditioning principles applied to strengthening, stretching, and endurance training. Personalized attention enables students to increase their ability to dance more efficiently and to prevent dance injuries. May be repeated twice. P/NP grading.

25. Introduction to Dance/Movement Notation. (2) Lecture, two hours; laboratory, one hour. Beginning skills in observing, analyzing, reconstructing, and recording dance/movement based on principles of the labanotation and labananalysis systems.

40. Introduction to Dance Theater. (2) Lecture, two hours; laboratory, two hours. Introduction to practical and aesthetic perspectives on theater space, as well as basic aspects of scene, lighting, costume, and sound design technology for dance production.

48. Laboratory in Dance Production. (1) Laboratory, two hours. Realization of concepts of lighting, sound, costume, scene design, and stage practices in departmental dance productions. Must be repeated once in another year. P/NP grading.

50. World Arts Forum. (1) Lecture, 90 minutes. Introduction to various arts resources on campus. Presentations by curators, artistic directors, performers, scholars, national leaders in the arts, international guests. Specific presentations vary from term to term. May be repeated for a maximum of four units. P/NP grading.

70. Survey of Dancing in Selected Cultures. (2) Studio, three hours. Introduction to dances and their movement characteristics in Western and non-Western cultures.

71B. Dance of Indonesia. (2) Studio, three hours. Dance experience not required. Introduction to technique and repertory of dance traditions (e.g., Java, Bali, Sunda).

71C. Dance of Japan. (2) Studio, three hours. Dance experience not required. Technique and repertory from the court dance tradition (e.g., Gagaku).

71D. Dance of India. (2) Studio, three hours. Dance experience not required. Introduction to dance in India, with emphasis on a particular tradition (e.g., Bharata Natyam).

71E. Dance of Korea. (2) Studio, three hours. Dance experience not required. Technique and repertoire of a selected dance tradition (e.g., Korean classical and folk).

72B. Dance of West Africa. (2) Studio, three hours. Dance experience not required. Introduction to technique and repertory of a selected region (e.g., Ghana, Guinea, Nigeria).

73B. Dance of Mexico. (2) Studio, three hours. Dance experience not required. Introduction to forms and styles in dances of several ethnographic regions. Emphasis on identifying dance characteristics through actual dancing.

74C. Dance of Spain. (2) Studio, three hours. Dance experience not required. Technique and repertory of dances from selected ethnographic regions.

74D. Dance of Anglo- and Celtic-American Tradition. (2) Laboratory, four hours. Introduction to technique and repertory of vernacular dance traditions of the British Isles and their derivatives in North America. P/NP or letter grading.

76B. Dance of Israel. (2) Studio, three hours. Dance experience not required. Technique and repertory from selected ethnographic regions.

79. Dance of a Selected Culture. (2) Studio, four hours. Introduction to selected dance forms from a culture area or historical period or of a particular dance genre. May be repeated for a maximum of 20 units. P/NP or letter grading.

80A-80B. Movement as Cultural Behavior. (2-2) Studio, three hours. Limited to World Arts and Cultures majors. Studio/laboratory examination of individual and cultural factors which affect expressive movement in cultures. Experimental classes which enhance kinesthetic and movement awareness of self and others through cultural perspective.

80C. Fundamentals of Movement. (4) Lecture, three hours; laboratory, two hours. Introduction to dance/movement principles and concepts, with primary emphasis on developing skills for understanding and analysis of art of moving. Techniques from Laban movement analysis work to be used to increase body instrument's effectiveness as a source of knowledge.

Upper Division Courses

101A-101B-101C. Intermediate Modern Dance Technique. (2-2-2) Lecture, two hours; laboratory, two hours. Technique levels II and III. Emphasis on increasing technical skill. Each course may be repeated once.

C102A-C102B-C102C. Advanced Modern Dance Technique. (2-2-2) Laboratory, four and one-half hours. Requisite: course 101C. Technique levels IV and V. Studies in advanced modern dance technique, with emphasis on performing skills. Each course may be repeated for a maximum of six units. Concurrently scheduled with courses C402A-C402B-C402C. P/NP or letter grading.

103. Improvisation in Dance. (2) Studio, four hours. Designed for World Arts and Cultures majors. Development of aesthetic perspective through use of imagery, sound, and other art. Concentration and projection. May be repeated twice.

M103D. Contemporary Chicano Theater: Beginning of Chicano Theater Movement. (4) (Same as Chicana and Chicano Studies M103D and Theater M103D.) Analysis and discussion of historical and political events from 1965 to 1980, as well as theatrical traditions which led to emergence of Chicano theater.

M103H. Contemporary Chicano Theater: Chicano Theater since 1980. (4) (Same as Chicana and Chicano Studies M103H and Theater M103H.) Requisite: course M103D. Analysis and discussion of Chicano theater since 1980, including discussion of Chicana playwrights, magic realism, Chicano comedy, and Chicano performance art.

105. Form and Motion in Choreography. (2) (Formerly numbered 114.) Lecture, one hour; laboratory, three hours. Requisite: course 5. Study of processes derived from a Western theatrical tradition by which movement is generated with specific consideration toward shaping/forming of movement materials. May be repeated twice for credit. P/NP or letter grading.

C107. Workshop in Ballet. (2) (Formerly numbered C107A-C107B-C107C.) Lecture, one hour; studio, five hours. Requisites: courses 7A-7B-7C. Use of forms of ballet at intermediate to advanced levels, structured to integrate a somatic learning process of uncovering habitual choices in order to free personal movement habits. Examination and practice of theoretical elements of ballet, basic components of coordination, and technical training combined with expressivity. May be repeated for a maximum of 24 units. Concurrently scheduled with course C407. P/NP or letter grading.

CM109. African Religion in the Diaspora. (4) (Same as Folklore CM109.) Lecture, three hours. Designed for juniors/seniors and graduate students. Ethnography of diaspora African religions, including voodoo, Santeria, and Candomble. Lectures, readings, and video material focus on performance of ritual and its expression in religious art. Concurrently scheduled with course CM209.

110. Field Studies in World Arts and Cultures. (2 to 4) (Formerly numbered 120.) Seminar, two to four hours; fieldwork in community settings, eight to 12 hours. Field studies in the arts. Seminars, guest speakers, and field trips provide theory and methodology related to ethnographic research and/or internship placements. Projects emphasize ethnic communities or international arts organizations. May be taken for a maximum of eight units. P/NP or letter grading.

M112. Special Topics in Women and the Arts. (4) (Same as Women's Studies M112.) Lecture, three hours; outside study, nine hours. Selected topics relating feminist theories to creation of art by women, with consideration of cultural contexts in which they work. Approach to be comparative, cross-cultural, and interdisciplinary. Consideration of artistic practice by women in relation to issues of power, representation, and access. May be repeated twice, except for credit toward women's studies major. P/NP or letter grading.

115. Topics in Choreography. (3) Lecture, two hours; laboratory, four hours. Requisite: course 5 or 103 or 105. Directed exploration in composition, with focus on developing theme-based choreographic works that are informed by theoretical engagement with selected topic through lectures, readings, and discussion. Thematic topics include contemporary issues and concerns such as image, essence, and abstraction; home, history, and memory; interculturalism; constructing identity. May be repeated for a maximum of 12 units. P/NP or letter grading.

C120. Music as Dance Accompaniment. (4) Requisite: course 20. Piano and percussion improvisation for dance. Choreographer/composer relationships. History of music for dance, with emphasis on contemporary trends. Music for dance performance. May be concurrently scheduled with course C220.

122. Movement Theories: Variable Topics. (2) Lecture, two hours; laboratory, two hours. Study of motor coordination patterns as related to expressive movement features for dance performance. Personalized attention and use of video to increase students' stylistic diversity. Development of movement efficiency for prevention of dance injuries. May be repeated twice. P/NP or letter grading.

123A. Anatomy for the Dancer. (4) Study of human muscular-skeletal system as related to dance.

123B. Principles of Conditioning and Correctives for Dance. (4) Requisite: course 123A. Study of biological and physical principles of human movement as related to dance. Prevention and care of dance injuries.

123C. Projects in Dance Kinesiology. (4) Requisite: course 123B. In-depth study of selected topics introduced in courses 123A and 123B.

125. Principles of Movement Analysis: Labananalysis. (4) Lecture, two hours; laboratory, two hours. Requisite: course 25. Basic principles of labananalysis. Emphasis on experiential understanding of movement through study of motion factors and elementary concepts of spatial dynamics. Focus on qualitative area of movement to further comprehension of dance as a creative art form.

126. Principles of Movement Analysis: Labanotation. (4) Lecture, two hours; laboratory, two hours. Requisite: course 25. Developing skills in reading, writing, reconstructing, and score preparation of complex movement.

C127. Video Production for Performance and Research in Traditional and Performing Arts. (4) Lecture, one hour; laboratory, three hours. Fundamentals of video production: conceptualization, field recording (camera, lighting, sound, coverage), and editing (organizing raw footage, constructing a program, mastering finished tape). Emphasis alternates quarterly between ethnographic documentary and dance/choreography. May be repeated once for credit. Concurrently scheduled with course C227.

128. Dance and the Visual Media. (4) Examination of aesthetic differences between dance, film, and video and exploration of the new aesthetic when they are combined. Analysis of the record and documentary dance film, choreo-cinema, and impact of MTV, as well as integration of media with performance.

130. Selected Topics in World Arts and Cultures. (4) Lecture, three hours. Designed for juniors/seniors. Selected topics dealing with arts and cultures through disciplines of anthropology, art history, dance, folklore and mythology, music, and theater, and additional multidisciplinary cross-cultural areas. Consult *Schedule of Classes* for topics to be offered in a specific term. May be repeated twice for credit. P/NP or letter grading.

132A-C132B. Philosophical Bases and Trends in Dance (4-2). Course 132A is requisite to C132B. Critical analysis of dance as a creative experience and role of professional and educational dance in our society. Study of present-day concepts and their relationships to other art forms and cultures. Course C132B is concurrently scheduled with course C231B.

134. History of Dance in Culture and Performance. (4) Lecture, two hours; discussion, one hour; laboratory, one hour. Study of dance in historical and cultural context, its function in society and its relationship to contemporary artistic expression. Focus on topics from traditional and recent research in world dance. P/NP or letter grading.

135. Dance in the U.S. (4) Lecture, two hours; discussion, one hour; laboratory, one hour. Designed for juniors/seniors. Study of dance expression in the U.S., including concert modern dance and ballet, popular idioms, and video dance. Special attention to influences from Native America, Asia, Africa, and Europe. P/NP or letter grading.

140A. Art as Social Action. (4) Designed for juniors/seniors. Discussion of what constitutes an artist's social responsibility and in what ways art is qualified to engage in direct political action. Study of tension between the powers of this world and the powers of art. P/NP or letter grading.

140B. Art as Moral Action. (4) Designed for juniors/seniors. One's ability to distinguish between right and wrong action is culturally intuited, nurtured, and developed. Study of cultural strategies of moral engagement, persuasion, and inquiry in personal and public life, including acts of conscience and civil disobedience. P/NP or letter grading.

140C. Seminar: Intercultural and Interdisciplinary Performance. (4) Designed for juniors/seniors. Recent discussions of multiculturalism have demanded a broader base of cultural literacy for society in general and from artists in particular. Moving beyond stereotyping and formalism, focus on areas of overlap and exchange, collaborations, collective creation, hybridization, and evolving possibilities of video and extended media. May be repeated once for credit. P/NP or letter grading.

141. Lighting Design for Dance Theater. (4) Lecture, four hours; laboratory, two hours. Lighting for dance: examination of aesthetics, principles, and technical elements. Application to selected choreographies to be publicly performed.

141A. The City as a Work of Art. (4) Lecture, three hours. Designed for juniors/seniors. Interdisciplinary approach to complex physical, emotional, psychological, and spiritual dynamics that create and sustain urban life, with emphasis on artist's role in shaping the spaces which affect people's lives. Discussion of religious and social aspirations as expressed in music, poetry, dance, and visual arts, as well as architecture and city planning. P/NP or letter grading.

142. Advanced Studies in Dance Theater Lighting. (2 or 4) Lecture, four hours; laboratory, four or more hours. Requisite: course 141. Analysis of diverse dance theater lighting problems at advanced level and individual development of creative solutions. May be taken for a maximum of four units.

144. Costume and Scenic Design Concepts for Dance Theater. (4) Study of theory for conceptualizing dance performance environments, communication through visual elements, artistic properties of costume and sets media, and procedures for producing dance costumes and sets in order to facilitate choreographer/designer communication.

145. Advanced Dance Costuming. (4) Lecture, three hours; laboratory, six hours. Requisite: course 144. Theory of dance costume construction as it relates to design intent; enhancement, accommodation, and impact on movement. Choice of textiles, construction methodology, fabric modification, and accessories. Laboratories include dance design projects currently in production.

146. Textiles of the World. (4) Lecture, four hours; discussion, one hour; laboratory, one hour. How cloth and clothing was and continues to be hand-woven in indigenous societies. Use of textiles from Fowler Museum collection to coordinate hands-on experience with cultural history. May be repeated twice for credit. P/NP or letter grading.

148. Advanced Laboratory in Dance Production. (1) Laboratory, two hours. Requisites or corequisites: courses 141, 144. Further development and application of concepts of lighting, sound, costume, scene design, and stage practices in departmental dance productions. May be repeated once. P/NP grading.

149. Dance Performance Practicum. (1) Laboratory, four hours. Dancing in selected choreography or repertory in performance. May be repeated for credit. P/NP grading.

150. Viewing Native American Culture. (4) Lecture, three hours; outside study, nine hours. Exploration of artistic, political, folk, and religious images of American Indians as demonstrated in literature, art, anthropology, film, and folklore and contrasted with historic and contemporary views held by Native Americans and others. P/NP or letter grading.

151A. Foundations of Dance Education. (4) Lecture, two hours; laboratory, three hours. Designed for World Arts and Cultures majors. Introduction to movement concepts, skills, and teaching principles for modern dance instruction. Supervised teaching practicum included.

151B. Dance as Culture in Education. (4) Lecture, two hours; laboratory, two hours. Requisite: course 70. Theoretical and practical aspects of teaching ethnic dance, especially in higher education.

M152. Asian American Aesthetics. (4) (Same as Asian American Studies M119.) Lecture, four hours; outside study, eight hours. Designed for juniors/seniors. Exploration of shared and distinctive aspects of aesthetics found among groups of Asian Americans through lecture, readings, and field study. Formal and informal expressions of the culture, with focus on origins, artists, arts activists, and reinterpretations of culture through the arts. Individual project required. P/NP or letter grading.

153. Creative Dance for Children. (4) Lecture, three hours; laboratory, one hour. Designed for World Arts and Cultures majors. Introduction to movement concepts, skills, and principles for teaching children's dance; emphasis on dance as a creative medium of expression.

C160A-C160B-C160C. Group Dynamics and Process. (2-2-2) Lecture, one hour; laboratory, three hours. Exploration of individual and group dynamics within context of an ongoing dance/movement therapy group. Courses must be taken in sequence. Concurrently scheduled with courses C260A-C260B-C260C. P/NP or letter grading.

C161A. Women Healers, Ritual, and Transformation. (4) Lecture, four hours. Examination of role of women healers, historically and within contemporary culture-specific contexts. Exploration of psychological functions served by rites of passage and healing rituals and role of arts in healing troubled communities. Concurrently scheduled with course C261A. Letter grading.

163. Living Vernacular. (4) Lecture, three hours. Survey of array of spaces and places from a cross-cultural or comparative perspective and with a performance emphasis, which means focus on mutual interaction of human beings and their created environments. Emphasis on "common," "ordinary," "anonymous," or "vernacular" nonbuilt and built environments, which are built and used by members of small-scale, "traditional," and "transitional" communities around the world. P/NP or letter grading.

C164. Arts of Identity. (4) Lecture, three hours. Introduction to a range of expressive forms, from performative and artisan traditions, that indicate cultural "identity." Survey of these arts of identity in a variety of cultural settings to provide students with a "tool kit" for perceiving and interpreting these forms in their life experiences. Concurrently scheduled with course C264. P/NP or letter grading.

165A. Introduction to Museology: Museum Collections and Administration. (5) Lecture, six hours. Introduction to history and functions of museums, tracing development to the present. Collection, organization, management, and conservation of objects and legal and ethical issues surrounding these practices. P/NP or letter grading.

165B. Introduction to Museology: Museum Exhibitions and Education. (5) Lecture, six hours. Requisite: course 165A. Conceptual development of exhibitions and formulation of educational and other goals for specified audiences. Design considerations, media applications, and installation process. P/NP or letter grading.

165C. Introduction to Museology: Selected Topics in Museology. (4) Discussion, six hours; individual study, six hours. Requisites: courses 165A, 165B. Students pursue projects in an area of museum operations, working with staff members and museum directors to produce papers on contemporary issues in museums. For example, one student might work under a curator and director to examine cultural property issues as they pertain to contemporary museums, following a suggested reading list. P/NP or letter grading.

M166A. Beyond the Mexican Mural: Beginning Muralism and Community Development. (4) (Formerly numbered M166.) (Same as Art M186A and Chicana and Chicano Studies M186A.) Studio/lecture, six hours. Corequisite: course M166AL. Investigation of muralism as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. P/NP or letter grading.

M166AL-M166BL-M166CL. Beyond the Mexican Mural: Muralism and Community Laboratory. (2-2-2) (Same as Art M186AL-M186BL-M186CL and Chicana and Chicano Studies M186AL-M186BL-M186CL.) Laboratory, two hours. Course M166AL is requisite to M166BL, which is requisite to M166CL. Mural and Digital Laboratory is an art studio housed at Social and Public Art Resource Center in Venice, CA, where students work in a community-based setting. Open to students during scheduled hours with laboratory tech support, it offers instruction as students independently and in collaborative teams research, design, and produce large-scale painted and digitally generated murals to be placed in a community setting. P/NP or letter grading. **M166AL.** Beginning; **M166BL.** Intermediate; **M166CL.** Advanced.

M166B. Beyond the Mexican Mural: Intermediate Muralism and Community Development. (4) (Same as Art M186B and Chicana and Chicano Studies M186B.) Studio/lecture, six hours. Requisites: courses M166A/M166AL. Corequisite: course M166BL. Continuation of investigation of muralism as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. Continuation of project through states of production to full scale and community approval. P/NP or letter grading.

M166C. Beyond the Mexican Mural: Advanced Muralism and Community Development. (4) (Same as Art M186C and Chicana and Chicano Studies M186C.) Studio/lecture, six hours. Requisites: courses M166B/M166BL. Corequisite: course M166CL. Continuation of investigation of muralism as a method of community education, development, and empowerment. Exploration of issues through development of a large-scale collaborative digitally created image and/or painting for placement in a community. Students research, design, and work with community participants. Continuation of project through installation, documentation, and dedication, with work on more advanced independent projects. P/NP or letter grading.

M167. Whose Monument Where: Course on Public Art. (4) (Same as Art M188 and Chicana and Chicano Studies M188.) Lecture, four hours. Recommended corequisite: course M166A, M166B, or M166C. Examination of public monuments in the U.S. as a basis for cultural insight and critique of American values from perspective of an artist. Use of urban Los Angeles as textbook in urban space issues such as who is the "public," what is "public space" at the end of the 20th century, what defines a neighborhood, and do different ethnic populations use public space differently. P/NP or letter grading.

C171B. Dance of Indonesia. (2) Studio, three hours. Requisite: course 71B. Technique and repertoire of a selected dance tradition (e.g., Java, Bali, or Sunda). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C471B.

C171C. Dance of Japan. (2) Studio, three hours. Requisite: course 71C. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C471C.

C171D. Dance of India. (2) Studio, three hours. Requisite: course 71D. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C471D.

C171E. Dance of Korea. (2) Studio, three hours. Requisite: course 71E. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C471E.

C172B. Dance of West Africa. (2) Studio, three hours. Requisite: course 72B. Technique and repertoire of a selected region (e.g., Ghana, Guinea, Nigeria). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C472B.

C173B. Dance of Mexico. (2) Studio, three hours. Requisite: course 73B. Dance techniques of selected ethnographic regions. May be repeated once. Concurrently scheduled with course C473B.

C174C. Dance of Spain. (2) Studio, three hours. Requisite: course 74C. Techniques and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C474C.

174D. Dance of Anglo- and Celtic-American Tradition. (2) Laboratory, four hours. Requisite: course 74D. Technique and repertoire of vernacular dance traditions of the British Isles and their derivatives in North America. May be repeated for credit. P/NP or letter grading.

C176B. Dance of Israel. (2) Studio, three hours. Requisite: course 76B. Technique and repertoire from selected ethnographic regions. May be repeated once. Concurrently scheduled with course C476B.

C179. Dance of a Selected Culture. (2) Laboratory, four hours. Dance technique of a selected dance form from a culture area or historical period or of a particular dance genre. May be repeated for credit. Concurrently scheduled with course C479. P/NP or letter grading.

C180A-C180B. Studies in Dance Ethnography. (4-4) Lecture, two hours; discussion, two hours. Development of observation and recording skills for study of dance events, including both analytical consideration of selected ethnographies and training in and application of field research methodologies. Concurrently scheduled with courses C279A-C279B. P/NP or letter grading. **C180A.** Dance Event Ethnographies; **C180B.** Field Research. Requisite: course C180A.

181A. Dance Cultures of Asia. (4) Introduction to dance cultures of Asia. How theories and practices of dance are influenced by historical and social factors and by ideological and aesthetic systems. Lectures illustrated with demonstrations, films, and slides.

181B. Dance in Southeast Asia. (4) Requisite: course 181A. Survey of selected ritual, social, and court dances of Indonesia, Cambodia, Thailand, and the Philippines. Social, historical, and aesthetic factors. Lectures illustrated with demonstrations, films, and slides.

181C. Dance in East Asia. (4) Requisite: course 181A. Survey of dances of Japan, China, and Korea and factors which have influenced their development and social function. Consideration of relationship of dance to other art forms. Lectures illustrated with demonstrations, films, and slides.

181D. Dance in South Asia. (4) Requisite: course 181A. Survey of dance forms in India and Sri Lanka. Factors influencing development of dance, its social function, and its relationship to other art forms. Lectures illustrated with demonstrations, films, and slides.

182. Dance in Africa and the African Diaspora. (4) Survey of dance in sub-Saharan cultures and their new world transformations, with consideration of role of dance in society, its cultural significance, and historical background. Emphasis on various African and African American cultures and genres.

183. Dance in Latino American Cultures. (4) Survey of dance in Latin America, with consideration of role of dance in society, its cultural significance, historical background, and relationship to other art forms. Emphasis on various Latino American cultures and dance genres.

CM184. Dance and Folklore. (4) (Same as Folklore CM184.) Consideration of vernacular tradition as a site for cultural configuration, social construction, representation, and display of national, ethnic, and other affinity identities. Emphasis on various European and European-American dance idioms. Concurrently scheduled with course CM284.

C187. Dance in Native American Cultures. (4) Survey of Native American dance; role of dance in society, its cultural significance, and historical background. Concurrently scheduled with course C287.

190A-190B. World Arts and Cultures Senior Colloquium. (4) Limited to senior World Arts and Cultures majors. Comparative and integrative studies in world arts and cultures, with application of concepts and content from the six disciplines of the major. Lecture/seminar format with World Arts and Cultures faculty during first term; topics include arts in a societal context, ethnicity and the individual, and problems and approaches to fieldwork. Faculty-directed individual projects during second term. Fieldwork on some aspect of various arts/expressive behaviors found in ethnic communities of Los Angeles. In Progress grading.

191. Repertory Dance Tour. (2 or 4) Lecture, two hours; rehearsal or performance, four to six hours. Designed for World Arts and Cultures majors. Creation and performance of dance concerts in the community, with special emphasis on problems of touring dance company with a variable repertoire. May be repeated once.

192. Projects in Dance. (2 to 4) Laboratory, four to six hours (one or two hours may be individualized consultation). Individualized major projects in choreography, performance, production, media. May be repeated for credit. P/NP or letter grading.

196. Senior Project. (2 or 4) Seminar, two hours; discussion, two hours, or laboratory, to be arranged. Limited to seniors. Advanced project reflecting student's area of concentration. May be taken for a maximum of four units.

C197. Selected Topics in Dance. (2 to 4) Lecture, discussion, and analysis of a selected dance style, specific time period, or dance of a particular culture group. May be repeated once. Concurrently scheduled with course C297.

199. Special Studies in World Arts and Cultures. (2 to 8) Preparation: 3.0 grade-point average in major. Designed for juniors/seniors. Individual studies for World Arts and Cultures majors. May be taken for a maximum of eight units. P/NP or letter grading.

Graduate Courses

CM209. African Religion in the Diaspora. (4) (Same as Folklore CM209.) Lecture, three hours. Designed for juniors/seniors and graduate students. Ethnography of diaspora African religions, including voodoo, Santeria, and Candomble. Lectures, readings, and video material focus on performance of ritual and its expression in religious art. Concurrently scheduled with course CM109.

211A-211F. Advanced Choreography. (4) Lecture, two hours; laboratory, two hours. Theoretical aspects of advanced choreography for students who have reached the level of self-initiation of substantial creative works. Refinement and realistic self-evaluation; critical counsel by acknowledged choreographers.

C220. Music as Dance Accompaniment. (4) Requisite: course 20. Piano and percussion improvisation for dance. Choreographer/composer relationships. History of music for dance, with emphasis on contemporary trends. Music for dance performance. May be concurrently scheduled with course C120. Graduate students must complete two additional assignments. May not be applied toward M.A. degree requirements.

221. Music for Dance. (4) Requisite: course C120. Theory of aesthetic and functional relationship of music to dance.

223. Principles of Dance Kinesiology. (4) Scientific basis for movement for dance. Study of anatomical, kinesiological, and physical principles and demands of dance.

225A-225B. Theories of Movement: Laban analysis. (4) Lecture, two hours; laboratory, two hours. Theories of Laban movement analysis as means for analyzing and describing human movement. Use of Laban movement analysis to increase movement observation skills and theoretical understanding of role of movement in dance, nonverbal behavior, and cross-cultural dance studies. Focus on complex movement patterns and timing.

226. Advanced Studies in Notation. (2) Requisite: course 126. Selected problems in directing from notated repertoire; principles of teaching, comparative notation systems, writing projects.

C227. Video Production for Performance and Research in Traditional and Performing Arts. (4) Lecture, one hour; laboratory, three hours. Fundamentals of video production: conceptualization, field recording (camera, lighting, sound, coverage), and editing (organizing raw footage, constructing a program, mastering finished tape). Emphasis alternates quarterly between ethnographic documentary and dance/choreography. May be repeated once for credit. Concurrently scheduled with course C127.

230. Research Methods and Bibliography in Dance. (4) Survey of methods for scholarly analysis of dance materials using systems from social sciences, physical sciences, and humanities.

231A. Basic Issues in Dance and Dance Theory. (4) Lecture, four hours. Issues common to specialization areas in the field of dance: movement, presentation and transformation, composition, contexts (such as historical, ritual, social, educational, therapeutic), documentation (notation, film, video), production, etc. S/U or letter grading.

C231B. Philosophical Bases and Trends in Dance. (2) Requisite: course 231A. Study of present-day concepts and their relationship to other art forms and cultures. Concurrently scheduled with course C132B. Evaluations of graduate students based on extended reading list and term papers.

232. Aesthetics of Dance. (4) Analysis of aesthetic concepts and critical methods used in writing about dance.

235. History of Ballet. (4) Development of ballet from 19th-century Romanticism to the present. Stylistic differences in Italy, France, England, Denmark, and Russia. S/U or letter grading.

236. Dance in the 20th Century. (4) Seminar in historical development of 20th-century dance. S/U or letter grading.

240A. Production Arts Seminar. (4) Seminar, two hours; discussion, two hours; laboratory, two hours. Examination and research of dance and performer/audience relationships in various historic periods and cultural settings. Impact of different aesthetic/directorial approaches to theatrical production of dance. Exploration of selection of locale, style, aural and visual enhancements.

240B. Production Arts Seminar. (4) Seminar, four hours; laboratory, to be arranged. Study of elements of design. Development of a vocabulary for analysis of dance movement and choreography. Communication among collaborating artists. Conceptualizing and producing the design and sound score for a dance production.

240C. Production Arts Seminar. (4) Seminar, four hours; laboratory, to be arranged. Examination of contemporary art world, including arts organizations, funding sources, legal aspects of arts production, support groups, public relations and publicity. S/U or letter grading.

240D. Production Arts Seminar. (2) Seminar, three hours. Corequisites: courses 441, 490. Topics from current problems of students preparing M.F.A. concert productions.

251A-251D. Advanced Studies in Dance Education. (4 each) Lecture, two hours; discussion, two hours. Preparation: previous teaching experience. S/U or letter grading:

251A. Historical and Theoretical Framework for Dance Education. Development of a framework for teaching/learning process in dance and application to varied settings and populations.

251B. Theories and Methods. Examination of current theories of artistic intelligence, body education systems, motor learning, and creativity and how they are related to teaching dance, including analysis of traditional models for developing alternative methodologies.

251C. Curriculum Development in Varied Dance Settings. Issues include course/program/materials planning, development, implementation, and evaluation, with emphasis on analyzing underlying educational values affecting decision-making process.

251D. Dance Administration. Relation of theories and practice to dance settings, clarifying issues of hierarchical structures, chains of command, staffing, facilities, and budget and why and how dance courses/programs succeed or fail.

C260A-C260B-C260C. Group Dynamics and Process. (2-2-2) Lecture, one hour; laboratory, three hours. Exploration of individual and group dynamics within context of an ongoing dance/movement therapy group. Concurrently scheduled with courses C160A-C160B-C160C. S/U grading.

C261A. Women Healers, Ritual, and Transformation. (4) Lecture, four hours. Examination of role of women healers, historically and within contemporary culture-specific contexts. Exploration of psychological functions served by rites of passage and healing rituals and role of arts in healing troubled communities. Concurrently scheduled with course C161A. Letter grading.

261B. Self and Culture. (4) (Not the same as course 261B prior to Fall Quarter 1997.) Lecture, two hours; laboratory, two hours. Requisite: course C261A. Examination of critical developmental processes and situational factors contributing to construction of a sense of self and emergence of creativity and subjective relatedness in different cultural contexts.

261C. Dance/Movement Therapy: Dance as Healing and Therapy. (4) Lecture, two hours; laboratory, two hours. Requisites: courses C261A, 261B. Historical overview of various theoretical approaches and corresponding methodologies encompassed by dance/movement therapy, a contemporary creative arts therapy field which encompasses healing and therapeutic aspects of dance.

262A-262B-262C. Seminars: Dance/Movement Therapy. (4-4-4) Seminar, two hours; laboratory, two hours. Requisites: courses C261A, 261B-261C. Year-long sequential dance/movement therapy seminars adopting a psychodynamic life-span developmental approach to clinical community work with ethnically diverse populations.

C264. Arts of Identity. (4) Lecture, three hours. Introduction to a range of expressive forms, from performative and artisan traditions, that indicate cultural "identity." Survey of these arts of identity in a variety of cultural settings to provide students with a "tool kit" for perceiving and interpreting these forms in their life experiences. Concurrently scheduled with course C164. S/U or letter grading.

C279A-C279B. Studies in Dance Ethnography. (4-4) Lecture, two hours; discussion, two hours. Development of observation and recording skills for study of dance events, including both analytical consideration of selected ethnographies and training in and application of field research methodologies. Concurrently scheduled with courses C180A-C180B. S/U or letter grading. **C279A.** Dance Event Ethnographies; **C279B.** Field Research. Requisite: course C279A.

280A-280B. Advanced Studies in Dance Ethnology. (4-4) Dance viewed as an aspect of culture and human behavior. S/U or letter grading. **280A.** Survey of literature of the field of dance ethnology and in related fields of anthropology, folklore, performance studies, and sociology. **280B.** Advanced studies in methodologies and theories to develop dance-focused ethnographic research.

CM284. Dance and Folklore. (4) (Same as Folklore CM284.) Consideration of vernacular tradition as a site for cultural configuration, social construction, representation, and display of national, ethnic, and other affinity identities. Emphasis on various European and European-American dance idioms. Concurrently scheduled with course CM184.

C287. Dance in Native American Cultures. (4) Survey of Native American dance; role of dance in society, its cultural significance, and historical background. Concurrently scheduled with course C187.

C297. Selected Topics in Dance. (2 to 4) Lecture, discussion, and analysis of a selected dance style, specific time period, or dance of a particular culture group. May be repeated once. Concurrently scheduled with courses C197. S/U or letter grading.

375. Teaching Apprentice Practicum. (1 to 4) Preparation: apprentice personnel employment as a teaching assistant, associate, or fellow. Teaching apprenticeship under active guidance and supervision of a regular faculty member responsible for curriculum and instruction at the University. May be repeated for credit. S/U grading.

400. Directed Professional Activities. (2 to 8) Directed projects in professional editing, bibliography, filmography, videography, conference and festival direction, and other professional activities. May not be applied toward M.A. degree requirements. May be repeated. S/U grading.

C402A-C402B-C402C. Advanced Modern Dance Technique. (2-2-2) Laboratory, four and one-half hours. Technique levels IV and V. Studies in advanced modern dance technique, with emphasis on performing skills. May be repeated for credit. Concurrently scheduled with courses C102A-C102B-C102C. S/U or letter grading.

C407. Workshop in Ballet. (2) (Formerly numbered C407A-C407B-C407C.) Lecture, one hour; studio, five hours. Requisites: courses 7A-7B-7C. Use of forms of ballet at intermediate to advanced levels, structured to integrate a somatic learning process of uncovering habitual choices in order to free personal movement habits. Examination and practice of theoretical elements of ballet, basic components of coordination, and technical training combined with expressivity. May be repeated for a maximum of 24 units. Concurrently scheduled with course C107. S/U or letter grading.

441. Dance Production Practicum. (2 to 4) Laboratory, four to eight hours (one or two hours may be individualized consultation). Skills and understanding of production components in roles of stage manager, production assistants, and producer. May be repeated for a maximum of eight units. S/U grading.

451. Teaching Assistant Seminar. (2) Seminar, one hour; laboratory, three hours. Required of all World Arts and Cultures Department teaching assistants. Lectures, discussion, readings, and practice teaching. May be repeated once for credit. S/U grading.

452. Directed Field Study in Dance Education. (2 to 8) Seminar, one hour; field study, two hours minimum. Directed field study to provide teaching experience in the community school or other approved site. No more than four units may be applied toward M.A. degree requirements. S/U grading.

460A-460B-460C. Clinical Internship Supervision. (4-4-4) Lecture, two hours; discussion, two hours. Corequisites: courses 262A-262B-262C, 596R. Practicum dealing with student internship: movement/observation, therapeutic goals, therapeutic process, and other clinical uses. S/U grading.

C471B. Dance of Indonesia. (2) Studio, three hours. Requisite: course 71B. Technique and repertoire of a selected dance tradition (e.g., Java, Bali, or Sunda). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171B.

C471C. Dance of Japan. (2) Studio, three hours. Requisite: course 71C. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171C.

C471D. Dance of India. (2) Studio, three hours. Requisite: course 71D. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171D.

C471E. Dance of Korea. (2) Studio, three hours. Requisite: course 71E. Technique and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C171E.

C472B. Dance of West Africa. (2) Studio, three hours. Requisite: course 72B. Technique and repertoire of a selected region (e.g., Ghana, Guinea, Nigeria). Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C172B.

C473B. Dance of Mexico. (2) Studio, three hours. Requisite: course 73B. Dance techniques of selected ethnographic regions. May be repeated once. Concurrently scheduled with course C173B.

C474C. Dance of Spain. (2) Studio, three hours. Requisite: course 74C. Techniques and repertoire of a selected tradition. Dance in relation to music, aesthetic principles, and cultural context. May be repeated once. Concurrently scheduled with course C174C.

C476B. Dance of Israel. (2) Studio, three hours. Requisite: course 76B. Technique and repertoire from selected ethnographic regions. May be repeated once. Concurrently scheduled with course C176B.

C479. Dance of a Selected Culture. (2) Laboratory, four hours. Dance technique of a selected dance form from a culture area or historical period or of a particular dance genre. May be repeated for credit. Concurrently scheduled with course C179. S/U or letter grading.

480. Seminar: Research Topics. (2) Forum in which faculty, students, and visitors make presentations and obtain feedback on research being planned, conducted, or recently completed. Students required to make a presentation each term they are enrolled for credit. May be repeated for a maximum of eight units. S/U grading.

490. Projects in Choreography and Performance. (2 to 8) Tutorial, one three-hour rehearsal per unit per week minimum. Requisite: course 240C. Creation, casting, and rehearsing of culminating concert, reflecting professional achievement in choreography or performance, in first term. In second term, direction of on-stage rehearsals for culminating concert by each student leading to fully staged performance. May be repeated for a maximum of 16 units.

498. Professional Internship in Dance. (4, 8, or 12) Full- or part-time supervised fieldwork. Limited to M.F.A. students. Internship in dance, theater, film, or television organization. Participation in creative, administrative, or technical work of professionals in their specialties.

596A. Directed Individual Study or Research. (2 to 8) Tutorial, to be arranged. S/U or letter grading.

596R. Directed Study or Research in a Hospital or Clinic. (2 to 8) S/U grading.

597. Preparation for Master's Comprehensive Examination. (2 to 8) Preparation for M.A. or M.F.A. comprehensive examination. S/U grading.

598. Research for and Preparation of Master's Thesis. (2 to 8) Research for and preparation of M.A. or M.F.A. thesis. S/U grading.

Appendix A

Regulations and Policies

Nondiscrimination

The University of California, in accordance with applicable Federal and State Laws and University Policies, does not discriminate on the basis of race, color, national origin, religion, sex, disability, age, medical condition (cancer-related), ancestry, marital status, citizenship, sexual orientation, or status as a Vietnam-era veteran or special disabled veteran. The University also prohibits sexual harassment. This nondiscrimination policy covers admission, access, and treatment in University programs and activities.

Inquiries regarding the University's student-related nondiscrimination policies may be directed to the UCLA Campus Counsel, 3149 Murphy Hall, Box 951405, Los Angeles, CA 90095-1405, (310) 825-4042. Speech- and hearing-impaired persons may call TTY (310) 206-6083.

Inquiries regarding nondiscrimination on the basis of disability covered by the Americans with Disabilities Act (ADA) or Section 504 of the Rehabilitation Act of 1973 may be directed to Dr. Douglas Martin, Special Assistant to the Chancellor/Coordinator of ADA and 504 Compliance, A239 Murphy Hall, UCLA, Box 951405, Los Angeles, CA 90095-1405, voice (310) 825-2242, TTY (310) 206-3349; <http://www.saonet.ucla.edu/ada.htm>.

Students may complain of any action which they believe discriminates against them on the ground of race, color, national origin, marital status, sex, sexual orientation, disability, or age and may contact the Office of the Dean of Students, 1206 Murphy Hall, and/or refer to Section 111.00 of the *University of California Policies Applying to Campus Activities, Organizations, and Students* (available in 1206 Murphy Hall or at <http://www.ucop.edu/ucophome/uwnews/aospol.html>) for further information and procedures.

Student Conduct Policies

Students are members of both society and the academic community with attendant rights and responsibilities. Students are expected to comply with the general law, University policies, and campus regulations. For further information, refer to the *University of California Policies Applying to Campus Activities, Organizations, and Students* at <http://www.ucop.edu/ucophome/uwnews/aospol/toc.html> and the *UCLA Students Conduct Code* at <http://www.saonet.ucla.edu/dos/SCC98.htm>.

A. Jurisdiction

The University shall have jurisdiction over student conduct that occurs on University property, or in connection with official University functions whether on or off University property. Although the University will not routinely invoke its disciplinary processes over student conduct that occurs off campus except in connection with an official University function, the University shall have discretion to exercise jurisdiction over conduct that occurs off campus and that would violate student conduct and discipline policies or regulations if the conduct had occurred on campus when (1) the alleged misconduct indicates the student poses a threat to the safety or security of any member(s) of the University community or (2) the alleged misconduct involves academic work or the forgery, alteration, or misuse of any University document, record, key, electronic device, or identification.

Specifically, the University may choose to exercise jurisdiction over off-campus incidents under item 1 above where the alleged misconduct involves

(a) Physical abuse, including but not limited to rape, sexual assault, sex offenses, and other physical assault; threats of violence; or conduct that threatens the health or safety of any person;

(b) Stalking (as defined in Section 102.10 of the *University of California Policies Applying to Campus Activities, Organizations, and Students*);

(c) Sexual harassment (as defined in Section 102.09 of the *University of California Policies Applying to Campus Activities, Organizations, and Students*);

(d) Hazing (as defined in Section 102.12 of the *University of California Policies Applying to Campus Activities, Organizations, and Students*).

In determining whether or not to exercise off-campus jurisdiction in cases under item 1 above, the University will consider the seriousness of the alleged misconduct; whether the alleged victim is a member of the campus community; the ability of the University to gather evidence, including the testimony of witnesses; or whether the off-campus conduct is part of a series of actions that occurred both on and off campus.

This section is intended only to provide guidance for the exercise of discretion by the University in invoking its jurisdiction over conduct that occurs off campus. It may not be relied on by any student charged under this section to create any rights, substantive or procedural, or as a basis for a challenge to the exercise of the University's jurisdiction.

B. Grounds for Discipline

The chancellor may impose discipline for violation of, or an attempt to violate, any University policies or campus regulations. The lack of intent to commit a violation is not a factor in determining if a violation occurred; however, the lack of intent may be considered a mitigating factor in determining the appropriate sanction if it has been determined that a violation has occurred. Violations or attempted violations include, but are not limited to, the following types of misconduct (Sections 102.01 through 102.25 below are adapted from the *University of California Policies Applying to Campus Activities, Organizations, and Students*):

C. Types of Misconduct

102.01: Academic Dishonesty. All forms of academic misconduct, including but not limited to cheating, fabrication, plagiarism, multiple submissions, or facilitating academic dishonesty. For the purposes of this Code, the following definitions apply:

Salary and Employment Information, University of California

	DEGREE LEVEL OF GRADUATES		
	BACHELOR'S	MASTER'S	DOCTORATE
	AVERAGE MONTHLY SALARY*		
Engineering	\$3,549	\$4,256	\$5,443
Humanities	2,150	2,719	3,083
Life Sciences	2,114	2,725	3,814
Management	2,711	4,429	5,281
Physical Sciences	2,842	3,877	5,002
Social Sciences	2,221	3,386	4,375

*Source: A national survey of a representative group of colleges conducted by the National Association of Colleges and Employers, representing the 80 percent range of offers for April 1999 throughout the country. It should be noted that a wide variation in starting salaries exists within each discipline based on job location, type of employer, personal qualifications of the individual, and employment conditions at the time of job entry.

102.01a: Cheating. Cheating includes, but is not limited to, the use of unauthorized materials, information, or study aids in any academic exercise; or helping another student commit an act of academic fraud; or the failure to observe the expressed procedures or instructions of an academic exercise (e.g., examination instructions regarding alternate seating or conversation during an examination).

102.01b: Fabrication. Fabrication includes, but is not limited to, falsification or invention of any information or citation in an academic exercise.

102.01c: Plagiarism. Plagiarism includes, but is not limited to, the use of another's words or ideas as if they were one's own; including but not limited to representing, either with the intent to deceive or by the omission of the true source, part of or an entire work produced by someone other than the student, obtained by purchase or otherwise, as the student's original work; or representing the identifiable but altered ideas, data, or writing of another person as if those ideas, data, or writing were the student's original work.

102.01d: Multiple Submissions. Multiple submissions includes, but is not limited to, the re-submission by a student of any work which has been previously submitted for credit in identical or similar form in one course to fulfill the requirements of a second course, without the informed permission/consent of the instructor of the second course; or the submission by a student of any work submitted for credit in identical or similar form in one course to fulfill the requirements of a concurrent course, without the permission/consent of the instructors of both courses.

102.02: Other Forms of Dishonesty. Other forms of dishonesty, including but not limited to fabricating information or knowingly furnishing false information or reporting a false emergency to the University or to University officials acting in the performance of their duties.

102.03: Forgery. Forgery, alteration, or misuse of any University document, record, key, electronic device, or identification. Section 102.03 applies to any individual for whom the University maintains records, regardless of current student status.

102.04: Theft. Theft of, conversion of, misappropriation of, or damage to or destruction of any property of the University or property of others while on University premises or at official University functions; or possession of any property of the University or others stolen while on University premises or at official University functions.

102.05: Computers. Theft or other abuse of computing facilities or computer time, including but not limited to unauthorized entry into a file to use, read, or change the contents or for any other purpose; unauthorized transfer of a file; unauthorized use of another individual's identification or password; use of computing facilities to interfere with the work of another student,

faculty member, or University official; use of computing facilities to interfere with a University computing system. Violation of the *University of California Electronic Mail Policy* (available at www.ucop.edu/ucophome/policies/email/), or of any UCLA acceptable or allowable use policy, is also considered a violation of Section 102.05.

102.06: Unauthorized Conduct. Unauthorized possession of, receipt of, duplication of, or use of the University's name, insignia, or seal. Unauthorized entry to, possession of, receipt of, or use of any University properties, equipment, resources, or services. Selling or distributing course lecture notes, handouts, readers, or other information provided by an instructor, or using them for any commercial purpose, without the express permission of the instructor.

102.07: University-Owned Housing. Violation of policies, regulations, or rules governing University-owned or operated housing facilities or leased housing facilities located on University property.

102.08: Physical Abuse. Physical abuse, including but not limited to rape, sexual assault, sex offenses, and other physical assault; threats of violence; or conduct that threatens the health or safety of any person.

102.08a: Rape. For the purposes of this Code, rape refers to "rape" as defined by the California Penal Code (as it may be amended from time to time). Among other acts, the Penal Code prohibits the following acts:

(1) Sexual intercourse against a person's will accomplished by force or threats of bodily injury.

(2) Sexual intercourse against a person's will where the person has reasonable fear that she (or he) or another will be injured if she (or he) does not submit to the intercourse.

(3) Sexual intercourse where the person is incapable of giving consent, or is prevented from resisting, due to alcohol or drugs, and this condition was known, or reasonably should have been known by the accused.

(4) Sexual intercourse where the person is incapable of resisting because she (or he), at the time, is unconscious or asleep, and this is known to the accused.

102.08b: Sexual Assault. The act of sexual assault includes forced sodomy (anal intercourse); forced oral copulation (oral-genital contact); rape by foreign object (forced penetration by a foreign object, including a finger); and sexual battery (the unwanted touching of an intimate part of another person for the purpose of sexual arousal). These also include situations when the accused sexually assaults a complainant incapable of giving consent, including where the complainant is prevented from resisting due to alcohol or drugs and this condition was known, or reasonably should have been known by the accused. NOTE: For

the purpose of this regulation, students should understand that

(1) Forced intercourse or other unwanted sexual contact is defined as rape or sexual assault whether the assailant is a stranger or an acquaintance of the complainant.

(2) Intoxication of the assailant shall not diminish the assailant's responsibility for sexual assault.

102.09: Sexual Harassment. Unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature constitute sexual harassment when

(1) Submission to such conduct is made either explicitly or implicitly a term or condition of instruction, employment, or participation in other University activity;

(2) Submission to or rejection of such conduct by an individual is used as a basis for evaluation in making academic or personnel decisions affecting an individual; or

(3) Such conduct has the purpose or effect of unreasonably interfering with an individual's performance or creating an intimidating, hostile, or offensive University environment.

In determining whether the alleged conduct constitutes sexual harassment, consideration shall be given to the record of the incident as a whole and to the totality of the circumstances, including the context in which the alleged incidents occurred.

102.10: Stalking. Stalking behavior in which an individual willfully, maliciously, and repeatedly engages in a knowing course of conduct directed at a specific person which reasonably and seriously alarms, torments, or terrorizes the person, and which serves no legitimate purpose.

102.11: "Fighting Words." The use of "fighting words" by students to harass any person(s) on University property, on other property to which these policies apply, or in connection with official University functions or University-sponsored programs. "Fighting words" are those personally abusive epithets which, when directly addressed to any ordinary person are, in the context used and as a matter of common knowledge, inherently likely to provoke a violent reaction whether or not they actually do so. Such words include, but are not limited to, those terms widely recognized to be derogatory references to race, ethnicity, religion, sex, sexual orientation, disability, and other personal characteristics. "Fighting words" constitute "harassment" when the circumstances of their utterance create a hostile and intimidating environment which the student uttering them should reasonably know will interfere with the victim's ability to pursue effectively his or her education or otherwise to participate fully in University programs and activities.

102.12: Hazing. Hazing or any method of initiation or preinitiation into a campus organization or any activity engaged in by the organization or members of the organization which

causes, or is likely to cause, bodily danger, physical harm, or personal degradation or disgrace resulting in physical or mental harm to any student or other person.

102.13: Obstruction or Disruption. Obstruction or disruption of teaching, research, administration, disciplinary procedures, or other University activities.

102.14: Disorderly Conduct. Disorderly or lewd conduct.

102.15: Disturbing the Peace. Participation in a disturbance of the peace or unlawful assembly.

102.16: Failure to Comply. Failure to identify oneself to, or comply with directions of, a University official or other public official acting in the performance of their duties while on University property or at official University functions, or resisting or obstructing such University or other public officials in the performance of or the attempt to perform their duties.

102.17: Controlled Substances. Unlawful manufacture, distribution, dispensing, possession, use, or sale of, or the attempted manufacture, distribution, dispensing, or sale of controlled substances, identified in Federal and State laws or regulations.

102.18: Alcohol. Manufacture, distribution, dispensing, possession, use, or sale of, or the attempted manufacture, distribution, dispensing, or sale of alcohol which is unlawful or otherwise prohibited by, or not in compliance with, University policy or campus regulations.

102.19: Destructive Devices. Possession, use, storage, or manufacture of explosives, firebombs, or other destructive devices.

102.20: Weapons. Except as expressly permitted by law, possession, use, storage, or manufacture of a firearm or other weapon capable of causing bodily injury.

102.21: Violation of Disciplinary Conditions. Violation of the conditions contained in the terms of a disciplinary action imposed under this Code.

102.22: Violation of Emergency or Interim Suspension Conditions. Violation of the conditions contained in a written Notice of Emergency or Interim Suspension issued pursuant to Section IV of this Code.

102.23: Violation of Campus Restraining Order. Violation of the conditions contained in a written Campus Restraining Order issued pursuant to Section III.A.2.a.(1) of this Code.

102.24: University Properties. Using University properties for the purpose of organizing or carrying out unlawful activity.

102.25: Violations of Law. Violation of Federal, State, or local laws.

Rape and Other Forms of Sexual Assault

UCLA does not tolerate sexual assault in any form, including acquaintance or date rape.

Where there is probable cause to believe that the campus regulations prohibiting sexual assault have been violated, the campus pursues disciplinary actions which may include sanctions up to and including dismissal from the University.

A student charged with sexual assault can be prosecuted under California criminal statutes *and* disciplined under the campus student conduct policies and regulations. Even if the criminal justice authorities choose not to prosecute, the campus can pursue disciplinary action.

Definitions

For explicit definitions of **rape** and **sexual assault**, refer to Sections 102.08a and 102.08B of the Student Conduct Policies listed above.

If a Person Has Been Raped or Sexually Assaulted

Those who believe that they are the victims of rape or other forms of sexual assault should

(1) **Immediately call the police department.** If possible, call 911 or the UCLA Police Department at (310) 825-1491.

(2) **Get medical attention.** Campus police will provide transportation to the Santa Monica UCLA Medical Center Emergency Room for emergency medical treatment and evidence collection. A counselor from the Santa Monica Rape Treatment Center will be available at that time, free of charge.

Utilize campus and community support services:

(1) **Contact a Rape Services Consultant (RSC)** at the Women's Resource Center. RSCs have expertise in working with victims of rape or sexual assault. They can discuss options and alternatives, help identify the most appropriate support services, and provide information about medical care, psychological counseling, academic assistance, legal options, how to file a police report, and how to file a complaint through the Office of the Dean of Students. RSCs are available to assist UCLA faculty, staff, and students regardless of where or when the assault occurred. For assistance, contact the Women's Resource Center at (310) 206-8240 or go to 2 Dodd Hall and ask to speak to an RSC.

(2) **Contact the Rape Treatment Center** at Santa Monica UCLA Medical Center (310-319-4000) for free emergency medical treatment and counseling services.

Campus Discipline Process When the Assailant Is a Student

Those who believe that they are the victims of rape or other forms of sexual assault by a student on University properties or in conjunction with an official University function may file a complaint directly with the Office of the Dean of Students, 1206 Murphy Hall, <http://www.saonet.ucla.edu/dos/>.

Cases referred to the Office of the Dean of Students are treated under the hearing procedures set forth in the *UCLA Student Conduct Code*

(<http://www.saonet.ucla.edu/dos/SCC98.htm>).

Where the allegation is of rape or other forms of sexual assault, and the case is referred to the Student Conduct Committee, the following *additional* procedures shall apply:

(1) The complainant shall be entitled, for support, to have up to two persons of the complainant's choice accompany the complainant to the hearing. A support person may be called as a witness, and the fact that he or she is to act as a witness shall not preclude that person's attendance throughout the entire hearing. If a support person is also a witness, the committee chair (or the hearing officer) may require him or her to testify before the complainant. Neither of these persons shall be entitled to represent or defend the complainant. Similar rights shall be afforded to the accused student.

(2) The complainant shall have the right to be present during the entire hearing, notwithstanding the fact that the complainant is to be called as a witness.

(3) Evidence of the complainant's past sexual history, including opinion evidence, reputation evidence, and evidence of specific instances of the complainant's sexual conduct, shall not be admissible by the accused student unless the committee chair or hearing officer makes a specific finding of relevance after an offer of proof by the accused student. Under no circumstances is past sexual history admissible to prove consent. The offer of proof must be made and resolved by the panel before the complainant testifies.

(4) The hearing shall be closed to spectators.

Harassment

Sexual Harassment

Every member of the campus community should be aware that the University is strongly opposed to sexual harassment and that such behavior is prohibited both by law and by University policy.

Definitions

For explicit definitions of **sexual harassment**, refer to Section 102.09 of the Student Conduct Policies listed above.

Complaint Resolution

Experience has demonstrated that many complaints of sexual harassment can be effectively resolved through informal intervention. Individuals who experience what they consider to be sexual harassment are advised to confront the alleged offender immediately and firmly.

Additionally, an individual who believes that she or he has been sexually harassed may contact the alleged offender's supervisor and/or a Sexual Harassment Information Center counselor for help and information regarding sexual harassment complaint resolution or grievance procedures at one of the locations listed below as determined by the complainant's status at the University at the time of the alleged incident:

(1) Campus Ombuds Office, 1172 Career Center, (310) 825-7627, <http://www.saonet.ucla.edu/ombuds/> (for faculty, staff, and students)

(2) Women's Resource Center, 2 Dodd Hall, (310) 825-3945 (for faculty, staff, and students)

(3) Office of Residential Life, Residential Life Building, (310) 825-3401, <http://www.orl.ucla.edu/> (for students)

(4) Office of International Students and Scholars, 106 Bradley Hall, (310) 825-1681, <http://www.saonet.ucla.edu/intl/> (for international students)

(5) Student Psychological Services, 4223 Math Sciences, (310) 825-0768, or A3-062 Center for the Health Sciences, (310) 825-7985, <http://www.saonet.ucla.edu/sps.htm> (for students)

(6) Office of Vice Chancellor — Academic Personnel, 2147 Murphy Hall, (310) 206-9345, <http://www.apo.ucla.edu/apoweb/index.htm> (for faculty, including non-Senate academic appointees and student academic appointees when acting in the capacity of their non-Senate appointments)

(7) Campus Human Resources/Employee and Labor Relations Division, 200 UCLA Wilshire Center, (310) 794-0859, <http://www.chr.ucla.edu> (for campus staff employees and students when acting in the capacity of their staff appointments)

(8) Medical Center Human Resources Office, 924 Westwood Boulevard (Bank of America Building), Suite 200, (310) 794-0500, <http://149.142.193.6/healthnet/medctr.hr/> (for Medical Center staff employees and students when acting in the capacity of their staff appointments)

(9) UCLA Extension Dean's Office, 770 UCLA Extension (UNEX), (310) 825-5603, <http://www.unex.ucla.edu> (for UCLA Extension faculty, staff employees, and students)

Other Forms of Harassment

The University strives to create an environment which fosters the values of mutual respect and tolerance and is free from discrimination based on race, ethnicity, sex, religion, sexual orientation, disability, age, and other personal characteristics. Certainly harassment, in its many forms, works against those values and often corrodes a person's sense of worth and interferes with one's ability to participate in University programs or activities. While the University is committed to the free exchange of ideas and the full protection of free expression, the University also recognizes that words can be used in such a way that they no longer express an idea, but rather injure and intimidate, thus undermining the ability of individuals to participate in the University community. The *University of California Policies Applying to Campus Activities, Organizations, and Students* (hereafter referred to as *Policies*; <http://www.ucop.edu/ucophome/uwnews/aospol/toc.html>) presently prohibit a variety of conduct by students which, in certain contexts, may be regarded as harassment or intimidation.

For example, harassing expression which is accompanied by physical abuse, threats of violence, or conduct that threatens the health or safety of any person on University property or in connection with official University functions may subject an offending student to University discipline under the provisions of Section 102.08 of the *Policies*.

Similarly, harassing conduct, including symbolic expression, which also involves conduct resulting in damage to or destruction of any property of the University or property of others while on University premises may subject a student violator to University discipline under the provisions of Section 102.04 of the *Policies*.

Further, under specific circumstances described in the *Universitywide Student Conduct Harassment Policy* (<http://www.saonet.ucla.edu/dos/sexharas.htm>), students may be subject to University discipline for misconduct which may consist solely of expression. Copies of this *Policy* are available in the Office of the Dean of Students, 1206 Murphy Hall, or in any of the Harassment Information Centers listed below:

(1) Campus Ombuds Office, 1172 Career Center, (310) 825-7627, <http://www.saonet.ucla.edu/ombuds/>

(2) Women's Resource Center, 2 Dodd Hall, (310) 825-3945

(3) Office of Residential Life, Residential Life Building, (310) 825-3401, <http://www.orl.ucla.edu/>

(4) Office of International Students and Scholars, 106 Bradley Hall, (310) 825-1681, <http://www.saonet.ucla.edu/intl/>

(5) Student Psychological Services, 4223 Math Sciences, (310) 825-0768, or A3-062 Center for the Health Sciences, (310) 825-7985, <http://www.saonet.ucla.edu/sps.htm>

(6) Office of Fraternity and Sorority Relations, 118 Men's Gym, (310) 825-6322, <http://www.saonet.ucla.edu/csp/FSR/>

Complaint Resolution

One of the necessary measures in our efforts to assure an atmosphere of civility and mutual respect is the establishment of procedures which provide effective informal and formal mechanisms for those who believe that they have been victims of any of the above misconduct.

Many incidents of harassment and intimidation can be effectively resolved through informal means. For example, an individual may wish to confront the alleged offender immediately and firmly. An individual who chooses not to confront the alleged offender and who wishes help, advice, or information is urged to contact any of the Harassment Information Centers listed immediately above.

In addition to providing support for those who believe they have been victims of harassment, Harassment Information Centers offer persons the opportunity to learn about the phenomena

of harassment and intimidation; to understand the formal and informal mechanisms by which misunderstandings may be corrected and, when appropriate, student perpetrators may be disciplined; and to consider which of the available options is the most useful for the particular circumstances.

With regard to the *Universitywide Student Conduct Harassment Policy*, complainants should be aware that not all conduct which is offensive may be regarded as a violation of this *Policy* and may, in fact, be protected expression. Thus, the application of formal institutional discipline to such protected expression may not be legally permissible. Nevertheless, the University is committed to reviewing any complaint of harassing or intimidating conduct by a student and intervening on behalf of the complainant to the extent possible.

Faculty Code of Conduct

The entire Faculty Code of Conduct can be found in the *UCLA Faculty Handbook* (copies are available in the Academic Personnel Office, 3109 Murphy Hall, and at <http://www.apo.ucla.edu/apoweb/facultyhandbook/9.htm#9c>). Part IIA outlines faculty obligations to students and reads as follows:

Teaching and Students

Ethical Principles: "As teachers, the professors encourage the free pursuit of learning in their students. They hold before them the best scholarly standards of their discipline. Professors demonstrate respect for students as individuals and adhere to their proper roles as intellectual guides and counselors. Professors make every reasonable effort to foster honest academic conduct and to assure that their evaluations of students reflect each student's true merit. They respect the confidential nature of the relationship between professor and student. They avoid any exploitation, harassment, or discriminatory treatment of students. They acknowledge significant academic and scholarly assistance from them. They protect their academic freedom." (from 1966 AAUP statement, revised 1987)

Types of Unacceptable Conduct

(1) Failure to meet the responsibilities of instruction, including (a) arbitrary denial of access to instruction, (b) significant intrusion of material unrelated to the course, (c) significant failure to adhere, without legitimate reason, to the rules of the faculty in the conduct of courses, to meet class, to keep office hours, or to hold examinations as scheduled, (d) evaluation of student work by criteria not directly reflective of course performance, (e) undue and unexcused delay in evaluating student work.

(2) Discrimination against a student on political grounds or for reasons of race, religion, sex, sexual orientation, ethnic origin, national origin, ancestry, marital status, medical condition, status as a Vietnam-era veteran or disabled veteran or, within the limits imposed by law or University regulations, because of age or citi-

zenship or for other arbitrary or personal reasons.

(3) Knowing violation of University policy, including the pertinent guidelines, applying to nondiscrimination against students on the basis of handicap.

(4) Use of the position or powers of a faculty member to coerce the judgment or conscience of a student or to cause harm to a student for arbitrary or personal reasons.

(5) Participating in or deliberately abetting disruption, interference, or intimidation in the classroom.

Charges of Violation

If a student has reason to believe that a faculty member has violated the code, the student may consult with a member of the Academic Senate Grievance and Disciplinary Procedures Committee (3125 Murphy Hall, 310-825-3851) for help in deciding on appropriate action. If the student believes that formal discipline may be warranted, the alleged violator should be reported to the chair of the department and to the dean of the division or school with a request that a charge be filed with the Academic Senate Charges Committee. If the dean, in consultation with the vice chancellor of Academic Personnel, determines that there are not sufficient grounds for the administration to file a charge, the student may, after discussing the matter with a member of the Academic Senate Grievance and Disciplinary Procedures Committee, file such a charge in person if the student continues to feel it is warranted.

Residence for Tuition Purposes

Students who have not been living in California with intent to make it their permanent home for more than one year immediately before the residence determination date for each term in which they propose to attend the University must pay a nonresident tuition fee in addition to all other fees. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter, and for schools on the semester system, the day instruction begins for the semester.

Law Governing Residence

The rules regarding residence for tuition purposes at the University of California are governed by the California Education Code and implemented by Standing Orders of The Regents of the University of California. Under these rules adult citizens and certain classes of aliens can establish residence for tuition purposes. There are particular rules that apply to the residence classification of minors (see below).

Who Is a Resident?

Persons who are adult students (at least 18 years of age) may establish residence for tuition purposes in California if (1) they are U.S. citizens, (2) they are permanent residents or

other immigrants, or (3) they are nonimmigrants who are not precluded from establishing a domicile in the U.S. Nonimmigrants who are not precluded from establishing domicile in the U.S. include those who hold valid visas of the following types — A, E, G, H-1, H-4, I, K, L, O-1, O-3, or R. To establish residence students must be physically present in California for more than one year, and they must have come here with the intent to make California their home as opposed to coming to this state to go to school. Physical presence within the state solely for educational purposes does not constitute the establishment of California residence, regardless of the length of stay. Students must demonstrate their intention to make California their home by severing their residential ties with their former state of residence and establishing those ties with California. If these steps are delayed, the one-year durational period is extended until students have demonstrated both presence and intent for one full year. If their parents are not California residents or students were not enrolled in a regular session at any University of California campus prior to fall 1993, they are required to be financially independent in order to be a resident for tuition purposes. Their residence cannot be derived from their spouse or their parents.

Requirements for Financial Independence

Students are considered "financially independent" if one or more of the following apply: (1) they are at least 24 years of age by December 31 of the calendar year for which they are requesting residence classification; (2) they are a veteran of the U.S. Armed Forces; (3) they are a ward of the court or both parents are deceased; (4) they have legal dependents other than a spouse; (5) they are married, or a graduate student or a professional student, and they were not claimed as an income tax deduction by their parents or any other individual for the tax year immediately preceding the term for which they are requesting resident classification; or (6) they are a single undergraduate student and they were not claimed as an income tax deduction by their parents or any other individual for the two tax years immediately preceding the term for which they are requesting resident classification, and they can demonstrate self-sufficiency for those years and the current year. *Note:* Financial dependence is not a factor in determining residence status for graduate student instructors, graduate student teaching assistants, research assistants, junior specialists, postgraduate researchers, graduate student researchers, and teaching associates who are employed 49 percent or more of full time or awarded the equivalent in University-administered funds (e.g., grants, stipends, fellowships) in the term for which classification is sought.

Establishing Intent to Become a California Resident

Indications of students' intent to make California their permanent residence can include the

following: registering to vote and voting in California elections; designating California as their permanent address on all school and employment records, including military records if they are in the military service; obtaining a California driver's license or, if they do not drive, a California Identification Card; obtaining California vehicle registration; paying California income taxes as a resident, including taxes on income earned outside California from the date they establish residence; establishing a California residence in which they keep their personal belongings; and licensing for professional practice in California. The absence of these indicia in other states during any period for which students claim residence can also serve as an indication of their intent. Documentary evidence is required, and all relevant indications are considered in determining the classification. Intent is questioned if students return to their prior state of residence when the University is not in session.

General Rules Applying to Minors

If students are unmarried minors (under age 18), the residence of the parent with whom they live is considered to be their residence. If they have a parent living, they cannot change their residence by their own act, by the appointment of a legal guardian, or by the relinquishment of their parent's right of control. If students live with neither parent, their residence is that of the parent with whom they last lived. Unless they are minor aliens present in the U.S. under the terms of a nonimmigrant visa which precludes them from establishing domicile in the U.S., students may establish their own residence when both their parents are deceased and a legal guardian has not been appointed. If they derive California residence from a parent, that parent must satisfy the one-year durational residence requirement.

Specific Rules Applying to Minors

(1) **Divorced or Separated Parents.** Students may be able to derive California resident status from a California resident parent if they move to California to live with that parent on or before their 18th birthday. If they begin residing with their California parent after their 18th birthday, they are treated like any other adult student coming to California to establish residence.

(2) **Parent of Minor Moves from California.** Students may be entitled to resident status if they are minor U.S. citizens or eligible aliens whose parent(s) was a resident of California who left the state within one year of the residence determination date if (a) they remained in California after their parent(s) departed, (b) they enroll in a California public postsecondary institution within one year of their parent(s) departure, and (c) once enrolled, they maintain continuous attendance in that institution. Financial independence is not required in this case.

(3) **Two-Year Care and Control.** Students may be entitled to resident status if they are U.S. citizens or eligible aliens and they have lived continuously with an adult who is not their

parent for at least two years prior to the residence determination date. The adult with whom they are living must have been responsible for their care and control for the entire two-year period and must have been residing in California during the one year immediately preceding the residence determination date.

Exemptions from Nonresident Tuition

(1) **Member of the Military.** If students are members of the U.S. military stationed in California on active duty, unless they are assigned for educational purposes to a state-supported institution of higher education, they may be exempt from the nonresident tuition fees until they have lived in California long enough to become a resident. They must provide the residence deputy on campus with a statement from their commanding officer or personnel officer stating that their assignment to active duty in California is not for educational purposes. The letter must include the dates of their assignment to the state.

(2) **Spouse or Other Dependents of Military Personnel.** Students are exempt from payment of the nonresident tuition fee if they are a spouse or a natural or adopted child or stepchild who is a dependent of a member of the U.S. military stationed in California on active duty. The exemption is available until they have lived in California long enough to become a resident. Students must petition for a waiver of the nonresident tuition fee each term they are eligible. If they are enrolled in an educational institution and the member of the military is transferred on military orders to a place outside California where he or she continues to serve in the Armed Forces, or the member of the military retires from active duty immediately after having served in California on active duty, they may retain this exemption under conditions listed above.

(3) **Child or Spouse of Faculty Member.** To the extent funds are available, if students are an unmarried dependent child under age 21 or the spouse of a member of the University faculty who is a member of the Academic Senate, they may be eligible for a waiver of the nonresident tuition fee. Confirmation of the faculty member's membership on the Academic Senate must be secured each term this waiver is granted.

(4) **Child or Spouse of University Employee.** Students may be entitled to resident classification if they are an unmarried dependent child or the spouse of a full-time University employee whose assignment is outside California (e.g., Los Alamos Scientific Laboratory). Their parent's or spouse's employment status with the University must be ascertained each term.

(5) **Child of Deceased Public Law Enforcement or Fire Suppression Employee.** Students may be entitled to a waiver of the nonresident tuition fee if they are the child of a deceased public law enforcement or fire suppression employee who was a California

resident at the time of his or her death and who was killed in the course of fire suppression or law enforcement duties.

(6) **Dependent Child of a California Resident.** If students have not been an adult resident of California for more than one year and are the natural or adopted dependent child of a California resident who has been a resident for more than one year immediately prior to the residence determination date, they may be entitled to a waiver of the nonresident tuition until they have resided in California the minimum time necessary to become a resident, so long as continuous attendance is maintained at an institution.

Temporary Absences

If persons are nonresident students who are in the process of establishing a residence for tuition purposes and they return to their former home during noninstructional periods, their presence in the state is presumed to be solely for educational purposes and only convincing evidence to the contrary rebuts this presumption. **Students who are in the state solely for educational purposes are NOT classified as residents for tuition purposes regardless of the length of their stay.**

If persons are students who have been classified as residents for tuition purposes and they leave the state temporarily, their absence could result in the loss of their California residence. The burden is on students (or their parents if they are minors) to verify that they did nothing inconsistent with their claim of a continuing California residence during their absence. Steps that students (or their parents) should take to retain a California residence include the following:

(1) Continue to use a California permanent address in all records — educational, employment, military, etc.

(2) Continue to satisfy California tax obligations. If students are claiming California residence, they are liable for payment of income taxes on their total income from the date they establish their residence in the state, including income earned in another state or country.

(3) Retain a California voter's registration and vote by absentee ballot.

(4) Maintain a California driver's license and vehicle registration. If it is necessary to change the driver's license or vehicle registration, students must change them back within the time prescribed by law.

Petition for Resident Classification

Students may obtain a petition at 1113 Murphy Hall for a change of classification from nonresident to resident status. All changes of status must be initiated prior to the first day of classes for the term for which they intend to be classified as residents.

Time Limitation on Providing Documentation

If additional documentation is required for residence classification but is not readily accessible, students are allowed until the end of the applicable term to provide it.

Incorrect Classification

Students who were incorrectly classified as residents are subject to nonresident classification and to payment of all nonresident tuition fees not paid. If they concealed information or furnished false information and were classified incorrectly as a result, you are also subject to University discipline. Resident students who become nonresidents must immediately notify the residence deputy.

Inquiries and Appeals

Inquiries regarding residence requirements, determination, and/or recognized exceptions should be directed to the Residence Deputy, Office of the Registrar, 1113 Murphy Hall, 405 Hilgard Avenue, Los Angeles, CA 90024-1429 (310-825-3447; <http://www.registrar.ucla.edu/faq/res.htm>) or to the Legal Analyst — Residence Matters, 1111 Franklin Street, 8th Floor, Oakland, CA 94607-5200. **NO OTHER UNIVERSITY PERSONNEL ARE AUTHORIZED TO SUPPLY INFORMATION RELATIVE TO RESIDENCE REQUIREMENTS FOR TUITION PURPOSES.**

Students are cautioned that this summary is NOT a complete explanation of the law regarding residence. Note that changes may be made in the residence requirements between the publication of this statement and the relevant residence determination date. Any student, following a final decision on residence classification by the residence deputy, may appeal in writing to the legal analyst within 45 days of notification of the residence deputy's final decision.

Privacy Notice

All of the information requested on the Statement of Legal Residence form is required (by the authority of Standing Order 110.2 (a)-(d) of The Regents of the University of California) for determining whether or not students are legal residents for tuition purposes. Registration cannot be processed without this information. The Registrar's Office on campus maintains the requested information. Students have the right to inspect University records containing the residence information requested on the form.

Financial Aid Minimum Progress Standards

Federal regulations require UCLA to establish, publish, and apply standards of satisfactory academic progress for financial aid eligibility. Students who fail to meet minimum progress standards become ineligible to receive financial aid until they are in compliance with the standards. If, during any term, students expect they cannot meet the satisfactory academic progress

requirements listed below, they should contact the Financial Aid Office immediately for further advising.

Undergraduate Students

Qualitative Standard

The qualitative standard is enforced by the college or school. Students are notified by their academic department if they fall below the required grade-point average (GPA).

Quantitative Standard

This standard is enforced by the Financial Aid Office on the basis of the number of units (including remedial courses) successfully completed within any given number of regular session terms. It may differ from the college/school requirement.

All students receiving aid as full-time students must be enrolled in at least 12 units in order to obtain funds. To be eligible for financial aid as full-time students, they must successfully complete at least 24 units in their first academic year at UCLA to maintain satisfactory academic progress. Thereafter, students must successfully complete 90 units by the end of the ninth term, 123 units by the end of the twelfth term, 156 units by the end of the fifteenth term, and 180 units by the end of the seventeenth term.

After 17 terms of enrollment as a full-time student or the equivalent as a part-time student, no further need-based financial aid is granted.

The measurement of progress occurs at the end of the academic year. The schedule above is adjusted appropriately for students ending an academic year with a different number of terms completed than is listed above. If students enter UCLA in advanced standing, the number of terms for which they are eligible for aid is reduced proportionally to the number of transfer units credited to their record. For example, students who are credited with 90 transfer units would have only 11 terms of financial aid eligibility as an undergraduate at UCLA.

If persons are continuing students at UCLA at the time they apply for financial aid, their progress is measured by the satisfactory academic progress chart to determine their eligibility (i.e., they must have successfully completed 57 units if they attended UCLA for six terms). They would then have only 11 terms of financial aid eligibility.

Nonstandard Enrollment

Progress for students approved for part-time enrollment by the Registrar's Office is measured by a modified schedule. Part-time students should inform the Financial Aid Office of their enrollment arrangements so their aid can be adjusted accordingly. Any units earned during Summer Sessions are applied toward the unit count for the following year. Summer Sessions are not included as part of the overall term count.

Successful Completion

To successfully complete units, students must receive a grade of A, B, C, D, or P (S for graduate students) in a course. Grades of F, I, NP (U for graduate students), NR (No Report), and DR (Deferred Report) do not earn completed units. An I or DR grade that is replaced with a passing grade does earn units.

Withdrawal and Cancellation

Withdrawal after the first day of classes during a term counts as a term attended when determining overall term and unit count eligibility, unless students do not attend any classes for the given term and receive a 100 percent refund of all fees. Cancellation of registration on or before the first day of classes does not count as a term attended when determining term or unit count eligibility. Beginning with Fall Quarter 1997, administrative cancellation does not count toward the overall term or unit count eligibility; however, cancellation in any term prior to Fall Quarter 1997 does count toward the term and unit counts.

Disqualification and Reinstatement

The Financial Aid Office monitors satisfactory progress annually after Winter Quarter grades are recorded. Progress is measured according to the number of terms students have attended and the number of units they have successfully completed.

If students have not met the requirements shown on the schedule, their financial aid is discontinued until the deficiencies are satisfied. They may use Summer Sessions or completion of extra units during regular academic terms to make up deficiencies.

Financial aid eligibility is reinstated for the term following the term in which students reestablish compliance with the units-per-term schedule. For example, if they successfully complete 16 units in Fall Quarter and therefore make up the deficiency, they become eligible for financial aid in Winter Quarter. Financial aid is then awarded on the basis of their need and the availability of funds.

Appeal Process

Students who fail to meet the satisfactory academic progress standards because of debilitating illness, prolonged hospitalization, death in the immediate family, or other such mitigating circumstances may appeal their disqualification.

To appeal, students should submit a letter and supporting documentation to the Financial Aid Appeal Committee explaining the circumstances and how they affected their ability to meet the requirements. The committee evaluates the request based on the rationale and evidence provided.

Graduate Students

Qualitative Standard

The qualitative standard is enforced by the dean of the Graduate Division in consultation with the department.

Quantitative Standard

Students must successfully complete at least 12 units per term of enrollment to be eligible for financial aid as full-time students. Approved study loads of less than 12 units result in proportionally reduced aid for that term and are charged against the maximum period of eligibility at the appropriate proportional rate.

Disqualification and Appeal Process

If students fail to meet the qualitative and quantitative requirements, their financial aid is discontinued until the deficiencies are made up. Appeals are reviewed by their academic department, the dean of the Graduate Division, and/or the Financial Aid Appeal Committee.

Period of Eligibility

The degree program to which students are admitted determines the maximum number of terms for which they can receive need-based financial aid. Terms for which no need-based aid is received are considered when determining the remaining number of terms of financial aid eligibility.

Students who are in a credential program or a professional master's program (other than Master of Fine Arts) are eligible for a maximum of nine terms of need-based financial aid.

Students who are in a Master of Fine Arts program are eligible to apply for aid for the first 12 terms of enrollment. If students are in an M.A. or M.S. program, a doctoral program, or a combination master's/doctoral program, their eligibility expires after 27 terms of enrollment. Students who change their program may be accommodated through an extension of terms of eligibility. The extension should be secured at the time the program change is made.

Professional Schools

Students attending the Schools of Dentistry, Law, and Medicine are covered by criteria established by the respective school.

Grading Regulations

Assigning a Grade

The instructor in charge of a course is responsible for determining the grade of each student in the course. The standards for evaluating student performance are based on the course description as approved by the appropriate course committee.

The final grade in the course is based on the instructor's evaluation of the student's achievement in the course. When on an examination or other work submitted by a student, the student is suspected of having engaged in plagiarism or otherwise having cheated, the suspected infraction is to be reported to the appropriate administrative officer of the University for consideration of disciplinary proceedings against the student. Until such proceedings, if any, have been completed, the grade DR (Deferred Report) is assigned for that course. If in such disciplinary proceedings it is determined that the student did engage in plagiarism or otherwise cheat, the administrative officer, in

addition to imposing discipline, reports back to the instructor of the course involved, the nature of the plagiarism or cheating. In light of that report, the instructor may replace the grade DR with a final grade that reflects an evaluation of that which may fairly be designated as the student's own achievement in the course as distinguished from any achievement that resulted from plagiarism or cheating.

Grade Complaints

A grade may be appealed, on any reasonable grounds, to the instructor, the chair of the department, and the dean of the division or school.

If the student believes that the instructor has violated the Faculty Code of Conduct by assigning the grade on any basis other than academic, the matter should first be taken up with the instructor. If the matter is not resolved, the student may go for counsel to the Campus Ombuds Office or may follow the procedures for the formal filing of charges (see Faculty Code of Conduct earlier in the Appendix). If a charge is sustained by the Academic Senate Committees on Charges and on Privilege and Tenure, an ad hoc committee is appointed within two weeks to review the disputed grade, and any warranted change is made within four weeks.

Correction of Grades

All grades, except DR, I, and IP, are final when filed by the instructor in the end-of-term course report. However, the Registrar's Office is authorized to change a final grade (1) on written request of an instructor, provided that a clerical or procedural error is the reason for the change or (2) on written request of the chair of the UCLA Academic Senate in cases where it has been determined by the Committee on Privilege and Tenure that an instructor has assigned a grade on any basis other than academic grounds. No change of grade may be made on the basis of reexamination or, with the exception of the I and IP grades, the completion of additional work. Any grade change request made more than one year after the original filing must be validated for authenticity of the instructor's signature by the department chair. Any grade change request made by an instructor who has left the University must be countersigned by the department chair. All grade changes are recorded on the transcript.

Policy on Alternate Examination Dates

In compliance with Section 92640(a) of the California Education Code, the University must accommodate requests for alternate examination dates at a time when that activity would not violate a student's religious creed. This requirement does not apply in the event that administering the test or examination at an alternate time would impose an undue hardship which could not reasonably be avoided. Accommodation for alternate examination dates will be worked out directly and on an individual

basis between the student and the faculty member involved.

(1) In general, students should make such requests of the instructor during the first two weeks of any given academic term, or as soon as possible after a particular examination date is announced by the instructor.

(2) Students unable to reach a satisfactory arrangement with their instructor should contact the Campus Ombuds Office, 1172 Career Center, or the Office of the Dean of Students, 1206 Murphy Hall, for assistance.

(3) Instructors who have questions or who wish to verify the nature of the religious event or practice involved should contact the Campus Ombuds Office or the Office of the Dean of Students for assistance.

Undergraduate Final Examinations

No student shall be excused from assigned final examinations, except as provided above in the policy on alternate examination dates and as provided in the following three paragraphs.

The instructor in charge of an undergraduate course is responsible for assigning the final grade in the course. The final grade shall reflect the student's achievement in the course and shall be based on adequate evaluation of that achievement. The instructor's method of evaluation must be announced at the beginning of the course. The methods may include a final written examination, a term paper, a final oral examination, a take-home examination, or other evaluation device. Evaluation methods must be of reasonable duration and difficulty and must be in accord with applicable departmental policies. Final written examinations may not exceed three hours' duration and are given only at the times and places established and published by the department chair and the Registrar's Office.

At the end of the term in which a student is expected to be graduated, a student's major department may examine him or her in the field of the major, may excuse the student from final examinations in courses offered by the department during that term and, with the approval of the Undergraduate Council, assign a credit value to such general examination.

An instructor shall, if he or she wishes, release to individual students their original final examinations (or copies). This may be done by any method which insures the students' right to privacy. Otherwise, the instructor shall retain final examination materials, or a copy thereof, until the end of the next succeeding regular term of instruction, during which period students shall have access to their examinations.

Disclosure of Student Records

Pursuant to the Federal Family Educational Rights and Privacy Act, the California Education Code, and the University of California Policies Applying to the Disclosure of Information

from Student Records, students at UCLA have the right to (1) inspect and review records pertaining to themselves in their capacity as students, except as the right may be waived or qualified under the Federal and State Laws and the University Policies, (2) have withheld from disclosure, absent their prior consent for release, personally identifiable information from their student records, except as provided by the Federal and State Laws and the University Policies, (3) inspect records maintained by UCLA of disclosures of personally identifiable information from their student records, (4) seek correction of their student records through a request to amend the records or, if such request is denied, through a hearing, and (5) file complaints with the U.S. Department of Education regarding alleged violations of the rights accorded them by the Federal Act.

UCLA, in accordance with the Federal and State Laws and the University Policies, has designated the following categories of personally identifiable information as "public information" which UCLA may release and publish without the student's prior consent: name, address (local/mailling, permanent, and/or e-mail), telephone numbers, major field of study, dates of attendance, number of course units in which enrolled, degrees and honors received, the most recent previous educational institution attended, participation in officially recognized activities (including intercollegiate athletics), and the name, weight, and height of participants on intercollegiate athletic teams.

Students who do not wish certain items (i.e., name, local/mailling, permanent, and/or e-mail address, telephone numbers, major field of study, dates of attendance, number of course units in which enrolled, and degrees and honors received) of this "public information" released and published may so indicate through URSA OnLine (<http://www.ursa.ucla.edu/>). To restrict the release and publication of the additional items in the category of "public information," complete the Decline to Release form available from Enrollment and Degree Services, 1113 Murphy Hall.

Student records which are the subject of the Federal and State Laws and the University Policies may be maintained in a variety of offices, including the Registrar's Office, Office of the Dean of Students, UCLA Career Center, Graduate Division, and the offices of a student's college or school and major department. Students are referred to the *UCLA Campus and CHS Directory* which lists all the offices that may maintain student records, together with their campus address and telephone number. Students have the right to inspect their student records in any such office subject to the terms of the Federal and State Laws and the University Policies. Inspection of student records maintained by the Registrar's Office is by appointment only and must be arranged 24 hours in advance. Call (310) 825-3801 or inquire at Academic Record Services, 1134 Murphy Hall.

A copy of the Federal and State Laws, the University Policies, and the *UCLA Campus and CHS Directory* may be inspected in the office of the Information Practices Coordinator, 500 UCLA Wilshire Center. Information concerning students' hearing rights may be obtained from that office and from the Office of the Dean of Students, 1206 Murphy Hall.

In addition to the public information described above, information related to students' Social Security number, sex, and marital status, and the name(s), address(es), and telephone number(s) of their parents or next of kin are made available to the UCLA External Affairs Department for use in alumni, development, and public relations activities. To restrict the release of this additional information, complete a Request for External Affairs Information Restriction form available from Enrollment and Degree Services, 1113 Murphy Hall.

UCLA Retention/Graduation Rates and Time to Degree

Current retention and graduation rates are the highest on record for UCLA and among the highest rates for public universities anywhere in the country. One-year retention rates for new undergraduates have been above 90 percent for over a decade. For students entering over a three-year span from Fall Quarter 1995 to Fall Quarter 1997, more than 95 percent of new freshmen and 93 percent of new transfers were still enrolled at UCLA one year later.

Graduation rates are high and still increasing. Over the past three years the four-year, five-year, and six-year graduation rates for cohorts of entering fall freshmen averaged 38, 74, and 79 percent respectively, up from 29, 68, and 73 percent for the same set of indicators at a point in time six years ago. More than 80 percent of all fall freshmen entering from 1986 to 1991 have now graduated from UCLA; final graduation rates of better than 82 percent are projected for all freshmen cohorts arriving since 1992.

Over the past three years the two-year, three-year, and four-year graduation rates for cohorts of entering fall transfers have averaged 37, 72, and 80 percent respectively, up from 23, 65, and 74 percent for the same set of indicators at a point in time six years ago. More than 80 percent of all fall transfers entering from 1988 to 1993 have now graduated from UCLA; final graduation rates of better than 82 percent are projected for all transfer cohorts arriving since 1994. The graduation rates listed above refer exclusively to degrees awarded by UCLA. Students who transfer to and graduate from another UC campus or university are not included.

Time to degree for UCLA undergraduates declined significantly during the 1990s. During the past four years (1994-95 to 1997-98), more than 12,800 baccalaureate degrees were awarded to students who entered directly from high school. The average number of quarters

registered at UCLA was 13.22, declining from an average of 13.74 quarters for similar graduates in 1989-90. Among the recent graduates, 50 percent were registered for 12 quarters or less (i.e., four years or less), 59 percent for 13 quarters or less, 70 percent for 14 quarters or less, and 92 percent for 15 quarters or less (i.e., five years or less).

During the same four years (1994-95 to 1997-98), more than 8,900 baccalaureate degrees were awarded to students who entered as transfers. The average number of quarters registered at UCLA was 7.64, declining from an average of 8.25 quarters for similar graduates in 1989-90. Among the recent graduates, 42 percent were registered for six quarters or less (i.e., two years or less), 57 percent for seven quarters or less, 68 percent for eight quarters or less, and 87 percent for 15 quarters or less (i.e., three years or less).

Additional information on retention and graduation rates is available at <http://www.apb.ucla.edu>.

Campus Security Information

UCLA Police Department

The UCLA Police Department (310-825-1491; <http://www.ucpd.ucla.edu>), located at Westwood Plaza and Circle Drive South, has 56 sworn California State Police Officers empowered by the State of California with the authority to enforce all state and local laws. UCLA police officers patrol the campus 24 hours a day, 365 days a year. They enforce all applicable local, state, and federal laws, arrest violators, investigate and suppress crime, and provide a full range of police services and community safety programs.

The department is linked by computer to city, state, and federal criminal justice agencies that provide access to information concerning criminal records, wanted persons, stolen property, and vehicle identification. The Detective Bureau handles all criminal investigations, and detectives conduct interviews, arrest violators, execute search warrants, and file cases with the city attorney's office.

Incident Reporting

UCLA police officers have primary jurisdiction over the UCLA campus, Center for the Health Sciences, and University Apartments South. The City of Los Angeles Police Department does not handle calls for service on campus. All requests for police service should be made to the UCLA Police Department. All crime occurring on campus and in the Center for the Health Sciences should be reported immediately to the department to ensure appropriate action is taken. The University endorses a policy that strongly encourages victims to report all incidents to the department anytime of the day or night. Crimes occurring off campus should be reported immediately to the local law enforcement agency.

Police, fire, or medical EMERGENCIES can be reported by dialing **911** from any telephone on campus. All telephones (University, private, public) located on University grounds are tied into the 911 emergency system. Emergencies can also be reported by using the blue-hooded Emergency Reporting Telephones located throughout the campus.

NONEMERGENCY calls for service can be made by contacting the department at (310) 825-1491.

Crime Statistics

Statistics on FBI Crime Index offenses (violent and property crime) and other offenses committed between 1994 and 1998, as well as a crime trend overview, are available at <http://www.ucpd.ucla.edu/ucpd/stats96-98.htm>.

Community Service Officers

The UCLA Police Department employs approximately 125 student community service officers (CSOs; <http://www.ucpd.ucla.edu/ucpd/cso/index.htm>) who are the "eyes and ears" (trained observers) of the department and act as nonintervention visual deterrents to crime. CSOs wear high-visibility uniforms and carry two-way police radios. They are dispatched by the department's Communications Center and provide a direct link to police, fire, or medical aid. CSOs provide security service to a number of campus buildings, including residence halls and libraries. They are most well-known for the Campus Escort Service and the Evening Van Service. The Campus Escort Service operates every day of the year from dusk to 1 a.m. Individuals requesting the service call the Communications Center; a CSO is then dispatched to walk them safely to their destination. The service is available to UCLA students, staff, faculty, and visitors and operates on campus and in the nearby residential areas. The Evening Van Service provides a safe and convenient mode of transportation around campus at night and is accessible to people with disabilities.

Crime Prevention

An involved community is one of the best defenses against crime. Therefore, the department is committed to a community policing philosophy and supports a proactive Crime Prevention Unit (<http://www.ucpd.ucla.edu/ucpd/crimepre.htm>) that works closely with community members to make UCLA a safer place to work, live, and learn. The unit gives presentations on vehicle and residential security, personal safety, office and equipment security, and rape prevention. Other programs are developed to meet the special needs of the campus community. Brochures and literature on crime prevention and personal safety are available. The Women's Resource Center (WRC) and the Crime Prevention Unit provide presentations on sexual assault issues. Topics include acquaintance rape education and prevention, personal safety and prevention techniques, recovery from sexual assault, clear communications, pornography, and the continuum of violence and rape in society. The educational pro-

grams, tailored to meet the needs of individual audiences, include films, discussion groups, lectures, role-plays, and communication exercises. The WRC reaches students through the residence halls, sororities, fraternities, athletic teams, student clubs, and various student functions. Services include crisis intervention and advocacy for victims of sexual assault; short-term counseling and referrals for survivors, their families, and friends; support groups for rape survivors; and self-defense classes and a lending library. The WRC works closely with the student housing offices and the police department to increase campus safety.

Several programs have been designed to increase the level of crime awareness and campus safety at UCLA. All incidents of criminal activity which pose a potential threat to the campus are brought immediately to the attention of the community through *Campus Alert Bulletins* (<http://www.ucpd.ucla.edu/ucpd/alerts.htm>). With the combined efforts of the Crime Prevention Unit, the Women's Resource Center, and the CSOs, incidents of sexual assault on campus have been reduced.

Alcohol and Substance Abuse Education

Students with alcohol or substance abuse problems create safety and health risks for themselves and others. Such abuses also can result in a wide range of emotional and behavioral problems. Therefore, UCLA makes available to every student a variety of alcohol and substance abuse awareness programs which are designed to discourage the use of illicit substances and to educate students on the merits of legal and responsible alcohol consumption. Student Psychological Services (310-825-7985; <http://www.saonet.ucla.edu/sps.htm>) provides counseling and referral assistance to students who are troubled by alcohol or substance abuse problems. The service is completely confidential and free to regularly enrolled students. All information and counseling is treated in accordance with University Policies and State and Federal Laws. Any decision to seek assistance is not used in connection with any academic determination or as a basis for disciplinary proceedings.

Policies

UCLA has been designated drug free, and only under certain conditions is alcohol consumption permitted (none is permitted at athletic events). In keeping with its educational mission, the University assumes the responsibility to better inform the UCLA community about alcohol and substance abuse.

The sale, manufacture, distribution, or possession of any controlled substance without a prescription is illegal under both State and Federal Laws. Such laws are strictly enforced by UCLA police officers. Student violators are subject to University disciplinary action, criminal prosecution, fine, and imprisonment. Refer to the UCLA policies on substance abuse for further information.

The sale, consumption, and distribution of alcohol on the UCLA campus is restricted by the UCLA alcohol policy and California State Law. Organizations or groups violating alcohol or substance policies or laws may be subject to sanctions by the University.

Residential Housing

UCLA is the size of a small city and provides residential housing to approximately 18,000 students. Housing facilities range from apartments designed for students with children to multi-student apartment complexes to high-rise student residence halls. The UCLA Police Department and student housing staff work hand in hand to create a safe and comfortable living and learning environment.

Campuswide security and safety programs for residents are held throughout the year to increase crime potential awareness and improve campus safety. To keep residents immediately informed of major crime or threats to the campus, *Crime Alert Bulletins* are posted in residential areas by the housing staff. However, residents must take an active role to ensure their own safety by exercising simple commonsense crime prevention techniques. Because the campus is open 24 hours a day, visitation to residence halls and apartments is not restricted. All residence halls have 24-hour access control on entrance doors, and during the evening hours access control monitors are stationed at each entrance. Police officers and CSOs are also assigned to the residence halls.

UCLA-affiliated organizations that maintain off-campus facilities are under the shared jurisdiction of their local police department and the UCLA Police Department, which provides assistance to students, faculty, and staff and/or referrals to neighboring police departments.

Safety Tips

The nature of the studies and research done at UCLA requires many of the campus buildings to be open 24 hours. Because the campus is so large and adjacent to the greater Los Angeles community, individuals with criminal intent are able to access the University grounds. Regardless of the time of day or night and no matter where persons are on campus, they should be alert and aware of their surroundings and exercise good commonsense safety precautions. Anyone parking on campus should remember to lock their vehicles and consider investing in a steering wheel locking device and/or alarm. Take advantage of all of the safety services provided by the University and the UCLA Police Department. Use the Campus Escort Service when walking at night. Keep room and apartment doors locked at all times. Most important, anyone needing assistance should not hesitate to contact the department.

Appendix B

University Administrative Officers

Terms of Regents (<http://www.ucop.edu/regents/>) appointed by the Governor expire March 1 of the year in parentheses. The Student Regent (Michelle K. Pannor) and Alumni Regents serve a one-year term beginning July 1 and ending June 30 of the year listed.

Regents Ex Officio

Governor of California
Gray Davis
Lieutenant Governor of California
Cruz M. Bustamante
Speaker of the Assembly
Antonio R. Villaraigosa
State Superintendent of Public Instruction
Delaine Eastin
President of the Alumni Association of the University of California
Kent M. Vining
Vice President of the Alumni Association of the University of California
Peter J. Taylor
President of the University
Richard C. Atkinson

Appointed Regents

William T. Bagley (2002)
Frank W. Clark, Jr. (2000)
Ward Connerly (2005)
John G. Davies (2004)

are endowed professorships or “chairs,” which support the educational and research activities of distinguished members of the faculty.

As this catalog goes to press, UCLA has 144 endowed chairs which have been approved by the Office of the President of the University of California, as follows. (Asterisks indicate new chairs which have been approved by the Office of the President since publication of the 1997-99 *UCLA General Catalog*.)

School of the Arts and Architecture

S. Charles Lee Chair in Architecture and

Urban Design

Harvey S. Perloff Chair

UCLA Art Council Professorship of Art

Graduate School of Education and Information Studies

Allan Murray Cartter Chair in Higher Education

*George F. Kneller Chair in Education and

Anthropology

George F. Kneller Chair in Education and

Philosophy

School of Engineering and Applied Science

L.M.K. Boelter Chair in Engineering

*Roy and Carol Doumani Chair in Biomedical

Engineering

Norman E. Friedmann Chair in Knowledge

Sciences

Hughes Aircraft Company Chair in Electrical

Engineering

Hughes Aircraft Company Chair in

Manufacturing Engineering

Levi James Knight, Jr., Chair in Engineering

Nippon Sheet Glass Company Chair in

Materials Science

Northrop Chair in Electrical Engineering/

Electromagnetics

Ralph M. Parsons Chair in Chemical

Engineering

Ben Rich Lockheed Martin Chair in

Aeronautics

Rockwell International Chair in Engineering

TRW Chair in Electrical Engineering

School of Law

Harry Graham Balter Chair in Law

Connell Professorship of Law

Richard C. Maxwell Chair in Law

Arjay and Frances Fearing Miller Chair in Law

David G. and Dallas P. Price Chair in Law

Security Pacific Bank Chair

William D. Warren Chair in Law

College of Letters and Science

*Armen A. Alchian Chair in Economic Theory

Maurice Amado Chair in Sephardic Studies

Armenian Educational Foundation Chair in

Modern Armenian History

Henry J. Bruman Chair in German History

Ralph Bunche Chair in International Studies

Development Studies

Courtaulds Chair in Chemistry

*Norman Cousins Endowed Chair in

Psychoneuroimmunology

Appendix C

Endowed Chairs

Although UCLA is a public institution, private gifts are increasingly important in maintaining the quality of the University's three missions of teaching, research, and community service. Among the principal forms of private support

*Navin and Pratima Doshi Chair in Premodern Indian History
 Mr. and Mrs. C.N. Flint Professorship of Philosophy
 *Evan Frankel Endowed Chair in English
 Gloria and Paul Griffin Chair in Philosophy
 Marvin Hoffenberg Chair in American Politics and Public Policy
 Franklin D. Murphy Chair in Italian Renaissance Studies
 Narekatsi Chair in Armenian Studies
 "1939" Club Chair
 President's Chair in Developmental Immunology
 Hans Reichenbach Chair in Scientific Philosophy
 David S. Saxon Presidential Chair in Physics
 Louis B. Slichter Chair in Geophysics and Planetary Physics
 Charles Speroni Chair in Italian Literature and Culture
 UCLA Alumni and Friends of Japanese Ancestry Chair in Japanese American Studies
 UCLA Foundation Chair
 Eugen Weber Chair in Modern European History
 Alexander von Humboldt Endowed Chair in Geography
 Saul Winstein Chair in Organic Chemistry

John E. Anderson Graduate School of Management

Allstate Chair in Insurance and Finance
 Andersen Worldwide Chair in Management
 John E. Anderson Chair in Management
 Marion Anderson Chair in Management
 California Chair in Real Estate and Land Economics
 Edward W. Carter Chair in Business Administration
 William M. Cockrum Professorship in Entrepreneurial Finance
 James A. Collins Chair in Management
 Warren C. Corder Chair in Money and Financial Markets
 Ernst and Young Chair in Accounting
 Henry Ford II Chair in International Management
 Goldyne and Irwin Hearsh Chair in Money and Banking
 IBM Chair in Computers and Information Systems
 Joseph Jacobs Chair in Entrepreneurial Studies
 Neil Jacoby Chair in Management
 *Betsy Wood Knapp Professorship for Innovation and Creativity
 *Bud Knapp Professorship
 Kommerstad Chair in Financial Markets
 Harry and Elsa Kunin Chair in Business and Society
 William E. Leonhard Chair in Management
 Chauncey J. Medberry Chair in Management
 Howard Noble Chair in Management
 Paine Chair in Management
 *Price Waterhouse Chair in Accounting
 George Robbins Chair in Management
 Sanford and Betty Sigoloff Chair in Corporate Renewal
 Times Mirror Chair in Management Strategy and Policy

Ho-Su Wu Chair in Management

School of Medicine

William S. Adams, M.D., Chair in Medicine
 Louis D. Beaumont Chair in Surgery
 *Jerome L. Belzer Chair in Medical Research
 Bowyer Professorship of Medical Oncology
 Judson Braun Chair in Biological Psychiatry
 *Rubin Brown Chair in Pediatric Neurology
 Joseph Campbell Chair in Child Psychiatry
 Iris Cantor Chair in Breast Imaging
 Edward W. Carter Chair in Internal Medicine
 Castera Chair in Cardiology
 Tony Coelho Chair in Neurology
 *Norman Cousins Endowed Chair in Psychoneuroimmunology
 Crump Chair in Medical Engineering
 M. Philip Davis Chair in Microbiology and Immunology
 Dumont-UCLA Chair in Transplantation Surgery
 Max Factor Family Foundation Chair in Nephrology
 Charles Kenneth Feldman Chair in Ophthalmology
 *Laraine and David Gerber Chair in Ophthalmology
 Dolly Green Chair in Ophthalmology
 Maud Cady Guthman Chair in Cardiology
 *Stefan Hatos Endowed Chair in Psychiatry and Biobehavioral Sciences
 *Ronald S. Hirschberg Chair in Translational Pancreatic Cancer Research
 *Ronald L. Katz, M.D., Endowed Chair in Anesthesiology
 Chizuko Kawata Chair in Cardiology
 George F. Kneller Chair in Family Medicine
 Grace and Walter Lantz Endowed Chair
 Eleanor I. Leslie Chair in Neuroscience
 William P. Longmire, Jr., Chair in Surgery
 *Gordon and Virginia MacDonald Distinguished Chair in Human Genetics
 Charles H. Markham Chair in Neurology
 Della Martin Chair in Psychiatry
 *David May II Chair in Ophthalmology
 Sherman M. Mellinkoff Distinguished Professor in Medicine Endowed Chair
 James H. Nicholson Chair in Pediatric Cardiology
 *Albert F. and David H. Parlow-Soloman Chair for UCLA Program on Aging
 Samuel J. Pearlman, M.D., and Della Z. Pearlman Chair in Head and Neck Surgery
 Thomas P. and Katherine K. Pike Chair in Alcohol Studies
 Elizabeth R. and Thomas E. Plott Chair in Gerontology
 Edith Agnes Plumb Endowed Chair in Neurobiology
 Revlon Chair in Women's Health
 Leo G. Rigler Chair in Radiological Sciences
 Augustus S. Rose Chair in Neurology
 *Bernard G. Sarnat Endowed Chair in Craniofacial Biology
 Jennifer Jones Simon Chair in Radiation Oncology
 Norton Simon Chair in Biophysics
 Norman F. Sprague Chair in Molecular Oncology
 Fran and Ray Stark Foundation Chair in Digestive Diseases
 Fran and Ray Stark Foundation Chair in Urology

Frances and Ray Stark Chair in Ophthalmology
 Frances Stark Chair in Neurology
 Jules Stein Chair in Ophthalmology
 W. Eugene Stern Chair in Neurosurgery
 Ruth and Raymond H. Stotter Chair in Neurosurgery
 Bradley R. Straatsma, M.D., Endowed Chair in Ophthalmology
 Dorothy and Leonard Straus Chair in Gastroenterology in Memory of Gussie Borun
 Streisand Chair in Cardiology
 Leon J. Tiber, M.D., and David S. Alpert, M.D., Chair in Medicine
 Vernon O. Underwood Family Chair in Ophthalmology
 Richard D. and Ruth P. Walter Chair in Neurology
 Wasserman Professor of Ophthalmology

School of Nursing

Lulu Wolf Hassenplug Chair in Nursing
 *Audrienne H. Moseley Chair in Nursing

School of Public Health

Fred H. Bixby Chair in Population Policy
 Fred W. and Pamela K. Wasserman Chair in Health Services

School of Public Policy and Social Research

Marjorie Crump Chair in Social Welfare
 Harvey S. Perloff Chair

Appendix D

Distinguished Teaching Awards

Academic Senate Recipients

Each year the UCLA Alumni Association presents Distinguished Teaching Awards to five Academic Senate faculty members. The highly prized awards are presented at the annual UCLA Alumni Association Awards Ceremony, and selection of recipients is based on recommendations of the Academic Senate Committee on Teaching. Nominations are solicited from academic departments during Fall Quarter.

The Luckman Distinguished Teaching Awards Program was established in late 1991 after receipt of a generous gift from Harriet and Charles Luckman. Awards given for 1992 through 1997 were named the Luckman Distinguished Teaching Awards.

1961

John F. Barron (*Economics*)
 Hector E. Hall (*Physiology*)
 Kenneth N. Trueblood (*Chemistry and Biochemistry*)

1962

Charles W. Hoffman (*Germanic Languages*)
 Thomas P. Jenkin (*Political Science*)

Ken Nobe (*Chemical Engineering*)

1963

Carl W. Hagge (*Germanic Languages*)
Wendell P. Jones (*Education*)
Robert H. Sorgenfrey (*Mathematics*)
Saul Winstein (*Chemistry and Biochemistry*)

1964

Mostafa A. El-Sayed (*Chemistry and Biochemistry*)
Leon Howard (*English*)
Moshe F. Rubinstein (*Civil and Environmental Engineering*)

1965

E.A. Carlson (*Biology*)
W.R. Hitchcock (*History*)
Allen Parducci (*Psychology*)
William R. Romig (*Microbiology and Molecular Genetics*)

1966

George A. Bartholomew (*Biology*)
William P. Gerberding (*Political Science*)
Hans Meyerhoff (*Philosophy*)
Joseph E. Spencer (*Geography*)

1967

Basil Gordon (*Mathematics*)
J.A.C. Grant (*Political Science*)
William Matthews (*English*)
David S. Saxon (*Physics and Astronomy*)
E.K.L. Upton (*Physics and Astronomy*)

1968

Edward W. Graham (*Chemistry and Biochemistry*)
W. James Popham (*Education*)
Sydney C. Rittenberg (*Microbiology and Molecular Genetics*)
Robert P. Stockwell (*Linguistics*)
Fred N. White (*Physiology*)

1969

Robert J. Finkelstein (*Physics and Astronomy*)
Douglas S. Hobbs (*Political Science*)
J.E. Phillips (*English*)
Raymond M. Redheffer (*Mathematics*)
Margret I. Sellers (*Microbiology and Immunology*)

1970

Ehrhard Bahr (*Germanic Languages*)
Joseph Cascarano (*Biology*)
B. Lamar Johnson (*Education*)
Daniel Kivelson (*Chemistry and Biochemistry*)
Richard D. Lehan (*English*)

1971

Vernon E. Denny (*Chemical Engineering*)
Peter N. Ladefoged (*Linguistics*)
Arthur D. Schwabe (*Medicine*)
Duane E. Smith (*Political Science*)
Andreas Tietze (*Near Eastern Languages and Cultures*)

1972

Barbara K. Keogh (*Education*)
James N. Miller (*Microbiology and Immunology*)
David S. Rodes (*English*)
Ned A. Shearer (*Speech*)
Charles A. West (*Chemistry and Biochemistry*)

1973

Kirby A. Baker (*Mathematics*)
David Evans (*Chemistry and Biochemistry*)
Albert Hoxie (*History*)
Nhan Levan (*Electrical Engineering*)
Judith L. Smith (*Physiological Science*)

1974

Robert B. Edgerton (*Anthropology, Psychiatry and Biobehavioral Sciences*)
David S. Eisenberg (*Chemistry and Biochemistry*)
Victoria A. Fromkin (*Linguistics*)
Robert C. Neerhout (*Pediatrics*)
Andrea L. Rich (*Speech*)

1975

Alma M. Hawkins (*World Arts and Cultures*)
Morris Holland (*Psychology*)
Paul M. Schachter (*Linguistics*)
Stanley A. Wolpert (*History*)
Richard W. Young (*Neurobiology*)

1976

Marianne Celce-Murcia (*Teaching English as a Second Language and Applied Linguistics*)
Jesse J. Dukeminier (*Law*)
George R. Guffey (*English*)
Marilyn L. Kourilsky (*Education*)
Chand R. Viswanathan (*Electrical Engineering*)

1977

Michael J.B. Allen (*English*)
Henry M. Cherrick (*Dentistry*)
Richard C. Maxwell (*Law*)
J. William Schopf (*Earth and Space Sciences*)
Verne N. Schumaker (*Chemistry and Biochemistry*)

1978

William R. Allen (*Economics*)
Michael E. Jung (*Chemistry and Biochemistry*)
J. Fred Weston (*Management*)
Thomas D. Wickens (*Psychology*)
Johannes Wilbert (*Anthropology*)

1979

Ann L.T. Bergren (*Classics*)
Charles A. Berst (*English*)
Michael J. Goldstein (*Psychology*)
Richard L. Sklar (*Political Science*)

1989

John B. Garnett (*Mathematics*)
Kathleen L. Komar (*Comparative Literature, Germanic Languages*)
William G. Roy (*Sociology*)
Stephen Yenser (*English*)
Eric M. Zolt (*Law*)

1990

Peter M. Narins (*Physiological Science*)
Gary B. Nash (*History*)
John S. Wiley (*Law*)
Merlin C. Wittrock (*Education*)
Ruth Yeazell (*English*)

1991

Michael R. Asimow (*Law*)
Edward G. Berenson (*History*)
Robert A. Bjork (*Psychology*)
Margaret FitzSimmons (*Urban Planning*)
Kenneth R. Lincoln (*English*)

1992

Bruce L. Baker (*Psychology*)
Paul B. Bergman (*Law*)
Robert B. Goldberg (*Molecular, Cell, and Developmental Biology*)
Peter E. Kollock (*Sociology*)
Eugen Weber (*History*)

1993

Calvin B. Bedient (*English*)
 Richard B. Kaner (*Chemistry and Biochemistry*)
 Katherine C. King (*Classics*)
 William G. Ouchi (*Management*)
 Bruce Schulman (*History*)

1994

David A. Binder (*Law*)
 Jon P. Davidson (*Earth and Space Sciences*)
 Melvin Oliver (*Sociology*)
 Barbara L. Packer (*English*)
 E. Victor Wolfenstein (*Political Science*)

1995

Noriko Akatsuka (*East Asian Languages and Cultures*)
 Douglas Hollan (*Anthropology*)
 V.A. Kolve (*English*)
 Jerome Rabow (*Sociology*)
 Paul V. Reale (*Music*)

1996

Walter Allen (*Sociology*)
 Judith A. Carney (*Geography*)
 William M. Gelbart (*Chemistry and Biochemistry*)
 Phyllis A. Guzé (*Medicine*)
 Peter B. Hammond (*Anthropology*)

1997

Uptal Banerjee (*Molecular, Cell, and Developmental Biology*)
 Christine D. Gutierrez (*Education*)
 Susan McClary (*Musicology*)
 Arnold B. Scheibel (*Neurobiology, Psychiatry and Biobehavioral Sciences*)
 Ivan Szelenyi (*Sociology*)

1998

George W. Bernard (*Dentistry*)
 Verónica Cortínez (*Spanish and Portuguese*)
 Wayne A. Dollase (*Earth and Space Sciences*)
 Jayne E. Lewis (*English*)
 Joshua S.S. Muldavin (*Geography*)

1999

Grace Ganz Blumberg (*Law*)
 Alessandro Duranti (*Anthropology*)
 Richard H. Gold (*Radiological Sciences*)
 N. Katherine Hayles (*English*)
 Bernard Weiner (*Psychology*)

Non-Academic Senate Recipients

In spring of 1985, the Office of Instructional Development began sponsorship of awards to three instructors who are not members of the Academic Senate. This category includes lecturers and adjunct and clinical faculty members. All non-Academic Senate faculty members who are nominated by their departments are eligible. Recipients are selected by the Academic Senate Committee on Teaching, utilizing the same criteria as that used for Academic Senate members.

The Luckman Distinguished Teaching Awards Program was established in late 1991 after receipt of a generous gift from Harriet and Charles Luckman. Awards given for 1992 through 1997 were named the Luckman Distinguished Teaching Awards.

1985

L. Geoffrey Cowan (*Communication Studies*)
 Mary Elizabeth Perry (*History*)
 Linda Diane Venis (*English*)

1986

David Cohen (*Mathematics*)
 Johanna Harris-Heggie (*Music*)
 Paul Von Blum (*Interdisciplinary*)

1987

Carol D. Berkowitz (*Pediatrics*)
 Jeffrey I. Cole (*Communication Studies*)
 Cheryl Giuliano (*Writing Programs*)

1988

Jeanne Gunner (*Writing Programs*)
 Art Huffman (*Physics and Astronomy*)
 David G. Kay (*Computer Science*)

1989

S. Scott Bartchy (*History*)
 Bonnie Lisle (*Writing Programs*)
 Kenneth R. Pfeiffer (*Civil Engineering, Psychology*)

1990

Lisa Gerrard (*Writing Programs*)
 Andres Durstenfeld (*Biology*)
 Dorothy Phillips (*Physiological Science*)

1991

Marde S. Gregory (*Speech*)
 Betty A. Luceigh (*Chemistry and Biochemistry*)
 Cheryl Pfoff (*Writing Programs*)

1992

Janet Goodwin (*Teaching English as a Second Language and Applied Linguistics*)
 Janette Lewis (*Writing Programs*)
 Yihua Wang (*East Asian Languages and Cultures*)

1993

Stephen Dickey (*English*)
 Sondra Hale (*Anthropology*)
 Jutta Landa (*Germanic Languages*)

1994

Steven K. Derian (*Law*)
 Linda Jensen (*Teaching English as a Second Language and Applied Linguistics*)
 Shelby Popham (*Writing Programs*)

1995

Nicholas Collaros (*French*)
 Kristine S. Knaplund (*Law*)
 Christopher Mott (*English*)

1996

Scott Bowman (*Political Science*)
 Timothy Tangherlini (*Scandinavian Section*)
 G. Jennifer Wilson (*Honors and Undergraduate Programs*)

1997

William McDonald (*Film and Television*)
 Stuart Slavin (*Pediatrics*)
 Sung-Ock Sohn (*East Asian Languages and Cultures*)

1998

Paul Frymer (*Political Science*)
 George Gadda (*UCLA Writing Programs*)
 Julie Giese (*English*)

1999

Patricia Gilmore-Jaffe (*UCLA Writing Programs*)
 Emily Schiller (*English*)
 Scott Votey (*UCLA Emergency Medicine Center*)

Gold Shield Faculty Prize

The \$30,000 Gold Shield Faculty Prize, an award for academic excellence, was created by the Gold Shield Alumnae of UCLA in celebration of their fiftieth anniversary in 1986. The prize is funded by an endowment of \$250,000 raised by Gold Shield for this purpose, which has grown to over \$400,000. Guidelines provide that the prize "recognize and reward UCLA faculty members who have demonstrated extraordinary accomplishment in teaching and in research or creative activity...and who have made a significant contribution to undergraduate education." Preference for recipients is given to faculty members in mid-career who do not often receive the extra professional incentives available to distinguished senior faculty.

The Gold Shield Faculty Prize is awarded to each recipient for scholarly use. The awardee is selected every two years by a committee of peers appointed by the Academic Senate. Student and Gold Shield representatives are included. Recipients must come from fields that have undergraduate programs at UCLA.

1986-88

Michael E. Jung (*Chemistry and Biochemistry*)

1988-90

Patricia M. Greenfield (*Psychology*)

1990-92

Jeffrey C. Alexander (*Sociology*)

1992-94

J. William Schopf (*Earth and Space Sciences*)

1994-96

Albert R. Braunmuller (*English*)

1996-98

Peter M. Narins (*Physiological Science*)

1998-00

Robert B. Goldberg (*Molecular, Cell, and Developmental Biology*)
